4. Is productivity satisfactory?

The evaluation of a system or a procedure actually includes three separate considerations. First, is the system or procedure meeting all of the current requirements? Second, is it operating effectively? And third, what is the degree of effectiveness? To determine whether system or procedure is meeting current requirements, the following among other things, should be considered:

1. Is the system or procedure designed to promote achievement of the company's objectives, and is it accomplished effectively?
2. Does the system or procedure operate within the framework of the organisational structure?
3. Does the system or procedure adequately provide methods of control in order to obtain maximum performance with the least expenditure of time and effort?
4. Do the routines designated in the system or procedures indicate performance in logical sequence?
5. Does the system or procedure provide the means for effective coordination between one department and another?
6. Have all required functions been established?
7. Has the necessary authority been designated to carry out responsibilities?
8. Can any changes be made to improve effectiveness?

The important thing is to make sure that the system or procedure is designed to meet the desired results. One must determine what is actually done, as well as where, how, when, and by whom. Each individual step in the process must be studied and its effectiveness considered. At the same time, one must be constantly alert for possible improvements. While it may be difficult to determine a precise measurement of how effectively a system or procedure operates, the degree of effectiveness can be somewhat ascertained by checking on the activities from the standpoint of speed, accuracy and orderly flow of paper work. Do bottlenecks and delays occur from time to time the schedules, reports, or end results promptly completed and furnished on time? Are operations proceeding well or better than expected? What is the relationship between the volume of work and the number of employees performing the work, and how does it compare from month to month? The auditor must always be on the alert for possible defects and irregularities. He must check the activities with the instructions, to see if the instructions are properly complied with. All deviations must be called to the attention of the supervisor who is responsible for the proper adherence to instructions, and necessary corrective action taken. On occasions, due to some unusual circumstances, the auditor may find that good judgement often dictates some deviation from an instruction possibly to better achieve a desired objective. Management must be constantly alerted to the importance of systems and procedural function as an element of good organisation and management.

Differences between Financial and Operational Auditing - The major differences between financial and operational auditing can be described as follows:

- (i) **Purpose** - The financial auditing is basically concerned with the opinion that whether the historical information recorded is correct or not, whereas the operational auditing emphasizes on effectiveness and efficiency of operations for future performance.

19.44 Advanced Auditing and Professional Ethics

(ii) **Area** - Financial audits are restricted to the matters directly affecting the appropriateness of the presented financial statements but the operational auditing covers all the activities that are related to efficiency and effectiveness of operations directed towards accomplishment of objectives of organization.

(iii) **Reporting** -The financial audit report is sent to all stock holders, bankers and other persons having stake in the Organisation. However the operational audit report is primarily for the management.

(iv) **End Task** - The financial audit has reporting the findings to the persons getting the report as its end objective, however, the operational auditing is not limited to reporting only but includes suggestions for improvement also.

19.10 Management Audit Questionnaire

A management audit questionnaire is an important tool for conducting the management audit. It is through these questionnaires that the auditors make an inquiry into important facts by measuring current performance. Such questionnaires aim at a comprehensive and constructive examination of an organisation's management and its assigned tasks. Overall it is concerned with the appraisal of management actions in accomplishing the organisation's objectives. Its primary objective is to highlight weaknesses and deficiencies of the organisation. It includes a review of how well or badly the management functions of planning, organising, directing and controlling are being performed. The questionnaire provides a means for evaluating an organisation's ongoing operations by examining its major functional areas. There are three possible answers to the management audit questions: "Yes", "No" and "N.A.", (not applicable). Questionnaire comments on negative answers not only provide documentation for future reference, but, more important, provide background information for undertaking remedial action. The management audit questionnaire does not give answers, but simply asks questions. If all questions are answered with a 'yes', operations are proceeding as desired. On the other hand, if there are one or more 'no' answers, difficulties are being experienced and must be explained in writing. If the question does not apply, the N.A. (not applicable) column is checked. Thus, management audit questionnaire for this part of the audit not only serves as a management tool to analyse the current situation; more importantly, it enables the management auditors to synthesis those elements that are causing organisational difficulties and deficiencies.

APPENDIX

The following Standards on Internal Audit are recommendatory in nature. The Standards shall become mandatory from such date as notified by the council:

- SIA 1 : Planning an Internal Audit
- SIA 2 : Basic Principles Governing Internal Audit
- SIA 3 : Documentation.
- SIA 4 : Reporting
- SIA 5 : Sampling
- SIA 6 : Analytical Procedures
- SIA 7 : Quality Assurance in Internal Audit
- SIA 8 : Terms of Internal Audit Engagement.
- SIA 9 : Communication with Management
- SIA 10 : Internal Audit Evidence
- SIA 11 : Consideration of Fraud in an Internal Audit.
- SIA 12 : Internal Control Evaluation
- SIA 13 : Enterprise Risk Management
- SIA 14 : Internal Audit in an Information Technology Environment
- SIA 15 : Knowledge of the Entity and its Environment.
- SIA 16 : Using the Work of an Expert.
- SIA 17 : Consideration of Laws and Regulations in an Internal Audit.
- SIA 18 : Related Parties

Investigation and Due Diligence

20.1 Introduction

The term investigation implies a systematic and in-depth examination or inquiry to establish a fact or to evaluate a specific situation. In other words, investigation means inquiry into facts". Professional accountants are often required to investigate the accounts or the related matters and records of the enterprise. The term investigation may be defined as an examination of books and records preliminary to financing or for any other specified purpose, sometimes differing in scope from the ordinary audit. Thus, investigation covers areas of financing decisions, investment decisions, fraud or profitability determination or cost determination etc.

20.2 Audit versus Investigation

Investigation differs substantially from an audit assignment. Audit aims at collection of sufficient appropriate audit evidence to enable the auditor to form a judgement and express an opinion on the financial statements or other data under examination. An investigation, on

the other hand, requires special in-depth examination of the particular records or transaction with the objective of establishing a part or happening or assessing a particular situation. The scope of audit is broad based and general in nature whereas investigation is narrow and specific.

The difference is tabulated below:

Basis of Difference	Investigation	Audit
(i) Objective	An investigation aims at establishing a fact or a happening or at assessing a particular situation.	The main objective of an audit is to verify whether the financial statements display a true and fair view of the state of affairs and the working results of an entity.
(ii) Scope	The scope of investigation may be governed by statute	The scope of audit is wide and in case of statutory

	or it may be non- statutory.	audit the scope of work is determined by the provisions of relevant law.
(iii) Periodicity	The work is not limited by rigid time frame. It may cover several years, as the outcome of the same is not certain.	The audit is carried on either quarterly, half-yearly or yearly.
(iv) Nature	Requires a detailed study and examination of facts and figures.	Involves tests checking or sample technique to draw evidences for forming a judgement and expression of opinion.
(v) Inherent Limitations	No inherent limitation owing to its nature of engagement.	Audit suffers from inherent limitation.
(vi) Evidence	It seeks conclusive evidence.	Audit is mainly concerned with prima- facie evidence.
(vii) Observance of Accounting Principles	It is analytical in nature and requires a thorough mind, capable of observing, collecting and evaluating facts.	Is governed by compliance with generally accepted accounting principles, audit procedures and disclosure requirements.
(viii) Reporting	The outcome is reported to the person(s) on whose behalf investigation is carried out.	The outcome is reported to the owners of the business entity.

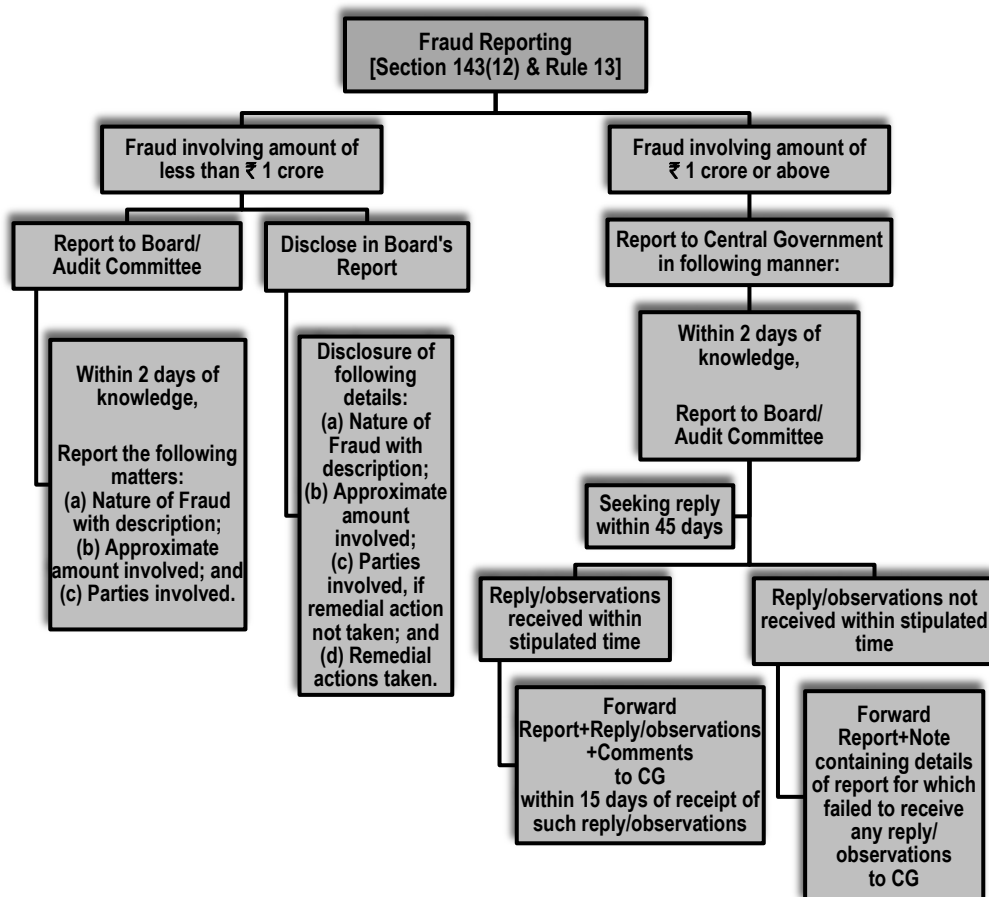

The approach to an investigation is different from that followed in an audit. An investigation involves a more detailed examination of the selected areas than what is required in an audit. An investigation seeks substantive and in some case even conclusive evidence as compared to audit which mainly relies on persuasive evidence.

An investigator does not accept a stated fact as correct until it is substantiated. An auditor, in the absence of suspicious circumstances, relies on stated facts or figures. An auditor has to see whether the method of valuation and other accounting policies have been properly made in the financial statements or not. An investigator, however, is not by accounting conventions, policies and disclosure requirements. An auditor does not suspect unless circumstances are there to arouse suspicion, while an investigator approaches the work with a frame of mind to suspect, verify and satisfy.

The auditor seeks to report what he finds in the normal course of examination of the accounts adopting generally followed techniques unless circumstances call for a special probe: fraud, error, irregularity, whatever comes to the auditor's notice in the usual course of checking, are all looked into in depth and sometimes investigation results from the prima facie findings of the auditor. However, sub section 12 of section 143 of the Companies Act, 2013 deals with the

20.3 Advanced Auditing and Professional Ethics

fraud reporting requirements which are discussed below:

- I. Reporting to the Central Government- As per sub-section (12) of section 143 of the Companies Act, 2013, if an auditor of a company in the course of the performance of his duties as auditor, has reason to believe that an offence of fraud involving such amount or amounts as may be prescribed, is being or has been committed in the company by its officers or employees, the auditor shall report the matter to the Central Government within such time and in such manner as may be prescribed.***

In this regard, Rule 13 of the Companies (Audit and Auditors) Rules, 2014 has been prescribed. Sub-rule (1) of the said rule states that if an auditor of a company, in the course of the performance of his duties as statutory auditor, has reason to believe that an offence of fraud, which involves or is expected to involve individually an amount of ₹ 1 crore or above, is being or has been committed against the company by its officers or employees, the auditor shall report the matter to the Central Government.

The manner of reporting the matter to the Central Government is as follows:

- (a) *the auditor shall report the matter to the Board or the Audit Committee, as the case may be, immediately but not later than 2 days of his knowledge of the fraud, seeking their reply or observations within 45 days;*
 - (b) *on receipt of such reply or observations, the auditor shall forward his report and the reply or observations of the Board or the Audit Committee along with his comments (on such reply or observations of the Board or the Audit Committee) to the Central Government within 15 days from the date of receipt of such reply or observations;*
 - (c) *in case the auditor fails to get any reply or observations from the Board or the Audit Committee within the stipulated period of 45 days, he shall forward his report to the Central Government along with a note containing the details of his report that was earlier forwarded to the Board or the Audit Committee for which he has not received any reply or observations;*
 - (d) *the report shall be sent to the Secretary, Ministry of Corporate Affairs in a sealed cover by Registered Post with Acknowledgement Due or by Speed Post followed by an e-mail in confirmation of the same;*
 - (e) *the report shall be on the letter-head of the auditor containing postal address, e-mail address and contact telephone number or mobile number and be signed by the auditor with his seal and shall indicate his Membership Number; and*
 - (f) *the report shall be in the form of a statement as specified in Form ADT-4.*
- II. Reporting to the Audit Committee or Board - Sub-section (12) of section 143 of the Companies Act, 2013 further prescribes that in case of a fraud involving lesser than the specified amount [i.e. less than ₹ 1 crore], the auditor shall report the matter to the audit committee constituted under section 177 or to the Board in other cases within such time and in such manner as may be prescribed.**
- In this regard, sub-rule (3) of Rule 13 of the Companies (Audit and Auditors) Rules, 2014 states that in case of a fraud involving lesser than the amount specified in sub-rule (1) [i.e. less than ₹ 1 crore], the auditor shall report the matter to Audit Committee constituted under section 177 or to the Board immediately but not later than 2 days of his knowledge of the fraud and he shall report the matter specifying the following:*
- (a) *Nature of Fraud with description;*
 - (b) *Approximate amount involved; and*
 - (c) *Parties involved.*
- III. Disclosure in the Board's Report: Sub-section (12) of section 143 of the Companies Act, 2013 furthermore prescribes that the companies, whose auditors have reported frauds under this sub-section (12) to the audit committee or the Board, but not reported to the Central Government, shall disclose the details about such**

20.5 Advanced Auditing and Professional Ethics

frauds in the Board's report in such manner as may be prescribed.

In this regard, sub-rule (4) of Rule 13 of the Companies (Audit and Auditors) Rules, 2014 states that the auditor is also required to disclose in the Board's Report the following details of each of the fraud reported to the Audit Committee or the Board under sub-rule (3) during the year:

- (a) Nature of Fraud with description;*
- (b) Approximate Amount involved;*
- (c) Parties involved, if remedial action not taken; and*
- (d) Remedial actions taken.*

No duty to which an auditor of a company may be subject to shall be regarded as having been contravened by reason of his reporting the matter above if it is done in good faith.

It is very important to note that the provision of this rule shall also apply, mutatis mutandis, to a cost auditor and a secretarial auditor during the performance of his duties under section 148 and section 204 respectively. If any auditor, cost accountant or company secretary in practice do not comply with the provisions of sub-section (12) of section 143, he shall be punishable with fine which shall not be less than one lakh rupees but which may extend to twenty-five lakh rupees)

Case Study

Intelligent Ltd. entered into an agreement with Mr. Intellectual on 15th March, 2016, whereby it agreed to pay him ₹ 2 lakhs per month as retainership fee for consultation in IT department. However, no amount was actually paid and ₹ 24 lakhs was provided in the Statement of Profit and Loss for the year ending on March 31st, 2016.

Management of the company uttered that need-based consultation was obtained throughout the year. However, on investigation, no documentary or other evidence of receipt of such service was found. As the auditor of Innocent Ltd., what would be your approach?

Provisions and Explanation: As per SA 240 on "The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements", fraud can be committed by management overriding controls using such techniques as recording fictitious journal entries, particularly close to the end of an accounting period, to manipulate operating results or achieve other objectives.

In the given case, Intelligent Ltd. has entered into an agreement with Mr. Intellectual, at year-end, for consultation in IT department. It also charged yearly fee of ₹ 24 lakhs in the Statement of Profit and Loss, however, no documentary or other evidence of receipt of such service was found, on investigation. It is clear that company has passed fictitious journal entries, near year-end, to manipulate the operating results.

Accordingly, the auditor would adopt the approach which will be based on the result of misstatement on the basis of such fictitious journal entry, i.e. if, as a result of a misstatement

resulting from fraud or suspected fraud, the auditor encounters exceptional circumstances that bring into question the auditor's ability to continue performing the audit, the auditor shall determine the professional and legal responsibilities applicable in the circumstances, including whether there is a requirement for the auditor to report to the person or persons who made the audit appointment or, in some cases, to regulatory authorities; or the auditor may consider for appropriateness of withdrawal from such engagement, where withdrawal from the engagement is legally permitted.

In addition, the auditor is required to report according to section 143(12) of the Companies Act, 2013. As per Section 143(12), if an auditor of a company, in the course of the performance of his duties as auditor, has reason to believe that an offence involving fraud is being or has been committed against the company by officers or employees of the company, he shall immediately report the matter to the audit committee within 2 days of his knowledge (as amount involved is less than one crore rupees) and after following the prescribed procedure such as reporting on : Nature of Fraud with description; (ii) Approximate amount involved; and (iii) Parties involved etc.

20.3 Steps in Investigation

As investigation involves a variety of situations, it is not possible to lay down any standardised procedure. However, usually, an investigation requires the following steps in order of sequence:

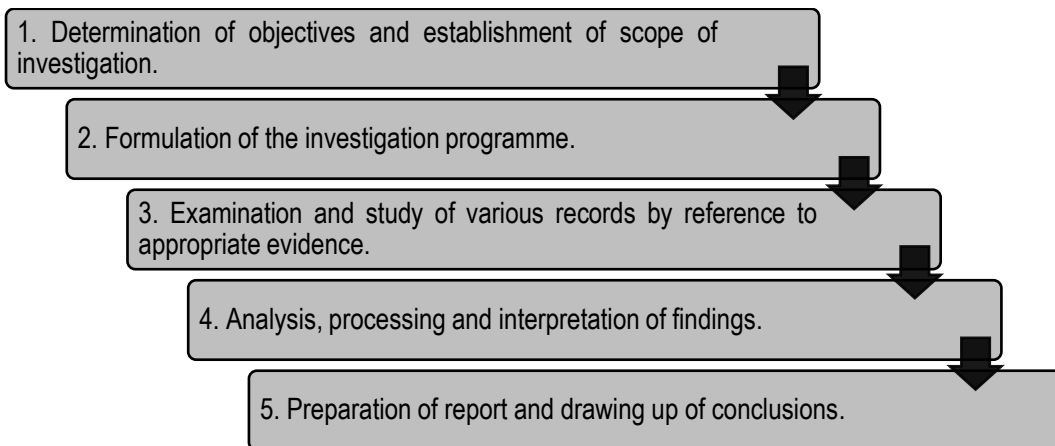

Diagram showing Sequence of Steps for Investigation

Now let us study each of these steps in detail.

20.3.1 Determination of objectives and establishment of scope of investigation

At the stage of acceptance of the assignment, the investigator should be absolutely clear about what is sought to be achieved by the investigation. If instructions from the client leave matters vague and non-specific, it would be proper for the investigator to have the matters discussed and obtain clearly written instructions covering the object and the scope of investigations and the issues incidental thereto.

20.7 Advanced Auditing and Professional Ethics

The period which the investigation should cover should be clearly specified. The results of investigation are often seriously affected owing to change in circumstances which have occurred since it was contemplated, e.g., devaluation, import restrictions, starting of a new division, etc. Therefore, the purpose of the investigation should be borne in mind while determining the period which an investigation should cover.

20.3.2 Formulation of the investigation programme

It is not possible to draw up one programme to serve different types of investigations which a professional accountant is called upon to carry out, for their scope and content have to be determined on a consideration of circumstances peculiar to each business or situation. The investigation programme should be drawn up having regard to the nature of the business, the structure of business, the instructions from the client embodying the objectives, the consequent scope and depth and the necessity to extend the investigation into books and records belonging to others. The programme should also be flexible so that knowledge gained with the progress of work can be used to extend, reduce or modify the extent and areas of checking.

In programming the verification, the investigator should concentrate on areas considered relevant rather than to undertake a wide-ranging verification. For example, in an investigation on suspected payment of wages to ghost workers, the investigator should scan the areas having a bearing on the determination of wages and payments thereof. He should concentrate on time and job cards, appointment and termination of workers, attendance records, internal controls, internal checks, and preparation of wage sheets, withdrawal of money from bank for payment of wages and the actual disbursement of wages. A conscious effort in investigation programming should be devoted to localise the enquiry into the relevant areas and, for that purpose, the initial wider base of inquiry should be gradually narrowed and fixed at a level that is meaningful. Matters not found to have a bearing on the subject matter of investigation should be gradually and progressively eliminated. This procedure alone will enable an in-depth examination of the matters relevant to the investigation.

20.3.3 Collection of Evidence

Through examination, the investigator would be gathering relevant evidence connected with the matters to be investigated. In the course of examination of the documents and records, the investigator may require to obtain oral explanations from various personnel of the concerned business. In case his client is a person external to the business, it may be necessary for the investigator to get the matter formally agreed to by the business through the client. The investigator should look for the most convincing evidence; he should seek and examine all the available evidence and by a process of elimination and corroboration, should endeavour to reach at the truth of the matter. He, unlike the auditor, is not to restrict himself to *prima facie* evidence ordinarily available. He should examine it and if circumstances demand should try to obtain evidence that may have to be specifically procured. For example, in the matter of valuation of land, he should definitely have regard to the available evidence as per records of the business and records of any bid received for the land. In addition, he should have regard to the prices at which land was sold or purchased in the neighbourhood around the same time.

This may require him to obtain evidence even by going to the land registration office. He may also call for the report of experts in land valuation.

20.3.4 Analysis and Interpretation of Findings

Careful analysis and correlation of facts and figures will be necessary before the investigator can reach his conclusion. The conclusion should be well reasoned and backed by established facts and data. He must analyse the data objectively on the basis of evidence gathered by him and should not draw conclusions according to pre-conceived notions. While interpreting the figures, the investigator must keep in mind various factors e.g. the political and economic considerations, competition faced by the business, historical pattern of the data, nature of the business, etc.

20.3.5 Reporting of findings

Like all other work of an accountant, an investigation results in a report. It is submitted and addressed to the party at whose instance the investigation has been carried out. The nature of the report is governed mainly by two factors. First, the instructions given by the client as regards the special aspects of the business which are required to be investigated; and second, the findings of the investigating accountant. The important issues to be kept in mind by the investigator while preparing his report are as follows:

- (i) The report should not contain anything which is not relevant either to highlight the nature of the investigation or the final outcome thereof.
- (ii) Every word or expression used should be properly considered so that the possibility of arriving at a different meaning or interpretation other than the one intended by the investigator can be minimized.
- (iii) Relevant facts and conclusions should be properly linked.
- (iv) Bases and assumptions made should be explicitly stated. Reasonableness of the bases and assumptions made should be well examined and care should be taken to see that none of the bases and assumptions can be considered to be in conflict with the objective of the investigation. For example, in an investigation into over-stocking of raw materials, inventories and spares etc. it should not be assumed that the ordering levels indicated on bin cards provide fair guidance about acquisition of further materials. Also, since investigation is a fact finding assignment, assumptions should be made only when it is unavoidably necessary.
- (v) The report should clearly spell out the nature and objective of the assignment accepted its scope and limitations, if any.
- (vi) The report should be made in paragraph form with headings for the paragraphs. Any detailed data and figures supporting any finding may be given in Annexures.
- (vii) The report should also state restrictions or limitations, if any, imposed on the instructions given by the client. Preferably the reasons for placing such restrictions and their impact on the final result should also be stated.
- (viii) The opinion of the investigator should appear in the final paragraph of the report.

20.9 Advanced Auditing and Professional Ethics

Due to non-availability of standardised procedure and lack of professional guidance, investigation calls for extreme care, caution and circumspection on the part of the investigator in exercising his judgement and discretion. Investigation often has a characteristic of very intimate and direct involvement of parties whose interest may be affected. Therefore, unlike auditing, chances of one or the other of the parties challenging the finding of the investigation are far greater.

20.4 Special Issues in Investigations

Investigations broadly range between two extremes; on the one hand there are those in respect of which complete accounts, documents, records and other information are available, and on the other, those in respect of which little information, besides published accounts and statistical data, is available. Then again, investigation may cover the whole of accounting or may relate to only a part or parts of accounting as may be specified. Some more issues often arise in investigation. They are stated below:

(a) Whether an investigator is required to undertake a cent per cent verification approach or whether he can adopt selective verification - The answer to this question depends on the exact circumstances of the case under investigation. If the investigator has to establish the amount of cash defalcated by the cashier, he has probably no option but to carefully examine all the cash vouchers and related transactions. On the other hand, if he is to arrive at the profitability of a concern, he may verify constituent transactions on a selective basis taking extreme care to see that no material transaction that affects profit has remained concealed from his eyes. In investigation, it is always safer to go by statistically recognised sampling methods than to depend on the so-called "test checks" where circumstances permit selective verification.

(b) Whether the investigator can put reliance on the already audited statement of account - Here also no dogmatic views are possible. If the investigation has been launched because of some doubt in the audited statement of account, no question of reliance on the audited statement of account arises. However, if the investigator has been requested to establish value of a business or a share or the amount of goodwill payable by an incoming partner, ordinarily the investigator would be entitled to put reliance on audited materials made available to him unless, in the course of his test verification, he finds the audit to have been carried on very casually or unless his terms of appointment clearly require to test everything afresh. It was held in the case of *Short & Compton v. Brackert (1904)* that an accountant, when making an investigation for an incoming partner, was entitled to assume that the figures appearing in the books were correct. In another case, *Mead v. Ball Baker & Co. (1911)*, it was held that an accountant, when acting as an adviser to a proposed investor in a limited company, was not expected to check errors in stock sheets and the omission of liabilities. These cases were decided long time ago. Therefore, much reliance cannot be placed on them. It is, therefore, desirable for the investigator to ascertain from the client, in advance, in writing, whether the audited statements of account produced to him should be taken as correct.

If the statements of account produced before the investigator were not audited by a qualified accountant, then of course there arises a natural duty to get the figures in the accounts properly checked and verified. However, when the accounts produced to the investigator have been specially prepared by a professional accountant, who knows or ought to have known that these were prepared for purposes of the investigation, he could accept them as correct relying on the principle of liability to third parties settled in the famous Hedley Byrne's case. Nevertheless, it would be prudent to see first that such accounts were prepared with objectivity and that no bias has crept in to give advantage to the person on whose behalf these were prepared.

(c) Whether an investigator necessarily requires assistance of expert - Often an investigator may feel the necessity of obtaining views and opinions of experts in various fields to properly conduct the investigation. It would be therefore, proper for the investigator to get the written general consent of his client, to refer special matters for views of different experts; at the beginning it and he should settle the question of costs for obtaining the views and other related implications.

(d) Investigation out of disputes and conflicting claims - Cases for investigation sometimes arise out of disputes and conflicting claims. It is needless to emphasise that the investigator should remain above disputes or conflicting claims and be alert to the possibilities of the information or documents made available to him to be prejudiced. Even the client, overtly or covertly, may try to influence his reports. A seller of a business or controlling shares may request him to see that he gets the most favourable price. Similarly, if he is appointed by the buyer, he may be requested to deliberately depress the value. The investigator should keep him scrupulously professional and should keep the interest of all the involved parties in view. This is a challenging task and probably no other professional work offers this much of challenge. This work is exciting too and requires not only the best of skill but of a high degree of maturity and experience.

(e) Basis of opinion of an investor- The investigator should refrain from issuing speculative opinion. He should confine his opinion to the established facts and nothing more. If the facts, as conveyed through the books, records, papers and other evidence, are not capable of being properly established, he should not express an opinion or, if at all he expresses any opinion, he should qualify the opinion appropriately. This problem may particularly arise in cases where incomplete books and records are produced for investigation.

(f) Whether an investigator can make futuristic statements - The investigator should refuse to be futuristic. He may assume that the established trend in the business will continue in the near future, in the absence of any contrary evidence, in arriving at the present value of a business. He, however, should not project the trend into any future years to establish a value.

(g) Whether to retain working papers or not - Another important precaution is that the investigating accountant should retain, on his files full notes of the work carried out, copies of schedules and all working papers, record of conversations and the like. Also the working papers should link up the figures shown by the books of business with the final figures produced by the accountant. In the absence thereof, he would not be able to explain the figures when he is called upon to give evidence in a court of law to support his figures; for

20.11 Advanced Auditing and Professional Ethics

quite often the conclusions of the accountant are challenged by parties whose interest is adversely affected by his findings, for example, when the value of shares of a company taken over by the Government has been determined by him. This will also be of immense help to the investigator in correlating facts and events and later in drafting the report.

20.5 Special Aspects in Connection with Business Investigations

We discuss below the factors to be considered by a professional accountant while carrying out the investigation for attaining satisfactory results:

(a) Studying the overall picture - In such a business investigation, it is of utmost importance first to have an overall picture of the position of the business which is being investigated before the details are gone into. This is because figures are only symbols; and it is impossible to interpret them intelligently without knowledge of the background in which they have emerged. For instance, for investigating the accounts of a group of companies, it would not be possible to know the manner in which the profits had emerged in the past unless a chart is prepared, showing the relationship of different companies comprising the group; whether as subsidiaries or not, the nature of transactions entered into by one unit in the group with another or others and the terms on which this has been done. Further, it is important to know whether the business is engaged in the manufacture of one or two important lines of products, is principally processing materials or is concerned only with the sale of a single product. Also, whether it is a business which depends for its success on imported raw materials or supply of parts and components from ancillary businesses or uses indigenous materials and parts which are manufactured locally. If the business is labour - intensive, its future profitability would be dependent on availability of skilled labour and relations of the management with the trade unions. Labour relations thus can affect the future profitability of the business. The method of distribution of products, either through wholesalers or retailers also must be examined. Apart from these preliminary enquiries, the investigating accountant should study:

- (i) the character of management;
- (ii) the economic and political forces to which the business is subject; and
- (iii) the position it enjoys in trade.

At times, political or economic factors also may affect the fortunes of a business; for example, labour disturbances, changes in government policies in the matter of levy of excise and custom duties, imports, etc. It is, therefore necessary that the impact of all these factors should be studied and their effect on the business judged on a consideration of the profits in the past. For studying the economic and financial position of the business, the following should be considered:

- (i) The adequacy or otherwise of fixed and working capital. Are these sufficient for the growth of the business?
- (ii) What will be the trend of the sales and profits in the future? Establishing the trend of sales, product-wise and area-wise will ordinarily help in drawing a conclusion on whether the trend will be maintained in the future.

- (iii) Whether the profit which the business could be expected to maintain in the future would yield an adequate return on the capital employed?

For finding answers to all these questions, the Statement of Profit and Loss and the Balance Sheets of the concern for the past several years should be examined.

(b) Statement of Profit and Loss - To study the Statement of Profit and Loss of a concern, it is necessary to consider each item, included therein, in relation to the corresponding items in the Statement of Profit and Loss of the previous years. It is therefore, necessary that a summary, in a columnar form, should be prepared of the balances included in the Statement of Profit and Loss of the business for a period, say of 5 to 7 years.

In the foregoing summary, in the place of figures of opening and closing inventories, the figures of inventory consumed in different years should be entered. It should also be verified that the inventories have been valued on a consistent basis throughout the period under review. If there has been a change, the values of inventories should be adjusted. Further, in the summary, the gross profit ratios and the ratios showing the relationship between various items of expenses and sales should be entered. The trend of these ratios should be examined and, if there is a wide divergence in them, an explanation for the same should be sought. In the preparation of the summary attention should also be paid to the following matters:

Turnover - The figures of sales should be broken down between the various products sold to show variations in turnover of individual products from year to year. In this way, it would be possible to find out the products the sales of which have been increasing and those the sales of which have been falling. Further, by reference to the list of customers, in the Order Books, it should be ascertained whether the business has a very large turnover with a few customers or a small turnover with several customers. The Order Books should also be examined to find out if fictitious sales have been entered in any year to boost up profits. If so, the figures of sales of the year or years should be adjusted. If the business consists of activities which are dissimilar in operation, like manufacturing and agency, then apart from splitting the income between the two sources, expenses should also be apportioned between them to separately arrive at the figures of profit from each of the activities.

Wage structure - The method of computing wages and the rates of wages should be examined. On occasions a business may have to pay higher wages than those prevailing in other business in the same neighbourhood in pursuance of an industrial award. Another factor which is important to consider in this connection is the relationship of the business with its workers. A business which has suffered several industrial disputes, strikes, etc. and has had its working interrupted by them frequently cannot be expected to prosper unless a proper settlement is reached with workers' unions.

Depreciation - The charge on account of depreciation and maintenance of machinery and other assets included in the accounts of different years should be compared to verify that depreciation has been provided from year to year on a consistent basis and that it is adequate. Also, the necessary adjustment in the depreciation charge should be made if it is the practice of the company to write off the assets on a renewal basis. Further, if assets have been revalued, it should be confirmed that depreciation on the increased valuation has been adjusted. Generally, with age, the cost of maintenance of assets should increase. If it has not,

20.13 Advanced Auditing and Professional Ethics

the reason thereof should be ascertained. In case of leasehold property, it should be ascertained whether an adequate provision has been made for the dilapidation charge which may be payable at the end of the lease. Further, compliance of relevant AS should also be verified.

Managerial Remuneration - It should be verified that the remuneration payable to various members of managerial personnel is not excessive in relation to the profits of the business after taking into account the time devoted by each of them. However, it could also be that no or only a nominal remuneration has been charged in the accounts. In either case, an adjustment should be made to arrive at true profitability of the concern. Further, in case of company, requirement of relevant section of Companies Act, 2013 is to be seen. It has to be assured that calculation of profit for arriving at the remuneration is correct.

Exceptional and non-recurring items - It is customary to adjust exceptional items in the summary of Statement of Profit and Loss in order that they may not obscure the trend of the profits. In the matter of non-recurring items, it is necessary to remember that adjustments are to be made in respect of exceptional items which do not recur from year to year or can be considered exceptional having regard to their materiality or periodicity. In this connection, it is worthwhile to examine the income tax assessment orders of the business to find out the items which have been treated as revenue but have been regarded by the taxing authority as inadmissible. Where the effect of these has been abnormal on the tax paid by the company from year to year, suitable adjustments should be made in the figures of taxes paid, as well as in the assets amounts. Likewise, adjustments should be made in respect of exceptional profits and losses.

Repairs and maintenance - It is one of the recurring expenses of a business. Occasionally it is noticed that this expenditure is unduly heavy in some of the years, while quite low in some others. Generally, companies, as a matter of routine undertake major repairs, overhauls and maintenance programme at an interval of 3 or 4 years while running repairs and maintenance continue in the usual manner which gives rise to fluctuating charges in the accounts unless periodic major expenses are treated as deferred expenditure. Besides, due to wrong allocation of expenses between capital and revenue, repair charges may appear to be heavy or low. If fluctuating and abnormal charges for repairs is noticed, it would be the duty of the investigating accountant to scrutinise this head thoroughly to establish correct and normal charge for repairs.

Unusual year - A company's record of profitability may show a trend of increasing or decreasing profit or loss or it may be highly erratic and fluctuating. Where a definite trend is discernible, the job of the investigating accountant is somewhat simplified. He can adopt recent years' record of profitability as the basis for estimating future maintainable profit having regard to the inflationary state in the economy. But if the same is fluctuating, there would be more demand on judgement of the accountant in selecting the period to be covered for estimation of profitability. In such cases it may even be necessary to take into consideration

results of past 9 to 10 years with a view to iron out the fluctuation. If, however, it is noticed that results of one or more years under scrutiny were materially vitiated by exceptional factors like a long term industrial dispute, natural calamities, fire, war, ravage etc., the investigating accountant should eliminate such year / years from consideration altogether since they do not reflect the results obtained through normal business.

(c) Balance Sheet

Fixed Assets - Fixed assets, usually, are shown in accounts at cost less depreciation but the accounts do not show the ages of different assets. It is desirable, therefore, to obtain age analysis of various items of fixed assets. Assets which are old or are obsolete would naturally have to be replaced. It should be seen that their values are not in excess of the value of service that they could be expected to render to the business during the balance period of their active life and the amount they would fetch on sale as scrap.

In addition, from a study of the maintenance expenses incurred from year to year, it should be judged whether the assets have been properly maintained. If not, it might be necessary to incur heavy expenditure on repairs to put them in a proper working order. In such a case, an allowance for this factor should be made in the value of assets. More particularly, it should be seen that if assets have been revalued, the increased depreciation charge has been adjusted against profit. Para 10 of the Guidance Note on 'Treatment of Reserve created on Revaluation of Fixed Assets' states that when a company has created revaluation reserve by revaluation of fixed assets and the company has charged the additional depreciation to Statement of Profit and Loss, it is possible to transfer an amount equivalent to accumulated additional depreciation from the revaluation reserve to Statement of Profit and Loss or General Reserve as the case may be. Further, investigator has to assure whether assets whose recoverable amount is less than carrying amount are impaired and requirement of AS 28, "Impairment of Asset", has been complied.

Investments - Investments should be broadly classified into long term investments and current investments. A current investment is by its nature readily realisable and is intended to be held for not more than one year. All other investments are long term investments. Current investments are valued on the basis of lower of cost and fair value determined either on an individual investment basis or by category of investment but not on an overall basis. Long-term investments are usually carried at cost. However, when there is a permanent decline in the value of long-term investments, the carrying amount should be reduced to recognise the decline. The carrying amount of long term investments is determined on an individual investment basis. Interest, dividends and rentals receivable in connection with investment are generally regarded as income. However in some cases, such receipts represent recovery of cost and should therefore be reduced from, the cost of investment (e.g. dividend out of pre-acquisition profits).

Inventories-It should be seen that inventories have been valued consistently and that the basis of valuation was such that the value placed on inventories did not include any element of profit. Also, there should be due allowance for damaged, obsolete and slow moving inventories.

20.15 Advanced Auditing and Professional Ethics

Trade Receivables - In assessing their value, the following should be taken into account:

- (i) Whether bad debts have been adjusted in the years in which the relevant sales took place instead of in the year in which they have been written off. Normally, such an adjustment should be made but not when debts have had to be written off on account of a slump or a fall in international prices, during a period subsequent to the period in which sales had taken place.
- (ii) The length of the credit period allowed throughout the period under investigation, to determine whether it has been necessary to increase continually the credit period in order to effect the sales. If it has been so, it would indicate that the demand for the goods manufactured by the concern in the market has been diminishing gradually.
- (iii) Debts should be classified according to their age. This would disclose the character of the parties with whom the company trades and the amount of working capital that will be necessarily blocked on this account in the course of business.

Other liquid assets - It should be ascertained that the assets so described are readily realisable. Money with a bank in liquidation should be taken only to the extent guaranteed by Deposit Insurance Scheme.

Idle assets - On a scrutiny, it may appear that certain assets are remaining idle and are not being properly applied in the business. These may come from all sections of assets. For example, certain plant and machinery may have been put to use after a considerable period of time after acquisition. Some of the fixed assets may be awaiting installation even at the valuation time. The company may hold large cash and bank balances, not warranted by the need of the business. Then again, there may be instances of obsolete and slow moving inventories of large value in the accounts of the company. It would be the duty of the investigating accountant to eliminate these idle assets, if any, after proper identification from the net worth of the business. However, proper value of these assets may be separately added to the value of the business.

Liabilities - The important matter to investigate in this regard is whether those are stated fully or understated or overstated. In other words, whether the profits of the business have been inflated by suppression of liabilities or there are any free reserves included in the liabilities. In either case, an adjustment would be necessary. Secondly, it should be ascertained that liabilities are not unduly large or are not outstanding for a long time, in such cases, it would be necessary to pay off some of them which would cause a drain on the liquid resources of the concern. The fact should be stated in the report.

Taxation - Orders in respect of assessments completed should be studied and it should be verified that an adequate provision has been made in respect of liabilities for taxes which have not been assessed. Also, it should be seen that in the past there has been no reopening of assessments. If so, the company may be liable for an undisclosed sum of taxes plus penalties. Any temporary tax benefit should also be disregarded.

Capital - In this regard, it is necessary to ascertain:

- (i) Whether the capital is well balanced. This would not be the case if the amount of debentures and preference share capital are disproportionately large as compared to the equity capital, for this would be a handicap to the company in raising further equity capital, on favourable terms for financing the business or to pay off capital commitment. Further, when the capital is highly geared, it would affect the value of the equity capital;
- (ii) That the amount of capital is reasonable compared to the value of fixed assets and the amount of working capital required. The terms associated with the issue of the capital should also be studied; restriction on transferability of shares usually depresses the value of share and of the business.

(d) Interpretation of figures -

Fixed Assets - The amount of capital expenditure which would be necessary in the future for the continuation of the business, in its existing stage, should be assessed having regard to the under-mentioned factors:

- (i) the amount required for the replacement of assets when these would become worn out or obsolete;
- (ii) the expenditure which will be necessary to replace obsolete machinery by more sophisticated machinery for manufacturing different types of goods for which there is demand.

Turnover - In assessing the turnover which the business would be able to maintain in the future, the following factors should be taken into account:

- (i) **Trend:** Whether in the past sales have been increasing consistently or they have been fluctuating. A proper study of this phenomenon should be made.
- (ii) **Marketability:** Is it possible to extend the sales into new markets or that these have been fully exploited? Product wise estimation should be made.
- (iii) **Political and economic considerations:** Are the policies pursued by the Government likely to promote the extension of the market for goods to other countries? Whether the sales in the home market are likely to increase or decrease as a result of various emerging economic trends?
- (iv) **Competition:** What is the likely effect on the business if other manufacturers enter the same field or if products which would sell in competition are placed on the market at cheaper price? Is the demand for competing products increasing? Is the company's share in the total trade constant or has it been fluctuating?

Working Capital - In making assessment of the working capital requirements in the future, the following matters should be taken into account:

- (i) Has the ratio of inventory to turnover been increasing and if so, is it a continuing or only a temporary trend?

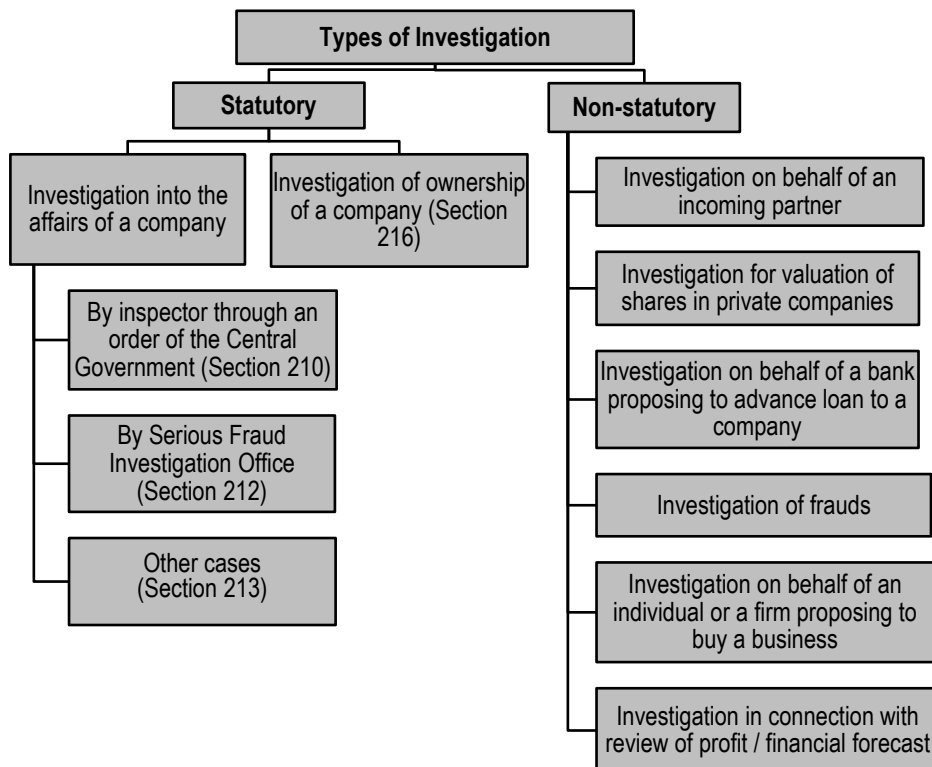

20.17 Advanced Auditing and Professional Ethics

- (ii) Are the trade payables being paid promptly or is there a backlog which will have to be dealt with?
- (iii) What will be the effect on inventory, trade receivables and trade payables, if the turnover is increased or if new products are introduced?

Estimating future maintainable profits - Fluctuations in profits during the years under review should be examined after adjusting the profits for extraneous factors, if any, that had given rise to fluctuations to determine whether the factors responsible for the fluctuations were temporary or was likely to recur in future. A statement should be prepared showing separately the profits after depreciation earned in each of the years during the period under review, after making adjustments therein, if considered necessary, as regards factors which have been responsible for any extraordinary increase in profits. If the percentage of profits before taxation to capital has been stable or has been increasing, it would indicate that the business would continue to earn the same rate of profit as it has done in the past. If, on the other hand, the percentage has been falling, and there is no evidence that the factors responsible therefore have ceased to operate, investment of further capital in the business would not be commercially advisable.

20.6 Types of Investigation

The different types of investigation that a chartered accountant is usually called upon to carry out are given hereunder:

Statutory - By an inspector under Sections 210, 212, 213 and 216 of the Companies Act, 2013.

Non-statutory - These are listed as under:

- (a) Investigation on behalf of an incoming partner.
- (b) Investigation for valuation of shares in private companies.
- (c) Investigation on behalf of a bank proposing to advance loan to a company.
- (d) Investigation of frauds.
- (e) Investigation on behalf of an individual or a firm proposing to buy a business.
- (f) Investigation in connection with review of profit/financial forecast.

20.6.1 Investigation under the Companies Act, 2013

Investigation under the Companies Act, 2013 may broadly be classified into:

- (A) Investigation into the affairs of a company; and
- (B) Investigation of ownership of a company.

(A) Investigation into the affairs of a company: This may further be divided into three parts:

- (1) Investigation into the affairs of a company by inspector through an order of the Central Government as envisaged under Section 210.
- (2) Investigation into the affairs of a company by Serious Fraud Investigation Office as prescribed under Section 212.
- (3) Investigation into the affairs of a company in other cases as provided under Section 213.

(1) Investigation into the affairs of a company as envisaged under Section 210: Where the Central Government is of the opinion, that it is necessary to investigate into the affairs of a company-

- (a) on the receipt of a report of the Registrar or inspector;
- (b) on intimation of a special resolution passed by a company that the affairs of the company ought to be investigated; or
- (c) in public interest,

it may order an investigation into the affairs of the company.

Further, where an order is passed by a court; or the Tribunal requiring investigation, the Central Government shall order an investigation into the affairs of that company.

For the above purposes, the Central Government would appoint one or more persons as inspectors to investigate into the affairs of the company and to report thereon in such manner as the Central Government may direct.

20.19 Advanced Auditing and Professional Ethics

(2) Investigation into the affairs of a company by Serious Fraud Investigation Office under Section 212: The Central Government may, by an order, assign the investigation, into the affairs of the company, to the Serious Fraud Investigation Office, when it considers necessary to investigate into the affairs of the company, on receipt of a report of the Registrar or inspector; or on intimation of a special resolution passed by a company; or in public interest; or on request from the Department of the Central Government, or a State Government.

Where the Central Government assign any case to the Serious Fraud Investigation Office for investigation under this Act, no other investigating agency of Central Government or any State Government shall proceed with investigation in such case. The Serious Fraud Investigation Office shall follow the manner and procedure as provided and submit its report to the Central Government. The Central Government may also direct to submit an interim report.

(3) Investigation into the affairs of a company in other cases as provided under Section 213*: The Tribunal may order investigation into affairs of the company, on an application received by specified number of members and supported by such evidence; or on an application made to it by any other person or otherwise, if it is satisfied that there are circumstances like, the business of the company is being conducted with intent to defraud its creditors, or that the company was formed for any fraudulent or unlawful purpose, or the members of the company have not been given all the information with respect to its affairs, etc. The investigation may be ordered, after giving a reasonable opportunity of being heard to the parties concerned.

It may be noted that if after investigation it is proved that—

- (i) the business of the company is being conducted with intent to defraud its creditors, members or any other persons or otherwise for a fraudulent or unlawful purpose, or that the company was formed for any fraudulent or unlawful purpose; or
- (ii) any person concerned in the formation of the company or the management of its affairs have in connection therewith been guilty of fraud, misfeasance or other misconduct,

then, every officer of the company who is in default and the person or persons concerned in the formation of the company or the management of its affairs shall be punishable for fraud.

***NOTE:** Students may note that Section 213 of the Companies Act, 2013 is not enforced yet. Hence, the provisions of this section is not discussed in detail for the time being.

Who can be appointed as an Inspector - A firm, body corporate or other association cannot be appointed as an inspector. Thus, a firm of professional accountant cannot be appointed as inspector but an individual accountant can be so appointed.

Power of Inspector to conduct investigation into the affairs of related companies etc.- Section 219 of the Companies Act, 2013 provides that an inspector appointed under section 210 or section 212 or section 213 to investigate into the affairs of a company may also investigate, subject to approval of the Central Government, into the affairs of—

- (a) any other body corporate which is, or has at any relevant time been the company's subsidiary company or holding company, or a subsidiary company of its holding company;

(b) any other body corporate which is, or has at any relevant time been managed by any person as managing director or as manager, who is, or was, at the relevant time, the managing director or the manager of the company;

(c) any other body corporate whose Board of Directors comprises nominees of the company or is accustomed to act in accordance with the directions or instructions of the company or any of its directors; or

(d) any person who is or has at any relevant time been the company's managing director or manager or employee.

It may be noted that he shall, subject to the prior approval of the Central Government, investigate into and report on the affairs of the other body corporate or of the managing director or manager, in so far as he considers that the results of his investigation are relevant to the investigation of the affairs of the company for which he is appointed.

The objective of these investigations, fundamentally, is to determine whether any provision of the Act has been violated or there has been a breach of duty on the part of a director or an officer of the company resulting in a loss to shareholders or a class of them. It has been held in the case *Narayanlal Bansilal v. Maneck Phiroze Mistry and another (1960 comp. Cases, p. 62)* that an investigation into the affairs of a company under the Companies Act was not a criminal proceeding. It was also held that the report of the inspector is just an expression of his opinion in the manner in which affairs of the company was conducted.

The term "affairs of a company" was considered in *R.V. Board of Trade Ex. parte St. Martin Preserving Company Ltd. (1964 E.R. 561)*. It was held that it can cover investigations into all aspects of its business; its assets including goodwill, profits and losses, contracts and transactions, investments and rather property interests and control of subsidiary companies and transactions of a receiver and manager of a company.

PROCEDURE, POWERS ETC. OF INSPECTORS – Section 217 of the Companies Act, 2013 states the procedures, powers of the Inspectors as follows:

(1) **Duty of officers and employees of the company towards inspector:** It shall be the duty of all officers and other employees and agents including the former officers, employees and agents of a company which is under investigation to preserve and to produce to an inspector or any person authorised by him, all books and papers relating to the company or the person; and to provide assistance in connection with the investigation which they are reasonably able to give.

(2) **Inspector may ask information from any body corporate:** The inspector may require any body corporate, other than a body corporate referred to in point(1), to furnish such information to, or produce such books and papers before him as he may consider necessary.

(3) **Not to keep Books and Papers in custody for more than 180 days:** The inspector shall not keep in his custody any books and papers produced for more than 180 days and return the same to those by whom the books and papers were produced.

The inspector may call the books and papers again, if needed, for a further period of 180 days by an order in writing.

20.21 Advanced Auditing and Professional Ethics

(4) **Examine on oath:** The inspector may examine on oath any of the persons referred above; and with the prior approval of the Central Government, any other person in relation to the affairs of the company, or other body corporate or person, as the case may be.

(5) **Inspector to possess all the Powers of Civil Court:** The inspector, being an officer of the Central Government, making an investigation shall have all the powers as are vested in a civil court under the Code of Civil Procedure, while trying a suit in respect of specified matters.

(6) **Assistance of Officers of Government to Inspector:** The officers of the Central Government, State Government, police or statutory authority shall provide necessary assistance to the inspector for the purpose of inspection, investigation etc.

(7) **Evidence from place outside India:** If in the course of an investigation into the affairs of the company, an application is made to the competent court in India by the inspector stating that evidence may be available in a country or place outside India, such court may issue a letter of request to a court or an authority in such country or place for seeking such evidence.

It may be noted that the letter of request shall be transmitted in such manner as the Central Government may specify in this behalf.

INSPECTOR'S REPORT - Under Section 223 of the Companies Act, 2013, an inspector shall, if so directed by the Central Government, submit interim reports to that Government, and on the conclusion of the investigation, shall submit a final report to the Central Government. Every report made shall be in writing or printed as directed by the Central Government. A copy of the report may be obtained by making an application to the Central Government.

Section 224 of the Companies Act, 2013, deal with follow-up of the inspector's report and gives power to the central government to launch prosecution; apply for winding up of the company etc.

GENERAL APPROACH FOR INVESTIGATION - The general approach for investigation under Sections 210, 212 and 213 of the Companies Act, 2013 is conditioned by the legal requirements in these regards. From the foregoing requirements of law, it is apparent that investigations under these requirements may encompass a wide field. The affairs of the company may include everything such as goodwill, profit and loss, contracts, investments, assets, shareholding in subsidiaries, decision making, etc. Also the specific circumstances mentioned in these sections like fraud, mismanagement, oppression of any shareholder etc. come within the term "affairs of the company."

Investigation under Sections 210, 212 and 213 do not call for any special approach. The approach to any investigation is determined on a consideration of the nature of the investigation and the terms of reference. However, the inspector should ensure that the terms of reference are clear, unambiguous and in writing. If he has any doubt about any item in the terms, he should obtain clarification in writing. It should also be seen that the terms of reference are not too general, because that may frustrate the whole objective of the investigation; the scope of the investigation will become unwieldy and ill defined. An investigation order to investigate into the affairs of the company would be an instance at point. Affairs would mean anything and everything that the company is involved in. The thrust and sharpness of the investigation would get diffused and blunted and important distortions in the

company may be overlooked in the generalities of the scope. Therefore the inspector should ask for reframing of the order specifying the exact matters to be investigated. He should also take into consideration the possible effect of limitations, if any, put in the terms of reference and should keep the Central Government informed in writing about their effect on the investigation.

The next point for consideration of the inspector would be the determination of the scope of the investigation on the basis of the terms of reference. At this stage, it may be useful for the inspector to go into the history of the company and its affiliates or associates. He should evaluate the terms of reference in sketching the scope of investigation; this will enable him to locate the limitation, if any, in the terms of reference, not clearly mentioned. For a purposeful investigation, he may need to stretch his inquiry into the books and records of allied and associated persons and concerns and may require to arm himself with the powers given under Section 217 of the Companies Act. He should also have regard to the period over which the investigation should stretch. The evaluation of terms of reference and the consequential determination of the scope of investigation are the twin props on which the entire investigation would rest and, therefore, the inspector appointed should devote careful attention to these. Thereafter, he should frame his programme for investigation in a systematic manner. He should keep adequate working notes and papers with references and cross references in a proper and methodical way to aid him in the preparation of the report. The actual process of investigation would be essentially an evidence gathering procedure and, at every step, he should have regard to the procedures laid down in these sections regarding production of documents and evidence, examination on oath and seizure of documents. He should also keep his mind open to the revelations he comes across in the process of evidence collection and should assess whether the programme of investigation needs amendment or modification. He should also consider whether assistance of other experts like engineers, lawyers, etc., is necessary in the interest of a comprehensive and fool proof examination of the documents and information.

Only after he has completed the steps in the investigation programme and has marshaled all the information that he needed should he prepare his report. He, however, can make interim report also as provided under Section 223 of the Companies Act. The findings should be completed and exhaustive. Before he makes his final report he should obtain and keep on record the evidences relied upon by him. By the nature of things, such evidence should be as conclusive as possible depending on circumstances of the case. He should make his report in accordance with the provisions of 223 of the Companies Act. However, the overriding consideration that he should at every stage of investigation and especially in the report framing stage bear is to remain fair and thoroughly unbiased.

The general approach for investigations under Sections 210, 212 and 213 should, therefore, be formulated having regard to the terms of reference, scope, the period, the programme and procedure of the investigation and the attending legal requirements specified above.

(B) INVESTIGATION OF OWNERSHIP OF A COMPANY: According to Section 216 of the Companies Act, 2013, where it appears to the Central Government that there is a reason so to do, it may appoint one or more inspectors to investigate and report on matters relating to the

20.23 Advanced Auditing and Professional Ethics

company, and its membership for the purpose of determining the true persons, who are or have been financially interested in the success or failure, whether real or apparent, of the company; or who are or have been able to control or to materially influence the policy of the company.

While appointing an inspector, the Central Government may define the scope of the investigation as respects the matters or the period to which it is to extend. It may limit the investigation to matters connected with particular shares or debentures. Powers of inspectors shall extend to the investigation of any circumstances suggesting the existence of any arrangement or understanding.

Scope and extent of investigation - When a chartered accountant is appointed to carry out an investigation under any of the aforementioned provisions, the extent of enquiry, the objective of the investigation and the various matters referred to for investigation are specified in the order of investigation issued by the appointing authority. On a consideration thereof, the investigating accountant should determine the areas of accounts which require investigation and the extent to which the enquiry is to be made as well as his general approach to the enquiry. For example, if the allegation is that certain transactions have been entered into in contravention of the provisions of the Companies Act, the nature of transactions, the persons who were parties thereto, the amount or amounts involved and the circumstances under which these were entered into must be examined. If the contravention was deliberate and willful and was made with some ulterior motive, it would attract greater penalty as compared to the one which was inadvertent. The enquiry therefore should show the motive, if any, of the contravention. If the loss suffered by the company has given rise to a gain by a director and other managerial personnel or its associates, the manner in which the benefit has accrued and the amount thereof shall have to be investigated.

In case of a company having subsidiaries or where one or more directors are interested in one or more concerns, all the dealings with these concerns should be examined for these may have been entered into with the intention of transferring profit. Generally, all sales and purchases of goods and assets from directors and their associated concerns should be scrutinized since these also can be a vehicle of illicit transferring of profits.

Any breach of duty or abdication of responsibility for purposes of investigation would be material only if it has resulted in a loss to the company. In such a case, the factors responsible for the loss or losses, besides the amount thereof, shall have to be investigated. Negligence would be culpable only if it was in relation to a duty cast by the Act, Articles of Association or by a resolution of the shareholders or that of the Board of Directors.

Any negligence in the discharge of duty of a director or any other managerial personnel must be construed very broadly, for apart from being the agents of the company, they are trustees of its property. As such, it is their duty to safeguard the property of the company and protect the interest of the shareholders. It must be remembered, however, that it is not the duty of a director to attend to the business of a company continuously and, therefore, so long as the decisions of the Board at which the director was present were taken on a proper consideration of the evidence available and in the best interest of the company, he would not be responsible for any losses suffered by the company.

It may be necessary for an investigator to interrogate directors, officers, agents, and others concerned with matters under his enquiry. Before drawing up his brief in this regard as well as for framing his conclusions, he should, if necessary, take legal assistance. If the Investigating accountant is required to report on the efficiency of the management, he should be discreet in expressing his opinion. Usually, it is sufficient if he merely indicates the general limitations of the management. The inspector must ensure that the persons who figure in the investigation get the fullest opportunity to explain their action and conduct. However, the inspector cannot hold out any assurance to anybody except the assurance of fairness implicit in the job.

20.6.2 Investigation on behalf of an incoming partner

The general approach of the investigating accountant in this type of investigation would be more or less similar, irrespective of the nature of business of the firm—manufacturing, trading or rendering a service.

Primarily, an incoming partner would be interested to know whether the terms offered to him are reasonable having regard to the nature of the business, profit records, capital distribution, personal capability of the existing partners, socio-economic setting, etc., and whether he would be capable of deriving continuing benefit in the shape of return on capital to be contributed and remuneration for services to be rendered, which can be justified by the overall economic conditions prevailing and other considerations considering his own personality and achievements. In addition, he would be interested to ascertain whether the capital to be contributed by him would be safe and applied usefully.

Broadly, the steps involved are the following:

- (a) Ascertainment of the history of the inception and growth of the firm.
- (b) Study of the provisions of the deed of partnership, particularly for composition of partners, their capital contribution, drawing rights, retirement benefits, job allocation, financial management, goodwill, etc.
- (c) Scrutiny of the record of profitability of the firm's business over a suitable number of years, with usual adjustments that are necessary in ascertaining the true record of business profits. Particular attention should, however, be paid to the nature of partners' remuneration, which may be excessive or inadequate in relation to the nature and profitability of the business, qualification and expertise of the partners and such other factors as may be relevant.
- (d) Examination of the asset and liability position to determine the tangible asset backing for the partner's investment, appraisal of the value of intangibles like goodwill, know how, patents, etc. impending liabilities including contingent liabilities and those for pending tax assessment. In case of firms rendering services, the question of tangible asset backing usually is not important, provided the firm's profit record, business coverage and standing of the partners are of the acceptable order.
- (e) Position of orders at hand and the range and quality of clientele should be thoroughly examined, which the firm is presently operating.

20.25 Advanced Auditing and Professional Ethics

- (f) Position and terms of loan finance would call for careful scrutiny to assess its usefulness and implication for the overall financial position; reason for its absence should be studied.
- (g) It would be interesting to study the composition and quality of key personnel employed by the firm and any likelihood of their leaving the organisation in the near future.
- (h) Various important contractual and legal obligations should be ascertained and their nature studied. It may be the case that the firm has standing agreement with the employees as regards salary and wages, bonus, gratuity and other incidental benefits. Full import of such standing agreements would be gauged before a final decision is reached.
- (i) Reasons for the offer of admission to a new partner should be ascertained and it should be determined whether the same synchronises with the retirement of any senior partner whose association may have had considerable bearing on the firm's success.
- (j) Appraisal of the record of capital employed and the rate of return. It is necessary to have a comparison with alternative business avenues for investments and evaluation of possible results on a changed capital and organisation structure, if any, envisaged along with the admission of the partner.
- (k) It would be useful to have a firsthand knowledge about the specialisation, if any, attained by the firm in any of its activities.
- (l) Manner of computation of goodwill on admission as also on retirement, if any, should be ascertained.
- (m) Whether any special clause exists in the deed of partnership to allow admission in future of a new partner, who may be specified, on concessional terms.
- (n) Whether the incomplete contracts which will be transferred to the reconstituted firm will be a liability or a loss.

It would always be worthwhile to remember that, in a partnership, personal considerations count predominantly over other considerations and assessment of standing of the firm, standing and reliability of other partners, their personal reputation and the goodwill enjoyed by the products/services are important.

On the basis of the broad frame of considerations as given above, the investigating accountant should devise his own considerations in each case which may be quite diverse. Additional considerations may come up in the case of service-rendering firms where profit and business record, goodwill of the firm and of individual partners would assume greater significance.

Again, in the case of industrial firms, the network of customers, their scatter, size, etc., would be relevant for consideration.

20.6.3 Investigation for valuation of shares in private companies

The importance should be given on various purposes for which such a valuation is necessary, the different bases on which valuation is possible and the variety of economic factors, on a

consideration whereof the price so determined needs to be adjusted.

The necessity for valuation of shares of a private company arises, for under the Companies Act, a private company must restrict the transfer of its shares. In consequence, the shares of a private company do not have a free market in which their prices could be determined by interaction of the forces of supply and demand.

In respect of equity shares, there are two main methods of valuation. According to the *first* method, value is determined on the basis of net worth of the company. The amount of net worth is divided by the number of shares comprising the equity capital to arrive at the value for one share. When this method is followed, goodwill of the business, based on the estimated future maintainable profit, is included among the assets to arrive at the amount of net worth. According to the *second* method, the average profit earned by the business during the preceding 5 to 7 years is computed. Afterwards, on the assumption that the same would continue to be earned in the future, the value of business is calculated by capitalising it at a reasonable rate of interest. If the rate assumed is high, the value of the business would be smaller. Correspondingly, it would be high if the rate of interest applied is low. A provision of the risk factor and restriction on transfers in the value of shares is made by varying the rate of interest applied. The rate of return that an investor expects to earn in a business of the type in which the company is engaged, is ascertained from the prices of the shares of companies engaged in a similar business quoted on the stock exchange.

The value of preference shares is estimated on the basis of the yield on preference shares of companies engaged in a similar trade or industry after making allowance for factors like restriction on transferability, average rate of earnings as compared to the rate of dividend, etc.

Special features -

Net worth basis

- (a) Each asset should be revalued on taking into account its utility to the business as a going concern. The value of different assets, on a revaluation, may be either more or less in comparison to their book values. For example, the book value of safes and furniture in the case of a bank is usually much less as compared to their utility. On the other hand, the book value of intangible assets, e.g., leasehold rights, patents, goodwill, etc., in case of an industrial concern may be higher in comparison with the advantage which accrues to it from these assets. In both the cases, the assets should be revalued at their replacement cost i.e., the cost of similar assets at the prevailing market price, reduced by the amount of depreciation which they would have suffered, if they were in use during the period that the corresponding assets have been in use. But the cost adopted, in cash, should be the cost of the assets as were originally purchased or that of their substitutes considered more suitable in the circumstances of the case.
- (b) The value of goodwill of a business is primarily dependent on its capacity to earn super-profit and the period over which these are expected to arise. The super profits that the business would earn in the future are estimated on the basis of profits earned in the past, after making an allowance therein for the continuation or otherwise of favourable factors, which in the past had enabled the business to earn super-profits. This is usually a difficult

20.27 Advanced Auditing and Professional Ethics

matter since, for the purpose, it is necessary to analyse the trend of economic, social and political forces which have an impact on the profitability of the business. For instance, the installed capacity must be viewed against future national requirements on taking into account the government's licensing policy. Again, government policies like controls over selling price or advantages of marketing through its own organisations will have to be considered since any change therein might seriously affect the profit structure. Therefore, to determine the impact of these factors, the accountant must have knowledge of the company's working and experience of the business in general.

Yield basis

- (a) The value of shares on yield basis is arrived at on the basis of present value of the right to receive dividends in the future. Since dividends can be paid only out of profits, in this case also, it is necessary to determine the amounts of profits which the company would be earning in future as well as the amounts thereof which would be distributed as dividend from year to year. In short, it is an exercise in projecting the trend to profits and predicting the policy that the company might follow in the matter of declaration of dividends.
- (b) The rate at which the amount of dividends should be capitalised is decided on taking into account the risk that shareholders are taking in the matter of declaration of dividends being continued in future, assessed in the background of past history of the company, the amount of reserves the company possesses, both secret and those disclosed in its books, future prospects of the line of manufacture or trade in which the company is engaged and the impact of various social and political factors that are likely to emerge on the company's profitability. Since the effect of these factors is reflected in the prices at which the shares of companies engaged in similar trades and businesses are quoted on the Stock Exchange, the investigating accountant should consider them. These would show to him the rate at which their dividends were being capitalised. He should adopt the average rate of return expected by investors in the shares of such companies but it should be applied only after making due allowance for the factors peculiar to the case, such as restrictions on transfer of shares, majority holding, etc. In any valuation of shares, with the transfer of shares control is also to pass, a separate value should be ascertained for the control and added to the value otherwise obtained either on net worth basis or yield basis.

20.6.4 Investigation on behalf of a bank proposing to advance loan to a company

A bank is primarily interested in knowing the purpose for which a loan is required, the sources from which it would be repaid and the security that would be available to it, if the borrower fails to pay back the loan. On these considerations, the investigating accountant, in the course of his enquiry, should attempt to collect information on the under-mentioned points:

- (i) The purpose for which the loan is required and the manner in which the borrower proposes to invest the amount of the loan.
- (ii) The schedule of repayment of loan submitted by the borrower, particularly the assumptions made therein as regards amounts of profits that will be earned in cash and

the amount of cash that would be available for the repayment of loan to confirm that they are reasonable and valid in the circumstances of the case. Institutional lenders now-a-days rely more for payment of loans on the reliability of annual profits and loss on the values of assets mortgaged to them.

- (iii) The financial standing and reputation for business integrity enjoyed by directors and officers of the company.
- (iv) Whether the company is authorised by the Memorandum or the Articles of Association to borrow money for the purpose for which the loan will be used.
- (v) The history of growth and development of the company and its performance during the past 5 years.
- (vi) How the economic position of the company would be affected by economic, political and social changes that are likely to take place during the period of loan.

To investigate the profitability of the business for judging the accuracy of the schedule of repayment furnished by the borrower, as well as the value of the security in the form of assets of the business already possessed and those which will be created out of the loan, the investigating accountant should take the under-mentioned steps:

- (a) Prepare a condensed income statement from the Statement of Profit and Loss for the previous five years, showing separately therein various items of income and expenses, the amounts of gross and net profits earned and taxes paid annually during each of the five years. The amount of maintainable profits determined on the basis of foregoing statement should be increased by the amount by which these would increase on the investment of borrowed funds.
- (b) Compute the under-mentioned ratios separately and then include them in the statement to show the trend as well as changes that have taken place in the financial position of the company:
 - (i) Sales to Average Inventories held.
 - (ii) Sales to Fixed Assets.
 - (iii) Equity to Fixed Assets.
 - (iv) Current Assets to Current Liabilities.
 - (v) Quick Assets (the current assets that are readily realisable) to Quick Liabilities.
 - (vi) Equity to Long Term Loans.
 - (vii) Sales to Book Debts.
 - (viii) Return on Capital Employed.
- (c) Enter in a separate part of the statement the break-up of annual sales product-wise to show their trend.

Steps involved in the verification of assets and liabilities included in the Balance Sheet of the borrower company which has been furnished to the Bank - The investigating

20.29 Advanced Auditing and Professional Ethics

accountant should prepare schedules of assets and liabilities of the borrower and include in the particulars stated below:

(a) **Fixed assets** - A full description of each item, its gross value, the rate at which depreciation has been charged and the total depreciation written off. In case the rate at which depreciation has been adjusted is inadequate, the fact should be stated. In case any asset is encumbered, the amount of the charge and its nature should be disclosed. In case an asset has been revalued recently, the amount by which the value of the asset has been decreased or increased on revaluation should be stated along with the date of revaluation. If considered necessary, he may also comment on the revaluation and its basis.

(b) **Inventory** - The value of different types of inventories held (raw materials, work-in-progress and finished goods) and the basis on which these have been valued.

Details as regards the nature and composition of finished goods should be disclosed. Slow-moving or obsolete items should be separately stated along with the amounts of allowances, if any, made in their valuation. For assessing redundancy, the changes that have occurred in important items of inventory subsequent to the date of the Balance Sheet, either due to conversion into finished goods or sale, should be considered.

If any inventory has been pledged as a security for a loan the amount of loan should be disclosed.

(c) **Trade Receivables, including bills receivable** - Their composition should be disclosed to indicate the nature of different types of debts that are outstanding for recovery; also whether the debts were being collected within the period of credit as well as the fact whether any debts are considered bad or doubtful and the provision if any, that has been made against them.

Further, the total amount outstanding at the close of the period should be segregated as follows:

- (i) debts due in respect of which the period of credit has not expired;
- (ii) debts due within six months; and
- (iii) debts due but not recovered for over six months.

If any debts are due from directors or other officers or employees of the company, the particulars thereof should be stated. Amounts due from subsidiary and affiliated concerns, as well as those considered abnormal should be disclosed. The recoveries out of various debts subsequent to the date of the Balance sheet should be stated.

(d) **Investments** - The schedule of investments should be prepared. It should disclose the - date of purchase, cost and the nominal and market value of each investment. If any investment is pledged as security for a loan, full particulars of the loan should be given.

(e) **Secured Loans** - Debentures and other loans should be included together in a separate schedule. Against the debentures and each secured loan, the amounts outstanding for payments along with due dates of payment should be shown. In case any debentures

have been issued as a collateral security, the fact should be stated. Particulars of assets pledged or those on which a charge has been created for re-payment of a liability should be disclosed.

- (f) **Provision of Taxation** - The previous years up to which taxes have been assessed should be ascertained. If provision for taxes not assessed appears to be inadequate, the fact should be stated along with the extent of the shortfall.
- (g) **Other Liabilities** - It should be stated whether all the liabilities, actual and contingent, are correctly disclosed. Also, an analysis according to ages of trade payables should be given to show that the company has been meeting its obligations in time and has not been depending on trade credit for its working capital requirements.
- (h) **Insurance** - A schedule of insurance policies giving details of risks covered, the date of payment of last premiums and their value should be attached as an annexure to the statements of assets, together with a report as to whether or not the insurance-cover appears to be adequate, having regard to the value of assets.
- (i) **Contingent Liabilities** - By making direct enquiries from the borrower company, from members of its staff, perusal of the files of parties to whom any loan has been advanced those of machinery suppliers and the legal adviser, for example, the investigating accountant should ascertain particulars of any contingent liabilities which have not been disclosed. In case, there are any, these should be included in a schedule and attached to the report.

Finally, the investigating accountant should ascertain whether any application for loan to another bank or any other party has been made. If so, the result thereof should be examined.

20.6.5 Investigation of Frauds

In the Companies Act, 2013 meaning of fraud has been considered in two specific sections viz. Section 143(10), where the SAs specified by the ICAI are deemed to be the auditing standards for purposes of the Act, which, inter alia, define fraud, and in Section 447, where punishment for fraud has been prescribed.

Fraud has been defined in paragraph 11(a) of SA 240, "The Auditor's responsibilities Relating to Fraud in an Audit of Financial Statements" as 'an intentional act by one or more individuals among management, those charged with governance, employees, or third parties, involving the use of deception to obtain an unjust or illegal advantage.'

In the context of stating the provisions for punishment for fraud, Section 447 of the Act has explained the term 'fraud' as "fraud in relation to affairs of a company or any body corporate, includes any act, omission, concealment of fact or abuse of position committed by any person or any other person with the connivance in any manner, with intent to deceive, to gain undue advantage from, or to injure the interests of, the company or its shareholders or its creditors or any other person, whether or not there is any wrongful gain or wrongful loss."

20.31 Advanced Auditing and Professional Ethics

This Section further explains the terms 'wrongful gain' and 'wrongful loss' to mean the gain by unlawful means of property to which the person gaining is not legally entitled; and the loss by unlawful means of property to which the person losing is legally entitled, respectively.

Frauds may be classified as defalcations involving misappropriation, either of money or that of goods, and manipulation of accounts not involving a defalcation. The detections of manipulations of accounts being one of the objects of an audit, for the detection of frauds perpetrated for misappropriating either money or goods, knowledge of the various circumstances under which these may be committed and that of different forms they take is essential. On this account, a brief description thereof at different level is given below.

1. Fraud for Personal Gain

Bribery: Money, gift or other favours offered to procure (often illegal or dishonest) action or decision in favour of the giver. These are also relatable to contract fraud or procurement fraud and are, generally, out of books transactions. The auditor normally conducts a propriety audit over the veracity of the transactions and review of any undue favours to vendors.

2. Corporate Frauds/ Irregularities

(i) **Advance Billing:** Advance billing is a situation where the company officials indulge in booking fictitious sales in anticipation of actual sales. This results in misrepresentation of revenue in the books thereby misleading financiers and stakeholders. When the management treats borrowings from money lenders as customer advances in the books against sale orders or for adjusting bills receivables, the fraudulent act gets unnoticed for an extended period. This situation results in a death knell for the corporation as the company is dragged into an irredeemable debt trap.

Use of Shell Company, false vendors, purchases of personal nature booked as official expenses enable falsification of accounts and diversion of funds for purposes other than an intended purpose. These could also be mechanism for employees or cartel of employees engaging in personal gain at the cost of the company. In the former incident this could be termed as management fraud.

(ii) **Shell/ Dummy Company Schemes:** Generally, represents a fictitious company or a 'paper company' to transfer profits or funds from the main company. This could also involve fictitious bills (mostly for services rendered or consultancy charges that cannot be corroborated) which are used in the name of dummy companies diverting the funds taken from banks and financial institutions.

The books could be falsified by wrong classification of expenses, inflating the expense claims, fictitious expenses or multiple reimbursements. A review of controls, normally, leads to the uncovering of expense booking that are prima facie not incurred.

(iii) **Money Laundering Activities:** As per the Prevention of Money Laundering Act, 2002 whosoever directly or indirectly attempts to indulge or knowingly assists or knowingly is a party or is actually involved in any process or activity connected with the proceeds of crime and projecting it as untainted property shall be guilty of offence of money laundering."

The person indulging in money laundering looks for avenues with weak banking controls for converting illegal money into the banking system. Any excess credit in the bank accounts that does

not belong to the customer or is parked for a temporary period should raise suspicion of such activities. This person indulging in money laundering activity looks for avenues to enter into 'benami' (could be called 'proxy' name lending) transactions. Companies with extensive cash handling and inadequate identification process of source of money or about the remitter are susceptible to money laundering activities.

3. Fraud at Operational Level Employees

(i) Tampering of Cheques/Drafts/On-line payments/receipts: Tampering of cheques, payee name being altered, or preparation of cheques without issue of the cheques to payee, etc., are methods that may also lead to falsification of accounts.

On-line payments generally are considered a transparent mechanism to prevent the above frauds. The ATM is a popular technological advancement that has inherent control gaps. For example, credit cards once swiped the transaction is put through in the system without the need for a signature of the payer. Similarly, unauthorised credits in bank accounts through ATMs are an immense source of threat to recipients including bribery allegations, unless they lodge a complaint with the bankers or the regulatory authorities in a prompt manner of such unauthorised credits to their accounts/or company bank accounts.

Care should be taken that the name of the payee in the payment transactions in books and cheque issued therein for payment is not fabricated to wrongly codify and book against an improper account head.

(ii) Off Book Frauds: In off book frauds, the fraud perpetrator misappropriates the cash before these are recorded in the books or before the sale is recorded in the books. These frauds are difficult to unearth as the cash or collection is taken off before the accounting entries are made in the books. This situation arises especially in unorganized markets and in rural economies where banking habits are relatively under developed. These are difficult to establish due to absence of audit trails and are more prevalent in businesses that have extensive cash dealings. These are difficult to uncover as the means adopted could include printing of receipts/ bills outside the system.

The above fraudulent schemes can be established based on circumstantial evidence or validation through external sources such as, customer balance confirmations (where feasible) and customer copy of the receipts or other documents that are retained by them. These are also further supplemented by external evidence in the form of background checks and surveillance mechanism.

(iii) Cash Misappropriation: Cash is misappropriated after the accounting entries are already passed in the books. These are identified through surprise checks and through shortages in cash balances. These occur when there are delays in accounting of cash collections and there are no laid down cash flow controls. Unaccounted money in any form in an entity is a serious red flag in uncovering of irregularities. Improper daily fund monitoring mechanism is another factor that results in creating unauthorised float by employees in their personal account or in fictitious surrogate (proxy) entities by fraudsters.

(iv) Teeming and Lading: This is also achieved through cash deposits or cheques collected from customers being overlapped with the collections from subsequent customers and the amount

20.33 Advanced Auditing and Professional Ethics

collected is diverted to personal account. The ageing of receivables is not a constant, and, therefore, this makes the task of identifying the leakage of collections unless all the customer accounts are reconciled at a single point of time.

(v) Fraudulent Disbursements: Fraudulent disbursements or reimbursements take place either by issuing or submission of false bills, or personal expense bills being converted into official expenses bills. The other method that is resorted to by the perpetrator of fraud is to inflate the refunds due to a customer and skim the excess refunds.

(vi) Expense Reimbursement Schemes: These fraudulent schemes involve employees resorting to treating their personal expenses as incurred for business purpose and claiming reimbursement. In some cases, employees may get reimbursed by third parties (such as distributors) as well as by claiming these expenses from the company. Multiple expense claims based on duplicate bills or photostat copies.

(vii) Payroll Fraud: The payroll fraud could include payment to non-existent employees or in a contractual arrangement inflating of the manpower resources than those actually deployed while billing the client. It may also include showing higher pay than actual disbursement to employees/workers, etc. The process would require a detailed review of statutory declarations/filings under various labour law statutes including disclosures in financial statements of retirement benefits such as P.F, Gratuity and Superannuation benefits from an evidence gathering perspective.

(viii) Commission Schemes: The salesman exaggerates the sales through fictitious billings to earn higher commission or alter the sales prices of the products sold from those stipulated by the company or share the sales volumes achieved with other employees to share higher commission. Commission schemes in mega deals backed by legal documents are often tools used to camouflage kickbacks. These are often difficult to uncover and would need to be supplemented by the monetary trails across entities and geographies.

Procedure for Investigation of Fraud: Before proceeding to investigate frauds of the type afore-mentioned, the investigating accountant should ascertain the exact duties of the person concerned who is suspected to have committed a fraud; his relationship to the general routine of the office, and the circumstances in which any known instances of defalcation have come to light. Such an enquiry would give a clue to promising avenues of investigation. Greater the authority of the individual suspected of a fraud, wider would be the field which would have to be covered by the investigation. At times, an accountant is called upon to investigate a suspected fraud, the details or the nature whereof is not known. In such a case, for localising the source of the fraud, the investigating accountant will have to study the financial and accounting structure of the organisation. As a first step, he should examine the line of responsibility between the various members of the staff. He should have a look at the system of internal control in operation for spotting out the weaknesses, if any, that may exist in it. Relying on the above study, he should direct his enquiry towards those aspects of the business where there has been excessive control in the hands of single persons, without any supervision by any other person or any other inherent weakness that may be in existence in the system.

Some of the situations in which money may be embezzled and the various forms that such frauds usually take place alongwith their investigation procedure include the following:

- (a) **Cash receipts** - In cases like holding back cash sales, collections by travelling salesmen, V.P.P receipts, or casual receipts, e.g., sales of scrap, recoveries out of debts written off earlier, etc., the amount or amounts of receipts embezzled may be subsequently covered up by the perpetrator adopting one or other of the under-mentioned devices:
- (i) Issuing a receipt to the payee for the full amount collected and entering only a part of the amount on the counterfoil.
 - (ii) Showing a larger cash discount than actually allowed.
 - (iii) Adjusting a fictitious credit in the account of a customer for the value of goods returned by him.
 - (iv) Adjusting a cash sale as a credit sale, and raising a debit in the account of the customer.
 - (v) Writing off a good debt as bad and irrecoverable to cover up the amount collected which has been misappropriated.
 - (vi) Short-debiting the customer's account in the ledger with an intention to withdraw the difference when the full amount payable by him is collected.
 - (vii) Under-casting the receipts side of the Cash Book or over-casting the payment side; carrying over a shorter total of the receipts from one page of the Cash Book to the next or over-carrying the total of the payment from one page of the Cash Book to the next with a view to covering up misappropriation; either short banking of cash collection or apart of the amount withdrawal from the bank.

Verification of Cash Receipts: On the assumption that some of these may have been diverted before being entered in the books, evidence as regards income received from different sources should be scrutinised, e.g., inventory, sales summaries, rental registers, correspondence with customers, advices of travelling salesmen and counterfoils or receipts. Carbon copies of receipts marked 'duplicate', should be scrutinised to confirm that they are in fact copies of receipts issued earlier. In addition, by recalling paying-in-slips from the bank the details of cash deposited on each day should be compared with those shown in the Cash Book. The record of sales of scrap of waste paper, that of collection of rents from labourers temporarily accommodated in the company's quarters, that of refunds of amounts deposited with the electric supply co., and other Government authorities should be examined for finding out if any of these amounts have been misappropriated. Cash sales should be vouched in detail. Recoveries from customers and sundry parties should be checked with the copies of receipts issued to them; deductions made on account of cash discounts should be reviewed. All withdrawals from the bank should be checked by reference to corresponding entries in the bank pass book.

20.35 Advanced Auditing and Professional Ethics

(b) Inflating cash payment -

- (i) Making double payment of an invoice or paying a false invoice.
- (ii) Paying personal expenses out of the business by falsifying details. e.g., showing betting losses as advertisement charges.
- (iii) Withdrawing unclaimed credit balances of customers or amounts falsely credited in the accounts of parties.
- (iv) Falsely adjusting a refund in the account of a customer and withdrawing the credit balance.
- (v) Wrong totalling of the wage sheets and misappropriating the excess amount withdrawn from the bank for payment of wages.

Verification of Cash Payments: All the evidence as regards cash payments made, including acknowledgement by parties for payments shown to have been made to them, should be carefully scrutinised. In the case where a figure appears to have been erased or altered on the receipts issued by the party, on reference to the party concerned, the actual amount paid to him should be confirmed. The same procedure should be adopted in respect of amounts acknowledged on blank papers. All payments by bearer cheques should be examined. The system of recording of wages should be reviewed, specially as regards possible over-totalling of wage sheets, and entries in them of dummy workmen. The system of ordering and receiving goods should be reviewed so as to confirm that no payment has been made in respect of supplies which have not been received. Confirmations should be obtained from partners or Directors in respect of amounts shown to have been paid to them.

The Petty Cash Book should be vouched and totaled. Special attention should be paid to payments made on account of salaries and wages; confirmation should be obtained from the management that all payments of such salaries and wages were made to persons who were actually in the service of the company. All the withdrawals from the bank should be checked by reference to entries in the bank's pass book. All the bills receivable or payable should be checked by reference to the Bills Books.

(c) Frauds through suppliers' ledger -

- (i) Adjusting fictitious or duplicate invoices as purchases in the accounts of suppliers and subsequently misappropriating the amounts when payments are made to the suppliers in respect of these invoices.
- (ii) Suppressing the Credit Notes issued by suppliers and withdrawing the corresponding amounts not claimed by them.
- (iii) Withdrawing amounts unclaimed by suppliers, for one reason or another by showing that the same have been paid to them.
- (iv) Accepting purchase invoices at prices considerably higher than their market prices and collecting the excess amount, paid in cash, from the suppliers.

Verification of balances in suppliers' ledger - The Bought Journal should be vouched by reference to entries in the Goods Inward Book and the suppliers' invoices to confirm that amounts credited to the accounts of suppliers were in respect of goods, which were duly received and the suppliers' accounts had been credited correctly. All the suppliers should be requested to furnish statements of their accounts to see whether or not any balance is outstanding or due so as to confirm that allowances and rebates given by them have been correctly adjusted.

(d) Customers' ledger -

- (i) By the 'teeming and lading' method, i.e., misappropriating the amount collected from a customer and crediting his account by the amount paid by him only when an amount is subsequently collected from another customer; repeating this practice with several items collected and depositing back the amount or amounts so misappropriated before the close of the year.
- (ii) Misappropriating the amount collected from a customer and subsequently adjusting his account by crediting the amount on account of allowance or a rebate for excess price charged.
- (iii) Crediting the amount received from a customer to the account of another customer and subsequently withdrawing the amount wrongly credited.

Verification of balances in customers' ledger: Special attention should be paid to allowances adjusted on account of goods returned or difference in price or on any other account as well as to amounts written off as bad debts. To confirm that the accounts of customers have been debited in respect of goods supplied to them, entries in the Order Book should be tested with those in the Sales Day Book where one is kept. The investigating accountant should obtain confirmation of customers in respect of the amounts standing in their accounts. Those of them who have no balance in their accounts should be requested to confirm the statement of their account (which should be sent to them) for ascertaining that the entries shown therein were genuine.

(e) Inventory frauds-Inventory frauds are many and varied but here we are concerned with misappropriation of goods and their concealment.

- (i) Employees may simply remove goods from the premises.
- (ii) Theft of goods may be concealed by writing them off as damaged goods, etc.
- (iii) Inventory records may be manipulated by employees who have committed theft so that book quantities tally with the actual quantities of inventories in hand.

Verification Procedure for Defalcation of inventory - It may be of trading stock, raw materials, manufacturing stores, tools or of other similar items (readily) capable of conversion into cash. The loss may be the result of a theft by an employee once or repeatedly over a long period, when the same have not been detected. Such thefts usually are possible through collusion among a number of persons. Therefore, for their detection, the entire system of receipts, storage and despatch of all goods, etc. should be reviewed to localise the weakness in the system.

20.37 Advanced Auditing and Professional Ethics

The determination of factors which have been responsible for the theft and the establishment of guilt would be difficult in the absence of: (a) a system of inventory control, and existence of detailed record of the movement of inventory, or (b) availability of sufficient data from which such a record can be constructed. The first step in such an investigation is to establish the different items of inventory defalcated and their quantities by checking physically the quantities in inventory held and those shown by the Inventory Book.

Afterwards, all the receipts and issues of inventory recorded in the Inventory Book should be verified by reference to entries in the Goods Inward and Outward Registers and the documentary evidence as regards purchases and sales. This would reveal the particulars of inventory not received but paid for as well as that issued but not charged to customers. Further, entries in respect of returns, both inward and outward, recorded in the financial books should be checked with corresponding entries in the Inventory Book. Also, the totals of the Inventory Book should be checked. Finally, the shortages observed on physical verification of inventory should be reconciled with the discrepancies observed on checking the books in the manner mentioned above. In the case of an industrial concern, issue of raw materials, stores and tools to the factory and receipts of manufactured goods in the godown also should be verified with relative source documents.

Defalcations of inventory, sometimes, also are committed by the management, by diverting a part of production and the consequent shortages in production being adjusted by inflating the wastage in production; similar defalcations of inventories and stores are covered up by inflating quantities issued for production. For detecting such shortages, the investigating accountant should take assistance of an engineer. For that he will be more conversant with factors which are responsible for shortage in production and thus will be able to correctly determine the extent to which the shortage in production has been inflated. In this regard, guidance can also be taken from past records showing the extent of wastage in production in the past. Similarly, he would be able to better judge whether the material issued for production was excessive and, if so to what extent. The per hour capacity of the machine and the time that it took to complete one cycle of production, also would show whether the issues have been larger than those required.

20.6.6 Investigation on behalf of an individual or firm proposing to buy a business

Scope of investigation - The objective of such an investigation is to collect such information as would enable the purchaser to decide whether it is worthwhile to buy the business and if so, for what amount. The investigation should proceed broadly on the same lines as for valuation of shares.

Additional matters which must receive the attention of the investigating accountant on which, if appropriate, information to the client should be given.

(A) In case of proprietary concerns or partnerships -

- (i) Reasons for the sale of the business and the effect on turnover and profits that there would be on retirement of the present proprietor (or partners).
- (ii) The length of lease under which the premises are held; the prospects of its renewal or extension.

- (iii) The unexpired period of any patents owned by the vendors.
 - (iv) The age of the present managerial staff and the prospects of continuing in service under the new proprietorship and the possible liability, not already provided for that would arise as regards payment of pensions or gratuities in case of old and aged employees and those retrenched.
 - (v) If the bulk of sales are made to customers whose number is small, the profitability of the business would be greatly shaken on withdrawing their support. This would be an element of weakness which should be investigated as it might affect future profitability.
 - (vi) The valuation that could be placed on goodwill to determine whether that appearing in the book is less or more; if none is included to determine the amount that should be included, if at all.
- (B) If the business belongs to a limited company** -The vendors' interest in this case will be purchased by the acquisition of shares. On that account, the following additional matters would also require consideration:
- (i) The authorised and issued capital of the company.
 - (ii) Whether there is any uncalled liability on the shares.
 - (iii) If the capital is divided into different classes of shares - the rights that are attached to each class.
 - (iv) Particulars of dividends paid in the past and the amounts thereof which are in arrear (on cumulative preference shares).
 - (v) If there are any mortgages created on the assets appearing in the company's books, a search should be made in the Register of Charges in the office of the Registrar of Companies.
 - (vi) The price at which the shares are being offered. If the company is a public company, the price will usually be in excess of market price quoted on the Stock Exchange, but in the case of unquoted shares particularly where the company whose shares are being acquired is a private company, a valuation will have to be placed on the shares for the purpose of purchase.

20.6.7 Investigation in connection with review of profit/financial forecasts

There are many investigations which involve an examination of future profits. Profit reports can be required as part of a general investigation into the purchase of a business or by banks and financial institutions with regard to project cash flow and profitability statements for appraisal of loan applications submitted by the intending borrowers. All forecasts depend, to a large extent, on the nature of the business with its numerous and substantial uncertainties. Therefore, such forecasts are not capable of verification by the reporting accountants in the same way as financial statements which present the results of a completed accounting period. Normally, such situations involve special review as these depart from the auditor's traditional role of expressing an opinion in relation to past events.

20.39 Advanced Auditing and Professional Ethics

For quite a long time, professional accountants have been involved in the preparation or review of profit forecasts to be submitted by intending borrowers to banks and financial institutions. These institutions place a greater reliance on such statements if they are prepared or reviewed by chartered accountants. As a large number of chartered accountants are undertaking the preparation and review of profit and financial forecasts for submission to banks and financial institutions, the ICAI had issued a guidance note on this subject. The guidance note discussed various considerations and important matters to which the accountants should direct their attention in reviewing the forecasts. It also contained guidelines for preparation of the report. Pursuant to the growing implications in this arena, ICAI issued SAE 3400 on “Examination of Prospective Financial Information” to deal with the subject matter. Consequent upon to the issue of this Standard, the erstwhile Guidance Note stands withdrawn.

20.7 Due Diligence

Due Diligence refers to a comprehensive appraisal of a business undertaken by a prospective buyer/investor, specifically to establish its assets and liabilities and ascertain its commercial potentiality. It is a term that is often heard in the corporate world these days in relation to corporate restructuring. The term '*corporate restructuring*' normally includes internal reconstruction, amalgamations, spin-offs, divestiture, mergers, joint ventures, split-off, etc. Certain corporate restructuring exercises are not within the group (also known as external corporate restructuring exercises), for example, a joint venture between two parties where one party hives off an existing unit or division into another company into which the joint venture partner then acquires an interest or has acquired an interest. These are all corporate restructuring exercises that involve more than one party. For such a corporate restructuring exercise to succeed, it must be planned properly. A key element in such an exercise, where it involves the acquisition of another entity, unit or assets of an entity, is the performance of a “due diligence” review.

FIG. 1: Image showing due diligence file*

Due Diligence may also required to be performed in cases of venture capital financing, lending, leveraged buyouts, public offerings, disinvestment, corporatisation, etc. Sometimes, in a restructuring exercise, while the unit may remain within a group, it may pass from under the charge of one management team to that of another team. This situation also gives rise to the need for a due diligence review.

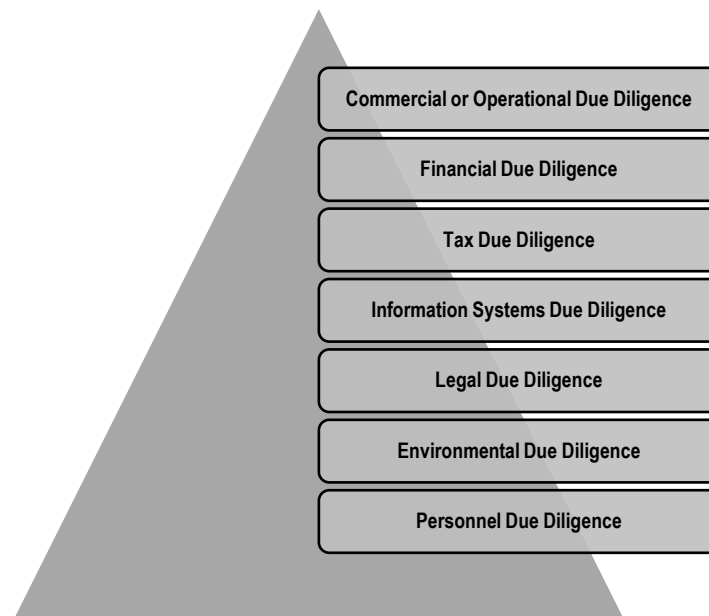

Purpose of Due-Diligence - The purpose of due diligence is to assist the purchaser or the investor in finding out all the reasonably can about the business he is acquiring or investing in

* Source: www.lyagency.co.ke

prior to completion of the transaction including its critical success factors as well as its strength and weaknesses.

In addition, it may expose problems or potential problems that can be addressed in the price negotiations or by dealing suitable clauses in the contractual documentation, in particular, warranty and or indemnity provisions.

Due Diligence can be sub-classified into discipline-wise exercises in following diagram:

20.7.1 Commercial or operational Due Diligence

Operational due diligence is generally performed by the concerned acquirer enterprise (due diligence may also be commissioned by the enterprise for the sale of its business or part of a business), and involves an evaluation from a commercial, strategic or operational perspective. For example, whether proposed merger would create operational synergies. On the other hand, financial due diligence review would be performed after the commercial valuation. Accordingly, while a preliminary review might be performed during initial stages of the restructuring exercise and may, in fact, be performed simultaneously with the commercial evaluation, at a later stage, financial due diligence may be performed on the books of account and other information directly pertaining to the financial matters of the entity. In addition, a legal due diligence may be required where legal aspects of functioning of the entities are reviewed; for example, the legal aspects of property owned by the entity or compliance with various statutory requirements under various laws. Like other due diligence exercises, environmental and personnel due diligence are also carried out in order to establish whether various propositions with regard to environment and personnel of the enterprise under review are appropriate.

20.7.2 Financial Due Diligence

At times, the financial due diligence review is interpreted as complete due diligence review since it is supposed to ascertain the financial implications of all the other due diligence reviews. This is, however, not appropriate. The term 'financial due diligence' should be used with caution. Unless the scope of financial due diligence to be performed is wide enough to cover all the aspects, it should not be confused with overall due diligence review.

It can be understood from the foregoing that the role of financial due diligence commences after a price has been agreed for the business. The initial price and other decisions are taken on the basis of net worth as well as trend of profitability of the target company, with an assumption that all contingent liabilities that may impact the future of the business have been recorded. The principal objective of financial due diligence, therefore, is usually to look behind the veil of initial information provided by the company and to assess the benefits and costs of the proposed acquisition/merger by inquiring into all relevant aspects of the past, present and future of the business to be acquired/merged with.

In order to achieve its objective, the due diligence process can include any or all of the following objectives for individual areas of the verification:

- ◆ Brief description of the history of business
- ◆ The background of promoters
- ◆ Accounting policies and practices
- ◆ Management information systems
- ◆ Details of management structure
- ◆ Trading results both past and the recent past
- ◆ Assets and liabilities as per latest balance sheet
- ◆ Current status of Income tax assessments including appeals pending against tax liabilities assessed by tax authority.
- ◆ Cash flow patterns
- ◆ The projection of future profitability

If a full fledged financial due diligence is conducted, it would include the following matters, *inter alia*, in its scope:

- (a) Brief history of the target and background of its promoter
- (b) Accounting policies
- (c) Review of financial statements
- (d) Taxation
- (e) Cash flow
- (f) Financial Projection
- (g) Management and employees

(h) Statutory Compliance.

(a) Brief history of the target and background of its promoters - The accountant should begin the financial due diligence review by looking into the history of the company and the background of the promoters. The details of how the company was set up and who were the original promoters has to be gone into, before verification of financial data in detail. An eye into the history of the target may reveal its turning points, survival strategies adopted by the target from time to time, the market share enjoyed by the target and changes therein, product life cycle and adequacy of resources. It could also help the accountant in determining whether, in the past, any regulatory requirements have had an impact on the business of the target. Broadly, the accountant should make relevant enquiries about the history of target's business products, markets, suppliers, expenses, operations. This could, inter alia, include the following:

- ◆ Nature of business(es) (for example, manufacturer, wholesaler, financial services, import/export).
- ◆ Location of production facilities, warehouses, offices.
- ◆ Employment (for example, by location, supply, wage levels, union contracts, pension commitments, government regulation).
- ◆ Products or services and markets (for example, major customers and contracts, terms of payment, profit margins, market share, competitors, exports, pricing policies, reputation of products, warranties, order book, trends, marketing strategy and objectives, manufacturing processes).
- ◆ History of the business with important suppliers of goods and services (for example, long-term contracts, stability of supply, terms of payment, imports, methods of delivery such as "just-in-time").
- ◆ Inventories (for example, locations, quantities).
- ◆ Franchises, licenses, patents.
- ◆ Important expense categories.
- ◆ Research and development.
- ◆ Foreign currency assets, liabilities and transactions.
- ◆ Legislation and regulation that significantly affect the entity.
- ◆ Information systems.

(b) Accounting policies - The accountant should study the accounting policies being followed by the target and ascertain whether any accounting policy is inappropriate. The accountant should also see the effects of the recent changes in the accounting policies. The target might have changed its accounting policies in the recent past keeping in view its intention of offering itself for sale. The overall scope has to be based on the accounting policies adopted by the management. The accountant has to look at the main effect of accounting policies on the overall profitability and their correctness. It is reiterated that the

20.43 Advanced Auditing and Professional Ethics

accountant should mainly look at all material changes in Accounting Policies in the period subjected to review very carefully.

The accountant's report should include a summary of significant accounting policies used by the target, that changes that have been made to the accounting policies in the recent past, the areas in which accounting policies followed by the target are different from those adopted by the acquiring enterprise, the effect of such differences.

(c) Review of Financial Statements - Before commencing the review of each of the aspect covered by the financial statements, the accountant should examine whether the financial statements of the target have been prepared in accordance with the Statute governing the target, Framework for Preparation and Presentation of the Financial Statements and the relevant Accounting Standards. If not the accountant should record the deviations from the above and consider whether it warrant an inclusion in the final report on due diligence.

After having an overall view of the financial statements, as mentioned in the above paragraphs, the accountant should review the operating results of the target in great detail. It is important to make an evaluation of the profit reported by the target. The reason being that the price of the target would be largely based upon its operating results. The accountant should consider the presence of an extraordinary item of income or expense that might have affected the operating results of the target. It is advisable to compare the actual figures with the budgeted figures for the period under review and those of the previous accounting period. This comparison could lead the accountant to the reasons behind the variations. It is important that the trading results for the past four to five years are compared and the trend of normal operating profit arrived at. The normal operating profits should further be benchmarked against other similar companies. Besides the above, and based on the trend of operating results, the accountant has to advise the acquiring enterprise, through due diligence report, on the indicative valuation of the business. In the case of many enterprises, the valuation is mainly based on the value of net assets only. For valuation of immovable properties and plant, if required, the assistance of expert valuers could also be taken. The exercise to evaluate the balance sheet of the target company has to take into consideration the basis upon which assets have been valued and liabilities have been recognised. The net worth of the business has to be arrived at by taking into account the impact of over/under valuation of assets and liabilities. The accountant should pay particular attention to the valuation of intangible assets. The objective of the Due Diligence exercise will be to look specifically for any hidden liabilities or over-valued assets.

Examples of Hidden Liabilities are:

- ◆ The company may not show any show cause notices which have not matured into demands, as contingent liabilities. These may be material and important.
- ◆ The company may have given "Letters of Comfort" to banks and Financial Institutions. Since these are not "guarantees", these may not be disclosed in the Balance sheet of the target company.

- ◆ The Company may have sold some subsidiaries/businesses and may have agreed to take over and indemnify all liabilities and contingent liabilities of the same prior to the date of transfer. These may not be reflected in the books of accounts of the company.
- ◆ Product and other liability claims; warranty liabilities; product returns/discounts; liquidated damages for late deliveries etc. and all litigation.
- ◆ Tax liabilities under direct and indirect taxes.
- ◆ Long pending sales tax assessments.
- ◆ Pending final assessments of customs duty where provisional assessment only has been completed.
- ◆ Agreement to buy back shares sold at a stated price.
- ◆ Future lease liabilities.
- ◆ Environmental problems/claims/third party claims.
- ◆ Unfunded gratuity/superannuation/leave salary liabilities; incorrect gratuity valuations.
- ◆ Huge labour claims under negotiation when the labour wage agreement has already expired.

Examples of Over Valued Assets could be:

- ◆ Uncollected/uncollectable receivables.
- ◆ Obsolete, slow non-moving inventories or inventories valued above NRV; huge inventories of packing materials etc. with name of company.
- ◆ Underused or obsolete Plant and Machinery and their spares; asset values which have been impaired due to sudden fall in market value etc.
- ◆ Assets carried at much more than current market value due to capitalization of expenditure/foreign exchange fluctuation, or capitalization of expenditure mainly in the nature of revenue.
- ◆ Litigated assets and property.
- ◆ Investments carried at cost though realizable value is much lower.
- ◆ Investments carrying a very low rate of income / return.
- ◆ Infructuous project expenditure/deferred revenue expenditure etc.
- ◆ Group Company balances under reconciliation etc.
- ◆ Intangibles of no value.

(d) Taxation - Tax due diligence is a separate due diligence exercise but since it is an integral component of the financial status of a company, it is generally included in the financial due diligence. It is important to check if the company is regular in paying various taxes to the Government. The accountant has to also look at the tax effects of the merger or acquisition.

(e) Cash Flow - A review of historical cash flows and their pattern would reflect the cash generating abilities of the target company and should highlight the major trends. It is important

20.45 Advanced Auditing and Professional Ethics

to know if the company is able to meet its cash requirements through internal accruals or does it have to seek external help from time to time. It is necessary to check if a) Is the company able to honour its commitments to its trade payables, to the banks, to government and other stakeholders b) How well is the company able to turn its trade receivables and inventories c) How well does it deploy its funds d) Are there any funds lying idle or is the company able to reap maximum benefits out of the available funds?

(f) Financial Projections - The accountant should obtain from the target company the projections for the next five years with detailed assumptions and workings. He should ask the target to give projections on optimistic, pessimistic and most likely bases.

Ordinarily, it would be desirable that the accountant evaluates the appropriateness of assumption used in the preparation and presentation of financial projections. If, the accountant is of the opinion that an assumption used by the target is unrealistic, the accountant should consider its impact on the overall valuation of the company. He should offer his comments on all the assumption, highlighting those which, in his opinion are not inappropriate. In case he feels the projections provided by the target are not achievable or aggressive he has to mention this in his report. He should thoroughly check the arithmetic of the calculations made for financial projections.

(g) Management and Employees - In most of the companies which are available for take over the problem of excess work force is often witnessed. It is important to work out how much of the labour force has to be retained. It is also important to judge the job profile of the administrative and managerial staff to gauge which of these match the requirements of the new incumbents. Due to complex set of labour laws applicable to them, companies often have to face protracted litigation from its workforce and it is important to gauge the likely impact of such litigation.

It is important to see if all employee benefits like Provident Fund (P.F.), Employees State Insurance (E.S.I.), Gratuity, leave and Superannuation have been properly paid/ provided for/funded. In case of un-funded Gratuity, an actuarial valuation of the liability has to be obtained from a reputed actuary. The assumptions regarding increase in salaries, interest rate, retirement etc. have to be gone into to see if they are reasonable. It is also necessary to see if the basic salary /wage considered for the valuation is correct and includes all elements subject to payment of Gratuity. In the case of PF, ESI etc. the accountant has to see if all eligible employees have been covered.

It is very important to consider the pay packages of the key employees as this can be a crucial factor in future costs. One has to carefully look at Employees Stock Option Plans; deferred compensation plans; Economic Value Addition and other performance linked pay; sales incentives that have been promised etc. It is also important to identify the key employees who will not continue after the acquisition either because they are not willing to continue or because they are to be transferred to another company within the 'group' of the target company.

(h) Statutory Compliance - During a due diligence this is one aspect that has to be investigated in detail. It is important therefore, to make a list of laws that are applicable to the entity as well as to make a checklist of compliance required from the company under those

laws. If the company has not been regular in its legal compliance it could lead to punitive charges under the law. These may have to be quantified and factored into the financial results of the company.

20.7.3 Contents of a Due Diligence Report

The contents of a due diligence report will always vary with individual circumstances. Following headings are illustrative:

Example of Headings of a Due Diligence Report

- ◆ Executive Summary
- ◆ Introduction
- ◆ Background of Target
- ◆ Objective of due diligence
- ◆ Terms of reference and scope of verification
- ◆ Brief history of the company
- ◆ Share holding pattern
- ◆ Observations on the review
- ◆ Assessment of management structure
- ◆ Assessment of financial liabilities
- ◆ Assessment of valuation of assets
- ◆ Comments on properties, terms of leases, lien and encumbrances.
- ◆ Assessment of operating results
- ◆ Assessment of taxation and statutory liabilities
- ◆ Assessment of possible liabilities on account of litigation and legal proceedings against the company
- ◆ Assessment of net worth
- ◆ Interlocking investments and financial obligations with group / associates companies, amounts receivables subject to litigation, any other likely liability which is not provided for in the books of account
- ◆ SWOT ANALYSIS
- ◆ Comments on future projections
- ◆ Status of charges, liens, mortgages, assets and properties of the company
- ◆ Suggestion on ways and means including affidavits, indemnities, to be executed to cover unforeseen and undetected contingent liabilities
- ◆ Suggestions on various aspects to be taken care of before and after the proposed merger/acquisition

CASE STUDIES

I. Excess Claim for Loss of Stocks

This is a case study of an investigation in respect of a major insurance claim where an investigator was appointed by surveyors for evaluation of stocks.

Introduction

An investigator (for that matter even an auditor, whether statutory, Internal, or Concurrent) has to be attentive to deficiencies or weaknesses in internal controls. Such deficiencies or weaknesses expose the client to possibilities of errors and frauds. The significant difference between the two is that errors are a result of either inefficiency or oversight, while frauds are the result of shrewd planning by the fraudster. Further, errors can be more easily located since they would have been inadvertently committed without any intention of concealment, while camouflaging of frauds would be deliberate and intelligent. Therefore, the investigator (or auditor) has to modify his approach in circumstances where fraud is suspected.

It is always advisable for an investigator (or auditor) to review all his findings objectively towards the completion of the assignment, just before finalizing his report. This would enable him to have an overview of all his observations. He must ask himself "Do all the facts and pieces of evidence fit in logically? Is there any indication of mismatching of facts? Do the data tie up with the current, circumstances? Is there any unusual or strange pattern?" A study of the findings is likely to give him a wealth of information. This exercise may reveal latent errors or frauds.

The following case study explains how an investigator was able to detect a major insurance fraud.

Facts of the case

ABC was a partnership firm trading in television sets. It stocked several models of television sets of various companies. The stocks were kept at a warehouse. After an outbreak of fire in the warehouse, ABC lodged a claim with the insurance company. The claim was for ₹ 200 lacs for about 1550 television sets. Stock records which were maintained at the warehouse included the following:

1. Goods Inward Notes
2. Delivery Challans
3. No Charge Invoices for free replacements
4. Stock Ledger (ledger page for each model of television)

A parallel stock, ledger was maintained at the office also.

The insurance company sent an investigator to assess the claim of ABC. Since the warehouse was completely reduced to cinders, the only quantitative record available was the stock ledger at the office. The investigator went about his task meticulously. First he gathered all the routine information — list of books of account, purchase and sales procedures, levels of authorities in force, and list of suppliers and customers. He also documented, in brief, the nature of the business and the background of the owners. Since his focus was on the insurance claim. He concentrated his efforts on the examination of stock ledger, purchases and sales.

Investigator's approach and plan

The investigator conducted the investigation with two broad objectives in mind:

- (a) To assess the correctness of the quantities of the stock-on-hand as on the date of fire.
- (b) To satisfy himself that the valuation was fair and reasonable.

As regards (a), he adopted the following procedure:

- (i) He traced the opening balances from the last audited physical verification statement.
- (ii) He checked the castings of the stock ledger for all the quantities received and sold.
- (iii) He traced quantities of goods received from the Purchase Register and suppliers' challans (since GRNs were lost).
- (iv) He traced quantities of goods sold from the sale register.
- (v) He traced the free replacements from the Claims Register and obtained confirmations in writing from the partners that barring those shown in the register, there were no other free replacements.
- (vi) He listed damaged or defective stock on the basis of the Claims Register.
- (vii) He traced quantities of returns from both credit notes and debit notes into the stock register.
- (viii) He could not get any feedback from the storekeeper since the latter had been hospitalised after the fire and had subsequently gone back to his village.

As regards the findings, he had nothing unusual to report. Everything seemed to be correct. All the checks detailed above did not reveal any discrepancy.

As regards (b), the procedure was fairly simple since it was only a trading firm. The firm had adopted the FIFO basis of valuation and, therefore, the cost of stock was derived from the latest purchase bill. The insurance company was satisfied with this because, as per the policy, it had to reimburse the claimant at the 'replacement value'.

The investigator then decided to examine all the facts collectively before finalising his report.

Results and findings

Though he did not have any specific query, the following observations were unusual:

- ◆ The past audited physical verification statement as well as the earlier balance sheets of the firm disclosed stocks which were less than 50 % of the stocks value as on the date of the fire.
- ◆ Faxed orders-on-hand as on the date of fire did not even add up to 15 % of the stocks claimed to have been lost.
- ◆ Some of the purchases during the last few days before the fire were made without any advance being paid. In the past, by and large, purchases were made with 50% advance to suppliers. The payments were made after the date of fire.
- ◆ Suppliers' challans for the purchases stated above did not bear the usual godown keepers' signature.

20.49 Advanced Auditing and Professional Ethics

All these facts led the investigator to believe that the stocks had been overstated in the claim. However, none of these observations were really sufficient for him to conclusively prove that stocks were overstated. He asked the firm for explanations which were given in respect of each of the above observations as follows:

- (a) The increase in the quantum of stocks was due to major sales drive which the firm was proposing to launch shortly. They had been negotiating a major order with a new client, which was in the process of finalisation.
- (b) A lot of verbal and telephonic orders were received as on the date of fire.
- (c) Due to growing competition, some of the suppliers were willing to favour the Firm by not insisting advance payments.
- (d) Due to heavy traffic, a large consignment of stocks came late at night when the usual warehouse keeper was not there and one of the partners had himself come and accepted the stocks.

Obviously, some concrete evidence was required to disprove the claim. The investigator decided to visit the warehouse to see if any more evidence was available. It was at the warehouse that he hit upon the solution to the problem of proving the absurdity of the claim. The dimensions of the warehouse apparently did not seem to practically permit more than 1000 television sets to fit in. He called for the layout of the warehouse and took the actual measurements of the smallest television set stocked by the firm. Even if these had been the only sets stocked by the firm, not more than 1200 sets could be fitted in the godown without even providing for space for human movement. Also, stacking norms permitted only 3 television boxes in a column, further restricting the number of sets, which could be stored. When these queries were raised, the firm accepted that there seemed to be an 'error' and reduced the claim unconditionally.

Lessons to be learnt

Dimensional limits of storage of assets can be the most important consideration in determination of an asset quantification. It is logical to presume that the inventory cannot be more than:

- (a) The physical limits of space available.
- (b) The permissible storage facility. The storage facility limits may not merely be on account of dimensions. For instance, stocks may be governed by stocking norms for safety or prevention of damage. To illustrate a godown having stacks of pressure cookers may have a height to accommodate 15 pressure cookers, but storage may not be permitted over 10 cookers cartons vertically since the cookers may not be able to withstand the weight of more than 9 cartons on top.
- (c) Legal constraints.
- (d) Certain items of plant and machinery may technically require certain open space or clear area surrounding it or on top thereby restricting the number of such assets in a given area.

Wherever the investigator (auditor) deems fit, he should obtain technical guidance on the storage and custody of the assets as per the plan and layout furnished by the client. This would give the investigator (auditor) the upper limit of the asset quantification with suitable.

Modifications and adjustments for stocks lying with third parties and third party stocks lying with the client.

The point that this case study highlights is that an effective investigation warrants all the examination and review procedures are adopted in harmony and objectively. The findings have to be viewed both individually and collectively and the results must ring true. Illogical trends, patterns or mismatches of facts are the significant pointers to the investigator or auditor, as the case may be. It is up to him to examine them and draw his conclusions appropriately.

II. Embezzlement of Cash

This is a case study where an investigator was appointed by an insurance company to assist the surveyors in investigating into a major insurance claim involving embezzlement of cash.

Introduction

Man has been known to exploit situations of crisis and disaster, because human, nature is frail and easily susceptible to temptation. Accordingly, an investigator needs to be alert to the increased probability of fraud in circumstances of disaster and crisis. The following is a case, which amply illustrates this point.

Facts of the case

A supermarket, having a very large turnover in cash sales of all kinds of items such as groceries, foodstuffs, sweets, chocolates, meat, and other related items, was severely looted during an outbreak of riots and was literally reduced to shambles. Foodstuffs, sweets, and other traded items were looted or strewn all over. The supermarket remained shut for a few days after the riots since the stocks and scraps could not be disposed of until permitted by the Police and the insurance company. A police complaint was filed but the stolen goods and cash could not be recovered. The insurance company started making preparations for assessment of the claim. As per the standard approved procedure, insurance surveyors were appointed to assess the claim for:

Loss of stocks: ₹ 1.25 crores.

Loss of cash : ₹ 1.5 lacs. An amount of ₹ 8 lacs was left back in the cash box which had been forcibly broken open.

Investigator's approach and plan

The surveyors appointed a chartered accountant as an investigator to help them in evaluating the claim. The following procedures were performed by him:

- (a) Photographs and a video film of the site evidencing the actual damage were examined.
- (b) Copy of the police complaint was obtained and kept on record.
- (c) Books of account and stock records were asked for. It was explained that these were fully destroyed and found to be in a torn, damaged or mutilated condition in the inner accounts office which was also not spared by the rioters.
- (d) Monthly physical stock statements sent to the bank till the date of damage were also compared with the estimate of the claim to assess the reasonableness of the claim.

20.51 Advanced Auditing and Professional Ethics

- (e) In respect of the 'A' category items (top 70% in value), investigator derived the quantities of items of closing stock using the last audited physical verification stock sheet as the starting point and adjusting subsequent receipts (from statements submitted by vendors) and issues (from statements submitted to sales tax consultant).
- (f) Both the cash on hand and the stocks were tested for 'goodness of fit' in the trends seen for the relevant periods. As far as the cash balance was concerned, it was actually estimated on the basis of the average daily balance for the previous year which seemed reasonable, considering that sales during the current period were at least 12% higher. Stock value was compared with the average stock value for the last three years and fitted reasonably to the trend.
- (g) Routine statements were taken from the cashiers and the salesmen. Apparently, when the supermarket was opened the day after the riots the entire premises were found ransacked. The manager had designated the person in-charge to assess the damage in his individual department and report on its status after taking note of the physical condition and quantity of the inventory. On the basis of these reports, made informally initially, an estimate of the loss was made.

Results and findings

General symptoms did not seem to point out anything adverse or extraordinary. It seemed as if the claim was reasonable and acceptable under the circumstances. However, the investigator decided to probe further. He asked for routine, but essential information such as the list of books and records maintained and documents in use and the system of accounting in force. In addition to the analysis of historical data of cash, sales and stocks as above, the investigator even asked for assistance in gathering and preserving documents in whatever condition they appeared to be in and expressed a desire to examine each scrap of paper himself. The investigator, eventually, came across the proof. He found some torn faxes dated three days subsequent to the date of the riots! Obviously, the rioters had not come back to damage the papers. It had to be someone else who would benefit from the destruction of papers. Moreover, it had to be someone who had been the first to visit the cash department immediately after the date of the riots. The cashier, on being confronted with the faxes, confessed that in order to take advantage of the situation, he had taken out the money and destroyed all the papers in the cashier's office to make it seem as if the cash box had also been broken open and looted. He admitted that there was indeed no damage in the inner account office. This also gave him an opportunity to cover up his earlier embezzlement by destroying all the records.

How then did the investigator guess that something was wrong when all other tests did not indicate so? Partly it was his experience. He had seen a case where an income tax assessee had deliberately taken advantage of a fire in his office to destroy certain records for avoiding disconcerting tax queries. He saw a similar opportunity here for a typical cash fraud. Secondly, it was unlikely that rioters would leave 8.5 lacs in the cash box and destroy each and every document in the office. The normal psychology of any human being would be to take off with money rather than go on rampage where no material gain was likely.

Lessons to be learnt

The case study highlights:

- (a) Disaster and crisis can provide unbelievable opportunity for perpetrating frauds, and

- (b) a fraud can be very easily camouflaged and it is very easy to fall into a trap of believing what one sees.

Thus, in situations of disaster and crisis, the investigator must not fall into the trap of believing and depending only on what is apparent, unless he has eliminated every other possibility. In such situations, he can effectively adopt the principle of 'mistrust the obvious'. He should leave no stone unturned and satisfy himself that all evidence is reliable and, if not, must clearly state in his report the extent of gap or insufficiency in the evidence. The management must be informed of all possible consequences of damage/ loss through such gaps in the evidence.

III. Misuse of a Discount Scheme

This is a case study highlighting the use of the technique of "Investigator's Bluff" to detect misuse of a discount scheme.

Introduction

Investigation goes beyond a mere exercise of examining books and records produced before an investigator. Application of skill and expertise by the investigator is essential to get meaningful and useful results. In this context, inspection, physical verification, or visit to place of manufacturing, trading, marketing or any other place of activity assumes immeasurable importance in collection and gathering of evidence. The following case study highlights the importance of inspection and use of the technique of "Investigator's Bluff".

Facts of the case

A trading concern, dealing in chocolates and sweets and having a chain of retail outlets in all the metro cities, decided to have an incentive scheme to induce shoppers to visit its shops again. The scheme required shoppers to make a purchase of more than ₹ 1,000 to entitle them to get a 10% discount coupon for their next visit. A placard was prominently displayed at each of the shops to advertise the discount scheme. Appropriate internal controls in the form of pre-numbered receipt books and discount coupons were also introduced.

Pursuant to the scheme, sales of all the metros, showed an upswing as expected, except in one city where even after the introduction of the discount scheme, the sales had not increased, though large values of discounts had been availed of the management was intrigued by this and appointed an investigator to look into the matter.

Investigator's approach and plan

The investigator's plan covered examination of the following:

- ◆ Sales
- ◆ Purchases
- ◆ Cash and bank transactions
- ◆ Salaries
- ◆ Journal entries
- ◆ Other books of account

Results and findings

The investigator did not notice anything untoward and the financial statements and the books of account seemed to be in order. The serial numbers controls, cash totals and cash registers appeared to be satisfactory. The investigator then decided to personally visit the concerned metro to look into the matter.

On a personal visit, the first thing he noticed was that the placard regarding the scheme was not displayed. Obviously, shoppers could have had no other way of knowing whether such a scheme was in force unless the cashier was, as a matter of routine, informing shoppers purchasing chocolates worth ₹ 1,000 or more, of the discount entitlement and furnishing discount coupons. He went through all the past discount coupons encashed by customers and found that most of the shoppers who had purchased chocolates and sweets over ₹ 1,000/- had purchased chocolates or sweets worth much more on their next visit. This perhaps was understandable, but even more intriguing was the fact that a lot of shoppers had visited the shop again on the same or the very next day to purchase chocolates. This was certainly unusual because normally chocolates are not 'stocked and a shopper would generally buy his required quantity on the first visit itself. This led the investigator to believe that the discounts claimed were not genuine. However, since the names and addresses of the shoppers were not available, proving any foul play was difficult.

The investigator decided to adopt "Investigator's bluff" technique. He decided to test the scheme by sending a decoy customer who purchased chocolates worth ₹ 2,500. As expected, the customer did not get the discount coupon. He was given a receipt of ₹ 2,500, numbered 20026. The spaces relating to information of discount coupon as well as the net payment amount were left blank in the receipt. At the end of the day, the cashier reported his total cash sales for the day and a statement of account coupons issued, which showed that discount coupon number 2113 had been issued against the receipt 20026. The investigator confronted the cashier about the discount coupon, who confessed that he had fraudulently retained the discount coupon himself, explained how he went about encashing such discount coupons, as follows

Step 1: Receipt say 20001 was issued to XYZ for ₹ 2,500/-

Step 2: Daily Cash Receipt and Discount Coupons Statement would disclose: A discount coupon say 2001 issued to the shopper XYZ against Receipt 20001, though the discount coupon 2001 was actually in possession of the cashier himself.

Step 3: When another customer making a purchase of ₹1,500/- did not ask for a cash receipt, the cashier would make out a receipt for ₹ 1,500/ with ₹ 150/- entered in the discount column, and attach coupon 2001 to that receipt as if that customer was XYZ who had returned to purchase chocolates again with the discount receipt 2001.

Step 4: The cashier would pocket ₹ 150/- and put ₹ 1,350/- In the cash box.

In this manner, he had siphoned off an average of almost ₹ 20,000 per week. This would never have come to light if the investigator had not visited the shop and learnt that the discount scheme, in fact, had never been in operation at all. This explained why the sales at the concerned metro had not increased even after the introduction of the scheme.

Lessons to be learnt

Very often the conventional procedures applied by the investigator do disclose weaknesses in controls and anomalies in findings. However, these procedures may, at times, fail to discover or bring to light the actual damage done and the nature of deceit or trickery. It is, therefore, essential for an investigator to adopt effective fact-finding techniques to determine whether all policies and control procedures are being implemented or not. That is also why personal inspection, visits and 'walk-through tests' are very meaningful, and where situation so demands, an "investigator's bluff", as shown above, can be used.

IV. Duplicate Documentary Evidence used to Raise False Claims

This is a case study wherein duplicate documentary evidence used to support a payment was detected by an investigator.

Introduction

In spite of various controls in an organisation, it is difficult to rule out the possibility of a payment being made on the basis of duplicate supporting evidence. It is not easy to lay down a plan applicable in all situations regarding the steps to be taken to prevent such payments. The following case study illustrates this point.

Facts of the case

A Company was spending several lacs of rupees on advertising through hoardings at prominent places in the city. The usual evidence of such an expenditure was in the form of:

- ◆ Agreement with the owner of the hoarding site, specifying the details of the size of the hoarding, the subject matter with a description of the hoarding, location, rate, and the period for which the hoarding was to be kept.
- ◆ Agreement regarding the maintenance of the hoarding, i.e., touching-up and cleaning periodically for removal of dust, erasures due to rain, etc.
- ◆ Photograph of the hoarding.
- ◆ Bill for rent charged by the owner of the site.
- ◆ Certification by an independent agency as regards verification and compliance of the terms and conditions of the agreement with the owner of the hoarding site.

Investigator's approach and plan

1. Compliance with agreement: The investigator verified the compliance of the terms of agreements, as per the checklist prepared by him.
2. Vouching of bills: The bill for rent charged by the site owner was checked to ensure that it was supported by a 'physical inspection report' and photographs.

Results and findings

At a first glance, the evidence stated above appeared to be sufficient. There was nothing in the inspection report to suggest any non-compliance of any of the terms of the agreement. However, one small detail in the photograph attached to the bill caught the investigator's attention. The photograph showed the hoarding next to a small poster of a film running at a particular cinema hall. He knew that particular cinema hall had been demolished well over a year ago. Just to satisfy himself, the investigator asked for the previous year's file and on examining it he found that the photographs of the

20.55 Advanced Auditing and Professional Ethics

hoardings attached were duplicates of those in the previous year. The investigator notified the management and suggested that a physical verification be carried out immediately to ascertain whether the hoarding was satisfactorily displayed at the site. An independent check was carried out and the results were startling. Not only had the company's hoarding been removed from its designated place on the date of verification, but its competitor was given the hoarding site for which the rent was being collected from the company. On making further inquiries with local residents, it was learnt that the hoarding of the company had been removed many months ago. The company took legal action against the owner of the hoarding site and the agency, which was responsible for carrying out the physical inspection.

Lessons to be learnt

It is necessary to minutely examine the evidence particularly where the investigator is dependent on another agency for physical inspection or verification. In this case though there was no real necessity for the investigator to call for the previous year's records, yet, on a suspicion as mentioned above, he called for the previous year's photographs and a comparison provided the clue as to the possibility of existence of a foul play. Keen examination of photographs revealed that they were identical and thus, the investigator decided to launch a further inquiry and on physical inspection at the site, the actual fraud came to light. Therefore, it is advisable that, in all areas requiring physical verification or inspection, the investigators must include in their checklist, comparison with previous periods' records. For example:

1. Physical verification of investments and comparison with investments which existed in the previous period will disclose bonus shares received or investments stolen or lost.
2. Stock verification statements compared with those related to previous period will indicate the comparative status of old, damaged, unserviceable and obsolete stocks.
3. Similar procedures will be applicable to all assets of the-client lying with third parties.
4. Physical verification or inspection is also likely to enable an investigator to verify the reasonableness and sanctity of expenses incurred.

21.1 Introduction

The term "peer" means a person of similar standing. The term "review" means conduct of re-examination or retrospective evaluation of the subject matter. In general, for a professional, the term "peer review" would mean review of work done by a professional, by another professional of similar standing. 'Peer Review' is defined as, a regulatory mechanism for monitoring the performances of professionals for maintaining quality of service expected of them for enhancing the reliance placed by the users of financial statements for economic decision-making.

As per the Statement of Peer Review "Peer Review" means an examination and review of the systems and procedures to determine whether they have been put in place by the practice unit for ensuring the quality of assurance services as envisaged and implied/mandated by the Technical Standards, Ethical Standards and Professional Standards and whether these were effective or not during the period under review".

Fig. : Peer Review*

The examination and review of a practice unit would be carried out by a "reviewer", i.e., a member, selected from a panel of reviewers maintained by the Board. The term "practice unit" means members in practice, whether practising individually or as a firm of Chartered Accountants.

21.2 Objectives of Peer Review

The main objective of Peer Review is to ensure that in carrying out the assurance service assignments, the members of the Institute-

- (a) comply with Technical, Professional and Ethical Standards as applicable including other regulatory requirements thereto and

* Source : cccpa.com

21.2 Advanced Auditing and Professional Ethics

- (b) have in place proper systems including documentation thereof, to amply demonstrate the quality of the assurance services.

Thus the primary objective of peer review is not to find out deficiencies but to improve the quality of services rendered by members of the profession. The Statement of Peer Review also makes it clear that the peer review, "does not seek to redefine the scope and authority of the Technical Standards specified by the Council but seeks to enforce them within the parameters prescribed by the Technical Standards". The peer review is directed towards maintenance as well as enhancement of quality of assurance services and to provide guidance to members to improve their performance and adherence to various statutory and other regulatory requirements. Such an objective of the peer review process makes it amply clear that the reviewer is not going to sit on the judgement of the *practice unit* while rendering assurance services but to evaluate the procedure followed by the practice unit in rendering such a service. Accordingly, where a practice unit is not following technical standards, the reviewers are expected to recommend measures to improve the procedures. To elaborate further, the key objective of peer review exercise is not to identify isolated cases of engagement failure, but to identify weaknesses that are pervasive and chronic in nature. For instance, absence of formal planning of an audit represents a serious deficiency that needs to be remedied by the practice unit. An instance of the auditor not carrying out physical verification of furniture and fixture may not attract the same comment. However, certain items of assets are best verified through the physical verification process and not adopting the same procedure may rightly be viewed as a systemic failure. The conclusion, therefore, is that the peer review seeks to identify and address patterns of non-compliance with quality control standards.

21.3 Scope of Peer Review

The Statement on Peer Review lays down the scope of review to be conducted as under:

The Peer Review process shall apply to all the assurance services provided by a Practice Unit.

1. Once a Practice Unit is selected for Review, its assurance engagement records pertaining to the Peer Review Period shall be subjected to Review.
2. The Review shall cover:
 - (i) Compliance with Technical, Professional and Ethical Standards:
 - (ii) Quality of reporting.
 - (iii) Systems and procedures for carrying out assurance services.
 - (iv) Training programmes for staff (including articled and audit assistants) concerned with assurance functions, including availability of appropriate infrastructure.
 - (v) Compliance with directions and / or guidelines issued by the Council to the Members, including Fees to be charged, Number of audits undertaken, register for Assurance Engagements conducted during the year and such other related records.

- (vi) Compliance with directions and / or guidelines issued by the Council in relating to article assistants and / or audit assistants, including attendance register, work diaries, stipend payments, and such other related records.

As it is clear from the above, that the Statement of Peer Review aims to confine the scope of review to preceding three years since this would establish the consistency or deviations, if any, in respect of procedures followed by the practice unit. A *Practice Unit* means members in practice, whether practicing individually or a firm of Chartered Accountants.

The Statement defines the scope of peer review which revolves around compliance with technical, ethical and professional standards; quality of reporting; office systems and procedures with regard to compliance of assurance engagements; and, training programmes for staff including article and audit assistants involved in assurance engagements. The entire peer review process is directed at the assurance services. Assurance Services means assurance engagements services as specified in the “Framework for Assurance Engagements” issued by the Institute of Chartered Accountants of India and as may be amended from time to time

As per the Statement, **Technical, Professional and Ethical Standards** - means

- (i) Accounting Standards issued by ICAI and /or prescribed and notified by the Central Government of India;
- (ii) Standards issued by the Institute of Chartered Accountants of India including-
 - (a) Engagement standards
 - (b) Statements
 - (c) Guidance notes
 - (d) Standards on Internal Audit
 - (e) Statements on Quality Control
 - (f) Notifications / Directions / Announcements / Guidelines / Pronouncements / Professional standards issued from time to time by the Council or any of its committees.
- (iii) Framework for the Preparation and presentation of financial statements, framework of statements and Standard on Auditing, Standard on Assurance Engagements, Standards on Quality Control and Guidance Notes on related services issued, from time to time, by the Institute of Chartered Accountants of India and framework for assurance engagements;
- (iv) Provisions of the various relevant statutes and / or regulations which are applicable in the context of the specific engagements being Reviewed including instructions, guidelines, notifications, directions issued by regulatory bodies as covered in the scope of assurance engagements.

Students may note that assurance services shall not include:

- (i) Management Consultancy Engagements;

21.4 Advanced Auditing and Professional Ethics

- (ii) Representation before various Authorities;
- (iii) Engagements to prepare tax returns or advising clients in taxation matters;
- (iv) Engagements for the compilation of financial statements;
- (v) Engagements solely to assist the client in preparing, compiling or collating information other than financial statements;
- (vi) Testifying as an expert witness;
- (vii) Providing expert opinion on points of principle, such as Accounting Standards or the applicability of certain laws, on the basis of facts provided by the client; and
- (viii) Engagement for Due diligence.

The phrase 'Assurance Services' is used interchangeably with Audit Services, Attestation Functions, and Audit Functions.

21.4 Applicability

Practice Units subject to Review

1. Every Practice Unit, based on their category as determined below will be subject to Peer Review in accordance with this statement.

Level I

A Practice Unit which has undertaken any of the under-mentioned assurance services in the period under review:

- (i) Central Statutory Audit of Public Sector Banks, Private Sector Banks, Foreign Banks, Cooperative Banks and Public Financial Institutions;
- (ii) Central Statutory Audit of Central or State Public Sector Undertakings and Central Cooperative Societies based on criteria such as turnover or paid up capital etc. as may be decided by the Board;
- (iii) Central Statutory Audit of Insurance Companies;
- (iv) Statutory Audit of asset management companies or mutual funds;
- (v) Statutory Audit of enterprises whose equity or debt securities are listed in India or abroad;
- (vi) Statutory Audit of Entities which have raised funds from public or banks or financial institutions of over Rupees Fifty Crores during the period under Review;
- (vii) Statutory Audit of Entities which have raised donations and / or contributions over Rupees Fifty Crores during the period under Review;
- (viii) Statutory Audit of entities having Net Worth of more than Rupees Five Hundred Crores at any time during the period under Review;

- (ix) Statutory Audit of entities which have been funded by Central and / or State Government(s) schemes of over Rupees Fifty Crores during the period under Review.

Level II

A Practice Unit which has undertaken any of the under-mentioned assurance services in the period under review:

- (i) Statutory/Internal/Concurrent/Systems/Tax audit and/or Departmental Review of Branches/Offices of
 - (a) Public Sector or Private Sector and / or Foreign Banks;
 - (b) Insurance Companies;
 - (c) Co-operative Banks;
 - (d) Statutory Audit of Regional Rural Banks;
 - (e) Statutory Audit of Non – Banking Financial Companies (NBFCs).
- (ii) Statutory Audit of entities having Net Worth of over Rs. Five Crores or an annual turnover of more than Rs. Fifty Crores during the period under Review.

Level III

Any other Practice Unit providing assurance services not covered in Level I and Level II hereinabove.

- 2. Any Practice Unit not selected for Peer Review, may suo moto apply to the Board for the conduct of its Peer Review. The Board shall act upon the same within 30 days from the date of receipt of such request.
- 3. An Auditee (Client) may request the Board for the conduct of Peer Review of its auditor (Practice Unit). The Board shall act upon the same within 30 days from the date of receipt of such request.

Periodicity of Peer Review

The Periodicity of Peer Review will be:

- (a) Level - I Practice Units – Once in 3 years.
- (b) Level - II Practice Units – Once in 4 years
- (c) Level - III Practice Units – Once in 5 Years

However, if the Board so decides or otherwise at the request of the Practice Unit, the Peer Review for a Practice Unit can be conducted at shorter intervals.

21.5 Peer Review Board

The Board shall be constituted by the Council. The Board shall consist of a maximum of twelve members to be appointed by the Council, of whom not less than 50% shall be from amongst the members of the Council as defined in Section 9 of the Chartered Accountants Act, 1949, as amended from time to time. The Council may nominate members to the Board from outside bodies and from amongst prominent individuals of high integrity and reputation, including but not limited to, regulatory authorities, bankers, academicians economists, legal Professionals and business executives. The Council shall appoint the Chairman and the Vice-Chairman from amongst its elected Council members appointed on the Board. The term of a member shall be for one year, or such other period as may be prescribed by the Council from time to time. Casual vacancies on the Board shall be filled by the Council. A Member of the Disciplinary Committee or the Disciplinary Board or the Committee on Ethical Standards or the Committee on Financial Reporting and Review Board of the Institute of Chartered Accountants of India shall not be a member of the Board.

21.5.1 Eligibility to be a Reviewer

1. A Peer Reviewer shall: -
 - (a) Be a member with at least 10 years of experience in practice.
 - (b) Is in Practice as per the Chartered Accountants Act, 1949.
 - (c) Should have undergone the requisite training as prescribed by the Board.
 - (d) Should furnish a declaration as prescribed by the Board, at the time of acceptance of Peer Review appointment.
 - (e) Should have signed the Declaration of Confidentiality as prescribed by the Board.
 - (f) Should have conducted audit of Level I Entities for at least 7 years to be eligible for conducting Peer Review of Level I Entities as referred to in Para II of this Statement.
2. For being a Reviewer a member should not have: -
 - (i) Disciplinary action / proceedings pending against him
 - (ii) been found guilty by the Council or the Disciplinary Board or Committee at any time.
 - (iii) been convicted by a Competent Court whether within or outside India, of an offence involving moral turpitude and punishable with transportation or imprisonment.
 - (iv) any Obligation or conflict of interest in the Practice Unit or its Partners / Personnel.
3. A Reviewer shall not accept any professional assignment from the Practice Unit for a period two years from the date of appointment.

21.6 The Peer Review Process

The Peer Review process will include-

Image showing Peer Review Process

1. Selection of Practice Unit & appointment of Reviewer:

- (i) Notification to the Practice Unit:
A Practice Unit which has been selected for a Peer Review shall be notified by the Board.
- (ii) Name of three Reviewers shall be recommended by the Board to the Practice Unit so selected.
- (iii) The Practice Unit shall select one out of the three Reviewers & intimate to the Board within seven days of receipt of the names.
- (iv) The Board shall intimate the Reviewer so selected and seek his consent within seven days.

2. Planning:

- (i) Information to be furnished by Practice Unit
On intimation by the Board, of the Reviewer's consent, the Practice Unit shall within 15 days furnish the following information to the Reviewer:
 - Duly filled-in Questionnaire sent by the Board.
 - Complete list of assurance service clients indicating the nature of service provided and the fees charged for the period under Review.
 - A note on the policies and procedures adopted by the Practice Unit in relation to Independence, Staff Supervision and Development, 'Second Person' Review and the process generally followed in carrying out assurance services.
 - Details of any proceedings against the Practice Unit or any of its partners or qualified assistants taken by any regulatory, monitoring or enforcement bodies relating to investigation or allegation of deficiency in the conduct of Attest function by them during the period of three years preceding the period of Review or at any time thereafter i.e. till the date of submission of the duly filled-in Questionnaire.

21.8 Advanced Auditing and Professional Ethics

- (ii) Selection of Sample by the Reviewer:
 - (a) The Reviewer shall within 15 days of receiving the information from the Practice Unit select a sample of the assurance services that he would like to Review and intimate the same to the Practice Unit.
 - (b) The Reviewer may also seek further / additional clarification from the Practice Unit on the information furnished / not furnished.
 - (c) The Reviewer shall plan for an on-site Review visit or initial meeting in consultation with the Practice Unit. The Reviewer shall give the Practice Unit at least fifteen days time to keep ready the necessary records of the selected assurance services.
 - (d) The Reviewer and Practice Unit shall mutually cooperate and ensure that the entire Review process is completed within 90 days from the date of notifying the Practice Unit about its selection for Review.

3. Execution:

- (i) Peer Review visits will be conducted at the Practice Unit's head office or /and branch(es) or any other locations. This on-site Review should not extend beyond seven working days.
- (ii) Compliance Review-General Controls
 - (a) The Reviewer is required to carry out a compliance Review of the following General Controls for evaluating the degree of reliance to be placed upon them for effective Review:
 - ◆ Independence
 - ◆ Maintenance of Professional Skills and Standards
 - ◆ Outside Consultation
 - ◆ Staff recruitment, Supervision and Development
 - ◆ Office Administration
- (iii) Selection of Assurance Service Engagements for Review
 - (a) The number of assurance service engagements to be Reviewed shall depend upon:
 - ◆ Standard of quality controls generally prevailing;
 - ◆ The size and nature of assurance service engagements undertaken by the Practice Unit.
 - ◆ The methodology generally adopted by the Practice Unit in providing assurance services.
 - ◆ The number of partners / members involved in assurance service engagements in the Practice Unit;

- ◆ The number of locations / branch offices of the practice Unit;
 - ◆ The Fees charged / received / service tax paid by the Practice unit.
- (b) From the initial sample selected at the planning stage, the Reviewer, in consultation with the Practice Unit, may reduce or enlarge the initial sample size of assurance service engagements for Review.
- (iv) Review of Records

The Reviewer is required to adopt a combination of compliance approach and substantive approach in the Review process.

(A) Compliance Approach – Assurance Service Engagements

The compliance approach is to assess whether proper control procedures have been established / followed by the Practice Unit to ensure that assurance services are being performed in accordance with Technical, Professional and Ethical Standards.

The following areas shall be considered:

- ◆ Assurance services records for Administration
- ◆ Review and Evaluation of System of Internal controls
- ◆ Substantive Tests
- ◆ Financial Statements Presentation and
- ◆ Assurance Services Conclusions
- ◆ Assurance Services Reporting

(B) Substantive Approach - Assurance Service Engagements

This approach requires a Review of the assurance working papers in order to establish the extent of compliance, whether the assurance work has been carried out as per the Technical, Ethical, and Professional Standards.

4. Reporting:

The Peer Review Report should state that the system of quality control for the assurance services of the Practice Unit for the period under Review has been designed so as to carry out the assurance services in a manner that ensures compliance with Technical, Professional and Ethical standards.

The Peer Review Report shall address his report of compliance or otherwise on the following areas of controls:

- (a) Independence
- (b) Maintenance of Professional skills and standards.
- (c) Outside Consultation
- (d) Staff recruitment, Supervision and Development.

21.10 Advanced Auditing and Professional Ethics

- (e) Office Administration.
 - (i) Discussion/Communication of Findings
 - (a) After completing the on-site Review, the Reviewer, before making his Report to the Board, shall communicate his findings in the Preliminary Report to the Practice Unit if in his opinion, the systems and procedures are deficient or non-compliant with reference to any matter that has been noticed by him or if there are other matters where he wants to seek clarification.
 - (b) The Practice Unit shall within 15 days after the date of receipt of the findings, make any submissions or representations, in writing to the Reviewer. (i.e. Response to the Preliminary Report).
 - (ii) Peer Review Report of Reviewer
 - (a) At the end of an on-site Review if the Reviewer is satisfied with the reply received from the Practice Unit, he shall submit a Peer Review Report to the Board along with his initial findings, response by the Practice Unit and the manner in which the responses have been dealt with. A copy of the report shall also be forwarded to the Practice Unit.
 - (b) In case the Reviewer is of the opinion that the response by the Practice Unit is not satisfactory, the Reviewer shall accordingly submit a modified Report to the Board incorporating his reasons for the same. The Reviewer shall also submit initial findings (i.e. Preliminary Report), response by the Practice Unit (Response to Preliminary Report) and the manner in which the responses have been dealt with. A copy of the report shall also be forwarded to the Practice Unit.
 - (c) In case of a modified report, The Board shall order for a "Follow On" Review after a period of one year from the date of issue of report as mentioned in (b) above. If the Board so decides, the period of one year may be reduced but shall not be less than six months from the date of issue of the report.

21.6.1 Qualified Assistant

The reviewer may take the help of a qualified assistant while carrying out peer review. In this context, the Board decided to clarify that a reviewer is permitted to take the assistance of only one assistant who shall be a chartered accountant and a person who does not attract any of the dis-qualifications prescribed under Section 8 or Section 21 of the Chartered Accountants Act, 1949. The name of the qualified assistant which the reviewer would like to assist him shall be identified and intimated to the Board as well as the practice unit before the commencement of the peer review. Such a qualified assistant shall also have to sign the declaration of confidentiality as annexed to the Statement. He shall have no direct interface either with the

practice unit or the Board. Further the person chosen for assisting the reviewer shall be from the firm of the reviewer and should have been working with him for at least one year as a member in practice.

21.6.2 Confidentiality

Strict confidentiality shall be maintained by all those involved in the Peer Review process, namely, Reviewers, members of the Board, any-Qualified Assistants or Practice Unit.

All persons governed by the secrecy provisions:

- (a) shall at all times preserve and aid in preserving secrecy with regard to any matter arising in the performance or in assisting in the performance of any function, directly or indirectly related to the process and conduct of Peer Reviews;
- (b) Reviewer shall not make use of or disclose the contents of Review report or any confidential information about the process of Review unless as required by the Board or the Council.

Non-compliance with the secrecy provisions in the above clause shall amount to professional misconduct as defined under Section 22 of the Chartered Accountants Act, 1949.

A Declaration of Confidentiality shall be signed by the persons who are responsible for the conduct of Peer Review i.e., Reviewers, and his Qualified Assistants and be filed with the Board. All members of the Board shall also sign a declaration of Confidentiality in a manner as may be prescribed by the Board.

21.6.3 Approach of the Reviewer

Briefly, the stepwise approach which may be adopted by the reviewer is discussed in the following paragraphs:

- (a) The reviewer should gain an understanding of the engagement letter since an assurance engagement or for that matter any other kind of engagement should begin with an engagement letter. Engagement letter is an important document as it defines the nature and scope of the assurance engagement, practice unit's responsibilities with regard to the engagement. This understanding would help him in planning the review of documentation. The reviewer should focus the review primarily on the key engagement matters. The reviewer should also consider the materiality of the matter while planning the review.
- (b) The number of assurance engagements to be selected requires the exercise of judgement by the reviewer based on the evaluation of replies given in the questionnaire and the size of the practice unit. The objective is to obtain a reasonable cross-section of the practice unit's clients although greater weight may be given to large clients.
- (c) The practice unit may have policies and procedures for accepting a particular engagement. These policies and procedures may not exist in the form of records in each practice unit. In such a case the reviewer should consider enquiring from the concerned persons about such policies and procedures. The reviewer should, wherever possible,

21.12 Advanced Auditing and Professional Ethics

examine that the policies and procedures for acceptance of audit have been complied with and necessary documentation with regard to the same exists.

- (d) The reviewer may follow a combination of compliance procedures and substantive procedures throughout the peer review process. The mix of compliance and substantive procedures depends upon the professional judgement of the reviewer. The reviewer may consider the following:
- In carrying out the compliance tests, the reviewer may evaluate whether the policies and procedures of the practice unit are sufficient to ensure compliance of technical standards and whether these policies and procedures are adequately communicated to all staff who are involved in carrying out the assurance work.
 - In performing substantive tests, the reviewer should evaluate whether the practice unit's working papers relating to the client adequately document the findings and conclusions and whether the report of practice unit is in consonance with the findings and conclusions drawn.
- (e) Finally, the reviewer while evaluating records may consider the following:
- determine that any significant issues, matters, problems that arose during the course of the engagement have been appropriately considered, resolved and documented;
 - determine that adequate audit evidence or other relevant evidence in relation to the engagement is obtained to support the reasonableness of the conclusions drawn; and
 - determine that significant decisions relating to the engagement, use of professional judgement, resolution of significant matters have been properly documented.

21.6.4 Inherent Limitations of Review

The reviewer conducts the review in accordance with the Statement on Peer Review. The review would not necessarily disclose all weaknesses in compliance of technical standards and maintenance of quality of assurance services since it would be based on selective tests. As there are inherent limitations in the effectiveness of any system of quality control which happens to be subject-matter of review, departure from the system may occur and may not be detected.

Professional Ethics

22.1 Introduction

The term “*Ethics*” means moral principles which govern a person’s behaviour or the conducting of an activity. It is the branch of knowledge that deals with moral principles, whereas “*Professional Ethics*” consist of personal, organizational and corporate standards of behaviour expected for professionals. Every professional has some enforced code of ethics which need to be followed to preserve the integrity of the profession. However, there is a dispute with regard to whether profession should be consistent with the requirements of morality governing public. This can be understood with some of the examples, like, a doctor lies to a patient about the serious condition of his health, thinking that disclosing the seriousness of health may cause more distress to the patient. This would be morally wrong as the doctor is hiding imperative information from the patient. However, here, improvement in health is given moral priority and hence it is justifiable to contravene other morals. Another example would be on the practice of lawyer. A lawyer is responsible to his immediate client only. It doesn’t matter whether the client has committed an offence or not, the lawyer has to defend him before the court of law, whereas a Chartered Accountant, as an auditor, has the responsibility to highlight and bring to the knowledge of stakeholders about where the client has flawed. This implies that there can be different moral codes to different sections of society or professionals.

Chartered Accountants as professionals are engaged in building trust to vast variety of users, whether shareholders, government, banks, investors, employees or others, which imposes a public interest responsibility on their profession. Like other professionals, Chartered Accountants also have some set of code of ethics. A Chartered Accountant, either in practice or in service, has to abide by these ethical behaviors. They are expected to follow the fundamental principles of professional ethics while performing their jobs. Service users of professionals should be able to feel secure that there exists a framework of professional ethics which governs the provision of those services. Any deviation from the ethical responsibilities brings the disciplinary mechanism into action against the Chartered Accountants.

Code of Ethics– Its Necessity: Ethics are as old as human civilization. It is nothing but the laws or rules of acceptable behaviour. The whole foundation of any profession, particularly CA profession, is its credibility. The sole purpose of Code of Ethics is to ensure and uphold this credibility. The main ingredient of our profession is independence. An auditor needs to be independent while carrying out his audit. The provisions discussed in the same ensure that the independence of members of the Institute is not affected.

Our Institute's Motto – 'Ya Esha Supteshu Jagrati' is adopted from Kathopanishad and it denotes 'eternal vigilance' – awakening when the world is asleep.

Many of our members perceive Code of Ethics as a burden. They are totally mistaken. On the contrary Code of Ethics seeks to protect the interests of the profession as a whole. It is a shield that enables us to command respectability.

Fig. : Scale of Code of Ethics*

22.2 Fundamental Principles

In order to achieve the objectives of the Accountancy profession, professional accountants have to observe a number of prerequisites or fundamental principles. The fundamental principles as discussed in Code of Ethics of ICAI, to be complied, are given below:

Integrity - A professional accountant should be straightforward and honest in all professional and business relationships.

Objectivity - A professional accountant should not allow bias, conflict of interest or undue influence of others to override professional judgments.

Professional Competence and Due Care - A professional accountant has a continuing duty to maintain professional knowledge based on current developments, and should act in accordance with applicable technical and professional standards while providing professional services.

Confidentiality - A professional accountant should respect the confidentiality of information acquired as a result of professional and employment relationships. The acquired information should not be disclosed to third parties without specific authority unless there is a legal or professional duty to disclose, and should also not be used for personal advantage of any person.

* Source: CSRwire

Professional Behaviour - A professional accountant should comply with relevant laws and regulations and should avoid any action that discredits the profession.

22.3 Membership of the Institute

On acceptance of application by the Council, the applicant's name shall be entered in the Register and a certificate of membership in the appropriate Form shall be issued to the applicant.

Particulars of the Register: Section 19 of the Act provides the particulars to be included in the Register about every member of the Institute, namely-

- (i) his full name, date of birth, domicile, residential and professional address;
- (ii) date on which his name is entered in the Register;
- (iii) his qualifications;
- (iv) whether he holds a certificate of practice (COP); and
- (v) any other particulars which may be prescribed.

22.3.1 Disabilities for the Purpose of Membership

Section 8 of the Chartered Accountants Act, 1949 enumerates the circumstances under which a person is debarred from having his name entered in or borne on the Register of Members, as follows:

- (i) If he has not attained the age of 21 years at the time of his application for the entry of his name in the Register; or
- (ii) If he is of unsound mind and stands so adjudged by a competent court; or
- (iii) If he is an undischarged insolvent; or
- (iv) If he, being a discharged insolvent, has not obtained from the court a certificate stating that his insolvency was caused by misfortune without any misconduct on his part; or
- (v) If he has been convicted by a competent Court whether within or without India, of an offence involving moral turpitude and punishable with transportation or imprisonment or of an offence, not of a technical nature, committed by him in his professional capacity unless in respect of the offence committed he has either been granted a pardon or, on an application made by him in this behalf, the Central Government has, by an order in writing, removed the disability; or
- (vi) If he has been removed from membership of the Institute on being found on inquiry to have been guilty of professional or other misconduct;

It may be noted that a person who has been removed from membership for a specified period, shall not be entitled to have his name entered in the Register until the expiry of such period.

In addition, failure on the part of a person to disclose the fact that he suffers from any one of the disabilities aforementioned would constitute professional misconduct. The name of the

22.4 Advanced Auditing and Professional Ethics

person, who is found to have been subject at any time to any of the disabilities aforementioned, can be removed from the Register of Members by the Council.

22.3.2 Types of Members of the Institute

Section 5 of the Chartered Accountants Act, 1949 provides the division of members of the Institute. The members shall be divided into two classes designated as Associates and Fellows.

Diagrammatic presentation showing types of members of the Institute

Associate Member: Any person, whose name has been entered in the Register, shall be deemed to have become an Associate of the Institute and shall also be entitled to use the letters A.C.A. after his name to indicate that he is an Associate Member of the Institute.

Fellow Member: The name of following types of members shall be entered into the Register as a Fellow of the Institute, on payment of such fees along with the application made and granted in the prescribed manner-

- (i) An associate member who has been in continuous practice in India for at least 5 years,
- (ii) A member who has been an associate for a continuous period of not less than 5 years and who possesses such qualifications as may be prescribed by the Council with a view to ensuring that he has experience equivalent to the experience normally acquired as a result of continuous practice for a period of 5 years as a Chartered Accountant.

The abovementioned members shall be entitled to use the letters F.C.A. after his name to indicate that he is a Fellow Member of the Institute.

22.3.3 Removal of Name from the Register

As per section 20 of the Act, the Council may remove, from the Register, the name of any member of the Institute in the following cases-

- (i) who is dead; or
- (ii) from whom a request has been received to that effect; or
- (iii) who has not paid any prescribed fee required to be paid by him; or
- (iv) who is found to have been subject at the time when his name was entered in the Register, or who at any time thereafter has become subject, to any of the disabilities mentioned in Section 8, or who for any other reason has ceased to be entitled to have his name borne on the Register.

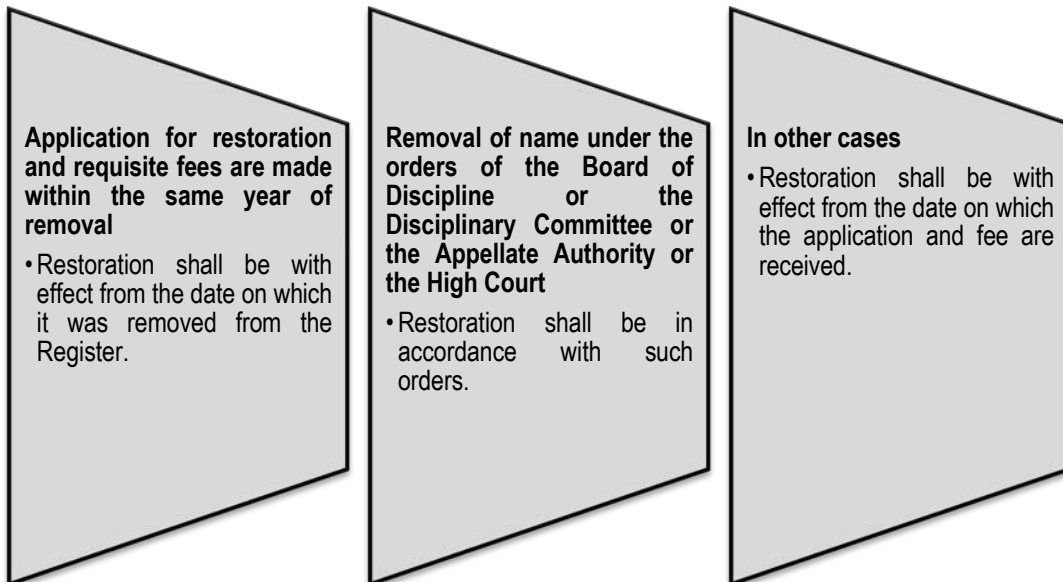

The Council shall remove the name of any member from the Register in respect of whom an order has been passed under this Act removing him from membership of the Institute.

If the name of any member has been removed from the Register for non-payment of prescribed fee as required to be paid by him, then, on receipt of an application, his name may be entered again in the Register on payment of the arrears of annual fee and entrance fee along with such additional fee, as may be determined by the Council.

22.3.4 Restoration of Membership

In addition to the provisions of the section 20 of the Chartered Accountants Act, 1949 (as discussed in above Para), Regulation 19 of the Chartered Accountants Regulations, 1988, as well states that the name of the member may be restored by the Council in the Register on an application, in the appropriate Form, received in this behalf whose name has been removed from the Register for non-payment of prescribed fee as required to be paid by him, if he is otherwise eligible to such membership, on his paying the arrears of annual membership fee, entrance fee and additional fee determined by the Council under the Act.

However, the effective date in case of restoration of cancelled membership, in different situations, shall be in the following manner:

22.3.5 Penalty for Falsely Claiming to be a Member etc.

Section 24 of the Chartered Accountants Act, 1949 provides that any person who-

- (i) not being a member of the Institute;
 - (a) represents that he is a member of the Institute; or
 - (b) uses the designation Chartered Accountant;

22.6 Advanced Auditing and Professional Ethics

- (ii) being a member of the Institute, but not having a certificate of practice, represents that he is in practice or practices as a Chartered Accountant,

shall be punishable on first conviction with fine which may extend to ₹ 1000, and on any subsequent conviction with imprisonment which may extend to 6 months or with fine which may extend to ₹ 5,000, or with both.

The provision may be understood with a case, where, the Court of Additional Chief Judicial Magistrate had by its judgement found the accused guilty under Section 24(i)(a) & (b) of the Chartered Accountants Act, 1949 and Section 465 of the Indian Penal Code. The Court imposed a fine on the accused and in the event of his failure to pay the fine, sentenced to rigorous imprisonment for three months. (Case of Prem Batra decided on 18.7.1989)

22.4 Chartered Accountants in Practice

A practicing Chartered Accountant is a person who is a member of the Institute and is holding Certificate of Practice; and includes such members of the Institute who are deemed to be in Practice in accordance with the provisions of the Chartered Accountants Act, 1949.

22.4.1 Significance of the Certificate of Practice

A member who is not in practice is precluded from accepting engagement to render services of any of the types normally prescribed for a Chartered Accountant, even though for doing so, he does not require special qualifications. The Council of the institute is of view that-

- (i) Once the person concerned becomes a member of the Institute, he is bound by the provisions of the Chartered Accountants Act and its Regulations. If and when he appears before the Income-tax Tribunal as an Income-tax representative after having become a member of the Institute, he could so appear only in his capacity as a Chartered Accountant and a member of the Institute. Having, as it were, brought himself within the jurisdiction of the Chartered Accountants Act and its Regulations, he could not set them at naught by contending that even though he continues to be a member of the Institute and has been punished by suspension from practice as a member, he would be entitled, in substance, to practice in some other capacity.
- (ii) A member of the Institute can have no other capacity in which he can take up such practice, separable from his capacity to practice as a member of the Institute.”

Therefore, in nutshell, a Chartered Accountant whose name has been removed from the membership for professional and/or other misconduct, during such period of removal, will not appear before the various tax authorities or other bodies before whom he could have appeared in his capacity as a member of this Institute.

[Note: For illustrative examples/case studies on abovementioned provisions, students may refer question no. 10(a), 28(a) of the Practice Manual.]

22.4.2 Cancellation and Restoration of Certificate of Practice

Regulation 10 provides that a Certificate of Practice (COP) shall be liable for cancellation, if:

- (i) the name of the holder of the certificate is removed from the Register; or
- (ii) the Council is satisfied, after giving an opportunity of being heard to the person concerned, that such certificate was issued on the basis of incorrect, misleading or false information, or by mistake or inadvertence; or
- (iii) a member has ceased to practise; or
- (iv) a member has not paid annual fee for certificate of practice till 30th day of September of the relevant year.

Where a COP is cancelled, the holder shall surrender the same to the Secretary.

Further, Regulation 11 on restoration of COP states that, on an application made in the approved Form and on payment of such fee, the Council may restore the COP with effect from the date on which it was cancelled, to a member whose certificate has been cancelled due to non-payment of the annual fee for the COP and whose application, complete in all respects, together with the fee, is received by the Secretary before the expiry of the relevant year.

22.4.3 Members who are deemed to be in Practice

Every member of the Institute is entitled to designate himself as a Chartered Accountant. There are two classes of members, those who are in practice and those who are otherwise occupied. In Section 2(2) of the Act, the term deemed "to be in practice" has been defined as follows:

"A member of the Institute shall be deemed "to be in practice" when individually or in partnership with Chartered Accountants in practice, or in partnership with members of such other recognised professions as may be prescribed, he, in consideration of remuneration received or to be received-

- (i) engages himself in the practice of accountancy; or
- (ii) offers to perform or performs service involving the auditing or verification of financial transactions, books, accounts or records, or the preparation, verification or certification of financial accounting and related statements or holds himself out to the public as an accountant; or
- (iii) renders professional services or assistance in or about matters of principle or detail relating to accounting procedure or the recording, presentation or certification of financial facts or data; or
- (iv) renders such other services as, in the opinion of the Council, are or may be rendered by a Chartered Accountant in practice;

and the words "to be in practice" with their grammatical variations and cognate expressions shall be construed accordingly.

Explanation - An associate or a fellow of the Institute who is a salaried employee of a Chartered Accountant in practice or a firm of such Chartered Accountants or firm consisting of one or more

22.8 Advanced Auditing and Professional Ethics

chartered accountants and members of any other professional body having prescribed qualifications shall, notwithstanding such employment, be deemed to be in practice for the limited purpose of the training of Articled Assistants”.

Pursuant to Section 2(2)(iv) above, the Council has passed a resolution permitting a Chartered Accountant in practice to render entire range of “Management Consultancy and other Services”.

The expression “Management Consultancy and other Services” shall not include the function of statutory or periodical audit, tax (both direct taxes and indirect taxes) representation or advice concerning tax matters or acting as liquidator, trustee, executor, administrator, arbitrator or receiver, but shall include the following-

- (i) Financial management planning and financial policy determination.*
- (ii) Capital structure planning and advice regarding raising finance.*
- (iii) Working capital management.*
- (iv) Preparing project reports and feasibility studies.*
- (v) Preparing cash budget, cash flow statements, profitability statements, statements of sources and application of funds etc.
- (vi) Budgeting including capital budgets and revenue budgets.
- (vii) Inventory management, material handling and storage.
- (viii) Market research and demand studies.
- (ix) Price-fixation and other management decision making.
- (x) Management accounting systems, cost control and value analysis.
- (xi) Control methods and management information and reporting.
- (xii) Personnel recruitment and selection.
- (xiii) Setting up executive incentive plans, wage incentive plans etc.
- (xiv) Management and operational audits.
- (xv) Valuation of shares and business and advice regarding amalgamation, merger and acquisition.
- (xvi) Business Policy, corporate planning, organisation development, growth and diversification.

* Consideration of “tax implications” while rendering the services at (i), (ii), (iii) and (iv) above will be considered as part of “Management Consultancy and other services”.

- (xvii) Organisation structure and behaviour, development of human resources including design and conduct of training programmes, work study, job-description, job evaluation and evaluation of workloads.
- (xviii) Systems analysis and design, and computer related services including selection of hardware and development of software in all areas of services which can otherwise be rendered by a Chartered Accountant in practice and also to carry out any other professional services relating to EDP.
- (xix) Acting as advisor or consultant to an issue, including such matters as:
 - (a) Drafting of prospectus and memorandum containing salient features of prospectus. Drafting and filing of listing agreement and completing formalities with Stock Exchanges, Registrar of Companies and SEBI.
 - (b) Preparation of publicity budget, advice regarding arrangements for selection of (i) ad-media, (ii) centres for holding conferences of brokers, investors, etc., (iii) bankers to issue, (iv) collection centres, (v) brokers to issue, (vi) underwriters and the underwriting arrangement, distribution of publicity and issue material including application form, prospectus and brochure and deciding on the quantum of issue material (In doing so, the relevant provisions of the Code of Ethics must be kept in mind).
 - (c) Advice regarding selection of various agencies connected with issue, namely Registrars to Issue, printers and advertising agencies.
 - (d) Advice on the post issue activities, e.g., follow up steps which include listing of instruments and dispatch of certificates and refunds, with the various agencies connected with the work.

Explanation - For removal of doubts, it is hereby clarified that the activities of broking, underwriting and portfolio management are not permitted.
- (xx) Investment counselling in respect of securities [as defined in the Securities Contracts (Regulation) Act, 1956 and other financial instruments.] (In doing so, the relevant provisions of the Code of Ethics must be kept in mind).
- (xxi) Acting as registrar to an issue and for transfer of shares/other securities. (In doing so, the relevant provisions of the Code of Ethics must be kept in mind).
- (xxii) Quality Audit.
- (xxiii) Environment Audit.
- (xxiv) Energy Audit.
- (xxv) Acting as Recovery Consultant in the Banking Sector.
- (xxvi) Insurance Financial Advisory Services under the Insurance Regulatory & Development Authority Act, 1999, including Insurance Brokerage.

22.10 Advanced Auditing and Professional Ethics

Pursuant to Section 2(2)(iv) of the Chartered Accountants Act, 1949, read with Regulation 191 of Chartered Accountants Regulations, 1988 a member shall be deemed to be in practice if he, in his professional capacity and neither in his personal capacity nor in his capacity as an employee, acts as a liquidator, trustee, executor, administrator, arbitrator, receiver, adviser or representative for costing, financial or taxation matters or takes up an appointment made by the Central Government or a State Government or a court of law or any other legal authority or acts as a Secretary unless his employment is on a salary-cum-full-time basis.

It is necessary to note that a person is deemed to be in practice not only when he is actually engaged in the practice of accountancy but also when he offers to render accounting services whether or not he in fact does so. In other words, the act of setting up of an establishment offering to perform accounting services would tantamount to being in practice even though no client has been served.

It may also be noted that a member of the Institute is deemed to be in practice during the period he renders 'service with armed forces'.

The above provisions need to be correlated with the provisions of section 144 of the Companies Act, 2013 which prohibits an auditor of the company from rendering certain services directly or indirectly to the company or its holding company or its subsidiary company.

(Students may refer Chapter 6 'The Company Audit' of the Study Material for detailed understanding of provisions on section 144 of the Companies Act, 2013)

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 17(a), 20(a) of the Practice Manual.]

22.4.4 Companies not to Engage in Accountancy

Section 25 of the Chartered Accountants Act, 1949 provides that:

- (1) No company, whether incorporated in India or elsewhere, shall practise as chartered accountants.

Here, the term "company" shall include any limited liability partnership which has company as its partner for the purpose of this section.

- (2) If any company contravenes this provision then, without prejudice to any other proceedings which may be taken against the company, every director, manager, secretary and any other officer thereof who is knowingly a party to such contravention shall be punishable with fine which may extend on first conviction to ₹ 1,000 and on any subsequent conviction to ₹ 5,000.

In addition, as per section 141(2) of the Companies Act, 2013, where a firm (including a limited liability partnership) is appointed as an auditor of a company, then, only the partners who are chartered accountants shall be authorised to act and sign on behalf of the firm.

On thoroughly studying the provisions of both the Acts, the LLPs, though allowed to be appointed as an auditor in accordance with the Companies Act, 2013, however, it can't be engaged into practice, if it has company as its partner, as per the Chartered Accountants Act, 1949.

Therefore, in short, the LLP not having any company as its partner, can be engaged into practicing and thus take audit assignments.

22.4.5 Member in Practice Prohibited from using a Designation Other Than Chartered Accountant

- (i) The member of the Institute are now permitted to use the word 'CA' as prefix before their name irrespective of the fact that they are in practice or not.
- (ii) Under Section 7 of the Chartered Accountants Act, 1949 a member in practice cannot use any designation other than that of a Chartered Accountant, nor can he use any other description, whether in addition thereto or in substitution therefor, but a member who is not in practice and does not use the designation of a Chartered Accountant may use any other description. Nevertheless a member in practice may use any other letters or description indicating membership of Accountancy Bodies which have been approved by the Council or of bodies other than Accountancy Institutes so long as such use does not imply adoption of a designation and/or does not amount to advertisement or publicity.

For example, though a member cannot designate himself as a Cost Accountant, he can use the letters A.I.C.W.A. after his name, when he is a member of that Institute.

“It is improper for a Chartered Accountant to state on his professional documents that he is an Income-tax Consultant, Cost Accountant, Company Secretary, Cost Consultant or a Management Consultant”.

“Member are allowed to appear before the various authorities including Company Law Board, Income Tax Appellate Tribunal, Sales Tax Tribunal where the law has permitted the same, so far as the designation “Corporate Lawyer” is concerned, the Council was of the view that as per the existing provisions of law, a Chartered Accountant in practice is not entitled to use the designation “Corporate Lawyer”.

Further, the members are not permitted to use the initials ‘CPA’ (standing for Certified Public Accountant) on their visiting cards”.

“Members of the Institute in practice who are otherwise eligible may also practice as Company Secretaries and/or Cost Accountants. Such members shall, however, not use designation/s of the aforesaid Institute/s simultaneously with the designation “Chartered Accountant”.

22.4.6 Maintenance of Branch Offices

In terms of Section 27 of the Act, if a Chartered Accountant in practice or a Firm of Chartered Accountants has more than one office in India, each one of such offices should be in the separate charge of a member of the Institute. Failure on the part of a member or a firm to have a member in charge of its branch and a separate member in case of each of the branches, where there is more than one, would constitute professional misconduct.

However, exemption has been given to members practicing in hill areas subject to certain conditions. The conditions are:

- (1) Such members/firm be allowed to open temporary offices in a city in the plains for a limited period not exceeding 3 months in a year.

22.12 Advanced Auditing and Professional Ethics

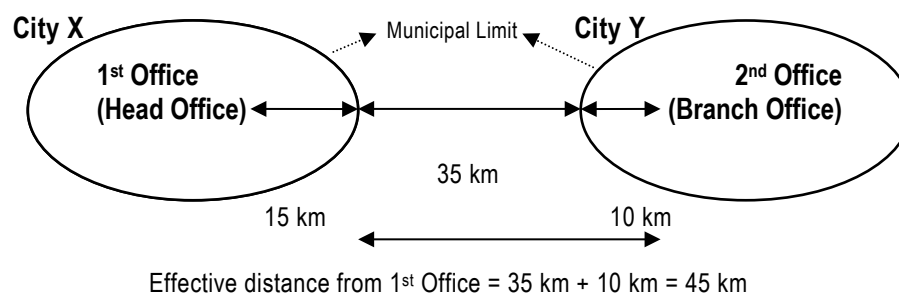

- (2) The regular office need not be closed during this period and all correspondence can continue to be made at the regular office.
- (3) The name board of the firm in the temporary office should not be displayed at times other than the period such office is permitted to function as above.
- (4) The temporary office should not be mentioned in the letterheads, visiting cards or any other documents as a place of business of the member/firm.
- (5) Before commencement of every winter it shall be obligatory on the member/firm to inform the Institute that he/it is opening the temporary office from a particular date and after the office is closed at the expiry of the period of permission, an intimation to that effect should also be sent to the office of the Institute by registered post.

It is necessary to mention that the Chartered Accountant in-charge of the branch of another firm should be associated with him or with the firm either as a partner or as a paid assistant. If he is a paid assistant, he must be in whole time employment with him.

However, a member can be in-charge of two offices if they are located in one and the same Accommodation. In this context some of the Council's decisions are as follows:

- (1) With regard to the use of the name-board, there will be no bar to the putting up of a name-board in the place of residence of a member with the designation of Chartered Accountant, provided it is a name-plate or a name-board of an individual member and not of the firm.
- (2) The exemption may be granted to a member or a firm of Chartered Accountants in practice to have a second office without such second office being under the separate charge of a member of the Institute, provided-
 - (a) the second office is located in the same premises, in which the first office is located or,
 - (b) the second office is located in the same city, in which the first office is located or,

- (c) the second office is located within a distance of 50 km. from the municipal limits of a city, in which the first office is located.

A member having two offices of the type referred to above shall have to declare, which of the two offices is his main office, which would constitute his professional address.

[Note: For illustrative examples/case studies on abovementioned provisions, students may refer question no. 9(i), 17(b), 30(b) of the Practice Manual.]

22.4.7 KYC Norms for CA in Practice

The financial services industry globally is required to obtain information of their clients and comply with Know Your Client Norms (KYC norms). Keeping in mind the highest standards of Chartered Accountancy profession in India, the Council of ICAI recommended such norms to be observed by the members of the profession who are in practice. These Know Your Client (KYC) Norms are also important in order to ensure a healthy growth of the profession and an equitable flow of professional work among the members.

The self-regulatory measures are recommendatory. However, considering the spirit underlying these measures, it is expected that every Chartered Accountant carrying out attest function is encouraged to follow them and implementation of these measures would go a long way in ensuring equitable flow of work among the members and would also further enhance the prestige of the profession in the society.

The KYC Norms approved by the Council of ICAI are given below:

- 1. Where Client is an Individual/ Proprietor**
 - A. General Information
 - B. Engagement Information
- 2. Where Client is a Corporate Entity**
 - A. General Information
 - B. Engagement Information
 - C. Regulatory Information
- 3. Where Client is a Non-Corporate Entity**
 - A. General Information
 - B. Engagement Information

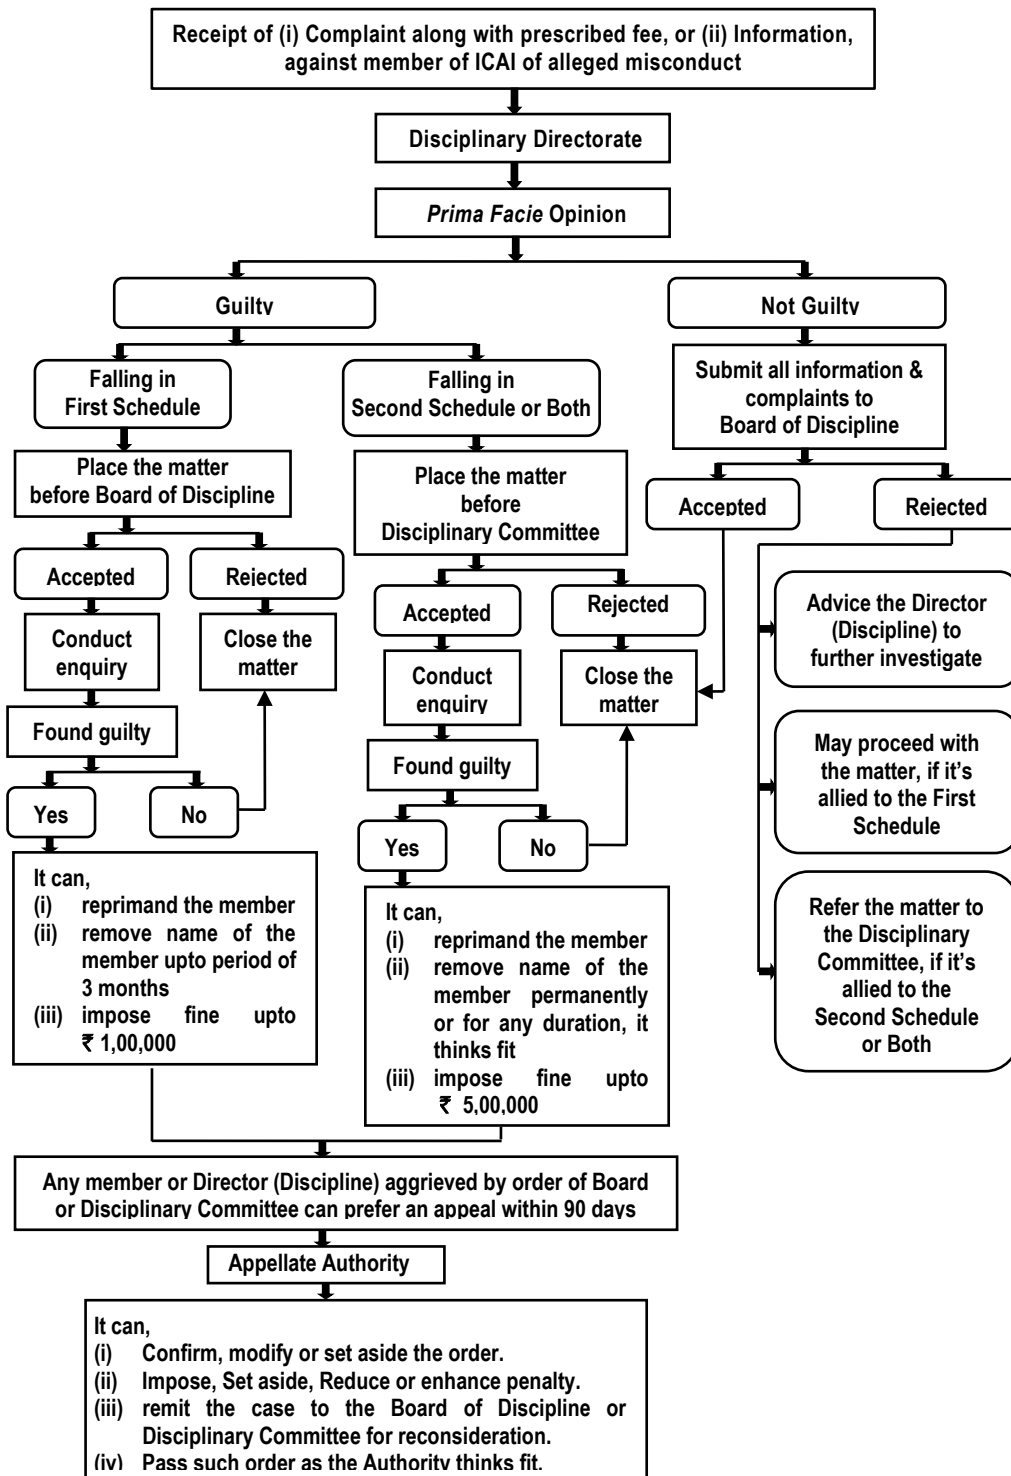

22.5 Chartered Accountants in Service

In accordance with the definitions provided under the Code of Ethics, a Professional Accountant in Service or Chartered Accountant in Service means a professional accountant employed or engaged in an executive or non-executive capacity in such areas as commerce, industry, service, the public sector, education, the not for profit sector, regulatory bodies or professional bodies, or a professional accountant contracted by such entities.

22.6 Disciplinary Procedure

Provisions of the Chartered Accountant, Act, 1949 regarding (i) Disciplinary Directorate, (ii) Board of Discipline, (iii) Disciplinary Committee, (iv) Appellate Authority and procedure in enquiries for disciplinary matters relating to misconduct of the members of the Institute are as hereunder:

Flow Chart of Discipline Procedure Mechanism

[For detailed knowledge with respect to Disciplinary Procedure, students are advised to refer Chartered Accountants Act, 1949 produced under Annexure 2 at the end of this Chapter.]

22.7 Types of Misconduct- Professional or Other

According to section 22 of the Act, for the purposes of this Act, the expression “professional or other misconduct” shall be deemed to include any act or omission provided in any of the Schedules, but nothing in this section shall be construed to limit or abridge in any way the power conferred or duty cast on the Director (Discipline) under sub-section (1) of section 21 to inquire into the conduct of any member of the Institute under any other circumstances.

A member is liable to disciplinary action under Section 21 of the Chartered Accountants Act, if he is found guilty of any Professional or Other Misconduct.

22.7.1 Professional Misconduct: Professional misconduct has been defined in part I, II and III of the First Schedule; and part I and II of the Second Schedule. A member who is engaged in the profession of accountancy whether in practice or in service should conduct/restrict his action in accordance with the provisions contained in the respective parts of the schedules. If the member is found guilty of any of the acts or omissions stated in any of the respective parts of the Schedule, he/she shall be deemed to be guilty of professional misconduct.

22.7.2 Other Misconduct: Other misconduct has been defined in part IV of the First Schedule and part III of the Second Schedule. These provisions empower the Council to inquire into any misconduct of a member even it does not arise out of his professional work. This is considered necessary because a chartered accountant is expected to maintain the highest standards of integrity even in his personal affairs and any deviation from these standards, even in his non-professional work, would expose him to disciplinary action. For example, a member who is found to have forged the will of a relative, would be liable to disciplinary action even though the forgery may not have been done in the course of his professional duty.

Other misconduct would also relate to conviction by a competent court for an offence involving moral turpitude punishable with transportation or imprisonment to an offence not of a technical nature committed by the member in his professional capacity. [See section 8(v) of the Act].

Some illustrative examples, where a member may be found guilty of “Other Misconduct”, under the aforesaid provisions rendering, himself unfit to be member are:

- (i) Where a chartered accountant retains the books of account and documents of the client and fails to return these to the client on request without a reasonable cause.
- (ii) Where a chartered accountant makes a material misrepresentation.
- (iii) Where a chartered accountant uses the services of his articled or audit assistant for purposes other than professional practice.
- (iv) Conviction by a competent court of law for any offence under Section 8 (v) of the Chartered Accountants Act 1949.
- (v) Misappropriation by office-bearer of a Regional Council of the Institute, of a large amount and utilisation thereof for his personal use.

22.16 Advanced Auditing and Professional Ethics

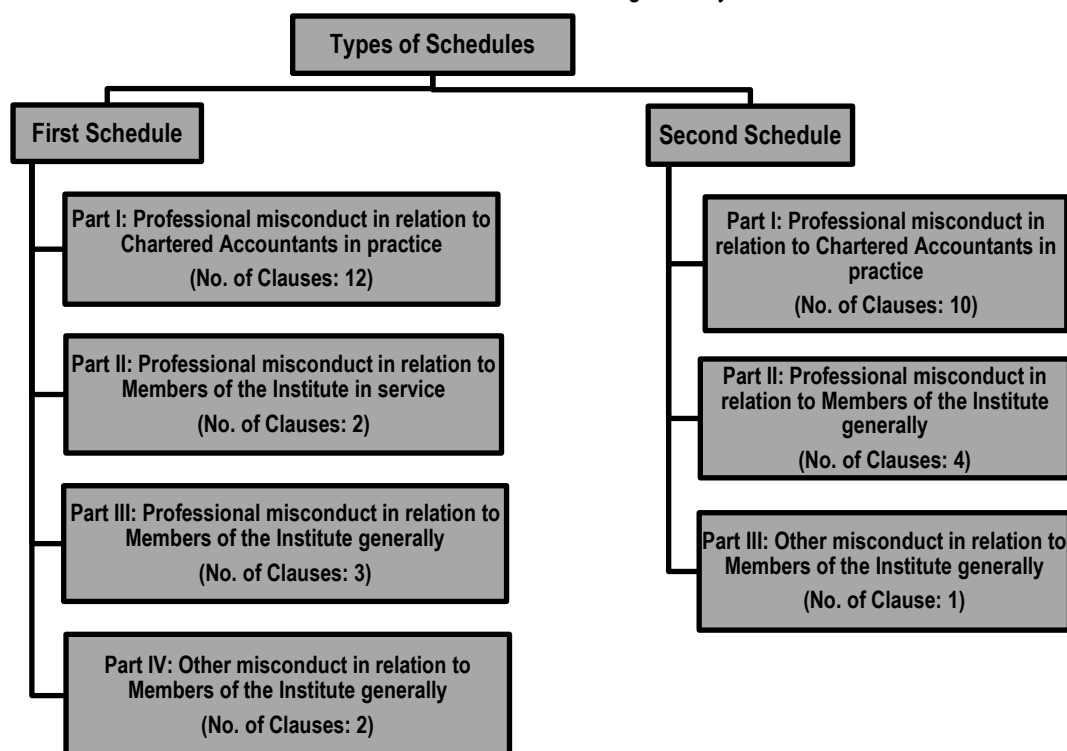

- (vi) Not replying within a reasonable time and without a good cause to the letter of the public authorities.
- (vii) Where certain assessment records of income tax department belonging to the client of Chartered Accountant were found in the almirah of the bed-room of the chartered accountant.
- (viii) Where a chartered accountant had adopted coercive methods on a bank for having a loan sanctioned to him.

[Note: For illustrative examples/case studies on abovementioned provisions, students may refer question no. 10(b) of the Practice Manual.]

22.8 Schedules to the Act

Acts or omissions which comprise professional misconduct within the meaning of Section 22 of the Chartered Accountants Act are defined in two Schedules viz. the First Schedule and the Second Schedule. The First Schedule is divided into four parts, Part I of the First Schedule deals with the misconduct of a member in practice which would have the effect generally of compromising his position as an independent person. Part II deals with misconduct of members in services. Part III deals with the misconduct of members generally and Part IV deals with other misconduct in relation to members of the institute generally.

The Second Schedule is divided into three parts. Part I deals with misconduct in relation to a member in practice, Part II deals with misconduct of members generally and Part III deals with other misconduct in relation to members of the Institute generally.

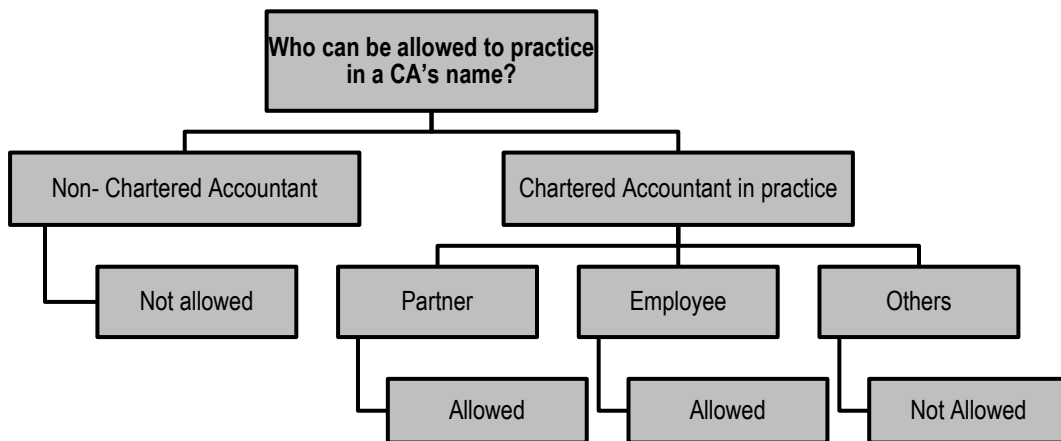

The implications of the different clauses in the schedules are discussed below:

22.8.1 The First Schedule: Where the Director (Discipline) is of the opinion that member is guilty of any professional or other misconduct mentioned in the First Schedule; he shall place the matter before the Board of Discipline.

PART I - Professional misconduct in relation to Chartered Accountants in practice

A Chartered Accountant in practice is deemed to be guilty of professional misconduct if he:

Clause (1) allows any person to practice in his name as a chartered accountant unless such person is also a chartered accountant in practice and is in partnership with or employed by him.

The above clause is intended to safeguard the public against unqualified accountant practicing under the cover of qualified accountants. It ensures that the work of the accountant will be carried out by a Chartered Accountant who may be his partner, or his employee and would work under his control and supervision.

Clause (2) pays or allows or agrees to pay or allow, directly or indirectly, any share, commission or brokerage in the fees or profits of his professional business, to any person other than a member of the Institute or a partner or a retired partner or the legal representative of a deceased partner, or a member of any other professional body or with such other persons having such qualification as may be prescribed, for the purpose of rendering such professional services from time to time in or outside India.

Explanation - In this item, “partner” includes a person residing outside India with whom a chartered accountant in practice has entered into partnership which is not in contravention of item (4) of this Part.

It is in order for a member to share his fees or profits with another member of the Institute and/or a firm of Chartered Accountants. A practicing Member of the Institute can share fees or profits arising out of his professional business with such members of other professional bodies or with

22.18 Advanced Auditing and Professional Ethics

such other persons having such qualifications as may be prescribed from time to time by the Council.

The Council has prescribed [**Regulation 53A(1)** of the Chartered Accountants Regulations, 1988] the professional bodies, which are as under:-

- (a) The Institute of Company Secretaries of India established under the Company Secretaries Act, 1980.
- (b) The Institute of Cost & Works Accountants of India established under the Cost & Works Accountants Act, 1959.
- (c) Bar Council of India established under the Advocates Act, 1961.
- (d) The Indian Institute of Architects established under the Architects Act, 1972.
- (e) The Institute of Actuaries of India established under the Actuaries Act, 2006.

Further, the Council has also prescribed [Regulation 53A(3) of the Chartered Accountants Regulations, 1988] the persons qualified in India, which are as under:

- (i) Company Secretary within the meaning of the Company Secretaries Act, 1980;
- (ii) Cost Accountant within the meaning of the Cost and Works Accountants Act, 1959;
- (iii) Actuary within the meaning of the Actuaries Act, 2006;
- (iv) Bachelor in Engineering from a University established by law or an Institution recognised by law;
- (v) Bachelor in Technology from a University established by law or an institution recognised by law;
- (vi) Bachelor in Architecture from a University established by law or an institution recognised by law;
- (vii) Bachelor in Law from a University established by law or an institution recognised by law;
- (viii) Master in Business Administration from Universities established by law or technical institutions recognised by All India Council for Technical Education.

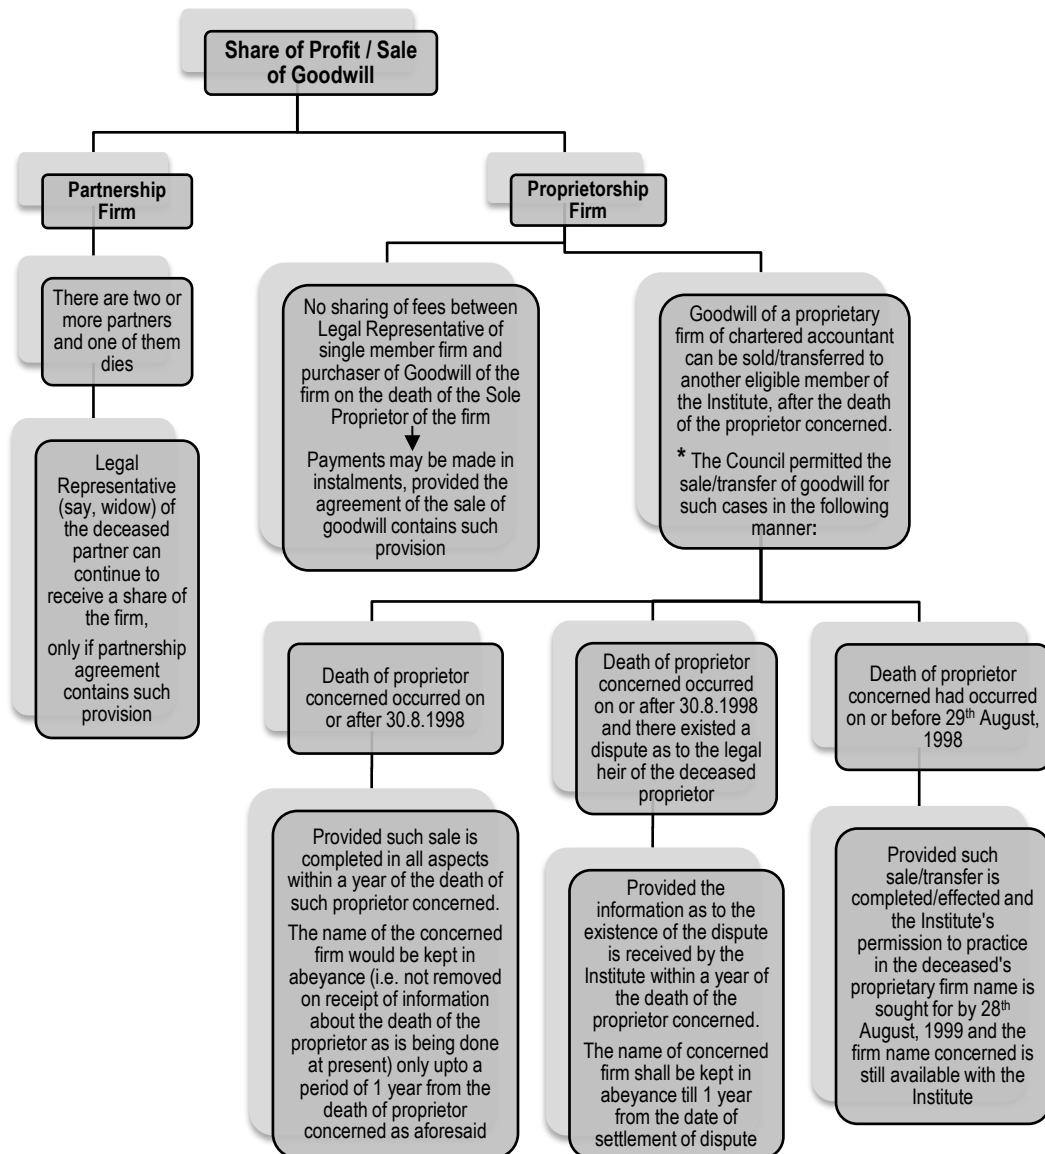

The Institute came across certain Circulars/Orders issued by the Registrars of various State Co-operative Societies wherein it has been mentioned that certain amount of audit fee is payable to the concerned State Government and the auditor has to deposit a percentage of his audit fee in the state Treasury by a prescribed challan within a prescribed time of the receipt of Audit fee. The Council considered the issue and while noting that the Government is asking auditors to deposit such percentage of their audit fee for recovering the administrative and other expenses incurred in the process, the Council decided that as such there is no bar in the Code of Ethics to accept such assignment wherein a percentage of professional fee is deducted by the Government to meet the administrative and other expenditure.

Considering the case where a Chartered Accountant gave 50% of the audit fees received by him to the complainant, who was not a Chartered Accountant, under the nomenclature of office allowance and such an arrangement continued for a number of years, it was held by the Council that in substance the Chartered Accountant had shared his profits and, therefore, was guilty of

professional misconduct under the clause. It is not the nomenclature to a transaction that is material but it is the substance of the transaction, which has to be looked into.

(D. S. Sadri vs B.M. Pithewala - 14th & 17th September, 1974)

Treatment of Goodwill –

* In case of a partnership firm when all the partners die at the same time, the above Council decision would also be applicable.

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 4(b), 10(c), 29(c), 30(a), 32(a) of the Practice Manual.]

Clause (3) accepts or agrees to accept any part of the profits of the professional work of a person who is not a member of the Institute.

Provided that nothing herein contained shall be construed as prohibiting a member 'from entering into profit sharing or other similar arrangements, including receiving any share commission or brokerage in the fees, with a member of such professional body or other person having qualifications, as is referred to in item (2) of this part.

Just as a member cannot share his fees with a non-member, he is also not permitted to receive and share the fees of others except for sharing with Member of such professional body or other person having such qualification as may be prescribed (Regulation 53A of the Chartered Accountants Regulations, 1988) by the Council for the purpose of Clause (2), (3) and (5) of Part I of First Schedule. Such a restriction is necessary so that a Chartered Accountant who is often required to engage or to recommend for engagement by his clients, the services of the members of other professions, cannot share the fees received by other persons who are otherwise not permitted by the Council in terms of provision of this clause.

Clause (4) enters into partnership, in or outside India, with any person other than Chartered Accountant in practice or such other person who is a member of any other professional body having such qualifications as may be prescribed, including a resident who but for his residence abroad would be entitled to be registered as a member under clause (v) of sub-section (1) of section 4 or whose qualifications are recognized by the Central Government or the Council for the purpose of permitting such partnerships.

The Council has prescribed Regulation 53A(3) (as discussed under clause (2) of this part) and Regulation 53B of the Chartered Accountants Regulations, 1988 for the persons qualified and the professional bodies.

The Regulation 53B prescribes the membership of following professional bodies for entering into partnership:

- (a) Company Secretary, member, The Institute of Company Secretaries of India, established under the Company Secretaries Act, 1980;
- (b) Cost Accountant, member, The Institute of Cost and Works Accountants of India established under the Cost and Works Accountants Act, 1959;
- (c) Advocate, member, Bar Council of India established under the Advocates Act, 1961;
- (d) Engineer, member, The Institution of Engineers, or Engineering from a University established by law or an institution recognized by law.
- (e) Architect, member, The Indian Institute of Architects established under the Architects Act, 1972;
- (f) Actuary, member, The Institute of Actuaries of India, established under the Actuaries Act, 2006.

Some of the decisions of the Council under this clause are given below:

Where a Chartered Accountant had engaged himself as a partner in two business firms and Managing Director in two Companies and was also holding Certificate of Practice without obtaining permission of the Institute. Held that he was guilty of professional misconduct *inter alia* under Clauses (4) and (11).

(Harish kumar in re:- Pages 286 of Vol. VIII (2) of Disciplinary cases – Council's decision dated 1st to 3rd August, 2001)

The Respondent was a Taxation Advisor of a group of Companies. During search and seizure under Section 132 of The Income Tax Act, 1961 of the group and also of the Chartered Accountant, the Complainant found that the Respondent was colluding with this group in evasion of tax. The Respondent had signed two sets of financial statements of the same auditee, for the same financial year. The two financial statements showed different figures of contract receipts, net profits and balance sheet. He was grossly negligent in the conduct of his professional duties. The Respondent admitted that he was managing partner/partner in two partnership firms where there were other partners who were not Chartered Accountants. Held, the respondent is guilty under Clause (4) of Part I of First Schedule and under Clauses (5), (6) & (7) of Part I of Second Schedule.

[Assistant Director of Income Tax (investment), Calicut v. P Subramanian. Council Decision of 281st Meeting held in October, (2008)].

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 1(d), 7(i) of the Practice Manual.]

Clause (5) Secures either through the services of a person who is not an employee of such Chartered Accountant or who is not his partner or by means which are not open to a Chartered Accountant, any professional business.

Provided that nothing herein contained shall be construed as prohibiting any agreement permitted in terms of item (2), (3) and (4) of this part.

“A man must stand erect, and not to be kept erect by others”, is a dictum by Marcus Aurelius which though applicable for a man in every walk of life is more so in the case of a professional life. He must seek work not through any agency, but by the respect, that he is able to command for his professional talent and skill and by the confidence he is able to inspire by his reputation. All forms of canvassing on that account are regarded unethical and are prohibited. The decision of the Council under this clause is given below:

A Chartered Accountant wrote various letters to officers of different Army Canteens giving details about him and his experience, his partner & office and the norms for charging audit fees. He was held guilty for violation of Clauses (5) & (6).

(Jethanand Sharda vs. Deepak Mehta – Council's decision dated 1st to 4th July, 1998 – Page 61 of Volume VIII(2) of Disciplinary Cases).

Clause (6) Solicits clients or professional work either directly or indirectly by circular, advertisement, personal communication or interview or by any other means.

Provided that nothing herein contained shall be construed as preventing or prohibiting -

- (i) Any Chartered Accountant from applying or requesting for or inviting or securing professional work from another chartered accountant in practice; or
- (ii) A member from responding to tenders or enquiries issued by various users of professional services or organizations from time to time and securing professional work as a consequence.

However, as per the guideline issued by the Council of the Institute of Chartered Accountants of India, a member of the Institute in practice shall not respond to any tender issued by an organization or user of professional services in areas of services which are exclusively reserved for chartered accountants, such as audit and attestation services. However, such restriction shall not be applicable where minimum fee of the assignment is prescribed in the tender document itself or where the areas are open to other professionals along with the Chartered Accountants.

It is an elaboration of the principle propounded in the preceding clause enjoining that for securing professional work the help of others should not be sought. This clause further enjoins on a member not to solicit professional work by means of advertisement, circular, personal communication or interview or by any other means. The members should not adopt any indirect methods to adventure their professional practice with a view to gain publicity and thereby solicit clients or professional work. Such a restraint must be practiced so that members may maintain their independence of judgment and may be able to command the respect of their prospective clients.

In the early years of their professional career, members may find this restraint inconvenient and irksome. A question may arise in their minds as to how they would be able to find professional work if they are not permitted to advertise or solicit work.

A little reflection would show that professional work cannot be secured either by advertisement or by circulars or by solicitation. It can only be obtained by a member gradually building confidence in his ability and integrity. The service tendered by an accountant is of a personal and intimate nature and its value can be appraised only by personal contact and experience. A public advertisement is likely to lead to an impression that the professional person is over anxious to win confidence, which however will have the opposite effect. The satisfaction of clients would be the best advertisement, which would lead to other clients. Unabashed advertisement would affect the public esteem in which the profession is held and would act to the disadvantage of its members. An advertisement is not a key to success in the profession. It is the quality service, which attracts and retains the clients.

Consequent to amendment made by Chartered Accountant (Amendment) Act, 2006 in Clause (6) of Part I of the First Schedule, **Ban on Solicitation is relaxed** in the following situation of client or professional work:

- (i) If work or professional work occurs within the fraternity; or
- (ii) If professional work is secured from responding to tenders, or enquiries issued by various users of professional services or organization.

Some forms of soliciting work which the Council has prohibited are discussed below:

- (a) **Advertisement and note in the press** – Members should not advertise for soliciting work or advertise in a manner which could be interpreted as soliciting or offering to undertake professional work. They are also not permitted to use the less open method of circulating letters to a small field of possible clients. Personal canvassing or canvassing for clients of previous employer through the help of the employees are also not permitted. The **exceptions** to the above rule are:
- (i) A member may request another Chartered Accountant in practice for professional work.
 - (ii) a member may advertise changes in partnerships or dissolution of a firm, or of any change in address of practice and telephone numbers. Such announcements should be limited to a bare statement of facts and consideration given to the appropriateness of the area of distribution of the newspaper or magazine and number of insertions.
 - (iii) a member is also permitted to issue a classified advertisement in the journal/newsletter of the Institute intended to give information for sharing professional work on assignment basis or for seeking partnership or salaried employment of an accountancy nature, provided it only contains the accountant's name, address or telephone number, fax number, e-mail address.
- (b) **Application for empanelment for allotment of audit and other professional work** – The Government departments, government companies/Corporations, courts, co-operative societies and banks and other similar institutions prepare panels of chartered accountants for allotment of audit and other professional work. Where the existence of such a panel is within the knowledge of a member, he is free to write to the concerned organization with a request to place his name on the panel. However, it would not be proper for the Chartered Accountant to make roving enquiries by applying to any such organization for having his name included in any such panel. It is permissible to quote fees on enquiries being received from such bodies, which maintain such panel.
- (c) **Publication of Name or Firm Name by Chartered Accountants in the Telephone or other Directories published by Telephone Authorities or Private Bodies** – The Council has held that it would not be proper for a chartered accountant to have entries made in a Telephone Directory either by making a special request or by means of an additional payment. The Council has also considered the question of permitting entries in respect of chartered accountants and their firms under specified groups in telephone/trade directories brought out by government and non-government agencies. It has decided to permit such entries subject to certain restrictions.
- (d) **Responding to Tenders, Advertisements and Circulars** – It is not prohibited to the members to respond to tenders and requests made by users of professional work.
- (e) **Publication of Books or Articles** – A member is not permitted to indicate in a book or an article, published by him, the association with any firm of Chartered Accountants.
- (f) **Issue of greeting cards or invitations** – The Council does not approve of the issue of greeting cards or personal invitations by members indicating their professional designation,

22.24 Advanced Auditing and Professional Ethics

status and qualification etc. However, the Council is of the view that the designation “Chartered Accountant” as well as the name of the firm may be used in greeting cards, invitations for marriages and religious ceremonies and any invitation for opening or inauguration of office of the members, change in office premises and change in telephone numbers, provided that such greeting cards or invitations etc. are sent only to clients, relatives and close friends of the members concerned.

- (g) **Soliciting professional work by making roving inquiries** – It is not permissible for a member to address letters or circulars to persons who are likely to require services of a Chartered Accountant since it would tantamount to advertisement.
- (h) **Seeking work from professional colleagues** – The issue of an advertisement or a circular by a Chartered Accountant, seeking work from professional colleagues on any basis whatsoever except as provided above would be in violation of this Clause.
- (i) **Scope of Representation which an auditor is entitled to make under Section 225(3) Companies Act, 1956 (now section 140(4)(iii) of the Companies Act, 2013)** – The right to make representation does not mean that an auditor has any prescriptive right or a lien to an audit. The wording of his representation should be such that apart from the opportunity not being abused to secure needless publicity, it does not tantamount directly or indirectly to canvassing or soliciting for his continuance as an auditor. The letter should merely set out in a dignified manner how he has been acting independently and conscientiously through the term of office and may, in addition, indicate if he so chooses his willingness to continue as auditor if re appointed by the shareholders.
- (j) **Acceptance of original professional work by a member emanating from the client Introduced to him by another member** – The Council has decided that a member should not accept the original professional work emanating from a client introduced to him by another member. If any professional work of such client comes to him directly, it should be his duty to ask the client that he should come through the other member dealing generally with his original work.
- (k) **Giving public Interviews** – While giving any interview or otherwise furnishing details about themselves or their firms in public interviews or to the press or at any forum, the members should ensure that it should not result in publicity. Due care should be taken to ensure that such interviews or details about the members or their firms are not given in a manner highlighting their professional attainments.
- (k) **Members and/or firms who publish advertisements under Box numbers** – Members/Firms are prohibited from inserting advertisements for soliciting clients or professional work under box numbers in the newspapers. This practice is in violation of this clause.
- (m) **Website** –

The Council at its 212th meeting held in January, 2001 approved the detailed guidelines for posting the particulars on Website by Chartered Accountant(s) in practice and firm(s) of Chartered Accountants in practice. Subsequently, the Council at its 235th meeting held in July, 2003 amended sub-para (8) & (20) of the said

guidelines. Thereafter, the Council at its 242nd meeting held in April, 2004 and its 345th Meeting held in August, 2015 again revised the said guidelines. The amended guidelines issued by the Council are as under:*

- (1) The Chartered Accountants and/or Chartered Accountants' Firms would be free to create their own Website subject to the overall guidelines laid down by the Council hereunder. The actual format of the Website is not being prescribed nor any standard format of the Website is being given to provide independence to the Members. There is no restriction on the colours which may be used in the Website.*
- (2) Individual Members would also be permitted to have their Webpages in their trade name or individual name.*
- (3) The Chartered Accountants and/or Chartered Accountants' Firms would ensure that their Websites are run on a "pull" model and not a "push" model of the technology to ensure that any person who wishes to locate the Chartered Accountants or Chartered Accountants' firms would only have access to the information and the information should be provided only on the basis of specific "pull" request.*
- (4) The Chartered Accountants and/or Chartered Accountants' Firms should ensure that none of the information contained in the Website be circulated on their own or through E-mail or by any other mode or technique except on a specific "pull" request.*
- (5) The Chartered Accountants would also not issue any circular or any other advertisement or any other material of any kind whatsoever by virtue of which they solicit people to visit their Website. The Chartered Accountants would, however, be permitted to mention their Website address on their professional stationery.*
- (6) The following information may be allowed to be displayed on the Firms/Members' Websites:*
 - (i) Member/Trade/Firm name.*
 - (ii) Year of establishment.*
 - (iii) Member/Firm's Address (both Head Office and Branches)*
 - Tel. No(s)*
 - Fax No(s)*
 - E-mail ID(s)*

** The Council at its 345th Meeting amended the para 6(ix) of the Guidelines*

(iv) *Nature of services rendered (to be displayable only on specific “pull” request)*

(v) **Partners**

Partners Name	Year of Qualification	Other Qualification(s)	Tel Off. – Direct Res. Mobile E-mail address	Area of Experience (to be displayable only on Specific “pull” request)

(vi) **Details of Employees –**

Professional	Others	Name	Designation	Area of Experience (to be displayable only on Specific “pull” request)

(vii) *Job vacancies for the Chartered Accountant/firm of Chartered Accountants (including articleship).*

(viii) *No. of articled clerks. (to be displayable only on specific “pull” request).*

(ix) *Nature of assignments handled (to be displayable only on specific “pull” request). Names of clients and fee charged cannot be given.*

Note*: *Disclosure of names of clients and/or fees charged, on the website is permissible only where it is required by a regulator, whether or not constituted under a statute, in India or outside India, provided that such disclosure is only to the extent of requirement of the regulator. Where such disclosure of names of clients and/or fees charged is made on the website, the member/ firm shall ensure that it is mentioned on the website [in italics], below such disclosure itself, that “This disclosure is in terms of the requirement of [name of the regulator] having jurisdiction in [name of the country/area where such regulator has jurisdiction] vide [Rule/ Directive etc. under which the disclosure is required by the Regulator].*

(7) *Since Chartered Accountants in practice/firms of Chartered Accountants are not permitted to use logo with effect from 1st July, 1998, they cannot use logo on Website also.*

(8) *Display of Passport size photograph is permitted.*

(9) *The members may include articles, professional information, professional updation and other matters of larger importance or of professional interest.*

* The amendment shown in bold was made pursuant to the decision taken by the Council at its 345th Meeting held on 14th -16th August, 2015

- (10) The bulletin boards can be provided.*
- (11) The chat rooms can be provided which permit chatting amongst members of the ICAI and between Firms and its clients. The confidentiality protocol would have to be observed.*
- (12) The members/firms can provide on line advice to their clients who specifically request for the advice whether free of charge or on payment.*
- (13) The listing on suitable search engine should be permitted. However, the field of search should be restricted only to the field of "Chartered Accountants" or "CA" or "Indian CA", "Indian CPA", "Indian Chartered Accountant" or any permutation or combination related thereto. The Websites would be subjected to the guidelines contained herein and normally would not be vetted by the Institute of Chartered Accountants of India (ICAI). ICAI at its sole discretion may vet any of the Websites created by its members or individual Chartered Accountant or firms of Chartered Accountants and would have powers to direct deletion of certain portions and/or issue specific directions. In addition, necessary action can be taken in accordance with the Chartered Accountants Act, 1949 and the Regulations framed thereunder, in case there is any violation of the above guidelines.*
- (14) The details in the Website should be so designed that it does not amount to soliciting client or professional work. In case any content or technical feature of Website is against the professional Code of Conduct and Ethics as well as the restrictions contained in the schedules to the Chartered Accountants Act, 1949 or against the guidelines or directions issued by ICAI from time to time, appropriate action will be initiated by the ICAI in terms of its disciplinary mechanism either suo-motto or on complaint as provided under the Chartered Accountants Act, 1949.*
- (15) The Website should ensure adequate secrecy of the matters of the clients handled through Website,*
- (16) A number of Chartered Accountants Societies or other bodies are creating databases of Chartered Accountants or Chartered Accountants' Firms and are offering listing to Chartered Accountants. Such listing would be permitted with or without payment. In case a Chartered Accountant or Chartered Accountants' Firm is a member of a professional body or association or Chamber of Commerce and they offer listing to the members or firm, the same would be permitted.*
- (17) The Institute of Chartered Accountants of India will regularly inform the aforesaid guidelines to the members and the Chartered Accountants' Firms to ensure the strict compliance of the guidelines. The guidelines may be revised from time to time.*
- (18) No Advertisement in the nature of banner or any other nature will be permitted on the Website.*

- (19) *The Website should be befitting the profession of Chartered Accountants and should not contain any information or material which is unbecoming of a Chartered Accountant.*
- (20) *The Website may provide a link to the Website of ICAI, its Regional Councils and Branches and also the Website of Govt./Govt. Departments/Regulatory authorities/other Professional Bodies, such as, American Institute of Certified Public Accountants (AICPA), the Institute of Chartered Accountants of England & Wales (ICAEW) and The Canadian Institute of Chartered Accountants (CICA).*
- (21) *The address of the Website can be different from the name of the firm. But it should not amount to soliciting clients or professional work or advertisement of professional attainments or services. The Website address should be as near as possible to the individual name/trade name, firm name of the Chartered Accountant in practice or firm of Chartered Accountants in practice. The Ethical Standards Board (ESB) of ICAI will decide in case there is any difficulty.*
- (22) *The Website should mention the date upto which it is updated and the information should not be at material variance from the information as per the ICAI's records.*

The website address of the member be obtained on annual basis in the annual form required to be filed by the member while paying fee and the same be taken as entry on record & the website address of the member be provided to members as part of the membership record. If the member chose not to give his website address, it did not prevent the Institute to take suitable action against him in case his noncompliance with the guidelines.

A number of non-Chartered Accountants' firms, corporate including banks, finance Companies and newspapers have set up their own Websites providing advisory services on taxation and other areas where Chartered Accountants are rendering professional service. Some of such Websites may request Chartered Accountants or Chartered Accountants' firms to provide consultation and advice through their Websites. This would be permitted subject to the condition that on the Website, contact address of the Chartered Accountant concerned is not provided nor such Website will contain any material which advertises professional achievements or status of such Chartered Accountant except making a statement that they are Chartered Accountants. The name of Chartered Accountants' firm with suffix "Chartered Accountants" would not be permitted.

Some of the decisions of the Council/High Courts on this clause are given below:

Solicitation – Where a chartered accountant firm issued a letter of authority in favour of two other chartered accountants to accept and carry out audits of Co-operative Societies on its behalf and they (the two chartered accountants) issued circulars of which the firm was not aware - Held, that the firm was not guilty of professional misconduct. [V.B. Kirtane (1958)] But the person, in whose favour the letter of authority was given in the above case, was held guilty. [MR Walke (1958)]

A chartered accountant sent a printed circular to a person unknown to him offering his services in profit planning and profit improvement programmes. The circular conveyed the idea that it was meant for strangers only. Held, the chartered accountant was guilty of professional misconduct under the clause as he used the circulars to solicit clients and professional work. [*B.S.N. Bhushan (1965)*]

A chartered accountant wrote several letters to Assistant Registrars/ Registrars of Co-operative Societies, Government of West Bengal requesting for allotment of audit work and to enroll his name on panel of auditors. Held he was guilty of professional misconduct under the clause. The activities of the chartered accountant went much beyond the instructions of the Council to the effect that roving enquiries should not be made with the Government Department for empanelling the name unless it had been ascertained in advance that specific panel was being maintained. It was also held that an auditor of co-operative societies under a license granted by co-operative department was not its employee and, therefore, he could not solicit work. [*Chief Auditor of Co-operative Societies, West Bengal vs. B.B. Mukherjee (1967)*]

A chartered accountant, inspite of the previous reprimand, sent letters to registrar Co-operative societies, Calcutta, stating that no allotment of audit was made to him and requested to take action immediately and oblige. Held he was guilty of professional misconduct under the clause. [*D.N. Das Gupta, Chief auditor of Co-operative Societies, West Bengal vs. B.B. Mukherjee (1969)*]

A Chartered Accountant approached the principal of a secondary school through a third person known to the principal for his appointment as auditor of that school. Further, the chartered accountant misrepresented to the previous Auditor that he had been offered appointment as auditor of the school and enquired whether he had any objection to his accepting the same though it was a fact that the appointment of chartered accountant was not made, the chartered accountant was guilty of professional misconduct under the clause. It was further held that writing letter by the Chartered Accountant to the previous auditor offering his services to audit the accounts of school was not wrong as it was an offer to professional colleague and not to a prospective client. [*M. L. Agarwal (1973)*]

A member was found guilty of professional misconduct under Clauses (6) and (7) Part I of the First Schedule for having issued circular letter regarding change of address of his firm to persons who were not in professional relationship with him and for having written to the shareholders thanking them for appointing him as auditor. He was reprimanded by the Council under Section 21(4), on an appeal made by the Council having regard to the ethical requirement about publicity by the members of the Institute as laid down in the "Code of Conduct". [*K.K. Mehta vs. M..K. Kaul (1975)*]

An advertisement was published in a newspaper containing the member's photograph wherein he was congratulated on the occasion of the opening ceremony of his office. He was found guilty by the Council and later, by High Court of violating the Clause (soliciting work by advertisement). The following observations of the High Court may be relevant.

- (a) The advertisement which had been put in by the member is a noticeable one and the profession of Chartered Accountancy should maintain high standards of integrity, professional ethics and efficiency.

22.30 Advanced Auditing and Professional Ethics

- (b) If soliciting of work is allowed the independence and forthrightness of a Chartered Accountant in the discharge of duties cannot be maintained and therefore some discipline must be maintained by the profession. *[G.P. Agrawal (1982)]*

A member who got an advertisement published in a newspaper offering his "services in matters of Accounts, Income Tax, Labour laws, Law matters and Management Services was found guilty in terms of this clause as also under Clause (7). *[Anil K. Garg (1987)]*

A member had an advertisement published in a newspaper regarding inauguration of his professional office. It was held that having regard to:

- (i) the nature of the advertisement
- (ii) the function organised on that occasion
- (iii) the persons invited
- (iv) the medium used
- (v) the names of various concerns which had conveyed their good wishes
- (vi) the advertisement having been released by the Respondent himself and he had solicited professional work by advertisement, he was found guilty in terms of this clause. *[Shashindra S. Ostwal (1988)]*

A member wrote a letter to a Company in standard format highlighting his expertise in sales tax matters and had requested for a draft of ₹ 200/- if his knowledge of the Sales tax matters has been found worthwhile. The member was found guilty in terms of this Clause. *[K.A. Gupta (1989)]*

Where a Chartered Accountant had visited personally the clients for securing the appointment as auditors of the Institutions. Held that he was guilty under Clause (6) of Part I of First Schedule. *[J.S. Bhati Vs. M.L Aggarwal. (1991)]*

Where a Chartered Accountant had addressed an undated but signed letter to-a Bank requesting for empanelment of his firm as auditor along with the particulars of his firm showing the past experience and other details of the firm; and a Member of Parliament had also sent a letter to the Bank recommending the name of the said Chartered Accountant's firm for immediate empanelling for Internal Audit/Inspection Audit/Management Audit, Expenditure Audit. Held that the member was guilty under Clause (6) of Part I of the First Schedule. *[Naresh C. Aggarwal (1992)]*

Where a Chartered Accountant had sent a letter on the letterhead of his firm to a non-member introducing himself as a chartered accountant giving details of services rendered by him and the schedule of his fees for rendering various kinds of services. Held that he was guilty under the clause. *[Vijay Kumar Goel (1994)]*

Where a Chartered Accountant had written a letter to a Co-operative Society wherein he had mentioned that he had been authorised by the Registrar of Societies to conduct the statutory audit of the Societies and requested it to contact him. Held that it tantamount to solicitation of the audit and he had violated the provisions of the clause. *[M. V. Lonkar (1996)]*

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 1(a), 3(c), 8, 9(ii), 10(d), 13(a), 18(a), 20(c), 20(d), 24(c), 24(d), 25(a), 27(b), 29(d), 32(b), 34 of the Practice Manual.]

Clause (7) Advertises his professional attainments or services, or uses any designation or expressions other than the Chartered Accountant on professional documents, visiting cards, letter heads or sign boards unless it be a degree of a University established by law in India or recognized by the Central Government or a title indicating membership of the Institute of Chartered Accountants or of any other institution that has been recognized by the Central Government or may be recognized by the Council.

Provided that a member in practice may advertise through a write up, setting out the service provided by him or his firm and particulars of his firm subject to such guidelines as may be issued by the Council.

This clause prohibits advertising of professional attainments or services of a member. It also restrains a member from using any designation or expression other than that of a Chartered Accountant in documents through which the professional attainments of the member would come to the notice of the public.

It is improper for a Chartered Accountant to state on his professional documents that he is an Income-tax Consultant or a Cost Consultant or a Management Consultant.

The date of setting up the practice by a member or the date of establishment of the firm on the letterheads and other professional documents, etc. should not be mentioned. However in the Website, the year of establishment can be given on the specific "pull" request.

A member must not use the designation such as 'Member of Parliament', Municipal Councilor or any other functionary in addition to that of Chartered Accountant.

Members of the Institute in practice who are otherwise eligible may practice as advocates subject to the permission of the Bar Council but in such case, they should not use designation 'chartered accountant in respect of the matters involving the practice as an advocate. In respect of other matters they should use the designation 'chartered accountant' but they should not use the designation 'chartered accountant' and 'advocate' simultaneously.

It is not proper for Chartered Accountant to use the designation "Chartered Accountant" except on professional documents, visiting cards, letterheads or sign boards and under the circumstances clarified under para (f) of Clause (6).

The name, description and address of member (or firm) may appear in any directory or list of members of a particular body in which the names are listed alphabetically. For a specialised directory or a publication such as a "Who's Who" (including those compiled on purely local basis), a member should use his discretion in supplying information, bearing in mind the nature and purpose of the publications. In addition to his name, description and address and those of his firm, a member may give where appropriate, directorship held and reasonable personal details and may state his outside interests. He should not, however, give the names of any of his clients or details of the service offered by his firm.

22.32 Advanced Auditing and Professional Ethics

Publication of Name or Firm Name by Chartered Accountants in the Telephone or other Directories published by Telephone Authorities or Private Bodies. Detailed directions of the Council in this regard are published under Clause (6).

There should be no objection to the publication of photographs and brief particulars of members in magazines provided no payment is made for such publication and there is no advertisement of professional attainments.

Further via a clarification on whether the Chartered Accountants in practice can print their photograph on their visiting cards, the Ethical Standard Board (ESB) of the Institute has opined that mostly the business class prints the photograph on their visiting cards for promoting their business and soliciting clients. As such, it is not permissible for the chartered accountants in practice to print their photograph on their visiting cards.

However, a member in practice is allowed to print Quick Response Code (QR Code) on the visiting Card, provided that the Code does not contain information that is not otherwise permissible to be printed on a visiting Card.

A special exemption has been made as regards publication of the name and address of a member or that of his firm, with the description Chartered Accountant(s), in an advertisement appearing in the press in the following circumstances, provided that the advertisement is not displayed more prominently than is usual for such advertisements or the member or that of his firm with the designation Chartered Accountant(s) appears in type not bolder than the substance of the advertisement.

- (a) Advertisements for recruiting staff in the members' own office.
- (b) Advertisements inserted on behalf of clients requiring staff or wishing to acquire or dispose of business or property.
- (c) Advertisement for the sale of a business or property by a member acting in a professional capacity as trustee, liquidator or receiver.

When advertising for staff, it is desirable that members should avoid the expression such as "a well-known firm", since this would be form of advertisement. Similar considerations apply to advertisements for articled clerks. The advertisements should not contain any promotional element nor should there be any suggestion that the services offered by the Chartered Accountant or his firm are superior to those offered by other accountants.

Notice in the press relating to the success in an examination of an individual candidate, should not contain any element of undesirable publicity either in relation to the articled/audit clerk or an employee or the member or the firm with whom he has served.

It is usual for local papers to publish details of the examination success of local candidates. Some biographical information is often included. The rule aforementioned is not intended to discourage the printing of news of local interest but is intended to indicate the need for restraint. The candidate's name and address, school and local background, examinations passed with details of any prize or place gained, the name of the principal, firm and town in which the principal practices may be published.

The reports and certificates issued by a Chartered Accountant brings him to the notice of the public in a greater or lesser degree. It is therefore incumbent upon him to ensure that the extent and manner of publications of certificates are limited to what is necessary to enable the report or certificate to serve its proper purpose.

Member may appear on television and films and agree to broadcast in the Radio or give lectures at forums and may give their names and describe themselves as Chartered Accountants. Special qualifications or specialized knowledge directly relevant to the subject matter of the programme may also be given but no reference should be made, in the case of practicing member to the name and address or services of his firm. What he may say or write must not be promotional of his or his firm but must be an objective professional view of the topic under consideration.

Publicity is permitted for appointments to positions of local or national importance or for the views of members on matters of similar importance. Mention of the membership of the Institute is desirable in such cases. What should be aimed at is to achieve suitable publicity for the Institute and its member generally. Members giving talks or lectures or attending a conference may describe themselves as Chartered Accountants only when they are acting in their capacity as Chartered Accountant. Here again reference to the professional firm of the member should not be given.

A professional accountant in public practice holding training courses, seminars etc. for his staff may also invite the staff of other professional accountants and clients to attend the same. However, undue prominence should not be given to the name of the profession accountant in any booklet or document issued in connection therewith.

Members writing articles or letters to the press on subjects connected with the profession may give their names and use the description Chartered Accountants.

Council Guidelines for Advertisement for the Members in Practice

(Issued Pursuant to Clause (7) of Part I of the First Schedule to the Chartered Accountants Act, 1949)

The Members may advertise through a write up setting out their particulars or of their firms and services provided by them subject to the following Guidelines and must be presented in such a manner as to maintain the profession's good reputation, dignity and its ability to serve the public interest.

The Member(s)/Firm(s) should ensure that the contents of the Write up are true to the best of their knowledge and belief and are in conformity with these Guidelines and be aware that the Institute of Chartered Accountants of India does not own any responsibility whatsoever for such contents or claims by the Writer Member(s)/ Firm(s).

With regard to the size of signboard for his office that member can put up, it is matter in which the members should exercise their own discretion and good taste. Use of glow signs or lights on large-sized boards as is used by traders or shop-keepers would not be proper. A member can have a name board at the place of his residence with the designation of a Chartered

22.34 Advanced Auditing and Professional Ethics

Accountant provided it is a name plate or name board of an individual member and not of the firm.

The Council has issued following Guidance Note for Members Holding Certificate of Practice on acceptance of directorships in companies.

The Council's attention has been drawn to the fact that more and more companies are appointing Chartered Accountants as directors on their Boards. The prospectus or public announcements issued by these companies often publish descriptions about the Chartered Accountant's expertise, specialization and knowledge in any particular field or add appellation or adjectives to their names. Attention of the members in this context is invited to the provisions of Clauses (6) and (7) of Part I of the First Schedule to the Chartered Accountants Act.

In order that the inclusion of the name of a member of the Institute in the prospectus or public announcements or other public communications issued by the companies in which the member is a director does not contravene the above noted provisions, it is necessary that the members should take necessary steps to ensure that such prospectus or public announcements or public communications do not advertise his professional attainments and also that such prospectus or public announcements or public communications do not directly or indirectly amount to solicitation of clients for professional work by the member. While it may be difficult to lay down a rigid rule in this respect, the members must use their good judgement, depending upon the facts and circumstances of each case to ensure that the above noted provisions are complied with both in letter and spirit.

It is advisable for a member that as soon as he is appointed as a director on the Board of a Company, he should specifically invite the attention of the management of the company to the aforesaid provisions and should request that before any such prospectus or public announcements or public communication mentioning the name of the member concerned, is issued, the material pertaining to the member concerned should, as far as practicable be got approved by him. The use of the expression 'Chartered Accountant' is permissible. However, the member must ensure that descriptions about his expertise, specialization and knowledge in any particular field of other appellation or adjectives are not published with his name. Particulars about directorships held by the member in other companies can, however, be given, but the name of the Firm of Chartered Accountants in which the member is a partner, should not be given.

The Council has issued the following guidelines for use of expressions such as 'Associates of 'Correspondents of... etc. on letter heads, visiting cards etc. of firms of Chartered Accountants:

The use of expressions / words 'in Association with 'Associates of 'Correspondents of.... etc., on the stationery letter heads, visiting cards and professional documents etc. of firms of Chartered Accountants is not permissible in view of the provisions of Clause (7) of Part I of the First Schedule to the Chartered Accountants Act, 1949 irrespective of whether the connection bearing name sought to be used was the name of an Indian firm or a foreign firm. The Council has not barred entering into such association and the restriction given under the above clause is to bar an advertisement appearing / derived from such associations.

For use of logos by Members on letter heads, visiting cards etc. the Council has decided that the logos unconnected with the first letter of the name of the firm or its partners or proprietors will not be permitted for use by members in practice / firms of chartered accountants on their letter heads, visiting cards etc. as the same amounts to advertisement or smacking of publicity. Accordingly, an announcement was published in October, 1995 issue of "The Chartered Accountant".

Subsequent to above, the Institute came across cases of registration of firm name in circumvention of the provisions contained in the Regulation 190 of the Chartered Accountants Regulations, 1988. The members/firms by themselves or through engineered name had been seeking to obtain firm name approval based on the name of the partner/s selected in the manner that logo of the firm would be identical to the firm name which would have not otherwise been permissible as firm name under Regulation 190. In order to ensure compliance with the Regulations, the Council at its meeting held in December, 1997, therefore, decided that the use of logo/monogram of any kind/form/style/design/colour, etc. whatsoever on any display material or media e.g. paper stationery, documents, visiting cards, magnetic devices, internet, sign board, by the members in practice and/or the firm of Chartered Accountants, be prohibited. Use/printing of member/firm name in any other manner tantamounting to logo/monogram was also prohibited.

An announcement was published in February, 1998 issue of the Journal at pages 54 & 55 informing that the use of logo/monogram as above was prohibited with immediate effect in the case of newly enrolled members in practice/new firms of Chartered Accountants. The members already in practice/existing firms of Chartered Accountants using logo/monogram were advised to take immediate steps for discontinuing use of the logo/monogram so as to stop using the logo/monogram in any case before 1st July, 1998. The Council at its meeting held in December 1999 has reiterated its decision to ban logo.

Some of the decisions of the Council/High Courts on this clause are given below:

Where a Chartered Accountant used the designation 'Incorporated Accountant London' and 'Registered Accountant', India, in the Balance Sheet and also failed to report to the shareholders in the prescribed form under the Banking Companies Act - Held the chartered accountant was guilty of the two charges. The word 'member' in Section 21 of the Act should be constructed as including a past member for the purpose of inquiry, as what was required membership at the time of the commission of the alleged misconduct. [*Mirza M. Hussain (1955)*]

A chartered accountant wrote several letters to Government Department, inter alia, pointing out seniority of his firm, sending his life sketch and stating that he had a glorious record of service to the country as well as to the organisation of accountancy profession with a view to get the audit work. These letters were clearly in the nature of advertising professional attainments. Held, he was guilty of professional misconduct under the clause. [*Sirdar P.S. Sodhbans (1969)*]

Where a Chartered Accountant had issued two insertions in a Journal published by a Chamber of Commerce expressing his willingness to offer the concession in respect of all services offered by him. Held that he was guilty under Clauses (6) & (7). [*N.O. Abraham Isaac Raj (1992)*]

22.36 Advanced Auditing and Professional Ethics

Where a Chartered Accountant had addressed a letter to the Managing Director of a company offering his services as a practicing chartered accountant and giving impression that the letter had been addressed to more than one organization for the above purpose, it was held that the member had contravened the provisions of Clauses (6) & (7). [*Yogash Gupta (1996)*]

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 7(ii), 9(ii), 20(b), 21(a), 31(b), 34 of the Practice Manual.]

Clause (8) accepts a position as auditor previously held by another chartered accountant or a certified auditor who has been issued certificate under the Restricted Certificate Rules, 1932 without first communicating with him in writing.

It must be pointed out that professional courtesy alone is not the major reason for requiring a member to communicate with the existing accountant who is a member of the Institute or a certified auditor. The underlying objective is that the member may have an opportunity to know the reasons for the change in order to be able to safeguard his own interest the legitimate interest of the public and the independence of the existing accountant. It is not intended, in any way, to prevent or obstruct the change. When making the inquiry from the retiring auditor, the one proposed to be appointed or already appointed should primarily find out whether there are any professional or other reasons why he should not accept the appointment.

It is important to remember that every client has an inherent right to choose his accountant also that he may, subject to compliance, with the statutory requirements in the case of limited companies, make a change whenever he chooses, whether or not the reasons which had impelled him to do so are good and valid. The change normally occurs where there has been a change of venue of business and a local accountant is preferred or where the partner who has been dealing with the client's affairs retires or dies; or where temperaments clash or the client has some good reasons to feel dissatisfied. In such cases, the retiring auditor should always accept the situation with good grace.

The existence of a dispute as regards the fees not having been paid often may be the root cause of an auditor being changed, but this would not constitute valid professional reasons on account of which an audit should not be accepted by the member to whom it is offered. It is no doubt true that the incoming auditor should in appropriate circumstances use his influence in favour of his predecessor to have the disputes as regards the fees settled. Also a number of members would not accept appointment in such circumstances unless and until they are satisfied that the predecessor has been fairly treated, but there is no rule to that effect and the decision in this regard must rest with the good sense of the member himself.

The professional reasons for not accepting an audit could be:

- (i) Non-compliance of the provisions of Sections 224 and 225 of the Companies Act as mentioned in Clause (9) [now Section 139, 140 and 142 read with Section 141 of the Companies Act, 2013];
- (ii) Non-payment of undisputed audit fees by auditees other than in case of sick units for carrying out the statutory audit under the Companies Act or various other statutes; and
- (iii) Issuance of a qualified report.

In the first two cases, an auditor who accepts the audit would be guilty of professional misconduct. The Council has taken the view that the provision for audit fee made in accounts signed by both - the auditee and auditor shall be considered as 'undisputed' audit fees. In this connection, attention of members is invited to Council Guidelines No. 1-CA/(7)/02/2008 dated 08.08.08. In the said guidelines, Council has explained that the provision for audit fee in accounts signed by both the auditee and the auditor shall be considered as "undisputed" audit fee and "sick unit" shall mean where the net worth is negative.

In the last case, however, he may accept the audit if he is satisfied that the attitude of the retiring auditor was not proper and justified. If, on the other hand, he feels that the retiring auditor has qualified the report for good and valid reasons, it would be a healthy practice not to accept the audit. There is however no rule, written or unwritten, which would prevent an auditor from accepting the appointment offered to him in these circumstances. However, before accepting the appointment he should ascertain full facts of the case. For nothing will bring the profession to disrepute so much as the knowledge amongst the public that if an auditor is found to be "inconvenient" by the client, he could readily be replaced by another who would not displease the client and this point cannot be too over-emphasized.

What should be the correct procedure to adopt when a prospective client tells you that he wants to change his auditor and wants you to take up his work? There being two persons involved, the company and the old auditor, the former should be asked whether the retiring auditor has been informed of the intention to change. If the answer is in the affirmative, then a communication should be addressed to the retiring auditor. If, however, it is learned that the old auditor has not been informed, and the client is not willing to make the first move, it would be necessary to ask him the reason for the proposed change. If there is no valid reason for a change, it would be healthy practice not to accept the audit. If he decides to accept the audit he should address a communication to the retiring auditor.

As stated earlier the object of the incoming auditor, in communicating with the retiring auditor is to ascertain from him whether, there are any circumstances which warrants him not to accept the appointment. For example, whether the previous auditor has been changed on account of having qualified his report or he had expressed a wish not to continue on account of something inherently wrong with the administration of the business. The retiring auditor may even give out information regarding the condition of the accounts of the client or the reason that impelled him to qualify his report. In all these cases it would be essential for the incoming auditor to carefully consider the facts before deciding whether or not he should accept the audit, and should he do so, he must also take into account the information while discharging his duties and responsibilities.

Sometimes, the retiring auditor fails without justifiable cause except a feeling of hurt because of the change, to respond to the communication of the incoming auditor. So that it may not create a deadlock, the auditor appointed can act, after waiting for a reasonable time for a reply.

The Council has taken the view that a mere posting of a letter "under certificate of posting" is not sufficient to establish communication with the retiring auditor unless there is some evidence to show that the letter has in fact reached the person communicated with. A Chartered

22.38 Advanced Auditing and Professional Ethics

Accountant who relies solely upon a letter posted “under certificate of posting” therefore does so at his own risk.

The view taken by the Council has been confirmed in a decision by the Rajasthan High Court in J.S. Bhati v.s. The Council of the Institute of Chartered Accountants of India and another. The following observations of the Court are relevant in this context:

“Mere obtaining a certificate of posting in my opinion does not fulfil the requirements of Clause (8) of Schedule I as the presumption under Section 114 of the Evidence Act that the letter in due course reached the addressee cannot replace that positive degree of proof of the delivery of the letter to the addressee which the letters of the law in that case required. The expression ‘in ‘ communication with’ when read in the light of the instructions contained in the booklet ‘Code of Conduct’ (now Code of Ethics) cannot be interpreted in any other manner but to mean that there should be positive evidence of the fact that the communication addressed to the outgoing auditor by the incoming auditor reached his hands. Certificate of posting of a letter cannot, in the circumstances, be taken as a positive proof of its delivery to the addressee”.

Members should therefore communicate with a retiring auditor in such a manner as to retain in their hands positive evidence of the delivery of the communication to the addressee. In the opinion of the Council, communication by a letter sent “Registered Acknowledgment due” or by hand against a written acknowledgment would in the normal course provide such evidence.

The Council is of the opinion that it would be a healthy practice if the practice of communication with the member who had done the work previously is followed in every case where a Chartered Accountant is required to give a certificate or in respect of a verification of the books of account for special purpose as well as in cases where he is appointed as a Liquidator, Trustee or Receiver and his predecessor was a Chartered Accountant.

As a matter of professional courtesy and professional obligation it is necessary for the new auditor appointed to act jointly with the earlier auditor and to communicate with such earlier auditor.

It is desirable that a member, on receiving communication from the auditor who has been appointed in his place, should send a reply to him as soon as possible setting out in detail the reasons which according to him had given rise to the change and other attended circumstances but without disclosing any information as regards the affairs of the client which he is not competent to do.

The Council has also laid down the detailed guidelines on the subject as under:

- (1) The requirement for communicating with the previous auditor being a chartered accountant in practice would apply to all types of audit viz., statutory audit, tax audit, internal audit, concurrent audit or any other kind of audit.
- (2) Various doubts have been raised by the members about the terms “audit”, “previous auditor”, “Certificate” and “report”, normally while interpreting the aforesaid Clause (8). These terms need to be clarified.
- (3) As per para 2 of SA 200 on “Basic Principles Governing an Audit”, an “audit” is the independent examination of financial information of any entity, whether profit oriented or

not, and irrespective of its size or legal form, when such an examination is conducted with a view to expressing an opinion thereon.

- (4) The term “previous auditor” means the immediately preceding auditor who held same or similar assignment comprising same/similar scope of work. The mandatory communication with the previous auditor being a Chartered Accountant is required even in a case where the previous auditor happens to be an auditor for a year other than the immediately preceding year.
- (5) As explained in para 2.2 of the Institute’s publication viz., ‘Guidance Note on Audit Report and Certificates for Special Purposes’, a “certificate” is a written confirmation of the accuracy of the facts stated therein and does not involve any estimate or opinion. A “report”, on the other hand, a formal statement usually made after an enquiry, examination or review of specified matters under report and includes the reporting auditor’s opinion thereon. Thus, when a reporting auditor issues a certificate, he is responsible for the factual accuracy of what is stated therein. On the other hand, when a reporting auditor gives a report, he is responsible for ensuring that the report is based on factual data, that his opinion is in due accordance with facts, and that it is arrived at by the application of due care and skill.
- (6) A communication is mandatorily required for all types of audit/report if the previous auditor is a chartered accountant. For certification, it would be healthy practice to communicate. In case of assignments done by other professionals not being chartered accountants, it would also be a healthy practice to communicate.
- (7) Although the mandatory requirement of communication with previous auditor being chartered accountant applies, in uniform manner, to audits of both government and non-government entities, yet in the case of audit of government is made well in time to enable the obligation must be complied with before accepting the audit. However, in case the time schedule given for the assignment is such that there is no time to wait for the reply from the outgoing auditor, the incoming auditor may give a conditional acceptance of the appointment and commence the work which needs to be attended to immediately after he has sent the communication to the previous auditor in accordance with this clause. In his acceptance letter, he should make clear to the client that his acceptance of appointment is subject to professional objections, if any, from the previous auditors and that he will decide about his final acceptance after taking into account the information received from the previous auditor.

Some of the decisions of the Council/High Courts on this matter are briefly given in the following paragraphs:

A Chartered Accountant commenced the work of audit on the very day he sent letter to the ‘previous auditor - Held, he was guilty of professional misconduct under the clause. The appointment could be accepted only when the outgoing auditor does not respond within a reasonable time. [S.N. Johri vs. N.K. Jain (1973)]

22.40 Advanced Auditing and Professional Ethics

A Chartered Accountant sent a registered letter to the previous auditor after the commencement of the audit by him. Held he was guilty of professional misconduct under the clause. [*Radhey Shyam vs. K.S. Dubey (1974)*]

A chartered accountant had sent a communication to the previous auditor under certificate of posting without obtaining any acknowledgment thereof. The Council held the member guilty in terms of this Clause. On an appeal made by the member, the High Court observed that the expression “in communication with” when read in the light of the instructions contained in the booklet “Code of Conduct” could not be interpreted in any other manner but to mean that there should be positive evidence of the fact that the communication addressed to the outgoing auditor had reached his hands. Certificate of Posting of a letter could not in the circumstances be taken as positive evidence of its delivery to the addressee. [*M.L. Agarwal vs. J.S. Bhati (1975)*]

The provision of Clause (8) requiring a communication with the previous auditor is absolute and applicable even in respect of an appointment by the Government agencies and even in case where the member is aware that the previous auditor had been made aware of the appointment. [*Rajeev Kumar vs. R.K. Agrawal (1988)*]

The requirements of Clause (8) of Part I of the First Schedule can be considered to have been complied with only:

- (i) if there is evidence that a communication to the previous auditor had been by R.P.A.D.
- (ii) if there was positive evidence about delivery of the communication to the previous auditor.

In the absence of both, the member should be found to have contravened this Clause. [*R.M. Singhai vs. R.V. Agarwal (1988)*]

Where a Chartered Accountant had conducted tax audit of a firm without first communicating in writing with the Complainant, who was the previous tax auditor of the said firm. Held that he was guilty under the clause. [*V.A. Parikh vs. R.I. Galledar (1991)*]

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 12(a), 13(b), 16(c), 26 of the Practice Manual.]

Clause (9) Accepts an appointment as auditor of a company without first ascertaining from it whether the requirements of Section 225 of the Companies Act, 1956, in respect of such appointment have been duly complied with (now Section 139, 140 and 142 read with Section 141 of the Companies Act, 2013).

The Companies Act, 2013 provides for the requirements which an auditor appointed in respect of a company should satisfy himself about, before he accepts the appointment. The relevant provisions are contained in Sections 139, 140, 141 and 142 of the said Act. Section 139 contains several provisions in the matter of appointment of auditors in different circumstances and situations; and Section 140 lays down the procedure which must be followed when a company desires to change its auditors, or when an auditor resigns from the company; whereas Section 141 provides the eligibility, qualifications and disqualifications of auditors; and Section 142 contains the provisions related to the remuneration of the auditor. In order that the validity of the appointment of an auditor is not challenged or objected to by shareholders or the retiring auditors at a later date, it has been made obligatory on the incoming auditor to ascertain from

the company that the appropriate procedure in the matter of appointment has been faithfully followed.

The following guidelines have been issued by the Council for this purpose:

- (1) The steps to be taken by an auditor of a company who is appointed in the following circumstances are indicated below:
 - (i) When the auditor appointed is the first auditor of the company.
 - (ii) When the auditor is appointed in place of an existing auditor who has resigned or has been removed or has ceased to hold office for any other reason.
 - (iii) When the auditor or auditors appointed by the company were holding this office jointly with others and one or more of such joint auditors are not reappointed.
 - (iv) When one or more of the auditors appointed by the company was/were not holding this office earlier.
- (2) Under Clause (9) of Part I of the First Schedule to the Chartered Accountants Act, 1949, the incoming auditor has to ascertain whether the company has complied with the provisions of the above sections. The word “ascertain” means “to find out for certain”. This would mean that the incoming auditor should find out for certain as to whether the company has complied with the provisions of Sections 224, 224A and 225 of the Companies Act, 1956 (now Section 139, 140 and 142 read with Section 141 of the Companies Act, 2013). In this respect, it would not be sufficient for the incoming auditor to accept a certificate from the management of the company that the provisions of the above sections have been complied with. It is necessary for the incoming auditor to verify the relevant records of the company and ascertain as to whether the company has, in fact, complied with the provisions of the above Sections. If the company is not willing to allow the incoming auditor to verify the relevant records in order to enable him to ascertain as to whether the provisions of the above sections have been complied with, the incoming auditor should not accept the audit assignment.
- (3) (A) As regards the mode of sending the notice of the resolution to the members of the company as provided in Sections 224 and 225 (now Section 139, 140 and 142 read with Section 141 of the Companies Act, 2013), it should be noted that there is no provision that the notice should necessarily be sent by registered post. The notice can be sent by the company in accordance with the provisions contained in Section 53 (now Section 20 of the Companies Act, 2013).

For the purpose of better understanding to the students, the relevant provisions of Section 20 of the Companies Act, 2013 are briefly summarised hereunder:

- (i) A document may be served on a company or an officer thereof sending it through registered post; or speed post; or courier service; or by leaving it at its registered office; or by means of electronic transmission.
- (ii) If the member or the person concerned has given specific direction to the Company that the notice should be sent to him through a particular mode, and has deposited with the Company the sum sufficient to defray the expenses for

22.42 Advanced Auditing and Professional Ethics

this purpose, the notice should be sent in such specified manner.

- (iii) For above purposes, the courier means a document sent through a courier which provides proof of delivery.
- (B) If it is not practicable to send the notice of the resolution to the members by post, such notice can be given either by advertisement in a newspaper having an appropriate circulation or in any other mode allowed by the Articles of Association of the Company.
- (C) In order to ascertain whether notice of the resolution has been sent to the members, the incoming auditor should ascertain whether there is sufficient evidence with the Company to indicate that the notice has been sent by any of the modes stated in (A) or (B) above. The despatch register, postage register, postal certificate (if notice is sent under postal certificate) or such other satisfactory evidence available with the company should be verified.
- (D) As regards the mode of sending the notice of the resolution to the retiring auditor as provided in Sections 224 and 225 (now Section 139, 140 and 142 read with Section 141 of the Companies Act, 2013), attention is invited to the Department of Company Affairs circular dated 17.10.1981 issued to all Chambers of Commerce, which is reproduced below.
- “I am directed to say that it has been reported by the Institute of Chartered Accountant of India that difficulties are being experienced by retiring Auditors in the operation of the provisions of Section 225 of the Companies Act, 1956 whenever any appointment of a new auditor takes place. Such difficulties arise because of the fact that the copy of the special notice required to be served under Section 225(2) of the Act on the retiring auditors are not effectively served and proof of such service is not available. To obviate such difficulties, therefore, it is advisable than the copy of the special notice under Section 225(2) of the Act should be sent to the retiring auditors by Registered Post with A/D.”
- (E) Accordingly, it is necessary for the incoming auditor to satisfy himself that the notice provided for in Sections 224 & 225 (now Section 139, 140 and 142 read with Section 141 of the Companies Act, 2013) has been effectively served on the outgoing auditor (e.g. by seeing that the notice has been duly served through hand delivery or by Regd. Post A.D.). Production of a certificate of posting by the company would not be adequate for the purpose of the incoming auditor satisfying himself about compliance with Sections 224/225. Acknowledgement received from the outgoing auditor would be one of the forms in which satisfaction can be obtained.
- (4) A copy of the relevant minutes of the general meeting where the above resolution is passed duly verified by the Chairman of the meeting should also be obtained by the incoming auditor for his records.
- (5) If any annual general meeting is adjourned without appointing an auditor, no special notice for removal or replacement of the retiring auditor received after the adjournment can be

taken note of and acted upon by the company, since in terms of Section 190(1) of the Companies Act, 1956 (now Section 115 of the Companies Act, 2013), special notice should be given to the company at least fourteen clear days before the meeting in which the subject matter of the notice is to be considered. The meeting contemplated in Section 190(1) undoubtedly is the original meeting.

- (6) If the incoming auditor is satisfied that the company has complied with the provisions of Sections 224, 224A and 225 of the Companies Act, 1956 (now Section 139, 140 and 142 read with Section 141 of the Companies Act, 2013), he should first communicate with the outgoing auditor in writing as provided in Clause (8) of Part I of the First Schedule to the Chartered Accountants Act, 1949 before accepting the audit assignment.

In order to examine various ethical issues and safeguard the independence of the Auditors, the Council has set up Ethical Standards Board. This Committee examines various issues concerning professional ethics governing the members of the Institute which are either raised by the members or are taken up based on their importance. The recommendations of the Committee are forwarded to the Council for its consideration. This Committee is also charged with the responsibility of looking into the cases of removal and resignation of auditors and making an appropriate report to the Council. The following guidelines have been issued for this Committee for looking into the cases of Removal of Auditors:

- (A) Where an auditor resigns his appointment as an auditor of a Company or does not offer himself for reappointment as auditor of such company, he shall send a communication, in writing, to the Board of Directors of the Company giving reasons therefore if he considers that there are professional reasons. Therefore, if he considers that there are professional reasons connected with his resignation or not offering him for reappointment which, in his opinion should be brought to the notice of the Board, and shall send a copy of such communication to the Institute. It shall be obligatory on the incoming auditor, before accepting appointment, to obtain a 'copy of such communication, from the Board and consider the same before accepting the appointment.
- (B) Where an auditor, though willing for reappointment has not been reappointed, he shall file with the Institute a copy of the statement which he may have sent to the management of the company for circulation among the shareholders. It shall be obligatory on the incoming auditor before accepting the appointment, to obtain a copy of such a communication from the company and consider it, before accepting the appointment.
- (C) The Committee, on a review of the communications referred to in above paras may call for such further information as it may require from the incoming auditor, the outgoing auditor and the company and make a report to the Council in cases where it considers necessary.
- (D) The above procedure is also followed in the case of removal of auditors by the government and other statutory authorities.

[Students may note that, with the introduction of Companies Act, 2013, Clause 9 of Part I of the First Schedule to the Chartered Accountants Act, 1949 also needs to be

modified in view of the new Companies Act, 2013. Till the time the Chartered Accountants Act, 1949 along with the “Code of Ethics” gets amended in accordance with Companies Act, 2013, students may study and use section 139, 140 and 142 read with section 141 of the Companies Act, 2013 while applying the above clause.

Further, students may refer Chapter 6 of the Study Material for detailed knowledge on the abovementioned sections.]

CASE STUDY 1

CA Raja was appointed as the Auditor of Castle Ltd. for the year 2015-16. Since he declined to accept the appointment, the Board of Directors appointed CA Rani as the auditor in the place of CA Raja, which was also accepted by CA Rani.

Board can appoint the auditor in the case of casual vacancy under section 139(8) of the Companies Act, 2013. The non-acceptance of appointment by CA. Raja does not constitute a casual vacancy to be filled by the Board. In this case, it will be deemed that no auditor was appointed in the AGM.

Further, as per Section 139(10) of the Companies Act, 2013 when at any annual general meeting, no auditor is appointed or re-appointed, the existing auditor shall continue to be the auditor of the company. The appointment of the auditor by the Board is defective in law.

Clause (9) of Part I of First Schedule to the Chartered Accountants Act, 1949 states that a chartered accountant is deemed to be guilty of professional misconduct if he accepts an appointment as auditor of a company without first ascertaining from it whether the requirements of section 225 of the Companies Act, 1956 (now Section 139, 140 and 142 read with Section 141 of the Companies Act, 2013), in respect of such appointment have been fully complied with.

Hence, CA. Rani is guilty of professional misconduct since she accepted the appointment without verification of statutory requirements.

CASE STUDY 2

Mrs. X is a Director of ABC Pvt. Ltd. During the year 2015-16, the company appointed CA Mr. Y, Mrs. X's spouse, as its statutory auditor. Mr. Y used to deliver audit report without any comments or disclosures, thereupon.

As per Section 141(3)(f) of the Companies Act, 2013, a person shall not be eligible for appointment as an auditor of a company whose relative is a director or is in the employment of the company as a director or key managerial personnel. The definition of ‘Relative’ includes husband and wife.

Clause (9) of Part I of the First Schedule to the Chartered Accountants Act, 1949, provides that a member in practice shall be deemed to be guilty of professional misconduct if he accepts an appointment as auditor of a company without first ascertaining from it whether the requirements of Section 225 of the Companies Act, 1956 (now Section 139, 140 and 142 read with Section 141 of the Companies Act, 2013), in respect of such appointment have been duly complied with.

In this case Mrs. X is a Director of ABC Pvt. Ltd. and the company has appointed Mr. Y, Chartered Accountant, Mrs. X's spouse, as its statutory auditor. Mr. Y should not accept the appointment as statutory auditor of the company, where his wife Mrs. X is a director. This is contravention of section 141 of the Companies Act, 2013.

Therefore, Mr. Y is liable for misconduct under the said clause since he accepted the appointment without first verifying the compliance of statutory requirements.

Some decisions of the Council/High Courts on this subject are given below:

Failure to communicate with the previous auditor-

Where a chartered accountant failed to communicate in writing with the previous auditor of his appointment as auditor of a co-operative bank and such omission was not intentional. Held that the breach was only technical and that it was open to the High Court to award a lesser punishment than removal of a member. [*S.V. Kharwandikar vs. O.K. Borkar (1952)*]

Where a chartered accountant applied in response to an advertisement in a newspaper for appointment as auditor and was appointed by the Directors and failed to communicate with the previous auditor and ascertain from the company whether the requirements of the Companies Act as regards the appointment of the auditors were duly complied with. Held the respondent was guilty on both the counts under Clauses (8) and (9). [*B.N. Mohan vs. K.C.J. Satyawadi (1955)*]

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 15(a), 24(a), 26, 30(d) of the Practice Manual.]

Clause (10) Charges or offers to charge, accepts or offers to accept in respect of any professional employment fees which are based on a percentage of profits or which are contingent upon the findings, or results of such employment, except as permitted under any regulations made under this Act.

What distinguishes a profession from a business is that professional services are not rendered with the sole purpose of a profit motive. Personal gain is one but not the main or the only objective. Professional opinion, therefore frowns upon methods where payment is made to depend on the basis of results. It is obvious that a person who is to receive payment in direct proportion to the benefit received by his client, may be tempted to exaggerate the advantage of his service or may adopt means that are not ethical. It will have the effect of undermining his integrity and impairing his independence. Therefore, members are prohibited from charging or accepting any remuneration based on a percentage of the profits or on the happening of a particular contingency such as, the successful outcome of an appeal in revenue proceedings.

Professional services should not be offered or rendered under an arrangement whereby no fee will be charged unless a specified finding or result is obtained or where the fee is otherwise contingent upon the findings or results of such services. However, fees should not be regarded as being, contingent if fixed by a court or other public authority.

The Council of the Institute has however framed Regulation 192 which exempts members from the operation of this clause in certain professional services. The said Regulation 192 is reproduced -

192. Restriction on fees - No Chartered Accountant in practice shall charge or offer to charge, accept or offer to accept, in respect of any professional work, fees which are based on a percentage of profits, or which are contingent upon the findings or results of such work, provided that:

- (a) "In the case of a receiver or a liquidator, the fees may be based on a percentage of the realization or disbursement of the assets;
- (b) In the case of an auditor of a co-operative society, the fees may be based on a percentage of the paid up capital or the working capital or the gross or net income or profits;
- (c) In the case of a valuer for the purposes of direct taxes and duties, the fees may be based on a percentage of the value of property valued;
- (d) in the case of certain management consultancy services as may be decided by the resolution of the Council from time to time, the fees may be based on percentage basis which may be contingent upon the findings, or results of such work;**
- (e) in the case of certain fund raising services, the fees may be based on a percentage of the fund raised;**
- (f) in the case of debt recovery services, the fees may be based on a percentage of the debt recovered;**
- (g) in the case of services related to cost optimisation, the fees may be based on a percentage of the benefit derived; and**
- (h) any other service or audit as may be decided by the Council.**

CASE STUDY

CA Deepak, a Chartered Accountant prepared a project report for one of his clients to obtain bank finance (long-term) of ₹ 50 lakhs from a Commercial Bank. Consequent to the sanction of the loan by the bank CA Deepak raised a bill for his services @ 2% of the loan sanctioned.

Clause (10) of Part I to First Schedule to the Chartered Accountants Act prohibits a Chartered Accountant in practice to charge, to offer, to accept or accept fees which are based on a percentage of profits or which are contingent upon the findings or results of such work done by him.

However, this restriction is not applicable where such payment is permitted by the Chartered Accountants Act, 1949. The Council of the Institute has framed regulation 192 which exempts certain professional services from the operation of Clause (10).

The services rendered by CA Deepak are not covered under the said exemption and hence CA Deepak is liable for professional misconduct.

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 15(c) of the Practice Manual.]

Clause (11) Engages in any business or occupation other than the profession of chartered accountant unless permitted by the Council so to engage.

Provided that nothing contained herein shall disentitle a chartered accountant from being a director of a company (Not being managing director or a whole time director) unless he or any of his partners is interested in such company as an auditor.

This is a provision introduced to restrain a member in practice from engaging himself in any business or occupation other than that of chartered accountant except when permitted by the Council to be so engaged. The objective is to restrain members from carrying on any other business in conjunction with the profession of accountancy and combining such work with any business, which is not in keeping with the dignity of the profession. Another reason for the introduction of such prohibition is that a chartered accountant, if permitted to enter into all kinds of business, would be able to advertise for his other business and thereby secure an unfair advantage in his professional practice.

The Council, on a very careful consideration of the matter, has formulated Regulation, 190A and 191 which are reproduced below, specifying the activities with which a member in practice can associate himself with or without the permission of the Council.

190A. Chartered Accountant in practice not to engage in any other business or occupation.

“A chartered accountant in practice not to engage in any other business or occupation other than the profession of accountancy except with the permission granted in accordance with a resolution of the Council”.

191. Part-time employment a Chartered Accountant in practice may accept.

“Notwithstanding anything contained in Regulation 190A but subject to the control of the Council, a chartered accountant in practice may act as a liquidator, trustee, executor, administrator, arbitrator, receiver, adviser or representative for costing, financial or taxation matter, or may take up an appointment that may be made by the Central Government or a State Government or a court of law or any other legal authority or may act as a Secretary in his professional capacity, provided his employment is not on a salary-cum-full-time basis”.

Appendix 9 C.A. Regulations, 1988

The General and specific Resolutions passed by the Council under the power vested in it under Regulation 190A as included in Appendix 9 of C.A. Regulations, 1988 are also reproduced below for information.

General Resolution

Permission granted generally - Members of the Institute in practice be generally permitted to engage in the following categories of occupations, for which no specific permission from the Council would be necessary in individual cases:

- (1) Employment under Chartered Accountants in practice or firms of such chartered accountants.
- (2) Private tutorship.
- (3) Authorship of books and articles.

22.48 Advanced Auditing and Professional Ethics

- (4) Holding of Life Insurance Agency License for the limited purpose of getting renewal commission.
- (5) Attending classes and appearing for any examination.
- (6) Holding of public elective offices such as M.P., M.L.A. and M.L.C.
- (7) Honorary office leadership of charitable-educational or other non-commercial organisations.
- (8) Acting as Notary Public, Justice of the Peace, Special Executive Magistrate and the like.
- (9) Part-time tutorship under the coaching organisation of the Institute.
- (10) Valuation of papers, acting as paper-setter, head-examiner or a moderator, for any examination.
- (11) Editorship of professional journals.
- (12) Acting as Surveyor and Loss Assessor under the Insurance Act, 1938 provided they are **otherwise eligible**.

(13) Acting as recovery consultant in the banking sector

- (14) Owning agricultural land and carrying out agricultural activity (w.e.f. August 9th, 2008).

Specific Resolution - Members of the Institute in practice may engage in the following categories of business or occupations, after obtaining the specific and prior approval of the Council in each case:

- (1) Full-time or part-time employment in business concerns provided that the member and/or his relatives do not hold "substantial interest" in such concerns.
- (2) Full-time or part-time employment in non-business concern.
- (3) Office of managing director or a whole-time director of a body corporate within the meaning of the Companies Act, 1956 (now Companies Act, 2013).
- (4) Interest in family business concerns (including such interest devolving on the members as a result of inheritance / succession / partition of the family business) or concerns in which interest has been acquired as a result of relationships and in the management of which no active part is taken.
- (5) Interest in an educational institution.
- (6) Part-time or full-time lectureship for courses other than those relating to the Institute's examinations conducted under the auspices of the Institute or the Regional councils or their branches.
- (7) Part-time or full-time tutorship under any educational institution other than the coaching organization of the Institute.
- (8) Editorship of journals other than professional journals.
- (9) Any other business or occupation for which the Executive Committee considers that permission may be granted.

However, it is open to the Council to refuse permission in individual cases though covered under any of the above categories. For the purpose of the above resolution:

- (i) the expression “relative”, in relation to a member, means the husband, wife, brother or sister or any lineal ascendant or descendant of that member;
- (ii) a member shall be deemed to have a “substantial interest” in a concern:
 - (a) In a case where the concern is a company, if its shares (not being shares entitled to a fixed rate of dividend whether with or without a further right to participate in profit) carrying not less than 20% of voting power at any time, during the relevant years are owned beneficially by such member or by any one or more of the following persons or partly by such member and partly by one or more of the following persons:
 - (i) one or more relatives of the member;
 - (ii) one or more partners and/or their relative;
 - (iii) any concern in which any of the persons referred to above has a substantial interest.
 - (b) In the case of any other concern, if such member is entitled or the other persons referred to above or such member and one or more of the other persons referred to above or persons of such number and / or are more sections of such persons are entitled in the aggregate, at any time during the relevant years not less than 20% of the profits of such concern.

Attention of the members is also invited to para 3 of the above Resolution relating to the holding of office of a managing director or a whole-time director in a company. In such cases, a member can accept the office of a managing director or a whole-time director only after obtaining, the specific and prior approval of the Council. Attention of the members is also invited to the provisions of Section 2(26) of the Companies Act, 1956 (now Section 2(54) of the Companies Act, 2013) under which even where a person is not designated as a managing director or a whole-time director, he can be deemed to be a managing director or a whole-time director if he is entrusted with the whole or substantially the whole of the management of the affairs of the company. It may be pointed out that a member cannot accept and hold the office of a managing director or a whole-time director in a company if the member and/or his partners and relatives hold substantial interest in such a company.

The Council has considered the question of permitting members in practice to become a Director, Managing Director, full time/Executive Director etc. and related issues and the following decisions have been taken.

As regards the question of permitting member in practice to be a Director, Promoter/Promoter-Director, Subscriber to the Memorandum and Articles of Association of any company including a board managed company, it was decided that -

(a) Director of a Company

- (i) The expression “Director Simplicitor” means an ordinary / simple Director.
- (ii) A member in practice is permitted generally to be a Director Simplicitor in any company including a board-managed company and as such he is not required to obtain any specific permission of the council in this behalf irrespective of whether he and / or his relatives hold substantial interest in that company.

22.50 Advanced Auditing and Professional Ethics

A question arises, whether the auditor of a Subsidiary Company can be a Director of its Holding Company-

The Ethical Standard Board (ESB) noted that, in terms of Clause (11) of Part I of the First Schedule to the Chartered Accountants Act, 1949 a Chartered Accountant in practice can not engage (unless permitted by the Council so to engage) in any business or occupation other than the profession of Chartered Accountant but he can be a director of a Company (not being a managing director or whole time director) wherein he or any of his partners is not interested in such company as an auditor. The Board further noted that Public conscience is expected to be ahead of the law. Members, therefore, are expected to interpret the requirement as regards independence much more strictly than what the law requires and should not place themselves in positions which would either compromise or jeopardise their independence. In view of the above, the Board, via a clarification, decided that the auditor of a Subsidiary Company can't be a Director of its Holding Company, as it will affect the independence of an auditor.

(b) Promoter/Promoter Director - There is no bar for a member to be a promoter / signatory to the Memorandum and Articles of Association of any company. There is also no bar for such a promoter / signatory to be a Director Simplicitor of that company irrespective of whether the object of the company include areas which fall within the scope of the profession of chartered accounts. Therefore members are not required to obtain specific permission of the Council in such cases.

Item Nos. 4 & 5 of the Specific Resolution would be equally applicable to member carrying out the activities referred to therein in his capacity as Karta / representative of HUF provided he is not actively engaged in carrying on such activities.

CASE STUDY

CA Ram who is a leading Income Tax Practitioner and consultant in Jaipur is also trading in derivatives.

As per Clause (11) of Part I of First Schedule of CA Act, 1949, a Chartered Accountant is deemed to be guilty of professional misconduct if he "engages in any business or occupation other than the profession of Chartered Accountant unless permitted by the Council so to engage".

However, the Council has granted general permission to the members to engage in certain specific occupation. In respect of all other occupations specific permission of the Institute is necessary.

In this case CA Ram is engaged in the occupation of trading in derivatives which is not covered under the general permission.

Hence specific permission of the Institute has to be obtained otherwise he will be deemed to be guilty of professional misconduct under Clause (11) of Part I of First Schedule of CA Act, 1949.

Some of the decisions of the Council/High Courts on this clause are given below:

A chartered accountant in practice entered into partnership with persons who were not the members of the Institute, for the purpose of carrying on business. The share of the chartered accountant in the profit and losses was 25%. He was to take part in the business and was

entitled to represent the firm before Govt. authorities etc. He was operating the Bank account of the firm was receiving moneys from the customers and was also looking after the affairs of the partnership. Held he was guilty of professional misconduct under the clause, as he was engaged in the business, without the permission of the Council. [*K.S. Dugar (1980)*]

A member in practice was authorised by a resolution of the Board of Directors of a company held on 4.9.81 to look after the day to do affairs of the company and other more than 51% the said company. Later on 8.5.82, he applied to the Council for permission to hold the office of the Executive Chairman of the said company. It was held on the basis of facts and circumstances of the case that during the period 4.9.81 to 8.5.82 the member had engaged himself in 'other occupation' without the permission of the Council and was found guilty in terms of this Clause. [*M.K. Abrol and S.S. Bawa vs. V.P. Vijn (1988)*]

Where a Chartered Accountant who had held a salaried employment as an Assistant Manager (Finance & Accounts) in addition to the practice of chartered accountancy without obtaining permission of the Institute as required was held guilty under Clause (11) of Part I of First Schedule. [*Anil Kumar (1994)*]

Where a Chartered Accountant while practicing as a chartered accountant had engaged himself in other occupation as an LIC agent in another name. Held that he was guilty Clause (11) of First Schedule. [*C.I.T. (Admn.) vs. H.M. Giriya (1996)*]

Where a chartered Accountant had offered to help the Complainant in disposing of odd lot share holding, sold them at much lower rate than he had sent of the Complainant notes etc. and the said chartered accountant was personally involved in the share transfer and broker's business besides his professional activities. Held that he was guilty under Clause (11) of Part I.

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 12(b), 14(a), 15(b), 16(d), 18(b), 23(a), 25(b), 33 of the Practice Manual.]

Clause (12) Allows a person not being a member of the institute in practice or a member not being his partner to sign on his behalf or on behalf of his firm, any balance sheet, profit and loss account, report or financial statements.

The above clause prohibits a member from allowing another member who is not his partner to sign any balance sheet, profit and loss account or financial statements on his behalf or on behalf of his firm.

This clause is to be read in conjunction with Section 26 of the Chartered Accountants Act, 1949 which stipulates that 'No person other than a member of the Institute shall sign any document on behalf of a Chartered Accountant in practice or a firm of Chartered Accountants in his or its professional capacity'.

The term 'financial statement' for the purposes of this clause would cover an examination of the accounts or of financial statements given under a statutory enactment or otherwise. A report, however, may cover a wider range of documents but in the context in which it is used in this clause, it would mean only a report arising out of a professional assignment undertaken by him or his firm and submitted by him or his firm to the client(s) or where so required, to an outsider on behalf of himself or on behalf of the firm. The subject matter of report should be the

22.52 Advanced Auditing and Professional Ethics

expression of a professional opinion whether, financial or non-financial. The financial statements and the reports referred to in this clause obviously means the financial statements and reports as ultimately finalized and submitted to the outside authorities.

The Council has clarified that the power to sign routine documents on which a professional opinion or authentication is not required to be expressed may be delegated in the following instances and such delegation will not attract provisions of this clause:

- (i) Issue of audit queries during the course of audit.
- (ii) Asking for information or issue of questionnaire.
- (iii) Letter forwarding draft observations/financial statements.
- (iv) Initiating and stamping of vouchers and of schedules prepared for the purpose of audit.
- (v) Acknowledging and carrying on routine correspondence with clients.
- (vi) Issue of memorandum of cash verification and other physical verification or recording the results thereof in the books of the clients.
- (vii) Issuing acknowledgements for records produced. Raising of bills and issuing acknowledgements for money receipts.
- (ix) Attending to routine matters in tax practice, subject to provisions of Section 288 of Income Tax Act.
- (x) Any other matter incidental to the office administration and routine work involved in practice of accountancy.

It is also clarified that where the authority to sign documents given above is delegated by a chartered accountant or by a firm of chartered accountants the fact that the documents have not been signed by a chartered accountant is not a defence to him or to the firm in an enquiry relating to professional misconduct.

However, the Council has decided that where a Chartered Accountant while signing a report or, a financial statement or any other document is statutorily required to disclose his name, the member should disclose his name while appending his signature on the report or document. Where there is no such statutory requirement, the member may sign in the name of the firm.

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 18(c), 27(a), 35(a) of the Practice Manual.]

PART II - Professional misconduct in relation to members of the Institute in service

A member of the Institute (other than a member in practice) shall be deemed to be guilty of professional misconduct, if he being an employee of any company, firm or person-

Clause (1) pays or allows or agrees to pay directly or indirectly to any person any share in the emoluments of the employment undertaken by him.

A member of the Institute in service is deemed to be guilty of professional misconduct, if he is an employee of any company, firm or person and during that course whatever emoluments he receives, if he either pays or allows to pay or agree to pay any part or share thereof whether directly or indirectly. However, this clause does not restrict such sharing or commitments

among relatives, dependents, friends etc., if there is no relationship in procuring or retaining the job and payment is not a consideration for job procurement or retainership.

The clear verdict of this clause is that job must be procured and retained with own professional capabilities and not by any financial deal impairing professional dignity.

Clause (2) accepts or agrees to accept any part of fees, profits or gains from a lawyer, a chartered accountant or broker engaged by such company, firm or person or agent or customer of such company, firm or person by way of commission or gratification.

This clause restricts to accept or agrees to accept any part of fee, profits or gains from a lawyer, a chartered accountant or broker engaged by such company, firm or person or agent or customer of such company, firm or person by way of commission or gratification. The objective is that when a member is in employment, he must maintain high level of ethics and should not accept any other amount from anyone for which he is not entitled from employer under contractual agreement of service.

[Note: A member in the foregoing circumstances would be guilty of misconduct regardless of the fact that he was in whole-time or part-time employment or that he was holding Certificate of Practice along with his employment.]

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 35(c) of the Practice Manual.]

PART III - Professional misconduct in relation to members of the Institute generally

A member of the Institute, whether in practice or not, shall be deemed to be guilty of professional misconduct, if he -

Clause (1) not being a fellow of the Institute, acts as a fellow of the Institute.

Clause (2) does not supply the information called for, or does not comply with the requirements asked for, by the Institute, Council or any of its Committees, Director (Discipline), Board of Discipline, Disciplinary Committee, Quality Review Board or the Appellate Authority.

Clause (11) of Part I and Clauses (1) and (3) of Part III where a Chartered Accountant had not disclosed to the Institute at any time about his engagement as a proprietor of a non-chartered accountant's firm while holding certificate of practice and had not furnished particulars of his engagement as Director of a company despite various letters of the institute which remained unreplyed. Held that he was guilty under Clause (11) of Part I and Clauses (1) and (3) of Part III of the First Schedule. *[P.S. Rao (1992)]*

Where a Chartered Accountant had continued to train an articled clerk though his name was removed from the membership of the Institute and he had failed to send any reply to the Institute asking him to send his explanation as to how he was training as his articled clerk when he was not a member of the Institute. Held that he was guilty under Clause (2) of Part III of the First Schedule. *[S.M. Vohra (1992)]*

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 14(c), 23(d), 35(b) of the Practice Manual.]

Clause (3) while inviting professional work from another chartered accountant or while responding to tenders or enquiries or while advertising through a write up, or anything as provided for in items (6) and (7) of Part I of this Schedule, gives information knowing it to be false.

Any member of the Institute, in the course of procurement of professional work from another Chartered Accountant or from any other source provides or renders any information which he knows to be false through any documents, or acts (like tenders, enquiries, response to advertisement, CV type write ups etc.), he would be deemed to be guilty of professional misconduct under Clause (3), Part III of First Schedule.

PART IV- Other misconduct in relation to members of the Institute generally

A member of the Institute, whether in practice or not, shall be deemed to be guilty of other misconduct, if he -

Clause (1) is held guilty by any civil or criminal court for an offence which is punishable with imprisonment for a term not exceeding six months.

Clause (2) in the opinion of the Council, brings disrepute to the profession or the Institute as a result of his action whether or not related to his professional work.

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 16(b), 25(c), 28(d), 31(a) of the Practice Manual.]

These Clauses (1) & (2) are self explanatory and any of the member of the Institute is found guilty by any civil or criminal court and prosecuted for an imprisonment in an offence involving moral turpitude or his acts bring disrepute to the profession or the Institute, irrespective of the fact whether such acts are related to profession or not, such member will be deemed to be guilty of other misconduct in Part IV of First Schedule.

The important point to note is that if imprisonment tenure exceeds six months, this case will be covered in the Clause of Part III of Second Schedule.

22.8.2 The Second schedule: Where the Director (Discipline) is of the opinion that a member is guilty of any professional or other misconduct mentioned in the second schedule or in both the Schedule, he shall place the matter before the Disciplinary Committee.

Part I - Professional misconduct in relation to chartered Accountant in practice

A Chartered Accountant in practice shall be deemed to be guilty of professional misconduct, if he-

Clause (1) Discloses Information acquired in the course of his professional engagement to any person other than his client so engaging him without the consent of his client or otherwise than as required by any law for the time being in force.

An accountant in public practice has access to a great deal of information of his client, which is of a highly confidential character. It is important for the work of an accountant and for maintaining the dignity and status of the profession that he should treat such information as having been provided to him, only to facilitate the performance of his professional duties for which his services have been engaged. To divulge such information would be a breach of

professional confidence, which may give rise to the most serious consequences, even to an action by the client for the loss suffered by him through such a breach. But for this confidence that the public has developed in the integrity of accountants, it would not be possible for a person in a similar trade or industry to appoint the same accountant. The accountant's duty not to disclose continues even after the completion of his assignment.

If disclosure is required as a part of performance of professional duty by a practicing member in relation to a client, the fact that such performance is required by the client would itself amount to the client consenting to such disclosure. Thus, a member in practice submitting information to, say, exchange control authorities, while performing his professional duties cannot be considered to have made disclosure without the aforesaid consent. But, in all cases, the request or the initiative that the members do prefer the service, which would entail such disclosure, must come from the client in relation to whose affairs the disclosure would be entailed.

If disclosure is required in other cases, it would be necessary to ensure that the consent of the client is given by a person who is competent to accord such consent. Thus, in the case of a sole proprietary concern, the consent may be given by the proprietor or his constituted attorney who is legally empowered to give such consent. In the case of partnership firm, since in turn, every partner has the authority to bind the firm by his acts, the consent may be given by any partner. In the case of a company, by virtue of section 179 of the Companies Act, 2013, the Board of Directors is empowered to do all that the company in a general meeting may do unless a resolution by the company in general meeting is required by the Act or by the Memorandum or Articles of the company. Hence, the consent may be given by the Managing Director if the powers of the Board of Directors are delegated to him comprehensively enough to include the power to give such consent, but if the powers of the Board of Directors are not so delegated, the consent should be obtained by means of resolution of the Board of Directors of the Company.

An auditor is not required to provide the client or other auditors of the same enterprise or its related enterprise such as a parent or a subsidiary, access to his audit working papers. The main auditors of an enterprise do not have right of access to the audit working papers of the branch auditors. In the case of a company, the statutory auditor has to consider the report of the branch auditor and has a right to seek clarifications and/or to visit the branch if he deems it necessary to do so for the performance of the duties as auditor. An auditor can rely on the work of another auditor, without having any right of access to the audit working papers of the other auditor. For this purpose, the term 'auditor' includes 'internal auditor'.

However, the auditor may, at his discretion, in cases considered appropriate by him, make portions of or extracts from his working papers available to the client. The above clarification has been published in April, 2000 issue of the Journal, 'The Chartered Accountant'.

It is not possible to set out all the circumstances under which disclosure of information may be required by law. If under any legal compulsion and if it is not legally permissible to claim privilege under the Evidence Act, 1872 (Section 126), the disclosure made by a member of such information may not be considered as misconduct. However, such matters involve niceties of law and expert legal advice may be sought prior to, such disclosure.

22.56 Advanced Auditing and Professional Ethics

The only circumstance in which this duty of confidence may give rise to a difficulty is where the accountant has reason to believe that the client has been guilty of some unlawful act or default. This matter is of special significance in the case where the client is guilty of tax evasion.

Further, students may note that as per section 143(12) of the Companies Act, 2013, if an auditor of a company, in the course of the performance of his duties as auditor, has reason to believe that an offence involving fraud is being or has been committed against the company by officers or employees of the company, he shall immediately report the matter to the Central Government within 60 days of his knowledge and after following the prescribed procedure.

Role of chartered accountants in relation to unlawful acts by their clients -

- (1) The question of the member's liability when he is not directly involved in tax frauds committed by his client but he discovers such fraud in the course of his professional work, the action recommended to be taken by him is indicated below. These recommendations are generally in line with similar recommendations made by the Institute of chartered accountants in England and Wales for the guidance of its members.
- (2) The recommendations below are based on the following premises:
 - (a) No duty is cast on a member, whether by Section 44 of Criminal Procedure Code, or by any other enactment, to inform the Income tax Authorities about taxation frauds by his client of which he comes to know during the course of his professional work.
 - (b) Under Section 126 of the Evidence Act, a barrister, attorney, pleader or *Vakil* is barred from disclosing except with the express consent of his client, any communication made to him in the course of and for the purpose of his employment or to state the contents or conditions of any document with which he has become acquainted in such course. The proceedings before the Income tax authorities are judicial proceedings and the assessee is authorized to be represented by a chartered accountant. The privilege given and the restrictions imposed by Section 126 apply as between the client and the member as the member is the client's attorney. Nothing in Section 126 shall protect from disclosure of any fact observed by a barrister, pleader, attorney or *Vakil* in the course of his employment of such showing that any crime or fraud has been committed since the commencement of his employment.
 - (c) Subject to the above, it is not the duty of a member to shield a client from the consequences of his tax frauds; on the contrary it is guiding principle of professional conduct to discourage tax evasion.
- (3) The paragraphs that follow apply to intentional suppressions or misstatement by the client in his tax returns. If there is a genuine mistake or inadvertent omission, it is presumed that the client would not have any objection to make a complete disclosure to the tax authorities.
- (4) If the fraud discovered by the member relates to the accounts or tax matters of the client for past year(s) for which the client was not represented by the member, the client should be advised to make a disclosure. The member may, however, continue to act for the client in respect of current matters, but is under no obligation so to continue. It is assumed that the past fraud does not affect in any way the current tax matters, and the member should be extra careful to ensure that past behaviour is not reflected in current matters.

- (5) If the fraud relates to accounts etc., examined by the member and reported upon, on the basis of which the tax assessment in the past has been made, or is currently to be made, the client should be advised to make a complete disclosure. If the client should refuse, he should be informed that the member would be entitled to dissociate himself from the case, and that, further, he would inform the authorities that the accounts prepared by him and/or reported upon by him are unreliable, on account of certain information since obtained. He should then make such a report to the authorities. But the information subsequently obtained should not as such be communicated to the authorities, unless the client consents in writing.
- (6) Normally, if disclosure is consented to by the client it should be made immediately. But if the suppression is trivial, the disclosure may be made when the current return is submitted. But if there is any possibility that the collection of tax would be prejudiced, on account of the client disposing of his property or removing his person from the jurisdiction of the Income-tax authorities the postponement of disclosure would be improper.
- (7) If the suppression etc. relates to accounts or returns currently being prepared, the member should advise the client to make full disclosure in the accounts and/or return, and should the client refuse, he should make full reservation in his report, and should not associate himself with the return.
- (8) If the employment of the member is dispensed with before the accounts are completed or are reported on, or the return is submitted, no further duty regarding disclosure etc. rests on the member.
- (9) The suppression may relate to accounts, which are not prepared and/or reported upon by the member, e.g. personal income, from investments other than business investments etc. The client may refuse full disclosure in the tax return but still wish that the member should continue to prepare and/ or report on his business accounts, though this is quite unlikely in practice. If so requested, the member may continue to do so, but is under no obligation so to do.
- (10) It should be impressed on the client that:
 - (a) While disclosure may entail only monetary penalties, nondisclosure and subsequent discovery thereof may entail imprisonment and fine, in addition to penalties.
 - (b) Any intimation by the member to the Income tax authorities that the member dissociates himself from the case is certain to start investigation by them in the whole matter.
- (11) The Income-tax authorities may summon the member for the purpose of examining him on oath, under Section 131(1) of the Income tax Act. The immunity from disclosure afforded by Section 126 of the Evidence Act, and the extent of such immunity are questions, which involve niceties of law, and expert legal advice should be sought in the matter. The refusal of the member to disclose may be taken down, and he may be required to certify it on oath.
- (12) Production of books of account and other documents may be called for under Section 131(1). Here also the protection offered by Section 126 of the Evidence Act, is a matter for expert legal advice.

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 6(a), 14(b) of the Practice Manual.]

Clause (2) If he certifies or submits in his name or in the name of his firm, a report of an examination of financial statements unless the examination of such statements and the related records has been made by him or by a partner or an employee in his firm or by another chartered accountant in practice.

The above clause restrains a member from subscribing to the report on a financial statement so long as it has not been examined by him or by a partner or an employee of his firm or by another chartered accountant in practice. It has been introduced to ensure that the work entrusted to him has been carried out by the member either directly or under his supervision before he renders his report.

An exception however has been made in respect of an examination carried out by another chartered accountant in practice. This enables two or more members to accept a joint assignment or enables a member also to carry out the examination of financial statements by or with the assistance of all or either any chartered accountant in practice.

Where the joint auditors are appointed, the work is normally divided among themselves in terms of identifiable units or areas, or with reference to the items of liabilities, or income or expenditure or to the period of time etc. Such division should be adequately documented and communicated to the auditee.

In the course of his work, where a joint auditor comes across matters requiring discussion with or application of judgement by the joint auditors, he must communicate to the other joint auditors before submission of the report.

In respect of audit work divided among the joint auditors, each joint auditor is responsible only for the work allocated to him, whether or not he has prepared a separate report on the work performed by him. On the other hand, all the joint auditors are jointly and severally responsible:

- (a) In respect of the audit work which is not divided among the joint auditors and is carried out by all of them;
- (b) In respect of decisions taken by all the joint auditors concerning the nature, timing or extent of the audit procedures to be performed by any of the joint auditors. It may, however, be clarified that all the joint auditors are responsible only in respect of the appropriateness of the decisions concerning the nature, timing or extent of the audit procedures agreed upon among them; proper execution by the joint auditor concerned;
- (c) In respect of matters which are brought to the notice of the joint auditors by any one of them and on which there is an agreement among the joint auditors;
- (d) For examining that the financial statements of the entity comply with the disclosure requirements of the relevant statute; and
- (e) For ensuring that the audit report complies with the requirements of the relevant statute.

Each joint auditor should decide for himself the appropriateness of using test checks or sampling, the nature, timing and extent of audit procedures to be applied in relation to the work allotted to him.

Obtaining and evaluating the information and explanations from the management is the joint responsibility of the joint auditors unless they agree upon a specific pattern of distribution of this responsibility. In case of distribution of the responsibility, the liability of the joint auditors is limited to the area allotted to that auditor.

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 24(b), 25(d) of the Practice Manual.]

Clause (3) Permits his name or the name of his firm to be used in connection with an estimate of earnings contingent upon future transactions in manner which may lead to the belief that he vouches for the accuracy of the forecast.

The Council has issued Standard on Assurance Engagements (SAE) 3400, "The Examination of Prospective Financial Information", which is effective in relation to reports on projections/forecasts, issued on or after April 1, 2007. Pursuant to the issuance of this Standard, the Guidance Note on Accountant's Report on Profit Forecasts and/or Financial Forecasts, issued in September, 1982 stands withdrawn. The guidance provided in this Standard is in line with the provisions of Clause (3) of Part I of the Second Schedule to the Chartered Accountants Act, 1949. As per the opinion of the Council while finalising the Guidance Note on Accountant's Report on Profit Forecasts and/or Financial Forecasts at its 100th meeting held on 22nd through 24th July 1982, a chartered accountant can participate in the preparation of profit or financial forecasts and can review them, provided he indicates clearly in his report the sources of information, the basis of forecasts and also the major assumptions made in arriving at the forecasts and so long as he does not vouch for the accuracy of the forecasts. The Council has further opined that the same opinion would also apply to projections made on the basis of hypothetical assumptions about future events and management actions which are not necessarily expected to take place so long as the auditor does not vouch for the accuracy of the projection. Further, the attention of the members is drawn to "Guidance Note on Reports in Company Prospectuses (Revised)" issued by the Council in October, 2006. This Guidance Note provides guidance on compliance with the provisions of the Companies Act and the Securities and Exchange Board of India (Disclosure and Investor Protection) Guidelines, 2000 relating to the reports required to be issued by chartered accountants in prospectus/statement in lieu of prospectus issued by the companies for the offerings made in India.

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 3(d), 16(a) of the Practice Manual.]

Clause (4) Expresses his opinion on financial statements of any business or enterprise in which he, his firm, or a partner in his firm has a substantial interest.

In this connection attention of members is also invited to Chapter IV of Council Guidelines No. 1-CA(7)/02/2008 dated 8th August, 2008. The said guidelines state that a member of the Institute shall not express his opinion on financial statements of any business or enterprise in which one or more persons, who are his "relatives" within the meaning of Accounting Standard

22.60 Advanced Auditing and Professional Ethics

(AS-18) has/have either by themselves or in conjunction with such members, a substantial interest in the said business or enterprise.

Many new areas of professional work have been added, e.g., Tax Audit, Concurrent Audit of Banks, Concurrent Audit of Borrowers of Financial institutions, Audit of non-corporate borrowers of banks and financial institutions, audit of stock exchange, brokers etc. The Council wishes to emphasize that the aforesaid requirement of Clause (4) are equally applicable while performing all types of attest functions by the members. Some of the situations which may arise in the applicability of Clause (4) are discussed below for the guidance of members:

- (1) Where the member, his firm or his partner or his relative has substantial interest in the business or enterprise.

The independence of mind is a fundamental concept of audit and/or expression of opinion on the financial statements in any form and, therefore, must always be maintained. Nothing can substitute for the essential and fundamental requirements of independence. Therefore, the Council's views are clarified in the following circumstances.

- (i) An enterprise/concern of which a member is either an owner or a partner. The holding of interest in the business or enterprise by a member himself whether as sole-proprietor or partner in a firm, in the opinion of the Council, would affect his independence of mind in the performance of professional duties in conducting the audit and/or expressing an opinion on financial statements of such enterprise. Therefore, a member should not audit financial statements of such business or enterprise.
 - (ii) Where the partner or relative of a member has substantial interest: The holding of substantial interest by the partner or relative of the member in the business or enterprise of which the audit is to be carried out and opinion is to be expressed on the financial statement, may also affect the independence of mind of the member, in the opinion of Council, in the performance of professional duties. Therefore, the member may, for the same reasons as not to compromise his independence, refrain from undertaking the audit of financial statements of such business or enterprise.
- (2) Where the member or his partner or relative is a director or in the employment of an officer or an employee of the company.

Section 141 of the Companies Act, 2013 specifically prohibits a member from auditing the accounts of a company in which he is an officer or employee. Although the provisions of the aforesaid section are not specifically applicable in the context of audits performed under other statutes, e.g. tax audit, yet the underlying principle of independence of mind is equally applicable in those situations also. Therefore, the Council's views are clarified in the following situations.

In cases where the member is a director of a company the financial statements of which are to be audited and/or opinion is to be expressed, he should not undertake such job and/or express opinion on the financial statements of that company.

The Council has clarified that the members are not permitted to write books of account of their auditee clients.

A statutory auditor of a company cannot also be its internal auditor, as it will not be possible for him to give independent and objective report.

A member should satisfy himself before accepting an appointment as an auditor of an entity that his appointment is in accordance with the statute governing the entity. In case the entity is constituted under a trust deed / instrument, the member should satisfy whether his appointment is valid according to the instrument constituting the entity and rules made hereunder. In case the appointment is to be authorized by the regulatory authorities such as in the case of cooperative societies, trusts etc. then the member must satisfy whether such regulatory authorities have authorized the managing committee of the society / trust for appointment of the auditors. In a case where any entity is being managed by a Managing Committee or Board of Trustees or Board of Governors by whatever name called he should ensure that his appointment is duly made by a resolution passed of such Managing Committee or Board of Trustees of Board of Governors. Even in case of partnership or sole proprietary, the member must ensure that a letter of appointment/ engagement is given by a financial statement before he accepts the assignment.

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 4(a), 6(b), 21(d), 25(b), 30(c) of the Practice Manual.]

Clause (5) fails to disclose a material fact known to him which is not disclosed in a financial statement, but disclosure of which is necessary in making such financial statement not misleading where he is concerned with that financial statement in a professional capacity.

It may be observed that this clause refers to failure to disclose a material fact, which is known to him, in a financial statement reported on by the auditor. It is obvious, that before a member could be held guilty of misconduct, materiality has to be established. The determination of materiality has been provided in SA 320, "Materiality in Planning and Performing an Audit".

It should be borne in mind that there may be cases where an item may not be material from the point of view of the balance sheet, but may have material significance in relation to the profit and loss account for that year and vice-versa. It is therefore essential that care should be taken to ensure that the aspect of materiality should be judged in relation to both the balance sheet and the profit and loss account.

The word "financial statements" used in this clause would cover both reports and certificate usually given after an examination of the accounts or of financial statements under any statutory enactment, or/for purposes of income tax assessments. This would not however, apply to cases where such statements are prepared by members in employment purely for the information of their respective employers in the normal course of their duties and not meant to be submitted to any outside authority.

Some of the decisions of the Courts on this clause are briefly given below-

Where a Chartered Accountant failed to report to the shareholders of a company about the non-creation of a sinking fund in accordance with the Debenture Trust Deed and did not make clear that the amounts shown as towards sinking fund were borrowed from the managing agents of the company-Held, that the chartered accountant was duty bound to see that the nature and

22.62 Advanced Auditing and Professional Ethics

subject matter of the charge over a security and the nature and mode of valuation of the sinking fund investment were disclosed in the Balance Sheet in accordance with Form F and he was found guilty of misconduct. [*Davar & Sons Ltd. vs M.S. Krishnaswamy (1952)*]

Where a Chartered Accountant failed to examine how debts became bad and were written off- Held he was guilty under Clause (5). [*A. Doraiswami/ Naidu-vs. P.M. Raghavendra Rao (1965)*]

Where a Chartered Accountant had not disclosed the fact that a large amount of loan have been given out of the funds of an Employees Provident Fund to the Employer Company in contravention of the Rules of the Provident Fund and had failed to report on the default in clearing the cheques received in re-payment of the loan. Held by the High Court that he was not guilty of any non-disclosure to the individual subscribers of the Provident Fund because he owed no duty to disclose to them and he was well within his rights to have disclosed the irregularities to the trustees themselves and to the company which had appointed him. Held by the Supreme Court on appeal that it was no defence for the chartered accountant to say that he had disclosed the irregularities to the company as it was his duty to have made a disclosure thereof to the beneficiaries of the Provident Fund in the statement of accounts signed by him as the legal position of the auditor in the present case was similar to that of the auditor appointed under the Companies Act. He was therefore guilty of professional misconduct under Clause (5). [*Kishori Lal Dutta vs-P.K. Mukherjee (1968)*]

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 6(c), 17(c), 19(a), 22, 28(b) of the Practice Manual.]

Clause (6) Fails to report a material misstatement known to him to appear in a financial statement with which he is concerned in a professional capacity.

This clause refers to failure on the part of a member to point out in his report a material misstatement appearing in a financial statement and he has knowledge of the same. Here also, it is obvious, that before a member could be held guilty of misconduct, materiality has to be established and the observations made under the preceding Clause (5), in this connection, will equally apply to this clause.

Some of the decisions of the Courts on this clause are briefly given below-

A Company did not provide for depreciation as required by Section 205 and Section 350 of the Companies Act, 1956 (now Section 123 read with Schedule III of the Companies Act, 2013) and although the Chartered Accountant was aware that the Company had underprovided depreciation, he did not bring out this fact in his report- Held the Chartered Accountant was guilty of professional misconduct under the clause. He had failed to disclose a material fact known to him but disclosure of which was necessary to make the financial statement not misleading.

Where a Chartered Accountant prepared a balance sheet of a firm and subsequently prepared statement regarding the state of affairs of the firm without taking into account the balance sheet already prepared by him showing a lesser amount by way of opening stock and a lesser amount to the credit of the proprietor and subsequently when he was called upon by his client to prepare a fresh balance sheet and profit and loss account for the same year so that it should tally with the statement of affairs prepared by him he did so without reference to the actual account books

but on instruction of the client, and as such it was a false and incorrect balance sheet. Held, he was guilty under Clauses (5) & (6). [*Attorney General of Kenya-vs-V.B. Joshi (1968)*]

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 17(c) of the Practice Manual.]

Clause (7) does not exercise due diligence, or is grossly negligent in the conduct of his professional duties.

Though very simply worded, it is a vital clause which unusually gets attracted whenever it is necessary to judge whether the accountant has honestly and reasonably discharged his duties. The expression negligence covers a wide field and extends from the frontiers of fraud to collateral minor negligence. The meaning and significance of this clause is well contained in the following passage quoted from the Judgement of the Karnataka High Court in a disciplinary case which came before it in 1977.

It is the duty of an auditor to bring to bear on the work he has to perform that skill, care and caution which a reasonably competent, careful, and cautious auditor would use. What is reasonable skill, care and caution must depend on the particular circumstances of each case. An auditor is not bound to be a detective, or, as was said, to approach his work with suspicion or with a foregone conclusion that there is something wrong. He is a watchdog but not a bloodhound. If there is anything calculated to excite suspicion he should probe it to the bottom; but in the absence of anything of that kind he is only bound to be reasonably cautious and careful.

Professional misconduct is a term of fairly wide import but generally speaking, it implies fairly serious cases of misconduct of gross negligence. Negligence per se would not amount to gross negligence in the case of minor errors and lapses, which do not constitute professional misconduct and which, therefore, don't require a reference to the Disciplinary Committee, the Council would nevertheless bring the matter to the attention of its members so that greater care may be taken in the future in avoiding errors and lapses of a similar type".

CASE STUDY

CA Chiranjiv who conducted ABC audit of a Haryana daily 'New Era' certified the circulation figures based on Management Information System Report (M.I.S Report) without examining the books of Account.

According to Clause (7) of Part I of Second Schedule of Chartered Accountants Act, 1949, a Chartered Accountant in practice is deemed to be guilty of professional misconduct if he "does not exercise due diligence or is grossly negligent in the conduct of his professional duties".

In the instant case, CA Chiranjiv did not exercise due diligence and is grossly negligent in the conduct of his professional duties since he certified the circulation figures without examining the books of accounts.

To ascertain the number of paid copies verification of remittances from the agents, credit allowed to the agents for unsold copies returned, examination of books of account is essential. Further certification of circulation figures based on statistical information without cross

verification with financial records amounts to gross negligence and failure to exercise due diligence.

Hence, CA Chiranjiv is guilty of professional misconduct as per Clause (7) of Part I of Second Schedule of Chartered Accountants Act, 1949.

Some of the decisions of the Courts on this clause are briefly mentioned below:

Where a Chartered Accountant failed to indicate the mode of valuation of investments in shares as required by the Companies Act and also to draw attention to the inclusion of uniforms in the depreciation account- Held that he was guilty under Clause (7). [*M.C. Poddar vs-P.S. Sodhbans* - page 259 of Vol. I of the Disciplinary Cases and page 554 of March 1954 issue of the Institute's Journal-Judgement delivered on 1st April, 1954].

Where a Chartered Accountant certified the circulation of a newspaper based on the statistic record but stated in his certificate that he had given it after examination of the books of account without verifying that the books of account and the statistical records agreed and also without taking into account the return of copies unsold. Held that he was guilty of gross negligence. [*V.K. Madhava Rao (1956)*]

Where a certificate issued by a Chartered Accountant under Regulations 7(c) & 7(d) (i) of Part I (d) the First Schedule to the Insurance Act, 1938 was not correct, as the company had granted loans on policies which had already lapsed for non-payment of premium and also the claims in respect of two policies which had matured were not included in estimated liability in respect of outstanding claims shown in the Balance Sheet- Held he was guilty under Clauses (7) & (8). [*Controller of Insurance vs H. C. Das (1957)*]

Where a Chartered Accountant, appointed as auditor of the Madras branch of a limited company in Bombay was charged with failure to report to the Bombay office that some entries in the bank pass book had not been passed through the cash book of the branch. Held he was guilty of gross negligence. The High Court observed that a small fee paid to the respondent should not come in the way of his doing duty without fear or favour, although it involved unpleasant consequence namely, he might not be appointed again. [*The Fairdeal Corporation Ltd. Bombay vs K. Gopalakrishna (1957)*]

A certificate issued by a Chartered Accountant to a proprietor of a firm in respect of the turnover of betel nuts to enable the firm, which was not dealing in betel nuts, to obtain import license without checking the books and documents himself, but relying on his articled clerk for its correctness. Held he was guilty of gross negligence. [*Sunder Lal Fatehpuria in Re: page 591 of Vol. III of the Disciplinary Cases and page 224 of January, 1959 issue of the Institute's Journal-Judgement delivered on 14th November, 1958*]

Where a Chartered Accountant failed in his duty to check the bank balances with the pass books of the banks and failed to obtain certificates of balances from the bankers in respect of those balances. The Council found him guilty of misconduct under Clauses (7) & (8) of Part I of the Second Schedule. Held there being no proof of dishonesty or volume *malafide* on the part of the Chartered Accountant and in view of the circumstances of the case, the High Court took no more serious view of the matter than to express disapprobation of the conduct of the Chartered Accountant in the form of admonition. [*Company Law Administration-vs-D.B. Kulkarni (1960)*]

In the course of some investigation of the affairs of a bank on liquidation, it was found that the authorities of the bank failed to disclose the total indebtedness of the directors in the balance sheet and to report on the numerous alterations and fictitious entries in the books of accounts of the bank. Held that no auditor could escape from personal liability by taking shelter under the misconduct of his own employees. There was nothing to indicate the status, qualifications or capacity of the assistants. Under the circumstances, the conduct of the Chartered Accountant in abdicating his functions to his subordinates amounted to gross negligence. [*Superintendent of Police Madras vs M. Rajamany (1961)*]

Where a Chartered Accountant had placed implicit reliance on his paid assistant who took absolutely no step whatsoever to check the cash balances facilitating and resulting, in serious defalcations. Held he was guilty under Clauses (5), (7) (8) and (9). [*D. C. Sopariwala (1968)*]

Where a certificate issued by a Chartered Accountant to the Joint Chief Controller of Imports & Exports, Calcutta stating that a firm had exported a certain quantity of onions during a certain period contained false and inaccurate particulars in respect of three items of invoice value the particulars themselves related to exports not by this firm but by two other firms. Held he was guilty of the charge of gross negligence. [*The Chief Controller of Exports vs-G.P. Acharya (1962)*]

Where a Chartered Accountant signed the accounts of an institution subject to separate notes. Held he was guilty of gross negligence. In the view of the High Court, the essential part was the separate notes. Any one going through his report would at least assume that those notes when prepared and were ready at the time when the report was signed by him. It could not be supposed that those notes were not in existence at that time and were written at some later date on some facts, which were still to be verified or ascertained. His act, though not suffering from bad or vicious intention, was still an act of gross negligence. [*Hitkarini Mahavidyalaya, Jabalpur vs P.C. Madan (1963)*]

Where a chartered accountant gave clean reports on the balance sheets whereas the reports on the special audit conducted subsequently revealed certain irregularities which amounted to failure to examine the pass book and to verify the cash balance. Held he was guilty under Clause (7). [*Director of Accounts, Gujarat State, Ahmedabad vs K.D. Patel (1968)*]

Where a Chartered Accountant had not completed his work relating to the audit of the accounts of a company and had not submitted his audit report in due time to enable the company to comply with the statutory requirement in this regard. Held, he was guilty of professional misconduct under Clause (7). [*Qaroon Trading & Finance Pvt. Ltd.- vs Luxmi Narain Saxena and Jitendera Mohan Chadha (1969)*]

Where a Chartered Accountant failed to exercise sufficient care and diligence in his professional responsibilities in not checking the cash memos and not verifying the alterations in the trial balance with the original books in respect of one company and in not checking the journal entries and the final figures of the balance sheet with the general ledger in respect of another company. Held, he was guilty under Clause (7). [*Messrs. O. M. Agency Private Ltd. & Messers. Oriental Mercantile Distributors Private Ltd. Surendra Sastry (1971)*]

22.66 Advanced Auditing and Professional Ethics

In his audit report of a school, the auditor failed to point out wrong and misleading entries and a sum of ₹ 7,000/- on account of reserve fund did not find a place at all in the original statement sent to the school. The correction slip alleged to be sent by the Chartered Accountant was never received by the school. The Chartered Accountant had not proved that the correction slip was sent to the school. Held the Chartered Accountant was guilty of gross negligence in the conduct of professional duties and his conduct was quite unbecoming of a professional person entrusted with responsibility of dealing with the accounts. [*B.L. Shoulder vs-M.K. Deb (1976)*]

A Chartered Accountant adopted arbitrary valuation of closing stock and no verification at all was done by him. Further he accepted the capitalization of a large sum of expenditure which was in the nature of revenue. He had merely adopted an *ad-hoc* basis in deciding upon capitalization of expenditure and failed to apply his mind and bring to bear on the subject the due diligence and care expected of a member of the profession. Held, the Chartered Accountant was guilty of gross negligence in the performance of his duties. [*B. Shantharam Rao (1977)*]

A Chartered Accountant was charged under Clauses (5), (6), (7) and (8) of Part I of Second Schedule in regard to a loss of ₹ 1.84 lakhs in a bank of sale of some investments out of which only a sum of ₹ 21,500 was written off by the bank. The value of investment in the balance sheet was inflated and it did not exhibit the correct position and the profit and loss account did not show a true balance of profit and loss. Held, the respondent was guilty of misconduct so as to render him unfit to be a member of the institute. [*B.S. Waierker (1957)*]

Where a Chartered Accountant issued two different certificates of circulation of a daily for one and the same period showing different figures in respect of the number of copies printed and circulated. Held, he was guilty under Clauses (7) and (8). [*Registrar of Newspapers for India vs P.K. Mukherji (1971)*]

A Chartered Accountant had failed to detect a fraud committed by the accountant of a canteen which could have been detected if he had checked the castings of the cash books and also checked the 'contra' entries of the bank and cash columns of the cash books. Held, he was guilty of professional misconduct under Clauses (7), (8) and (9). [*Air Commodore Dilbagh Singh vs C.G. Apte (1976)*]

Where a Chartered Accountant failed to make a reference in the "Income Certificates" prescribed by the ABC to the report which he had separately submitted to the newspaper concerned which did represent the correct state of affairs in all respects but which was not sent by the newspaper to the Bureau. Held, he was guilty under Clauses (7) and (9). [*Audit Bureau of Circulations Ltd., vs A.D. Shinde (1968)*]

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 13(c), 15(d), 24(b), 25(d), 31(c) of the Practice Manual.]

Clause (8): Fails to obtain sufficient information which is necessary for expression of an opinion or its exceptions are sufficiently material to negate the expression of an opinion.

It is expected of a Chartered Accountant to express his opinion on the truth and fairness of statements of accounts after examining their authenticity with reference to information and explanations given to him. A Chartered Accountant must determine the extent of information,

which, should be obtained by him before he expresses an opinion on the financial statements submitted to him for report.

The accountant should not express an opinion before obtaining the required data and information. The latter part of the clause enjoins that where due to inadequacy of information or data the report has to be circumscribed to an extent that it would cease to be of any expression of a categorical opinion, the auditor should clearly express his disclaimer in no uncertain terms. For example, if the auditor has not seen any evidence of the existence and/or valuation of the investment which constitute the only asset of a company, he should not say that:

“Subject to the verification of the existence and value of the investments the balance sheet shows a true and fair view etc.”

On the other hand he should say that-

“As we have been unable to verify the existence and value of the investments of the company, we are unable to state whether the balance sheet shows a true and fair view etc.

Some of the decisions of the Courts on this subject are briefly presented below:

A Chartered Accountant without examination of stock register and other relevant matters issued a wrong consumption certificate on the basis of which licence of higher value, for which the unit was not entitled, was issued by Controller of Imports & Exports. The examination done by the Chartered Accountant was so restricted that he could not have obtained the information necessary to warrant the expression of an opinion regarding consumption of raw material and components. Held the chartered accountant was guilty of professional misconduct under Clause (8). [*T.S. Vaidyanatha Iyer (1977)*]

Where a Chartered Accountant relying on the work of the internal auditor of a company qualified his report that the books of account and the supporting vouchers had been examined by the internal auditor of the company, the Council taking the view that the qualification amounted to an exception sufficiently material to negate the expression of an opinion, found him guilty, of misconduct under the latter part of Clause (8). As a general rule, a statutory auditor would be guilty under this clause, if he performed his work so recklessly as to give his report without looking into the books of account of a company, on the basis of the work of the internal auditor whose opinion turned out to be false. [*J.C. Chandhok (1964)*]

Where a Chartered Accountant issued a certificate of circulation of a periodical without going into the most elementary details of how the circulation of a periodical was being maintained i.e. by not looking into the financial records, bank statements or bank pass books, by not examining evidence of actual payment of printers bills and by not caring to ascertain how many copies were sold and paid for. Held he was guilty under Clause (8). [*Registrar of Newspapers for India vs K. Rajinder Singh (1971)*]

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 6(d), 23(b), 24(b), 28(c), 29(a) of the Practice Manual.]

Clause (9) Fails to invite attention to any material departure from the generally accepted procedure of audit applicable to the circumstances.

This clause implies that the audit should be performed in accordance with “generally accepted procedure of audit applicable to the circumstances” and if for any reason the auditor has not been able to perform the audit in accordance with such procedure, his report should draw attention to the material departures from such procedures. What constitutes “generally accepted audit procedure” would depend upon the facts and circumstances of each case, but guidance is available in general terms from the various pronouncements of the Institute is issued by way of statements and Guidance Notes and SAs to members.

Members are also advised to refer to the ISA's issued by the International Auditing Practices Committee of IFAC.

An auditor of a company is appointed by the shareholders to perform certain statutory functions and duties and it is expected of him that he will in fact, perform these functions and duties. The failure to perform a statutory duty in the manner required is not excused merely by giving a qualification or reservation in auditor's report. For example, if an auditor fails to verify the cash balance in circumstances where such verification was necessary, feasible and material, it is not sufficient for him merely to state in his report that he did not verify the cash balance in circumstances when giving any reservations or qualifications in the auditor's report as required under this clause, a member would be well advised to indicate clearly the reasons why he was unable to perform the audit in accordance with generally accepted procedures and standards.

It is not possible to exhaustively deal with instances or accepted procedure of audit applicable to special cases. Two instances of an audit requiring a special procedure are given below:

Very often members are required to certify the figures of circulation of newspapers, magazines etc. by their clients on behalf of the Audit Bureau of Circulations Ltd. Members are normally supplied by the ABC with the Rules and Regulations under which the certification of circulation is to be carried out. Members are also asked to give their acceptance in writing that they will observe the rules of procedure envisaged to report upon any lapse of such special requirements, even of an insignificant nature.

Similarly, in the case of verification on behalf of banks, the rules or procedure for conducting such audit are different from the normal rules applicable to audits under the Companies Act. Members are required to be very familiar with the special procedure required in these matters and act accordingly.

Some of the decisions of the Court on this subject are briefly summarised below:

Where a Chartered Accountant did not conduct sample checking of the bank accounts in relation to the accounts of the company and did not carry out vouching with respect to the transactions reflected in the accounts of the company and depended upon his assistant who was a Chartered Accountant and experienced clerk who were entrusted with the auditing work. Held he was guilty under Clauses (7), (8) and (9). [*M.R. Ramanathan vs A. Utnatlath Rao (1968)*]

Where a Chartered Accountant failed to verify the actual disbursement of the amount by examining the various items of purchases and insisting for the bills to be produced in respect of the various items before issuing his certificate as mere payment would not constitute utilization of the amount for the purpose for which it was meant. Held he was guilty under Clauses (7), (8) and (9). [*Punjab State Govt. vs K.N. Chandla (1972)*]

A Chartered Accountant had checked the cash book totals but not the bank column totals, had verified all the transactions in the bank columns but not the contra-entries, had taken the casting only of personal ledger and that too not of all accounts, had resorted to test check when there was no system of internal check, had not seen the pay-in-slips, had not checked the bank reconciliation statements for all the months. Held he was guilty of professional misconduct under Clauses (7), (8) and (9). [*Air Commodore Dilbagh Singh vs E.S. Venkataraman (1976)*]

Where the form of the certificate prescribed by the Audit Bureau of circulation Ltd., did not permit any alteration or explanation being given in the certificate itself, the Chartered Accountant had recorded, in a separate report the true state of affairs which he had found. Except making a report which explained the correct position he had no authority to indicate in the certificate itself the true position. But the separate report which he had sent along with the "Income Certificate" to the Newspaper concerned had not been forwarded by the newspaper to the Bureau. It was only later on that the ABC introduced a change in the procedure of audit by permitting a report being sent along with the "Income Certificate" in the various columns were subject to his separate report. Held he was guilty under Clauses (7) and (9). [*Audit Bureau of Circulations Ltd. v.s. M.L. Nanda (1968)*]

Clause (10) fails to keep moneys of his client other than fees or remuneration or money meant to be expended in a separate banking account or to use such moneys for purposes for which they are intended within a reasonable time.

In the course of his engagement as a professional accountant, a member may be entrusted with moneys belonging to his client. If he should receive such funds, it would be his duty to deposit them in a separate banking account, and to utilize such funds only in accordance with the instructions of the client or for the purposes intended by the client. In this connection the Council has considered some practical difficulties of the members and the following suggestions have been made to remove these difficulties:

- (i) An advance received by a Chartered Accountant against services to be rendered does not fall under Clause (10) of Part I of the Second Schedule.
- (ii) Moneys received for expenses to be incurred, for example, payment of prescribed statutory fees, purchase of stamp paper etc., which are intended to be spent within a reasonably short time need not be put in a separate bank account. For this purpose, the expression; "reasonably time", would depend upon the circumstances of each case.
- (iii) Moneys received for expenses to be incurred which are not intended to be spent within a reasonably short time as aforesaid, should be put in a separate bank account immediately.
- (iv) Moneys received by a Chartered Accountant, in his capacity as trustee, executor liquidator, etc. must be put in a separate bank account immediately.

The decision of the Court in this matter is briefly mentioned below:

A Chartered Accountant was found guilty of professional misconduct under Clauses (7) & (10) of Part I of the Second Schedule to the Act for having failed to account satisfactorily for the various amounts entrusted to him by the client and for failure to keep them in a separate bank account. A refund voucher issued in the name of the client by the Income Tax Department was credited by him to his account in the bank.

22.70 Advanced Auditing and Professional Ethics

(N.S. Chenoy v.s. K.V. Subba Rao - page 958 of Vol. IV of the Disciplinary Cases and pages 207-214 of October, 1973, issue of the Institute's Journal - Judgement delivered on 6th April, 1973)

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 6(e), 19(b), 23(c) of the Practice Manual.]

PART II - Professional misconduct in relation to members of the Institute generally

A member of the Institute, whether in practice or not, shall be deemed to be guilty of professional misconduct, if he -

Clause (1) contravenes any of the provisions of this Act or the regulations made there under or any guidelines issued by the Council.

This clause is very important. It requires every member of the Institute to act within the framework of the Chartered Accountants Act and the Regulations made thereunder. Any violation either of the Act or the Regulations by a member would amount to misconduct.

The Regulations under which cases of contravention have generally come to the notice of the Council are the following:

Regulation 43	Engagement of Articled Assistant
Regulation 46	Registration of Articled Assistant
Regulation 47	Premium from Articled Assistant
Regulation 48	Stipend to Articled Assistant
Regulation 56	Termination or assignment of Articles
Regulation 65	Articled Assistant not to engage in any other occupation
Regulation 67	Complaint against the employer (from Articled Assistant)
Regulation 68 to 80	Audit Assistant
Regulation 190	Register of offices and firms
Regulation 190-A	Chartered Accountants not to engage in any other business or occupation
Regulation 191	Part time employment's a Chartered Accountant may accept
Regulation 192	Restriction on fees

Some of the decisions of the Court under this clause are mentioned below:

A Chartered Accountant certified in Form K-2 that an audit clerk was in service with him while he was also, employed elsewhere with another employer between 11 A.M. and 5 P.M. and attended the office of the Chartered Accountant thereafter until 8 P.M. The Chartered Accountant suspended the audit clerk when the Institute brought this fact to the notice of the Chartered Accountant. Held he was guilty of misconduct for making a misstatement to the institute in regard to the discharge of his professional duties. [*J.K. Ghosh in (1953)*]

Where a Chartered Accountant agreed to take a person as an articled clerk in a vacancy shortly to arise and received the premium for the purpose and made him believe, when he executed the deed of articles that he was taking him in that vacancy, while, in fact, that vacancy had been filled up by the Chartered Accountant earlier by taking another audit clerk. The audit clerk came to know from the Institute that the deed of articles was not registered as that was forwarded with a request for entertaining an extra articled clerk. Held that the Chartered Accountant was guilty of serious misconduct for having contravened Regulation 58. [*A.K. Basu v.s. P.K. Mukherjee (1956)*]

Where a Chartered Accountant, who was entitled to take three articled clerks, had already taken three such clerks, represented to a person that he had still a vacancy and induced him to enter into articles. A formal deed was executed and the premium was paid. He subsequently cancelled the articles of the third articled clerk for irregular attendance without reference to the Institute. Held that he had contravened the provisions of Regulation 58 and was guilty of grave misconduct. [*J.K. Ghosh (1955)*]

Where a Chartered Accountant (i) issued false certificates to two articled clerks stating that he had refunded the entire premium, while a part of it was claimed as a set off against food and halting allowances given to them while they were working in out-stations, (ii) violated Regulation 62 by not refunding the premium within the time specified in the Regulation, and (iii) the refund of premium in instalments in one case was not as specified in the certificate. Held he was guilty of dishonest behaviour both as regards his clients and articled clerks. [*M.N. Bhargava (1958)*]

Where a Chartered Accountant after signing the Articles of Agreement, failed to forward the articles for registration as required by Regulation 64 and the statement of particulars in the prescribed form as required by Regulation 64 in spite of repeated enquiries from the articled clerk and even failed to take notice of communications addressed to him in that behalf and having two other articled clerks along with the present one who articles were not sent for registration took up a fourth articled clerk without being entitled to do so. Held he was guilty for breach of Regulation 46. [*Mohan Sehwanji vs. Sunderlal Fatehpuria (1968)*]

A Chartered Accountant was found guilty of professional misconduct in terms of Clause (1) of Part II of the Second Schedule to the Act for contravention of Section 6 of the Act for having issued a certificate in respect of a consumption statement of a concern as a Chartered Accountant in practice on a date when he had not even applied for a certificate of practice to the Institute. [*N.K. Ray Chowdhery in (1973)*]

A Chartered Accountant issued a confidential and private circular to clients where, in addition to, describing himself as "Chartered Accountant" he also described himself as "Investment Consultant Public Accountant". By this circular he introduced himself to the public and private limited companies, which were accepting, fixed deposits and loans through him. Held he was guilty of professional misconduct under Clause (1) of Part II of the Second Schedule. [*B. M. Lala (1976)*]

A Chartered Accountant took loan from a firm in which the articled clerk and his father were both Interested, against the provisions of the Chartered Accountants Regulations, 1988 which prohibit 'taking of loan or deposit etc. from the articled clerk. Held the Chartered Accountant was guilty of professional misconduct under the clause. [*M.K. Tripathi (1979)*]

22.72 Advanced Auditing and Professional Ethics

A Chartered Accountant did not pay stipend to his articled clerk, in accordance with Regulation 48 of the Chartered Accountants Regulations 1988, while to another articled clerk, he was paying every month. The stipend was paid only after the articled clerk left him after working for a months and complaint was lodged with the Institute. The plea of the Chartered Accountant that he had an agreement with the articled clerk to pay stipend on annual basis was found to be misconceived as the same should be against the provisions of Regulation 48. [*Radhey Mohan (1979)*]

Three articled clerks of a Chartered Accountant informed Institute that the Chartered Accountant had failed to make the payments of stipend to them every month in accordance with Regulation 48. Held the Chartered Accountant was guilty of professional misconduct under the clause as he contravened Regulation 48 by not making the payment every month. The court rejected two contentions put forward by the Chartered Accountant, viz, (i) that the declaration filed by the articled clerks could not be regarded as 'information' in order to justify the commencement of disciplinary proceedings (2) that under Regulation 48 the payments had to be made at a monthly rate and not that the payments had to be made every month. The third contention that the payments could not be made every month or regularly because of financial stringency was also rejected particularly in view of the fact that the Chartered Accountant during the relevant period had purchased a plot of land and constructed a house at the cost of more than 1 lakh of rupees and he had in his employment throughout the relevant period a Chartered Accountant at a salary of ₹ 500 Per Month. [*R.C. Gupta (1980)*]

The Chartered Accountant received ₹ 2000/- by way of security from the complainant's father as a consideration for taking him as an articled clerk. Held that he was guilty under the provision. [*Virender Kumar v.s. K.B. Madan (1980)*]

A Chartered Accountant did not pay stipend to the articled clerk per month in accordance with Regulation 32B of the Chartered Accountant Regulations, 1964 in view of the letter written by the articled clerk to the effect that the stipend be not paid to him every month. This letter was purported to have written at the time of commencement of training- Held the letter taken from the articled clerk would not be relied upon as it was ante-dated and it was not written on the date it purported to be. The Chartered Accountant was guilty of professional misconduct under the clause. It was observed that it was very reprehensible that a practising Chartered Accountant should have tried to fabricate evidence in support of the defence. [*V.K. Mittal (1980)*]

A Chartered Accountant did not pay stipend to the articled clerk in accordance with Regulation 32B of the Chartered Accountants Regulations, 1964 for the period during which the Article Clerk worked with him. Also the Article Clerk was asked to work in excess of the prescribed working hours in violation of Regulation 45 of the Chartered Accountants Regulations, 1964. Held that he was guilty of professional misconduct under Clause (1) of Part II of Second Schedule to the Chartered Accountants Act, 1949. [*U.V. Benadikar vs. N.G. Kulkarni (2004)*]

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 3(b), 12(b), 12(c), 14(c), 18(c), 29(b) of the Practice Manual.]

Clause (2) being an employee of any company, firm or person, discloses confidential information acquired in the course of his employment except as and when required by any law for the time being in force or except as permitted by the employer.

This is an adaptation of the well-accepted principle of the law of agency. A member in the forthcoming circumstance would be guilty of misconduct regardless of the fact that he was in whole time or part-time employment or that he was carrying on practice of accountancy along with his employment. Since as employee, a member may have access to a confidential information, hence for maintaining the status and dignity of the profession in general, he should treat such information as having been provided to him only to facilitate the performance of his duties as an employee. In order to keep the confidence of the people, Chartered Accountants, should take special care not to divulge such information.

Clause (3) Includes in any information, statement, return or form to be submitted to the Institute, Council or any of its Committees, Director (Discipline), Board of Discipline. Disciplinary Committee, Quality Review Board or the Appellate Authority any particulars knowing them to be false.

If a Chartered Accountant includes in any information, statement, return or form to be submitted to the Institute Council etc. any particular knowing it to be false, he will be held guilty of misconduct.

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 17(d), 29(b) of the Practice Manual.]

Clause (4) Defalcates or embezzles money received in his professional capacity.

Defalcation and embezzlement of moneys received in professional capacity amounts to fraud (Covered in SA-240) and such member will be deemed to be guilty of professional misconduct under this clause.

Part III - Other misconduct in relation to members of the Institute generally

A member of the Institute, whether in practice or not, shall be deemed to be guilty of other misconduct, if he is held guilty by any civil or criminal court for an offence which is punishable with imprisonment for a term exceeding six months.

Imprisonment awarded for a term exceeding six months in any civil/criminal matter treated as a major offence under 'other misconduct' is included in this Schedule.

22.9 Council Guidelines

The relevant extracts of the council guidelines are given below:

Council General Guidelines, 2008.

Chapter I

Preliminary

1.0 Short title, commencement, etc.

- (a) These Guidelines have been issued by the Council of the Institute of Chartered Accountants of India under the provisions of The Chartered Accountants Act, 1949, as amended by The Chartered Accountants (Amendment) Act 2006, in supersession of the Notifications issued by the Council under erstwhile Clause (2) of Part II of the

22.74 Advanced Auditing and Professional Ethics

Second Schedule to the Chartered Accountants Act, 1949. These Guidelines be called the 'Council General Guidelines, 2008'.

- (b) These guidelines shall be applicable to all the Members of the Institute whether in practice or not wherever the context so requires.

Chapter II

Conduct of a Member being an employee

A member of the Institute who is an employee shall exercise due diligence and shall not be grossly negligent in the conduct of his duties.

Chapter III

Appointment of a Member as Cost auditor

A member of the Institute shall not accept-

- (i) The appointment as Cost auditor of a Company under Section 233B* of the Companies Act, 1956 while he-
- (a) is an auditor of the Company appointed under Section 224 of the Companies Act; or
 - (b) is an officer or employee of the Company; or
 - (c) is a partner, of any employee or officer of the Company; or
 - (d) is a partner or is in the employment of the Company's auditor appointed under Section 224 of the Companies Act, 1956; or
 - (e) is indebted to the Company for an amount exceeding one thousand rupees, or has given any guarantee or provided any security in connection with the indebtedness of any third person to the Company for an amount exceeding one thousand rupees;

OR

- (ii) After his appointment as Cost Auditor, he becomes subject to any of the disabilities stated in items (i) (a) to (e) above and continues to function as a cost auditor thereafter.

A member of the Institute in practice shall not accept the appointment as auditor of a Company under Section 224 of the Companies Act, 1956, while he is an employee of the cost auditor of the Company appointed under Section 233B* of the Companies Act, 1956.

*** [Students may note that Section 233B of the Companies Act, 1956 on Cost Audit has been replaced with Section 148 of the Companies Act, 2013. They may refer Chapter-16 'Cost Audit' of the Study Material for detailed knowledge on cost audit.]**

Chapter IV

Opinion on financial statements when there is substantial interest

A member of the Institute shall not express his opinion on financial statements of any business or enterprise in which one or more persons who are his "relatives" within the meaning of *Accounting Standard (AS-18) has/have, either by themselves or in conjunction with such member, a substantial interest in the said business or enterprise.

Explanation: For this purpose and for the purpose of compliance of Clause (4) of Part I of the Second Schedule to the Chartered Accountants Act, 1949, the expression “substantial interest” shall have the same meaning as is assigned thereto under Appendix (9) to the Chartered Accountants Regulations, 1988.

[*In terms of its decision taken at the 299th Meeting of the Council held on 27th – 28th October, 2010, it has been decided that the term “relative” for the purpose of Chapter-IV of Council General Guidelines, 2008 (Opinion on Financial Statements when there is substantial interest) will have the same meaning as assigned to it in AS-18.]

Chapter V

Maintenance of books of account

A member of the Institute in practice or the firm of Chartered Accountants of which he is a partner, shall maintain and keep in respect of his / its professional practice, proper books of account including the following-

- (i) a Cash Book;
- (ii) a Ledger.

[Note: For illustrative examples/case studies on abovementioned clause, students may refer question no. 3(a) of the Practice Manual.]

Chapter VI

Tax Audit assignments under Section 44 AB of the Income-tax Act, 1961

A member of the Institute in practice shall not accept, in a financial year, more than the “specified number of tax audit assignments” under Section 44AB of the Income-tax Act, 1961.

Provided that in the case of a firm of Chartered Accountants in practice, the “specified number of tax audit assignments” shall be construed as the specified number of tax audit assignments for every partner of the firm.

Provided further that where any partner of the firm is also a partner of any other firm or firms of Chartered Accountants in practice, the number of tax audit assignments which may be taken for all the firms together in relation to such partner shall not exceed the “specified number of tax audit assignments” in the aggregate.

Provided further that where any partner of a firm of Chartered Accountants in practice accepts one or more tax audit assignments in his individual capacity, the total number of such assignments which may be accepted by him shall not exceed the “specified number of tax audit assignments” in the aggregate.

Provided also that the audits conducted under Section 44AD, 44AE and 44AF of the Income Tax Act, 1961 shall not be taken into account for the purpose of reckoning the “specified number of tax audit assignments”.

Explanation:

For the above purpose, “the specified number of tax audit assignments” means -

22.76 Advanced Auditing and Professional Ethics

- (a) in the case of a Chartered Accountant in practice or a proprietary firm of Chartered Accountant, **60 tax audit assignments, in a financial year, whether in respect of corporate or non-corporate assesses.
- (b) in the case of firm of Chartered Accountants in practice, **60 tax audit assignments per partner in the firm, in a financial year, whether in respect of corporate or non-corporate assesses.

According to a clarification on Tax Audit Assignments by Committee on Ethical Standards Board) of the Institute, if there are 10 partners in a firm of Chartered Accountants in practice, then all the partners of the firm can collectively sign 600 tax audit reports. This maximum limit of 600 tax audit assignments may be distributed between the partners in any manner whatsoever. For instance, 1 partner can individually sign 600 tax audit reports in case remaining 9 partners are not signing any tax audit report.

In computing the “specified number of tax audit assignments” each year’s audit would be taken as a separate assignment.

In computing the “specified number of tax audit assignments”, the number of such assignments, which he or any partner of his firm has accepted whether singly or in combination with any other Chartered Accountant in practice or firm of such Chartered Accountants, shall be taken into account.

The audit of the head office and branch offices of a concern shall be regarded as one tax audit assignment.

The audit of one or more branches of the same concern by one Chartered Accountant in practice shall be construed as only one tax audit assignment.

A Chartered Accountant being a part time practicing partner of a firm shall not be taken into account for the purpose of reckoning the tax audit assignments of the firm.

A Chartered Accountant in practice shall maintain a record of the tax audit assignments accepted by him in each financial year in the format as may be prescribed by the Council.

** [Students may note that the specified number of tax audit assignments that an auditor, as an individual or as a partner of a firm, can accept is 60 numbers. The ceiling limit was increased from 45 to 60 numbers in February, 2014 effective for the audits conducted during the financial year 2014-15 and onwards. ICAI has notified that a chartered accountant in practice shall be deemed to be guilty of professional misconduct, if he accepts in a financial year, more than the specified number of tax audit assignments u/s 44AB.]

Chapter VII

Appointment of an Auditor in case of non-payment of undisputed fees

A member of the Institute in practice shall not accept the appointment as auditor of an entity in case the undisputed audit fee of another Chartered Accountant for carrying out the statutory

audit under the Companies Act, 1956 (now Companies Act, 2013) or various other statutes has not been paid:

Provided that in the case of sick unit, the above prohibition of acceptance shall not apply.

Explanation 1:

For this purpose, the provision for audit fee in accounts signed by both - the auditee and the auditor shall be considered as “undisputed” audit fee.

Explanation 2:

For this purpose, “sick unit” shall mean where the net worth is negative.

[Note: For illustrative examples/case studies on abovementioned council guidelines, students may refer question no. 1(b) of the Practice Manual.]

Chapter VIII

Specified number of audit assignments

A member of the Institute in practice shall not hold at any time appointment of more than the “specified number of audit assignments” of Companies under Section 224 and/or Section 228 of the Companies Act, 1956 (now Section 139 and/or Section 143(8) read with Section 141(3)(g) of the Companies Act, 2013).

Provided that in the case of a firm of Chartered Accountants in practice, the “specified number of audit assignments” shall be construed as the specific number of audit assignments for every partner of the firm.

Provided further that where any partner of the firm of Chartered Accountants in practice is also a partner of any other firm or firms of Chartered Accountants in practice, the number of audit assignments which may be taken for all the firms together in relation to such partner shall not exceed the “specified number of audit assignments” in the aggregate.

Provided further where any partner of a firm or firms of Chartered Accountants in practice accepts one or more audit of Companies in his individual capacity, or in the name of his proprietary firm, the total number of such assignments which may be accepted by all firms in relation to such Chartered Accountant and by him shall not exceed the “specified number of audit assignments” in the aggregate.

Students may note that the limit for holding maximum number of assignments has been changed under the Companies Act, 2013. According to Section 141(3)(g) of the said Act, a person or a partner of a firm holding appointment as its auditor, shall not be eligible for appointment as an Auditor of a Company, if such person or partner is at the date of such appointment or reappointment holding appointment as auditor of more than 20 Companies other than one person companies, dormant companies, small companies and private companies having paid-up share capital less than ₹ 100 crore.

In computing the “specified number of audit assignments”-

22.78 Advanced Auditing and Professional Ethics

- (a) the number of audit of such Companies, which he or any partner of his firm has accepted whether singly or in combination with any other Chartered Accountant in practice or firm of such Chartered Accountants, shall be taken into account.
- (b) the audit of the head office and branch offices of a Company by one Chartered Accountant or firm of such Chartered Accountants in practice shall be regarded as one audit assignment.
- (c) the audit of one or more branches of the same Company by one Chartered Accountant in practice or by firm of Chartered Accountants in practice in which he is a partner shall be construed as one audit assignment only.
- (d) the number of partners of a firm on the date of acceptance of audit assignment shall be taken into account.

A Chartered Accountant in practice, whether in full-time or part time employment elsewhere, shall not be counted for the purpose of determination of “specified number of audit of Companies” by firms of Chartered Accountants.

A Chartered Accountant being a part time practicing partner of a firm shall not be taken into account for the purpose of reckoning the audit assignments of the firm.

A Chartered Accountant in practice as well as firm of Chartered Accountants in practice shall maintain a record of the audit assignments accepted by him or by the firm of Chartered Accountants, or by any of the partners of the firm in his individual name or as a partner of any other firm, as far as possible, in the following format:

S. No.	Name of the Company	Registration Number	Date of appointment	Date of Acceptance	Date on which 23-B filed with Registrar of Companies
--------	---------------------	---------------------	---------------------	--------------------	---

[Students may note that, presently, new Form ADT-1 is required to be filed with the Registrar as per the provisions and rules made under Companies Act, 2013 in place of 23-B.]

Chapter IX

Appointment as Statutory auditor

A member of the Institute in practice shall not accept the appointment as statutory auditor of Public Sector Undertaking(s)/ Government Company(ies)/Listed Company(ies) and other Public Company(ies) having turnover of ₹ 50 crores or more in a year where he accepts any other work(s) or assignment(s) or service(s) in regard to the same Undertaking(s)/ Company(ies) on a remuneration which in total exceeds the fee payable for carrying out the statutory audit of the same Undertaking/company.

Provided that in case appointing authority(ies)/regulatory body(ies) specify(ies) more stringent condition(s)/restriction(s), the same shall apply instead of the conditions/restrictions specified under these Guidelines.

The above restrictions shall apply in respect of fees for other work(s) or service(s) or assignment(s) payable to the statutory auditors and their associate concern(s) put together.

For the above purpose,

- (i) the term “other work(s)” or “service(s)” or “assignment(s)” shall include Management Consultancy and all other professional services permitted by the Council pursuant to Section 2(2)(iv) of the Chartered Accountants Act, 1949 but shall not include:-
 - (a) audit under any other statute;
 - (b) certification work required to be done by the statutory auditors; and
 - (c) any representation before an authority;
- (ii) the term “associate concern” means any corporate body or partnership firm which renders the Management Consultancy and all other professional services permitted by the Council wherein the proprietor and/or partner(s) of the statutory auditor firm and/or their “relative(s)” is/are Director/s or partner/s and/or jointly or severally hold “substantial interest” in the said corporate body or partnership;
- (iii) the terms “relative” and “substantial interest” shall have the same meaning as are assigned thereto under Appendix (9) to the Chartered Accountants Regulations, 1988.

In regard to taking up other work(s) or service(s) or assignment(s) of the undertaking/company referred to above, it shall be open to such associate concern or corporate body to render such work(s) or service(s) or assignment(s) so long as aggregate remuneration for such other work(s) or service(s) or assignment(s) payable to the statutory auditor/s together with fees payable to its associate concern(s) or corporate body(ies) do/does not exceed the aggregate of fee payable for carrying out the statutory audit.

[Note: For illustrative examples/case studies on abovementioned council guidelines, students may refer question no. 18(d) of the Practice Manual.]

Chapter X

Appointment of an auditor when he is indebted to a concern

A member of the Institute in practice or a partner of a firm in practice or a firm shall not accept appointment as auditor of a concern while indebted to the concern or given any guarantee or provided any security in connection with the indebtedness of any third person to the concern, for limits fixed in the statute and in other cases for amount exceeding ₹ 10,000/-

[Note: For illustrative examples/case studies on abovementioned council guidelines, students may refer question no. 21(b) of the Practice Manual.]

Chapter XI

Directions in case of unjustified removal of auditors

A member of the Institute in practice shall follow the direction given, by the Council or an appropriate Committee or on behalf of any of them, to him being the incoming auditor(s) not to accept the appointment as auditor(s), in the case of unjustified removal of the earlier auditor(s).

22.10 Recommended Self-Regulatory Measures

As the members are aware, the Council has decided upon certain self-regulatory measures in order to ensure a healthy growth of the profession and an equitable flow of professional work among the members. These measures are reviewed from time to time and are published in the Journal of the Institute for observance by the members. The self-regulatory measures are recommendatory. However, considering the spirit underlying these measures, the Council expects that each and every member will effectively implement them. The Council earnestly believes that implementation of these measures would go a long way in ensuring equitable flow of work among the members and would also further enhance the prestige of the profession in the society.

The more important of these recommendations are as under:

22.10.1 Branch Audits - The branch audits of a company should not be conducted by its statutory auditors consisting of ten or more members, but should be conducted by the local firms of auditors consisting of less than ten members. This should not be understood to mean any restriction on the right of the statutory auditors to have access over branch accounts conferred under the Companies Act, 1956 (now Companies Act, 2013). This restriction may not apply in the following cases.

- (i) where the accounting records of the branches are maintained at the head office of the respective companies, and
- (ii) where significant operations of an undertaking or a company are carried out at its branch office.

22.10.2 Joint Audit - In the case of large companies the practice of associating a practicing firm with less than five members as Joint auditors should be encouraged. Where a client desires to appoint such a firm as joint auditor, the senior firm should not object to the same.

22.10.3 Ratio Between Qualified and Unqualified Staff: In the Council's view, a practicing firm of Chartered Accountants engaged in audit work should have at least one member for every five non-qualified members of the staff, excluding articled and audit clerks, typists, peons and other persons not engaged directly in such professional work.

22.10.4 Disclosure of Interest by Auditors in other Firms - The Council has decided that as a good and healthy practice, auditors should make a disclosure of the payments received by them for other services through the medium of a different firm or firms in which the said auditor may be either a partner or proprietor.

[Important Note: Students may note that, in view of the fact that with effect from 01.04.2014, the Companies Act, 1956 has been replaced with Companies Act, 2013, the "Code of Ethics" issued by ICAI is under revision. Till the time the "Code of Ethics" gets amended in accordance with Companies Act, 2013, students may quote revised provisions along with the old provisions.]

Annexure – 1

The Chartered Accountants Act, 1949

The Chartered Accountants Act, 1949 (No. 38 of 1949) came into force on the 1st day of July, 1949. Later in the year 1959, certain amendments were made therein through the Chartered Accountants (Amendment) Act, 1959 (No.15 of 1959). After about 47 years extensive changes have been made in the Act through the Chartered Accountants (Amendment) Act, 2006 (No.9 of 2006) which have been notified by the Central Government in the Gazette of India (Extra Ordinary) dated 23rd March, 2006. Further, few insertions were made to the principle Act through the Chartered Accountants (Amendment) Act, 2011 (No. 3 of 2012).

The entire Act is divided in nine chapters [Including chapter VIIA inserted by Chartered Accountants (Amendment) Act, 2006].

The Complete enumeration of Contents is given below:

Chapter I - Preliminary

1. Short title, Extent and Commencement
2. Interpretation

This Chapter contains preliminary aspects of the Act like applicability of the Act, definition of various terms like, Chartered Accountant, Council, holder of a restricted certificate, Registered Accountant, etc.

Chapter II - The Institute of Chartered Accountants of India

3. Incorporation of the Institute
4. Entry of names in the Register
5. Fellows and Associates
6. Certificate of Practice
7. Members to be known as Chartered Accountants
8. Disabilities

This chapter deals with various things like who shall be entitled to have his name entered in the register of members of the Institute, who shall be deemed to have become an associate member of the Institute, who shall be entered in the Register as a fellow of the Institute. This Chapter also deals with issues relating to certificate of practice and disabilities of a person for having his name entered in the Register.

Chapter III - Council of the Institute

9. Constitution of the Council of the Institute
10. Re-election or re-nomination to Council [Substituted by Chartered Accountants (Amendment) Act, 2006]
- 10A. Settlement of dispute regarding election [Inserted by Chartered Accountants (Amendment) Act, 2006]

22.82 Advanced Auditing and Professional Ethics

- 10B. Establishment of Tribunal [Inserted by Chartered Accountants (Amendment) Act, 2006]
- 11. Nomination in default of election or nomination
- 12. President and Vice-President
- 13. Resignation of Membership and casual vacancies
- 14. Duration and dissolution of the Council
- 15. Function of the Council
- 15A. Imparting education by Universities and Other bodies [Inserted by Chartered Accountants (Amendment) Act, 2006]
- 16. Officers and employees, salary, allowances etc. [substituted by Chartered Accountants (Amendment) Act, 2006]
- 17. Committees of the Council
- 18. Finances of the Council

This Chapter deals with various issues like composition of Council of the Institute, manner of conducting election to the Council, mode of tendering resignation from the membership of the Council mode of filling a casual vacancy, various duties of the Council. This Chapter also deals with the permission accorded to any University established by law or any Body affiliated to the Institute to impart education on the subjects covered by the academic courses of the Institute.

Chapter IV - Register of Members

- 19. Register of Members
- 20. Removal from the Register

This chapter deals with the matters relating to register of members and removal from the register the name of any member. The Council has to maintain a Register of Members of the Institute. This Register shall include name, date of birth, domicile, residential and professional address, qualification etc. Also, the Council may remove from the Register the name of any member in certain circumstances like in case of death of the member or if the member does not pay the prescribed fees, or when a member has become subject to any of the disabilities mentioned in section 8.

Chapter V - Misconduct

- 21. Disciplinary Directorate [Substituted by Chartered Accountants (Amendment) Act, 2006]
- 21A. Board of Discipline [Inserted by Chartered Accountants (Amendment) Act, 2006]
- 21B. Disciplinary Committee [Inserted by Chartered Accountants (Amendment) Act, 2006]
- 21C. Authority, Disciplinary Committee, Board of Discipline and Director (Discipline) to have powers of civil court [Inserted by Chartered Accountants (Amendment) Act, 2006]
- 21D. Transitional provisions [Inserted by Chartered Accountants (Amendment) Act, 2006]
- 22. Professional or other misconduct defined [Substituted by Chartered Accountants (Amendment) Act, 2006]

- 22A. Constitution of Appellate Authority [Substituted by Chartered Accountants (Amendment) Act, 2006]
- 22B. Term of office of Chairperson and members of Authority [Inserted by Chartered Accountants (Amendment) Act, 2006].
- 22C. Allowances and conditions of service of Chairperson and Members of Authority (Inserted by Chartered Accountants (Amendment) Act, 2006)
- 22D. Procedure to be regulated by Authority [Inserted by Chartered Accountants (Amendment) Act, 2006]
- 22E. Officers and other staff of Authority [Inserted by Chartered Accountants (Amendment) Act, 2006]
- 22F. Resignation and removal of Chairperson and Members [Inserted by Chartered Accountants (Amendment) Act, 2006]
- 22G. Appeal to Authority [Inserted by Chartered Accountants (Amendment) Act, 2006]

In this chapter professional and other misconduct has been defined. As per section 22 of the Act, the expression "professional or other misconduct " shall be deemed to include any act or omission provided in any of the Schedules. In this chapter, Section 21, 22 and 22A have been substituted by new sections 21, 22 and 22A. Other sections (Section 21A, 21B, 21C, 21D, 22B, 22C, 22D, 22E, 22F and 22G) have been inserted by Chartered Accountants (Amendment) Act, 2006. These Sections along with the Schedules deal with the new Disciplinary Mechanism.

Chapter VI - Regional Councils

23. Constitution and Functions of Regional Councils

The Councils may constitute such Regional Councils for the purpose of advising and assisting it on matters concerning its functions. The Regional councils shall exercise prescribed functions.

Chapter VII - Penalties

- 24. Penalty for falsely claiming to be a member etc.
- 24A. Penalty for using name of the Council, awarding degree of Chartered Accountancy etc.
- 25. Companies not to engage in accountancy
- 26. Unqualified persons not to sign documents
- 27. Maintenance of branch offices
- 28. Sanction to prosecute

This chapter lists penalties in various cases like, if a person who is not a member of the Institute and represents himself as a member of the Institute or uses the designation Chartered Accountant, he shall be punishable with fine which may extend to one thousand rupees (on first conviction) and with imprisonment which may extend to six months or with fine which may extend to five thousand rupees or with both (on subsequent conviction). Other provisions regarding penalties that are included in this chapter provide that a Company (Incorporated in or outside India) shall not practice as Chartered Accountant, a person other than a member of the Institute

22.84 Advanced Auditing and Professional Ethics

shall not sign any document on behalf of a Chartered Accountant in practice or a firm of such Chartered Accountants in his or its professional capacity, etc.

Chapter VII A Quality Review Board

[Inserted by Chartered Accountants (Amendment) Act, 2006]

28A. Establishment of Quality Review Board

28B. Functions of Board

28C. Procedure of Board

28D. Terms and conditions of services of Chairperson and Members of Board and its expenditure

After Chapter VII, the Chapter VIIA has been inserted by the Chartered Accountants (Amendment) Act, 2006. It empowers the Central Government to constitute a Quality Review Board outside the framework of the Institute. It will perform the functions like, to make recommendations to the Council with regard to the quality of services provided by the members of the Institute, to review the quality of services provided by the members of the Institute including audit services and to guide the members of the Institute to improve the quality of services and adherence to the various statutory and other regulatory requirements.

Chapter VIII – Miscellaneous

29. Reciprocity

29A. Power of Central Government to make rules.

30. Power to make regulations

30A. Powers of the Central Government to direct regulation to be made or to make or amend regulations

30B. Rules, Regulations and notification to be laid before Parliament [Substituted by Chartered Accountants (Amendment) Act, 2006]

30C. Power of Central Government to issue directions [Inserted by Chartered Accountants (Amendment) Act, 2006]

30D. Protection of action taken in good faith [Inserted by Chartered Accountants (Amendment) Act, 2006]

30E. Members etc. to be public servants [Inserted by Chartered Accountants (Amendment) Act, 2006]

31. Construction of References

32. Act not to affect right of accountants to practice as such in Acceding States.

33. [Repealed]

This Chapter contains miscellaneous provisions. It empowers the Council to prescribe the conditions subject to which foreign qualifications relating to accountancy shall be recognized for the purpose of entry in the Register. It also empowers the Council to make regulations for the purpose of carrying out the objects of this Act. It also empowers the Central Government to direct the Council to make any regulations or to amend or revoke any regulations already made.

Section 30C, 30D, and 30E have been inserted by Chartered Accountants (Amendment) Act, 2006. Section 30C empowers the Central Government to issue directions in the event of non-compliance by the Council of any provisions of the Act. Section 30D protects Central Government, Council, Authority Disciplinary Committee, Tribunal, Board, Board of Discipline, Disciplinary Directorate or any officer thereof, for anything which is in good faith done or intended to be done under this Act or any rule, regulation, notification, direction or order made there under. Section 30E says that the Chairperson, Presiding officer, Members and other officers and employees of the Authority, Disciplinary Committee, Tribunal, Board, Board of Discipline or the Disciplinary Directorate shall be deemed to be public servants within the meaning of Section 21 of the Indian Penal Code.

Annexure – 2

Relevant sections of the Chartered Accountants Act, 1949 with respect to disciplinary procedure are provided below:

Section 21. Disciplinary Directorate –

- (1) The Council shall, by notification, establish a Disciplinary Directorate headed by an officer of the Institute designated as Director (Discipline) and such other employees for making investigations in respect of any information or complaint received by it.
- (2) On receipt of any information or complaint along with the prescribed fee, the Director (Discipline) shall arrive at a prima facie opinion on the occurrence of the alleged misconduct.
- (3) Where the Director (Discipline) is of the opinion that a member is guilty of any professional or other misconduct mentioned in the First Schedule, he shall place the matter before the Board of Discipline and where the Director (Discipline) is of the opinion that a member is guilty of any professional or other misconduct mentioned in the Second Schedule or in both the Schedules, he shall place the matter before the Disciplinary Committee.
- (4) In order to make investigations under the provisions of this Act, the Disciplinary Directorate shall follow such procedure as may be specified.
- (5) Where a complainant withdraws the complaint, the Director (Discipline) shall place such withdrawal before the Board of Discipline or, as the case may be, the Disciplinary Committee, and the said Board or Committee may, if it is of the view that the circumstances so warrant, permit the withdrawal at any stage.

Section 21A. Board of Discipline –

- (1) The Council shall constitute a Board of Discipline consisting of -
 - (a) a person with experience in law and having knowledge of disciplinary matters and the profession, to be its presiding officer;
 - (b) two members one of whom shall be a member of the Council elected by the Council and the other member shall be nominated by the Central Government from amongst the persons of eminence having experience in the field of law, economics, business, finance or accountancy;

22.86 Advanced Auditing and Professional Ethics

- (c) the Director (Discipline) shall function as the Secretary of the Board.
- (2) The Board of Discipline shall follow summary disposal procedure in dealing with all cases before it.
- (3) Where the Board of Discipline is of the opinion that a member is guilty of a professional or other misconduct mentioned in the First Schedule, it shall afford to the member an opportunity of being heard before making any order against him and may thereafter take any one or more of the following actions, namely:
 - (a) reprimand the member;
 - (b) remove the name of the member from the Register up to a period of three months;
 - (c) impose such fine as it may think fit, which may extend to rupees one lakh.
- (4) The Director (Discipline) shall submit before the Board of Discipline all information and complaints where he is of the opinion that there is no prima facie case and the Board of Discipline may, if it agrees with the opinion of the Director (Discipline), close the matter or in case of disagreement, may advise the Director (Discipline) to further investigate the matter.

Section 21B. Disciplinary Committee –

- (1) The Council shall constitute a Disciplinary Committee consisting of the President or the Vice-President of the Council as the Presiding Officer and two members to be elected from amongst the members of the Council and two members to be nominated by the Central Government from amongst the persons of eminence having experience in the field of law, economics, business, finance or accountancy.

Provided that the Council may constitute more Disciplinary Committees as and when it considers necessary.

- (2) The Disciplinary Committee, while considering the cases placed before it shall follow such procedure as may be specified.
- (3) Where the Disciplinary Committee is of the opinion that a member is guilty of a professional or other misconduct mentioned in the Second Schedule or both the First Schedule and the Second Schedule, it shall afford to the member an opportunity of being heard before making any order against him and may thereafter take any one or more of the following actions, namely:
 - (a) reprimand the member;
 - (b) remove the name of the member from the Register permanently or for such period, as it thinks fit;
 - (c) impose such fine as it may think fit, which may extend to rupees five lakh.
- (4) The allowances payable to the members nominated by the Central Government shall be such as may be specified.

Section 21C. Authority, Disciplinary Committee, Board of Discipline and Director (Discipline) to have powers of civil court – For the purposes of an inquiry under the provisions of this Act, the Authority, the Disciplinary Committee, Board of Discipline and the Director

(Discipline) shall have the same powers as are vested in a civil court under the Code of Civil Procedure, 1908 (5 of 1908), in respect of the following matters, namely:

- (a) summoning and enforcing the attendance of any person and examining him on oath;
- (b) the discovery and production of any document; and
- (c) receiving evidence on affidavit.

Explanation: for the purposes of sections 21, 21A, 21B, 21C and 22, “member of the Institute” includes a person who was a member of the Institute on the date of the alleged misconduct although he has ceased to be a member of the Institute at the time of the inquiry.

Section 21D. Transitional provisions – All complaints pending before the Council or any inquiry initiated by the Disciplinary Committee or any reference or appeal made to a High Court prior to the commencement of the Chartered Accountants (Amendment) Act, 2006, shall continue to be governed by the provisions of this Act, as if this Act had not been amended by the Chartered Accountants (Amendment) Act, 2006.

Section 22. Professional or other misconduct defined – For the purposes of this Act, the expression “professional or other misconduct” shall be deemed to include any act or omission provided in any of the Schedules, but nothing in this section shall be construed to limit or abridge in any way the power conferred or duty cast on the Director (Discipline) under sub-section (1) of section 21 to inquire into the conduct of any member of the Institute under any other circumstances.

Section 22A. Constitution of Appellate Authority –

- (1) The Central Government shall, by notification, constitute an Appellate Authority consisting of -
 - (a) a person who is or has been a judge of a High Court, to be its Chairperson;
 - (b) two members to be appointed from amongst the persons who have been members of the Council for at least one full term and who are not sitting members of the Council;
 - (c) two members to be nominated by the Central Government from amongst persons having knowledge and practical experience in the field of law, economics, business, finance or accountancy.
- (2) The Chairperson and other members shall be part-time members.

Section 22B. Term of office of Chairperson and members of Authority –

- (1) A person appointed the Chairperson shall hold office for a term of three years from the date on which he enters upon his office or until he attains the age of sixty-five years, whichever is earlier.
- (2) A person appointed as a member shall hold office for a term of three years from the date on which he enters upon his office or until he attains the age of sixty-two years, whichever is earlier.

Section 22C. Allowances and conditions of service of Chairperson and members of Authority – The allowances payable to, and other terms and conditions of service of, the

22.88 Advanced Auditing and Professional Ethics

Chairperson and members and the manner of meeting expenditure of the Authority by the Council and such other authorities shall be such as may be specified.

Section 22D. Procedure to be regulated by Authority –

- (1) The office of the Authority shall be at Delhi.
- (2) The Authority shall regulate its own procedure.
- (3) All orders and decisions of the Authority shall be authenticated by an officer duly authorised by the Chairperson in this behalf.

Section 22E. Officers and other staff of Authority –

- (1) The Council shall make available to the Authority such officers and other staff members as may be necessary for the efficient performance of the functions of the Authority.
- (2) The salaries and allowances and conditions of service of the officers and other staff members of the Authority shall be such as may be prescribed.

Section 22F. Resignation and removal of Chairperson and members –

- (1) The Chairperson or a member may, by notice in writing under his hand addressed to the Central Government, resign his office.

Provided that the Chairperson or a member shall, unless he is permitted by the Central Government to relinquish his office sooner, continue to hold office until the expiry of three months from the date of receipt of such notice or until a person duly appointed as his successor enters upon his office or until the expiry of term of office, whichever is earlier.

- (2) The Chairperson or a member shall not be removed from his office except by an order of the Central Government on the ground of proved misbehaviour or incapacity after an inquiry made by such person as the Central Government may appoint for this purpose in which the Chairperson or a member concerned has been informed of the charges against him and given a reasonable opportunity of being heard in respect of such charges.

Section 22G. Appeal to Authority –

- (1) Any member of the Institute aggrieved by any order of the Board of Discipline or the Disciplinary Committee imposing on him any of the penalties referred to in sub-section (3) of section 21A and sub-section (3) of section 21B, may within ninety days of the date on which the order is communicated to him, prefer an appeal to the Authority.

Provided that the Director (Discipline) may also appeal against the decision of the Board of Discipline or the Disciplinary Committee to the Authority, if so authorised by the Council, within ninety days.

Provided further that the Authority may entertain any such appeal after the expiry of the said period of ninety days, if it is satisfied that there was sufficient cause for not filing the appeal in time.

- (2) The Authority may, after calling for the records of any case, revise any order made by the Board of Discipline or the Disciplinary Committee under sub-section (3) of section 21A and sub-section (3) of section 21B and may -
- (a) confirm, modify or set aside the order;
 - (b) impose any penalty or set aside, reduce, or enhance the penalty imposed by the order;
 - (c) remit the case to the Board of Discipline or Disciplinary Committee for such further enquiry as the Authority considers proper in the circumstances of the case; or
 - (d) pass such other order as the Authority thinks fit:

Provided that the Authority shall give an opportunity of being heard to the parties concerned before passing any order.

FINAL COURSE STUDY MATERIAL

AUDITING PRONOUNCEMENTS

**BOARD OF STUDIES
THE INSTITUTE OF CHARTERED ACCOUNTANTS OF INDIA**

The objective of this material is to provide teaching material to the students to enable them to obtain knowledge and skills in the subject. In case students need any clarifications or have any suggestions to make for further improvement of the material contained herein, they may write to the Director of Studies.

All care has been taken to provide interpretations and discussions in a manner useful for the students. However, this material has not been specifically discussed by the Council of the Institute or any of its Committees and the views expressed herein may not be taken to necessarily represent the views of the Council or any of its Committees.

Permission of the Institute is essential for reproduction of any portion of this material.

A WORD ABOUT AUDITING PRONOUNCEMENTS

The audit of financial statements add credibility to financial statements prepared by the management of the entity and ensure that the financial statements are prepared in accordance with the legal and regulatory requirements applicable to the entity and are free from any material misstatement.

For ensuring quality in audits, it is essential to have auditing standards for auditors which are at par with globally accepted auditing standards. The Engagement and Quality Control Standards developed by the Auditing and Assurance Standards Board of the ICAI and issued under the authority of the Council of the ICAI are harmonized with the globally recognized International Standards issued by the International Auditing and Assurance Standards Board (IAASB).

In respect of audit engagements, these Standards cover the important aspects such as planning, documentation, risk assessment, fraud considerations, evidence, reporting, etc. Separate Standards deal with other assurance engagements, review engagements and related services. These Standards are principle based and mandatory in nature.

Similarly, Statements on certain important aspects of an audit of a company have been issued for the benefit of the auditors. These Statements, too, are mandatory in nature.

On many occasions, guidance is required on certain procedural aspects of audits of financial statements, which may not, per se, specifically be dealt with by the Standards or they might need additional guidance on carrying out assurance engagements in terms of requirements of some specific laws or regulations. These Guidance Notes are recommendatory in nature.

Keeping all this in view, it has been decided to publish a separate book namely Auditing Pronouncements for the students. This book is quite handy and will be highly useful for the students since they will get all the relevant auditing pronouncements at one place for easy reference.

This handbook has been divided into three parts for the convenience of the students.

- First part contains the Authority and Preface, Glossary of Terms, Standards on Quality Control, Framework for Assurance engagements alongwith SAs, SREs, SAEs and SRSs.
- Second part comprises the Statement of Reporting under section 227 (1A) of the Companies Act, 1956.
- Third part of the book carries the applicable Guidance Notes prescribed at CA Final Level which is given in CD.

It is pertinent to note that necessary references have also been given in line with the Companies Act, 2013 at the appropriate places in this book for better understanding of students.

Happy Reading and Best Wishes!

PART III : GUIDANCE NOTES (Given in CD)

Announcements of the Council Regarding Status of Various Documents Issued by the Institute of Chartered Accountants of India

A. Clarification regarding Authority Attached to Documents Issued by the Institute¹

1. The Institute has, from time to time, issued 'Guidance Notes' and 'Statements' on a number of matters. With the formation of the Accounting Standards Board and the Auditing Practices Committee², 'Accounting Standards' and 'Statements on Standard Auditing Practices'³ are also being issued.

2. Members have sought guidance regarding the level of authority attached to the various documents issued by the Institute and the degree of compliance required in respect thereof. This note is being issued to provide this guidance.

3. The 'Statements' have been issued with a view to securing compliance by members on matters which, in the opinion of the Council, are critical for the proper discharge of their functions. 'Statements' therefore are mandatory. Accordingly, while discharging their attest function, it will be the duty of the members of the Institute:

- (a) to examine whether 'Statements' relating to accounting matters are complied with in the presentation of financial statements covered by their audit. In the event of any deviation from the 'Statements', it will be their duty to make adequate disclosures in their audit reports so that the users of financial statements may be aware of such deviations; and
- (b) to ensure that the 'Statements' relating to auditing matters are followed in the audit of financial information covered by their audit reports. If, for any reason, a member has not been able to perform an audit in accordance with such 'Statements', his report should draw attention to the material departures therefrom.

¹ Published in the December, 1985 issue of the 'The Chartered Accountant'.

² The Auditing Practices Committee of the Institute of Chartered Accountants of India was established in 1982 with, *inter alia*, the objectives of preparing the Statements on Standard Auditing Practices (SAPs), Guidance Notes on matters related to auditing, etc. At its 226th meeting held on July 2, 2002 at New Delhi, the Council of the Institute of Chartered Accountants of India approved the recommendations of the Auditing Practices Committee to strengthen the role being played by it in the growth and development of the profession of chartered accountancy in India. The Council also approved renaming of the Committee as, "Auditing and Assurance Standards Board" (AASB) with immediate effect to better reflect the activities being undertaken by the Committee. Apart from changes designed to strengthen the process for establishing auditing and assurance standards, such a move would bring about greater transparency in the working of the Auditing Practices Committee now known as the Auditing and Assurance Standards Board (AASB).

The Council also approved the renaming of the Statements on Standard Auditing Practices (SAPs) as, "Auditing and Assurance Standards" (AASs). The ICAI in 2007 issued the 'Revised Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services'. Pursuant to issuance of Revised Preface, the Auditing and Assurance Standards (AAS) have been renamed as 'Engagement and Quality Control Standards'. The Engagement Standards comprise:

- *Standards on Auditing (SAs)* - To be applied in the audit of historical financial information.
- *Standards on Review Engagements (SREs)* - To be applied in the review of historical financial information.
- *Standards on Assurance Engagements (SAEs)* - To be applied in assurance engagements, other than audits and reviews of historical financial information.
- *Standards on Related Services (SRSs)* - To be applied to engagements involving application of agreed-upon procedures to information, compilation engagements, and other related services engagements, as may be specified by the ICAI.

³ *ibid.*

2 Auditing Pronouncements

4. A list of 'Statements' issued by the Institute and currently in force is given at the end of this note.⁴
5. 'Guidance Notes' are primarily designed to provide guidance to members on matters which may arise in the course of their professional work and on which they may desire assistance in resolving issues which may pose difficulty. Guidance Notes are recommendatory in nature. A member should ordinarily follow recommendations in a guidance note relating to an auditing matter except where he is satisfied that in the circumstances of the case, it may not be necessary to do so. Similarly, while discharging his attest function, a member should examine whether the recommendations in a guidance note relating to an accounting matter have been followed or not. If the same have not been followed, the member should consider whether keeping in view the circumstances of the case, a disclosure in his report is necessary.
6. There are however a few guidance notes in case of which the Council has specifically stated that they should be considered as mandatory on members while discharging their attest function. A list of these guidance notes is given below:
 - (i) Guidance Note on Treatment of Interest on Deferred Payments read along with the pronouncement of the Council, published in 'The Chartered Accountant', March 1984.⁵
 - (ii) Provision for Depreciation in respect of Extra or Multiple Shift Allowance, published in 'The Chartered Accountant', May 1984.⁶
7. The 'Accounting Standards' and 'Statements on Standard Auditing Practices'⁷ issued by the Accounting Standards Board and the Auditing Practices Committee⁸, respectively, establish standards which have to be complied with to ensure that financial statements are prepared in accordance with generally accepted accounting standards and that auditors carry out their audits in accordance with the generally accepted auditing practices. They become mandatory on the dates specified either in the respective document or by notification issued by the Council.⁹
8. There can be situations in which certain matters are covered both by a 'Statement' and by an

⁴ An updated list of mandatory statements on auditing is included in the 'List of Mandatory Statements and Standards' given after this clarification. It may also be noted that besides statements on accounting and auditing, the Institute has issued statements on other aspects also, namely, Statement on Peer Review and Statement on Continuing Professional Education.

⁵ The nomenclature of this document was changed by the Council of the Institute at its 133rd meeting held in April, 1988. The new nomenclature was 'Statement on Treatment of Interest on Deferred Payments'. In view of para 8 of this 'Clarification', with Accounting Standard (AS) 10 on 'Accounting for Fixed Assets', becoming mandatory (see Announcement II) in respect of accounts for periods commencing on or after 1.4.1991, the 'Statement on Treatment of Interest on Deferred Payments' stands automatically withdrawn except in the case of certain specified non-corporate entities where it stands withdrawn in respect of accounts for periods commencing on or after 1.4.1993 (see Announcements III, V and VI in this regard). It may be noted that pursuant to the issuance of Accounting Standard (AS) 16 on 'Borrowing Costs', which came into effect in respect of accounting periods commencing on or after 1-4-2000, paragraph 9.2 and paragraph 20 (except the first sentence) of AS 10, relating to treatment of finance costs including interest, stand withdrawn from that date.

⁶ The nomenclature of this document was changed by the Council of the Institute at its 133rd meeting held in April, 1988. The new nomenclature was 'Statement on Provision for Depreciation in respect of Extra or Multiple Shift Allowance'. This statement has been withdrawn in respect of accounting periods commencing on or after 1.4.1989, as per the Guidance Note on Accounting for Depreciation in Companies, issued in pursuance of amendments in the Companies Act, 1956, through Companies (Amendment) Act, 1988.

⁷ Refer footnote 2. 'Statements on Standard Auditing Practices' have been renamed as 'Engagement and Quality Control Standards'.

⁸ Refer footnote 2. The 'Auditing Practices Committee' has been renamed as 'Auditing and Assurance Standards Board'.

⁹ Subsequent to the publication of this Clarification, the Council has made various Accounting Standards mandatory. The Announcements made by the Council in this regard are reproduced hereafter.

'Accounting Standard'/Statement on Standard Auditing Practices'¹⁰. In such a situation, the 'Statement' shall prevail till the time the relevant 'Accounting Standard'/Statement on Standard Auditing Practices'¹¹ becomes mandatory. It is clarified that once an 'Accounting Standard'/Statement on Standard Auditing Practices'¹² becomes mandatory, the concerned 'Statement' or the relevant part thereof shall automatically stand withdrawn.

9. List of statements issued by the Institute and which are mandatory in nature.

1. Statement on Companies (Auditor's Report) Order, 2003 (Revised 2005)
2. Statement on Reporting under Section 227(1A) of the Companies Act, 1956.

B. Use of Bold Type Face/ Normal Type Face in Auditing and Assurance Standards

- I. As the members are aware, the Institute of Chartered Accountants of India has till date issued 35 (thirty five) Auditing and Assurance Standards (AASs). It may be reiterated that all the Standards are mandatory in nature. This means that while carrying out an attest function, it will be the duty of the members of the Institute to ensure that these AASs are followed in the audit of financial information covered by their audit reports. If for any reason a member has not been able to perform an audit in accordance with the AASs, his report should draw attention to the material departures therefrom.
- II. Further, it might have been noted by the members that in case of AAS 1 to AAS 15, the entire text of the Standards appears in normal type face, except for the headings and sub headings therein. On the other hand, in case of AAS 16 to AAS 35, certain text in the Standards is appearing in **bold type** face and certain portion of the text appearing in normal type face. Normally, in these Standards, the **bold type** face has been used to facilitate distinction between the principles *vis-a-vis* the application/ procedural aspects, which have been written in normal type face. In any case, however, the entire text of the Standard is mandatory, irrespective of the fact whether such distinction is made in the Standard or not.

The New Format (applicable from 1st April, 2008)¹³

- III. Members may also note that recently, the Council of the Institute of Chartered Accountants of India has approved the **Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services**. The said Preface introduces a totally new format of writing Standards, in line with that adopted by the International Auditing and Assurance Standards Board pursuant to its Clarity Project. According to the new format the Standards on Auditing (SAs) would now contain two distinct sections, one, the Requirements section and, two, the Application Guidance section.
- IV. The fundamental principles of the Standard are contained in the Requirements section and represented by use of "shall". Hitherto, the word, "should" was used in the Standards, for this purpose. Further, this format also does away with the need to present the principles laid down by the Standard in bold text. The application and other explanatory material contained in a Standard on Auditing (SA) is an integral part of the SA as it provides further explanation of, and

¹⁰ Refer footnote 2. 'Statements on Standard Auditing Practices' have been renamed as 'Engagement and Quality Control Standards'.

¹¹ *ibid.*

¹² *ibid.*

¹³ The "Preface to Standards on Quality control, auditing, Review, Other Assurance and Related Services" and the document containing the reclassification and renumbering of the Auditing and Assurance Standards issued by the Institute have been published in July 2007 issue of the Journal.

4 Auditing Pronouncements

guidance for carrying out, the requirements of an SA, along with the background information on the matters addressed in the SA. It may include examples of procedures, some of which the auditor may judge to be appropriate in the circumstances. Such guidance is, however, not intended to impose a requirement. In view of this format of writing, the **standard portion or principles enunciated in a Standard would no longer be given in bold face.**

- V. The new presentation format has, however, not as yet been followed in drafting the Standards on Quality Control and other Standards.
- VI. **There is no change in the authority attached to the Standards, i.e., they are mandatory in nature, notwithstanding the new format of writing the Standards.**

C. Announcements/ Clarifications

1. *Clarification on the Auditors' Rights Where Clients and Other Auditors Seek Access to their Audit Working Papers**

- I. Auditing and Assurance Standard (AAS) 1¹⁴, "Basic Principles Governing An Audit", states in para 6, "The auditor should respect the confidentiality of information acquired in the course of his work and should not disclose any such information to a third party without specific authority or unless there is a legal or professional duty to disclose". Auditing and Assurance Standard (AAS) 3¹⁵, "Documentation" (Paragraph 13), states, "Working papers are the property of the auditor. The auditor may, at his discretion, make portions of or extracts from his working papers available to his client." AAS 3 further requires (paragraph 14), *inter alia*, that the "auditor should adopt reasonable procedures for custody and confidentiality of his working papers."
- II. Part I of the Second Schedule to the Chartered Accountants Act, 1949 provides that "A Chartered Accountant in practice shall be deemed to be guilty of professional misconduct, if he –
"Discloses information acquired in the course of his professional engagement to any person other than his client, without the consent of his client or otherwise than as required by any law for the time being in force."
- III. Requests are sometimes received by the members of the Institute, who have/had been performing the duties as the auditors of an enterprise, to provide access to their audit working papers. The requests may be made by the clients or other auditors of the enterprise or its related enterprise such as a parent enterprise.
- IV. It is hereby clarified that except to the extent stated in para 5 below, an auditor is not required to provide the client or the other auditors of the same enterprise or its related enterprise such as a parent or a subsidiary, access to his audit working papers. The main auditors of an enterprise do not have right of access to the audit working papers of the branch auditors. In the case of a company, the statutory auditor has to consider the report of the branch auditor and has a right to seek clarifications and/or to visit the branch if he deems it necessary to do so for the performance of the duties as auditor. An auditor can rely on the work of another auditor, without having any right of access to the audit working papers of the other auditor¹⁶. For this purpose, the term 'auditor' includes 'internal auditor'.
- V. As stated in para 4, the client does not have a right to access the working papers of the auditor.

* Published in May, 2000 issue of 'The Chartered Accountant'.

¹⁴ Now known as Standard on Auditing (SA) 200.

¹⁵ Now known as Standard on Auditing (SA) 230.

¹⁶ Reference in this regard may be made to Standard on Auditing (SA) 600, "Using the Work of Another Auditor" and Standard on Auditing (SA) 610, "Relying on the Work of Internal Auditor."

However, the auditor may, at his discretion, in cases considered appropriate by him, make portions of or extracts from his working papers available to the client.

2. Format of Review Report under Clause 41 of the Listing Agreement**

- I. As the members are aware, the Institute had in March 2005, issued Auditing and Assurance Standard (AAS) 33¹⁷, Engagements to Review Financial Statements, applicable to all review engagements relating to accounting periods beginning on or after April 1, 2005. Appendix 3 to the said AAS contains an illustrative format of review report in respect of balance sheet. The illustrative format given in the AAS is different from the format of the review report required to be given under clause 41 of the Listing Agreement in that it is in respect of review of financial results and not a balance sheet.
- II. In view of the above, the members are requested to note that in so far as review carried out in terms of clause 41 of the Listing Agreement is concerned, the members are expected to submit their review report in accordance with the format prescribed by the Securities and Exchange Board of India in clause 41 of the Listing Agreement.

3. Audit in Situations of Missing or Incomplete Records***

- I. Members of the Institute while carrying out audit assignments might come across a situation where the records of the client are incomplete or destroyed (partially or completely) on account of a natural calamity or otherwise. While guidance on reporting responsibilities of the members in such cases has been provided to the members by way of publications such as Auditing and Assurance Standard (AAS) 28¹⁸, The Auditor's Report on Financial Statements", the Statement on Qualifications in Auditor's Report, opinions of the Expert Advisory Committee, and a publication titled, "Study on Audit and Certification in Case of Missing Records", issued by the Institute, the Council, for the benefit of the members, wishes to reiterate the guidance in the following paragraphs.
- II. The auditor should, first, obtain a representation from the management that the original accounts are not available for audit. The letter should also include the fact whether the accounts of the entity have been reconstructed by the management. If yes, the extent thereof (partial or complete) and the details of the items of financial statements that have been reconstructed should also be specified in the said letter. In case the accounts have been reconstructed, the members must consider the limitation of scope in audit imposed by the circumstances. Limitation on scope of audit can be of two types, firstly, inability of the management to reconstruct some or all of the items of the financial statements either for the whole financial year or for a certain period during the financial year and secondly, lack of corroborative evidence to support certain or all the entries in the reconstructed accounts. In case of completely reconstructed accounts, the lack of supporting evidence will pose a greater risk of limitation on scope, whereas, for partially reconstructed accounts, both types of limitations, i.e., inability of the management to reconstruct accounts and lack of supporting evidence, can be material. While auditing the reconstructed accounts (partial as well as complete), the auditor should analyse the limitation imposed on application of audit procedures required to be applied in the given situation and use his professional judgment to determine whether to issue an unqualified opinion, qualified opinion or disclaimer of

** Issued in July, 2005.

¹⁷ Now known as Standard on Review Engagements (SRE) 2400.

*** Issued in October, 2006.

¹⁸ Now known as Standard on Auditing (SA) 700.

opinion. Further, the fact of scope limitation must clearly be mentioned in the scope paragraph of the audit report. The AAS 28, "The Auditor's Report on Financial Statements", in its paragraphs 43 and 44 reproduced below, provides the guidance for the auditor in case of a scope limitation:

"43. A scope limitation may be imposed by circumstances, for example, when the timing of the auditor's appointment is such that the auditor is unable to observe the counting of physical inventories. It may also arise when, in the opinion of the auditor, **the entity's accounting records are inadequate or when the auditor is unable to carry out an audit procedure believed to be desirable. In these circumstances, the auditor would attempt to carry out reasonable alternative procedures to obtain sufficient appropriate audit evidence to support an unqualified opinion.** (emphasis added)

44. When there is a limitation on the scope of the auditor's work that requires expression of a qualified opinion or a disclaimer of opinion, the auditor's report should describe the limitation and indicate the possible adjustments to the financial statements that might have been determined to be necessary had the limitation not existed."

- III. Guidance in respect of the matter discussed in the two paragraphs above has been explained in paragraph 45 of the AAS 28 by way of illustrative examples of the scope paragraphs in the audit reports in the cases of qualified opinion and disclaimer of opinion:

In situations of Qualified Opinion

"We have audited

Except as discussed in the following paragraph, we conducted our audit in accordance with

We did not observe the counting of the physical inventories as at 31st March 2XXX since that date was prior to the time we were appointed as auditors of(Name of the entity). Owing to the nature of the entity's records, we were unable to satisfy ourselves as to inventory quantities by other audit procedures."

In situations of Disclaimer of Opinion

"The paragraph discussing the scope of the audit would either be omitted or amended according to the circumstances. (emphasis added)

(Add a paragraph discussing the scope limitation as follows:)

We were not able to observe all physical inventories and confirm accounts receivable due to limitations placed on the scope of our work by the entity."

- IV. Paragraph 10 of AAS 13¹⁹, "Audit Materiality", reproduced below, states that the auditor while auditing the reconstructed accounts must consider the concept of materiality and the audit risk involved with specific account balances and classes of transactions:

"10. *There is an inverse relationship between materiality and the degree of audit risk, that is, the higher the materiality level, the lower the audit risk and vice versa. For example, the risk that a particular account balance or class of transactions could be misstated by an extremely large amount might be very low, but the risk that it could be misstated by an extremely small amount might be very high. The auditor takes the inverse relationship between materiality and audit risk into account when determining*

¹⁹ Now known as Standard on Auditing (SA) 320.

the nature, timing and extent of audit procedures. For example, if, after planning for specific audit procedures, the auditor determines that the acceptable materiality level is lower, audit risk is increased. The auditor would compensate for this by either:

- (a) reducing the assessed degree of control risk, where this is possible, and supporting the reduced degree by carrying out extended or additional tests of control; or*
- (b) reducing detection risk by modifying the nature, timing and extent of planned substantive procedures.”*

- V. While auditing the reconstructed accounts, since the auditor would normally find it difficult to obtain internally generated corroborative evidences supporting the reconstructed accounts, the auditor should apply alternative audit procedures such as inquiry and external confirmation as outlined in paragraphs 14 and 15 of the AAS 5²⁰, “Audit Evidence”, reproduced below:

“Inquiry and Confirmation

- 14. *Inquiry consists of seeking appropriate information from knowledgeable persons inside or outside the entity. Inquiries may range from formal written inquiries addressed to third parties to informal oral inquiries addressed to persons inside the entity. Responses to inquiries may provide the auditor with information which he did not previously possess or may provide him with corroborative evidence.*
- 15. *Confirmation consists of the response to an inquiry to corroborate information contained in the accounting records. For example, the auditor requests confirmation of receivables by direct communication with debtors.”*

For assessing the reliability of the evidence obtained by the auditor from various sources, the auditor is guided by the principles enunciated in paragraph 7 of AAS 5.

- VI. The auditor, if he himself was not the auditor in the immediately preceding financial year, must apply the principles laid down in AAS 22²¹, “Initial Engagements - Opening Balances” while verifying the figures of opening balances.
- VII. Paragraph 4 of the AAS 28, “The Auditor’s Report on Financial Statements”, provides that the auditor’s report should contain a clear written expression of opinion on the financial statements taken as a whole. An unqualified opinion can be expressed only if the auditor is able to satisfy himself, by way of application of sufficient appropriate compliance and substantive procedures, that the financial statements give a true and fair view. The scope limitation imposed by lack of supporting evidence implies a particular emphasis on obtaining alternative corroborative evidence. However, if the auditor concludes that an unqualified opinion can not be expressed but the limitation on scope is not so material and pervasive as to require a disclaimer of opinion, a qualified opinion should be expressed. Further, a disclaimer of opinion should be expressed when the possible effect of a limitation on scope is so material and pervasive that the auditor has not been able to obtain sufficient appropriate audit evidence and is, accordingly, unable to express an opinion on the financial statements. Paragraph 45 of AAS 28 illustrates the principles enunciated here above. Having regard to the above, two illustrative formats of reporting by the auditor are given in

²⁰ Now known as Standard on Auditing (SA) 500.

²¹ Now known as Standard on Auditing (SA) 510.

the paragraphs 8 and 10 below for guidance of the members.

VIII. Illustrative audit report where the auditor decides to express a qualified opinion about the true and fair view of the financial statements:

I. (Where accounts have been reconstructed for some or all of the items for the whole financial year)

“We have audited the attached Balance Sheet of (name of the client), as at 31st March 2XXX, and also the Profit and Loss Account and the cash flow statement for the year ended on that date annexed thereto. We have been informed by the management that because of ____ (give reason) _____ the original accounts are not available for audit and hence these financial statements have been prepared from the reconstructed accounts prepared by the management. The accounts as well as the financial statements are the responsibility of the management. Our responsibility is to express an opinion on these financial statements based on our audit of the accounts.

We conducted our audit in accordance with the auditing standards generally accepted in India. Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

We have not been able to obtain corroborative audit evidence supporting following items of the financial statements while auditing the accounts of the entity:

(State the areas for which the corroborative evidences were not available along with their quantification, to the extent possible and also their resultant effect on the financial statements.)

Subject to the above, the financial statements give a true and fair view:

- (i) in the case of the balance sheet, of the state of the _____ (name of the client) affairs as at the end of its financial year;
- (ii) in the case of the profit and loss account, of the profit or loss for its financial year; and
- (iii) In the case of the cash flow statement, of the cash flows for the year ended on that date.”

(ii) (where accounts have been reconstructed only for certain period during the year)

“We have audited the attached Balance Sheet of (name of the client), as at 31st March 2XXX, and also the Profit and Loss Account and the cash flow statement for the year ended on that date annexed thereto. We have been informed by the management that because of ____ (give reason) _____ the original accounts are not available for audit and hence these financial statements have been prepared from the reconstructed accounts prepared by the management for the period from ____ to ____ during the financial year. The accounts as well as the financial statements are the responsibility of the management. Our responsibility is to express an opinion on these financial statements based on our audit of the accounts.

(Other paragraphs shall be same as in the format given in Part I above.)

- IX. If the auditor is satisfied after obtaining a representation letter from the management and considering the results of sufficient appropriate audit procedures that the reconstruction of the accounts of the entity is not possible, he has no other option but to issue a disclaimer of opinion. The auditor should issue a report to the shareholders mentioning therein that it is not possible for him to express any opinion. The format of audit report to express disclaimer of opinion has been suggested in the following paragraph for guidance of the members.

- X. Illustrative audit report in situations where the reconstruction of the accounts is not possible:

“We were engaged to audit the Balance Sheet of (name of the client), as at 31st March 2XXX, and also the Profit and Loss Account and the cash flow statement for the year ended on that date. The financial statements are the responsibility of the company’s management. The management of(name of the client) has informed us that owing to (state the reason for unavailability of records), the books of account and/ or other related records and documents of the (name of the client) have been completely destroyed. The management has also informed us that the reconstruction of the accounts is also not possible.

Since we have not been able to examine the books of account as well as the financial statements of(name of the client), we are unable to form any opinion on the financial statements.”

- XI. Members’ attention is also invited to the opinion given by the Expert Advisory Committee in September 1988 in situation of an audit where the records etc., had been seized by the income tax authorities and released after four years and records were reconstructed for the interregnum. The Committee, apart from the opinion on the type of the opinion to be expressed by the auditor in such cases, has also opined that the auditor should not normally rely on the management’s certificate as to the opening balances unless the information therein can be corroborated by other supporting document.

4. Amendment to SQC 1 - Retention Period for Engagement Documentation* (Working Papers)

Paragraph 83 of the Standard on Quality Control (SQC) 1, *Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements*, states as follows:

“83. *The needs of the firm for retention*

.....

.....

*In the specific case of audit engagements, the retention period ordinarily is **no shorter than ten years** from the date of the auditor’s report, or, if later, the date of the group auditor’s report.” (emphasis added)*

The Council of the Institute of Chartered Accountants of India, at its 289th meeting held on August 19, 2009 at New Delhi, pursuant to the provisions of Rule 12 of the Chartered Accountants (Procedures of Investigations of Professional and Other Misconduct and Conduct of Cases) Rules, 2007, has decided to amend paragraph 83 of the SQC 1 as follows:

* Issued in August, 2009.

“83. *The needs of the firm for retention*

.....
.....

*In the specific case of audit engagements, the retention period ordinarily is **no shorter than seven years** from the date of the auditor’s report, or, if later, the date of the group auditor’s report.” (emphasis added)*

5. Requirement to include the registration number of the firm as allotted by ICAI, in the audit reports signed by members of the ICAI*

The Council of the Institute of Chartered Accountants of India (ICAI), at its 292nd meeting held on January 13, 2010 has decided to require the members of the Institute of Chartered Accountants of India to:

- Include, in addition to the other requirements relating to signature on the audit report, as prescribed under the relevant Standard on Auditing, the registration number of the firm as allotted by ICAI, in the audit reports signed by them ; and
- Ensure that the resolution passed by the company regarding appointment of the statutory auditor of the company under section 224 of the Companies Act, 1956, also contain the registration number of the firm of the auditor(s) with the ICAI.
- These requirements would come into effect from April 1, 2010.

6. Amendment to SA 230- Retention Period for Engagement Documentation (Working Papers)**

Consequential Amendment to Audit Documentation Retention Period in Standard on Auditing (SA) 230, Audit Documentation

The Council of the Institute of Chartered Accountants of India had in August 2009, pursuant to the provisions of Rule 12 of the Chartered Accountants (Procedures of Investigations of Professional and Other Misconduct and Cases) Rules, 2007 had amended the audit documentation retention period appearing as ten years in paragraph 83 of Standard on Quality Control 1 to seven years.

As a consequence of the above decision of the Council, with the issuance of this announcement by the Auditing and Assurance Standards Board, the audit documentation retention period appearing as ten years in paragraph A23 of the Standard on Auditing (SA) 230, Audit Documentation, issued in January 2009, shall also stand amended to seven years.

7. Requirement to mention the firm registration number allotted by ICAI in all reports issued, including certificates, by members of the ICAI***

Attention of the members is invited to the announcement regarding requirement relating to mentioning the firm registration number in the audit reports and resolution passed by the company for appointment of statutory auditors, published on page 1312 of the February 2010 issue of the Journal.

The Council of the Institute of Chartered Accountants of India, in terms of the decision taken at the 296th meeting held in June 2010 has decided to extend the requirement to mention the firm registration number to all reports issued pursuant to any attestation engagement, including certificates, issued by

* Issued in January, 2010.

** Issued in May, 2010.

*** Issued in August, 2010.

the members as proprietor of/ partner in the said firm. The requirement shall apply where such firm registration number has been allotted by the Institute of Chartered Accountants of India.

The Council further decided to make this requirement effective for all attestation reports/ certificates issued on or after 1st October, 2010.

8. Manner of Reporting by the Auditors on Prudential Regulatory Treatment Prescribed by RBI In Respect of Pension and Gratuity Liability of Public Sector Banks*

1. As the members are aware, the Reserve Bank of India on 9th February 2011 had issued a circular (no. DBOD.BP.BC.80/21.04.018/2010-11) on *Re-opening of Pension Option to Employees of Public Sector Banks and Enhancement in Gratuity Limits – Prudential Regulatory Treatment*. In terms of the said circular, “the banks may take the following course of action in the matter:
 - a. *The expenditure, as indicated in paragraph 2 above, may, if not fully charged to the Profit and Loss Account during the financial year 2010-11, be amortised over a period of five years {subject to (b) and (c) below} beginning with the financial year ending March 31, 2011 subject to a minimum of 1/5th of the total amount involved every year.*
 - b. *Consequent upon the introduction of International Financial Reporting Standards (IFRS) from April 1, 2013 for the banking industry as scheduled, the opening balance of reserves of banks will be reduced to the extent of the unamortised carry forward expenditure.*
 - c. *The unamortised expenditure carried forward as aforementioned shall not include any amounts relating to separated/retired employees.*
 - d. *Appropriate disclosures of the accounting policy followed in this regard may be made in the Notes to Accounts to the financial statements.
.....”*
2. The Council of the Institute of Chartered Accountants of India at its 304th meeting held on 23rd March 2011 considered the prudential regulatory treatment prescribed by the Reserve Bank of India vide its above mentioned circular *vis a vis* the impact thereof on the auditor’s report since the said treatment is a departure from the requirements of the Accounting Standard (AS) 15, *Employee Benefits*.
3. On a consideration of the matter, the Council of the Institute decided that since the accounting treatment for such expenditure is prescribed under the prudential regulatory framework of the Regulator, the auditors need not qualify their audit report on account of this. The matter should, however, be brought out by the auditors in the audit report by way of an “Emphasis of Matter Paragraph” in accordance with the Standard on Audit (SA) 706, “*Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor’s Report*, provided the matter of departure from the requirements of AS 15 pursuant to the aforesaid circular of RBI is appropriately disclosed, with quantification, by the bank by way of the notes to the accounts in the financial statements.

* Issued in April, 2011.

4. An illustrative Emphasis of Matter Paragraph in the audit report is as follows:

“Emphasis of Matter

Without qualifying our opinion, we draw attention to Note X to the financial statements, which describes deferment of pension and gratuity liability of the bank to the extent of Rs. YYY pursuant to the exemption granted by the Reserve Bank of India to the public sector banks from of application of the provisions of Accounting Standard (AS) 15, Employee Benefits vide its circular no. DBOD. BP.BC/80/21.04.018/2010-11 on Re-opening of Pension Option to Employees of Public Sector Banks and Enhancement in Gratuity Limits – Prudential Regulatory Treatment.”

5. Members may note that the aforesaid disclosure in the Notes to the Accounts would normally include:

- Quantification of the actual amount of pension liability arising on account of exercise of the pension option by the employees of the bank who had not opted for pension earlier;
- Quantification of the actual amount of additional liability arising on account of the amendment to the Payment of Gratuity Act, 1972; and
- Impact on the financial statements of application of the provisions of AS 15 in the given circumstances had such circular not been issued by RBI.

An illustrative Note to Accounts in this regard is as follows:

“During the year, the Bank reopened the pension option for such of its employees who had not opted for the pension scheme earlier. As a result of exercise of which by BBB (number of employees), the bank has incurred a liability of Rs. XXX. Further, during the year, the limit of gratuity payable to the employees of the banks was also enhanced pursuant to the amendment to the Payment of Gratuity Act, 1972. As a result the gratuity liability of the Bank has increased by Rs. ZZZ.

In terms of the requirements of the Accounting Standard (AS) 15, Employee Benefits, the entire amount of Rs. AAA (ie. Rs. XXX + Rs. ZZZ) is required to be charged to the Profit and Loss Account. However, the Reserve Bank of India has issued a circular no. DBOD.BP.BC.80/21.04.018/2010-11) on Re-opening of Pension Option to Employees of Public Sector Banks and Enhancement in Gratuity Limits – Prudential Regulatory Treatment, dated 9th February 2011. In accordance with the provisions of the said Circular, the Bank would amortise the amount of Rs. AAA over a period of five years. Accordingly, Rs. CCC (representing one-fifth²² of Rs. AAA) has been charged to the Profit and Loss Account. In terms of the requirements of the aforesaid RBI circular, the balance amount carried forward, ie., Rs. YYY (Rs. AAA – Rs. CCC) does not include any employees relating to separated/ retired employees.

Had such a circular not been issued by the RBI, the profit of the bank would have been lower by Rs. YYY pursuant to application of the requirements of AS 15.”

²² The said RBI circular requires that the amount of amortisation should be at least one-fifth of the total amount involved every year.

9. Compliance with Paragraphs 61 and 62 of the Standard on Review Engagements (SRE) 2410*

1. The Council of the Institute of Chartered Accountants of India, at its 308th meeting, considered an issue relating to difficulties being faced by the members of the Institute in compliance with paragraphs 61 and 62 of the SRE 2410, *Review of Interim Financial Information Performed by the Independent Auditor of the Entity*, raised by the Auditing and Assurance Standards Board of the Institute.
2. The Council noted that paragraphs 61 and 62 of SRE 2410 require as under:

“61. The terms of the engagement include management’s agreement that where any document containing interim financial information indicates that such information has been reviewed by the entity’s auditor, the review report will also be included in the document. If management has not included the review report in the document, the auditor considers seeking legal advice to assist in determining the appropriate course of action in the circumstances.

62. If the auditor has issued a modified review report and management issues the interim financial information without including the modified review report in the document containing the interim financial information, the auditor considers seeking legal advice to assist in determining the appropriate course of action in the circumstances, and the possibility of resigning from the appointment to audit the annual financial statements.”
3. The Council noted that a number of entities were publishing interim financial results with a declaration that the “results have been approved by the Board of Directors at its meeting held on xxxxx and have been subjected to limited review by the statutory auditors.” The companies, however, were not publishing the review report along with such published results. Accordingly, it was either that the auditors had not obtained an agreement with the management that they would publish the review report along with the reviewed results or that despite the said agreement, the management had not complied therewith. The Council noted that in the latter cases, the auditor would be penalised under the requirements of SRE 2410 even when the default/ breach had been committed by the management.
4. The Council was of the view that it is not practically feasible for the auditor to ensure that every document released by the management containing the interim financial information indicating that such information has been reviewed by the entity’s auditor, the review report has been included in the said document.
5. On a consideration of the matter, the Council is of the opinion that paragraphs 61 and 62 did not envisage the auditor to take steps to ensure that on every occasion when the review results were published by the management, it also published the review report therewith. The responsibility of the auditor was upto issuance of the review report on the results, at most till the time the interim results, along with the review report, were filed by the company with the concerned stock exchange. Further, since such filing led to the concerned interim results and the review report thereon becoming available in the public domain, the same would be construed as sufficient compliance by the auditor with the requirements of paragraphs 61 and 62 of SRE 2410.

* Issued in October, 2011.

6. The Council, however, felt that if, subsequent to the issuance of the review report, the auditor became aware of situations where the management had not published the review report especially where the review report contained auditor's reservations, he would need to bring the same to the attention of the management and, if considered necessary, take legal advice.

10. Statutory Auditor's Reporting Responsibilities in Respect of Depositing of Cess Pursuant to Clause 4(ix)(a) of the Companies (Auditor's Report) Order, 2003 and Section 227(3)(g) of the Companies Act, 1956*

1. The Council of the Institute, at its 312th meeting held on December 25 - 27, 2011, noted that paragraph 4(ix)(a) of the Companies (Auditor's Report) Order, 2003 required the statutory auditor to report on the matter relating to regularity of the company in depositing undisputed statutory dues as follows:

"Is the company regular in depositing undisputed statutory dues including Provident Fund, Investor Education and Protection Fund, Employees' State Insurance, Income-tax, Sales-tax, Wealth Tax, Service Tax, Custom Duty, Excise Duty, Cess and any other statutory dues with the appropriate authorities and if not, the extent of the arrears of outstanding statutory dues as at the last day of the financial year concerned for a period of more than six months from the date they became payable, shall be indicated by the auditor.[Paragraph 4(ix)(a)]"

2. The Council also noted that paragraph 63(g) of the Statement on the Companies (Auditor's Report) Order, 2003, issued by the Institute of Chartered Accountants of India states as follows:

*It may be noted that at present, no Rules relating to the amount of cess for rehabilitation or revival or protection of assets of sick industrial companies, payable by a company under section 441A of the Act have been notified by the Central Government. Thus, it would not be possible for the auditor to comment on the regularity or otherwise about the cess till the time relevant rules or regulations are issued. **However, till the time such Rules are prescribed, the auditor should also state in his report under this clause that the Government has not notified any Rules under section 441A of the Companies Act, 1956 and, therefore, the auditor is unable to comment on this particular issue.** (emphasis added)*

3. The Council noted that till date the Central Government had not notified the effective date of section 441A of the Companies Act, 1956. Consequently, no Rules thereunder had also been prescribed by the Central Government. Accordingly, there was no question of reporting thereon under the Companies (Auditor's Report) Order, 2003. The Council, therefore, decided that in view of the aforementioned situation, the statutory auditor need not report in respect of cess payable under section 441A of the Companies Act, 1956 as envisaged under paragraph 63(g) of the Statement on the Companies (Auditor's Report) Order, 2003. The Council, therefore, decided to modify paragraph 63(g) of the said Statement as follows:

"It may be noted that at present, no Rules relating to the amount of cess for rehabilitation or revival or protection of assets of sick industrial companies, payable by a company under section 441A of the Act have been notified by the

* Issued in January, 2012.

Central Government. Thus, it would not be possible for the auditor to comment on the regularity or otherwise about the cess till the time relevant rules or regulations are issued. ~~However, till the time such Rules are prescribed, the auditor should also state in his report under this clause that the Government has not notified any Rules under section 441A of the Companies Act, 1956 and, therefore, the auditor is unable to comment on this particular issue.~~ However, till the time such Rules are prescribed, the auditor need not make any comment in respect of the Cess under section 441A of the Companies Act, 1956 in his report under paragraph 4(ix)(a) of CARO 2003.

4. The Council, incidentally, also noted that section 227(3)(g) of the Companies Act, 1956 required the statutory auditor's report to state, "Whether the cess payable under section 441A has been paid and if not, the details of amount of cess not so paid." It was also noted that the operative date of even section 227(3)(g) had not yet been notified by the Central Government.
5. Accordingly, as a corollary to the Council's views on auditor's reporting responsibilities on cess under section 441A of the Companies Act, 1956, pursuant to clause 4(ix)(a) of CARO, 2003, the Council was of the view that the statutory auditor's report need not contain any comment on section 227(3)(g) of the Companies Act, 1956.

11. Important Announcement on revised Effective Date/ Applicability of three Standards on Auditing, namely:*

- SA 700 (Revised), "Forming an Opinion and Reporting on Financial Statements";
- SA 705, "Modifications to the Opinion in the Independent Auditor's Report";
- SA 706, "Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report"

During the last few weeks, the President and Vice-President, during their interaction with members especially statutory central and branch auditors of banks, business community and Council Members, have been urged that concerted efforts be made by the Institute by way of regular CPE and other programmes to familiarise the practicing members with the requirements of the following three Standards on Auditing namely:

- SA 700 (Revised), "Forming an Opinion and Reporting on Financial Statements";
- SA 705, "Modifications to the Opinion in the Independent Auditor's Report";
- SA 706, "Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report"

which were issued in 2010 to be effective/applicable for audits of financial statements for the periods beginning on or after 1.4.2011 and only after ensuring adequate education, publicity and familiarization, the said standards, be made mandatory.

The above concerns were shared by the President and Vice-President among other Council colleagues and thereafter based on the view emerged, the President directed the office to circulate a proposal, under Regulation 165, among Council Members for taking a decision on postponement by one year of the applicability of aforementioned Standards on Auditing.

Accordingly, a proposal for postponement by one year of the effective date/applicability of the

* Issued in April, 2012.

above mentioned three Standards on Auditing was circulated among Council Members for taking a decision in the matter, in accordance with the applicable provisions of Regulation 165 of the Chartered Accountants Regulations 1988. The decision so taken by the Council is as follows:

“The Council, in partial modification of the decision taken by it at its 291st meeting held in December, 2009, decided that the effective date/applicability of the following Standards on Auditing –

- a) SA 700 (Revised), “Forming an Opinion and Reporting on Financial Statements”;
- b) SA 705, “Modifications to the Opinion in the Independent Auditor’s Report”;
- c) SA 706, “Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor’s Report”

be postponed by one year and consequently the said Standards shall now be effective/applicable for audits of financial statements for periods beginning on or after 1st April, 2012 (instead of audits of financial statements for periods beginning on or after 1st April, 2011 as was earlier decided and referred to above).

The suggestion of some members on issue of suitable clarification in respect of those members who have since issued the audit reports in consonance with the said Standards i.e. under new format, shall be brought before the Council at its next meeting for addressing the same appropriately.”

This is for information and compliance of all concerned.

12. Manner of Reporting by the Statutory Auditors on Accounting for Liabilities Arising on Dismantling of Indian Motor Third Party Insurance Pool (IMTPIP) Prescribed by IRDA*

1. As the members are aware, the Insurance Regulatory and Development Authority (IRDA) had *vide* its Order No. IRDA/NL/ORD/MPL/277/12/2011 dated 23rd December 2011 had directed the dismantling of the Indian Motor Third Party Insurance Pool (IMTPIP) with effect from 31st March 2012.
2. Subsequently, *vide* its Order No. IRDA/F&A/ORD/MTPP/070/03-2012 dated 22nd March 2012, in exercise of its powers under section 34 of the Insurance Act, 1938, prescribed, *inter alia*, the following accounting treatment in respect of the “transitional liabilities” relating to the financial years 2009-10, 2010-11 and 2011-12, arising on account of such dismantling as follows:

“3. The IMPTPIP liabilities upon estimation/re-estimation of actuarially determined liabilities relating to the financial years (accounting years as the practice is) 2009-10, 2010-11 and 2011-12 following the dismantling of the IMTPIP shall be determined and such determined liabilities (Transitional Liabilities) shall be recognized by insurers by making an irrevocable choice to recognize the said transitional liabilities:

- a. *Immediately in the financial year ending March, 2012; or*
- b. *As an expense on a straight-line basis over upto the three years beginning with the financial year ending March, 31, 2012.*
- c. *An insurer opting for (b) above, shall:*

* Issued in May, 2012.

- (i) *Disclose at the end of each financial year the amount of transitional liabilities that remains unrecognized; and the amount recognized in the financial year; and*
 - (ii) *Shall ensure that the expense to be recognized in subsequent years shall not be less than the expense that shall fall due on a straight-line basis; and*
 - (iii) *In case the actual liability in respect of past years i.e. underwriting years until March, 31, 2012 being more than the amount on straight-line basis, such additional liabilities shall be recognized in full, in addition to the amount falling due for recognition on straight-line basis."*
3. The Council of the Institute of Chartered Accountants of India at its 316th meeting held from 15th to 17th May 2012 considered the accounting treatment prescribed under paragraph 3(b) of the above mentioned Order of IRDA *vis a vis* the impact thereof on the auditor's report since non-recognition of the said liability where an insurer exercises the option under paragraph 3(b) is not in accordance with accounting principles generally accepted in India.
4. On a consideration of the matter, the Council of the Institute noted that the aforesaid accounting treatment has been prescribed by the IRDA in exercise of its powers under section 34 of the Insurance Act, 1938. Accordingly, the statutory auditors need not qualify their audit report on account of such accounting treatment followed by the insurance company. The matter should, however, be brought out by the auditors in the audit report by way of an "Emphasis of Matter Paragraph" in accordance with the Standard on Audit (SA) 706, "Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report, provided the non-recognition of the said liability pursuant to the aforesaid order of IRDA is appropriately disclosed, with quantification, by the insurer by way of the notes to the accounts in the financial statements.
5. An illustrative Emphasis of Matter Paragraph in the audit report is as follows:

"Emphasis of Matter Without qualifying our opinion, we draw attention to Note X to the financial statements, which describes deferment of the liability on dismantling of the Indian Motor Third Party Insurance Pool by the Company to the extent of Rs. YYY pursuant to the exercise of the option for the accounting treatment for the same prescribed under paragraph 3(b) of Insurance Regulatory and Development Authority Order no. IRDA/F&A/ORD/MTAP/070/03/2012 dated 22nd March 2012. "
6. Members may note that the aforesaid disclosure in the Notes to the Accounts would normally include.
 - Quantification of the actual amount of the total liability on dismantling.
 - amount of transitional liabilities that remains unrecognized; and
 - the amount recognized in the financial year;
7. Further, pursuant to dismantling of the IMTPIP by the IRDA, the insurance company's accounting policy for recognition of liability incurred by it in respect of third party risks of specified commercial motor vehicles (specified risks) would also undergo a change. Accordingly, the Company would also need to appropriately disclose such change in accounting policy in its Notes to Accounts. An illustrative disclosure in this respect is this regard is also given below.

8. An illustrative Notes to Accounts in respect of treatment of liability arising on account of dismantling of IMTPIP for the financial years 2007-08 and 2008-09 and the transitional liability in respect of the financial years 2009-10, 2010-11 and 2011-12 is as follows:

“During the year, the Insurance Regulatory and Development Authority *vide* its Orders No. IRDA/NL/ORD/MPL/277/ 12/2011 dated 23rd December 2011 directed the dismantling of the Indian Motor Third Party Insurance Pool (IMTPIP).

Subsequently, the IRDA *vide its Order No.* IRDA/F&A/ORD/ MTPP/070/03-2012 dated 22nd March 2012, in exercise of its powers under section 34 of the Insurance Act, 1938, prescribed, the following accounting treatment in respect of the liability arising on account of the dismantling of the IMTPIP:

“2. The additional IMPTPIP liabilities upon re-estimation of actuarially determined liabilities relating to underwriting years 2007-08 and 2008-09 shall be accounted for and recognized in full in the financial year ending March 31, 2012 itself. The Pool Manager shall quantify the liability in respect of each insurer for this purpose.

3. The IMPTPIP liabilities upon estimation/re-estimation of actuarially determined liabilities relating to the financial years (accounting years as the practice is) 2009-10, 2010-11 and 2011-12 following the dismantling of the IMTPIP shall be determined and such determined liabilities (Transitional Liabilities) shall be recognized by insurers by making an irrevocable choice to recognize the said transitional liabilities:

- (a) *Immediately in the financial year ending March, 2012; or*
 (b) *As an expense on a straight-line basis over upto the three years beginning with the financial year ending March, 31, 2012.”*

As a result of dismantling of the IMTPIP, the Company has incurred the following liability:

2007 – 08	:	Rs. DDD	(as quantified by the Pool Manager)
2008 – 09	:	Rs. GGG	(as quantified by the Pool Manager)
Total		(A): Rs. JJJ	

Transitional Liability

2009-10	:	Rs. PPP	
2010-11	:	Rs. QQQ	
2011-12	:	Rs. TTT	
Total Transitional liability	(B):	Rs. AAA	

TOTAL LIABILITY ON ACCOUNT

OF DISMANTLING (A) + (B) : Rs. HHH

Accordingly, in terms of the requirements of paragraph 2 of IRDA’s Order of 22nd March 2012, an amount of Rs. JJJ has been charged to the Profit and Loss Account for the current financial year ended 31st March 2012.

Further, the Company has decided to exercise the option given under paragraph 3(b) of the aforesaid Order of IRDA in respect of the accounting treatment of

Transitional Liability amounting to Rs. AAA and, thus, would amortize the amount of Rs. AAA over a period of three years. Accordingly, Rs. CCC (representing one-third of Rs. AAA) has been charged to the Profit and Loss Account for this financial year. Further, in terms of the requirements of paragraphs 3(b) and (c) of the aforesaid Order of IRDA, the balance amount carried forward is Rs. YYY (Rs. AAA – Rs. CCC).

Had the Company chosen to exercise the option given under paragraph 3(a) of the aforesaid Order of the IRDA, the Company would have been required to recognise the entire amount of Transitional Liability of Rs. AAA in its Profit and Loss Account for the year 2011-12. Accordingly, the profit of the company would have been lower by Rs. YYY pursuant to recognition of the said liability in the year of dismantling of IMTPIP.”

9. An illustrative Notes to Account in respect of change in the accounting policy in respect of third party risks of specified commercial motor vehicles is as follows:

“Till the financial year 2010-11, the Company had the following accounting policy in respect of respect of third party risks of specified commercial motor vehicles (specified risks):

(state the policy hitherto being followed by the company)

Pursuant to the dismantling of the IMTPIP by the IRDA with effect from 31st March 2012, with effect from 1st April, 2012, it would not be possible for the Company to transfer the risks incurred by it on account of third party risks of specified commercial motor vehicles by way of reinsurance of same through IMTPIP. Accordingly, the Company would be required to provide for the entire amount of related liability and also recognize the entire amount of other related expenditure in the financial statements of the relevant financial year.”

13. Manner of Reporting on Section 227(3)(bb) of the Companies Act, 1956*

- I. Section 227(3)(bb) of the Companies Act, 1956 requires the statutory auditor to report on the following aspect:

“bb. whether the report on the accounts of any branch office audited under section 228 by a person other than the company’s auditor has been forwarded to him as required by clause (c) of sub-section (3) of that section and how he has dealt with the same in preparing the auditor’s report;”

(A similar reporting requirement appears in section 143(3)(c) of the Companies Act, 2013 though the section has not yet been notified by the Central Government”.)

- II. The Council of the Institute, at its 329th (Adjourned) meeting held on 03rd and 04th January 2014 at New Delhi noted that reporting by the statutory auditors of the Company on clause (3)(bb) of section 227 of the Companies Act, 1956 is a legal requirement in cases where the company had appointed separate branch auditor/s. However, the same was inadvertently not appearing under the “Report on Other Legal and Regulatory Requirements” paragraph in the illustrative format of the independent auditor’s report for a Company as given in the Appendix to SA 700. The Council

* Issued in February, 2014.

** The Section has been notified after the issuance of this announcement.

accordingly, decided to add the following reporting in the illustrative independent auditor's report formats for a Company (to be reported upon as and where applicable):

“bb. the report on the accounts of the branch offices audited under section 228 by a person other than the company's auditor has been forwarded to us as required by clause (c) of sub-section (3) of section 228 and have been dealt with in preparing our report in the manner considered necessary by us;”

14. Reference to the Accounting Standards Applicable to the Companies in the Auditor's Report and Limited Review Reports and various Engagement Standards*

- I. The Ministry of Corporate Affairs (MCA) has *vide* its notification dated 12th September 2013 notified 98 sections of the Companies Act 2013 having come into force from that date. One of the sections so notified is Section 133 which empowers the Central Government to prescribe the standards of accounting or any addendum thereto, as recommended by the Institute of Chartered Accountants of India (ICAI) in consultation with and after examination of the recommendation by the National Financial Reporting Authority (NFRA).
- II. Subsequently, MCA *vide* its General Clarification No. 15/2013 dated 13th September 2013, has clarified that to facilitate proper administration of the notified sections of the Companies Act 2013, in respect of the aforesaid Section 133, “*Till the Standards of Accounting or any addendum thereto are prescribed by Central Government in consultation and recommendation of the National Financial Reporting Authority, the existing Accounting Standards, notified under the Companies Act, 1956 shall continue to apply.*”
- III. Further, *vide* its Circular no. 16/2013 dated 18th September 2013, MCA has further clarified that with effect from 12th September 2013, “*the relevant provisions of the Companies Act, 1956, which correspond to provisions of 98 sections of the Companies Act, 2013 brought into force on 12.09.2013, cease to have effect from that date.*” As a result, section 211(3C) of the Companies Act, 1956 corresponding to which section 133 of the Companies Act, 2013 has been notified has ceased to have effect from 12th September, 2013.
- IV. In view of the above, members have sought guidance on the manner of reference to the Accounting Standards applicable to the company in the statutory auditor's report of the company as well as the limited review report in case of a listed company, issued pursuant to clause 41 of the Listing Agreement.
- V. The matter was considered by the Council of the Institute of Chartered Accountants of India at its 329th Adjourned meeting held on 03rd and 04th January 2014 at New Delhi. The Council noted that in so far as the format of the auditor's report for a statutory audit of a company, for example, as given in illustration 1 in Appendix to SA 700, is concerned, reference to the Accounting Standards issued under section 211 (3C) of the Companies Act, 1956 appears at two places. First, under the “*Management's Responsibility for the Financial Statements*” paragraph and second, under the “*Report on Other Legal and Regulatory Requirements*” paragraph.
- VI. The Council noted that, while section 133 of the Companies Act, 2013 had been notified, and accordingly, section 211(3C) of the Companies Act, 1956 had been superceded, section 143 of the Companies Act, 2013, which dealt with the matters to be contained in the auditor's report, had not yet been notified*. Accordingly, the auditor's reporting requirements were still being governed by section 227(3) of the Companies Act, 1956 and that clause 227(3)(d) of the Companies Act,

* The Section has been notified after the issuance of this announcement.

1956 requires the auditors to report “*whether, in his opinion, the profit and loss account and balance sheet comply with the accounting standards referred to in sub-section (3C) of section 211*” of the Companies Act, 1956.

- VII.** The Council is of the view that in the above background, till the time section 143 of the Companies Act, 2013 is made operative, both the following manners of making reference to the Accounting Standards in the independent auditor’s report of a Company would be acceptable:

Alternative 1: Refer to section 211(3C) of the Companies Act, 1956 (both in the “Management’s Responsibility for Financial Statements” and “Report on Legal and Other Regulatory Matters” paragraphs (*as currently given in the illustrative format of independent auditor’s report for a company given in Appendix to SA 700*);

OR

Alternative 2: Refer to only the Companies Act, 1956 along with the reference to the relevant notifications of MCA *vide* which it had clarified that the Accounting Standards prescribed under the Companies Act, 1956 would continue to apply in respect of section 133 of the Companies Act, 2013.

- VIII.** Where the members decide to opt for *Alternative 2* above, the “Management Responsibility for Financial Statements” paragraph and the “Report on Legal and Other Regulatory Matters” paragraph in the independent auditor’s report would need to suitably reworded as follows and such rewording would be construed to be in accordance with that prescribed in the text/ Appendix to the concerned Engagement Standard.

“Management’s Responsibility for the Financial Statements

Management iscash flows of the Company in accordance with the Accounting Standards notified under the Companies Act, 1956 (“the Act”) read with the General Circular 15/2013 dated 13th September 2013 of the Ministry of Corporate Affairs in respect of section 133 of the Companies Act, 2013. This responsibility..... fraud or error.”

“Report on Other Legal and Regulatory Requirements

2. As required by Section 227(3) of the Act, we report that:

(a)
.....

(d) In our opinion, the Balance Sheet, the Statement of Profit and Loss, and the Cash Flow Statement comply with the Accounting Standards notified under the Companies Act, 1956 read with the General Circular 15/2013 dated 13 September 2013 of the Ministry of Corporate Affairs in respect of section 133 of the Companies Act, 2013.

.....

(f)”

- IX.** Similarly, in case of limited review reports issued in terms of clause 41 of the Listing Agreement, approach similar to as suggested above may also be adopted while making a reference to the Accounting Standards applicable to the concerned Company in the limited review report/s issued by a practitioner pursuant to the Standard on Review Engagement (SRE) 2400, *Engagements to Review Financial Statements* or the Standard on Review Engagement (SRE) 2410, *Review of Interim Financial Information Performed by the Independent Auditor of the Entity*.

15. Amendment to the “Auditor’s Responsibility” Paragraph Included in the Independent Auditor’s Report*

1. The Council of the Institute of Chartered Accountants of India at its 329th Adjourned meeting held on 03rd and 04th January 2014, New Delhi noted that in the context of the “auditor’s responsibility”, paragraph 31(b) of the Standard on Auditing (SA) 700, *Forming An Opinion and Reporting on Financial Statements*, issued by the Institute, required the following to be mentioned in the auditor’s report:

“31. The auditor’s report shall describe an audit by stating that:

- (b) The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity’s preparation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. In circumstances when the auditor also has a responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, the auditor shall omit the phrase that the auditor’s consideration of internal control is not for the purpose of expressing an opinion on the effectiveness of internal control; and”

(emphasis added)

2. The Council noted that the “Auditor’s Responsibility” paragraph as given in the illustrative formats of the independent auditor’s report, as given in the Appendix to SA 700 (and as a corollary, in the Appendices to SA 705²³ and SA 706²⁴), however, did not contain such description that the auditor’s risk assessment and procedures were not designed for the purpose of expressing an opinion on the effectiveness of the entity’s internal controls.
3. The Council, accordingly, decided to amend the “Auditor’s Responsibility” paragraph in an independent auditor’s report as follows:

“An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity’s preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.”

(the amendment is shown in the track changed mode)

* Issued in February, 2014.

²³ SA 705, Modifications to the Opinion in the Independent Auditors Report.

²⁴ SA 706, Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor’s Report.

16. Use of the Term “Profit and Loss Account” or “Statement of Profit and Loss” in the Statutory Audit Reports of Companies*

- I. The Council of the Institute of Chartered Accountants of India, at its 329th Adjourned meeting, held on 03rd and 04th January, 2014 at New Delhi noted that the illustrative formats of the independent auditor’s report (in respect of a Company) as given in SA 700, SA 705 and SA 706 contain the references to “Profit and Loss Account” at various places. The term was being used since the Schedule VI to the Companies Act, 1956 also used this term.
- II. The Council also noted that though the Revised Schedule VI to the Companies Act, 1956 as also the corresponding Schedule III to the Companies Act, 2013, instead use the term “Statement of Profit and Loss”, section 227 of the Companies Act, 1956, which continues to be applicable in respect of the statutory auditor’s reporting requirements, used the term “Profit and Loss Account”.
- III. The Council decided that in view of the above, in the independent auditor’s report of a Company, the auditors may chose to use the term “Profit and Loss Account” or “Statement of Profit and Loss”.

17. Manner of Reporting In Respect of Such Clauses of the Companies (Auditor’s Report) Order, 2003 Which Are Not Applicable to the Auditee Company*

- I. The Council, at its 329th Adjourned meeting held on 03rd and 04th January 2014 at New Delhi noted that the paragraph 80 of the Statement on the Companies (Auditor’s Report) Order, 2003 (the Statement) requires that, in such situations, where one or more of the clauses are not applicable, it would be appropriate for the auditor to make a suitable comment in his report bringing out the fact of non-applicability of a particular clause.
- II. The Council considered the requirements of paragraph 80 of the Statement and was of the view that non applicability of one or more clauses of the Companies (Auditor’s Report) Order, 2003 (CARO 2003) to the company would not, in any way, impact the auditor’s opinion on the financial statements. Thus, the said information did not have much perceivable benefit to the readers of the audit report. Accordingly, the auditor may choose to report on the non-applicability of the individual clause of CARO, 2003, or, alternatively, aggregate/ club the fact of non applicability of different clause(s) of CARO 2003.
- III. The Council, accordingly, decided to amend paragraph 80 of the Statement on CARO, 2003 as follows:

80. There may be situations where one or more of the clauses are not applicable. For example, the requirement regarding internal audit system does not apply in case of all the companies. In such situations, it would be appropriate for the auditor to make a suitable comment in his report bringing out the fact of non-applicability of a particular clause. To illustrate, where the maintenance of cost records has not been prescribed by the Central Government under section 209(1)(d) of the Act, the auditor may state:

“The Central Government has not prescribed maintenance of cost records under section 209(1)(d) of the Companies Act, 1956 for any of the products of the company”.

Alternatively, the auditor may aggregate/ club the fact of non applicability of different clauses of CARO, 2003 and report as under:

* Issued in February, 2014.

"Matters specified in clauses.....(relevant clause number of the clause/s not applicable) of paragraph 4 of the CARO 2003 do not apply to the Company."

(note: Amendments to paragraph 80 of the Statement on CARO, 2003 are given in track changed mode).

18. Manner of Disclosure in the Auditor's Report of the Fact of Inclusion of Unaudited Financial Statements/ Information of Component/s in the Financial Statements Audited by the Principal Auditor(s)*

1. An independent auditor of the financial statements of an entity may, at times, need to rely upon work of the other auditors. For example, in an audit of the stand alone financial statements of an entity the independent auditor thereof (the Principal Auditor) may need to rely upon the financial statements of the entity's component/s such as branch/es, division/s, etc., which have been audited by other independent auditor/s. Similarly, in an audit of the consolidated financial statements of a group, the independent auditor thereof (the Principal Auditor), may need to rely upon the work of the independent auditors of the components of the group such as subsidiary/ies, joint venture/s, associate/s, etc., whose audited financial statements/ information have been included in the consolidated financial statements and have been audited by their respective independent auditors (the Component Auditors).
2. There may also be a situation where the financial statements of one or more components included in the stand alone financial statements of an entity/ consolidated financial statements of a group have not been audited either by the Principal Auditor or the Component Auditor/s.
3. Members have sought guidance on the appropriate manner of disclosure of information in the independent auditor's report of the Principal Auditor about the fact that the financial statements/ information pertaining to certain/ all components, included in the stand alone financial statements of an entity/ consolidated financial statements of a group are unaudited.
4. The Council at its 331st meeting held on 10th February, 2014 considered the above matter and decided as under:

Situation 1 Component/s is/ are unaudited and such component/s is/ are not material to the financial statements of the entity/ consolidated financial statements of the Group

Situation 2 Component/s is/ are audited by auditor/s other than the Principal Auditor and such component/s is/ are not material to the financial statements of the entity/ consolidated financial statements of the Group

Disclosures in the Principal Auditor's Report

The principal auditor may or may not disclose the fact of such component/s in the Principal Auditor's report. In case the Principal Auditor decided to make such disclosure, the same would be done under the "Other Matters" paragraph, pursuant to SA 706, *Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report*. An illustrative manner of reporting is given in Illustration 2 in the Appendix to SA 706.

* Issued in February, 2014.

Situation 3	Component/s is/ are audited by auditor/s other than the Principal Auditor and such component/s is/ are material to the financial statements of the entity/ consolidated financial statements of the Group	The principal auditor would need to disclose the fact of such component/s in the Principal Auditor's report. Such disclosure would be done under the "Other Matters" paragraph, pursuant to SA 706, <i>Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report</i> . An illustrative manner of reporting is given in Illustration 2 in the Appendix to SA 706.
Situation 4	Component/s is/ are unaudited and such component/s is/ are material to the financial statements of the entity/ consolidated financial statements of the Group	The Principal Auditor needs to consider its/ their impact on the auditor's opinion on the financial statements of the entity/ consolidated financial statements of the group, in terms of the principles laid down in SA 705, <i>Modifications to the Opinion in the Independent Auditor's Report</i> .

5. Further, in case of the auditor's reports of the statutory central auditors, the manner of disclosure about the audited/ unaudited components as given in the illustrative formats of the auditor's report in the Guidance Note on Audit of Banks would continue to apply.

19. Applicability of the Companies Act, 2013 to Auditor's Report to FY 2014-15 and Onwards*

The Ministry of Corporate Affairs, on 26th March 2014 notified a majority of the remaining sections of the Companies Act, 2013, including sections 139 to 148, relating to audits and auditors. The Act was stated to be effective from 1st April, 2014.

Accordingly, queries are being raised by a number of members as to whether any auditor's report of a company being signed on or after 01st April, 2014 would be in accordance with the requirements of section 143 of the Companies Act, 2013.

In this context, it may be noted that the Ministry of Corporate Affairs (MCA) has, on 04th April 2014, *vide* its General Circular No. 08/2014, clarified that the financial statements (and documents required to be attached thereto), auditor's report and Board's report in respect of financial years that commenced earlier than 01st April, 2014 shall be governed by the relevant provisions/Schedules/rules of the Companies Act 1956. This MCA Circular can be seen at URL http://www.mca.gov.in/Ministry/pdf/General_Circular_8_2014.pdf.

Therefore, it is clear from MCA's aforesaid General Circular that the auditor's report of a company pertaining to any financial year commencing on or before 31st March 2014, would be in accordance with the requirements of the Companies Act, 1956 even if that financial year ends after 01st April 2014. For example, where the financial year of a company is 01st January 2014 to 31st December 2014, the statutory auditor's report signed therefor would be in accordance with the requirements of the Companies Act, 1956.

* Issued in April, 2014.

As a corollary to MCA's General Circular, it appears that the provisions of the 2013 Act would apply only to the financial years commencing on or after 01st April 2014. Thus, for example, the statutory auditor's report signed in respect of the financial year of the company ended 31st March 2015 would need to be issued in accordance with the provisions of the Companies Act, 2013.

20. Manner of Reporting by the Auditors In Respect of RBI's Circular on Deferred Tax Liability on Special Reserve created under Section 36(1) (viii) of the Income Tax Act, 1961*

1. The Reserve Bank of India, on 20th December 2013, issued Circular No. DBOD. No.BP.BC.77/21.04.018/2013-14 for all commercial banks (excluding Regional Rural Banks) in respect of Deferred Tax Liability on Special Reserve created under Section 36(1) (viii) of the Income Tax Act, 1961.
2. RBI, in its aforesaid Circular has noted that some banks were not creating deferred tax liability (DTL) on Special Reserve as per Accounting Standard 22, 'Accounting for taxes on Income' (AS 22) on the grounds that they do not intend to withdraw from such Reserve in the future. In many cases banks have formalised such intent by having resolutions passed by their Boards or Committees to this effect.
3. RBI, *vide* its aforesaid Circular, has required that as a matter of prudence, banks should create DTL on such Special Reserve. Further, for this purpose, banks may take the following course of action:
 - a) If the expenditure due to the creation of DTL on Special Reserve as at March 31, 2013 has not been fully charged to the Profit and Loss account, banks may adjust the same directly from Reserves. The amount so adjusted may be appropriately disclosed in the Notes to Accounts of the financial statements for the financial year 2013-14.
 - b) DTL for amounts transferred to Special Reserve from the year ending March 31, 2014 onwards should be charged to the Profit and Loss Account of that year.
4. RBI Circular also states that in view of the requirement to create DTL on Special Reserve, banks may reckon the entire Special Reserve for the purpose of computing Tier-I Capital.
5. The Council of ICAI has considered the impact of the accounting dispensation prescribed by RBI with respect to treatment of expenditure on creation of DTL as at 31st March 2013 (as referred to in paragraph 3.a above) on the report of the banks' statutory auditors.
6. On a consideration of the matter, the Council is of the view that any specific accounting treatment prescribed by a regulator, even if at variance with the Accounting Standard/s, was an integral part of the financial reporting framework applicable to the entity falling under the jurisdiction of such regulator and the entity would be required to follow such prescribed accounting treatment. Accordingly, the statutory auditors need not modify their audit opinion in respect of such prescribed accounting treatment. However, the fact may be brought out by the statutory auditors in their audit report by way of an "Emphasis of Matter" paragraph in accordance with the Standard on Audit (SA) 706, "Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report", issued by ICAI, provided the matter of departure from the requirements of the Accounting Standard/s pursuant to the aforesaid regulatory requirement is appropriately disclosed, with quantification, by the entity by way of the notes to the accounts in the financial statements.

* Issued in April, 2014.

7. An illustrative “Emphasis of Matter” paragraph is as follows:

“Emphasis of Matter

We draw attention to Note X to the financial statements, which describes the accounting treatment of the expenditure on creation of Deferred Tax Liability on Special Reserve under section 36(1)(viii) of the Income Tax Act, 1961 as at 31st March 2013, pursuant to RBI’s Circular No. DBOD. No.BP.BC.77/21.04.018/2013-14 dated 20th December 2013. Our opinion is not qualified in respect of this matter.”

8. The aforesaid disclosure in the Notes to the Accounts would normally include the following information in respect of creation of Deferred Tax Liability (DTL) on Special Reserve for the following:
- Amount of expenditure due to the creation of DTL on Special Reserve as at March 31, 2013 not fully charged to the Profit and Loss Account as adjusted directly against Reserves
 - Impact on Profit & Loss Account had the amount of hitherto unprovided DTL been charged to the Profit and Loss Account instead of Reserves directly as required by the RBI Circular.

9. An illustrative Note to Accounts in this regard is as follows:

“Pursuant to Reserve Bank of India’s (RBI’s) Circular No. DBOD. No.BP.BC.77/21.04.018/2013-14 dated 20th December 2013, the Bank has created Deferred Tax Liability on the Special Reserve under section 36(1)(viii) of the Income-tax Act, 1961. As required by the said RBI Circular, the expenditure, amounting to Rs. XXXX due to the creation of DTL on Special Reserve as at March 31, 2013, not previously charged to the Profit and Loss Account, has now been adjusted directly from the Reserves. Had this amount been charged to the Profit & Loss Account in accordance with the generally accepted accounting principles in India, the amount of Profit for year had been lower/ amount of Loss for the year higher²⁵ by such amount.”

21. Applicability of The Provisions of Section 143(3)(i) of The Companies Act 2013 and The Related Rules*

Section 143(3)(i) of the Companies Act 2013 requires the auditors of the companies to report as whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.

The Council of the Institute of Chartered Accountants of India, at its adjourned 333rd meeting held on 18th June 2014, considered the issue of applicability of the provisions of sections 143(3)(i) of the Companies Act 2013 and the related Rules to the audits of the periods beginning on or before 31st March 2014.

The Council noted that the sections 143(3)(i) had come into force in respect of financial years beginning on or after 1st April 2014. The Council was of the view that the provisions of sections 143(3)(i) of the Companies Act 2013 applied to the auditors appointed under the Companies Act 2013 to audit the financial statements for the year beginning on or after 1st April 2014. As a corollary, the requirements of these sections and related Rules would not apply to audits of financial statements of the periods beginning on or before 31st March 2014, even if the audits therefor were actually carried out

²⁵ As the case may be.

* Issued in June, 2014.

and auditor's report thereon issued on or after 1st April 2014. These would continue to be done as per the requirements of the Companies Act 1956.

The Council also decided that as a corollary, the provisions of section 143(3)(i) of the Companies Act 2013 would apply to the audits of the financial year beginning on or after 1st April 2014.

22. *Applicability of The Provisions of Section 143(12) of The Companies Act 2013 and The Related Rules to Periods Beginning on or Before 31st March 2014**

Section 143(12) of the Companies Act 2013 requires the auditors of the companies to report to the Central Government on the frauds committed or being committed against the company.

The Council of the Institute of Chartered Accountants of India, at its adjourned 333rd meeting held on 18th June 2014, considered the issue of applicability of the provisions of sections 143(3)(12) of the Companies Act 2013 and the related Rules to the audits of the periods beginning on or before 31st March 2014.

The Council noted that the sections 143(12) had come into force in respect of financial years beginning on or after 1st April 2014. The Council was of the view that the provisions of sections 143(12) of the Companies Act 2013 applied to the auditors appointed under the Companies Act 2013 to audit the financial statements for the year beginning on or after 1st April 2014. As a corollary, the requirements of these sections and related Rules would not apply to audits of financial statements of the periods beginning on or before 31st March 2014, even if the audits therefor were actually carried out and auditor's report thereon issued on or after 1st April 2014.

23. *Applicability of Section 143(12) to Financial Years Beginning on or After 1st April 2014**

The Council of the Institute of Chartered Accountants of India, at its adjourned 333rd meeting held on 18th June 2014, considered the issue of applicability of the provisions of section 143(12) of the Companies Act 2013 to the financial periods beginning on or after 1st April 2014. In other words, whether the statutory auditor would be required to report pursuant to section 143(12) while carrying out audits of financial statements for the interim periods, such as quarterly or half yearly audits.

The Council was of the view that such quarterly/ half yearly audits are not carried out pursuant to the requirements of the Companies Act 2013 (rather to meet the specific requirements of the auditee company, for example, to comply with the listing agreement requirements) as the latter only envisages audit of the annual financial statements.

The Council, accordingly, felt that prima facie, as a corollary, section 143(12) would become applicable only for financial year (and not for a period) 2014-2015 and onwards. The Council is, however, in the process of communicating with the Ministry of Corporate Affairs in this regard.

24. *Illustrative Formats of the Engagement Letter for Audit of Financial Statements under the Companies Act, 2013 and the Rules Thereunder@*

The Auditing and Assurance Standards Board is issuing the following illustrative formats for engagement letter for audit of Financial Statements under the Companies Act, 2013 and the Rules thereunder. These illustrative formats were approved by the Council of the Institute of Chartered Accountants of India (ICAI) at its meeting held in November 2014. These illustrative formats would be added to the Appendix 1 of Standard on Auditing (SA) 210, 'Agreeing the Terms of Audit Engagements', issued by ICAI.

* Issued in June, 2014.

@ Issued in December, 2014.

Illus. 1	Engagement Letter for Audit of Financial Statements under the Companies Act 2013 and the Rules Thereunder (When Reporting u/s 143(3)(i) is Applicable) ²⁶
Illus. 2	Engagement Letter for Audit of Financial Statements under the Companies Act 2013 and the Rules Thereunder (When Reporting u/s 143(3)(i) is not Applicable) ²⁶

25. Illustrative Formats of the Independent Auditor's Report on Standalone Financial Statements under the Companies Act, 2013 and the Rules Thereunder*

The Auditing and Assurance Standards Board is issuing the following illustrative formats of the Independent Auditor's Report on the Standalone Financial Statements under the Companies Act, 2013 and the Rules thereunder. These illustrative formats were approved by the Council of the Institute of Chartered Accountants of India (ICAI) at its meeting held in November 2014. These illustrative formats would be added to the respective Appendices of Standard on Auditing (SA) 700, Forming An Opinion and Reporting On Financial Statements and Standard on Auditing (SA) 705, Modifications to the Opinion in the Independent Auditor's Report, issued by ICAI.

Illus. 1	Unmodified Opinion on Standalone Financial Statements, Emphasis of Matter Paragraphs, Reporting on clause 143(3)(i) regarding internal financial controls is required ²⁷	<i>Will be added to Appendix to SA 700</i>
Illus. 2	Unmodified Opinion on Standalone Financial Statements, Emphasis of Matter Paragraphs, Reporting on clause 143(3)(i) regarding internal financial controls is not required ²⁷	
Illus. 3	Qualified Opinion on Standalone Financial Statements, Qualification is quantifiable, Reporting on clause 143(3)(i) regarding internal financial controls is not required ²⁸	<i>Will be added to Appendix to SA 705</i>
Illus. 4	Qualified Opinion on Standalone Financial Statements, Qualification is not quantifiable, Reporting on clause 143(3)(i) regarding internal financial controls is not required ²⁸	
Illus. 5	Adverse Opinion on Standalone Financial Statements, Reporting on clause 143(3)(i) regarding internal financial controls is not required ²⁸	
Illus. 6	Disclaimer of Opinion on Standalone Financial Statements, Reporting on clause 143(3)(i) regarding internal financial controls is not required ²⁸	

The Board is in consultation with the Ministry of Corporate Affairs with respect to issues pertaining to the independent auditor's report on consolidated financial statements under the Companies Act 2013. Accordingly, the illustrative format of the independent auditor's report on consolidated financial statements under the Companies Act, 2013 will be issued in due course.

²⁶ These formats have been included as a part of Appendix 1 to SA 210, "Agreeing the Terms of Audit Engagements", published elsewhere in Volume I.A of the Handbook.

* Issued in December, 2014.

²⁷ These formats have been included as a part of Appendix to SA 700, "Forming an Opinion and Reporting on Financial Statements", published elsewhere in Volume I.A of the Handbook.

²⁸ These formats have been included as a part of Appendix to SA 705, "Modifications to the Opinion in the Independent Auditor's Report", published elsewhere in Volume I.A of the Handbook.

26. Announcement on CARO, 2003 and Additional Reporting Under the Companies Act, 2013*

We are receiving queries from the members regarding applicability of CARO, 2003 along with Auditors' Report on financial statements of companies for the financial year 2014-15. The Ministry of Corporate Affairs (MCA) is working on it and has constituted a Committee for this purpose to analyse the contents of the Order to be made under section 143(11) of the Companies Act, 2013 for the Financial Year 2014-15. ICAI is also a member of the said committee. We are given to understand by MCA that an Order being a smaller version of CARO 2003, applicable for the financial year 2014-15, may be notified soon under section 143(11) of the Companies Act, 2013. However, at this juncture, to bring more clarity, this Announcement is released in consultation with the Ministry.

The Companies Act, 1956 has ceased to have effect from 01st April, 2014. As a corollary, the Companies (Auditor's Report) Order, 2003 issued under section 227(4A) of the said Act also ceases to have effect from the said date.

Section 143(11) of the Companies Act, 2013 which came into force from 01st April, 2014 provides that "the Central Government may, in consultation with the National Financial Reporting Authority, by general or special order, direct, in respect of such class or description of companies, as may be specified in the order, that the auditor's report shall also include a statement on such matters as may be specified therein."

Accordingly, it may be noted that as when an Order is notified by the Central Government under section 143(11) of the Companies Act, 2013, the members would be required to report thereon as a part of their statutory audit reports.

Until the aforesaid Order is issued, no additional reporting under section 143(11) of the Companies Act, 2013 is required by the Auditors for the financial year 2014-15.

Members are advised to keep a watch on the MCA site (www.mca.gov.in) as well as the ICAI site (www.icaai.org) for further announcements in this regard.

27. *Guidance on Reporting Under the Companies (Auditor's Report) Order, 2015 (CARO, 2015) and Consequential Amendment to the Format of the Auditor's Report of a Company*²⁹

I. Reporting Under CARO, 2015

1. As the members are aware, the Ministry of Corporate Affairs, on 10th April, 2015, notified the Companies (Auditor's Report) Order, 2015 (CARO, 2015). The text of the Order is available on the URL http://www.mca.gov.in/Ministry/pdf/Companies_Auditors_Report_Order_2015.pdf.

2. Members would have noted that, inter alia, the exemption criteria applicable to private companies as laid down in the paragraph 1(v) of the CARO, 2015 is same as that in the Companies (Auditor's Report) Order, 2003 (CARO, 2003). Also, it is noted that the twelve reporting clauses given in paragraph 3 of CARO, 2015 are similar in their requirements to the corresponding clauses in paragraph 4 of the CARO, 2003. Further, the requirement to state reasons for unfavourable or qualified answers as given in paragraph 4 of the CARO, 2015 is also similar to that contained in paragraph 4 of the

* Issued in April, 2015.

* Issued in April, 2015.

²⁹ This Announcement is being issued in terms of the decision taken at the 342nd meeting of the Council of the Institute of Chartered Accountants of India.

CARO, 2003. Accordingly, members are advised to continue to draw in principle guidance from the relevant paragraphs of the Statement on the Companies (Auditor's Report) Order, 2003, issued by the Institute of Chartered Accountants of India.

3. For the benefit of the members, following is a reference table of reporting clauses of CARO, 2015 and the corresponding paragraphs of the Statements on CARO, 2003, wherefrom relevant guidance can be drawn (subject to necessary changes in the context of the provisions of the Companies Act, 2013 and the Rules issued thereunder):

Clause of CARO, 2015	Relevant Paragraph/s of the Statement on CARO, 2003
(i) (a) whether the company is maintaining proper records showing full particulars, including quantitative details and situation of fixed assets;	44(a) to (n)
(b) whether these fixed assets have been physically verified by the management at reasonable intervals; whether any material discrepancies were noticed on such verification and if so, whether the same have been properly dealt with in the books of account;	45(a) to (g)
(ii)(a) whether physical verification of inventory has been conducted at reasonable intervals by the management;	47(a) to (d)
(b) are the procedures of physical verification of inventory followed by the management reasonable and adequate in relation to the size of the company and the nature of its business. If not, the inadequacies in such procedures should be reported;	48(a) to (k)
(c) whether the company is maintaining proper records of inventory and whether any material discrepancies were noticed on physical verification and if so, whether the same have been properly dealt with in the books of account;	49(a) to (h)
(iii) whether the company has granted any loans, secured or unsecured to companies, firms or other parties covered in the register maintained under section 189 of the Companies Act. If so,	50(a) to (f)
(a) whether receipt of the principal amount and interest are also regular; and	52(a) to (e)
b) if overdue amount is more than rupees one lakh, whether reasonable steps have been taken by the company for recovery of the principal and interest	53(a) to (c)
(iv) is there an adequate internal control system commensurate with the size of the company and the nature of its business, for the purchase of inventory and fixed assets and for the sale of goods and services. Whether there is a continuing failure to correct major weaknesses in internal control system.	57(a) to (m)
(v) in case the company has accepted deposits, whether the directives issued by the Reserve Bank of India and the provisions of sections 73 to	60(a) to (l)

<p>76 or any other relevant provisions of the Companies Act and the rules framed there under, where applicable, have been complied with? If not, the nature of contraventions should be stated; If an order has been passed by Company Law Board or National Company Law Tribunal or Reserve Bank of India or any court or any other tribunal, whether the same has been complied with or not?</p>	
<p>(vi) where maintenance of cost records has been specified by the Central Government under sub-section (1) of section 148 of the Companies Act, whether such accounts and records have been made and maintained;</p>	<p>62(a) to (g)</p>
<p>(vii) (a) is the company regular in depositing undisputed statutory dues including provident fund, employees' state insurance, income-tax, sales-tax, wealth tax, service tax, duty of customs, duty of excise, value added tax, cess and any other statutory dues with the appropriate authorities and if not, the extent of the arrears of outstanding statutory dues as at the last day of the financial year concerned for a period of more than six months from the date they became payable, shall be indicated by the auditor.</p>	<p>63(a) to (r)</p>
<p>(b) in case dues of income tax or sales tax or wealth tax or service tax or duty of customs or duty of excise or value added tax or cess have not been deposited on account of any dispute, then the amounts involved and the forum where dispute is pending shall be mentioned. (A mere representation to the concerned Department shall not constitute a dispute).</p>	<p>64(a) to (h)</p>
<p>(c) whether the amount required to be transferred to investor education and protection fund in accordance with the relevant provisions of the Companies Act, 1956 (1 of 1956) and rules made thereunder has been transferred to such fund within time.</p>	<p>The members may note that the provisions relating to the Investor Education and Protection Fund (IEPF) are contained in section 205C of the Companies Act, 1956 and the IEPF (Awareness and Protection of Investors) Rules, 2001. For the purpose of reporting on this clause, the members would need to examine the date of transfer <i>vis a vis</i> the time prescribed in the aforesaid provisions and Rules and report accordingly.</p>
<p>(viii) whether in case of a company which has been registered for a period not less than five years, its accumulated losses at the end of the</p>	<p>65(a) to (h)</p>

financial year are not less than fifty per cent of its net worth and whether it has incurred cash losses in such financial year and in the immediately preceding financial year;	
(ix) whether the company has defaulted in repayment of dues to a financial institution or bank or debenture holders? If yes, the period and amount of default to be reported;	66(a) to (h)
(x) whether the company has given any guarantee for loans taken by others from bank or financial institutions, the terms and conditions whereof are prejudicial to the interest of the company;	71(a) to (h)
(xi) whether term loans were applied for the purpose for which the loans were obtained;	72(a) to (j)
(xii) whether any fraud on or by the company has been noticed or reported during the year; If yes, the nature and the amount involved is to be indicated.	77(a) to (k)

4. Members may also continue to draw guidance, to the extent relevant, in respect of applicability of the CARO, 2015, form of report and Board's report, from the guidance given in the Statement on Companies (Auditor's Report) Order, 2003 (subject to necessary changes in the context of the provisions of the Companies Act, 2013 and the Rules thereunder).

II. Consequential Amendment to the Format of the Auditor's Report of A Company

5. The Auditing and Assurance Standards Board had, in December 2014, issued illustrative formats of the auditor's report on financial statements of a company under the Companies Act, 2013. While reporting on the requirements of CARO, 2015, a reference thereto also needs be added in the main audit report under the "Report on Legal and Other Regulatory Matters" paragraph as follows:

"Report on Other Legal and Regulatory Requirements

As required by the Companies (Auditor's Report) Order, 2015 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the Annexure a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

As required by Section 143 (3) of the Act, we report that:

.....
"

The aforesaid illustrative formats of the auditor's report, accordingly, stand amended to that extent.

28. *Clarification on Auditor's Report in respect of Financial Statements of a Company for Accounting Years Beginning Before 1st April, 2014³⁰

1. The Ministry of Corporate Affairs vide its General Circular No 07/2014, *Dissemination of Information With Regards to the Provisions of the Companies Act, 2013 as Notified Till Date vis a vis Corresponding Provisions of the Companies Act, 1956*, dated 01st April 2014 had provided information in respect of such sections of the Companies Act 1956 which will cease/continue to have effect after 01st April 2014 (i.e. the date when a number of sections of the Companies Act 2013 came into force).

2. Also, the Ministry of Corporate Affairs had on 04th April, 2014 issued a General Circular No. 8/2014 regarding "Commencement of provisions of the Companies Act 2013 with regard to maintenance of books of accounts and preparations/adoption/filing of financial statements, auditor's report, Board's report and attachments to such statements and reports - Applicability with regard to relevant financial Year".

3. The aforesaid General Circular of 04th April 2014 *inter alia*, mentioned that "..... it is hereby notified that the financial statements (and documents required to be attached thereto), auditor's report and Board's report in respect of financial years that commenced earlier than 1st April, 2014 shall be governed by the relevant provisions/ Schedules/ rules of the Companies Act, 1956 and that in respect of financial years commencing on or after 1st April, 2014, the provisions of the new Act shall apply."

4. Also, such companies whose financial years ended at a date other than 31st March, are in the process of aligning their financial year to meet the definition of "financial year" as per the Companies Act, 2013.

5. The matters described in paragraph 1 above have given rise to a situation wherein, with effect from 01st April 2014, the various documents, minutes and registers, etc., are being maintained by companies in accordance with the provisions of the Companies Act, 2013. Consequently, in case of companies whose financial years commenced before 31st March 2014 but would end on or before 31st March 2015, w.e.f. 01st April 2014, various documents, minutes and registers, etc., may not be maintained in accordance with the provisions of the Companies Act, 1956 for such part of the financial year that falls after 01st April 2014 (i.e., the date when the Companies Act, 2013 comes into force).

6. The aforesaid situation is giving rise to practical difficulties for the statutory auditors while reporting in terms of certain provisions of section 227 of the Companies Act, 1956 in respect of the companies described in paragraph 5 above since necessary documents, minutes and registers, etc., under the Companies Act, 1956 may not be available for such part of the financial year that falls after 01st April 2014. Specifically, these difficulties relate to reporting under section 227(3)(f), relating to disqualification of the Directors under section 274(1)(g) of the Companies Act 1956. Similarly, problems would be faced while reporting on certain clauses of the Companies (Auditor's Report) Order, 2003 (CARO 2003). For example, clause (iii) relating to loans to/from parties covered in the register maintained under section 301 of the Companies Act 1956; or clause (v)(a) and (b) relating to contracts or arrangements referred to in section 301 of the Companies Act 1956; or clause (vi) relating to provisions of section 58A and 58AA of the Companies Act, 1956 relating to acceptance

* Issued in April, 2015.

³⁰ This "Clarification" was approved by the Council of the Institute of Chartered Accountants of India at its 342nd meeting held on 15-16 April, 2015.

of deposits from the public; or clause (viii) relating to maintenance of cost records; or clause (xiv) relating to dealing or trade in shares, securities, debentures, other investments, etc *vis a vis inter alia*, exemption under section 49 of the Companies Act, 1956 or clause (xviii) relating to preferential allotment of shares to parties and companies covered in the register maintained under section 301 of the Companies Act, 1956. It may also be noted that in terms of MCA's aforesaid General Circular No 07/2014, of 01st April, 2014, sections 49, 58A, 58AA, 209, 274, 301 of the Companies Act, 1956 cease to have effect from 01st April 2014.

7. It is, therefore, suggested that in case of aforesaid situation, the statutory auditors should report on the relevant clauses only for that part of the financial year upto which the concerned provisions of the Companies Act 1956 were in force (i.e. upto 31st March 2014). Also, the statutory auditors should clearly bring out this fact in the relevant portions of their audit reports. An illustrative manner of such disclosure is as follows:

“Other Matters

The Ministry of Corporate Affairs had on 01st April, 2014, *vide* its General Circular No. 07/2014, *Dissemination of Information with Regards to the Provisions of the Companies Act, 2013 as Notified Till date vis a vis Corresponding Provisions of the Companies Act, 1956*, identified such sections of the Companies Act, 1956 that would cease/ continue to have effect from 01st April 2014.

Accordingly, in terms of the aforesaid Circular, our reporting in respect of section 227(3)(f) of the Companies Act, 1956, and clauses (iii), (v)(a) and (b), (vi), (viii), (xiv), (xviii) of the Companies (Auditor's Report) Order, 2003 (dealing with sections 49, 58A, 58AA, 209(1)(d) and 301 of the Companies Act, 1956) is only for the period beginning from ie (date) till 31st March 2014 since as per the aforementioned MCA Circular these sections have ceased to have effect from 01st April, 2014.”

8. This Announcement is effective from the date of its hosting on ICAI's website.

29. Auditor's Report on Consolidated Financial Statements Under The Companies Act, 2013*

The Auditing and Assurance Standards Board, under the authority of the Council, has already issued the illustrative formats of the auditor's report on standalone financial statements of a company under the Companies Act 2013 in December 2014. While reporting on the consolidated financial statements (CFS) of a company under the Companies Act 2013, the auditors may draw guidance from the aforementioned formats and suitably reword the same, as required, to meet the circumstances of audit of CFS. The auditors of CFS, while reporting in respect of the provisions of, *inter alia*, section 143(3) and section 143(11) of the Companies Act, 2013 in their report on CFS, are also advised to:

- consider the observations and comments as given in this regard in the auditors' reports of the component auditors.
- include in their report or draw suitable reference to, negative/adverse comments, if any, in respect of section 143(3) and section 143(11) of the Act relating to a component, as appearing in the component auditors' report.

* Issued in May, 2015.

36 Auditing Pronouncements

The auditors of CFS are also advised to apply concept of materiality and professional judgment as provided in the Standards on Audit while reporting on the Consolidated Financial Statements.

The following illustrative formats of an auditors' report on CFS, covering some of the clauses of section 143(3) of the Companies Act, 2013 (and where the auditor does not have the responsibility for reporting on internal financial controls over financial reporting under section 143(3)(i) of the Companies Act, 2013), are being issued herewith just to provide a broad guidance on how such a report may be prepared. These formats may be applied for the FY 2014-15 and until further announcement. It is reiterated that the auditors of CFS may suitably reword/redraft these formats to suit the circumstances of their audit engagement.

Type of Format	
Unmodified opinion on the consolidated financial statements ³¹	This format will be added in the Appendix to SA 700
Modified opinion on the consolidated financial statements ³²	This format will be added in the Appendix to SA 705

D. List of Mandatory Statements and Standards on Auditing

I. List of Statements on Auditing as on 01.10.2015

- Statement on the Companies (Auditor's Report) Order, 2003 (Revised 2005).³³
- Statement on Reporting under section 227 (1A) of the Companies Act, 1956³⁴.

II. List of Engagement and Quality Control Standards as on 01.10.2015

Quality Control

PART – I : STANDARDS

Preface to Standards on Quality Control, Auditing, Review, Other Assurance and Related Services¹ (Effective from April 1, 2008)

Introduction

1. This Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services has been issued to facilitate understanding of the scope and authority of the pronouncements of the AASB issued under the authority of the Council of the Institute of Chartered Accountants of India (the ICAI).

2. The ICAI is committed to the goal of enabling the accountancy profession in India to provide services of high quality in the public interest and which are accepted worldwide. To further this goal, the ICAI develops and promulgates technical Standards and other professional literature. The ICAI being one of the founder members of the International Federation of Accountants (IFAC), the Standards developed and promulgated by the AASB under the authority of the Council of the ICAI are in conformity with the corresponding International Standards issued by the International Auditing and Assurance Standards Board (IAASB), established by the IFAC. The "Due Process" of the AASB for formulation of Standards, Statements, Guidance Notes and its other pronouncements is given in the **Appendix** to this Preface.

Standards Issued by AASB under the Authority of the Council of ICAI

3. The following Standards issued by the Auditing and Assurance Standards Board under the authority of the Council are collectively known as the Engagement Standards:

- (a) Standards on Auditing (SAs), to be applied in the audit of historical financial information.
- (b) Standards on Review Engagements (SREs), to be applied in the review of historical financial information.
- (c) Standards on Assurance Engagements (SAEs), to be applied in assurance engagements, other than audits and reviews of historical financial information.
- (d) Standards on Related Services (SRSs), to be applied to engagements involving application of agreed-upon procedures to information, compilation engagements, and other related services engagements, as may be specified by the ICAI.

4. Standards on Quality Control (SQC), issued by the AASB under the authority of the Council, are to be applied for all services covered by the Engagement Standards as described in paragraph 3 above.

A diagram containing the structure of the Standards issued by the Auditing and Assurance Standards Board under the authority of the Council is given as **Annexure** to this Preface.

Standards on Auditing

5. The Standards on Auditing (SAs) referred to in Paragraph 3(a) above are formulated in the context of an audit of financial statements by an independent auditor. They are to be adapted as necessary in the circumstances when applied to audits of other historical financial information. The authority of SAs is set out in SA 200².

¹ Issued in July, 2007.

² SA 200, "Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with Standards on Auditing".

I.2 Auditing Pronouncements

Standards on Quality Control

6. SQCs are written to apply to firms³ in respect of all their services falling under the Engagement Standards issued by the AASB of ICAI. The authority of SQCs is set out in the introduction to the SQCs.

Other Standards

7. The other Engagement Standards identified in paragraph 3 (b) to (d) as well as Standards on Quality Control referred to in paragraph 4 contain basic principles and essential procedures (identified in **bold type** lettering and by the word “should”) together with related guidance in the form of explanatory and other material, including appendices. The basic principles and essential procedures are to be understood and applied in the context of the explanatory and other material that provides guidance for their application. It is therefore necessary to consider the entire text of a Standard to understand and apply the basic principles and essential procedures. Appendices, which form part of the application material, are an integral part of a Standard. The purpose and intended use of an appendix are explained in the body of the related Standard or within the title and introduction of the appendix itself. An individual Standard should be read in the context of the objective stated in the Standard as well as this Preface. Any limitation of the applicability of a specific Standard is made clear in the Standard itself.

Statements on Auditing

8. Statements on Auditing are issued with a view to securing compliance by professional accountants on matters which, in the opinion of the Council, are critical for the proper discharge of their functions. Statements are, therefore, mandatory.

General Clarifications

9. General Clarifications are issued by the Board under the authority of the Council of the Institute with a view to clarify any issues arising from the Standards. General Clarifications are mandatory in nature.

Professional Judgment

10. The nature of the Standards/Statements/General Clarifications requires the professional accountant⁴ to exercise professional judgment in applying them.

Authority Attached to Other Standards, Statements on Auditing and General Clarifications

11. It is the duty of the professional accountants to ensure that the Standards/Statements/General Clarifications are followed in the engagements undertaken by them⁵. The need for the professional accountants to depart from a relevant requirement is expected to arise only where the requirement is for a specific procedure to be performed and, in the specific circumstances of the engagement, that procedure would be ineffective. If because of that reason, a professional accountant has not been able to perform an engagement procedure in accordance with any Standard/Statement/General Clarification, he is required to document how alternative procedures performed achieve the purpose of the procedure, and, unless

³ The term “firm” refers to a sole practitioner/proprietor, partnership, or any such entity of professional accountants, as may be permitted by law.

⁴ The term “professional accountant” refers to a member of the Institute of Chartered Accountants of India.

⁵ Members’ attention is invited to Clause 5 of Part I of the Second Schedule to the Chartered Accountants Act, 1949, according to which a chartered accountant in practice shall be deemed to be guilty of professional misconduct, if he fails to disclose a material fact known to him which is not disclosed in a financial statement, but disclosure of which is necessary in making such financial statement where he is concerned with that financial statement in a professional capacity. Further Clause 7 of Part I of the Second Schedule to the Chartered Accountants Act, 1949 states that a chartered accountant in practice shall be deemed to be guilty of professional misconduct, if he does not exercise due diligence, or is grossly negligent in the conduct of his professional duties.

otherwise clear, the reasons for the departure. Further, his report should draw attention to such departures. However, a mere disclosure in his report does not absolve a professional accountant from complying with the applicable Standards/Statements/General Clarifications⁶.

12. There may be a situation where a matter is covered both by a Standard as also by a Statement on Auditing. In such a situation, the Statement shall prevail till the time the Standard becomes mandatory. Once a Standard becomes mandatory, the concerned Statement or the relevant portion(s) thereof will automatically be withdrawn.

Guidance Notes

13. Guidance Notes are issued to assist professional accountants in implementing the Engagement Standards and the Standards on Quality Control issued by the AASB under the authority of the Council. Guidance Notes are also issued to provide guidance on other generic or industry specific audit issues, not necessarily arising out of a Standard. Professional accountants should be aware of and consider Guidance Notes applicable to the engagement. A professional accountant who does not consider and apply the guidance included in a relevant Guidance Note should be prepared to justify the appropriateness and completeness of the alternate procedures adopted by him to deal with the objectives and basic principles set out in the Guidance Note.

Technical Guides, Practice Manuals, Studies and Other Papers Published by the Auditing and Assurance Standards Board

14. The Board may also publish Technical Guides, Practice Manuals, Studies and other papers. Technical Guides are ordinarily aimed at imparting broad knowledge about a particular aspect or of an industry to the professional accountants. Practice Manuals are aimed at providing additional guidance to professional accountants in performing audit and other related assignments. Studies and other papers are aimed at promoting discussion or debate or creating awareness on issues relating to quality control, auditing, assurance and related service, affecting the profession. Such publications of the Board do not establish any basic principles or essential procedures to be followed in audit, review, other assurance or related services engagements, and accordingly, have no authority of the Council attached to them.

Material Modifications to the Preface to International Standards on Quality Control, Auditing, Review, Other Assurance and Related Services

Addition

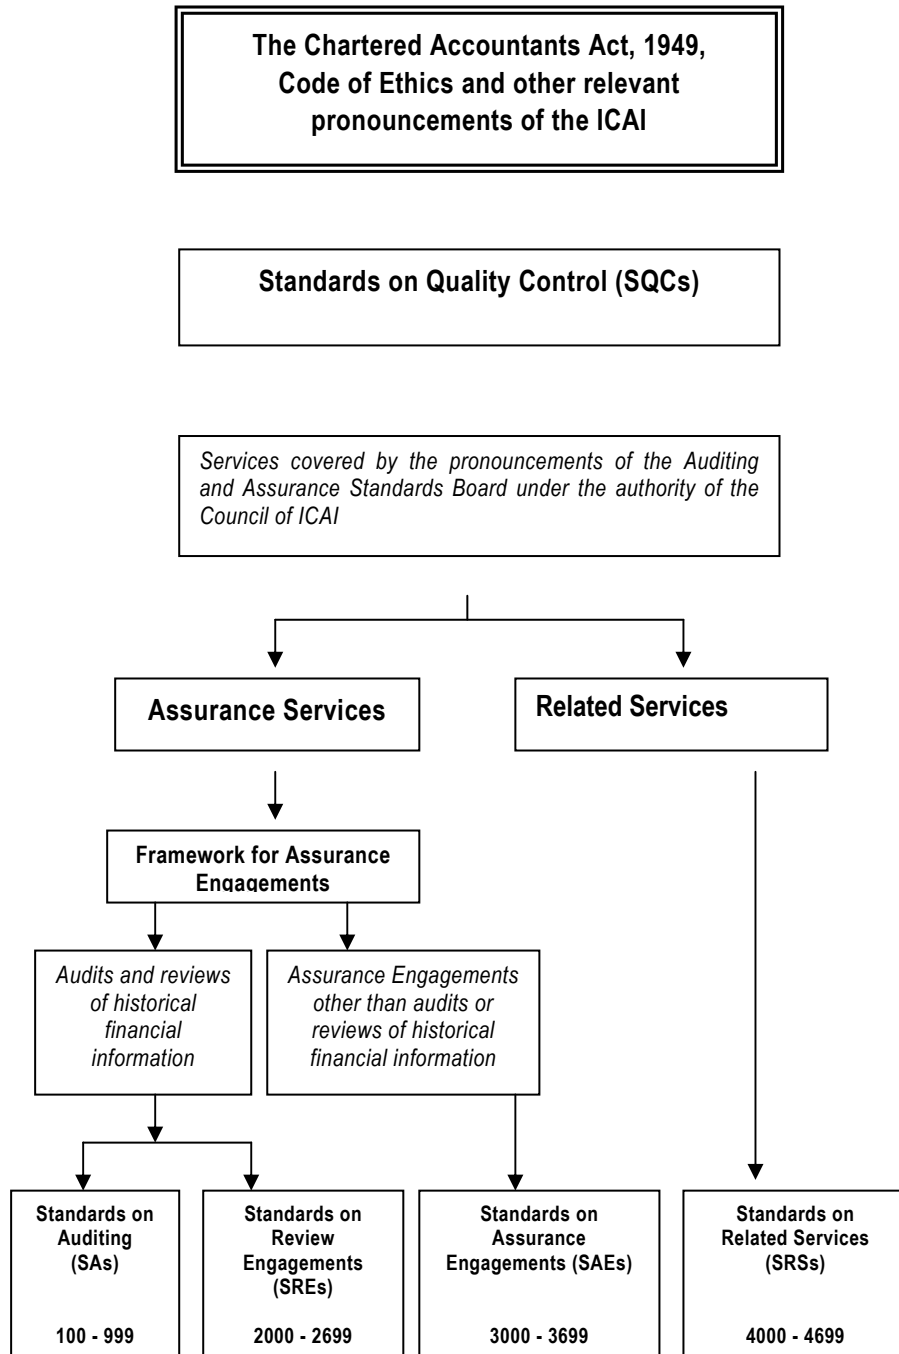

This Preface deals, apart from the Standards, with the Statements on Auditing and the General Clarifications as the mandatory documents for use by the professional accountants in performing engagements by them, whereas, the Preface issued by the IAASB does not deal with such aspects. Further, the nomenclature of International Auditing Practice Statements (IAPSs) referred in the Preface issued by the IAASB has been changed to Guidance Notes in this Preface.

Deletion

The Preface issued by the IAASB provides to include, in appropriate cases, additional considerations specific to public sector entities within the body of the Standard. However, since the Standards, Statements, General Clarifications and Guidance Notes issued by the ICAI are equally applicable in case of all engagements, irrespective of the form, nature and size of the entity, this Preface does not deal separately with the public sector perspective.

⁶ Attention of the members is also drawn to Clause 9 of Part I of the Second Schedule to the Chartered Accountants Act, 1949, whereby, a member is deemed to be guilty of professional misconduct if he fails to invite attention to any material departure from the generally accepted procedures of audit applicable to the circumstances.

Structure of Standards issued by the Auditing and Assurance Standards Board under the Authority of the Council of ICAI

Appendix

Auditing and Assurance Standards Board and its Due Process

Brief History

1. The Institute of Chartered Accountants of India (ICAI) constituted the Auditing Practices Committee (APC) on 17th September 1982, to review the existing auditing practices in India and to develop Statements on Standard Auditing Practices so that these may be issued under the authority of the Council of the Institute. Subsequently, at its 226th meeting held in July 2002, the Council of the Institute approved certain recommendations of the APC to strengthen its role in the growth and development of the accountancy profession in India. The Council, at the said meeting, also approved the renaming of the Auditing Practices Committee as the Auditing and Assurance Standards Board (AASB) as well as renaming of the Statements on Standard Auditing Practices as Auditing and Assurance Standards (AASs).

2. The ICAI is one of the founder members of the International Federation of Accountants (IFAC). It is one of the membership obligations of the Institute to actively propagate the pronouncements of the International Auditing and Assurance Standards Board (IAASB) of the IFAC to contribute towards global harmonisation and acceptance of the Standards issued by the IAASB. Accordingly, while formulating Engagement and Quality Control Standards, the AASB takes into consideration the corresponding Standards, if any, issued by the IAASB. In addition, the AASB also takes into consideration the applicable laws, customs, usages and business environment prevailing in India within the parameters of the July 2006 Policy Paper, A Guide for National Standard Setters that Adopt IAASB's International Standards but Find it Necessary to Make Limited Modifications, issued by the IAASB.

Objectives and Functions of the Auditing and Assurance Standards Board

3. The following are the objectives and functions of the Auditing and Assurance Standards Board:
- (i) To review the existing and emerging auditing practices worldwide and identify areas in which Standards on Quality Control, Engagement Standards and Statements on Auditing need to be developed.
 - (ii) To formulate Engagement Standards, Standards on Quality Control and Statements on Auditing so that these may be issued under the authority of the Council of the Institute.
 - (iii) To review the existing Standards and Statements on Auditing to assess their relevance in the changed conditions and to undertake their revision, if necessary.
 - (iv) To develop Guidance Notes on issues arising out of any Standard, auditing issues pertaining to any specific industry or on generic issues, so that those may be issued under the authority of the Council of the Institute.
 - (v) To review the existing Guidance Notes to assess their relevance in the changed circumstances and to undertake their revision, if necessary.
 - (vi) To formulate General Clarifications, where necessary, on issues arising from Standards.
 - (vii) To formulate and issue Technical Guides, Practice Manuals, Studies and other papers under its own authority for guidance of professional accountants in the cases felt appropriate by the Board.

Composition

4. The composition of the AASB is fairly broad-based and attempts to ensure participation of all interest groups in the standard-setting process. Apart from amongst the elected members of the Council of the ICAI the following are also represented on AASB:

- (i) Eminent members of the profession, whether in industry or in practice, as co-opted members on the Board.

I.6 Auditing Pronouncements

- (ii) One special invitee from each three regulatory bodies, viz., the Securities and Exchange Board of India, the Reserve Bank of India and the Insurance Regulatory and Development Authority.
- (iii) One special invitee from the Indian Institute(s) of Management, or from any other prominent academic and/or research organisation, as considered appropriate.
- (iv) One special invitee from a prominent Industry association.
- (v) One special invitee representing public interest, e.g., not for profit organization, etc.

The special invitees mentioned at (ii) through (v) above are decided in consultation with the President of the Institute. Further, special invitees do not constitute the members of the Board, as referred to in this document.

Term of the Members

5. The term of the Chairman of the Board is three years. Where such period of three years exceeds the term of the Council of ICAI during which the Chairman has been appointed, the term of the Chairman is restricted to the abovementioned term of the Council. The Council of the ICAI may fill any vacancy in the Office of the Chairman and the Chairman so appointed holds office for the unexpired term of the Council. The term of other members of the Board and the special invitees is one year. However, in case the period of one year exceeds the term of the Council during which the members have been appointed, the term of the members is restricted to the abovementioned term of the Council.

Attendance at the Meetings

6. Each AASB meeting requires the presence, in person, of at least one third of the members of the Board. However, the AASB meetings whereat a Standard or Statement, at whatever stage (as envisaged in the following paragraphs), is proposed to be considered, requires attendance of at least two thirds of the AASB members, in person or by simultaneous telecommunication link (such as teleconferencing, videoconferencing, etc.).

7. In case any member of the AASB absents himself from three consecutive meetings of the Board, without seeking leave of absence the AASB would bring such fact to the attention of the Council.

AASB Working Procedure

Standards, Statements on Auditing and General Clarifications

Project Identification, Prioritization and Approval

8. Project proposals to develop new, or revise existing Standards, Statements or General Clarifications are identified based on international and national developments, input from members of the Council of the ICAI, AASB members, members of other committees of the ICAI and/or recommendations received from other interested parties, such as regulators or professional accountants.

9. The AASB determines the priorities of various projects on hand for commencement.

10. In the preparation of Standards, Statements and General Clarifications, AASB is assisted by Study Groups/Task Forces constituted to consider specific projects. The AASB appoints one of the professional accountants as a convener of the Study Group/Task Force. The convener, in consultation with the Chairman, AASB, nominates other members of the Study Group/Task Force, ordinarily five to seven in number. For operating convenience and economy, a study group is usually based in the area where the convener is located. In situations considered necessary, the Board may also consider having an outside expert on such Study Groups/Task Forces and such an expert need not necessarily be a professional accountant. The Study Group/Task Force is responsible for preparing the basic draft of the Standard/ Statement/ General Clarification. In addition, a separate group of experts may be formed to advice the Study Group /Task Force.

11. The AASB may also conduct projects jointly with regulators and/or others. In such cases, the joint Study Group/Task Force is ordinarily chaired by the convenor appointed with mutual consent.

Consultation and Debate

12. The Study Group/Task Force develops the preliminary draft of the Standard/ Statement/ General Clarification based on appropriate research and consultation, which may include, depending on the circumstances, consultation with the other professionals, regulators and other interested parties, as well as reviewing professional pronouncements issued by IFAC member bodies and other professional bodies. The draft submitted by the study group, along with issue papers/background papers, is sent to the Chairman, AASB for approval.

13. The draft Standard/Statement/General clarification, along with other agenda papers, as approved by the Chairman, is hosted on the website of the AASB, ordinarily, at least twenty one days in advance of the AASB meeting at which such draft Standard/ Statement is planned to be considered. A notification to that effect is also sent to the AASB members. The printed version of the agenda papers, including background papers and draft Standard/ Statement/General Clarification prepared by the Study Group/Task Force for review and debate are made available to the members of and special invitees to the AASB at the concerned meeting.

14. The AASB considers the preliminary draft of the Standard/ Statement/General Clarification prepared by the Study Group/Task Force. The AASB may refer the draft to the Study Group/Task Force to examine the issues arising out of the deliberations of the AASB and accordingly modify the draft Standard/ Statement/General Clarification.

15. In case the revision to the Standard/ Statement/General Clarification is made by the Study Group/ Task Force in terms of the requirements of paragraph 14 above, the procedure laid down in paragraphs 12 to 14 above is followed for the revised draft of the Standard/ Statement/General Clarification.

16. The draft of the proposed Standard/ Statement/General Clarification, as modified in the light of the deliberations of the Board and approved by the Chairman, AASB, is circulated to the Council members of the ICAI for their comments before being issued as an Exposure Draft. Normally, a period of ten days is given for receiving comments on the Draft Exposure Draft. AASB finalises the Exposure Draft of the proposed Standard/ Statement on the basis of the comments so received, if any. Ordinarily, an Exposure Draft of a General Clarification is not issued.

Public Exposure

17. The Exposure Draft of the proposed Standard / Statement is issued, by way of publication in the monthly Journal of the Institute and/or hosted on the website of the ICAI wherefrom it is downloadable free of charge, for comments by the professional accountants and the public. The Board, however, may decide not to issue an Exposure Draft of a Statement, in which case, the reasons for such a decision is recorded in the minutes of the relevant AASB meeting. Each Exposure Draft is, ordinarily, accompanied by an explanatory memorandum that highlights the objectives and significant proposals contained in the draft. The explanatory memorandum may also direct the respondents to those aspects of the Exposure Draft on which specific feedback is sought.

18. The Exposure Draft is sent to the members of the Council of the ICAI, the Institute's past Presidents, Regional Councils and their branches. Copies of the Exposure Draft are also sent to the following bodies:

- i. The Ministry of Company Affairs, Government of India
- ii. The Comptroller and Auditor General of India
- iii. The Reserve Bank of India

I.8 Auditing Pronouncements

- iv. The Insurance Regulatory and Development Authority
- v. The Central Board of Direct Taxes
- vi. The Central Board of Excise and Customs
- vii. The Securities and Exchange Board of India
- viii. The Central Registrar of Co-operative Societies
- ix. The Institute of Cost and Works Accountants of India
- x. The Institute of Company Secretaries of India
- xi. The Indian Banks Association
- xii. Industry organizations such as Federation of Indian Chambers of Commerce and Industry, Associated Chambers of Commerce, Confederation of Indian Industry
- xiii. Indian Institute(s) of Management
- xiv. The Telecom Regulatory Authority of India
- xv. The Standing Conference on Public Enterprises
- xvi. Recognised stock exchanges in India
- xvii. Any other body considered relevant by the AASB keeping in view the nature and requirement of AAS/Statement.

19. To allow adequate time for due consideration and comment from all interested parties, exposure period is ordinarily 45 (forty five) days or such other period, but not less than 45 days in any case, as may be decided by the AASB. Further, the exposure period would be reckoned from the date of hosting of the Exposure Draft on the website of the Institute.

Responses to Exposure Drafts and Consideration of Respondents' Comments

20. An acknowledgement is sent to every respondent to an Exposure Draft. Except where the respondent has specifically indicated otherwise, the respondents' comments are considered a matter of public records. Comments which are received upto ten days prior to the date of the AASB meeting at which such comments are proposed to be considered, are hosted on the website of the AASB and kept there till the date of the AASB meeting at which the Exposure Draft and comments thereon are considered. The members of the AASB as well as the Council of the Institute are notified when the comments are hosted on the website of the AASB. Copies of the Exposure Draft and comment letters are also made available to the AASB members at the AASB meeting at which the Exposure Draft is scheduled for discussion.

21. The comments and suggestions received within the exposure period are read and considered by the AASB. The AASB's deliberations on the significant issues raised in the comments letters received together with the AASB's decision thereon are recorded in the minutes of the relevant AASB meeting and also hosted on the website of the AASB. The AASB may decide to discuss with the respondents their comment letters or explain to them the reasons for not having accepted their proposals. The nature and outcome of such discussions are reported and recorded in the minutes of the relevant AASB meeting.

22. Such part of the AASB meetings whereat the Exposure Draft of proposed Standard/ Statement and the comments thereon are to be discussed is open for public. The members of the public, at their own expenditure, can attend the said part of the meeting(s) as observers. Such observers, however, do not have the right to participate in the discussions at the meeting. The notification as to the date of the said AASB meeting is hosted on the website of the Institute at least 30 days in advance and the members of the public desirous of attending the said meeting(s) are required to send their request for the same to the Board at least 15 days prior to the date of the concerned AASB meeting. The seats for the members of the public at such

meetings are limited to such numbers as may be decided by the AASB and allotted on a first come first serve basis. The AASB may also hold a meeting with the representatives of the specified bodies, as may be identified by the Board on a case to case basis, to ascertain their views on the draft of the proposed Standard/ Statement.

23. After taking into consideration the comments received, the draft of the proposed Standard/ Statement is finalized by the AASB and submitted to the Council of the ICAI for its consideration and approval. The draft of the General Clarification, as finalised by the AASB, is submitted to the Council of ICAI for its consideration and approval.

24. The Council of the ICAI considers the final draft of the proposed Standard/ Statement/General Clarification, and if found necessary, modifies the same in consultation with AASB. The concerned Standard/ Statement/ General Clarification is then issued under the authority of the Council of the ICAI.

Re-exposure

25. The AASB on a direction from the Council of the ICAI or on its own, in cases considered appropriate, may re-expose a proposed Standard/ Statement. The need for re-exposure may arise on account of factors such as significant issues coming to the notice of the Board subsequently, including, significant changes in the laws or regulations having an impact on the requirements of the Standard/ Statement or revision of the corresponding International Standard by IAASB. In cases where a re-exposure of a Standard or a Statement is required, the procedures as listed in paragraphs 12 to 24 are followed.

Procedure for Issuing the Guidance Notes

26. The AASB identifies the issues on which Guidance Notes need to be formulated and the priority in regard to selection thereof.

27. In the preparation of the Guidance Note, the AASB is assisted by Study Groups/Task Forces constituted to consider specific projects. The AASB appoints one of the professional accountants as a convenor of the Study Group / Task Force. The Convenor nominates other members of the Study Group/Task Force and in the formation of Study Groups / Task Forces, provision is made for participation of a cross-section of members of the ICAI. In situations considered necessary, the Board may also consider having an outside expert on such Study Groups/Task Forces and such "expert" need not necessarily be a professional accountant. The Study Group/Task Force will be responsible for preparing the basic draft of the Guidance Note.

28. The Study Group/Task Force develops the preliminary draft of the Guidance Note based on appropriate research and consultation, which may include, depending on the circumstances, consulting with the other professionals, regulators and other interested parties, as well as reviewing professional pronouncements issued by IFAC member bodies and other parties and submits the preliminary draft Guidance Note to the AASB. The draft Guidance Note, along with the background papers, if any, is sent to the Chairman, AASB for approval.

29. The AASB considers the preliminary draft prepared by the Study Group/Task Force and may refer the same to the Study Group/Task Force to examine the issues arising out of the deliberations of the AASB and accordingly modify the draft Guidance Note. The modified Draft Guidance Note is once again considered by the Board. The draft Guidance Note as finalised by the Board is submitted for the consideration of the Council of the ICAI.

30. Unlike Standards/Statements, ordinarily, no proposed Guidance Note is exposed for comments of the professional accountants and others. However, in situations considered necessary by the Board, an Exposure Draft of a Guidance Note may well be issued for public comments. In case an Exposure Draft of a Guidance Note is to be issued, the same procedures as required for an Exposure Draft of the Standard/

I.10 Auditing Pronouncements

Statement (as mentioned in paragraphs 17 to 22 above) is required to be followed. The reasons for issuing an Exposure Draft of the Guidance Note are recorded in the minutes of the relevant AASB meeting. However, the part of the AASB meeting at such Exposure Draft is considered is not open for public.

31. The Council of the Institute considers the final draft of the proposed Guidance Note and, if necessary, suggests modifications thereto in consultation with the AASB. The Guidance Note is then issued under the authority of the Council of the ICAI.

Limited or Substantive Revision to the Standard, Statement or Guidance Note

32. Subsequent to issuance of a Standard, Statement or Guidance Note, the introduction of any new legal or professional requirement or any other national or international development in the field of auditing, may require a substantive revision to that Standard, Statement or Guidance Note. In that case, the Council of the ICAI makes substantive revision to such Standard/ Statement /Guidance Note. The procedure followed for substantive revision is the same as that followed for formulation of a new Standard, Statement or the Guidance Note, as the case may be, as detailed above.

33. Similarly, subsequent to issuance of a Standard, Statement or Guidance Note, some aspect(s) may require revision which are not substantive in nature. For this purpose, the Council of the ICAI may make limited revision to a Standard/ Statement /Guidance Note. In case of the Standards on Auditing (SAs), any revision to a Standard is treated as limited only if that revision is restricted to the application guidance of that Standard. The procedure followed for the limited revision is, in principle, the same as that followed for formulation of a Standard, Statement or Guidance Note, as the case may be. However, the AASB may decide to cut short some time limits, e.g. period of public exposure in case of a limited revision to a Standard/Statement, as detailed above, for the process.

Technical Guides, Practice Manuals, Studies and Other Papers Published by the Auditing and Assurance Standards Board

34. For issuance of a Technical Guides/Studies, etc., the procedure adopted by the AASB is ordinarily the same as in case of a Guidance Note except that the draft Technical Guide/ Practice Manual/ Study is not exposed for public comments nor such part of the AASB meeting at which the proposed Technical Guide, Practice Manual, etc., is considered, open for public. Also, since the Technical Guides, Practice Manuals, Studies, etc., are not issued under the authority of the Council, these are not required to be placed for consideration and final approval of the Council, and are issued by the AASB under its own authority.

Voting

35. The affirmative votes of a majority of the members of the Board, in person or by simultaneous telecommunication link, are required to approve the final draft of a Standard or Statement for submission to the Council.

36. Each member of the AASB has the right to one vote.

Glossary of Terms*

Access controls - Procedures designed to restrict access to on-line terminal devices, programs and data. Access controls consist of “user authentication” and “user authorization.” “User authentication” typically attempts to identify a user through unique logon identifications, passwords, access cards or biometric data. “User authorization” consists of access rules to determine the computer resources each user may access. Specifically, such procedures are designed to prevent or detect:

- (a) Unauthorized access to on-line terminal devices, programs and data;
- (b) Entry of unauthorized transactions;
- (c) Unauthorized changes to data files;
- (d) The use of computer programs by unauthorized personnel; and
- (e) The use of computer programs that have not been authorized.

Accounting estimate - An approximation of a monetary amount in the absence of a precise means of measurement. This term is used for an amount measured at fair value where there is estimation uncertainty, as well as for other amounts that require estimation. Where SA 540¹ addresses only accounting estimates involving measurement at fair value, the term “fair value accounting estimates” is used.

Accounting records - The records of initial accounting entries and supporting records, such as checks and records of electronic fund transfers; invoices; contracts; the general and subsidiary ledgers, journal entries and other adjustments to the financial statements that are not reflected in journal entries; and records such as work sheets and spreadsheets supporting cost allocations, computations, reconciliations and disclosures.

Accuracy Assertion - Amounts and other data relating to recorded transactions and events have been recorded appropriately.

Agreed-upon procedures engagement - An engagement in which an auditor is engaged to carry out those procedures of an audit nature to which the auditor and the entity and any appropriate third parties have agreed and to report on factual findings. The recipients of the report form their own conclusions from the report by the auditor. The report is restricted to those parties that have agreed to the procedures to be performed since others, unaware of the reasons for the procedures may misinterpret the results.

Analytical procedures - Evaluations of financial information through analysis of plausible relationships among both financial and non-financial data. Analytical procedures also encompass such investigation as is necessary of identified fluctuations or relationships that are inconsistent with other relevant information or that differ from expected values by a significant amount.

Annual report - A document issued by an entity, ordinarily on an annual basis, which includes its financial statements together with the auditor’s report thereon.

Anomaly - A misstatement or deviation that is demonstrably not representative of misstatements or deviations in a population.

Applicable financial reporting framework - The financial reporting framework adopted by management and, where appropriate, those charged with governance in the preparation and presentation of the financial statements that is acceptable in view of the nature of the entity and the objective of the financial statements, or that is required by law or regulation.

*Definitions given in this Glossary should be read in the context of the respective Standards where they are appearing.

¹ SA 540, “Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures”.

I.12 Auditing Pronouncements

The term “fair presentation framework” is used to refer to a financial reporting framework that requires compliance with the requirements of the framework and:

- (a) Acknowledges explicitly or implicitly that, to achieve fair presentation of the financial statements, it may be necessary for management to provide disclosures beyond those specifically required by the framework; or
- (b) Acknowledges explicitly that it may be necessary for management to depart from a requirement of the framework to achieve fair presentation of the financial statements. Such departures are expected to be necessary only in extremely rare circumstances.

The term “compliance framework” is used to refer to a financial reporting framework that requires compliance with the requirements of the framework, but does not contain the acknowledgements in (a) or (b) above.

Application controls in information technology - Manual or automated procedures that typically operate at a business process level. Application controls can be preventative or detective in nature and are designed to ensure the integrity of the accounting records. Accordingly, application controls relate to procedures used to initiate, record, process and report transactions or other financial data.

Applied criteria (in the context of SA 810²) - The criteria applied by management in the preparation of the summary financial statements.

Appropriateness (of audit evidence) - The measure of the quality of audit evidence; that is, its relevance and its reliability in providing support for the conclusions on which the auditor’s opinion is based.

Arm’s length transaction - A transaction conducted on such terms and conditions as between a willing buyer and a willing seller who are unrelated and are acting independently of each other and pursuing their own best interests.

Assertion-based Engagements - In some assurance engagements, the evaluation or measurement of the subject matter is performed by the responsible party, and the subject matter information is in the form of an assertion by the responsible party that is made available to the intended users. These engagements are called “assertion-based engagements”.

Assertions - Representations by management, explicit or otherwise, that are embodied in the financial statements, as used by the auditor to consider the different types of potential misstatements that may occur.

Assess - Analyze identified risks of to conclude on their significance. “Assess,” by convention, is used only in relation to risk. (also see *Evaluate*)

Association - (see *Auditor association with financial information*)

Assurance - (see *Reasonable assurance*)

Assurance engagement - An engagement in which a practitioner expresses a conclusion designed to enhance the degree of confidence of the intended users other than the responsible party about the outcome of the evaluation or measurement of a subject matter against criteria. The outcome of the evaluation or measurement of a subject matter is the information that results from applying the criteria (also see *Subject matter information*). Under the “Framework for Assurance Engagements” issued by the Institute of Chartered Accountants of India there are two types of assurance engagement a

² SA 810, “Engagements to Report on Summary Financial Statements.”

practitioner is permitted to perform: a reasonable assurance engagement and a limited assurance engagement.

Reasonable assurance engagement—The objective of a reasonable assurance engagement is a reduction in assurance engagement risk to an acceptably low level in the circumstances of the engagement³ as the basis for a positive form of expression of the practitioner's conclusion.

Limited assurance engagement—The objective of a limited assurance engagement is a reduction in assurance engagement risk to a level that is acceptable in the circumstances of the engagement, but where that risk is greater than for a reasonable assurance engagement, as the basis for a negative form of expression of the practitioner's conclusion.

Assurance engagement risk - The risk that the practitioner expresses an inappropriate conclusion when the subject matter information is materially misstated.

Audit documentation - The record of audit procedures performed, relevant audit evidence obtained, and conclusions the auditor reached (terms such as “working papers” or “workpapers” are also sometimes used).

Audit evidence - Information used by the auditor in arriving at the conclusions on which the auditor's opinion is based. Audit evidence includes both information contained in the accounting records underlying the financial statements and other information. (See *Sufficiency of audit evidence* and *Appropriateness of audit evidence*.)

Audit file - One or more folders or other storage media, in physical or electronic form, containing the records that comprise the audit documentation for a specific engagement.

Audit firm - (see *Firm*)

Audit opinion - (see *Modified opinion* and *Unmodified opinion*)

Audit risk - The risk that the auditor expresses an inappropriate audit opinion when the financial statements are materially misstated. Audit risk is a function of the risks of material misstatement and detection risk.

Audit sampling (sampling) - The application of audit procedures to less than 100% of items within a population of audit relevance such that all sampling units have a chance of selection in order to provide the auditor with a reasonable basis on which to draw conclusions about the entire population.

Audited financial statements (in the context of SA 810) - Financial statements⁴ audited by the auditor in accordance with SAs, and from which the summary financial statements are derived.

Auditor - “Auditor” is used to refer to the person or persons conducting the audit, usually the engagement partner or other members of the engagement team, or, as applicable, the firm. Where an SA expressly intends that a requirement or responsibility be fulfilled by the engagement partner, the term “engagement partner” rather than “auditor” is used.

Auditor association with financial information - An auditor is associated with financial information when the auditor attaches a report to that information or consents to the use of the auditor's name in a professional connection.

³ Engagement circumstances include the terms of the engagement, including whether it is a reasonable assurance engagement or a limited assurance engagement, the characteristics of the subject matter, the criteria to be used, the needs of the intended users, relevant characteristics of the responsible party and its environment, and other matters, for example events, transactions, conditions and practices, that may have a significant effect on the engagement.

⁴ SA 200, “Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with Standards on Auditing,” paragraph 13(f), defines the term “financial statements.”

I.14 Auditing Pronouncements

Auditor's expert - An individual or organization possessing expertise in a field other than accounting or auditing, whose work in that field is used by the auditor to assist the auditor in obtaining sufficient appropriate audit evidence. An auditor's expert may be either an auditor's internal expert (who is a partner or staff, including temporary staff, of the auditor's firm or a network firm), or an auditor's external expert.

Auditor's point estimate or auditor's range - The amount, or range of amounts, respectively, derived from audit evidence for use in evaluating management's point estimate.

Auditor's range - (see *Auditor's point estimate*)

Block Selection - Block selection involves selection of a block(s) of contiguous items from within the population.

Business risk - A risk resulting from significant conditions, events, circumstances, actions or inactions that could adversely affect an entity's ability to achieve its objectives and execute its strategies, or from the setting of inappropriate objectives and strategies.

Capabilities (of management's expert) - Capability relates to the ability of the management's expert to exercise that competence in the circumstances.

Classification assertion - Transactions and events have been recorded in the proper accounts.

Comparative financial statements - Comparative information where amounts and other disclosures for the prior period are included for comparison with the financial statements of the current period but, if audited, are referred to in the auditor's opinion. The level of information included in those comparative financial statements is comparable with that of the financial statements of the current period.

Comparative information - The amounts and disclosures included in the financial statements in respect of one or more prior periods in accordance with the applicable financial reporting framework.

Competence (of management's expert) - Competence relates to the nature and level of expertise of the management's expert.

Compilation engagement - An engagement in which accounting expertise, as opposed to auditing expertise, is used to collect, classify and summarize financial information.

Complementary user entity controls - Controls that the service organization assumes, in the design of its service, will be implemented by user entities, and which, if necessary to achieve control objectives, are identified in the description of its system.

Completeness Assertion - All transactions and events that should have been recorded have been recorded.

Completion memorandum - A summary that describes the significant matters identified during the audit and how they were, or that includes cross reference to other relevant supporting audit documentation that provides such information.

Compliance framework - (see *Applicable financial reporting framework* and *General purpose framework*)

Component - An entity or business activity for which group or component management prepares financial information that should be included in the group financial statements.

Component auditor - An auditor who, at the request of the group engagement team, performs work on financial information related to a component for the group audit.

Component management - Management responsible for the preparation of the financial information of a component.

Component materiality - The materiality for a component determined by the group engagement team.

Computer-assisted audit techniques - Applications of auditing procedures using the computer as an audit tool (also known as CAATs).

Control activities - Those policies and procedures that help ensure that management directives are carried out. Control activities are a component of internal control.

Control environment - Includes the governance and management functions and the attitudes, awareness and actions of those charged with governance and management concerning the entity's internal control and its importance in the entity. The control environment is a component of internal control.

Control risk - The risk that a material misstatement that could occur will not be prevented, or detected or corrected, on a timely basis by related internal controls (see *Risk of material misstatement*)

Corresponding figures—Comparative information where amounts and other disclosures for the prior period are included as an integral part of the current period financial statements, and are intended to be read only in relation to the amounts and other disclosures relating to the current period (referred to as “current period figures”). The level of detail presented in the corresponding amounts and disclosures is dictated primarily by its relevance to the current period figures.

Corporate governance - (see *Governance*)

Capabilities (of management's expert) - Capability relates the ability of the management's expert to exercise that competence in the circumstances.

Criteria - The benchmarks used to evaluate or measure the subject matter including, where relevant, benchmarks for presentation and disclosure. Criteria can be formal or less formal. There can be different criteria for the same subject matter. Suitable criteria are required for reasonably consistent evaluation or measurement of a subject matter within the context of professional judgment.

Suitable criteria—Exhibit the following characteristics:

- (a) *Relevance*: relevant criteria contribute to conclusions that assist decision-making by the intended users.
- (b) *Completeness*: criteria are sufficiently complete when relevant factors that could affect the conclusions in the context of the engagement circumstances are not omitted. Complete criteria include, where relevant, benchmarks for presentation and disclosure.
- (c) *Reliability*: reliable criteria allow reasonably consistent evaluation or measurement of the subject matter including, where relevant, presentation and disclosure, when used in similar circumstances by similarly qualified practitioners.
- (d) *Neutrality*: neutral criteria contribute to conclusions that are free from bias.
- (e) *Understandability*: understandable criteria contribute to conclusions that are clear, comprehensive, and not subject to significantly different interpretations.

Cut-off Assertion - Transactions and events have been recorded in the correct accounting period.

Date of approval of the financial statements - The date on which all the statements that comprise the financial statements, have been prepared and those with the recognized authority have asserted that they have taken responsibility for those financial statements.

Date of report (in relation to quality control) - The date selected by the practitioner to date the report.

I.16 Auditing Pronouncements

Date of the auditor's report - The date the auditor dates the report on the financial statements in accordance with Revised SA 700.⁵

Date of the financial statements—The date of the end of the latest period covered by the financial statements.

Date the financial statements are issued - The date that the auditor's report and audited financial statements are made available to third parties.

Deficiency in internal control - This exists when:

(a) A control is designed, implemented or operated in such a way that it is unable to prevent, or detect and correct, misstatements in the financial statements on a timely basis; or

(b) A control necessary to prevent, or detect and correct, misstatements in the financial statements on a timely basis is missing.

Detection risk - The risk that the procedures performed by the auditor to reduce audit risk to an acceptably low level will not detect a misstatement that exists and that could be material, either individually or when aggregated with other misstatements.

Direct Reporting Engagements - In other assurance engagements, the practitioner either directly performs the evaluation or measurement of the subject matter, or obtains a representation from the responsible party that has performed the evaluation or measurement that is not available to the intended users. The subject matter information is provided to the intended users in the assurance report. These engagements are called "direct reporting engagements".

Documentation of the audit plan - A record of the planned nature, timing and extent of risk assessment procedures and further audit procedures at the assertion level in response to the assessed risks.

Documentation of the overall audit strategy - A record of the key decisions considered necessary to properly plan the audit and to communicate significant matters to the engagement team.

Element - (see *Element of a financial statement*)

Element of a financial statement (in the context of SA 805⁶)— An element, account or item of a financial statement.

Emphasis of Matter paragraph - A paragraph included in the auditor's report that refers to a matter appropriately presented or disclosed in the financial statements that, in the auditor's judgment, is of such importance that it is fundamental to users' understanding of the financial statements.

Engagement documentation— The record of work performed, results obtained, and conclusions the practitioner reached (terms such as "working papers" or "workpapers" are sometimes used). The documentation for a specific engagement is assembled in an engagement file.

Engagement letter - Written terms of an engagement in the form of a letter.

Engagement partner - The partner or other person in the firm who is a member of the Institute of Chartered Accountants of India and is in full time practice and is responsible for the engagement and its performance, and for the report that is issued on behalf of the firm, and who, where required, has the appropriate authority from a professional, legal or regulatory body.

⁵ SA 700 (Revised), "Forming an Opinion and Reporting on Financial Statements."

⁶ SA 805, "Special Considerations—Audits of Single Financial Statements and Specific Elements, Accounts or Items of a Financial Statement."

Engagement quality control review - A process designed to provide an objective evaluation, before the date of the report, of the significant judgments the engagement team made and the conclusions it reached in formulating the report.

Engagement quality control reviewer- A partner, other person⁷ in the firm, suitably qualified external person, or a team made up of such individuals, with sufficient and appropriate experience and authority to objectively evaluate the significant judgments the engagement team made and the conclusions it reached in formulating the report. However, in case the review is done by a team of individuals, such team should be headed by a member of the Institute.

Engagement team - All personnel performing the engagement, including any experts contracted by the firm in connection with that engagement.⁸

Entity's risk assessment process - A component of internal control that is the entity's process for identifying business risks relevant to financial reporting objectives and deciding about actions to address those risks, and the results thereof.

Environmental matters - (a) Initiatives to prevent, abate, or remedy damage to the environment, or to deal with conservation of renewable and non-renewable resources (such initiatives may be required by environmental laws and regulations or by contract, or they may be undertaken voluntarily);

(b) Consequences of violating environmental laws and regulations;

(c) Consequences of environmental damage done to others or to natural resources; and

(d) Consequences of vicarious liability imposed by law (for example, liability for damages caused by previous owners).

Environmental performance report - A report, separate from the financial statements, in which an entity provides third parties with qualitative information on the entity's commitments towards the environmental aspects of the business, its policies and targets in that field, its achievement in managing the relationship between its business processes and environmental risk, and quantitative information on its environmental performance.

Environmental risk - In certain circumstances, factors relevant to the assessment of inherent risk for the development of the overall audit plan may include the risk of material misstatement of the financial statements due to environmental matters.

Error - An unintentional misstatement in financial statements, including the omission of an amount or a disclosure.

Estimation uncertainty - The susceptibility of an accounting estimate and related disclosures to an inherent lack of precision in its measurement.

Evaluate - Identify and analyze the relevant issues, including performing further procedures as necessary, to come to a specific conclusion on a matter. "Evaluation," by convention, is used only in relation to a range of matters, including evidence, the results of procedures and the effectiveness of management's response to a risk. (also see Assess)

Exception - A response that indicates a difference between information requested to be confirmed, or contained in the entity's records, and information provided by the confirming party.

Existence Assertion - Assets, liabilities, and equity interests exist.

⁷ Such other person should be a member of the Institute of Chartered Accountants of India.

⁸ SA 620, "Using the Work of an Auditor's Expert," paragraph 6(a), defines the term "auditor's expert".

I.18 Auditing Pronouncements

Experienced auditor - An individual (whether internal or external to the firm) who has practical audit experience, and a reasonable understanding of:

- (a) Audit processes;
- (b) SAs and applicable legal and regulatory requirements;
- (c) The business environment in which the entity operates; and
- (d) Auditing and financial reporting issues relevant to the entity's industry.

Expert - (see *Auditor's expert* and *Management's expert*)

Expertise - Skills, knowledge and experience in a particular field.

Extent of Audit Procedure - Extent of an audit procedure refers to the quantity to be performed, for example, a sample size or the number of observations of a control activity.

External confirmation - Audit evidence obtained as a direct written response to the auditor from a third party (the confirming party), in paper form, or by electronic or other medium.

Fair presentation framework - (see *Applicable financial reporting framework* and *General purpose framework*)

Financial Reporting Standards - Means the Accounting Standards issued by the Institute of Chartered Accountants of India (ICAI) or Accounting Standards, notified by the Central Government by publishing the same as the Companies (Accounting Standards) Rules, 2006, or the Accounting Standards for Local Bodies issued by the ICAI, as may be applicable.

Financial statements - A structured representation of historical financial information, including related notes, intended to communicate an entity's economic resources or obligations at a point in time or the changes therein for a period of time in accordance with a financial reporting framework. The related notes ordinarily comprise a summary of significant accounting policies and other explanatory information. The term "financial statements" ordinarily refers to a complete set of financial statements as determined by the requirements of the applicable financial reporting framework, but it can also refer to a single financial statement.

Firm - A sole practitioner/proprietor, partnership or any such entity of professional accountants, as may be permitted by law.

Forecast - Prospective financial information prepared on the basis of assumptions as to future events which management expects to take place and the actions management expects to take as of the date the information is prepared (best-estimate assumptions).

Fraud - An intentional act by one or more individuals among management, those charged with governance, employees, or third parties, involving the use of deception to obtain an unjust or illegal advantage.

Fraud risk factors - Events or conditions that indicate an incentive or pressure to commit fraud or provide an opportunity to commit fraud.

Fraudulent financial reporting - Involves intentional misstatements, including omissions of amounts or disclosures in financial statements, to deceive financial statement users.

General IT-controls - Policies and procedures that relate to many applications and support the effective functioning of application controls by helping to ensure the continued proper operation of information systems. General IT-controls commonly include controls over data center and network operations; system software acquisition, change and maintenance; access security; and application system acquisition, development, and maintenance.

General purpose financial statements - Financial statements prepared in accordance with a general purpose framework.

General purpose framework - A financial reporting framework designed to meet the common financial information needs of a wide range of users. The financial reporting framework may be a fair presentation framework or a compliance framework.

The term “fair presentation framework” is used to refer to a financial reporting framework that requires compliance with the requirements of the framework and:

- (a) Acknowledges explicitly or implicitly that, to achieve fair presentation of the financial statements, it may be necessary for management to provide disclosures beyond those specifically required by the framework; or
- (b) Acknowledges explicitly that it may be necessary for management to depart from a requirement of the framework to achieve fair presentation of the financial statements. Such departures are expected to be necessary only in extremely rare circumstances.

The term “compliance framework” is used to refer to a financial reporting framework that requires compliance with the requirements of the framework, but does not contain the acknowledgements in (a) or (b) above.⁹

Governance - Describes the role of person(s) or organization(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity.

Group - All the components whose financial information is included in the group financial statements. A group always has more than one component.

Group audit - The audit of group financial statements.

Group audit opinion - The audit opinion on the group financial statements.

Group engagement partner - The partner or other person in the firm who is responsible for the group audit engagement and its performance, and for the auditor’s report on the group financial statements that is issued on behalf of the firm. Where joint auditors conduct the group audit, the joint engagement partners and their engagement teams collectively constitute the group engagement partner and the group engagement team.

Group engagement team - Partners, including the group engagement partner, and staff who establish the overall group audit strategy, communicate with component auditors, perform work on the consolidation process, and evaluate the conclusions drawn from the audit evidence as the basis for forming an opinion on the group financial statements.

Group financial statements - Financial statements that include the financial information of more than one component. The term “group financial statements” also refers to combined financial statements aggregating the financial information prepared by components that have no parent but are under common control.

Group management - Management responsible for the preparation of the group financial statements.

Group-wide controls - Controls designed, implemented and maintained by group management over group financial reporting.

Haphazard Selection - Haphazard selection is a sample selection method in which the auditor selects the sample without following a structured technique.

Historical financial information - Information expressed in financial terms in relation to a particular entity, derived primarily from that entity’s accounting system, about economic events occurring in past time periods or about economic conditions or circumstances at points in time in the past.

Inconsistency - Other information that contradicts information contained in the audited financial statements. A material inconsistency may raise doubt about the audit conclusions drawn from audit evidence previously obtained and, possibly, about the basis for the auditor’s opinion on the financial statements.

⁹ SA 200, paragraph 13(a).

I.20 Auditing Pronouncements

Independence - Comprises:

- (a) Independence of mind—the state of mind that permits the provision of an opinion without being affected by influences that compromise professional judgment, allowing an individual to act with integrity, and exercise objectivity and professional skepticism.
- (b) Independence in appearance—the avoidance of facts and circumstances that are so significant a reasonable and informed third party, having knowledge of all relevant information, including any safeguards applied, would reasonably conclude a firm's, or a member of the assurance team's, integrity, objectivity or professional skepticism had been compromised.

Information system relevant to financial reporting - A component of internal control that includes the financial reporting system, and consists of the procedures and records designed and established to

- Initiate, record, process and report entity transactions (as well as events and conditions) and to maintain accountability for the related assets, liabilities and equity.
- Resolve incorrect processing of transactions, for example, automated suspense files and procedures followed to clear suspense items out on a timely basis;
- Process and account for system overrides or bypasses to controls;
- Transfer information from transaction processing systems to the general ledger;
- Capture information relevant to financial reporting for events and conditions other than transactions, such as the depreciation and amortization of assets and changes in the recoverability of accounts receivables; and
- Ensure information required to be disclosed by the applicable financial reporting framework is accumulated, recorded, processed, summarized and appropriately reported in the financial statements.

Inherent risk - (see *Risk of material misstatement*)

Initial audit engagement - An engagement in which either:

- (a) The financial statements for the prior period were not audited; or
- (b) The financial statements for the prior period were audited by a predecessor auditor.

Inquiry - Inquiry consists of seeking information of knowledgeable persons, both financial and non-financial, within the entity or outside the entity.

Inspection (as an audit procedure) - Examining records or documents, whether internal or external, in paper form, electronic form, or other media, or a physical examination of an asset.

Inspection (in relation to quality control) - In relation to completed engagements, procedures designed to provide evidence of compliance by engagement teams with the firm's quality control policies and procedures.

Intended users - The person, persons or class of persons for whom the practitioner prepares the assurance report. The responsible party can be one of the intended users, but not the only one.

Interim financial information or statements - Financial information that is prepared and presented in accordance with an applicable financial reporting framework and comprises either a complete or a condensed set of financial statements for a period that is shorter than the entity's financial year.

Internal audit function - An appraisal activity established or provided as a service to the entity. Its functions include, amongst other things, examining, evaluating and monitoring the adequacy and effectiveness of internal control.

Internal auditors - Those individuals who perform the activities of the internal audit function. Internal auditors may belong to an internal audit department or equivalent function.

Internal control - The process designed, implemented and maintained by those charged with governance, management and other personnel to provide reasonable assurance about the achievement of an entity's objectives with regard to reliability of financial reporting, effectiveness and efficiency of operations, safeguarding of assets and compliance with applicable laws and regulations. The term "controls" refers to any aspects of one or more of the components of internal control.

International Financial Reporting Standards - The International Financial Reporting Standards issued by the International Accounting Standards Board.

Investigate - Inquire into matters arising from other procedures to resolve them.

IT environment - The policies and procedures that the entity implements and the IT infrastructure (hardware, operating systems, etc.) and application software that it uses to support business operations and achieve business strategies.

Limited assurance engagement - (see *Assurance engagement*)

Listed entity - An entity whose shares, stock or debt are quoted or listed on a recognized stock exchange, or are traded under the regulations of a recognized stock exchange or other equivalent body.

Material Weakness - A weakness in internal control that could have a material effect on the financial statements.

Management - The person(s) with executive responsibility for the conduct of the entity's operations. For some entities, management includes some or all of those charged with governance, for example, executive members of a governance board, or an owner-manager.

Management bias - A lack of neutrality by management in the preparation and presentation of information.

Management's expert - An individual or organization possessing expertise in a field other than accounting or auditing, whose work in that field is used by the entity to assist the entity in preparing the financial statements.

Management's point estimate - The amount selected by management for recognition or disclosure in the financial statements as an accounting estimate

Misappropriation of assets - Involves the theft of an entity's assets and is often perpetrated by employees in relatively small and immaterial amounts. However, it can also involve management who are usually more capable of disguising or concealing misappropriations in ways that are difficult to detect.

Misstatement - A difference between the amount, classification, presentation, or disclosure of a reported financial statement item and the amount, classification, presentation, or disclosure that is required for the item to be in accordance with the applicable financial reporting framework. Misstatements can arise from error or fraud.

Where the auditor expresses an opinion on whether the financial statements are presented fairly, in all material respects, or give a true and fair view, misstatements also include those adjustments of amounts, classifications, presentation, or disclosures that, in the auditor's judgment, are necessary for the financial statements to be presented fairly, in all material respects, or to give a true and fair view.

Misstatement of fact - Other information that is unrelated to matters appearing in the audited financial statements that is incorrectly stated or presented. A material misstatement of fact may undermine the credibility of the document containing audited financial statements.

Modified opinion - A qualified opinion, an adverse opinion or a disclaimer of opinion.

Monitoring (in relation to quality control) - A process comprising an ongoing consideration and evaluation of the firm's system of quality control, including a periodic inspection of a selection of completed

I.22 Auditing Pronouncements

engagements, designed to provide the firm with reasonable assurance that its system of quality control is operating effectively.

Monitoring of controls - A process to assess the effectiveness of internal control performance over time. It includes assessing the design and operation of controls on a timely basis and taking necessary remedial actions modified for changes in conditions. Monitoring of controls is a component of internal control.

Monetary Unit Sampling - Monetary Unit Sampling is a type of value-weighted sample selection method in which sample size, selection and evaluation results in a conclusion in monetary amounts.

Nature of Audit Procedure - The nature of an audit procedure refers to its purpose (i.e., test of controls or substantive procedures) and its type (i.e., inspection, observation, inquiry, confirmation, recalculation, reperformance, or analytical procedure).

Negative confirmation request - A request that the confirming party respond directly to the auditor only if the confirming party disagrees with the information provided in the request.

Network - A larger structure:

- (a) That is aimed at cooperation, and
- (b) That is clearly aimed at profit or cost-sharing or shares common ownership, control or management, common quality control policies and procedures, common business strategy, the use of a common brand name, or a significant part of professional resources.

Network firm - A firm or entity that belongs to a network.

Non-compliance (in the context of SA 250¹⁰) - Acts of omission or commission by the entity, either intentional or unintentional, which are contrary to the prevailing laws or regulations. Such acts include transactions entered into by, or in the name of, the entity, or on its behalf, by those charged with governance, management or employees. Non-compliance does not include personal misconduct (unrelated to the business activities of the entity) by those charged with governance, management or employees of the entity.

Non-response - A failure of the confirming party to respond, or fully respond, to a positive confirmation request, or a confirmation request returned undelivered.

Non-sampling risk - The risk that the auditor reaches an erroneous conclusion for any reason not related to sampling risk.

Objectivity (of management's expert) - Objectivity relates to the possible effects that bias, conflict of interest or the influence of others may have on the professional or business judgment of the management's expert.

Observation - Consists of looking at a process or procedure being performed by others, for example, the auditor's observation of inventory counting by the entity's personnel, or of the performance of control activities.

Occurrence Assertion - Transactions and events that have been recorded have occurred and pertain to the entity.

Opening balances - Those account balances that exist at the beginning of the period. Opening balances are based upon the closing balances of the prior period and reflect the effects of transactions and events of prior periods and accounting policies applied in the prior period. Opening balances also include matters requiring disclosure that existed at the beginning of the period, such as contingencies and commitments.

¹⁰ SA 250, "Consideration of Laws and Regulations in an Audit of Financial Statements".

Other information - Financial and non-financial information (other than the financial statements and the auditor's report thereon) which is included, either by law, regulation, or custom, in a document containing audited financial statements and the auditor's report thereon.

Other Matter paragraph - A paragraph included in the auditor's report that refers to a matter other than those presented or disclosed in the financial statements that, in the auditor's judgment, is relevant to users' understanding of the audit, the auditor's responsibilities or the auditor's report.

Outcome of an accounting estimate - The actual monetary amount which results from the resolution of the underlying transaction(s), event(s) or condition(s) addressed by the accounting estimate.

Outcome of the evaluation or measurement of a subject matter - The information that results from applying the criteria to the subject matter.

Overall audit strategy - Sets the scope, timing and direction of the audit, and guides the development of the more detailed audit plan.

Partner - Any individual with authority to bind the firm with respect to the performance of a professional services engagement.

Performance materiality - The amount or amounts set by the auditor at less than materiality for the financial statements as a whole to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds materiality for the financial statements as a whole. If applicable, performance materiality also refers to the amount or amounts set by the auditor at less than the materiality level or levels for particular classes of transactions, account balances or disclosures.

Personnel - Partners and staff.

Pervasive - A term used, in the context of misstatements, to describe the effects on the financial statements of misstatements or the possible effects on the financial statements of misstatements, if any, that are undetected due to an inability to obtain sufficient appropriate audit evidence. Pervasive effects on the financial statements are those that, in the auditor's judgment:

- (a) Are not confined to specific elements, accounts or items of the financial statements;
- (b) If so confined, represent or could represent a substantial proportion of the financial statements; or
- (c) In relation to disclosures, are fundamental to users' understanding of the financial statements.

Population - The entire set of data from which a sample is selected and about which the auditor wishes to draw conclusions.

Positive confirmation request - A request that the confirming party respond directly to the auditor indicating whether the confirming party agrees or disagrees with the information in the request, or providing the requested information.

Practitioner - A professional accountant in public practice.

Practitioner's Association with Subject Matter - A practitioner is associated with a subject matter when the practitioner reports on information about the subject matter or consents to the use of the practitioner's name in a professional connection with that subject matter.

Preconditions for an audit - The use by management of an acceptable financial reporting framework in the preparation of the financial statements and the agreement of management and, where appropriate, those charged with governance to the premise¹¹ on which an audit is conducted.

¹¹ SA 200, paragraph 13(j).

I.24 Auditing Pronouncements

Predecessor auditor - The auditor from a different audit firm, who audited the financial statements of an entity in the prior period and who has been replaced by the current auditor.

Premise, relating to the responsibilities of management and, where appropriate, those charged with governance, on which an audit is conducted - That management and, where appropriate, those charged with governance have acknowledged and understand that they have the following responsibilities that are fundamental to the conduct of an audit in accordance with ISAs. That is, responsibility:

- (a) For the preparation of the financial statements in accordance with the applicable financial reporting framework, including where relevant their fair presentation;
- (b) For such internal control as management and, where appropriate, those charged with governance determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; and
- (c) To provide the auditor with:
 - (i) Access to all information of which management and, where appropriate, those charged with governance are aware that is relevant to the preparation of the financial statements such as records,
 - (ii) documentation and other matters;
 - (iii) Additional information that the auditor may request from management and, where appropriate, those charged with governance for the purpose of the audit; and
 - (iv) Unrestricted access to persons within the entity from whom the auditor determines it necessary to obtain audit evidence.

In the case of a fair presentation framework, (a) above may be restated as “for the preparation and *fair* presentation of the financial statements in accordance with the financial reporting framework,” or “for the preparation of financial statements *that give a true and fair view* in accordance with the financial reporting framework.”

The “premise, relating to the responsibilities of management and, where appropriate, those charged with governance, on which an audit is conducted” may also be referred to as the “premise.”

Professional accountant - Member of the Institute of Chartered Accountants of India.

Professional accountant in public practice - Refers to the member of the Institute of Chartered Accountants of India who is in practice in terms of section 2 of the Chartered Accountants Act, 1949. The term is also used to refer to a firm of chartered accountants in public practice.

Professional judgment - The application of relevant training, knowledge and experience, within the context provided by auditing, accounting and ethical standards, in making informed decisions about the courses of action that are appropriate in the circumstances of the audit engagement.

Professional skepticism - An attitude that includes a questioning mind, being alert to conditions which may indicate possible misstatement due to error or fraud, and a critical assessment of evidence.

Professional standards - Engagement Standards as defined in the AASB’s “Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services”, and relevant ethical requirements as contained in the Code.

Projection - Prospective financial information prepared on the basis of:

- (a) Hypothetical assumptions about future events and management actions which are not necessarily expected to take place, such as when some entities are in a start-up phase or are considering a major change in the nature of operations; or

(b) A mixture of best-estimate and hypothetical assumptions.

Prospective financial information - Financial information based on assumptions about events that may occur in the future and possible actions by an entity. It is highly subjective in nature and its preparation requires exercise of considerable judgment. Prospective financial information can be in the form of a forecast, a projection or a combination of both. (See *Forecast* and *Projection*)

Public sector - National governments, regional (for example, state, provincial, territorial) governments, local (for example, city, town) governments and related governmental entities (for example, agencies, boards, commissions and enterprises).

Random Selection - It is a sample selection method involving application of random number generators, for example, random number tables.

Reasonable assurance (in the context of assurance engagements, including audit engagements, and quality control) - A high, but not absolute, level of assurance.

Reasonable assurance engagement - (see *Assurance engagement*)

Recalculation - Consists of checking the mathematical accuracy of documents or records.

Related party - A party that is either:

- (a) A related party as defined in the applicable financial reporting framework; or
- (b) Where the applicable financial reporting framework establishes minimal or no related party requirements:
 - (i) A person or other entity that has control or significant influence, directly or indirectly through one or more intermediaries, over the reporting entity;
 - (ii) Another entity over which the reporting entity has control or significant influence, directly or indirectly through one or more intermediaries; or
 - (iii) Another entity that is under common control with the reporting entity through having:
 - a. Common controlling ownership;
 - b. Owners who are close family members; or
 - c. Common key management.

However, entities that are under common control by a state (that is, a national, regional or local government) are not considered related unless they engage in significant transactions or share resources to a significant extent with one another.

Related services - Comprise agreed-upon procedures and compilations.

Relevant ethical requirements - Ethical requirements to which the engagement team and engagement quality control reviewer are subject, which ordinarily comprise Code of Ethics issued by Institute of Chartered Accountants of India (ICAI) together with other relevant pronouncements issued by the Institute.

Reperformance - The auditor's independent execution of procedures or controls that were originally performed as part of the entity's internal controls.

Report on the description and design of controls at a service organization (referred to in SA 402¹² (Revised) as a Type 1 report) - A report that comprises:

¹² SA 402, "Audit Considerations Relating to an Entity Using a Service Organization".

I.26 Auditing Pronouncements

- (a) A description, prepared by management of the service organization, of the service organization's system, control objectives and related controls that have been designed and implemented as at a specified date; and
- (b) A report by the service auditor with the objective of conveying reasonable assurance that includes the service auditor's opinion on the description of the service organization's system, control objectives and related controls and the suitability of the design of the controls to achieve the specified control objectives.

Report on the description, design, and operating effectiveness of controls at a service organization (referred to in SA 402) as a Type 2 report) - A report that comprises:

- (a) A description, prepared by management of the service organization, of the service organization's system, control objectives and related controls, their design and implementation as at a specified date or throughout a specified period and, in some cases, their operating effectiveness throughout a specified period; and
- (b) A report by the service auditor with the objective of conveying reasonable assurance that includes:
 - (i) The service auditor's opinion on the description of the service organization's system, control objectives and related controls, the suitability of the design of the controls to achieve the specified control objectives, and the operating effectiveness of the controls; and
 - (ii) A description of the service auditor's tests of the controls and the results thereof.

Responsible party - The person (or persons) who:

- (a) In a direct reporting engagement, is responsible for the subject matter; or
- (b) In an assertion-based engagement, is responsible for the subject matter information (the assertion), and may be responsible for the subject matter.

The responsible party may or may not be the party who engages the practitioner (the engaging party).

Review (in relation to quality control) - Appraising the quality of the work performed and conclusions reached by others.

Review engagement - The objective of a review engagement is to enable an auditor to state whether, on the basis of procedures which do not provide all the evidence that would be required in an audit, anything has come to the auditor's attention that causes the auditor to believe that the financial statements are not prepared, in all material respects, in accordance with an applicable financial reporting framework.

Review procedures - The procedures deemed necessary to meet the objective of a review engagement, primarily inquiries of entity personnel and analytical procedures applied to financial data.

Rights and Obligations Assertion - The entity holds or controls the rights to assets, and liabilities are the obligations of the entity.

Risk assessment procedures - The audit procedures performed to obtain an understanding of the entity and its environment, including the entity's internal control, to identify and assess the risks of material misstatement, whether due to fraud or error, at the financial statement and assertion levels.

Risk of material misstatement - The risk that the financial statements are materially misstated prior to audit. This consists of two components, described as follows at the assertion level:

- (a) Inherent risk—The susceptibility of an assertion about a class of transaction, account balance or disclosure to a misstatement that could be material, either individually or when aggregated with other misstatements, before consideration of any related controls.
- (b) Control risk—The risk that a misstatement that could occur in an assertion about a class of transaction, account balance or disclosure and that could be material, either individually or when aggregated with

other misstatements, will not be prevented, or detected and corrected, on a timely basis by the entity's internal control.

Sampling - (see *Audit sampling*)

Sampling risk - The risk that the auditor's conclusion based on a sample may be different from the conclusion if the entire population were subjected to the same audit procedure. Sampling risk can lead to two types of erroneous conclusions:

- (a) In the case of a test of controls, that controls are more effective than they actually are, or in the case of a test of details, that a material misstatement does not exist when in fact it does. The auditor is primarily concerned with this type of erroneous conclusion because it affects audit effectiveness and is more likely to lead to an inappropriate audit opinion.
- (b) In the case of a test of controls, that controls are less effective than they actually are, or in the case of a test of details, that a material misstatement exists when in fact it does not. This type of erroneous conclusion affects audit efficiency as it would usually lead to additional work to establish that initial conclusions were incorrect.

Sampling unit - The individual items constituting a population.

Scope of a review - The review procedures deemed necessary in the circumstances to achieve the objective of the review.

Service auditor - An auditor who, at the request of the service organization, provides an assurance report on the controls of a service organization.

Service organization - A third-party organization (or segment of a third-party organization) that provides services to user entities that are part of those entities' information systems relevant to financial reporting.

Service organization's system - The policies and procedures designed, implemented and maintained by the service organization to provide user entities with the services covered by the service auditor's report.

Significance - The relative importance of a matter, taken in context. The significance of a matter is judged by the practitioner in the context in which it is being considered. This might include, for example, the reasonable prospect of its changing or influencing the decisions of intended users of the practitioner's report; or, as another example, where the context is a judgment about whether to report a matter to those charged with governance, whether the matter would be regarded as important by them in relation to their duties. Significance can be considered in the context of quantitative and qualitative factors, such as relative magnitude, the nature and effect on the subject matter and the expressed interests of intended users or recipients

Significant component - A component identified by the group engagement team (i) that is of individual financial significance to the group, or (ii) that, due to its specific nature or circumstances, is likely to include significant risks of material misstatement of the group financial statements.

Significant deficiency in internal control - A deficiency or combination of deficiencies in internal control that, in the auditor's professional judgment, is of sufficient importance to merit the attention of those charged with governance.

Significant risk - An identified and assessed risk of material misstatement that, in the auditor's judgment, requires special audit consideration.

Single financial statement (for example, a cash flow statement) or to a specific element of a financial statement (for example, cash and bank balances) - Includes the related notes. The related notes ordinarily comprise a summary of significant accounting policies and other explanatory information relevant to the financial statement or to the element.

I.28 Auditing Pronouncements

Smaller entity - An entity which typically possesses qualitative characteristics such as:

- (a) Concentration of ownership and management in a small number of individuals (often a single individual – either a natural person or another enterprise that owns the entity provided the owner exhibits the relevant qualitative characteristics); and
- (b) One or more of the following:
 - (i) Straightforward or uncomplicated transactions;
 - (ii) Simple record-keeping;
 - (iii) Few lines of business and few products within business lines;
 - (iv) Few internal controls;
 - (v) Few levels of management with responsibility for a broad range of controls; or
 - (vi) Few personnel, many having a wide range of duties.

These qualitative characteristics are not exhaustive, they are not exclusive to smaller entities, and smaller entities do not necessarily display all of these characteristics.

Special purpose financial statements - Financial statements prepared in accordance with a special purpose framework.

Special purpose framework - A financial reporting framework designed to meet the financial information needs of specific users. The financial reporting framework may be a fair presentation framework or a compliance framework.¹³

Staff - Professionals, other than partners, including any experts the firm employs.

Statistical sampling - An approach to sampling that has the following characteristics:

- (a) Random selection of the sample items; and
- (b) The use of probability theory to evaluate sample results, including measurement of sampling risk.

A sampling approach that does not have characteristics (a) and (b) is considered non-statistical sampling.

Stratification - The process of dividing a population into sub-populations, each of which is a group of sampling units which have similar characteristics (often monetary value).

Subject matter information - The outcome of the evaluation or measurement of a subject matter. It is the subject matter information about which the practitioner gathers sufficient appropriate evidence to provide a reasonable basis for expressing a conclusion in an assurance report.

Subsequent events - Events occurring between the date of the financial statements and the date of the auditor's report, and facts that become known to the auditor after the date of the auditor's report.

Subservice organization - A service organization used by another service organization to perform some of the services provided to user entities that are part of those user entities' information systems relevant to financial reporting.

Substantive procedure - An audit procedure designed to detect material misstatements at the assertion level. Substantive procedures comprise:

- (a) Tests of details (of classes of transactions, account balances, and disclosures); and
- (b) Substantive analytical procedures.

¹³ SA 200, paragraph 13(a).

Sufficiency (of audit evidence) - The measure of the quantity of audit evidence. The quantity of the audit evidence needed is affected by the auditor's assessment of the risks of material misstatement and also by the quality of such audit evidence.

Suitable criteria - (see *Criteria*)

Suitably qualified external person - An individual outside the firm with the competence and capabilities to act as an engagement partner, for example a partner of another firm, or an employee (with appropriate experience) of another firm.

Summary financial statements (in the context of ISA 810) - Historical financial information that is derived from financial statements but that contains less detail than the financial statements, while still providing a structured representation consistent with that provided by the financial statements of the entity's economic resources or obligations at a point in time or the changes therein for a period of time.¹⁴ Different jurisdictions may use different terminology to describe such historical financial information.

Supplementary information - Information that is presented together with the financial statements that is not required by the applicable financial reporting framework used to prepare the financial statements, normally presented in either supplementary schedules or as additional notes.

Systematic Selection - Systematic selection is a sample selection method, in which the number of sampling units in the population is divided by the sample size to give a sampling interval, for example 50, and having determined a starting point within the first 50, each 50th sampling unit thereafter is selected.

Test - The application of procedures to some or all items in a population.

Tests of controls - An audit procedure designed to evaluate the operating effectiveness of controls in preventing, or detecting and correcting, material misstatements at the assertion level.

Those charged with governance - The person(s) or organization(s) (for example, a corporate trustee) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. This includes overseeing the financial reporting process. For some entities in some jurisdictions, those charged with governance may include management personnel, for example, executive members of a governance board of a private or public sector entity, or an owner-manager.¹⁵

Timing of Audit Procedure - Timing of an audit procedure refers to when it is performed, or the period to date to which the audit evidence applies.

Tolerable misstatement - A monetary amount set by the auditor in respect of which the auditor seeks to obtain an appropriate level of assurance that the monetary amount set by the auditor is not exceeded by the actual misstatement in the population.

Total rate of deviation - A rate of deviation from prescribed internal control procedures set by the auditor in respect of which the auditor seeks to obtain an appropriate level of assurance that the rate of deviation set by the auditor is not exceeded by the actual rate of deviation in the population.

Uncertainty - A matter whose outcome depends on future actions or events not under the direct control of the entity but that may affect the financial statements.

Uncorrected misstatements - Misstatements that the auditor has accumulated during the audit and that have not been corrected.

¹⁴ SA 200, paragraph 13(f).

¹⁵ For discussion of the diversity of governance structures, see paragraphs A1-A8 of SA 260, "Communication with Those Charged with Governance."

I.30 Auditing Pronouncements

Unmodified opinion - The opinion expressed by the auditor when the auditor concludes that the financial statements are prepared, in all material respects, in accordance with the applicable financial reporting framework.¹⁶

User auditor - An auditor who audits and reports on the financial statements of a user entity.

User entity - An entity that uses a service organization and whose financial statements are being audited.

Valuation and Allocation Assertion - Assets, liabilities and equity interest are included in the financial statements at appropriate amounts and any resulting valuation or allocation adjustments are appropriately recorded.

Walk-through test - Involves tracing a few transactions through the financial reporting system.

Written representation - A written statement by management provided to the auditor to confirm certain matters or to support other audit evidence. Written representations in this context do not include financial statements, the assertions therein, or supporting books and records.

¹⁶ SA 700 (Revised), paragraphs 35-36, deal with the phrases used to express this opinion in the case of a fair presentation framework and a compliance framework respectively.

Standard on Quality Control (SQC) 1

Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements*

(Effective for all engagements relating to accounting periods beginning on or after April 1, 2009)

Introduction

1. The purpose of this Standard on Quality Control (SQC) is to establish standards and provide guidance regarding a firm's responsibilities for its system of quality control for audits and reviews of historical financial information, and for other assurance and related services engagements. This SQC is to be read in conjunction with the requirements of the Chartered Accountants Act, 1949, the Code of Ethics and other relevant pronouncements of the Institute¹ (hereinafter referred to as "the Code").

2. Additional standards and guidance on the responsibilities of firm personnel regarding quality control procedures for specific types of engagements are set out in other pronouncements of the Auditing and Assurance Standards Board (AASB) issued under the authority of the Council. For example, Standard on Auditing (SA) 220, "Quality Control for an Audit of Financial Statements", establishes standards and provides guidance on quality control procedures for audits of historical financial information.

3. The firm should establish a system of quality control designed to provide it with reasonable assurance that the firm and its personnel comply with professional standards and regulatory and legal requirements, and that reports issued by the firm² or engagement partner(s) are appropriate in the circumstances.

4. A system of quality control consists of policies designed to achieve the objectives set out in paragraph 3 and the procedures necessary to implement and monitor compliance with those policies.

5. This SQC applies to all firms. The nature of the policies and procedures developed by individual firms to comply with this SQC will depend on various factors such as the size and operating characteristics of the firm, and whether it is part of a network.

Definitions

6. In this SQC, the following terms have the meanings attributed below:

- (a) *Engagement documentation* – the record of work performed, results obtained, and conclusions the practitioner reached (terms such as "working papers" or "workpapers" are also sometimes used). The documentation for a specific engagement is assembled in an engagement file;
- (b) *Engagement partner* – the partner or other person in the firm who is a member of the Institute of Chartered Accountants of India and is in full time practice and is responsible for the engagement and its performance, and for the report that is issued on behalf of the firm, and who, where required, has the appropriate authority from a professional, legal or regulatory body.
- (c) *Engagement quality control review* – a process designed to provide an objective evaluation, before the report is issued, of the significant judgments the engagement team made and the conclusions they reached in formulating the report.

* Published in October, 2007 issue of the Journal.

¹ Attention of the members is invited, for instance, to the *Guidance Note on Independence of Auditors*, issued by the Committee on Ethical Standards.

² It is clarified that in India the reports are not issued/signed in the firm's name, rather they are issued/signed on behalf of the firm by the sole practitioner, proprietor or a partner of the firm, as the case may be, in his individual name. The definition of a 'firm' has been given in paragraph 6(f) of this Standard.

I.32 Auditing Pronouncements

- (d) *Engagement quality control reviewer* – a partner, other person³ in the firm, suitably qualified external person, or a team made up of such individuals, with sufficient and appropriate experience and authority to objectively evaluate, before the report is issued, the significant judgments the engagement team made and the conclusions they reached in formulating the report. However, in case the review is done by a team of individuals, such team should be headed by a member of the Institute.
- (e) *Engagement team* – all personnel performing an engagement, including any experts contracted by the firm in connection with that engagement.
- (f) *Firm* – a sole practitioner/proprietor, partnership, or any such entity of professional accountants, as may be permitted by law.
- (g) *Inspection* – in relation to completed engagements, procedures designed to provide evidence of compliance by engagement teams with the firm’s quality control policies and procedures.
- (h) *Listed entity* – an entity whose shares, stock or debt are quoted or listed on a recognized stock exchange, or are traded under the regulations of a recognized stock exchange or other equivalent body.
- (i) *Monitoring* – a process comprising an ongoing consideration and evaluation of the firm’s system of quality control, including a periodic inspection of a selection of completed engagements, designed to enable the firm to obtain reasonable assurance that its system of quality control is operating effectively.
- (j) *Network firm*– A firm or entity that belongs to a network.
- (k) *Network* – A larger structure:
 - (i) That is aimed at cooperation, and
 - (ii) That is clearly aimed at profit or cost-sharing or shares common ownership, control or management, common quality control policies and procedures, common business strategy, the use of a common brand name, or a significant part of professional resources.
- (l) *Partner* – any individual with authority to bind the firm with respect to the performance of a professional services engagement.
- (m) *Personnel* – partners and staff.
- (n) *Professional standards* – engagement standards, as defined in the AASB’s “Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services,” and relevant ethical requirements as contained in the Code.
- (o) *Reasonable assurance* – in the context of this SQC, a high, but not absolute, level of assurance.
- (p) *Staff* – professionals, other than partners, including any experts which the firm employs.
- (q) *Suitably qualified external person* – an individual outside the firm with the capabilities and competence to act as an engagement partner, for example a partner or an employee⁴ (with appropriate experience) of another firm.

Elements of a System of Quality Control

7. The firm’s system of quality control should include policies and procedures addressing each of the following elements:

³ Such other person should be a member of the Institute of Chartered Accountants of India.

⁴ Such employee should be a member of the Institute of Chartered Accountants of India.

- (a) Leadership responsibilities for quality within the firm.
- (b) Ethical requirements.
- (c) Acceptance and continuance of client relationships and specific engagements.
- (d) Human resources.
- (e) Engagement performance.
- (f) Monitoring.

8. **The quality control policies and procedures should be documented and communicated to the firm's personnel.** Such communication describes the quality control policies and procedures and the objectives they are designed to achieve, and includes the message that each individual has a personal responsibility for quality and is expected to comply with these policies and procedures. In addition, the firm recognizes the importance of obtaining feedback on its quality control system from its personnel. Therefore, the firm encourages its personnel to communicate their views or concerns on quality control matters.

Leadership Responsibilities for Quality within the Firm

9. **The firm should establish policies and procedures designed to promote an internal culture based on the recognition that quality is essential in performing engagements. Such policies and procedures should require the firm's chief executive officer (or equivalent) or, if appropriate, the firm's managing partners (or equivalent), to assume ultimate responsibility for the firm's system of quality control.**

10. The firm's leadership and the examples it sets significantly influence the internal culture of the firm. The promotion of a quality-oriented internal culture depends on clear, consistent and frequent actions and messages from all levels of the firm's management emphasizing the firm's quality control policies and procedures, and the requirement to:

- (a) Perform work that complies with professional standards and regulatory and legal requirements; and
- (b) Issue reports that are appropriate in the circumstances.

Such actions and messages encourage a culture that recognizes and rewards high quality work. They may be communicated by training seminars, meetings, formal or informal dialogue, mission statements, newsletters, or briefing memoranda. They are incorporated in the firm's internal documentation and training materials, and in partner and staff appraisal procedures such that they will support and reinforce the firm's view on the importance of quality and how, practically, it is to be achieved.

11. Of particular importance is the need for the firm's leadership to recognize that the firm's business strategy is subject to the overriding requirement for the firm to achieve quality in all the engagements that the firm performs. Accordingly:

- (a) The firm assigns its management responsibilities so that commercial considerations do not override the quality of work performed;
- (b) The firm's policies and procedures addressing performance evaluation, compensation, and promotion (including incentive systems) with regard to its personnel, are designed to demonstrate the firm's overriding commitment to quality; and
- (c) The firm devotes sufficient resources for the development, documentation and support of its quality control policies and procedures.

12. **Any person or persons assigned operational responsibility for the firm's quality control system by the firm's chief executive officer or managing board of partners should have sufficient and appropriate experience and ability, and the necessary authority, to assume that responsibility.**

I.34 Auditing Pronouncements

13. Sufficient and appropriate experience and ability enables the responsible person or persons to identify and understand quality control issues and to develop appropriate policies and procedures. Necessary authority enables the person or persons to implement those policies and procedures.

Ethical Requirements

14. The firm should establish policies and procedures designed to provide it with reasonable assurance that the firm and its personnel comply with relevant ethical requirements.

15. Ethical requirements relating to audits and reviews of historical financial information, and other assurance and related services engagements are contained in the Code. The Code establishes the fundamental principles of professional ethics, which include:

- (a) Integrity;
- (b) Objectivity;
- (c) Professional competence and due care;
- (d) Confidentiality; and
- (e) Professional behavior.

16. The Code includes a conceptual approach to independence for assurance engagements, including aspects such as threats to independence, accepted safeguards and the public interest.

17. The firm's policies and procedures should emphasize the fundamental principles, which are reinforced in particular by (a) the leadership of the firm, (b) education and training, (c) monitoring, and (d) a process for dealing with non-compliance. Independence for assurance engagements is so significant that it is addressed separately in paragraphs 18-27 below. These paragraphs need to be read in conjunction with the Code.

Independence

18. The firm should establish policies and procedures designed to provide it with reasonable assurance that the firm, its personnel and, where applicable, others subject to independence requirements (including experts contracted by the firm and network firm personnel), maintain independence where required by the Code. Such policies and procedures should enable the firm to:

- (a) **Communicate its independence requirements to its personnel and, where applicable, to others subject to them; and**
- (b) **Identify and evaluate circumstances and relationships that create threats to independence, and to take appropriate action to eliminate those threats or reduce them to an acceptable level by applying safeguards, or, if considered appropriate, to withdraw from the engagement.**

19. Such policies and procedures should require:

- (a) **Engagement partners to provide the firm with relevant information about client engagements, including the scope of services, to enable the firm to evaluate the overall impact, if any, on independence requirements;**
- (b) **Personnel to promptly notify the firm of circumstances and relationships that create a threat to independence so that appropriate action can be taken; and**
- (c) **The accumulation and communication of relevant information to appropriate personnel so that:**
 - (i) **The firm and its personnel can readily determine whether they satisfy independence requirements;**
 - (ii) **The firm can maintain and update its records relating to independence; and**

(iii) The firm can take appropriate action regarding identified threats to independence.

20. The firm should establish policies and procedures designed to provide it with reasonable assurance that it is notified of breaches of independence requirements, and to enable it to take appropriate actions to resolve such situations. The policies and procedures should include requirements for:

- (a) All who are subject to independence requirements to promptly notify the firm of independence breaches of which they become aware;
- (b) The firm to promptly communicate identified breaches of these policies and procedures to:
 - (i) The engagement partner who, with the firm, needs to address the breach; and
 - (ii) Other relevant personnel in the firm and those subject to the independence requirements who need to take appropriate action; and
- (c) Prompt communication to the firm, if necessary, by the engagement partner and the other individuals referred to in subparagraph (b)(ii) of the actions taken to resolve the matter, so that the firm can determine whether it should take further action.

21. Comprehensive guidance on threats to independence and safeguards, including application to specific situations are contained in the Code.

22. A firm receiving notice of a breach of independence policies and procedures promptly communicates relevant information to engagement partners, others in the firm, as appropriate and, where applicable, experts contracted by the firm and network firm personnel, for appropriate action. Appropriate action by the firm and the relevant engagement partner includes applying appropriate safeguards to eliminate the threats to independence or to reduce them to an acceptable level, or withdrawing from the engagement. In addition, the firm provides independence education to personnel who are required to be independent.

23. At least annually, the firm should obtain written confirmation of compliance with its policies and procedures on independence from all firm personnel required to be independent in terms of the requirements of the Code.

24. Written confirmation may be in paper or electronic form. By obtaining confirmation and taking appropriate action on information indicating non-compliance, the firm demonstrates the importance that it attaches to independence and makes the issue current for, and visible to, its personnel.

25. The Code discusses the familiarity threat that may be created by using the same senior personnel on an assurance engagement over a long period of time and the safeguards that might be appropriate to address such a threat. **Accordingly, the firm should establish policies and procedures:**

- (a) **Setting out criteria for determining the need for safeguards to reduce the familiarity threat to an acceptable level when using the same senior personnel on an assurance engagement over a long period of time; and**
- (b) **For all audits of financial statements of listed entities, requiring the rotation of the engagement partner after a specified period in compliance with the Code.**

26. Using the same senior personnel on assurance engagements over a prolonged period may create a familiarity threat or otherwise impair the quality of performance of the engagement. Therefore, the firm should establish criteria for determining the need for safeguards to address this threat. In determining appropriate criteria, the firm considers such matters as (a) the nature of the engagement, including the extent to which it involves a matter of public interest, and (b) the length of service of the senior personnel on the engagement. Examples of safeguards include rotating the senior personnel or requiring an engagement quality control review.

27. The familiarity threat is particularly relevant in the context of financial statement audits of listed entities. **For these audits, the engagement partner should be rotated after a pre-defined period, normally not more than seven years⁵.**

Acceptance and Continuance of Client Relationships and Specific Engagements

28. **The firm should establish policies and procedures for the acceptance and continuance of client relationships and specific engagements, designed to provide it with reasonable assurance that it will undertake or continue relationships and engagements only where it:**

- (a) **Has considered the integrity of the client and does not have information that would lead it to conclude that the client lacks integrity;**
- (b) **Is competent to perform the engagement and has the capabilities, time and resources to do so; and**
- (c) **Can comply with the ethical requirements.**

The firm should obtain such information as it considers necessary in the circumstances before accepting an engagement with a new client, when deciding whether to continue an existing engagement, and when considering acceptance of a new engagement with an existing client. Where issues have been identified, and the firm decides to accept or continue the client relationship or a specific engagement, it should document how the issues were resolved.

29. With regard to the integrity of a client, matters that the firm considers include, for example:

- The identity and business reputation of the client's principal owners, key management, related parties and those charged with its governance.
- The nature of the client's operations, including its business practices.
- Information concerning the attitude of the client's principal owners, key management and those charged with its governance towards such matters as aggressive interpretation of accounting standards and the internal control environment.
- Whether the client is aggressively concerned with maintaining the firm's fees as low as possible.
- Indications of an inappropriate limitation in the scope of work.
- Indications that the client might be involved in money laundering or other criminal activities.
- The reasons for the proposed appointment of the firm and non-reappointment of the previous firm.

The extent of knowledge a firm will have regarding the integrity of a client will generally grow within the context of an ongoing relationship with that client.

30. Information on such matters that the firm obtains may come from, for example:

- Communications with existing or previous providers of professional accountancy services to the client in accordance with the Code, and discussions with other third parties.
- Inquiry of other firm personnel or third parties such as bankers, legal counsel and industry peers.
- Background searches of relevant databases.

⁵ The provision of rotation of partners shall not be applicable in case the audit of listed entities is being done by a sole practitioner/proprietor. However, in order to ensure that appropriate system of quality control exists in the firm and that appropriate reports are issued in the circumstances by sole practitioners/proprietors, such practice unit(s) shall be compulsorily reviewed under the process of peer review. The complete text of the Announcement is published in Paragraph 'C', "Announcements/Clarifications" of Section 1, "Announcements of the Council regarding Status of Various Documents issued by the Institute of Chartered Accountants of India", included in Volume I.A of the Handbook.

31. In considering whether the firm has the capabilities, competence, time and resources to undertake a new engagement from a new or an existing client, the firm reviews the specific requirements of the engagement and existing partner and staff profiles at all relevant levels. Matters the firm considers include whether:

- Firm personnel have knowledge of relevant industries or subject matters;
- Firm personnel have experience with relevant regulatory or reporting requirements, or the ability to gain the necessary skills and knowledge effectively;
- The firm has sufficient personnel with the necessary capabilities and competence;
- Experts are available, if needed;
- Individuals meeting the criteria and eligibility requirements to perform engagement quality control review are available, where applicable; and
- The firm would be able to complete the engagement within the reporting deadline.

32. The firm also considers whether accepting an engagement from a new or an existing client may give rise to an actual or perceived conflict of interest⁶. Where a potential conflict is identified, the firm considers whether it is appropriate to accept the engagement.

33. Deciding whether to continue a client relationship includes consideration of significant matters that have arisen during the current or previous engagements, and their implications for continuing the relationship. For example, a client may have started to expand its business operations into an area where the firm does not possess the necessary knowledge or expertise.

34. Where the firm obtains information that would have caused it to decline an engagement if that information had been available earlier, policies and procedures on the continuance of the engagement and the client relationship should include consideration of:

- (a) **The professional and legal responsibilities that apply to the circumstances, including whether there is a requirement for the firm to report to the person or persons who made the appointment or, in some cases, to regulatory authorities; and**
- (b) **The possibility of withdrawing from the engagement or from both the engagement and the client relationship.**

35. Policies and procedures on withdrawal from an engagement or from both the engagement and the client relationship address issues that include the following:

- Discussing with the appropriate level of the client's management and those charged with its governance regarding the appropriate action that the firm might take based on the relevant facts and circumstances.
- If the firm determines that it is appropriate to withdraw, discussing with the appropriate level of the client's management and those charged with its governance withdrawal from the engagement or from both the engagement and the client relationship, and the reasons for the withdrawal.
- Considering whether there is a professional, regulatory or legal requirement for the firm to remain in place, or for the firm to report the withdrawal from the engagement, or from both the engagement and the client relationship, together with the reasons for the withdrawal, to regulatory authorities.
- Documenting significant issues, consultations, conclusions and the basis for the conclusions.

⁶ Attention of the members is invited to the 'Code of Ethics' and the 'Guidance Note on Independence of Auditors' issued by the ICAI.

Human Resources

36. The firm should establish policies and procedures designed to provide it with reasonable assurance that it has sufficient personnel with the capabilities, competence, and commitment to ethical principles necessary to perform its engagements in accordance with professional standards and regulatory and legal requirements, and to enable the firm or engagement partners to issue reports that are appropriate in the circumstances.

37. Such policies and procedures address the following personnel issues:

- (a) Recruitment;
- (b) Performance evaluation;
- (c) Capabilities;
- (d) Competence;
- (e) Career development;
- (f) Promotion;
- (g) Compensation; and
- (h) Estimation of personnel needs.

Addressing these issues enables the firm to ascertain the number and characteristics of the individuals required for the firm's engagements. The firm's recruitment processes include procedures that help the firm select individuals of integrity as well as the capacity to develop the capabilities and competence necessary to perform the firm's work.

38. Capabilities and competence are developed through a variety of methods, including the following:

- Professional education.
- Continuing professional development, including training.
- Work experience.
- Coaching by more experienced staff, for example, other members of the engagement team.

39. The continuing competence of the firm's personnel depends to a significant extent on an appropriate level of continuing professional development so that personnel maintain and also enhance their knowledge and capabilities. The firm therefore emphasizes in its policies and procedures, the need for continuing training for all levels of firm personnel, and provides the necessary training resources and assistance to enable personnel to develop and maintain the required capabilities and competence. Where internal technical and training resources are unavailable, or for any other reason, the firm may use a suitably qualified external person for that purpose.

40. The firm's performance evaluation, compensation and promotion procedures give due recognition and reward to the development and maintenance of competence and commitment to ethical principles. In particular, the firm:

- (a) Makes personnel aware of the firm's expectations regarding performance and ethical principles;
- (b) Provides personnel with evaluation of, and counseling on, performance, progress and career development; and
- (c) Helps personnel understand that advancement to positions of greater responsibility depends, among other things, upon performance quality and adherence to ethical principles, and that failure to comply with the firm's policies and procedures may result in disciplinary action.

41. The size and circumstances of the firm will influence the structure of the firm's performance evaluation process. Smaller firms, in particular, may employ less formal methods of evaluating the performance of their personnel.

Assignment of Engagement Teams

42. The firm should assign responsibility for each engagement to an engagement partner. The firm should establish policies and procedures requiring that:

- (a) **The identity and role of the engagement partner are communicated to key members of the client's management and those charged with governance;**
- (b) **The engagement partner has the appropriate capabilities, competence, authority and time to perform the role; and**
- (c) **The responsibilities of the engagement partner are clearly defined and communicated to that partner.**

43. Policies and procedures include systems to monitor the workload and availability of engagement partners so as to enable these individuals to have sufficient time to adequately discharge their responsibilities.

44. The firm should also assign appropriate staff with the necessary capabilities, competence and time to perform engagements in accordance with professional standards and regulatory and legal requirements, and to enable the firm or engagement partners to issue reports that are appropriate in the circumstances.

45. The firm establishes procedures to assess its staff's capabilities and competence. The capabilities and competence considered when assigning engagement teams, and in determining the level of supervision required, include the following:

- An understanding of, and practical experience with, engagements of a similar nature and complexity through appropriate training and participation.
- An understanding of professional standards and regulatory and legal requirements.
- Appropriate technical knowledge, including knowledge of relevant information technology.
- Knowledge of the relevant industries in which the clients operate.
- Ability to apply professional judgment.
- An understanding of the firm's quality control policies and procedures.

Engagement Performance

46. The firm should establish policies and procedures designed to provide it with reasonable assurance that engagements are performed in accordance with professional standards and regulatory and legal requirements, and that the firm or the engagement partner issues reports that are appropriate in the circumstances.

47. Through its policies and procedures, the firm seeks to establish consistency in the quality of engagement performance. This is often accomplished through written or electronic manuals, software tools or other forms of standardized documentation, and industry or subject matter-specific guidance materials. Matters addressed include the following:

- How engagement teams are briefed on the engagement to obtain an understanding of the objectives of their work.
- Processes for complying with applicable engagement standards.

I.40 Auditing Pronouncements

- Processes of engagement supervision, staff training and coaching.
- Methods of reviewing the work performed, the significant judgments made and the form of report being issued.
- Appropriate documentation of the work performed and of the timing and extent of the review.
- Processes to keep all policies and procedures current.

48. It is important that all members of the engagement team understand the objectives of the work they are to perform. Appropriate team-working and training are necessary to assist less experienced members of the engagement team to clearly understand the objectives of the assigned work.

49. Supervision includes the following:

- Tracking the progress of the engagement.
- Considering the capabilities and competence of individual members of the engagement team, whether they have sufficient time to carry out their work, whether they understand their instructions and whether the work is being carried out in accordance with the planned approach to the engagement.
- Addressing significant issues arising during the engagement, considering their significance and appropriately modifying the planned approach appropriately.
- Identifying matters for consultation or consideration by more experienced engagement team members during the engagement.

50. Review responsibilities are determined on the basis that more experienced engagement team members, including the engagement partner, review work performed by less experienced team members. Reviewers consider whether:

- (a) The work has been performed in accordance with professional standards and regulatory and legal requirements;
- (b) Significant matters have been raised for further consideration;
- (c) Appropriate consultations have taken place and the resulting conclusions have been documented and implemented;
- (d) There is a need to revise the nature, timing and extent of work performed;
- (e) The work performed supports the conclusions reached and is appropriately documented;
- (f) The evidence obtained is sufficient and appropriate to support the report; and
- (g) The objectives of the engagement procedures have been achieved.

Consultation

51. The firm should establish policies and procedures designed to provide it with reasonable assurance that:

- (a) Appropriate consultation takes place on difficult or contentious matters;**
- (b) Sufficient resources are available to enable appropriate consultation to take place;**
- (c) The nature and scope of such consultations are documented; and**
- (d) Conclusions resulting from consultations are documented and implemented.**

52. Consultation includes discussion, at the appropriate professional level, with individuals within or outside the firm who have specialized expertise, to resolve a difficult or contentious matter.

53. Consultation uses appropriate research resources as well as the collective experience and technical

expertise of the firm. Consultation helps to promote quality and improves the application of professional judgment. The firm seeks to establish a culture in which consultation is recognized as a strength and encourages personnel to consult on difficult or contentious matters.

54. Effective consultation with other professionals requires that those consulted be given all the relevant facts that will enable them to provide informed advice on technical, ethical or other matters. Consultation procedures require consultation with those having appropriate knowledge, seniority and experience within the firm (or, where applicable, outside the firm) on significant technical, ethical and other matters, and appropriate documentation and implementation of conclusions resulting from consultations.

55. A firm needing to consult externally, for example, a firm without appropriate internal resources, may take advantage of advisory services provided by (a) other firms, or (b) professional and regulatory bodies. Before contracting for such services, the firm considers whether the external provider is suitably qualified for that purpose.

56. The documentation of consultations with other professionals that involve difficult or contentious matters is agreed by both the individual seeking consultation and the individual consulted. The documentation is sufficiently complete and detailed to enable an understanding of:

- (a) The issue on which consultation was sought; and
- (b) The results of the consultation, including any decisions taken, the basis for those decisions and how they were implemented.

Differences of Opinion

57. The firm should establish policies and procedures for dealing with and resolving differences of opinion within the engagement team, with those consulted and, where applicable, between the engagement partner and the engagement quality control reviewer. Conclusions reached should be documented and implemented.

58. Such procedures encourage identification of differences of opinion at an early stage, provide clear guidelines as to the successive steps to be taken thereafter, and require documentation regarding the resolution of the differences and the implementation of the conclusions reached. **The report should not be issued until the matter is resolved.**

59. A firm using a suitably qualified external person(s) to conduct an engagement quality control review recognizes that differences of opinion can occur and establishes procedures to resolve such differences, for example, by consulting with another practitioner or firm, or a professional or regulatory body.

Engagement Quality Control Review

60. The firm should establish policies and procedures requiring, for appropriate engagements, an engagement quality control review that provides an objective evaluation of the significant judgments made by the engagement team and the conclusions reached in formulating the report. Such policies and procedures should:

- (a) **Require an engagement quality control review for all audits of financial statements of listed entities;**
- (b) **Set out criteria against which all other audits and reviews of historical financial information, and other assurance and related services engagements should be evaluated to determine whether an engagement quality control review should be performed; and**
- (c) **Require an engagement quality control review for all engagements meeting the criteria established in compliance with subparagraph (b).**

61. The firm's policies and procedures should require the completion of the engagement quality

I.42 Auditing Pronouncements

control review before the report is issued.

62. Criteria that a firm considers when determining which engagements other than audits of financial statements of listed entities are to be subject to an engagement quality control review include the following:

- The nature of the engagement, including the extent to which it involves a matter of public interest.
- The identification of unusual circumstances or risks in an engagement or class of engagements.
- Whether laws or regulations require an engagement quality control review.

63. The firm should establish policies and procedures setting out:

- (a) The nature, timing and extent of an engagement quality control review;**
- (b) Criteria for the eligibility of engagement quality control reviewers; and**
- (c) Documentation requirements for an engagement quality control review.**

Nature, Timing and Extent of the Engagement Quality Control Review

64. An engagement quality control review ordinarily involves discussion with the engagement partner, a review of the financial statements or other subject matter information and the report, and, in particular, consideration of whether the report is appropriate. It also involves a review of selected working papers relating to the significant judgments that the engagement team made and the conclusions they reached. The extent of the review depends on the complexity of the engagement and the risk that the report might not be appropriate in the circumstances. The review does not reduce the responsibilities of the engagement partner.

65. An engagement quality control review for audits of financial statements of listed entities includes considering the following:

- The engagement team's evaluation of the firm's independence in relation to the specific engagement.
- Significant risks identified during the engagement and the responses to those risks.
- Judgments made, particularly with respect to materiality and significant risks.
- Whether appropriate consultation has taken place on matters involving differences of opinion or other difficult or contentious matters, and the conclusions arising from those consultations.
- The significance and disposition of corrected and uncorrected misstatements identified during the engagement.
- The matters to be communicated to management and those charged with governance and, where applicable, other parties such as regulatory bodies.
- Whether working papers selected for review reflect the work performed in relation to the significant judgments and support the conclusions reached.
- The appropriateness of the report to be issued.

Engagement quality control reviews for engagements other than audits of financial statements of listed entities may, depending on the circumstances, include some or all of these considerations.

66. The engagement quality control reviewer conducts the review in a timely manner at appropriate stages during the engagement so that significant matters may be promptly resolved to the reviewer's satisfaction before the report is issued.

67. Where the engagement quality control reviewer makes recommendations that the engagement partner does not accept and the matter is not resolved to the reviewer's satisfaction, the report is not issued until the matter is resolved by following the firm's procedures for dealing with differences of opinion.

Criteria for the Eligibility of Engagement Quality Control Reviewers

68. The firm's policies and procedures should address the appointment of engagement quality control reviewers and establish their eligibility through:

- (a) **The technical qualifications required to perform the role, including the necessary experience and authority; and**
- (b) **The degree to which an engagement quality control reviewer can be consulted on the engagement without compromising the reviewer's objectivity.**

69. The firm's policies and procedures on the technical qualifications of engagement quality control reviewers address the technical expertise, experience and authority necessary to perform the role. What constitutes sufficient and appropriate technical expertise, experience and authority depends on the circumstances of the engagement. In addition, the engagement quality control reviewer for an audit of the financial statements of a listed entity is an individual with sufficient and appropriate experience and authority to act as an audit engagement partner on audits of financial statements of listed entities.

70. The firm's policies and procedures are designed to maintain the objectivity of the engagement quality control reviewer. For example, the engagement quality control reviewer:

- (a) Is not selected by the engagement partner;
- (b) Does not otherwise participate in the engagement during the period of review;
- (c) Does not make decisions for the engagement team; and
- (d) Is not subject to other considerations that would threaten the reviewer's objectivity.

71. The engagement partner may consult the engagement quality control reviewer during the engagement. Such consultation need not compromise the engagement quality control reviewer's eligibility to perform the role. Where the nature and extent of the consultations become significant, however, care is taken by both the engagement team and the reviewer to maintain the reviewer's objectivity. Where this is not possible, another individual within the firm or a suitably qualified external person is appointed to take on the role of either the engagement quality control reviewer or the person to be consulted on the engagement. The firm's policies provide for the replacement of the engagement quality control reviewer where the ability to perform an objective review may be impaired.

72. Suitably qualified external persons may be contracted where sole practitioners or small firms identify engagements requiring engagement quality control reviews. Alternatively, some sole practitioners or small firms may wish to use other firms to facilitate engagement quality control reviews. Where the firm contracts suitably qualified external persons, the firm follows the requirements and guidance in paragraphs 69-72.

Documentation of the Engagement Quality Control Review

73. Policies and procedures on documentation of the engagement quality control review should require documentation that:

- (a) **The procedures required by the firm's policies on engagement quality control review have been performed;**
- (b) **The engagement quality control review has been completed before the report is issued; and**
- (c) **The reviewer is not aware of any unresolved matters that would cause the reviewer to believe that the significant judgments the engagement team made and the conclusions they reached were not appropriate.**

Engagement Documentation

Completion of the Assembly of Final Engagement Files

74. The firm should establish policies and procedures for engagement teams to complete the assembly of final engagement files on a timely basis after the engagement reports have been finalized.

75. Law or regulation may prescribe the time limits by which the assembly of final engagement files for specific types of engagement should be completed. Where no such time limits are prescribed in law or regulation, the firm establishes time limits appropriate to the nature of the engagements that reflect the need to complete the assembly of final engagement files on a timely basis. In the case of an audit, for example, such a time limit is ordinarily not more than 60 days after the date of the auditor's report.

76. Where two or more different reports are issued in respect of the same subject matter information of an entity, the firm's policies and procedures relating to time limits for the assembly of final engagement files address each report as if it were for a separate engagement. This may, for example, be the case when the firm issues an auditor's report on a component's financial information for group consolidation purposes and, at a subsequent date, an auditor's report on the same financial information for statutory purposes.

Confidentiality, Safe Custody, Integrity, Accessibility and Retrievability of Engagement Documentation

77. The firm should establish policies and procedures designed to maintain the confidentiality, safe custody, integrity, accessibility and retrievability of engagement documentation.

78. Relevant ethical requirements establish an obligation for the firm's personnel to observe at all times the confidentiality of information contained in engagement documentation, unless specific client authority has been given to disclose information, or there is a legal or professional duty to do so. Specific laws or regulations may impose additional obligations on the firm's personnel to maintain client confidentiality, particularly where data of a personal nature are concerned.

79. Whether engagement documentation is in paper, electronic or other media, the integrity, accessibility or retrievability of the underlying data may be compromised if the documentation could be altered, added to or deleted without the firm's knowledge, or if it could be permanently lost or damaged. Accordingly, the firm designs and implements appropriate controls for engagement documentation to:

- (a) Enable the determination of when and by whom engagement documentation was created, changed or reviewed;
- (b) Protect the integrity of the information at all stages of the engagement, especially when the information is shared within the engagement team or transmitted to other parties *via* the Internet;
- (c) Prevent unauthorized changes to the engagement documentation; and
- (d) Allow access to the engagement documentation by the engagement team and other authorized parties as necessary to properly discharge their responsibilities.

80. Controls that the firm may design and implement to maintain the confidentiality, safe custody, integrity, accessibility and retrievability of engagement documentation include, for example:

- The use of a password among engagement team members to restrict access to electronic engagement documentation to authorized users.
- Appropriate back-up routines for electronic engagement documentation at appropriate stages during the engagement.
- Procedures for properly distributing engagement documentation to the team members at the start of

engagement, processing it during engagement, and collating it at the end of engagement.

- Procedures for restricting access to, and enabling proper distribution and confidential storage of, hardcopy engagement documentation.
81. For practical reasons, original paper documentation may be electronically scanned for inclusion in engagement files. In that case, the firm implements appropriate procedures requiring engagement teams to:
- (a) Generate scanned copies that reflect the entire content of the original paper documentation, including manual signatures, cross-references and annotations;
 - (b) Integrate the scanned copies into the engagement files, including indexing and signing off on the scanned copies as necessary; and
 - (c) Enable the scanned copies to be retrieved and printed as necessary.

The firm considers whether to retain original paper documentation that has been scanned for legal, regulatory or other reasons.

Retention of Engagement Documentation

82. The firm should establish policies and procedures for the retention of engagement documentation for a period sufficient to meet the needs of the firm or as required by law or regulation.

83. The needs of the firm for retention of engagement documentation, and the period of such retention, will vary with the nature of the engagement and the firm's circumstances, for example, whether the engagement documentation is needed to provide a record of matters of continuing significance to future engagements. The retention period may also depend on other factors, such as whether local law or regulation prescribes specific retention periods for certain types of engagements, or whether there are generally accepted retention periods in the jurisdiction in the absence of specific legal or regulatory requirements. In the specific case of audit engagements, the retention period ordinarily is no shorter than seven years⁷ from the date of the auditor's report, or, if later, the date of the group auditor's report.

84. Procedures that the firm adopts for retention of engagement documentation include those that:
- Enable the retrieval of, and access to, the engagement documentation during the retention period, particularly in the case of electronic documentation since the underlying technology may be upgraded or changed over time.
 - Provide, where necessary, a record of changes made to engagement documentation after the engagement files have been completed.
 - Enable authorized external parties to access and review specific engagement documentation for quality control or other purposes.

Ownership of Engagement Documentation

85. Unless otherwise specified by law or regulation, engagement documentation is the property of the firm.

⁷ The Council of the Institute had in August 2009, pursuant to the provisions of Rule 12 of the Chartered Accountants (Procedures of Investigations of Professional and Other Misconduct and Cases) Rules, 2007 had amended the audit documentation retention period appearing as ten years in paragraph 83 of SQC 1 to seven years. As a consequence of above decision of the Council, the audit documentation retention period appearing as ten years in paragraph A23 of SA 230, 'Audit Documentation', issued in January 2009, shall also stand amended to seven years. The complete text of the Announcement is published in Paragraph 'C', "Announcements/Clarifications" of Section 1, "Announcements of the Council regarding Status of Various Documents issued by the Institute of Chartered Accountants of India", included in Volume I.A of the Handbook.

I.46 Auditing Pronouncements

The firm may, at its discretion, make portions of, or extracts from, engagement documentation available to clients, provided such disclosure does not undermine the validity of the work performed, or, in the case of assurance engagements, the independence of the firm or its personnel.

Monitoring

86. The firm should establish policies and procedures designed to provide it with reasonable assurance that the policies and procedures relating to the system of quality control are relevant, adequate, operating effectively and complied with in practice. Such policies and procedures should include an ongoing consideration and evaluation of the firm's system of quality control, including a periodic inspection of a selection of completed engagements.

87. The purpose of monitoring compliance with quality control policies and procedures is to provide an evaluation of:

- (a) Adherence to professional standards and regulatory and legal requirements;
- (b) Whether the quality control system has been appropriately designed and effectively implemented; and
- (c) Whether the firm's quality control policies and procedures have been appropriately applied, so that reports that are issued by the firm or engagement partners are appropriate in the circumstances.

88. The firm entrusts responsibility for the monitoring process to a partner or partners or other persons with sufficient and appropriate experience and authority in the firm to assume that responsibility. Monitoring of the firm's system of quality control is performed by competent individuals and covers both the appropriateness of the design and the effectiveness of the operation of the system of quality control.

89. Ongoing consideration and evaluation of the system of quality control includes matters such as the following:

- Analysis of:
 - New developments in professional standards and regulatory and legal requirements, and how they are reflected in the firm's policies and procedures where appropriate;
 - Written confirmation of compliance with policies and procedures on independence;
 - Continuing professional development, including training; and
 - Decisions related to acceptance and continuance of client relationships and specific engagements.
- Determination of corrective actions to be taken and improvements to be made in the system, including the provision of feedback into the firm's policies and procedures relating to education and training.
- Communication to appropriate firm personnel of weaknesses identified in the system, in the level of understanding of the system, or compliance with it.
- Follow-up by appropriate firm personnel so that necessary modifications are promptly made to the quality control policies and procedures.

90. The inspection of a selection of completed engagements is ordinarily performed on a cyclical basis. Engagements selected for inspection include at least one engagement for each engagement partner over an inspection cycle, which ordinarily spans no more than three years. The manner in which the inspection cycle is organized, including the timing of selection of individual engagements, depends on many factors, including the following:

- The size of the firm.
- The number and geographical location of offices.
- The results of previous monitoring procedures.

- The degree of authority both personnel and offices have (for example, whether individual offices are authorized to conduct their own inspections or whether only the head office may conduct them).
- The nature and complexity of the firm's practice and organization.
- The risks associated with the firm's clients and specific engagements.

91. The inspection process includes the selection of individual engagements, some of which may be selected without prior notification to the engagement team. Those inspecting the engagements are not involved in performing the engagement or the engagement quality control review. In determining the scope of the inspections, the firm may take into account the scope or conclusions of an independent external inspection program. However, an independent external inspection program does not act as a substitute for the firm's own internal monitoring program.

92. Small firms and sole practitioners may wish to use a suitably qualified external person or another firm to carry out engagement inspections and other monitoring procedures. Alternatively, they may wish to establish arrangements to share resources with other appropriate organizations to facilitate monitoring activities.

93. The firm should evaluate the effect of deficiencies noted as a result of the monitoring process and should determine whether they are either:

- (a) **Instances that do not necessarily indicate that the firm's system of quality control is insufficient to provide it with reasonable assurance that it complies with professional standards and regulatory and legal requirements, and that the reports issued by the firm or engagement partners are appropriate in the circumstances; or**
- (b) **Systemic, repetitive or other significant deficiencies that require prompt corrective action.**

94. The firm should communicate to relevant engagement partners and other appropriate personnel deficiencies noted as a result of the monitoring process and recommendations for appropriate remedial action.

95. The firm's evaluation of each type of deficiency should result in recommendations for one or more of the following:

- (a) **Taking appropriate remedial action in relation to an individual engagement or member of personnel;**
- (b) **The communication of the findings to those responsible for training and professional development;**
- (c) **Changes to the quality control policies and procedures; and**
- (d) **Disciplinary action against those who fail to comply with the policies and procedures of the firm, especially those who do so repeatedly.**

96. Where the results of the monitoring procedures indicate that a report may be inappropriate or that procedures were omitted during the performance of the engagement, the firm should determine what further action is appropriate to comply with relevant professional standards and regulatory and legal requirements. It should also consider obtaining legal advice.

97. At least annually, the firm should communicate the results of the monitoring of its quality control system to engagement partners and other appropriate individuals within the firm, including the firm's chief executive officer or, if appropriate, its managing partner(s). Such communication should enable the firm and these individuals to take prompt and appropriate action where necessary in accordance with their defined roles and responsibilities. Information communicated should

include the following:

- (a) **A description of the monitoring procedures performed.**
- (b) **The conclusions drawn from the monitoring procedures.**
- (c) **Where relevant, a description of systemic, repetitive or other significant deficiencies and of the actions taken to resolve or amend those deficiencies.**

98. The reporting of identified deficiencies to individuals other than the relevant engagement partners ordinarily does not include an identification of the specific engagements concerned, unless such identification is necessary for the proper discharge of the responsibilities of the individuals other than the engagement partners.

99. Some firms operate as part of a network and, for consistency, may implement some or all of their monitoring procedures on a network basis. Where firms within a network operate under common monitoring policies and procedures designed to comply with this SQC, and these firms place reliance on such a monitoring system:

- (a) At least annually, the network communicates the overall scope, extent and results of the monitoring process to appropriate individuals within the network firms;
- (b) The network communicates promptly any identified deficiencies in the quality control system to appropriate individuals within the relevant network firm or firms so that the necessary action can be taken; and
- (c) Engagement partners in the network firms are entitled to rely on the results of the monitoring process implemented within the network, unless the firms or the network advises otherwise.

100. Appropriate documentation relating to monitoring:

- (a) Sets out monitoring procedures, including the procedure for selecting completed engagements to be inspected;
- (b) Records the evaluation of:
 - (i) Adherence to professional standards and regulatory and legal requirements;
 - (ii) Whether the quality control system has been appropriately designed and effectively implemented; and
 - (iii) Whether the firm's quality control policies and procedures have been appropriately applied, so that reports that are issued by the firm or engagement partners are appropriate in the circumstances; and
- (c) Identifies the deficiencies noted, evaluates their effect, and sets out the basis for determining whether and what further action is necessary.

Complaints and Allegations

101. The firm should establish policies and procedures designed to provide it with reasonable assurance that it deals appropriately with:

- (a) **Complaints and allegations that the work performed by the firm fails to comply with professional standards and regulatory and legal requirements; and**
- (b) **Allegations of non-compliance with the firm's system of quality control.**

102. Complaints and allegations (which do not include those that are clearly frivolous) may originate from within or outside the firm. They may be made by firm personnel, clients or other third parties. They may be received by engagement team members or other firm personnel.

103. As part of this process, the firm establishes clearly defined channels for firm personnel to raise any concerns in a manner that enables them to come forward without fear of reprisals.

104. The firm investigates such complaints and allegations in accordance with established policies and procedures. The investigation is supervised by a partner with sufficient and appropriate experience and authority within the firm but who is not otherwise involved in the engagement, and includes involving legal counsel as necessary. Small firms and sole practitioners may use the services of a suitably qualified external person or another firm to carry out the investigation. Complaints, allegations and the responses to them are documented.

105. Where the results of the investigations indicate deficiencies in the design or operation of the firm's quality control policies and procedures, or non-compliance with the firm's system of quality control by an individual or individuals, the firm takes appropriate action as discussed in paragraph 95.

Documentation

106. The firm should establish policies and procedures requiring appropriate documentation to provide evidence of the operation of each element of its system of quality control.

107. How such matters are documented is the firm's decision. For example, large firms may use electronic databases to document matters such as independence confirmations, performance evaluations and the results of monitoring inspections. Smaller firms may use more simpler and informal methods such as manual notes, checklists and forms.

108. Factors to consider when determining the form and content of documentation evidencing the operation of each of the elements of the system of quality control include the following:

- The size of the firm and the number of offices.
- The degree of authority both personnel and offices have.
- The nature and complexity of the firm's practice and organization.

109. The firm retains this documentation for a period of time sufficient to permit those performing monitoring procedures to evaluate the firm's compliance with its system of quality control, or for a longer period if required by law or regulation.

Effective Date

110. This Standard on Quality Control is recommendatory for all engagements relating to accounting periods beginning on or after April 1, 2008 and is mandatory for all engagements relating to accounting periods beginning on or after April 1, 2009.

Material Modifications to the International Standard on Quality Control (ISQC) 1, "Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements"

Additions

1. Paragraph 6(d) of the ISQC 1, dealing with the definition of "engagement quality control reviewer" mentions that "other person in the firm" with sufficient and appropriate experience and authority can also act as quality control reviewer. The SQC 1 has retained this concept subject to the condition that such "other person in the firm" should also be a member of the Institute of Chartered Accountants of India.

2. Paragraph 6(d) of the ISQC 1, while defining the "engagement quality control reviewer" provides that the review can be done by a team of individuals comprising the partner, other person in the firm and/or the suitably qualified external person. The SQC 1 has retained this concept subject to the condition that in case of review by a team of individuals, such team should be headed by a member of the Institute.

I.50 Auditing Pronouncements

3. Paragraph 6(f) of the ISQC 1 defines “firm” as “a sole practitioner, partnership, corporation or other entity of professional accountants”. Since in India an individual can practice in his individual name and also in the name of the firm as proprietor of that firm, accordingly, the term ‘Proprietor’ has been added to the definition of the firm.

4. Paragraph 83 of the ISQC 1 prescribes the minimum period of engagement documentation as five years. The SQC 1 prescribes the minimum period of retention of engagement documentation as seven years since, as per the provisions of the Chartered Accountants Act, 1949, including regulations therein, prescribes the minimum period of retention of working papers as seven years.

Deletions

1. Paragraph 6(f) of the ISQC 1 defines “firm” as “a sole practitioner, partnership, corporation or other entity of professional accountants”. Since in India, the practitioners establish any corporate entity for practice, the word ‘Corporation’ has been deleted from the definition.

2. In terms of paragraph 6(p) of the ISQC 1, defining a “suitably qualified external person” as a partner of another firm, or an employee (with appropriate experience) of either a professional accountancy body whose members may perform audits and reviews of historical financial information, or other assurance or related services engagements, or of an organisation that provides relevant quality control services. Since, in India only the Institute of Chartered Accountants of India is the professional body whose members can carry out an audit or a review of historical financial information or other assurance engagement, a specific reference to this fact appearing in the context of “partner of another firm or an employee” has been deleted from the definition of “suitably qualified external person”.

3. Paragraph 6(p) lays down that “an organisation that provides relevant quality control services” can also act as a suitably qualified person. The SQC does not include any such requirement since it is felt that a review of a firm of accountants should be done by a similar firm of accountants only.

4. Paragraph 27 of the ISQC 1 requires that in all engagements of audit of listed companies, the engagement partner of the firm should be rotated within a period of seven years in order to avoid the familiarity threat. The SQC 1 does not mandate such a provision in the audit engagements of the listed entities that are audited by the sole practitioners/proprietors as it is not possible to apply the provision in such cases. However, the SQC 1 provides for peer review of those firms in order to mitigate familiarity threat.

5. The ISQC 1 also deals with the public sector perspective. However, since the Standards, Statements, General Clarifications and Guidance Notes issued by the ICAI are equally applicable in case of all engagements, irrespective of the form, nature and size of the entity, this Standard does not specifically mention that aspect.

Framework for Assurance Engagements*

(Effective From April 1, 2008)

Introduction

1. This Framework defines and describes the elements and objectives of an assurance engagement, and identifies engagements to which Standards on Auditing (SAs), Standards on Review Engagements (SREs) and Standards on Assurance Engagements (SAEs) apply. It provides a frame of reference for:

- (a) Professional accountants in public practice¹ (practitioners) when performing assurance engagements. Professional accountants who are neither in public practice nor in the public sector are encouraged to consider the Framework when performing assurance engagements²
- (b) Others involved with assurance engagements, including the intended users of an assurance report and the responsible party; and
- (c) The Auditing and Assurance Standards Board (AASB) in its development of SAs, SREs and SAEs.

This Framework does not cover engagements covered by Standards on Related Services (SRSs), such as engagements to perform agreed-upon procedures and engagements to compile financial or other information since the members do not express any assurance on the financial information or any other subject matter of their report.

2. This Framework does not itself establish standards or provide procedural requirements for the performance of assurance engagements. SAs, SREs and SAEs contain basic principles, essential procedures and related guidance, consistent with the concepts in this Framework, for the performance of assurance engagements.

3. The following is an overview of this Framework:

- *Introduction:* This Framework deals with assurance engagements performed by practitioners. It provides a frame of reference for practitioners and others involved with assurance engagements, such as those engaging a practitioner (the “engaging party”).
- *Definition and objective of an assurance engagement:* This section defines assurance engagements and identifies the objectives of the two types of assurance engagements a practitioner is permitted to perform. This Framework calls these two types reasonable assurance engagements and limited assurance engagements.³
- *Scope of the Framework:* This section distinguishes assurance engagements from other engagements, such as consulting engagements.

* Published in July, 2007 issue of the Journal.

¹ As defined in the Preface, the term “professional accountant” refers to the member of the Institute of Chartered Accountants of India. Further, the term “professional accountant in public practice (practitioner)” refers to the member of the Institute of Chartered Accountants of India who is in practice in terms of section 2 of the Chartered Accountants Act, 1949. The term is also used to refer to a firm of chartered accountants in public practice.

² If a professional accountant not in public practice applies this Framework, and (a) this Framework, the SAs, SREs or the SAEs are referred to in the professional accountant’s report; and (b) the professional accountant or other members of the assurance team and, when applicable, the professional accountant’s employer, are not independent of the entity in respect of which the assurance engagement is being performed, the lack of independence and the nature of the relationship(s) with the entity are prominently disclosed in the professional accountant’s report. Also, that report does not include the word “independent” in its title, and the purpose and users of the report are restricted.

³ For assurance engagements relating to historical financial information in particular, such engagements which provide reasonable assurance are called audits, and those engagements which provide limited assurance are called reviews.

I.52 Auditing Pronouncements

- *Engagement acceptance*: This section sets out characteristics that must be exhibited before a practitioner can accept an assurance engagement.
- *Elements of an assurance engagement*: This section identifies and discusses five elements that assurance engagement performed by practitioners exhibit: a three party relationship, a subject matter, criteria, evidence and an assurance report. It explains important distinctions between reasonable assurance engagements and limited assurance engagements (also outlined in **Appendix** to the Framework). This section also discusses, for example, the significant variation in the subject matters of assurance engagements, the required characteristics of suitable criteria, the role of risk and materiality in assurance engagements, and how conclusions are expressed in each of the two types of assurance engagements.
- *Inappropriate use of the practitioner's name*: This section discusses implications of a practitioner's association with a subject matter.

Ethical Principles and Quality Control Standards

4. In addition to this Framework and SAs, SREs and SAEs, practitioners who perform assurance engagements are governed by:

- (a) The requirements of the Chartered Accountants Act, 1949;
- (b) The Code of Ethics (the Code), issued by the Institute, which establishes fundamental ethical principles for professional accountants;
- (c) Other relevant pronouncements of the Institute of Chartered Accountants of India⁴; and
- (d) Standards on Quality Control (SQC)s, which establish standards and provide guidance on a firm's system of quality control⁵.

5. The Code of Ethics sets out the fundamental ethical principles that all professional accountants are required to observe, including:

- (a) Integrity;
- (b) Objectivity;
- (c) Professional competence and due care;
- (d) Confidentiality; and
- (e) Professional behaviour.

Definition and Objective of an Assurance Engagement

6. "Assurance engagement" means an engagement in which a practitioner expresses a conclusion designed to enhance the degree of confidence of the intended users other than the responsible party about the outcome of the evaluation or measurement of a subject matter against criteria.

7. The outcome of the evaluation or measurement of a subject matter is the information that results from applying the criteria to the subject matter. For example:

- The recognition, measurement, presentation and disclosure represented in the financial statements (outcome) result from applying a financial reporting framework for recognition, measurement,

⁴ Attention of the members is invited, for instance, to the *Guidance Note on Independence of Auditors*, issued by the Institute of Chartered Accountants of India.

⁵ Additional Standards and guidance on quality control procedures for specific types of assurance engagements are set out in SAs, SREs and SAEs.

presentation and disclosure, such as the Accounting Standards, (criteria) to an entity's financial position, financial performance and cash flows (subject matter).

- An assertion about the effectiveness of internal control (outcome) results from applying a framework for evaluating the effectiveness of internal control, (criteria) to internal control, a process (subject matter).

In the remainder of this Framework, the term "subject matter information" will be used to mean the outcome of the evaluation or measurement of a subject matter. It is the subject matter information about which the practitioner gathers sufficient appropriate evidence to provide a reasonable basis for expressing a conclusion in an assurance report.

8. Subject matter information can fail to be properly expressed in the context of the subject matter and the criteria, and can therefore be misstated, potentially to a material extent. This occurs when the subject matter information does not properly reflect the application of the criteria to the subject matter, for example, when an entity's financial statements do not give a true and fair view of (or present fairly, in all material respects) its financial position, financial performance and cash flows in accordance with the generally accepted accounting principles, or when an entity's assertion that its internal control is effective is not fairly stated, in all material respects, based on the established internal control framework.

9. In some assurance engagements, the evaluation or measurement of the subject matter is performed by the responsible party, and the subject matter information is in the form of an assertion by the responsible party that is made available to the intended users. These engagements are called "assertion-based engagements". In other assurance engagements, the practitioner either directly performs the evaluation or measurement of the subject matter, or obtains a representation from the responsible party that has performed the evaluation or measurement that is not available to the intended users. The subject matter information is provided to the intended users in the assurance report. These engagements are called "direct reporting engagements".

10. Under this Framework, there are two types of assurance engagements a practitioner is permitted to perform: a reasonable assurance engagement and a limited assurance engagement. The objective of a reasonable assurance engagement is a reduction in assurance engagement risk to an acceptably low level in the circumstances of the engagement⁶ as the basis for a positive form of expression of the practitioner's conclusion. The objective of a limited assurance engagement is a reduction in assurance engagement risk to a level that is acceptable in the circumstances of the engagement, but where that risk is greater than for a reasonable assurance engagement, as the basis for a negative form of expression of the practitioner's conclusion.

Scope of the Framework

11. Not all engagements performed by practitioners are assurance engagements. Other frequently performed engagements that do not meet the above definition (and therefore are not covered by this Framework) include:

- Engagements covered by Standards for Related Services, such as agreed-upon procedures engagements and compilations of financial or other information.
- The preparation of tax returns where no conclusion conveying assurance is expressed.

⁶ Engagement circumstances include the terms of the engagement, including whether it is a reasonable assurance engagement or a limited assurance engagement, the characteristics of the subject matter, the criteria to be used, the needs of the intended users, relevant characteristics of the responsible party and its environment, and other matters, for example events, transactions, conditions and practices, that may have a significant effect on the engagement.

I.54 Auditing Pronouncements

➤ Consulting (or advisory) engagements⁷, such as management and tax consulting.

12. An assurance engagement may be part of a larger engagement, for example, when a business acquisition consulting engagement includes a requirement to convey assurance regarding historical or prospective financial information. In such circumstances, this Framework is relevant only to the assurance portion of the engagement.

13. The following engagements, which may meet the definition in paragraph 6, need not be performed in accordance with this Framework:

- (a) Engagements to testify in legal proceedings regarding accounting, auditing, taxation or other matters; and
- (b) Engagements that include professional opinions, views or wording from which a user may derive some assurance, if all of the following apply:
 - (i) Those opinions, views or wording are merely incidental to the overall engagement;
 - (ii) Any written report issued is expressly restricted for use by only the intended users specified in the report;
 - (iii) Under a written understanding with the specified intended users, the engagement is not intended to be an assurance engagement; and
 - (iv) The engagement is not represented as an assurance engagement in the professional accountant's report.

Reports on Non-Assurance Engagements

14. A practitioner reporting on an engagement that is not an assurance engagement within the scope of this Framework, clearly distinguishes that report from an assurance report. So as not to confuse users, a report that is not an assurance report avoids, for example:

- Implying compliance with this Framework, SAs, SREs or SAEs.
- Inappropriately using the words “assurance,” “audit” or “review.”
- Including a statement that could reasonably be mistaken for a conclusion designed to enhance the degree of confidence of intended users about the outcome of the evaluation or measurement of a subject matter against criteria.

15. The practitioner and the responsible party may agree to apply the principles of this Framework to an engagement when there are no intended users other than the responsible party but where all other requirements of the SAs, SREs or SAEs are met. In such cases, the practitioner's report includes a statement restricting the use of the report to the responsible party.

Engagement Acceptance

16. A practitioner accepts an assurance engagement only where the practitioner's preliminary knowledge of the engagement circumstances indicates that:

⁷ Consulting engagements employ a professional accountant's technical skills, education, observations, experiences and knowledge of the consulting process. The consulting process is an analytical process that typically involves some combination of activities relating to: objective-setting, fact-finding, definition of problems or opportunities, evaluation of alternatives, development of recommendations including actions, communication of results and sometimes implementation and follow-up. Reports (if issued) are generally written in a narrative (or “long form”) style. Generally the work performed is only for the use and benefit of the client. The nature and scope of work is determined by agreement between the professional accountant and the client. Any service that meets the definition of an assurance engagement is not a consulting engagement but an assurance engagement.

- (a) Relevant ethical requirements, such as independence and professional competence will be satisfied, and
- (b) The engagement exhibits all of the following characteristics:
 - (i) The subject matter is appropriate;
 - (ii) The criteria to be used are suitable and are available to the intended users;
 - (iii) The practitioner has access to sufficient appropriate evidence to support the practitioner's conclusion;
 - (iv) The practitioner's conclusion, in the form appropriate to either a reasonable assurance engagement or a limited assurance engagement, is to be contained in a written report; and
 - (v) The practitioner is satisfied that there is a rational purpose for the engagement. If there is a significant limitation on the scope of the practitioner's work (see paragraph 54), it may be unlikely that the engagement has a rational purpose. Also, a practitioner may believe the engaging party intends to associate the practitioner's name with the subject matter in an inappropriate manner (see paragraph 60).

Specific SAs, SREs or SAEs may include additional requirements that need to be satisfied prior to accepting an engagement.

17. When a potential engagement cannot be accepted as an assurance engagement because it does not exhibit all the characteristics in the previous paragraph, the engaging party may be able to identify a different engagement that will meet the needs of intended users. For example:

- (a) If the original criteria were not suitable, an assurance engagement may still be performed if:
 - (i) the engaging party can identify an aspect of the original subject matter for which those criteria are suitable, and the practitioner could perform an assurance engagement with respect to that aspect as a subject matter in its own right. In such cases, the assurance report makes it clear that it does not relate to the original subject matter in its entirety; or
 - (ii) alternative criteria suitable for the original subject matter can be selected or developed.
- (b) The engaging party may request an engagement that is not an assurance engagement, such as a consulting or an agreed-upon procedures engagement.

18. Having accepted an assurance engagement, a practitioner may not change that engagement to a non-assurance engagement, or from a reasonable assurance engagement to a limited assurance engagement without reasonable justification. A change in circumstances that affects the intended users' requirements, or a misunderstanding concerning the nature of the engagement, ordinarily will justify a request for a change in the engagement. If such a change is made, the practitioner does not disregard evidence that was obtained prior to the change.

Elements of an Assurance Engagement

19. The following elements of an assurance engagement are discussed in this section:
- (a) A three party relationship involving a practitioner, a responsible party, and intended users;
 - (b) An appropriate subject matter;
 - (c) Suitable criteria;
 - (d) Sufficient appropriate evidence; and
 - (e) A written assurance report in the form appropriate to a reasonable assurance engagement or a limited assurance engagement.

Three Party Relationship

20. Assurance engagements involve three separate parties: a practitioner, a responsible party and intended users.

21. The responsible party and the intended users may be from different entities or the same entity. As an example of the latter case, in a two-tier board structure, the supervisory board may seek assurance about information provided by the management board of that entity. The relationship between the responsible party and the intended users needs to be viewed within the context of a specific engagement and may differ from more traditionally defined lines of responsibility. For example, an entity's senior management (an intended user) may engage a practitioner to perform an assurance engagement on a particular aspect of the entity's activities that is the immediate responsibility of a lower level of management (the responsible party), but for which senior management is ultimately responsible.

Practitioner

22. The term "practitioner" as used in this Framework is broader than the term "auditor" as used in SAs and SREs, which relates only to practitioners performing audit or review engagements with respect to historical financial information.

23. A practitioner may be requested to perform assurance engagements on a wide range of subject matters. Some subject matters may require specialized skills and knowledge beyond those ordinarily possessed by an individual practitioner. As noted in paragraph 17 (a), a practitioner does not accept an engagement if preliminary knowledge of the engagement circumstances indicates that ethical requirements regarding professional competence will not be satisfied. In some cases this requirement can be satisfied by the practitioner using the work of persons from other professional disciplines, referred to as experts. In such cases, the practitioner is satisfied that those persons carrying out the engagement collectively possess the requisite skills and knowledge, and that the practitioner has an adequate level of involvement in the engagement and understanding of the work for which any expert is used.

Responsible Party

24. The responsible party is the person (or persons) who:

- (a) in a direct reporting engagement, is responsible for the subject matter; or
- (b) in an assertion-based engagement, is responsible for the subject matter information (the assertion), and may be responsible for the subject matter. An example of when the responsible party is responsible for both the subject matter information and the subject matter, is when an entity engages a practitioner to perform an assurance engagement regarding a report it has prepared about its own sustainability practices. An example of when the responsible party is responsible for the subject matter information but not the subject matter, is when a government organization engages a practitioner to perform an assurance engagement regarding a report about a private company's sustainability practices that the organization has prepared and is to distribute to intended users.

The responsible party may or may not be the party who engages the practitioner (the engaging party).

25. The responsible party ordinarily provides the practitioner with a written representation that evaluates or measures the subject matter against the identified criteria, whether or not it is to be made available as an assertion to the intended users. In a direct reporting engagement, the practitioner may not be able to obtain such a representation when the engaging party is different from the responsible party.

Intended Users

26. The intended users are the person, persons or class of persons for whom the practitioner prepares the assurance report. The responsible party can be one of the intended users, but not the only one.

27. Whenever practical, the assurance report is addressed to all the intended users, but in some cases there may be other intended users. The practitioner may not be able to identify all those who will read the assurance report, particularly where there is a large number of people who have access to it. In such cases, particularly where possible readers are likely to have a broad range of interests in the subject matter, intended users may be limited to major stakeholders with significant and common interests. Intended users may be identified in different ways, for example, by agreement between the practitioner and the responsible party or engaging party, or by law.

28. Whenever practical, intended users or their representatives are involved with the practitioner and the responsible party (and the engaging party, if different) in determining the requirements of the engagement. Regardless of the involvement of others however, and unlike an agreed-upon procedures engagement (which involves reporting findings based upon the procedures, rather than a conclusion):

- (a) The practitioner is responsible for determining the nature, timing and extent of procedures; and
- (b) The practitioner is required to pursue any matter the practitioner becomes aware of that leads the practitioner to question whether a material modification should be made to the subject matter information.

29. In some cases, intended users (for example, bankers and regulators) impose a requirement on, or request the responsible party (or the engaging party, if different) to arrange for, an assurance engagement to be performed for a specific purpose. When engagements are designed for specified intended users or a specific purpose, the practitioner considers including a restriction in the assurance report that limits its use to those users or that purpose.

Subject Matter

30. The subject matter, and subject matter information, of an assurance engagement can take many forms, such as:

- Financial performance or conditions (for example, historical or prospective financial position, financial performance and cash flows) for which the subject matter information may be the recognition, measurement, presentation and disclosure represented in financial statements.
- Non-financial performance or conditions (for example, performance of an entity) for which the subject matter information may be key indicators of efficiency and effectiveness.
- Physical characteristics (for example, capacity of a facility) for which the subject matter information may be a specifications document.
- Systems and processes (for example, an entity's internal control or IT system) for which the subject matter information may be an assertion about effectiveness.
- Behaviour (for example, corporate governance, compliance with regulation, human resource practices) for which the subject matter information may be a statement of compliance or a statement of effectiveness.

31. Subject matters have different characteristics, including the degree to which information about them is qualitative versus quantitative, objective versus subjective, historical versus prospective, and relates to a point in time or covers a period. Such characteristics affect the:

- (a) precision with which the subject matter can be evaluated or measured against criteria; and
- (b) the persuasiveness of available evidence.

The assurance report notes characteristics of particular relevance to the intended users.

32. An appropriate subject matter is:

I.58 Auditing Pronouncements

- (a) identifiable, and capable of consistent evaluation or measurement against the identified criteria; and
- (b) such that the information about it can be subjected to procedures for gathering sufficient appropriate evidence to support a reasonable assurance or limited assurance conclusion, as appropriate.

Criteria

33. Criteria are the benchmarks used to evaluate or measure the subject matter including, where relevant, benchmarks for presentation and disclosure. Criteria can be formal, for example in the preparation of financial statements, the criteria may be Accounting Standards issued by the Institute; when reporting on internal control, the criteria may be an established internal control framework or individual control objectives specifically designed for the engagement; and when reporting on compliance, the criteria may be the applicable law, regulation or contract. Examples of less formal criteria are an internally developed code of conduct or an agreed level of performance (such as the number of times a particular committee is expected to meet in a year).

34. Suitable criteria are required for reasonably consistent evaluation or measurement of a subject matter within the context of professional judgment. Without the frame of reference provided by suitable criteria, any conclusion is open to individual interpretation and misunderstanding. Suitable criteria are context-sensitive, that is, relevant to the engagement circumstances. Even for the same subject matter there can be different criteria. For example, one responsible party might select the number of customer complaints resolved to the acknowledged satisfaction of the customer for the subject matter of customer satisfaction; another responsible party might select the number of repeat purchases in the three months following the initial purchase.

35. Suitable criteria exhibit the following characteristics:

- (a) *Relevance*: relevant criteria contribute to conclusions that assist decision-making by the intended users.
- (b) *Completeness*: criteria are sufficiently complete when relevant factors that could affect the conclusions in the context of the engagement circumstances are not omitted. Complete criteria include, where relevant, benchmarks for presentation and disclosure.
- (c) *Reliability*: reliable criteria allow reasonably consistent evaluation or measurement of the subject matter including, where relevant, presentation and disclosure, when used in similar circumstances by similarly qualified practitioners.
- (d) *Neutrality*: neutral criteria contribute to conclusions that are free from bias.
- (e) *Understandability*: understandable criteria contribute to conclusions that are clear, comprehensive, and not subject to significantly different interpretations.

The evaluation or measurement of a subject matter on the basis of the practitioner's own expectations, judgments and individual experience would not constitute suitable criteria.

36. The practitioner assesses the suitability of criteria for a particular engagement by considering whether they reflect the above characteristics. The relative importance of each characteristic to a particular engagement is a matter of judgment. Criteria can either be established or specifically developed. Established criteria are those embodied in laws or regulations, or issued by authorized or recognized bodies of experts that follow a transparent due process. Specifically developed criteria are those designed for the purpose of the engagement. Whether criteria are established or specifically developed affects the work that the practitioner carries out to assess their suitability for a particular engagement.

37. Criteria need to be available to the intended users to allow them to understand how the subject matter has been evaluated or measured. Criteria are made available to the intended users in one or more of the

following ways:

- (a) Publicly.
- (b) Through inclusion in a clear manner in the presentation of the subject matter information.
- (c) Through inclusion in a clear manner in the assurance report.
- (d) By general understanding, for example the criterion for measuring time in hours and minutes.

Criteria may also be available only to specific intended users, for example, the terms of a contract, or criteria issued by an industry association that are available only to those in the industry. When identified criteria are available only to specific intended users, or are relevant only to a specific purpose, use of the assurance report is restricted to those users or for that purpose.⁸

Evidence

38. The practitioner plans and performs an assurance engagement with an attitude of professional skepticism to obtain sufficient appropriate evidence about whether the subject matter information is free of material misstatement. The practitioner considers materiality, assurance engagement risk, and the quantity and quality of available evidence when planning and performing the engagement, in particular when determining the nature, timing and extent of evidence-gathering procedures.

Professional Skepticism

39. The practitioner plans and performs an assurance engagement with an attitude of professional skepticism recognizing that circumstances may exist that cause the subject matter information to be materially misstated. An attitude of professional skepticism means the practitioner makes a critical assessment, with a questioning mind, of the validity of evidence obtained and is alert to evidence that contradicts or brings into question the reliability of documents or representations by the responsible party. For example, an attitude of professional skepticism is necessary throughout the engagement process for the practitioner to reduce the risk of overlooking suspicious circumstances, of over generalizing when drawing conclusions from observations, and of using faulty assumptions in determining the nature, timing and extent of evidence-gathering procedures and evaluating the results thereof.

40. An assurance engagement rarely involves the authentication of documentation, nor is the practitioner trained as or expected to be an expert in such authentication. However, the practitioner considers the reliability of the information to be used as evidence, for example, photocopies, facsimiles, filmed, digitized or other electronic documents, including consideration of controls over their preparation and maintenance where relevant.

Sufficiency and Appropriateness of Evidence

41. Sufficiency is the measure of the quantity of evidence. Appropriateness is the measure of the quality of evidence; that is, its relevance and its reliability. The quantity of evidence needed is affected by the risk of the subject matter information being materially misstated (the greater the risk, the more evidence is likely to be required) and also by the quality of such evidence (the higher the quality, the less may be required). Accordingly, the sufficiency and appropriateness of evidence are interrelated. However, merely obtaining more evidence may not compensate for its poor quality.

42. The reliability of evidence is influenced by its source and by its nature, and is dependent on the individual circumstances under which it is obtained. Generalizations about the reliability of various kinds of

⁸ While an assurance report may be restricted whenever it is intended only for specified intended users or for a specific purpose, the absence of a restriction regarding a particular reader or purpose, does not itself indicate that a legal responsibility is owed by the practitioner in relation to that reader or for that purpose. Whether a legal responsibility is owed will depend on the circumstances of each case and the relevant jurisdiction.

I.60 Auditing Pronouncements

evidence can be made; however, such generalizations are subject to important exceptions. Even when evidence is obtained from sources external to the entity, circumstances may exist that could affect the reliability of the information obtained. For example, evidence obtained from an independent external source may not be reliable if the source is not knowledgeable. While recognizing that exceptions may exist, the following generalizations about the reliability of evidence may be useful:

- Evidence is more reliable when it is obtained from independent sources outside the entity.
- Evidence that is generated internally is more reliable when the related controls are effective.
- Evidence obtained directly by the practitioner (for example, observation of the application of a control) is more reliable than evidence obtained indirectly or by inference (for example, inquiry about the application of a control).
- Evidence is more reliable when it exists in documentary form, whether paper, electronic, or other media (for example, a contemporaneously written record of a meeting is more reliable than a subsequent oral representation of what was discussed).
- Evidence provided by original documents is more reliable than evidence provided by photocopies or facsimiles.

43. The practitioner ordinarily obtains more assurance from consistent evidence obtained from different sources or of a different nature than from items of evidence considered individually. In addition, obtaining evidence from different sources or of a different nature may indicate that an individual item of evidence is not reliable. For example, corroborating information obtained from a source independent of the entity may increase the assurance the practitioner obtains from a representation from the responsible party. Conversely, when evidence obtained from one source is inconsistent with that obtained from another, the practitioner determines what additional evidence-gathering procedures are necessary to resolve the inconsistency.

44. In terms of obtaining sufficient appropriate evidence, it is generally more difficult to obtain assurance about subject matter information covering a period than about subject matter information at a point in time. In addition, conclusions provided on processes ordinarily are limited to the period covered by the engagement; the practitioner provides no conclusion about whether the process will continue to function in the specified manner in the future.

45. The practitioner considers the relationship between the cost of obtaining evidence and the usefulness of the information obtained. However, the matter of difficulty or expense involved is not in itself a valid basis for omitting an evidence-gathering procedure for which there is no alternative. The practitioner uses professional judgment and exercises professional skepticism in evaluating the quantity and quality of evidence, and thus its sufficiency and appropriateness, to support the assurance report.

Materiality

46. Materiality is relevant when the practitioner determines the nature, timing and extent of evidence-gathering procedures, and when assessing whether the subject matter information is free of misstatement. When considering materiality, the practitioner understands and assesses what factors might influence the decisions of the intended users. For example, when the identified criteria allow for variations in the presentation of the subject matter information, the practitioner considers how the adopted presentation might influence the decisions of the intended users. Materiality is considered in the context of quantitative and qualitative factors, such as relative magnitude, the nature and extent of the effect of these factors on the evaluation or measurement of the subject matter, and the interests of the intended users. The assessment of materiality and the relative importance of quantitative and qualitative factors in a particular engagement are matters for the practitioner's judgment.

Assurance Engagement Risk

47. Assurance engagement risk is the risk that the practitioner expresses an inappropriate conclusion when the subject matter information is materially misstated⁹. In a reasonable assurance engagement, the practitioner reduces assurance engagement risk to an acceptably low level in the circumstances of the engagement to obtain reasonable assurance as the basis for a positive form of expression of the practitioner's conclusion. The level of assurance engagement risk is higher in a limited assurance engagement than in a reasonable assurance engagement because of the different nature, timing or extent of evidence-gathering procedures. However, in a limited assurance engagement, the combination of the nature, timing and extent of evidence-gathering procedures is at least sufficient for the practitioner to obtain a meaningful level of assurance as the basis for a negative form of expression. To be meaningful, the level of assurance obtained by the practitioner is likely to enhance the intended users' confidence about the subject matter information to a degree that is clearly more than inconsequential.

48. In general, assurance engagement risk can be represented by the following components, although not all of these components will necessarily be present or significant for all assurance engagements:

- (a) The risk that the subject matter information is materially misstated, which in turn consists of:
 - (i) *Inherent risk*: the susceptibility of the subject matter information to a material misstatement, assuming that there are no related controls; and
 - (ii) *Control risk*: the risk that a material misstatement that could occur will not be prevented, or detected and corrected, on a timely basis by related internal controls. When control risk is relevant to the subject matter, some control risk will always exist because of the inherent limitations of the design and operation of internal control; and
- (b) *Detection risk*: the risk that the practitioner will not detect a material misstatement that exists.

The degree to which the practitioner considers each of these components is affected by the engagement circumstances, in particular by the nature of the subject matter and whether a reasonable assurance or a limited assurance engagement is being performed.

Nature, Timing and Extent of Evidence-gathering Procedures

49. The exact nature, timing and extent of evidence-gathering procedures will vary from one engagement to the next. In theory, infinite variations in evidence-gathering procedures are possible. In practice, however, these are difficult to communicate clearly and unambiguously. The practitioner attempts to communicate them clearly and unambiguously and uses the form appropriate to a reasonable assurance engagement or a limited assurance engagement.¹⁰

⁹ (a) This includes the risk, in those direct reporting engagements where the subject matter information is presented only in the practitioner's conclusion, that the practitioner inappropriately concludes that the subject matter does, in all material respects, conform with the criteria, for example: "In our opinion, internal control is effective, in all material respects, based on XYZ criteria".

(b) In addition to assurance engagement risk, the practitioner is exposed to the risk of expressing an inappropriate conclusion when the subject matter information is not materially misstated, and risks through loss from litigation, adverse publicity, or other events arising in connection with a subject matter reported on. These risks are not part of assurance engagement risk.

¹⁰ Where the subject matter information is made up of a number of aspects, separate conclusions may be provided on each aspect. While not all such conclusions need to relate to the same level of evidence-gathering procedures, each conclusion is expressed in the form that is appropriate to either a reasonable assurance or a limited assurance engagement.

I.62 Auditing Pronouncements

50. "Reasonable assurance" is a concept relating to accumulating evidence necessary for the practitioner to conclude in relation to the subject matter information taken as a whole. To be in a position to express a conclusion in the positive form required in a reasonable assurance engagement, it is necessary for the practitioner to obtain sufficient appropriate evidence as part of an iterative, systematic engagement process involving:

- (a) Obtaining an understanding of the subject matter and other engagement circumstances which, depending on the subject matter, includes obtaining an understanding of internal control;
- (b) Based on that understanding, assessing the risks that the subject matter information may be materially misstated;
- (c) Responding to assessed risks, including developing overall responses, and determining the nature, timing and extent of further procedures;
- (d) Performing further procedures clearly linked to the identified risks, using a combination of inspection, observation, confirmation, recalculation, re-performance, analytical procedures and inquiry. Such further procedures involve substantive procedures including, where applicable, obtaining corroborating information from sources independent of the responsible party, and depending on the nature of the subject matter, tests of the operating effectiveness of controls; and
- (e) Evaluating the sufficiency and appropriateness of evidence.

51. "Reasonable assurance" is less than absolute assurance. Reducing assurance engagement risk to zero is very rarely attainable or cost beneficial as a result of factors such as the following:

- The use of selective testing.
- The inherent limitations of internal control.
- The fact that much of the evidence available to the practitioner is persuasive rather than conclusive.
- The use of judgment in gathering and evaluating evidence and forming conclusions based on that evidence.
- In some cases, the characteristics of the subject matter when evaluated or measured against the identified criteria.

52. Both reasonable assurance and limited assurance engagements require the application of assurance skills and techniques and the gathering of sufficient appropriate evidence as part of an iterative, systematic engagement process that includes obtaining an understanding of the subject matter and other engagement circumstances. The nature, timing and extent of procedures for gathering sufficient appropriate evidence in a limited assurance engagement are, however, deliberately limited relative to a reasonable assurance engagement. For some subject matters, there may be specific pronouncements to provide guidance on procedures for gathering sufficient appropriate evidence for a limited assurance engagement. For example, SRE 2400¹¹ (Revised), "Engagements to Review Financial Statements" establishes that sufficient appropriate evidence for reviews of financial statements is obtained primarily through analytical procedures and inquiries. In the absence of a relevant pronouncement, the procedures for gathering sufficient appropriate evidence will vary with the circumstances of the engagement, in particular, the subject matter,

¹¹ Published in May 2010 issue of the Journal.

and the needs of the intended users and the engaging party, including relevant time and cost constraints. For both reasonable assurance and limited assurance engagements, if the practitioner becomes aware of a matter that leads the practitioner to question whether a material modification should be made to the subject matter information, the practitioner pursues the matter by performing other procedures sufficient to enable the practitioner to report.

Quantity and Quality of Available Evidence

53. The quantity or quality of available evidence is affected by:

- (a) The characteristics of the subject matter and subject matter information. For example, less objective evidence might be expected when information about the subject matter is future-oriented rather than historical (see paragraph 31); and
- (b) Circumstances of the engagement other than the characteristics of the subject matter, when evidence that could reasonably be expected to exist is not available because of, for example, the timing of the practitioner's appointment, an entity's document retention policy, or a restriction imposed by the responsible party.

Ordinarily, available evidence will be persuasive rather than conclusive.

54. An unqualified conclusion is not appropriate for either type of assurance engagement in the case of a material limitation on the scope of the practitioner's work, that is, when:

- (a) Circumstances prevent the practitioner from obtaining evidence required to reduce assurance engagement risk to the appropriate level; or
- (b) The responsible party or the engaging party imposes a restriction that prevents the practitioner from obtaining evidence required to reduce assurance engagement risk to the appropriate level.

Assurance Report

55. The practitioner provides a written report containing a conclusion that conveys the assurance obtained about the subject matter information. SAs, SREs and SAEs establish basic elements for assurance reports. In addition, the practitioner considers other reporting responsibilities, including communicating with those charged with governance when it is appropriate to do so.

56. In an assertion-based engagement, the practitioner's conclusion can be worded either:

- (a) In terms of the responsible party's assertion (for example: "In our opinion *the responsible party's* assertion that internal control is effective, in all material respects, based on *XYZ criteria*, is fairly stated"); or
- (b) Directly in terms of the subject matter and the criteria (for example: "In our opinion internal control is effective, in all material respects, based on *XYZ criteria*").

In a direct reporting engagement, the practitioner's conclusion is worded directly in terms of the subject matter and the criteria.

57. In a reasonable assurance engagement, the practitioner expresses the conclusion in the positive form, for example: "In our opinion internal control is effective, in all material respects, based on *XYZ criteria*". This form of expression conveys "reasonable assurance". Having performed evidence-gathering procedures of a nature, timing and extent that were reasonable given the characteristics of the subject matter and other relevant engagement circumstances described in the assurance report, the practitioner has obtained

I.64 Auditing Pronouncements

sufficient appropriate evidence to reduce assurance engagement risk to an acceptably low level.

58. In a limited assurance engagement, the practitioner expresses the conclusion in the negative form, for example, “based on our work described in this report, nothing has come to our attention that causes us to believe that internal control is not effective, in all material respects, based on XYZ criteria”. This form of expression conveys a level of “limited assurance” that is proportional to the level of the practitioner’s evidence-gathering procedures given the characteristics of the subject matter and other engagement circumstances described in the assurance report.

59. A practitioner does not express an unqualified conclusion for either type of assurance engagement when the following circumstances exist and, in the practitioner’s judgment, the effect of the matter is or may be material:

- (a) There is a limitation on the scope of the practitioner’s work (see paragraph 54). The practitioner expresses a qualified conclusion or a disclaimer of conclusion depending on how material or pervasive the limitation is. In some cases the practitioner considers withdrawing from the engagement.
- (b) In those cases where:
 - (i) The practitioner’s conclusion is worded in terms of the responsible party’s assertion, and that assertion is not fairly stated, in all material respects; or
 - (ii) The practitioner’s conclusion is worded directly in terms of the subject matter and the criteria, and the subject matter information is materially misstated,¹²The practitioner expresses a qualified or adverse conclusion depending on how material or pervasive the matter is.
- (c) When it is discovered after the engagement has been accepted, that the criteria are unsuitable or the subject matter is not appropriate for an assurance engagement. The practitioner expresses:
 - (i) A qualified conclusion or adverse conclusion depending on how material or pervasive the matter is, when the unsuitable criteria or inappropriate subject matter is likely to mislead the intended users; or
 - (ii) A qualified conclusion or a disclaimer of conclusion depending on how material or pervasive the matter is, in other cases.

In some cases, the practitioner considers withdrawing from the engagement.

Inappropriate Use of the Practitioner’s Name

60. A practitioner is associated with a subject matter when the practitioner reports on information about that subject matter or consents to the use of the practitioner’s name in a professional connection with that subject matter. If the practitioner is not associated in this manner, third parties can assume no responsibility of the practitioner. If the practitioner learns that a party is inappropriately using the practitioner’s name in association with a subject matter, the practitioner requires the party to cease doing so. The practitioner also considers what other steps may be needed, such as informing any known third party users of the inappropriate use of the practitioner’s name or seeking legal advice.

¹² In those direct reporting engagements where the subject matter information is presented only in the practitioner’s conclusion, and the practitioner concludes that the subject matter does not, in all material respects, conform with the criteria, for example: “In our opinion, except for [...], internal control is effective, in all material respects, based on XYZ criteria,” such a conclusion would also be considered to be qualified (or adverse as appropriate).

Material Modifications to International Framework for Assurance Engagements

Deletions

1. The International Framework issued by the IAASB specifically makes it clear that such Framework is also relevant to professional accountants in public sector. However, since the Standards, Statements, General Clarifications and Guidance Notes issued by the ICAI are equally applicable in case of all engagements, irrespective of the form, nature and size of the entity, this Framework does not specifically mention that aspect.
2. Paragraph 6 of the International Framework issued by the IAASB refers to Part B of the International Code of Ethics regarding threats to independence, accepted safeguards and the public interest, which is applicable to professional accountants in public practice, has been deleted since the Code of Ethics issued by the ICAI is woven around the Chartered Accountants Act, 1949 and Schedules annexed thereto.

Appendix

Differences Between Reasonable Assurance Engagements and Limited Assurance Engagements

This Appendix outlines the differences between a reasonable assurance engagement and a limited assurance engagement discussed in the Framework (see in particular the referenced paragraphs).

Type of Engagement	Objective	Evidence-gathering procedures ¹³	The Assurance Report
Reasonable Assurance Engagement	A reduction in assurance engagement risk to an acceptably low level in the circumstances of the engagement as the basis for a positive form of expression of the practitioner's conclusion (Paragraph 10)	<ul style="list-style-type: none"> ➤ Sufficient appropriate evidence is obtained as part of a systematic engagement process that includes: ➤ Obtaining an understanding of the engagement circumstances; ➤ Assessing risks; ➤ Responding to assessed risks; ➤ Performing further procedures using a combination of inspection, observation, confirmation, recalculation, re-performance, analytical procedures and inquiry. Such further procedures involve substantive procedures, including, where applicable, obtaining corroborating information, and depending on the nature of the subject matter, tests of the operating effectiveness of controls; and ➤ Evaluating the evidence obtained (Paragraphs 50 and 51) 	Description of the engagement circumstances and a positive form of expression of the conclusion (Paragraph 57)

¹³ A detailed discussion of evidence-gathering requirement is only possible within SAEs for specific subject matters.

I.66 Auditing Pronouncements

Limited Assurance Engagement	A reduction in assurance engagement risk to a level that is acceptable in the circumstances of the engagement but where that risk is greater than for a reasonable assurance engagement, as the basis for a negative form of expression of the practitioner's conclusion (Paragraph 10)	Sufficient appropriate evidence is obtained as part of a systematic engagement process that includes obtaining an understanding of the subject matter and other engagement circumstances, but in which procedures are deliberately limited relative to reasonable assurance engagement (Paragraph 52)	Description of the engagement circumstances, and a negative form of expression of the conclusion (Paragraph 58)

SA 200 *

**Overall Objectives of the Independent Auditor and
the Conduct of an Audit in Accordance with
Standards on Auditing**
*(Effective for all audits relating to accounting periods
beginning on or after April 1, 2010)*

Introduction

Scope of this SA

1. This Standard on Auditing (SA) establishes the independent auditor's overall responsibilities when conducting an audit of financial statements in accordance with SAs. Specifically, it sets out the overall objectives of the independent auditor, and explains the nature and scope of an audit designed to enable the independent auditor to meet those objectives. It also explains the scope, authority and structure of the SAs, and includes requirements establishing the general responsibilities of the independent auditor applicable in all audits, including the obligation to comply with the SAs. The independent auditor is referred to as "the auditor" hereafter.
2. SAs are written in the context of an audit of financial statements by an auditor. They are to be adapted as necessary in the circumstances when applied to audits of other historical financial information.

An Audit of Financial Statements

3. The purpose of an audit is to enhance the degree of confidence of intended users in the financial statements. This is achieved by the expression of an opinion by the auditor on whether the financial statements are prepared, in all material respects, in accordance with an applicable financial reporting framework. In the case of most general purpose frameworks, that opinion is on whether the financial statements are presented fairly, in all material respects, or give a true and fair view in accordance with the framework. An audit conducted in accordance with SAs and relevant ethical requirements enables the auditor to form that opinion. (Ref: Para. A1)
4. The financial statements subject to audit are those of the entity, prepared and presented by management of the entity with oversight from those charged with governance. SAs do not impose responsibilities on management or those charged with governance and do not override laws and regulations that govern their responsibilities. However, an audit in accordance with SAs is conducted on the premise that management and, where appropriate, those charged with governance have responsibilities that are fundamental to the conduct of the audit. The audit of the financial statements does not relieve management or those charged with governance of those responsibilities. (Ref: Para. A2-A11)
5. As the basis for the auditor's opinion, SAs require the auditor to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error. Reasonable assurance is a high level of assurance. It is obtained when the auditor has obtained sufficient appropriate audit evidence to reduce audit risk (i.e., the risk that the auditor expresses an

* Published in March, 2010 issue of the Journal.

inappropriate opinion when the financial statements are materially misstated) to an acceptably low level. However, reasonable assurance is not an absolute level of assurance, because there are inherent limitations of an audit which result in most of the audit evidence on which the auditor draws conclusions and bases the auditor's opinion being persuasive rather than conclusive. (Ref: Para. A28-A52)

6. The concept of materiality is applied by the auditor both in planning and performing the audit, and in evaluating the effect of identified misstatements on the audit and of uncorrected misstatements, if any, on the financial statements¹. In general, misstatements, including omissions, are considered to be material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements. Judgments about materiality are made in the light of surrounding circumstances, and are affected by the auditor's perception of the financial information needs of users of the financial statements, and by the size or nature of a misstatement, or a combination of both. The auditor's opinion deals with the financial statements as a whole and therefore the auditor is not responsible for the detection of misstatements that are not material to the financial statements as a whole.

7. The SAs contain objectives, requirements and application and other explanatory material that are designed to support the auditor in obtaining reasonable assurance. The SAs require that the auditor exercise professional judgment and maintain professional skepticism throughout the planning and performance of the audit and, among other things:

- Identify and assess risks of material misstatement, whether due to fraud or error, based on an understanding of the entity and its environment, including the entity's internal control.
- Obtain sufficient appropriate audit evidence about whether material misstatements exist, through designing and implementing appropriate responses to the assessed risks.
- Form an opinion on the financial statements based on conclusions drawn from the audit evidence obtained.

8. The form of opinion expressed by the auditor will depend upon the applicable financial reporting framework and any applicable laws or regulations. (Ref: Para. A12-A13)

9. The auditor may also have certain other communication and reporting responsibilities to users, management, those charged with governance, or parties outside the entity, in relation to matters arising from the audit. These may be established by the SAs or by applicable laws or regulations².

Effective Date

10. This SA is effective for audits of financial statements for periods beginning on or after April 1, 2010.

Overall Objectives of the Auditor

11. In conducting an audit of financial statements, the overall objectives of the auditor are:

- (a) To obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, thereby enabling the auditor to express an opinion on whether the financial statements are prepared, in all material respects, in accordance with an applicable financial reporting framework; and
- (b) To report on the financial statements, and communicate as required by the SAs, in accordance with the

¹ SA 320, "Materiality in Planning and Performing an Audit" and SA 450, "Evaluation of Misstatements Identified during the Audit".

² See, for example, SA 260, "Communication with Those Charged with Governance"; and paragraph 43 of SA 240, "The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements".

auditor's findings.

12. In all cases when reasonable assurance cannot be obtained and a qualified opinion in the auditor's report is insufficient in the circumstances for purposes of reporting to the intended users of the financial statements, the SAs require that the auditor disclaim an opinion or withdraw from the engagement, where withdrawal is legally permitted.

Definitions

13. For purposes of the SAs, the following terms have the meanings attributed below:

(a) Applicable financial reporting framework – The financial reporting framework adopted by management and, where appropriate, those charged with governance in the preparation and presentation of the financial statements that is acceptable in view of the nature of the entity and the objective of the financial statements, or that is required by law or regulation.

The term "fair presentation framework" is used to refer to a financial reporting framework that requires compliance with the requirements of the framework and:

- (i) Acknowledges explicitly or implicitly that, to achieve fair presentation of the financial statements, it may be necessary for management to provide disclosures beyond those specifically required by the framework; or
- (ii) Acknowledges explicitly that it may be necessary for management to depart from a requirement of the framework to achieve fair presentation of the financial statements. Such departures are expected to be necessary only in extremely rare circumstances.

The term "compliance framework" is used to refer to a financial reporting framework that requires compliance with the requirements of the framework, but does not contain the acknowledgements in (i) or (ii) above.

(b) Audit evidence – Information used by the auditor in arriving at the conclusions on which the auditor's opinion is based. Audit evidence includes both information contained in the accounting records underlying the financial statements and other information. For purposes of the SAs:

- (i) Sufficiency of audit evidence is the measure of the quantity of audit evidence. The quantity of the audit evidence needed is affected by the auditor's assessment of the risks of material misstatement and also by the quality of such audit evidence.
- (ii) Appropriateness of audit evidence is the measure of the quality of audit evidence; that is, its relevance and its reliability in providing support for the conclusions on which the auditor's opinion is based.

(c) Audit risk – The risk that the auditor expresses an inappropriate audit opinion when the financial statements are materially misstated. Audit risk is a function of the risks of material misstatement and detection risk.

(d) Auditor – "Auditor" is used to refer to the person or persons conducting the audit, usually the engagement partner or other members of the engagement team, or, as applicable, the firm. Where an SA expressly intends that a requirement or responsibility be fulfilled by the engagement partner, the term "engagement partner" rather than "auditor" is used. "Engagement partner" and "firm" are to be read as referring to their public sector equivalents where relevant.

(e) Detection risk – The risk that the procedures performed by the auditor to reduce audit risk to an acceptably low level will not detect a misstatement that exists and that could be material, either individually or when aggregated with other misstatements.

(f) Financial statements – A structured representation of historical financial information, including related

I.70 Auditing Pronouncements

notes, intended to communicate an entity's economic resources or obligations at a point in time or the changes therein for a period of time in accordance with a financial reporting framework. The related notes ordinarily comprise a summary of significant accounting policies and other explanatory information. The term "financial statements" ordinarily refers to a complete set of financial statements as determined by the requirements of the applicable financial reporting framework, but can also refer to a single financial statement.

- (g) Historical financial information – Information expressed in financial terms in relation to a particular entity, derived primarily from that entity's accounting system, about economic events occurring in past time periods or about economic conditions or circumstances at points in time in the past.
- (h) Management – The person(s) with executive responsibility for the conduct of the entity's operations. For some entities in some jurisdictions, management includes some or all of those charged with governance, for example, executive members of a governance board, or an owner-manager.
- (i) Misstatement – A difference between the amount, classification, presentation, or disclosure of a reported financial statement item and the amount, classification, presentation, or disclosure that is required for the item to be in accordance with the applicable financial reporting framework. Misstatements can arise from error or fraud.

When the auditor expresses an opinion on whether the financial statements are presented fairly, in all material respects, or give a true and fair view, misstatements also include those adjustments of amounts, classifications, presentation, or disclosures that, in the auditor's judgment, are necessary for the financial statements to be presented fairly, in all material respects, or to give a true and fair view.

- (j) Premise, relating to the responsibilities of management and, where appropriate, those charged with governance, on which an audit is conducted – That management and, where appropriate, those charged with governance have the following responsibilities that are fundamental to the conduct of an audit in accordance with SAs. That is, responsibility:
 - (i) For the preparation and presentation of the financial statements in accordance with the applicable financial reporting framework; this includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of financial statements that are free from material misstatement, whether due to fraud or error; and
 - (ii) To provide the auditor with:
 - a. All information, such as records and documentation, and other matters that are relevant to the preparation and presentation of the financial statements;
 - b. Any additional information that the auditor may request from management and, where appropriate, those charged with governance; and
 - c. Unrestricted access to those within the entity from whom the auditor determines it necessary to obtain audit evidence.

In the case of a fair presentation framework, the responsibility is for the preparation and *fair* presentation of the financial statements in accordance with the financial reporting framework; or the preparation of financial statements *that give a true and fair view* in accordance with the financial reporting framework. This applies to all references to "preparation and presentation of the financial statements" in the SAs.

The "premise, relating to the responsibilities of management and, where appropriate, those charged with governance, on which an audit is conducted" may also be referred to as the "premise".

- (k) Professional judgment – The application of relevant training, knowledge and experience, within the

context provided by auditing, accounting and ethical standards, in making informed decisions about the courses of action that are appropriate in the circumstances of the audit engagement.

- (l) Professional skepticism – An attitude that includes a questioning mind, being alert to conditions which may indicate possible misstatement due to error or fraud, and a critical assessment of audit evidence.
- (m) Reasonable assurance – In the context of an audit of financial statements, a high, but not absolute, level of assurance.
- (n) Risk of material misstatement – The risk that the financial statements are materially misstated prior to audit. This consists of two components, described as follows at the assertion level:
 - (i) Inherent risk – The susceptibility of an assertion about a class of transaction, account balance or disclosure to a misstatement that could be material, either individually or when aggregated with other misstatements, before consideration of any related controls.
 - (ii) Control risk – The risk that a misstatement that could occur in an assertion about a class of transaction, account balance or disclosure and that could be material, either individually or when aggregated with other misstatements, will not be prevented, or detected and corrected, on a timely basis by the entity's internal control.
- (o) Those charged with governance – The person(s) or organisation(s) (e.g., a corporate trustee) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. This includes overseeing the financial reporting process. For some entities in some jurisdictions, those charged with governance may include management personnel, for example, executive members of a governance board of a private or public sector entity, or an owner-manager.

Requirements

Ethical Requirements Relating to an Audit of Financial Statements

14. The auditor shall comply with relevant ethical requirements, including those pertaining to independence, relating to financial statement audit engagements. (Ref: Para. A14-A17)

Professional Skepticism

15. The auditor shall plan and perform an audit with professional skepticism recognising that circumstances may exist that cause the financial statements to be materially misstated. (Ref: Para. A18-A22)

Professional Judgment

16. The auditor shall exercise professional judgment in planning and performing an audit of financial statements. (Ref: Para. A23-A27)

Sufficient Appropriate Audit Evidence and Audit Risk

17. To obtain reasonable assurance, the auditor shall obtain sufficient appropriate audit evidence to reduce audit risk to an acceptably low level and thereby enable the auditor to draw reasonable conclusions on which to base the auditor's opinion. (Ref: Para. A28-A52)

Conduct of an Audit in Accordance with SAs

Complying with SAs Relevant to the Audit

18. The auditor shall comply with all SAs relevant to the audit. An SA is relevant to the audit when the SA is in effect and the circumstances addressed by the SA exist. (Ref: Para. A53-A56)

19. The auditor shall have an understanding of the entire text of an SA, including its application and other explanatory material, to understand its objectives and to apply its requirements properly. (Ref: Para. A57-A65)

I.72 Auditing Pronouncements

20. The auditor shall not represent compliance with SAs in the auditor's report unless the auditor has complied with the requirements of this SA and all other SAs relevant to the audit.

Objectives Stated in Individual SAs

21. To achieve the overall objectives of the auditor, the auditor shall use the objectives stated in relevant SAs in planning and performing the audit, having regard to the interrelationships among the SAs, to: (Ref: Para. A66-A68)

- (a) Determine whether any audit procedures in addition to those required by the SAs are necessary in pursuance of the objectives stated in the SAs; and (Ref: Para. A69)
- (b) Evaluate whether sufficient appropriate audit evidence has been obtained. (Ref: Para. A70)

Complying with Relevant Requirements

22. Subject to paragraph 23, the auditor shall comply with each requirement of an SA unless, in the circumstances of the audit:

- (a) The entire SA is not relevant; or
- (b) The requirement is not relevant because it is conditional and the condition does not exist. (Ref: Para. A71-A72)

23. In exceptional circumstances, the auditor may judge it necessary to depart from a relevant requirement in an SA. In such circumstances, the auditor shall perform alternative audit procedures to achieve the aim of that requirement. The need for the auditor to depart from a relevant requirement is expected to arise only where the requirement is for a specific procedure to be performed and, in the specific circumstances of the audit, that procedure would be ineffective in achieving the aim of the requirement. (Ref: Para. A73)

Failure to Achieve an Objective

24. If an objective in a relevant SA cannot be achieved, the auditor shall evaluate whether this prevents the auditor from achieving the overall objectives of the auditor and thereby requires the auditor, in accordance with the SAs, to modify the auditor's opinion or withdraw from the engagement. Failure to achieve an objective represents a significant matter requiring documentation in accordance with SA 230³. (Ref: Para. A74-A75)

Application and Other Explanatory Material

An Audit of Financial Statements

Scope of the Audit (Ref: Para. 3)

A1. The auditor's opinion on the financial statements deals with whether the financial statements are prepared, in all material respects, in accordance with the applicable financial reporting framework. Such an opinion is common to all audits of financial statements. The auditor's opinion therefore does not assure, for example, the future viability of the entity nor the efficiency or effectiveness with which management has conducted the affairs of the entity. In some cases, however, the applicable laws and regulations may require auditors to provide opinions on other specific matters, such as the effectiveness of internal control, or the consistency of a separate management report with the financial statements. While the SAs include requirements and guidance in relation to such matters to the extent that they are relevant to forming an opinion on the financial statements, the auditor would be required to undertake further work if the auditor had additional responsibilities to provide such opinions.

³ SA 230, "Audit Documentation", paragraph 8(c).

Preparation of the Financial Statements (Ref: Para. 4)

A2. An audit in accordance with SAs is conducted on the premise that management and, where appropriate, those charged with governance have responsibility:

- (a) For the preparation and presentation of the financial statements in accordance with the applicable financial reporting framework; this includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of financial statements that are free from material misstatement, whether due to fraud or error; and
- (b) To provide the auditor with:
 - (i) All information, such as records and documentation, and other matters that are relevant to the preparation and presentation of the financial statements;
 - (ii) Any additional information that the auditor may request from management and, where appropriate, those charged with governance; and
 - (iii) Unrestricted access to those within the entity from whom the auditor determines it necessary to obtain audit evidence.

A3. As part of their responsibility for the preparation and presentation of the financial statements, management and, where appropriate, those charged with governance are responsible for:

- The identification of the applicable financial reporting framework, in the context of any relevant laws or regulations.
- The preparation and presentation of the financial statements in accordance with that framework.
- An adequate description of that framework in the financial statements.

The preparation of the financial statements requires management to exercise judgment in making accounting estimates that are reasonable in the circumstances, as well as to select and apply appropriate accounting policies. These judgments are made in the context of the applicable financial reporting framework.

A4. The financial statements may be prepared in accordance with a financial reporting framework designed to meet:

- The common financial information needs of a wide range of users (i.e., “general purpose financial statements”); or
- The financial information needs of specific users (i.e., “special purpose financial statements”).

A5. The applicable financial reporting framework often encompasses financial reporting standards established by an authorised or recognised standards setting organisation, or legislative or regulatory requirements. In some cases, the financial reporting framework may encompass both financial reporting standards established by an authorised or recognised standards setting organisation and legislative or regulatory requirements. Other sources may provide direction on the application of the applicable financial reporting framework. In some cases, the applicable financial reporting framework may encompass such other sources, or may even consist only of such sources. Such other sources may include:

- The legal and ethical environment, including statutes, regulations, court decisions, and professional ethical obligations in relation to accounting matters;
- Published accounting interpretations of varying authority issued by standards setting, professional or regulatory organisations;
- Published views of varying authority on emerging accounting issues issued by standards setting,

I.74 Auditing Pronouncements

professional or regulatory organisations;

- General and industry practices widely recognised and prevalent; and
- Accounting literature.

Where conflicts exist between the financial reporting framework and the sources from which direction on its application may be obtained, or among the sources that encompass the financial reporting framework, the source with the highest authority prevails.

A6. The requirements of the applicable financial reporting framework determine the form and content of the financial statements. Although the framework may not specify how to account for or disclose all transactions or events, it ordinarily embodies sufficient broad principles that can serve as a basis for developing and applying accounting policies that are consistent with the concepts underlying the requirements of the framework.

A7. Some financial reporting frameworks are fair presentation frameworks, while others are compliance frameworks. Financial reporting frameworks that encompass primarily the financial reporting standards established by an organisation that is authorised or recognised to promulgate standards to be used by entities for preparing and presenting general purpose financial statements are often designed to achieve fair presentation.

A8. The requirements of the applicable financial reporting framework also determine what constitutes a complete set of financial statements. In the case of many frameworks, financial statements are intended to provide information about the state of affairs, results of operations and cash flows of an entity. For such frameworks, a complete set of financial statements would include a balance sheet; statement of profit and loss; a cash flow statement; and related notes. For some other financial reporting frameworks, a single financial statement and the related notes might constitute a complete set of financial statements:

- For example, normally, in government departments and local bodies, the primary financial statement is a statement of cash receipts and payments.
- Other examples of a single financial statement, each of which would include related notes, are:
 - Balance sheet.
 - Statement of profit & loss.
 - Statement of cash flows.
 - Statement of operations by product lines.

A9. SA 210 establishes requirements and provides guidance on determining the acceptability of the applicable financial reporting framework⁴. SA 800 deals with special considerations when financial statements are prepared in accordance with a special purpose framework⁵.

A10. Because of the significance of the premise to the conduct of an audit, the auditor is required to obtain agreement from management and, where appropriate, those charged with governance that they acknowledge and understand their responsibilities set out in paragraph A2 as a precondition for accepting the audit engagement⁶. The auditor is also required to obtain written representations about whether

⁴ SA 210, "Agreeing the Terms of Audit Engagements", paragraph 6(a).

⁵ SA 800, "Special Considerations—Audits of Financial Statements Prepared in Accordance with Special Purpose Frameworks", paragraph 8.

⁶ SA 210, paragraph 6(b).

management and, where appropriate, those charged with governance have fulfilled those responsibilities⁷.

Considerations Specific to Central/State Governments and Related Government Entities

A11. The mandates for audits of the financial statements of certain entities, such as, Central/State governments and related government entities (for example, agencies, boards, commissions), may be broader than those of other entities. As a result, the premise, relating to management's responsibilities, on which an audit of the financial statements of such an entity is conducted may include additional responsibilities, such as, the responsibility for the execution of transactions and events in accordance with legislation or proper authority.

Form of the Auditor's Opinion (Ref: Para. 8)

A12. The opinion expressed by the auditor is on whether the financial statements are prepared, in all material respects, in accordance with the applicable financial reporting framework. The form of the auditor's opinion, however, will depend upon the applicable financial reporting framework and any applicable laws or regulations. Most financial reporting frameworks include requirements relating to the presentation of the financial statements; for such frameworks, preparation of the financial statements in accordance with the applicable financial reporting framework includes presentation.

A13. Where the financial reporting framework is a fair presentation framework, as is generally the case for general purpose financial statements, the opinion required by the SAs is on whether the financial statements are presented fairly, in all material respects, or give a true and fair view. Where the financial reporting framework is a compliance framework, the opinion required is on whether the financial statements are prepared, in all material respects, in accordance with the framework. Unless specifically stated otherwise, references in the SAs to the auditor's opinion cover both forms of opinion.

Ethical Requirements Relating to an Audit of Financial Statements (Ref: Para. 14)

A14. The auditor is subject to relevant ethical requirements, including those pertaining to independence, relating to financial statement audit engagements. Relevant ethical requirements ordinarily comprise the Code of Ethics issued by the Institute of Chartered Accountants of India.

A15. The Code establishes the following as the fundamental principles of professional ethics relevant to the auditor when conducting an audit of financial statements and provides a conceptual framework for applying those principles;

- (a) Integrity;
- (b) Objectivity;
- (c) Professional competence and due care;
- (d) Confidentiality; and
- (e) Professional behavior.

A16. In the case of an audit engagement it is in the public interest and, therefore, required by the Code of Ethics, that the auditor be independent of the entity subject to the audit. The Code describes independence as comprising both independence of mind and independence in appearance. The auditor's independence from the entity safeguards the auditor's ability to form an audit opinion without being affected by influences that might compromise that opinion. Independence enhances the auditor's ability to act with integrity, to be objective and to maintain an attitude of professional skepticism.

⁷ SA 580, "Written Representations", paragraphs 10-11.

I.76 Auditing Pronouncements

A17. Standard on Quality Control (SQC) 1⁸ sets out the responsibilities of the firm for establishing policies and procedures designed to provide it with reasonable assurance that the firm and its personnel comply with relevant ethical requirements, including those pertaining to independence⁹. SA 220 sets out the engagement partner's responsibilities with respect to relevant ethical requirements. These include evaluating whether members of the engagement team have complied with relevant ethical requirements, determining the appropriate action if matters come to the engagement partner's attention that indicate that members of the engagement team have not complied with relevant ethical requirements, and forming a conclusion on compliance with independence requirements that apply to the audit engagement¹⁰. SA 220 recognises that the engagement team is entitled to rely on a firm's systems in meeting its responsibilities with respect to quality control procedures applicable to the individual audit engagement, unless information provided by the firm or other parties suggests otherwise.

Professional Skepticism (Ref: Para. 15)

A18. Professional skepticism includes being alert to, for example:

- Audit evidence that contradicts other audit evidence obtained.
- Information that brings into question the reliability of documents and responses to inquiries to be used as audit evidence.
- Conditions that may indicate possible fraud.
- Circumstances that suggest the need for audit procedures in addition to those required by the SAs.

A19. Maintaining professional skepticism throughout the audit is necessary if the auditor is, for example, to reduce the risks of:

- Overlooking unusual circumstances.
- Over generalising when drawing conclusions from audit observations.
- Using inappropriate assumptions in determining the nature, timing, and extent of the audit procedures and evaluating the results thereof.

A20. Professional skepticism is necessary to the critical assessment of audit evidence. This includes questioning contradictory audit evidence and the reliability of documents and responses to inquiries and other information obtained from management and those charged with governance. It also includes consideration of the sufficiency and appropriateness of audit evidence obtained in the light of the circumstances, for example in the case where fraud risk factors exist and a single document, of a nature that is susceptible to fraud, is the sole supporting evidence for a material financial statement amount.

A21. The auditor may accept records and documents as genuine unless the auditor has reason to believe the contrary. Nevertheless, the auditor is required to consider the reliability of information to be used as audit evidence¹¹. In cases of doubt about the reliability of information or indications of possible fraud (for example, if conditions identified during the audit cause the auditor to believe that a document may not be authentic or that terms in a document may have been falsified), the SAs require that the auditor investigate further and

⁸ Standard on Quality Control (SQC) 1, "Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements".

⁹ SQC 1, paragraphs 14-27.

¹⁰ SA 220, "Quality Control for an Audit of Financial Statements", paragraphs 9-12.

¹¹ SA 500, "Audit Evidence", paragraphs 7-9.

determine what modifications or additions to audit procedures are necessary to resolve the matter¹².

A22. The auditor cannot be expected to disregard past experience of the honesty and integrity of the entity's management and those charged with governance. Nevertheless, a belief that management and those charged with governance are honest and have integrity does not relieve the auditor of the need to maintain professional skepticism or allow the auditor to be satisfied with less-than-persuasive audit evidence when obtaining reasonable assurance.

Professional Judgment (Ref: Para. 16)

A23. Professional judgment is essential to the proper conduct of an audit. This is because interpretation of relevant ethical requirements and the SAs and the informed decisions required throughout the audit cannot be made without the application of relevant knowledge and experience to the facts and circumstances. Professional judgment is necessary in particular regarding decisions about:

- Materiality and audit risk.
- The nature, timing, and extent of audit procedures used to meet the requirements of the SAs and gather audit evidence.
- Evaluating whether sufficient appropriate audit evidence has been obtained, and whether more needs to be done to achieve the objectives of the SAs and thereby, the overall objectives of the auditor.
- The evaluation of management's judgments in applying the entity's applicable financial reporting framework.
- The drawing of conclusions based on the audit evidence obtained, for example, assessing the reasonableness of the estimates made by management in preparing the financial statements.

A24. The distinguishing feature of the professional judgment expected of an auditor is that it is exercised by an auditor whose training, knowledge and experience have assisted in developing the necessary competencies to achieve reasonable judgments.

A25. The exercise of professional judgment in any particular case is based on the facts and circumstances that are known by the auditor. Consultation on difficult or contentious matters during the course of the audit, both within the engagement team and between the engagement team and others at the appropriate level within or outside the firm, such as that required by SA 220¹³, assist the auditor in making informed and reasonable judgments.

A26. Professional judgment can be evaluated based on whether the judgment reached reflects a competent application of auditing and accounting principles and is appropriate in the light of, and consistent with, the facts and circumstances that were known to the auditor up to the date of the auditor's report.

A27. Professional judgment needs to be exercised throughout the audit. It also needs to be appropriately documented. In this regard, the auditor is required to prepare audit documentation sufficient to enable an experienced auditor, having no previous connection with the audit, to understand the significant professional judgments made in reaching conclusions on significant matters arising during the audit¹⁴. Professional judgment is not to be used as the justification for decisions that are not otherwise supported by the facts and circumstances of the engagement or sufficient appropriate audit evidence.

¹² SA 240, paragraph 13; SA 500, paragraph 11; and SA 505, paragraphs 10-11, and 16.

¹³ SA 220, paragraph 18.

¹⁴ SA 230, paragraph 8.

Sufficient Appropriate Audit Evidence and Audit Risk (Ref: Para. 5 and 17)

Sufficiency and Appropriateness of Audit Evidence

A28. Audit evidence is necessary to support the auditor's opinion and report. It is cumulative in nature and is primarily obtained from audit procedures performed during the course of the audit. It may, however, also include information obtained from other sources such as previous audits (provided the auditor has determined whether changes have occurred since the previous audit that may affect its relevance to the current audit¹⁵) or a firm's quality control procedures for client acceptance and continuance. In addition to other sources inside and outside the entity, the entity's accounting records are an important source of audit evidence. Also, information that may be used as audit evidence may have been prepared by an expert employed or engaged by the entity. Audit evidence comprises both information that supports and corroborates management's assertions, and any information that contradicts such assertions. In addition, in some cases, the absence of information (for example, management's refusal to provide a requested representation) is used by the auditor, and therefore, also constitutes audit evidence. Most of the auditor's work in forming the auditor's opinion consists of obtaining and evaluating audit evidence.

A29. The sufficiency and appropriateness of audit evidence are interrelated. Sufficiency is the measure of the quantity of audit evidence. The quantity of audit evidence needed is affected by the auditor's assessment of the risks of misstatement (the higher the assessed risks, the more audit evidence is likely to be required) and also by the quality of such audit evidence (the higher the quality, the less may be required). Obtaining more audit evidence, however, may not compensate for its poor quality.

A30. Appropriateness is the measure of the quality of audit evidence; that is, its relevance and its reliability in providing support for the conclusions on which the auditor's opinion is based. The reliability of evidence is influenced by its source and by its nature, and is dependent on the individual circumstances under which it is obtained.

A31. Whether sufficient appropriate audit evidence has been obtained to reduce audit risk to an acceptably low level, and thereby enable the auditor to draw reasonable conclusions on which to base the auditor's opinion, is a matter of professional judgment. SA 500 and other relevant SAs establish additional requirements and provide further guidance applicable throughout the audit regarding the auditor's considerations in obtaining sufficient appropriate audit evidence.

Audit Risk

A32. Audit risk is a function of the risks of material misstatement and detection risk. The assessment of risks is based on audit procedures to obtain information necessary for that purpose and evidence obtained throughout the audit. The assessment of risks is a matter of professional judgment, rather than a matter capable of precise measurement.

A33. For purposes of the SAs, audit risk does not include the risk that the auditor might express an opinion that the financial statements are materially misstated when they are not. This risk is ordinarily insignificant. Further, audit risk is a technical term related to the process of auditing; it does not refer to the auditor's business risks such as loss from litigation, adverse publicity, or other events arising in connection with the audit of financial statements.

Risks of Material Misstatement

A34. The risks of material misstatement may exist at two levels:

- The overall financial statement level; and

¹⁵ SA 315, "Identifying and Assessing the Risks of Material Misstatement Through Understanding the Entity and Its Environment", paragraph 9.

- The assertion level for classes of transactions, account balances, and disclosures.

A35. Risks of material misstatement at the overall financial statement level refer to risks of material misstatement that relate pervasively to the financial statements as a whole and potentially affect many assertions.

A36. Risks of material misstatement at the assertion level are assessed in order to determine the nature, timing, and extent of further audit procedures necessary to obtain sufficient appropriate audit evidence. This evidence enables the auditor to express an opinion on the financial statements at an acceptably low level of audit risk. Auditors use various approaches to accomplish the objective of assessing the risks of material misstatement. For example, the auditor may make use of a model that expresses the general relationship of the components of audit risk in mathematical terms to arrive at an acceptable level of detection risk. Some auditors find such a model to be useful when planning audit procedures.

A37. The risks of material misstatement at the assertion level consist of two components: inherent risk and control risk. Inherent risk and control risk are the entity's risks; they exist independently of the audit of the financial statements.

A38. Inherent risk is higher for some assertions and related classes of transactions, account balances, and disclosures than for others. For example, it may be higher for complex calculations or for accounts consisting of amounts derived from accounting estimates that are subject to significant estimation uncertainty. External circumstances giving rise to business risks may also influence inherent risk. For example, technological developments might make a particular product obsolete, thereby causing inventory to be more susceptible to overstatement. Factors in the entity and its environment that relate to several or all of the classes of transactions, account balances, or disclosures may also influence the inherent risk related to a specific assertion. Such factors may include, for example, a lack of sufficient working capital to continue operations or a declining industry characterised by a large number of business failures.

A39. Control risk is a function of the effectiveness of the design, implementation and maintenance of internal control by management to address identified risks that threaten the achievement of the entity's objectives relevant to preparation of the entity's financial statements. However, internal control, no matter how well designed and operated, can only reduce, but not eliminate, risks of material misstatement in the financial statements, because of the inherent limitations of internal control. These include, for example, the possibility of human errors or mistakes, or of controls being circumvented by collusion or inappropriate management override. Accordingly, some control risk will always exist. The SAs provide the conditions under which the auditor is required to, or may choose to, test the operating effectiveness of controls in determining the nature, timing and extent of substantive procedures to be performed¹⁶.

A40. The SAs do not ordinarily refer to inherent risk and control risk separately, but rather to a combined assessment of the "risks of material misstatement". However, the auditor may make separate or combined assessments of inherent and control risk depending on preferred audit techniques or methodologies and practical considerations. The assessment of the risks of material misstatement may be expressed in quantitative terms, such as in percentages, or in non-quantitative terms. In any case, the need for the auditor to make appropriate risk assessments is more important than the different approaches by which they may be made.

A41. SA 315 establishes requirements and provides guidance on identifying and assessing the risks of material misstatement at the financial statement and assertion levels.

¹⁶ SA 330, "The Auditor's Responses to Assessed Risks", paragraphs 7-17.

I.80 Auditing Pronouncements

Detection Risk

A42. For a given level of audit risk, the acceptable level of detection risk bears an inverse relationship to the assessed risks of material misstatement at the assertion level. For example, the greater the risks of material misstatement the auditor believes exists, the less the detection risk that can be accepted and, accordingly, the more persuasive the audit evidence required by the auditor.

A43. Detection risk relates to the nature, timing, and extent of the auditor's procedures that are determined by the auditor to reduce audit risk to an acceptably low level. It is therefore a function of the effectiveness of an audit procedure and of its application by the auditor. Matters such as:

- adequate planning;
- proper assignment of personnel to the engagement team;
- the application of professional skepticism; and
- supervision and review of the audit work performed,

assist to enhance the effectiveness of an audit procedure and of its application and reduce the possibility that an auditor might select an inappropriate audit procedure, misapply an appropriate audit procedure, or misinterpret the audit results.

A44. SA 300¹⁷ and SA 330 establish requirements and provide guidance on planning an audit of financial statements and the auditor's responses to assessed risks. Detection risk, however, can only be reduced, not eliminated, because of the inherent limitations of an audit. Accordingly, some detection risk will always exist.

Inherent Limitations of an Audit

A45. The auditor is not expected to, and cannot, reduce audit risk to zero and cannot therefore obtain absolute assurance that the financial statements are free from material misstatement due to fraud or error. This is because there are inherent limitations of an audit, which result in most of the audit evidence on which the auditor draws conclusions and bases the auditor's opinion being persuasive rather than conclusive. The inherent limitations of an audit arise from:

- The nature of financial reporting;
- The nature of audit procedures; and
- The need for the audit to be conducted within a reasonable period of time and at a reasonable cost.

The Nature of Financial Reporting

A46. The preparation of financial statements involves judgment by management in applying the requirements of the entity's applicable financial reporting framework to the facts and circumstances of the entity. In addition, many financial statement items involve subjective decisions or assessments or a degree of uncertainty, and there may be a range of acceptable interpretations or judgments that may be made. Consequently, some financial statement items are subject to an inherent level of variability which cannot be eliminated by the application of additional auditing procedures. For example, this is often the case with respect to certain accounting estimates. Nevertheless, the SAs require the auditor to give specific consideration to whether accounting estimates are reasonable in the context of the applicable financial reporting framework and related disclosures, and to the qualitative aspects of the entity's accounting

¹⁷ SA 300, "Planning an Audit of Financial Statements".

practices, including indicators of possible bias in management's judgments¹⁸.

The Nature of Audit Procedures

A47. There are practical and legal limitations on the auditor's ability to obtain audit evidence. For example:

- There is the possibility that management or others may not provide, intentionally or unintentionally, the complete information that is relevant to the preparation and presentation of the financial statements or that has been requested by the auditor. Accordingly, the auditor cannot be certain of the completeness of information, even though the auditor has performed audit procedures to obtain assurance that all relevant information has been obtained.
- Fraud may involve sophisticated and carefully organised schemes designed to conceal it. Therefore, audit procedures used to gather audit evidence may be ineffective for detecting an intentional misstatement that involves, for example, collusion to falsify documentation which may cause the auditor to believe that audit evidence is valid when it is not. The auditor is neither trained as nor expected to be an expert in the authentication of documents.
- An audit is not an official investigation into alleged wrongdoing. Accordingly, the auditor is not given specific legal powers, such as the power of search, which may be necessary for such an investigation.

Timeliness of Financial Reporting and the Balance between Benefit and Cost

A48. The matter of difficulty, time, or cost involved is not in itself a valid basis for the auditor to omit an audit procedure for which there is no alternative or to be satisfied with audit evidence that is less than persuasive. Appropriate planning assists in making sufficient time and resources available for the conduct of the audit. Notwithstanding this, the relevance of information, and thereby its value, tends to diminish over time, and there is a balance to be struck between the reliability of information and its cost. This is recognised in certain financial reporting frameworks (see, for example, the "Framework for the Preparation and Presentation of Financial Statements" issued by the Institute of Chartered Accountants of India (ICAI)). Therefore, there is an expectation by users of financial statements that the auditor will form an opinion on the financial statements within a reasonable period of time and at a reasonable cost, recognising that it is impracticable to address all information that may exist or to pursue every matter exhaustively on the assumption that information is in error or fraudulent until proved otherwise.

A49. Consequently, it is necessary for the auditor to:

- Plan the audit so that it will be performed in an effective manner;
- Direct audit effort to areas most expected to contain risks of material misstatement, whether due to fraud or error, with correspondingly less effort directed at other areas; and
- Use testing and other means of examining populations for misstatements.

A50. In light of the approaches described in paragraph A49, the SAs contain requirements for the planning and performance of the audit and require the auditor, among other things, to:

- Have a basis for the identification and assessment of risks of material misstatement at the financial statement and assertion levels by performing risk assessment procedures and related activities¹⁹; and
- Use testing and other means of examining populations in a manner that provides a reasonable basis

¹⁸ SA 540, "Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures", and Revised SA 700, "Forming an Opinion and Reporting on Financial Statements", paragraph 12.

¹⁹ SA 315, paragraphs 5-10.

I.82 Auditing Pronouncements

for the auditor to draw conclusions about the population²⁰.

Other Matters that Affect the Inherent Limitations of an Audit

A51. In the case of certain assertions or subject matters, the potential effects of the inherent limitations on the auditor's ability to detect material misstatements are particularly significant. Such assertions or subject matters include:

- Fraud, particularly fraud involving senior management or collusion. See SA 240 for further discussion.
- The existence and completeness of related party relationships and transactions. See SA 550 ²¹ for further discussion.
- The occurrence of non-compliance with laws and regulations. See SA 250 ²² for further discussion.
- Future events or conditions that may cause an entity to cease to continue as a going concern. See SA 570 ²³ for further discussion.

Relevant SAs identify specific audit procedures to assist in mitigating the effect of the inherent limitations.

A52. Because of the inherent limitations of an audit, there is an unavoidable risk that some material misstatements of the financial statements may not be detected, even though the audit is properly planned and performed in accordance with SAs. Accordingly, the subsequent discovery of a material misstatement of the financial statements resulting from fraud or error does not by itself indicate a failure to conduct an audit in accordance with SAs. However, the inherent limitations of an audit are not a justification for the auditor to be satisfied with less-than-persuasive audit evidence. Whether the auditor has performed an audit in accordance with SAs is determined by the audit procedures performed in the circumstances, the sufficiency and appropriateness of the audit evidence obtained as a result thereof and the suitability of the auditor's report based on an evaluation of that evidence in light of the overall objectives of the auditor.

Conduct of an Audit in Accordance with SAs

Nature of the SAs (Ref: Para. 18)

A53. The SAs, taken together, provide the standards for the auditor's work in fulfilling the overall objectives of the auditor. The SAs deal with the general responsibilities of the auditor, as well as the auditor's further considerations relevant to the application of those responsibilities to specific topics.

A54. The scope, effective date and any specific limitation of the applicability of a specific SA is made clear in the SA. Unless otherwise stated in the SA, the auditor is permitted to apply an SA before the effective date specified therein.

A55. In performing an audit, the auditor may be required to comply with legal or regulatory requirements in addition to the SAs. The SAs do not override laws and regulations that govern an audit of financial statements. In the event that those laws and regulations differ from the SAs, an audit conducted only in accordance with laws and regulations will not automatically comply with SAs.

A56. The SAs are also relevant to engagements in case of certain entities, such as, Central/State governments and related government entities (for example, agencies, boards, commissions). The auditor's responsibilities of those entities, however, may be affected by the audit mandate, or by obligations on those

²⁰ SA 330; SA 500; SA 520, "Analytical Procedures", and SA 530, "Audit Sampling".

²¹ SA 550, "Related Parties".

²² SA 250, "Consideration of Laws and Regulations in an Audit of Financial Statements".

²³ SA 570, "Going Concern".

entities arising from legislation, regulation, ministerial directives, government policy requirements, or resolutions of the legislature, which may encompass a broader scope than an audit of financial statements in accordance with the SAs. These additional responsibilities are not dealt with in the SAs. They may be dealt with in the relevant laws and regulations in which the entities are operating.

Contents of the SAs (Ref: Para. 19)

A57. In addition to objectives and requirements (requirements are expressed in the SAs using “shall”), an SA contains related guidance in the form of application and other explanatory material. It may also contain introductory material that provides context relevant to a proper understanding of the SA, and definitions. The entire text of an SA, therefore, is relevant to an understanding of the objectives stated in an SA and the proper application of the requirements of an SA.

A58. Where necessary, the application and other explanatory material provides further explanation of the requirements of an SA and guidance for carrying them out. In particular, it may:

- Explain more precisely what a requirement means or is intended to cover.
- Include examples of procedures that may be appropriate in the circumstances.

While such guidance does not in itself impose a requirement, it is relevant to the proper application of the requirements of an SA. The application and other explanatory material may also provide background information on matters addressed in an SA.

A59. Appendices form part of the application and other explanatory material. The purpose and intended use of an appendix are explained in the body of the related SA or within the title and introduction of the appendix itself.

A60. Introductory material may include, as needed, such matters as explanation of:

- The purpose and scope of the SA, including how the SA relates to other SAs.
- The subject matter of the SA.
- The respective responsibilities of the auditor and others in relation to the subject matter of the SA.
- The context in which the SA is set.

A61. An SA may include, in a separate section under the heading “Definitions”, a description of the meanings attributed to certain terms for purposes of the SAs. These are provided to assist in the consistent application and interpretation of the SAs, and are not intended to override definitions that may be established for other purposes, whether in law, regulation or otherwise. Unless otherwise indicated, those terms will carry the same meanings throughout the SAs. The Glossary of Terms relating to Engagement and Quality Control Standards issued by the Auditing and Assurance Standards Board contains a complete listing of terms defined in the SAs. It also includes descriptions of other terms found in SAs to assist in common and consistent interpretation.

A62. When appropriate, additional considerations specific to audits of smaller entities and to certain entities, such as, Central/State governments and related government entities (for example, agencies, boards, commissions), are included within the application and other explanatory material of an SA. These additional considerations assist in the application of the requirements of the SA in the audit of such entities. They do not, however, limit or reduce the responsibility of the auditor to apply and comply with the requirements of the SAs.

Considerations Specific to Smaller Entities

A63. For purposes of specifying additional considerations to audits of smaller entities, a “smaller entity”

I.84 Auditing Pronouncements

refers to an entity which typically possesses qualitative characteristics such as:

- (a) Concentration of ownership and management in a small number of individuals (often a single individual – either a natural person or another enterprise that owns the entity provided the owner exhibits the relevant qualitative characteristics); and
- (b) One or more of the following:
 - (i) Straightforward or uncomplicated transactions;
 - (ii) Simple record-keeping;
 - (iii) Few lines of business and few products within business lines;
 - (iv) Few internal controls;
 - (v) Few levels of management with responsibility for a broad range of controls; or
 - (vi) Few personnel, many having a wide range of duties.

These qualitative characteristics are not exhaustive, they are not exclusive to smaller entities, and smaller entities do not necessarily display all of these characteristics.

A64. The considerations specific to smaller entities included in the SAs have been developed primarily with unlisted entities in mind. Some of the considerations, however, may be helpful in audits of smaller listed entities.

A65. The SAs refer to the proprietor of a smaller entity who is involved in running the entity on a day-to-day basis as the “owner-manager”.

Objectives Stated in Individual SAs (Ref: Para. 21)

A66. Each SA contains one or more objectives which provide a link between the requirements and the overall objectives of the auditor. The objectives in individual SAs serve to focus the auditor on the desired outcome of the SA, while being specific enough to assist the auditor in:

- Understanding what needs to be accomplished and, where necessary, the appropriate means of doing so; and
- Deciding whether more needs to be done to achieve them in the particular circumstances of the audit.

A67. Objectives are to be understood in the context of the overall objectives of the auditor stated in paragraph 11 of this SA. As with the overall objectives of the auditor, the ability to achieve an individual objective is equally subject to the inherent limitations of an audit.

A68. In using the objectives, the auditor is required to have regard to the interrelationships among the SAs. This is because, as indicated in paragraph A53, the SAs deal in some cases with general responsibilities and in others with the application of those responsibilities to specific topics. For example, this SA requires the auditor to adopt an attitude of professional skepticism; this is necessary in all aspects of planning and performing an audit but is not repeated as a requirement of each SA. At a more detailed level, SA 315 and SA 330 contain, among other things, objectives and requirements that deal with the auditor’s responsibilities to identify and assess the risks of material misstatement and to design and perform further audit procedures to respond to those assessed risks, respectively; these objectives and requirements apply throughout the audit. An SA dealing with specific aspects of the audit (for example, SA 540) may expand on how the objectives and requirements of such SAs as SA 315 and SA 330 are to be applied in relation to the subject of the SA but does not repeat them. Thus, in achieving the objective stated in SA 540 , the auditor has regard to the objectives and requirements of other relevant SAs.

Use of Objectives to Determine Need for Additional Audit Procedures (Ref: Para. 21(a))

A69. The requirements of the SAs are designed to enable the auditor to achieve the objectives specified in the SAs, and thereby the overall objectives of the auditor. The proper application of the requirements of the SAs by the auditor is therefore expected to provide a sufficient basis for the auditor's achievement of the objectives. However, because the circumstances of audit engagements vary widely and all such circumstances cannot be anticipated in the SAs, the auditor is responsible for determining the audit procedures necessary to fulfill the requirements of the SAs and to achieve the objectives. In the circumstances of an engagement, there may be particular matters that require the auditor to perform audit procedures in addition to those required by the SAs to meet the objectives specified in the SAs.

Use of Objectives to Evaluate Whether Sufficient Appropriate Audit Evidence Has Been Obtained (Ref: Para. 21(b))

A70. The auditor is required to use the objectives to evaluate whether sufficient appropriate audit evidence has been obtained in the context of the overall objectives of the auditor. If as a result the auditor concludes that the audit evidence is not sufficient and appropriate, then the auditor may follow one or more of the following approaches to meeting the requirement of paragraph 21(b):

- Evaluate whether further relevant audit evidence has been, or will be, obtained as a result of complying with other SAs;
- Extend the work performed in applying one or more requirements; or
- Perform other procedures judged by the auditor to be necessary in the circumstances. Where none of the above is expected to be practical or possible in the circumstances, the auditor will not be able to obtain sufficient appropriate audit evidence and is required by the SAs to determine the effect on the auditor's report or on the auditor's ability to complete the engagement.

Complying with Relevant Requirements

Relevant Requirements (Ref: Para. 22)

A71. In some cases, an SA (and therefore all of its requirements) may not be relevant in the circumstances. For example, if an entity does not have an internal audit function, nothing in SA 610²⁴ is not relevant.

A72. Within a relevant SA, there may be conditional requirements. Such a requirement is relevant when the circumstances envisioned in the requirement apply and the condition exists. In general, the conditionality of a requirement will either be explicit or implicit, for example:

- The requirement to modify the auditor's opinion if there is a limitation of scope²⁵ represents an explicit conditional requirement.
- The requirement to communicate significant deficiencies in internal control identified during the audit to those charged with governance²⁶, which depends on the existence of such identified significant deficiencies; and the requirement to obtain sufficient appropriate audit evidence regarding the presentation and disclosure of segment information in accordance with the applicable financial reporting framework²⁷, which depends on that framework requiring or permitting such disclosure, represent implicit conditional requirements.

²⁴ SA 610, "Using the Work of Internal Auditors".

²⁵ SA 705, "Modifications to the Opinion in the Independent Auditor's Report", paragraph 13.

²⁶ SA 265, "Communicating Deficiencies in Internal Control to Those Charged with Governance and Management", paragraph 9.

²⁷ SA 501, "Audit Evidence – Specific Considerations for Selected Items", paragraph 13.

Departure from a Requirement (Ref: Para. 23)

A73. SA 230 establishes documentation requirements in those exceptional circumstances where the auditor departs from a relevant requirement²⁸. The SAs do not call for compliance with a requirement that is not relevant in the circumstances of the audit.

Failure to Achieve an Objective (Ref: Para. 24)

A74. Whether an objective has been achieved is a matter for the auditor's professional judgment. That judgment takes account of the results of audit procedures performed in complying with the requirements of the SAs, and the auditor's evaluation of whether sufficient appropriate audit evidence has been obtained and whether more needs to be done in the particular circumstances of the audit to achieve the objectives stated in the SAs. Accordingly, circumstances that may give rise to a failure to achieve an objective include those that:

- Prevent the auditor from complying with the relevant requirements of an SA.
- Result in its not being practicable or possible for the auditor to carry out the additional audit procedures or obtain further audit evidence as determined necessary from the use of the objectives in accordance with paragraph 21, for example due to a limitation in the available audit evidence.

A75. Audit documentation that meets the requirements of SA 230 and the specific documentation requirements of other relevant SAs provides evidence of the auditor's basis for a conclusion about the achievement of the overall objectives of the auditor. While it is unnecessary for the auditor to document separately (as in a checklist, for example) that individual objectives have been achieved, the documentation of a failure to achieve an objective assists the auditor's evaluation of whether such a failure has prevented the auditor from achieving the overall objectives of the auditor.

Modifications *vis-à-vis* ISA 200, "Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with International Standards on Auditing"

Deletion

Paragraph A11 of ISA 200 deals with the additional responsibilities for the execution of transactions and events in accordance with legislation or proper authority in case of public sector entities. Further, paragraph A57 of ISA 200 (A56 of SA 200) deals with the auditor's additional responsibility arising out of the mandatory or obligatory laws or regulations applicable to that public sector entity. These additional responsibilities are not dealt by the SAs but dealt by the laws or regulations under which the public sector entity operates. Also, paragraph A63 of ISA 200 (A62 of SA 200) deals with the inclusion of the paragraph specific to public sector entities in the application and explanatory material section. Since as mentioned in the "Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services", the Standards issued by the Auditing and Assurance Standards Board, apply equally to all entities, irrespective of their form, nature and size, a specific reference to applicability of the Standard to public sector entities has been deleted.

Further, it is also possible that such a specific situation may exist in case of Central/State governments or related government entities, pursuant to a requirement under the statute or regulation under which they operate. Accordingly, the spirit of paragraphs A11, A57 and A63 in ISA, highlighting such fact, has been retained.

²⁸ SA 230, paragraph 12.

SA 210*

Agreeing the Terms of Audit Engagements
(Effective for all audits relating to accounting periods beginning on or after April 1, 2010)

Introduction

Scope of this SA

1. This Standard on Auditing (SA) deals with the auditor's responsibilities in agreeing the terms of the audit engagement with management and, where appropriate, those charged with governance. This includes establishing that certain preconditions for an audit, responsibility for which rests with management and, where appropriate, those charged with governance, are present. SA 220¹ deals with those aspects of engagement acceptance that are within the control of the auditor. (Ref: Para. A1)

Effective Date

2. This SA is effective for audits of financial statements for periods beginning on or after April 1, 2010.

Objective

3. The objective of the auditor is to accept or continue an audit engagement only when the basis upon which it is to be performed has been agreed, through:

- (a) Establishing whether the preconditions for an audit are present; and
- (b) Confirming that there is a common understanding between the auditor and management and, where appropriate, those charged with governance of the terms of the audit engagement.

Definitions

4. For purposes of the SAs, the following term has the meaning attributed below:

Preconditions for an audit – The use by management of an acceptable financial reporting framework² in the preparation of the financial statements and the agreement of management and, where appropriate, those charged with governance to the premise³ on which an audit is conducted.

5. For the purposes of this SA, references to "management" should be read hereafter as "management and, where appropriate, those charged with governance".

Requirements

Preconditions for an Audit

6. In order to establish whether the preconditions for an audit are present, the auditor shall:
- (a) Determine whether the financial reporting framework to be applied in the preparation of the financial statements is acceptable; and (Ref: Para. A2-A9)

*Published in September, 2009 issue of the Journal.

¹ SA 220, "Quality Control for an Audit of Financial Statements", published in March, 2010 issue of the Journal.

² SA 200, "Overall Objectives of the Independent Auditor and the Conduct of an Audit in accordance with Standards on Auditing", paragraph 13 (a).

³ SA 200, Paragraph 13 (j).

I.88 Auditing Pronouncements

- (b) Obtain the agreement of management that it acknowledges and understands its responsibility: (Ref: Para A10-A13, A19)
 - (i) For the preparation of the financial statements in accordance with the applicable financial reporting framework, including where relevant their fair presentation; (Ref: Para. A14)
 - (ii) For such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; and (Ref: Para. A15-A18)
 - (iii) To provide the auditor with:
 - a. Access to all information of which management is aware that is relevant to the preparation of the financial statements such as records, documentation and other matters;
 - b. Additional information that the auditor may request from management for the purpose of the audit; and
 - c. Unrestricted access to persons within the entity from whom the auditor determines it necessary to obtain audit evidence.

Limitation on Scope Prior to Audit Engagement Acceptance

7. If management or those charged with governance impose a limitation on the scope of the auditor's work in the terms of a proposed audit engagement such that the auditor believes the limitation will result in the auditor disclaiming an opinion on the financial statements, the auditor shall not accept such a limited engagement as an audit engagement, unless required by law or regulation to do so.

Other Factors Affecting Audit Engagement Acceptance

8. If the preconditions for an audit are not present, the auditor shall discuss the matter with management. Unless required by law or regulation to do so, the auditor shall not accept the proposed audit engagement:
- (a) If the auditor has determined that the financial reporting framework to be applied in the preparation of the financial statements is unacceptable, except as provided in paragraph 19; or
 - (b) If the agreement referred to in paragraph 6(b) has not been obtained.

Agreement on Audit Engagement Terms

9. The auditor shall agree the terms of the audit engagement with management or those charged with governance, as appropriate. (Ref: Para. A20)

10. Subject to paragraph 11, the agreed terms of the audit engagement shall be recorded in an audit engagement letter or other suitable form of written agreement and shall include: (Ref: Para. A21-A24)

- (a) The objective and scope of the audit of the financial statements;
- (b) The responsibilities of the auditor;
- (c) The responsibilities of management;
- (d) Identification of the applicable financial reporting framework for the preparation of the financial statements; and
- (e) Reference to the expected form and content of any reports to be issued by the auditor and a statement that there may be circumstances in which a report may differ from its expected form and content.

11. If law or regulation prescribes in sufficient detail the terms of the audit engagement referred to in paragraph 10, the auditor need not record them in a written agreement, except for the fact that such law or regulation applies and that management acknowledges and understands its responsibilities as set out in paragraph 6(b). (Ref: Para. A21, A25-A26)

12. If law or regulation prescribes responsibilities of management similar to those described in paragraph 6(b), the auditor may determine that the law or regulation includes responsibilities that, in the auditor's judgment, are equivalent in effect to those set out in that paragraph. For such responsibilities that are equivalent, the auditor may use the wording of the law or regulation to describe them in the written agreement. For those responsibilities that are not prescribed by law or regulation such that their effect is equivalent, the written agreement shall use the description in paragraph 6(b). (Ref: Para. A25)

Recurring Audits

13. On recurring audits, the auditor shall assess whether circumstances require the terms of the audit engagement to be revised and whether there is a need to remind the entity of the existing terms of the audit engagement. (Ref: Para. A27)

Acceptance of a Change in the Terms of the Audit Engagement

14. The auditor shall not agree to a change in the terms of the audit engagement where there is no reasonable justification for doing so. (Ref: Para. A28-A30)

15. If, prior to completing the audit engagement, the auditor is requested to change the audit engagement to an engagement that conveys a lower level of assurance, the auditor shall determine whether there is reasonable justification for doing so. (Ref: Para. A31-A32)

16. If the terms of the audit engagement are changed, the auditor and management shall agree on and record the new terms of the engagement in an engagement letter or other suitable form of written agreement.

17. If the auditor is unable to agree to a change of the terms of the audit engagement and is not permitted by management to continue the original audit engagement, the auditor shall:

- (a) Withdraw from the audit engagement where possible under applicable law or regulation; and
- (b) Determine whether there is any obligation, either contractual or otherwise, to report the circumstances to other parties, such as those charged with governance, owners or regulators.

Additional Considerations in Engagement Acceptance

Financial Reporting Standards⁴ Supplemented by Law or Regulation

18. If financial reporting standards established by an authorised or recognised standards setting organization are supplemented by law or regulation, the auditor shall determine whether there are any conflicts between the financial reporting standards and the additional requirements. If such conflicts exist, the auditor shall discuss with management the nature of the additional requirements and shall agree whether:

- (a) The additional requirements can be met through additional disclosures in the financial statements; or
- (b) The description of the applicable financial reporting framework in the financial statements can be amended accordingly.

If neither of the above actions is possible, the auditor shall determine whether it will be necessary to modify the auditor's opinion in accordance with SA 705⁵. (Ref: Para. A33)

⁴ Accounting Standards issued by the ICAI or Accounting Standards, notified by the Central Government by publishing the same as the Companies (Accounting Standards) Rules, 2006, or the Accounting Standards for Local Bodies issued by the ICAI, as may be applicable.

⁵ Standard on Auditing (SA) 705, "Modifications to the Opinion in the Independent Auditor's Report"; published in February, 2010 issue of the Journal.

I.90 Auditing Pronouncements

Financial Reporting Framework Prescribed by Law or Regulation—Other Matters Affecting Acceptance

19. If the auditor has determined that the financial reporting framework prescribed by law or regulation would be unacceptable but for the fact that it is prescribed by law or regulation, the auditor shall accept the audit engagement only if the following conditions are present: (Ref: Para. A34)

- (a) Management agrees to provide additional disclosures in the financial statements required to avoid the financial statements being misleading; and
- (b) It is recognised in the terms of the audit engagement that:
 - (i) The auditor's report on the financial statements will incorporate an Emphasis of Matter paragraph, drawing users' attention to the additional disclosures, in accordance with SA 706⁶ ; and
 - (ii) Unless the auditor is required by law or regulation to express the auditor's opinion on the financial statements by using the phrases "present fairly, in all material respects", or "give a true and fair view" in accordance with the applicable financial reporting framework, the auditor's opinion on the financial statements will not include such phrases.

20. If the conditions outlined in paragraph 19 are not present and the auditor is required by law or regulation to undertake the audit engagement, the auditor shall:

- (a) Evaluate the effect of the misleading nature of the financial statements on the auditor's report; and
- (b) Include appropriate reference to this matter in the terms of the audit engagement.

Auditor's Report Prescribed by Law or Regulation

21. In some cases, the law or regulation applicable to the entity prescribes the layout or wording of the auditor's report in a form or in terms that are significantly different from the requirements of SAs. In these circumstances, the auditor shall evaluate:

- (a) Whether users might misunderstand the assurance obtained from the audit of the financial statements and, if so,
- (b) Whether additional explanation in the auditor's report can mitigate possible misunderstanding⁷.

If the auditor concludes that additional explanation in the auditor's report cannot mitigate possible misunderstanding, the auditor shall not accept the audit engagement, unless required by law or regulation to do so. An audit conducted in accordance with such law or regulation does not comply with SAs. Accordingly, the auditor shall not include any reference within the auditor's report to the audit having been conducted in accordance with SAs⁸. (Ref: Para. A35-A36)

Application and Other Explanatory Material

Scope of this SA (Ref: Para. 1)

A1. Assurance engagements, which include audit engagements, may only be accepted when the practitioner considers that relevant ethical requirements such as independence and professional competence will be satisfied, and when the engagement exhibits certain characteristics⁹. The auditor's responsibilities in respect of ethical requirements in the context of the acceptance of an audit engagement and in so far as they

⁶ Standard on Auditing (SA) 706, "Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report", published in February, 2010 issue of the Journal.

⁷ SA 706.

⁸ SA 700, "Forming an Opinion and Reporting on Financial Statements", paragraph 43.

⁹ "Framework for Assurance Engagements," paragraph 16.

are within the control of the auditor are dealt with in SA 220¹⁰. This SA deals with those matters (or preconditions) that are within the control of the entity and upon which it is necessary for the auditor and the entity's management to agree.

Preconditions for an Audit

The Financial Reporting Framework (Ref: Para. 6(a))

A2. A condition for acceptance of an assurance engagement is that the criteria referred to in the definition of an assurance engagement are suitable and available to intended users¹¹. Criteria are the benchmarks used to evaluate or measure the subject matter including, where relevant, benchmarks for presentation and disclosure. Suitable criteria enable reasonably consistent evaluation or measurement of a subject matter within the context of professional judgment. For purposes of the SAs, the applicable financial reporting framework provides the criteria the auditor uses to audit the financial statements, including where relevant their fair presentation.

A3. Without an acceptable financial reporting framework, management does not have an appropriate basis for the preparation of the financial statements and the auditor does not have suitable criteria for auditing the financial statements. In many cases the auditor may presume that the applicable financial reporting framework is acceptable, as described in paragraphs A8-A9.

Determining the Acceptability of the Financial Reporting Framework

A4. Factors that are relevant to the auditor's determination of the acceptability of the financial reporting framework to be applied in the preparation of the financial statements include:

- The nature of the entity (for example, whether it is a business enterprise, or a not for profit organization);
- The purpose of the financial statements (for example, whether they are prepared to meet the common financial information needs of a wide range of users or the financial information needs of specific users);
- The nature of the financial statements (for example, whether the financial statements are a complete set of financial statements or a single financial statement); and
- Whether law or regulation prescribes the applicable financial reporting framework.

A5. Many users of financial statements are not in a position to demand financial statements tailored to meet their specific information needs. While all the information needs of specific users cannot be met, there are financial information needs that are common to a wide range of users. Financial statements prepared in accordance with a financial reporting framework designed to meet the common financial information needs of a wide range of users are referred to as general purpose financial statements.

A6. In some cases, the financial statements will be prepared in accordance with a financial reporting framework designed to meet the financial information needs of specific users. Such financial statements are referred to as special purpose financial statements. The financial information needs of the intended users will determine the applicable financial reporting framework in these circumstances. SA 800 discusses the acceptability of financial reporting frameworks designed to meet the financial information needs of specific users.¹²

¹⁰ SA 220, "Quality Control for an Audit of Financial Statements", paragraphs 9-11.

¹¹ "Framework for Assurance Engagements," paragraph 16(b)(ii).

¹² Standard on Auditing (SA) 800, "Special Considerations-Audits of Financial Statements Prepared in Accordance with Special Purpose Framework", paragraph 8.

I.92 Auditing Pronouncements

A7. Deficiencies in the applicable financial reporting framework that indicate that the framework is not acceptable may be encountered after the audit engagement has been accepted. When use of that framework is prescribed by law or regulation, the requirements of paragraphs 19-20 apply. When use of that framework is not prescribed by law or regulation, management may decide to adopt another framework that is acceptable. When management does so, as required by paragraph 16, new terms of the audit engagement are agreed to reflect the change in the framework as the previously agreed terms will no longer be accurate.

General purpose frameworks

A8. At present, there is no objective and authoritative basis that has been generally recognised globally for judging the acceptability of general purpose frameworks. In the absence of such a basis, financial reporting standards established by organizations that are authorised or recognised to promulgate standards to be used by certain types of entities are presumed to be acceptable for general purpose financial statements prepared by such entities, provided the organizations follow an established and transparent process involving deliberation and consideration of the views of a wide range of stakeholders. Examples of such financial reporting standards include:

- Accounting Standards issued by the Institute of Chartered Accountants of India (ICAI) and/ or Accounting Standards, notified by the Central Government by publishing the same as the Companies (Accounting Standards) Rules, 2006, as may be applicable;
- Accounting Standards for Local Bodies issued by the Institute of Chartered Accountants of India (ICAI);
- International Financial Reporting Standards (IFRSs) issued by the International Accounting Standards Board; and
- International Public Sector Accounting Standards (IPSASs) issued by the International Public Sector Accounting Standards Board.

These financial reporting standards are often identified as the applicable financial reporting framework in law or regulation governing the preparation of general purpose financial statements.

Financial reporting frameworks prescribed by law or regulation

A9. In accordance with paragraph 6(a), the auditor is required to determine whether the financial reporting framework, to be applied in the preparation of the financial statements, is acceptable. Appendix 2 contains guidance on determining the acceptability of the financial reporting framework. In case of some entities, law or regulation may prescribe the financial reporting framework to be used in the preparation of general purpose financial statements. In the absence of indications to the contrary, such a financial reporting framework is presumed to be acceptable for general purpose financial statements prepared by such entities. In the event that the framework is not considered to be acceptable, paragraphs 19-20 apply.

Agreement of the Responsibilities of Management (Ref: Para. 6(b))

A10. An audit in accordance with SAs is conducted on the premise that management has acknowledged and understands that it has the responsibilities set out in paragraph 6(b)¹³. In case of certain entities, such responsibilities may be specified in the applicable law or regulation. In others, there may be little or no legal or regulatory definition of such responsibilities. SAs do not override law or regulation in such matters. However, the concept of an independent audit requires that the auditor's role does not involve taking responsibility for the preparation of the financial statements or for the entity's related internal control, and that the auditor has a reasonable expectation of obtaining the information necessary for the audit in so far as management is able to provide or procure it. Accordingly, the premise is fundamental to the conduct of an

¹³ SA 200, Paragraph A2.

independent audit. To avoid misunderstanding, agreement is reached with management that it acknowledges and understands that it has such responsibilities as part of agreeing and recording the terms of the audit engagement in paragraphs 9-12.

A11. The way in which the responsibilities for financial reporting are divided between management and those charged with governance will vary according to the resources and structure of the entity and any relevant law or regulation, and the respective roles of management and those charged with governance within the entity. In most cases, management is responsible for execution while those charged with governance have oversight of management. In some cases, those charged with governance will have, or will assume, responsibility for approving the financial statements or monitoring the entity's internal control related to financial reporting. In larger or public entities, a subgroup of those charged with governance, such as an audit committee, may be charged with certain oversight responsibilities.

A12. SA 580 requires the auditor to request management to provide written representations that it has fulfilled certain of its responsibilities¹⁴. It may therefore be appropriate to make management aware that receipt of such written representations will be expected, together with written representations required by other SAs and, where necessary, written representations to support other audit evidence relevant to the financial statements or one or more specific assertions in the financial statements.

A13. Where management will not acknowledge its responsibilities, or agree to provide the written representations, the auditor will be unable to obtain sufficient appropriate audit evidence¹⁵. In such circumstances, it would not be appropriate for the auditor to accept the audit engagement, unless law or regulation requires the auditor to do so. In cases where the auditor is required to accept the audit engagement, the auditor may need to explain to management the importance of these matters, and the implications for the auditor's report.

Preparation of the Financial Statements (Ref: Para. 6(b)(i))

A14. Most financial reporting frameworks include requirements relating to the presentation of the financial statements; for such frameworks, preparation of the financial statements in accordance with the financial reporting framework includes presentation. In the case of a fair presentation framework the importance of the reporting objective of fair presentation is such that the premise agreed with management includes specific reference to fair presentation, or to the responsibility to ensure that the financial statements will "give a true and fair view" in accordance with the financial reporting framework.

Internal Control (Ref: Para. 6(b)(ii))

A15. Management maintains such internal control as it determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. Internal control, no matter how effective, can provide an entity with only reasonable assurance about achieving the entity's financial reporting objectives due to the inherent limitations of internal control¹⁶.

A16. An independent audit conducted in accordance with the SAs does not act as a substitute for the maintenance of internal control necessary for the preparation of financial statements by management. Accordingly, the auditor is required to obtain the agreement of management that it acknowledges and understands its responsibility for internal control. However, the agreement required by paragraph 6(b)(ii) does not imply that the auditor will find that internal control maintained by management has achieved its

¹⁴ SA 580, "Written Representations," paragraphs 10-11.

¹⁵ SA 580, paragraph A26.

¹⁶ SA 315, "Identifying and Assessing the Risks of Material Misstatement Through Understanding the Entity and Its Environment," paragraph A46.

I.94 Auditing Pronouncements

purpose or will be free of deficiencies.

A17. It is for management to determine what internal control is necessary to enable the preparation of the financial statements. The term “internal control” encompasses a wide range of activities within components that may be described as the control environment; the entity’s risk assessment process; the information system, including the related business processes relevant to financial reporting, and communication; control activities; and monitoring of controls. This division, however, does not necessarily reflect how a particular entity may design, implement and maintain its internal control, or how it may classify any particular component.¹⁷ An entity’s internal control (in particular, its accounting books and records, or accounting systems) will reflect the needs of management, the complexity of the business, the nature of the risks to which the entity is subject, and relevant laws or regulation.

A18. In some cases, law or regulation may refer to the responsibility of management for the adequacy of accounting books and records, or accounting systems. In some other cases, general practice may assume a distinction between accounting books and records or accounting systems on the one hand, and internal control or controls on the other. As accounting books and records, or accounting systems, are an integral part of internal control as referred to in paragraph A18, no specific reference is made to them in paragraph 6(b)(ii) for the description of the responsibility of management. To avoid misunderstanding, it may be appropriate for the auditor to explain to management the scope of this responsibility.

Considerations Relevant to Smaller Entities (Ref: Para. 6(b))

A19. One of the purposes of agreeing the terms of the audit engagement is to avoid misunderstanding about the respective responsibilities of management and the auditor. For example, when a third party has assisted with the preparation of the financial statements, it may be useful to remind management that the preparation of the financial statements in accordance with the applicable financial reporting framework remains its responsibility.

Agreement on Audit Engagement Terms

Agreeing the Terms of the Audit Engagement (Ref: Para. 9)

A20. The roles of management and those charged with governance in agreeing the terms of the audit engagement for the entity depend on the governance structure of the entity and relevant law or regulation.

*Audit Engagement Letter or Other Form of Written Agreement*¹⁸ (Ref: Para. 10-11)

A21. It is in the interests of both the entity and the auditor that the auditor sends an audit engagement letter before the commencement of the audit to help avoid misunderstandings with respect to the audit. In some entities, however, the objective and scope of an audit and the responsibilities of management and of the auditor may be sufficiently established by law, that is, they prescribe the matters described in paragraph 10. Although in these circumstances paragraph 11 permits the auditor to include in the engagement letter only reference to the fact that relevant law or regulation applies and that management acknowledges and understands its responsibilities as set out in paragraph 6(b), the auditor may nevertheless consider it appropriate to include the matters described in paragraph 10 in an engagement letter for the information of management.

Form and Content of the Audit Engagement Letter

A22. The form and content of the audit engagement letter may vary for each entity. Information included in

¹⁷ SA 315, paragraph A51 and Appendix 1.

¹⁸ In the paragraphs that follow, any reference to an audit engagement letter is to be taken as a reference to an audit engagement letter or other suitable form of written agreement.

the audit engagement letter on the auditor's responsibilities may be based on SA 200¹⁹. Paragraphs 6(b) and 12 of this SA deal with the description of the responsibilities of management. In addition to including the matters required by paragraph 10, an audit engagement letter may make reference to, for example:

- Elaboration of the scope of the audit, including reference to applicable legislation, regulations, SAs, and ethical and other pronouncements of professional bodies to which the auditor adheres.
- The form of any other communication of results of the audit engagement.
- The fact that because of the inherent limitations of an audit, together with the inherent limitations of internal control, there is an unavoidable risk that some material misstatements may not be detected, even though the audit is properly planned and performed in accordance with SAs.
- Arrangements regarding the planning and performance of the audit, including the composition of the audit team.
- The expectation that management will provide written representations (see also paragraph A13).
- The agreement of management to make available to the auditor draft financial statements and any accompanying other information in time to allow the auditor to complete the audit in accordance with the proposed timetable.
- The agreement of management to inform the auditor of facts that may affect the financial statements, of which management may become aware during the period from the date of the auditor's report to the date the financial statements are issued.
- The basis on which fees are computed and any billing arrangements.
- A request for management to acknowledge receipt of the audit engagement letter and to agree to the terms of the engagement outlined therein.
- The fact that the audit process may be subjected to a peer review under the Chartered Accountants Act, 1949.

A23. When relevant, the following points could also be made in the audit engagement letter:

- Arrangements concerning the involvement of other auditors and experts in some aspects of the audit.
- Arrangements concerning the involvement of internal auditors and other staff of the entity.
- Arrangements to be made with the predecessor auditor, if any, in the case of an initial audit.
- Any restriction of the auditor's liability when such possibility exists.
- A reference to any further agreements between the auditor and the entity.
- Any obligations to provide audit working papers to other parties.

An example of an audit engagement letter is set out in Appendix 1.

Audits of Components

A24. When the auditor of a parent entity is also the auditor of a component, the factors that may influence the decision whether to send a separate audit engagement letter to the component include the following:

- Who appoints the component auditor;

¹⁹ SA 200, paragraph 3-9.

I.96 Auditing Pronouncements

- Whether a separate auditor's report is to be issued on the component;
- Legal requirements in relation to audit appointments;
- Degree of ownership by parent; and
- Degree of independence of the component management from the parent entity.

Responsibilities of Management Prescribed by Law or Regulation (Ref: Para. 11-12)

A25. If, in the circumstances described in paragraphs A22 and A27, the auditor concludes that it is not necessary to record certain terms of the audit engagement in an audit engagement letter, the auditor is still required by paragraph 11 to seek the written agreement from management that it acknowledges and understands that it has the responsibilities set out in paragraph 6(b). However, in accordance with paragraph 12, such written agreement may use the wording of the law or regulation if such law or regulation establishes responsibilities for management that are equivalent in effect to those described in paragraph 6(b).

A26. In case of certain entities, such as, Central/State governments and related government entities (for example, agencies, boards, commissions), law or regulation governing the operations of that entities generally mandate the appointment of the auditor and commonly set out the auditor's responsibilities and powers, including the power to access an entity's records and other information. When law or regulation prescribes in sufficient detail the terms of the audit engagement, the auditor may nonetheless consider that there are benefits in issuing a fuller audit engagement letter than permitted by paragraph 11.

Recurring Audits (Ref: Para. 13)

A27. The auditor may decide not to send a new audit engagement letter or other written agreement each period. However, the following factors may make it appropriate to revise the terms of the audit engagement or to remind the entity of existing terms:

- Any indication that the entity misunderstands the objective and scope of the audit.
- Any revised or special terms of the audit engagement.
- A recent change of senior management.
- A significant change in ownership.
- A significant change in nature or size of the entity's business.
- A change in legal or regulatory requirements.
- A change in the financial reporting framework adopted in the preparation of the financial statements.
- A change in other reporting requirements.

Acceptance of a Change in the Terms of the Audit Engagement

Request to Change the Terms of the Audit Engagement (Ref: Para. 14)

A28. A request from the entity for the auditor to change the terms of the audit engagement may result from a change in circumstances affecting the need for the service, a misunderstanding as to the nature of an audit as originally requested or a restriction on the scope of the audit engagement, whether imposed by management or caused by other circumstances. The auditor, as required by paragraph 14, considers the justification given for the request, particularly the implications of a restriction on the scope of the audit engagement.

A29. A change in circumstances that affects the entity's requirements or a misunderstanding concerning the nature of the service originally requested may be considered a reasonable basis for requesting a change in the audit engagement.

A30. In contrast, a change may not be considered reasonable if it appears that the change relates to information that is incorrect, incomplete or otherwise unsatisfactory. An example might be where the auditor is unable to obtain sufficient appropriate audit evidence regarding receivables and the entity asks for the audit engagement to be changed to a review engagement to avoid a qualified opinion or a disclaimer of opinion.

Request to Change to a Review or a Related Service (Ref: Para. 15)

A31. Before agreeing to change an audit engagement to a review or a related service, an auditor who was engaged to perform an audit in accordance with SAs may need to assess, in addition to the matters referred to in paragraphs A29-A31 above, any legal or contractual implications of the change.

A32. If the auditor concludes that there is reasonable justification to change the audit engagement to a review or a related service, the audit work performed to the date of change may be relevant to the changed engagement; however, the work required to be performed and the report to be issued would be those appropriate to the revised engagement. In order to avoid confusing the reader, the report on the related service would not include reference to:

- (a) The original audit engagement; or
- (b) Any procedures that may have been performed in the original audit engagement, except where the audit engagement is changed to an engagement to undertake agreed- upon procedures and thus reference to the procedures performed is a normal part of the report.

Additional Considerations in Engagement Acceptance

Financial Reporting Standards Supplemented by Law or Regulation (Ref: Para. 18)

A33. In case of some entities, law or regulation may supplement the financial reporting standards established by an authorised or recognised standards setting organization with additional requirements relating to the preparation of financial statements. In such cases, the applicable financial reporting framework for the purposes of applying the SAs encompasses both the identified financial reporting framework and such additional requirements provided they do not conflict with the identified financial reporting framework. This may, for example, be the case when law or regulation prescribes disclosures in addition to those required by the financial reporting standards or when they narrow the range of acceptable choices that can be made within the financial reporting standards²⁰.

Financial Reporting Framework Prescribed by Law or Regulation—Other Matters Affecting Acceptance (Ref: Para. 19)

A34. Law or regulation may prescribe that the wording of the auditor's opinion use the phrases "present fairly, in all material respects" or "give a true and fair view" in a case where the auditor concludes that the applicable financial reporting framework prescribed by law or regulation would otherwise have been unacceptable. In this case, the terms of the prescribed wording of the auditor's report are significantly different from the requirements of SAs (see paragraph 21).

Auditor's Report Prescribed by Law or Regulation (Ref: Para. 21)

A35. SAs require that the auditor shall not represent compliance with SAs unless the auditor has complied with all of the SAs relevant to the audit²¹. When law or regulation prescribes the layout or wording of the auditor's report in a form or in terms that are significantly different from the requirements of SAs and the auditor concludes that additional explanation in the auditor's report cannot mitigate possible

²⁰ SA 700, "Forming an Opinion and Reporting on Financial Statements", paragraph 15.

²¹ SA 200, paragraph 20.

misunderstanding, the auditor may consider including a statement in the auditor's report that the audit is not conducted in accordance with SAs. The auditor is, however, encouraged to apply SAs, including the SAs that address the auditor's report, to the extent practicable, notwithstanding that the auditor is not permitted to refer to the audit being conducted in accordance with SAs.

A36. In case of certain entities, such as, Central/State governments and related government entities (for example, agencies, boards, commissions), specific requirements may exist within the legislation governing the audit mandate; for example, the auditor may be required to report directly to a regulator or the legislative body or the stakeholders if the entity attempts to limit the scope of the audit.

Material Modifications to ISA 210, "Agreeing the Terms of Audit Engagements"

Addition

Paragraph A8 of ISA 210 provides the examples of the financial reporting standards, which can be used for the preparation and presentation of general purpose financial statements. Since in India, financial reporting standards, used for the preparation and presentation of financial statements, can be 'Accounting Standards issued by the Institute of Chartered Accountants of India or Accounting Standards, notified under Companies (Accounting Standards) Rules, 2006' or 'Accounting Standards for Local Bodies issued by the Institute of Chartered Accountants of India (ICAI)', these have been added in the list of examples of financial reporting standards. References have accordingly been changed.

Deletions

1. Paragraph A10 of the ISA 210 deals with situations where the entity operates in a jurisdiction that does not have a standard setting organization or a prescribed financial reporting framework. Since in India, this kind of situation does not exist, paragraph A10 has been deleted. However, the reference to Appendix 2, *Determining Acceptability of General Purpose Frameworks*, has been shifted to paragraph A9.
2. Paragraph A27 of ISA 210 deals with the condition where the law or regulation governs the operations of public sector audits, and also prescribes the public sector auditor's responsibilities and powers. Paragraph A37 of ISA 210 deals with the specific reporting requirements within the legislation governing the audit which may mandate; for example, the auditor may be required to report directly to a minister or the legislature or to public if the entity attempts to limit the scope of the audit in case of public sector entities. Since as mentioned in the "Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services", the Standards issued by the Auditing and Assurance Standards Board, apply equally to all entities, irrespective of their form, nature and size, a specific reference to applicability of the Standard to public sector entities has been deleted. However, since it is also possible that such situations may also exist in case of certain non-public entities pursuant to a requirement under the statute or regulation under which they operate the spirit of erstwhile A27 and A37 has been retained.

Appendix 1

(Ref: Paras. A22-A23)

Example of an Audit Engagement Letter

The following is an example of an audit engagement letter for an audit of general purpose financial statements prepared in accordance with Financial Reporting Standards²² of a company registered under the Companies Act, 1956. This letter is not authoritative but is intended only to be a guide that may be used in conjunction with the considerations outlined in this SA. It will need to be varied according to individual requirements and circumstances. It is drafted to refer to the audit of financial statements for a single reporting period and would

²² Refer footnote 6.

require adaptation if intended or expected to apply to recurring audits (see paragraph 13 of this SA). It may be appropriate to seek legal advice that any proposed letter is suitable.

To the Board of Directors of ABC Company Limited:²³

[The objective and scope of the audit]

You²⁴ have requested that we audit the financial statements of ABC Company Limited, which comprise the Balance Sheet as at March 31, 20X1, and the Statement of Profit & Loss, and Cash Flow Statement for the year then ended, and a summary of significant accounting policies and other explanatory information. We are pleased to confirm our acceptance and our understanding of this audit engagement by means of this letter. Our audit will be conducted with the objective of our expressing an opinion on the financial statements.²⁵

[The responsibilities of the auditor]

We will conduct our audit in accordance with Standards on Auditing (SAs), issued by the Institute of Chartered Accountants of India (ICAI). Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement. An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

Because of the inherent limitations of an audit, together with the inherent limitations of internal control, there is an unavoidable risk that some material misstatements may not be detected, even though the audit is properly planned and performed in accordance with SAs.

In making our risk assessments, we consider internal control relevant to the entity's preparation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. However, we will communicate to you in writing concerning any significant deficiencies in internal control relevant to the audit of the financial statements that we have identified during the audit.

[The responsibilities of management and identification of the applicable financial reporting framework (for

²³ The addressees and references in the letter would be those that are appropriate in the circumstances of the engagement, including the relevant jurisdiction. It is important to refer to the appropriate persons – see paragraph A21.

²⁴ Throughout this letter, references to "you", "we", "us", "management", "those charged with governance" and "auditor" would be used or amended as appropriate in the circumstances.

²⁵ Where the financial statements of the entity include financial statements/ information of its component(s) which have been audited by another auditor/ auditors, the engagement letter may be modified as under:

"You have requested that we audit the financial statements of ABC Company Limited, which comprise the Balance Sheet as at March 31, 20X1, and the Statement of Profit & Loss, and Cash Flow Statement for the year then ended, and a summary of significant accounting policies and other explanatory information. We are pleased to confirm our acceptance and our understanding of this audit engagement by means of this letter. Our audit will be conducted with the objective of our expressing an opinion on the financial statements.

Further, as informed by you, the financial statements of the components of ABC Company Limited, viz., PQR Company Limited and XYZ Company Pvt Limited, whose financial information/ financial statements have been included in the financial statements of ABC Company would be/ have been audited by another auditor/ auditors. However, we expect to be furnished the reports of such other auditor(s) before the date of our audit report so as to enable us to deal with such reports in accordance with the principles enunciated in the Standard on Auditing (SA) 600, *Using the Work of Another Auditor*, issued by the Institute of Chartered Accountants of India".

I.100 Auditing Pronouncements

purposes of this example it is assumed that the auditor has determined that the provisions of the Companies Act, 1956 relating to responsibility of the Board of Directors be supplemented by the descriptions in paragraph 6(b) of this SA.)]

Our audit will be conducted on the basis that [management and, where appropriate, those charged with governance]²⁶ acknowledge and understand that they have responsibility:

- (a) For the preparation of financial statements that give a true and fair view in accordance with the Financial Reporting Standards.²⁷ This includes:
- the responsibility for the preparation of financial statements on a going concern basis.
 - the responsible for selection and consistent application of appropriate accounting policies, including implementation of applicable accounting standards along with proper explanation relating to any material departures from those accounting standards.
 - The responsibility for making judgements and estimates that are reasonable and prudent so as to give a true and fair view of the state of affairs of the entity at the end of the financial year and of the profit or loss of the entity for that period.
- (b) For such internal control as [management] determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; and
- (c) To provide us with:
- (i) Access, at all times, to all information, including the books, account, vouchers and other records and documentation, of the Company, whether kept at the head office of the company or elsewhere, of which [management] is aware that is relevant to the preparation of the financial statements such as records, documentation and other matters;
 - (ii) Additional information that we may request from [management] for the purpose of the audit; and
 - (iii) Unrestricted access to persons within the entity from whom we determine it necessary to obtain audit evidence. This includes our entitlement to require from the officers of the Company such information and explanations as we may think necessary for the performance of our duties as auditor.

As part of our audit process, we will request from [management and, where appropriate, those charged with governance], written confirmation concerning representations made to us in connection with the audit.

We also wish to invite your attention to the fact that our audit process is subject to 'peer review' under the Chartered Accountants Act, 1949 to be conducted by an Independent reviewer. The reviewer may inspect, examine or take abstract of our working papers during the course of the peer review.

We look forward to full cooperation from your staff during our audit.

[Other relevant information]

[Insert other information, such as fee arrangements, billings²⁸ and other specific terms, as appropriate.]

[Reporting]

[Insert appropriate reference to the expected form and content of the auditor's report.]

²⁶ Use terminology as appropriate in the circumstances.

²⁷ Or, if appropriate, "For the preparation and fair presentation of the financial statements in accordance with the Financial Reporting Standards".

²⁸ For example, "Our fees will be billed as the work progresses".

The form and content of our report may need to be amended in the light of our audit findings.

Please sign and return the attached copy of this letter to indicate your acknowledgement of, and agreement with, the arrangements for our audit of the financial statements including our respective responsibilities.

Determining the Acceptability of General Purpose Frameworks

1. Acceptable financial reporting frameworks normally exhibit the following attributes that result in information provided in financial statements that is useful to the intended users:

- (a) Relevance, in that the information provided in the financial statements is relevant to the nature of the entity and the purpose of the financial statements. For example, in the case of a business enterprise that prepares general purpose financial statements, relevance is assessed in terms of the information necessary to meet the common financial information needs of a wide range of users in making economic decisions. These needs are ordinarily met by presenting the financial position, financial performance and cash flows of the business enterprise.
- (b) Completeness, in that transactions and events, account balances and disclosures that could affect conclusions based on the financial statements are not omitted.
- (c) Reliability, in that the information provided in the financial statements:
 - (i) Where applicable, reflects the economic substance of events and transactions and not merely their legal form; and
 - (ii) Results in reasonably consistent evaluation, measurement, presentation and disclosure, when used in similar circumstances.
- (d) Neutrality, in that it contributes to information in the financial statements that is free from bias.
- (e) Understandability, in that the information in the financial statements is clear and comprehensive and not subject to significantly different interpretation.

2. The auditor may decide to compare the accounting conventions to the requirements of an existing financial reporting framework considered to be acceptable. For example, the auditor may compare the accounting conventions to IFRSs. For an audit of a small entity, the auditor may decide to compare the

²⁹ Partner or proprietor, as the case may be.

I.102 Auditing Pronouncements

accounting conventions to a financial reporting framework specifically developed for such entities by an authorised or recognised standards setting organization. When the auditor makes such a comparison and differences are identified, the decision as to whether the accounting conventions adopted in the preparation and presentation of the financial statements constitute an acceptable financial reporting framework includes considering the reasons for the differences and whether application of the accounting conventions, or the description of the financial reporting framework in the financial statements, could result in financial statements that are misleading.

3. A conglomeration of accounting conventions devised to suit individual preferences is not an acceptable financial reporting framework for general purpose financial statements. Similarly, a compliance framework will not be an acceptable financial reporting framework, unless it is generally accepted in the industry to which the entity belongs by preparers and users.

SA 220*

**Quality Control for an Audit of
Financial Statements**
*(Effective for all audits relating to
accounting periods beginning on or after April 1, 2010)*

Introduction

Scope of this SA

1. This Standard on Auditing (SA) deals with the specific responsibilities of the auditor regarding quality control procedures for an audit of financial statements. It also addresses, where applicable, the responsibilities of the engagement quality control reviewer. This SA is to be read in conjunction with relevant ethical requirements.

System of Quality Control and Role of Engagement Teams

2. Quality control systems, policies and procedures are the responsibility of the audit firm. Under SQC 1, the firm has an obligation to establish and maintain a system of quality control to provide it with reasonable assurance that:

- (a) The firm and its personnel comply with professional standards and regulatory and legal requirements; and
- (b) The reports issued by the firm or engagement partners are appropriate in the circumstances¹.

This SA is premised on the basis that the firm is subject to SQC 1. (Ref: Para. A1)

3. Within the context of the firm's system of quality control, engagement teams have a responsibility to implement quality control procedures that are applicable to the audit engagement and provide the firm with relevant information to enable the functioning of that part of the firm's system of quality control relating to independence.

4. Engagement teams are entitled to rely on the firm's system of quality control, unless information provided by the firm or other parties suggests otherwise. (Ref: Para. A2)

Effective Date

5. This SA is effective for audits of financial statements for periods beginning on or after April 1, 2010.

Objective

6. The objective of the auditor is to implement quality control procedures at the engagement level that provide the auditor with reasonable assurance that:

- (a) The audit complies with professional standards and regulatory and legal requirements; and
- (b) The auditor's report issued is appropriate in the circumstances.

* Published in March, 2010 issue of the Journal.

I.104 Auditing Pronouncements

Definitions

7. For purposes of the SAs, the following terms have the meanings attributed below:
- (a) Engagement partner – the partner or other person in the firm who is a member of the Institute of Chartered Accountants of India and is in full time practice and is responsible for the engagement and its performance, and for the report that is issued on behalf of the firm, and who, where required, has the appropriate authority from a professional, legal or regulatory body.
 - (b) Engagement quality control review – a process designed to provide an objective evaluation, before the report is issued, of the significant judgments the engagement team made and the conclusions they reached in formulating the report.
 - (c) Engagement quality control reviewer – a partner, other person² in the firm, suitably qualified external person, or a team made up of such individuals, with sufficient and appropriate experience and authority to objectively evaluate, before the report is issued, the significant judgments the engagement team made and the conclusions they reached in formulating the report. However, in case the review is done by a team of individuals, such team should be headed by a member of the Institute.
 - (d) Engagement team – all personnel performing an engagement, including any experts contracted by the firm in connection with that engagement.
 - (e) Firm – a sole practitioner/proprietor, partnership, or any such entity of professional accountants, as may be permitted by law.
 - (f) Inspection – in relation to completed engagements, procedures designed to provide evidence of compliance by engagement teams with the firm's quality control policies and procedures.
 - (g) Listed entity – an entity whose shares, stock or debt are quoted or listed on a recognized stock exchange, or are traded under the regulations of a recognized stock exchange or other equivalent body.
 - (h) Monitoring – a process comprising an ongoing consideration and evaluation of the firm's system of quality control, including a periodic inspection of a selection of completed engagements, designed to enable the firm to obtain reasonable assurance that its system of quality control is operating effectively.
 - (i) Network firm – A firm or entity that belongs to a network.
 - (j) Network – A larger structure:
 - (i) That is aimed at cooperation, and
 - (ii) That is clearly aimed at profit or cost-sharing or shares common ownership, control or management, common quality control policies and procedures, common business strategy, the use of a common brand name, or a significant part of professional resources.
 - (k) Partner – any individual with authority to bind the firm with respect to the performance of a professional services engagement.
 - (l) Personnel – partners and staff.
 - (m) Professional Standards – Engagement Standards, as defined in the "Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services", issued by the Institute of Chartered Accountants of India and relevant ethical requirements as contained in the Code of Ethics issued by the Institute.

² Such other person should be a member of the Institute of Chartered Accountants of India.

- (n) Relevant ethical requirements – Ethical requirements to which the engagement team and engagement quality control reviewer are subject, which ordinarily comprise the Code of Ethics of the Institute of Chartered Accountants of India related to an audit of financial statements.
- (o) Staff – professionals, other than partners, including any experts which the firm employs.
- (p) Suitably qualified external person – an individual outside the firm with the capabilities and competence to act as an engagement partner, for example a partner or an employee³ (with appropriate experience) of another firm.

Requirements

Leadership Responsibilities for Quality on Audits

8. The engagement partner shall take responsibility for the overall quality on each audit engagement to which that partner is assigned. (Ref: Para. A3)

Relevant Ethical Requirements

9. Throughout the audit engagement, the engagement partner shall remain alert, through observation and making inquiries as necessary, for evidence of non-compliance with relevant ethical requirements by members of the engagement team. (Ref: Para. A4-A5)

10. If matters come to the engagement partner's attention through the firm's system of quality control or otherwise that indicate that members of the engagement team have not complied with relevant ethical requirements, the engagement partner, in consultation with others in the firm, shall determine the appropriate action. (Ref: Para. A5)

Independence

11. The engagement partner shall form a conclusion on compliance with independence requirements that apply to the audit engagement. In doing so, the engagement partner shall:

- (a) Obtain relevant information from the firm and, where applicable, network firms, to identify and evaluate circumstances and relationships that create threats to independence;
- (b) Evaluate information on identified breaches, if any, of the firm's independence policies and procedures to determine whether they create a threat to independence for the audit engagement; and
- (c) Take appropriate action to eliminate such threats or reduce them to an acceptable level by applying safeguards, or, if considered appropriate, to withdraw from the audit engagement, where withdrawal is permitted by law or regulation. The engagement partner shall promptly report to the firm any inability to resolve the matter for appropriate action. (Ref: Para. A5-A7)

Acceptance and Continuance of Client Relationships and Audit Engagements

12. The engagement partner shall be satisfied that appropriate procedures regarding the acceptance and continuance of client relationships and audit engagements have been followed, and shall determine that conclusions reached in this regard are appropriate. (Ref: Para. A8-A9)

13. If the engagement partner obtains information that would have caused the firm to decline the audit engagement had that information been available earlier, the engagement partner shall communicate that information promptly to the firm, so that the firm and the engagement partner can take the necessary action. (Ref: Para. A9)

³ Such employee should be a member of the Institute of Chartered Accountants of India.

I.106 Auditing Pronouncements

Assignment of Engagement Teams

14. The engagement partner shall be satisfied that the engagement team, and any auditor's experts who are not part of the engagement team, collectively have the appropriate competence and capabilities to:

- (a) Perform the audit engagement in accordance with professional standards and regulatory and legal requirements; and
- (b) Enable an auditor's report that is appropriate in the circumstances to be issued. (Ref: Para. A10-A12)

Engagement Performance

Direction, Supervision and Performance

15. The engagement partner shall take responsibility for:

- (a) The direction, supervision and performance of the audit engagement in compliance with professional standards and regulatory and legal requirements; and (Ref: Para. A13-A15, A20)
- (b) The auditor's report being appropriate in the circumstances.

Reviews

16. The engagement partner shall take responsibility for reviews being performed in accordance with the firm's review policies and procedures. (Ref: Para. A16-A17, A20)

17. On or before the date of the auditor's report, the engagement partner shall, through a review of the audit documentation and discussion with the engagement team, be satisfied that sufficient appropriate audit evidence has been obtained to support the conclusions reached and for the auditor's report to be issued. (Ref: Para. A18-A20)

Consultation

18. The engagement partner shall:

- (a) Take responsibility for the engagement team undertaking appropriate consultation on difficult or contentious matters;
- (b) Be satisfied that members of the engagement team have undertaken appropriate consultation during the course of the engagement, both within the engagement team and between the engagement team and others at the appropriate level within or outside the firm;
- (c) Be satisfied that the nature and scope of, and conclusions resulting from, such consultations are agreed with the party consulted; and
- (d) Determine that conclusions resulting from such consultations have been implemented. (Ref: Para. A21-A22)

Engagement Quality Control Review

19. For audits of financial statements of listed entities, and those other audit engagements, if any, for which the firm has determined that an engagement quality control review is required, the engagement partner shall:

- (a) Determine that an engagement quality control reviewer has been appointed;
- (b) Discuss significant matters arising during the audit engagement, including those identified during the engagement quality control review, with the engagement quality control reviewer; and
- (c) Not date the auditor's report until the completion of the engagement quality control review. (Ref: Para. A23-A25)

20. The engagement quality control reviewer shall perform an objective evaluation of the significant judgments made by the engagement team, and the conclusions reached in formulating the auditor's report.

This evaluation shall involve:

- (a) Discussion of significant matters with the engagement partner;
 - (b) Review of the financial statements and the proposed auditor's report;
 - (c) Review of selected audit documentation relating to the significant judgments the engagement team made and the conclusions it reached; and
 - (d) Evaluation of the conclusions reached in formulating the auditor's report and consideration of whether the proposed auditor's report is appropriate. (Ref: Para. A26-A27, A29-A31)
21. For audits of financial statements of listed entities, the engagement quality control reviewer, on performing an engagement quality control review, shall also consider the following:
- (a) The engagement team's evaluation of the firm's independence in relation to the audit engagement;
 - (b) Whether appropriate consultation has taken place on matters involving differences of opinion or other difficult or contentious matters, and the conclusions arising from those consultations; and
 - (c) Whether audit documentation selected for review reflects the work performed in relation to the significant judgments made and supports the conclusions reached. (Ref: Para. A28-A31)

Differences of Opinion

22. If differences of opinion arise within the engagement team, with those consulted or, where applicable, between the engagement partner and the engagement quality control reviewer, the engagement team shall follow the firm's policies and procedures for dealing with and resolving differences of opinion.

Monitoring

23. An effective system of quality control includes a monitoring process designed to provide the firm with reasonable assurance that its policies and procedures relating to the system of quality control are relevant, adequate, and operating effectively. The engagement partner shall consider the results of the firm's monitoring process as evidenced in the latest information circulated by the firm and, if applicable, other network firms and whether deficiencies noted in that information may affect the audit engagement. (Ref: Para A32-A34)

Documentation

24. The auditor shall document:
- (a) Issues identified with respect to compliance with relevant ethical requirements and how they were resolved.
 - (b) Conclusions on compliance with independence requirements that apply to the audit engagement, and any relevant discussions with the firm that support these conclusions.
 - (c) Conclusions reached regarding the acceptance and continuance of client relationships and audit engagements.
 - (d) The nature and scope of, and conclusions resulting from, consultations undertaken during the course of the audit engagement. (Ref: Para. A35)
25. The engagement quality control reviewer shall document, for the audit engagement reviewed, that:
- (a) The procedures required by the firm's policies on engagement quality control review have been performed;
 - (b) The engagement quality control review has been completed on or before the date of the auditor's report; and

I.108 Auditing Pronouncements

- (c) The reviewer is not aware of any unresolved matters that would cause the reviewer to believe that the significant judgments the engagement team made and the conclusions they reached were not appropriate.

Application and Other Explanatory Material

System of Quality Control and Role of Engagement Teams (Ref: Para. 2)

A1. SQC 1 deals with the firm's responsibilities to establish and maintain its system of quality control for audit engagements. The system of quality control includes policies and procedures that address each of the following elements:

- Leadership responsibilities for quality within the firm;
- Relevant ethical requirements;
- Acceptance and continuance of client relationships and specific engagements;
- Human resources;
- Engagement performance; and
- Monitoring.

Reliance on the Firm's System of Quality Control (Ref: Para. 4)

A2. Unless information provided by the firm or other parties suggest otherwise, the engagement team may rely on the firm's system of quality control in relation to, for example:

- Competence of personnel through their recruitment and formal training.
- Independence through the accumulation and communication of relevant independence information.
- Maintenance of client relationships through acceptance and continuance systems.
- Adherence to regulatory and legal requirements through the monitoring process.

Leadership Responsibilities for Quality on Audits (Ref: Para. 8)

A3. The actions of the engagement partner and appropriate messages to the other members of the engagement team, in taking responsibility for the overall quality on each audit engagement, emphasise:

- (a) The importance to audit quality of:
- (i) Performing work that complies with professional standards and regulatory and legal requirements;
 - (ii) Complying with the firm's quality control policies and procedures as applicable;
 - (iii) Issuing auditor's reports that are appropriate in the circumstances; and
 - (iv) The engagement team's ability to raise concerns without fear of reprisals; and
- (b) The fact that quality is essential in performing audit engagements.

Relevant Ethical Requirements

Compliance with Relevant Ethical Requirements (Ref: Para. 9)

A4. The Code of Ethics issued by the Institute of Chartered Accountants of India establishes the fundamental principles of professional ethics, which include:

- (a) Integrity;
- (b) Objectivity;
- (c) Professional competence and due care;

- (d) Confidentiality; and
- (e) Professional behavior.

Definition of "Firm", "Network" and "Network Firm" (Ref: Para. 9-11)

A5. The definitions of "firm", "network" or "network firm" in relevant ethical requirements may differ from those set out in this SA. For example, the Code of Ethics of the Institute of Chartered Accountants of India (ICAI) defines the "Network Firm" as:

"Networking amongst two or more firms under common control, ownership or management with the firm or having affiliation with an accounting entity or any entity that a reasonable and informed third party having knowledge of all relevant information would reasonably conclude as being part of the firm nationally".

In complying with the requirements in paragraphs 9-11, the definitions used in the relevant ethical requirements apply in so far as is necessary to interpret those ethical requirements.

Threats to Independence (Ref: Para. 11(c))

A6. The engagement partner may identify a threat to independence regarding the audit engagement that safeguards may not be able to eliminate or reduce to an acceptable level. In that case, as required by paragraph 11(c), the engagement partner reports to the relevant person(s) within the firm to determine appropriate action, which may include eliminating the activity or interest that creates the threat, or withdrawing from the audit engagement, where withdrawal is legally permitted.

A7. In case of certain entities, such as, Central/State governments and related government entities (for example, agencies, boards, commissions), statutory measures may provide safeguards for the independence of auditors of certain entities. However, such auditors or audit firms carrying out audits on behalf of the statutory auditor may, depending on the terms of the applicable legal or regulatory framework, need to adapt their approach in order to promote compliance with the spirit of paragraph 11. This may include, where the auditor's applicable law or regulation does not permit withdrawal of the auditor from the engagement, disclosure through a public report, of circumstances that have arisen that would, have otherwise lead the auditor to withdraw.

Acceptance and Continuance of Client Relationships and Audit Engagements (Ref: Para. 12)

A8. SQC 1 requires the firm to obtain information considered necessary in the circumstances before accepting an engagement with a new client, when deciding whether to continue an existing engagement, and when considering acceptance of a new engagement with an existing client⁴. Information such as the following assists the engagement partner in determining whether the conclusions reached regarding the acceptance and continuance of client relationships and audit engagements are appropriate:

- The integrity of the principal owners, key management and those charged with governance of the entity;
- Whether the engagement team is competent to perform the audit engagement and has the necessary capabilities, including time and resources;
- Whether the firm and the engagement team can comply with relevant ethical requirements; and
- Significant matters that have arisen during the current or previous audit engagement, and their implications for continuing the relationship.

A9. In case of certain entities, such as, Central/State governments and related government entities (for

⁴ SQC 1, paragraph 28.

I.110 Auditing Pronouncements

example, agencies, boards, commissions), auditors may be appointed in accordance with statutory procedures. Accordingly, certain of the requirements and considerations regarding the acceptance and continuance of client relationships and audit engagements as set out in paragraphs 12, 13 and A7 may not be relevant. Nonetheless, information gathered as a result of the process described may be valuable to the auditors of such entities in performing risk assessments and in carrying out reporting responsibilities.

Assignment of Engagement Teams (Ref: Para. 14)

A10. An engagement team also includes a member using expertise in a specialised area of accounting or auditing, whether engaged or employed by the firm, if any, who performs audit procedures on the engagement.

A11. When considering the appropriate competence and capabilities expected of the engagement team as a whole, the engagement partner may take into consideration such matters as the team's:

- Understanding of, and practical experience with, audit engagements of a similar nature and complexity through appropriate training and participation.
- Understanding of professional standards and regulatory and legal requirements.
- Technical expertise, including expertise with relevant information technology and specialised areas of accounting or auditing.
- Knowledge of relevant industries in which the client operates.
- Ability to apply professional judgment.
- Understanding of the firm's quality control policies and procedures.

A12. In case of certain entities, such as, Central/State governments and related government entities (for example, agencies, boards, commissions), additional appropriate competence may include skills that are necessary to discharge the terms of the audit mandate in a particular jurisdiction. Such competence may include an understanding of the applicable reporting arrangements, including reporting to the legislature or other governing body or in the public interest. The wider scope of audit of such entities may include, for example, some aspects of performance auditing or a comprehensive assessment of compliance with legislative authorities and preventing and detecting fraud and corruption.

Engagement Performance

Direction, Supervision and Performance (Ref: Para. 15(a))

A13. Direction of the engagement team involves informing the members of the engagement team of matters such as:

- Their responsibilities, including the need to comply with relevant ethical requirements, and to plan and perform an audit with professional skepticism as required by SA 200⁵.
- Responsibilities of respective partners where more than one partner is involved in the conduct of an audit engagement.
- The objectives of the work to be performed.
- The nature of the entity's business.
- Risk-related issues.
- Problems that may arise.

⁵ SA 200, "Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with Standards on Auditing", paragraph 15.

- The detailed approach to the performance of the engagement.

Discussion among members of the engagement team allows less experienced team members to raise questions with more experienced team members so that appropriate communication can occur within the engagement team.

A14. Appropriate teamwork and training assist less experienced members of the engagement team to clearly understand the objectives of the assigned work.

A15. Supervision includes matters such as:

- Tracking the progress of the audit engagement.
- Considering the competence and capabilities of individual members of the engagement team, including whether they have sufficient time to carry out their work, whether they understand their instructions, and whether the work is being carried out in accordance with the planned approach to the audit engagement.
- Addressing significant matters arising during the audit engagement, considering their significance and modifying the planned approach appropriately.
- Identifying matters for consultation or consideration by more experienced engagement team members during the audit engagement.

Reviews

Review Responsibilities (Ref: Para. 16)

A16. Under SQC 1, the firm's review responsibility policies and procedures are determined on the basis that work of less experienced team members is reviewed by more experienced team members⁶.

A17. A review consists of consideration whether, for example:

- The work has been performed in accordance with professional standards and regulatory and legal requirements;
- Significant matters have been raised for further consideration;
- Appropriate consultations have taken place and the resulting conclusions have been documented and implemented;
- There is a need to revise the nature, timing and extent of work performed;
- The work performed supports the conclusions reached and is appropriately documented;
- The evidence obtained is sufficient and appropriate to support the auditor's report; and
- The objectives of the engagement procedures have been achieved.

The Engagement Partner's Review of Work Performed (Ref: Para. 17)

A18. Timely reviews of the following by the engagement partner at appropriate stages during the engagement allow significant matters to be resolved on a timely basis to the engagement partner's satisfaction on or before the date of the auditor's report:

- Critical areas of judgment, especially those relating to difficult or contentious matters identified during the course of the engagement;
- Significant risks; and

⁶ SQC 1, paragraph 50.

I.112 Auditing Pronouncements

- Other areas the engagement partner considers important.

The engagement partner need not review all audit documentation, but may do so. However, as required by SA 230, the partner documents the extent and timing of the reviews⁷.

A19. An engagement partner taking over an audit during the engagement may apply the review procedures as described in paragraphs A17 to review the work performed to the date of a change in order to assume the responsibilities of an engagement partner.

Considerations Relevant Where a Member of the Engagement Team with Expertise in a Specialised Area of Accounting or Auditing Is Used (Ref: Para. 15-17)

A20. Where a member of the engagement team with expertise in a specialised area of accounting or auditing is used, direction, supervision and review of that engagement team member's work may include matters such as:

- Agreeing with that member the nature, scope and objectives of that member's work; and the respective roles of, and the nature, timing and extent of communication between that member and other members of the engagement team.
- Evaluating the adequacy of that member's work including the relevance and reasonableness of that member's findings or conclusions and their consistency with other audit evidence.

Consultation (Ref: Para. 18)

A21. Effective consultation on significant technical, ethical, and other matters within the firm or, where applicable, outside the firm can be achieved when those consulted:

- Are given all the relevant facts that will enable them to provide informed advice; and
- Have appropriate knowledge, seniority and experience.

A22. It may be appropriate for the engagement team to consult outside the firm, for example, where the firm lacks appropriate internal resources. They may take advantage of advisory services provided by other firms, professional and regulatory bodies, or commercial organisations that provide relevant quality control services.

Engagement Quality Control Review

Completion of the Engagement Quality Control Review before Dating of the Auditor's Report (Ref: Para. 19(c))

A23. SA 700 requires the auditor's report to be dated no earlier than the date on which the auditor has obtained sufficient appropriate evidence on which to base the auditor's opinion on the financial statements⁸. In cases of an audit of financial statements of listed entities or when an engagement meets the criteria for an engagement quality control review, such a review assists the auditor in determining whether sufficient appropriate evidence has been obtained.

A24. Conducting the engagement quality control review in a timely manner at appropriate stages during the engagement allows significant matters to be promptly resolved to the engagement quality control reviewer's satisfaction on or before the date of the auditor's report.

A25. Completion of the engagement quality control review means the completion by the engagement quality control reviewer of the requirements in paragraphs 20-21, and where applicable, compliance with paragraph

⁷ SA 230, "Audit Documentation", paragraph 9(c).

⁸ SA 700, "Forming an Opinion and Reporting on Financial Statements", paragraph 41.

22. Documentation of the engagement quality control review may be completed after the date of the auditor's report as part of the assembly of the final audit file. SA 230 establishes requirements and provides guidance in this regard⁹.

Nature, Extent and Timing of Engagement Quality Control Review (Ref: Para. 20)

A26. Remaining alert for changes in circumstances allows the engagement partner to identify situations in which an engagement quality control review is necessary, even though at the start of the engagement, such a review was not required.

A27. The extent of the engagement quality control review may depend, among other things, on the complexity of the audit engagement, whether the entity is a listed entity, and the risk that the auditor's report might not be appropriate in the circumstances. The performance of an engagement quality control review does not reduce the responsibilities of the engagement partner for the audit engagement and its performance.

Engagement Quality Control Review of Listed Entities (Ref: Para. 21)

A28. Other matters relevant to evaluating the significant judgments made by the engagement team that may be considered in an engagement quality control review of a listed entity include:

- Significant risks identified during the engagement in accordance with SA 315¹⁰, and the responses to those risks in accordance with SA 330¹¹, including the engagement team's assessment of, and response to, the risk of fraud in accordance with SA 240¹².
- Judgments made, particularly with respect to materiality and significant risks.
- The significance and disposition of corrected and uncorrected misstatements identified during the audit.
- The matters to be communicated to management and those charged with governance and, where applicable, other parties such as regulatory bodies.

These other matters, depending on the circumstances, may also be applicable for engagement quality control reviews for audits of financial statements of other entities.

Considerations Specific to Smaller Entities (Ref: Para. 20-21)

A29. In addition to the audits of financial statements of listed entities, an engagement quality control review is required for such audit engagements also that meet the criteria established by the firm that subjects engagements to an engagement quality control review. In some cases, none of the firm's audit engagements may meet the criteria that would subject them to such a review.

Considerations Specific to Central/State Governments and Related Government Entities (Ref: Para. 20-21)

A30. In case of certain entities, such as, Central/State governments and related government entities (for example, agencies, boards, commissions), a statutorily appointed auditor (for example, an Auditor General, or other suitably qualified person appointed on behalf of the Auditor General), may act in a role equivalent to that of engagement partner with overall responsibility for certain entities audits. In such circumstances, where applicable, the selection of the engagement quality control reviewer includes consideration of the need for

⁹ SA 230, paragraphs 14-16 and A21-A24.

¹⁰ SA 315, "Identifying and Assessing the Risks of Material Misstatement Through Understanding the Entity and Its Environment".

¹¹ SA 330, "The Auditor's Responses to Assessed Risks".

¹² SA 240, "The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements".

I.114 Auditing Pronouncements

independence from the audited entity and the ability of the engagement quality control reviewer to provide an objective evaluation.

A31. Certain entities, such as, Central/State governments and related government entities (for example, agencies, boards, commissions), may not necessarily be listed entities yet may be significant due to size, complexity or public interest aspects, and which consequently have a wide range of stakeholders. Examples include state owned corporations and public utilities. Ongoing transformations within the certain entities may also give rise to new types of significant entities. There are no fixed objective criteria on which the determination of significance is based. Nonetheless, auditors of such entities evaluate which of these entities may be of sufficient significance to warrant performance of an engagement quality control review.

Monitoring (Ref: Para. 23)

A32. SQC 1 requires the firm to establish a monitoring process designed to provide it with reasonable assurance that the policies and procedures relating to the system of quality control is relevant, adequate and operating effectively¹³.

A33. In considering deficiencies that may affect the audit engagement, the engagement partner may have regard to measures the firm took to rectify the situation that the engagement partner considers are sufficient in the context of that audit.

A34. A deficiency in the firm's system of quality control does not necessarily indicate that a particular audit engagement was not performed in accordance with professional standards and regulatory and legal requirements, or that the auditor's report was not appropriate.

Documentation

Documentation of Consultations (Ref: Para. 24(d))

A35. Documentation of consultations with other professionals that involve difficult or contentious matters that is sufficiently complete and detailed contributes to an understanding of:

- The issue on which consultation was sought; and
- The results of the consultation, including any decisions taken, the basis for those decisions and how they were implemented.

Modifications vis-à-vis ISA 220, "Quality Control for an Audit of Financial Statements"

Deletion

Paragraphs A7, A9, A12, A30 and A31 of the Application Section of ISA 220 dealt with the application of the requirements of ISA 220 to the audits of public sector entities. Since as mentioned in the "Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services", the Standards issued by the Auditing and Assurance Standards Board, apply equally to all entities, irrespective of their form, nature and size, a specific reference to applicability of the Standard to public sector entities has been deleted.

Further, it is also possible that these requirements may also exist in case of non public sector entities pursuant to a requirement under the statute. Accordingly, the spirit of paragraphs A7, A9, A12, A30 and A31 has, accordingly, been made more generic in its application.

¹³ SQC 1, Paragraph 86.

SA 230*

Audit Documentation
***(Effective for audits of financial statements
for periods beginning on or after April 1, 2009)***

Introduction

Scope of this SA

1. This Standard on Auditing (SA) deals with the auditor's responsibility to prepare audit documentation for an audit of financial statements. It is to be adapted as necessary in the circumstances when applied to audits of other historical financial information. The specific documentation requirements of other SAs do not limit the application of this SA. Laws or regulations may establish additional documentation requirements.

Nature and Purposes of Audit Documentation

2. Audit documentation that meets the requirements of this SA and the specific documentation requirements of other relevant SAs provides:

- (a) Evidence of the auditor's basis for a conclusion about the achievement of the overall objectives of the auditor; and
- (b) Evidence that the audit was planned and performed in accordance with SAs and applicable legal and regulatory requirements.

3. Audit documentation serves a number of additional purposes, including the following:

- ◆ Assisting the engagement team to plan and perform the audit.
- ◆ Assisting members of the engagement team responsible for supervision to direct and supervise the audit work, and to discharge their review responsibilities in accordance with SA 220¹.
- ◆ Enabling the engagement team to be accountable for its work.
- ◆ Retaining a record of matters of continuing significance to future audits.
- ◆ Enabling the conduct of quality control reviews and inspections in accordance with SQC 1².
- ◆ Enabling the conduct of external inspections in accordance with applicable legal, regulatory or other requirements.

Effective Date

4. This SA is effective for audits of financial statements for periods beginning on or after April 1, 2009.

Objective

5. The objective of the auditor is to prepare documentation that provides:

* Published in January, 2009 issue of the Journal.

¹ SA 220, "Quality Control for an Audit of Financial Statements", paragraph 15-17.

² SQC 1, "Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements", paragraphs 46, 60, 63, 65 and 85.

I.116 Auditing Pronouncements

- (a) A sufficient and appropriate record of the basis for the auditor's report; and
- (b) Evidence that the audit was planned and performed in accordance with SAs and applicable legal and regulatory requirements.

Definitions

6. For purposes of the SAs, the following terms have the meanings attributed below:
- (a) **Audit documentation** – The record of audit procedures performed, relevant audit evidence obtained, and conclusions the auditor reached (terms such as “working papers” or “workpapers” are also sometimes used).
 - (b) **Audit file** – One or more folders or other storage media, in physical or electronic form, containing the records that comprise the audit documentation for a specific engagement.
 - (c) **Experienced auditor** – An individual (whether internal or external to the firm) who has practical audit experience, and a reasonable understanding of:
 - (i) Audit processes;
 - (ii) SAs and applicable legal and regulatory requirements;
 - (iii) The business environment in which the entity operates; and
 - (iv) Auditing and financial reporting issues relevant to the entity's industry.

Requirements

Timely Preparation of Audit Documentation

7. The auditor shall prepare audit documentation on a timely basis. (Ref: Para. A1)

Documentation of the Audit Procedures Performed and Audit Evidence Obtained

Form, Content and Extent of Audit Documentation

8. The auditor shall prepare audit documentation that is sufficient to enable an experienced auditor, having no previous connection with the audit, to understand: (Ref: Para. A2-A5, A16- A17)
- (a) The nature, timing, and extent of the audit procedures performed to comply with the SAs and applicable legal and regulatory requirements; (Ref: Para. A6-A7)
 - (b) The results of the audit procedures performed, and the audit evidence obtained; and
 - (c) Significant matters arising during the audit, the conclusions reached thereon, and significant professional judgments made in reaching those conclusions. (Ref: Para. A8- A11)
9. In documenting the nature, timing and extent of audit procedures performed, the auditor shall record:
- (a) The identifying characteristics of the specific items or matters tested; (Ref: Para. A12)
 - (b) Who performed the audit work and the date such work was completed; and
 - (c) Who reviewed the audit work performed and the date and extent of such review. (Ref: Para. A13)
10. The auditor shall document discussions of significant matters with management, those charged with governance, and others, including the nature of the significant matters discussed and when and with whom the discussions took place. (Ref: Para. A14)
11. If the auditor identified information that is inconsistent with the auditor's final conclusion regarding a significant matter, the auditor shall document how the auditor addressed the inconsistency. (Ref: Para. A15)

Departure from a Relevant Requirement

12. If, in exceptional circumstances, the auditor judges it necessary to depart from a relevant requirement

in a SA, the auditor shall document how the alternative audit procedures performed achieve the aim of that requirement, and the reasons for the departure. (Ref: Para. A18-A19)

Matters Arising after the Date of the Auditor's Report

13. If, in exceptional circumstances, the auditor performs new or additional audit procedures or draws new conclusions after the date of the auditor's report, the auditor shall document: (Ref: Para. A20)

- (a) The circumstances encountered;
- (b) The new or additional audit procedures performed, audit evidence obtained, and conclusions reached, and their effect on the auditor's report; and
- (c) When and by whom the resulting changes to audit documentation were made and reviewed.

Assembly of the Final Audit File

14. The auditor shall assemble the audit documentation in an audit file and complete the administrative process of assembling the final audit file on a timely basis after the date of the auditor's report. (Ref: Para. A21-A22)

15. After the assembly of the final audit file has been completed, the auditor shall not delete or discard audit documentation of any nature before the end of its retention period. (Ref: Para. A23)

16. In circumstances other than those envisaged in paragraph 13 where the auditor finds it necessary to modify existing audit documentation or add new audit documentation after the assembly of the final audit file has been completed, the auditor shall, regardless of the nature of the modifications or additions, document: (Ref: Para. A24 -A25)

- (a) The specific reasons for making them; and
- (b) When and by whom they were made and reviewed.

Application and Other Explanatory Material

Timely Preparation of Audit Documentation (Ref: Para. 7)

A1. Preparing sufficient and appropriate audit documentation on a timely basis helps to enhance the quality of the audit and facilitates the effective review and evaluation of the audit evidence obtained and conclusions reached before the auditor's report is finalised. Documentation prepared after the audit work has been performed is likely to be less accurate than documentation prepared at the time such work is performed.

Documentation of the Audit Procedures Performed and Audit Evidence Obtained

Form, Content and Extent of Audit Documentation (Ref: Para. 8)

A2. The form, content and extent of audit documentation depend on factors such as:

- ◆ The size and complexity of the entity.
- ◆ The nature of the audit procedures to be performed.
- ◆ The identified risks of material misstatement.
- ◆ The significance of the audit evidence obtained.
- ◆ The nature and extent of exceptions identified.
- ◆ The need to document a conclusion or the basis for a conclusion not readily determinable from the documentation of the work performed or audit evidence obtained.
- ◆ The audit methodology and tools used.

I.118 Auditing Pronouncements

A3. Audit documentation may be recorded on paper or on electronic or other media. Examples of audit documentation include:

- ◆ Audit programmes.
- ◆ Analyses.
- ◆ Issues memoranda.
- ◆ Summaries of significant matters.
- ◆ Letters of confirmation and representation.
- ◆ Checklists.
- ◆ Correspondence (including e-mail) concerning significant matters.

The auditor may include abstracts or copies of the entity's records (for example, significant and specific contracts and agreements) as part of audit documentation. Audit documentation, however, is not a substitute for the entity's accounting records.

A4. The auditor need not include in audit documentation superseded drafts of working papers and financial statements, notes that reflect incomplete or preliminary thinking, previous copies of documents corrected for typographical or other errors, and duplicates of documents.

A5. Oral explanations by the auditor, on their own, do not represent adequate support for the work auditor performed or conclusions the auditor reached, but may be used to explain or clarify information contained in the audit documentation.

Documentation of Compliance with SAs (Ref: Para. 8(a))

A6. In principle, compliance with the requirements of this SA will result in the audit documentation being sufficient and appropriate in the circumstances. Other SAs contain specific documentation requirements that are intended to clarify the application of this SA in the particular circumstances of those SAs. The specific documentation requirements of other SAs do not limit the application of this SA. Furthermore, the absence of a documentation requirement in any particular SA is not intended to suggest that there is no documentation that will be prepared as a result of complying with that SA.

A7. Audit documentation provides evidence that the audit complies with SAs. However, it is neither necessary nor practicable for the auditor to document every matter considered, or professional judgment made, in an audit. Further, it is unnecessary for the auditor to document separately (as in a checklist, for example) compliance with matters for which compliance is demonstrated by documents included within the audit file. For example:

- ◆ The existence of an adequately documented audit plan demonstrates that the auditor has planned the audit.
- ◆ The existence of a signed engagement letter in the audit file demonstrates that the auditor has agreed the terms of the audit engagement with management, or where appropriate, those charged with governance.
- ◆ An auditor's report containing an appropriately qualified opinion demonstrates that the auditor has complied with the requirement to express a qualified opinion under the circumstances specified in the SAs.
- ◆ In relation to requirements that apply generally throughout the audit, there may be a number of ways in which compliance with them may be demonstrated within the audit file:
 - For example, there may be no single way in which the auditor's professional skepticism is documented. But the audit documentation may nevertheless provide evidence of the auditor's

exercise of professional skepticism in accordance with SAs. Such evidence may include specific procedures performed to corroborate management's responses to the auditor's inquiries.

- Similarly, that the engagement partner has taken responsibility for the direction, supervision and performance of the audit in compliance with the SAs may be evidenced in a number of ways within the audit documentation. This may include documentation of the engagement partner's timely involvement in aspects of the audit, such as participation in the team discussion required by SA 315³.

Documentation of Significant Matters and Related Significant Professional Judgments (Ref: Para. 8(c))

A8. Judging the significance of a matter requires an objective analysis of the facts and circumstances. Examples of significant matters include:

- ◆ Matters that give rise to significant risks (as defined in SA 315)⁴.
- ◆ Results of audit procedures indicating (a) that the financial statements could be materially misstated, or (b) a need to revise the auditor's previous assessment of the risks of material misstatement and the auditor's responses to those risks.
- ◆ Circumstances that cause the auditor significant difficulty in applying necessary audit procedures.
- ◆ Findings that could result in a modification to the audit opinion or the inclusion of an Emphasis of Matter paragraph in the auditor's report.

A9. An important factor in determining the form, content and extent of audit documentation of significant matters is the extent of professional judgment exercised in performing the work and evaluating the results. Documentation of the professional judgments made, where significant, serves to explain the auditor's conclusions and to reinforce the quality of the judgment. Such matters are of particular interest to those responsible for reviewing audit documentation, including those carrying out subsequent audits, when reviewing matters of continuing significance (for example, when performing a retrospective review of accounting estimates).

A10. Some examples of circumstances in which, in accordance with paragraph 8, it is appropriate to prepare audit documentation relating to the use of professional judgment include, where the matters and judgments are significant:

- ◆ The rationale for the auditor's conclusion when a requirement provides that the auditor 'shall consider' certain information or factors, and that consideration is significant in the context of the particular engagement.
- ◆ The basis for the auditor's conclusion on the reasonableness of areas of subjective judgments (for example, the reasonableness of significant accounting estimates).
- ◆ The basis for the auditor's conclusions about the authenticity of a document when further investigation (such as making appropriate use of an expert or of confirmation procedures) is undertaken in response to conditions identified during the audit that caused the auditor to believe that the document may not be authentic.

A11. The auditor may consider it helpful to prepare and retain as part of the audit documentation a summary (sometimes known as a completion memorandum) that describes the significant matters identified during the audit and how they were addressed, or that includes cross- references to other relevant supporting audit documentation that provides such information. Such a summary may facilitate effective and efficient reviews

³ SA 315, "Identifying and Assessing the Risks of Material Misstatement Through Understanding the Entity and Its Environment", paragraph 10.

⁴ SA 315, paragraph 4(e).

I.120 Auditing Pronouncements

and inspections of the audit documentation, particularly for large and complex audits. Further, the preparation of such a summary may assist the auditor's consideration of the significant matters. It may also help the auditor to consider whether, in light of the audit procedures performed and conclusions reached, there is any individual relevant SA objective that the auditor cannot achieve that would prevent the auditor from achieving the overall objectives of the auditor.

Identification of Specific Items or Matters Tested, and of the Preparer and Reviewer (Ref: Para. 9)

A12. Recording the identifying characteristics serves a number of purposes. For example, it enables the engagement team to be accountable for its work and facilitates the investigation of exceptions or inconsistencies. Identifying characteristics will vary with the nature of the audit procedure and the item or matter tested. For example:

- ◆ For a detailed test of entity-generated purchase orders, the auditor may identify the documents selected for testing by their dates and unique purchase order numbers.
- ◆ For a procedure requiring selection or review of all items over a specific amount from a given population, the auditor may record the scope of the procedure and identify the population (for example, all journal entries over a specified amount from the journal register).
- ◆ For a procedure requiring systematic sampling from a population of documents, the auditor may identify the documents selected by recording their source, the starting point and the sampling interval (for example, a systematic sample of shipping reports selected from the shipping log for the period April 1 to September 30, starting with report number 12345 and selecting every 125th report).
- ◆ For a procedure requiring inquiries of specific entity personnel, the auditor may record the dates of the inquiries and the names and job designations of the entity personnel.
- ◆ For an observation procedure, the auditor may record the process or matter being observed, the relevant individuals, their respective responsibilities, and where and when the observation was carried out.

A13. SA 220⁵ requires the auditor to review the audit work performed through review of the audit documentation. The requirement to document who reviewed the audit work performed does not imply a need for each specific working paper to include evidence of review. The requirement, however, means documenting what audit work was reviewed, who reviewed such work, and when it was reviewed.

Documentation of Discussions of Significant Matters with Management, Those Charged with Governance, and Others (Ref: Para. 10)

A14. The documentation is not limited to records prepared by the auditor but may include other appropriate records such as minutes of meetings prepared by the entity's personnel and agreed by the auditor. Others with whom the auditor may discuss significant matters may include other personnel within the entity, and external parties, such as persons providing professional advice to the entity.

Documentation of How Inconsistencies have been addressed (Ref: Para. 11)

A15. The requirement to document how the auditor addressed inconsistencies in information does not imply that the auditor needs to retain documentation that is incorrect or superseded.

Considerations Specific to Smaller Entities (Ref: Para. 8)

A16. The audit documentation for the audit of a smaller entity is generally less extensive than that for the audit of a larger entity. Further, in the case of an audit where the engagement partner performs all the audit work, the documentation will not include matters that might have to be documented solely to inform or instruct members of an engagement team, or to provide evidence of review by other members of the team

⁵ SA 220, paragraph 17.

(for example, there will be no matters to document relating to team discussions or supervision). Nevertheless, the engagement partner complies with the overriding requirement in paragraph 8 to prepare audit documentation that can be understood by an experienced auditor, as the audit documentation may be subject to review by external parties for regulatory or other purposes.

A17. When preparing audit documentation, the auditor of a smaller entity may also find it helpful and efficient to record various aspects of the audit together in a single document, with cross references to supporting working papers as appropriate. Examples of matters that may be documented together in the audit of a smaller entity include the understanding of the entity and its internal control, the overall audit strategy and audit plan, materiality, determined in accordance with SA 320⁶, assessed risks, significant matters noted during the audit, and conclusions reached.

Departure from a Relevant Requirement (Ref: Para. 12)

A18. The requirements of the SAs are designed to enable the auditor to achieve the objectives specified in the SAs, and thereby the overall objectives of the auditor. Accordingly, other than in exceptional circumstances, the SAs call for compliance with each requirement that is relevant in the circumstances of the audit.

A19. The documentation requirement applies only to requirements that are relevant in the circumstances. A requirement is not relevant⁷ only in the cases where:

- (a) The entire SA is not relevant [for example, if an entity does not have an internal audit function, nothing in SA 610⁸ is relevant]; or
- (b) The requirement is conditional and the condition does not exist (for example, the requirement to modify the auditor's opinion where there is an inability to obtain sufficient appropriate audit evidence, and there is no such inability).

Matters Arising after the Date of the Auditor's Report (Ref: Para. 13)

A20. Examples of exceptional circumstances include facts which become known to the auditor after the date of the auditor's report but which existed at that date and which, if known at that date, might have caused the financial statements to be amended or the auditor to modify the opinion in the auditor's report.⁹ The resulting changes to the audit documentation are reviewed in accordance with the review responsibilities set out in SA 220¹⁰, with the engagement partner taking final responsibility for the changes.

Assembly of the Final Audit File (Ref: Para. 14-16)

A21. SQC 1 requires firms to establish policies and procedures for the timely completion of the assembly of audit files.¹¹ An appropriate time limit within which to complete the assembly of the final audit file is ordinarily not more than 60 days after the date of the auditor's report.¹²

A22. The completion of the assembly of the final audit file after the date of the auditor's report is an administrative process that does not involve the performance of new audit procedures or the drawing of new conclusions. Changes may, however, be made to the audit documentation during the final assembly process if

⁶ SA 320, "Materiality in Planning and Performing an Audit".

⁷ Refer paragraph 22 of SA 200.

⁸ SA 610, "Using the Work of Internal Auditors."

⁹ SA 560, "Subsequent Events", paragraph 13.

¹⁰ SA 220, paragraph 16.

¹¹ Refer para 74 of SQC 1.

¹² Refer para 75 of SQC 1.

I.122 Auditing Pronouncements

they are administrative in nature. Examples of such changes include:

- ◆ Deleting or discarding superseded documentation.
- ◆ Sorting, collating and cross referencing working papers.
- ◆ Signing off on completion checklists relating to the file assembly process.
- ◆ Documenting audit evidence that the auditor has obtained, discussed and agreed with the relevant members of the engagement team before the date of the auditor's report.

A23. SQC 1 requires firms to establish policies and procedures for the retention of engagement documentation.¹³ The retention period for audit engagements ordinarily is no shorter than seven years¹⁴ from the date of the auditor's report, or, if later, the date of the group auditor's report.¹⁵

A24. An example of a circumstance in which the auditor may find it necessary to modify existing audit documentation or add new audit documentation after file assembly has been completed is the need to clarify existing audit documentation arising from comments received during monitoring inspections performed by internal or external parties.

Ownership of Audit Documentation

A25. Standard on Quality Control (SQC) 1, "Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements", issued by the Institute, provides that, unless otherwise specified by law or regulation, audit documentation is the property of the auditor. He may at his discretion, make portions of, or extracts from, audit documentation available to clients, provided such disclosure does not undermine the validity of the work performed, or, in the case of assurance engagements, the independence of the auditor or of his personnel.

Material Modifications to ISA 230, "Audit Documentation"

Addition

1. Paragraph A23 of ISA 230 prescribes the minimum period of engagement documentation as five years. The SA 230 prescribes the minimum period of retention of engagement documentation as seven years since, as per the provisions of the Chartered Accountants Act, 1949, and regulations made there under, prescribe the minimum period of retention of working papers as seven years.
2. An additional paragraph A25 has been added from SQC 1, giving provisions regarding Ownership of Audit Documentation.

¹³ Refer para 82 of SQC 1.

¹⁴ The Council of the Institute had in August 2009, pursuant to the provisions of Rule 12 of the Chartered Accountants (Procedures of Investigations of Professional and Other Misconduct and Cases) Rules, 2007 had amended the audit documentation retention period appearing as ten years in paragraph 83 of SQC 1 to seven years. As a consequence of above decision of the Council, the audit documentation retention period appearing as ten years in paragraph A23 of SA 230, 'Audit Documentation', issued in January 2009, shall also stand amended to seven years. The complete text of the Announcement is published in Paragraph 'C', "Announcements/Clarifications" of Section 1, "Announcements of the Council regarding Status of Various Documents issued by the Institute of Chartered Accountants of India", included in Volume I.A of the Handbook.

¹⁵ Refer para 83 of SQC 1.

SA 240*

**The Auditor's Responsibilities Relating to Fraud
In An Audit of Financial Statements
(Effective for audits of financial statements
for periods beginning on or after April 1, 2009)**

Introduction

Scope of this SA

1. This Standard on Auditing (SA) deals with the auditor's responsibilities relating to fraud in an audit of financial statements. Specifically, it expands on how SA 315, "Identifying and Assessing the Risks of Material Misstatement Through Understanding the Entity and Its Environment," and SA 330, "The Auditor's Responses to Assessed Risks," are to be applied in relation to risks of material misstatement due to fraud.

Characteristics of Fraud

2. Misstatements in the financial statements can arise from either fraud or error. The distinguishing factor between fraud and error is whether the underlying action that results in the misstatement of the financial statements is intentional or unintentional.

3. Although fraud is a broad legal concept, for the purposes of the SAs, the auditor is concerned with fraud that causes a material misstatement in the financial statements. Two types of intentional misstatements are relevant to the auditor—misstatements resulting from fraudulent financial reporting and misstatements resulting from misappropriation of assets. Although the auditor may suspect or, in rare cases, identify the occurrence of fraud, the auditor does not make legal determinations of whether fraud has actually occurred. (Ref: Para. A1-A6)

Responsibility for the Prevention and Detection of Fraud

4. The primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management. It is important that management, with the oversight of those charged with governance, place a strong emphasis on fraud prevention, which may reduce opportunities for fraud to take place, and fraud deterrence, which could persuade individuals not to commit fraud because of the likelihood of detection and punishment. This involves a commitment to creating a culture of honesty and ethical behavior which can be reinforced by an active oversight by those charged with governance. In exercising oversight responsibility, those charged with governance consider the potential for override of controls or other inappropriate influence over the financial reporting process, such as efforts by management to manage earnings in order to influence the perceptions of analysts as to the entity's performance and profitability.

Responsibilities of the Auditor

5. An auditor conducting an audit in accordance with SAs is responsible for obtaining reasonable assurance that the financial statements taken as a whole are free from material misstatement, whether caused by fraud or error. Owing to the inherent limitations of an audit, there is an unavoidable risk that some material misstatements of the financial statements may not be detected, even though the audit is properly

* Published in December, 2007 issue of the Journal.

I.124 Auditing Pronouncements

planned and performed in accordance with the SAs.¹

6. As described in SA 200², the potential effects of inherent limitations are particularly significant in the case of misstatement resulting from fraud. The risk of not detecting a material misstatement resulting from fraud is higher than the risk of not detecting one resulting from error. This is because fraud may involve sophisticated and carefully organized schemes designed to conceal it, such as forgery, deliberate failure to record transactions, or intentional misrepresentations being made to the auditor. Such attempts at concealment may be even more difficult to detect when accompanied by collusion. Collusion may cause the auditor to believe that audit evidence is persuasive when it is, in fact, false. The auditor's ability to detect a fraud depends on factors such as the skillfulness of the perpetrator, the frequency and extent of manipulation, the degree of collusion involved, the relative size of individual amounts manipulated, and the seniority of those individuals involved. While the auditor may be able to identify potential opportunities for fraud to be perpetrated, it is difficult for the auditor to determine whether misstatements in judgment areas such as accounting estimates are caused by fraud or error.

7. Furthermore, the risk of the auditor not detecting a material misstatement resulting from management fraud is greater than for employee fraud, because management is frequently in a position to directly or indirectly manipulate accounting records, present fraudulent financial information or override control procedures designed to prevent similar frauds by other employees.

8. When obtaining reasonable assurance, the auditor is responsible for maintaining professional skepticism throughout the audit, considering the potential for management override of controls and recognizing the fact that audit procedures that are effective for detecting error may not be effective in detecting fraud. The requirements in this SA are designed to assist the auditor in identifying and assessing the risks of material misstatement due to fraud and in designing procedures to detect such misstatement.

Effective Date

9. This SA is effective for audits of financial statements for periods beginning on or after 1st April, 2009.

Objectives

10. The objectives of the auditor are:

- (a) To identify and assess the risks of material misstatement in the financial statements due to fraud;
- (b) To obtain sufficient appropriate audit evidence about the assessed risks of material misstatement due to fraud, through designing and implementing appropriate responses; and
- (c) To respond appropriately to identified or suspected fraud.

Definitions

11. For purposes of the SAs, the following terms have the meanings attributed below:

- (a) *Fraud* - An intentional act by one or more individuals among management, those charged with governance, employees, or third parties, involving the use of deception to obtain an unjust or illegal advantage.
- (b) *Fraud risk factors* - Events or conditions that indicate an incentive or pressure to commit fraud or provide an opportunity to commit fraud.

¹ SA 200, paragraph A51.

² SA 200, paragraph A51.

Requirements

Professional Skepticism

12. In accordance with SA 200³, the auditor shall maintain professional skepticism throughout the audit, recognizing the possibility that a material misstatement due to fraud could exist, notwithstanding the auditor's past experience of the honesty and integrity of the entity's management and those charged with governance. (Ref: Para. A7- A8)

13. Unless the auditor has reason to believe the contrary, the auditor may accept records and documents as genuine. If conditions identified during the audit cause the auditor to believe that a document may not be authentic or that terms in a document have been modified but not disclosed to the auditor, the auditor shall investigate further. (Ref: Para. A9)

14. Where responses to inquiries of management or those charged with governance are inconsistent, the auditor shall investigate the inconsistencies.

Discussion Among the Engagement Team

15. SA 315 requires a discussion among the engagement team members and a determination by the engagement partner of matters which are to be communicated to those team members not involved in the discussion⁴. This discussion shall place particular emphasis on how and where the entity's financial statements may be susceptible to material misstatement due to fraud, including how fraud might occur. The discussion shall occur notwithstanding the engagement team members' beliefs that management and those charged with governance are honest and have integrity. (Ref: Para. A10-A11)

Risk Assessment Procedures and Related Activities

16. When performing risk assessment procedures and related activities to obtain an understanding of the entity and its environment, including the entity's internal control, required by SA 315⁵, the auditor shall perform the procedures in paragraphs 17-24 to obtain information for use in identifying the risks of material misstatement due to fraud.

Management and Others within the Entity

17. The auditor shall make inquiries of management regarding:

- (a) Management's assessment of the risk that the financial statements may be materially misstated due to fraud, including the nature, extent and frequency of such assessments; (Ref: Para. A12-A13)
- (b) Management's process for identifying and responding to the risks of fraud in the entity, including any specific risks of fraud that management has identified or that have been brought to its attention, or classes of transactions, account balances, or disclosures for which a risk of fraud is likely to exist; (Ref: Para. A14)
- (c) Management's communication, if any, to those charged with governance regarding its processes for identifying and responding to the risks of fraud in the entity; and
- (d) Management's communication, if any, to employees regarding its views on business practices and ethical behavior.

18. The auditor shall make inquiries of management, and others within the entity as appropriate, to determine whether they have knowledge of any actual, suspected or alleged fraud affecting the entity. (Ref: Para. A15-A17)

³ SA 200, paragraph 15.

⁴ SA 315, paragraph 10.

⁵ SA 315, paragraphs 5-24.

I.126 Auditing Pronouncements

19. For those entities that have an internal audit function, the auditor shall make inquiries of internal audit to determine whether it has knowledge of any actual, suspected or alleged fraud affecting the entity, and to obtain its views about the risks of fraud. (Ref: Para. A18)

Those Charged with Governance

20. Unless all of those charged with governance are involved in managing the entity⁶, the auditor shall obtain an understanding of how those charged with governance exercise oversight of management's processes for identifying and responding to the risks of fraud in the entity and the internal control that management has established to mitigate these risks. (Ref: Para. A19-A21)

21. The auditor shall make inquiries of those charged with governance to determine whether they have knowledge of any actual, suspected or alleged fraud affecting the entity. These inquiries are made in part to corroborate the responses to the inquiries of management.

Unusual or Unexpected Relationships Identified

22. The auditor shall evaluate whether unusual or unexpected relationships that have been identified in performing analytical procedures, including those related to revenue accounts, may indicate risks of material misstatement due to fraud.

Other Information

23. The auditor shall consider whether other information obtained by the auditor indicates risks of material misstatement due to fraud. (Ref: Para. A22)

Evaluation of Fraud Risk Factors

24. The auditor shall evaluate whether the information obtained from the other risk assessment procedures and related activities performed indicates that one or more fraud risk factors are present. While fraud risk factors may not necessarily indicate the existence of fraud, they have often been present in circumstances where frauds have occurred and therefore may indicate risks of material misstatement due to fraud. (Ref: Para. A23-A27)

Identification and Assessment of the Risks of Material Misstatement Due to Fraud

25. In accordance with SA 315, the auditor shall identify and assess the risks of material misstatement due to fraud at the financial statement level, and at the assertion level for classes of transactions, account balances and disclosures⁷.

26. When identifying and assessing the risks of material misstatement due to fraud, the auditor shall, based on a presumption that there are risks of fraud in revenue recognition, evaluate which types of revenue, revenue transactions or assertions give rise to such risks. Paragraph 47 specifies the documentation required when the auditor concludes that the presumption is not applicable in the circumstances of the engagement and, accordingly, has not identified revenue recognition as a risk of material misstatement due to fraud. (Ref: Para. A28-A30)

27. The auditor shall treat those assessed risks of material misstatement due to fraud as significant risks and accordingly, to the extent not already done so, the auditor shall obtain an understanding of the entity's related controls, including control activities, relevant to such risks. (Ref: Para. A31-A32)

⁶ SA 260, "Communication with Those Charged with Governance", paragraph 12 (c).

⁷ SA 315, Paragraph 25.

Responses to the Assessed Risks of Material Misstatement Due to Fraud

Overall Responses

28. In accordance with SA 330, the auditor shall determine overall responses to address the assessed risks of material misstatement due to fraud at the financial statement level.⁸ (Ref: Para. A33)

29. In determining overall responses to address the assessed risks of material misstatement due to fraud at the financial statement level, the auditor shall:

- (a) Assign and supervise personnel taking account of the knowledge, skill and ability of the individuals to be given significant engagement responsibilities and the auditor's assessment of the risks of material misstatement due to fraud for the engagement; (Ref: Para. A34-A35)
- (b) Evaluate whether the selection and application of accounting policies by the entity, particularly those related to subjective measurements and complex transactions, may be indicative of fraudulent financial reporting resulting from management's effort to manage earnings; and
- (c) Incorporate an element of unpredictability in the selection of the nature, timing and extent of audit procedures. (Ref: Para. A36)

Audit Procedures Responsive to Assessed Risks of Material Misstatement Due to Fraud at the Assertion Level

30. In accordance with SA 330, the auditor shall design and perform further audit procedures whose nature, timing and extent are responsive to the assessed risks of material misstatement due to fraud at the assertion level.⁹ (Ref: Para. A37-A40)

Audit Procedures Responsive to Risks Related to Management Override of Controls

31. Management is in a unique position to perpetrate fraud because of management's ability to manipulate accounting records and prepare fraudulent financial statements by overriding controls that otherwise appear to be operating effectively. Although the level of risk of management override of controls will vary from entity to entity, the risk is nevertheless present in all entities. Due to the unpredictable way in which such override could occur, it is a risk of material misstatement due to fraud and thus a significant risk.

32. Irrespective of the auditor's assessment of the risks of management override of controls, the auditor shall design and perform audit procedures to:

- (a) Test the appropriateness of journal entries recorded in the general ledger and other adjustments made in the preparation of the financial statements. In designing and performing audit procedures for such tests, the auditor shall:
 - (i) Make inquiries of individuals involved in the financial reporting process about inappropriate or unusual activity relating to the processing of journal entries and other adjustments;
 - (ii) Select journal entries and other adjustments made at the end of a reporting period; and
 - (iii) Consider the need to test journal entries and other adjustments throughout the period. (Ref: Para. A41-A44)
- (b) Review accounting estimates¹⁰ for biases and evaluate whether the circumstances producing the bias, if any, represent a risk of material misstatement due to fraud. In performing this review, the auditor

⁸ SA 330, paragraph 5.

⁹ SA 330, paragraph 6.

¹⁰ Reference may be made to SA 540, "Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures".

I.128 Auditing Pronouncements

shall:

- (i) Evaluate whether the judgments and decisions made by management in making the accounting estimates included in the financial statements, even if they are individually reasonable, indicate a possible bias on the part of the entity's management that may represent a risk of material misstatement due to fraud. If so, the auditor shall re-evaluate the accounting estimates taken as a whole; and
 - (ii) Perform a retrospective review of management judgments and assumptions related to significant accounting estimates reflected in the financial statements of the prior year¹¹. (Ref: Para. A45-A46)
- (c) For significant transactions that are outside the normal course of business for the entity, or that otherwise appear to be unusual given the auditor's understanding of the entity and its environment and other information obtained during the audit, the auditor shall evaluate whether the business rationale (or the lack thereof) of the transactions suggests that they may have been entered into to engage in fraudulent financial reporting or to conceal misappropriation of assets. (Ref: Para. A47)

33. The auditor shall determine whether, in order to respond to the identified risks of management override of controls, the auditor needs to perform other audit procedures in addition to those specifically referred to above (i.e., when there are specific additional risks of management override that are not covered as part of the procedures performed to address the requirements in paragraph 32).

Evaluation of Audit Evidence (Ref: Para. A48)

34. The auditor shall evaluate whether analytical procedures¹² that are performed when forming an overall conclusion as to whether the financial statements as a whole are consistent with the auditor's understanding of the entity and its environment indicate a previously unrecognized risk of material misstatement due to fraud. (Ref: Para. A49)

35. When the auditor identifies a misstatement, the auditor shall evaluate whether such a misstatement is indicative of fraud. If there is such an indication, the auditor shall evaluate the implications of the misstatement in relation to other aspects of the audit, particularly the reliability of management representations, recognizing that an instance of fraud is unlikely to be an isolated occurrence. (Ref: Para. A50)

36. If the auditor identifies a misstatement, whether material or not, and the auditor has reason to believe that it is or may be the result of fraud and that management (in particular, senior management) is involved, the auditor shall re-evaluate the assessment of the risks of material misstatement due to fraud and its resulting impact on the nature, timing and extent of audit procedures to respond to the assessed risks. The auditor shall also consider whether circumstances or conditions indicate possible collusion involving employees, management or third parties when reconsidering the reliability of evidence previously obtained. (Ref: Para. A51)

37. When the auditor confirms that, or is unable to conclude whether, the financial statements are materially misstated as a result of fraud the auditor shall evaluate the implications for the audit. (Ref: Para. A52)

¹¹ Accounting Standard (AS) 5, "Net Profit or Loss for the Period, Prior Period Items and Changes in Accounting Policies" requires the adjustment of the prior period estimates, which may affect both the period of change in the Accounting Estimates and subsequent periods, in subsequent years.

¹² Reference may be made to SA 520, "Analytical Procedures".

Auditor Unable to Continue the Engagement

38. If, as a result of a misstatement resulting from fraud or suspected fraud, the auditor encounters exceptional circumstances that bring into question the auditor's ability to continue performing the audit, the auditor shall:

- (a) Determine the professional and legal responsibilities applicable in the circumstances, including whether there is a requirement for the auditor to report to the person or persons who made the audit appointment or, in some cases, to regulatory authorities;
- (b) Consider whether it is appropriate to withdraw from the engagement, where withdrawal from the engagement is legally permitted; and
- (c) If the auditor withdraws:
 - (i) Discuss with the appropriate level of management and those charged with governance, the auditor's withdrawal from the engagement and the reasons for the withdrawal; and
 - (ii) Determine whether there is a professional or legal requirement to report to the person or persons who made the audit appointment or, in some cases, to regulatory authorities, the auditor's withdrawal from the engagement and the reasons for the withdrawal. (Ref: Para. A53-A56)

Management Representations

39. The auditor shall obtain written representations from management and, where applicable, those charged with governance that:

- (a) They acknowledge their responsibility for the design, implementation and maintenance of internal control to prevent and detect fraud;
- (b) They have disclosed to the auditor the results of management's assessment of the risk that the financial statements may be materially misstated as a result of fraud;
- (c) They have disclosed to the auditor their knowledge of fraud or suspected fraud affecting the entity involving:
 - (i) Management;
 - (ii) Employees who have significant roles in internal control; or
 - (iii) Others where the fraud could have a material effect on the financial statements; and
- (d) They have disclosed to the auditor their knowledge of any allegations of fraud, or suspected fraud, affecting the entity's financial statements communicated by employees, former employees, analysts, regulators or others. (Ref: Para. A57-A58)

Communications to Management and with Those Charged with Governance

40. If the auditor has identified a fraud or has obtained information that indicates that a fraud may exist, the auditor shall communicate these matters on a timely basis to the appropriate level of management in order to inform those with primary responsibility for the prevention and detection of fraud of matters relevant to their responsibilities. (Ref: Para. A59)

41. Unless all of those charged with governance are involved in managing the entity, if the auditor has identified or suspects fraud involving:

- (a) Management;
- (b) Employees who have significant roles in internal control; or
- (c) Others where the fraud results in a material misstatement in the financial statements.

I.130 Auditing Pronouncements

The auditor shall communicate these matters to those charged with governance on a timely basis. If the auditor suspects fraud involving management, the auditor shall communicate these suspicions to those charged with governance and discuss with them the nature, timing and extent of audit procedures necessary to complete the audit. (Ref: Para. A60-A62)

42. In accordance with SA 260, Communication with Those Charged with Governance¹³, the auditor shall communicate with those charged with governance any other matters related to fraud that are, in the auditor's judgment, relevant to their responsibilities. (Ref: Para. A63)

Communications to Regulatory and Enforcement Authorities

43. If the auditor has identified or suspects a fraud, the auditor shall determine whether there is a responsibility to report the occurrence or suspicion to a party outside the entity. Although the auditor's professional duty to maintain the confidentiality of client information may preclude such reporting, the auditor's legal responsibilities may override the duty of confidentiality in some circumstances. (Ref: Para. A64-A66)

Documentation

44. The auditor's documentation of the understanding of the entity and its environment and the assessment of the risks of material misstatement required by SA 315¹⁴ shall include:

- (a) The significant decisions reached during the discussion among the engagement team regarding the susceptibility of the entity's financial statements to material misstatement due to fraud; and
- (b) The identified and assessed risks of material misstatement due to fraud at the financial statement level and at the assertion level.

45. The auditor's documentation of the responses to the assessed risks of material misstatement required by SA 330¹⁵ shall include:

- (a) The overall responses to the assessed risks of material misstatement due to fraud at the financial statement level and the nature, timing and extent of audit procedures, and the linkage of those procedures with the assessed risks of material misstatement due to fraud at the assertion level; and
- (b) The results of the audit procedures, including those designed to address the risk of management override of controls.

46. The auditor shall document communications about fraud made to management, those charged with governance, regulators and others.

47. When the auditor has concluded that the presumption that there is a risk of material misstatement due to fraud related to revenue recognition is not applicable in the circumstances of the engagement, the auditor shall document the reasons for that conclusion.

Application and Other Explanatory Material

Characteristics of Fraud (Ref: Para. 3)

A1. Fraud, whether fraudulent financial reporting or misappropriation of assets, involves incentive or pressure to commit fraud, a perceived opportunity to do so and some rationalization of the act. For example:

- Incentive or pressure to commit fraudulent financial reporting may exist when management is under

¹³ Reference may be made to SA 260, "Communication with Those Charged with Governance".

¹⁴ SA 315, paragraph 32.

¹⁵ SA 330, paragraph 28.

pressure, from sources outside or inside the entity, to achieve an expected (and perhaps unrealistic) earnings target or financial outcome – particularly since the consequences to management for failing to meet financial goals can be significant. Similarly, individuals may have an incentive to misappropriate assets, for example, because the individuals are living beyond their means.

- A perceived opportunity to commit fraud may exist when an individual believes internal control can be overridden, for example, because the individual is in a position of trust or has knowledge of specific deficiencies in internal control.
- Individuals may be able to rationalize committing a fraudulent act. Some individuals possess an attitude, character or set of ethical values that allow them knowingly and intentionally to commit a dishonest act. However, even otherwise honest individuals can commit fraud in an environment that imposes sufficient pressure on them.

A2. Fraudulent financial reporting involves intentional misstatements including omissions of amounts or disclosures in financial statements to deceive financial statement users. It can be caused by the efforts of management to manage earnings in order to deceive financial statement users by influencing their perceptions as to the entity's performance and profitability. Such earnings management may start out with small actions or inappropriate adjustment of assumptions and changes in judgments by management. Pressures and incentives may lead these actions to increase to the extent that they result in fraudulent financial reporting. Such a situation could occur when, due to pressures to meet market expectations or a desire to maximize compensation based on performance, management intentionally takes positions that lead to fraudulent financial reporting by materially misstating the financial statements. In some entities, management may be motivated to reduce earnings by a material amount to minimize tax or to inflate earnings to secure bank financing.

A3. Fraudulent financial reporting may be accomplished by the following:

- Manipulation, falsification (including forgery), or alteration of accounting records or supporting documentation from which the financial statements are prepared.
- Misrepresentation in or intentional omission from, the financial statements of events, transactions or other significant information.
- Intentional misapplication of accounting principles relating to amounts, classification, manner of presentation, or disclosure.

A4. Fraudulent financial reporting often involves management override of controls that otherwise may appear to be operating effectively. Fraud can be committed by management overriding controls using such techniques as:

- Recording fictitious journal entries, particularly close to the end of an accounting period, to manipulate operating results or achieve other objectives.
- Inappropriately adjusting assumptions and changing judgments used to estimate account balances.
- Omitting, advancing or delaying recognition in the financial statements of events and transactions that have occurred during the reporting period.
- Concealing, or not disclosing, facts that could affect the amounts recorded in the financial statements.
- Engaging in complex transactions that are structured to misrepresent the financial position or financial performance of the entity.
- Altering records and terms related to significant and unusual transactions.

A5. Misappropriation of assets involves the theft of an entity's assets and is often perpetrated by employees in relatively small and immaterial amounts. However, it can also involve management who are

I.132 Auditing Pronouncements

usually more able to disguise or conceal misappropriations in ways that are difficult to detect. Misappropriation of assets can be accomplished in a variety of ways including:

- Embezzling receipts (for example, misappropriating collections on accounts receivable or diverting receipts in respect of written-off accounts to personal bank accounts).
- Stealing physical assets or intellectual property (for example, stealing inventory for personal use or for sale, stealing scrap for resale, colluding with a competitor by disclosing technological data in return for payment).
- Causing an entity to pay for goods and services not received (for example, payments to fictitious vendors, kickbacks paid by vendors to the entity's purchasing agents in return for inflating prices, payments to fictitious employees).
- Using an entity's assets for personal use (for example, using the entity's assets as collateral for a personal loan or a loan to a related party).

Misappropriation of assets is often accompanied by false or misleading records or documents in order to conceal the fact that the assets are missing or have been pledged without proper authorization.

A6. The auditor may, at times, be required to by a legislation or a regulation to make a specific assertion in respect of frauds on/by the entity in his report. For example, Clause (xxi) of Paragraph 4 of the Companies (Auditor's Report) Order, 2003 requires the auditor to specifically report "whether any fraud on or by the entity has been noticed or reported during the year; if yes, the nature and amount involved is to be indicated". Similarly, in case of audit of banks, the auditors, in terms of the circular no. DBS.FGV.(F).No. BC/23.08.001/2001-02, is required to report to the Reserve Bank of India anything susceptible to fraud or fraudulent activity or act of excess power or any foul play in any transaction. Consequently, in such cases, the auditor's responsibilities may not be limited to consideration of risks of material misstatement of the financial statements, but may also include a broader responsibility to consider risks of fraud.

Professional Skepticism (Ref: Para. 12-14)

A7. Maintaining professional skepticism requires an ongoing questioning of whether the information and audit evidence obtained suggests that a material misstatement due to fraud may exist. It includes considering the reliability of the information to be used as audit evidence and the controls over its preparation and maintenance where relevant. Due to the characteristics of fraud, the auditor's professional skepticism is particularly important when considering the risks of material misstatement due to fraud.

A8. Although the auditor cannot be expected to disregard past experience of the honesty and integrity of the entity's management and those charged with governance, the auditor's professional skepticism is particularly important in considering the risks of material misstatement due to fraud because there may have been changes in circumstances.

A9. As explained in SA 200, an audit performed in accordance with SAs rarely involves the authentication of documents, nor is the auditor trained as or expected to be an expert in such authentication.¹⁶ However, when the auditor identifies conditions that cause the auditor to believe that a document may not be authentic or that terms in a document have been modified but not disclosed to the auditor, possible procedures to investigate further may include:

- Confirming directly with the third party.
- Using the work of an expert to assess the document's authenticity.

¹⁶ SA 200, paragraph A47.

Discussion among the Engagement Team (Ref: Para. 15)

A10. Discussing the susceptibility of the entity's financial statements to material misstatement due to fraud with the engagement team:

- Provides an opportunity for more experienced engagement team members to share their insights about how and where the financial statements may be susceptible to material misstatement due to fraud.
- Enables the auditor to consider an appropriate response to such susceptibility and to determine which members of the engagement team will conduct certain audit procedures.
- Permits the auditor to determine how the results of audit procedures will be shared among the engagement team and how to deal with any allegations of fraud that may come to the auditor's attention.

A11. The discussion may include such matters as:

- An exchange of ideas among engagement team members about how and where they believe the entity's financial statements may be susceptible to material misstatement due to fraud, how management could perpetrate and conceal fraudulent financial reporting, and how assets of the entity could be misappropriated.
- A consideration of circumstances that might be indicative of earnings management and the practices that might be followed by management to manage earnings that could lead to fraudulent financial reporting.
- A consideration of the known external and internal factors affecting the entity that may create an incentive or pressure for management or others to commit fraud, provide the opportunity for fraud to be perpetrated, and indicate a culture or environment that enables management or others to rationalize committing fraud.
- A consideration of management's involvement in overseeing employees with access to cash or other assets susceptible to misappropriation.
- A consideration of any unusual or unexplained changes in behavior or lifestyle of management or employees which have come to the attention of the engagement team.
- An emphasis on the importance of maintaining a proper state of mind throughout the audit regarding the potential for material misstatement due to fraud.
- A consideration of the types of circumstances that, if encountered, might indicate the possibility of fraud.
- A consideration of how an element of unpredictability will be incorporated into the nature, timing and extent of the audit procedures to be performed.
- A consideration of the audit procedures that might be selected to respond to the susceptibility of the entity's financial statement to material misstatement due to fraud and whether certain types of audit procedures are more effective than others.
- A consideration of any allegations of fraud that have come to the auditor's attention.
- A consideration of the risk of management override of controls.

Risk Assessment Procedures and Related Activities

Inquiries of Management

Management's Assessment of the Risk of Material Misstatement Due to Fraud [Ref: Para. 17(a)]

A12. Management accepts responsibility for the entity's internal control and for the preparation of the entity's

I.134 Auditing Pronouncements

financial statements. Accordingly, it is appropriate for the auditor to make inquiries of management regarding management's own assessment of the risk of fraud and the controls in place to prevent and detect it. The nature, extent and frequency of management's assessment of such risk and controls may vary from entity to entity. In some entities, management may make detailed assessments on an annual basis or as part of continuous monitoring. In other entities, management's assessment may be less structured and less frequent. The nature, extent and frequency of management's assessment are relevant to the auditor's understanding of the entity's control environment. For example, the fact that management has not made an assessment of the risk of fraud may in some circumstances be indicative of the lack of importance that management places on internal control.

Considerations specific to smaller entities

A13. In some entities, particularly smaller entities, the focus of management's assessment may be on the risks of employee fraud or misappropriation of assets.

Management's Process for Identifying and Responding to the Risks of Fraud (Ref: Para. 17(b))

A14. In the case of entities with multiple locations management's processes may include different levels of monitoring of operating locations, or business segments. Management may also have identified particular operating locations or business segments for which a risk of fraud may be more likely to exist.

Inquiry of Management and Others within the Entity (Ref: Para. 18)

A15. The auditor's inquiries of management may provide useful information concerning the risks of material misstatements in the financial statements resulting from employee fraud. However, such inquiries are unlikely to provide useful information regarding the risks of material misstatement in the financial statements resulting from management fraud. Making inquiries of others within the entity may provide individuals with an opportunity to convey information to the auditor that may not otherwise be communicated.

A16. Examples of others within the entity to whom the auditor may direct inquiries about the existence or suspicion of fraud include:

- Operating personnel not directly involved in the financial reporting process.
- Employees with different levels of authority.
- Employees involved in initiating, processing or recording complex or unusual transactions and those who supervise or monitor such employees.
- In-house legal counsel.
- Chief ethics officer or equivalent person.
- The person or persons charged with dealing with allegations of fraud.

A17. Management is often in the best position to perpetrate fraud. Accordingly, when evaluating management's responses to inquiries with an attitude of professional skepticism, the auditor may judge it necessary to corroborate responses to inquiries with other information.

Inquiry of Internal Audit (Ref: Para. 19)

A18. SA 315 and SA 610, establishes requirements and provides guidance in audits of those entities that have an internal audit function.¹⁷ In carrying out the requirement of those SAs in the context of fraud, the auditor may inquire about specific internal audit activities including, for example:

- The procedures performed, if any, by the internal auditors during the year to detect fraud.

¹⁷ SA 315, paragraph 23 and SA 610, "Using the Work of Internal Auditors".

- Whether management has satisfactorily responded to any findings resulting from those procedures.

Obtaining an Understanding of Oversight Exercised by Those Charged With Governance (Ref: Para. 20)

A19. Those charged with governance of an entity have oversight responsibility for systems for monitoring risk, financial control and compliance with the law. In many entities, corporate governance practices are well developed and those charged with governance play an active role in oversight of the entity's assessment of the risks of fraud and of the relevant internal control. Since the responsibilities of those charged with governance and management may vary by entity, it is important that the auditor understands their respective responsibilities to enable the auditor to obtain an understanding of the oversight exercised by the appropriate individuals.¹⁸

A20. An understanding of the oversight exercised by those charged with governance may provide insights regarding the susceptibility of the entity to management fraud, the adequacy of internal control over risks of fraud, and the competency and integrity of management. The auditor may obtain this understanding in a number of ways, such as by attending meetings where such discussions take place, reading the minutes from such meetings or making inquiries of those charged with governance.

Considerations Specific to Smaller Entities

A21. In some cases, all of those charged with governance are involved in managing the entity. This may be the case in a small entity where a single owner manages the entity and no one else has a governance role. In these cases, there is ordinarily no action on the part of the auditor because there is no oversight separate from management.

Consideration of Other Information (Ref: Para. 23)

A22. In addition to information obtained from applying analytical procedures, other information obtained about the entity and its environment may be helpful in identifying the risks of material misstatement due to fraud. The discussion among team members may provide information that is helpful in identifying such risks. In addition, information obtained from the auditor's client acceptance and retention processes, and experience gained on other engagements performed for the entity, for example engagements to review interim financial information, may be relevant in the identification of the risks of material misstatement due to fraud.

Evaluation of Fraud Risk Factors (Ref: Para. 24)

A23. The fact that fraud is usually concealed can make it very difficult to detect. Nevertheless, the auditor may identify events or conditions that indicate an incentive or pressure to commit fraud or provide an opportunity to commit fraud (fraud risk factors). For example:

- The need to meet expectations of third parties to obtain additional equity financing may create pressure to commit fraud;
- The granting of significant bonuses if unrealistic profit targets are met may create an incentive to commit fraud; and
- A control environment that is not effective may create an opportunity to commit fraud.

A24. Fraud risk factors cannot easily be ranked in order of importance. The significance of fraud risk factors varies widely. Some of these factors will be present in entities where the specific conditions do not present risks of material misstatement. Accordingly, the determination of whether a fraud risk factor is present and

¹⁸ SA 260, "Communication with Those Charged with Governance", paragraphs A1-A8, discusses with whom the auditor communicates when the entity's governance structure is not well defined.

I.136 Auditing Pronouncements

whether it is to be considered in assessing the risks of material misstatement of the financial statements due to fraud requires the exercise of professional judgment.

A25. Examples of fraud risk factors related to fraudulent financial reporting and misappropriation of assets are presented in Appendix 1. These illustrative risk factors are classified based on the three conditions that are generally present when fraud exists:

- An incentive or pressure to commit fraud;
- A perceived opportunity to commit fraud; and
- An ability to rationalize the fraudulent action.

Risk factors reflective of an attitude that permits rationalization of the fraudulent action may not be susceptible to observation by the auditor. Nevertheless, the auditor may become aware of the existence of such information. Although the fraud risk factors described in Appendix 1 cover a broad range of situations that may be faced by auditors, they are only examples and other risk factors may exist.

A26. The size, complexity, and ownership characteristics of the entity have a significant influence on the consideration of relevant fraud risk factors. For example, in the case of a large entity, there may be factors that generally constrain improper conduct by management, such as:

- Effective oversight by those charged with governance.
- An effective internal audit function.
- The existence and enforcement of a written code of conduct.

Furthermore, fraud risk factors considered at a business segment operating level may provide different insights when compared with those obtained when considered at an entity-wide level.

Considerations Specific to Smaller Entities

A27. In the case of a small entity, some or all of these considerations may be inapplicable or less relevant. For example, a smaller entity may not have a written code of conduct but, instead, may have developed a culture that emphasizes the importance of integrity and ethical behavior through oral communication and by management example. Domination of management by a single individual in a small entity does not generally, in and of itself, indicate a failure by management to display and communicate an appropriate attitude regarding internal control and the financial reporting process. In some entities, the need for management authorization can compensate for otherwise deficient controls and reduce the risk of employee fraud. However, domination of management by a single individual can be a potential deficiency in internal control since there is an opportunity for management override of controls.

Identification and Assessment of the Risks of Material Misstatement Due to Fraud

Risks of Fraud in Revenue Recognition (Ref: Para. 26)

A28. Material misstatement due to fraudulent financial reporting relating to revenue recognition often results from an overstatement of revenues through, for example, premature revenue recognition or recording fictitious revenues. It may result also from an understatement of revenues through, for example, improperly shifting revenues to a later period.

A29. The risks of fraud in revenue recognition may be greater in some entities than others. For example, there may be pressures or incentives on management to commit fraudulent financial reporting through inappropriate revenue recognition in the case of listed entities when, for example, performance is measured in terms of year-over-year revenue growth or profit. Similarly, for example, there may be greater risks of fraud in revenue recognition in the case of entities that generate a substantial portion of revenues through cash sales.

A30. The presumption that there are risks of fraud in revenue recognition may be rebutted. For example, the auditor may conclude that there is no risk of material misstatement due to fraud relating to revenue recognition in the case where there is a single type of simple revenue transaction, for example, leasehold revenue from a single unit rental property.

Identifying and Assessing the Risks of Material Misstatement Due to Fraud and Understanding the Entity's Related Controls (Ref: Para. 27)

A31. As explained in SA 315 management may make judgments on the nature and extent of the controls it chooses to implement, and the nature and extent of the risks it chooses to assume.¹⁹ In determining which controls to implement to prevent and detect fraud, management considers the risks that the financial statements may be materially misstated as a result of fraud. As part of this consideration, management may conclude that it is not cost effective to implement and maintain a particular control in relation to the reduction in the risks of material misstatement due to fraud to be achieved.

A32. It is therefore important for the auditor to obtain an understanding of the controls that management has designed, implemented and maintained to prevent and detect fraud. In doing so, the auditor may learn, for example, that management has consciously chosen to accept the risks associated with a lack of segregation of duties. Information from obtaining this understanding may also be useful in identifying fraud risks factors that may affect the auditor's assessment of the risks that the financial statements may contain material misstatement due to fraud.

Responses to the Assessed Risks of Material Misstatement Due to Fraud

Overall Responses (Ref: Para. 28)

A33. Determining overall responses to address the assessed risks of material misstatement due to fraud generally includes the consideration of how the overall conduct of the audit can reflect increased professional skepticism, for example, through:

- Increased sensitivity in the selection of the nature and extent of documentation to be examined in support of material transactions.
- Increased recognition of the need to corroborate management explanations or representations concerning material matters.

It also involves more general considerations apart from the specific procedures otherwise planned; these considerations include the matters listed in paragraph 29, which are discussed below.

Assignment and Supervision of Personnel (Ref: Para. 29(a))

A34. The auditor may respond to identified risks of material misstatement due to fraud by, for example, assigning additional individuals with specialized skill and knowledge, such as forensic and IT experts, or by assigning more experienced individuals to the engagement.

A35. The extent of supervision reflects the auditor's assessment of risks of material misstatement due to fraud and the competencies of the engagement team members performing the work.

Unpredictability in the Selection of Audit Procedures (Ref: Para. 29(c))

A36. Incorporating an element of unpredictability in the selection of the nature, timing and extent of audit procedures to be performed is important as individuals within the entity who are familiar with the audit procedures normally performed on engagements may be more able to conceal fraudulent financial reporting. This can be achieved by, for example:

¹⁹ SA 315, paragraph A48.

I.138 Auditing Pronouncements

- Performing substantive procedures on selected account balances and assertions not otherwise tested due to their materiality or risk.
- Adjusting the timing of audit procedures from that otherwise expected.
- Using different sampling methods.
- Performing audit procedures at different locations or at locations on an unannounced basis.

Audit Procedures Responsive to Assessed Risks of Material Misstatement Due to Fraud at the Assertion Level (Ref: Para. 30)

A37. The auditor's responses to address the assessed risks of material misstatement due to fraud at the assertion level may include changing the nature, timing, and extent of audit procedures in the following ways:

- The nature of audit procedures to be performed may need to be changed to obtain audit evidence that is more reliable and relevant or to obtain additional corroborative information. This may affect both the type of audit procedures to be performed and their combination. For example:
 - Physical observation or inspection of certain assets may become more important or the auditor may choose to use computer-assisted audit techniques to gather more evidence about data contained in significant accounts or electronic transaction files.
 - The auditor may design procedures to obtain additional corroborative information. For example, if the auditor identifies that management is under pressure to meet earnings expectations, there may be a related risk that management is inflating sales by entering into sales agreements that include terms that preclude revenue recognition or by invoicing sales before delivery. In these circumstances, the auditor may, for example, design external confirmations not only to confirm outstanding amounts, but also to confirm the details of the sales agreements, including date, any rights of return and delivery terms. In addition, the auditor might find it effective to supplement such external confirmations with inquiries of non-financial personnel in the entity regarding any changes in sales agreements and delivery terms.
- The timing of substantive procedures may need to be modified. The auditor may conclude that performing substantive testing at or near the period end better addresses an assessed risk of material misstatement due to fraud. The auditor may conclude that, given the assessed risks of intentional misstatement or manipulation, audit procedures to extend audit conclusions from an interim date to the period end would not be effective. In contrast, because an intentional misstatement—for example, a misstatement involving improper revenue recognition—may have been initiated in an interim period, the auditor may elect to apply substantive procedures to transactions occurring earlier in or throughout the reporting period.
- The extent of the procedures applied reflects the assessment of the risks of material misstatement due to fraud. For example, increasing sample sizes or performing analytical procedures at a more detailed level may be appropriate. Also, computer-assisted audit techniques may enable more extensive testing of electronic transactions and account files. Such techniques can be used to select sample transactions from key electronic files, to sort transactions with specific characteristics, or to test an entire population instead of a sample.

A38. If the auditor identifies a risk of material misstatement due to fraud that affects inventory quantities, examining the entity's inventory records may help to identify locations or items that require specific attention during or after the physical inventory count. Such a review may lead to a decision to observe inventory counts at certain locations on an unannounced basis or to conduct inventory counts at all locations on the same date.

A39. The auditor may identify a risk of material misstatement due to fraud affecting a number of accounts

and assertions. These may include asset valuation, estimates relating to specific transactions (such as acquisitions, restructurings, or disposals of a segment of the business), and other significant accrued liabilities (such as pension and other post-employment benefit obligations, or environmental remediation liabilities). The risk may also relate to significant changes in assumptions relating to recurring estimates. Information gathered through obtaining an understanding of the entity and its environment may assist the auditor in evaluating the reasonableness of such management estimates and underlying judgments and assumptions. A retrospective review of similar management judgments and assumptions applied in prior periods may also provide insight about the reasonableness of judgments and assumptions supporting management estimates.

A40. Examples of possible audit procedures to address the assessed risks of material misstatement due to fraud, including those that illustrate the incorporation of an element of unpredictability, are presented in Appendix 2. The appendix includes examples of responses to the auditor's assessment of the risks of material misstatement resulting from both fraudulent financial reporting, including fraudulent financial reporting resulting from revenue recognition, and misappropriation of assets.

Audit Procedures Responsive to Risks Related to Management Override of Controls

Journal Entries and Other Adjustments (Ref: Para. 32(a))

A41. Material misstatement of financial statements due to fraud often involve the manipulation of the financial reporting process by recording inappropriate or unauthorized journal entries. This may occur throughout the year or at period end, or by management making adjustments to amounts reported in the financial statements that are not reflected in journal entries, such as through consolidating adjustments and reclassifications.

A42. Further, the auditor's consideration of the risks of material misstatement associated with inappropriate override of controls over journal entries is important since automated processes and controls may reduce the risk of inadvertent error but do not overcome the risk that individuals may inappropriately override such automated processes, for example, by changing the amounts being automatically passed to the general ledger or to the financial reporting system. Furthermore, when IT is used to transfer information automatically, there may be little or no visible evidence of such intervention in the information systems.

A43. When identifying and selecting journal entries and other adjustments for testing and determining the appropriate method of examining the underlying support for the items selected, the following matters are of relevance:

- The assessment of the risks of material misstatement due to fraud – the presence of fraud risk factors and other information obtained during the auditor's assessment of the risks of material misstatement due to fraud may assist the auditor to identify specific classes of journal entries and other adjustments for testing.
- Controls that have been implemented over journal entries and other adjustments – effective controls over the preparation and posting of journal entries and other adjustments may reduce the extent of substantive testing necessary, provided that the auditor has tested the operating effectiveness of the controls.
- The entity's financial reporting process and the nature of evidence that can be obtained – for many entities routine processing of transactions involves a combination of manual and automated steps and procedures. Similarly, the processing of journal entries and other adjustments may involve both manual and automated procedures and controls. When information technology is used in the financial reporting process, journal entries and other adjustments may exist only in electronic form.
- The characteristics of fraudulent journal entries or other adjustments – inappropriate journal entries or

I.140 Auditing Pronouncements

other adjustments often have unique identifying characteristics. Such characteristics may include entries (a) made to unrelated, unusual, or seldom-used accounts, (b) made by individuals who typically do not make journal entries, (c) recorded at the end of the period or as post-closing entries that have little or no explanation or description, (d) made either before or during the preparation of the financial statements that do not have account numbers, or (e) containing round numbers or consistent ending numbers.

- The nature and complexity of the accounts – inappropriate journal entries or adjustments may be applied to accounts that (a) contain transactions that are complex or unusual in nature, (b) contain significant estimates and period-end adjustments, (c) have been prone to misstatements in the past, (d) have not been reconciled on a timely basis or contain unreconciled differences, (e) contain inter-company transactions, or (f) are otherwise associated with an identified risk of material misstatement due to fraud. In audits of entities that have several locations or components, consideration is given to the need to select journal entries from multiple locations.
- Journal entries or other adjustments processed outside the normal course of business – non standard journal entries may not be subject to the same level of internal control as those journal entries used on a recurring basis to record transactions such as monthly sales, purchases and cash disbursements.

A44. The auditor uses professional judgment in determining the nature, timing and extent of testing of journal entries and other adjustments. However, because fraudulent journal entries and other adjustments are often made at the end of a reporting period, paragraph 32(a)(ii) requires the auditor to select the journal entries and other adjustments made at that time. Further, because material misstatements in financial statements due to fraud can occur throughout the period and may involve extensive efforts to conceal how the fraud is accomplished, paragraph 32(a)(iii) requires the auditor to consider whether there is also a need to test journal entries and other adjustments throughout the period.

Accounting Estimates (Ref: Para. 32(b))

A45. In preparing financial statements, management is responsible for making a number of judgments or assumptions that affect significant accounting estimates and for monitoring the reasonableness of such estimates on an ongoing basis. Fraudulent financial reporting is often accomplished through intentional misstatement of accounting estimates. This may be achieved by, for example, understating or overstating all provisions or reserves in the same fashion so as to be designed either to smooth earnings over two or more accounting periods, or to achieve a designated earnings level in order to deceive financial statement users by influencing their perceptions as to the entity's performance and profitability.

A46. The purpose of performing a retrospective review of management judgments and assumptions related to significant accounting estimates reflected in the financial statements of the prior year is to determine whether there is an indication of a possible bias on the part of management. It is not intended to call into question the auditor's professional judgments made in the prior year that were based on information available at the time.

Business Rationale for Significant Transactions (Ref: Para. 32(c))

A47. Indicators that may suggest that significant transactions that are outside the normal course of business for the entity, or that otherwise appear to be unusual, may have been entered into to engage in fraudulent financial reporting or to conceal misappropriation of assets include:

- The form of such transactions appears overly complex (for example, the transaction involves multiple entities within a consolidated group or multiple unrelated third parties).
- Management has not discussed the nature of and accounting for such transactions with those charged with governance of the entity, and there is inadequate documentation.

- Management is placing more emphasis on the need for a particular accounting treatment than on the underlying economics of the transaction.
- Transactions that involve non-consolidated related parties, including special purpose entities, have not been properly reviewed or approved by those charged with governance of the entity.
- The transactions involve previously unidentified related parties or parties that do not have the substance or the financial strength to support the transaction without assistance from the entity under audit.

Evaluation of Audit Evidence (Ref: Para. 34-37)

A48. SA 330 requires the auditor, based on the audit procedures performed and the audit evidence obtained, to evaluate whether the assessments of the risks of material misstatement at the assertion level remain appropriate.²⁰ This evaluation is primarily a qualitative matter based on the auditor's judgment. Such an evaluation may provide further insight about the risks of material misstatement due to fraud and whether there is a need to perform additional or different audit procedures. Appendix 3 contains examples of circumstances that may indicate the possibility of fraud.

Analytical Procedures Performed in the Overall Review of the Financial Statements (Ref: Para. 34)

A49. Determining which particular trends and relationships may indicate a risk of material misstatement due to fraud requires professional judgment. Unusual relationships involving year-end revenue and income are particularly relevant. These might include, for example: uncharacteristically large amounts of income being reported in the last few weeks of the reporting period or unusual transactions; or income that is inconsistent with trends in cash flow from operations.

Consideration of Identified Misstatements (Ref: Para. 35-37)

A50. Since fraud involves incentive or pressure to commit fraud, a perceived opportunity to do so or some rationalization of the act, an instance of fraud is unlikely to be an isolated occurrence. Accordingly, misstatements, such as numerous misstatements at a specific location even though the cumulative effect is not material, may be indicative of a risk of material misstatement due to fraud.

A51. The implications of identified fraud depend on the circumstances. For example, an otherwise insignificant fraud may be significant if it involves senior management. In such circumstances, the reliability of evidence previously obtained may be called into question, since there may be doubts about the completeness and truthfulness of representations made and about the genuineness of accounting records and documentation. There may also be a possibility of collusion involving employees, management or third parties.

A52. SA 450, "Evaluation of Misstatements Identified during the Audit"²¹, and SA 700, "Forming an Opinion and Reporting on Financial Statements", establish requirements and provide guidance on the evaluation and disposition of misstatements and the effect on the auditor's opinion in the auditor's report.

Auditor Unable to Continue the Engagement (Ref: Para. 38)

A53. Examples of exceptional circumstances that may arise and that may bring into question the auditor's ability to continue performing the audit include:

- (a) The entity does not take the appropriate action regarding fraud that the auditor considers necessary in the circumstances, even when the fraud is not material to the financial statements;

²⁰ SA 330, paragraph 25.

²¹ SA 450, "Evaluation of Misstatements Identified during the Audit", paragraphs 12-19.

I.142 Auditing Pronouncements

- (b) The auditor's consideration of the risks of material misstatement due to fraud and the results of audit tests indicate a significant risk of material and pervasive fraud; or
- (c) The auditor has significant concern about the competence or integrity of management or those charged with governance.

A54. Because of the variety of the circumstances that may arise, it is not possible to describe definitively when withdrawal from an engagement is appropriate. Factors that affect the auditor's conclusion include the implications of the involvement of a member of management or of those charged with governance (which may affect the reliability of management representations) and the effects on the auditor of a continuing association with the entity.

A55. The auditor has professional and legal responsibilities in such circumstances and these responsibilities may vary under different legislations and regulations and, accordingly, the clients. Under some legislations/regulations, for example, the auditor may be entitled to, or required to, make a statement or report to the person or persons who made the audit appointment or, in some cases, to regulatory authorities. Given the exceptional nature of the circumstances and the need to consider the legal requirements, the auditor may consider it appropriate to seek legal advice when deciding whether to withdraw from an engagement and in determining an appropriate course of action, including the possibility of reporting to shareholders, regulators or others²².

A56. In some cases, the option of withdrawing from the engagement may not be available to the auditor due to the nature of the terms of appointment or public interest considerations.

Management Representations (Ref: Para. 39)

A57. SA 580, "Written Representations²³", establishes requirements and provides guidance on obtaining appropriate representations from management and, where appropriate, those charged with governance in the audit. In addition to acknowledging that they have fulfilled their responsibility for the preparation of the financial statements, it is important that, irrespective of the size of the entity, management and, where appropriate, those charged with governance acknowledge their responsibility for internal control designed, implemented and maintained to prevent and detect fraud.

A58. Because of the nature of fraud and the difficulties encountered by auditors in detecting material misstatements in the financial statements resulting from fraud, it is important that the auditor obtain a written representation from management and, where appropriate, those charged with governance confirming that they have disclosed to the auditor:

- (a) The results of management's assessment of the risk that the financial statements may be materially misstated as a result of fraud; and
- (b) Their knowledge of actual, suspected or alleged fraud affecting the entity.

Communications to Management and with Those Charged with Governance

Communication to Management (Ref: Para. 40)

A59. When the auditor has obtained evidence that fraud exists or may exist, it is important that the matter be brought to the attention of the appropriate level of management as soon as practicable. This is so even if the matter might be considered inconsequential (for example, a minor defalcation by an employee at a low level in the entity's organization). The determination of which level of management is the appropriate one is a

²² The Code of Ethics issued by the Institute of Chartered Accountants of India contains guidance on communication between the outgoing and incoming auditor.

²³ SA 580, "Written Representations".

matter of professional judgment and is affected by such factors as the likelihood of collusion and the nature and magnitude of the suspected fraud. Ordinarily, the appropriate level of management is at least one level above the persons who appear to be involved with the suspected fraud.

Communication with Those Charged with Governance (Ref: Para. 41)

A60. The auditor's communication with those charged with governance may be made orally or in writing. SA 260 identifies factors the auditor considers in determining whether to communicate orally or in writing.²⁴ Due to the nature and sensitivity of fraud involving senior management, or fraud that results in a material misstatement in the financial statements, the auditor reports such matters on a timely basis and may consider it necessary to also report such matters in writing.

A61. In some cases, the auditor may consider it appropriate to communicate with those charged with governance when the auditor becomes aware of fraud involving employees other than management that does not result in a material misstatement. Similarly, those charged with governance may wish to be informed of such circumstances. The communication process is assisted if the auditor and those charged with governance agree at an early stage in the audit about the nature and extent of the auditor's communications in this regard.

A62. In the exceptional circumstances where the auditor has doubts about the integrity or honesty of management or those charged with governance, the auditor may consider it appropriate to obtain legal advice to assist in determining the appropriate course of action.

Other Matters Related to Fraud (Ref: Para. 42)

A63. Other matters related to fraud to be discussed with those charged with governance of the entity may include, for example:

- Concerns about the nature, extent and frequency of management's assessments of the controls in place to prevent and detect fraud and of the risk that the financial statements may be misstated.
- A failure by management to appropriately address identified significant deficiencies in internal control, or to appropriately respond to an identified fraud.
- The auditor's evaluation of the entity's control environment, including questions regarding the competence and integrity of management.
- Actions by management that may be indicative of fraudulent financial reporting, such as management's selection and application of accounting policies that may be indicative of management's effort to manage earnings in order to deceive financial statement users by influencing their perceptions as to the entity's performance and profitability.
- Concerns about the adequacy and completeness of the authorization of transactions that appear to be outside the normal course of business.

Communications to Regulatory and Enforcement Authorities (Ref: Para. 43)

A64. The auditor's professional duty to maintain the confidentiality of client information may preclude reporting fraud to a party outside the client entity. However, the auditor's legal responsibilities vary by law & statute and, in certain circumstances, the duty of confidentiality may be overridden by statute, the law or courts of law. In some entities, for example, in case of audit of banks, the auditor has a statutory duty to report the occurrence of fraud to the supervisory authorities, i.e., the Reserve Bank of India, in terms of the latter's circular no. DBS.FGV.(F).No. BC/23.08.001/2001-02. Also, in some entities the auditor may have a duty to report misstatements to authorities in those cases where management and those charged with

²⁴ SA 260, Paragraph A42.

I.144 Auditing Pronouncements

governance fail to take corrective action.

A65. The auditor may consider it appropriate to obtain legal advice to determine the appropriate course of action in the circumstances, the purpose of which is to ascertain the steps necessary in considering the public interest aspects of identified fraud.

A66. In some clients, requirements for reporting fraud, whether or not discovered through the audit process, may be subject to specific provisions of the audit mandate or related legislation or regulation.

Material Modifications to ISA 240, The Auditor's Responsibility relating to Fraud in an Audit of Financial Statements

Addition

In paragraph A64, the guidance has been made more entity specific, in the context of Indian legal requirement, by way of an example.

Deletions

1. Paragraph A6 of the Application Section of ISA 240 dealt with the application of the requirements of ISA 240 to the audits of public sector entities. Since as mentioned in the "Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services", the Standards issued by the Auditing and Assurance Standards Board, apply equally to all entities, irrespective of their form, nature and size, a specific reference to applicability of the Standard to public sector entities has been deleted.

Further, it is also possible that such a specific reporting requirement may also exist in case of non public sector entities pursuant to a requirement under the statute or regulation under which they operate. Accordingly, the spirit of erstwhile A6, highlighting the fact that in some cases, the auditors may be required by the legislature or the regulator to specifically report on the instances of actual/suspected fraud in the client entity, has been retained and examples of such situations have also been added.

2. Paragraph A56 of the Application Section of ISA 240 dealt with the considerations specific to public sector entities. Since as mentioned in the "Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services", the Standards issued by the Auditing and Assurance Standards Board, apply equally to all entities, irrespective of their form, nature and size, a specific reference to applicability of the Standard to public sector entities has been deleted.

Further, it is also possible that option of withdrawal may not be available in case of non public sector entities pursuant to a requirement under the statute or terms of appointment of the auditor. Accordingly, the spirit of erstwhile A56, highlighting that in some cases, the auditors may not be having an option to withdraw from the engagement has been retained.

3. Paragraph A66 of the Application Section of ISA 240 dealt with the application of the requirements of ISA 240 to the audits of public sector entities. Since as mentioned in the "Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services", the Standards issued by the Auditing and Assurance Standards Board, apply equally to all entities, irrespective of their form, nature and size, a specific reference to applicability of the Standard to public sector entities has been deleted.

Further, it is also possible that such a specific reporting requirement may also exist in case of non public sector entities pursuant to a requirement under the statute or regulation under which they operate. Accordingly, the spirit of A66 as given in ISA 240, highlighting the fact that in some cases, requirements for reporting fraud, whether or not discovered through the audit process, may be subject to specific provisions of the audit mandate or related legislation or regulation, has been retained.

Appendix 1

(Ref: Para. A25)

Examples of Fraud Risk Factors

The fraud risk factors identified in this Appendix are examples of such factors that may be faced by auditors in a broad range of situations. Separately presented are examples relating to the two types of fraud relevant to the auditor's consideration, i.e., fraudulent financial reporting and misappropriation of assets. For each of these types of fraud, the risk factors are further classified based on the three conditions generally present when material misstatements due to fraud occur: (a) incentives/pressures, (b) opportunities, and (c) attitudes/rationalizations. Although the risk factors cover a broad range of situations, they are only examples and, accordingly, the auditor may identify additional or different risk factors. Not all of these examples are relevant in all circumstances, and some may be of greater or lesser significance in entities of different size or with different ownership characteristics or circumstances. Also, the order of the examples of risk factors provided is not intended to reflect their relative importance or frequency of occurrence.

Risk Factors Relating to Misstatements Arising from Fraudulent Financial Reporting

The following are examples of risk factors relating to misstatements arising from fraudulent financial reporting.

Incentives/Pressures

Financial stability or profitability is threatened by economic, industry, or entity operating conditions, such as (or as indicated by):

- High degree of competition or market saturation, accompanied by declining margins.
- High vulnerability to rapid changes, such as changes in technology, product obsolescence, or interest rates.
- Significant declines in customer demand and increasing business failures in either the industry or overall economy.
- Operating losses making the threat of bankruptcy, foreclosure, or hostile takeover imminent.
- Recurring negative cash flows from operations or an inability to generate cash flows from operations while reporting earnings and earnings growth.
- Rapid growth or unusual profitability especially compared to that of other companies in the same industry.
- New accounting, statutory, or regulatory requirements.

Excessive pressure exists for management to meet the requirements or expectations of third parties due to the following:

- Profitability or trend level expectations of investment analysts, institutional investors, significant creditors, or other external parties (particularly expectations that are unduly aggressive or unrealistic), including expectations created by management in, for example, overly optimistic press releases or annual report messages.
- Need to obtain additional debt or equity financing to stay competitive—including financing of major research and development or capital expenditures.
- Marginal ability to meet exchange listing requirements or debt repayment or other debt covenant requirements.
- Perceived or real adverse effects of reporting poor financial results on significant pending transactions, such as business combinations or contract awards.

Information available indicates that the personal financial situation of management or those charged with

I.146 Auditing Pronouncements

governance is threatened by the entity's financial performance arising from the following:

- Significant financial interests in the entity.
- Significant portions of their compensation (for example, bonuses, stock options, and earn-out arrangements) being contingent upon achieving aggressive targets for stock price, operating results, financial position, or cash flow.²⁵
- Personal guarantees of debts of the entity.
- There is excessive pressure on management or operating personnel to meet financial targets established by those charged with governance, including sales or profitability incentive goals.

Opportunities

The nature of the industry or the entity's operations provides opportunities to engage in fraudulent financial reporting that can arise from the following:

- Significant related-party transactions not in the ordinary course of business or with related entities not audited or audited by another firm.
- A strong financial presence or ability to dominate a certain industry sector that allows the entity to dictate terms or conditions to suppliers or customers that may result in inappropriate or non-arm's-length transactions.
- Assets, liabilities, revenues, or expenses based on significant estimates that involve subjective judgments or uncertainties that are difficult to corroborate.
- Significant, unusual, or highly complex transactions, especially those close to period end that pose difficult "substance over form" questions.
- Significant operations located or conducted across international borders in jurisdictions where differing business environments and cultures exist.
- Use of business intermediaries for which there appears to be no clear business justification.
- Significant bank accounts or subsidiary or branch operations in tax-haven jurisdictions for which there appears to be no clear business justification.

The monitoring of management is not effective as a result of the following:

- Domination of management by a single person or small group (in a non owner-managed business) without compensating controls.
- Oversight by those charged with governance over the financial reporting process and internal control is not effective.

There is a complex or unstable organizational structure, as evidenced by the following:

- Difficulty in determining the organization or individuals that have controlling interest in the entity.
- Overly complex organizational structure involving unusual legal entities or managerial lines of authority.
- High turnover of senior management, legal counsel, or those charged with governance.

Internal control components are deficient as a result of the following:

- Inadequate monitoring of controls, including automated controls and controls over interim financial reporting (where external reporting is required).
- High turnover rates or employment of accounting, internal audit, or information technology staff that are not effective.
- Accounting and information systems that are not effective, including situations involving significant deficiencies in internal control.

²⁵ Management incentive plans may be contingent upon achieving targets relating only to certain accounts or selected activities of the entity, even though the related accounts or activities may not be material to the entity as a whole.

Attitudes/Rationalizations

- Communication, implementation, support, or enforcement of the entity's values or ethical standards by management, or the communication of inappropriate values or ethical standards, that are not effective.
- Non-financial management's excessive participation in or preoccupation with the selection of accounting policies or the determination of significant estimates.
- Known history of violations of securities laws or other laws and regulations, or claims against the entity, its senior management, or those charged with governance alleging fraud or violations of laws and regulations.
- Excessive interest by management in maintaining or increasing the entity's stock price or earnings trend.
- The practice by management of committing to analysts, creditors, and other third parties to achieve aggressive or unrealistic forecasts.
- Management failing to remedy known significant deficiencies in internal control on a timely basis.
- An interest by management in employing inappropriate means to minimize reported earnings for tax-motivated reasons.
- Low morale among senior management.
- The owner-manager makes no distinction between personal and business transactions.
- Dispute between shareholders in a closely held entity.
- Recurring attempts by management to justify marginal or inappropriate accounting on the basis of materiality.
- The relationship between management and the current or predecessor auditor is strained, as exhibited by the following:
 - Frequent disputes with the current or predecessor auditor on accounting, auditing, or reporting matters.
 - Unreasonable demands on the auditor, such as unrealistic time constraints regarding the completion of the audit or the issuance of the auditor's report.
 - Restrictions on the auditor that inappropriately limit access to people or information or the ability to communicate effectively with those charged with governance.
 - Domineering management behavior in dealing with the auditor, especially involving attempts to influence the scope of the auditor's work or the selection or continuance of personnel assigned to or consulted on the audit engagement.

Risk Factors Arising from Misstatements Arising from Misappropriation of Assets

Risk factors that relate to misstatements arising from misappropriation of assets are also classified according to the three conditions generally present when fraud exists: incentives/pressures, opportunities, and attitudes/rationalization. Some of the risk factors related to misstatements arising from fraudulent financial reporting also may be present when misstatements arising from misappropriation of assets occur. For example, ineffective monitoring of management and other deficiencies in internal control may be present when misstatements due to either fraudulent financial reporting or misappropriation of assets exist. The following are examples of risk factors related to misstatements arising from misappropriation of assets.

Incentives/Pressures

Personal financial obligations may create pressure on management or employees with access to cash or other assets susceptible to theft to misappropriate those assets.

Adverse relationships between the entity and employees with access to cash or other assets susceptible to theft may motivate those employees to misappropriate those assets. For example, adverse relationships

I.148 Auditing Pronouncements

may be created by the following:

- Known or anticipated future employee layoffs.
- Recent or anticipated changes to employee compensation or benefit plans.
- Promotions, compensation, or other rewards inconsistent with expectations.

Opportunities

Certain characteristics or circumstances may increase the susceptibility of assets to misappropriation. For example, opportunities to misappropriate assets increase when there are the following:

- Large amounts of cash on hand or processed.
- Inventory items that are small in size, of high value, or in high demand.
- Easily convertible assets, such as bearer bonds, diamonds, or computer chips.
- Fixed assets which are small in size, marketable, or lacking observable identification of ownership.

Inadequate internal control over assets may increase the susceptibility of misappropriation of those assets. For example, misappropriation of assets may occur because there is the following:

- Inadequate segregation of duties or independent checks.
- Inadequate oversight of senior management expenditures, such as travel and other reimbursements.
- Inadequate management oversight of employees responsible for assets, for example, inadequate supervision or monitoring of remote locations.
- Inadequate job applicant screening of employees with access to assets.
- Inadequate record keeping with respect to assets.
- Inadequate system of authorization and approval of transactions (for example, in purchasing).
- Inadequate physical safeguards over cash, investments, inventory, or fixed assets.
- Lack of complete and timely reconciliations of assets.
- Lack of timely and appropriate documentation of transactions, for example, credits for merchandise returns.
- Lack of mandatory vacations for employees performing key control functions.
- Inadequate management understanding of information technology, which enables information technology employees to perpetrate a misappropriation.
- Inadequate access controls over automated records, including controls over and review of computer systems event logs.

Attitudes/Rationalizations

- Disregard for the need for monitoring or reducing risks related to misappropriations of assets.
- Disregard for internal control over misappropriation of assets by overriding existing controls or by failing to take appropriate remedial action on known deficiencies in internal control.
- Behavior indicating displeasure or dissatisfaction with the entity or its treatment of the employee.
- Changes in behavior or lifestyle that may indicate assets have been misappropriated.
- Tolerance of petty theft.

Appendix 2

(Ref: Para. A40)

Examples of Possible Audit Procedures to Address the Assessed Risks of Material Misstatement Due to Fraud

The following are examples of possible audit procedures to address the assessed risks of material misstatement due to fraud resulting from both fraudulent financial reporting and misappropriation of assets. Although these procedures cover a broad range of situations, they are only examples and, accordingly they may not be the most appropriate nor necessary in each circumstance. Also the order of the procedures provided is not intended to reflect their relative importance.

Consideration at the Assertion Level

Specific responses to the auditor's assessment of the risks of material misstatement due to fraud will vary depending upon the types or combinations of fraud risk factors or conditions identified, and the classes of transactions, account balances, disclosures and assertions they may affect.

The following are specific examples of responses:

- Visiting locations or performing certain tests on a surprise or unannounced basis. For example, observing inventory at locations where auditor attendance has not been previously announced or counting cash at a particular date on a surprise basis.
- Requesting that inventories be counted at the end of the reporting period or on a date closer to period end to minimize the risk of manipulation of balances in the period between the date of completion of the count and the end of the reporting period.
- Altering the audit approach in the current year. For example, contacting major customers and suppliers orally in addition to sending written confirmation, sending confirmation requests to a specific party within an organization, or seeking more or different information.
- Performing a detailed review of the entity's quarter-end or year-end adjusting entries and investigating any that appear unusual as to nature or amount.
- For significant and unusual transactions, particularly those occurring at or near year-end, investigating the possibility of related parties and the sources of financial resources supporting the transactions.
- Performing substantive analytical procedures using disaggregated data. For example, comparing sales and cost of sales by location, line of business or month to expectations developed by the auditor.
- Conducting interviews of personnel involved in areas where a risk of material misstatement due to fraud has been identified, to obtain their insights about the risk and whether, or how, controls address the risk.
- When other independent auditors are auditing the financial statements of one or more subsidiaries, divisions or branches, discussing with them the extent of work necessary to be performed to address the assessed risk of material misstatement due to fraud resulting from transactions and activities among these components.
- If the work of an expert becomes particularly significant with respect to a financial statement item for which the assessed risk of misstatement due to fraud is high, performing additional procedures relating to some or all of the expert's assumptions, methods or findings to determine that the findings are not unreasonable, or engaging another expert for that purpose.
- Performing audit procedures to analyze selected opening balance sheet accounts of previously audited financial statements to assess how certain issues involving accounting estimates and judgments, for

I.150 Auditing Pronouncements

example, an allowance for sales returns, were resolved with the benefit of hindsight.

- Performing procedures on account or other reconciliations prepared by the entity, including considering reconciliations performed at interim periods.
- Performing computer-assisted techniques, such as data mining to test for anomalies in a population.
- Testing the integrity of computer-produced records and transactions.
- Seeking additional audit evidence from sources outside of the entity being audited.

Specific Responses—Misstatement Resulting from Fraudulent Financial Reporting

Examples of responses to the auditor's assessment of the risks of material misstatement due to fraudulent financial reporting are as follows:

Revenue Recognition

- Performing substantive analytical procedures relating to revenue using disaggregated data, for example, comparing revenue reported by month and by product line or business segment during the current reporting period with comparable prior periods. Computer-assisted audit techniques may be useful in identifying unusual or unexpected revenue relationships or transactions.
- Confirming with customers certain relevant contract terms and the absence of side agreements, because the appropriate accounting often is influenced by such terms or agreements and basis for rebates or the period to which they relate are often poorly documented. For example, acceptance criteria, delivery and payment terms, the absence of future or continuing vendor obligations, the right to return the product, guaranteed resale amounts, and cancellation or refund provisions often are relevant in such circumstances.
- Inquiring of the entity's sales and marketing personnel or in-house legal counsel regarding sales or shipments near the end of the period and their knowledge of any unusual terms or conditions associated with these transactions.
- Being physically present at one or more locations at period end to observe goods being shipped or being readied for shipment (or returns awaiting processing) and performing other appropriate sales and inventory cut-off procedures.
- For those situations for which revenue transactions are electronically initiated, processed, and recorded, testing controls to determine whether they provide assurance that recorded revenue transactions occurred and are properly recorded.

Inventory Quantities

- Examining the entity's inventory records to identify locations or items that require specific attention during or after the physical inventory count.
- Observing inventory counts at certain locations on an unannounced basis or conducting inventory counts at all locations on the same date.
- Conducting inventory counts at or near the end of the reporting period to minimize the risk of inappropriate manipulation during the period between the count and the end of the reporting period.
- Performing additional procedures during the observation of the count, for example, more rigorously examining the contents of boxed items, the manner in which the goods are stacked (for example, hollow squares) or labeled, and the quality (that is, purity, grade, or concentration) of liquid substances such as perfumes or specialty chemicals. Using the work of an expert may be helpful in this regard.
- Comparing the quantities for the current period with prior periods by class or category of inventory, location or other criteria, or comparison of quantities counted with perpetual records.

- Using computer-assisted audit techniques to further test the compilation of the physical inventory counts—for example, sorting by tag number to test tag controls or by item serial number to test the possibility of item omission or duplication.

Management Estimates

- Using an expert to develop an independent estimate for comparison to management's estimate.
- Extending inquiries to individuals outside of management and the accounting department to corroborate management's ability and intent to carry out plans that are relevant to developing the estimate.

Specific Responses—Misstatements Due to Misappropriation of Assets

Differing circumstances would necessarily dictate different responses. Ordinarily, the audit response to an assessed risk of material misstatement due to fraud relating to misappropriation of assets will be directed toward certain account balances and classes of transactions. Although some of the audit responses noted in the two categories above may apply in such circumstances, the scope of the work is to be linked to the specific information about the misappropriation risk that has been identified.

Examples of responses to the auditor's assessment of the risk of material misstatements due to misappropriation of assets are as follows:

- Counting cash or securities at or near year-end.
- Confirming directly with customers the account activity (including credit memo and sales return activity as well as dates payments were made) for the period under audit.
- Analyzing recoveries of written-off accounts.
- Analyzing inventory shortages by location or product type.
- Comparing key inventory ratios to industry norm.
- Reviewing supporting documentation for reductions to the perpetual inventory records.
- Performing a computerized match of the vendor list with a list of employees to identify matches of addresses or phone numbers.
- Performing a computerized search of payroll records to identify duplicate addresses, employee identification or taxing authority numbers or bank accounts.
- Reviewing personnel files for those that contain little or no evidence of activity, for example, lack of performance evaluations.
- Analyzing sales discounts and returns for unusual patterns or trends.
- Confirming specific terms of contracts with third parties.
- Obtaining evidence that contracts are being carried out in accordance with their terms.
- Reviewing the propriety of large and unusual expenses.
- Reviewing the authorization and carrying value of senior management and related party loans.
- Reviewing the level and propriety of expense reports submitted by senior management.

Appendix 3

(Ref: Para. A48)

Examples of Circumstances that Indicate the Possibility of Fraud

The following are examples of circumstances that may indicate the possibility that the financial statements may contain a material misstatement resulting from fraud.

Discrepancies in the accounting records, including:

- Transactions that are not recorded in a complete or timely manner or are improperly recorded as to amount, accounting period, classification, or entity policy.
- Unsupported or unauthorized balances or transactions.
- Last-minute adjustments that significantly affect financial results.
- Evidence of employees' access to systems and records inconsistent with that necessary to perform their authorized duties.
- Tips or complaints to the auditor about alleged fraud.

Conflicting or missing evidence, including:

- Missing documents.
- Documents that appear to have been altered.
- Unavailability of other than photocopied or electronically transmitted documents when documents in original form are expected to exist.
- Significant unexplained items on reconciliations.
- Unusual balance sheet changes, or changes in trends or important financial statement ratios or relationships, for example, receivables growing faster than revenues.
- Inconsistent, vague, or implausible responses from management or employees arising from inquiries or analytical procedures.
- Unusual discrepancies between the entity's records and confirmation replies.
- Large numbers of credit entries and other adjustments made to accounts receivable records.
- Unexplained or inadequately explained differences between the accounts receivable sub-ledger and the control account, or between the customer statements and the accounts receivable sub-ledger.
- Missing or non-existent cancelled checks in circumstances where cancelled checks are ordinarily returned to the entity with the bank statement.
- Missing inventory or physical assets of significant magnitude.
- Unavailable or missing electronic evidence, inconsistent with the entity's record retention practices or policies.
- Fewer responses to confirmations than anticipated or a greater number of responses than anticipated.
- Inability to produce evidence of key systems development and program change testing and implementation activities for current-year system changes and deployments.

Problematic or unusual relationships between the auditor and management, including:

- Denial of access to records, facilities, certain employees, customers, vendors, or others from whom audit evidence might be sought.

- Undue time pressures imposed by management to resolve complex or contentious issues.
- Complaints by management about the conduct of the audit or management intimidation of engagement team members, particularly in connection with the auditor's critical assessment of audit evidence or in the resolution of potential disagreements with management.
- Unusual delays by the entity in providing requested information.
- Unwillingness to facilitate auditor access to key electronic files for testing through the use of computer-assisted audit techniques.
- Denial of access to key IT operations staff and facilities, including security, operations, and systems development personnel.
- An unwillingness to add or revise disclosures in the financial statements to make them more complete and understandable.
- An unwillingness to address identified deficiencies in internal control on a timely basis.

Other

- Unwillingness by management to permit the auditor to meet privately with those charged with governance.
- Accounting policies that appear to be at variance with industry norms.
- Frequent changes in accounting estimates that do not appear to result from changed circumstances.
- Tolerance of violations of the entity's Code of Conduct.

SA 250*

**Consideration of Laws and Regulations
in an Audit of Financial Statements**
(Effective for all audits commencing on or after April 1, 2009)

Introduction

Scope of this SA

1. This Standard on Auditing (SA) deals with the auditor's responsibility to consider laws and regulations when performing an audit of financial statements. This SA does not apply to other assurance engagements in which the auditor is specifically engaged to test and report separately on compliance with specific laws or regulations.

Effect of Laws and Regulations

2. The effect on the financial statements of laws and regulations varies considerably. Those laws and regulations to which an entity is subject constitute the legal and regulatory framework. The provisions of some laws or regulations have a direct effect on the financial statements in that they determine the reported amounts and disclosures in an entity's financial statements. Other laws or regulations are to be complied with by management or set the provisions under which the entity is allowed to conduct its business but do not have a direct effect on an entity's financial statements. Some entities operate in heavily regulated industries (such as banks and chemical companies). Others are subject only to the many laws and regulations that relate generally to the operating aspects of the business (such as those related to occupational safety and health). Non-compliance with laws and regulations may result in fines, litigation or other consequences for the entity that may have a material effect on the financial statements.

Responsibility of Management for Compliance with Laws and Regulations

3. It is the responsibility of management, with the oversight of those charged with governance, to ensure that the entity's operations are conducted in accordance with the provisions of laws and regulations, including compliance with the provisions of laws and regulations that determine the reported amounts and disclosures in an entity's financial statements. (Ref: Para. A1-A2)

Responsibility of the Auditor (Ref: Para. A3-A6)

4. The requirements in this SA are designed to assist the auditor in identifying material misstatement of the financial statements due to non-compliance with laws and regulations. However, the auditor is not responsible for preventing non-compliance and cannot be expected to detect non-compliance with all laws and regulations.

5. The auditor is responsible for obtaining reasonable assurance that the financial statements, taken as a whole, are free from material misstatement, whether caused by fraud or error.² In conducting an audit of financial statements, the auditor takes into account the applicable legal and regulatory framework. Owing to the inherent limitations of an audit, there is an unavoidable risk that some material misstatements in the financial statements may not be detected, even though the audit is properly planned and performed in

* Published in December, 2008 issue of the Journal.

² SA 200, paragraph 5.

accordance with the SAs.³ In the context of laws and regulations, the potential effects of inherent limitations on the auditor's ability to detect material misstatements are greater for such reasons as the following:

- There are many laws and regulations, relating principally to the operating aspects of an entity that typically do not affect the financial statements and are not captured by the entity's information systems relevant to financial reporting.
- Non-compliance may involve conduct designed to conceal it, such as collusion, forgery, deliberate failure to record transactions, management override of controls or intentional misrepresentations being made to the auditor.
- Whether an act constitutes non-compliance is ultimately a matter for legal determination by a court of law.

Ordinarily, the further removed non-compliance is from the events and transactions reflected in the financial statements, the less likely the auditor is to become aware of it or to recognise the non-compliance.

6. This SA distinguishes the auditor's responsibilities in relation to compliance with two different categories of laws and regulations as follows:

- (a) The provisions of those laws and regulations generally recognised to have a direct effect on the determination of material amounts and disclosures in the financial statements such as tax and labour laws. (see paragraph 13); and
- (b) Other laws and regulations that do not have a direct effect on the determination of the amounts and disclosures in the financial statements, but compliance with which may be fundamental to the operating aspects of the business, to an entity's ability to continue its business, or to avoid material penalties (for example, compliance with the terms of an operating license, compliance with regulatory solvency requirements, or compliance with environmental regulations); non-compliance with such laws and regulations may therefore have a material effect on the financial statements (see paragraph 14).

7. In this SA, differing requirements are specified for each of the above categories of laws and regulations. For the category referred to in paragraph 6(a), the auditor's responsibility is to obtain sufficient appropriate audit evidence about compliance with the provisions of those laws and regulations. For the category referred to in paragraph 6(b), the auditor's responsibility is limited to undertaking specified audit procedures to help identify non-compliance with those laws and regulations that may have a material effect on the financial statements.

8. The auditor is required by this SA to remain alert to the possibility that other audit procedures applied for the purpose of forming an opinion on financial statements may bring instances of identified or suspected non-compliance to the auditor's attention. Maintaining professional skepticism throughout the audit, as required by SA 200,⁴ is important in this context, given the extent of laws and regulations that affect the entity.

Effective Date

9. This SA is effective for audits of financial statements for periods beginning on or after April 1, 2009.

Objectives

10. The objectives of the auditor are:

- (a) To obtain sufficient appropriate audit evidence regarding compliance with the provisions of those laws

³ SA 200, paragraph 52.

⁴ SA 200, paragraph 15.

I.156 Auditing Pronouncements

and regulations generally recognised to have a direct effect on the determination of material amounts and disclosures in the financial statements;

- (b) To perform specified audit procedures to help identify instances of non-compliance with other laws and regulations that may have a material effect on the financial statements; and
- (c) To respond appropriately to non-compliance or suspected non-compliance with laws and regulations identified during the audit.

Definition

11. For the purposes of this SA, the following term has the meaning attributed below:

Non-compliance – Acts of omission or commission by the entity, either intentional or unintentional, which are contrary to the prevailing laws or regulations. Such acts include transactions entered into by, or in the name of, the entity, or on its behalf, by those charged with governance, management or employees. Non-compliance does not include personal misconduct (unrelated to the business activities of the entity) by those charged with governance, management or employees of the entity.

Requirements

The Auditor's Consideration of Compliance with Laws and Regulations

12. As part of obtaining an understanding of the entity and its environment in accordance with SA 315,⁵ the auditor shall obtain a general understanding of:

- (a) The legal and regulatory framework applicable to the entity and the industry or sector in which the entity operates; and
- (b) How the entity is complying with that framework. (*Ref: Para. A7*)

13. The auditor shall obtain sufficient appropriate audit evidence regarding compliance with the provisions of those laws and regulations generally recognised to have a direct effect on the determination of material amounts and disclosures in the financial statements. (*Ref: Para. A8*)

14. The auditor shall perform the following audit procedures to help identify instances of non-compliance with other laws and regulations that may have a material effect on the financial statements:

- (a) Inquiring of management and, where appropriate, those charged with governance, as to whether the entity is in compliance with such laws and regulations; and
- (b) Inspecting correspondence, if any, with the relevant licensing or regulatory authorities. (*Ref: Para. A9-A10*)

15. During the audit, the auditor shall remain alert to the possibility that other audit procedures applied may bring instances of non-compliance or suspected non-compliance with laws and regulations to the auditor's attention. (*Ref: Para. A11*)

16. The auditor shall request management and, where appropriate, those charged with governance to provide written representations that all known instances of non-compliance or suspected non-compliance with laws and regulations whose effects should be considered when preparing financial statements have been disclosed to the auditor. (*Ref: Para. A12*)

17. In the absence of identified or suspected non-compliance, the auditor is not required to perform audit procedures regarding the entity's compliance with laws and regulations, other than those set out in paragraphs 12-16.

⁵ SA 315, "Identifying and Assessing the Risks of Material Misstatement Through Understanding the Entity and Its Environment", paragraph 11.

Audit Procedures When Non-Compliance is Identified or Suspected

18. If the auditor becomes aware of information concerning an instance of non-compliance or suspected non-compliance with laws and regulations, the auditor shall obtain: (Ref: Para. A13)

- (a) An understanding of the nature of the act and the circumstances in which it has occurred; and
- (b) Further information to evaluate the possible effect on the financial statements. (Ref: Para. A14)

19. If the auditor suspects there may be non-compliance, the auditor shall discuss the matter with management and, where appropriate, those charged with governance. If management or, as appropriate, those charged with governance do not provide sufficient information that supports that the entity is in compliance with laws and regulations and, in the auditor's judgment, the effect of the suspected non-compliance may be material to the financial statements, the auditor shall consider the need to obtain legal advice. (Ref: Para. A15-A16)

20. If sufficient information about suspected non-compliance cannot be obtained, the auditor shall evaluate the effect of the lack of sufficient appropriate audit evidence on the auditor's opinion.

21. The auditor shall evaluate the implications of non-compliance in relation to other aspects of the audit, including the auditor's risk assessment and the reliability of written representations, and take appropriate action. (Ref: Para. A17-A18)

Reporting of Identified or Suspected Non-Compliance

Reporting Non-Compliance to Those Charged with Governance

22. Unless all of those charged with governance are involved in management of the entity, and therefore are aware of matters involving identified or suspected non-compliance already communicated by the auditor,⁶ the auditor shall communicate with those charged with governance matters involving non-compliance with laws and regulations that come to the auditor's attention during the course of the audit, other than when the matters are clearly inconsequential.

23. If, in the auditor's judgment, the non-compliance referred to in paragraph 22 is believed to be intentional and material, the auditor shall communicate the matter to those charged with governance as soon as practicable.

24. If the auditor suspects that management or those charged with governance are involved in non-compliance, the auditor shall communicate the matter to the next higher level of authority at the entity, if it exists, such as an audit committee or supervisory board. Where no higher authority exists, or if the auditor believes that the communication may not be acted upon or is unsure as to the person to whom to report, the auditor shall consider the need to obtain legal advice.

Reporting Non-Compliance in the Auditor's Report on the Financial Statements

25. If the auditor concludes that the non-compliance has a material effect on the financial statements, and has not been adequately reflected in the financial statements, the auditor shall, in accordance with SA 705⁷, express a qualified or adverse opinion on the financial statements.

26. If the auditor is precluded by management or those charged with governance from obtaining sufficient appropriate audit evidence to evaluate whether non-compliance that may be material to the financial statements has, or is likely to have, occurred, the auditor shall express a qualified opinion or disclaim an opinion on the financial statements on the basis of a limitation on the scope of the audit in accordance with SA 705.

⁶ SA 260, "Communication with Those Charged with Governance", paragraph 9.

⁷ SA 705, "Modifications to the Opinion in the Independent Auditor's Report", paragraph 7-8.

I.158 Auditing Pronouncements

27. If the auditor is unable to determine whether non-compliance has occurred because of limitations imposed by the circumstances rather than by management or those charged with governance, the auditor shall evaluate the effect on the auditor's opinion in accordance with SA 705.

Reporting Non-Compliance to Regulatory and Enforcement Authorities

28. If the auditor has identified or suspects non-compliance with laws and regulations, the auditor shall determine whether the auditor has a responsibility to report the identified or suspected non-compliance to parties outside the entity. (Ref: Para. A19-A20)

Documentation

29. The auditor shall document identified or suspected non-compliance with laws and regulations and the results of discussion with management and, where applicable, those charged with governance and other parties outside the entity.⁸ (Ref: Para. A21)

Application and Other Explanatory Material

Responsibility for Compliance with Laws and Regulations

Responsibility of Management for Compliance with Laws and Regulations (Ref: Para. 3)

A1. Management, with the oversight of those charged with governance, is responsible for ensuring that the entity's operations are conducted in accordance with laws and regulations. Laws and regulations may affect an entity's financial statements in different ways: for example, most directly, they may affect specific disclosures required of the entity in the financial statements or they may prescribe the applicable financial reporting framework⁹. They may also establish certain legal rights and obligations of the entity, some of which will be recognised in the entity's financial statements. In addition, laws and regulations may impose penalties in cases of non-compliance.

A2. The following are examples of the types of policies and procedures an entity may implement to assist in the prevention and detection of non-compliance with laws and regulations:

- Monitoring legal requirements and ensuring that operating procedures are designed to meet these requirements.
- Instituting and operating appropriate systems of internal control.
- Developing, publicising and following a code of conduct.
- Ensuring employees are properly trained and understand the code of conduct.
- Monitoring compliance with the code of conduct and acting appropriately to discipline employees who fail to comply with it.
- Engaging legal advisors to assist in monitoring legal requirements.
- Maintaining a register of significant laws and regulations with which the entity has to comply within its particular industry and a record of complaints.

In larger entities, these policies and procedures may be supplemented by assigning appropriate responsibilities to the following:

- An internal audit function.
- An audit committee.

⁸ SA 230, "Audit Documentation", paragraphs 8-11, and paragraph A6.

⁹ SA 200, "Overall Objectives of the Independent Auditor and the Conduct of an Audit in accordance with Standards on Auditing", paragraph 13 (a).

- A compliance function.

Responsibility of the Auditor (Ref: Para. 4-8)

A3. Non-compliance by the entity with laws and regulations may result in a material misstatement of the financial statements. Detection of non-compliance, regardless of materiality, may affect other aspects of the audit including, for example, the auditor's consideration of the integrity of management or employees.

A4. Whether an act constitutes non-compliance with laws and regulations is a matter for legal determination, which is ordinarily beyond the auditor's professional competence to determine. Nevertheless, the auditor's training, experience and understanding of the entity and its industry or sector may provide a basis to recognise that some acts, coming to the auditor's attention, may constitute non-compliance with laws and regulations.

A5. In accordance with specific statutory requirements, the auditor may be specifically required to report, as part of the audit of the financial statements, on whether the entity complies with certain provisions of laws or regulations. In these circumstances, Revised SA 700¹⁰ or SA 800¹¹ deal with how these audit responsibilities are addressed in the auditor's report. Furthermore, where there are specific statutory reporting requirements, it may be necessary for the audit plan to include appropriate tests for compliance with those provisions of the laws and regulations.

A6. In some audit engagements, specially those relating to audit of government ventures and undertakings, etc., there may be additional audit responsibilities with respect to the consideration of laws and regulations which may relate to the audit of financial statements or may extend to other aspects of the entity's operations.

The Auditor's Consideration of Compliance with Laws and Regulations

Obtaining an Understanding of the Legal and Regulatory Framework (Ref: Para. 12)

A7. To obtain a general understanding of the legal and regulatory framework, and how the entity complies with that framework, the auditor may, for example:

- Use the auditor's existing understanding of the entity's industry, regulatory and other external factors;
- Update the understanding of those laws and regulations that directly determine the reported amounts and disclosures in the financial statements;
- Inquire of management as to other laws or regulations that may be expected to have a fundamental effect on the operations of the entity;
- Inquire of management concerning the entity's policies and procedures regarding compliance with laws and regulations; and
- Inquire of management regarding the policies or procedures adopted for identifying, evaluating and accounting for litigation claims.

Laws and Regulations Generally Recognised to have a Direct Effect on the Determination of Material Amounts and Disclosures in the Financial Statements (Ref: Para. 13)

A8. Certain laws and regulations are well-established, known to the entity and within the entity's industry or sector, and relevant to the entity's financial statements (as described in paragraph 6(a)). They could include those that relate to, for example:

¹⁰ Revised SA 700, "Forming an Opinion and Reporting on Financial Statements"; paragraph 38.

¹¹ SA 800, "Special Considerations—Audits of Financial Statements Prepared in Accordance with Special Purpose Frameworks", paragraph 11.

I.160 Auditing Pronouncements

- The form and content of financial statements;
- Industry-specific financial reporting issues;
- Accounting for transactions under government contracts; or
- The accrual or recognition of expenses for income tax or retirement benefits.

Some matters may be relevant to specific assertions (for example, the completeness of income tax provisions), while others may be relevant to the financial statements as a whole (for example, the required statements constituting a complete set of financial statements). Non-compliance with other laws and regulations may result in fines, litigation or other consequences for the entity, the costs of which may need to be provided for in the financial statements, but are not considered to have a direct effect on the financial statements as described in paragraph 6(a).

Procedures to Identify Instances of Non-Compliance – Other Laws and Regulations (Ref: Para. 14)

A9. Certain other laws and regulations may need particular attention by the auditor because they have a fundamental effect on the operations of the entity (as described in paragraph 6(b)). Non-compliance with laws and regulations that have a fundamental effect on the operations of the entity may cause the entity to cease operations, or call into question the entity's continuance as a going concern. For example, non-compliance with the requirements of the entity's license or other entitlement to perform its operations could have such an impact (for example, for a bank, non-compliance with capital or investment requirements). To illustrate further, a Non Banking Financial Company might have to cease to carry on the business of a non-banking financial institution if it fails to obtain a certificate of registration issued under Chapter III B of the Reserve Bank of India Act, 1934 and if its Net Owned Funds are less than the amount specified by the RBI in this regard. There are also many laws and regulations relating principally to the operating aspects of the entity that typically do not affect the financial statements and are not captured by the entity's information systems relevant to financial reporting.

A10. As the financial reporting consequences of other laws and regulations can vary depending on the entity's operations, the audit procedures required by paragraph 14 are directed to bringing to the auditor's attention instances of non-compliance with laws and regulations that may have a material effect on the financial statements.

Non-Compliance brought to the Auditor's Attention by Other Audit Procedures (Ref: Para. 15)

A11. Audit procedures applied to form an opinion on the financial statements may bring instances of non-compliance or suspected non-compliance with laws and regulations to the auditor's attention. For example, such audit procedures may include:

- Reading minutes;
- Inquiring of the entity's management and in-house legal counsel or external legal counsel concerning litigation, claims and assessments; and
- Performing substantive tests of details of classes of transactions, account balances or disclosures.

Written Representations (Ref: Para. 16)

A12. Because the effect on financial statements of laws and regulations can vary considerably, written representations provide necessary audit evidence about management's knowledge of identified or suspected non-compliance with laws and regulations, whose effects may have a material effect on the financial statements. However, written representations do not provide sufficient appropriate audit evidence on their own and, accordingly, do not affect the nature and extent of other audit evidence that is to be obtained by the

auditor.¹²

Audit Procedures When Non-Compliance is Identified or Suspected

Indications of Non-Compliance with Laws and Regulations (Ref: Para. 18)

A13. When the auditor becomes aware of the existence of, or information about, the following matters, it may be an indication of non-compliance with laws and regulations:

- Investigations by regulatory organisations and government departments or payment of fines or penalties.
- Payments for unspecified services or loans to consultants, related parties, employees or government employees.
- Sales commissions or agent's fees that appear excessive in relation to those ordinarily paid by the entity or in its industry or to the services actually received.
- Purchasing at prices significantly above or below market price.
- Unusual payments in cash, purchases in the form of cashiers' cheques payable to bearer or transfers to numbered bank accounts.
- Unusual payments towards legal and retainership fees.
- Unusual transactions with companies registered in tax havens.
- Payments for goods or services made other than to the country from which the goods or services originated.
- Payments without proper exchange control documentation.
- Existence of an information system which fails, whether by design or by accident, to provide an adequate audit trail or sufficient evidence.
- Unauthorised transactions or improperly recorded transactions.
- Adverse media comment.

Matters Relevant to the Auditor's Evaluation (Ref: Para. 18(b))

A14. Matters relevant to the auditor's evaluation of the possible effect on the financial statements include:

- The potential financial consequences of non-compliance with laws and regulations on the financial statements including, for example, the imposition of fines, penalties, damages, threat of expropriation of assets, enforced discontinuation of operations, and litigation.
- Whether the potential financial consequences require disclosure.
- Whether the potential financial consequences are so serious as to call into question the fair presentation of the financial statements, or otherwise make the financial statements misleading.

Audit Procedures (Ref: Para. 19)

A15. The auditor may discuss the findings with those charged with governance where they may be able to provide additional audit evidence. For example, the auditor may confirm that those charged with governance have the same understanding of the facts and circumstances relevant to transactions or events that have led to the possibility of non-compliance with laws and regulations.

A16. If management or, as appropriate, those charged with governance do not provide sufficient information

¹² SA 580, "Written Representations", paragraph 3.

I.162 Auditing Pronouncements

to the auditor that the entity is in fact in compliance with laws and regulations, the auditor may consider it appropriate to consult with the entity's in-house legal counsel or external legal counsel about the application of the laws and regulations to the circumstances, including the possibility of fraud, and the possible effects on the financial statements. When it is not considered appropriate to consult with the entity's legal counsel or when the auditor is not satisfied with the legal counsel's opinion, the auditor may consider it appropriate to consult the auditor's own legal counsel as to whether a contravention of a law or regulation is involved, the possible legal consequences, including the possibility of fraud, and what further action, if any, the auditor would take.

Evaluating the Implications of Non-Compliance (Ref: Para. 21)

A17. As required by paragraph 21, the auditor evaluates the implications of non-compliance in relation to other aspects of the audit, including the auditor's risk assessment and the reliability of written representations. The implications of particular instances of non-compliance identified by the auditor will depend on the relationship of the perpetration and concealment, if any, of the act to specific control activities and the level of management or employees involved, especially implications arising from the involvement of the highest authority within the entity.

A18. In exceptional cases, the auditor may consider whether, unless prohibited by law or regulation, withdrawal from the engagement is necessary when management or those charged with governance do not take the remedial action that the auditor considers appropriate in the circumstances, even when the non-compliance is not material to the financial statements. When deciding whether withdrawal from the engagement is necessary, the auditor may consider seeking legal advice. If withdrawal from the engagement is prohibited, the auditor may consider alternative actions, including describing the non-compliance in an Other Matter(s) paragraph in the auditor's report.¹³

Reporting of Identified or Suspected Non-Compliance

Reporting Non-Compliance to Regulatory and Enforcement Authorities (Ref: Para. 28)

A19. The auditor's professional duty to maintain the confidentiality of client information may preclude reporting identified or suspected non-compliance with laws and regulations to a party outside the entity. However, the auditor's legal responsibilities vary under different laws and regulations and, in certain circumstances, the duty of confidentiality may be overridden by statute, the law or courts of law. Under the present legal and regulatory framework for financial institutions in India, their auditor has a statutory duty to report the occurrence, or suspected occurrence, of non-compliance with laws and regulations to supervisory authorities. For example, the auditor is required to report certain matters of non-compliance to the Reserve Bank of India as per the requirements of Non Banking Financial Companies Auditor's Report (Reserve Bank) Directions, 1988, issued by the Reserve Bank of India. Also, some laws or regulations require the auditor to report misstatements to authorities in those cases where management and, where applicable, those charged with governance fail to take corrective action. The auditor may consider it appropriate to obtain legal advice to determine the appropriate course of action.

A20. In case of certain entities, such as national governments, regional (for example, state, provincial, territorial) governments, local (for example, city, town) governments and related governmental entities (for example, agencies, boards, commissions and enterprises), the auditor may be obliged to report on instances of non-compliance to governing authorities or to report them in the auditor's report.

Documentation (Ref: Para. 29)

¹³ SA 706, "Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report", paragraph 8.

A21. The auditor's documentation of findings regarding identified or suspected non-compliance with laws and regulations may include, for example:

- Copies of records or documents.
- Minutes of discussions held with management, those charged with governance or parties outside the entity.

Material Modifications to ISA 250, "Consideration of Laws and Regulations in an Audit of Financial Statements"

Deletions

1. Paragraph A6 of the Application Section of ISA 250 deals with the application of the requirements of ISA 250 to the audits of public sector entities regarding the additional audit responsibilities with respect to the consideration of laws and regulations. Since as mentioned in the "Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services", the Standards issued by the Auditing and Assurance Standards Board, apply equally to all entities, irrespective of their form, nature and size, a specific reference to applicability of the Standard to public sector entities has been deleted.

Further, it is also possible that even in case of non public sector entities, there may be additional audit responsibilities with respect to the consideration of laws and regulations which may relate to the audit of financial statements or may extend to other aspects of the entity's operations. Accordingly, the spirit of erstwhile A6, highlighting the fact that in case of certain entities, there may be additional audit responsibilities with respect to the consideration of laws and regulations, has been retained.

2. Paragraph A20 of the Application Section of ISA 250 deals with the application of the requirements of ISA 250 to the audits of public sector entities regarding the obligation to report on instances of non-compliance to governing authorities or to report them in the auditor's report. Since as mentioned in the "Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services", the Standards issued by the Auditing and Assurance Standards Board, apply equally to all entities, irrespective of their form, nature and size, a specific reference to applicability of the Standard to public sector entities has been deleted.

Further, it is also possible that even in case of non public sector entities, the auditor may be obliged to report on instances of non-compliance to governing authorities or to report them in the auditor's report. Accordingly, the spirit of erstwhile A20, highlighting the fact that in case of certain entities, there may be instances of reporting non-compliance to governing authorities or to report them in the auditor's report, has been retained.

Standard on Auditing (SA) 260 (Revised), Communication with Those Charged with Governance

(Effective for all audits commencing on or after April 1, 2017)

Introduction

Scope of this SA

1. This Standard on Auditing (SA) deals with the auditor's responsibility to communicate with those charged with governance in an audit of financial statements. Although this SA applies irrespective of an entity's governance structure or size, particular considerations apply where all of those charged with governance are involved in managing an entity, and for listed entities. This SA does not establish requirements regarding the auditor's communication with an entity's management or owners unless they are also charged with a governance role.
2. This SA is written in the context of an audit of financial statements, but may also be applicable, adapted as necessary in the circumstances, to audits of other historical financial information when those charged with governance have a responsibility to oversee the preparation of the other historical financial information.
3. Recognizing the importance of effective two-way communication in an audit of financial statements, this SA provides an overarching framework for the auditor's communication with those charged with governance, and identifies some specific matters to be communicated with them. Additional matters to be communicated, which complement the requirements of this SA, are identified in other SAs (see Appendix 1). In addition, SA 265¹ establishes specific requirements regarding the communication of significant deficiencies in internal control the auditor has identified during the audit to those charged with governance. Further matters, not required by this or other SAs, may be required to be communicated by law or regulation, by agreement with the entity, or by additional requirements applicable to the engagement, for example, the standards of a national professional accountancy body. Nothing in this SA precludes the auditor from communicating any other matters to those charged with governance. (Ref: Para. A33–A36)

The Role of Communication

4. This SA focuses primarily on communications from the auditor to those charged with governance. Nevertheless, effective two-way communication is important in assisting:
 - a. The auditor and those charged with governance in understanding matters related to the audit in context, and in developing a constructive working relationship. This relationship is developed while maintaining the auditor's independence and objectivity;
 - b. The auditor in obtaining from those charged with governance information relevant to the audit. For example, those charged with governance may assist the auditor in understanding the entity and its environment, in identifying appropriate sources of audit evidence, and in providing information about specific transactions or events; and

¹ SA 265, *Communicating Deficiencies in Internal Control to Those Charged with Governance and Management*.

c. Those charged with governance in fulfilling their responsibility to oversee the financial reporting process, thereby reducing the risks of material misstatement of the financial statements.

5. Although the auditor is responsible for communicating matters required by this SA, management also has a responsibility to communicate matters of governance interest to those charged with governance. Communication by the auditor does not relieve management of this responsibility.

Similarly, communication by management with those charged with governance of matters that the auditor is required to communicate does not relieve the auditor of the responsibility to also communicate them. Communication of these matters by management may, however, affect the form or timing of the auditor's communication with those charged with governance.

6. Clear communication of specific matters required to be communicated by SAs is an integral part of every audit. SAs do not, however, require the auditor to perform procedures specifically to identify any other matters to communicate with those charged with governance.

7. Law or regulation may restrict the auditor's communication of certain matters with those charged with governance. For example, laws or regulations may specifically prohibit a communication, or other action, that might prejudice an investigation by an appropriate authority into an actual, or suspected, illegal act. In some circumstances, potential conflicts between the auditor's obligations of confidentiality and obligations to communicate may be complex. In such cases, the auditor may consider obtaining legal advice.

Effective Date

8. This SA is effective for audits of financial statements for periods beginning on or after April 1, 2017.

Objectives

9. The objectives of the auditor are:

- (a) To communicate clearly with those charged with governance the responsibilities of the auditor in relation to the financial statement audit, and an overview of the planned scope and timing of the audit;
- (b) To obtain from those charged with governance information relevant to the audit;
- (c) To provide those charged with governance with timely observations arising from the audit that are significant and relevant to their responsibility to oversee the financial reporting process; and
- (d) To promote effective two-way communication between the auditor and those charged with governance.

Definitions

10. For purposes of the SAs, the following terms have the meanings attributed below:

(a) **Those charged with governance** – The person(s) or organization(s) (e.g., a corporate trustee) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. This includes overseeing the financial reporting process. For some entities, those charged with governance may include management personnel, for example, executive members of a governance board of a private or public sector entity, or an owner-manager. For discussion of the diversity of governance structures, see paragraphs A1–A8.

(b) **Management** – The person(s) with executive responsibility for the conduct of the entity's operations. For some entities, management includes some or all of those charged with governance, for example, executive members of a governance board, or an owner-manager.

Requirements

Those Charged with Governance

11. The auditor shall determine the appropriate person(s) within the entity's governance structure with

I.166 Auditing Pronouncements

whom to communicate. (Ref: Para. A1–A4)

Communication with a Subgroup of Those Charged with Governance

12. If the auditor communicates with a subgroup of those charged with governance, for example, an audit committee, or an individual, the auditor shall determine whether the auditor also needs to communicate with the governing body. (Ref: Para. A5–A7)

When All of Those Charged with Governance Are Involved in Managing the Entity

13. In some cases, all of those charged with governance are involved in managing the entity, for example, a small business where a single owner manages the entity and no one else has a governance role. In these cases, if matters required by this SA are communicated with person(s) with management responsibilities, and those person(s) also have governance responsibilities, the matters need not be communicated again with those same person(s) in their governance role. These matters are noted in paragraph 16(c). The auditor shall nonetheless be satisfied that communication with person(s) with management responsibilities adequately informs all of those with whom the auditor would otherwise communicate in their governance capacity. (Ref: Para. A8)

Matters to Be Communicated

The Auditor's Responsibilities in Relation to the Financial Statement Audit

14. The auditor shall communicate with those charged with governance the responsibilities of the auditor in relation to the financial statement audit, including that:

- (a) The auditor is responsible for forming and expressing an opinion on the financial statements that have been prepared by management with the oversight of those charged with governance; and
- (b) The audit of the financial statements does not relieve management or those charged with governance of their responsibilities. (Ref: Para. A9–A10)

Planned Scope and Timing of the Audit

15. The auditor shall communicate with those charged with governance an overview of the planned scope and timing of the audit, which includes communicating about the significant risks identified by the auditor. (Ref: Para. A11–A16)

Significant Findings from the Audit

16. The auditor shall communicate with those charged with governance: (Ref: Para. A17–A18)

- (a) The auditor's views about significant qualitative aspects of the entity's accounting practices, including accounting policies, accounting estimates and financial statement disclosures. When applicable, the auditor shall explain to those charged with governance why the auditor considers a significant accounting practice, that is acceptable under the applicable financial reporting framework, not to be most appropriate to the particular circumstances of the entity; (Ref: Para. A19–A20)
- (b) Significant difficulties, if any, encountered during the audit; (Ref: Para. A21)
- (c) Unless all of those charged with governance are involved in managing the entity:
 - i. Significant matters arising during the audit that were discussed, or subject to correspondence, with management; and (Ref: Para. A22)
 - ii. Written representations the auditor is requesting;
- (d) Circumstances that affect the form and content of the auditor's report, if any; and (Ref: Para. A23–A25)
- (e) Any other significant matters arising during the audit that, in the auditor's professional judgment, are relevant to the oversight of the financial reporting process. (Ref: Para. A26–A28)

Auditor Independence

17. In the case of listed entities, the auditor shall communicate with those charged with governance:
- (a) A statement that the engagement team and others in the firm as appropriate, the firm and, when applicable, network firms have complied with relevant ethical requirements regarding independence; and
 - i. All relationships and other matters between the firm, network firms, and the entity that, in the auditor's professional judgment, may reasonably be thought to bear on independence. This shall include total fees charged during the period covered by the financial statements for audit and non-audit services provided by the firm and network firms to the entity and components controlled by the entity. These fees shall be allocated to categories that are appropriate to assist those charged with governance in assessing the effect of services on the independence of the auditor; and
 - ii. The related safeguards that have been applied to eliminate identified threats to independence or reduce them to an acceptable level. (Ref: Para. A29–A32)

The Communication Process

Establishing the Communication Process

18. The auditor shall communicate with those charged with governance the form, timing and expected general content of communications. (Ref: Para. A37–A45)

Forms of Communication

19. The auditor shall communicate in writing with those charged with governance regarding significant findings from the audit if, in the auditor's professional judgment, oral communication would not be adequate. Written communications need not include all matters that arose during the course of the audit. (Ref: Para. A46–A48)

20. The auditor shall communicate in writing with those charged with governance regarding auditor independence when required by paragraph 17.

Timing of Communications

21. The auditor shall communicate with those charged with governance on a timely basis. (Ref: Para. A49–A50)

Adequacy of the Communication Process

22. The auditor shall evaluate whether the two-way communication between the auditor and those charged with governance has been adequate for the purpose of the audit. If it has not, the auditor shall evaluate the effect, if any, on the auditor's assessment of the risks of material misstatement and ability to obtain sufficient appropriate audit evidence, and shall take appropriate action. (Ref: Para. A51–A53)

Documentation

23. Where matters required by this SA to be communicated are communicated orally, the auditor shall include them in the audit documentation, and when and to whom they were communicated. Where matters have been communicated in writing, the auditor shall retain a copy of the communication as part of the audit documentation.² (Ref: Para. A54)

² SA 230, *Audit Documentation*, paragraphs 8–11, and A6.

Application and Other Explanatory Material

Those Charged with Governance (Ref: Para. 11)

A1. Governance structures vary by entities, reflecting influences such as different cultural and legal backgrounds, and size and ownership characteristics. For example:

- In some entities, a supervisory (wholly or mainly non-executive) board exists that is legally separate from an executive (management) board (a “two-tier board” structure). In other entities, both the supervisory and executive functions are the legal responsibility of a single, or unitary, board (a “one-tier board” structure).
- In some entities, those charged with governance hold positions that are an integral part of the entity’s legal structure, for example, company directors. In others, for example, some government entities, a body that is not part of the entity is charged with governance.
- In some cases, some or all of those charged with governance are involved in managing the entity. In others, those charged with governance and management comprise different persons.
- In some cases, those charged with governance are responsible for approving³ the entity’s financial statements (in other cases management has this responsibility).

A2. In most entities, governance is the collective responsibility of a governing body, such as a board of directors, a supervisory board, partners, proprietors, a committee of management, a council of governors, trustees, or equivalent persons. In some smaller entities, however, one person may be charged with governance, for example, the owner-manager where there are no other owners, or a sole trustee. When governance is a collective responsibility, a subgroup such as an audit committee or even an individual, may be charged with specific tasks to assist the governing body in meeting its responsibilities. Alternatively, a subgroup or individual may have specific, legally identified responsibilities that differ from those of the governing body.

A3. Such diversity means that it is not possible for this SA to specify for all audits the person(s) with whom the auditor is to communicate particular matters. Also, in some cases, the appropriate person(s) with whom to communicate may not be clearly identifiable from the applicable legal framework or other engagement circumstances, for example, entities where the governance structure is not formally defined, such as some family-owned entities, some not-for-profit organizations, and some government entities. In such cases, the auditor may need to discuss and agree with the engaging party the relevant person(s) with whom to communicate. In deciding with whom to communicate, the auditor’s understanding of an entity’s governance structure and processes obtained in accordance with SA 315⁴ is relevant. The appropriate person(s) with whom to communicate may vary depending on the matter to be communicated.

A4. SA 600 includes specific matters to be communicated by group auditors with those charged with governance. When the entity is a component of a group, the appropriate person(s) with whom the component auditor communicates depends on the engagement circumstances and the matter to be communicated. In some cases, a number of components may be conducting the same businesses within the same system of internal control and using the same accounting practices. Where those charged with governance of those components are the same (e.g., common board of directors), duplication may be avoided by dealing with these components concurrently for the purpose of communication.

³ As described in paragraph A60 of SA 700 (Revised), *Forming an Opinion and Reporting on Financial Statements*, having responsibility for approving in this context means having the authority to conclude that all the statements that comprise the financial statements, including the related notes, have been prepared.

⁴ SA 315, *Identifying and Assessing the Risks of Material Misstatement through Understanding the Entity and Its Environment*.

Communication with a Subgroup of Those Charged with Governance (Ref: Para. 12)

A5. When considering communicating with a subgroup of those charged with governance, the auditor may take into account such matters as:

- The respective responsibilities of the subgroup and the governing body.
- The nature of the matter to be communicated.
- Relevant legal or regulatory requirements.
- Whether the subgroup has the authority to take action in relation to the information communicated, and can provide further information and explanations the auditor may need.

A6. When deciding whether there is also a need to communicate information, in full or in summary form, with the governing body, the auditor may be influenced by the auditor's assessment of how effectively and appropriately the subgroup communicates relevant information with the governing body. The auditor may make explicit in agreeing the terms of engagement that, unless prohibited by law or regulation, the auditor retains the right to communicate directly with the governing body.

A7. Audit committees (or similar subgroups with different names) exist in many entities. Although their specific authority and functions may differ, communication with the audit committee, where one exists, has become a key element in the auditor's communication with those charged with governance. Good governance principles suggest that:

- The auditor will be invited to regularly attend meetings of the audit committee.
- The chair of the audit committee and, when relevant, the other members of the audit committee, will liaise with the auditor periodically.
- The audit committee will meet the auditor without management present at least annually.

When All of Those Charged with Governance Are Involved in Managing the Entity (Ref: Para.13)

A8. In some cases, all of those charged with governance are involved in managing the entity, and the application of communication requirements is modified to recognize this position. In such cases, communication with person(s) with management responsibilities may not adequately inform all of those with whom the auditor would otherwise communicate in their governance capacity. For example, in a company where all directors are involved in managing the entity, some of those directors (e.g., one responsible for marketing) may be unaware of significant matters discussed with another director (e.g., one responsible for the preparation of the financial statements).

Matters to Be Communicated

The Auditor's Responsibilities in Relation to the Financial Statement Audit (Ref: Para. 14)

A9. The auditor's responsibilities in relation to the financial statement audit are often included in the engagement letter or other suitable form of written agreement that records the agreed terms of the engagement.⁵ Law, regulation or the governance structure of the entity may require those charged with governance to agree the terms of the engagement with the auditor. When this is not the case, providing those charged with governance with a copy of that engagement letter or other suitable form of written agreement may be an appropriate way to communicate with them regarding such matters as:

- The auditor's responsibility for performing the audit in accordance with SAs, which is directed towards the expression of an opinion on the financial statements. The matters that SAs require to be communicated, therefore, include significant matters arising during the audit of the financial statements

⁵ See paragraph 10 of SA 210, *Agreeing the Terms of Audit Engagements*.

I.170 Auditing Pronouncements

that are relevant to those charged with governance in overseeing the financial reporting process.

- The fact that SAs do not require the auditor to design procedures for the purpose of identifying supplementary matters to communicate with those charged with governance.
- When SA 701⁶ applies, the auditor's responsibilities to determine and communicate key audit matters in the auditor's report.
- When applicable, the auditor's responsibility for communicating particular matters required by law or regulation, by agreement with the entity or by additional requirements applicable to the engagement, for example, the standards of a national professional accountancy body.

A10. Law or regulation, an agreement with the entity or additional requirements applicable to the engagement may provide for broader communication with those charged with governance. For example, (a) an agreement with the entity may provide for particular matters to be communicated when they arise from services provided by a firm or network firm other than the financial statement audit; or (b) the mandate of a public sector auditor may provide for matters to be communicated that come to the auditor's attention as a result of other work, such as performance audits.

Planned Scope and Timing of the Audit (Ref: Para. 15)

A11. Communication regarding the planned scope and timing of the audit may:

- Assist those charged with governance to understand better the consequences of the auditor's work, to discuss issues of risk and the concept of materiality with the auditor, and to identify any areas in which they may request the auditor to undertake additional procedures; and
- Assist the auditor to understand better the entity and its environment.

A12. Communicating significant risks identified by the auditor helps those charged with governance understand those matters and why they require special audit consideration. The communication about significant risks may assist those charged with governance in fulfilling their responsibility to oversee the financial reporting process.

A13. Matters communicated may include:

- (a) How the auditor plans to address the significant risks of material misstatement, whether due to fraud or error.
- (b) How the auditor plans to address areas of higher assessed risks of material misstatement.
- (c) The auditor's approach to internal control relevant to the audit.
- (d) The application of the concept of materiality in the context of an audit.⁷
- (e) The nature and extent of specialized skill or knowledge needed to perform the planned audit procedures or evaluate the audit results, including the use of an auditor's expert.⁸
- (f) When SA 701 applies, the auditor's preliminary views about matters that may be areas of significant auditor attention in the audit and therefore may be key audit matters.

A14. Other planning matters that it may be appropriate to discuss with those charged with governance include:

- Where the entity has an internal audit function, how the external auditor and internal auditors can work

⁶ SA 701, *Communicating Key Audit Matters in the Independent Auditor's Report*.

⁷ SA 320, *Materiality in Planning and Performing an Audit*.

⁸ See SA 620, 'Using the Work of an Auditor's Expert'.

together in a constructive and complementary manner, including any planned use of the work of the internal audit function, and the nature and extent of any planned use of internal auditors to provide direct assistance.⁹

- The views of those charged with governance of:
 - The appropriate person(s) in the entity's governance structure with whom to communicate.
 - The allocation of responsibilities between those charged with governance and management.
 - The entity's objectives and strategies, and the related business risks that may result in material misstatements.
 - Matters those charged with governance consider warrant particular attention during the audit, and any areas where they request additional procedures to be undertaken.
 - Significant communications with regulators.
 - Other matters those charged with governance consider may influence the audit of the financial statements.
- The attitudes, awareness, and actions of those charged with governance concerning (a) the entity's internal control and its importance in the entity, including how those charged with governance oversee the effectiveness of internal control, and (b) the detection or possibility of fraud.
- The actions of those charged with governance in response to developments in accounting standards, corporate governance practices, exchange listing rules, and related matters.
- The responses of those charged with governance to previous communications with the auditor.

A15. While communication with those charged with governance may assist the auditor to plan the scope and timing of the audit, it does not change the auditor's sole responsibility to establish the overall audit strategy and the audit plan, including the nature, timing and extent of procedures necessary to obtain sufficient appropriate audit evidence.

A16. Care is necessary when communicating with those charged with governance about the planned scope and timing of the audit so as not to compromise the effectiveness of the audit, particularly where some or all of those charged with governance are involved in managing the entity. For example, communicating the nature and timing of detailed audit procedures may reduce the effectiveness of those procedures by making them too predictable.

Significant Findings from the Audit (Ref: Para. 16)

A17. The communication of findings from the audit may include requesting further information from those charged with governance in order to complete the audit evidence obtained. For example, the auditor may confirm that those charged with governance have the same understanding of the facts and circumstances relevant to specific transactions or events.

A18. When SA 701 applies, the communications with those charged with governance required by paragraph 16, as well as the communication about the significant risks identified by the auditor required by paragraph 15, are particularly relevant to the auditor's determination of matters that required significant auditor attention and which therefore may be key audit matters.¹⁰

Significant Qualitative Aspects of Accounting Practices (Ref: Para. 16(a))

⁹ SA 610 (Revised), 'Using the Work of Internal Auditors', paragraph 31.

¹⁰ SA 701, paragraphs 9–10.

I.172 Auditing Pronouncements

A19. Financial reporting frameworks ordinarily allow for the entity to make accounting estimates, and judgments about accounting policies and financial statement disclosures, for example, in relation to the use of key assumptions in the development of accounting estimates for which there is significant measurement uncertainty. In addition, law, regulation or financial reporting frameworks may require disclosure of a summary of significant accounting policies or make reference to “critical accounting estimates” or “critical accounting policies and practices” to identify and provide additional information to users about the most difficult, subjective or complex judgments made by management in preparing the financial statements.

A20. As a result, the auditor’s views on the subjective aspects of the financial statements may be particularly relevant to those charged with governance in discharging their responsibilities for oversight of the financial reporting process. For example, in relation to the matters described in paragraph A19, those charged with governance may be interested in the auditor’s evaluation of the adequacy of disclosures of the estimation uncertainty relating to accounting estimates that give rise to significant risks. Open and constructive communication about significant qualitative aspects of the entity’s accounting practices also may include comment on the acceptability of significant accounting practices. Appendix 2 identifies matters that may be included in this communication.

Significant Difficulties Encountered during the Audit (Ref: Para. 16(b))

A21. Significant difficulties encountered during the audit may include such matters as:

- (i) Significant delays by management, the unavailability of entity personnel, or an unwillingness by management to provide information necessary for the auditor to perform the auditor’s procedures.
- (ii) An unreasonably brief time within which to complete the audit.
- (iii) Extensive unexpected effort required to obtain sufficient appropriate audit evidence.
- (iv) The unavailability of expected information.
- (v) Restrictions imposed on the auditor by management.
- (vi) Management’s unwillingness to make or extend its assessment of the entity’s ability to continue as a going concern when requested.

In some circumstances, such difficulties may constitute a scope limitation that leads to a modification of the auditor’s opinion.¹¹

Significant Matters Discussed, or Subject to Correspondence with Management (Ref: Para. 16(c)(i))

A22. Significant matters discussed, or subject to correspondence with management may include such matters as:

- Significant events or transactions that occurred during the year.
- Business conditions affecting the entity, and business plans and strategies that may affect the risks of material misstatement.
- Concerns about management’s consultations with other accountants on accounting or auditing matters.
- Discussions or correspondence in connection with the initial or recurring appointment of the auditor regarding accounting practices, the application of auditing standards, or fees for audit or other services.
- Significant matters on which there was disagreement with management, except for initial differences of opinion because of incomplete facts or preliminary information that are later resolved by the auditor obtaining additional relevant facts or information.

¹¹ SA 705 (Revised), *Modifications to the Opinion in the Independent Auditor’s Report*.

Circumstances that Affect the Form and Content of the Auditor's Report (Ref: Para 16(d))

A23. SA 210 requires the auditor to agree the terms of the audit engagement with management or those charged with governance, as appropriate.¹² The agreed terms of the audit engagement are required to be recorded in an audit engagement letter or other suitable form of written agreement and include, among other things, reference to the expected form and content of the auditor's report.¹³ As explained in paragraph A9, if the terms of engagement are not agreed with those charged with governance, the auditor may provide those charged with governance with a copy of the engagement letter to communicate about matters relevant to the audit. The communication required by paragraph 16(d) is intended to inform those charged with governance about circumstances in which the auditor's report may differ from its expected form and content or may include additional information about the audit that was performed.

A24. Circumstances in which the auditor is required or may otherwise consider it necessary to include additional information in the auditor's report in accordance with the SAs, and for which communication with those charged with governance is required, include when:

- The auditor expects to modify the opinion in the auditor's report in accordance with SA 705 (Revised).¹⁴
- A material uncertainty related to going concern is reported in accordance with SA 570 (Revised).¹⁵
- Key audit matters are communicated in accordance with SA 701.¹⁶
- The auditor considers it necessary to include an Emphasis of Matter paragraph or Other Matters paragraph in accordance with SA 706 (Revised)¹⁷ or is required to do so by other SAs.

In such circumstances, the auditor may consider it useful to provide those charged with governance with a draft of the auditor's report to facilitate a discussion of how such matters will be addressed in the auditor's report.

A25. In the rare circumstances that the auditor intends not to include the name of the engagement partner in the auditor's report in accordance with SA 700 (Revised), the auditor is required to discuss this intention with those charged with governance to inform the auditor's assessment of the likelihood and severity of a significant personal security threat. The auditor also may communicate with those charged with governance in circumstances when the auditor elects not to include the description of the auditor's responsibilities in the body of the auditor's report as permitted by SA 700 (Revised).¹⁸

Other Significant Matters Relevant to the Financial Reporting Process (Ref: Para. 16(e))

A26. SA 300¹⁹ notes that, as a result of unexpected events, changes in conditions, or the audit evidence obtained from the results of audit procedures, the auditor may need to modify the overall audit strategy and audit plan and thereby the resulting planned nature, timing and extent of further audit procedures, based on the revised consideration of assessed risks. The auditor may communicate with those charged with governance about such matters, for example, as an update to initial discussions about the planned scope

¹² SA 210, paragraph 9.

¹³ SA 210, paragraph 10.

¹⁴ SA 705 (Revised), paragraph 30.

¹⁵ SA 570 (Revised), 'Going Concern', paragraph 25(d).

¹⁶ SA 701, paragraph 17.

¹⁷ SA 706 (Revised), 'Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report', paragraph 12.

¹⁸ SA 700 (Revised), paragraph 40.

¹⁹ SA 300, 'Planning an Audit of Financial Statements', paragraph A14.

I.174 Auditing Pronouncements

and timing of the audit.

A27. Other significant matters arising from the audit that are directly relevant to those charged with governance in overseeing the financial reporting process may include such matters as material misstatements of fact or material inconsistencies in information accompanying the audited financial statements that have been corrected.

A28. To the extent not already addressed by the requirements in paragraphs 16(a)–(d) and related application material, the auditor may consider communicating about other matters discussed with, or considered by, the engagement quality control reviewer, if one has been appointed, in accordance with SA 220.²⁰

Auditor Independence (Ref: Para. 17)

A29. The auditor is required to comply with relevant ethical requirements, including those pertaining to independence, relating to financial statement audit engagements.²¹

A30. The relationships and other matters, and safeguards to be communicated, vary with the circumstances of the engagement, but generally address:

- (a) Threats to independence, which may be categorized as: self-interest threats, self-review threats, advocacy threats, familiarity threats, and intimidation threats; and
- (b) Safeguards created by the profession, legislation or regulation, safeguards within the entity, and safeguards within the firm's own systems and procedures.

A31. Relevant ethical requirements or law or regulation may also specify particular communications to those charged with governance in circumstances where breaches of independence requirements have been identified. For example, the Code of Ethics issued by ICAI requires the auditor to communicate with those charged with governance in writing about any breach and the action the firm has taken or proposes to take.

A32. The communication requirements relating to auditor independence that apply in the case of listed entities may also be appropriate in the case of some other entities, including those that may be of significant public interest, for example because they have a large number and wide range of stakeholders and considering the nature and size of the business. Examples of such entities may include financial institutions (such as banks, insurance companies, and pension funds), and other entities such as charities. On the other hand, there may be situations where communications regarding independence may not be relevant, for example, where all of those charged with governance have been informed of relevant facts through their management activities. This is particularly likely where the entity is owner-managed, and the auditor's firm and network firms have little involvement with the entity beyond a financial statement audit.

Supplementary Matters (Ref: Para. 3)

A33. The oversight of management by those charged with governance includes ensuring that the entity designs, implements and maintains appropriate internal control with regard to reliability of financial reporting, effectiveness and efficiency of operations and compliance with applicable laws and regulations.

A34. The auditor may become aware of supplementary matters that do not necessarily relate to the oversight of the financial reporting process but which are, nevertheless, likely to be significant to the responsibilities of those charged with governance in overseeing the strategic direction of the entity or the entity's obligations related to accountability. Such matters may include, for example, significant issues

²⁰ See paragraphs 19–21 and A23–A31 of SA 220, *Quality Control for an Audit of Financial Statements*.

²¹ SA 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with Standards on Auditing*, paragraph 14.

regarding governance structures or processes, and significant decisions or actions by senior management that lack appropriate authorization.

A35. In determining whether to communicate supplementary matters with those charged with governance, the auditor may discuss matters of this kind of which the auditor has become aware with the appropriate level of management, unless it is inappropriate to do so in the circumstances.

A36. If a supplementary matter is communicated, it may be appropriate for the auditor to make those charged with governance aware that:

- (a) Identification and communication of such matters is incidental to the purpose of the audit, which is to form an opinion on the financial statements;
- (b) No procedures were carried out with respect to the matter other than any that were necessary to form an opinion on the financial statements; and
- (c) No procedures were carried out to determine whether other such matters exist.

The Communication Process

Establishing the Communication Process (Ref: Para. 18)

A37. Clear communication of the auditor's responsibilities, the planned scope and timing of the audit, and the expected general content of communications helps establish the basis for effective two-way communication.

A38. Matters that may also contribute to effective two-way communication include discussion of:

- The purpose of communications. When the purpose is clear, the auditor and those charged with governance are better placed to have a mutual understanding of relevant issues and the expected actions arising from the communication process.
- The form in which communications will be made.
- The person(s) in the engagement team and among those charged with governance who will communicate regarding particular matters.
- The auditor's expectation that communication will be two-way, and that those charged with governance will communicate with the auditor matters they consider relevant to the audit, for example, strategic decisions that may significantly affect the nature, timing and extent of audit procedures, the suspicion or the detection of fraud, and concerns with the integrity or competence of senior management.
- The process for taking action and reporting back on matters communicated by the auditor.
- The process for taking action and reporting back on matters communicated by those charged with governance.

A39. The communication process will vary with the circumstances, including the size and governance structure of the entity, how those charged with governance operate, and the auditor's view of the significance of matters to be communicated. Difficulty in establishing effective two-way communication may indicate that the communication between the auditor and those charged with governance is not adequate for the purpose of the audit (see paragraph A52).

Considerations Specific to Smaller Entities

A40. In the case of audits of smaller entities, the auditor may communicate in a less structured manner with those charged with governance than in the case of listed or larger entities.

Communication with Management

A41. Many matters may be discussed with management in the ordinary course of an audit, including

I.176 Auditing Pronouncements

matters required by this SA to be communicated with those charged with governance. Such discussions recognize management's executive responsibility for the conduct of the entity's operations and, in particular, management's responsibility for the preparation of the financial statements.

A42. Before communicating matters with those charged with governance, the auditor may discuss them with management, unless that is inappropriate. For example, it may not be appropriate to discuss questions of management's competence or integrity with management. In addition to recognizing management's executive responsibility, these initial discussions may clarify facts and issues, and give management an opportunity to provide further information and explanations. Similarly, when the entity has an internal audit function, the auditor may discuss matters with the internal auditor before communicating with those charged with governance.

Communication with Third Parties

A43. Those charged with governance may be required by law or regulation, or may wish, to provide third parties, for example, bankers or certain regulatory authorities, with copies of a written communication from the auditor. In some cases, disclosure to third parties may be illegal or otherwise inappropriate. When a written communication prepared for those charged with governance is provided to third parties, it may be important in the circumstances that the third parties be informed that the communication was not prepared with them in mind, for example, by stating in written communications with those charged with governance:

- That the communication has been prepared for the sole use of those charged with governance and, where applicable, the group management and the group auditor, and should not be relied upon by third parties;
- That no responsibility is assumed by the auditor to third parties; and
- Any restrictions on disclosure or distribution to third parties.

A44. In some entities, the auditor may be required by law or regulation to, for example:

- Notify a regulatory or enforcement body of certain matters communicated with those charged with governance. For example, in some countries the auditor has a duty to report misstatements to authorities where management and those charged with governance fail to take corrective action;
- Submit copies of certain reports prepared for those charged with governance to relevant regulatory or funding bodies, or other bodies such as a central authority in the case of some public sector entities; or
- Make reports prepared for those charged with governance publicly available.

A45. Unless required by law or regulation to provide a third party with a copy of the auditor's written communications with those charged with governance, the auditor may need the prior consent of those charged with governance before doing so.

Forms of Communication (Ref: Para. 19)

A46. Effective communication may involve structured presentations and written reports as well as less structured communications, including discussions. The auditor may communicate matters other than those identified in paragraphs 19–20 either orally or in writing. Written communications may include an engagement letter that is provided to those charged with governance.

A47. In addition to the significance of a particular matter, the form of communication (e.g., whether to communicate orally or in writing, the extent of detail or summarization in the communication, and whether to communicate in a structured or unstructured manner) may be affected by such factors as:

- (a) Whether a discussion of the matter will be included in the auditor's report. For example, when key audit matters are communicated in the auditor's report, the auditor may consider it necessary to

communicate in writing about the matters determined to be key audit matters.

- (b) Whether the matter has been satisfactorily resolved.
- (c) Whether management has previously communicated the matter.
- (d) The size, operating structure, control environment, and legal structure of the entity.
- (e) In the case of an audit of special purpose financial statements, whether the auditor also audits the entity's general purpose financial statements.
- (f) Legal requirements. In some entities, a written communication with those charged with governance is required in a prescribed form by local law.
- (g) The expectations of those charged with governance, including arrangements made for periodic meetings or communications with the auditor.
- (h) The amount of ongoing contact and dialogue the auditor has with those charged with governance.
- (i) Whether there have been significant changes in the membership of a governing body.

A48. When a significant matter is discussed with an individual member of those charged with governance, for example, the chair of an audit committee, it may be appropriate for the auditor to summarize the matter in later communications so that all of those charged with governance have full and balanced information.

Timing of Communications (Ref: Para. 21)

A49. Timely communication throughout the audit contributes to the achievement of robust two-way dialogue between those charged with governance and the auditor. However, the appropriate timing for communications will vary with the circumstances of the engagement. Relevant circumstances include the significance and nature of the matter, and the action expected to be taken by those charged with governance. For example:

- (a) Communications regarding planning matters may often be made early in the audit engagement and, for an initial engagement, may be made as part of agreeing the terms of the engagement.
- (b) It may be appropriate to communicate a significant difficulty encountered during the audit as soon as practicable if those charged with governance are able to assist the auditor to overcome the difficulty, or if it is likely to lead to a modified opinion. Similarly, the auditor may communicate orally to those charged with governance as soon as practicable significant deficiencies in internal control that the auditor has identified, prior to communicating these in writing as required by SA 265.²²
- When SA 701 applies, the auditor may communicate preliminary views about key audit matters when discussing the planned scope and timing of the audit (see paragraph A13), and the auditor also may have more frequent communications to further discuss such matters when communicating about significant audit findings.
- Communications regarding independence may be appropriate whenever significant judgments are made about threats to independence and related safeguards, for example, when accepting an engagement to provide non-audit services, and at a concluding discussion.
- Communications regarding findings from the audit, including the auditor's views about the qualitative aspects of the entity's accounting practices, may also be made as part of the concluding discussion.
- When auditing both general purpose and special purpose financial statements, it may be appropriate to coordinate the timing of communications.

²² SA 265, paragraphs 9 and A14.

I.178 Auditing Pronouncements

A50. Other factors that may be relevant to the timing of communications include:

- The size, operating structure, control environment, and legal structure of the entity being audited.
- Any legal obligation to communicate certain matters within a specified timeframe.
- The expectations of those charged with governance, including arrangements made for periodic meetings or communications with the auditor.
- The time at which the auditor identifies certain matters, for example, the auditor may not identify a particular matter (e.g., noncompliance with a law) in time for preventive action to be taken, but communication of the matter may enable remedial action to be taken.

Adequacy of the Communication Process (Ref: Para. 22)

A51. The auditor need not design specific procedures to support the evaluation of the two-way communication between the auditor and those charged with governance; rather, that evaluation may be based on observations resulting from audit procedures performed for other purposes. Such observations may include:

- The appropriateness and timeliness of actions taken by those charged with governance in response to matters raised by the auditor. Where significant matters raised in previous communications have not been dealt with effectively, it may be appropriate for the auditor to inquire as to why appropriate action has not been taken, and to consider raising the point again. This avoids the risk of giving an impression that the auditor is satisfied that the matter has been adequately addressed or is no longer significant.
- The apparent openness of those charged with governance in their communications with the auditor.
- The willingness and capacity of those charged with governance to meet with the auditor without management present.
- The apparent ability of those charged with governance to fully comprehend matters raised by the auditor, for example, the extent to which those charged with governance probe issues, and question recommendations made to them.
- Difficulty in establishing with those charged with governance a mutual understanding of the form, timing and expected general content of communications.
- Where all or some of those charged with governance are involved in managing the entity, their apparent awareness of how matters discussed with the auditor affect their broader governance responsibilities, as well as their management responsibilities.
- Whether the two-way communication between the auditor and those charged with governance meets applicable legal and regulatory requirements.

A52. As noted in paragraph 4, effective two-way communication assists both the auditor and those charged with governance. Further, SA 315 identifies participation by those charged with governance, including their interaction with internal audit, if any, and external auditors, as an element of the entity's control environment.²³ Inadequate two-way communication may indicate an unsatisfactory control environment and influence the auditor's assessment of the risks of material misstatements. There is also a risk that the auditor may not have obtained sufficient appropriate audit evidence to form an opinion on the financial statements.

A53. If the two-way communication between the auditor and those charged with governance is not adequate and the situation cannot be resolved, the auditor may take such actions as:

- Modifying the auditor's opinion on the basis of a scope limitation.

²³ SA 315, paragraph A70.

- Obtaining legal advice about the consequences of different courses of action.
- Communicating with third parties (e.g., a regulator), or a higher authority in the governance structure that is outside the entity, such as the owners of a business (e.g., shareholders in a general meeting), or the responsible government minister or parliament in the public sector.
- Withdrawing from the engagement, where withdrawal is possible under applicable law or regulation.

Documentation (Ref: Para. 23)

A54. Documentation of oral communication may include a copy of minutes prepared by the entity retained as part of the audit documentation where those minutes are an appropriate record of the communication.

Appendix 1

(Ref: Para. 3)

Specific Requirements in SQC 1 and Other SAs that Refer to Communications with Those Charged With Governance

This appendix identifies paragraphs in SQC 1¹ and other SAs that require communication of specific matters with those charged with governance. The list is not a substitute for considering the requirements and related application and other explanatory material in SAs.

- SQC 1, *Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements* – paragraph 42(a).
- SA 240, *The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements* – paragraphs 21, 38(c)(i) and 40-42.
- SA 250, *Consideration of Laws and Regulations in an Audit of Financial Statements* – paragraphs 14, 19 and 22-24.
- SA 265, *Communicating Deficiencies in Internal Control to Those Charged with Governance and Management* – paragraph 9.
- SA 450, *Evaluation of Misstatements Identified during the Audit* – paragraphs 12-13.
- SA 505, *External Confirmations* – paragraph 9.
- SA 510, *Initial Audit Engagements—Opening Balances* – paragraph 7.
- SA 550, *Related Parties* – paragraph 27.
- SA 560, *Subsequent Events*— paragraphs 7(b)-(c), 10(a), 13(b), 14(a) and 17.
- SA 570 (Revised), *Going Concern* – paragraph 25.
- SA 610 (Revised), *Using the Work of Internal Auditors* – paragraphs 20 and 31.
- SA 701, *Communicating Key Audit Matters in the Independent Auditor's Report* – paragraph 17.
- SA 705 (Revised), *Modifications to the Opinion in the Independent Auditor's Report* – paragraphs 12, 14, 23 and 30.
- SA 706 (Revised), *Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report* – paragraph 12.

¹ SQC 1, *Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements*.

- SA 710, *Comparative Information—Corresponding Figures and Comparative Financial Statements* - paragraph 18.
- SA 720, *The Auditor's Responsibilities in Relation to Other Information in Documents Containing Audited Financial Statements* – paragraphs 10, 13 and 16.

Appendix 2

(Ref: Para. 16(a), A19–A20)

Qualitative Aspects of Accounting Practices

The communication required by paragraph 16(a), and discussed in paragraphs A19–A20, may include such matters as:

Accounting Policies

- The appropriateness of the accounting policies to the particular circumstances of the entity, having regard to the need to balance the cost of providing information with the likely benefit to users of the entity's financial statements. Where acceptable alternative accounting policies exist, the communication may include identification of the financial statement items that are affected by the choice of significant accounting policies as well as information on accounting policies used by similar entities.
- The initial selection of, and changes in, significant accounting policies, including the application of new accounting pronouncements. The communication may include: the effect of the timing and method of adoption of a change in accounting policy on the current and future earnings of the entity; and the timing of a change in accounting policies in relation to expected new accounting pronouncements.
- The effect of significant accounting policies in controversial or emerging areas (or those unique to an industry, particularly when there is a lack of authoritative guidance or consensus).
- The effect of the timing of transactions in relation to the period in which they are recorded.

Accounting Estimates

- For items for which estimates are significant, issues discussed in SA 540,¹ including, for example:
 - How management identifies those transactions, events and conditions that may give rise to the need for accounting estimates to be recognized or disclosed in the financial statements.
 - Changes in circumstances that may give rise to new, or the need to revise existing, accounting estimates.
 - Whether management's decision to recognize, or to not recognize, the accounting estimates in the financial statements is in accordance with the applicable financial reporting framework.
 - Whether there has been or ought to have been a change from the prior period in the methods for making the accounting estimates and, if so, why, as well as the outcome of accounting estimates in prior periods.
 - Management's process for making accounting estimates (e.g., when management has used a model), including whether the selected measurement basis for the accounting estimate is in accordance with the applicable financial reporting framework.
 - Whether the significant assumptions used by management in developing the accounting estimate

¹ SA 540, Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures.

are reasonable.

- Where relevant to the reasonableness of the significant assumptions used by management or the appropriate application of the applicable financial reporting framework, management's intent to carry out specific courses of action and its ability to do so.
- Risks of material misstatement.
- Indicators of possible management bias.
- How management has considered alternative assumptions or outcomes and why it has rejected them, or how management has otherwise addressed estimation uncertainty in making the accounting estimate.
- The adequacy of disclosure of estimation uncertainty in the financial statements.

Financial Statement Disclosures

- The issues involved, and related judgments made, in formulating particularly sensitive financial statement disclosures (e.g., disclosures related to revenue recognition, remuneration, going concern, subsequent events, and contingency issues).
- The overall neutrality, consistency and clarity of the disclosures in the financial statements.

Related Matters

- The potential effect on the financial statements of significant risks, exposures and uncertainties, such as pending litigation, that are disclosed in the financial statements.
- The extent to which the financial statements are affected by significant transactions that are outside the normal course of business for the entity, or that otherwise appear to be unusual. This communication may highlight:
 - The non-recurring amounts recognized during the period.
 - The extent to which such transactions are separately disclosed in the financial statements.
 - Whether such transactions appear to have been designed to achieve a particular accounting or tax treatment, or a particular legal or regulatory objective.
 - Whether the form of such transactions appears overly complex or where extensive advice regarding the structuring of the transaction has been taken.
 - Where management is placing more emphasis on the need for a particular accounting treatment than on the underlying economics of the transaction.
- The factors affecting asset and liability carrying values, including the entity's bases for determining useful lives assigned to tangible and intangible assets. The communication may explain how factors affecting carrying values were selected and how alternative selections would have affected the financial statements.
- The selective correction of misstatements, for example, correcting misstatements with the effect of increasing reported earnings, but not those that have the effect of decreasing reported earnings.

SA 265*

**Communicating Deficiencies in Internal Control to
Those Charged with Governance and Management**
*(Effective for all audits relating to
accounting periods beginning on or after April 1, 2010)*

Introduction

Scope of this SA

1. This Standard on Auditing (SA) deals with the auditor's responsibility to communicate appropriately to those charged with governance and management deficiencies in internal control²⁴ that the auditor has identified in an audit of financial statements. This SA does not impose additional responsibilities on the auditor regarding obtaining an understanding of internal control and designing and performing tests of controls over and above the requirements of SA 315 and SA 330²⁵. SA 260²⁶ establishes further requirements and provides guidance regarding the auditor's responsibility to communicate with those charged with governance in relation to the audit.
2. The auditor is required to obtain an understanding of internal control relevant to the audit when identifying and assessing the risks of material misstatement²⁷. In making those risk assessments, the auditor considers internal control in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of internal control. The auditor may identify deficiencies in internal control not only during this risk assessment process but also at any other stage of the audit. This SA specifies which identified deficiencies the auditor is required to communicate to those charged with governance and management.
3. Nothing in this SA precludes the auditor from communicating to those charged with governance and management other internal control matters that the auditor has identified during the audit.

Effective Date

4. This SA is effective for audits of financial statements for periods beginning on or after April 1, 2010.

Objective

5. The objective of the auditor is to communicate appropriately to those charged with governance and management deficiencies in internal control that the auditor has identified during the audit and that, in the auditor's professional judgment, are of sufficient importance to merit their respective attentions.

* Published in September, 2009 issue of the Journal.

²⁵ SA 330, "The Auditor's Responses to Assessed Risks".

²⁶ SA 260, "Communication with Those Charged with Governance".

²⁷ SA 315, paragraph 12.

Definitions

6. For purposes of the SAs, the following terms have the meanings attributed below:
- (a) Deficiency in internal control – This exists when:
 - (i) A control is designed, implemented or operated in such a way that it is unable to prevent, or detect and correct, misstatements in the financial statements on a timely basis; or
 - (ii) A control necessary to prevent, or detect and correct, misstatements in the financial statements on a timely basis is missing.
 - (b) Significant deficiency in internal control – A deficiency or combination of deficiencies in internal control that, in the auditor’s professional judgment, is of sufficient importance to merit the attention of those charged with governance. (Ref: Para. A5)

Requirements

7. The auditor shall determine whether, on the basis of the audit work performed, the auditor has identified one or more deficiencies in internal control. (Ref: Para. A1-A4)
8. If the auditor has identified one or more deficiencies in internal control, the auditor shall determine, on the basis of the audit work performed, whether, individually or in combination, they constitute significant deficiencies. (Ref: Para. A5-A11)
9. The auditor shall communicate in writing significant deficiencies in internal control identified during the audit to those charged with governance on a timely basis. (Ref: Para. A12- A18, A27)
10. The auditor shall also communicate to management at an appropriate level of responsibility on a timely basis: (Ref: Para. A19, A27)
- (a) In writing, significant deficiencies in internal control that the auditor has communicated or intends to communicate to those charged with governance, unless it would be inappropriate to communicate directly to management in the circumstances; and (Ref: Para. A14, A20-A21)
 - (b) Other deficiencies in internal control identified during the audit that have not been communicated to management by other parties and that, in the auditor’s professional judgment, are of sufficient importance to merit management’s attention. (Ref: Para. A22- A26)
11. The auditor shall include in the written communication of significant deficiencies in internal control:
- (a) A description of the deficiencies and an explanation of their potential effects; and (Ref: Para. A28)
 - (b) Sufficient information to enable those charged with governance and management to understand the context of the communication. In particular, the auditor shall explain that: (Ref: Para. A29-A30)
 - (i) The purpose of the audit was for the auditor to express an opinion on the financial statements;
 - (ii) The audit included consideration of internal control relevant to the preparation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of internal control; and
 - (iii) The matters being reported are limited to those deficiencies that the auditor has identified during the audit and that the auditor has concluded are of sufficient importance to merit being reported to those charged with governance.

Application and Other Explanatory Material

Determination of Whether Deficiencies in Internal Control Have Been Identified (Ref: Para. 7)

- A1. In determining whether the auditor has identified one or more deficiencies in internal control, the auditor may discuss the relevant facts and circumstances of the auditor’s findings with the appropriate level

I.184 Auditing Pronouncements

of management. This discussion provides an opportunity for the auditor to alert management on a timely basis to the existence of deficiencies of which management may not have been previously aware. The level of management with whom it is appropriate to discuss the findings is one that is familiar with the internal control area concerned and that has the authority to take remedial action on any identified deficiencies in internal control. In some circumstances, it may not be appropriate for the auditor to discuss the auditor's findings directly with management, for example, if the findings appear to call management's integrity or competence into question (see paragraph A20).

A2. In discussing the facts and circumstances of the auditor's findings with management, the auditor may obtain other relevant information for further consideration, such as:

- Management's understanding of the actual or suspected causes of the deficiencies.
- Exceptions arising from the deficiencies that management may have noted, for example, misstatements that were not prevented by the relevant information technology (IT) controls.
- A preliminary indication from management of its response to the findings.

Considerations Specific to Smaller Entities

A3. While the concepts underlying control activities in smaller entities are likely to be similar to those in larger entities, the formality with which they operate will vary. Further, smaller entities may find that certain types of control activities are not necessary because of controls applied by management. For example, management's sole authority for granting credit to customers and approving significant purchases can provide effective control over important account balances and transactions, lessening or removing the need for more detailed control activities.

A4. Also, smaller entities often have fewer employees which may limit the extent to which segregation of duties is practicable. However, in a small owner-managed entity, the owner-manager may be able to exercise more effective oversight than in a larger entity. This higher level of management oversight needs to be balanced against the greater potential for management override of controls.

Significant Deficiencies in Internal Control (Ref: Para. 6(b), 8)

A5. The significance of a deficiency or a combination of deficiencies in internal control depends not only on whether a misstatement has actually occurred, but also on the likelihood that a misstatement could occur and the potential magnitude of the misstatement. Significant deficiencies may therefore exist even though the auditor has not identified misstatements during the audit.

A6. Examples of matters that the auditor may consider in determining whether a deficiency or combination of deficiencies in internal control constitutes a significant deficiency include:

- The likelihood of the deficiencies leading to material misstatements in the financial statements in the future.
- The susceptibility to loss or fraud of the related asset or liability.
- The subjectivity and complexity of determining estimated amounts, such as fair value accounting estimates.
- The financial statement amounts exposed to the deficiencies.
- The volume of activity that has occurred or could occur in the account balance or class of transactions exposed to the deficiency or deficiencies.
- The importance of the controls to the financial reporting process; for example:

- General monitoring controls (such as oversight of management).
 - Controls over the prevention and detection of fraud.
 - Controls over the selection and application of significant accounting policies.
 - Controls over significant transactions with related parties.
 - Controls over significant transactions outside the entity's normal course of business.
 - Controls over the period-end financial reporting process (such as controls over non-recurring journal entries).
- The cause and frequency of the exceptions detected as a result of the deficiencies in the controls.
 - The interaction of the deficiency with other deficiencies in internal control.
- A7. Indicators of significant deficiencies in internal control include, for example:
- Evidence of ineffective aspects of the control environment, such as:
 - Indications that significant transactions in which management is financially interested are not being appropriately scrutinised by those charged with governance.
 - Identification of management fraud, whether or not material, that was not prevented by the entity's internal control.
 - Management's failure to implement appropriate remedial action on significant deficiencies previously communicated.
 - Absence of a risk assessment process within the entity where such a process would ordinarily be expected to have been established.
 - Evidence of an ineffective entity risk assessment process, such as management's failure to identify a risk of material misstatement that the auditor would expect the entity's risk assessment process to have identified.
 - Evidence of an ineffective response to identified significant risks (e.g., absence of controls over such a risk).
 - Misstatements detected by the auditor's procedures that were not prevented, or detected and corrected, by the entity's internal control.
 - Disclosure of a material misstatement due to error or fraud as prior period items in the current year's Statement of Profit and Loss²⁸.
 - Evidence of management's inability to oversee the preparation of the financial statements.
- A8. Controls may be designed to operate individually or in combination to effectively prevent, or detect and correct, misstatements²⁹. For example, controls over accounts receivable may consist of both automated and manual controls designed to operate together to prevent, or detect and correct, misstatements in the account balance. A deficiency in internal control on its own may not be sufficiently important to constitute a significant deficiency. However, a combination of deficiencies affecting the same account balance or disclosure,

²⁸ Accounting Standard (AS) 5, "Net Profit or Loss for the Period, Prior Period Items and Changes in Accounting Policies" requires that prior period items should be separately disclosed in the Statement of Profit and Loss in a manner that their impact on the current profit or loss can be perceived.

²⁹ SA 315, paragraph A66.

relevant assertion, or component of internal control may increase the risks of misstatement to such an extent as to give rise to a significant deficiency.

A9. Law or regulation in some jurisdictions may establish a requirement (particularly for audits of listed entities) for the auditor to communicate to those charged with governance or to other relevant parties (such as regulators) one or more specific types of deficiency in internal control that the auditor has identified during the audit. Where law or regulation has established specific terms and definitions for these types of deficiency and requires the auditor to use these terms and definitions for the purpose of the communication, the auditor uses such terms and definitions when communicating in accordance with the legal or regulatory requirement.

A10. Where the jurisdiction has established specific terms for the types of deficiency in internal control to be communicated but has not defined such terms, it may be necessary for the auditor to use judgment to determine the matters to be communicated further to the legal or regulatory requirement. In doing so, the auditor may consider it appropriate to have regard to the requirements and guidance in this SA. For example, if the purpose of the legal or regulatory requirement is to bring to the attention of those charged with governance certain internal control matters of which they should be aware, it may be appropriate to regard such matters as being generally equivalent to the significant deficiencies required by this SA to be communicated to those charged with governance.

A11. The requirements of this SA remain applicable notwithstanding that law or regulation may require the auditor to use specific terms or definitions.

Communication of Deficiencies in Internal Control

Communication of Significant Deficiencies in Internal Control to Those Charged with Governance (Ref: Para. 9)

A12. Communicating significant deficiencies in writing to those charged with governance reflects the importance of these matters, and assists those charged with governance in fulfilling their oversight responsibilities. SA 260 establishes relevant considerations regarding communication with those charged with governance when all of them are involved in managing the entity.³⁰

A13. In determining when to issue the written communication, the auditor may consider whether receipt of such communication would be an important factor in enabling those charged with governance to discharge their oversight responsibilities. In addition, in case of listed entities, those charged with governance may need to receive the auditor's written communication before the date of approval of the financial statements in order to discharge specific responsibilities in relation to internal control for regulatory or other purposes. For other entities, the auditor may issue the written communication at a later date. Nevertheless, in the latter case, as the auditor's written communication of significant deficiencies forms part of the final audit file, the written communication is subject to the overriding requirement³¹ for the auditor to complete the assembly of the final audit file on a timely basis. SA 230 states that an appropriate time limit within which to complete the assembly of the final audit file is ordinarily not more than 60 days after the date of the auditor's report³².

A14. Regardless of the timing of the written communication of significant deficiencies, the auditor may communicate these orally in the first instance to management and, when appropriate, to those charged with governance to assist them in taking timely remedial action to minimize the risks of material misstatement. Doing so, however, does not relieve the auditor of the responsibility to communicate the significant deficiencies in writing, as this SA requires.

³⁰ SA 260, paragraph 9.

³¹ SA 230, "Audit Documentation", paragraph 14.

³² SA 230, paragraph A21.

A15. The level of detail at which to communicate significant deficiencies is a matter of the auditor's professional judgment in the circumstances. Factors that the auditor may consider in determining an appropriate level of detail for the communication include, for example:

- The nature of the entity. For instance, the communication required for a public interest entity may be different from that for a non-public interest entity.
- The size and complexity of the entity. For instance, the communication required for a complex entity may be different from that for an entity operating a simple business.
- The nature of significant deficiencies that the auditor has identified.
- The entity's governance composition. For instance, more detail may be needed if those charged with governance include members who do not have significant experience in the entity's industry or in the affected areas.
- Legal or regulatory requirements regarding the communication of specific types of deficiency in internal control.

A16. Management and those charged with governance may already be aware of significant deficiencies that the auditor has identified during the audit and may have chosen not to remedy them because of cost or other considerations. The responsibility for evaluating the costs and benefits of implementing remedial action rests with management and those charged with governance. Accordingly, the requirement in paragraph 9 applies regardless of cost or other considerations that management and those charged with governance may consider relevant in determining whether to remedy such deficiencies.

A17. The fact that the auditor communicated a significant deficiency to those charged with governance and management in a previous audit does not eliminate the need for the auditor to repeat the communication if remedial action has not yet been taken. If a previously communicated significant deficiency remains, the current year's communication may repeat the description from the previous communication, or simply reference the previous communication. The auditor may ask management or, where appropriate, those charged with governance, why the significant deficiency has not yet been remedied. A failure to act, in the absence of a rational explanation, may in itself represent a significant deficiency.

Considerations Specific to Smaller Entities

A18. In the case of audits of smaller entities, the auditor may communicate in a less structured manner with those charged with governance than in the case of larger entities.

Communication of Deficiencies in Internal Control to Management (Ref: Para. 10)

A19. Ordinarily, the appropriate level of management is the one that has responsibility and authority to evaluate the deficiencies in internal control and to take the necessary remedial action. For significant deficiencies, the appropriate level is likely to be the chief executive officer or chief financial officer (or equivalent) as these matters are also required to be communicated to those charged with governance. For other deficiencies in internal control, the appropriate level may be operational management with more direct involvement in the control areas affected and with the authority to take appropriate remedial action.

Communication of Significant Deficiencies in Internal Control to Management (Ref: Para. 10(a))

A20. Certain identified significant deficiencies in internal control may call into question the integrity or competence of management. For example, there may be evidence of fraud or intentional non-compliance with laws and regulations by management, or management may exhibit an inability to oversee the preparation of adequate financial statements that may raise doubt about management's competence. Accordingly, it may not be appropriate to communicate such deficiencies directly to management.

I.188 Auditing Pronouncements

A21. SA 250 establishes requirements and provides guidance on the reporting of identified or suspected non-compliance with laws and regulations, including when those charged with governance are themselves involved in such non-compliance³³. SA 240 establishes requirements and provides guidance regarding communication to those charged with governance when the auditor has identified fraud or suspected fraud involving management³⁴.

Communication of Other Deficiencies in Internal Control to Management (Ref: Para. 10(b))

A22. During the audit, the auditor may identify other deficiencies in internal control that are not significant deficiencies but that may be of sufficient importance to merit management's attention. The determination as to which other deficiencies in internal control merit management's attention is a matter of professional judgment in the circumstances, taking into account the likelihood and potential magnitude of misstatements that may arise in the financial statements as a result of those deficiencies.

A23. The communication of other deficiencies in internal control that merit management's attention need not be in writing but may be oral. Where the auditor has discussed the facts and circumstances of the auditor's findings with management, the auditor may consider an oral communication of the other deficiencies to have been made to management at the time of these discussions. Accordingly, a formal communication need not be made subsequently.

A24. If the auditor has communicated deficiencies in internal control other than significant deficiencies to management in a prior period and management has chosen not to remedy them for cost or other reasons, the auditor need not repeat the communication in the current period. The auditor is also not required to repeat information about such deficiencies if it has been previously communicated to management by other parties, such as internal auditors or regulators. It may, however, be appropriate for the auditor to re-communicate these other deficiencies if there has been a change of management, or if new information has come to the auditor's attention that alters the prior understanding of the auditor and management regarding the deficiencies. Nevertheless, the failure of management to remedy other deficiencies in internal control that were previously communicated may become a significant deficiency requiring communication with those charged with governance. Whether this is the case depends on the auditor's judgment in the circumstances.

A25. In some circumstances, those charged with governance may wish to be made aware of the details of other deficiencies in internal control the auditor has communicated to management, or be briefly informed of the nature of the other deficiencies. Alternatively, the auditor may consider it appropriate to inform those charged with governance of the communication of the other deficiencies to management. In either case, the auditor may report orally or in writing to those charged with governance as appropriate.

A26. SA 260 establishes relevant considerations regarding communication with those charged with governance when all of them are involved in managing the entity³⁵.

A27. In the case of certain entities, such as, Central/State governments and related government entities (for example, agencies, boards, commissions), the auditors may have additional responsibilities to communicate deficiencies in internal control that the auditor has identified during the audit, in ways, at a level of detail and to parties not envisaged in this SA. For example, significant deficiencies may have to be communicated to the legislature or other governing body. Law, regulation or other authority may also mandate that the auditors report deficiencies in internal control, irrespective of the significance of the potential effects of those deficiencies. Further, legislation may require the auditors to report on broader internal control-related matters than the deficiencies in internal control required to be communicated by this SA, for example, controls related

³³ SA 250, Consideration of Laws and Regulations in an Audit of Financial Statements, paragraphs 22-28.

³⁴ SA 240, "The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements," paragraph 41.

³⁵ SA 260, paragraph 9.

to compliance with legislative authorities, regulations, or provisions of contracts or grant agreements.

Content of Written Communication of Significant Deficiencies in Internal Control (Ref: Para. 11)

A28. In explaining the potential effects of the significant deficiencies, the auditor need not quantify those effects. The significant deficiencies may be grouped together for reporting purposes where it is appropriate to do so. The auditor may also include in the written communication suggestions for remedial action on the deficiencies, management's actual or proposed responses, and a statement as to whether or not the auditor has undertaken any steps to verify whether management's responses have been implemented.

A29. The auditor may consider it appropriate to include the following information as additional context for the communication:

- An indication that if the auditor had performed more extensive procedures on internal control, the auditor might have identified more deficiencies to be reported, or concluded that some of the reported deficiencies need not, in fact, have been reported.
- An indication that such communication has been provided for the purposes of those charged with governance, and that it may not be suitable for other purposes.

A30. Law or regulation may require the auditor or management to furnish a copy of the auditor's written communication on significant deficiencies to appropriate regulatory authorities. Where this is the case, the auditor's written communication may identify such regulatory authorities.

Material Modifications to ISA 265, "Communicating Deficiencies in Internal Control to Those Charged with Governance and Management"

Deletions

1 Paragraph A7 of ISA 265 provides the examples of the indicators of significant deficiencies in internal control which may include restatement of previously issued financial statements to reflect the correction of a material misstatement due to error or fraud. Since in India Accounting Standard (AS) 5, "Net Profit or Loss for the Period, Prior Period Items and Changes in Accounting Policies" requires that prior period items should be separately disclosed in the Statement of Profit and Loss in a manner that their impact on the current profit or loss can be perceived, the restatement of the prior period financial statements does not exist in the Indian scenario. Hence, to align with the requirements of AS 5, the requirement of restatement of prior period items has been replaced with the requirement to disclose the prior period items in the current year's Statement of Profit & Loss.

2. Paragraph A27 of ISA 265 deals with the additional responsibilities of the public sector auditors to communicate/report deficiencies in internal control to the legislature or governing body. Since as mentioned in the "Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services", the Standards issued by the Auditing and Assurance Standards Board, apply equally to all entities, irrespective of their form, nature and size, a specific reference to applicability of the Standard to public sector entities has been deleted.

Further, it is also possible that such additional responsibilities may also be imposed on the auditor in case of non public sector entities pursuant to a requirement under the statute or regulation under which they operate. Accordingly, the spirit of erstwhile A22, highlighting the fact, has been retained though a specific reference to public sector entities has been deleted.

SA 299

Responsibility of Joint Auditors
*(Effective for all audits relating to
accounting periods beginning on or after April 1, 1996)*

Introduction

1. The practice of appointing more than one auditor to conduct the audit of large entities is in vogue these days. Such auditors, known as joint auditors, conduct the audit jointly and report on the financial statements of the entity. This Standard deals with the professional responsibilities which the auditors undertake in accepting such appointments as joint auditors. The Standard does not deal with the relationship between a principal auditor who is appointed to report on the financial statements of an entity and another auditor who is appointed to report on the financial statements of one or more divisions or branches included in the financial statements of the entity, e.g., the relationship between a company auditor appointed under section 224 of the Companies Act, 1956 and a branch auditor appointed under section 228 of the said Act.¹

Division of Work

2. Where joint auditors are appointed, they should, by mutual discussion, divide the audit work among themselves. The division of work would usually be in terms of audit of identifiable units or specified areas. In some cases, due to the nature of the business of the entity under audit, such a division of work may not be possible. In such situations, the division of work may be with reference to items of assets or liabilities or income or expenditure or with reference to periods of time. Certain areas of work, owing to their importance or owing to the nature of the work involved, would often not be divided and would be covered by all the joint auditors.

3. The division of work among joint auditors as well as the areas of work to be covered by all of them should be adequately documented and preferably communicated to the entity.

Coordination

4. Where, in the course of his work, a joint auditor comes across matters which are relevant to the areas of responsibility of other joint auditors and which deserve their attention, or which require disclosure or require discussion with, or application of judgement by, other joint auditors, he should communicate the same to all the other joint auditors in writing. This should be done by the submission of a report or note prior to the finalisation of the audit.

Relationship Among Joint Auditors

5. In respect of audit work divided among the joint auditors, each joint auditor is responsible only for the work allocated to him, whether or not he has prepared a separate report on the work performed by him. On the other hand, all the joint auditors are jointly and severally responsible –

- (a) in respect of the audit work which is not divided among the joint auditors and is carried out by all of them;
- (b) in respect of decisions taken by all the joint auditors concerning the nature, timing or extent of the audit procedures to be performed by any of the joint auditors. It may, however, be clarified that all the joint auditors are responsible only in respect of the appropriateness of the decisions concerning the nature,

¹ These aspects have been dealt with in Standard on Auditing (SA) 600, "Using the Work of Another Auditor".

timing or extent of the audit procedures agreed upon among them; proper execution of these audit procedures is the separate and specific responsibility of the joint auditor concerned;

- (c) in respect of matters which are brought to the notice of the joint auditors by any one of them and on which there is an agreement among the joint auditors;
- (d) for examining that the financial statements of the entity comply with the disclosure requirements of the relevant statute; and
- (e) for ensuring that the audit report complies with the requirements of the relevant statute.

6. If any matters of the nature referred to in paragraph 4 above are brought to the attention of the entity or other joint auditors by an auditor after the audit report has been submitted, the other joint auditors would not be responsible for those matters.

7. Subject to paragraph 5(b) above, it is the responsibility of each joint auditor to determine the nature, timing and extent of audit procedures to be applied in relation to the area of work allocated to him. The issues such as appropriateness of using test checks or sampling should be decided by each joint auditor in relation to his own area of work. This responsibility is not shared by the other joint auditors. Thus, it is the separate and specific responsibility of each joint auditor to study and evaluate the prevailing system of internal control relating to the work allocated to him. Similarly, the nature, timing and extent of the enquiries to be made in the course of audit as well as the other audit procedures to be applied are solely the responsibility of each joint auditor.

8. In the case of audit of a large entity with several branches, including those required to be audited by branch auditors, the branch audit reports/returns may be required to be scrutinised by different joint auditors in accordance with the allocation of work. In such cases, it is the specific and separate responsibility of each joint auditor to review the audit reports/returns of the divisions/branches allocated to him and to ensure that they are properly incorporated into the accounts of the entity. In respect of the branches which do not fall within any divisions or zones which are separately assigned to the various joint auditors, they may agree among themselves as regards the division of work relating to the review of such branch returns. It is also the separate and specific responsibility of each joint auditor to exercise his judgement with regard to the necessity of visiting such divisions/branches in respect of which the work is allocated to him.

9. A significant part of the audit work involves obtaining and evaluating information and explanations from the management. This responsibility is shared by all the joint auditors unless they agree upon a specific pattern of distribution of this responsibility. In cases where specific divisions, zones or units are allocated to different joint auditors, it is the separate and specific responsibility of each joint auditor to obtain appropriate information and explanations from the management in respect of such divisions/zones/units and to evaluate the information and explanations so obtained by him.

10. Each joint auditor is entitled to assume that the other joint auditors have carried out their part of the audit work in accordance with the generally accepted audit procedures.² It is not necessary for a joint auditor to review the work performed by other joint auditors or perform any tests in order to ascertain whether the work has actually been performed in such a manner. Each joint auditor is entitled to rely upon the other joint auditors for bringing to his notice any departure from generally accepted accounting principles or any material error noticed in the course of the audit.

11. Where separate financial statements of a division/branch are audited by one of the joint auditors, the other joint auditors are entitled to proceed on the basis that such financial statements comply with all the

² Reference may be made in this regard to the Standards on Auditing and other mandatory Statements relating to auditing matters issued by the Council of the Institute from time to time.

I.192 Auditing Pronouncements

legal and professional requirements regarding the disclosures to be made and present a true and fair view of the state of affairs and of the working results of the division/branch concerned, subject to such observations as may be communicated by the joint auditor concerned.

Reporting Responsibilities

12. Normally, the joint auditors are able to arrive at an agreed report. However, where the joint auditors are in disagreement with regard to any matters to be covered by the report, each one of them should express his own opinion through a separate report. A joint auditor is not bound by the views of the majority of the joint auditors regarding matters to be covered in the report and should express his opinion in a separate report in case of a disagreement.

Effective Date

13. This Standard on Auditing becomes operative in respect of all audits relating to accounting periods beginning on or after April 1, 1996.

SA 300*

Planning an Audit of Financial Statements
*(Effective for audits of financial statements
for periods beginning on or after April 1, 2008)*

Introduction

Scope of this SA

1. This Standard on Auditing (SA) deals with the auditor's responsibility to plan an audit of financial statements. This SA is framed in the context of recurring audits. Additional considerations in initial audit engagements are separately identified. (Ref: Para. A1-A4)

Effective Date

2. This SA is effective for audits of financial statements for periods beginning on or after 1st April 2008.

Objective

3. The objective of the auditor is to plan the audit so that it will be performed in an effective manner.

Requirements

Involvement of Key Engagement Team Members

4. The engagement partner and other key members of the engagement team shall be involved in planning the audit, including planning and participating in the discussion among engagement team members. (Ref: Para. A5)

Preliminary Engagement Activities

5. The auditor shall undertake the following activities at the beginning of the current audit engagement:
- (a) Performing procedures required by SA 220¹, "Quality Control for an Audit of Financial Statements" regarding the continuance of the client relationship and the specific audit engagement;
 - (b) Evaluating compliance with ethical requirements, including independence, as required by SA 220²; and
 - (c) Establishing an understanding of the terms of the engagement, as required by SA 210³. (Ref: Para. A6-A8)

Planning Activities

6. The auditor shall establish an overall audit strategy that sets the scope, timing and direction of the audit, and that guides the development of the audit plan.
7. In establishing the overall audit strategy, the auditor shall:
- (a) Identify the characteristics of the engagement that define its scope;

*Published in December, 2007 issue of the Journal.

¹ SA 220, paragraph 12-13.

² SA 220, paragraph 9-11.

³ SA 210, "Agreeing the Terms of Audit Engagements," paragraphs 9-13.

I.194 Auditing Pronouncements

- (b) *Ascertain the reporting objectives of the engagement to plan the timing of the audit and the nature of the communications required;*
 - (c) *Consider the factors that, in the auditor's professional judgment, are significant in directing the engagement team's efforts;*
 - (d) *Consider the results of preliminary engagement activities and, where applicable, whether knowledge gained on other engagements performed by the engagement partner for the entity is relevant; and*
 - (e) *Ascertain the nature, timing and extent of resources necessary to perform the engagement. (Ref: Para. A9-A12)*
8. *The auditor shall develop an audit plan that shall include a description of:*
- (a) *The nature, timing and extent of planned risk assessment procedures, as determined under SA 315 "Identifying and Assessing the Risks of Material Misstatement through Understanding the Entity and Its Environment".*
 - (b) *The nature, timing and extent of planned further audit procedures at the assertion level, as determined under SA 330 "The Auditor's Responses to Assessed Risks".*
 - (c) *Other planned audit procedures that are required to be carried out so that the engagement complies with SAs. (Ref: Para. A13)*
9. *The auditor shall update and change the overall audit strategy and the audit plan as necessary during the course of the audit. (Ref: Para. A14)*
10. *The auditor shall plan the nature, timing and extent of direction and supervision of engagement team members and the review of their work. (Ref: Para. A15-A16)*

Documentation

11. *The auditor shall document:*
- (a) *The overall audit strategy;*
 - (b) *The audit plan; and*
 - (c) *Any significant changes made during the audit engagement to the overall audit strategy or the audit plan, and the reasons for such changes. (Ref: Para. A17-A20)*

Additional Considerations in Initial Audit Engagements

12. *The auditor shall undertake the following activities prior to starting an initial audit:*
- (a) *Performing procedures required by SA 220 regarding the acceptance of the client relationship and the specific audit engagement⁴; and*
 - (b) *Communicating with the predecessor auditor, where there has been a change of auditors, in compliance with relevant ethical requirements. (Ref: Para. A21)*

Application and Other Explanatory Material

The Role and Timing of Planning (Ref: Para. 1)

A1. *Planning an audit involves establishing the overall audit strategy for the engagement and developing an audit plan. Adequate planning benefits the audit of financial statements in several ways, including the following:*

- *Helping the auditor to devote appropriate attention to important areas of the audit.*
- *Helping the auditor identify and resolve potential problems on a timely basis.*

⁴ SA 220, paragraphs 12-13.

- Helping the auditor properly organize and manage the audit engagement so that it is performed in an effective and efficient manner.
- Assisting in the selection of engagement team members with appropriate levels of capabilities and competence to respond to anticipated risks, and the proper assignment of work to them.
- Facilitating the direction and supervision of engagement team members and the review of their work.
- Assisting, where applicable, in coordination of work done by auditors of components and experts.

A2. The nature and extent of planning activities will vary according to the size and complexity of the entity, the key engagement team members' previous experience with the entity, and changes in circumstances that occur during the audit engagement.

A3. Planning is not a discrete phase of an audit, but rather a continual and iterative process that often begins shortly after (or in connection with) the completion of the previous audit and continues until the completion of the current audit engagement. Planning, however, includes consideration of the timing of certain activities and audit procedures that need to be completed prior to the performance of further audit procedures. For example, planning includes the need to consider, prior to the auditor's identification and assessment of the risks of material misstatement, such matters as:

- The analytical procedures to be applied as risk assessment procedures.
- Obtaining a general understanding of the legal and regulatory framework applicable to the entity and how the entity is complying with that framework.
- The determination of materiality.
- The involvement of experts.
- The performance of other risk assessment procedures.

A4. The auditor may decide to discuss elements of planning with the entity's management to facilitate the conduct and management of the audit engagement (for example, to coordinate some of the planned audit procedures with the work of the entity's personnel). Although these discussions often occur, the overall audit strategy and the audit plan remain the auditor's responsibility. When discussing matters included in the overall audit strategy or audit plan, care is required in order not to compromise the effectiveness of the audit. For example, discussing the nature and timing of detailed audit procedures with management may compromise the effectiveness of the audit by making the audit procedures too predictable.

Involvement of Key Engagement Team Members (Ref: Para. 4)

A5. The involvement of the engagement partner and other key members of the engagement team in planning the audit draws on their experience and insight, thereby enhancing the effectiveness and efficiency of the planning process⁵.

Preliminary Engagement Activities (Ref: Para. 5)

A6. Performing the preliminary engagement activities specified in paragraph 5 at the beginning of the current audit engagement assists the auditor in identifying and evaluating events or circumstances that may adversely affect the auditor's ability to plan and perform the audit engagement.

A7. Performing these preliminary engagement activities enables the auditor to plan an audit engagement

⁵ SA 315, "Identifying and Assessing the Risks of Material Misstatement Through Understanding the Entity and Its Environment", paragraph 10, establishes requirements and provides guidance on the engagement team's discussion of the susceptibility of the entity to material misstatements of the financial statements. SA 240, "The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements", paragraph 15 provides guidance on the emphasis given during this discussion to the susceptibility of the entity's financial statements to material misstatement due to fraud.

I.196 Auditing Pronouncements

for which, for example:

- The auditor maintains the necessary independence and ability to perform the engagement.
- There are no issues with management integrity that may affect the auditor's willingness to continue the engagement.
- There is no misunderstanding with the client as to the terms of the engagement.

A8. The auditor's consideration of client continuance and ethical requirements, including independence, occurs throughout the audit engagement as changes in conditions and circumstances occur. Performing initial procedures on both client continuance and evaluation of ethical requirements (including independence) at the beginning of the current audit engagement means that they are completed prior to the performance of other significant activities for the current audit engagement. For continuing audit engagements, such initial procedures often occur shortly after (or in connection with) the completion of the previous audit.

Planning Activities

The Overall Audit Strategy (Ref: Para. 6-7)

A9. The process of establishing the overall audit strategy assists the auditor to determine, subject to the completion of the auditor's risk assessment procedures, such matters as:

- The resources to deploy for specific audit areas, such as the use of appropriately experienced team members for high risk areas or the involvement of experts on complex matters;
- The amount of resources to allocate to specific audit areas, such as the number of team members assigned to observe the inventory count at material locations, the extent of review of other auditors' work in the case of group audits, or the audit budget in hours to allocate to high risk areas;
- When these resources are to be deployed, such as whether at an interim audit stage or at key cut-off dates; and
- How such resources are managed, directed and supervised, such as when team briefing and debriefing meetings are expected to be held, how engagement partner and manager reviews are expected to take place (for example, on-site or off-site), and whether to complete engagement quality control reviews.

A10. The Appendix lists examples of considerations in establishing the overall audit strategy.

A11. Once the overall audit strategy has been established, an audit plan can be developed to address the various matters identified in the overall audit strategy, taking into account the need to achieve the audit objectives through the efficient use of the auditor's resources. The establishment of the overall audit strategy and the detailed audit plan are not necessarily discrete or sequential processes, but are closely inter-related since changes in one may result in consequential changes to the other.

Considerations Specific to Smaller Entities

A12. In audits of small entities, the entire audit may be conducted by a very small audit team. Many audits of small entities involve the engagement partner (who may be a sole practitioner) working with one engagement team member (or without any engagement team members). With a smaller team, co-ordination of, and communication between, team members are easier. Establishing the overall audit strategy for the audit of a small entity need not be a complex or time-consuming exercise; it varies according to the size of the entity, the complexity of the audit, and the size of the engagement team. For example, a brief memorandum prepared at the completion of the previous audit, based on a review of the working papers and highlighting issues identified in the audit just completed, updated in the current period based on discussions with the owner-manager, can serve as the documented audit strategy for the current audit engagement if it covers the matters noted in paragraph 7.

The Audit Plan (Ref: Para. 8)

A13. The audit plan is more detailed than the overall audit strategy that includes the nature, timing and extent of audit procedures to be performed by engagement team members. Planning for these audit procedures takes place over the course of the audit as the audit plan for the engagement develops. For example, planning of the auditor's risk assessment procedures occurs early in the audit process. However, planning the nature, timing and extent of specific further audit procedures depends on the outcome of those risk assessment procedures. In addition, the auditor may begin the execution of further audit procedures for some classes of transactions, account balances and disclosures before planning all remaining further audit procedures.

Changes to Planning Decisions During the Course of the Audit (Ref: Para. 9)

A14. As a result of unexpected events, changes in conditions, or the audit evidence obtained from the results of audit procedures, the auditor may need to modify the overall audit strategy and audit plan and thereby the resulting planned nature, timing and extent of further audit procedures, based on the revised consideration of assessed risks. This may be the case when information comes to the auditor's attention that differs significantly from the information available when the auditor planned the audit procedures. For example, audit evidence obtained through the performance of substantive procedures may contradict the audit evidence obtained through tests of controls.

Direction, Supervision and Review (Ref: Para. 10)

A15. The nature, timing and extent of the direction and supervision of engagement team members and review of their work vary depending on many factors, including:

- The size and complexity of the entity.
- The area of the audit.
- The assessed risks of material misstatement (for example, an increase in the assessed risk of material misstatement for a given area of the audit ordinarily requires a corresponding increase in the extent and timeliness of direction and supervision of engagement team members, and a more detailed review of their work).
- The capabilities and competence of the individual team members performing the audit work.

SA 220 contains further guidance on the direction, supervision and review of audit work⁶.

Considerations Specific to Smaller Entities

A16. When an audit is carried out entirely by the engagement partner, questions of direction and supervision of engagement team members and review of their work do not arise. In such cases, the engagement partner, having personally conducted all aspects of the work, will be aware of all material issues. Forming an objective view on the appropriateness of the judgments made in the course of the audit can present practical problems when the same individual also performs the entire audit. When particularly complex or unusual issues are involved, and the audit is performed by a sole practitioner, it may be desirable to consult with other suitably-experienced auditors or the auditor's professional body⁷.

Documentation (Ref: Para. 11)

A17. The documentation of the overall audit strategy is a record of the key decisions considered necessary to properly plan the audit and to communicate significant matters to the engagement team. For example, the

⁶ SA 220, paragraphs 15-17.

⁷ In India, the Institute of Chartered Accountants of India governs the accountancy profession to provide services of high quality in the public interest which are accepted worldwide.

I.198 Auditing Pronouncements

auditor may summarize the overall audit strategy in the form of a memorandum that contains key decisions regarding the overall scope, timing and conduct of the audit.

A18. The documentation of the audit plan is a record of the planned nature, timing and extent of risk assessment procedures and further audit procedures at the assertion level in response to the assessed risks. It also serves as a record of the proper planning of the audit procedures that can be reviewed and approved prior to their performance. The auditor may use standard audit programs and/or audit completion checklists, tailored as needed to reflect the particular engagement circumstances.

A19. A record of the significant changes to the overall audit strategy and the audit plan, and resulting changes to the planned nature, timing and extent of audit procedures, explains why the significant changes were made, and the overall strategy and audit plan finally adopted for the audit. It also reflects the appropriate response to the significant changes occurring during the audit.

Considerations Specific to Smaller Entities

A20. As discussed in paragraph A12, a suitable, brief memorandum may serve as the documented strategy for the audit of a smaller entity. For the audit plan, standard audit programs and/or checklists (see paragraph A18) drawn up on the assumption of few relevant control activities, as is likely to be the case in a smaller entity, may be used provided that they are tailored to the circumstances of the engagement, including the auditor's risk assessments.

Additional Considerations in Initial Audit Engagements (Ref: Para. 12)

A21. The purpose and objective of planning the audit are the same whether the audit is an initial or recurring engagement. However, for an initial audit, the auditor may need to expand the planning activities because the auditor does not ordinarily have the previous experience with the entity that is considered when planning recurring engagements. For initial audits, additional matters the auditor may consider in establishing the overall audit strategy and audit plan include the following:

- Unless prohibited by law or regulation, arrangements to be made with the predecessor auditor, for example, to review the predecessor auditor's working papers.
- Any major issues (including the application of accounting principles or of auditing and reporting standards) discussed with management in connection with the initial selection as auditor, the communication of these matters to those charged with governance and how these matters affect the overall audit strategy and audit plan.
- The audit procedures necessary to obtain sufficient appropriate audit evidence regarding opening balances (see SA 510⁸ "Initial Audit Engagements—Opening Balances").
- Other procedures required by the firm's system of quality control for initial audit engagements (for example, the firm's system of quality control may require the involvement of another partner or senior individual to review the overall audit strategy prior to commencing significant audit procedures or to review reports prior to their issuance).

Modifications to ISA 300, "Planning an Audit of Financial Statements"

SA 300, "Planning an Audit of Financial Statements" does not contain any modifications *vis a vis* ISA 300.

⁸ SA 510, "Initial Audit Engagements—Opening Balances".

Appendix

(Ref: Para. 6-7 and A9-A12)

Considerations in Establishing the Overall Audit Strategy

This appendix provides examples of matters the auditor may consider in establishing the overall audit strategy. Many of these matters will also influence the auditor's detailed audit plan. The examples provided cover a broad range of matters applicable to many engagements. While some of the matters referred to below may be required by other SAs, not all matters are relevant to every audit engagement and the list is not necessarily complete.

Characteristics of the Engagement

- The financial reporting framework on which the financial information to be audited has been prepared, including any need for reconciliations to another financial reporting framework.
- Industry-specific reporting requirements such as reports mandated by industry regulators.
- The expected audit coverage, including the number and locations of components to be included.
- The nature of the control relationships between a parent and its components that determine how the group is to be consolidated.
- The extent to which components are audited by other auditors.
- The nature of the business segments to be audited, including the need for specialized knowledge.
- The reporting currency to be used, including any need for currency translation for the financial information audited.
- The need for a statutory audit of standalone financial statements in addition to an audit for consolidation purposes.
- The availability of the work of internal auditors and the extent of the auditor's potential reliance on such work.
- The entity's use of service organizations and how the auditor may obtain evidence concerning the design or operation of controls performed by them.
- The expected use of audit evidence obtained in previous audits, for example, audit evidence related to risk assessment procedures and tests of controls.
- The effect of information technology on the audit procedures, including the availability of data and the expected use of computer-assisted audit techniques.
- The coordination of the expected coverage and timing of the audit work with any reviews of interim financial information and the effect on the audit of the information obtained during such reviews.
- The availability of client personnel and data.

Reporting Objectives, Timing of the Audit, and Nature of Communications

- The entity's timetable for reporting, such as at interim and final stages.
- The organization of meetings with management and those charged with governance to discuss the nature, timing and extent of the audit work.
- The discussion with management and those charged with governance regarding the expected type and timing of reports to be issued and other communications, both written and oral, including the auditor's report, management letters and communications to those charged with governance.
- The discussion with management regarding the expected communications on the status of audit work throughout the engagement.

I.200 Auditing Pronouncements

- Communication with auditors of components regarding the expected types and timing of reports to be issued and other communications in connection with the audit of components.
- The expected nature and timing of communications among engagement team members, including the nature and timing of team meetings and timing of the review of work performed.
- Whether there are any other expected communications with third parties, including any statutory or contractual reporting responsibilities arising from the audit.

Significant Factors, Preliminary Engagement Activities, and Knowledge Gained on Other Engagements

- The determination of materiality in accordance with SA 320⁹, and, where applicable:
 - Determination of materiality for components and communication thereof to component auditors.
 - Preliminary identification of significant components and material classes of transactions, account balances and disclosures
- Preliminary identification of areas where there may be a higher risk of material misstatement.
- The impact of the assessed risk of material misstatement at the overall financial statement level on direction, supervision and review.
- The manner in which the auditor emphasizes to engagement team members the need to maintain a questioning mind and to exercise professional skepticism in gathering and evaluating audit evidence.
- Results of previous audits that involved evaluating the operating effectiveness of internal control, including the nature of identified deficiencies and action taken to address them.
- The discussion of matters that may affect the audit with firm personnel responsible for performing other services to the entity.
- Evidence of management's commitment to the design, implementation and maintenance of sound internal control, including evidence of appropriate documentation of such internal control.
- Volume of transactions, which may determine whether it is more efficient for the auditor to rely on internal control.
- Importance attached to internal control throughout the entity to the successful operation of the business.
- Significant business developments affecting the entity, including changes in information technology and business processes, changes in key management, and acquisitions, mergers and divestments.
- Significant industry developments such as changes in industry regulations and new reporting requirements.
- Significant changes in the financial reporting framework, such as changes in accounting standards.
- Other significant relevant developments, such as changes in the legal environment affecting the entity.

Nature, Timing and Extent of Resources

- The selection of the engagement team (including, where necessary, the engagement quality control reviewer) and the assignment of audit work to the team members, including the assignment of appropriately experienced team members to areas where there may be higher risks of material misstatement.
- Engagement budgeting, including considering the appropriate amount of time to set aside for areas where there may be higher risks of material misstatement.

⁹ SA 320, "Materiality in Planning and Performing an Audit".

SA 315*

**Identifying and Assessing the Risk of Material
Misstatement through understanding the
Entity and its Environment**
*(Effective for audits of financial statements
for periods beginning on or after April 1, 2008)*

Introduction

Scope of this SA

1. This Standard on Auditing (SA) deals with the auditor's responsibility to identify and assess the risks of material misstatement in the financial statements, through understanding the entity and its environment, including the entity's internal control.

Effective Date

2. This SA is effective for audits of financial statements for periods beginning on or after April 1, 2008.

Objective

3. The objective of the auditor is to identify and assess the risks of material misstatement, whether due to fraud or error, at the financial statement and assertion levels, through understanding the entity and its environment, including the entity's internal control, thereby providing a basis for designing and implementing responses to the assessed risks of material misstatement. This will help the auditor to reduce the risk of material misstatement to an acceptably low level.

Definitions

4. For purposes of the SAs, the following terms have the meanings attributed below:

- (a) Assertions – Representations by management, explicit or otherwise, that are embodied in the financial statements, as used by the auditor to consider the different types of potential misstatements that may occur.
- (b) Business risk – A risk resulting from significant conditions, events, circumstances, actions or inactions that could adversely affect an entity's ability to achieve its objectives and execute its strategies, or from the setting of inappropriate objectives and strategies.
- (c) Internal control – The process designed, implemented and maintained by those charged with governance, management and other personnel to provide reasonable assurance about the achievement of an entity's objectives with regard to reliability of financial reporting, effectiveness and efficiency of operations, safeguarding of assets, and compliance with applicable laws and regulations. The term "controls" refers to any aspects of one or more of the components of internal control.
- (d) Risk assessment procedures – The audit procedures performed to obtain an understanding of the entity and its environment, including the entity's internal control, to identify and assess the risks of material misstatement, whether due to fraud or error, at the financial statement and assertion levels.

* Published in February, 2008 issue of the Journal.

I.202 Auditing Pronouncements

- (e) Significant risk – An identified and assessed risk of material misstatement that, in the auditor's judgment, requires special audit consideration.

Requirements

Risk Assessment Procedures and Related Activities

5. The auditor shall perform risk assessment procedures to provide a basis for the identification and assessment of risks of material misstatement at the financial statement and assertion levels. Risk assessment procedures by themselves, however, do not provide sufficient appropriate audit evidence on which to base the audit opinion. (Ref: Para. A1-A5)
6. The risk assessment procedures shall include the following:
 - (a) Inquiries of management and of others within the entity who in the auditor's judgment may have information that is likely to assist in identifying risks of material misstatement due to fraud or error. (Ref: Para. A6)
 - (b) Analytical procedures. (Ref: Para. A7-A10)
 - (c) Observation and inspection. (Ref: Para. A11)
7. The auditor shall consider whether information obtained from the auditor's client acceptance or continuance process is relevant to identifying risks of material misstatement.
8. Where the engagement partner has performed other engagements for the entity, the engagement partner shall consider whether information obtained is relevant to identifying risks of material misstatement.
9. When the auditor intends to use information obtained from the auditor's previous experience with the entity and from audit procedures performed in previous audits, the auditor shall determine whether changes have occurred since the previous audit that may affect its relevance to the current audit. (Ref: Para. A12-A13)
10. The engagement partner and other key engagement team members shall discuss the susceptibility of the entity's financial statements to material misstatement, and the application of the applicable financial reporting framework to the entity's facts and circumstances. The engagement partner shall determine which matters are to be communicated to engagement team members not involved in the discussion. (Ref: Para. A14-A16)

The Required Understanding of the Entity and Its Environment, Including the Entity's Internal Control

The Entity and Its Environment

11. The auditor shall obtain an understanding of the following:
 - (a) Relevant industry, regulatory, and other external factors including the applicable financial reporting framework. (Ref: Para. A17-A22)
 - (b) The nature of the entity, including:
 - (i) its operations;
 - (ii) its ownership and governance structures;
 - (iii) the types of investments that the entity is making and plans to make, including investments in special-purpose entities; and
 - (iv) the way that the entity is structured and how it is financed; to enable the auditor to understand the classes of transactions, account balances, and disclosures to be expected in the financial statements. (Ref: Para. A23-A27)
 - (c) The entity's selection and application of accounting policies, including the reasons for changes thereto.

The auditor shall evaluate whether the entity's accounting policies are appropriate for its business and consistent with the applicable financial reporting framework and accounting policies used in the relevant industry. (Ref: Para. A28)

- (d) The entity's objectives and strategies, and those related business risks that may result in risks of material misstatement. (Ref: Para. A29-A35)
- (e) The measurement and review of the entity's financial performance. (Ref: Para. A36-A41)

The Entity's Internal Control

12. The auditor shall obtain an understanding of internal control relevant to the audit. Although most controls relevant to the audit are likely to relate to financial reporting, not all controls that relate to financial reporting are relevant to the audit. It is a matter of the auditor's professional judgment whether a control, individually or in combination with others, is relevant to the audit. (Ref: Para. A42-A65)

Nature and Extent of the Understanding of Relevant Controls

13. When obtaining an understanding of controls that are relevant to the audit, the auditor shall evaluate the design of those controls and determine whether they have been implemented, by performing procedures in addition to inquiry of the entity's personnel. (Ref: Para. A66-A68)

Components of Internal Control

Control environment

14. The auditor shall obtain an understanding of the control environment. As part of obtaining this understanding, the auditor shall evaluate whether:

- (a) Management, with the oversight of those charged with governance, has created and maintained a culture of honesty and ethical behavior; and
- (b) The strengths in the control environment elements collectively provide an appropriate foundation for the other components of internal control, and whether those other components are not undermined by deficiencies in the control environment. (Ref: Para. A69-A78)

The entity's risk assessment process

15. The auditor shall obtain an understanding of whether the entity has a process for:

- (a) Identifying business risks relevant to financial reporting objectives;
- (b) Estimating the significance of the risks;
- (c) Assessing the likelihood of their occurrence; and
- (d) Deciding about actions to address those risks. (Ref: Para. A79)

16. If the entity has established such a process (referred to hereafter as the 'entity's risk assessment process'), the auditor shall obtain an understanding of it, and the results thereof. Where the auditor identifies risks of material misstatement that management failed to identify, the auditor shall evaluate whether there was an underlying risk of a kind that the auditor expects would have been identified by the entity's risk assessment process. If there is such a risk, the auditor shall obtain an understanding of why that process failed to identify it, and evaluate whether the process is appropriate to its circumstances or determine if there is a significant deficiency in internal control with regard to the entity's risk assessment process.

17. If the entity has not established such a process or has an ad hoc process, the auditor shall discuss with management whether business risks relevant to financial reporting objectives have been identified and how they have been addressed. The auditor shall evaluate whether the absence of a documented risk assessment process is appropriate in the circumstances, or determine whether it represents a significant

I.204 Auditing Pronouncements

deficiency in internal control. (Ref: Para. A80)

The information system, including the related business processes, relevant to financial reporting, and communication.

18. The auditor shall obtain an understanding of the information system, including the related business processes, relevant to financial reporting, including the following areas:

- (a) The classes of transactions in the entity's operations that are significant to the financial statements;
- (b) The procedures, within both information technology (IT) and manual systems, by which those transactions are initiated, recorded, processed, corrected as necessary, transferred to the general ledger and reported in the financial statements;
- (c) The related accounting records, supporting information and specific accounts in the financial statements that are used to initiate, record, process and report transactions; this includes the correction of incorrect information and how information is transferred to the general ledger. The records may be in either manual or electronic form;
- (d) How the information system captures events and conditions, other than transactions, that are significant to the financial statements;
- (e) The financial reporting process used to prepare the entity's financial statements, including significant accounting estimates and disclosures;
- (f) Controls surrounding journal entries, including non-standard journal entries used to record non-recurring, unusual transactions or adjustments. (Ref: Para. A81-A85)

19. The auditor shall obtain an understanding of how the entity communicates financial reporting roles and responsibilities and significant matters relating to financial reporting, including:

- (a) Communications between management and those charged with governance; and
- (b) External communications, such as those with regulatory authorities. (Ref: Para. A86-A87)

Control activities relevant to the audit

20. The auditor shall obtain an understanding of control activities relevant to the audit, being those the auditor judges it necessary to understand in order to assess the risks of material misstatement at the assertion level and design further audit procedures responsive to assessed risks. An audit requires an understanding of only those control activities related to significant class of transactions, account balance, and disclosure in the financial statements and the assertions which the auditor finds relevant in his risk assessment process. (Ref: Para. A88-A94)

21. In understanding the entity's control activities, the auditor shall obtain an understanding of how the entity has responded to risks arising from IT. (Ref: Para. A95-A97)

Monitoring of controls

22. The auditor shall obtain an understanding of the major activities that the entity uses to monitor internal control over financial reporting, including those related to those control activities relevant to the audit, and how the entity initiates remedial actions to deficiencies in its controls. (Ref: Para. A98-A100)

23. If the entity has an internal audit function,¹ the auditor shall obtain an understanding of the following in order to determine whether the internal audit function is likely to be relevant to the audit:

- (a) The nature of the internal audit function's responsibilities and how the internal audit function fits in the

¹ SA 610, "Using the Work of Internal Auditors", paragraph 7(a).

entity's organisational structure; and

- (b) The activities performed, or to be performed, by the internal audit function. (Ref: Para. A101-A103)
24. The auditor shall obtain an understanding of the sources of the information used in the entity's monitoring activities, and the basis upon which management considers the information to be sufficiently reliable for the purpose. (Ref: Para. A104)

Identifying and Assessing the Risks of Material Misstatement

25. The auditor shall identify and assess the risks of material misstatement at:

- (a) the financial statement level; and (Ref: Para. A105-A108)
- (b) the assertion level for classes of transactions, account balances, and disclosures; (Ref: Para. A109-A113)

to provide a basis for designing and performing further audit procedures.

26. For this purpose, the auditor shall:

- (a) Identify risks throughout the process of obtaining an understanding of the entity and its environment, including relevant controls that relate to the risks, and by considering the classes of transactions, account balances, and disclosures in the financial statements; (Ref: Para. A114-A115)
- (b) Assess the identified risks, and evaluate whether they relate more pervasively to the financial statements as a whole and potentially affect many assertions;
- (c) Relate the identified risks to what can go wrong at the assertion level, taking account of relevant controls that the auditor intends to test; and (Ref: Para. A116-A118)
- (d) Consider the likelihood of misstatement, including the possibility of multiple misstatements, and whether the potential misstatement is of a magnitude that could result in a material misstatement.

Risks that Require Special Audit Consideration

27. As part of the risk assessment as described in paragraph 25, the auditor shall determine whether any of the risks identified are, in the auditor's judgment, a significant risk. In exercising this judgment, the auditor shall exclude the effects of identified controls related to the risk.

28. In exercising judgment as to which risks are significant risks, the auditor shall consider at least the following:

- (a) Whether the risk is a risk of fraud;
- (b) Whether the risk is related to recent significant economic, accounting, or other developments like changes in regulatory environment, etc., and, therefore, requires specific attention;
- (c) The complexity of transactions;
- (d) Whether the risk involves significant transactions with related parties;
- (e) The degree of subjectivity in the measurement of financial information related to the risk, especially those measurements involving a wide range of measurement uncertainty; and
- (f) Whether the risk involves significant transactions that are outside the normal course of business for the entity, or that otherwise appear to be unusual. (Ref: Para. A119-A123)

29. When the auditor has determined that a significant risk exists, the auditor shall obtain an understanding of the entity's controls, including control activities, relevant to that risk. (Ref: Para. A124-A126)

Risks for Which Substantive Procedures Alone Do Not Provide Sufficient Appropriate Audit Evidence

I.206 Auditing Pronouncements

30. In respect of some risks, the auditor may judge that it is not possible or practicable to obtain sufficient appropriate audit evidence only from substantive procedures. Such risks may relate to the inaccurate or incomplete recording of routine and significant classes of transactions or account balances, the characteristics of which often permit highly automated processing with little or no manual intervention. In such cases, the entity's controls over such risks are relevant to the audit and the auditor shall obtain an understanding of them. (Ref: Para. A127-A129)

Revision of Risk Assessment

31. The auditor's assessment of the risks of material misstatement at the assertion level may change during the course of the audit as additional audit evidence is obtained. In circumstances where the auditor obtains audit evidence from performing further audit procedures, or if new information is obtained, either of which is inconsistent with the audit evidence on which the auditor originally based the assessment, the auditor shall revise the assessment and modify the further planned audit procedures accordingly. (Ref: Para. A130)

Documentation

32. The auditor shall document:

- (a) The discussion among the engagement team where required by paragraph 10, and the significant decisions reached;
- (b) Key elements of the understanding obtained regarding each of the aspects of the entity and its environment specified in paragraph 11 and of each of the internal control components specified in paragraphs 14-24; the sources of information from which the understanding was obtained; and the risk assessment procedures performed;
- (c) The identified and assessed risks of material misstatement at the financial statement level and at the assertion level as required by paragraph 25; and
- (d) The risks identified, and related controls about which the auditor has obtained an understanding, as a result of the requirements in paragraphs 27-30. (Ref: Para. A131-A134)

Application and Other Explanatory Material

Risk Assessment Procedures and Related Activities (Ref: Para. 5)

A1. Obtaining an understanding of the entity and its environment, including the entity's internal control (referred to hereafter as an "understanding of the entity"), is a continuous, dynamic process of gathering, updating and analysing information throughout the audit. The understanding establishes a frame of reference within which the auditor plans the audit and exercises professional judgment throughout the audit, for example, when:

- ◆ Assessing risks of material misstatement of the financial statements;
- ◆ Determining materiality in accordance with SA 320²;
- ◆ Considering the appropriateness of the selection and application of accounting policies, and the adequacy of financial statement disclosures;
- ◆ Identifying areas where special audit consideration may be necessary, for example, related party transactions, the appropriateness of management's use of the going concern assumption, or considering the business purpose of transactions;

² SA 320, "Materiality in Planning and Performing an Audit".

- ◆ Developing expectations for use when performing analytical procedures;
- ◆ Responding to the assessed risks of material misstatement, including designing and performing further audit procedures to obtain sufficient appropriate audit evidence; and
- ◆ Evaluating the sufficiency and appropriateness of audit evidence obtained, such as the appropriateness of assumptions and of management's oral and written representations.

A2. Information obtained by performing risk assessment procedures and related activities may be used by the auditor as audit evidence to support assessments of the risks of material misstatement. In addition, the auditor may obtain audit evidence about classes of transactions, account balances, or disclosures and related assertions and about the operating effectiveness of controls, even though such procedures were not specifically planned as substantive procedures or as tests of controls. The auditor also may choose to perform substantive procedures or tests of controls concurrently with risk assessment procedures because it is efficient to do so.

A3. The auditor uses professional judgment to determine the extent of the understanding required. The auditor's primary consideration is whether the understanding that has been obtained is sufficient to meet the objective stated in this SA. The depth of the overall understanding that is required by the auditor is less than that possessed by management in managing the entity.

A4. The risks to be assessed include both those due to error and those due to fraud, and both are covered by this SA. However, the significance of fraud is such that further requirements and guidance are included in SA 240³, "The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements", in relation to risk assessment procedures and related activities to obtain information that is used to identify the risks of material misstatement due to fraud.

A5. Although the auditor is required to perform all the risk assessment procedures described in paragraph 6 in the course of obtaining the required understanding of the entity (see paragraphs 11-24), the auditor is not required to perform all of them for each aspect of that understanding. Other procedures may be performed where the information to be obtained therefrom may be helpful in identifying risks of material misstatement. Examples of such procedures include:

- ◆ Reviewing information obtained from external sources such as trade and economic journals; reports by analysts, banks, or rating agencies; or regulatory or financial publications.
- ◆ Making inquiries of the entity's external legal counsel or of valuation experts that the entity has used.

Inquiries of Management and Others Within the Entity (Ref: Para. 6(a))

A6. Much of the information obtained by the auditor's inquiries is obtained from management and those responsible for financial reporting. However, the auditor may also obtain information, or a different perspective in identifying risks of material misstatement, through inquiries of others within the entity and other employees with different levels of authority. For example:

- ◆ Inquiries directed towards those charged with governance may help the auditor understand the environment in which the financial statements are prepared.
- ◆ Inquiries directed toward internal audit personnel may provide information about internal audit procedures performed during the year relating to the design and effectiveness of the entity's internal control and whether management has satisfactorily responded to findings from those procedures.
- ◆ Inquiries of employees involved in initiating, processing or recording complex or unusual transactions may help the auditor to evaluate the appropriateness of the selection and application of certain

³ SA 240, "The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements", paragraphs 12-24.

I.208 Auditing Pronouncements

accounting policies.

- ◆ Inquiries directed toward in-house legal counsel may provide information about such matters as litigation, compliance with laws and regulations, knowledge of fraud or suspected fraud affecting the entity, warranties, post-sales obligations, arrangements (such as joint ventures) with business partners and the meaning of contract terms.
- ◆ Inquiries directed towards marketing or sales personnel may provide information about changes in the entity's marketing strategies, sales trends, or contractual arrangements with its customers.

Analytical Procedures (Ref: Para. 6(b))

A7. Analytical procedures performed as risk assessment procedures may identify aspects of the entity of which the auditor was unaware and may assist in assessing the risks of material misstatement in order to provide a basis for designing and implementing responses to the assessed risks*. Analytical procedures performed as risk assessment procedures may include both financial and non-financial information, for example, the relationship between sales and square footage of selling space or volume of goods sold.

A8. Analytical procedures may help identify the existence of unusual transactions or events, and amounts, ratios, and trends that might indicate matters that have audit implications. Unusual or unexpected relationships that are identified may assist the auditor in identifying risks of material misstatement, especially risks of material misstatement due to fraud.

A9. However, when such analytical procedures use data aggregated at a high level (which may be the situation with analytical procedures performed as risk assessment procedures), the results of those analytical procedures only provide a broad initial indication about whether a material misstatement may exist. Accordingly, in such cases, consideration of other information that has been gathered when identifying the risks of material misstatement together with the results of such analytical procedures may assist the auditor in understanding and evaluating the results of the analytical procedures.

Considerations Specific to Smaller Entities

A10. Some smaller entities may not have interim or monthly financial information that can be used for purposes of analytical procedures. In these circumstances, although the auditor may be able to perform limited analytical procedures for purposes of planning the audit or obtain some information through inquiry, the auditor may need to plan to perform analytical procedures to identify and assess the risks of material misstatement when an early draft of the entity's financial statements is available.

Observation and Inspection (Ref: Para. 6(c))

A11. Observation and inspection may support inquiries of management and others, and may also provide information about the entity and its environment. Examples of such audit procedures include observation or inspection of the following:

- ◆ The entity's operations.
- ◆ Documents (such as business plans and strategies), records, and internal control manuals.
- ◆ Reports prepared by management (such as quarterly management reports and interim financial statements) and those charged with governance (such as minutes of board of directors' meetings).
- ◆ The entity's premises and plant facilities.

Information Obtained in Prior Periods (Ref: Para. 9)

A12. The auditor's previous experience with the entity and audit procedures performed in previous audits

* SA 520, "Analytical Procedures", paragraphs A1-A3 describe the nature of analytical procedures.

may provide the auditor with information about such matters as:

- ◆ Past misstatements and whether they were corrected on a timely basis.
- ◆ The nature of the entity and its environment, and the entity's internal control (including deficiencies in internal control).
- ◆ Significant changes that the entity or its operations may have undergone since the prior financial period, which may assist the auditor in gaining a sufficient understanding of the entity to identify and assess risks of material misstatement.

A13. The auditor is required to determine whether information obtained in prior periods remains relevant, if the auditor intends to use that information for the purposes of the current audit. This is because changes in the control environment, for example, may affect the relevance of information obtained in the prior year. To determine whether changes have occurred that may affect the relevance of such information, the auditor may make inquiries and perform other appropriate audit procedures, such as walk-throughs of relevant systems.

Discussion Among the Engagement Team (Ref: Para. 10)

A14. The discussion among the engagement team about the susceptibility of the entity's financial statements to material misstatement:

- ◆ Provides an opportunity for more experienced engagement team members, including the engagement partner, to share their insights based on their knowledge of the entity.
- ◆ Allows the engagement team members to exchange information about the business risks to which the entity is subject and about how and where the financial statements might be susceptible to material misstatement due to fraud or error.
- ◆ Assists the engagement team members to gain a better understanding of the potential for material misstatement of the financial statements in the specific areas assigned to them, and to understand how the results of the audit procedures that they perform may affect other aspects of the audit including the decisions about the nature, timing, and extent of further audit procedures.
- ◆ Provides a basis upon which engagement team members communicate and share new information obtained throughout the audit that may affect the assessment of risks of material misstatement or the audit procedures performed to address these risks.

SA 240 provides further requirements and guidance in relation to the discussion among the engagement team about the risks of fraud.⁴

A15. It is not always necessary or practical for the discussion to include all members in a single discussion (as, for example, in a multi-location audit), nor is it necessary for all of the members of the engagement team to be informed of all of the decisions reached in the discussion. The engagement partner may discuss matters with key members of the engagement team including, if considered appropriate, specialists and those responsible for the audits of components, while delegating discussion with others, taking account of the extent of communication considered necessary throughout the engagement team. A communications plan, agreed by the engagement partner, may be useful.

Considerations Specific to Smaller Entities

A16. Many small audits are carried out entirely by the engagement partner (who may be a sole practitioner). In such situations, it is the engagement partner who, having personally conducted the planning of the audit, would be responsible for considering the susceptibility of the entity's financial statements to material

⁴ SA 240, paragraph 15.

I.210 Auditing Pronouncements

misstatement due to fraud or error.

The Required Understanding of the Entity and Its Environment, Including the Entity's Internal Control The Entity and Its Environment

Industry, Regulatory and Other External Factors (Ref: Para. 11(a))

Industry factors

A17. Relevant industry factors include industry conditions such as the competitive environment, supplier and customer relationships, and technological developments. Examples of matters the auditor may consider include:

- ◆ The market and competition, including demand, capacity, and price competition.
- ◆ Cyclical or seasonal activity.
- ◆ Product technology relating to the entity's products.
- ◆ Energy supply and cost.

A18. The industry in which the entity operates may give rise to specific risks of material misstatement arising from the nature of the business or the degree of regulation. For example, long-term contracts may involve significant estimates of revenues and expenses that give rise to risks of material misstatement. In such cases, it is important that the engagement team include members with sufficient relevant knowledge and experience⁵.

Regulatory factors

A19. Relevant regulatory factors include the regulatory environment. The regulatory environment encompasses, among other matters, the applicable financial reporting framework and the legal and political environment. Examples of matters the auditor may consider include:

- ◆ Accounting principles and industry specific practices.
- ◆ Regulatory framework for a regulated industry.
- ◆ Legislation and regulation that significantly affect the entity's operations, including direct supervisory activities.
- ◆ Taxation (corporate and other).
- ◆ Government policies currently affecting the conduct of the entity's business, such as monetary, including foreign exchange controls, fiscal, financial incentives (for example, government aid programs), and tariffs or trade restrictions policies.
- ◆ Environmental requirements affecting the industry and the entity's business.

A20. SA 250, "Consideration of Laws and Regulations in an Audit of Financial Statements"⁶, includes some specific requirements related to the legal and regulatory framework applicable to the entity and the industry.

A21. In case of the audits of certain entities, in addition to legislation or regulations, there may be government policy requirements and resolutions of the legislature that affect the entity's operations. Such elements are essential to consider when obtaining an understanding of the entity and its environment.

Other external factors

A22. Examples of other external factors affecting the entity that the auditor may consider include the general

⁵ SA 220, "Quality Control for an Audit of Financial Statements", paragraph 14.

⁶ SA 250, "Consideration of Laws and Regulations in an Audit of Financial Statements", paragraph 10.

economic conditions, interest rates and availability of financing, and inflation or currency revaluation.

Nature of the Entity (Ref: Para.11(b))

A23. An understanding of the nature of an entity enables the auditor to understand such matters as:

- ◆ Whether the entity has a complex structure, for example with subsidiaries or other components in multiple locations. Complex structures often introduce issues that may give rise to risks of material misstatement. Such issues may include whether goodwill, joint ventures, investments, or special-purpose entities are accounted for appropriately.
- ◆ The ownership, and relations between owners and other people or entities. This understanding assists in determining whether related party transactions have been identified and accounted for appropriately. SA 550, "Related Parties"⁷, establishes requirements and provides guidance on the auditor's considerations relevant to related parties.

A24. Examples of matters that the auditor may consider when obtaining an understanding of the nature of the entity include:

- ◆ Business operations – such as:
 - Nature of revenue sources, products or services, and markets, including involvement in electronic commerce such as internet sales and marketing activities.
 - Conduct of operations (for example, stages and methods of production, or activities exposed to environmental risks).
 - Alliances, joint ventures, and outsourcing activities.
 - Geographic dispersion and industry segmentation.
 - Location of production facilities, warehouses, and offices, and location and quantities of inventories.
 - Key customers and important suppliers of goods and services, employment arrangements (including the existence of union contracts, pension and other post employment benefits, stock option or incentive bonus arrangements, and government regulation related to employment matters).
 - Research and development activities and expenditures.
 - Transactions with related parties.
- ◆ Investments and investment activities – such as:
 - Planned or recently executed acquisitions or divestitures.
 - Investments and dispositions of securities and loans.
 - Capital investment activities.
 - Investments in non-consolidated entities, including partnerships, joint ventures and special-purpose entities.
- ◆ Financing and financing activities – such as:
 - Major subsidiaries and associated entities, including consolidated and non-consolidated structures.

⁷ SA 550, "Related Parties". Reference may also be made to the Accounting Standard (AS) 18, "Related Party Disclosures" for definition of related party and related party transactions.

I.212 Auditing Pronouncements

- Debt structure and related terms, including off-balance-sheet financing arrangements and leasing arrangements.
- Beneficial owners (local, foreign, business reputation and experience) and related parties.
- Use of derivative financial instruments.
- ◆ Financial reporting – such as:
 - Accounting principles and industry - specific practices, including industry - specific significant categories (for example, loans and investments for banks, or research and development for pharmaceuticals).
 - Revenue recognition practices.
 - Accounting for fair values.
 - Foreign currency assets, liabilities and transactions.
 - Accounting for unusual or complex transactions including those in controversial or emerging areas (for example, accounting for stock-based compensation).

A25. Significant changes in the entity from prior periods may give rise to, or change, risks of material misstatement.

Nature of Special-Purpose Entities

A26. A special-purpose entity (sometimes referred to as a special purpose vehicle) is an entity that is generally established for a narrow and well-defined purpose, such as to effect a lease or a securitisation of financial assets, or to carry out research and development activities. It may take the form of a corporation, trust, partnership or unincorporated entity. The entity on behalf of which the special-purpose entity has been created may often transfer assets to the latter (e.g., as part of a de-recognition transaction involving financial assets), obtain the right to use the latter's assets, or perform services for the latter, while other parties may provide the funding to the latter. As SA 550 indicates, in some circumstances, a special-purpose entity may be a related party of the entity.⁸

A27. Financial reporting frameworks often specify detailed conditions that are deemed to amount to control, or circumstances under which the special-purpose entity should be considered for consolidation. The interpretation of the requirements of such frameworks often demands a detailed knowledge of the relevant agreements involving the special- purpose entity.

The Entity's Selection and Application of Accounting Policies (Ref: Para.11(c))

A28. An understanding of the entity's selection and application of accounting policies may encompass such matters as:

- ◆ The methods the entity uses to account for significant and unusual transactions.
- ◆ The effect of significant accounting policies in controversial or emerging areas for which there is a lack of authoritative guidance or consensus.
- ◆ Changes in the entity's accounting policies.
- ◆ Financial reporting standards and laws and regulations that are new to the entity, and when and how the entity will adopt such requirements.

Objectives and Strategies and Related Business Risks (Ref. Para.11(d))

⁸ SA 550, 'Related Parties', paragraph A7.

A29. The entity conducts its business in the context of industry, regulatory and other internal and external factors. To respond to these factors, the entity's management or those charged with governance define objectives, which are the overall plans for the entity. Strategies are the approaches by which management intends to achieve its objectives. The entity's objectives and strategies may change over time.

A30. Business risk is broader than the risk of material misstatement of the financial statements, though it includes the latter. Business risk may arise from change or complexity. A failure to recognise the need for change may also give rise to business risk. Business risk may arise, for example, from:

- ◆ The development of new products or services that may fail;
- ◆ A market which, even if successfully developed, is inadequate to support a product or service; or
- ◆ Flaws in a product or service that may result in liabilities and reputational risk.

A31. An understanding of the business risks facing the entity increases the likelihood of identifying risks of material misstatement, since most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, the auditor does not have a responsibility to identify or assess all business risks because not all business risks give rise to risks of material misstatement.

A32. Examples of matters that the auditor may consider when obtaining an understanding of the entity's objectives, strategies and related business risks that may result in a risk of material misstatement of the financial statements include:

- ◆ Industry developments (a potential related business risk might be, for example, that the entity does not have the personnel or expertise to deal with the changes in the industry).
- ◆ New products and services (a potential related business risk might be, for example, that there is increased product liability).
- ◆ Expansion of the business (a potential related business risk might be, for example, that the demand has not been accurately estimated).
- ◆ New accounting requirements (a potential related business risk might be, for example, incomplete or improper implementation, or increased costs).
- ◆ Regulatory requirements (a potential related business risk might be, for example, that there is increased legal exposure).
- ◆ Current and prospective financing requirements (a potential related business risk might be, for example, the loss of financing due to the entity's inability to meet requirements).
- ◆ Use of IT (a potential related business risk might be, for example, that systems and processes are incompatible).
- ◆ The effects of implementing a strategy, particularly any effects that will lead to new accounting requirements (a potential related business risk might be, for example, incomplete or improper implementation).

A33. A business risk may have an immediate consequence for the risk of material misstatement for classes of transactions, account balances, and disclosures at the assertion level or the financial statement level. For example, the business risk arising from a contracting customer base may increase the risk of material misstatement associated with the valuation of receivables. However, the same risk, particularly in combination with a contracting economy, may also have a longer-term consequence, which the auditor considers when assessing the appropriateness of the going concern assumption. Whether a business risk may result in a risk of material misstatement is, therefore, considered in light of the entity's circumstances. Examples of conditions and events that may indicate risks of material misstatement are indicated in the

I.214 Auditing Pronouncements

Appendix 2.

A34. Usually, management identifies business risks and develops approaches to address them. Such a risk assessment process is part of internal control and is discussed in paragraph 15 and paragraphs A79-A80.

A35. In case of audits of certain entities, “management objectives” may be influenced by concerns regarding public accountability and may include objectives which have their source in legislation, regulations, and government directions.

Measurement and Review of the Entity’s Financial Performance (Ref: Para. 11(e))

A36. Management and others will measure and review those things they regard as important. Performance measures, whether external or internal, create pressures on the entity. These pressures, in turn, may motivate management to take action to improve the business performance or to misstate the financial statements. Accordingly, an understanding of the entity’s performance measures assists the auditor in considering whether pressures to achieve performance targets may result in management actions that increase the risks of material misstatement, including those due to fraud – See SA 240 for requirements and guidance in relation to the risks of fraud.

A37. The measurement and review of financial performance is not the same as the monitoring of controls (discussed as a component of internal control in paragraphs A98-A104), though their purposes may overlap:

- ◆ The measurement and review of performance is directed at whether business performance is meeting the objectives set by management (or third parties).
- ◆ Monitoring of controls is specifically concerned with the effective operation of internal control.

In some cases, however, performance indicators also provide information that enables management to identify deficiencies in internal control.

A38. Examples of internally-generated information used by management for measuring and reviewing financial performance, and which the auditor may consider, include:

- ◆ Key performance indicators (financial and non-financial) and key ratios, trends and operating statistics.
- ◆ Period-on-period financial performance analyses.
- ◆ Budgets, forecasts, variance analyses, segment information and divisional, departmental or other level performance reports.
- ◆ Employee performance measures and incentive compensation policies.
- ◆ Comparisons of an entity’s performance with that of competitors.

A39. External parties may also measure and review the entity’s financial performance. For example, external information such as analysts’ reports and credit rating agency reports may represent useful information for the auditor. Such reports can often be obtained from the entity being audited.

A40. Internal measures may highlight unexpected results or trends requiring management to determine their cause and take corrective action (including, in some cases, the detection and correction of misstatements on a timely basis). Performance measures may also indicate to the auditor that risks of misstatement of related financial statement information do exist. For example, performance measures may indicate that the entity has unusually rapid growth or profitability when compared to that of other entities in the same industry. Such information, particularly if combined with other factors such as performance-based bonus or incentive remuneration, may indicate the potential risk of management bias in the preparation of the financial statements.

Considerations specific to smaller entities

A41. Smaller entities often do not have processes to measure and review financial performance. Inquiry of management may reveal that it relies on certain key indicators for evaluating financial performance and taking appropriate action. If such inquiry indicates an absence of performance measurement or review, there may be an increased risk of misstatements not being detected and corrected.

The Entity's Internal Control

A42. An understanding of internal control assists the auditor in identifying types of potential misstatements and factors that affect the risks of material misstatement, and in designing the nature, timing, and extent of further audit procedures.

A43. The following application material on internal control is presented in four sections, as follows:

- ◆ General Nature and Characteristics of Internal Control.
- ◆ Controls Relevant to the Audit.
- ◆ Nature and Extent of the Understanding of Relevant Controls.
- ◆ Components of Internal Control.

General Nature and Characteristics of Internal Control (Ref: Para. 12)

Purpose of internal control

A44. Internal control is designed, implemented and maintained to address identified business risks that threaten the achievement of any of the entity's objectives that concern:

- ◆ The reliability of the entity's financial reporting;
- ◆ The effectiveness and efficiency of its operations;
- ◆ Its compliance with applicable laws and regulations; and
- ◆ Safeguarding of assets.

The way in which internal control is designed, implemented and maintained varies with an entity's size and complexity.

Considerations specific to smaller entities

A45. Smaller entities may use less structured means and simpler processes and procedures to achieve their objectives.

Limitations of internal control

A46. Internal control, no matter how effective, can provide an entity with only reasonable assurance about achieving the entity's financial reporting objectives. The likelihood of their achievement is affected by inherent limitations of internal control. These include the realities that human judgment in decision-making can be faulty and that breakdowns in internal control can occur because of human error. For example, there may be an error in the design of, or in the change to, a control. Equally, the operation of a control may not be effective, such as where information produced for the purposes of internal control (for example, an exception report) is not effectively used because the individual responsible for reviewing the information does not understand its purpose or fails to take appropriate action.

A47. Additionally, controls can be circumvented by the collusion of two or more people or inappropriate management override of internal control. For example, management may enter into side agreements with customers that alter the terms and conditions of the entity's standard sales contracts, which may result in improper revenue recognition. Also, edit checks in a software program that are designed to identify and report transactions that exceed specified credit limits may be overridden or disabled.

I.216 Auditing Pronouncements

A48. Further, in designing and implementing controls, management may make judgments on the nature and extent of the controls it chooses to implement, and the nature and extent of the risks it chooses to assume.

Considerations specific to smaller entities

A49. Smaller entities often have fewer employees which may limit the extent to which segregation of duties is practicable. However, in a small owner-managed entity, the owner-manager⁹ may be able to exercise more effective oversight than in a larger entity. This oversight may compensate for the generally more limited opportunities for segregation of duties.

A50. On the other hand, the owner-manager may be more able to override controls because the system of internal control is less structured. This is taken into account by the auditor when identifying the risks of material misstatement due to fraud.

Division of internal control into components

A51. The division of internal control into the following five components, for purposes of the SAs, provides a useful framework for auditors to consider how different aspects of an entity's internal control may affect the audit:

- (a) The control environment;
- (b) The entity's risk assessment process;
- (c) The information system, including the related business processes, relevant to financial reporting, and communication;
- (d) Control activities; and
- (e) Monitoring of controls.

The division does not necessarily reflect how an entity designs, implements and maintains internal control, or how it may classify any particular component. Auditors may use different terminology or frameworks to describe the various aspects of internal control, and their effect on the audit than those used in this SA, provided all the components described in this SA are addressed.

A52. Application material relating to the five components of internal control as they relate to a financial statement audit is set out in paragraphs A69-A104 below. Appendix 1 provides further explanation of these components of internal control.

Characteristics of manual and automated elements of internal control relevant to the auditor's risk assessment

A53. An entity's system of internal control contains manual elements and often contains automated elements. The characteristics of manual or automated elements are relevant to the auditor's risk assessment and further audit procedures based thereon.

A54. The use of manual or automated elements in internal control also affects the manner in which transactions are initiated, recorded, processed, and reported:

- ◆ Controls in a manual system may include such procedures as approvals and reviews of transactions, and reconciliations and follow-up of reconciling items. Alternatively, an entity may use automated procedures to initiate, record, process, and report transactions, in which case records in electronic format replace paper documents.
- ◆ Controls in IT systems consist of a combination of automated controls (for example, controls embedded in computer programs) and manual controls. Further, manual controls may be independent

⁹ Owner-manager refers to the proprietor of an entity who is involved in running the entity on a day-to-day basis.

of IT, may use information produced by IT, or may be limited to monitoring the effective functioning of IT and of automated controls, and to handling exceptions. When IT is used to initiate, record, process or report transactions, or other financial data for inclusion in financial statements, the systems and programs may include controls related to the corresponding assertions for material accounts or may be critical to the effective functioning of manual controls that depend on IT.

An entity's mix of manual and automated elements in internal control varies with the nature and complexity of the entity's use of IT.

A55. Generally, IT benefits an entity's internal control by enabling an entity to:

- ◆ Consistently apply predefined business rules and perform complex calculations in processing large volumes of transactions or data;
- ◆ Enhance the timeliness, availability, and accuracy of information;
- ◆ Facilitate the additional analysis of information;
- ◆ Enhance the ability to monitor the performance of the entity's activities and its policies and procedures;
- ◆ Reduce the risk that controls will be circumvented; and
- ◆ Enhance the ability to achieve effective segregation of duties by implementing security controls in applications, databases, and operating systems.

A56. IT also poses specific risks to an entity's internal control, including, for example:

- ◆ Reliance on systems or programs that are inaccurately processing data, processing inaccurate data, or both.
- ◆ Unauthorised access to data that may result in destruction of data or improper changes to data, including the recording of unauthorised or non-existent transactions, or inaccurate recording of transactions. Particular risks may arise where multiple users access a common database.
- ◆ The possibility of IT personnel gaining access privileges beyond those necessary to perform their assigned duties thereby breaking down segregation of duties.
- ◆ Unauthorised changes to data in master files.
- ◆ Unauthorised changes to systems or programs.
- ◆ Failure to make necessary changes to systems or programs.
- ◆ Inappropriate manual intervention.
- ◆ Potential loss of data or inability to access data as required.

A57. Manual elements in internal control may be more suitable where judgment and discretion are required such as for the following circumstances:

- ◆ Large, unusual or non-recurring transactions.
- ◆ Circumstances where errors are difficult to define, anticipate or predict.
- ◆ In changing circumstances that require a control response outside the scope of an existing automated control.
- ◆ In monitoring the effectiveness of automated controls.

A58. Manual elements in internal control may be less reliable than automated elements because they can be more easily bypassed, ignored, or overridden and they are also more prone to simple errors and mistakes. Consistency of application of a manual control element cannot therefore be assumed. Manual control elements may be less suitable for the following circumstances:

I.218 Auditing Pronouncements

- ◆ High volume or recurring transactions, or in situations where errors that can be anticipated or predicted can be prevented, or detected and corrected, by control parameters that are automated.
- ◆ Control activities where the specific ways to perform the control can be adequately designed and automated.

A59. The extent and nature of the risks to internal control vary depending on the nature and characteristics of the entity's information system. The entity responds to the risks arising from the use of IT or from use of manual elements in internal control by establishing effective controls in light of the characteristics of the entity's information system.

Controls Relevant to the Audit

A60. There is a direct relationship between an entity's objectives and the controls it implements to provide reasonable assurance about their achievement. The entity's objectives, and therefore controls, relate to financial reporting, operations and compliance; however, not all of these objectives and controls are relevant to the auditor's risk assessment.

A61. Factors relevant to the auditor's judgment about whether a control, individually or in combination with others, is relevant to the audit may include such matters as the following:

- ◆ Materiality.
- ◆ The significance of the related risk.
- ◆ The size of the entity.
- ◆ The nature of the entity's business, including its organisation and ownership characteristics.
- ◆ The diversity and complexity of the entity's operations.
- ◆ Applicable legal and regulatory requirements.
- ◆ The circumstances and the applicable component of internal control.
- ◆ The nature and complexity of the systems that are part of the entity's internal control, including the use of service organisations.
- ◆ Whether, and how, a specific control, individually or in combination with others, prevents, or detects and corrects, material misstatement.

A62. Controls over the completeness and accuracy of information produced by the entity may be relevant to the audit if the auditor intends to make use of the information in designing and performing further procedures. For example, in auditing revenue by applying standard prices to records of sales volume, the auditor considers the accuracy of the price information and the completeness and accuracy of the sales volume data. Controls relating to operations and compliance objectives may also be relevant to an audit if they relate to data the auditor evaluates or uses in applying audit procedures.

A63. Internal control over safeguarding of assets against unauthorised acquisition, use, or disposition may include controls relating to both financial reporting and operations objectives. The auditor's consideration of such controls is generally limited to those relevant to the reliability of financial reporting. For example, use of access controls, such as passwords, that limit access to the data and programs that process cash disbursements may be relevant to a financial statement audit. Conversely, safeguarding controls relating to operations objectives, such as controls to prevent the excessive use of materials in production, generally are not relevant to a financial statement audit.

A64. An entity generally has controls relating to objectives that are not relevant to an audit and therefore need not be considered. For example, an entity may rely on a sophisticated system of automated controls to provide efficient and effective operations (such as an airline's system of automated controls to maintain flight

schedules), but these controls ordinarily would not be relevant to the audit. Further, although internal control applies to the entire entity or to any of its operating units or business processes, an understanding of internal control relating to each of the entity's operating units and business processes may not be relevant to the audit.

A65. In certain circumstances, the statute or the regulation governing the entity may require the auditor to report on compliance with certain specific aspects of internal controls as a result, the auditor's review of internal control may be broader and more detailed.

Nature and Extent of the Understanding of Relevant Controls (Ref: Para. 13)

A66. Evaluating the design of a control involves considering whether the control, individually or in combination with other controls, is capable of effectively preventing, or detecting and correcting, material misstatements. Implementation of a control means that the control exists and that the entity is using it. There is little point in assessing the implementation of a control that is not effective, and so the design of a control is considered first. An improperly designed control may represent a significant deficiency in internal control.

A67. Risk assessment procedures to obtain audit evidence about the design and implementation of relevant controls may include:

- ◆ Inquiring of entity personnel.
- ◆ Observing the application of specific controls.
- ◆ Inspecting documents and reports.
- ◆ Tracing transactions through the information system relevant to financial reporting.

Inquiry alone, however, is not sufficient for such purposes.

A68. Obtaining an understanding of an entity's controls is not sufficient to test their operating effectiveness, unless there is some automation that provides for the consistent operation of the controls. For example, obtaining audit evidence about the implementation of a manual control at a point in time does not provide audit evidence about the operating effectiveness of the control at other times during the period under audit. However, because of the inherent consistency of IT processing (see paragraph A55), performing audit procedures to determine whether an automated control has been implemented may serve as a test of that control's operating effectiveness, depending on the auditor's assessment and testing of controls such as those over program changes. Tests of the operating effectiveness of controls are further described in SA 330, "The Auditor's Responses to Assessed Risks".

Components of Internal Control—Control Environment (Ref: Para. 14)

A69. The control environment includes the governance and management functions and the attitudes, awareness, and actions of those charged with governance and management concerning the entity's internal control and its importance in the entity. The control environment sets the tone of an organization, influencing the control consciousness of its people.

A70. Elements of the control environment that may be relevant when obtaining an understanding of the control environment include the following:

- (a) *Communication and enforcement of integrity and ethical values* – These are essential elements that influence the effectiveness of the design, administration and monitoring of controls.
- (b) *Commitment to competence* – Matters such as management's consideration of the competence levels for particular jobs and how those levels translate into requisite skills and knowledge.
- (c) *Participation by those charged with governance* – Attributes of those charged with governance

I.220 Auditing Pronouncements

such as:

- ◆ Their independence from management.
 - ◆ Their experience and stature.
 - ◆ The extent of their involvement and the information they receive, and the scrutiny of activities.
 - ◆ The appropriateness of their actions, including the degree to which difficult questions are raised and pursued with management, and their interaction with internal and external auditors.
- (d) Management's philosophy and operating style – Characteristics such as management's:
- ◆ Approach to taking and managing business risks.
 - ◆ Attitudes and actions toward financial reporting.
 - ◆ Attitudes toward information processing and accounting functions and personnel.
- (e) *Organisational structure* – The framework within which an entity's activities for achieving its objectives are planned, executed, controlled, and reviewed.
- (f) *Assignment of authority and responsibility* - Matters such as how authority and responsibility for operating activities are assigned and how reporting relationships and authorisation hierarchies are established.
- (g) *Human resource policies and practices* – Policies and practices that relate to, for example, recruitment, orientation, training, evaluation, counselling, promotion, compensation, and remedial actions.

Audit evidence for elements of the control environment

A71. Relevant audit evidence may be obtained through a combination of inquiries and other risk assessment procedures such as corroborating inquiries through observation or inspection of documents. For example, through inquiries of management and employees, the auditor may obtain an understanding of how management communicates to employees its views on business practices and ethical behavior. The auditor may then determine whether relevant controls have been implemented by considering, for example, whether management has a written code of conduct and whether it acts in a manner that supports the code.

Effect of the control environment on the assessment of the risks of material misstatement

A72. Some elements of an entity's control environment have a pervasive effect on assessing the risks of material misstatement. For example, an entity's control consciousness is influenced significantly by those charged with governance, because one of their roles is to counterbalance pressures on management in relation to financial reporting that may arise from market demands or remuneration schemes. The effectiveness of the design of the control environment in relation to participation by those charged with governance is therefore influenced by such matters as:

- ◆ Their independence from management and their ability to evaluate the actions of management.
- ◆ Whether they understand the entity's business transactions.
- ◆ The extent to which they evaluate whether the financial statements are prepared in accordance with the applicable financial reporting framework.

A73. An active and independent board of directors may influence the philosophy and operating style of senior management. However, other elements may be more limited in their effect. For example, although human resource policies and practices directed toward hiring competent financial, accounting, and IT personnel may reduce the risk of errors in processing financial information, they may not mitigate a strong bias by top management to overstate earnings.

A74. The existence of a satisfactory control environment can be a positive factor when the auditor assesses the risks of material misstatement. However, although it may help reduce the risk of fraud, a satisfactory control environment is not an absolute deterrent to fraud. Conversely, deficiencies in the control environment may undermine the effectiveness of controls, in particular in relation to fraud. For example, management's failure to commit sufficient resources to address IT security risks may adversely affect internal control by allowing improper changes to be made to computer programs or to data, or unauthorized transactions to be processed. As explained in SA 330, the control environment also influences the nature, timing, and extent of the auditor's further procedures¹⁰.

A75. The control environment in itself does not prevent, or detect and correct, a material misstatement. It may, however, influence the auditor's evaluation of the effectiveness of other controls (for example, the monitoring of controls and the operation of specific control activities) and thereby, the auditor's assessment of the risks of material misstatement.

Considerations specific to smaller entities

A76. The control environment within small entities is likely to differ from larger entities. For example, those charged with governance in small entities may not include an independent or outside member, and the role of governance may be undertaken directly by the owner-manager where there are no other owners. The nature of the control environment may also influence the significance of other controls, or their absence. For example, the active involvement of an owner-manager may mitigate certain of the risks arising from a lack of segregation of duties in a small business; it may, however, increase other risks, for example, the risk of override of controls.

A77. In addition, audit evidence for elements of the control environment in smaller entities may not be available in documentary form, in particular where communication between management and other personnel may be informal, yet effective. For example, small entities might not have a written code of conduct but, instead, develop a culture that emphasizes the importance of integrity and ethical behavior through oral communication and by management example.

A78. Consequently, the attitudes, awareness and actions of management or the owner-manager are of particular importance to the auditor's understanding of a smaller entity's control environment.

Components of Internal Control—The Entity's Risk Assessment Process (Ref: Para. 15)

A79. The entity's risk assessment process forms the basis for how management determines the risks to be managed. If that process is appropriate to the circumstances, including the nature, size and complexity of the entity, it assists the auditor in identifying risks of material misstatement. Whether the entity's risk assessment process is appropriate to the circumstances is a matter of judgment.

Considerations specific to smaller entities (Ref: Para. 17)

A80. There is unlikely to be an established risk assessment process in a small entity. In such cases, it is likely that management will identify risks through direct personal involvement in the business. Irrespective of the circumstances, however, inquiry about identified risks and how they are addressed by management is still necessary.

Components of Internal Control—The Information System, Including the Related Business Processes, Relevant to Financial Reporting, and Communication

The information system, including related business processes, relevant to financial reporting (Ref: Para. 18)

A81. The information system relevant to financial reporting objectives, which includes the accounting

¹⁰ SA 330, paragraphs A2-A3.

I.222 Auditing Pronouncements

system, consists of the procedures and records designed and established to:

- ◆ Initiate, record, process, and report entity transactions (as well as events and conditions) and to maintain accountability for the related assets, liabilities, and equity;
- ◆ Resolve incorrect processing of transactions, for example, automated suspense files and procedures followed to clear suspense items out on a timely basis;
- ◆ Process and account for system overrides or bypasses to controls;
- ◆ Transfer information from transaction processing systems to the general ledger;
- ◆ Capture information relevant to financial reporting for events and conditions other than transactions, such as the depreciation and amortisation of assets and changes in the recoverability of accounts receivables; and
- ◆ Ensure information required to be disclosed by the applicable financial reporting framework is accumulated, recorded, processed, summarised and appropriately reported in the financial statements.

Journal entries

A82. An entity's information system typically includes the use of standard journal entries that are required on a recurring basis to record transactions. Examples might be journal entries to record sales, purchases, and cash disbursements in the general ledger, or to record accounting estimates that are periodically made by management, such as changes in the estimate of uncollectible accounts receivable.

A83. An entity's financial reporting process also includes the use of non-standard journal entries to record non-recurring, unusual transactions or adjustments. Examples of such entries include consolidating adjustments and entries for a business combination or disposal or non-recurring estimates such as the impairment of an asset. In manual general ledger systems, non-standard journal entries may be identified through inspection of ledgers, journals, and supporting documentation. When automated procedures are used to maintain the general ledger and prepare financial statements, such entries may exist only in electronic form and may therefore be more easily identified through the use of computer-assisted audit techniques.

Related business processes

A84. An entity's business processes are the activities designed to:

- ◆ Develop, purchase, produce, sell and distribute an entity's products and services;
- ◆ Ensure compliance with laws and regulations; and
- ◆ Record information, including accounting and financial reporting information.

Business processes result in the transactions that are recorded, processed and reported by the information system. Obtaining an understanding of the entity's business processes, which include how transactions are originated, assists the auditor obtain an understanding of the entity's information system relevant to financial reporting in a manner that is appropriate to the entity's circumstances.

Considerations specific to smaller entities

A85. Information systems and related business processes relevant to financial reporting in small entities are likely to be less sophisticated than in larger entities, but their role is just as significant. Small entities with active management involvement may not need extensive descriptions of accounting procedures, sophisticated accounting records, or written policies. Understanding the entity's systems and processes may therefore be easier in an audit of smaller entities, and may be more dependent on inquiry than on review of documentation. The need to obtain an understanding, however, remains

important.

Communication (Ref: Para. 19)

A86. Communication by the entity of the financial reporting roles and responsibilities and of significant matters relating to financial reporting involves providing an understanding of individual roles and responsibilities pertaining to internal control over financial reporting. It includes such matters as the extent to which personnel understand how their activities in the financial reporting information system relate to the work of others and the means of reporting exceptions to an appropriate higher level within the entity. Communication may take such forms as policy manuals and financial reporting manuals. Open communication channels help ensure that exceptions are reported and acted on.

Considerations specific to smaller entities

A87. Communication may be less structured and easier to achieve in a small entity than in a larger entity due to fewer levels of responsibility and management's greater visibility and availability.

Components of Internal Control—Control Activities (Ref: Para. 20)

A88. Control activities are the policies and procedures that help ensure that management directives are carried out. Control activities, whether within IT or manual systems, have various objectives and are applied at various organisational and functional levels. Examples of specific control activities include those relating to the following:

- ◆ Authorization.
- ◆ Performance reviews.
- ◆ Information processing.
- ◆ Physical controls.
- ◆ Segregation of duties.

A89. Control activities that are relevant to the audit are:

- ◆ Those that are required to be treated as such, being control activities that relate to significant risks and those that relate to risks for which substantive procedures alone do not provide sufficient appropriate audit evidence, as required by paragraphs 29 and 30, respectively; or
- ◆ Those that are considered to be relevant in the judgment of the auditor.

A90. The auditor's judgment about whether a control activity is relevant to the audit is influenced by the risk that the auditor has identified that may give rise to a material misstatement and whether the auditor thinks it is likely to be appropriate to test the operating effectiveness of the control in determining the extent of substantive testing.

A91. The auditor's emphasis may be on identifying and obtaining an understanding of control activities that address the areas where the auditor considers that risks of material misstatement are likely to be higher. When multiple control activities each achieve the same objective, it is unnecessary to obtain an understanding of each of the control activities related to such objective.

A92. The auditor's knowledge about the presence or absence of control activities obtained from the understanding of the other components of internal control assists the auditor in determining whether it is necessary to devote additional attention to obtaining an understanding of control activities.

Considerations specific to smaller entities

A93. The concepts underlying control activities in small entities are likely to be similar to those in larger entities, but the formality with which they operate may vary. Further, small entities may find that certain types of

I.224 Auditing Pronouncements

control activities are not relevant because of controls applied by management. For example, management's sole authority for granting credit to customers and approving significant purchases can provide strong control over important account balances and transactions, lessening or removing the need for more detailed control activities.

A94. Control activities relevant to the audit of a smaller entity are likely to relate to the main transaction cycles such as revenues, purchases and employment expenses.

Risks arising from IT (Ref: Para. 21)

A95. The use of IT affects the way that control activities are implemented. From the auditor's perspective, controls over IT systems are effective when they maintain the integrity of information and the security of the data such systems process, and include effective general IT-controls and application controls.

A96. General IT-controls are policies and procedures that relate to many applications and support the effective functioning of application controls. They apply to mainframe, miniframe, and end-user environments. General IT-controls that maintain the integrity of information and security of data commonly include controls over the following:

- ◆ Data center and network operations.
- ◆ System software acquisition, change and maintenance.
- ◆ Program change.
- ◆ Access security.
- ◆ Application system acquisition, development, and maintenance.

They are generally implemented to deal with the risks referred to in paragraph A56 above.

A97. Application controls are manual or automated procedures that typically operate at a business process level and apply to the processing of individual applications. Application controls can be preventive or detective in nature and are designed to ensure the integrity of the accounting records. Accordingly, application controls relate to procedures used to initiate, record, process and report transactions or other financial data. These controls help ensure that transactions occurred, are authorised, and are completely and accurately recorded and processed. Examples include edit checks of input data, and numerical sequence checks with manual follow-up of exception reports or correction at the point of data entry.

Components of Internal Control—Monitoring of Controls (Ref: Para. 22)

A98. Monitoring of controls is a process to assess the effectiveness of internal control performance over time. It involves assessing the effectiveness of controls on a timely basis and taking necessary remedial actions. Management accomplishes monitoring of controls through ongoing activities, separate evaluations, or a combination of the two. Ongoing monitoring activities are often built into the normal recurring activities of an entity and include regular management and supervisory activities.

A99. Management's monitoring activities may include using information from communications from external parties such as customer complaints and regulator comments that may indicate problems or highlight areas in need of improvement.

Considerations specific to smaller entities

A100. Management's monitoring of control is often accomplished by management's or the owner-manager's close involvement in operations. This involvement often will identify significant variances from expectations and inaccuracies in financial data leading to remedial action to the control.

Internal Audit Functions (Ref: Para 23)

A101. The entity's internal audit function is likely to be relevant to the audit if the nature of the internal audit function's responsibilities and activities are related to the entity's financial reporting, and the auditor expects to use the work of the internal auditors to modify the nature or timing, or reduce the extent, of audit procedures to be performed. When the auditor determines that the internal audit function is likely to be relevant to the audit, SA 610 applies.

A102. The objectives of an internal audit function, and therefore the nature of its responsibilities and its status within the organisation, vary widely and depend on the size and structure of the entity and the requirements of management and, where applicable, those charged with governance. The responsibilities of an internal audit function may include, for example, monitoring of internal control, risk management, and review of compliance with laws and regulations. On the other hand, the responsibilities of the internal audit function may be limited to the review of the economy, efficiency and effectiveness of operations, for example, and accordingly, may not relate to the entity's financial reporting.

A103. If the nature of the internal audit function's responsibilities are related to the entity's financial reporting, the external auditor's consideration of the activities performed, or to be performed by, the internal audit function may include review of the internal audit function's audit plan for the period, if any, and discussion of that plan with the internal auditors.

Sources of information (Ref: Para. 24)

A104. Much of the information used in monitoring may be produced by the entity's information system. If management assumes that data used for monitoring are accurate without having a basis for that assumption, errors that may exist in the information could potentially lead management to incorrect conclusions from its monitoring activities. Accordingly, an understanding of:

- ◆ the sources of the information related to the entity's monitoring activities; and
- ◆ the basis upon which management considers the information to be sufficiently reliable for the purpose; is required as part of the auditor's understanding of the entity's monitoring activities as a component of internal control.

Identifying and Assessing the Risks of Material Misstatement

Assessment of Risks of Material Misstatement at the Financial Statement Level (Ref: Para. 25 (a))

A105. Risks of material misstatement at the financial statement level refer to risks that relate pervasively to the financial statements as a whole and potentially affect many assertions. Risks of this nature are not necessarily risks identifiable with specific assertions at the class of transactions, account balance, or disclosure level. Rather, they represent circumstances that may increase the risks of material misstatement at the assertion level, for example, through management override of internal control. Financial statement level risks may be especially relevant to the auditor's consideration of the risks of material misstatement arising from fraud.

A106. Risks at the financial statement level may derive in particular from deficient control environment (although these risks may also relate to other factors, such as declining economic conditions). For example, deficiencies such as management's lack of competence may have a more pervasive effect on the financial statements and may require an overall response by the auditor.

A107. The auditor's understanding of internal control may raise doubts about the auditability of an entity's financial statements. For example:

- ◆ Concerns about the integrity of the entity's management may be so serious as to cause the auditor to conclude that the risk of management misrepresentation in the financial statements is

I.226 Auditing Pronouncements

such that an audit cannot be conducted.

- ◆ Concerns about the condition and reliability of an entity's records may cause the auditor to conclude that it is unlikely that sufficient appropriate audit evidence will be available to support an unqualified opinion on the financial statements.

A108.SA 705, "Modifications to the Opinion in the Independent Auditor's Report" establishes requirements and provides guidance in determining whether there is a need for the auditor to consider a qualification or disclaimer of opinion or, as may be required in some cases, to withdraw from the engagement where this is legally possible.

Assessment of Risks of Material Misstatement at the Assertion Level (Ref: Para. 25(b))

A109.Risks of material misstatement at the assertion level for classes of transactions, account balances, and disclosures need to be considered because such consideration directly assists in determining the nature, timing, and extent of further audit procedures at the assertion level necessary to obtain sufficient appropriate audit evidence. In identifying and assessing risks of material misstatement at the assertion level, the auditor may conclude that the identified risks relate more pervasively to the financial statements as a whole and potentially affect many assertions.

The Use of Assertions

A110.In representing that the financial statements are in accordance with the applicable financial reporting framework, management implicitly or explicitly makes assertions regarding the recognition, measurement, presentation and disclosure of the various elements of financial statements and related disclosures.

A111.Assertions used by the auditor to consider the different types of potential misstatements that may occur fall into the following three categories and may take the following forms:

- (a) Assertions about classes of transactions and events for the period under audit:
 - (i) Occurrence—transactions and events that have been recorded have occurred and pertain to the entity.
 - (ii) Completeness—all transactions and events that should have been recorded have been recorded.
 - (iii) Accuracy—amounts and other data relating to recorded transactions and events have been recorded appropriately.
 - (iv) Cut-off—transactions and events have been recorded in the correct accounting period.
 - (v) Classification—transactions and events have been recorded in the proper accounts.
- (b) Assertions about account balances at the period end:
 - (i) Existence—assets, liabilities, and equity interests exist.
 - (ii) Rights and obligations—the entity holds or controls the rights to assets, and liabilities are the obligations of the entity.
 - (iii) Completeness—all assets, liabilities and equity interests that should have been recorded have been recorded.
 - (iv) Valuation and allocation—assets, liabilities, and equity interests are included in the financial statements at appropriate amounts and any resulting valuation or allocation adjustments are appropriately recorded.
- (c) Assertions about presentation and disclosure:
 - (i) Occurrence and rights and obligations—disclosed events, transactions, and other matters have

occurred and pertain to the entity.

- (ii) Completeness—all disclosures that should have been included in the financial statements have been included.
- (iii) Classification and understandability—financial information is appropriately presented and described, and disclosures are clearly expressed.
- (iv) Accuracy and valuation—financial and other information are disclosed fairly and at appropriate amounts.

A112. The auditor may use the assertions as described above or may express them differently provided all aspects described above have been covered. For example, the auditor may choose to combine the assertions about transactions and events with the assertions about account balances.

A113. When making assertions about the financial statements of certain entities, especially, for example, where the Government is a major stakeholder, in addition to those assertions set out in paragraph A111, management may often assert that transactions and events have been carried out in accordance with legislation or proper authority. Such assertions may fall within the scope of the financial statement audit.

Process of Identifying Risks of Material Misstatement (Ref: Para. 26(a))

A114. Information gathered by performing risk assessment procedures, including the audit evidence obtained in evaluating the design of controls and determining whether they have been implemented, is used as audit evidence to support the risk assessment. The risk assessment determines the nature, timing, and extent of further audit procedures to be performed.

A115. **Appendix 2** provides examples of conditions and events that may indicate the existence of risks of material misstatement.

Relating Controls to Assertions [Ref: Para. 26(c)]

A116. In making risk assessments, the auditor may identify the controls that are likely to prevent, or detect and correct, material misstatement in specific assertions. Generally, it is useful to obtain an understanding of controls and relate them to assertions in the context of processes and systems in which they exist because individual control activities often do not in themselves address a risk. Often, only multiple control activities, together with other components of internal control, will be sufficient to address a risk.

A117. Conversely, some control activities may have a specific effect on an individual assertion embodied in a particular class of transactions or account balance. For example, the control activities that an entity established to ensure that its personnel are properly counting and recording the annual physical inventory relate directly to the existence and completeness assertions for the inventory account balance.

A118. Controls can be either directly or indirectly related to an assertion. The more indirect the relationship, the less effective that control may be in preventing, or detecting and correcting, misstatements in that assertion. For example, a sales manager's review of a summary of sales activity for specific stores by region ordinarily is only indirectly related to the completeness assertion for sales revenue. Accordingly, it may be less effective in reducing risk for that assertion than controls more directly related to that assertion, such as matching shipping documents with billing documents.

Significant Risks

Identifying Significant Risks (Ref: Para. 28)

A119. Significant risks often relate to significant non-routine transactions or judgmental matters. Non-routine

I.228 Auditing Pronouncements

transactions are transactions that are unusual, due to either size or nature, and that therefore occur infrequently. Judgmental matters may include the development of accounting estimates for which there is significant measurement uncertainty. Routine, non-complex transactions that are subject to systematic processing are less likely to give rise to significant risks.

A120. Risks of material misstatement may be greater for significant non-routine transactions arising from matters such as the following:

- ◆ Greater management intervention to specify the accounting treatment.
- ◆ Greater manual intervention for data collection and processing.
- ◆ Complex calculations or accounting principles.
- ◆ The nature of non-routine transactions, which may make it difficult for the entity to implement effective controls over the risks.

A121. Risks of material misstatement may be greater for significant judgmental matters that require the development of accounting estimates, arising from matters such as the following:

- ◆ Accounting principles for accounting estimates or revenue recognition may be subject to differing interpretation.
- ◆ Required judgment may be subjective or complex, or require assumptions about the effects of future events, for example, judgment about fair value.

A122. SA 330 describes the consequences for further audit procedures of identifying a risk as significant.¹¹

Significant risks relating to the risks of material misstatement due to fraud

A123. SA 240 provides further requirements and guidance in relation to the identification and assessment of the risks of material misstatement due to fraud.¹²

Understanding Controls Related to Significant Risks (Ref: Para. 29)

A124. Although risks relating to significant non-routine or judgmental matters are often less likely to be subject to routine controls, management may have other responses intended to deal with such risks. Accordingly, the auditor's understanding of whether the entity has designed and implemented controls for significant risks arising from non-routine or judgmental matters includes whether and how management responds to the risks. Such responses might include:

- ◆ Control activities such as a review of assumptions by senior management or experts.
- ◆ Documented processes for estimations.
- ◆ Approval by those charged with governance.

A125. For example, where there are one-off events such as the receipt of notice of a significant lawsuit, consideration of the entity's response may include such matters as whether it has been referred to appropriate experts (such as internal or external legal counsel), whether an assessment has been made of the potential effect, and how it is proposed that the circumstances are to be disclosed in the financial statements.

A126. In some cases, management may not have appropriately responded to significant risks of material misstatement by implementing controls over these significant risks. Failure by management to

¹¹ SA 330, paragraphs 15 and 21.

¹² SA 240, paragraph 25-27.

implement such controls is an indicator of a significant deficiency in internal control.¹³

Risks for Which Substantive Procedures Alone Do Not Provide Sufficient Appropriate Audit Evidence
(Ref: Para. 30)

A127. Risks of material misstatement may relate directly to the recording of routine classes of transactions or account balances, and the preparation of reliable financial statements. Such risks may include risks of inaccurate or incomplete processing for routine and significant classes of transactions such as an entity's revenue, purchases, and cash receipts or cash payments.

A128. Where such routine business transactions are subject to highly automated processing with little or no manual intervention, it may not be possible to perform only substantive procedures in relation to the risk. For example, the auditor may consider this to be the case in circumstances where a significant amount of an entity's information is initiated, recorded, processed, or reported only in electronic form such as in an integrated system. In such cases:

- ◆ Audit evidence may be available only in electronic form, and its sufficiency and appropriateness usually depend on the effectiveness of controls over its accuracy and completeness.
- ◆ The potential for improper initiation or alteration of information to occur and not be detected may be greater if appropriate controls are not operating effectively.

A129. The consequences for further audit procedures of identifying such risks are described in SA 330.¹⁴

Revision of Risk Assessment (Ref: Para. 31)

A130. During the audit, information may come to the auditor's attention that differs significantly from the information on which the risk assessment was based. For example, the risk assessment may be based on an expectation that certain controls are operating effectively. In performing tests of those controls, the auditor may obtain audit evidence that they were not operating effectively at relevant times during the audit. Similarly, in performing substantive procedures the auditor may detect misstatements in amounts or frequency greater than is consistent with the auditor's risk assessments. In such circumstances, the risk assessment may not appropriately reflect the true circumstances of the entity and the further planned audit procedures may not be effective in detecting material misstatements. See SA 330 for further guidance.

Documentation (Ref: Para. 32)

A131. The manner in which the requirements of paragraph 32 are documented is for the auditor to determine using professional judgment. For example, in audits of small entities the documentation may be incorporated in the auditor's documentation of the overall strategy and audit plan that is required by SA 300, "Planning an Audit of Financial Statements"¹⁵. Similarly, for example, the results of the risk assessment may be documented separately, or may be documented as part of the auditor's documentation of further procedures (see SA 330)¹⁶. The form and extent of the documentation is influenced by the nature, size and complexity of the entity and its internal control, availability of information from the entity and the audit methodology and technology used in the course of the audit.

A132. For entities that have uncomplicated businesses and processes relevant to financial reporting, the

¹³ SA 265, "Communicating Deficiencies in Internal Control to Those Charged with Governance and Management", Paragraph A7.

¹⁴ SA 330, paragraph 8.

¹⁵ SA 300, paragraphs 7 and 9.

¹⁶ SA 330, paragraph 8.

I.230 Auditing Pronouncements

documentation may be simple in form and relatively brief. It is not necessary to document the entirety of the auditor's understanding of the entity and matters related to it. Key elements of understanding documented by the auditor include those on which the auditor based the assessment of the risks of material misstatement.

A133. The extent of documentation may also reflect the experience and capabilities of the members of the audit engagement team. Provided the requirements of SA 230, "Audit Documentation" are always met, an audit undertaken by an engagement team comprising less experienced individuals may require more detailed documentation to assist them to obtain an appropriate understanding of the entity than one that includes experienced individuals.

A134. For recurring audits, certain documentation may be carried forward, updated as necessary to reflect changes in the entity's business or processes.

Material Modifications to ISA 315, Identifying and Assessing the Risks of Material Misstatement Through Understanding the Entity and Its Environment

Deletions

1. Paragraph A21 of the Application Section of ISA 315 deals with the application of the requirements of ISA 315 to the audits of public sector entities regarding the effect of ministerial directives, government policy requirements and resolutions of the legislature on the operations of the entity. Since as mentioned in the "Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services", the Standards issued by the Auditing and Assurance Standards Board, apply equally to all entities, irrespective of their form, nature and size, a specific reference to applicability of the Standard to public sector entities has been deleted.

Further, it is also possible that even in case of non public sector entities, the operation of the entity may be affected by government policy requirements and resolutions of the legislature. Accordingly, the spirit of erstwhile A21, highlighting the fact that in some cases, the entity's operations may be affected by such requirements/resolutions, has been retained.

2. Paragraph A35 of the Application Section of ISA 315 deals with the application of the requirements of ISA 315 to the audits of public sector entities regarding the influence of concerns relating to public accountability, including objectives having source in legislation, regulations, government ordinances, etc., on 'management objectives'. Since as mentioned in the "Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services", the Standards issued by the Auditing and Assurance Standards Board, apply equally to all entities, irrespective of their form, nature and size, a specific reference to applicability of the Standard to public sector entities has been deleted.

Further, it is also possible that even in case of non public sector entities, the management's objectives are influenced by such aspects. Accordingly, the spirit of erstwhile A35, highlighting the fact that in some cases, the management objectives may be influenced by the concerns relating to public accountability, including objectives having source in legislation, regulations, government directions, has been retained.

3. Paragraph A65 of the Application Section of ISA 315 deals with the application of the requirements of ISA 315 to the audits of public sector entities regarding the additional reporting responsibilities of the auditor with respect to internal control because of any code of practice or compliance with legislative authorities. Since as mentioned in the "Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services", the Standards issued by the Auditing and Assurance Standards Board, apply equally to all entities, irrespective of their form, nature and size, a specific reference to applicability of the Standard to public sector entities has been deleted.

Further, it is also possible that even in case of non public sector entities, the statute or regulations may require the auditor to report on compliance with certain specific aspects of internal control. Accordingly, the spirit of erstwhile A65, highlighting such additional reporting responsibilities of the auditor, has been retained.

4. Paragraph A113 of the Application Section of ISA 315 deals with the application of the requirements of ISA 315 to the audits of public sector entities regarding the relevance of management's assertions that transactions and events have been carried out in accordance with legislation or proper authority, for the financial statement audit. Since as mentioned in the "Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services", the Standards issued by the Auditing and Assurance Standards Board, apply equally to all entities, irrespective of their form, nature and size, a specific reference to applicability of the Standard to public sector entities has been deleted.

Further, it is also possible that even in case of non public sector entities, there may be similar assertions made by the management that may fall within the scope of the financial statement audit. Accordingly, the spirit of erstwhile A113, highlighting such fact, has been retained and an example has been added.

Appendix 1

(Ref: Paras. 4(c), 14-23 and A65-A97)

Internal Control Components

1. This appendix further explains the components of internal control, as set out in paragraphs 4(c), 14-24 and A69-A104, as they relate to a financial statement audit.

Control Environment

2. The control environment encompasses the following elements:
 - (a) *Communication and enforcement of integrity and ethical values.* The effectiveness of controls cannot rise above the integrity and ethical values of the people who create, administer, and monitor them. Integrity and ethical behavior are the product of the entity's ethical and behavioral standards, how they are communicated, and how they are reinforced in practice. The enforcement of integrity and ethical values includes, for example, management actions to eliminate or mitigate incentives or temptations that might prompt personnel to engage in dishonest, illegal, or unethical acts. The communication of entity policies on integrity and ethical values may include the communication of behavioral standards to personnel through policy statements and codes of conduct and by example.
 - (b) *Commitment to competence.* Competence is the knowledge and skills necessary to accomplish tasks that define the individual's job.
 - (c) *Participation by those charged with governance.* An entity's control consciousness is influenced significantly by those charged with governance. The importance of the responsibilities of those charged with governance is recognised in codes of practice and other laws and regulations or guidance produced for the benefit of those charged with governance. Other responsibilities of those charged with governance include oversight of the design and effective operation of whistle blower procedures and the process for reviewing the effectiveness of the entity's internal control.
 - (d) *Management's philosophy and operating style.* Management's philosophy and operating style encompass a broad range of characteristics. For example, management's attitudes and actions toward financial reporting may manifest themselves through conservative or aggressive selection from available alternative accounting principles, or conscientiousness and conservatism with which accounting estimates are developed.
 - (e) *Organizational structure.* Establishing a relevant organisational structure includes considering key areas of authority and responsibility and appropriate lines of reporting. The appropriateness of an entity's organisational structure depends, in part, on its size and the nature of its activities.
 - (f) *Assignment of authority and responsibility.* The assignment of authority and responsibility may include policies relating to appropriate business practices, knowledge and experience of key personnel, and resources provided for carrying out duties. In addition, it may include policies and communications directed at ensuring that all personnel understand the entity's objectives, know how their individual actions interrelate and contribute to those objectives, and recognise how and for what they will be held accountable.
 - (g) *Human resource policies and practices.* Human resource policies and practices often demonstrate important matters in relation to the control consciousness of an entity. For example, standards for recruiting the most qualified individuals – with emphasis on educational background, prior work experience, past accomplishments, and evidence of integrity and ethical behavior – demonstrate an entity's commitment to competent and trustworthy people. Training policies that communicate prospective roles and responsibilities and include practices such as training schools and seminars

illustrate expected levels of performance and behavior. Promotions driven by periodic performance appraisals demonstrate the entity's commitment to the advancement of qualified personnel to higher levels of responsibility.

Entity's Risk Assessment Process

3. For financial reporting purposes, the entity's risk assessment process includes how management identifies business risks relevant to the preparation of financial statements in accordance with the entity's applicable financial reporting framework, estimates their significance, assesses the likelihood of their occurrence, and decides upon actions to respond to and manage them and the results thereof. For example, the entity's risk assessment process may address how the entity considers the possibility of unrecorded transactions or identifies and analyses significant estimates recorded in the financial statements.
4. Risks relevant to reliable financial reporting include external and internal events, transactions or circumstances that may occur and adversely affect an entity's ability to initiate, record, process, and report financial data consistent with the assertions of management in the financial statements. Management may initiate plans, programs, or actions to address specific risks or it may decide to accept a risk because of cost or other considerations. Risks can arise or change due to circumstances such as the following:
 - ◆ *Changes in operating environment.* Changes in the regulatory or operating environment can result in changes in competitive pressures and significantly different risks.
 - ◆ *New personnel.* New personnel may have a different focus on or understanding of internal control.
 - ◆ *New or revamped information systems.* Significant and rapid changes in information systems can change the risk relating to internal control.
 - ◆ *Rapid growth.* Significant and rapid expansion of operations can strain controls and increase the risk of a breakdown in controls.
 - ◆ *New technology.* Incorporating new technologies into production processes or information systems may change the risk associated with internal control.
 - ◆ *New business models, products, or activities.* Entering into business areas or transactions with which an entity has little experience may introduce new risks associated with internal control.
 - ◆ *Corporate restructurings.* Restructurings may be accompanied by staff reductions and changes in supervision and segregation of duties that may change the risk associated with internal control.
 - ◆ *Expanded foreign operations.* The expansion or acquisition of foreign operations carries new and often unique risks that may affect internal control, for example, additional or changed risks from foreign currency transactions.
 - ◆ *New accounting pronouncements.* Adoption of new accounting principles or changing accounting principles may affect risks in preparing financial statements.

Information System, Including the Related Business Processes, Relevant To Financial Reporting, And Communication

5. An information system consists of infrastructure (physical and hardware components), software, people, procedures, and data. Many information systems make extensive use of information technology (IT).

I.234 Auditing Pronouncements

6. The information system relevant to financial reporting objectives, which includes the financial reporting system, encompasses methods and records that:
 - ◆ Identify and record all valid transactions.
 - ◆ Describe on a timely basis the transactions in sufficient detail to permit proper classification of transactions for financial reporting.
 - ◆ Measure the value of transactions in a manner that permits recording their proper monetary value in the financial statements.
 - ◆ Determine the time period in which transactions occurred to permit recording of transactions in the proper accounting period.
 - ◆ Present properly the transactions and related disclosures in the financial statements.
7. The quality of system-generated information affects management's ability to make appropriate decisions in managing and controlling the entity's activities and to prepare reliable financial reports.
8. Communication, which involves providing an understanding of individual roles and responsibilities pertaining to internal control over financial reporting, may take such forms as policy manuals, accounting and financial reporting manuals, and memoranda. Communication also can be made electronically, orally, and through the actions of management.

Control Activities

9. Generally, control activities that may be relevant to an audit may be categorised as policies and procedures that pertain to the following:
 - ◆ *Performance reviews.* These control activities include reviews and analyses of actual performance versus budgets, forecasts, and prior period performance; relating different sets of data – operating or financial – to one another, together with analyses of the relationships and investigative and corrective actions; comparing internal data with external sources of information; and review of functional or activity performance.
 - ◆ *Information processing.* The two broad groupings of information systems control activities are application controls, which apply to the processing of individual applications, and general IT-controls, which are policies and procedures that relate to many applications and support the effective functioning of application controls by helping to ensure the continued proper operation of information systems. Examples of application controls include checking the arithmetical accuracy of records, maintaining and reviewing accounts and trial balances, automated controls such as edit checks of input data and numerical sequence checks, and manual follow-up of exception reports. Examples of general IT-controls are program change controls, controls that restrict access to programs or data, controls over the implementation of new releases of packaged software applications, and controls over system software that restrict access to or monitor the use of system utilities that could change financial data or records without leaving an audit trail.
 - ◆ *Physical controls.* Controls that encompass:
 - The physical security of assets, including adequate safeguards such as secured facilities over access to assets and records.
 - The authorisation for access to computer programs and data files.
 - The periodic counting and comparison with amounts shown on control records (for example, comparing the results of cash, security and inventory counts with accounting

records).

The extent to which physical controls intended to prevent theft of assets are relevant to the reliability of financial statement preparation, and therefore the audit, depends on circumstances such as when assets are highly susceptible to misappropriation.

- ◆ *Segregation of duties.* Assigning different people the responsibilities of authorising transactions, recording transactions, and maintaining custody of assets. Segregation of duties is intended to reduce the opportunities to allow any person to be in a position to both perpetrate and conceal errors or fraud in the normal course of the person's duties.
10. Certain control activities may depend on the existence of appropriate higher level policies established by management or those charged with governance. For example, authorisation controls may be delegated under established guidelines, such as, investment criteria set by those charged with governance; alternatively, non-routine transactions such as, major acquisitions or divestments may require specific high level approval, including in some cases that of shareholders.

Monitoring of Controls

11. An important management responsibility is to establish and maintain internal control on an ongoing basis. Management's monitoring of controls includes considering whether they are operating as intended and that they are modified as appropriate for changes in conditions. Monitoring of controls may include activities such as, management's review of whether bank reconciliations are being prepared on a timely basis, internal auditors' evaluation of sales personnel's compliance with the entity's policies on terms of sales contracts, and a legal department's oversight of compliance with the entity's ethical or business practice policies. Monitoring is done also to ensure that controls continue to operate effectively over time. For example, if the timeliness and accuracy of bank reconciliations are not monitored, personnel are likely to stop preparing them.
12. Internal auditors or personnel performing similar functions may contribute to the monitoring of an entity's controls through separate evaluations. Ordinarily, they regularly provide information about the functioning of internal control, focusing considerable attention on evaluating the effectiveness of internal control, and communicate information about strengths and deficiencies in internal control and recommendations for improving internal control.
13. Monitoring activities may include using information from communications from external parties that may indicate problems or highlight areas in need of improvement. Customers implicitly corroborate billing data by paying their invoices or complaining about their charges. In addition, regulators may communicate with the entity concerning matters that affect the functioning of internal control, for example, communications concerning examinations by bank regulatory agencies. Also, management may consider communications relating to internal control from external auditors in performing monitoring activities.

Appendix 2

(Ref: Para. A29 and A108)

Conditions and Events that May Indicate Risks of Material Misstatement

The following are examples of conditions and events that may indicate the existence of risks of material misstatement. The examples provided cover a broad range of conditions and events; however, not all conditions and events are relevant to every audit engagement and the list of examples is not necessarily complete.

- ◆ Operations in regions that are economically unstable, for example, countries with significant currency

I.236 Auditing Pronouncements

devaluation or highly inflationary economies.

- ◆ Operations exposed to volatile markets, for example, futures trading.
- ◆ Operations that are subject to a high degree of complex regulation.
- ◆ Going concern and liquidity issues including loss of significant customers.
- ◆ Constraints on the availability of capital and credit.
- ◆ Changes in the industry in which the entity operates.
- ◆ Changes in the supply chain.
- ◆ Developing or offering new products or services, or moving into new lines of business.
- ◆ Expanding into new locations.
- ◆ Changes in the entity such as large acquisitions or reorganisations or other unusual events.
- ◆ Entities or business segments likely to be sold.
- ◆ The existence of complex alliances and joint ventures.
- ◆ Use of off-balance-sheet finance, special-purpose entities, and other complex financing arrangements.
- ◆ Significant transactions with related parties.
- ◆ Lack of personnel with appropriate accounting and financial reporting skills.
- ◆ Changes in key personnel including departure of key executives.
- ◆ Deficiencies in internal control, especially those not addressed by management.
- ◆ Inconsistencies between the entity's IT strategy and its business strategies.
- ◆ Changes in the IT environment.
- ◆ Installation of significant new IT systems related to financial reporting.
- ◆ Inquiries into the entity's operations or financial results by regulatory or government bodies.
- ◆ Past misstatements, history of errors or a significant amount of adjustments at period end.
- ◆ Significant amount of non-routine or non-systematic transactions including intercompany transactions and large revenue transactions at period end.
- ◆ Transactions that are recorded based on management's intent, for example, debt refinancing, assets to be sold and classification of marketable securities.
- ◆ Application of new accounting pronouncements.
- ◆ Accounting measurements that involve complex processes.
- ◆ Events or transactions that involve significant measurement uncertainty, including accounting estimates.
- ◆ Pending litigation and contingent liabilities, for example, sales warranties, financial guarantees and environmental remediation.

SA 320*

Materiality in Planning and Performing an Audit (Effective for all audits relating to accounting periods beginning on or after April 1, 2010)

Introduction

Scope of this SA

1. This Standard on Auditing (SA) deals with the auditor's responsibility to apply the concept of materiality in planning and performing an audit of financial statements. SA 450¹, explains how materiality is applied in evaluating the effect of identified misstatements on the audit and of uncorrected misstatements, if any, on the financial statements.

Materiality in the Context of an Audit

2. Financial reporting frameworks often discuss the concept of materiality in the context of the preparation and presentation of financial statements. Although financial reporting frameworks may discuss materiality in different terms, they generally explain that:
 - Misstatements, including omissions, are considered to be material if they, individually or in the aggregate, could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements;
 - Judgments about materiality are made in the light of surrounding circumstances, and are affected by the size or nature of a misstatement, or a combination of both; and
 - Judgments about matters that are material to users of the financial statements are based on a consideration of the common financial information needs of users as a group.² The possible effect of misstatements on specific individual users, whose needs may vary widely, is not considered.
3. Such a discussion, if present in the applicable financial reporting framework, provides a frame of reference to the auditor in determining materiality for the audit. If the applicable financial reporting framework does not include a discussion of the concept of materiality, the characteristics referred to in paragraph 2 provide the auditor with such a frame of reference.
4. The auditor's determination of materiality is a matter of professional judgment, and is affected by the auditor's perception of the financial information needs of users of the financial statements. In this context, it is reasonable for the auditor to assume that users:

* Published in August, 2009 issue of the Journal.

¹ SA 450, "Evaluation of Misstatements Identified during the Audit".

² For example, paragraph 10 of the "Framework for the Preparation and Presentation of Financial Statements," issued by the Institute of Chartered Accountants of India (ICAI) in July 2000, indicates for a profit-oriented entity that "as providers of risk capital to the enterprise, investor need more comprehensive information than other users. The provision of financial statements that meet their needs will also meet most of the needs of other users that financial statements can satisfy".

I.238 Auditing Pronouncements

- (a) Have a reasonable knowledge of business and economic activities and accounting and a willingness to study the information in the financial statements with reasonable diligence;
 - (b) Understand that financial statements are prepared, presented and audited to levels of materiality;
 - (c) Recognize the uncertainties inherent in the measurement of amounts based on the use of estimates, judgment and the consideration of future events; and
 - (d) Make reasonable economic decisions on the basis of the information in the financial statements.
5. The concept of materiality is applied by the auditor both in planning and performing the audit, and in evaluating the effect of identified misstatements on the audit and of uncorrected misstatements, if any, on the financial statements and in forming the opinion in the auditor's report. (Ref: Para. A1)
6. In planning the audit, the auditor makes judgments about the size of misstatements that will be considered material. These judgments provide a basis for:
- (a) Determining the nature, timing and extent of risk assessment procedures;
 - (b) Identifying and assessing the risks of material misstatement; and
 - (c) Determining the nature, timing and extent of further audit procedures.

The materiality determined when planning the audit does not necessarily establish an amount below which uncorrected misstatements, individually or in aggregate, will always be evaluated as immaterial. The circumstances related to some misstatements may cause the auditor to evaluate them as material even if they are below materiality. Although, it is not practicable to design audit procedures to detect misstatements that could be material solely because of their nature, the auditor considers not only the size but also the nature of uncorrected misstatements, and the particular circumstances of their occurrence, when evaluating their effect on the financial statements.³

Effective Date

7. This SA is effective for audits of financial statements for periods beginning on or after April 1, 2010.

Objective

8. The objective of the auditor is to apply the concept of materiality appropriately in planning and performing the audit.

Definition

9. For purposes of the SAs, performance materiality means the amount or amounts set by the auditor at less than materiality for the financial statements as a whole to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds materiality for the financial statements as a whole. If applicable, performance materiality also refers to the amount or amounts set by the auditor at less than the materiality level or levels for particular classes of transactions, account balances or disclosures.

Requirements

Determining Materiality and Performance Materiality when Planning the Audit

10. When establishing the overall audit strategy, the auditor shall determine materiality for the financial statements as a whole. If, in the specific circumstances of the entity, there is one or more particular classes of transactions, account balances or disclosures for which misstatements of lesser amounts than the materiality for the financial statements as a whole could reasonably be expected to influence

³ SA 450, paragraph A16.

the economic decisions of users taken on the basis of the financial statements, the auditor shall also determine the materiality level or levels to be applied to those particular classes of transactions, account balances or disclosures. (Ref: Para. A2-A11)

11. The auditor shall determine performance materiality for purposes of assessing the risks of material misstatement and determining the nature, timing and extent of further audit procedures. (Ref: Para. A12)

Revision as the Audit Progresses

12. The auditor shall revise materiality for the financial statements as a whole (and, if applicable, the materiality level or levels for particular classes of transactions, account balances or disclosures) in the event of becoming aware of information during the audit that would have caused the auditor to have determined a different amount (or amounts) initially. (Ref: Para. A13)
13. If the auditor concludes that a lower materiality for the financial statements as a whole (and, if applicable, materiality level or levels for particular classes of transactions, account balances or disclosures) than that initially determined is appropriate, the auditor shall determine whether it is necessary to revise performance materiality, and whether the nature, timing and extent of the further audit procedures remain appropriate.

Documentation

14. The audit documentation shall include the following amounts and the factors considered in their determination:
 - (a) Materiality for the financial statements as a whole (see paragraph 10);
 - (b) If applicable, the materiality level or levels for particular classes of transactions, account balances or disclosures (see paragraph 10);
 - (c) Performance materiality (see paragraph 11); and
 - (d) Any revision of (a)-(c) as the audit progressed (see paragraphs 12-13).

Application and Other Explanatory Material

Materiality and Audit Risk (Ref: Para. 5)

- A1. In conducting an audit of financial statements, the overall objectives of the auditor are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, thereby enabling the auditor to express an opinion on whether the financial statements are prepared, in all material respects, in accordance with an applicable financial reporting framework; and to report on the financial statements, and communicate as required by the SAs, in accordance with the auditor's findings.⁴ The auditor obtains reasonable assurance by obtaining sufficient appropriate audit evidence to reduce audit risk to an acceptably low level⁵. Audit risk is the risk that the auditor expresses an inappropriate audit opinion when the financial statements are materially misstated. Audit risk is a function of the risks of material misstatement and detection risk⁶. Materiality and audit risk are considered throughout the audit, in particular, when:
 - (a) Identifying and assessing the risks of material misstatement⁷;

⁴ SA 200, paragraph 11.

⁵ SA 200, paragraph 17.

⁶ SA 200, paragraph 13(c)

⁷ SA 315, "Identifying and Assessing the Risks of Material Misstatements Through Understanding the Entity and Its Environment".

I.240 Auditing Pronouncements

- (b) Determining the nature, timing and extent of further audit procedures⁸; and
- (c) Evaluating the effect of uncorrected misstatements, if any, on the financial statements and in forming the opinion in the auditor's report⁹.

Determining Materiality and Performance Materiality when Planning the Audit (Ref: Para. 10)

Use of Benchmarks in Determining Materiality for the Financial Statements as a Whole

- A2. Determining materiality involves the exercise of professional judgment. A percentage is often applied to a chosen benchmark as a starting point in determining materiality for the financial statements as a whole. Factors that may affect the identification of an appropriate benchmark include the following:
- The elements of the financial statements (for example, assets, liabilities, equity, revenue, expenses);
 - Whether there are items on which the attention of the users of the particular entity's financial statements tends to be focused (for example, for the purpose of evaluating financial performance users may tend to focus on profit, revenue or net assets);
 - The nature of the entity, where the entity is at in its life cycle, and the industry and economic environment in which the entity operates;
 - The entity's ownership structure and the way it is financed (for example, if an entity is financed solely by debt rather than equity, users may put more emphasis on assets, and claims on them, than on the entity's earnings); and
 - The relative volatility of the benchmark.
- A3. Examples of benchmarks that may be appropriate, depending on the circumstances of the entity, include categories of reported income such as profit before tax, total revenue, gross profit and total expenses, total equity or net asset value. Profit before tax from continuing operations is often used for profit-oriented entities. When profit before tax from continuing operations is volatile, other benchmarks may be more appropriate, such as gross profit or total revenues.
- A4. In relation to the chosen benchmark, relevant financial data ordinarily includes prior periods' financial results and financial positions, the period-to-date financial results and financial position, and budgets or forecasts for the current period, adjusted for significant changes in the circumstances of the entity (for example, a significant business acquisition) and relevant changes of conditions in the industry or economic environment in which the entity operates. For example, when, as a starting point, the materiality for the financial statements as a whole is determined for a particular entity based on a percentage of profit before tax from continuing operations, circumstances that give rise to an exceptional decrease or increase in such profit may lead the auditor to conclude that the materiality for the financial statements as a whole is more appropriately determined using a normalized profit before tax from continuing operations figure based on past results.
- A5. Materiality relates to the financial statements on which the auditor is reporting. Where the financial statements are prepared for a financial reporting period of more or less than twelve months, such as may be the case for a new entity or a change in the financial reporting period, materiality relates to the financial statements prepared for that financial reporting period.
- A6. Determining a percentage to be applied to a chosen benchmark involves the exercise of professional

⁸ SA 330, "The Auditor's Responses to Assessed Risks".

⁹ SA 700 (Revised), "Forming an Opinion and Reporting on Financial Statements".

judgment. There is a relationship between the percentage and the chosen benchmark, such that a percentage applied to profit before tax from continuing operations will normally be higher than a percentage applied to total revenue. For example, the auditor may consider five percent of profit before tax from continuing operations to be appropriate for a profit oriented entity in a manufacturing industry, while the auditor may consider one percent of total revenue or total expenses to be appropriate for a not-for-profit entity. Higher or lower percentages, however, may be deemed appropriate in different circumstances.

Considerations Specific to Small Entities

- A7. When an entity's profit before tax from continuing operations is consistently nominal, as might be the case for an owner-managed business where the owner takes much of the profit before tax in the form of remuneration, a benchmark such as profit before remuneration and tax may be more relevant.
- A8. In the case of certain entities, such as, Central/State governments and related government entities (for example, agencies, boards, commissions), legislators and regulators are often the primary users of its financial statements. Furthermore, the financial statements may be used to make decisions other than economic decisions. The determination of materiality for the financial statements as a whole (and, if applicable, materiality level or levels for particular classes of transactions, account balances or disclosures) in an audit of the financial statements of those entities may therefore be influenced by legislative and regulatory requirements, and by the financial information needs of legislators and the public in relation to public utility programs/projects, such as, Accelerated Irrigation Benefit Programme (AIBP), Pradhan Mantri Gram Sadak Yojana (PMGSY) undertaken by the Central/State governments or related government entities .
- A9. In an audit of the entities doing public utility programs/projects, total cost or net cost (expenses less revenues or expenditure less receipts) may be appropriate benchmarks for that particular program/project activity. Where an entity has custody of the assets, assets may be an appropriate benchmark.

Materiality Level or Levels for Particular Classes of Transactions, Account Balances or Disclosures
(Ref: Para. 10)

- A10. Factors that may indicate the existence of one or more particular classes of transactions, account balances or disclosures for which misstatements of lesser amounts than materiality for the financial statements as a whole could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements include the following:
- Whether law, regulations or the applicable financial reporting framework affect users' expectations regarding the measurement or disclosure of certain items (for example, related party transactions, and the remuneration of management and those charged with governance).
 - The key disclosures in relation to the industry in which the entity operates (for example, research and development costs for a pharmaceutical company).
 - Whether attention is focused on a particular aspect of the entity's business that is separately disclosed in the financial statements (for example, a newly acquired business).
- A11. In considering whether, in the specific circumstances of the entity, such classes of transactions, account balances or disclosures exist, the auditor may find it useful to obtain an understanding of the views and expectations of those charged with governance and management.

Performance Materiality (Ref: Para. 11)

- A12. Planning the audit solely to detect individually material misstatements overlooks the fact that the aggregate of individually immaterial misstatements may cause the financial statements to be materially misstated, and leaves no margin for possible undetected misstatements. Performance materiality (which,

I.242 Auditing Pronouncements

as defined, is one or more amounts) is set to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements in the financial statements exceeds materiality for the financial statements as a whole. Similarly, performance materiality relating to a materiality level determined for a particular class of transactions, account balance or disclosure is set to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements in that particular class of transactions, account balance or disclosure exceeds the materiality level for that particular class of transactions, account balance or disclosure. The determination of performance materiality is not a simple mechanical calculation and involves the exercise of professional judgment. It is affected by the auditor's understanding of the entity, updated during the performance of the risk assessment procedures; and the nature and extent of misstatements identified in previous audits and thereby the auditor's expectations in relation to misstatements in the current period.

Revision as the Audit Progresses (Ref: Para. 12)

- A13. Materiality for the financial statements as a whole (and, if applicable, the materiality level or levels for particular classes of transactions, account balances or disclosures) may need to be revised as a result of a change in circumstances that occurred during the audit (for example, a decision to dispose of a major part of the entity's business), new information, or a change in the auditor's understanding of the entity and its operations as a result of performing further audit procedures. For example, if during the audit it appears as though actual financial results are likely to be substantially different from the anticipated period end financial results that were used initially to determine materiality for the financial statements as a whole, the auditor revises that materiality.

Material Modifications to ISA 320, "Materiality in Planning and Performing an Audit"

Deletions

1. Paragraph A2 of ISA 320 dealt with the determination of materiality for the financial statements as a whole or for particular assertion in an audit of financial statements of a public sector entity, which is influenced by legislative and regulatory requirements, and by the financial information needs of legislators and the public in relation to public sector programs. Since as mentioned in the "Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services", the Standards issued by the Auditing and Assurance Standards Board, apply equally to all entities, irrespective of their form, nature and size, a specific reference to applicability of the Standard to public sector entities has been deleted.

Further, it is also possible that such a specific situation may exist in case of Central/State governments or related government entities, or programs/projects launched by them, pursuant to a requirement under the statute or regulation under which they operate. Accordingly, the spirit of erstwhile A2, highlighting such fact, has been retained and the paragraph has been re-numbered as A8.

2. Paragraph A9 of ISA 320 states that in an audit of the public sector entities, total cost or net cost (expenses less revenues or expenditure less receipts) may be appropriate benchmarks for program/project activities. Where a public sector entity has custody of assets, assets may be an appropriate benchmark. Since as mentioned in the "Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services", the Standards issued by the Auditing and Assurance Standards Board, apply equally to all entities, irrespective of their form, nature and size, a specific reference to applicability of the Standard to public sector entities has been deleted.

Further, it is also possible that such a specific situation may exist in case of Central/State governments or related government entities, or programs/projects launched by them, pursuant to a requirement under the statute or regulation under which they operate. Accordingly, the spirit of erstwhile A9, highlighting such fact, has been retained.

SA 330*
The Auditor's
Responses to Assessed Risks
(Effective for audits of financial statements
for periods beginning on or after April 1, 2008)

Introduction

Scope of this SA

1. This Standard on Auditing (SA) deals with the auditor's responsibility to design and implement responses to the risks of material misstatement identified and assessed by the auditor in accordance with SA 315, "Identifying and Assessing Risks of Material Misstatement Through Understanding the Entity and Its Environment" in a financial statement audit.

Effective Date

2. This SA is effective for audits of financial statements for periods beginning on or after April 1, 2008.

Objective

3. The objective of the auditor is to obtain sufficient appropriate audit evidence about the assessed risks of material misstatement, through designing and implementing appropriate responses to those risks.

Definitions

4. For purposes of the SAs, the following terms have the meanings attributed below:

- (a) Substantive procedure – An audit procedure designed to detect material misstatements at the assertion level. Substantive procedures comprise:
 - (i) Tests of details (of classes of transactions, account balances, and disclosures), and
 - (ii) Substantive analytical procedures.
- (b) Test of controls – An audit procedure designed to evaluate the operating effectiveness of controls in preventing, or detecting and correcting, material misstatements at the assertion level.

Requirements

Overall Responses

5. The auditor shall design and implement overall responses to address the assessed risks of material misstatement at the financial statement level. (Ref: Para. A1-A3)

Audit Procedures Responsive to the Assessed Risks of Material Misstatement at the Assertion Level

6. The auditor shall design and perform further audit procedures whose nature, timing and extent are based on and are responsive to the assessed risks of material misstatement at the assertion level. (Ref: Para. A4-A8)

7. In designing the further audit procedures to be performed, the auditor shall:

* Published in February, 2008 issue of the Journal.

I.244 Auditing Pronouncements

- (a) Consider the reasons for the assessment given to the risk of material misstatement at the assertion level for each class of transactions, account balance, and disclosure, including:
 - (i) The likelihood of material misstatement due to the particular characteristics of the relevant class of transactions, account balance, or disclosure (i.e., the inherent risk); and
 - (ii) Whether the risk assessment takes into account the relevant controls (i.e., the control risk), thereby requiring the auditor to obtain audit evidence to determine whether the controls are operating effectively (i.e., the auditor intends to rely on the operating effectiveness of controls in determining the nature, timing and extent of substantive procedures); and (Ref: Para. A9-A18)
- (b) Obtain more persuasive audit evidence the higher the auditor's assessment of risk. (Ref: Para. A19)

Tests of Controls

8. The auditor shall design and perform tests of controls to obtain sufficient appropriate audit evidence as to the operating effectiveness of relevant controls when:
- (a) The auditor's assessment of risks of material misstatement at the assertion level includes an expectation that the controls are operating effectively (i.e., the auditor intends to rely on the operating effectiveness of controls in determining the nature, timing and extent of substantive procedures); or
 - (b) Substantive procedures alone cannot provide sufficient appropriate audit evidence at the assertion level. (Ref: Para. A20-A24)
9. In designing and performing tests of controls, the auditor shall obtain more persuasive audit evidence the greater the reliance the auditor places on the effectiveness of a control. (Ref: Para. A25)

Nature and Extent of Tests of Controls

10. In designing and performing tests of controls, the auditor shall:
- (a) Perform other audit procedures in combination with inquiry to obtain audit evidence about the operating effectiveness of the controls, including:
 - (i) How the controls were applied at relevant times during the period under audit.
 - (ii) The consistency with which they were applied.
 - (iii) By whom or by what means they were applied. (Ref: Para. A26-A29)
 - (b) Determine whether the controls to be tested depend upon other controls (indirect controls), and if so, whether it is necessary to obtain audit evidence supporting the effective operation of those indirect controls. (Ref: Para. A30-A31)

Timing of Tests of Controls

11. The auditor shall test controls for the particular time, or throughout the period, for which the auditor intends to rely on those controls, subject to paragraphs 12 and 15 below, in order to provide an appropriate basis for the auditor's intended reliance. (Ref: Para. A32)

Using audit evidence obtained during an interim period

12. When the auditor obtains audit evidence about the operating effectiveness of controls during an interim period, the auditor shall:
- (a) Obtain audit evidence about significant changes to those controls subsequent to the interim period; and
 - (b) Determine the additional audit evidence to be obtained for the remaining period. (Ref: Para. A33-A34)

Using audit evidence obtained in previous audits

13. In determining whether it is appropriate to use audit evidence about the operating effectiveness of

controls obtained in previous audits, and, if so, the length of the time period that may elapse before retesting a control, the auditor shall consider the following:

- (a) The effectiveness of other elements of internal control, including the control environment, the entity's monitoring of controls, and the entity's risk assessment process;
- (b) The risks arising from the characteristics of the control, including whether it is manual or automated;
- (c) The effectiveness of general IT-controls;
- (d) The effectiveness of the control and its application by the entity, including the nature and extent of deviations in the application of the control noted in previous audits, and whether there have been personnel changes that significantly affect the application of the control;
- (e) Whether the lack of a change in a particular control poses a risk due to changing circumstances; and
- (f) The risks of material misstatement and the extent of reliance on the control. (Ref: Para. A35)

14. If the auditor plans to use audit evidence from a previous audit about the operating effectiveness of specific controls, the auditor shall establish the continuing relevance of that evidence by obtaining audit evidence about whether significant changes in those controls have occurred subsequent to the previous audit. The auditor shall obtain this evidence by performing inquiry combined with observation or inspection, to confirm the understanding of those specific controls, and:

- (a) If there have been changes that affect the continuing relevance of the audit evidence from the previous audit, the auditor shall test the controls in the current audit. (Ref: Para. A36)
- (b) If there have not been such changes, the auditor shall test the controls at least once in every third audit, and shall test some controls each audit to avoid the possibility of testing all the controls on which the auditor intends to rely in a single audit period with no testing of controls in the subsequent two audit periods. (Ref: Para. A37-A39)

Controls over significant risks

15. When the auditor plans to rely on controls over a risk the auditor has determined to be a significant risk, the auditor shall test those controls in the current period.

Evaluating the Operating Effectiveness of Controls

16. When evaluating the operating effectiveness of relevant controls, the auditor shall evaluate whether misstatements that have been detected by substantive procedures indicate that controls are not operating effectively. The absence of misstatements detected by substantive procedures, however, does not provide audit evidence that controls related to the assertion being tested are effective. (Ref: Para. A40)

17. When deviations from controls upon which the auditor intends to rely are detected, the auditor shall make specific inquiries to understand these matters and their potential consequences, and shall determine whether:

- (a) The tests of controls that have been performed provide an appropriate basis for reliance on the controls;
- (b) Additional tests of controls are necessary; or
- (c) The potential risks of misstatement need to be addressed using substantive procedures. (Ref: Para. A41)

Substantive Procedures

18. Irrespective of the assessed risks of material misstatement, the auditor shall design and perform substantive procedures for each material class of transactions, account balance, and disclosure. (Ref: Para. A42-A47)

I.246 Auditing Pronouncements

19. The auditor shall consider whether external confirmation procedures are to be performed as substantive audit procedures. (Ref: Para. A48-A51)

Substantive Procedures Related to the Financial Statement Closing Process

20. The auditor's substantive procedures shall include the following audit procedures related to the financial statement closing process:

- (a) Agreeing or reconciling the financial statements with the underlying accounting records; and
- (b) Examining material journal entries and other adjustments made during the course of preparing the financial statements. (Ref: Para. A52)

Substantive Procedures Responsive to Significant Risks

21. When the auditor has determined that an assessed risk of material misstatement at the assertion level is a significant risk, the auditor shall perform substantive procedures that are specifically responsive to that risk. When the approach to a significant risk consists only of substantive procedures, those procedures shall include tests of details. (Ref: Para. A53)

Timing of Substantive Procedures (Ref: Para.A54)

22. When substantive procedures are performed at an interim date, the auditor shall cover the remaining period by performing:

- (a) substantive procedures, combined with tests of controls for the intervening period; or
- (b) if the auditor determines that it is sufficient, further substantive procedures only;

that provide a reasonable basis for extending the audit conclusions from the interim date to the period end. (Ref: Para. A55-A57)

23. If misstatements that the auditor did not expect when assessing the risks of material misstatement are detected at an interim date, the auditor shall evaluate whether the related assessment of risk and the planned nature, timing, or extent of substantive procedures covering the remaining period need to be modified. (Ref: Para. A58)

Adequacy of Presentation and Disclosure

24. The auditor shall perform audit procedures to evaluate whether the overall presentation of the financial statements, including the related disclosures, is in accordance with the applicable financial reporting framework. (Ref: Para. A59)

Evaluating the Sufficiency and Appropriateness of Audit Evidence

25. Based on the audit procedures performed and the audit evidence obtained, the auditor shall evaluate before the conclusion of the audit whether the assessments of the risks of material misstatement at the assertion level remain appropriate. (Ref: Para. A60-A61)

26. The auditor shall conclude whether sufficient appropriate audit evidence has been obtained. In forming an opinion, the auditor shall consider all relevant audit evidence, regardless of whether it appears to corroborate or to contradict the assertions in the financial statements. (Ref: Para. A62)

27. If the auditor has not obtained sufficient appropriate audit evidence as to a material financial statement assertion, the auditor shall attempt to obtain further audit evidence. If the auditor is unable to obtain sufficient appropriate audit evidence, the auditor shall express a qualified opinion or a disclaimer of opinion.

Documentation

28. The auditor shall document:

- (a) The overall responses to address the assessed risks of material misstatement at the financial

statement level, and the nature, timing and extent of the further audit procedures performed;

- (b) The linkage of those procedures with the assessed risks at the assertion level; and
- (c) The results of the audit procedures, including the conclusions where these are not otherwise clear. (Ref: Para. A63)

29. If the auditor plans to use audit evidences about the operating effectiveness of controls obtained in previous audits, the auditor shall document the conclusions reached about relying on such controls that were tested in a previous audit.

30. The auditors' documentation shall demonstrate that the financial statements agree or reconcile with the underlying accounting records.

Application and Other Explanatory Material

Overall Responses (Ref: Para. 5)

A1. Overall responses to address the assessed risks of material misstatement at the financial statement level may include:

- Emphasizing to the audit team the need to maintain professional skepticism.
- Assigning more experienced staff or those with special skills or using experts.
- Providing more supervision.
- Incorporating additional elements of unpredictability in the selection of further audit procedures to be performed.
- Making general changes to the nature, timing or extent of audit procedures, for example: performing substantive procedures at the period end instead of at an interim date; or modifying the nature of audit procedures to obtain more persuasive audit evidence.

A2. The assessment of the risks of material misstatement at the financial statement level, and thereby the auditor's overall responses, is affected by the auditor's understanding of the control environment. An effective control environment may allow the auditor to have more confidence in internal control and the reliability of audit evidence generated internally within the entity and thus, for example, allow the auditor to conduct some audit procedures at an interim date rather than at the period end. Deficiencies in the control environment, however, have the opposite effect; for example, the auditor may respond to an ineffective control environment by:

- Conducting more audit procedures as of the period end rather than at an interim date.
- Obtaining more extensive audit evidence from substantive procedures.
- Increasing the number of locations to be included in the audit scope.

A3. Such considerations, therefore, have a significant bearing on the auditor's general approach, for example, an emphasis on substantive procedures (substantive approach), or an approach that uses tests of controls as well as substantive procedures (combined approach).

Audit Procedures Responsive to the Assessed Risks of Material Misstatement at the Assertion Level

The Nature, Timing and Extent of Further Audit Procedures (Ref: Para. 6)

A4. The auditor's assessment of the identified risks at the assertion level provides a basis for considering the appropriate audit approach for designing and performing further audit procedures. For example, (as

I.248 Auditing Pronouncements

appropriate and notwithstanding the requirements of this SA)¹, the auditor may determine that:

- (a) Only by performing tests of controls may the auditor achieve an effective response to the assessed risk of material misstatement for a particular assertion;
- (b) Performing only substantive procedures is appropriate for particular assertions and, therefore, the auditor excludes the effect of controls from the relevant risk assessment. This may be because the auditor's risk assessment procedures have not identified any effective controls relevant to the assertion, or because testing controls would be inefficient and therefore the auditor does not intend to rely on the operating effectiveness of controls in determining the nature, timing and extent of substantive procedures; or
- (c) A combined approach using both tests of controls and substantive procedures is an effective approach.

A5. The nature of an audit procedure refers to its purpose (i.e., test of controls or substantive procedure) and its type (i.e., inspection, observation, inquiry, confirmation, recalculation, reperformance, or analytical procedure). The nature of the audit procedures is of most importance in responding to the assessed risks.

A6. Timing of an audit procedure refers to when it is performed, or the period or date to which the audit evidence applies.

A7. Extent of an audit procedure refers to the quantity to be performed, for example, a sample size or the number of observations of a control activity.

A8. Designing and performing further audit procedures whose nature, timing and extent are based on and are responsive to the assessed risks of material misstatement at the assertion level provides a clear linkage between the auditors' further audit procedures and the risk assessment.

Responding to the Assessed Risks at the Assertion Level (Ref: Para. 7(a))

Nature

A9. The auditor's assessed risks may affect both the types of audit procedures to be performed and their combination. For example, when an assessed risk is high, the auditor may confirm the completeness of the terms of a contract with the counterparty, in addition to inspecting the document. Further, certain audit procedures may be more appropriate for some assertions than others. For example, in relation to revenue, tests of controls may be most responsive to the assessed risk of misstatement of the completeness assertion, whereas substantive procedures may be most responsive to the assessed risk of misstatement of the occurrence assertion.

A10. The reasons for the assessment given to a risk are relevant in determining the nature of audit procedures. For example, if an assessed risk is lower because of the particular characteristics of a class of transactions without consideration of the related controls, then the auditor may determine that substantive analytical procedures alone provide sufficient appropriate audit evidence. On the other hand, if the assessed risk is lower because of internal controls, and the auditor intends to base the substantive procedures on that low assessment, then the auditor performs tests of those controls, as required by paragraph 8(a). This may be the case, for example, for a class of transactions of reasonably uniform, non-complex characteristics that are routinely processed and controlled by the entity's information system.

Timing

A11. The auditor may perform tests of controls or substantive procedures at an interim date or at the period end. The higher the risk of material misstatement, the more likely it is that the auditor may

¹ For example, as required by paragraph 18, irrespective of the approach selected, the auditor designs and performs substantive procedures for each significant class of transactions, account balance, and disclosure.

decide it is more effective to perform substantive procedures nearer to, or at, the period end rather than at an earlier date, or to perform audit procedures unannounced or at unpredictable times (for example, performing audit procedures at selected locations on an unannounced basis). This is particularly relevant when considering the response to the risks of fraud. For example, the auditor may conclude that, when the risks of intentional misstatement or manipulation have been identified, audit procedures to extend audit conclusions from interim date to the period end would not be effective.

A12. On the other hand, performing audit procedures before the period end may assist the auditor in identifying significant matters at an early stage of the audit, and consequently resolving them with the assistance of management or developing an effective audit approach to address such matters.

A13. In addition, certain audit procedures can be performed only at or after the period end, for example:

- Agreeing the financial statements to the accounting records;
- Examining adjustments made during the course of preparing the financial statements; and
- Procedures to respond to a risk that, at the period end, the entity may have entered into improper sales contracts, or transactions may not have been finalised.

A14. Further relevant factors that influence the auditor's consideration of when to perform audit procedures include the following:

- The control environment.
- When relevant information is available (for example, electronic files may subsequently be overwritten, or procedures to be observed may occur only at certain times).
- The nature of the risk (for example, if there is a risk of inflated revenues to meet earnings expectations by subsequent creation of false sales agreements, the auditor may wish to examine contracts available on the date of the period end).
- The period or date to which the audit evidence relates.

Extent

A15. The extent of an audit procedure judged necessary is determined after considering the materiality, the assessed risk, and the degree of assurance the auditor plans to obtain. When a single purpose is met by a combination of procedures, the extent of each procedure is considered separately. In general, the extent of audit procedures increases as the risk of material misstatement increases. For example, in response to the assessed risk of material misstatement due to fraud, increasing sample sizes or performing substantive analytical procedures at a more detailed level may be appropriate. However, increasing the extent of an audit procedure is effective only if the audit procedure itself is relevant to the specific risk.

A16. The use of computer-assisted audit techniques (CAATs) may enable more extensive testing of electronic transactions and account files, which may be useful when the auditor decides to modify the extent of testing, for example, in responding to the risks of material misstatement due to fraud. Such techniques can be used to select sample transactions from key electronic files, to sort transactions with specific characteristics, or to test an entire population instead of a sample.

A17. In certain circumstances, the audit mandate and any other special auditing requirements may affect the auditor's consideration of the nature, timing and extent of further audit procedures.

Considerations specific to smaller entities

A18. In the case of very small entities, there may not be many control activities that could be identified by the auditor, or the extent to which their existence or operation have been documented by the entity

I.250 Auditing Pronouncements

may be limited. In such cases, it may be more efficient for the auditor to perform further audit procedures that are primarily substantive procedures. In some rare cases, however, the absence of control activities or of other components of control may make it impossible to obtain sufficient appropriate audit evidence.

Higher Assessments of Risk (Ref: Para 7(b))

A19. When obtaining more persuasive audit evidence because of a higher assessment of risk, the auditor may increase the quantity of the evidence, or obtain evidence that is more relevant or reliable, e.g., by placing more emphasis on obtaining third party evidence or by obtaining corroborating evidence from a number of independent sources.

Tests of Controls

Designing and Performing Tests of Controls (Ref: Para. 8)

A20. Tests of controls are performed only on those controls that the auditor has determined are suitably designed to prevent, or detect and correct, a material misstatement in an assertion. If substantially different controls were used at different times during the period under audit, each is considered separately.

A21. Testing the operating effectiveness of controls is different from obtaining an understanding of and evaluating the design and implementation of controls. However, the same types of audit procedures are used. The auditor may, therefore, decide it is efficient to test the operating effectiveness of controls at the same time as evaluating their design and determining that they have been implemented.

A22. Further, although some risk assessment procedures may not have been specifically designed as tests of controls, they may nevertheless provide audit evidence about the operating effectiveness of the controls and, consequently, serve as tests of controls. For example, the auditor's risk assessment procedures may have included:

- Inquiring about management's use of budgets.
- Observing management's comparison of monthly budgeted and actual expenses.
- Inspecting reports pertaining to the investigation of variances between budgeted and actual amounts.

These audit procedures provide knowledge about the design of the entity's budgeting policies and whether they have been implemented, but may also provide audit evidence about the effectiveness of the operation of budgeting policies in preventing or detecting material misstatements in the classification of expenses.

A23. In addition, the auditor may design a test of controls to be performed concurrently with a test of details on the same transaction. Although the purpose of a test of controls is different from the purpose of a test of details, both may be accomplished concurrently by performing a test of controls and a test of details on the same transaction, also known as a dual-purpose test. For example, the auditor may design, and evaluate the results of, a test to examine an invoice to determine whether it has been approved and to provide substantive audit evidence of a transaction. A dual-purpose test is designed and evaluated by considering each purpose of the test separately.

A24. In some cases, as discussed in SA 315, the auditor may find it impossible to design effective substantive procedures that by themselves provide sufficient appropriate audit evidence at the assertion level². This may occur when an entity conducts its business using IT and no documentation of transactions is produced or maintained, other than through the IT system. In such cases, paragraph 8(b) requires the auditor to perform tests of relevant controls.

² SA 315, paragraph 30.

Audit Evidence and Intended Reliance (Ref: Para. 9)

A25. A higher level of assurance may be sought about the operating effectiveness of controls when the approach adopted consists primarily of tests of controls, in particular where it is not possible or practicable to obtain sufficient appropriate audit evidence only from substantive procedures.

Nature and Extent of Tests of Controls

Other audit procedures in combination with inquiry (Ref: Para. 10(a))

A26. Inquiry alone is not sufficient to test the operating effectiveness of controls. Accordingly, other audit procedures are performed in combination with inquiry. In this regard, inquiry combined with inspection or reperformance may provide more assurance than inquiry and observation, since an observation is pertinent only at the point in time at which it is made.

A27. The nature of the particular control influences the type of procedure required to obtain audit evidence about whether the control was operating effectively. For example, if operating effectiveness is evidenced by documentation, the auditor may decide to inspect it to obtain audit evidence about operating effectiveness. For other controls, however, documentation may not be available or relevant. For example, documentation of operation may not exist for some factors in the control environment, such as assignment of authority and responsibility, or for some types of control activities, such as control activities performed by a computer. In such circumstances, audit evidence about operating effectiveness may be obtained through inquiry in combination with other audit procedures such as observation or the use of CAATs.

Extent of tests of controls

A28. When more persuasive audit evidence is needed regarding the effectiveness of a control, it may be appropriate to increase the extent of testing of the control. As well as the degree of reliance on controls, matters the auditor may consider in determining the extent of tests of controls include the following:

- The frequency of the performance of the control by the entity during the period.
- The length of time during the audit period that the auditor is relying on the operating effectiveness of the control.
- The expected rate of deviation from a control.
- The relevance and reliability of the audit evidence to be obtained regarding the operating effectiveness of the control at the assertion level.
- The extent to which audit evidence is obtained from tests of other controls related to the assertion.

SA 530, "Audit Sampling" contains further guidance on the extent of testing.

A29. Because of the inherent consistency of IT processing, it may not be necessary to increase the extent of testing of an automated control. An automated control can be expected to function consistently unless the program (including the tables, files, or other permanent data used by the program) is changed. Once the auditor determines that an automated control is functioning as intended (which could be done at the time the control is initially implemented or at some other date), the auditor may consider performing tests to determine that the control continues to function effectively. Such tests might include determining that:

- Changes to the program are not made without being subject to the appropriate program change controls;
- The authorised version of the program is used for processing transactions; and
- Other relevant general controls are effective.

Such tests also might include determining that changes to the programs have not been made, as may be the

I.252 Auditing Pronouncements

case when the entity uses packaged software applications without modifying or maintaining them. For example, the auditor may inspect the record of the administration of IT security to obtain audit evidence that unauthorised access has not occurred during the period.

Testing of indirect controls (Ref: Para. 10(b))

A30. In some circumstances, it may be necessary to obtain audit evidence supporting the effective operation of indirect controls. For example, when the auditor decides to test the effectiveness of a user review of exception reports detailing sales in excess of authorized credit limits, the user review and related follow up is the control that is directly of relevance to the auditor. Controls over the accuracy of the information in the reports (for example, the general IT-controls) are described as "indirect" controls.

A31. Because of the inherent consistency of IT processing, audit evidence about the implementation of an automated application control, when considered in combination with audit evidence about the operating effectiveness of the entity's general controls (in particular, change controls), may also provide substantial audit evidence about its operating effectiveness.

Timing of Tests of Controls

Intended period of reliance (Ref: Para. 11)

A32. Audit evidence pertaining only to a point in time may be sufficient for the auditor's purpose, for example, when testing controls over the entity's physical inventory counting at the period end. If, on the other hand, the auditor intends to rely on a control over a period, tests that are capable of providing audit evidence that the control operated effectively at relevant times during that period are appropriate. Such tests may include tests of the entity's monitoring of controls.

Using audit evidence obtained during an interim period (Ref: Para. 12)

A33. Relevant factors in determining what additional audit evidence to obtain about controls that were operating during the period remaining after an interim period, include:

- The significance of the assessed risks of material misstatement at the assertion level.
- The specific controls that were tested during the interim period, and significant changes to them since they were tested, including changes in the information system, processes, and personnel.
- The degree to which audit evidence about the operating effectiveness of those controls was obtained.
- The length of the remaining period.
- The extent to which the auditor intends to reduce further substantive procedures based on the reliance of controls.
- The control environment.

A34. Additional audit evidence may be obtained, for example, by extending tests of controls over the remaining period or testing the entity's monitoring of controls.

Using audit evidence obtained in previous audits (Ref: Para.13)

A35. In certain circumstances, audit evidence obtained from previous audits may provide audit evidence where the auditor performs audit procedures to establish its continuing relevance. For example, in performing a previous audit, the auditor may have determined that an automated control was functioning as intended. The auditor may obtain audit evidence to determine whether changes to the automated control have been made that affect its continued effective functioning through, for example, inquiries of management and the inspection of logs to indicate what controls have been changed. Consideration of audit evidence about these changes may support either increasing or decreasing the expected audit evidence to be obtained in the current period about the operating effectiveness of the controls.

Controls that have changed from previous audits (Ref: Para. 14(a))

A36. Changes may affect the relevance of the audit evidence obtained in previous audits such that there may no longer be a basis for continued reliance. For example, changes in a system that enable an entity to receive a new report from the system probably do not affect the relevance of audit evidence from a previous audit; however, a change that causes data to be accumulated or calculated differently does affect it.

Controls that have not changed from previous audits (Ref: Para. 14(b))

A37. The auditor's decision on whether to rely on audit evidence obtained in previous audits for controls that:

- (a) Have not changed since they were last tested; and
- (b) Are not controls that mitigate a significant risk;

is a matter of professional judgment. In addition, the length of time between retesting such controls is also a matter of professional judgment, but is required by paragraph 14 (b) to be at least once in every third year.

A38. In general, the higher the risk of material misstatement, or the greater the reliance on controls, the shorter the time period elapsed, if any, is likely to be. Factors that may decrease the period for retesting a control, or result in not relying on audit evidence obtained in previous audits at all, include the following:

- A deficient control environment.
- Deficient monitoring of controls.
- A significant manual element to the relevant controls.
- Personnel changes that significantly affect the application of the control.
- Changing circumstances that indicate the need for changes in the control.
- Deficient general IT-controls.

A39. When there are a number of controls for which the auditor intends to rely on audit evidence obtained in previous audits, testing some of those controls in each audit provides corroborating information about the continuing effectiveness of the control environment. This contributes to the auditor's decision about whether it is appropriate to rely on audit evidence obtained in previous audits.

Evaluating the Operating Effectiveness of Controls (Ref: Para.16-17)

A40. A material misstatement detected by the auditor's procedures is a strong indicator of the existence of a significant deficiency in internal control.

A41. The concept of effectiveness of the operation of controls recognises that some deviations in the way controls are applied by the entity may occur. Deviations from prescribed controls may be caused by such factors as changes in key personnel, significant seasonal fluctuations in volume of transactions and human error. The detected rate of deviation, in particular in comparison with the expected rate, may indicate that the control cannot be relied on to reduce risk at the assertion level to that assessed by the auditor.

Substantive Procedures (Ref: Para. 18)

A42. Paragraph 18 requires the auditor to design and perform substantive procedures for each material class of transactions, account balance, and disclosure, irrespective of the assessed risks of material misstatement. This requirement reflects the facts that: (i) the auditor's assessment of risk is judgmental and so may not identify all risks of material misstatement; and (ii) there are inherent limitations to internal control, including management override.

Nature and Extent of Substantive Procedures

A43. Depending on the circumstances, the auditor may determine that:

- Performing only substantive analytical procedures will be sufficient to reduce audit risk to an acceptably low level. For example, where the auditor's assessment of risk is supported by audit evidence from tests of controls.
- Only tests of details are appropriate.
- A combination of substantive analytical procedures and tests of details are most responsive to the assessed risks.

A44. Substantive analytical procedures are generally more applicable to large volumes of transactions that tend to be predictable over time. SA 520, "Analytical Procedures" establishes requirements and provides guidance on the application of analytical procedures during an audit.

A45. The nature of the risk and assertion is relevant to the design of tests of details. For example, tests of details related to the existence or occurrence assertion may involve selecting from items contained in a financial statement amount and obtaining the relevant audit evidence. On the other hand, tests of details related to the completeness assertion may involve selecting from items that are expected to be included in the relevant financial statement amount and investigating whether they are included.

A46. Because the assessment of the risk of material misstatement takes account of internal control, the extent of substantive procedures may need to be increased when the results from tests of controls are unsatisfactory. However, increasing the extent of an audit procedure is appropriate only if the audit procedure itself is relevant to the specific risk.

A47. In designing tests of details, the extent of testing is ordinarily thought of in terms of the sample size. However, other matters are also relevant, including whether it is more effective to use other selective means of testing. See SA 500³.

Considering Whether External Confirmation Procedures Are to Be Performed (Ref: Para. 19)

A48. External confirmation procedures frequently are relevant when addressing assertions associated with account balances and their elements, but need not be restricted to these items. For example, the auditor may request external confirmation of the terms of agreements, contracts, or transactions between an entity and other parties. External confirmation procedures also may be performed to obtain audit evidence about the absence of certain conditions. For example, a request may specifically seek confirmation that no "side agreement" exists that may be relevant to an entity's revenue cut-off assertion. Other situations where external confirmation procedures may provide relevant audit evidence in responding to assessed risks of material misstatement include:

- Bank balances and other information relevant to banking relationships.
- Accounts receivable balances and terms.
- Inventories held by third parties at bonded warehouses for processing or on consignment.
- Property title deeds held by lawyers or financiers for safe custody or as security.
- Investments held for safekeeping by third parties, or purchased from stockbrokers but not delivered at the balance sheet date.
- Amounts due to lenders, including relevant terms of repayment and restrictive covenants.

³ SA 500, "Audit Evidence", paragraph 10.

- Accounts payable balances and terms.

A49. Although external confirmations may provide relevant audit evidence relating to certain assertions, there are some assertions for which external confirmations provide less relevant audit evidence. For example, external confirmations provide less relevant audit evidence relating to the recoverability of accounts receivable balances, than they do of their existence.

A50. The auditor may determine that external confirmation procedures performed for one purpose provide an opportunity to obtain audit evidence about other matters. For example, confirmation requests for bank balances often include requests for information relevant to other financial statement assertions. Such considerations may influence the auditor's decision about whether to perform external confirmation procedures.

A51. Factors that may assist the auditor in determining whether external confirmation procedures are to be performed as substantive audit procedures include:

- The confirming party's knowledge of the subject matter – responses may be more reliable if provided by a person at the confirming party who has the requisite knowledge about the information being confirmed.
- The ability or willingness of the intended confirming party to respond – for example, the confirming party:
 - May not accept responsibility for responding to a confirmation request;
 - May consider responding too costly or time consuming;
 - May have concerns about the potential legal liability resulting from responding;
 - May account for transactions in different currencies; or
 - May operate in an environment where responding to confirmation requests is not a significant aspect of day-to-day operations.

In such situations, confirming parties may not respond, may respond in a casual manner or may attempt to restrict the reliance placed on the response.

- The objectivity of the intended confirming party – if the confirming party is a related party of the entity, responses to confirmation requests may be less reliable.

Substantive Procedures Related to the Financial Statement Closing Process (Ref: Para. 20(b))

A52. The nature, and also the extent, of the auditor's examination of journal entries and other adjustments depends on the nature and complexity of the entity's financial reporting process and the related risks of material misstatement.

Substantive Procedures Responsive to Significant Risks (Ref: Para. 21)

A53. Paragraph 21 of this SA requires the auditor to perform substantive procedures that are specifically responsive to risks the auditor has determined to be significant risks. Audit evidence in the form of external confirmations received directly by the auditor from appropriate confirming parties may assist the auditor in obtaining audit evidence with the high level of reliability that the auditor requires to respond to significant risks of material misstatement, whether due to fraud or error. For example, if the auditor identifies that management is under pressure to meet earnings expectations, there may be a risk that management is inflating sales by improperly recognising revenue related to sales agreements with terms that preclude revenue recognition or by invoicing sales before shipment. In these circumstances, the auditor may, for example, design external confirmation procedures not only to confirm outstanding amounts, but also to confirm the details of the sales agreements, including date, any rights of return and delivery terms. In

I.256 Auditing Pronouncements

addition, the auditor may find it effective to supplement such external confirmation procedures with inquiries of non-financial personnel in the entity regarding any changes in sales agreements and delivery terms.

Timing of Substantive Procedures (Ref: Para. 22-23)

A54. In most cases, audit evidence from a previous audit's substantive procedures provides little or no audit evidence for the current period. There are, however, exceptions, e.g., a legal opinion obtained in a previous audit related to the structure of a securitisation to which no changes have occurred, may be relevant in the current period. In such cases, it may be appropriate to use audit evidence from a previous audit's substantive procedures if that evidence and the related subject matter have not fundamentally changed, and audit procedures have been performed during the current period to establish its continuing relevance.

Using audit evidence obtained during an interim period (Ref: Para. 22)

A55. In some circumstances, the auditor may determine that it is effective to perform substantive procedures at an interim date, and to compare and reconcile information concerning the balance at the period end with the comparable information at the interim date to:

- (a) Identify amounts that appear unusual;
- (b) Investigate any such amounts; and
- (c) Perform substantive analytical procedures or tests of details to test the intervening period.

A56. Performing substantive procedures at an interim date without undertaking additional procedures at a later date increases the risk that the auditor will not detect misstatements that may exist at the period end. This risk increases as the remaining period is lengthened. Factors such as the following may influence whether to perform substantive procedures at an interim date:

- The control environment and other relevant controls.
- The availability at a later date of information necessary for the auditor's procedures.
- The purpose of the substantive procedure.
- The assessed risk of material misstatement.
- The nature of the class of transactions or account balance and related assertions.
- The ability of the auditor to perform appropriate substantive procedures or substantive procedures combined with tests of controls to cover the remaining period in order to reduce the risk that misstatements that may exist at the period end will not be detected.

A57. Factors such as the following may influence whether to perform substantive analytical procedures with respect to the period between the interim date and the period end:

- Whether the period end balances of the particular classes of transactions or account balances are reasonably predictable with respect to amount, relative significance, and composition.
- Whether the entity's procedures for analysing and adjusting such classes of transactions or account balances at interim dates and for establishing proper accounting cutoffs are appropriate.
- Whether the information system relevant to financial reporting will provide information concerning the balances at the period end and the transactions in the remaining period that is sufficient to permit investigation of:
 - (a) Significant unusual transactions or entries (including those at or near the period end);
 - (b) Other causes of significant fluctuations, or expected fluctuations that did not occur; and
 - (c) Changes in the composition of the classes of transactions or account balances.

Misstatements detected at an interim date (Ref: Para. 23)

A58. When the auditor concludes that the planned nature, timing or extent of substantive procedures covering the remaining period need to be modified as a result of unexpected misstatements detected at an interim date, such modification may include extending or repeating the procedures performed at the interim date at the period end.

Adequacy of Presentation and Disclosure (Ref: Para. 24)

A59. Evaluating the overall presentation of the financial statements, including the related disclosures, relates to whether the individual financial statements are presented in a manner that reflects the appropriate classification and description of financial information, and the form, arrangement, and content of the financial statements and their appended notes. This includes, for example, the terminology used, the amount of detail given, the classification of items in the statements, and the bases of amounts set forth.

Evaluating the Sufficiency and Appropriateness of Audit Evidence (Ref: Para. 25-27)

A60. An audit of financial statements is a cumulative and iterative process. As the auditor performs planned audit procedures, the audit evidence obtained may cause the auditor to modify the nature, timing or extent of other planned audit procedures. Information may come to the auditor's attention that differs significantly from the information on which the risk assessment was based. For example,

- The extent of misstatements that the auditor detects by performing substantive procedures may alter the auditor's judgment about the risk assessments and may indicate a significant deficiency in internal control.
- The auditor may become aware of discrepancies in accounting records, or conflicting or missing evidence.
- Analytical procedures performed at the overall review stage of the audit may indicate a previously unrecognised risk of material misstatement.

In such circumstances, the auditor may need to re-evaluate the planned audit procedures, based on the revised consideration of assessed risks for all or some of the classes of transactions, account balances, or disclosures and related assertions. SA 315 contains further guidance on revising the auditor's risk assessment⁴.

A61. The auditor cannot assume that an instance of fraud or error is an isolated occurrence. Therefore, the consideration of how the detection of a misstatement affects the assessed risks of material misstatement is important in determining whether the assessment remains appropriate.

A62. The auditor's judgment as to what constitutes sufficient appropriate audit evidence is influenced by such factors as the following:

- Significance of the potential misstatement in the assertion and the likelihood of its having a material effect, individually or aggregated with other potential misstatements, on the financial statements.
- Effectiveness of management's responses and controls to address the risks.
- Experience gained during previous audits with respect to similar potential misstatements.
- Results of audit procedures performed, including whether such audit procedures identified specific instances of fraud or error.
- Source and reliability of the available information.
- Persuasiveness of the audit evidence.

⁴ SA 315, paragraph 31.

I.258 Auditing Pronouncements

- Understanding of the entity and its environment, including the entity's internal control.

Documentation (Ref: Para. 28)

A63. The form and extent of audit documentation is a matter of professional judgment, and is influenced by the nature, size and complexity of the entity and its internal control, availability of information from the entity and the audit methodology and technology used in the audit.

Material Modifications to ISA 330, The Auditor's Responses to Assessed Risks

Deletion

1. Paragraph A17 of the Application Section of ISA 330 dealt with the application of the requirements of ISA 330 to the audits of public sector entities regarding the auditor's consideration of the nature, timing and extent of further audit procedures. Since as mentioned in the "Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services", the Standards issued by the Auditing and Assurance Standards Board, apply equally to all entities, irrespective of their form, nature and size, a specific reference to applicability of the Standard to public sector entities has been deleted.

Further, it is also possible that even in case of non-public sector entities the auditor may be required to give special considerations regarding the nature, timing and extent as a result of the terms of appointment of the auditor or any other special reporting requirement under the statute or regulation under which the entity operates. Accordingly, the spirit of erstwhile A17, highlighting the fact that in some cases, the auditor's consideration of the nature, timing and extent of further audit procedures may be affected by the audit mandate or any other special auditing requirements, has been retained.

SA 402*

**Audit Considerations relating to an Entity Using a
Service Organisation**
*(Effective for all audits relating to
accounting periods beginning on or after April 1, 2010)*

Introduction

Scope of this SA

1. This Standard on Auditing (SA) deals with the user auditor's responsibility to obtain sufficient appropriate audit evidence when a user entity uses the services of one or more service organisations. Specifically, it expands on how the user auditor applies SA 315¹ and SA 330² in obtaining an understanding of the user entity, including internal control relevant to the audit, sufficient to identify and assess the risks of material misstatement and in designing and performing further audit procedures responsive to those risks.
2. Many entities outsource aspects of their business to organisations that provide services ranging from performing a specific task under the direction of an entity to replacing an entity's entire business units or functions, such as the tax compliance function. Many of the services provided by such organisations are integral to the entity's business operations; however, not all those services are relevant to the audit.
3. Services provided by a service organisation are relevant to the audit of a user entity's financial statements when those services, and the controls over them, are part of the user entity's information system, including related business processes, relevant to financial reporting. Although most controls at the service organisation are likely to relate to financial reporting, there may be other controls that may also be relevant to the audit, such as controls over the safeguarding of assets. A service organisation's services are part of a user entity's information system, including related business processes, relevant to financial reporting if these services affect any of the following:
 - (a) The classes of transactions in the user entity's operations that are significant to the user entity's financial statements;
 - (b) The procedures, within both information technology (IT) and manual systems, by which the user entity's transactions are initiated, recorded, processed, corrected as necessary, transferred to the general ledger and reported in the financial statements;
 - (c) The related accounting records, either in electronic or manual form, supporting information and specific accounts in the user entity's financial statements that are used to initiate, record, process and report the user entity's transactions; this includes the correction of incorrect information and how information is transferred to the general ledger;
 - (d) How the user entity's information system captures events and conditions, other than transactions, that are significant to the financial statements;

* Published in August, 2009 issue of the Journal.

¹ SA 315, "Identifying and Assessing the Risks of Material Misstatement Through Understanding the Entity and Its Environment".

² SA 330, "The Auditor's Responses to Assessed Risks".

I.260 Auditing Pronouncements

- (e) The financial reporting process used to prepare the user entity's financial statements, including significant accounting estimates and disclosures; and
 - (f) Controls surrounding journal entries, including non-standard journal entries used to record non-recurring, unusual transactions or adjustments.
4. The nature and extent of work to be performed by the user auditor regarding the services provided by a service organisation depend on the nature and significance of those services to the user entity and the relevance of those services to the audit.
5. This SA does not apply to services provided by financial institutions that are limited to processing, for an entity's account held at the financial institution, transactions that are specifically authorised by the entity, such as the processing of checking account transactions by a bank or the processing of securities transactions by a broker. In addition, this SA does not apply to the audit of transactions arising from proprietary financial interests in other entities, such as partnerships, corporations and joint ventures, when proprietary interests are accounted for and reported to interest holders.

Effective Date

6. This SA is effective for audits of financial statements for periods beginning on or after April 1, 2010.

Objectives

7. The objectives of the user auditor, when the user entity uses the services of a service organisation, are:
- (a) To obtain an understanding of the nature and significance of the services provided by the service organisation and their effect on the user entity's internal control relevant to the audit, sufficient to identify and assess the risks of material misstatement; and
 - (b) To design and perform audit procedures responsive to those risks.

Definitions

8. For purposes of the SAs, the following terms have the meanings attributed below:
- (a) *Complementary user entity controls* – Controls that the service organisation assumes, in the design of its service, will be implemented by user entities, and which, if necessary to achieve control objectives, are identified in the description of its system.
 - (b) *Report on the description and design of controls at a service organisation (referred to in this SA as a Type 1 report)* – A report that comprises:
 - (i) A description, prepared by management of the service organisation, of the service organisation's system, control objectives and related controls that have been designed and implemented as at a specified date; and
 - (ii) A report by the service auditor with the objective of conveying reasonable assurance that includes the service auditor's opinion on the description of the service organisation's system, control objectives and related controls and the suitability of the design of the controls to achieve the specified control objectives.
 - (c) *Report on the description, design, and operating effectiveness of controls at a service organisation (referred to in this SA as a Type 2 report)* – A report that comprises:
 - (i) A description, prepared by management of the service organisation, of the service organisation's system, control objectives and related controls, their design and implementation as at a specified date or throughout a specified period and, in some cases, their operating effectiveness throughout a specified period; and

- (ii) A report by the service auditor with the objective of conveying reasonable assurance that includes:
 - a. The service auditor's opinion on the description of the service organisation's system, control objectives and related controls, the suitability of the design of the controls to achieve the specified control objectives, and the operating effectiveness of the controls; and
 - b. A description of the service auditor's tests of the controls and the results thereof.
- (d) *Service auditor* – An auditor who, at the request of the service organisation, provides an assurance report on the controls of a service organisation.
- (e) *Service organisation* – A third-party organisation (or segment of a third-party organisation) that provides services to user entities that are part of those entities' information systems relevant to financial reporting.
- (f) *Service organisation's system* – The policies and procedures designed, implemented and maintained by the service organisation to provide user entities with the services covered by the service auditor's report.
- (g) *Subservice organisation* – A service organisation used by another service organisation to perform some of the services provided to user entities that are part of those user entities' information systems relevant to financial reporting.
- (h) *User auditor* – An auditor who audits and reports on the financial statements of a user entity.
- (i) *User entity* – An entity that uses a service organisation and whose financial statements are being audited.

Requirements

Obtaining an Understanding of the Services Provided by a Service Organisation, Including Internal Control

9. When obtaining an understanding of the user entity in accordance with SA 315,³ the user auditor shall obtain an understanding of how a user entity uses the services of a service organisation in the user entity's operations, including: (Ref: Para. A1-A2)

- (a) The nature of the services provided by the service organisation and the significance of those services to the user entity, including the effect thereof on the user entity's internal control; (Ref: Para. A3-A5)
- (b) The nature and materiality of the transactions processed or accounts or financial reporting processes affected by the service organisation; (Ref: Para. A6)
- (c) The degree of interaction between the activities of the service organisation and those of the user entity; and (Ref: Para. A7)
- (d) The nature of the relationship between the user entity and the service organisation, including the relevant contractual terms for the activities undertaken by the service organisation. (Ref: Para. A8-A11)

10. When obtaining an understanding of internal control relevant to the audit in accordance with SA 315,⁴ the user auditor shall evaluate the design and implementation of relevant controls at the user entity that relate to the services provided by the service organisation, including those that are applied to the transactions processed by the service organisation. (Ref: Para. A12-A14)

³ SA 315, paragraph 11.

⁴ SA 315, paragraph 12.

I.262 Auditing Pronouncements

11. The user auditor shall determine whether a sufficient understanding of the nature and significance of the services provided by the service organisation and their effect on the user entity's internal control relevant to the audit has been obtained to provide a basis for the identification and assessment of risks of material misstatement.
12. If the user auditor is unable to obtain a sufficient understanding from the user entity, the user auditor shall obtain that understanding from one or more of the following procedures: (Ref: Para. A15-A20)
 - (a) Obtaining a Type 1 or Type 2 report, if available;
 - (b) Contacting the service organisation, through the user entity, to obtain specific information;
 - (c) Visiting the service organisation and performing procedures that will provide the necessary information about the relevant controls at the service organisation; or
 - (d) Using another auditor to perform procedures that will provide the necessary information about the relevant controls at the service organisation.

Using a Type 1 or Type 2 Report to Support the User Auditor's Understanding of the Service Organisation

13. In determining the sufficiency and appropriateness of the audit evidence provided by a Type 1 or Type 2 report, the user auditor shall be satisfied as to: (Ref: Para. A21)
 - (a) The service auditor's professional competence (except where the service auditor is a member of the Institute of Chartered Accountants of India) and independence from the service organisation; and
 - (b) The adequacy of the standards under which the Type 1 or Type 2 report was issued.
14. If the user auditor plans to use a Type 1 or Type 2 report as audit evidence to support the user auditor's understanding about the design and implementation of controls at the service organisation, the user auditor shall: (Ref: Para. A22-A23)
 - (a) Evaluate whether the description and design of controls at the service organisation is at a date or for a period that is appropriate for the user auditor's purposes;
 - (b) Evaluate the sufficiency and appropriateness of the evidence provided by the report for the understanding of the user entity's internal control relevant to the audit; and
 - (c) Determine whether complementary user entity controls identified by the service organisation are relevant to the user entity and, if so, obtain an understanding of whether the user entity has designed and implemented such controls.

Responding to the Assessed Risks of Material Misstatement

15. In responding to assessed risks in accordance with SA 330 , the user auditor shall: (Ref: Para. A24-A28)
 - (a) Determine whether sufficient appropriate audit evidence concerning the relevant financial statement assertions is available from records held at the user entity; and, if not,
 - (b) Perform further audit procedures to obtain sufficient appropriate audit evidence or use another auditor to perform those procedures at the service organisation on the user auditor's behalf.

Tests of Controls

16. When the user auditor's risk assessment includes an expectation that controls at the service organisation are operating effectively, the user auditor shall obtain audit evidence about the operating

effectiveness of those controls from one or more of the following procedures: (Ref: Para. A29-A30)

- (a) Obtaining a Type 2 report, if available;
- (b) Performing appropriate tests of controls at the service organisation; or
- (c) Using another auditor to perform tests of controls at the service organisation on behalf of the user auditor.

Using a Type 2 Report as Audit Evidence that Controls at the Service Organisation Are Operating Effectively

17. If, in accordance with paragraph 16(a), the user auditor plans to use a Type 2 report as audit evidence that controls at the service organisation are operating effectively, the user auditor shall determine whether the service auditor's report provides sufficient appropriate audit evidence about the effectiveness of the controls to support the user auditor's risk assessment by: (Ref: Para. A31-A39)
- (a) Evaluating whether the description, design and operating effectiveness of controls at the service organisation is at a date or for a period that is appropriate for the user auditor's purposes;
 - (b) Determining whether complementary user entity controls identified by the service organisation are relevant to the user entity and, if so, obtaining an understanding of whether the user entity has designed and implemented such controls and, if so, testing their operating effectiveness;
 - (c) Evaluating the adequacy of the time period covered by the tests of controls and the time elapsed since the performance of the tests of controls; and
 - (d) Evaluating whether the tests of controls performed by the service auditor and the results thereof, as described in the service auditor's report, are relevant to the assertions in the user entity's financial statements and provide sufficient appropriate audit evidence to support the user auditor's risk assessment.

Type 1 and Type 2 Reports that Exclude the Services of a Subservice Organisation

18. If the user auditor plans to use a Type 1 or a Type 2 report that excludes the services provided by a subservice organisation and those services are relevant to the audit of the user entity's financial statements, the user auditor shall apply the requirements of this SA with respect to the services provided by the subservice organisation. (Ref: Para. A40)

Fraud, Non-Compliance with Laws and Regulations and Uncorrected Misstatements in Relation to Activities at the Service Organisation

19. The user auditor shall inquire of management of the user entity whether the service organisation has reported to the user entity, or whether the user entity is otherwise aware of, any fraud, non-compliance with laws and regulations or uncorrected misstatements affecting the financial statements of the user entity. The user auditor shall evaluate how such matters affect the nature, timing and extent of the user auditor's further audit procedures, including the effect on the user auditor's conclusions and user auditor's report. (Ref: Para. A41)

Reporting by the User Auditor

20. The user auditor shall modify the opinion in the user auditor's report in accordance with SA 705⁵ if the user auditor is unable to obtain sufficient appropriate audit evidence regarding the services provided by the service organisation relevant to the audit of the user entity's financial statements. (Ref: Para. A42)
21. The user auditor shall not refer to the work of a service auditor in the user auditor's report

⁵ SA 705, "Modifications to the Opinion in the Independent Auditor's Report", paragraph 6.

I.264 Auditing Pronouncements

containing an unmodified opinion unless required by law or regulation to do so. If such reference is required by law or regulation, the user auditor's report shall indicate that the reference does not diminish the user auditor's responsibility for the audit opinion. (Ref: Para. A43)

22. If reference to the work of a service auditor is relevant to an understanding of a modification to the user auditor's opinion, the user auditor's report shall indicate that such reference does not diminish the user auditor's responsibility for that opinion. (Ref: Para. A44)

Application and Other Explanatory Material

Obtaining an Understanding of the Services Provided by a Service Organisation, Including Internal Control

Sources of Information (Ref: Para. 9)

- A1. Information on the nature of the services provided by a service organisation may be available from a wide variety of sources, such as:
- User manuals.
 - System overviews.
 - Technical manuals.
 - The contract or service level agreement between the user entity and the service organisation.
 - Reports by service organisations, internal auditors or regulatory authorities on controls at the service organisation.
 - Reports by the service auditor, including management letters, if available.
- A2. Knowledge obtained through the user auditor's experience with the service organisation, for example through experience with other audit engagements, may also be helpful in obtaining an understanding of the nature of the services provided by the service organisation. This may be particularly helpful if the services and controls at the service organisation over those services are highly standardised.

Nature of the Services Provided by the Service Organisation (Ref: Para. 9(a))

- A3. A user entity may use a service organisation such as one that processes transactions and maintains related accountability, or records transactions and processes related data. Service organisations that provide such services include, for example, bank trust departments that invest and service assets for employee benefit plans or for others; mortgage bankers that service mortgages for others; and application service providers that provide packaged software applications and a technology environment that enables customers to process financial and operational transactions.
- A4. Examples of service organisation services that are relevant to the audit include:
- Maintenance of the user entity's accounting records.
 - Management of assets.
 - Initiating, recording or processing transactions as agent of the user entity.

Considerations Specific to Smaller Entities

- A5. Smaller entities may use external bookkeeping services ranging from the processing of certain transactions (e.g., payment of payroll taxes) and maintenance of their accounting records to the preparation of their financial statements. The use of such a service organisation for the preparation of its financial statements does not relieve management of the smaller entity and, where appropriate, those charged with governance of their responsibilities for the financial

statements.⁶

Nature and Materiality of Transactions Processed by the Service Organisation (Ref: Para. 9(b))

A6. A service organisation may establish policies and procedures that affect the user entity's internal control. These policies and procedures are at least in part physically and operationally separate from the user entity. The significance of the controls of the service organisation to those of the user entity depends on the nature of the services provided by the service organisation, including the nature and materiality of the transactions it processes for the user entity. In certain situations, the transactions processed and the accounts affected by the service organisation may not appear to be material to the user entity's financial statements, but the nature of the transactions processed may be significant and the user auditor may determine that an understanding of those controls is necessary in the circumstances.

The Degree of Interaction between the Activities of the Service Organisation and the User Entity (Ref: Para. 9(c))

A7. The significance of the controls of the service organisation to those of the user entity also depends on the degree of interaction between its activities and those of the user entity. The degree of interaction refers to the extent to which a user entity is able to and elects to implement effective controls over the processing performed by the service organisation. For example, a high degree of interaction exists between the activities of the user entity and those at the service organisation when the user entity authorises transactions and the service organisation processes and does the accounting for those transactions. In these circumstances, it may be practicable for the user entity to implement effective controls over those transactions. On the other hand, when the service organisation initiates or initially records, processes, and does the accounting for the user entity's transactions, there is a lower degree of interaction between the two organisations. In these circumstances, the user entity may be unable to, or may elect not to, implement effective controls over these transactions at the user entity and may rely on controls at the service organisation.

Nature of the Relationship between the User Entity and the Service Organisation (Ref: Para. 9(d))

A8. The contract or service level agreement between the user entity and the service organisation may provide for matters such as:

- The information to be provided to the user entity and responsibilities for initiating transactions relating to the activities undertaken by the service organisation;
- The application of requirements of regulatory bodies concerning the form of records to be maintained, or access to them;
- The indemnification, if any, to be provided to the user entity in the event of a performance failure;
- Whether the service organisation will provide a report on its controls and, if so, whether such report would be a Type 1 or Type 2 report;
- Whether the user auditor has rights of access to the accounting records of the user entity maintained by the service organisation and other information necessary for the conduct of the audit; and
- Whether the agreement allows for direct communication between the user auditor and the service auditor.

⁶ SA 200, paragraph 4 and A2-A3.

- A9. There is a direct relationship between the service organisation and the user entity and between the service organisation and the service auditor. These relationships do not necessarily create a direct relationship between the user auditor and the service auditor. When there is no direct relationship between the user auditor and the service auditor, communications between the user auditor and the service auditor are usually conducted through the user entity and the service organisation. A direct relationship may also be created between a user auditor and a service auditor, taking into account the relevant ethical and confidentiality considerations. A user auditor, for example, may use a service auditor to perform procedures on the user auditor's behalf, such as:
- (a) Tests of controls at the service organisation; or
 - (b) Substantive procedures on the user entity's financial statement transactions and balances maintained by a service organisation.
- A10. Auditors generally have broad rights of access established by legislation. However, there may be situations where such rights of access are not available, for example when the service organisation is located in a different jurisdiction. In such situations, the auditor may need to obtain an understanding of the legislation applicable in the different jurisdiction to determine whether appropriate access rights can be obtained. In such cases, the auditor may also obtain or ask the user entity to incorporate rights of access in any contractual arrangements between the user entity and the service organisation.
- A11. In the above context, the auditors may also use another auditor to perform tests of controls or substantive procedures in relation to compliance with law, regulation or other authority.

Understanding the Controls relating to Services provided by the Service Organisation (Ref: Para. 10)

- A12. The user entity may establish controls over the service organisation's services that may be tested by the user auditor and that may enable the user auditor to conclude that the user entity's controls are operating effectively for some or all of the related assertions, regardless of the controls in place at the service organisation. If a user entity, for example, uses a service organisation to process its payroll transactions, the user entity may establish controls over the submission and receipt of payroll information that could prevent or detect material misstatements. These controls may include:
- Comparing the data submitted to the service organisation with reports of information received from the service organisation after the data has been processed.
 - Recomputing a sample of the payroll amounts for clerical accuracy and reviewing the total amount of the payroll for reasonableness.
- A13. In this situation, the user auditor may perform tests of the user entity's controls over payroll processing that would provide a basis for the user auditor to conclude that the user entity's controls are operating effectively for the assertions related to payroll transactions.
- A14. As noted in SA 315,7 in respect of some risks, the user auditor may judge that it is not possible or practicable to obtain sufficient appropriate audit evidence only from substantive procedures. Such risks may relate to the inaccurate or incomplete recording of routine and significant classes of transactions and account balances, the characteristics of which often permit highly automated processing with little or no manual intervention. Such automated processing characteristics may be particularly present when the user entity uses service organisations. In such cases, the user entity's controls over such risks are relevant to the audit and the user auditor is required to obtain an understanding of, and to evaluate, such controls in accordance with paragraphs 9 and 10 of

⁷ SA 315, paragraph 30.

this SA.

Further Procedures When a Sufficient Understanding Cannot Be Obtained from the User Entity
(Ref: Para. 12)

A15. The user auditor's decision as to which procedure, individually or in combination, in paragraph 12 to undertake, in order to obtain the information necessary to provide a basis for the identification and assessment of the risks of material misstatement in relation to the user entity's use of the service organisation, may be influenced by such matters as:

- The size of both the user entity and the service organisation;
- The complexity of the transactions at the user entity and the complexity of the services provided by the service organisation;
- The location of the service organisation (for example, the user auditor may decide to use another auditor to perform procedures at the service organisation on the user auditor's behalf if the service organisation is in a remote location);
- Whether the procedure(s) is expected to effectively provide the user auditor with sufficient appropriate audit evidence; and
- The nature of the relationship between the user entity and the service organisation.

A16. A service organisation may engage a service auditor to report on the description and design of its controls (Type 1 report) or on the description and design of its controls and their operating effectiveness (Type 2 report). Type 1 or Type 2 reports may be issued under Standard on Assurance Engagements (SAE) 34028 or under standards established by an authorised or recognised standards setting organisation (which may identify them by different names, such as Type A or Type B reports).

A17. The availability of a Type 1 or Type 2 report will generally depend on whether the contract between a service organisation and a user entity includes the provision of such a report by the service organisation. A service organisation may also elect, for practical reasons, to make a Type 1 or Type 2 report available to the user entities. However, in some cases, a Type 1 or Type 2 report may not be available to user entities.

A18. In some circumstances, a user entity may outsource one or more significant business units or functions, such as its entire tax planning and compliance functions, or finance and accounting or the controllership function to one or more service organisations. As a report on controls at the service organisation may not be available in these circumstances, visiting the service organisation may be the most effective procedure for the user auditor to gain an understanding of controls at the service organisation, as there is likely to be direct interaction of management of the user entity with management at the service organisation.

A19. Another auditor may be used to perform procedures that will provide the necessary information about the relevant controls at the service organisation. If a Type 1 or Type 2 report has been issued, the user auditor may use the service auditor to perform these procedures as the service auditor has an existing relationship with the service organisation. The user auditor using the work of another auditor may find the guidance in SA 600⁹ useful as it relates to understanding another auditor

⁸ SAE 3402, Assurance Reports on Controls at a Service Organisation.

⁹ SA 600, Using the Work of Another Auditor.

(including that auditor's independence and professional competence¹⁰), involvement in the work of another auditor in planning the nature, extent and timing of such work, and in evaluating the sufficiency and appropriateness of the audit evidence obtained.

A20. A user entity may use a service organisation that in turn uses a sub-service organisation to provide some of the services provided to a user entity that are part of the user entity's information system relevant to financial reporting. The sub-service organisation may be a separate entity from the service organisation or may be related to the service organisation. A user auditor may need to consider controls at the sub-service organisation. In situations where one or more sub-service organisations are used, the interaction between the activities of the user entity and those of the service organisation is expanded to include the interaction between the user entity, the service organisation and the sub-service organisations. The degree of this interaction, as well as the nature and materiality of the transactions processed by the service organisation and the sub-service organisations are the most important factors for the user auditor to consider in determining the significance of the service organisation's and sub-service organisation's controls to the user entity's controls.

Using a Type 1 or Type 2 Report to Support the User Auditor's Understanding of the Service Organisation (Ref: Para. 13-14)

A21. The user auditor may make inquiries about the service auditor to the service auditor's professional organisation or other practitioners and inquire whether the service auditor is subject to regulatory oversight. The service auditor may be practicing in a jurisdiction where different standards are followed in respect of reports on controls at a service organisation, and the user auditor may obtain information about the standards used by the service auditor from the standard setting organisation.

A22. A Type 1 or Type 2 report, along with information about the user entity, may assist the user auditor in obtaining an understanding of:

- (a) The aspects of controls at the service organisation that may affect the processing of the user entity's transactions, including the use of subservice organisations;
- (b) The flow of significant transactions through the service organisation to determine the points in the transaction flow where material misstatements in the user entity's financial statements could occur;
- (c) The control objectives at the service organisation that are relevant to the user entity's financial statement assertions; and
- (d) Whether controls at the service organisation are suitably designed and implemented to prevent or detect processing errors that could result in material misstatements in the user entity's financial statements.

A Type 1 or Type 2 report may assist the user auditor in obtaining a sufficient understanding to identify and assess the risks of material misstatement. A type 1 report, however, does not provide any evidence of the operating effectiveness of the relevant controls.

A23. A Type 1 or Type 2 report that is as of a date or for a period that is outside of the reporting period of a user entity may assist the user auditor in obtaining a preliminary understanding of the controls implemented at the service organisation if the report is supplemented by additional current information from other sources. If the service organisation's description of controls is as of

¹⁰ Except where such other auditor is a member of the Institute of Chartered Accountants of India.

a date or for a period that precedes the beginning of the period under audit, the user auditor may perform procedures to update the information in a Type 1 or Type 2 report, such as:

- Discussing the changes at the service organisation with user entity personnel who would be in a position to know of such changes;
- Reviewing current documentation and correspondence issued by the service organisation; or
- Discussing the changes with service organisation personnel.

Responding to the Assessed Risks of Material Misstatement (Ref: Para. 15)

A24. Whether the use of a service organisation increases a user entity's risk of material misstatement depends on the nature of the services provided and the controls over these services; in some cases, the use of a service organisation may decrease a user entity's risk of material misstatement, particularly if the user entity itself does not possess the expertise necessary to undertake particular activities, such as initiating, processing, and recording transactions, or does not have adequate resources (e.g., an IT system).

A25. When the service organisation maintains material elements of the accounting records of the user entity, direct access to those records may be necessary in order for the user auditor to obtain sufficient appropriate audit evidence relating to the operations of controls over those records or to substantiate transactions and balances recorded in them, or both. Such access may involve either physical inspection of records at the service organisation's premises or interrogation of records maintained electronically from the user entity or another location, or both. Where direct access is achieved electronically, the user auditor may thereby obtain evidence as to the adequacy of controls operated by the service organisation over the completeness and integrity of the user entity's data for which the service organisation is responsible.

A26. In determining the nature and extent of audit evidence to be obtained in relation to balances representing assets held or transactions undertaken by a service organisation on behalf of the user entity, the following procedures may be considered by the user auditor:

- (a) Inspecting records and documents held by the user entity: the reliability of this source of evidence is determined by the nature and extent of the accounting records and supporting documentation retained by the user entity. In some cases, the user entity may not maintain independent detailed records or documentation of specific transactions undertaken on its behalf.
- (b) Inspecting records and documents held by the service organisation: the user auditor's access to the records of the service organisation may be established as part of the contractual arrangements between the user entity and the service organisation. The user auditor may also use another auditor, on its behalf, to gain access to the user entity's records maintained by the service organisation.
- (c) Obtaining confirmations of balances and transactions from the service organisation: where the user entity maintains independent records of balances and transactions, confirmation from the service organisation corroborating the user entity's records may constitute reliable audit evidence concerning the existence of the transactions and assets concerned. For example, when multiple service organisations are used, such as an investment manager and a custodian, and these service organisations maintain independent records, the user auditor may confirm balances with these organisations in order to compare this information with the independent records of the user entity.

If the user entity does not maintain independent records, information obtained in confirmations from the service organisation is merely a statement of what is reflected in the records maintained by the service organisation. Therefore, such confirmations do not, taken alone, constitute reliable

I.270 Auditing Pronouncements

audit evidence. In these circumstances, the user auditor may consider whether an alternative source of independent evidence can be identified.

- (d) Performing analytical procedures on the records maintained by the user entity or on the reports received from the service organisation: the effectiveness of analytical procedures is likely to vary by assertion and will be affected by the extent and detail of information available.
- A27. Another auditor may perform procedures that are substantive in nature for the benefit of user auditors. Such an engagement may involve the performance, by another auditor, of procedures agreed upon by the user entity and its user auditor and by the service organisation and its service auditor. The findings resulting from the procedures performed by another auditor are reviewed by the user auditor to determine whether they constitute sufficient appropriate audit evidence. In addition, there may be requirements imposed by governmental authorities or through contractual arrangements whereby a service auditor performs designated procedures that are substantive in nature. The results of the application of the required procedures to balances and transactions processed by the service organisation may be used by user auditors as part of the evidence necessary to support their audit opinions. In these circumstances, it may be useful for the user auditor and the service auditor to agree, prior to the performance of the procedures, to the audit documentation or access to audit documentation that will be provided to the user auditor.
- A28. In certain circumstances, in particular when a user entity outsources some or all of its finance function to a service organisation, the user auditor may face a situation where a significant portion of the audit evidence resides at the service organisation. Substantive procedures may need to be performed at the service organisation by the user auditor or another auditor on its behalf. A service auditor may provide a Type 2 report and, in addition, may perform substantive procedures on behalf of the user auditor. The involvement of another auditor does not alter the user auditor's responsibility to obtain sufficient appropriate audit evidence to afford a reasonable basis to support the user auditor's opinion. Accordingly, the user auditor's consideration of whether sufficient appropriate audit evidence has been obtained and whether the user auditor needs to perform further substantive procedures includes the user auditor's involvement with, or evidence of, the direction, supervision and performance of the substantive procedures performed by another auditor.

Tests of Controls (Ref: Para. 16)

- A29. The user auditor is required by SA 330¹¹ to design and perform tests of controls to obtain sufficient appropriate audit evidence as to the operating effectiveness of relevant controls in certain circumstances. In the context of a service organisation, this requirement applies when:
- (a) The user auditor's assessment of risks of material misstatement includes an expectation that the controls at the service organisation are operating effectively (i.e., the user auditor intends to rely on the operating effectiveness of controls at the service organisation in determining the nature, timing and extent of substantive procedures); or
 - (b) Substantive procedures alone, or in combination with tests of the operating effectiveness of controls at the user entity, cannot provide sufficient appropriate audit evidence at the assertion level.
- A30. If a Type 2 report is not available, a user auditor may contact the service organisation, through the user entity, to request that a service auditor be engaged to provide a Type 2 report that includes tests of the operating effectiveness of the relevant controls or the user auditor may use another auditor to perform procedures at the service organisation that test the operating effectiveness of those controls. A user

¹¹ SA 330, paragraph 8.

auditor may also visit the service organisation and perform tests of relevant controls if the service organisation agrees to it. The user auditor's risk assessments are based on the combined evidence provided by the work of another auditor and the user auditor's own procedures.

Using a Type 2 Report as Audit Evidence that Controls at the Service Organisation Are Operating Effectively (Ref: Para. 17)

A31. A Type 2 report may be intended to satisfy the needs of several different user auditors; therefore tests of controls and results described in the service auditor's report may not be relevant to assertions that are significant in the user entity's financial statements. The relevant tests of controls and results are evaluated to determine that the service auditor's report provides sufficient appropriate audit evidence about the effectiveness of the controls to support the user auditor's risk assessment. In doing so, the user auditor may consider the following factors:

- (a) The time period covered by the tests of controls and the time elapsed since the performance of the tests of controls;
- (b) The scope of the service auditor's work and the services and processes covered, the controls tested and tests that were performed, and the way in which tested controls relate to the user entity's controls; and
- (c) The results of those tests of controls and the service auditor's opinion on the operating effectiveness of the controls.

A32. For certain assertions, the shorter the period covered by a specific test and the longer the time elapsed since the performance of the test, the less audit evidence the test may provide. In comparing the period covered by the Type 2 report to the user entity's financial reporting period, the user auditor may conclude that the Type 2 report offers less audit evidence if there is little overlap between the period covered by the Type 2 report and the period for which the user auditor intends to rely on the report. When this is the case, a Type 2 report covering a preceding or subsequent period may provide additional audit evidence. In other cases, the user auditor may determine it is necessary to perform, or use another auditor to perform, tests of controls at the service organisation in order to obtain sufficient appropriate audit evidence about the operating effectiveness of those controls.

A33. It may also be necessary for the user auditor to obtain additional evidence about significant changes to the relevant controls at the service organisation outside of the period covered by the Type 2 report or determine additional audit procedures to be performed. Relevant factors in determining what additional audit evidence to obtain about controls at the service organisation that were operating outside of the period covered by the service auditor's report may include:

- The significance of the assessed risks of material misstatement at the assertion level;
- The specific controls that were tested during the interim period, and significant changes to them since they were tested, including changes in the information system, processes, and personnel;
- The degree to which audit evidence about the operating effectiveness of those controls was obtained;
- The length of the remaining period;
- The extent to which the user auditor intends to reduce further substantive procedures based on the reliance on controls; and
- The effectiveness of the control environment and monitoring of controls at the user entity.

A34. Additional audit evidence may be obtained, for example, by extending tests of controls over the

I.272 Auditing Pronouncements

remaining period or testing the user entity's monitoring of controls.

- A35. If the service auditor's testing period is completely outside the user entity's financial reporting period, the user auditor will be unable to rely on such tests for the user auditor to conclude that the user entity's controls are operating effectively because they do not provide current audit period evidence of the effectiveness of the controls, unless other procedures are performed.
- A36. In certain circumstances, a service provided by the service organisation may be designed with the assumption that certain controls will be implemented by the user entity. For example, the service may be designed with the assumption that the user entity will have controls in place for authorising transactions before they are sent to the service organisation for processing. In such a situation, the service organisation's description of controls may include a description of those complementary user entity controls. The user auditor considers whether those complementary user entity controls are relevant to the service provided to the user entity.
- A37. If the user auditor believes that the service auditor's report may not provide sufficient appropriate audit evidence, for example, if a service auditor's report does not contain a description of the service auditor's tests of controls and results thereon, the user auditor may supplement the understanding of the service auditor's procedures and conclusions by contacting the service organisation, through the user entity, to request a discussion with the service auditor about the scope and results of the service auditor's work. Also, if the user auditor believes it is necessary, the user auditor may contact the service organisation, through the user entity, to request that the service auditor perform procedures at the service organisation. Alternatively, the user auditor, or another auditor at the request of the user auditor, may perform such procedures.
- A38. The service auditor's Type 2 report identifies results of tests, including exceptions and other information that could affect the user auditor's conclusions. Exceptions noted by the service auditor or a modified opinion in the service auditor's Type 2 report do not automatically mean that the service auditor's Type 2 report will not be useful for the audit of the user entity's financial statements in assessing the risks of material misstatement. Rather, the exceptions and the matter giving rise to a modified opinion in the service auditor's Type 2 report are considered in the user auditor's assessment of the testing of controls performed by the service auditor. In considering the exceptions and matters giving rise to a modified opinion, the user auditor may discuss such matters with the service auditor. Such communication is dependent upon the user entity contacting the service organisation, and obtaining the service organisation's approval for the communication to take place.

Communication of Deficiencies in Internal Control identified during the Audit

- A39. The user auditor is required to communicate in writing significant deficiencies identified during the audit to both management and those charged with governance on a timely basis.¹² The user auditor is also required to communicate to management at an appropriate level of responsibility on a timely basis other deficiencies in internal control identified during the audit that, in the user auditor's professional judgment, are of sufficient importance to merit management's attention.¹³ Matters that the user auditor may identify during the audit and may communicate to management and those charged with governance of the user entity include:

- Any monitoring of controls that could be implemented by the user entity, including those identified as a result of obtaining a Type 1 or Type 2 report;

¹² SA 265, "Communicating Deficiencies in Internal Control to Those Charged with Governance and Management", paragraph 9 and 10.

¹³ SA 265, paragraph 9.

- Instances where complementary user entity controls are noted in the Type 1 or Type 2 report and are not implemented at the user entity; and
- Controls that may be needed at the service organisation that do not appear to have been implemented or that are not specifically covered by a Type 2 report.

Type 1 and Type 2 Reports that Exclude the Services of a Subservice Organisation (Ref: Para. 18)

A40. If a service organisation uses a subservice organisation, the service auditor's report may either include or exclude the subservice organisation's relevant control objectives and related controls in the service organisation's description of its system and in the scope of the service auditor's engagement. These two methods of reporting are known as the inclusive method and the carve-out method, respectively. If the Type 1 or Type 2 report excludes the controls at a subservice organisation, and the services provided by the subservice organisation are relevant to the audit of the user entity's financial statements, the user auditor is required to apply the requirements of this SA in respect of the subservice organisation. The nature and extent of work to be performed by the user auditor regarding the services provided by a subservice organisation depend on the nature and significance of those services to the user entity and the relevance of those services to the audit. The application of the requirement in paragraph 9 assists the user auditor in determining the effect of the subservice organisation and the nature and extent of work to be performed.

Fraud, Non-Compliance with Laws and Regulations and Uncorrected Misstatements in Relation to Activities at the Service Organisation (Ref: Para. 19)

A41. A service organisation may be required under the terms of the contract with user entities to disclose to affected user entities any fraud, non-compliance with laws and regulations or uncorrected misstatements attributable to the service organisation's management or employees. As required by paragraph 19, the user auditor makes inquiries of the user entity management regarding whether the service organisation has reported any such matters and evaluates whether any matters reported by the service organisation affect the nature, timing and extent of the user auditor's further audit procedures. In certain circumstances, the user auditor may require additional information to perform this evaluation, and may request the user entity to contact the service organisation to obtain the necessary information.

Reporting by the User Auditor (Ref: Para. 20)

A42. When a user auditor is unable to obtain sufficient appropriate audit evidence regarding the services provided by the service organisation relevant to the audit of the user entity's financial statements, a limitation on the scope of the audit exists. This may be the case when:

- The user auditor is unable to obtain a sufficient understanding of the services provided by the service organisation and does not have a basis for the identification and assessment of the risks of material misstatement;
- A user auditor's risk assessment includes an expectation that controls at the service organisation are operating effectively and the user auditor is unable to obtain sufficient appropriate audit evidence about the operating effectiveness of these controls; or
- Sufficient appropriate audit evidence is only available from records held at the service organisation, and the user auditor is unable to obtain direct access to these records.

Whether the user auditor expresses a qualified opinion or disclaims an opinion depends on the user auditor's conclusion as to whether the possible effects on the financial statements are material or

I.274 Auditing Pronouncements

pervasive.

Reference to the Work of a Service Auditor (Ref: Para. 21-22)

- A43. In some cases, law or regulation may require a reference to the work of a service auditor in the user auditor's report, for example, for the purposes of transparency in the public sector. In such circumstances, the user auditor may need the consent of the service auditor before making such a reference.
- A44. The fact that a user entity uses a service organisation does not alter the user auditor's responsibility under SAs to obtain sufficient appropriate audit evidence to afford a reasonable basis to support the user auditor's opinion. Therefore, the user auditor does not make reference to the service auditor's report as a basis, in part, for the user auditor's opinion on the user entity's financial statements. However, when the user auditor expresses a modified opinion because of a modified opinion in a service auditor's report, the user auditor is not precluded from referring to the service auditor's report if such reference assists in explaining the reason for the user auditor's modified opinion. In such circumstances, the user auditor may need the consent of the service auditor before making such a reference.

Material Modifications to ISA 402, "Audit Considerations Relating to an Entity Using a Service Organisation"

1. Paragraphs A10 and A11 of ISA 402 deal with the application of the requirements of ISA 402 to public sector auditors who have broad rights of access established by legislation. Since as mentioned in the "Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services", the Standards issued by the Auditing and Assurance Standards Board, apply equally to all entities, irrespective of their form, nature and size, a specific reference to applicability of the Standard to public sector entities has been deleted.

However, since the situation envisaged in paragraphs A10 and A11 may be possible even in case of auditors of non-public sector entities, the spirit of paragraphs A10 and A11 has been retained and made generic.
2. Paragraph 13 (a) and paragraph A19 of ISA 402 deal with assessment of the service auditor's professional competence and independence from the service organisation for obtaining sufficient and appropriate audit evidence and for reporting purposes. The corresponding paragraphs of SA 402 also require such assessment of professional competence except where the service auditor is also a member of the Institute of Chartered Accountants of India.

SA 450*

**Evaluation of Misstatements Identified during the
Audit**
*(Effective for all audits relating to
accounting periods beginning on or after April 1, 2010)*

Introduction

Scope of this SA

1. This Standard on Auditing (SA) deals with the auditor's responsibility to evaluate the effect of identified misstatements on the audit and of uncorrected misstatements, if any, on the financial statements. SA 700 (Revised)¹ deals with the auditor's responsibility, in forming an opinion on the financial statements, to conclude whether reasonable assurance has been obtained about whether the financial statements as a whole are free from material misstatement. The auditor's conclusion required by SA 700 (Revised) takes into account the auditor's evaluation of uncorrected misstatements, if any, on the financial statements, in accordance with this SA. SA 320² deals with the auditor's responsibility to apply the concept of materiality appropriately in planning and performing an audit of financial statements.

Effective Date

2. This SA is effective for audits of financial statements for periods beginning on or after April 1, 2010.

Objective

3. The objective of the auditor is to evaluate:
 - (a) The effect of identified misstatements on the audit; and
 - (b) The effect of uncorrected misstatements, if any, on the financial statements.

Definitions

4. For purposes of the SAs, the following terms have the meanings attributed below:
 - (a) Misstatement – A difference between the amounts, classification, presentation, or disclosure of a reported financial statement item and the amount, classification, presentation, or disclosure that is required for the item to be in accordance with the applicable financial reporting framework. Misstatements can arise from error or fraud. (Ref: Para. A1)

When the auditor expresses an opinion on whether the financial statements give a true and fair view or are presented fairly, in all material respects, misstatements also include those adjustments of amounts, classifications, presentation, or disclosures that, in the auditor's judgment, are necessary for the financial statements to give a true and fair view or present fairly, in all material respects.

* Published in August, 2009 issue of the Journal.

¹ 700, "Forming an Opinion and Reporting on Financial Statements", paragraphs 10-11.

² SA 320, "Materiality in Planning and Performing an Audit".

I.276 Auditing Pronouncements

- (b) Uncorrected misstatements – Misstatements that the auditor has accumulated during the audit and that have not been corrected.

Requirements

Accumulation of Identified Misstatements

- 5. The auditor shall accumulate misstatements identified during the audit, other than those that are clearly trivial. (Ref: Para. A2-A3)

Consideration of Identified Misstatements as the Audit Progresses

- 6. The auditor shall determine whether the overall audit strategy and audit plan need to be revised if:
 - (a) The nature of identified misstatements and the circumstances of their occurrence indicate that other misstatements may exist that, when aggregated with misstatements accumulated during the audit, could be material; or (Ref: Para. A4)
 - (b) The aggregate of misstatements accumulated during the audit approaches materiality determined in accordance with SA 320. (Ref: Para. A5)
- 7. If, at the auditor's request, management has examined a class of transactions, account balance or disclosure and corrected misstatements that were detected, the auditor shall perform additional audit procedures to determine whether misstatements remain. (Ref: Para. A6)

Communication and Correction of Misstatements

- 8. The auditor shall communicate on a timely basis all misstatements accumulated during the audit with the appropriate level of management, unless prohibited by law or regulation³. The auditor shall request management to correct those misstatements. (Ref: Para. A7-A9)
- 9. If management refuses to correct some or all of the misstatements communicated by the auditor, the auditor shall obtain an understanding of management's reasons for not making the corrections and shall take that understanding into account when evaluating whether the financial statements as a whole are free from material misstatement. (Ref: Para. A 10)

Evaluating the Effect of Uncorrected Misstatements

- 10. Prior to evaluating the effect of uncorrected misstatements, the auditor shall reassess materiality determined in accordance with SA 320 to confirm whether it remains appropriate in the context of the entity's actual financial results. (Ref: Para. A11-A12)
- 11. The auditor shall determine whether uncorrected misstatements are material, individually or in aggregate. In making this determination, the auditor shall consider:
 - (a) The size and nature of the misstatements, both in relation to particular classes of transactions, account balances or disclosures and the financial statements as a whole, and the particular circumstances of their occurrence; and (Ref: Para. A13-A17, A19-A20)
 - (b) The effect of uncorrected misstatements related to prior periods on the relevant classes of transactions, account balances or disclosures, and the financial statements as a whole. (Ref: Para. A18)

³ SA 260, "Communication with Those Charged with Governance", paragraph A4.

Communication with Those Charged with Governance

12. The auditor shall communicate with those charged with governance⁴ uncorrected misstatements and the effect that they, individually or in aggregate, may have on the opinion in the auditor's report, unless prohibited by law or regulation. The auditor's communication shall identify material uncorrected misstatements individually. The auditor shall request that uncorrected misstatements be corrected. (Ref: Para. A21-A23)
13. The auditor shall also communicate with those charged with governance the effect of uncorrected misstatements related to prior periods on the relevant classes of transactions, account balances or disclosures, and the financial statements as a whole.

Written Representation

14. The auditor shall request a written representation from management and, where appropriate, those charged with governance whether they believe the effects of uncorrected misstatements are immaterial, individually and in aggregate, to the financial statements as a whole. A summary of such items shall be included in or attached to the written representation. (Ref: Para. A24)

Documentation

15. The audit documentation shall include: (Ref: Para. A25)
 - (a) The amount below which misstatements would be regarded as clearly trivial (paragraph 5);
 - (b) All misstatements accumulated during the audit and whether they have been corrected (paragraphs 5,8 and 12); and
 - (c) The auditor's conclusion as to whether uncorrected misstatements are material, individually or in aggregate, and the basis for that conclusion. (paragraph 11)

Application and Other Explanatory Material

Misstatements (Ref: Para. 4(a))

- A1. Misstatements may result from:
 - (a) An inaccuracy in gathering or processing data from which the financial statements are prepared;
 - (b) An omission of an amount or disclosure;
 - (c) An incorrect accounting estimate arising from overlooking, or clear misinterpretation of, facts; and
 - (d) Judgments of management concerning accounting estimates that the auditor considers unreasonable or the selection and application of accounting policies that the auditor considers inappropriate.

Examples of misstatements arising from fraud are provided in SA 240.⁵

Accumulation of Identified Misstatements (Ref: Para. 5)

- A2. The auditor may designate an amount below which misstatements would be clearly trivial and would not need to be accumulated because the auditor expects that the accumulation of such amounts clearly would not have a material effect on the financial statements. "Clearly trivial" is not another

⁴ In accordance with the paragraph 9 of SA 260, "Communication with Those Charged with Governance," if this matter has been communicated with person(s) with management responsibilities, and those person(s) also have governance responsibilities, the matter need not be communicated again with those same person(s) in their governance role.

⁵ SA 240, "The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements," paragraphs A1-A6.

I.278 Auditing Pronouncements

expression for “not material”. Matters that are “clearly trivial” will be of a wholly different (smaller) order of magnitude than materiality determined in accordance with SA 320, and will be matters that are clearly inconsequential, whether taken individually or in aggregate and whether judged by any criteria of size, nature or circumstances. When there is any uncertainty about whether one or more items are clearly trivial, the matter is considered not to be clearly trivial.

- A3. To assist the auditor in evaluating the effect of misstatements accumulated during the audit and in communicating misstatements to management and those charged with governance, it may be useful to distinguish between factual misstatements, judgmental misstatements and projected misstatements.
- Factual misstatements are misstatements about which there is no doubt.
 - Judgmental misstatements are differences arising from the judgments of management concerning accounting estimates that the auditor considers unreasonable, or the selection or application of accounting policies that the auditor considers inappropriate.
 - Projected misstatements are the auditor’s best estimate of misstatements in populations, involving the projection of misstatements identified in audit samples to the entire populations from which the samples were drawn. Guidance on the determination of projected misstatements and evaluation of the results is set out in SA 530⁶.

Consideration of Identified Misstatements as the Audit Progresses (Ref: Para. 6-7)

- A4. A misstatement may not be an isolated occurrence. Evidence that other misstatements may exist include, for example, where the auditor identifies that a misstatement arose from a breakdown in internal control or from inappropriate assumptions or valuation methods that have been widely applied by the entity.
- A5. If the aggregate of misstatements accumulated during the audit approaches materiality determined in accordance with SA 320, there may be a greater than an acceptably low level of risk that possible undetected misstatements, when taken with the aggregate of misstatements accumulated during the audit, could exceed the materiality. Undetected misstatements could exist because of the presence of sampling risk and non-sampling risk.⁷
- A6. The auditor may request management to examine a class of transactions, account balance or disclosure in order for management to understand the cause of a misstatement identified by the auditor, perform procedures to determine the amount of the actual misstatement in the class of transactions, account balance or disclosure, and to make appropriate adjustments to the financial statements. Such a request may be made, for example, based on the auditor’s projection of misstatements identified in an audit sample to the entire population from which it was drawn.

Communication and Correction of Misstatements (Ref: Para. 8-9)

- A7. Timely communication of misstatements to the appropriate level of management is important as it enables management to evaluate whether the items are misstatements, inform the auditor if it disagrees, and take action as necessary. Ordinarily, the appropriate level of management is the one that has responsibility and authority to evaluate the misstatements and to take the necessary action.
- A8. Law or regulation may restrict the auditor’s communication of certain misstatements to management, or others, within the entity. For example, laws or regulations may specifically prohibit a communication, or other action, that might prejudice an investigation by an appropriate authority into an actual, or suspected, illegal act. In some circumstances, potential conflicts between the auditor’s obligations of

⁶ SA 530, “Audit Sampling”, paragraphs 14-15.

⁷ SA 530, paragraphs 5(c) and (d).

confidentiality and obligations to communicate may be complex. In such cases, the auditor may consider seeking legal advice.

- A9. The correction by management of all misstatements, including those communicated by the auditor, enables management to maintain accurate accounting books and records and reduces the risks of material misstatement of future financial statements because of the cumulative effect of immaterial uncorrected misstatements related to prior periods.
- A10. SA 700 (Revised) requires the auditor to evaluate whether the financial statements are prepared and presented, in all material respects, in accordance with the requirements of the applicable financial reporting framework. This evaluation includes consideration of the qualitative aspects of the entity's accounting practices, including indicators of possible bias in management's judgments⁸, which may be affected by the auditor's understanding of management's reasons for not making the corrections.

Evaluating the Effect of Uncorrected Misstatements (Ref: Para. 10-11)

- A11. The auditor's determination of the materiality in accordance with SA 320 is often based on estimates of the entity's financial results, because the actual financial results may not yet be known. Therefore, prior to the auditor's evaluation of the effect of uncorrected misstatements, it may be necessary to revise materiality determined in accordance with SA 320 based on the actual financial results.
- A12. SA 320 explains that, as the audit progresses, the materiality for the financial statements as a whole (and, if applicable, the materiality level or levels for particular classes of transactions, account balances or disclosures) is revised in the event of the auditor becoming aware of information during the audit that would have caused the auditor to have determined a different amount (or amounts) initially⁹. Thus, any significant revision is likely to have been made before the auditor evaluates the effect of uncorrected misstatements. However, if the auditor's reassessment of materiality determined in accordance with SA 320 (see paragraph 10 of this SA) gives rise to a lower amount (or amounts), then performance materiality and the appropriateness of the nature, timing and extent of the further audit procedures, are reconsidered so as to obtain sufficient appropriate audit evidence on which to base the audit opinion.
- A13. Each individual misstatement is considered to evaluate its effect on the relevant classes of transactions, account balances or disclosures, including whether the materiality level for that particular class of transactions, account balance or disclosure, if any, has been exceeded.
- A14. If an individual misstatement is judged to be material, it is unlikely that it can be offset by other misstatements. For example, if revenue has been materially overstated, the financial statements as a whole will be materially misstated, even if the effect of the misstatement on earnings is completely offset by an equivalent overstatement of expenses. It may be appropriate to offset misstatements within the same account balance or class of transactions; however, the risk that further undetected misstatements may exist is considered before concluding that offsetting even immaterial misstatements is appropriate¹⁰.
- A15. Determining whether a classification misstatement is material involves the evaluation of qualitative considerations, such as the effect of the classification misstatement on debt or other contractual covenants, the effect on individual line items or sub-totals, or the effect on key ratios. There may be circumstances where the auditor concludes that a classification misstatement is not material in the context of the financial statements as a whole, even though it may exceed the materiality level or levels

⁸ Revised SA 700, "Forming an Opinion and Reporting on Financial Statements", paragraph 12.

⁹ SA 320, paragraph 12.

¹⁰ The identification of a number of immaterial misstatements within the same account balance or class of transactions may require the auditor to re-assess the risk of material misstatement for that account balance or class of transactions.

applied in evaluating other misstatements. For example, a misclassification between balance sheet line items may not be considered material in the context of the financial statements as a whole when the amount of the misclassification is small in relation to the size of the related balance sheet line items and the misclassification does not affect the income statement or any key ratios.

A16. The circumstances related to some misstatements may cause the auditor to evaluate them as material, individually or when considered together with other misstatements accumulated during the audit, even if they are lower than the materiality for the financial statements as a whole. Circumstances that may affect the evaluation include the extent to which the misstatement:

- Affects compliance with regulatory requirements;
- Affects compliance with debt covenants or other contractual requirements;
- Relates to the incorrect selection or application of an accounting policy that has an immaterial effect on the current period's financial statements but is likely to have a material effect on future periods' financial statements;
- Makes a change in earnings or other trends, especially in the context of general economic and industry conditions;
- Affects ratios used to evaluate the entity's financial position, results of operations or cash flows;
- Affects segment information presented in the financial statements (for example, the significance of the matter to a segment or other portion of the entity's business that has been identified as playing a significant role in the entity's operations or profitability);
- Has the effect of increasing management compensation, for example, by ensuring that the requirements for the award of bonuses or other incentives are satisfied;
- Is significant having regard to the auditor's understanding of known previous communications to users, for example in relation to forecast earnings;
- Relates to items involving particular parties (for example, whether external parties to the transaction are related to members of the entity's management);
- Is an omission of information not specifically required by the applicable financial reporting framework but which, in the judgment of the auditor, is important to the users' understanding of the financial position, financial performance or cash flows of the entity; or
- Affects other information that will be communicated in documents containing the audited financial statements (for example, information to be included in a "Management Discussion and Analysis" or an "Operating and Financial Review") that may reasonably be expected to influence the economic decisions of the users of the financial statements. SA 720¹¹ deals with the auditor's consideration of other information, on which the auditor has no obligation to report, in documents containing audited financial statements.

These circumstances are only examples; not all are likely to be present in all audits nor is the list necessarily complete. The existence of any circumstances such as these does not necessarily lead to a conclusion that the misstatement is material.

¹¹ SA 720, "The Auditor's Responsibility in Relation to Other Information in Documents Containing Audited Financial Statements".

- A17. SA 24012, explains how the implications of a misstatement that is, or may be, the result of fraud ought to be considered in relation to other aspects of the audit, even if the size of the misstatement is not material in relation to the financial statements.
- A18. The cumulative effect of immaterial uncorrected misstatements related to prior periods may have a material effect on the current period's financial statements. There are different acceptable approaches to the auditor's evaluation of such uncorrected misstatements on the current period's financial statements. Using the same evaluation approach provides consistency from period to period.
- A19. In the case of an audit of certain entities, such as, Central/State governments and related government entities (for example, agencies, boards, commissions), the evaluation whether a misstatement is material may also be affected by legislation or regulation and additional responsibilities for the auditor to report other matters, including, for example, fraud.
- A20. Furthermore, issues such as public interest, accountability, probity and ensuring effective legislative oversight, in particular, may affect the assessment whether an item is material by virtue of its nature. This is particularly so for items that relate to compliance with regulation, legislation or other authority.

Communication with Those Charged with Governance (Ref: Para. 12)

- A21. If uncorrected misstatements have been communicated with person(s) with management responsibilities and those person(s) also have governance responsibilities, they need not be communicated again with those same person(s) in their governance role. The auditor nonetheless has to be satisfied that communication with person(s) with management responsibilities adequately informs all of those with whom the auditor would otherwise communicate in their governance capacity.¹³
- A22. Where there is a large number of individual immaterial uncorrected misstatements, the auditor may communicate the number and overall monetary effect of the uncorrected misstatements, rather than the details of each individual uncorrected misstatement.
- A23. SA 260 requires the auditor to communicate with those charged with governance the written representations the auditor is requesting (see paragraph 14 of this SA).¹⁴ The auditor may discuss with those charged with governance the reasons for, and the implications of, a failure to correct misstatements, having regard to the size and nature of the misstatement judged in the surrounding circumstances, and possible implications in relation to future financial statements.

Written Representation (Ref: Para. 14)

- A24. Because management and, where appropriate, those charged with governance are responsible for adjusting the financial statements to correct material misstatements, the auditor is required to request them to provide a written representation about uncorrected misstatements. In some circumstances, management and, where appropriate, those charged with governance may not believe that certain uncorrected misstatements are misstatements. For that reason, they may want to add to their written representation words such as: "We do not agree that itemsand constitute misstatements because [*description of reasons*]." Obtaining this representation does not, however, relieve the auditor of the need to form a conclusion on the effect of uncorrected misstatements.

Documentation (Ref: Para. 15)

- A25. The auditor's documentation of uncorrected misstatements may take into account:

¹² SA 240, paragraph 35.

¹³ SA 260, paragraph 9.

¹⁴ SA 260, paragraph 12(c)(iii).

I.282 Auditing Pronouncements

- (a) The consideration of the aggregate effect of uncorrected misstatements;
- (b) The evaluation of whether the materiality level or levels for particular classes of transactions, account balances or disclosures, if any, have been exceeded; and
- (c) The evaluation of the effect of uncorrected misstatements on key ratios or trends, and compliance with legal, regulatory and contractual requirements (for example, debt covenants).

Material Modifications to ISA 450, “Evaluation of Misstatements Identified during the Audit”

Deletions

Paragraph A19 of ISA 450 states that in the case of an audit of public sector entities, the evaluation whether a misstatement is material may also be affected by legislation or regulation and additional responsibilities for the auditor to report other matters, including, for example, fraud. Since as mentioned in the “Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services”, the Standards issued by the Auditing and Assurance Standards Board, apply equally to all entities, irrespective of their form, nature and size, a specific reference to applicability of the Standard to public sector entities has been deleted.

Further, it is also possible that such a specific situation may exist in case of Central/State governments or related government entities pursuant to a requirement under the statute or regulation under which they operate. Accordingly, the spirit of erstwhile A19, highlighting such fact, has been retained though a specific reference to public sector entities has been deleted.

SA 500*
Audit Evidence
*(Effective for audits of financial statements
for periods beginning on or after April 1, 2009)*

Introduction

Scope of this SA

1. This Standard on Auditing (SA) explains what constitutes audit evidence in an audit of financial statements, and deals with the auditor's responsibility to design and perform audit procedures to obtain sufficient appropriate audit evidence to be able to draw reasonable conclusions on which to base the auditor's opinion.
2. This SA is applicable to all the audit evidence obtained during the course of the audit. Other SAs deal with specific aspects of the audit (for example, SA 315¹), the audit evidence to be obtained in relation to a particular topic (for example, SA 570²), specific procedures to obtain audit evidence (for example, SA 520³), and the evaluation of whether sufficient appropriate audit evidence has been obtained (SA 200 and SA 330⁴).

Effective Date

3. This SA is effective for audits of financial statements for periods beginning on or after April 1, 2009.

Objective

4. The objective of the auditor is to design and perform audit procedures in such a way as to enable the auditor to obtain sufficient appropriate audit evidence to be able to draw reasonable conclusions on which to base the auditor's opinion.

Definitions

5. For purposes of the SAs, the following terms have the meanings attributed below:
 - (a) Accounting records – The records of initial accounting entries and supporting records, such as checks and records of electronic fund transfers; invoices; contracts; the general and subsidiary ledgers, journal entries and other adjustments to the financial statements that are not reflected in journal entries; and records such as work sheets and spreadsheets supporting cost allocations, computations, reconciliations and disclosures.
 - (b) Appropriateness (of audit evidence) – The measure of the quality of audit evidence; that is, its relevance and its reliability in providing support for the conclusions on which the auditor's opinion is based.
 - (c) Audit evidence – Information used by the auditor in arriving at the conclusions on which the auditor's

* Published in April, 2009 issue of the Journal.

² SA 570, "Going Concern".

³ SA 520, "Analytical Procedures".

⁴ SA 330, "The Auditor's Responses to Assessed Risks".

I.284 Auditing Pronouncements

opinion is based. Audit evidence includes both information contained in the accounting records underlying the financial statements and other information.

- (d) Management's expert – An individual or organisation possessing expertise in a field other than accounting or auditing, whose work in that field is used by the entity to assist the entity in preparing the financial statements.
- (e) Sufficiency (of audit evidence) – The measure of the quantity of audit evidence. The quantity of the audit evidence needed is affected by the auditor's assessment of the risks of material misstatement and also by the quality of such audit evidence.

Requirements

Sufficient Appropriate Audit Evidence

6. The auditor shall design and perform audit procedures that are appropriate in the circumstances for the purpose of obtaining sufficient appropriate audit evidence. (Ref: Para. A1-A25)

Information to Be Used as Audit Evidence

7. When designing and performing audit procedures, the auditor shall consider the relevance and reliability of the information to be used as audit evidence. (Ref: Para. A26-A33)

8. When information to be used as audit evidence has been prepared using the work of a management's expert, the auditor shall, to the extent necessary, having regard to the significance of that expert's work for the auditor's purposes, (Ref: Para. A34-A36)

- (a) Evaluate the competence, capabilities and objectivity of that expert; (Ref: Para. A37-A43)
- (b) Obtain an understanding of the work of that expert; and (Ref: Para. A44-A47)
- (c) Evaluate the appropriateness of that expert's work as audit evidence for the relevant assertion. (Ref: Para. A48)

9. When using information produced by the entity, the auditor shall evaluate whether the information is sufficiently reliable for the auditor's purposes, including as necessary in the circumstances:

- (a) Obtaining audit evidence about the accuracy and completeness of the information; and (Ref: Para. A49-A50)
- (b) Evaluating whether the information is sufficiently precise and detailed for the auditor's purposes. (Ref: Para. A51)

Selecting Items for Testing to Obtain Audit Evidence

10. When designing tests of controls and tests of details, the auditor shall determine means of selecting items for testing that are effective in meeting the purpose of the audit procedure. (Ref: Para. A52-A56)

Inconsistency in, or Doubts over Reliability of, Audit Evidence

11. If:

- (a) audit evidence obtained from one source is inconsistent with that obtained from another; or
- (b) the auditor has doubts over the reliability of information to be used as audit evidence,

The auditor shall determine what modifications or additions to audit procedures are necessary to resolve the matter, and shall consider the effect of the matter, if any, on other aspects of the audit. (Ref: Para. A57)

Application and Other Explanatory Material

Sufficient Appropriate Audit Evidence (Ref: Para. 6)

A1. Audit evidence is necessary to support the auditor's opinion and report. It is cumulative in nature and is

primarily obtained from audit procedures performed during the course of the audit. It may, however, also include information obtained from other sources such as previous audits (provided the auditor has determined whether changes have occurred since the previous audit that may affect its relevance to the current audit)⁵ or a firm's quality control procedures for client acceptance and continuance. In addition to other sources inside and outside the entity, the entity's accounting records are an important source of audit evidence. Also, information that may be used as audit evidence may have been prepared using the work of a management's expert. Audit evidence comprises both information that supports and corroborates management's assertions, and any information that contradicts such assertions. In addition, in some cases the absence of information (for example, management's refusal to provide a requested representation) is used by the auditor, and therefore, also constitutes audit evidence.

A2. Most of the auditor's work in forming the auditor's opinion consists of obtaining and evaluating audit evidence. Audit procedures to obtain audit evidence can include inspection, observation, confirmation, recalculation, reperformance and analytical procedures, often in some combination, in addition to inquiry. Although inquiry may provide important audit evidence, and may even produce evidence of a misstatement, inquiry alone ordinarily does not provide sufficient audit evidence of the absence of a material misstatement at the assertion level, nor of the operating effectiveness of controls.

A3. As explained in SA 200,⁶ reasonable assurance is obtained when the auditor has obtained sufficient appropriate audit evidence to reduce audit risk (i.e., the risk that the auditor expresses an inappropriate opinion when the financial statements are materially misstated) to an acceptably low level.

A4. The sufficiency and appropriateness of audit evidence are interrelated. Sufficiency is the measure of the quantity of audit evidence. The quantity of audit evidence needed is affected by the auditor's assessment of the risks of misstatement (the higher the assessed risks, the more audit evidence is likely to be required) and also by the quality of such audit evidence (the higher the quality, the less may be required). Obtaining more audit evidence, however, may not compensate for its poor quality.

A5. Appropriateness is the measure of the quality of audit evidence; that is, its relevance and its reliability in providing support for the conclusions on which the auditor's opinion is based. The reliability of evidence is influenced by its source and by its nature, and is dependent on the individual circumstances under which it is obtained.

A6. SA 330 requires the auditor to conclude whether sufficient appropriate audit evidence has been obtained.⁷ Whether sufficient appropriate audit evidence has been obtained to reduce audit risk to an acceptably low level, and thereby enable the auditor to draw reasonable conclusions on which to base the auditor's opinion, is a matter of professional judgment. SA 200 contains discussion of such matters as the nature of audit procedures, the timeliness of financial reporting, and the balance between benefit and cost, which are relevant factors when the auditor exercises professional judgment regarding whether sufficient appropriate audit evidence has been obtained.

Sources of Audit Evidence

A7. Some audit evidence is obtained by performing audit procedures to test the accounting records, for example, through analysis and review, reperforming procedures followed in the financial reporting process, and reconciling related types and applications of the same information. Through the performance of such audit procedures, the auditor may determine that the accounting records are internally consistent and agree to the financial statements.

⁵ SA 315, paragraph 9.

⁶ SA 200, paragraph 5.

⁷ SA 330, paragraph 26.

A8. More assurance is ordinarily obtained from consistent audit evidence obtained from different sources or of a different nature than from items of audit evidence considered individually. For example, corroborating information obtained from a source independent of the entity may increase the assurance the auditor obtains from audit evidence that is generated internally, such as evidence existing within the accounting records, minutes of meetings, or a management representation.

A9. Information from sources independent of the entity that the auditor may use as audit evidence may include confirmations from third parties, analysts' reports, and comparable data about competitors (benchmarking data).

Audit Procedures for Obtaining Audit Evidence

A10. As required by, and explained further in, SA 315 and SA 330, audit evidence to draw reasonable conclusions on which to base the auditor's opinion is obtained by performing:

- (a) Risk assessment procedures; and
- (b) Further audit procedures, which comprise:
 - (i) Tests of controls, when required by the SAs or when the auditor has chosen to do so; and
 - (ii) Substantive procedures, including tests of details and substantive analytical procedures.

A11. The audit procedures described in paragraphs A14-A25 below may be used as risk assessment procedures, tests of controls or substantive procedures, depending on the context in which they are applied by the auditor. As explained in SA 330, audit evidence obtained from previous audits may, in certain circumstances, provide appropriate audit evidence where the auditor performs audit procedures to establish its continuing relevance⁸.

A12. The nature and timing of the audit procedures to be used may be affected by the fact that some of the accounting data and other information may be available only in electronic form or only at certain points or periods in time. For example, source documents, such as purchase orders and invoices, may exist only in electronic form when an entity uses electronic commerce, or may be discarded after scanning when an entity uses image processing systems to facilitate storage and reference.

A13. Certain electronic information may not be retrievable after a specified period of time, for example, if files are changed and if backup files do not exist. Accordingly, the auditor may find it necessary as a result of an entity's data retention policies to request retention of some information for the auditor's review or to perform audit procedures at a time when the information is available.

Inspection

A14. Inspection involves examining records or documents, whether internal or external, in paper form, electronic form, or other media, or a physical examination of an asset. Inspection of records and documents provides audit evidence of varying degrees of reliability, depending on their nature and source and, in the case of internal records and documents, on the effectiveness of the controls over their production. An example of inspection used as a test of controls is inspection of records for evidence of authorisation.

A15. Some documents represent direct audit evidence of the existence of an asset, for example, a document constituting a financial instrument such as a stock or bond. Inspection of such documents may not necessarily provide audit evidence about ownership or value. In addition, inspecting an executed contract may provide audit evidence relevant to the entity's application of accounting policies, such as revenue recognition.

⁸ SA 330, paragraph A35.

A16. Inspection of tangible assets may provide reliable audit evidence with respect to their existence, but not necessarily about the entity's rights and obligations or the valuation of the assets. Inspection of individual inventory items may accompany the observation of inventory counting.

Observation

A17. Observation consists of looking at a process or procedure being performed by others, for example, the auditor's observation of inventory counting by the entity's personnel, or of the performance of control activities. Observation provides audit evidence about the performance of a process or procedure, but is limited to the point in time at which the observation takes place, and by the fact that the act of being observed may affect how the process or procedure is performed. See SA 501 for further guidance on observation of the counting of inventory.⁹

External Confirmation

A18. An external confirmation represents audit evidence obtained by the auditor as a direct written response to the auditor from a third party (the confirming party), in paper form, or by electronic or other medium. External confirmation procedures frequently are relevant when addressing assertions associated with certain account balances and their elements. However, external confirmations need not be restricted to account balances only. For example, the auditor may request confirmation of the terms of agreements or transactions an entity has with third parties; the confirmation request may be designed to ask if any modifications have been made to the agreement and, if so, what the relevant details are. External confirmation procedures also are used to obtain audit evidence about the absence of certain conditions, for example, the absence of a "side agreement" that may influence revenue recognition. See SA 505 for further guidance.¹⁰

Recalculation

A19. Recalculation consists of checking the mathematical accuracy of documents or records. Recalculation may be performed manually or electronically.

Reperformance

A20. Repformance involves the auditor's independent execution of procedures or controls that were originally performed as part of the entity's internal control.

Analytical Procedures

A21. Analytical procedures consist of evaluations of financial information made by a study of plausible relationships among both financial and non-financial data. Analytical procedures also encompass the investigation of identified fluctuations and relationships that are inconsistent with other relevant information or deviate significantly from predicted amounts. See SA 520 for further guidance.

Inquiry

A22. Inquiry consists of seeking information of knowledgeable persons, both financial and non-financial, within the entity or outside the entity. Inquiry is used extensively throughout the audit in addition to other audit procedures. Inquiries may range from formal written inquiries to informal oral inquiries. Evaluating responses to inquiries is an integral part of the inquiry process.

A23. Responses to inquiries may provide the auditor with information not previously possessed or with corroborative audit evidence. Alternatively, responses might provide information that differs significantly from other information that the auditor has obtained, for example, information regarding the possibility of management override of controls. In some cases, responses to inquiries provide a basis for the auditor to

⁹ SA 501, "Audit Evidence—Specific Considerations for Selected Items".

¹⁰ SA 505, "External Confirmations".

modify or perform additional audit procedures.

A24. Although corroboration of evidence obtained through inquiry is often of particular importance, in the case of inquiries about management intent, the information available to support management's intent may be limited. In these cases, understanding management's past history of carrying out its stated intentions, management's stated reasons for choosing a particular course of action, and management's ability to pursue a specific course of action may provide relevant information to corroborate the evidence obtained through inquiry.

A25. In respect of some matters, the auditor may consider it necessary to obtain written representations from management and, where appropriate, those charged with governance to confirm responses to oral inquiries. See SA 580 for further guidance.¹¹

Information to Be Used as Audit Evidence

Relevance and Reliability (Ref: Para. 7)

A26. As noted in paragraph A1, while audit evidence is primarily obtained from audit procedures performed during the course of the audit, it may also include information obtained from other sources such as, for example, previous audits, in certain circumstances, and a firm's quality control procedures for client acceptance and continuance. The quality of all audit evidence is affected by the relevance and reliability of the information upon which it is based.

Relevance

A27. Relevance deals with the logical connection with, or bearing upon, the purpose of the audit procedure and, where appropriate, the assertion under consideration. The relevance of information to be used as audit evidence may be affected by the direction of testing. For example, if the purpose of an audit procedure is to test for overstatement in the existence or valuation of accounts payable, testing the recorded accounts payable may be a relevant audit procedure. On the other hand, when testing for understatement in the existence or valuation of accounts payable, testing the recorded accounts payable would not be relevant, but testing such information as subsequent disbursements, unpaid invoices, suppliers' statements, and unmatched receiving reports may be relevant.

A28. A given set of audit procedures may provide audit evidence that is relevant to certain assertions, but not others. For example, inspection of documents related to the collection of receivables after the period end may provide audit evidence regarding existence and valuation, but not necessarily cut-off. Similarly, obtaining audit evidence regarding a particular assertion, for example, the existence of inventory, is not a substitute for obtaining audit evidence regarding another assertion, for example, the valuation of that inventory. On the other hand, audit evidence from different sources or of a different nature may often be relevant to the same assertion.

A29. Tests of controls are designed to evaluate the operating effectiveness of controls in preventing, or detecting and correcting, material misstatements at the assertion level. Designing tests of controls to obtain relevant audit evidence includes identifying conditions (characteristics or attributes) that indicate performance of a control, and deviation conditions which indicate departures from adequate performance. The presence or absence of those conditions can then be tested by the auditor.

A30. Substantive procedures are designed to detect material misstatements at the assertion level. They comprise tests of details and substantive analytical procedures. Designing substantive procedures includes identifying conditions relevant to the purpose of the test that constitute a misstatement in the relevant assertion.

¹¹ SA 580, "Written Representations".

Reliability

A31. The reliability of information to be used as audit evidence, and therefore of the audit evidence itself, is influenced by its source and its nature, and the circumstances under which it is obtained, including the controls over its preparation and maintenance where relevant. Therefore, generalisations about the reliability of various kinds of audit evidence are subject to important exceptions. Even when information to be used as audit evidence is obtained from sources external to the entity, circumstances may exist that could affect its reliability. For example, information obtained from an independent external source may not be reliable if the source is not knowledgeable, or a management's expert may lack objectivity. While recognising that exceptions may exist, the following generalisations about the reliability of audit evidence may be useful:

- The reliability of audit evidence is increased when it is obtained from independent sources outside the entity.
- The reliability of audit evidence that is generated internally is increased when the related controls, including those over its preparation and maintenance, imposed by the entity are effective.
- Audit evidence obtained directly by the auditor (for example, observation of the application of a control) is more reliable than audit evidence obtained indirectly or by inference (for example, inquiry about the application of a control).
- Audit evidence in documentary form, whether paper, electronic, or other medium, is more reliable than evidence obtained orally (for example, a contemporaneously written record of a meeting is more reliable than a subsequent oral representation of the matters discussed).
- Audit evidence provided by original documents is more reliable than audit evidence provided by photocopies or facsimiles, or documents that have been filmed, digitised or otherwise transformed into electronic form, the reliability of which may depend on the controls over their preparation and maintenance.

A32. SA 520 provides further guidance regarding the reliability of data used for purposes of designing analytical procedures as substantive procedures.¹²

A33. SA 240 deals with circumstances where the auditor has reason to believe that a document may not be authentic, or may have been modified without that modification having been disclosed to the auditor.¹³

Reliability of Information Produced by a Management's Expert (Ref: Para. 8)

A34. The preparation of an entity's financial statements may require expertise in a field other than accounting or auditing, such as actuarial calculations, valuations, or engineering data. The entity may employ or engage experts in these fields to obtain the needed expertise to prepare the financial statements. Failure to do so when such expertise is necessary increases the risks of material misstatement.

A35. When information to be used as audit evidence has been prepared using the work of a management's expert, the requirement in paragraph 8 of this SA applies. For example, an individual or organisation may possess expertise in the application of models to estimate the fair value of securities for which there is no observable market. If the individual or organisation applies that expertise in making an estimate which the entity uses in preparing its financial statements, the individual or organisation is a management's expert and paragraph 8 applies. If, on the other hand, that individual or organization merely provides price data regarding private transactions not otherwise available to the entity which the entity uses in its own estimation methods, such information, if used as audit evidence, is subject to paragraph 7 of this SA, but is not the use

¹² SA 520, paragraph 5 (a).

¹³ SA 240, "The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements", paragraph 13.

I.290 Auditing Pronouncements

of a management's expert by the entity.

A36. The nature, timing and extent of audit procedures in relation to the requirement in paragraph 8 of this SA, may be affected by such matters as:

- The nature and complexity of the matter to which the management's expert relates.
- The risks of material misstatement in the matter.
- The availability of alternative sources of audit evidence.
- The nature, scope and objectives of the management's expert's work.
- Whether the management's expert is employed by the entity, or is a party engaged by it to provide relevant services.
- The extent to which management can exercise control or influence over the work of the management's expert.
- Whether the management's expert is subject to technical performance standards or other professional or industry requirements.
- The nature and extent of any controls within the entity over the management's expert's work.
- The auditor's knowledge and experience of the management's expert's field of expertise.
- The auditor's previous experience of the work of that expert.

The Competence, Capabilities and Objectivity of a Management's Expert (Ref: Para. 8(a))

A37. Competence relates to the nature and level of expertise of the management's expert. Capability relates to the ability of the management's expert to exercise that competence in the circumstances. Factors that influence capability may include, for example, geographic location, and the availability of time and resources. Objectivity relates to the possible effects that bias, conflict of interest or the influence of others may have on the professional or business judgment of the management's expert. The competence, capabilities and objectivity of a management's expert, and any controls within the entity over that expert's work, are important factors in relation to the reliability of any information produced by a management's expert.

A38. Information regarding the competence, capabilities and objectivity of a management's expert may come from a variety of sources, such as:

- Personal experience with previous work of that expert.
- Discussions with that expert.
- Discussions with others who are familiar with that expert's work.
- Knowledge of that expert's qualifications, membership of a professional body or industry association, license to practice, or other forms of external recognition.
- Published papers or books written by that expert.
- An auditor's expert, if any, who assists the auditor in obtaining sufficient appropriate audit evidence with respect to information produced by the management's expert.

A39. Matters relevant to evaluating the competence, capabilities and objectivity of a management's expert include whether that expert's work is subject to technical performance standards or other professional or industry requirements, for example, ethical standards and other membership requirements of a professional body or industry association, accreditation standards of a licensing body, or requirements imposed by law or regulation.

A40. Other matters that may be relevant include:

- The relevance of the management's expert's competence to the matter for which that expert's work will be used, including any areas of specialty within that expert's field. For example, a particular actuary may specialise in property and casualty insurance, but have limited expertise regarding pension calculations.
- The management's expert's competence with respect to relevant accounting requirements, for example, knowledge of assumptions and methods, including models where applicable, that are consistent with the applicable financial reporting framework.
- Whether unexpected events, changes in conditions, or the audit evidence obtained from the results of audit procedures indicate that it may be necessary to reconsider the initial evaluation of the competence, capabilities and objectivity of the management's expert as the audit progresses.

A41. A broad range of circumstances may threaten objectivity, for example, self-interest threats, advocacy threats, familiarity threats, self-review threats and intimidation threats. Safeguards may reduce such threats, and may be created either by external structures (for example, the management's expert's profession, legislation or regulation), or by the management's expert's work environment (for example, quality control policies and procedures).

A42. Although safeguards cannot eliminate all threats to a management's expert's objectivity, threats such as intimidation threats may be of less significance to an expert engaged by the entity than to an expert employed by the entity, and the effectiveness of safeguards such as quality control policies and procedures may be greater. Because the threat to objectivity created by being an employee of the entity will always be present, an expert employed by the entity cannot ordinarily be regarded as being more likely to be objective than other employees of the entity.

A43. When evaluating the objectivity of an expert engaged by the entity, it may be relevant to discuss with management and that expert any interests and relationships that may create threats to the expert's objectivity, and any applicable safeguards, including any professional requirements that apply to the expert; and to evaluate whether the safeguards are adequate. Interests and relationships creating threats may include:

- Financial interests.
- Business and personal relationships.
- Provision of other services.

Obtaining an Understanding of the Work of the Management's Expert (Ref: Para. 8(b))

A44. An understanding of the work of the management's expert includes an understanding of the relevant field of expertise. An understanding of the relevant field of expertise may be obtained in conjunction with the auditor's determination of whether the auditor has the expertise to evaluate the work of the management's expert, or whether the auditor needs an auditor's expert for this purpose.¹⁴

A45. Aspects of the management's expert's field relevant to the auditor's understanding may include:

- Whether that expert's field has areas of specialty within it that are relevant to the audit.
- Whether any professional or other standards, and regulatory or legal requirements apply.
- What assumptions and methods are used by the management's expert, and whether they are generally accepted within that expert's field and appropriate for financial reporting purposes.

¹⁴ SA 620, "Using the Work of an Auditor's Expert", paragraph 7.

I.292 Auditing Pronouncements

- The nature of internal and external data or information the auditor's expert uses.

A46. In the case of a management's expert engaged by the entity, there will ordinarily be an engagement letter or other written form of agreement between the entity and that expert. Evaluating that agreement when obtaining an understanding of the work of the management's expert may assist the auditor in determining the appropriateness of the following for the auditor's purposes:

- The nature, scope and objectives of that expert's work;
- The respective roles and responsibilities of management and that expert; and
- The nature, timing and extent of communication between management and that expert, including the form of any report to be provided by that expert.

A47. In the case of a management's expert employed by the entity, it is less likely there will be a written agreement of this kind. Inquiry of the expert and other members of management may be the most appropriate way for the auditor to obtain the necessary understanding.

Evaluating the Appropriateness of the Management's Expert's Work (Ref: Para. 8(c))

A48. Considerations when evaluating the appropriateness of the management's expert's work as audit evidence for the relevant assertion may include:

- The relevance and reasonableness of that expert's findings or conclusions, their consistency with other audit evidence, and whether they have been appropriately reflected in the financial statements;
- If that expert's work involves use of significant assumptions and methods, the relevance and reasonableness of those assumptions and methods; and
- If that expert's work involves significant use of source data, the relevance, completeness, and accuracy of that source data.

Information Produced by the Entity and Used for the Auditor's Purposes (Ref: Para. 9(a)-(b))

A49. In order for the auditor to obtain reliable audit evidence, information produced by the entity that is used for performing audit procedures needs to be sufficiently complete and accurate. For example, the effectiveness of auditing revenue by applying standard prices to records of sales volume is affected by the accuracy of the price information and the completeness and accuracy of the sales volume data. Similarly, if the auditor intends to test a population (for example, payments) for a certain characteristic (for example, authorisation), the results of the test will be less reliable if the population from which items are selected for testing is not complete.

A50. Obtaining audit evidence about the accuracy and completeness of such information may be performed concurrently with the actual audit procedure applied to the information when obtaining such audit evidence is an integral part of the audit procedure itself. In other situations, the auditor may have obtained audit evidence of the accuracy and completeness of such information by testing controls over the preparation and maintenance of the information. In some situations, however, the auditor may determine that additional audit procedures are needed.

A51. In some cases, the auditor may intend to use information produced by the entity for other audit purposes. For example, the auditor may intend to make use of the entity's performance measures for the purpose of analytical procedures, or to make use of the entity's information produced for monitoring activities, such as internal auditor's reports. In such cases, the appropriateness of the audit evidence obtained is affected by whether the information is sufficiently precise or detailed for the auditor's purposes. For example, performance measures used by management may not be precise enough to detect material misstatements.

Selecting Items for Testing to Obtain Audit Evidence (Ref: Para. 10)

A52. An effective test provides appropriate audit evidence to an extent that, taken with other audit evidence obtained or to be obtained, will be sufficient for the auditor's purposes. In selecting items for testing, the auditor is required by paragraph 7 to determine the relevance and reliability of information to be used as audit evidence; the other aspect of effectiveness (sufficiency) is an important consideration in selecting items to test. The means available to the auditor for selecting items for testing are:

- (a) Selecting all items (100% examination);
- (b) Selecting specific items; and
- (c) Audit sampling.

The application of any one or combination of these means may be appropriate depending on the particular circumstances, for example, the risks of material misstatement related to the assertion being tested, and the practicality and efficiency of the different means.

Selecting All Items

A53. The auditor may decide that it will be most appropriate to examine the entire population of items that make up a class of transactions or account balance (or a stratum within that population). 100% examination is unlikely in the case of tests of controls; however, it is more common for tests of details. 100% examination may be appropriate when, for example:

- The population constitutes a small number of large value items;
- There is a significant risk and other means do not provide sufficient appropriate audit evidence; or
- The repetitive nature of a calculation or other process performed automatically by an information system makes a 100% examination cost effective.

Selecting Specific Items

A54. The auditor may decide to select specific items from a population. In making this decision, factors that may be relevant include the auditor's understanding of the entity, the assessed risks of material misstatement, and the characteristics of the population being tested. The judgmental selection of specific items is subject to non-sampling risk. Specific items selected may include:

- High value or key items. The auditor may decide to select specific items within a population because they are of high value, or exhibit some other characteristic, for example, items that are suspicious, unusual, particularly risk-prone or that have a history of error.
- All items over a certain amount. The auditor may decide to examine items whose recorded values exceed a certain amount so as to verify a large proportion of the total amount of a class of transactions or account balance.
- Items to obtain information. The auditor may examine items to obtain information about matters such as the nature of the entity or the nature of transactions.

A55. While selective examination of specific items from a class of transactions or account balance will often be an efficient means of obtaining audit evidence, it does not constitute audit sampling. The results of audit procedures applied to items selected in this way cannot be projected to the entire population; accordingly, selective examination of specific items does not provide audit evidence concerning the remainder of the population.

Audit Sampling

A56. Audit sampling is designed to enable conclusions to be drawn about an entire population on the basis

I.294 Auditing Pronouncements

of testing a sample drawn from it. Audit sampling is discussed in SA 530.¹⁵

Inconsistency in, or Doubts over Reliability of, Audit Evidence (Ref: Para. 11)

A57. Obtaining audit evidence from different sources or of a different nature may indicate that an individual item of audit evidence is not reliable, such as when audit evidence obtained from one source is inconsistent with that obtained from another. This may be the case when, for example, responses to inquiries of management, internal audit, and others are inconsistent, or when responses to inquiries of those charged with governance made to corroborate the responses to inquiries of management are inconsistent with the response by management. SA 230 includes a specific documentation requirement if the auditor identified information that is inconsistent with the auditor's final conclusion regarding a significant matter.¹⁶

Material Modifications *vis a vis* ISA 500, "Audit Evidence"

SA 500, "Audit Evidence" does not contain any material modifications *vis-a-vis* ISA 500.

SA 501*

**Audit Evidence—Specific Considerations for
Selected Items**
*(Effective for all audits relating to
accounting periods beginning on or after April 1, 2010)*

Introduction

Scope of this SA

1. This Standard on Auditing (SA) deals with specific considerations by the auditor in obtaining sufficient appropriate audit evidence in accordance with SA 330¹, SA 500² and other relevant SAs, with respect to certain aspects of inventory, litigation and claims involving the entity, and segment information in an audit of financial statements.

Effective Date

2. This SA is effective for audits of financial statements for periods beginning on or after April 1, 2010.

Objective

3. The objective of the auditor is to obtain sufficient appropriate audit evidence regarding the:
- (a) Existence and condition of inventory;
 - (b) Completeness of litigation and claims involving the entity; and
 - (c) Presentation and disclosure of segment information in accordance with the applicable financial reporting framework.

Requirements

Inventory

4. When inventory is material to the financial statements, the auditor shall obtain sufficient appropriate audit evidence regarding the existence and condition of inventory by:
- (a) Attendance at physical inventory counting, unless impracticable, to: (Ref: Para. A1-A3)
 - (i) Evaluate management's instructions and procedures for recording and controlling the results of the entity's physical inventory counting; (Ref: Para. A4)
 - (ii) Observe the performance of management's count procedures; (Ref: Para. A5)
 - (iii) Inspect the inventory; and (Ref: Para. A6)
 - (iv) Perform test counts; and (Ref: Para. A7-A8)
 - (b) Performing audit procedures over the entity's final inventory records to determine whether they accurately reflect actual inventory count results.

* Published in March, 2010 issue of the Journal.

¹ SA 330, "The Auditor's Responses to Assessed Risks".

² SA 500, "Audit Evidence".

I.296 Auditing Pronouncements

5. If physical inventory counting is conducted at a date other than the date of the financial statements, the auditor shall, in addition to the procedures required by paragraph 4, perform audit procedures to obtain audit evidence about whether changes in inventory between the count date and the date of the financial statements are properly recorded. (Ref: Para. A9-A11)
6. If the auditor is unable to attend physical inventory counting due to unforeseen circumstances, the auditor shall make or observe some physical counts on an alternative date, and perform audit procedures on intervening transactions.
7. If attendance at physical inventory counting is impracticable, the auditor shall perform alternative audit procedures to obtain sufficient appropriate audit evidence regarding the existence and condition of inventory. If it is not possible to do so, the auditor shall modify the opinion in the auditor's report in accordance with SA 705³. (Ref: Para. A12-A14)
8. When inventory under the custody and control of a third party is material to the financial statements, the auditor shall obtain sufficient appropriate audit evidence regarding the existence and condition of that inventory by performing one or both of the following:
 - (a) Request confirmation from the third party as to the quantities and condition of inventory held on behalf of the entity. (Ref: Para. A15)
 - (b) Perform inspection or other audit procedures appropriate in the circumstances. (Ref: Para. A16)

Litigation and Claims

9. The auditor shall design and perform audit procedures in order to identify litigation and claims involving the entity which may give rise to a risk of material misstatement, including: (Ref: Para. A17-A19)
 - (a) Inquiry of management and, where applicable, others within the entity, including in-house legal counsel;
 - (b) Reviewing minutes of meetings of those charged with governance and correspondence between the entity and its external legal counsel; and
 - (c) Reviewing legal expense accounts. (Ref: Para. A20)
10. If the auditor assesses a risk of material misstatement regarding litigation or claims that have been identified, or when audit procedures performed indicate that other material litigation or claims may exist, the auditor shall, in addition to the procedures required by other SAs, seek direct communication with the entity's external legal counsel. The auditor shall do so through a letter of inquiry, prepared by management and sent by the auditor, requesting the entity's external legal counsel to communicate directly with the auditor. If law, regulation or the respective legal professional body prohibits the entity's external legal counsel from communicating directly with the auditor, the auditor shall perform alternative audit procedures. (Ref: Para. A21-A25)
11. If:
 - (a) management refuses to give the auditor permission to communicate or meet with the entity's external legal counsel, or the entity's external legal counsel refuses to respond appropriately to the letter of inquiry, or is prohibited from responding; and
 - (b) the auditor is unable to obtain sufficient appropriate audit evidence by performing alternative audit procedures, the auditor shall modify the opinion in the auditor's report in accordance with SA 705.

³ SA 705, "Modifications to the Opinion in the Independent Auditor's Report".

Written Representations

12. The auditor shall request management and, where appropriate, those charged with governance to provide written representations that all known actual or possible litigation and claims whose effects should be considered when preparing the financial statements have been disclosed to the auditor and appropriately accounted for and disclosed in accordance with the applicable financial reporting framework.

Segment Information

13. The auditor shall obtain sufficient appropriate audit evidence regarding the presentation and disclosure of segment information in accordance with the applicable financial reporting framework by: (Ref: Para. A26)

- (a) Obtaining an understanding of the methods used by management in determining segment information, and: (Ref: Para. A27)
 - (i) Evaluating whether such methods are likely to result in disclosure in accordance with the applicable financial reporting framework; and
 - (ii) Where appropriate, testing the application of such methods; and
- (b) Performing analytical procedures or other audit procedures appropriate in the circumstances.

Application and Other Explanatory Material

Inventory

Attendance at Physical Inventory Counting (Ref: Para. 4(a))

A1. Management ordinarily establishes procedures under which inventory is physically counted at least once a year to serve as a basis for the preparation of the financial statements and, if applicable, to ascertain the reliability of the entity's perpetual inventory system.

A2. Attendance at physical inventory counting involves:

- Inspecting the inventory to ascertain its existence and evaluate its condition, and performing test counts;
- Observing compliance with management's instructions and the performance of procedures for recording and controlling the results of the physical inventory count; and
- Obtaining audit evidence as to the reliability of management's count procedures.

These procedures may serve as test of controls or substantive procedures depending on the auditor's risk assessment, planned approach and the specific procedures carried out.

A3. Matters relevant in planning attendance at physical inventory counting (or in designing and performing audit procedures pursuant to paragraphs 4-8 of this SA) include, for example:

- Nature of inventory.
- Stages of completion of work in progress.
- The risks of material misstatement related to inventory.
- The nature of the internal control related to inventory.
- Whether adequate procedures are expected to be established and proper instructions issued for physical inventory counting.
- The timing of physical inventory counting.
- Whether the entity maintains a perpetual inventory system.
- The locations at which inventory is held, including the materiality of the inventory and the risks of

I.298 Auditing Pronouncements

material misstatement at different locations, in deciding at which locations attendance is appropriate. SA 600, "Using the Work of Another Auditor" deals with the involvement of other auditors and accordingly may be relevant if such involvement is with regards to attendance of physical inventory counting at a remote location.

- Whether the assistance of an auditor's expert is needed. SA 620⁴ deals with the use of an auditor's expert to assist the auditor to obtain sufficient appropriate audit evidence.

Evaluate Management's Instructions and Procedures (Ref: Para. 4(a)(i))

A4. Matters relevant in evaluating management's instructions and procedures for recording and controlling the physical inventory counting include whether they address, for example:

- The application of appropriate control activities, for example, collection of used physical inventory count records, accounting for unused physical inventory count records, and count and re-count procedures.
- The accurate identification of the stage of completion of work in progress, of slow moving, obsolete or damaged items and of inventory owned by a third party, for example, on consignment.
- The procedures used to estimate physical quantities, where applicable, such as may be needed in estimating the physical quantity of a coal pile.
- Control over the movement of inventory between areas and the shipping and receipt of inventory before and after the cut off date.

Observe the Performance of Management's Count Procedures (Ref: Para. 4(a)(ii))

A5. Observing the performance of management's count procedures, for example those relating to control over the movement of inventory before, during and after the count, assists the auditor in obtaining audit evidence that management's instructions and count procedures are adequately designed and implemented. In addition, the auditor may obtain copies of cut off information, such as details of the movement of inventory, to assist the auditor in performing audit procedures over the accounting for such movements at a later date.

Inspect the Inventory (Ref: Para. 4(a)(iii))

A6. Inspecting inventory when attending physical inventory counting assists the auditor in ascertaining the existence of the inventory (though not necessarily its ownership), and in identifying, for example, obsolete, damaged or ageing inventory.

Perform Test Counts (Ref: Para. 4(a)(iv))

A7. Performing test counts, for example by tracing items selected from management's count records to the physical inventory and tracing items selected from the physical inventory to management's count records, provides audit evidence about the completeness and the accuracy of those records.

A8. In addition to recording the auditor's test counts, obtaining copies of management's completed physical inventory count records assists the auditor in performing subsequent audit procedures to determine whether the entity's final inventory records accurately reflect actual inventory count results.

Physical Inventory Counting Conducted Other than At the Date of the Financial Statements (Ref: Para. 5)

A9. For practical reasons, the physical inventory counting may be conducted at a date, or dates, other than the date of the financial statements. This may be done irrespective of whether management determines inventory quantities by an annual physical inventory counting or maintains a perpetual inventory system. In

⁴ SA 620, "Using the Work of an Auditor's Expert".

either case, the effectiveness of the design, implementation and maintenance of controls over changes in inventory determines whether the conduct of physical inventory counting at a date, or dates, other than the date of the financial statements is appropriate for audit purposes. SA 330 establishes requirements and provides guidance on substantive procedures performed at an interim date⁵.

A10. Where a perpetual inventory system is maintained, management may perform physical counts or other tests to ascertain the reliability of inventory quantity information included in the entity's perpetual inventory records. In some cases, management or the auditor may identify differences between the perpetual inventory records and actual physical inventory quantities on hand; this may indicate that the controls over changes in inventory are not operating effectively.

A11. Relevant matters for consideration when designing audit procedures to obtain audit evidence about whether changes in inventory amounts between the count date, or dates, and the final inventory records are properly recorded include:

- Whether the perpetual inventory records are properly adjusted.
- Reliability of the entity's perpetual inventory records.
- Reasons for significant differences between the information obtained during the physical count and the perpetual inventory records.

Attendance at Physical Inventory Counting Is Impracticable (Ref: Para. 7)

A12. In some cases, attendance at physical inventory counting may be impracticable. This may be due to factors such as the nature and location of the inventory, for example, where inventory is held in a location that may pose threats to the safety of the auditor. The matter of general inconvenience to the auditor, however, is not sufficient to support a decision by the auditor that attendance is impracticable. Further, as explained in SA 200⁶, the matter of difficulty, time, or cost involved is not in itself a valid basis for the auditor to omit an audit procedure for which there is no alternative or to be satisfied with audit evidence that is less than persuasive.

A13. In some cases where attendance is impracticable, alternative audit procedures, for example inspection of documentation of the subsequent sale of specific inventory items acquired or purchased prior to the physical inventory counting, may provide sufficient appropriate audit evidence about the existence and condition of inventory.

A14. In other cases, however, it may not be possible to obtain sufficient appropriate audit evidence regarding the existence and condition of inventory by performing alternative audit procedures. In such cases, SA 705 requires the auditor to modify the opinion in the auditor's report as a result of the scope limitation⁷.

Inventory under the Custody and Control of a Third Party

Confirmation (Ref: Para. 8(a))

A15. SA 505⁸ establishes requirements and provides guidance for performing external confirmation procedures.

Other Audit Procedures (Ref: Para. 8(b))

A16. Depending on the circumstances, for example where information is obtained that raises doubt about the integrity and objectivity of the third party, the auditor may consider it appropriate to perform other audit

⁵ SA 330, paragraphs 22-23.

⁶ SA 200, "Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with Standards on Auditing", paragraph A48.

⁷ SA 705, paragraph 13.

⁸ SA 505, "External Confirmations".

I.300 Auditing Pronouncements

procedures instead of, or in addition to, confirmation with the third party. Examples of other audit procedures include:

- Attending, or arranging for another auditor to attend, the third party's physical counting of inventory, if practicable.
- Obtaining another auditor's report, or a service auditor's report, on the adequacy of the third party's internal control for ensuring that inventory is properly counted and adequately safeguarded.
- Inspecting documentation regarding inventory held by third parties, for example, warehouse receipts.
- Requesting confirmation from other parties when inventory has been pledged as collateral.

Litigation and Claims

Completeness of Litigations and Claims (Ref: Para. 9)

A17. Litigation and claims involving the entity may have a material effect on the financial statements and thus may be required to be disclosed or accounted for in the financial statements.

A18. In addition to the procedures identified in paragraph 9, other relevant procedures include, for example, using information obtained through risk assessment procedures carried out as part of obtaining an understanding of the entity and its environment to assist the auditor to become aware of litigation and claims involving the entity.

A19. Audit evidence obtained for purposes of identifying litigation and claims that may give rise to a risk of material misstatement also may provide audit evidence regarding other relevant considerations, such as valuation or measurement, regarding litigation and claims. SA 540⁹ establishes requirements and provides guidance relevant to the auditor's consideration of litigation and claims requiring accounting estimates or related disclosures in the financial statements.

Reviewing Legal Expense Accounts (Ref: Para. 9(c))

A20. Depending on the circumstances, the auditor may judge it appropriate to examine related source documents, such as invoices for legal expenses, as part of the auditor's review of legal expense accounts.

Communication with the Entity's External Legal Counsel (Ref: Para. 10-11)

A21. Direct communication with the entity's external legal counsel assists the auditor in obtaining sufficient appropriate audit evidence as to whether potentially material litigation and claims are known and management's estimates of the financial implications, including costs, are reasonable.

A22. In some cases, the auditor may seek direct communication with the entity's external legal counsel through a letter of general inquiry. For this purpose, a letter of general inquiry requests the entity's external legal counsel to inform the auditor of any litigation and claims that the counsel is aware of, together with an assessment of the outcome of the litigation and claims, and an estimate of the financial implications, including costs involved.

A23. If it is considered unlikely that the entity's external legal counsel will respond appropriately to a letter of general inquiry, for example if the professional body to which the external legal counsel belongs prohibits response to such a letter, the auditor may seek direct communication through a letter of specific inquiry. For this purpose, a letter of specific inquiry includes:

- (a) A list of litigation and claims;
- (b) Where available, management's assessment of the outcome of each of the identified litigation and

⁹ SA 540, "Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures".

claims and its estimate of the financial implications, including costs involved; and

- (c) A request that the entity's external legal counsel confirm the reasonableness of management's assessments and provide the auditor with further information if the list is considered by the entity's external legal counsel to be incomplete or incorrect.

A24. In certain circumstances, the auditor also may judge it necessary to meet with the entity's external legal counsel to discuss the likely outcome of the litigation or claims. This may be the case, for example, where:

- The auditor determines that the matter is a significant risk.
- The matter is complex.
- There is disagreement between management and the entity's external legal counsel. Ordinarily, such meetings require management's permission and are held with a representative of management in attendance.

A25. In accordance with Revised SA 700¹⁰, the auditor is required to date the auditor's report no earlier than the date on which the auditor has obtained sufficient appropriate audit evidence on which to base the auditor's opinion on the financial statements. Audit evidence about the status of litigation and claims up to the date of the auditor's report may be obtained by inquiry of management, including in-house legal counsel, responsible for dealing with the relevant matters. In some instances, the auditor may need to obtain updated information from the entity's external legal counsel.

Segment Information (Ref: Para. 13)

A26. Depending on the applicable financial reporting framework, the entity may be required or permitted to disclose segment information in the financial statements. The auditor's responsibility regarding the presentation and disclosure of segment information is in relation to the financial statements taken as a whole. Accordingly, the auditor is not required to perform audit procedures that would be necessary to express an opinion on the segment information presented on a stand alone basis.

Understanding of the Methods Used by Management (Ref: Para. 13(a))

A27. Depending on the circumstances, example of matters that may be relevant when obtaining an understanding of the methods used by management in determining segment information and whether such methods are likely to result in disclosure in accordance with the applicable financial reporting framework include:

- Sales, transfers and charges between segments, and elimination of inter-segment amounts.
- Comparisons with budgets and other expected results, for example, operating profits as a percentage of sales.
- The allocation of assets and costs among segments.
- Consistency with prior periods, and the adequacy of the disclosures with respect to inconsistencies.

Modifications vis-a-vis ISA 501, "Audit Evidence—Specific Considerations for Selected Items"

SA 501, "Audit Evidence—Specific Considerations for Selected Items" does not contain any modifications vis-à-vis ISA 501.

¹⁰ Revised SA 700, "Forming an Opinion and Reporting on Financial Statements", paragraph 41.

SA 505*
External Confirmations
*(Effective for all audits relating to
accounting periods beginning on or after April 1, 2010)*

Introduction

Scope of this SA

1. This Standard on Auditing (SA) deals with the auditor's use of external confirmation procedures to obtain audit evidence in accordance with the requirements of SA 330¹ and SA 500². It does not address inquiries regarding litigation and claims. SA 501³ deals with obtaining sufficient appropriate audit evidence from such inquiries.

External Confirmation Procedures to Obtain Audit Evidence

2. SA 500 indicates that the reliability of audit evidence is influenced by its source and by its nature, and is dependent on the individual circumstances under which it is obtained⁴. That SA also includes the following generalisations applicable to audit evidence⁵:

- Audit evidence is more reliable when it is obtained from independent sources outside the entity.
- Audit evidence obtained directly by the auditor is more reliable than audit evidence obtained indirectly or by inference.
- Audit evidence is more reliable when it exists in documentary form, whether paper, electronic or other medium.

Accordingly, depending on the circumstances of the audit, audit evidence in the form of external confirmations received directly by the auditor from confirming parties may be more reliable than evidence generated internally by the entity. This SA is intended to assist the auditor in designing and performing external confirmations procedures to obtain relevant and reliable audit evidence.

3. Other SAs recognise the importance of external confirmations as audit evidence, for example:
- SA 330 discusses the auditor's responsibility to design and implement overall responses to address the assessed risks of material misstatement at the financial statement level, and to design and perform further audit procedures whose nature, timing and extent are based on, and are responsive to, the assessed risks of material misstatement at the assertion level⁶. In addition, SA 330 requires that,

* Published in March, 2010 issue of the Journal.

² SA 500, "Audit Evidence".

³ SA 501, "Audit Evidence—Specific Considerations for Selected Items".

⁴ SA 500, paragraph A5.

⁵ SA 500, paragraph A31.

⁶ SA 330, paragraphs 5-6.

irrespective of the assessed risks of material misstatement, the auditor designs and performs substantive procedures for each material class of transactions, account balance, and disclosure. The auditor is also required to consider whether external confirmation procedures are to be performed as substantive audit procedures⁷.

- SA 330 requires that the auditor obtain more persuasive audit evidence the higher the auditor's assessment of risk⁸. To do this, the auditor may increase the quantity of the evidence or obtain evidence that is more relevant or reliable, or both. For example, the auditor may place more emphasis on obtaining evidence directly from third parties or obtaining corroborating evidence from a number of independent sources. SA 330 also indicates that external confirmation procedures may assist the auditor in obtaining audit evidence with the high level of reliability that the auditor requires to respond to significant risks of material misstatement, whether due to fraud or error⁹.
- SA 240 indicates that the auditor may design confirmation requests to obtain additional corroborative information as a response to address the assessed risks of material misstatement, whether due to fraud at the assertion level¹⁰.
- SA 500 indicates that corroborating information obtained from a source independent of the entity, such as external confirmations, may increase the assurance the auditor obtains from evidence existing within the accounting records or from the representations made by the management¹¹.

Effective Date

4. This SA is effective for audit of financial statements for period beginning on or after April 1, 2010.

Objective

5. The objective of the auditor, when using external confirmation procedures, is to design and perform such procedures to obtain relevant and reliable audit evidence.

Definitions

6. For purposes of the SAs, the following terms have the meanings attributed below:
 - a) External confirmation – Audit evidence obtained as a direct written response to the auditor from a third party (the confirming party), in paper form, or by electronic or other medium.
 - b) Positive confirmation request – A request that the confirming party respond directly to the auditor indicating whether the confirming party agrees or disagrees with the information in the request, or providing the requested information.
 - c) Negative confirmation request – A request that the confirming party respond directly to the auditor only if the confirming party disagrees with the information provided in the request.
 - d) Non-response – A failure of the confirming party to respond, or fully respond, to a positive confirmation request, or a confirmation request returned undelivered.
 - e) Exception – A response that indicates a difference between information requested to be confirmed, or contained in the entity's records, and information provided by the confirming party.

⁷ SA 330, Paragraph 18 and 19.

⁸ SA 330, paragraph 7(b).

⁹ SA 330, paragraph A53.

¹⁰ SA 240, "The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements", paragraph A37.

¹¹ SA 500, paragraph A8.

I.304 Auditing Pronouncements

Requirements

External Confirmation Procedures

7. When using external confirmation procedures, the auditor shall maintain control over external confirmation requests, including:

- (a) Determining the information to be confirmed or requested; (Ref: Para. A1)
- (b) Selecting the appropriate confirming party; (Ref: Para. A2)
- (c) Designing the confirmation requests, including determining that requests are properly addressed and contain return information for responses to be sent directly to the auditor; and (Ref: Para. A3-A6)
- (d) Sending the requests, including follow-up requests when applicable, to the confirming party. (Ref: Para. A7)

Management's Refusal to Allow the Auditor to Send a Confirmation Request

8. If management refuses to allow the auditor to send a confirmation request, the auditor shall:

- (a) Inquire as to management's reasons for the refusal, and seek audit evidence as to their validity and reasonableness; (Ref: Para. A8)
- (b) Evaluate the implications of management's refusal on the auditor's assessment of the relevant risks of material misstatement, including the risk of fraud, and on the nature, timing and extent of other audit procedures; and (Ref: Para. A9)
- (c) Perform alternative audit procedures designed to obtain relevant and reliable audit evidence. (Ref: Para. A10)

9. If the auditor concludes that management's refusal to allow the auditor to send a confirmation request is unreasonable, or the auditor is unable to obtain relevant and reliable audit evidence from alternative audit procedures, the auditor shall communicate with those charged with governance in accordance with SA 260¹². The auditor also shall determine the implications for the audit and the auditor's opinion in accordance with SA 705¹³.

Results of the External Confirmation Procedures

Reliability of Responses to Confirmation Requests

10. If the auditor identifies factors that give rise to doubts about the reliability of the response to a confirmation request, the auditor shall obtain further audit evidence to resolve those doubts. (Ref: Para. A11-A16)

11. If the auditor determines that a response to a confirmation request is not reliable, the auditor shall evaluate the implications on the assessment of the relevant risks of material misstatement, including the risk of fraud, and on the related nature, timing and extent of other audit procedures. (Ref: Para. A17)

Non-Responses

12. In the case of each non-response, the auditor shall perform alternative audit procedures to obtain relevant and reliable audit evidence. (Ref: Para A18-A19)

¹² SA 260, "Communication with Those Charged with Governance", paragraph 12.

¹³ SA 705, "Modifications to the Opinion in the Independent Auditor's Report".

When a Response to a Positive Confirmation Request is Necessary to Obtain Sufficient Appropriate Audit Evidence

13. If the auditor has determined that a response to a positive confirmation request is necessary to obtain sufficient appropriate audit evidence, alternative audit procedures will not provide the audit evidence the auditor requires. If the auditor does not obtain such confirmation, the auditor shall determine the implications for the audit and the auditor's opinion in accordance with SA 705. (Ref: Para A20)

Exceptions

14. The auditor shall investigate exceptions to determine whether or not they are indicative of misstatements. (Ref: Para. A21-A22)

Negative Confirmations

15. Negative confirmations provide less persuasive audit evidence than positive confirmations. Accordingly, the auditor shall not use negative confirmation requests as the sole substantive audit procedure to address an assessed risk of material misstatement at the assertion level unless all of the following are present: (Ref: Para. A23)

- (a) The auditor has assessed the risk of material misstatement as low and has obtained sufficient appropriate audit evidence regarding the operating effectiveness of controls relevant to the assertion;
- (b) The population of items subject to negative confirmation procedures comprises a large number of small, homogeneous, account balances, transactions or conditions;
- (c) A very low exception rate is expected; and
- (d) The auditor is not aware of circumstances or conditions that would cause recipients of negative confirmation requests to disregard such requests.

Evaluating the Evidence Obtained

16. The auditor shall evaluate whether the results of the external confirmation procedures provide relevant and reliable audit evidence, or whether performing further audit procedures is necessary. (Ref: Para A24-A25)

Application and Other Explanatory Material

External Confirmation Procedures

Determining the Information to be Confirmed or Requested (Ref: Para. 7(a))

A1. External confirmation procedures frequently are performed to confirm or request information regarding account balances and their elements. They may also be used to confirm terms of agreements, contracts, or transactions between an entity and other parties, or to confirm the absence of certain conditions, such as a "side agreement".

Selecting the Appropriate Confirming Party (Ref: Para. 7(b))

A2. Responses to confirmation requests provide more relevant and reliable audit evidence when confirmation requests are sent to a confirming party the auditor believes is knowledgeable about the information to be confirmed. For example, a financial institution official who is knowledgeable about the transactions or arrangements for which confirmation is requested may be the most appropriate person at the financial institution from whom to request confirmation.

Designing Confirmation Requests (Ref: Para. 7(c))

A3. The design of a confirmation request may directly affect the confirmation response rate, and the reliability and the nature of the audit evidence obtained from responses.

I.306 Auditing Pronouncements

A4. Factors to consider when designing confirmation requests include:

- The assertions being addressed.
- Specific identified risks of material misstatement, including fraud risks.
- The layout and presentation of the confirmation request.
- Prior experience on the audit or similar engagements.
- The method of communication (for example, in paper form, or by electronic or other medium).
- Management's authorisation or encouragement to the confirming parties to respond to the auditor. Confirming parties may only be willing to respond to a confirmation request containing management's authorisation.
- The ability of the intended confirming party to confirm or provide the requested information (for example, individual invoice amount versus total balance).

A5. A positive external confirmation request asks the confirming party to reply to the auditor in all cases, either by indicating the confirming party's agreement with the given information, or by asking the confirming party to provide information. A response to a positive confirmation request ordinarily is expected to provide reliable audit evidence. There is a risk, however, that a confirming party may reply to the confirmation request without verifying that the information is correct. The auditor may reduce this risk by using positive confirmation requests that do not state the amount (or other information) on the confirmation request, and ask the confirming party to fill in the amount or furnish other information. On the other hand, use of this type of "blank" confirmation request may result in lower response rates because additional effort is required of the confirming parties.

A6. Determining that requests are properly addressed includes testing the validity of some or all of the addresses on confirmation requests before they are sent out.

Follow-Up on Confirmation Requests (Ref: Para. 7(d))

A7. The auditor may send an additional confirmation request when a reply to a previous request has not been received within a reasonable time. For example, the auditor may, having re-verified the accuracy of the original address, send an additional or follow-up request.

Management's Refusal to Allow the Auditor to Send a Confirmation Request

Reasonableness of Management's Refusal (Ref: Para. 8(a))

A8. A refusal by management to allow the auditor to send a confirmation request is a limitation on the audit evidence the auditor may wish to obtain. The auditor is therefore required to inquire as to the reasons for the limitation. A common reason advanced is the existence of a legal dispute or ongoing negotiation with the intended confirming party, the resolution of which may be affected by an untimely confirmation request. The auditor is required to seek audit evidence as to the validity and reasonableness of the reasons because of the risk that management may be attempting to deny the auditor access to audit evidence that may reveal fraud or error.

Implications for the Assessment of Risks of Material Misstatement (Ref: Para. 8(b))

A9. The auditor may conclude from the evaluation in paragraph 8(b) that it would be appropriate to revise the assessment of the risks of material misstatement at the assertion level and modify planned audit

procedures in accordance with SA 315¹⁴. For example, if management's request to not confirm is unreasonable, this may indicate a fraud risk factor that requires evaluation in accordance with SA 240¹⁵.

Alternative Audit Procedures (Ref: Para. 8(c))

A10. The alternative audit procedures performed may be similar to those appropriate for a non-response as set out in paragraphs A18-A19 of this SA. Such procedures also would take account of the results of the auditor's evaluation in paragraph 8(b) of this SA.

Results of the External Confirmation Procedures

Reliability of Responses to Confirmation Requests (Ref: Para. 10)

A11. SA 500 indicates that even when audit evidence is obtained from sources external to the entity, circumstances may exist that affect its reliability¹⁶. All responses carry some risk of interception, alteration or fraud. Such risk exists regardless of whether a response is obtained in paper form, or by electronic or other medium. Factors that may indicate doubts about the reliability of a response include that it:

- Was received by the auditor indirectly; or
- Appeared not to come from the originally intended confirming party.

A12. Responses received electronically, for example by facsimile or electronic mail, involve risks as to reliability because proof of origin and authority of the respondent may be difficult to establish, and alterations may be difficult to detect. A process used by the auditor and the respondent that creates a secure environment for responses received electronically may mitigate these risks. If the auditor is satisfied that such a process is secure and properly controlled, the reliability of the related responses is enhanced. An electronic confirmation process might incorporate various techniques for validating the identity of a sender of information in electronic form, for example, through the use of encryption, electronic digital signatures, and procedures to verify website authenticity.

A13. If a confirming party uses a third party to coordinate and provide responses to confirmation requests, the auditor may perform procedures to address the risks that:

- (a) The response may not be from the proper source;
- (b) A respondent may not be authorised to respond; and
- (c) The integrity of the transmission may have been compromised.

A14. The auditor is required by SA 500 to determine whether to modify or add procedures to resolve doubts over the reliability of information to be used as audit evidence¹⁷. The auditor may choose to verify the source and contents of a response to a confirmation request by contacting the confirming party. For example, when a confirming party responds by electronic mail, the auditor may telephone the confirming party to determine whether the confirming party did, in fact, send the response. When a response has been returned to the auditor indirectly (for example, because the confirming party incorrectly addressed it to the entity rather than to the auditor), the auditor may request the confirming party to respond in writing directly to the auditor.

A15. On its own, an oral response to a confirmation request does not meet the definition of an external confirmation because it is not a direct written response to the auditor. However, upon obtaining an oral response to a confirmation request, the auditor may, depending on the circumstances, request the confirming

¹⁴ SA 315, paragraph 31.

¹⁵ SA 240, paragraph 24.

¹⁶ SA 500, paragraph A31.

¹⁷ SA 500, paragraph 11.

I.308 Auditing Pronouncements

party to respond in writing directly to the auditor. If no such response is received, in accordance with paragraph 12, the auditor seeks other audit evidence to support the information in the oral response.

A16. A response to a confirmation request may contain restrictive language regarding its use. Such restrictions do not necessarily invalidate the reliability of the response as audit evidence.

Unreliable Responses (Ref: Para. 11)

A17. When the auditor concludes that a response is unreliable, the auditor may need to revise the assessment of the risks of material misstatement at the assertion level and modify planned audit procedures accordingly, in accordance with SA 315¹⁸. For example, an unreliable response may indicate a fraud risk factor that requires evaluation in accordance with SA 240¹⁹.

Non-Responses (Ref: Para. 12)

A18. Examples of alternative audit procedures the auditor may perform include:

- For accounts receivable balances – examining specific subsequent cash receipts, shipping documentation, and sales near the period-end.
- For accounts payable balances – examining subsequent cash disbursements or correspondence from third parties, and other records, such as goods received notes.

A19. The nature and extent of alternative audit procedures are affected by the account and assertion in question. A non-response to a confirmation request may indicate a previously unidentified risk of material misstatement. In such situations, the auditor may need to revise the assessed risk of material misstatement at the assertion level, and modify planned audit procedures, in accordance with SA 315²⁰. For example, fewer responses to confirmation requests than anticipated, or a greater number of responses than anticipated, may indicate a previously unidentified fraud risk factor that requires evaluation in accordance with SA 240²¹.

When a Response to a Positive Confirmation Request is Necessary to Obtain Sufficient Appropriate Audit Evidence (Ref: Para. 13)

A20. In certain circumstances, the auditor may identify an assessed risk of material misstatement at the assertion level for which a response to a positive confirmation request is necessary to obtain sufficient appropriate audit evidence. Such circumstances may include where:

- The information available to corroborate management's assertion(s) is only available outside the entity.
- Specific fraud risk factors, such as the risk of management override of controls, or the risk of collusion which can involve employee(s) and/or management, prevent the auditor from relying on evidence from the entity.

Exceptions (Ref: Para. 14)

A21. Exceptions noted in responses to confirmation requests may indicate misstatements or potential misstatements in the financial statements. When a misstatement is identified, the auditor is required by SA 240 to evaluate whether such misstatement is indicative of fraud²². Exceptions may provide a guide to the

¹⁸ SA 315, paragraph 31.

¹⁹ SA 240, paragraph 24.

²⁰ SA 315, paragraph 31.

²¹ SA 240, paragraph 24.

²² SA 240, paragraph 35.

quality of responses from similar confirming parties or for similar accounts. Exceptions also may indicate a deficiency, or deficiencies, in the entity's internal control over financial reporting.

A22. Some exceptions do not represent misstatements. For example, the auditor may conclude that differences in responses to confirmation requests are due to timing, measurement, or clerical errors in the external confirmation procedures.

Negative Confirmations (Ref: Para. 15)

A23. The failure to receive a response to a negative confirmation request does not explicitly indicate receipt by the intended confirming party of the confirmation request or verification of the accuracy of the information contained in the request. Accordingly, a failure of a confirming party to respond to a negative confirmation request provides significantly less persuasive audit evidence than does a response to a positive confirmation request. Confirming parties also may be more likely to respond indicating their disagreement with a confirmation request when the information in the request is not in their favour, and less likely to respond otherwise. For example, holders of bank deposit accounts may be more likely to respond if they believe that the balance in their account is understated in the confirmation request, but may be less likely to respond when they believe the balance is overstated. Therefore, sending negative confirmation requests to holders of bank deposit accounts may be a useful procedure in considering whether such balances may be understated, but is unlikely to be effective if the auditor is seeking evidence regarding overstatement.

Evaluating the Evidence Obtained (Ref: Para. 16)

A24. When evaluating the results of individual external confirmation requests, the auditor may categorise such results as follows:

- (a) A response by the appropriate confirming party indicating agreement with the information provided in the confirmation request, or providing requested information without exception;
- (b) A response deemed unreliable;
- (c) A non-response; or
- (d) A response indicating an exception.

A25. The auditor's evaluation, when taken into account with other audit procedures the auditor may have performed, may assist the auditor in concluding whether sufficient appropriate audit evidence has been obtained or whether performing further audit procedures is necessary, as required by SA 330²³.

Modifications *vis-a-vis* ISA 505, "External Confirmations"

SA 505, "External Confirmations" does not contain any modifications *vis-à-vis* ISA 505.

²³ SA 330, paragraphs 27-28.

SA 510*

Initial Audit Engagements—Opening Balances
*(Effective for audits of financial statements
for periods beginning on or after April 1, 2010)*

Introduction

Scope of this SA

1. This Standard on Auditing (SA) deals with the auditor's responsibilities relating to opening balances when conducting an initial audit engagement. In addition to financial statement amounts, opening balances include matters requiring disclosure that existed at the beginning of the period, such as contingencies and commitments. When the financial statements include comparative financial information, the requirements and guidance in SA 710¹ also apply. SA 300² includes additional requirements and guidance regarding activities prior to starting an initial audit.

Effective Date

2. This SA is effective for audits of financial statements for periods beginning on or after April 1, 2010.

Objective

3. In conducting an initial audit engagement, the objective of the auditor with respect to opening balances is to obtain sufficient appropriate audit evidence about whether:

- (a) Opening balances contain misstatements that materially affect the current period's financial statements; and
- (b) Appropriate accounting policies reflected in the opening balances have been consistently applied in the current period's financial statements, or changes thereto are properly accounted for and adequately presented and disclosed in accordance with the applicable financial reporting framework.

Definitions

4. For the purposes of the SAs, the following terms have the meanings attributed below:

- (a) Initial audit engagement – An engagement in which either:
 - (i) The financial statements for the prior period were not audited; or
 - (ii) The financial statements for the prior period were audited by a predecessor auditor.
- (b) Opening balances – Those account balances that exist at the beginning of the period. Opening balances are based upon the closing balances of the prior period and reflect the effects of transactions and events of prior periods and accounting policies applied in the prior period. Opening balances also include matters requiring disclosure that existed at the beginning of the period, such as contingencies and commitments.
- (c) Predecessor auditor – The auditor from a different audit firm, who audited the financial statements of an entity in the prior period and who has been replaced by the current auditor.

* Published in March, 2009 issue of the Journal.

¹ SA 710, "Comparative Information- Corresponding Figures and Comparatives Financial Statements".

² SA 300, "Planning an Audit of Financial Statements".

Requirements

Audit Procedures

Opening Balances

5. The auditor shall read the most recent financial statements, if any, and the predecessor auditor's report thereon, if any, for information relevant to opening balances, including disclosures.
6. The auditor shall obtain sufficient appropriate audit evidence about whether the opening balances contain misstatements that materially affect the current period's financial statements by:
- (a) Determining whether the prior period's closing balances have been correctly brought forward to the current period or, when appropriate, any adjustments have been disclosed as prior period items in the current year's Statement of Profit and Loss³;
 - (b) Determining whether the opening balances reflect the application of appropriate accounting policies; and
 - (c) Performing one or more of the following: (Ref: Para. A1–A4)
 - (i) Where the prior year financial statements were audited, perusing the copies of the audited financial statements including the other relevant documents relating to the prior period financial statements;
 - (ii) Evaluating whether audit procedures performed in the current period provide evidence relevant to the opening balances; or
 - (iii) Performing specific audit procedures to obtain evidence regarding the opening balances.
7. If the auditor obtains audit evidence that the opening balances contain misstatements that could materially affect the current period's financial statements, the auditor shall perform such additional audit procedures as are appropriate in the circumstances to determine the effect on the current period's financial statements. If the auditor concludes that such misstatements exist in the current period's financial statements, the auditor shall communicate the misstatements with the appropriate level of management and those charged with governance in accordance with SA 450⁴.

Consistency of Accounting Policies

8. The auditor shall obtain sufficient appropriate audit evidence about whether the accounting policies reflected in the opening balances have been consistently applied in the current period's financial statements, and whether changes in the accounting policies have been properly accounted for and adequately presented and disclosed in accordance with the applicable financial reporting framework.

Relevant Information in the Predecessor Auditor's Report

9. If the prior period's financial statements were audited by a predecessor auditor and there was a modification to the opinion, the auditor shall evaluate the effect of the matter giving rise to the modification in assessing the risks of material misstatement in the current period's financial statements in accordance with SA 315.⁵

³ Accounting Standard (AS) 5, "Net Profit or Loss for the Period, Prior Period Items and Changes in Accounting Policies" requires that prior period items should be separately disclosed in the Statement of Profit and Loss in a manner that their impact on the current profit or loss can be perceived.

⁴ SA 450, "Evaluation of Misstatements Identified During the Audit", paragraphs 8 and 12.

⁵ SA 315, "Identifying and Assessing the Risks of Material Misstatement Through Understanding the Entity and Its Environment".

Audit Conclusions and Reporting

Opening Balances

10. If the auditor is unable to obtain sufficient appropriate audit evidence regarding the opening balances, the auditor shall express a qualified opinion or a disclaimer of opinion, as appropriate, in accordance with SA 705.⁶ (Ref: Para. A5)

11. If the auditor concludes that the opening balances contain a misstatement that materially affects the current period's financial statements, and the effect of the misstatement is not properly accounted for or not adequately presented or disclosed, the auditor shall express a qualified opinion or an adverse opinion, as appropriate, in accordance with SA 705.

Consistency of Accounting Policies

12. If the auditor concludes that:

- (a) the current period's accounting policies are not consistently applied in relation to opening balances in accordance with the applicable financial reporting framework; or
- (b) a change in accounting policies is not properly accounted for or not adequately presented or disclosed in accordance with the applicable financial reporting framework,

the auditor shall express a qualified opinion or an adverse opinion as appropriate in accordance with SA 705.

Modification to the Opinion in the Predecessor Auditor's Report

13. If the predecessor auditor's opinion regarding the prior period's financial statements included a modification to the auditor's opinion that remains relevant and material to the current period's financial statements, the auditor shall modify the auditor's opinion on the current period's financial statements in accordance with SA 705 and SA 710. (Ref: Para. A6)

Application and Other Explanatory Material

Audit Procedures (Ref: Para. 6)

Opening Balances (Ref: Para. 6(c))

A1. The nature and extent of audit procedures necessary to obtain sufficient appropriate audit evidence regarding opening balances depend on such matters as:

- The accounting policies followed by the entity.
- The nature of the account balances, classes of transactions and disclosures and the risks of material misstatement in the current period's financial statements.
- The significance of the opening balances relative to the current period's financial statements.
- Whether the prior period's financial statements were audited and, if so, whether the predecessor auditor's opinion was modified.

A2. If the prior period's financial statements were audited by a predecessor auditor, the auditor may be able to obtain sufficient appropriate audit evidence regarding the opening balances by perusing the copies of the audited financial statements including the other relevant documents relating to the prior period financial statements such as supporting schedules to the audited financial statements. Ordinarily, the current auditor can place reliance on the closing balances contained in the financial statements for the preceding period, except when during the performance of audit procedures for the current period the possibility of

⁶ SA 705, "Modifications to the Opinion in the Independent Auditor's Report".

misstatements in opening balances is indicated.

A3. For current assets and liabilities, some audit evidence about opening balances may be obtained as part of the current period's audit procedures. For example, the collection (payment) of opening accounts receivable (accounts payable) during the current period will provide some audit evidence of their existence, rights and obligations, completeness and valuation at the beginning of the period. In the case of inventories, however, the current period's audit procedures on the closing inventory balance provide little audit evidence regarding inventory on hand at the beginning of the period. Therefore, additional audit procedures may be necessary, and one or more of the following may provide sufficient appropriate audit evidence:

- Observing a current physical inventory count and reconciling it to the opening inventory quantities.
- Performing audit procedures on the valuation of the opening inventory items.
- Performing audit procedures on gross profit and cut-off.

A4. For non-current assets and liabilities, such as property plant and equipment, investments and long-term debt, some audit evidence may be obtained by examining the accounting records and other information underlying the opening balances. In certain cases, the auditor may be able to obtain some audit evidence regarding opening balances through confirmation with third parties, for example, for long-term debt and investments. In other cases, the auditor may need to carry out additional audit procedures.

Audit Conclusions and Reporting

Opening Balances (Ref: Para. 10)

A5. SA 705 establishes requirements and provides guidance on circumstances that may result in a modification to the auditor's opinion on the financial statements, the type of opinion appropriate in the circumstances, and the content of the auditor's report when the auditor's opinion is modified. The inability of the auditor to obtain sufficient appropriate audit evidence regarding opening balances may result in one of the following modifications to the opinion in the auditor's report:

- (a) A qualified opinion or a disclaimer of opinion, as is appropriate in the circumstances; or
- (b) Unless prohibited by law or regulation, an opinion which is qualified or disclaimed, as appropriate, regarding the results of operations*, and cash flows, where relevant, and unmodified regarding State of Affairs*.

The Appendix includes illustrative auditor's reports.

Modification to the Opinion in the Predecessor Auditor's Report (Ref: Para. 13)

A6. In some situations, a modification to the predecessor auditor's opinion may not be relevant and material to the opinion on the current period's financial statements. This may be the case where, for example, there was a scope limitation in the prior period, but the matter giving rise to the scope limitation has been resolved in the current period.

Material Modifications vis a vis ISA 510, "Initial Audit Engagements - Opening Balances"

Deletions

1. Paragraph 6 (a) of ISA 510 dealt with the procedure for obtaining sufficient appropriate audit evidence about the opening balances which contain misstatements that materially affect the current period's financial statements by determining whether the prior period's closing balances have been correctly brought forward

* Profit & Loss Account.

* Balance Sheet.

I.314 Auditing Pronouncements

to the current period or, when appropriate, have been restated. Since in India Accounting Standard (AS) 5, "Net Profit or Loss for the Period, Prior Period Items and Changes in Accounting Policies" requires that prior period items should be separately disclosed in the Statement of Profit and Loss in a manner that their impact on the current profit or loss can be perceived, the restatement of the prior period financial statements does not exist in the Indian scenario. Hence, to align with the requirements of AS 5, the requirement of restatement of prior period items has been replaced with the requirement to disclose the prior period items in the current year's Statement of Profit & Loss.

2. Paragraph 6 (c) (i) of ISA 510 dealt with the procedure for obtaining sufficient appropriate audit evidence about the opening balances which contain misstatements that materially affect the current period's financial statements by reviewing the predecessor auditor's working papers, where the prior year financial statements were audited. Since in India Clause 1 of Part I of the Second Schedule to the Code of Ethics provides that a Chartered Accountant in Practice shall be deemed to be guilty of professional misconduct if he discloses information acquired in the course of his professional engagement to any person other than his client, an auditor cannot provide access to his working paper to the another auditor. Therefore, keeping in view the requirements of Code of Ethics, the requirement of reviewing the predecessor auditor's working papers has been replaced with the requirement of perusing the copies of the audited financial statements including the other relevant documents relating to the prior period financial statements. Corresponding change has also been made in the paragraph A4 of ISA 510 and Paragraphs A1 and A5 have been deleted.

3. Paragraph A2 of ISA 510 dealt with the outsourcing of an audit of a public sector entity by the statutorily appointed auditor to a private sector audit firm. Since in the Indian context such situation does not exist, the paragraph A2 of the application part has been deleted completely.

Appendix

(Ref: Para. A5)

Illustrations of Auditors' Reports with Modified Opinions*

Illustration 1:

Circumstances described in paragraph A5 (a) include the following:

- The auditor did not observe the counting of the physical inventory at the beginning of the current period and was unable to obtain sufficient appropriate audit evidence regarding the opening balances of inventory.
- The possible effects of the inability to obtain sufficient appropriate audit evidence regarding opening balances of inventory are deemed to be material but not pervasive to the entity's results of operations and cash flows.⁷
- The State of Affairs at year end gives a true and fair view.
- In this particular jurisdiction, law and regulation prohibit the auditor from giving an opinion which is qualified regarding the results of operations and cash flows and unmodified regarding State of Affairs.

* The Reporting Standards may give rise to conforming amendments to the illustrations of auditors' reports.

⁷ If the possible effects, in the auditor's judgment, are considered to be material and pervasive to the entity's results of operations and cash flows, the auditor would disclaim an opinion on the results of operations and cash flows.

INDEPENDENT AUDITOR'S REPORT

[Appropriate Addressee]

Report on the Financial Statements⁸

We have audited the accompanying financial statements of ABC Company, which comprise the balance sheet as at March 31, 20X1, and the Statement of Profit and Loss, and the cash flow statement for the year then ended, and a summary of significant accounting policies and other explanatory notes.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and presentation of financial statements that give a true and fair view in accordance with applicable Accounting Standards.⁹ This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and presentation¹⁰ of financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.¹¹ An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified audit opinion.

⁸ The sub-title "Report on the Financial Statements" is unnecessary in circumstances when the second sub-title "Report on Other Legal and Regulatory Requirements" is not applicable.

⁹ Depending on the circumstances, this sentence may read: "Management is responsible for the preparation and fair presentation of these financial statements in accordance with applicable accounting standards".

¹⁰ Depending on the circumstances, this sentence may read: "In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control".

¹¹ In circumstances when the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, this sentence would be worded as follows: "In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances". In the case of footnote 13, this sentence may read: "In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and presentation of financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances".

Basis for Qualified Opinion

We were appointed as auditors of the company on June 30, 20X0 and thus did not observe the counting of the physical inventories at the beginning of the year. We were unable to satisfy ourselves by alternative means concerning inventory quantities held at March 31, 20X0. Since opening inventories enter into the determination of the results of operations and cash flows, we were unable to determine whether adjustments might have been necessary in respect of the profit for the year reported in the Statement of Profit and Loss and the net cash flows from operating activities reported in the cash flow statement.

Qualified Opinion

In our opinion, except for the possible effects of the matter described in the Basis for Qualified Opinion paragraph, the financial statements give a true and fair view of the State of Affairs of ABC Company as of March 31, 20X1, and of its Results of Operations and its cash flows for the year then ended in accordance with applicable Accounting Standards.

Other Matters

The financial statements of the Company for the year ended March 31, 20X0, were audited by another auditor whose report dated July 1, 20X0 expressed an unmodified opinion on those statements.

Report on Other Legal and Regulatory Requirements

[Form and content of this section of the auditor's report will vary depending on the nature of the auditor's other reporting responsibilities].

Illustration 2:

Circumstances described in paragraph A5 (b) include the following:

- The auditor did not observe the counting of the physical inventory at the beginning of the current period and was unable to obtain sufficient appropriate audit evidence regarding the opening balances of inventory.
- The possible effects of the inability to obtain sufficient appropriate audit evidence regarding opening balances of inventory are deemed to be material but not pervasive to the entity's results of operations and cash flows.¹³
- The State of Affairs at year end gives a true and fair view.
- An opinion that is qualified regarding the results of operations and cash flows and unmodified regarding State of Affairs is considered appropriate in the circumstances.

¹² Partner or Proprietor, as the case may be.

¹³ If the possible effects, in the auditor's judgment, are considered to be material and pervasive to the entity's results of operations and cash flows, the auditor would disclaim the opinion on the results of operations and cash flows.

INDEPENDENT AUDITOR'S REPORT

[Appropriate Addressee]

Report on the Financial Statements¹⁴

We have audited the accompanying financial statements of ABC Company, which comprise the balance sheet as at March 31, 20X1, and the Statement of Profit and Loss, and the cash flow statement for the year then ended, and a summary of significant accounting policies and other explanatory notes.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and presentation¹⁵ of financial statements that give a true and fair view in accordance with applicable Accounting Standards. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and presentation¹⁶ of financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.¹⁷ An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our unmodified opinion on the State of Affairs and our qualified audit opinion on the results of operations and cash flows.

¹⁴ The sub-title "Report on the Financial Statements" is unnecessary in circumstances when the second sub-title "Report on Other Legal and Regulatory Requirements" is not applicable.

¹⁵ Depending on the circumstances, this sentence may read: "Management is responsible for the preparation and fair presentation of these financial statements in accordance with applicable accounting standards".

¹⁶ Depending on the circumstances, this sentence may read: "In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control".

¹⁷ In circumstances when the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, this sentence would be worded as follows: "In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances". In the case of footnote 19, this sentence may read: "In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and presentation of financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances".

Basis for Qualified Opinion on the results of operations and Cash Flows

We were appointed as auditors of the company on June 30, 20X0 and thus did not observe the counting of the physical inventories at the beginning of the year. We were unable to satisfy ourselves by alternative means concerning inventory quantities held at March 31, 20X0. Since opening inventories enter into the determination of the results of operations and cash flows, we were unable to determine whether adjustments might have been necessary in respect of the profit for the year reported in the Statement of Profit and Loss and the net cash flows from operating activities reported in the cash flow statement.

Qualified Opinion on the results of operations and Cash Flows

In our opinion, except for the possible effects of the matter described in the Basis for Qualified Opinion paragraph, the Statement of Profit and Loss and Cash Flow Statement give a true and fair view of the results of operations and cash flows of ABC Company for the year ended March 31, 20X1 in accordance with applicable Accounting Standards.

Opinion on the State of Affairs

In our opinion, the balance sheet gives a true and fair view of the State of Affairs of ABC Company as of March 31, 20X1 in accordance with applicable Accounting Standards.

Other Matters

The financial statements of the Company for the year ended March 31, 20X0, were audited by another auditor whose report dated July 1, 20X0 expressed an unmodified opinion on those statements.

Report on Other Legal and Regulatory Requirements

SA 520*
Analytical Procedures
***(Effective for all audits relating to
accounting periods beginning on or after April 1, 2010)***

Introduction

Scope of this SA

1. This Standard on Auditing (SA) deals with the auditor's use of analytical procedures as substantive procedures ("substantive analytical procedures"), and as procedures near the end of the audit that assist the auditor when forming an overall conclusion on the financial statements. The use of analytical procedures as risk assessment procedures is dealt with in SA 315¹. SA 330 includes requirements and guidance regarding the nature, timing and extent of audit procedures in response to assessed risks; these audit procedures may include substantive analytical procedures².

Effective Date

2. This SA is effective for audits of financial statements for periods beginning on or after April 1, 2010.

Objectives

3. The objectives of the auditor are:

- (a) To obtain relevant and reliable audit evidence when using substantive analytical procedures; and
- (b) To design and perform analytical procedures near the end of the audit that assist the auditor when forming an overall conclusion as to whether the financial statements are consistent with the auditor's understanding of the entity.

Definition

4. For the purposes of the SAs, the term "analytical procedures" means evaluations of financial information through analysis of plausible relationships among both financial and non-financial data. Analytical procedures also encompass such investigation as is necessary of identified fluctuations or relationships that are inconsistent with other relevant information or that differ from expected values by a significant amount. The auditor's choice of procedures, methods and level of application is a matter of professional judgement. (Ref: Para. A1-A3)

Requirements

Substantive Analytical Procedures

5. When designing and performing substantive analytical procedures, either alone or in combination with tests of details, as substantive procedures in accordance with SA 330³, the auditor shall: (Ref: Para. A4-A5)

- (a) Determine the suitability of particular substantive analytical procedures for given assertions, taking

*Published in March, 2010 issue of the Journal.

¹ SA 315, "Identifying and Assessing the Risks of Material Misstatement Through Understanding the Entity and Its Environment", paragraphs 6 (b) and A7-A10.

² SA 330, "The Auditor's Responses to Assessed Risks", paragraphs 6 and 18.

³ SA 330, paragraph 18.

I.320 Auditing Pronouncements

account of the assessed risks of material misstatement and tests of details, if any, for these assertions; (Ref: Para. A6-A11)

- (b) Evaluate the reliability of data from which the auditor's expectation of recorded amounts or ratios is developed, taking account of source, comparability, and nature and relevance of information available, and controls over preparation; (Ref: Para. A12-A14)
- (c) Develop an expectation of recorded amounts or ratios and evaluate whether the expectation is sufficiently precise to identify a misstatement that, individually or when aggregated with other misstatements, may cause the financial statements to be materially misstated; and (Ref: Para. A15)
- (d) Determine the amount of any difference of recorded amounts from expected values that is acceptable without further investigation as required by paragraph 7. (Ref: Para. A16)

Analytical Procedures that Assist When Forming an Overall Conclusion

6. The auditor shall design and perform analytical procedures near the end of the audit that assist the auditor when forming an overall conclusion as to whether the financial statements are consistent with the auditor's understanding of the entity. (Ref: Para. A17-A19)

Investigating Results of Analytical Procedures

7. If analytical procedures performed in accordance with this SA identify fluctuations or relationships that are inconsistent with other relevant information or that differ from expected values by a significant amount, the auditor shall investigate such differences by:

- (a) Inquiring of management and obtaining appropriate audit evidence relevant to management's responses; and
- (b) Performing other audit procedures as necessary in the circumstances. (Ref: Para. A20-A21)

Application and Other Explanatory Material

Nature of Analytical Procedures (Ref: Para. 4)

A1. Analytical procedures include the consideration of comparisons of the entity's financial information with, for example:

- Comparable information for prior periods.
- Anticipated results of the entity, such as budgets or forecasts, or expectations of the auditor, such as an estimation of depreciation.
- Similar industry information, such as a comparison of the entity's ratio of sales to accounts receivable with industry averages or with other entities of comparable size in the same industry.

A2. Analytical procedures also include consideration of relationships, for example:

- Among elements of financial information that would be expected to conform to a predictable pattern based on the entity's experience, such as gross margin percentages.
- Between financial information and relevant non-financial information, such as payroll costs to number of employees.

A3. Various methods may be used to perform analytical procedures. These methods range from performing simple comparisons to performing complex analyses using advanced statistical techniques. Analytical procedures may be applied to consolidated financial statements, components and individual elements of information.

Substantive Analytical Procedures (Ref: Para. 5)

A4. The auditor's substantive procedures at the assertion level may be tests of details, substantive analytical procedures, or a combination of both. The decision about which audit procedures to perform, including whether to use substantive analytical procedures, is based on the auditor's judgment about the expected effectiveness and efficiency of the available audit procedures to reduce audit risk at the assertion level to an acceptably low level.

A5. The auditor may inquire of management as to the availability and reliability of information needed to apply substantive analytical procedures, and the results of any such analytical procedures performed by the entity. It may be effective to use analytical data prepared by management, provided the auditor is satisfied that such data is properly prepared.

Suitability of Particular Analytical Procedures for Given Assertions (Ref: Para. 5(a))

A6. Substantive analytical procedures are generally more applicable to large volumes of transactions that tend to be predictable over time. The application of planned analytical procedures is based on the expectation that relationships among data exist and continue in the absence of known conditions to the contrary. However, the suitability of a particular analytical procedure will depend upon the auditor's assessment of how effective it will be in detecting a misstatement that, individually or when aggregated with other misstatements, may cause the financial statements to be materially misstated.

A7. In some cases, even an unsophisticated predictive model may be effective as an analytical procedure. For example, where an entity has a known number of employees at fixed rates of pay throughout the period, it may be possible for the auditor to use this data to estimate the total payroll costs for the period with a high degree of accuracy, thereby providing audit evidence for a significant item in the financial statements and reducing the need to perform tests of details on the payroll. The use of widely recognised trade ratios (such as profit margins for different types of retail entities) can often be used effectively in substantive analytical procedures to provide evidence to support the reasonableness of recorded amounts.

A8. Different types of analytical procedures provide different levels of assurance. Analytical procedures involving, for example, the prediction of total rental income on a building divided into apartments, taking the rental rates, the number of apartments and vacancy rates into consideration, can provide persuasive evidence and may eliminate the need for further verification by means of tests of details, provided the elements are appropriately verified. In contrast, calculation and comparison of gross margin percentages as a means of confirming a revenue figure may provide less persuasive evidence, but may provide useful corroboration if used in combination with other audit procedures.

A9. The determination of the suitability of particular substantive analytical procedures is influenced by the nature of the assertion and the auditor's assessment of the risk of material misstatement. For example, if controls over sales order processing are weak, the auditor may place more reliance on tests of details rather than on substantive analytical procedures for assertions related to receivables.

A10. Particular substantive analytical procedures may also be considered suitable when tests of details are performed on the same assertion. For example, when obtaining audit evidence regarding the valuation assertion for accounts receivable balances, the auditor may apply analytical procedures to an aging of customers' accounts in addition to performing tests of details on subsequent cash receipts to determine the collectability of the receivables.

Considerations Specific to Public Sector Entities

A11. The relationships between individual financial statement items traditionally considered in the audit of business entities may not always be relevant in the audit of governments or other non-business public sector entities; for example, in many public sector entities there may be little direct relationship between revenue

I.322 Auditing Pronouncements

and expenditure. In addition, because expenditure on the acquisition of assets may not be capitalised, there may be no relationship between expenditures on, for example, inventories and fixed assets and the amount of those assets reported in the financial statements. Also, industry data or statistics for comparative purposes may not be available in the public sector. However, other relationships may be relevant, for example, variations in the cost per kilometer of road construction or the number of vehicles acquired compared with vehicles retired.

The Reliability of the Data (Ref: Para. 5(b))

A12. The reliability of data is influenced by its source and nature and is dependent on the circumstances under which it is obtained. Accordingly, the following are relevant when determining whether data is reliable for purposes of designing substantive analytical procedures:

- (a) Source of the information available. For example, information may be more reliable when it is obtained from independent sources outside the entity⁴;
- (b) Comparability of the information available. For example, broad industry data may need to be supplemented to be comparable to that of an entity that produces and sells specialised products;
- (c) Nature and relevance of the information available. For example, whether budgets have been established as results to be expected rather than as goals to be achieved; and
- (d) Controls over the preparation of the information that are designed to ensure its completeness, accuracy and validity. For example, controls over the preparation, review and maintenance of budgets.

A13. The auditor may consider testing the operating effectiveness of controls, if any, over the entity's preparation of information used by the auditor in performing substantive analytical procedures in response to assessed risks. When such controls are effective, the auditor generally has greater confidence in the reliability of the information and, therefore, in the results of analytical procedures. The operating effectiveness of controls over non-financial information may often be tested in conjunction with other tests of controls. For example, in establishing controls over the processing of sales invoices, an entity may include controls over the recording of unit sales. In these circumstances, the auditor may test the operating effectiveness of controls over the recording of unit sales in conjunction with tests of the operating effectiveness of controls over the processing of sales invoices. Alternatively, the auditor may consider whether the information was subjected to audit testing. SA 500 establishes requirements and provides guidance in determining the audit procedures to be performed on the information to be used for substantive analytical procedures⁵.

A14. The matters discussed in paragraphs A12(a)-A12(d) are relevant irrespective of whether the auditor performs substantive analytical procedures on the entity's period end financial statements, or at an interim date and plans to perform substantive analytical procedures for the remaining period. SA 330 establishes requirements and provides guidance on substantive procedures performed at an interim date⁶.

Evaluation of Whether the Expectation Is Sufficiently Precise (Ref: Para. 5(c))

A15. Matters relevant to the auditor's evaluation of whether the expectation can be developed sufficiently precisely to identify a misstatement that, when aggregated with other misstatements, may cause the financial statements to be materially misstated, include:

- The accuracy with which the expected results of substantive analytical procedures can be predicted. For example, the auditor may expect greater consistency in comparing gross profit margins from one

⁴ SA 500, "Audit Evidence", paragraph A31.

⁵ SA 500, paragraph 10.

⁶ SA 330, paragraphs 22-23.

period to another than in comparing discretionary expenses, such as research or advertising.

- The degree to which information can be disaggregated. For example, substantive analytical procedures may be more effective when applied to financial information on individual sections of an operation or to financial statements of components of a diversified entity, than when applied to the financial statements of the entity as a whole.
- The availability of the information, both financial and non-financial. For example, the auditor may consider whether financial information, such as budgets or forecasts, and non-financial information, such as the number of units produced or sold, is available to design substantive analytical procedures. If the information is available, the auditor may also consider the reliability of the information as discussed in paragraphs A12 - A13 above.

Amount of Difference of Recorded Amounts from Expected Values that Is Acceptable (Ref: Para. 5(d))

A16. The auditor's determination of the amount of difference from the expectation that can be accepted without further investigation is influenced by materiality⁷ and the consistency with the desired level of assurance, taking account of the possibility that a misstatement, individually or when aggregated with other misstatements, may cause the financial statements to be materially misstated. SA 330 requires the auditor to obtain more persuasive audit evidence the higher the auditor's assessment of risk⁸. Accordingly, as the assessed risk increases, the amount of difference considered acceptable without investigation decreases in order to achieve the desired level of persuasive evidence⁹.

Analytical Procedures that Assist When Forming an Overall Conclusion (Ref: Para. 6)

A17. The conclusions drawn from the results of analytical procedures designed and performed in accordance with paragraph 6 are intended to corroborate conclusions formed during the audit of individual components or elements of the financial statements. This assists the auditor to draw reasonable conclusions on which to base the auditor's opinion.

A18. The results of such analytical procedures may identify a previously unrecognised risk of material misstatement. In such circumstances, SA 315 requires the auditor to revise the auditor's assessment of the risks of material misstatement and modify the further planned audit procedures accordingly¹⁰.

A19. The analytical procedures performed in accordance with paragraph 6 may be similar to those that would be used as risk assessment procedures.

Investigating Results of Analytical Procedures (Ref: Para. 7)

A20. Audit evidence relevant to management's responses may be obtained by evaluating those responses taking into account the auditor's understanding of the entity and its environment, and with other audit evidence obtained during the course of the audit.

A21. The need to perform other audit procedures may arise when, for example, management is unable to provide an explanation, or the explanation, together with the audit evidence obtained relevant to management's response, is not considered adequate.

Modifications *vis-a-vis* ISA 520, "Analytical Procedures"

SA 520, "Analytical Procedures" does not contain any modifications *vis-à-vis* ISA 520.

⁷ SA 320, "Materiality in Planning and Performing an Audit", paragraph A13.

⁸ SA 330, paragraph 7(b).

⁹ SA 330, paragraph A19.

¹⁰ SA 315, paragraph 31.

Analytical Procedures

Trends

Analysing account fluctuations by comparing current year to prior year information and, also, to information derived over several years.

Reasonableness

Tests are made by reviewing the relationship of certain account balances to other balances for reasonableness of amounts. Examples of accounts that may be reasonably tested are:

- Interest expense against interest bearing obligations
- Raw Material Consumption to Production (quantity)
- Wastage & Scrap % against production & raw material consumption (quantity)
- Work-in-Progress based on issued of materials & Sales (quantity)
- Sales discounts and commissions against sales volume
- Rental revenues based on occupancy of premises

Ratios

Analysis by computation of ratios includes the study of relationships between financial statement amounts. Commonly used ratios include:

- Elements of income or loss as a percentage of sales
- Gross profit turnover
- Accounts receivable turnover
- Inventory turnover
- Profitability, leverage, and liquidity

Sources of information

- Interim financial information
- Budgets
- Management accounts
- Non-financial information
- Bank and cash records
- VAT returns
- Board minutes

SA 530*
Audit Sampling
*(Effective for audits of financial statements
for periods beginning on or after April 1, 2009)*

Introduction

Scope of this SA

1. This Standard on Auditing (SA) applies when the auditor has decided to use audit sampling in performing audit procedures. It deals with the auditor's use of statistical and non-statistical sampling when designing and selecting the audit sample, performing tests of controls and tests of details, and evaluating the results from the sample.
2. This SA complements SA 500¹, which deals with the auditor's responsibility to design and perform audit procedures to obtain sufficient appropriate audit evidence to be able to draw reasonable conclusions on which to base the audit opinion. SA 500 provides guidance on the means available to the auditor for selecting items for testing, of which audit sampling is one means.

Effective Date

3. This SA is effective for audits of financial statements for periods beginning on or after April 1, 2009.

Objective

4. The objective of the auditor when using audit sampling is to provide a reasonable basis for the auditor to draw conclusions about the population from which the sample is selected.

Definitions

5. For purposes of the SAs, the following terms have the meanings attributed below:
 - (a) Audit sampling (sampling) – The application of audit procedures to less than 100% of items within a population of audit relevance such that all sampling units have a chance of selection in order to provide the auditor with a reasonable basis on which to draw conclusions about the entire population.
 - (b) Population – The entire set of data from which a sample is selected and about which the auditor wishes to draw conclusions.
 - (c) Sampling risk – The risk that the auditor's conclusion based on a sample may be different from the conclusion if the entire population were subjected to the same audit procedure. Sampling risk can lead to two types of erroneous conclusions:
 - (i) In the case of a test of controls, that controls are more effective than they actually are, or in the case of a test of details, that a material misstatement does not exist when in fact it does. The auditor is primarily concerned with this type of erroneous conclusion because it affects audit effectiveness and is more likely to lead to an inappropriate audit opinion.

* Published in February, 2009 issue of the Journal.

¹ SA 500, "Audit Evidence".

I.326 Auditing Pronouncements

- (ii) In the case of a test of controls, that controls are less effective than they actually are, or in the case of a test of details, that a material misstatement exists when in fact it does not. This type of erroneous conclusion affects audit efficiency as it would usually lead to additional work to establish that initial conclusions were incorrect.
- (d) Non-sampling risk – The risk that the auditor reaches an erroneous conclusion for any reason not related to sampling risk. *(Ref: Para A1)*
- (e) Anomaly – A misstatement or deviation that is demonstrably not representative of misstatements or deviations in a population.
- (f) Sampling unit – The individual items constituting a population. *(Ref: Para A2)*
- (g) Statistical sampling – An approach to sampling that has the following characteristics:
 - (i) Random selection of the sample items; and
 - (ii) The use of probability theory to evaluate sample results, including measurement of sampling risk.A sampling approach that does not have characteristics (i) and (ii) is considered non-statistical sampling.
- (h) Stratification – The process of dividing a population into sub-populations, each of which is a group of sampling units which have similar characteristics (often monetary value).
- (i) Tolerable misstatement – A monetary amount set by the auditor in respect of which the auditor seeks to obtain an appropriate level of assurance that the monetary amount set by the auditor is not exceeded by the actual misstatement in the population. *(Ref: Para. A3)*
- (j) Tolerable rate of deviation – A rate of deviation from prescribed internal control procedures set by the auditor in respect of which the auditor seeks to obtain an appropriate level of assurance that the rate of deviation set by the auditor is not exceeded by the actual rate of deviation in the population.

Requirements

Sample Design, Size and Selection of Items for Testing

- 6. When designing an audit sample, the auditor shall consider the purpose of the audit procedure and the characteristics of the population from which the sample will be drawn. *(Ref: Para. A4-A9)*
- 7. The auditor shall determine a sample size sufficient to reduce sampling risk to an acceptably low level. *(Ref: Para. A10-A11)*
- 8. The auditor shall select items for the sample in such a way that each sampling unit in the population has a chance of selection. *(Ref: Para. A12-A13)*

Performing Audit Procedures

- 9. The auditor shall perform audit procedures, appropriate to the purpose, on each item selected.
- 10. If the audit procedure is not applicable to the selected item, the auditor shall perform the procedure on a replacement item. *(Ref: Para. A14)*
- 11. If the auditor is unable to apply the designed audit procedures, or suitable alternative procedures, to a selected item, the auditor shall treat that item as a deviation from the prescribed control, in the case of tests of controls, or a misstatement, in the case of tests of details. *(Ref: Para. A15-A16)*

Nature and Cause of Deviations and Misstatements

12. The auditor shall investigate the nature and cause of any deviations or misstatements identified, and evaluate their possible effect on the purpose of the audit procedure and on other areas of the audit. (Ref: Para. A17)

13. In the extremely rare circumstances when the auditor considers a misstatement or deviation discovered in a sample to be an anomaly, the auditor shall obtain a high degree of certainty that such misstatement or deviation is not representative of the population. The auditor shall obtain this degree of certainty by performing additional audit procedures to obtain sufficient appropriate audit evidence that the misstatement or deviation does not affect the remainder of the population.

Projecting Misstatements

14. For tests of details, the auditor shall project misstatements found in the sample to the population. (Ref: Para. A18-A20)

Evaluating Results of Audit Sampling

15. The auditor shall evaluate:

- (a) The results of the sample; and (Ref: Para. A21-A22)
- (b) Whether the use of audit sampling has provided a reasonable basis for conclusions about the population that has been tested. (Ref: Para. A23)

Application and Other Explanatory Material

Definitions

Non-Sampling Risk (Ref: Para. 5(d))

A1. Examples of non-sampling risk include use of inappropriate audit procedures, or misinterpretation of audit evidence and failure to recognise a misstatement or deviation.

Sampling Unit (Ref: Para. 5(f))

A2. The sampling units might be physical items (for example, cheques listed on deposit slips, credit entries on bank statements, sales invoices or debtors' balances) or monetary units.

Tolerable Misstatement (Ref: Para. 5(i))

A3. When designing a sample, the auditor determines tolerable misstatement in order to address the risk that the aggregate of individually immaterial misstatements may cause the financial statements to be materially misstated and provide a margin for possible undetected misstatements. Tolerable misstatement is the application of performance materiality, as defined in SA 320², to a particular sampling procedure. Tolerable misstatement may be the same amount or an amount lower than performance materiality.

Sample Design, Size and Selection of Items for Testing

Sample Design (Ref: Para. 6)

A4. Audit sampling enables the auditor to obtain and evaluate audit evidence about some characteristic of the items selected in order to form or assist in forming a conclusion concerning the population from which the sample is drawn. Audit sampling can be applied using either non-statistical or statistical sampling approaches.

² SA 320, "Materiality in Planning and Performing an Audit", paragraph 9.

A5. When designing an audit sample, the auditor's consideration includes the specific purpose to be achieved and the combination of audit procedures that is likely to best achieve that purpose. Consideration of the nature of the audit evidence sought and possible deviation or misstatement conditions or other characteristics relating to that audit evidence will assist the auditor in defining what constitutes a deviation or misstatement and what population to use for sampling. In fulfilling the requirement of paragraph 8 of SA 500, when performing audit sampling, the auditor performs audit procedures to obtain evidence that the population from which the audit sample is drawn is complete.

A6. The auditor's consideration of the purpose of the audit procedure, as required by paragraph 6, includes a clear understanding of what constitutes a deviation or misstatement so that all, and only, those conditions that are relevant to the purpose of the audit procedure are included in the evaluation of deviations or projection of misstatements. For example, in a test of details relating to the existence of accounts receivable, such as confirmation, payments made by the customer before the confirmation date but received shortly after that date by the client, are not considered a misstatement. Also, a misposting between customer accounts does not affect the total accounts receivable balance. Therefore, it may not be appropriate to consider this a misstatement in evaluating the sample results of this particular audit procedure, even though it may have an important effect on other areas of the audit, such as the assessment of the risk of fraud or the adequacy of the allowance for doubtful accounts.

A7. In considering the characteristics of a population, for tests of controls, the auditor makes an assessment of the expected rate of deviation based on the auditor's understanding of the relevant controls or on the examination of a small number of items from the population. This assessment is made in order to design an audit sample and to determine sample size. For example, if the expected rate of deviation is unacceptably high, the auditor will normally decide not to perform tests of controls. Similarly, for tests of details, the auditor makes an assessment of the expected misstatement in the population. If the expected misstatement is high, 100% examination or use of a large sample size may be appropriate when performing tests of details.

A8. In considering the characteristics of the population from which the sample will be drawn, the auditor may determine that stratification or value-weighted selection is appropriate. Appendix 1 provides further discussion on stratification and value-weighted selection.

A9. The decision whether to use a statistical or non-statistical sampling approach is a matter for the auditor's judgment; however, sample size is not a valid criterion to distinguish between statistical and non-statistical approaches.

Sample Size (Ref: Para. 7)

A10. The level of sampling risk that the auditor is willing to accept affects the sample size required. The lower the risk the auditor is willing to accept, the greater the sample size will need to be.

A11. The sample size can be determined by the application of a statistically-based formula or through the exercise of professional judgment. Appendices 2 and 3 indicate the influences that various factors typically have on the determination of sample size. When circumstances are similar, the effect on sample size of factors such as those identified in Appendices 2 and 3 will be similar regardless of whether a statistical or non-statistical approach is chosen.

Selection of Items for Testing (Ref: Para. 8)

A12. With statistical sampling, sample items are selected in a way that each sampling unit has a known probability of being selected. With non-statistical sampling, judgment is used to select sample items. Because the purpose of sampling is to provide a reasonable basis for the auditor to draw conclusions about the population from which the sample is selected, it is important that the auditor selects a representative

sample, so that bias is avoided, by choosing sample items which have characteristics typical of the population.

A13. The principal methods of selecting samples are the use of random selection, systematic selection and haphazard selection. Each of these methods is discussed in Appendix 4.

Performing Audit Procedures (Ref: Para. 10-11)

A14. An example of when it is necessary to perform the procedure on a replacement item is when a cancelled cheque is selected while testing for evidence of payment authorisation. If the auditor is satisfied that the cheque has been properly cancelled such that it does not constitute a deviation, an appropriately chosen replacement is examined.

A15. An example of when the auditor is unable to apply the designed audit procedures to a selected item is when documentation relating to that item has been lost.

A16. An example of a suitable alternative procedure might be the examination of subsequent cash receipts together with evidence of their source and the items they are intended to settle when no reply has been received in response to a positive confirmation request.

Nature and Cause of Deviations and Misstatements (Ref: Para. 12)

A17. In analysing the deviations and misstatements identified, the auditor may observe that many have a common feature, for example, type of transaction, location, product line or period of time. In such circumstances, the auditor may decide to identify all items in the population that possess the common feature, and extend audit procedures to those items. In addition, such deviations or misstatements may be intentional, and may indicate the possibility of fraud.

Projecting Misstatements (Ref: Para. 14)

A18. The auditor is required to project misstatements for the population to obtain a broad view of the scale of misstatement but this projection may not be sufficient to determine an amount to be recorded.

A19. When a misstatement has been established as an anomaly, it may be excluded when projecting misstatements to the population. However, the effect of any such misstatement, if uncorrected, still needs to be considered in addition to the projection of the non-anomalous misstatements.

A20. For tests of controls, no explicit projection of deviations is necessary since the sample deviation rate is also the projected deviation rate for the population as a whole. SA 330³ provides guidance when deviations from controls upon which the auditor intends to rely are detected.

Evaluating Results of Audit Sampling (Ref: Para. 15)

A21. For tests of controls, an unexpectedly high sample deviation rate may lead to an increase in the assessed risk of material misstatement, unless further audit evidence substantiating the initial assessment is obtained. For tests of details, an unexpectedly high misstatement amount in a sample may cause the auditor to believe that a class of transactions or account balance is materially misstated, in the absence of further audit evidence that no material misstatement exists.

A22. In the case of tests of details, the projected misstatement plus anomalous misstatement, if any, is the auditor's best estimate of misstatement in the population. When the projected misstatement plus anomalous misstatement, if any, exceeds tolerable misstatement, the sample does not provide a reasonable basis for conclusions about the population that has been tested. The closer the projected misstatement plus anomalous misstatement is to tolerable misstatement, the more likely that actual misstatement in the

³ SA 330, "The Auditor's Responses to Assessed Risks", paragraphs 17 and A41.

I.330 Auditing Pronouncements

population may exceed tolerable misstatement. Also if the projected misstatement is greater than the auditor's expectations of misstatement used to determine the sample size, the auditor may conclude that there is an unacceptable sampling risk that the actual misstatement in the population exceeds the tolerable misstatement. Considering the results of other audit procedures helps the auditor to assess the risk that actual misstatement in the population exceeds tolerable misstatement, and the risk may be reduced if additional audit evidence is obtained.

A23. If the auditor concludes that audit sampling has not provided a reasonable basis for conclusions about the population that has been tested, the auditor may:

- Request management to investigate misstatements that have been identified and the potential for further misstatements and to make any necessary adjustments; or
- Tailor the nature, timing and extent of those further audit procedures to best achieve the required assurance. For example, in the case of tests of controls, the auditor might extend the sample size, test an alternative control or modify related substantive procedures.

Material Modifications *vis a vis* ISA 530, "Audit Sampling"

SA 530, "Audit Sampling" does not contain any material modifications *vis à vis* ISA 530.

Appendix 1 (Ref: Para. A8)

Stratification and Value-Weighted Selection

In considering the characteristics of the population from which the sample will be drawn, the auditor may determine that stratification or value-weighted selection is appropriate. This Appendix provides guidance to the auditor on the use of stratification and value-weighted sampling techniques.

Stratification

1. Audit efficiency may be improved if the auditor stratifies a population by dividing it into discrete sub-populations which have an identifying characteristic. The objective of stratification is to reduce the variability of items within each stratum and therefore allow sample size to be reduced without increasing sampling risk.
2. When performing tests of details, the population is often stratified by monetary value. This allows greater audit effort to be directed to the larger value items, as these items may contain the greatest potential misstatement in terms of overstatement. Similarly, a population may be stratified according to a particular characteristic that indicates a higher risk of misstatement, for example, when testing the allowance for doubtful accounts in the valuation of accounts receivable, balances may be stratified by age.
3. The results of audit procedures applied to a sample of items within a stratum can only be projected to the items that make up that stratum. To draw a conclusion on the entire population, the auditor will need to consider the risk of material misstatement in relation to whatever other strata make up the entire population. For example, 20% of the items in a population may make up 90% of the value of an account balance. The auditor may decide to examine a sample of these items. The auditor evaluates the results of this sample and reaches a conclusion on the 90% of value separately from the remaining 10% (on which a further sample or other means of gathering audit evidence will be used, or which may be considered immaterial).
4. If a class of transactions or account balance has been divided into strata, the misstatement is projected for each stratum separately. Projected misstatements for each stratum are then combined when considering the possible effect of misstatements on the total class of transactions or account balance.

Value-Weighted Selection

5. When performing tests of details it may be efficient to identify the sampling unit as the individual monetary units that make up the population. Having selected specific monetary units from within the population, for example, the accounts receivable balance, the auditor may then examine the particular items, for example, individual balances, that contain those monetary units. One benefit of this approach to defining the sampling unit is that audit effort is directed to the larger value items because they have a greater chance of selection, and can result in smaller sample sizes. This approach may be used in conjunction with the systematic method of sample selection (described in Appendix 4) and is most efficient when selecting items using random selection.

Appendix 2

(Ref: Para. A11)

Examples of Factors Influencing Sample Size for Tests of Controls

The following are factors that the auditor may consider when determining the sample size for tests of controls. These factors, which need to be considered together, assume the auditor does not modify the nature or timing of tests of controls or otherwise modify the approach to substantive procedures in response to assessed risks.

FACTOR	EFFECT ON SAMPLE SIZE	
1. An increase in the extent to which the auditor's risk assessment takes into account relevant controls	Increase	The more assurance the auditor intends to obtain from the operating effectiveness of controls, the lower the auditor's assessment of the risk of material misstatement will be, and the larger the sample size will need to be. When the auditor's assessment of the risk of material misstatement at the assertion level includes an expectation of the operating effectiveness of controls, the auditor is required to perform tests of controls. Other things being equal, the greater the reliance the auditor places on the operating effectiveness of controls in the risk assessment, the greater is the extent of the auditor's tests of controls (and therefore, the sample size is increased).
2. An increase in the tolerable rate of deviation	Decrease	The lower the tolerable rate of deviation, the larger the sample size needs to be.
3. An increase in the expected rate of deviation of the population to be tested	Increase	The higher the expected rate of deviation, the larger the sample size needs to be so that the auditor is in a position to make a reasonable estimate of the actual rate of deviation. Factors relevant to the auditor's consideration of the expected rate of deviation include the auditor's understanding of the business (in particular, risk assessment procedures

I.332 Auditing Pronouncements

		undertaken to obtain an understanding of internal control), changes in personnel or in internal control, the results of audit procedures applied in prior periods and the results of other audit procedures. High expected control deviation rates ordinarily warrant little, if any, reduction of the assessed risk of material misstatement.
4. An increase in the auditor's desired level of assurance that the tolerable rate of deviation is not exceeded by the actual rate of deviation in the population	Increase	The greater the level of assurance that the auditor desires that the results of the sample are in fact indicative of the actual incidence of deviation in the population, the larger the sample size needs to be.
5. An increase in the number of sampling units in the population	Negligible effect	For large populations, the actual size of the population has little, if any, effect on sample size. For small populations however, audit sampling may not be as efficient as alternative means of obtaining sufficient appropriate audit evidence.

Appendix 3

(Ref: Para. A11)

Examples of Factors Influencing Sample Size for Tests of Details

The following are factors that the auditor may consider when determining the sample size for tests of details. These factors, which need to be considered together, assume the auditor does not modify the approach to tests of controls or otherwise modify the nature or timing of substantive procedures in response to the assessed risks.

FACTOR	EFFECT ON SAMPLE SIZE	
1. An increase in the auditor's assessment of the risk of material misstatement	Increase	The higher the auditor's assessment of the risk of material misstatement, the larger the sample size needs to be. The auditor's assessment of the risk of material misstatement is affected by inherent risk and control risk. For example, if the auditor does not perform tests of controls, the auditor's risk assessment cannot be reduced for the effective operation of internal controls with respect to the particular assertion. Therefore, in order to reduce audit risk to an acceptably low level, the auditor needs a low detection risk and will rely more on substantive procedures. The more audit evidence that is obtained from tests of details (that is, the lower the detection risk), the larger the sample size will need to be.

2. An increase in the use of other substantive procedures directed at the same assertion	Decrease	The more the auditor is relying on other substantive procedures (tests of details or substantive analytical procedures) to reduce to an acceptable level the detection risk regarding a particular population, the less assurance the auditor will require from sampling and, therefore, the smaller the sample size can be.
3. An increase in the auditor's desired level of assurance that tolerable misstatement is not exceeded by actual misstatement in the population	Increase	The greater the level of assurance that the auditor requires that the results of the sample are in fact indicative of the actual amount of misstatement in the population, the larger the sample size needs to be.
4. An increase in tolerable misstatement	Decrease	The lower the tolerable misstatement, the larger the sample size needs to be.
5. An increase in the amount of misstatement the auditor expects to find in the population	Increase	The greater the amount of misstatement the auditor expects to find in the population, the larger the sample size needs to be in order to make a reasonable estimate of the actual amount of misstatement in the population. Factors relevant to the auditor's consideration of the expected misstatement amount include the extent to which item values are determined subjectively, the results of risk assessment procedures, the results of tests of control, the results of audit procedures applied in prior periods, and the results of other substantive procedures.
6. Stratification of the population when appropriate	Decrease	When there is a wide range (variability) in the monetary size of items in the population, it may be useful to stratify the population. When a population can be appropriately stratified, the aggregate of the sample sizes from the strata generally will be less than the sample size that would have been required to attain a given level of sampling risk, had one sample been drawn from the whole population.
7. The number of sampling units in the population	Negligible effect	For large populations, the actual size of the population has little, if any, effect on sample size. Thus, for small populations, audit sampling is often not as efficient as alternative means of obtaining sufficient appropriate audit evidence. (However, when using monetary unit sampling, an increase in the monetary value of the population increases sample size, unless this is offset by a proportional increase in materiality for the financial statements as a whole (and, if applicable, materiality level or levels for particular classes of transactions, account balances or disclosures).

Appendix 4

(Ref: Para. A13)

Sample Selection Methods

There are many methods of selecting samples. The principal methods are as follows:

- (a) Random selection (applied through random number generators, for example, random number tables).
- (b) Systematic selection, in which the number of sampling units in the population is divided by the sample size to give a sampling interval, for example 50, and having determined a starting point within the first 50, each 50th sampling unit thereafter is selected. Although the starting point may be determined haphazardly, the sample is more likely to be truly random if it is determined by use of a computerised random number generator or random number tables. When using systematic selection, the auditor would need to determine that sampling units within the population are not structured in such a way that the sampling interval corresponds with a particular pattern in the population.
- (c) Monetary Unit Sampling is a type of value-weighted selection (as described in Appendix 1) in which sample size, selection and evaluation results in a conclusion in monetary amounts.
- (d) Haphazard selection, in which the auditor selects the sample without following a structured technique. Although no structured technique is used, the auditor would nonetheless avoid any conscious bias or predictability (for example, avoiding difficult to locate items, or always choosing or avoiding the first or last entries on a page) and thus attempt to ensure that all items in the population have a chance of selection. Haphazard selection is not appropriate when using statistical sampling.
- (e) Block selection involves selection of a block(s) of contiguous items from within the population. Block selection cannot ordinarily be used in audit sampling because most populations are structured such that items in a sequence can be expected to have similar characteristics to each other, but different characteristics from items elsewhere in the population. Although in some circumstances it may be an appropriate audit procedure to examine a block of items, it would rarely be an appropriate sample selection technique when the auditor intends to draw valid inferences about the entire population based on the sample.

SA 540*

Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures
(Effective for audits of financial statements for periods beginning on or after April 1, 2009)

Introduction

Scope of this SA

1. This Standard on Auditing (SA) deals with the auditor's responsibilities regarding accounting estimates, including fair value accounting estimates, and related disclosures in an audit of financial statements. Specifically, it expands on how SA 315¹ and SA 330² and other relevant SAs are to be applied in relation to accounting estimates. It also includes requirements and guidance on misstatements of individual accounting estimates, and indicators of possible management bias.

Nature of Accounting Estimates

2. Some financial statement items cannot be measured precisely, but can only be estimated. For purposes of this SA, such financial statement items are referred to as accounting estimates. The nature and reliability of information available to management to support the making of an accounting estimate varies widely, which thereby affects the degree of estimation uncertainty associated with accounting estimates. The degree of estimation uncertainty affects, in turn, the risks of material misstatement of accounting estimates, including their susceptibility to unintentional or intentional management bias. (Ref: Para. A1-A11)

3. The measurement objective of accounting estimates can vary depending on the applicable financial reporting framework and the financial item being reported. The measurement objective for some accounting estimates is to forecast the outcome of one or more transactions, events or conditions giving rise to the need for the accounting estimate. For other accounting estimates, including many fair value accounting estimates, the measurement objective is different, and is expressed in terms of the value of a current transaction or financial statement item based on conditions prevalent at the measurement date, such as estimated market price for a particular type of asset or liability. For example, the applicable financial reporting framework may require fair value measurement based on an assumed hypothetical current transaction between knowledgeable, willing parties (sometimes referred to as "marketplace participants" or equivalent) in an arm's length transaction, rather than the settlement of a transaction at some past or future date.³

4. A difference between the outcome of an accounting estimate and the amount originally recognised or disclosed in the financial statements does not necessarily represent a misstatement of the financial statements. This is particularly the case for fair value accounting estimates, as any observed outcome is

* Published in February, 2009 issue of the Journal.

¹ SA 315, "Identifying and Assessing the Risks of Material Misstatement Through Understanding the Entity and Its Environment".

² SA 330, "The Auditor's Responses to Assessed Risks".

³ Different definitions of fair value may exist among financial reporting frameworks.

invariably affected by events or conditions subsequent to the date at which the measurement is estimated for purposes of the financial statements.

Effective Date

5. This SA is effective for audits of financial statements for periods beginning on or after April 1, 2009.

Objective

6. The objective of the auditor is to obtain sufficient appropriate audit evidence whether in the context of the applicable financial reporting framework:

- (a) accounting estimates, including fair value accounting estimates, in the financial statements, whether recognised or disclosed, are reasonable; and
- (b) related disclosures in the financial statements are adequate.

Definitions

7. For purposes of the SAs, the following terms have the meanings attributed below:

- (a) **Accounting estimate** – An approximation of a monetary amount in the absence of a precise means of measurement. This term is used for an amount measured at fair value where there is estimation uncertainty, as well as for other amounts that require estimation. Where this SA addresses only accounting estimates involving measurement at fair value, the term “fair value accounting estimates” is used.
- (b) **Auditor’s point estimate or auditor’s range** – The amount, or range of amounts, respectively, derived from audit evidence for use in evaluating management’s point estimate.
- (c) **Estimation uncertainty** – The susceptibility of an accounting estimate and related disclosures to an inherent lack of precision in its measurement.
- (d) **Management bias** – A lack of neutrality by management in the preparation and presentation of information.
- (e) **Management’s point estimate** – The amount selected by management for recognition or disclosure in the financial statements as an accounting estimate.
- (f) **Outcome of an accounting estimate** – The actual monetary amount which results from the resolution of the underlying transaction(s), event(s) or condition(s) addressed by the accounting estimate.

Requirements

Risk Assessment Procedures and Related Activities

8. When performing risk assessment procedures and related activities to obtain an understanding of the entity and its environment, including the entity’s internal control, as required by SA 315,⁴ the auditor shall obtain an understanding of the following in order to provide a basis for the identification and assessment of the risks of material misstatement for accounting estimates: (Ref: Para. A12)

- (a) The requirements of the applicable financial reporting framework relevant to accounting estimates, including related disclosures. (Ref: Para. A13-A15)
- (b) How management identifies those transactions, events and conditions that may give rise to the need for accounting estimates to be recognised or disclosed in the financial statements. In obtaining this understanding, the auditor shall make inquiries of management about changes in circumstances that

⁴ SA 315, paragraphs 5-6 and 11-12.

may give rise to new, or the need to revise existing, accounting estimates. (Ref: Para. A16-A21)

- (c) How management makes the accounting estimates, and an understanding of the data on which they are based, including: (Ref: Para. A22-A23)
- (i) The method, including where applicable the model, used in making the accounting estimate; (Ref: Para. A24-A26)
 - (ii) Relevant controls; (Ref: Para. A27-A28)
 - (iii) Whether management has used an expert; (Ref: Para. A29-A30)
 - (iv) The assumptions underlying the accounting estimates; (Ref: Para. A31-A36)
 - (v) Whether there has been or ought to have been a change from the prior period in the methods for making the accounting estimates, and if so, why; and (Ref: Para. A37)
 - (vi) Whether and, if so, how management has assessed the effect of estimation uncertainty. (Ref: Para. A38)

9. The auditor shall review the outcome of accounting estimates included in the prior period financial statements, or, where applicable, their subsequent re-estimation for the purpose of the current period. The nature and extent of the auditor's review takes account of the nature of the accounting estimates, and whether the information obtained from the review would be relevant to identifying and assessing risks of material misstatement of accounting estimates made in the current period financial statements. However, the review is not intended to call into question the judgments made in the prior periods that were based on information available at that time. (Ref: Para. A39-A44)

Identifying and Assessing the Risks of Material Misstatement

10. In identifying and assessing the risks of material misstatement, as required by SA 315,⁵ the auditor shall evaluate the degree of estimation uncertainty associated with an accounting estimate. (Ref: Para. A45-A46)

11. The auditor shall determine whether, in the auditor's judgment, any of those accounting estimates that have been identified as having high estimation uncertainty give rise to significant risks. (Ref: Para. A47-A51)

Responses to the Assessed Risks of Material Misstatement

12. Based on the assessed risks of material misstatement, the auditor shall determine: (Ref: Para. A52)

- (a) Whether management has appropriately applied the requirements of the applicable financial reporting framework relevant to the accounting estimate; and (Ref: Para. A53-A56)
- (b) Whether the methods for making the accounting estimates are appropriate and have been applied consistently, and whether changes, if any, in accounting estimates or in the method for making them from the prior period are appropriate in the circumstances. (Ref: Para. A57-A58)

13. In responding to the assessed risks of material misstatement, as required by SA 330,⁶ the auditor shall undertake one or more of the following, taking account of the nature of the accounting estimate: (Ref: Para. A59- A61)

- (a) Determine whether events occurring up to the date of the auditor's report provide audit evidence regarding the accounting estimate. (Ref: Para. A62-A67)
- (b) Test how management made the accounting estimate and the data on which it is based. In doing so,

⁵ SA 315, paragraph 25.

⁶ SA 330, paragraph 5.

I.338 Auditing Pronouncements

the auditor shall evaluate whether: (Ref: Para. A68-A70)

- (i) The method of measurement used is appropriate in the circumstances; and (Ref: Para. A71-A76)
 - (ii) The assumptions used by management are reasonable in light of the measurement objectives of the applicable financial reporting framework. (Ref: Para. A77-A83)
- (c) Test the operating effectiveness of the controls over how management made the accounting estimate, together with appropriate substantive procedures. (Ref: Para. A84- A86)
- (d) Develop a point estimate or a range to evaluate management's point estimate. For this purpose: (Ref: Para. A87-A91)
- (i) When the auditor uses assumptions or methods that differ from management's, the auditor shall obtain an understanding of management's assumptions or methods sufficient to establish that the auditor's point estimate or range takes into account relevant variables and to evaluate any significant differences from management's point estimate. (Ref: Para. A92)
 - (ii) When the auditor concludes that it is appropriate to use a range, the auditor shall narrow the range, based on audit evidence available, until all outcomes within the range are considered reasonable. (Ref: Para. A93-A95)

14. In determining the matters identified in paragraph 12 or in responding to the assessed risks of material misstatement in accordance with paragraph 13, the auditor shall consider whether specialised skills or knowledge in relation to one or more aspects of the accounting estimates are required in order to obtain sufficient appropriate audit evidence. (Ref: Para. A96-A101)

Further Substantive Procedures to Respond to Significant Risks

Estimation Uncertainty

15. For accounting estimates that give rise to significant risks, in addition to other substantive procedures performed to meet the requirements of SA 330,⁷ the auditor shall evaluate the following: (Ref: Para. A102)

- (a) How management has considered alternative assumptions or outcomes, and why it has rejected them, or how management has otherwise addressed estimation uncertainty in making the accounting estimate. (Ref: Para. A103-A106)
- (b) Whether the significant assumptions used by management are reasonable. (Ref: Para A107-A109)
- (c) Where relevant to the reasonableness of the significant assumptions used by management or the appropriate application of the applicable financial reporting framework, management's intent to carry out specific courses of action and its ability to do so. (Ref: Para. A110)

16. If, in the auditor's judgment, management has not adequately addressed the effects of estimation uncertainty on the accounting estimates that give rise to significant risks, the auditor shall, if considered necessary, develop a range with which to evaluate the reasonableness of the accounting estimate. (Ref: Para. A111-A112)

Recognition and Measurement Criteria

17. For accounting estimates that give rise to significant risks, the auditor shall obtain sufficient appropriate audit evidence whether the following are in accordance with the requirements of the applicable financial reporting framework:

- (a) management's decision to recognise, or to not recognise, the accounting estimates in the financial

⁷ SA 330, paragraph 18.

statements; and (Ref: Para. A113-A114)

- (b) the selected measurement basis for the accounting estimates. (Ref: Para. A115)

Evaluating the Reasonableness of the Accounting Estimates, and Determining Misstatements

18. The auditor shall evaluate, based on the audit evidence, whether the accounting estimates in the financial statements are either reasonable in the context of the applicable financial reporting framework, or are misstated. (Ref: Para. A116-A119)

Disclosures Related to Accounting Estimates

19. The auditor shall obtain sufficient appropriate audit evidence about whether the disclosures in the financial statements related to accounting estimates are in accordance with the requirements of the applicable financial reporting framework. (Ref: Para. A120-A121)

20. For accounting estimates that give rise to significant risks, the auditor shall also evaluate the adequacy of the disclosure of their estimation uncertainty in the financial statements in the context of the applicable financial reporting framework. (Ref: Para. A122-A123)

Indicators of Possible Management Bias

21. The auditor shall review the judgments and decisions made by management in the making of accounting estimates to identify whether there are indicators of possible management bias. Indicators of possible management bias do not themselves constitute misstatements for the purposes of drawing conclusions on the reasonableness of individual accounting estimates. (Ref: Para. A124-A125)

Written Representations

22. The auditor shall obtain written representations from management and, where appropriate, those charged with governance whether they believe significant assumptions used in making accounting estimates are reasonable. (Ref: Para. A126-A127)

Documentation

23. The audit documentation shall include:

- (a) The basis for the auditor's conclusions about the reasonableness of accounting estimates and their disclosure that give rise to significant risks; and
- (b) Indicators of possible management bias, if any. (Ref: Para. A128)

Application and Other Explanatory Material

Nature of Accounting Estimates (Ref: Para. 2)

A1. Because of the uncertainties inherent in business activities, some financial statement items can only be estimated. Further, the specific characteristics of an asset, liability or component of equity, or the basis of or method of measurement prescribed by the financial reporting framework, may give rise to the need to estimate a financial statement item. Some financial reporting frameworks prescribe specific methods of measurement and the disclosures that are required to be made in the financial statements, while other financial reporting frameworks are less specific. The Appendix to this SA discusses fair value measurements and disclosures under different financial reporting frameworks.

A2. Some accounting estimates involve relatively low estimation uncertainty and may give rise to lower risks of material misstatements, for example:

- Accounting estimates arising in entities that engage in business activities that are not complex.
- Accounting estimates that are frequently made and updated because they relate to routine transactions.

I.340 Auditing Pronouncements

- Accounting estimates derived from data that is readily available, such as published interest rate data or exchange-traded prices of securities. Such data may be referred to as “observable” in the context of a fair value accounting estimate.
 - Fair value accounting estimates where the method of measurement prescribed by the applicable financial reporting framework is simple and applied easily to the asset or liability requiring measurement at fair value.
 - Fair value accounting estimates where the model used to measure the accounting estimate is well-known or generally accepted, provided that the assumptions or inputs to the model are observable.
- A3. For some accounting estimates, however, there may be relatively high estimation uncertainty, particularly where they are based on significant assumptions, for example:
- Accounting estimates relating to the outcome of litigation.
 - Fair value accounting estimates for derivative financial instruments not publicly traded.
 - Fair value accounting estimates for which a highly specialised entity-developed model is used or for which there are assumptions or inputs that cannot be observed in the marketplace.
- A4. The degree of estimation uncertainty varies based on the nature of the accounting estimate, the extent to which there is a generally accepted method or model used to make the accounting estimate, and the subjectivity of the assumptions used to make the accounting estimate. In some cases, estimation uncertainty associated with an accounting estimate may be so great that the recognition criteria in the applicable financial reporting framework are not met and the accounting estimate cannot be made.
- A5. Not all financial statement items requiring measurement at fair value, involve estimation uncertainty. For example, this may be the case for some financial statement items where there is an active and open market that provides readily available and reliable information on the prices at which actual exchanges occur, in which case the existence of published price quotations ordinarily is the best audit evidence of fair value. However, estimation uncertainty may exist even when the valuation method and data are well defined. For example, valuation of securities quoted on an active and open market at the listed market price may require adjustment if the holding is significant in relation to the market or is subject to restrictions in marketability. In addition, general economic circumstances prevailing at the time, for example, illiquidity in a particular market, may impact estimation uncertainty.
- A6. Additional examples of situations where accounting estimates, other than fair value accounting estimates, may be required include:
- Allowance for doubtful accounts.
 - Inventory obsolescence.
 - Warranty obligations.
 - Depreciation method or asset useful life.
 - Provision against the carrying amount of an investment where there is uncertainty regarding its recoverability.
 - Outcome of long term contracts.
 - Financial Obligations / Costs arising from litigation settlements and judgments.
- A7. Additional examples of situations where fair value accounting estimates may be required include:
- Complex financial instruments, which are not traded in an active and open market.
 - Share-based payments.

- Property or equipment held for disposal.
- Certain assets or liabilities acquired in a business combination, including goodwill and intangible assets.
- Transactions involving the exchange of assets or liabilities between independent parties without monetary consideration, for example, a non-monetary exchange of plant facilities in different lines of business.

A8. Estimation involves judgments based on information available when the financial statements are prepared. For many accounting estimates, these include making assumptions about matters that are uncertain at the time of estimation. The auditor is not responsible for predicting future conditions, transactions or events that, if known at the time of the audit, might have significantly affected management's actions or the assumptions used by management.

Management Bias

A9. Financial reporting frameworks often call for neutrality, that is, freedom from bias. Accounting estimates are imprecise, however, and can be influenced by management judgment. Such judgment may involve unintentional or intentional management bias (for example, as a result of motivation to achieve a desired result). The susceptibility of an accounting estimate to management bias increases with the subjectivity involved in making it. Unintentional management bias and the potential for intentional management bias are inherent in subjective decisions that are often required in making an accounting estimate. For continuing audits, indicators of possible management bias identified during the audit of the preceding periods influence the planning and risk identification and assessment activities of the auditor in the current period.

A10. Management bias can be difficult to detect at an account level. It may only be identified when considered in the aggregate of groups of accounting estimates or all accounting estimates, or when observed over a number of accounting periods. Although some form of management bias is inherent in subjective decisions, in making such judgments there may be no intention by management to mislead the users of financial statements. Where, however, there is intention to mislead, management bias is fraudulent in nature.

A11. Certain entities such as, Central/State governments and related government entities (for example, agencies, boards, commissions) may have significant holdings of specialised assets for which there are no readily available and reliable sources of information for purposes of measurement at fair value or other current value bases, or a combination of both. Often specialised assets held do not generate cash flows and do not have an active market. Measurement at fair value therefore ordinarily requires estimation and may be complex, and in some rare cases may not be possible at all.

Risk Assessment Procedures and Related Activities (Ref: Para. 8)

A12. The risk assessment procedures and related activities required by paragraph 8 of this SA assist the auditor in developing an expectation of the nature and type of accounting estimates that an entity may have. The auditor's primary consideration is whether the understanding that has been obtained is sufficient to identify and assess the risks of material misstatement in relation to accounting estimates, and to plan the nature, timing and extent of further audit procedures.

Obtaining an Understanding of the Requirements of the Applicable Financial Reporting Framework (Ref: Para. 8(a))

A13. Obtaining an understanding of the requirements of the applicable financial reporting framework assists the auditor in determining whether it, for example:

I.342 Auditing Pronouncements

- Prescribes certain conditions for the recognition,⁸ or methods for the measurement, of accounting estimates.
- Specifies certain conditions that permit or require measurement at a fair value, for example, by referring to management's intentions to carry out certain courses of action with respect to an asset or liability.
- Specifies required or permitted disclosures.

Obtaining this understanding also provides the auditor with a basis for discussion with management about how management has applied those requirements relevant to the accounting estimate, and the auditor's determination of whether they have been applied appropriately.

A14. Financial reporting frameworks may provide guidance for management on determining point estimates where alternatives exist. Some financial reporting frameworks, for example, require that the point estimate selected be the alternative that reflects management's judgment of the most likely outcome.⁹ Others may require, for example, use of a discounted probability-weighted expected value. In some cases, management may be able to make a point estimate directly. In other cases, management may be able to make a reliable point estimate only after considering alternative assumptions or outcomes from which it is able to determine a point estimate.

A15. Financial reporting frameworks may require the disclosure of information concerning the significant assumptions to which the accounting estimate is particularly sensitive. Furthermore, where there is a high degree of estimation uncertainty, some financial reporting frameworks do not permit an accounting estimate to be recognised in the financial statements, but certain disclosures may be required in the notes to the financial statements.

Obtaining an Understanding of How Management Identifies the Need for Accounting Estimates (Ref: Para. 8(b))

A16. In preparing the financial statements, management has the responsibility to determine whether a transaction, event or condition gives rise to the need to make an accounting estimate, and that all necessary accounting estimates have been recognised, measured and disclosed in the financial statements in accordance with the applicable financial reporting framework.

A17. Management's identification of transactions, events and conditions that give rise to the need for accounting estimates is likely to be based on:

- Management's knowledge of the entity's business and the industry in which it operates.
- Management's knowledge of the implementation of business strategies in the current period.
- Where applicable, management's cumulative experience of preparing the entity's financial statements in prior periods.

In such cases, the auditor may obtain an understanding of how management identifies the need for accounting estimates primarily through inquiry of management. In other cases, where management's process is more structured, for example, when management has a formal risk management function, the auditor may perform risk assessment procedures directed at the methods and practices followed by management for periodically reviewing the circumstances that give rise to the accounting estimates and re-estimating the accounting

⁸ Most financial reporting frameworks require incorporation in the balance sheet or income statement of items that satisfy their criteria for recognition. Disclosure of accounting policies or adding notes to the financial statements does not rectify a failure to recognise such items, including accounting estimates.

⁹ Different financial reporting frameworks may use different terminology to describe point estimates determined in this way.

estimates as necessary. The completeness of accounting estimates is often an important consideration for the auditor particularly accounting estimates relating to liabilities.

A18. The auditor's understanding of the entity and its environment obtained during the performance of risk assessment procedures, together with other audit evidence obtained during the course of the audit, assist the auditor in identifying circumstances, or changes in circumstances, that may give rise to the need for an accounting estimate.

A19. Inquiries of management about changes in circumstances may include, for example, inquiries about whether:

- The entity has engaged in new types of transactions that may give rise to accounting estimates.
- Terms of transactions that gave rise to accounting estimates have changed.
- Accounting policies relating to accounting estimates have changed, as a result of changes to the requirements of the applicable financial reporting framework or otherwise.
- Regulatory or other changes outside the control of management have occurred that may require management to revise, or make new, accounting estimates.
- New conditions or events have occurred that may give rise to the need for new or revised accounting estimates.

A20. During the audit, the auditor may identify transactions, events and conditions that give rise to the need for accounting estimates that management failed to identify. SA 315 deals with circumstances where the auditor identifies risks of material misstatement that management failed to identify, including determining whether there is a significant deficiency in internal control with regard to the entity's risk assessment processes.¹⁰

Considerations Specific to Smaller Entities

A21. Obtaining this understanding for smaller entities is often less complex as their business activities are often limited and transactions are less complex. Further, often a single person, for example the owner-manager, identifies the need to make an accounting estimate and the auditor may focus inquiries accordingly.

Obtaining an Understanding of How Management Makes the Accounting Estimates (Ref: Para. 8(c))

A22. Management is responsible for establishing financial reporting processes for making accounting estimates, including adequate internal control. Such processes include the following:

- Selecting appropriate accounting policies and prescribing estimation processes, including appropriate estimation or valuation methods, including, where applicable, models.
- Developing or identifying relevant data and assumptions that affect accounting estimates.
- Periodically reviewing the circumstances that give rise to the accounting estimates and re-estimating the accounting estimates as necessary.

A23. Matters that the auditor may consider in obtaining an understanding of how management makes the accounting estimates include, for example:

- The types of accounts or transactions to which the accounting estimates relate (for example, whether the accounting estimates arise from the recording of routine and recurring transactions or whether they arise from non-recurring or unusual transactions).

¹⁰ SA 315, paragraph 16.

I.344 Auditing Pronouncements

- Whether and, if so, how management has used recognised measurement techniques for making particular accounting estimates.
- Whether the accounting estimates were made based on data available at an interim date and, if so, whether and how management has taken into account the effect of events, transactions and changes in circumstances occurring between that date and the period end.

Method of Measurement, Including the Use of Models (Ref: Para. 8(c)(i))

A24. In some cases, the applicable financial reporting framework may prescribe the method of measurement for an accounting estimate, for example, a particular model that is to be used in measuring a fair value estimate. In many cases, however, the applicable financial reporting framework does not prescribe the method of measurement, or may specify alternative methods for measurement.

A25. When the applicable financial reporting framework does not prescribe a particular method to be used in the circumstances, matters that the auditor may consider in obtaining an understanding of the method or, where applicable the model, used to make accounting estimates include, for example:

- How management selects a particular method considering the nature of the asset or liability being estimated.
- Whether the entity operates in a particular business, industry or environment in which there are methods commonly used to make the particular type of accounting estimate.

A26. There may be greater risks of material misstatement, for example, in cases when management has internally developed a model to be used to make the accounting estimate or is departing from a method commonly used in a particular industry or environment.

Relevant Controls (Ref: Para. 8(c)(ii))

A27. Matters that the auditor may consider in obtaining an understanding of relevant controls include, for example, the experience and competence of those who make the accounting estimates, and controls related to:

- How management determines the completeness, relevance and accuracy of the data used to develop accounting estimates.
- The review and approval of accounting estimates, including the assumptions or inputs used in their development, by appropriate levels of management and, where appropriate, those charged with governance.
- The segregation of duties between those committing the entity to the underlying transactions and those responsible for making the accounting estimates, including whether the assignment of responsibilities appropriately takes account of the nature of the entity and its products or services (for example, in the case of a large financial institution, relevant segregation of duties may include an independent function responsible for estimation and validation of fair value pricing of the entity's proprietary financial products staffed by individuals whose remuneration is not tied to such products).

A28. Other controls may be relevant to making the accounting estimates depending on the circumstances. For example, if the entity uses specific models for making accounting estimates, management may put into place specific policies and procedures around such models. Relevant controls may include, for example, those established over:

- The design and development, or selection, of a particular model for a particular purpose.
- The use of the model.
- The maintenance and periodic validation of the integrity of the model.

Management's Use of Experts (Ref: Para. 8(c)(iii))

A29. Management may have, or the entity may employ individuals with, the experience and competence necessary to make the required point estimates. In some cases, however, management may need to engage an expert to make, or assist in making, them. This need may arise because of, for example:

- The specialised nature of the matter requiring estimation, for example, the measurement of mineral or hydrocarbon reserves in extractive industries.
- The technical nature of the models required to meet the relevant requirements of the applicable financial reporting framework, as may be the case in certain measurements at fair value.
- The unusual or infrequent nature of the condition, transaction or event requiring an accounting estimate.

Considerations Specific to Smaller Entities

A30. In smaller entities, the circumstances requiring an accounting estimate often are such that the owner-manager is capable of making the required point estimate. In some cases, however, an expert will be needed. Discussion with the owner-manager early in the audit process about the nature of any accounting estimates, the completeness of the required accounting estimates, and the adequacy of the estimating process may assist the owner manager in determining the need to use an expert.

Assumptions (Ref: Para. 8(c)(iv))

A31. Assumptions are integral components of accounting estimates. Matters that the auditor may consider in obtaining an understanding of the assumptions underlying the accounting estimates include, for example:

- The nature of the assumptions, including which of the assumptions are likely to be significant assumptions.
- How management assesses whether the assumptions are relevant and complete (that is, that all relevant variables have been taken into account).
- Where applicable, how management determines that the assumptions used are internally consistent.
- Whether the assumptions relate to matters within the control of management (for example, assumptions about the maintenance programs that may affect the estimation of an asset's useful life), and how they conform to the entity's business plans and the external environment, or to matters that are outside its control (for example, assumptions about interest rates, mortality rates, potential judicial or regulatory actions, or the variability and the timing of future cash flows).
- The nature and extent of documentation, if any, supporting the assumptions.

Assumptions may be made or identified by an expert to assist management in making the accounting estimates. Such assumptions, when used by management, become management's assumptions.

A32. In some cases, assumptions may be referred to as inputs, for example, where management uses a model to make an accounting estimate, though the term inputs may also be used to refer to the underlying data to which specific assumptions are applied.

A33. Management may support assumptions with different types of information drawn from internal and external sources, the relevance and reliability of which will vary. In some cases, an assumption may be reliably based on applicable information from either external sources (for example, published interest rate or other statistical data) or internal sources (for example, historical information or previous conditions experienced by the entity). In other cases, an assumption may be more subjective, for example, where the entity has no experience or external sources from which to draw.

A34. In the case of fair value accounting estimates, assumptions reflect, or are consistent with, what

I.346 Auditing Pronouncements

knowledgeable, willing arm's length parties (sometimes referred to as "marketplace participants" or equivalent) would use in determining fair value when exchanging an asset or settling a liability. Specific assumptions will also vary with the characteristics of the asset or liability being valued, the valuation method used (for example, a market approach, or an income approach) and the requirements of the applicable financial reporting framework.

A35. With respect to fair value accounting estimates, assumptions or inputs vary in terms of their source and bases, as follows:

- (a) Those that reflect what marketplace participants would use in pricing an asset or liability developed based on market data obtained from sources independent of the reporting entity (sometimes referred to as "observable inputs" or equivalent).
- (b) Those that reflect the entity's own judgments about what assumptions marketplace participants would use in pricing the asset or liability developed based on the best information available in the circumstances (sometimes referred to as "unobservable inputs" or equivalent). In practice, however, the distinction between (a) and (b) is not always apparent. Further, it may be necessary for management to select from a number of different assumptions used by different marketplace participants.

A36. The extent of subjectivity, such as whether an assumption or input is observable, influences the degree of estimation uncertainty and thereby the auditor's assessment of the risks of material misstatement for a particular accounting estimate.

Changes in Methods for making Accounting Estimates (Ref: Para. 8(c)(v))

A37. In evaluating how management makes the accounting estimates, the auditor is required to understand whether there has been or ought to have been a change from the prior period in the methods for making the accounting estimates. A specific estimation method may need to be changed in response to changes in the environment or circumstances affecting the entity or in the requirements of the applicable financial reporting framework. If management has changed the method for making an accounting estimate, it is important that management can demonstrate that the new method is more appropriate, or is itself a response to such changes. For example, if management changes the basis of making an accounting estimate from a mark-to-market approach to using a model, the auditor challenges whether management's assumptions about the marketplace are reasonable in light of economic circumstances.

Estimation Uncertainty (Ref: Para. 8(c)(vi))

A38. Matters that the auditor may consider in obtaining an understanding of whether and, if so, how management has assessed the effect of estimation uncertainty include, for example:

- Whether and, if so, how management has considered alternative assumptions or outcomes by, for example, performing a sensitivity analysis to determine the effect of changes in the assumptions on an accounting estimate.
- How management determines the accounting estimate when analysis indicates a number of outcome scenarios.
- Whether management monitors the outcome of accounting estimates made in the prior period, and whether management has appropriately responded to the outcome of that monitoring procedure.

Reviewing Prior Period Accounting Estimates (Ref: Para. 9)

A39. The outcome of an accounting estimate will often differ from the accounting estimate recognised in the prior period financial statements. By performing risk assessment procedures to identify and understand the reasons for such differences, the auditor may obtain:

- Information regarding the effectiveness of management's prior period estimation process, from which the auditor can judge the likely effectiveness of management's current process.
- Audit evidence that is pertinent to the re-estimation, in the current period, of prior period accounting estimates.
- Audit evidence of matters, such as estimation uncertainty, that may be required to be disclosed in the financial statements.

A40. The review of prior period accounting estimates may also assist the auditor, in the current period, in identifying circumstances or conditions that increase the susceptibility of accounting estimates to, or indicate the presence of, possible management bias. The auditor's professional skepticism assists in identifying such circumstances or conditions and in determining the nature, timing and extent of further audit procedures.

A41. A retrospective review of management judgments and assumptions related to significant accounting estimates is also required by SA 240.¹¹ That review is conducted as part of the requirement for the auditor to design and perform procedures to review accounting estimates for biases that could represent a risk of material misstatement due to fraud, in response to the risks of management override of controls. As a practical matter, the auditor's review of prior period accounting estimates as a risk assessment procedure in accordance with this SA may be carried out in conjunction with the review required by SA 240.

A42. The auditor may judge that a more detailed review is required for those accounting estimates that were identified during the prior period audit as having high estimation uncertainty, or for those accounting estimates that have changed significantly from the prior period. On the other hand, for example, for accounting estimates that arise from the recording of routine and recurring transactions, the auditor may judge that the application of analytical procedures as risk assessment procedures is sufficient for purposes of the review.

A43. For fair value accounting estimates and other accounting estimates based on current conditions at the measurement date, more variation may exist between the fair value amount recognised in the prior period financial statements and the outcome or the amount re-estimated for the purpose of the current period. This is because the measurement objective for such accounting estimates deals with perceptions about value at a point in time, which may change significantly and rapidly as the environment in which the entity operates changes. The auditor may therefore focus the review on obtaining information that would be relevant to identifying and assessing risks of material misstatement. For example, in some cases obtaining an understanding of changes in marketplace participant assumptions which affected the outcome of a prior period fair value accounting estimate may be unlikely to provide relevant information for audit purposes. If so, then the auditor's consideration of the outcome of prior period fair value accounting estimates may be directed more towards understanding the effectiveness of management's prior estimation process, that is, management's track record, from which the auditor can judge the likely effectiveness of management's current process.

A44. A difference between the outcome of an accounting estimate and the amount recognised in the prior period financial statements does not necessarily represent a misstatement of the prior period financial statements. However, it may do so if, for example, the difference arises from information that was available to management when the prior period's financial statements were finalised, or that could reasonably be expected to have been obtained and taken into account in the preparation and presentation of those financial statements. Many financial reporting frameworks contain guidance on distinguishing between changes in accounting estimates that constitute misstatements and changes that do not, and the accounting treatment required to be followed.

¹¹ SA 240, "The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements", paragraph 32(b)(ii).

Identifying and Assessing the Risks of Material Misstatement

Estimation Uncertainty (Ref: Para. 10)

A45. The degree of estimation uncertainty associated with an accounting estimate may be influenced by factors such as:

- The extent to which the accounting estimate depends on judgment.
- The sensitivity of the accounting estimate to changes in assumptions.
- The existence of recognised measurement techniques that may mitigate the estimation uncertainty (though the subjectivity of the assumptions used as inputs may nevertheless give rise to estimation uncertainty).
- The length of the forecast period, and the relevance of data drawn from past events to forecast future events.
- The availability of reliable data from external sources.
- The extent to which the accounting estimate is based on observable or unobservable inputs.

The degree of estimation uncertainty associated with an accounting estimate may influence the estimate's susceptibility to bias.

A46. Matters that the auditor considers in assessing the risks of material misstatement may also include:

- The actual or expected magnitude of an accounting estimate.
- The recorded amount of the accounting estimate (that is, management's point estimate) in relation to the amount expected by the auditor to be recorded.
- Whether management has used an expert in making the accounting estimate.
- The outcome of the review of prior period accounting estimates.

High Estimation Uncertainty and Significant Risks (Ref: Para. 11)

A47. Examples of accounting estimates that may have high estimation uncertainty include the following:

- Accounting estimates that are highly dependent upon judgment, for example, judgments about the outcome of pending litigation or the amount and timing of future cash flows dependent on uncertain events many years in the future.
- Accounting estimates that are not calculated using recognised measurement techniques.
- Accounting estimates where the results of the auditor's review of similar accounting estimates made in the prior period financial statements indicate a substantial difference between the original accounting estimate and the actual outcome.
- Fair value accounting estimates for which a highly specialised entity-developed model is used or for which there are no observable inputs.

A48. A seemingly immaterial accounting estimate may have the potential to result in a material misstatement due to the estimation uncertainty associated with the estimation; that is, the size of the amount recognised or disclosed in the financial statements for an accounting estimate may not be an indicator of its estimation uncertainty.

A49. In some circumstances, the estimation uncertainty is so high that a reasonable accounting estimate cannot be made. The applicable financial reporting framework may, therefore, preclude recognition of the item in the financial statements, or its measurement at fair value. In such cases, the significant risks relate not only to whether an accounting estimate should be recognised, or whether it should be measured at fair

value, but also to the adequacy of the disclosures. With respect to such accounting estimates, the applicable financial reporting framework may require disclosure of the accounting estimates and the high estimation uncertainty associated with them (see paragraphs A120-A123).

A50. Where the auditor determines that an accounting estimate gives rise to a significant risk, the auditor is required to obtain an understanding of the entity's controls, including control activities.¹²

A51. In some cases, the estimation uncertainty of an accounting estimate may cast significant doubt about the entity's ability to continue as a going concern. SA 570¹³ establishes requirements and provides guidance in such circumstances.

Responses to the Assessed Risks of Material Misstatement (Ref: Para. 12)

A52. SA 330 requires the auditor to design and perform audit procedures whose nature, timing and extent are responsive to the assessed risks of material misstatement in relation to accounting estimates at both the financial statement and assertion levels.¹⁴ Paragraphs A53-A115 focus on specific responses at the assertion level only.

Application of the Requirements of the Applicable Financial Reporting Framework (Ref: Para. 12(a))

A53. Many financial reporting frameworks prescribe certain conditions for the recognition of accounting estimates and specify the methods for making them and required disclosures. Such requirements may be complex and require the application of judgment. Based on the understanding obtained in performing risk assessment procedures, the requirements of the applicable financial reporting framework that may be susceptible to misapplication or differing interpretations become the focus of the auditor's attention.

A54. Determining whether management has appropriately applied the requirements of the applicable financial reporting framework is based, in part, on the auditor's understanding of the entity and its environment. For example, the measurement of the fair value of some items, such as intangible assets acquired in a business combination, may involve special considerations that are affected by the nature of the entity and its operations.

A55. In some situations, additional audit procedures, such as the inspection by the auditor of the current physical condition of an asset, may be necessary to determine whether management has appropriately applied the requirements of the applicable financial reporting framework.

A56. The application of the requirements of the applicable financial reporting framework requires management to consider changes in the environment or circumstances that affect the entity. For example, the introduction of an active market for a particular class of asset or liability may indicate that the use of discounted cash flows to estimate the fair value of such asset or liability is no longer appropriate.

Consistency in Methods and Basis for Changes (Ref: Para. 12(b))

A57. The auditor's consideration of a change in an accounting estimate, or in the method for making it from the prior period, is important because a change that is not based on a change in circumstances or new information is considered arbitrary. Arbitrary changes in an accounting estimate result in inconsistent financial statements over time and may give rise to a financial statement misstatement or be an indicator of possible management bias.

A58. Management often is able to demonstrate good reason for a change in an accounting estimate or the method for making an accounting estimate from one period to another based on a change in circumstances. What constitutes a good reason, and the adequacy of support for management's contention that there has been

¹² SA 315, paragraph 29.

¹³ SA 570, "Going Concern".

¹⁴ SA 330, paragraphs 5-6.

I.350 Auditing Pronouncements

a change in circumstances that warrants a change in an accounting estimate or the method for making an accounting estimate, are matters of judgment.

Responses to the Assessed Risks of Material Misstatements (Ref: Para. 13)

A59. The auditor's decision as to which response, individually or in combination, in paragraph 13 to undertake to respond to the risks of material misstatement may be influenced by such matters as:

- The nature of the accounting estimate, including whether it arises from routine or non-routine transactions.
- Whether the procedure(s) is expected to effectively provide the auditor with sufficient appropriate audit evidence.
- The assessed risk of material misstatement, including whether the assessed risk is a significant risk.

A60. For example, when evaluating the reasonableness of the allowance for doubtful accounts, an effective procedure for the auditor may be to review subsequent cash collections in combination with other procedures. Where the estimation uncertainty associated with an accounting estimate is high, for example, an accounting estimate based on a proprietary model for which there are unobservable inputs, it may be that a combination of the responses to assessed risks in paragraph 13 is necessary in order to obtain sufficient appropriate audit evidence.

A61. Additional guidance explaining the circumstances in which each of the responses may be appropriate is provided in paragraphs A62-A95.

Events Occurring Up to the Date of the Auditor's Report (Ref: Para. 13(a))

A62. Determining whether events occurring up to the date of the auditor's report provide audit evidence regarding the accounting estimate may be an appropriate response when such events are expected to:

- Occur; and
- Provide audit evidence that confirms or contradicts the accounting estimate.

A63. Events occurring up to the date of the auditor's report may sometimes provide sufficient appropriate audit evidence about an accounting estimate. For example, sale of the complete inventory of a superseded product shortly after the period end may provide audit evidence relating to the estimate of its net realisable value. In such cases, there may be no need to perform additional audit procedures on the accounting estimate, provided that sufficient appropriate evidence about the events is obtained.

A64. For some accounting estimates, events occurring up to the date of the auditor's report are unlikely to provide audit evidence regarding the accounting estimate. For example, the conditions or events relating to some accounting estimates develop only over an extended period. Also, because of the measurement objective of fair value accounting estimates, information after the period-end may not reflect the events or conditions existing at the balance sheet date and therefore may not be relevant to the measurement of the fair value accounting estimate. Paragraph 13 identifies other responses to the risks of material misstatement that the auditor may undertake.

A65. In some cases, events that contradict the accounting estimate may indicate that management has ineffective processes for making accounting estimates, or that there is management bias in the making of accounting estimates.

A66. Even though the auditor may decide not to undertake this approach in respect of specific accounting estimates, the auditor is required to comply with SA 560¹⁵. The auditor is required to perform audit

¹⁵ Standard on Auditing (SA) 560, "Subsequent Events".

procedures designed to obtain sufficient appropriate audit evidence that all events occurring between the date of the financial statements and the date of the auditor's report that require adjustment of, or disclosure in, the financial statements have been identified¹⁶ and appropriately reflected in the financial statements.¹⁷ Because the measurement of many accounting estimates, other than fair value accounting estimates, usually depends on the outcome of future conditions, transactions or events, the auditor's work under SA 560 is particularly relevant.

Considerations Specific to Smaller Entities

A67. When there is a longer period between the balance sheet date and the date of the auditor's report, the auditor's review of events in this period may be an effective response for accounting estimates other than fair value accounting estimates. This may particularly be the case in some smaller owner-managed entities, especially when management does not have formalised control procedures over accounting estimates.

Testing how Management made the Accounting Estimate (Ref: Para. 13(b))

A68. Testing how management made the accounting estimate and the data on which it is based may be an appropriate response when the accounting estimate is a fair value accounting estimate developed on a model that uses observable and unobservable inputs. It may also be appropriate when, for example:

- The accounting estimate is derived from the routine processing of data by the entity's accounting system.
- The auditor's review of similar accounting estimates made in the prior period financial statements suggests that management's current period process is likely to be effective.
- The accounting estimate is based on a large population of items of a similar nature that individually are not significant.

A69. Testing how management made the accounting estimate may involve, for example:

- Testing the extent to which data on which the accounting estimate is based is accurate, complete and relevant, and whether the accounting estimate has been properly determined using such data and management assumptions.
- Considering the source, relevance and reliability of external data or information, including that received from external experts engaged by management to assist in making an accounting estimate.
- Re-calculating the accounting estimate, and reviewing information about an accounting estimate for internal consistency.
- Considering management's review and approval processes.

Considerations Specific to Smaller Entities

A70. In smaller entities, the process for making accounting estimates is likely to be less structured than in larger entities. Smaller entities with active management involvement may not have extensive descriptions of accounting procedures, sophisticated accounting records, or written policies. Even if the entity has no formal established process, it does not mean that management is not able to provide a basis upon which the auditor can test the accounting estimate.

Evaluating the Method of Measurement (Ref: Para. 13(b)(i))

A71. When the applicable financial reporting framework does not prescribe the method of measurement, evaluating whether the method used, including any applicable model, is appropriate in the circumstances is a

¹⁶ SA 560, paragraph 6.

¹⁷ SA 560, paragraph 7.

I.352 Auditing Pronouncements

matter of professional judgment.

A72. For this purpose, matters that the auditor may consider include, for example, whether:

- Management's rationale for the method selected is reasonable.
- Management has sufficiently evaluated and appropriately applied the criteria, if any, provided in the applicable financial reporting framework to support the selected method.
- The method is appropriate in the circumstances given the nature of the asset or liability being estimated and the requirements of the applicable financial reporting framework relevant to accounting estimates.
- The method is appropriate in relation to the business, industry and environment in which the entity operates.

A73. In some cases, management may have determined that different methods result in a range of significantly different estimates. In such cases, obtaining an understanding of how the entity has investigated the reasons for these differences may assist the auditor in evaluating the appropriateness of the method selected.

Evaluating the use of Models

A74. In some cases, particularly when making fair value accounting estimates, management may use a model. Whether the model used is appropriate in the circumstances may depend on a number of factors, such as the nature of the entity and its environment, including the industry in which it operates, and the specific asset or liability being measured.

A75. The extent to which the following considerations are relevant depends on the circumstances, including whether the model is one that is commercially available for use in a particular sector or industry, or a proprietary model. In some cases, an entity may use an expert to develop and test a model.

A76. Depending on the circumstances, matters that the auditor may also consider in testing the model include, for example, whether:

- The model is validated prior to usage, with periodic reviews to ensure it is still suitable for its intended use. The entity's validation process may include evaluation of:
 - The model's theoretical soundness and mathematical integrity, including the appropriateness of model parameters.
 - The consistency and completeness of the model's inputs with market practices.
 - The model's output as compared to actual transactions.
- Appropriate change control policies and procedures exist.
- The model is periodically calibrated and tested for validity, particularly when inputs are subjective.
- Adjustments are made to the output of the model, including in the case of fair value accounting estimates, whether such adjustments reflect the assumptions marketplace participants would use in similar circumstances.
- The model is adequately documented; including the model's intended applications and limitations and its key parameters, required inputs, and results of any validation analysis performed.

Assumptions Used by Management (Ref: Para. 13(b)(ii))

A77. The auditor's evaluation of the assumptions used by management is based only on information available to the auditor at the time of the audit. Audit procedures dealing with management assumptions are performed in the context of the audit of the entity's financial statements, and not for the purpose of providing

an opinion on assumptions themselves.

A78. Matters that the auditor may consider in evaluating the reasonableness of the assumptions used by management include, for example:

- Whether individual assumptions appear reasonable.
- Whether the assumptions are interdependent and internally consistent.
- Whether the assumptions appear reasonable when considered collectively or in conjunction with other assumptions, either for that accounting estimate or for other accounting estimates.
- In the case of fair value accounting estimates, whether the assumptions appropriately reflect observable marketplace assumptions.

A79. The assumptions on which accounting estimates are based may reflect what management expects will be the outcome of specific objectives and strategies. In such cases, the auditor may perform audit procedures to evaluate the reasonableness of such assumptions by considering, for example, whether the assumptions are consistent with:

- The general economic environment and the entity's economic circumstances.
- The plans of the entity.
- Assumptions made in prior periods, if relevant.
- Experience of, or previous conditions experienced by, the entity, to the extent this historical information may be considered representative of future conditions or events.
- Other assumptions used by management relating to the financial statements.

A80. The reasonableness of the assumptions used may depend on management's intent and ability to carry out certain courses of action. Management often documents plans and intentions relevant to specific assets or liabilities and the financial reporting framework may require it to do so. Although the extent of audit evidence to be obtained about management's intent and ability is a matter of professional judgment, the auditor's procedures may include the following:

- Review of management's history of carrying out its stated intentions.
- Review of written plans and other documentation, including, where applicable, formally approved budgets, authorisations or minutes.
- Inquiry of management about its reasons for a particular course of action.
- Review of events occurring subsequent to the date of the financial statements and up to the date of the auditor's report.
- Evaluation of the entity's ability to carry out a particular course of action given the entity's economic circumstances, including the implications of its existing commitments.

Certain financial reporting frameworks, however, may not permit management's intentions or plans to be taken into account when making an accounting estimate. This is often the case for fair value accounting estimates because their measurement objective requires that assumptions reflect those used by marketplace participants.

A81. Matters that the auditor may consider in evaluating the reasonableness of assumptions used by management underlying fair value accounting estimates, in addition to those discussed above where applicable, may include, for example:

- Where relevant, whether and, if so, how management has incorporated market specific inputs into the development of assumptions.

I.354 Auditing Pronouncements

- Whether the assumptions are consistent with observable market conditions, and the characteristics of the asset or liability being measured at fair value.
- Whether the sources of market-participant assumptions are relevant and reliable, and how management has selected the assumptions to use when a number of different market participant assumptions exist.
- Where appropriate, whether and, if so, how management considered assumptions used in, or information about, comparable transactions, assets or liabilities.

A82. Further, fair value accounting estimates may comprise observable inputs as well as unobservable inputs. Where fair value accounting estimates are based on unobservable inputs, matters that the auditor may consider include, for example, how management supports the following:

- The identification of the characteristics of marketplace participants relevant to the accounting estimate.
- Modifications it has made to its own assumptions to reflect its view of assumptions marketplace participants would use.
- Whether it has incorporated the best information available in the circumstances.
- Where applicable, how its assumptions take account of comparable transactions, assets or liabilities.

If there are unobservable inputs, it is more likely that the auditor's evaluation of the assumptions will need to be combined with other responses to assessed risks in paragraph 13 in order to obtain sufficient appropriate audit evidence. In such cases, it may be necessary for the auditor to perform other audit procedures, for example, examining documentation supporting the review and approval of the accounting estimate by appropriate levels of management and, where appropriate, by those charged with governance.

A83. In evaluating the reasonableness of the assumptions supporting an accounting estimate, the auditor may identify one or more significant assumptions. If so, it may indicate that the accounting estimate has high estimation uncertainty and may, therefore, give rise to a significant risk. Additional responses to significant risks are described in paragraphs A102- A115.

Testing the Operating Effectiveness of Controls (Ref: Para. 13(c))

A84. Testing the operating effectiveness of the controls over how management made the accounting estimate may be an appropriate response when management's process has been well-designed, implemented and maintained, for example:

- Controls exist for the review and approval of the accounting estimates by appropriate levels of management and, where appropriate, by those charged with governance.
- The accounting estimate is derived from the routine processing of data by the entity's accounting system.

A85. Testing the operating effectiveness of the controls is required when:

- (a) The auditor's assessment of risks of material misstatement at the assertion level includes an expectation that controls over the process are operating effectively; or
- (b) Substantive procedures alone do not provide sufficient appropriate audit evidence at the assertion level.¹⁸

Considerations Specific to Smaller Entities

A86. Controls over the process to make an accounting estimate may exist in smaller entities, but the

¹⁸ SA 330, paragraph 8.

formality with which they operate varies. Further, smaller entities may determine that certain types of controls are not necessary because of active management involvement in the financial reporting process. In the case of very small entities, however, there may not be many controls that the auditor can identify. For this reason, the auditor's response to the assessed risks is likely to be substantive in nature, with the auditor performing one or more of the other responses in paragraph 13.

Developing a Point Estimate or Range (Ref: Para. 13(d))

A87. Developing a point estimate or a range to evaluate management's point estimate may be an appropriate response when, for example:

- An accounting estimate is not derived from the routine processing of data by the accounting system.
- The auditor's review of similar accounting estimates made in the prior period financial statements suggests that management's current period process is unlikely to be effective.
- The entity's controls within and over management's processes for determining accounting estimates are not well designed or properly implemented.
- Events or transactions between the period end and the date of the auditor's report contradict management's point estimate.
- There are alternative sources of relevant data available to the auditor which can be used in making a point estimate or a range.

A88. Even when the entity's controls are well designed and properly implemented, developing a point estimate or a range may be an effective or efficient response to the assessed risks. In other situations, the auditor may consider this approach as part of determining whether further procedures are necessary and, if so, their nature and extent.

A89. The approach taken by the auditor in developing either a point estimate or a range may vary based on what is considered most effective in the circumstances. For example, the auditor may initially develop a preliminary point estimate, and then assess its sensitivity to changes in assumptions to ascertain a range with which to evaluate management's point estimate. Alternatively, the auditor may begin by developing a range for purposes of determining, where possible, a point estimate.

A90. The ability of the auditor to make a point estimate, as opposed to a range, depends on several factors, including the model used, the nature and extent of data available and the estimation uncertainty involved with the accounting estimate. Further, the decision to develop a point estimate or range may be influenced by the applicable financial reporting framework, which may prescribe the point estimate that is to be used after consideration of the alternative outcomes and assumptions, or prescribe a specific measurement method (for example, the use of a discounted probability-weighted expected value).

A91. The auditor may develop a point estimate or a range in a number of ways, for example, by:

- Using a model, for example, one that is commercially available for use in a particular sector or industry, or a proprietary or auditor-developed model.
- Further developing management's consideration of alternative assumptions or outcomes, for example, by introducing a different set of assumptions.
- Employing or engaging a person with specialised expertise to develop or execute the model, or to provide relevant assumptions.
- Making reference to other comparable conditions, transactions or events, or, where relevant, markets for comparable assets or liabilities.

Understanding Management's Assumptions or Method (Ref: Para. 13(d)(i))

A92. When the auditor makes a point estimate or a range and uses assumptions or a method different from those used by management, paragraph 13(d)(i) requires the auditor to obtain a sufficient understanding of the assumptions or method used by management in making the accounting estimate. This understanding provides the auditor with information that may be relevant to the auditor's development of an appropriate point estimate or range. Further, it assists the auditor to understand and evaluate any significant differences from management's point estimate. For example, a difference may arise because the auditor used different, but equally valid, assumptions as compared with those used by management. This may reveal that the accounting estimate is highly sensitive to certain assumptions and therefore subject to high estimation uncertainty, indicating that the accounting estimate may be a significant risk. Alternatively, a difference may arise as a result of a factual error made by management. Depending on the circumstances, the auditor may find it helpful in drawing conclusions to discuss with management the basis for the assumptions used and their validity, and the difference, if any, in the approach taken to making the accounting estimate.

Narrowing a Range (Ref: Para. 13(d)(ii))

A93. When the auditor concludes that it is appropriate to use a range to evaluate the reasonableness of management's point estimate (the auditor's range), paragraph 13(d)(ii) requires that range to encompass all "reasonable outcomes" rather than all possible outcomes. The range cannot be one that comprises all possible outcomes if it is to be useful, as such a range would be too wide to be effective for purposes of the audit. The auditor's range is useful and effective when it is sufficiently narrow to enable the auditor to conclude whether the accounting estimate is misstated.

A94. Ordinarily, a range that has been narrowed to be equal to or less than performance materiality is adequate for the purposes of evaluating the reasonableness of management's point estimate. However, particularly in certain industries, it may not be possible to narrow the range to below such an amount. This does not necessarily preclude recognition of the accounting estimate. It may indicate, however, that the estimation uncertainty associated with the accounting estimate is such that it gives rise to a significant risk. Additional responses to significant risks are described in paragraphs A102-A115.

A95. Narrowing the range to a position where all outcomes within the range are considered reasonable may be achieved by:

- (a) Eliminating from the range those outcomes at the extremities of the range judged by the auditor to be unlikely to occur; and
- (b) Continuing to narrow the range, based on audit evidence available, until the auditor concludes that all outcomes within the range are considered reasonable. In some rare cases, the auditor may be able to narrow the range until the audit evidence indicates a point estimate.

Considering whether Specialised Skills or Knowledge are Required (Ref: Para. 14)

A96. In planning the audit, the auditor is required to ascertain the nature, timing and extent of resources necessary to perform the audit engagement¹⁹. This may include, as necessary, the involvement of those with specialised skills or knowledge. In addition, SA 220 requires the engagement partner to be satisfied that the engagement team, and any auditor's external experts, collectively have the appropriate capabilities, competence and time to perform the audit engagement.²⁰ During the course of the audit of accounting estimates the auditor may identify, in light of the experience of the auditor and the circumstances of the engagement, the need for specialised skills or knowledge to be applied in relation to one or more aspects of

¹⁹ SA 300, "Planning an Audit of Financial Statements", paragraph 7(e).

²⁰ SA 220, "Quality Control for and Audit of Financial Statements", paragraph 14.

the accounting estimates.

A97. Matters that may affect the auditor's consideration of whether specialised skills or knowledge is required include, for example:

- The nature of the underlying asset, liability or component of equity in a particular business or industry (for example, mineral deposits, agricultural assets, complex financial instruments).
- A high degree of estimation uncertainty.
- Complex calculations or specialised models are involved, for example, when estimating fair values when there is no observable market.
- The complexity of the requirements of the applicable financial reporting framework relevant to accounting estimates, including whether there are areas known to be subject to differing interpretation or practice is inconsistent or developing.
- The procedures the auditor intends to undertake in responding to assessed risks.

A98. For the majority of accounting estimates, even when there is estimation uncertainty, it is unlikely that specialised skills or knowledge will be required. For example, it is unlikely that specialised skills or knowledge would be necessary for an auditor to evaluate an allowance for doubtful accounts.

A99. However, the auditor may not possess the specialised skills or knowledge required when the matter involved is in a field other than accounting or auditing and may need to obtain it from an auditor's expert. SA 620²¹ establishes requirements and provides guidance in determining the need to employ or engage an auditor's expert and the auditor's responsibilities when using the work of an auditor's expert.

A100. Further, in some cases, the auditor may conclude that it is necessary to obtain specialised skills or knowledge related to specific areas of accounting or auditing. Individuals with such skills or knowledge may be employed by the auditor's firm or engaged from an external organisation outside of the auditor's firm. When such individuals perform audit procedures on the engagement, they are part of the engagement team and accordingly, they are subject to the requirements in SA 220.

A101. Depending on the auditor's understanding and experience of working with the auditor's expert or those other individuals with specialised skills or knowledge, the auditor may consider it appropriate to discuss matters such as the requirements of the applicable financial reporting framework with the individuals involved to establish that their work is relevant for audit purposes.

Further Substantive Procedures to Respond to Significant Risks (Ref: Para. 15)

A102. In auditing accounting estimates that give rise to significant risks, the auditor's further substantive procedures are focused on the evaluation of:

- (a) How management has assessed the effect of estimation uncertainty on the accounting estimate, and the effect such uncertainty may have on the appropriateness of the recognition of the accounting estimate in the financial statements; and
- (b) The adequacy of related disclosures.

Estimation Uncertainty

Management's Consideration of Estimation Uncertainty (Ref: Para. 15(a))

A103. Management may evaluate alternative assumptions or outcomes of the accounting estimates through a number of methods, depending on the circumstances. One possible method used by management is to undertake a sensitivity analysis. This might involve determining how the monetary amount of an accounting estimate varies

²¹ SA 620, "Using the Work of an Auditor's Expert".

I.358 Auditing Pronouncements

with different assumptions. Even for accounting estimates measured at fair value there can be variation because different market participants will use different assumptions. A sensitivity analysis could lead to the development of a number of outcome scenarios, sometimes characterised as a range of outcomes by management, such as “pessimistic” and “optimistic” scenarios.

A104. A sensitivity analysis may demonstrate that an accounting estimate is not sensitive to changes in particular assumptions. Alternatively, it may demonstrate that the accounting estimate is sensitive to one or more assumptions that then become the focus of the auditor’s attention.

A105. This is not intended to suggest that one particular method of addressing estimation uncertainty (such as sensitivity analysis) is more suitable than another, or that management’s consideration of alternative assumptions or outcomes needs to be conducted through a detailed process supported by extensive documentation. Rather, it is whether management has assessed how estimation uncertainty may affect the accounting estimate that is important, not the specific manner in which it is done. Accordingly, where management has not considered alternative assumptions or outcomes, it may be necessary for the auditor to discuss with management, and request support for, how it has addressed the effects of estimation uncertainty on the accounting estimate.

Considerations Specific to Smaller Entities

A106. Smaller entities may use simple means to assess the estimation uncertainty. In addition to the auditor’s review of available documentation, the auditor may obtain other audit evidence of management consideration of alternative assumptions or outcomes by inquiry of management. In addition, management may not have the expertise to consider alternative outcomes or otherwise address the estimation uncertainty of the accounting estimate. In such cases, the auditor may explain to management the process or the different methods available for doing so, and the documentation thereof. This would not, however, change the responsibilities of management for the preparation and presentation of the financial statements.

Significant Assumptions (Ref: Para. 15(b))

A107. An assumption used in making an accounting estimate may be deemed to be significant if a reasonable variation in the assumption would materially affect the measurement of the accounting estimate.

A108. Support for significant assumptions derived from management’s knowledge may be obtained from management’s continuing processes of strategic analysis and risk management. Even without formal established processes, such as may be the case in smaller entities, the auditor may be able to evaluate the assumptions through inquiries of and discussions with management, along with other audit procedures in order to obtain sufficient appropriate audit evidence.

A109. The auditor’s considerations in evaluating assumptions made by management are described in paragraphs A77-A83.

Management Intent and Ability (Ref: Para. 15(c))

A110. The auditor’s considerations in relation to assumptions made by management and management’s intent and ability are described in paragraphs A13 and A80.

Development of a Range (Ref: Para. 16)

A111. In preparing the financial statements, management may be satisfied that it has adequately addressed the effects of estimation uncertainty on the accounting estimates that give rise to significant risks. In some circumstances, however, the auditor may view the efforts of management as inadequate. This may be the case, for example, where, in the auditor’s judgment:

- Sufficient appropriate audit evidence could not be obtained through the auditor's evaluation of how management has addressed the effects of estimation uncertainty.
- It is necessary to explore further the degree of estimation uncertainty associated with an accounting estimate, for example, where the auditor is aware of wide variation in outcomes for similar accounting estimates in similar circumstances.
- It is unlikely that other audit evidence can be obtained, for example, through the review of events occurring up to the date of the auditor's report.
- Indicators of management bias in the making of accounting estimates may exist.

A112. The auditor's considerations in determining a range for this purpose are described in paragraphs A87-A95.

Recognition and Measurement Criteria

Recognition of the Accounting Estimates in the Financial Statements (Ref: Para. 17(a))

A113. Where management has recognised an accounting estimate in the financial statements, the focus of the auditor's evaluation is on whether the measurement of the accounting estimate is sufficiently reliable to meet the recognition criteria of the applicable financial reporting framework.

A114. With respect to accounting estimates that have not been recognised, the focus of the auditor's evaluation is on whether the recognition criteria of the applicable financial reporting framework have in fact been met. Even where an accounting estimate has not been recognised, and the auditor concludes that this treatment is appropriate, there may be a need for disclosure of the circumstances in the notes to the financial statements. The auditor may also determine that there is a need to draw the reader's attention to a significant uncertainty by adding an Emphasis of Matter paragraph to the auditor's report. SA 706²² establishes requirements and provides guidance concerning such paragraphs.

Measurement Basis for the Accounting Estimates (Ref: Para. 17(b))

A115. With respect to fair value accounting estimates, some financial reporting frameworks presume that fair value can be measured reliably as a prerequisite to either requiring or permitting fair value measurements and disclosures. In some cases, this presumption may be overcome when, for example, there is no appropriate method or basis for measurement. In such cases, the focus of the auditor's evaluation is on whether management's basis for overcoming the presumption relating to the use of fair value set forth under the applicable financial reporting framework is appropriate.

Evaluating the Reasonableness of the Accounting Estimates, and Determining Misstatements (Ref: Para. 18)

A116. Based on the audit evidence obtained, the auditor may conclude that the evidence points to an accounting estimate that differs from management's point estimate. Where the audit evidence supports a point estimate, the difference between the auditor's point estimate and management's point estimate constitutes a misstatement. Where the auditor has concluded that using the auditor's range provides sufficient appropriate audit evidence, a management point estimate that lies outside the auditor's range would not be supported by audit evidence. In such cases, the misstatement is no less than the difference between management's point estimate and the nearest point of the auditor's range.

A117. Where management has changed an accounting estimate, or the method in making it, from the prior period based on a subjective assessment that there has been a change in circumstances, the auditor may conclude based on the audit evidence that the accounting estimate is misstated as a result of an arbitrary change by management, or may regard it as an indicator of possible management bias (see paragraphs A124-A125).

²² SA 706, "Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report".

I.360 Auditing Pronouncements

A118.SA 450²³ provides guidance on distinguishing misstatements for purposes of the auditor's evaluation of the effect of uncorrected misstatements on the financial statements. In relation to accounting estimates, a misstatement, whether caused by fraud or error, may arise as a result of:

- Misstatements about which there is no doubt (factual misstatements).
- Differences arising from management's judgments concerning accounting estimates that the auditor considers unreasonable, or the selection or application of accounting policies that the auditor considers inappropriate (judgmental misstatements).
- The auditor's best estimate of misstatements in populations, involving the projection of misstatements identified in audit samples to the entire populations from which the samples were drawn (projected misstatements).

In some cases involving accounting estimates, a misstatement could arise as a result of a combination of these circumstances, making separate identification difficult or impossible.

A119.Evaluating the reasonableness of accounting estimates and related disclosures included in the notes to the financial statements, whether required by the applicable financial reporting framework or disclosed voluntarily, involves essentially the same types of considerations applied when auditing an accounting estimate recognised in the financial statements.

Disclosures Related to Accounting Estimates

Disclosures in accordance with the Applicable Financial Reporting Framework (Ref: Para. 19)

A120.The presentation of financial statements in accordance with the applicable financial reporting framework includes adequate disclosure of material matters. The applicable financial reporting framework may permit, or prescribe, disclosures related to accounting estimates, and some entities may disclose voluntarily additional information in the notes to the financial statements. These disclosures may include, for example:

- The assumptions used.
- The method of estimation used, including any applicable model.
- The basis for the selection of the method of estimation.
- The effect of any changes to the method of estimation from the prior period.
- The sources and implications of estimation uncertainty.

Such disclosures are relevant to users in understanding the accounting estimates recognised or disclosed in the financial statements, and sufficient appropriate audit evidence needs to be obtained about whether the disclosures are in accordance with the requirements of the applicable financial reporting framework.

A121.In some cases, the applicable financial reporting framework may require specific disclosures regarding uncertainties. For example, some financial reporting frameworks prescribe:

- The disclosure of key assumptions and other sources of estimation uncertainty that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities. Such requirements may be described using terms such as "Key Sources of Estimation Uncertainty" or "Critical Accounting Estimates".
- The disclosure of the range of possible outcomes, and the assumptions used in determining the range.
- The disclosure of information regarding the significance of fair value accounting estimates to the

²³ SA 450, "Evaluation of Misstatements Identified during the Audit".

entity's financial position and performance.

- Qualitative disclosures such as the exposures to risk and how they arise, the entity's objectives, policies and procedures for managing the risk and the methods used to measure the risk and any changes from the previous period of these qualitative concepts.
- Quantitative disclosures such as the extent to which the entity is exposed to risk, based on information provided internally to the entity's key management personnel, including credit risk, liquidity risk and market risk.

Disclosures of Estimation Uncertainty for Accounting Estimates that give Rise to Significant Risks
(Ref: Para. 20)

A122. In relation to accounting estimates having significant risk, even where the disclosures are in accordance with the applicable financial reporting framework, the auditor may conclude that the disclosure of estimation uncertainty is inadequate in light of the circumstances and facts involved. The auditor's evaluation of the adequacy of disclosure of estimation uncertainty increases in importance the greater the range of possible outcomes of the accounting estimate is in relation to materiality (see related discussion in paragraph A95 & A94).

A123. In some cases, the auditor may consider it appropriate to encourage management to describe, in the notes to the financial statements, the circumstances relating to the estimation uncertainty. SA 705²⁴ provides guidance on the implications for the auditor's report when the auditor believes that management's disclosure of estimation uncertainty in the financial statements is inadequate or misleading.

Indicators of Possible Management Bias (Ref: Para. 21)

A124. During the audit, the auditor may become aware of judgments and decisions made by management which give rise to indicators of possible management bias. Such indicators may affect the auditor's conclusion as to whether the auditor's risk assessment and related responses remain appropriate, and the auditor may need to consider the implications for the rest of the audit. Further, they may affect the auditor's evaluation of whether the financial statements as a whole are free from material misstatement, as discussed in Revised SA 700²⁵

A125. Examples of indicators of possible management bias with respect to accounting estimates include:

- Changes in an accounting estimate, or the method for making it, where management has made a subjective assessment that there has been a change in circumstances.
- Use of an entity's own assumptions for fair value accounting estimates when they are inconsistent with observable marketplace assumptions.
- Selection or construction of significant assumptions that yield a point estimate favourable for management objectives.
- Selection of a point estimate that may indicate a pattern of optimism or pessimism.

Written Representations (Ref: Para. 22)

A126. SA 580²⁶ discusses the use of written representations. Depending on the nature, materiality and extent of estimation uncertainty, written representations about accounting estimates recognised or disclosed in the financial statements may include representations:

- About the appropriateness of the measurement processes, including related assumptions and models,

²⁴ SA 705, "Modifications to the Opinion in the Independent Auditor's Report".

²⁵ Revised SA 700, "Forming An Opinion and Reporting on Financial Statements".

²⁶ Standard on Auditing (SA) 580, "Written Representations".

I.362 Auditing Pronouncements

used by management in determining accounting estimates in the context of the applicable financial reporting framework, and the consistency in application of the processes.

- That the assumptions appropriately reflect management's intent and ability to carry out specific courses of action on behalf of the entity, where relevant to the accounting estimates and disclosures.
- That disclosure related to accounting estimates are complete and appropriate under the applicable financial reporting framework.
- That no subsequent event requires adjustment to the accounting estimates and disclosures included in the financial statements.

A127. For those accounting estimates not recognised or disclosed in the financial statements, written representations may also include representations about:

- The appropriateness of the basis used by management for determining that the recognition or disclosure criteria of the applicable financial reporting framework have not been met (see paragraph A114).
- The appropriateness of the basis used by management to overcome the presumption relating to the use of fair value set forth under the entity's applicable financial reporting framework, for those accounting estimates not measured or disclosed at fair value (see paragraph A115).

Documentation (Ref: Para. 23)

A128. Documentation of indicators of possible management bias identified during the audit assists the auditor in concluding whether the auditor's risk assessment and related responses remain appropriate, and in evaluating whether the financial statements as a whole are free from material misstatement. See paragraph A125 for examples of indicators of possible management bias.

Material Modifications vis a vis ISA 540, "Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures"

Deletions

1. Paragraph A11 of the Application Section of ISA 540 deals with the application of the requirements of ISA 540 to the audits of public sector entities regarding significant holdings of specialised assets for which there are no readily available and reliable sources of information for purposes of measurement at fair value or other current value bases, or a combination of both. Since as mentioned in the "Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services", the Standards issued by the Auditing and Assurance Standards Board, apply equally to all entities, irrespective of their form, nature and size, a specific reference to applicability of the Standard to public sector entities has been deleted.

Further, it is also possible that even non-public sector entities, may have significant holdings of specialised assets for which there are no readily available and reliable sources of information for purposes of measurement. Accordingly, the spirit of erstwhile A11, highlighting the fact that in case of certain entities, there may be a requirement of estimation at fair value in case of specialised assets, has been retained.

Appendix

(Ref: Para. A1)

Fair Value Measurements and Disclosures Under Different Financial Reporting Frameworks

The purpose of this appendix is only to provide a general discussion of fair value measurements and disclosures under different financial reporting frameworks, for background and context.

1. Different financial reporting frameworks require or permit a variety of fair value measurements and disclosures in financial statements. They also vary in the level of guidance that they provide on the basis for measuring assets and liabilities or the related disclosures. Some financial reporting frameworks give prescriptive guidance, others give general guidance, and some give no guidance at all. In addition, certain industry-specific measurement and disclosure practices for fair values also exist.

2. Definitions of fair value may differ among financial reporting frameworks, or for different assets, liabilities or disclosures within a particular framework. For example, Accounting Standard (AS) 30²⁷ defines fair value as “the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm’s length transaction”. The concept of fair value ordinarily assumes a current transaction, rather than settlement at some past or future date. Accordingly, the process of measuring fair value would be a search for the estimated price at which that transaction would occur. Additionally, different financial reporting frameworks may use such terms as “entity-specific value,” “value in use,” or similar terms, but may still fall within the concept of fair value in this SA.

3. Financial reporting frameworks may treat changes in fair value measurements that occur over time in different ways. For example, a particular financial reporting framework may require that changes in fair value measurements of certain assets or liabilities be reflected directly in equity, while such changes might be reflected in income under another framework. In some frameworks, the determination of whether to use fair value accounting or how it is applied is influenced by management’s intent to carry out certain courses of action with respect to the specific asset or liability.

4. Different financial reporting frameworks may require certain specific fair value measurements and disclosures in financial statements and prescribe or permit them in varying degrees. The financial reporting frameworks may:

- Prescribe measurement, presentation and disclosure requirements for certain information included in the financial statements or for information disclosed in notes to financial statements or presented as supplementary information;
- Permit certain measurements using fair values at the option of an entity or only when certain criteria have been met;
- Prescribe a specific method for determining fair value, for example, through the use of an independent appraisal or specified ways of using discounted cash flows;
- Permit a choice of method for determining fair value from among several alternative methods (the criteria for selection may or may not be provided by the financial reporting framework); or
- Provide no guidance on the fair value measurements or disclosures of fair value other than their use being evident through custom or practice, for example, an industry practice.

²⁷ AS 30, “Financial Instruments: Recognition and Measurement”.

5. Some financial reporting frameworks presume that fair value can be measured reliably for assets or liabilities as a prerequisite to either requiring or permitting fair value measurements or disclosures. In some cases, this presumption may be overcome when an asset or liability does not have a quoted market price in an active market and for which other methods of reasonably estimating fair value are clearly inappropriate or unworkable. Some financial reporting frameworks may specify a fair value hierarchy that distinguishes inputs for use in arriving at fair values ranging from those that involve clearly “observable inputs” based on quoted prices and active markets and those “unobservable inputs” that involve an entity’s own judgments about assumptions that marketplace participants would use.

6. Some financial reporting frameworks require certain specified adjustments or modifications to valuation information, or other considerations unique to a particular asset or liability. For example, accounting for investment properties may require adjustments to be made to an appraised market value, such as adjustments for estimated closing costs on sale, adjustments related to the property’s condition and location, and other matters. Similarly, if the market for a particular asset is not an active market, published price quotations may have to be adjusted or modified to arrive at a more suitable measure of fair value. For example, quoted market prices may not be indicative of fair value if there is infrequent activity in the market, the market is not well established, or small volumes of units are traded relative to the aggregate number of trading units in existence. Accordingly, such market prices may have to be adjusted or modified. Alternative sources of market information may be needed to make such adjustments or modifications. Further, in some cases, collateral assigned (for example, when collateral is assigned for certain types of investment in debt) may need to be considered in determining the fair value or possible impairment of an asset or liability.

7. In most financial reporting frameworks, underlying the concept of fair value measurements is a presumption that the entity is a going concern without any intention or need to liquidate, curtail materially the scale of its operations, or undertake a transaction on adverse terms. Therefore, in this case, fair value would not be the amount that an entity would receive or pay in a forced transaction, involuntary liquidation, or distress sale. On the other hand, general economic conditions or economic conditions specific to certain industries may cause illiquidity in the marketplace and require fair values to be predicated upon depressed prices, potentially significantly depressed prices. An entity, however, may need to take its current economic or operating situation into account in determining the fair values of its assets and liabilities if prescribed or permitted to do so by its financial reporting framework and such framework may or may not specify how that is done. For example, management’s plan to dispose of an asset on an accelerated basis to meet specific business objectives may be relevant to the determination of the fair value of that asset.

Prevalence of Fair Value Measurements

8. Measurements and disclosures based on fair value are becoming increasingly prevalent in financial reporting frameworks. Fair values may occur in, and affect the determination of, financial statements in a number of ways, including the measurement at fair value of the following:

- Specific assets or liabilities, such as marketable securities or liabilities to settle an obligation under a financial instrument, routinely or periodically “marked-to-market”.
- Specific components of equity, for example when accounting for the recognition, measurement and presentation of certain financial instruments with equity features, such as a bond convertible by the holder into common shares of the issuer.
- Specific assets or liabilities acquired in a business combination. For example, the initial determination of goodwill arising on the purchase of an entity in a business combination usually is based on the fair value measurement of the identifiable assets and liabilities acquired and the fair value of the consideration given.
- Specific assets or liabilities adjusted to fair value on a one-time basis. Some financial reporting

frameworks may require the use of a fair value measurement to quantify an adjustment to an asset or a group of assets as part of an asset impairment determination, for example, a test of impairment of goodwill acquired in a business combination based on the fair value of a defined operating entity or reporting unit, the value of which is then allocated among the entity's or unit's group of assets and liabilities in order to derive an implied goodwill for comparison to the recorded goodwill.

- Aggregations of assets and liabilities. In some circumstances, the measurement of a class or group of assets or liabilities calls for an aggregation of fair values of some of the individual assets or liabilities in such class or group. For example, under an entity's applicable financial reporting framework, the measurement of a diversified loan portfolio might be determined based on the fair value of some categories of loans comprising the portfolio.
- Information disclosed in notes to financial statements or presented as supplementary information, but not recognised in the financial statements.

SA 550*
RELATED PARTIES
*(Effective for audits of financial statements
for periods beginning on or after April 1, 2010)*

Introduction

Scope of this SA

1. This Standard on Auditing (SA) deals with the auditor's responsibilities regarding related party relationships and transactions when performing an audit of financial statements. Specifically, it expands on how SA 315¹, SA 330² and SA 240³ are to be applied in relation to risks of material misstatement associated with related party relationships and transactions.

Nature of Related Party Relationships and Transactions

2. Many related party transactions are in the normal course of business. In such circumstances, they may carry no higher risk of material misstatement of the financial statements than similar transactions with unrelated parties. However, the nature of related party relationships and transactions may, in some circumstances, give rise to higher risks of material misstatement of the financial statements than transactions with unrelated parties. For example:

- Related parties may operate through an extensive and complex range of relationships and structures, with a corresponding increase in the complexity of related party transactions.
- Information systems may be ineffective at identifying or summarising transactions and outstanding balances between an entity and its related parties.
- Related party transactions may not be conducted under normal market terms and conditions; for example, some related party transactions may be conducted with no exchange of consideration.

Responsibilities of the Auditor

3. Because related parties are not independent of each other, many financial reporting frameworks establish specific accounting and disclosure requirements for related party relationships, transactions and balances to enable users of the financial statements to understand their nature and actual or potential effects on the financial statements. Where the applicable financial reporting framework establishes such requirements, the auditor has a responsibility to perform audit procedures to identify, assess and respond to the risks of material misstatement arising from the entity's failure to appropriately account for or disclose related party relationships, transactions or balances in accordance with the requirements of the framework.

4. Even if the applicable financial reporting framework establishes minimal or no related party requirements, the auditor nevertheless needs to obtain an understanding of the entity's related party relationships and transactions sufficient to be able to conclude whether the financial statements, insofar as

* Published in March, 2009 issue of the Journal.

¹ SA 315, "Identifying and Assessing the Risks of Material Misstatement Through Understanding the Entity and Its Environment".

² SA 330, "The Auditor's Responses to Assessed Risks".

³ SA 240, "The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements".

they are affected by those relationships and transactions: (Ref: Para. A1)

- (a) Achieve a true and fair presentation (for fair presentation frameworks); or (Ref: Para. A2)
- (b) Are not misleading (for compliance frameworks). (Ref: Para. A3)

5. In addition, an understanding of the entity's related party relationships and transactions is relevant to the auditor's evaluation of whether one or more fraud risk factors are present as required by SA 240⁴ because fraud may be more easily committed through related parties.

6. Owing to the inherent limitations of an audit, there is an unavoidable risk that some material misstatements of the financial statements may not be detected, even though the audit is properly planned and performed in accordance with the SAs⁵. In the context of related parties, the potential effects of inherent limitations on the auditor's ability to detect material misstatements are greater for such reasons as the following:

- Management may be unaware of the existence of all related party relationships and transactions, particularly if the applicable financial reporting framework does not establish related party requirements.
- Related party relationships may present a greater opportunity for collusion, concealment or manipulation by management.

7. Planning and performing the audit with professional skepticism as required by SA 200⁶ is therefore particularly important in this context, given the potential for undisclosed related party relationships and transactions. The requirements in this SA are designed to assist the auditor in identifying and assessing the risks of material misstatement associated with related party relationships and transactions, and in designing audit procedures to respond to the assessed risks.

Effective Date

8. This SA is effective for audits of financial statements for periods beginning on or after April 1, 2010.

Objectives

9. The objectives of the auditor are:

- (a) Irrespective of whether the applicable financial reporting framework establishes related party requirements, to obtain an understanding of related party relationships and transactions sufficient to be able:
 - (i) To recognise fraud risk factors, if any, arising from related party relationships and transactions that are relevant to the identification and assessment of the risks of material misstatement due to fraud; and
 - (ii) To conclude whether the financial statements, insofar as they are affected by those relationships and transactions:
 - a. Achieve a true and fair presentation (for fair presentation frameworks); or
 - b. Are not misleading (for compliance frameworks); and
- (b) In addition, where the applicable financial reporting framework establishes related party requirements, to obtain sufficient appropriate audit evidence about whether related party relationships and transactions have been appropriately identified, accounted for and disclosed in the financial statements

⁴ SA 240, paragraph 24.

⁵ SA 200, paragraph A52.

⁶ SA 200, paragraph 15.

in accordance with the framework.

Definitions

10. For purposes of the SAs, the following terms have the meanings attributed below:

- (a) Arm's length transaction—A transaction conducted on such terms and conditions as between a willing buyer and a willing seller who are unrelated and are acting independently of each other and pursuing their own best interests.
- (b) Related party – A party that is either: (*Ref: Para. A4-A7*)
 - (i) A related party as defined in the applicable financial reporting framework⁷; or
 - (ii) Where the applicable financial reporting framework establishes minimal or no related party requirements:
 - a. A person or other entity that has control or significant influence, directly or indirectly through one or more intermediaries, over the reporting entity;
 - b. Another entity over which the reporting entity has control or significant influence, directly or indirectly through one or more intermediaries; or
 - c. Another entity that is under common control with the reporting entity through having:
 - i. Common controlling ownership;
 - ii. Owners who are close family members; or
 - iii. Common key management.

However, entities that are under common control by a state (i.e., a national, regional or local government) are not considered related unless they engage in significant transactions or share resources to a significant extent with one another.

Requirements

Risk Assessment Procedures and Related Activities

11. As part of the risk assessment procedures and related activities that SA 315 and SA 240 require the auditor to perform during the audit,⁸ the auditor shall perform the audit procedures and related activities set out in paragraphs 12-17 to obtain information relevant to identifying the risks of material misstatement associated with related party relationships and transactions. (*Ref: Para. A8*)

Understanding the Entity's Related Party Relationships and Transactions

12. The engagement team discussion that SA 315 and SA 240 require⁹ shall include specific consideration of the susceptibility of the financial statements to material misstatement due to fraud or error that could result from the entity's related party relationships and transactions. (*Ref: Para. A9-A10*)

13. The auditor shall inquire of management regarding:

- (a) The identity of the entity's related parties, including changes from the prior period; (*Ref: Para. A11-A14*)
- (b) The nature of the relationships between the entity and these related parties; and

⁷ In Indian context, definitions of "Related Party" and "Related Party Transactions" as given in Accounting Standard (AS) 18, "Related Party Disclosures", issued by the Institute of Chartered Accountants of India, will be applicable for the purposes of this SA, and the said definitions also meet the tests laid down in paragraph 10(b)(ii) of this SA.

⁸ SA 315, paragraph 5; and SA 240, paragraph 16.

⁹ SA 315, paragraph 10; and SA 240, paragraph 15.

- (c) Whether the entity entered into any transactions with these related parties during the period and, if so, the type and purpose of the transactions.

14. The auditor shall inquire of management and others within the entity, and perform other risk assessment procedures considered appropriate, to obtain an understanding of the controls, if any, that management has established to: (Ref: Para. A15-A20)

- (a) Identify, account for, and disclose related party relationships and transactions in accordance with the applicable financial reporting framework;
- (b) Authorise and approve significant transactions and arrangements with related parties; and (Ref: Para. A21)
- (c) Authorise and approve significant transactions and arrangements outside the normal course of business.

Maintaining Alertness for Related Party Information When Reviewing Records or Documents

15. During the audit, the auditor shall remain alert, when inspecting records or documents, for arrangements or other information that may indicate the existence of related party relationships or transactions that management has not previously identified or disclosed to the auditor. (Ref: Para. A22-A23)

In particular, the auditor shall inspect the following for indications of the existence of related party relationships or transactions that management has not previously identified or disclosed to the auditor:

- (a) Bank, legal and third party confirmations obtained as part of the auditor's procedures;
- (b) Minutes of meetings of shareholders and of those charged with governance; and
- (c) Such other records or documents as the auditor considers necessary in the circumstances of the entity.

16. If the auditor identifies significant transactions outside the entity's normal course of business when performing the audit procedures required by paragraph 15 or through other audit procedures, the auditor shall inquire of management about: (Ref: Para. A24-A25)

- (a) The nature of these transactions; and (Ref: Para. A26)
- (b) Whether related parties could be involved. (Ref: Para. A27)

Sharing Related Party Information with the Engagement Team

17. The auditor shall share relevant information obtained about the entity's related parties with the other members of the engagement team. (Ref: Para. A28)

Identification and Assessment of the Risks of Material Misstatement Associated with Related Party Relationships and Transactions

18. In meeting the SA 315 requirement to identify and assess the risks of material misstatement,¹⁰ the auditor shall identify and assess the risks of material misstatement associated with related party relationships and transactions and determine whether any of those risks are significant risks. In making this determination, the auditor shall treat identified significant related party transactions outside the entity's normal course of business as giving rise to significant risks.

19. If the auditor identifies fraud risk factors (including circumstances relating to the existence of a related party with dominant influence) when performing the risk assessment procedures and related activities in connection with related parties, the auditor shall consider such information when identifying and assessing

¹⁰ SA 315, paragraph 25.

I.370 Auditing Pronouncements

the risks of material misstatement due to fraud in accordance with SA 240. (Ref: Para. A6 and A29-A30)

Responses to the Risks of Material Misstatement Associated with Related Party Relationships and Transactions

20. As part of the SA 330 requirement that the auditor respond to assessed risks,¹¹ the auditor designs and performs further audit procedures to obtain sufficient appropriate audit evidence about the assessed risks of material misstatement associated with related party relationships and transactions. These audit procedures shall include those required by paragraphs 21-24. (Ref: Para. A31-A34)

Identification of Previously Unidentified or Undisclosed Related Parties or Significant Related Party Transactions

21. If the auditor identifies arrangements or information that suggests the existence of related party relationships or transactions that management has not previously identified or disclosed to the auditor, the auditor shall determine whether the underlying circumstances confirm the existence of those relationships or transactions.

22. If the auditor identifies related parties or significant related party transactions that management has not previously identified or disclosed to the auditor, the auditor shall:

- (a) Promptly communicate the relevant information to the other members of the engagement team; (Ref: Para. A35)
- (b) Where the applicable financial reporting framework establishes related party requirements:
 - (i) Request management to identify all transactions with the newly identified related parties for the auditor's further evaluation; and
 - (ii) Inquire as to why the entity's controls over related party relationships and transactions failed to enable the identification or disclosure of the related party relationships or transactions;
- (c) Perform appropriate substantive audit procedures relating to such newly identified related parties or significant related party transactions; (Ref: Para. A36)
- (d) Reconsider the risk that other related parties or significant related party transactions may exist that management has not previously identified or disclosed to the auditor, and perform additional audit procedures as necessary; and
- (e) If the non-disclosure by management appears intentional (and therefore indicative of a risk of material misstatement due to fraud), evaluate the implications for the audit. (Ref: Para. A37)

Identified Significant Related Party Transactions outside the Entity's Normal Course of Business

23. For identified significant related party transactions outside the entity's normal course of business, the auditor shall:

- (a) Inspect the underlying contracts or agreements, if any, and evaluate whether:
 - (i) The business rationale (or lack thereof) of the transactions suggests that they may have been entered into to engage in fraudulent financial reporting or to conceal misappropriation of assets;¹² (Ref: Para. A38-A39)
 - (ii) The terms of the transactions are consistent with management's explanations; and
 - (iii) The transactions have been appropriately accounted for and disclosed in accordance with the

¹¹ SA 330, paragraphs 5-6.

¹² SA 240, paragraph 32(c).

applicable financial reporting framework; and

- (b) Obtain audit evidence that the transactions have been appropriately authorised and approved. (Ref: Para. A40-A41)

Assertions That Related Party Transactions Were Conducted on Terms Equivalent to Those Prevailing in an Arm's Length Transaction

24. When management has made an assertion in the financial statements to the effect that a related party transaction was conducted on terms equivalent to those prevailing in an arm's length transaction, the auditor shall obtain sufficient appropriate audit evidence about the assertion. (Ref: Para. A42-A45)

Evaluation of the Accounting for and Disclosure of Identified Related Party Relationships and Transactions

25. In forming an opinion on the financial statements in accordance with SA 700,¹³ the auditor shall evaluate: (Ref: Para. A46)

- (a) Whether the identified related party relationships and transactions have been appropriately accounted for and disclosed in accordance with the applicable financial reporting framework; and (Ref: Para. A47)
- (b) Whether the effects of the related party relationships and transactions:
- (i) Prevent the financial statements from achieving true and fair presentation (for fair presentation frameworks); or
 - (ii) Cause the financial statements to be misleading (for compliance frameworks).

Written Representations

26. Where the applicable financial reporting framework establishes related party requirements, the auditor shall obtain written representations from management and, where appropriate, those charged with governance that: (Ref: Para. A48-A49)

- (a) They have disclosed to the auditor the identity of the entity's related parties and all the related party relationships and transactions of which they are aware; and
- (b) They have appropriately accounted for and disclosed such relationships and transactions in accordance with the requirements of the framework.

Communication with Those Charged with Governance

27. Unless all of those charged with governance are involved in managing the entity¹⁴, the auditor shall communicate with those charged with governance significant matters arising during the audit in connection with the entity's related parties. (Ref: Para. A50)

Documentation

28. In meeting the documentation requirements of SA 230¹⁵ and other SAs, the auditor shall include in the audit documentation the names of the identified related parties and the nature of the related party relationships.

¹³ Revised SA 700, "Forming an Opinion and Reporting on Financial Statements"; paragraphs 10-15.

¹⁴ SA 260, paragraph 12 (c).

¹⁵ SA 230, "Audit Documentation".

Application and Other Explanatory Material

Responsibilities of the Auditor

Financial Reporting Frameworks That Establish Minimal Related Party Requirements (Ref: Para. 4)

A1. An applicable financial reporting framework that establishes minimal related party requirements is one that defines the meaning of a related party but that definition has a substantially narrower scope than the definition set out in paragraph 10(b)(ii) of this SA, so that a requirement in the framework to disclose related party relationships and transactions would apply to substantially fewer related party relationships and transactions.

Fair Presentation Frameworks (Ref: Para. 4(a))

A2. In the context of a fair presentation framework,¹⁶ related party relationships and transactions may cause the financial statements to fail to achieve true and fair presentation if, for example, the economic reality of such relationships and transactions is not appropriately reflected in the financial statements. For instance, true and fair presentation may not be achieved if the sale of a property by the entity to a controlling shareholder at a price above or below fair market value has been accounted for as a transaction involving a profit or loss for the entity when it may constitute a contribution or return of capital or the payment of a dividend.

Compliance Frameworks (Ref: Para. 4(b))

A3. In the context of a compliance framework, whether related party relationships and transactions cause the financial statements to be misleading as discussed in SA 700 depends upon the particular circumstances of the engagement. For example, even if non-disclosure of related party transactions in the financial statements is in compliance with the framework and applicable law or regulation, the financial statements could be misleading if the entity derives a very substantial portion of its revenue from transactions with related parties, and that fact is not disclosed. However, it will be extremely rare for the auditor to consider financial statements that are prepared and presented in accordance with a compliance framework to be misleading if in accordance with SA 210¹⁷ the auditor determined that the framework is acceptable¹⁸.

Definition of a Related Party (Ref: Para. 10(b))

A4. Many financial reporting frameworks discuss the concepts of control and significant influence. Although they may discuss these concepts using different terms, they generally explain that:

- (a) Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities; and
- (b) Significant influence (which may be gained by share ownership, statute or agreement) is the power to participate in the financial and operating policy decisions of an entity, but is not control over those policies.

A5. The existence of the following relationships may indicate the presence of control or significant influence:

- (a) Direct or indirect equity holdings or other financial interests in the entity.
- (b) The entity's holdings of direct or indirect equity or other financial interests in other entities.
- (c) Being part of those charged with governance or key management (i.e., those members of management who have the authority and responsibility for planning, directing and controlling the activities of the entity).

¹⁶ SA 200, "Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with Standards on Auditing", paragraph 13 (a), defines the meaning of fair presentation and compliance frameworks.

¹⁷ SA 210, "Agreeing the Terms of Audit Engagements," paragraph 4(a).

¹⁸ SA 700, "Forming an Opinion and Reporting on Financial Statements", paragraph A12.

- (d) Being a close family member of any person referred to in subparagraph (c).
- (e) Having a significant business relationship with any person referred to in subparagraph (c).

Related Parties with Dominant Influence

A6. Related parties, by virtue of their ability to exert control or significant influence, may be in a position to exert dominant influence over the entity or its management. Consideration of such behavior is relevant when identifying and assessing the risks of material misstatement due to fraud, as further explained in paragraphs A29-A30.

Special-Purpose Entities as Related Parties

A7. In some circumstances, a special-purpose entity¹⁹ may be a related party of the entity because the entity may in substance control it, even if the entity owns little or none of the special- purpose entity's equity.

Risk Assessment Procedures and Related Activities

Risks of Material Misstatement Associated with Related Party Relationships and Transactions (Ref: Para. 11)

A8. In case of certain entities, auditor's responsibilities regarding related party relationships and transactions may be affected by the audit mandate, or by obligations on those entities arising from legislation, regulation, ministerial directives, government policy requirements, or resolutions of the legislature. Consequently, in such cases the auditor's responsibilities may not be limited to addressing the risks of material misstatement associated with related party relationships and transactions, but may also include a broader responsibility to address the risks of non-compliance with laws and regulations governing such entities that lay down specific requirements in the conduct of business with related parties. Further, in such cases the auditor may need to have regard to any specific financial reporting requirements for related party relationships and transactions that may differ from other entities.

Understanding the Entity's Related Party Relationships and Transactions

Discussion among the Engagement Team (Ref: Para. 12)

- A9. Matters that may be addressed in the discussion among the engagement team include:
- The nature and extent of the entity's relationships and transactions with related parties (using, for example, the auditor's record of identified related parties updated after each audit).
 - An emphasis on the importance of maintaining professional skepticism throughout the audit regarding the potential for material misstatement associated with related party relationships and transactions.
 - The circumstances or conditions of the entity that may indicate the existence of related party relationships or transactions that management has not identified or disclosed to the auditor (e.g., a complex organisational structure, use of special-purpose entities for off-balance sheet transactions, or an inadequate information system).
 - The records or documents that may indicate the existence of related party relationships or transactions.
 - The importance that management and those charged with governance attach to the identification, appropriate accounting for, and disclosure of related party relationships and transactions (if the applicable financial reporting framework establishes related party requirements), and the related risk of management override of relevant controls.

¹⁹ SA 315, paragraphs A26-A27, provides guidance regarding the nature of a special-purpose entity.

I.374 Auditing Pronouncements

A10. In addition, the discussion in the context of fraud may include specific consideration of how related parties may be involved in fraud. For example:

- How special-purpose entities controlled by management might be used to facilitate earnings management.
- How transactions between the entity and a known business partner of a key member of management could be arranged to facilitate misappropriation of the entity's assets.

The Identity of the Entity's Related Parties (Ref: Para. 13(a))

A11. Where the applicable financial reporting framework establishes related party requirements, information regarding the identity of the entity's related parties is likely to be readily available to management because the entity's information systems will need to record, process and summarise related party relationships and transactions to enable the entity to meet the accounting and disclosure requirements of the framework. Management is therefore likely to have a comprehensive list of related parties and changes from the prior period. For recurring engagements, making the inquiries provides a basis for comparing the information supplied by management with the auditor's record of related parties noted in previous audits.

A12. However, where the framework does not establish related party requirements, the entity may not have such information systems in place. Under such circumstances, it is possible that management may not be aware of the existence of all related parties. Nevertheless, the requirement to make the inquiries specified by paragraph 13 still applies because management may be aware of parties that meet the related party definition set out in this SA.

In such a case, however, the auditor's inquiries regarding the identity of the entity's related parties are likely to form part of the auditor's risk assessment procedures and related activities performed in accordance with SA 315 to obtain information regarding:

- The entity's ownership and governance structures;
- The types of investments that the entity is making and plans to make; and
- The way the entity is structured and how it is financed.

In the particular case of common control relationships, as management is more likely to be aware of such relationships if they have economic significance to the entity, the auditor's inquiries are likely to be more effective if they are focused on whether parties with which the entity engages in significant transactions, or shares resources to a significant degree, are related parties.

A13. In the context of a group audit, SA 600 requires the group engagement team to provide each component auditor with a list of related parties prepared by group management and any other related parties of which the group engagement team is aware²⁰. Where the entity is a component within a group, this information provides a useful basis for the auditor's inquiries of management regarding the identity of the entity's related parties.

A14. The auditor may also obtain some information regarding the identity of the entity's related parties through inquiries of management during the engagement acceptance or continuance process.

The Entity's Controls over Related Party Relationships and Transactions (Ref: Para. 14)

A15. Others within the entity are those considered likely to have knowledge of the entity's related party relationships and transactions, and the entity's controls over such relationships and transactions. These may

²⁰ Currently, SA 600, 'Using the Work of Another Auditor' is in force. The standard is being revised in light of the corresponding international standard.

include, to the extent that they do not form part of management:

- Those charged with governance;
- Personnel in a position to initiate, process, or record transactions that are both significant and outside the entity's normal course of business, and those who supervise or monitor such personnel;
- Internal auditors;
- In-house legal counsel; and
- The chief ethics officer or equivalent person.

A16. The audit is conducted on the premise that management and, where appropriate, those charged with governance have acknowledged and understand that they have responsibility for the preparation of the financial statements in accordance with the applicable financial reporting framework, including where relevant their fair presentation, and for such internal control as management and, where appropriate, those charged with governance, determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.²¹ Accordingly, where the framework establishes related party requirements, management, with oversight from those charged with governance, is responsible for the design, implementation and maintenance of adequate controls over related party relationships and transactions so that these are identified and appropriately accounted for and disclosed in accordance with the framework. In their oversight role, those charged with governance are responsible for monitoring how management is discharging its responsibility for such controls. Regardless of any related party requirements the framework may establish, those charged with governance may, in order to fulfill their oversight responsibilities, obtain information from management to enable them to understand the nature and business rationale of the entity's related party relationships and transactions.

A17. In meeting the SA 315 requirement to obtain an understanding of the control environment,²² the auditor may consider features of the control environment relevant to mitigating the risks of material misstatement associated with related party relationships and transactions, such as:

- Internal ethical codes, appropriately communicated to the entity's personnel and enforced, governing the circumstances in which the entity may enter into specific types of related party transactions.
- Policies and procedures for open and timely disclosure of the interests that management and those charged with governance have in related party transactions.
- The assignment of responsibilities within the entity for identifying, recording, summarising, and disclosing related party transactions.
- Timely disclosure and discussion between management and those charged with governance of significant related party transactions outside the entity's normal course of business, including whether those charged with governance have appropriately challenged the business rationale of such transactions (for example, by seeking advice from external professional advisors).
- Clear guidelines for the approval of related party transactions involving actual or perceived conflicts of interest, such as approval by a subcommittee of those charged with governance comprising individuals independent of management.
- Periodic reviews by internal auditors, where applicable.
- Proactive action taken by management to resolve related party disclosure issues, such as by seeking advice from the auditor or external legal counsel.

²¹ SA 200, paragraph A2.

²² SA 315, paragraph 14.

I.376 Auditing Pronouncements

- The existence of whistle-blowing policies and procedures, where applicable.

A18. Controls over related party relationships and transactions within some entities may be deficient or non-existent for a number of reasons, such as:

- The low importance attached by management to identifying and disclosing related party relationships and transactions.
- The lack of appropriate oversight by those charged with governance.
- An intentional disregard for such controls because related party disclosures may reveal information that management considers sensitive, for example, the existence of transactions involving family members of management.
- An insufficient understanding by management of the related party requirements of the applicable financial reporting framework.
- The absence of disclosure requirements under the applicable financial reporting framework.

Where such controls are ineffective or non-existent, the auditor may be unable to obtain sufficient appropriate audit evidence about related party relationships and transactions. If this were the case, the auditor would, in accordance with SA 705²³, consider the implications for the audit, including the auditor's report.

A19. Fraudulent financial reporting often involves management override of controls that otherwise may appear to be operating effectively.²⁴ The risk of management override of controls is higher if management has relationships that involve control or significant influence with parties with which the entity does business because these relationships may present management with greater incentives and opportunities to perpetrate fraud. For example, management's financial interests in certain related parties may provide incentives for management to override controls by (a) directing the entity, against its interests, to conclude transactions for the benefit of these parties, or (b) colluding with such parties or controlling their actions. Examples of possible fraud include:

- Creating fictitious terms of transactions with related parties designed to misrepresent the business rationale of these transactions.
- Fraudulently organizing the transfer of assets from or to management or others at amounts significantly above or below market value.
- Engaging in complex transactions with related parties, such as special-purpose entities, that are structured to misrepresent the financial position or financial performance of the entity.

Considerations specific to smaller entities

A20. Control environment in smaller entities is likely to be different from larger entities. In particular those charged with governance may not include an outside member, and the role of governance may be undertaken directly by the owner-manager where no other owner exists. Control activities in smaller entities are likely to be less formal and smaller entities may have no documented processes for dealing with related party relationships and transactions. An owner-manager may mitigate some of the risks arising from related party transactions, or potentially increase those risks, through active involvement in all the main aspects of the transactions. For such entities, the auditor may obtain an understanding of the related party relationships and transactions, and any controls that may exist over these, through inquiry of management combined with other procedures, such as observation of management's oversight and review activities, and inspection of

²³SA 705, "Modifications to the Opinion in the Independent Auditor's Report".

²⁴ SA 240, paragraphs 31 and A4.

available relevant documentation.

Authorisation and approval of significant transactions and arrangements (Ref: Para. 14(b))

A21. Authorisation involves the granting of permission by a party or parties with the appropriate authority (whether management, those charged with governance or the entity's shareholders) for the entity to enter into specific transactions in accordance with pre-determined criteria, whether judgmental or not. Approval involves those parties' acceptance of the transactions the entity has entered into as having satisfied the criteria on which authorisation was granted. Examples of controls the entity may have established to authorise and approve significant transactions and arrangements with related parties or significant transactions and arrangements outside the normal course of business include:

- Monitoring controls to identify such transactions and arrangements for authorisation and approval.
- Approval of the terms and conditions of the transactions and arrangements by management, those charged with governance or, where applicable, shareholders.

Maintaining Alertness for Related Party Information When Reviewing Records or Documents

Records or Documents That the Auditor May Inspect (Ref: Para. 15)

A22. During the audit, the auditor may inspect records or documents that may provide information about related party relationships and transactions, for example:

- Entity income tax returns.
- Information supplied by the entity to regulatory authorities.
- Shareholder registers to identify the entity's principal shareholders.
- Statements of conflicts of interest from management and those charged with governance.
- Records of the entity's investments and those of its pension plans.
- Contracts and agreements with key management or those charged with governance.
- Significant contracts and agreements not in the entity's ordinary course of business.
- Specific invoices and correspondence from the entity's professional advisors.
- Life insurance policies acquired by the entity.
- Significant contracts re-negotiated by the entity during the period.
- Internal auditors' reports.
- Documents associated with the entity's filings with a securities regulator (e.g, prospectuses).

Arrangements that may indicate the existence of previously unidentified or undisclosed related party relationships or transactions

A23. An arrangement involves a formal or informal agreement between the entity and one or more other parties for such purposes as:

- The establishment of a business relationship through appropriate vehicles or structures.
- The conduct of certain types of transactions under specific terms and conditions.
- The provision of designated services or financial support.

Examples of arrangements that may indicate the existence of related party relationships or transactions that management has not previously identified or disclosed to the auditor include:

- Participation in unincorporated partnerships with other parties.

I.378 Auditing Pronouncements

- Agreements for the provision of services to certain parties under terms and conditions that are outside the entity's normal course of business.
- Guarantees and guarantor relationships.

Identification of Significant Transactions outside the Normal Course of Business (Ref: Para. 16)

A24. Obtaining further information on significant transactions outside the entity's normal course of business enables the auditor to evaluate whether fraud risk factors, if any, are present and, where the applicable financial reporting framework establishes related party requirements, to identify the risks of material misstatement.

A25. Examples of transactions outside the entity's normal course of business may include:

- Complex equity transactions, such as corporate restructurings or acquisitions.
- Transactions with offshore entities in jurisdictions with weak corporate laws.
- The leasing of premises or the rendering of management services by the entity to another party if no consideration is exchanged.
- Sales transactions with unusually large discounts or returns.
- Transactions with circular arrangements, for example, sales with a commitment to repurchase.
- Transactions under contracts whose terms are changed before expiry.

Understanding the nature of significant transactions outside the normal course of business (Ref: Para. 16(a))

A26. Inquiring into the nature of the significant transactions outside the entity's normal course of business involves obtaining an understanding of the business rationale of the transactions, and the terms and conditions under which these have been entered into.

Inquiring into whether related parties could be involved (Ref: Para. 16(b))

A27. A related party could be involved in a significant transaction outside the entity's normal course of business not only by directly influencing the transaction through being a party to the transaction, but also by indirectly influencing it through an intermediary. Such influence may indicate the presence of a fraud risk factor.

Sharing Related Party Information with the Engagement Team (Ref: Para. 17)

A28. Relevant related party information that may be shared among the engagement team members includes, for example:

- The identity of the entity's related parties.
- The nature of the related party relationships and transactions.
- Significant or complex related party relationships or transactions that may require special audit consideration, in particular transactions in which management or those charged with governance are financially involved.

Identification and Assessment of the Risks of Material Misstatement Associated with Related Party Relationships and Transactions

Fraud Risk Factors Associated with a Related Party with Dominant Influence (Ref: Para. 19)

A29. Domination of management by a single person or small group of persons without compensating controls is a fraud risk factor.²⁵ Indicators of dominant influence exerted by a related party include:

²⁵ SA 240, Appendix 1.

- The related party has vetoed significant business decisions taken by management or those charged with governance.
- Significant transactions are referred to the related party for final approval.
- There is little or no debate among management and those charged with governance regarding business proposals initiated by the related party.
- Transactions involving the related party (or a close family member of the related party) are rarely independently reviewed and approved.

Dominant influence may also exist in some cases if the related party has played a leading role in founding the entity and continues to play a leading role in managing the entity.

A30. In the presence of other risk factors, the existence of a related party with dominant influence may indicate significant risks of material misstatement due to fraud. For example:

- An unusually high turnover of senior management or professional advisors may suggest unethical or fraudulent business practices that serve the related party's purposes.
- The use of business intermediaries for significant transactions for which there appears to be no clear business justification may suggest that the related party could have an interest in such transactions through control of such intermediaries for fraudulent purposes.
- Evidence of the related party's excessive participation in or preoccupation with the selection of accounting policies or the determination of significant estimates may suggest the possibility of fraudulent financial reporting.

Responses to the Risks of Material Misstatement Associated with Related Party Relationships and Transactions (Ref: Para. 20)

A31. The nature, timing and extent of the further audit procedures that the auditor may select to respond to the assessed risks of material misstatement associated with related party relationships and transactions depend upon the nature of those risks and the circumstances of the entity.²⁶

A32. Examples of substantive audit procedures that the auditor may perform when the auditor has assessed a significant risk that management has not appropriately accounted for or disclosed specific related party transactions in accordance with the applicable financial reporting framework (whether due to fraud or error) include:

- Confirming or discussing specific aspects of the transactions with intermediaries such as banks, law firms, guarantors, or agents, where practicable and not prohibited by law, regulation or ethical rules.
- Confirming the purposes, specific terms or amounts of the transactions with the related parties (this audit procedure may be less effective where the auditor judges that the entity is likely to influence the related parties in their responses to the auditor).
- Where applicable, reading the financial statements or other relevant financial information, if available, of the related parties for evidence of the accounting of the transactions in the related parties' accounting records.

A33. If the auditor has assessed a significant risk of material misstatement due to fraud as a result of the presence of a related party with dominant influence, the auditor may, in addition to the general requirements

²⁶ SA 330 provides further guidance on considering the nature, timing and extent of further audit procedures. SA 240 establishes requirements and provides guidance on appropriate responses to assessed risks of material misstatement due to fraud.

I.380 Auditing Pronouncements

of SA 240, perform audit procedures such as the following to obtain an understanding of the business relationships that such a related party may have established directly or indirectly with the entity and to determine the need for further appropriate substantive audit procedures:

- Inquiries of, and discussion with, management and those charged with governance.
- Inquiries of the related party.
- Inspection of significant contracts with the related party.
- Appropriate background research, such as through the Internet or specific external business information databases.
- Review of employee whistle-blowing reports where these are retained.

A34. Depending upon the results of the auditor's risk assessment procedures, the auditor may consider it appropriate to obtain audit evidence without testing the entity's controls over related party relationships and transactions. In some circumstances, however, it may not be possible to obtain sufficient appropriate audit evidence from substantive audit procedures alone in relation to the risks of material misstatement associated with related party relationships and transactions. For example, where intra-group transactions between the entity and its components are numerous and a significant amount of information regarding these transactions is initiated, recorded, processed or reported electronically in an integrated system, the auditor may determine that it is not possible to design effective substantive audit procedures that by themselves would reduce the risks of material misstatement associated with these transactions to an acceptably low level. In such a case, in meeting the SA 330 requirement to obtain sufficient appropriate audit evidence as to the operating effectiveness of relevant controls,²⁷ the auditor is required to test the entity's controls over the completeness and accuracy of the recording of the related party relationships and transactions.

Identification of Previously Unidentified or Undisclosed Related Parties or Significant Related Party Transactions

Communicating Newly Identified Related Party Information to the Engagement Team (Ref: Para. 22(a))

A35. Communicating promptly any newly identified related parties to the other members of the engagement team assists them in determining whether this information affects the results of, and conclusions drawn from, risk assessment procedures already performed, including whether the risks of material misstatement need to be reassessed.

Substantive Procedures Relating to Newly Identified Related Parties or Significant Related Party Transactions (Ref: Para. 22(c))

A36. Examples of substantive audit procedures that the auditor may perform relating to newly identified related parties or significant related party transactions include:

- Making inquiries regarding the nature of the entity's relationships with the newly identified related parties, including (where appropriate and not prohibited by law, regulation or ethical rules) inquiring of parties outside the entity who are presumed to have significant knowledge of the entity and its business, such as legal counsel, principal agents, major representatives, consultants, guarantors, or other close business partners.
- Conducting an analysis of accounting records for transactions with the newly identified related parties. Such an analysis may be facilitated using computer-assisted audit techniques.
- Verifying the terms and conditions of the newly identified related party transactions, and evaluating whether the transactions have been appropriately accounted for and disclosed in accordance with the

²⁷ SA 330, paragraph 8(b).

applicable financial reporting framework.

Intentional Non-Disclosure by Management (Ref: Para. 22(e))

A37. The requirements and guidance in SA 240 regarding the auditor's responsibilities relating to fraud in an audit of financial statements are relevant where management appears to have intentionally failed to disclose related parties or significant related party transactions to the auditor. The auditor may also consider whether it is necessary to re-evaluate the reliability of management's responses to the auditor's inquiries and management's representations to the auditor.

Identified Significant Related Party Transactions outside the Entity's Normal Course of Business

Evaluating the Business Rationale of Significant Related Party Transactions (Ref: Para. 23)

A38. In evaluating the business rationale of a significant related party transaction outside the entity's normal course of business, the auditor may consider the following:

- Whether the transaction:
 - Is overly complex (e.g., it may involve multiple related parties within a consolidated group).
 - Has unusual terms of trade, such as unusual prices, interest rates, guarantees and repayment terms.
 - Lacks an apparent logical business reason for its occurrence.
 - Involves previously unidentified related parties.
 - Is processed in an unusual manner.
- Whether management has discussed the nature of, and accounting for, such a transaction with those charged with governance.
- Whether management is placing more emphasis on a particular accounting treatment rather than giving due regard to the underlying economics of the transaction.

If management's explanations are materially inconsistent with the terms of the related party transaction, the auditor is required, in accordance with SA 500,²⁸ to consider the reliability of management's explanations and representations on other significant matters.

A39. The auditor may also seek to understand the business rationale of such a transaction from the related party's perspective, as this may help the auditor to better understand the economic reality of the transaction and why it was carried out. A business rationale from the related party's perspective that appears inconsistent with the nature of its business may represent a fraud risk factor.

Authorization and Approval of Significant Related Party Transactions (Ref: Para. 23(b))

A40. Authorisation and approval by management, those charged with governance, or, where applicable, the shareholders of significant related party transactions outside the entity's normal course of business may provide audit evidence that these have been duly considered at the appropriate levels within the entity and that their terms and conditions have been appropriately reflected in the financial statements. The existence of transactions of this nature that were not subject to such authorisation and approval, in the absence of rational explanations based on discussion with management or those charged with governance, may indicate risks of material misstatement due to error or fraud. In these circumstances, the auditor may need to be alert for other transactions of a similar nature. Authorisation and approval alone, however, may not be sufficient in concluding whether risks of material misstatement due to fraud are absent because authorisation and approval may be ineffective if there has been collusion between the related parties or if the entity is subject to

²⁸ SA 500, "Audit Evidence", paragraph 11.

the dominant influence of a related party.

Considerations specific to smaller entities

A41. A smaller entity may not have the same controls provided by different levels of authority and approval that may exist in a larger entity. Accordingly, when auditing a smaller entity, the auditor may rely to a lesser degree on authorization and approval for audit evidence regarding the validity of significant related party transactions outside the entity's normal course of business. Instead, the auditor may consider performing other audit procedures such as inspecting relevant documents, confirming specific aspects of the transactions with relevant parties, or observing the owner-manager's involvement with the transactions.

Assertions That Related Party Transactions Were Conducted on Terms Equivalent to Those Prevailing in an Arm's Length Transaction (Ref: Para. 24)

A42. Although audit evidence may be readily available regarding how the price of a related party transaction compares to that of a similar arm's length transaction, there are ordinarily practical difficulties that limit the auditor's ability to obtain audit evidence that all other aspects of the transaction are equivalent to those of the arm's length transaction. For example, although the auditor may be able to confirm that a related party transaction has been conducted at a market price, it may be impracticable to confirm whether other terms and conditions of the transaction (such as credit terms, contingencies and specific charges) are equivalent to those that would ordinarily be agreed between independent parties. Accordingly, there may be a risk that management's assertion that a related party transaction was conducted on terms equivalent to those prevailing in an arm's length transaction may be materially misstated.

A43. Management is responsible for the substantiation of an assertion that a related party transaction was conducted on terms equivalent to those prevailing in an arm's length transaction. Management's support for the assertion may include:

- Comparing the terms of the related party transaction to those of an identical or similar transaction with one or more unrelated parties.
- Engaging an external expert to determine a market value and to confirm market terms and conditions for the transaction.
- Comparing the terms of the transaction to known market terms for broadly similar transactions on an open market.

A44. Evaluating management's support for this assertion may involve one or more of the following:

- Considering the appropriateness of management's process for supporting the assertion.
- Verifying the source of the internal or external data supporting the assertion, and testing the data to determine their accuracy, completeness and relevance.
- Evaluating the reasonableness of any significant assumptions on which the assertion is based.

A45. Some financial reporting frameworks require the disclosure of related party transactions not conducted on terms equivalent to those prevailing in arm's length transactions. In these circumstances, if management has not disclosed a related party transaction in the financial statements, there may be an implicit assertion that the transaction was conducted on terms equivalent to those prevailing in an arm's length transaction.

Evaluation of the Accounting for and Disclosure of Identified Related Party Relationships and Transactions

Materiality Considerations in Evaluating Misstatements (Ref: Para. 25)

A46. SA 450 requires the auditor to consider both the size and the nature of a misstatement, and the

particular circumstances of its occurrence, when evaluating whether the misstatement is material.²⁹ The significance of the transaction to the financial statement users may not depend solely on the recorded amount of the transaction but also on other specific relevant factors, such as the nature of the related party relationship.

Evaluation of Related Party Disclosures (Ref: Para. 25(a))

A47. Evaluating the related party disclosures in the context of the disclosure requirements of the applicable financial reporting framework means considering whether the facts and circumstances of the entity's related party relationships and transactions have been appropriately summarized and presented so that the disclosures are understandable. Disclosures of related party transactions may not be understandable if:

- (a) The business rationale and the effects of the transactions on the financial statements are unclear or misstated; or
- (b) Key terms, conditions, or other important elements of the transactions necessary for understanding them are not appropriately disclosed.

Written Representations (Ref: Para. 26)

A48. Circumstances in which it may be appropriate to obtain written representations from those charged with governance include:

- When they have approved specific related party transactions that (a) materially affect the financial statements, or (b) involve management.
- When they have made specific oral representations to the auditor on details of certain related party transactions.
- When they have financial or other interests in the related parties or the related party transactions.
- Management's assertion of responsibility that related party transactions were conducted on terms equivalent to those prevailing in an arm's length transaction.

A49. The auditor may also decide to obtain written representations regarding specific assertions that management may have made, such as a representation that specific related party transactions do not involve undisclosed side agreements.

Communication with Those Charged with Governance (Ref: Para. 27)

A50. Communicating significant matters arising during the audit³⁰ in connection with the entity's related parties helps the auditor to establish a common understanding with those charged with governance of the nature and resolution of these matters. Examples of significant related party matters include:

- Non-disclosure (whether intentional or not) by management to the auditor of related parties or significant related party transactions, which may alert those charged with governance to significant related party relationships and transactions of which they may not have been previously aware.
- The identification of significant related party transactions that have not been appropriately authorised and approved, which may give rise to suspected fraud.
- Disagreement with management regarding the accounting for and disclosure of significant related party transactions in accordance with the applicable financial reporting framework.

²⁹ SA 450, "Evaluation of Misstatements Identified during the Audit," paragraph 11(a). Paragraph A16 of SA 450 provides guidance on the circumstances that may affect the evaluation of a misstatement.

³⁰ SA 230, "Audit Documentation", paragraph A8 provides further guidance on the nature of significant matters arising during the audit.

I.384 Auditing Pronouncements

- Non-compliance with applicable law or regulations prohibiting or restricting specific types of related party transactions.
- Difficulties in identifying the party that ultimately controls the entity.

Material Modifications *vis a vis* ISA 550, “Related Parties”

Additions

1. In paragraph A20 of the Application Section, the lines, “Control environment in smaller entities is likely to be different from larger entities. In particular those charged with governance may not include an outside member, and the role of governance may be undertaken directly by the owner-manager where no other owner exists” have been added so to explain the difference between the control environment in the larger entities and smaller entities.
2. In paragraph A48 of the Application Section, it has been added that a written representation may be obtained by the auditor regarding management’s assertion of responsibility that related party transactions were conducted on terms equivalent to those prevailing in an arm’s length transaction.

Deletions

1. Paragraph A8 of the Application Section of ISA 550 deals with the application of the requirement of ISA 550 to the audits of public sector entities regarding the effect of laws and regulations governing the public sector bodies on the auditor’s responsibilities with regard to related party relationships and transactions. Since as mentioned in the “Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services”, the Standards issued by the Auditing and Assurance Standards Board, apply equally to all entities, irrespective of their form, nature and size, a specific reference to applicability of the Standard to public sector entities has been deleted.

Further, it is also possible that even in case of certain entities, the laws and regulations may also include a broader responsibility to address the risks of non-compliance with laws and regulations that lay down specific requirements in the conduct of business with related parties. Accordingly, the spirit of erstwhile A8, highlighting such additional responsibilities of the auditor, has been retained.

SA 560*
Subsequent Events
***(Effective for audits of financial statements
for periods beginning on or after April 1, 2009)***

Introduction

Scope of this SA

1. This Standard on Auditing (SA) deals with the auditor's responsibilities relating to subsequent events in an audit of financial statements. (Ref: Para. A1)
2. Financial statements may be affected by certain events that occur after the date of the financial statements. Many financial reporting frameworks¹ specifically refer to such events. Such financial reporting frameworks ordinarily identify two types of events:
 - (a) Those that provide evidence of conditions that existed at the date of the financial statements; and
 - (b) Those that provide evidence of conditions that arose after the date of the financial statements.

SA 700 explains that the date of the auditor's report informs the reader that the auditor has considered the effect of events and transactions of which the auditor becomes aware and that occurred up to that date.²

Effective Date

3. This SA is effective for audits of financial statements for periods beginning on or after April 1, 2009.

Objectives

4. The objectives of the auditor are to:
 - (a) Obtain sufficient appropriate audit evidence about whether events occurring between the date of the financial statements and the date of the auditor's report that require adjustment of, or disclosure in, the financial statements are appropriately reflected in those financial statements; and
 - (b) Respond appropriately to facts that become known to the auditor after the date of the auditor's report, that, had they been known to the auditor at that date, may have caused the auditor to amend the auditor's report.

Definitions

5. For purposes of the SAs, the following terms have the meanings attributed below:
 - (a) Date of the financial statements – The date of the end of the latest period covered by the financial statements.
 - (b) Date of approval of the financial statements – The date on which all the statements that comprise the financial statements, including the related notes, have been prepared and those with the recognised authority have asserted that they have taken responsibility for those financial statements. (Ref: Para. A2)

* Published in January, 2009 issue of the Journal.

¹ SA 200, "Overall Objectives of the Independent Auditor and the Conduct of an Audit in accordance with Standards on Auditing", Paragraph 13 (a).

² Revised SA 700, "Forming an Opinion and Reporting on Financial Statements"; paragraph A37.

I.386 Auditing Pronouncements

- (c) Date of the auditor's report – The date the auditor dates the report on the financial statements in accordance with SA 700. (Ref: Para. A3)
- (d) Date the financial statements are issued – The date that the auditor's report and audited financial statements are made available to third parties. (Ref: Para. A4-A5)
- (e) Subsequent events – Events occurring between the date of the financial statements and the date of the auditor's report, and facts that become known to the auditor after the date of the auditor's report.

Requirements

Events Occurring Between the Date of the Financial Statements and the Date of the Auditor's Report

6. The auditor shall perform audit procedures designed to obtain sufficient appropriate audit evidence that all events occurring between the date of the financial statements and the date of the auditor's report that require adjustment of, or disclosure in, the financial statements have been identified. The auditor is not, however, expected to perform additional audit procedures on matters to which previously applied audit procedures have provided satisfactory conclusions. (Ref: Para. A6)

7. The auditor shall perform the procedures required by paragraph 6 so that they cover the period from the date of the financial statements to the date of the auditor's report, or as near as practicable thereto. The auditor shall take into account the auditor's risk assessment in determining the nature and extent of such audit procedures, which shall include the following: (Ref: Para. A7-A8)

- (a) Obtaining an understanding of any procedures management has established to ensure that subsequent events are identified.
- (b) Inquiring of management and, where appropriate, those charged with governance as to whether any subsequent events have occurred which might affect the financial statements. (Ref: Para. A9)
- (c) Reading minutes, if any, of the meetings, of the entity's owners, management and those charged with governance, that have been held after the date of the financial statements and inquiring about matters discussed at any such meetings for which minutes are not yet available. (Ref: Para. A10)
- (d) Reading the entity's latest subsequent interim financial statements, if any.

8. When, as a result of the procedures performed as required by paragraphs 6 and 7, the auditor identifies events that require adjustment of, or disclosure in, the financial statements, the auditor shall determine whether each such event is appropriately reflected in those financial statements.

Written Representations

9. The auditor shall request management and, where appropriate, those charged with governance, to provide a written representation in accordance with SA 580, "Written Representations" that all events occurring subsequent to the date of the financial statements and for which the applicable financial reporting framework requires adjustment or disclosure have been adjusted or disclosed.

Facts Which Become Known to the Auditor After the Date of the Auditor's Report but Before the Date the Financial Statements are Issued

10. The auditor has no obligation to perform any audit procedures regarding the financial statements after the date of the auditor's report. However, when, after the date of the auditor's report but before the date the financial statements are issued, a fact becomes known to the auditor that, had it been known to the auditor at the date of the auditor's report, may have caused the auditor to amend the auditor's report, the auditor shall: (Ref: Para. A11)

- (a) Discuss the matter with management and, where appropriate, those charged with governance.
- (b) Determine whether the financial statements need amendment and, if so,

- (c) Inquire how management intends to address the matter in the financial statements.
11. If management amends the financial statements, the auditor shall:
- (a) Carry out the audit procedures necessary in the circumstances on the amendment.
 - (b) Unless the circumstances in paragraph 12 apply:
 - (i) Extend the audit procedures referred to in paragraphs 6 and 7 to the date of the new auditor's report; and
 - (ii) Provide a new auditor's report on the amended financial statements. The new auditor's report shall not be dated earlier than the date of approval of the amended financial statements.
12. When law, regulation or the financial reporting framework does not prohibit management from restricting the amendment of the financial statements to the effects of the subsequent events or events causing that amendments and those responsible for approving the financial statements are not prohibited from restricting their approval to that amendment, the auditor is permitted to restrict the audit procedures on subsequent events required in paragraph 11(b)(i) to that amendment. In such cases, the auditor shall either:
- (a) Amend the auditor's report to include an additional date restricted to that amendment that thereby indicates that the auditor's procedures on subsequent events are restricted solely to the amendment of the financial statements described in the relevant note to the financial statements; or (*Ref: Para. A12*)
 - (b) Provide a new or amended auditor's report that includes a statement in an Emphasis of Matter paragraph or Other Matter(s) paragraph³ that conveys that auditor's procedures on subsequent events are restricted solely to the amendment of the financial statements as described in the relevant note to the financial statements.
13. In some entities, management may not be required by the applicable law, regulation or the financial reporting framework to issue amended financial statements and, accordingly, the auditor need not provide an amended or new auditor's report. However, when management does not amend the financial statements in circumstances where the auditor believes they need to be amended, then: (*Ref: Para. A13-A14*)
- (a) If the auditor's report has not yet been provided to the entity, the auditor shall modify the opinion as required by SA 705⁴ and then provide the auditor's report; or
 - (b) If the auditor's report has already been provided to the entity, the auditor shall notify management and, unless all of those charged with governance are involved in managing the entity, those charged with governance, not to issue the financial statements to third parties before the necessary amendments have been made. If the financial statements are nevertheless subsequently issued without the necessary amendments, the auditor shall take appropriate action, to seek to prevent reliance on the auditor's report. (*Ref: Para. A15-A16*)

Facts Which Become Known to the Auditor After the Financial Statements have been Issued

14. After the financial statements have been issued, the auditor has no obligation to perform any audit procedures regarding such financial statements. However, when, after the financial statements have been issued, a fact becomes known to the auditor that, had it been known to the auditor at the date of the auditor's report, may have caused the auditor to amend the auditor's report, the auditor shall:
- (a) Discuss the matter with management and, where appropriate, those charged with governance.
 - (b) Determine whether the financial statements need amendment and, if so,

³ SA 706, "Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report".

⁴ SA 705, "Modifications to the Opinion in the Independent Auditor's Report".

I.388 Auditing Pronouncements

- (c) Inquire how management intends to address the matter in the financial statements.
15. If the management amends the financial statements, the auditor shall: (Ref: Para. A17)
- (a) Carry out the audit procedures necessary in the circumstances on the amendment.
- (b) Review the steps taken by management to ensure that anyone in receipt of the previously issued financial statements together with the auditor's report thereon is informed of the situation.
- (c) Unless the circumstances in paragraph 12 apply:
- (i) Extend the audit procedures referred to in paragraphs 6 and 7 to the date of the new auditor's report, and the date the new auditor's report no earlier than the date of approval of the amended financial statements; and
- (ii) Provide a new auditor's report on the amended financial statements.
- (d) When the circumstances in paragraph 12 apply, amend the auditor's report, or provide a new auditor's report as required by paragraph 12.
16. The auditor shall include in the new or amended auditor's report an Emphasis of Matter paragraph or Other Matter(s) paragraph referring to a note to the financial statements that more extensively discusses the reason for the amendment of the previously issued financial statements and to the earlier report provided by the auditor.
17. If management does not take the necessary steps to ensure that anyone in receipt of the previously issued financial statements is informed of the situation and does not amend the financial statements in circumstances where the auditor believes they need to be amended, the auditor shall notify management and, unless all of those charged with governance⁵ are involved in managing the entity, those charged with governance, that the auditor will seek to prevent future reliance on the auditor's report. If, despite such notification, management or those charged with governance do not take these necessary steps, the auditor shall take appropriate action to seek to prevent reliance on the auditor's report. (Ref: Para. A18)

Application and Other Explanatory Material

Introduction (Ref: Para. 1)

A1. When the audited financial statements are included in other documents subsequent to the issuance of the financial statements, the auditor may have additional responsibilities relating to subsequent events that the auditor may need to consider, such as legal or regulatory requirements involving the offering of securities to the public in jurisdictions in which the securities are being offered. For example, the auditor may be required to perform additional audit procedures to the date of the final offering document. These procedures may include those referred to in paragraphs 6 and 7 performed up to a date at or near the effective date of the final offering document, and reading the offering document to assess whether the other information in the offering document is consistent with the financial information with which the auditor is associated.

Definitions

Date of Approval of the Financial Statements (Ref: Para. 5(b))

A2. In some entities, the applicable law or regulation identifies the individuals or bodies (for example, management or those charged with governance) that are responsible for concluding that all the statements that comprise the financial statements, including the related notes, have been prepared, and specifies the necessary approval process. In some other entities, the approval process is not prescribed in law or regulation and the entity follows its own procedures in preparing and finalising its financial statements in view

⁵ SA 260, paragraph 12(c).

of its management and governance structures. In some cases, final approval of the financial statements by shareholders is required. In such cases, final approval by shareholders is not necessary for the auditor to conclude that sufficient appropriate audit evidence on which to base the auditor's opinion on the financial statements has been obtained. The date of approval of the financial statements for purposes of the SAs is the earlier date on which those with the recognised authority determine that all the statements that comprise the financial statements, including the related notes, have been prepared and that those with the recognised authority have asserted that they have taken responsibility for those financial statements.

Date of the Auditor's Report (Ref: Para. 5(c))

A3. The auditor's report cannot be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence on which to base the opinion on the financial statements, including evidence that all the statements that comprise the financial statements, including the related notes, have been prepared and that those with the recognised authority have asserted that they have taken responsibility for those financial statements.⁶ Consequently, the date of the auditor's report cannot be earlier than the date of approval of the financial statements as defined in paragraph 5(b). A time period may elapse due to administrative issues between the date of the auditor's report as defined in paragraph 5(c) and the date the auditor's report is provided to the entity.

Date the Financial Statements are Issued (Ref: Para. 5(d))

A4. The date the financial statements are issued generally depends on the regulatory environment of the entity. In some circumstances, the date the financial statements are issued may be the date that they are filed with a regulatory authority. Since audited financial statements cannot be issued without an auditor's report, the date that the audited financial statements are issued must not only be at or later than the date of the auditor's report, but must also be at or later than the date the auditor's report is provided to the entity.

A5. In the case of certain entities, such as, Central/State governments and related government entities (for example, agencies, boards, commissions), the date the financial statements are issued may be the date the audited financial statements and the auditor's report thereon are presented to the legislature or otherwise made public.

Events Occurring Between the Date of the Financial Statements and the Date of the Auditor's Report (Ref: Para. 6-9)

A6. Depending on the auditor's risk assessment, the audit procedures required by paragraph 6 may include procedures, necessary to obtain sufficient appropriate audit evidence, involving the review or testing of accounting records or transactions occurring between the date of the financial statements and the date of the auditor's report. The audit procedures required by paragraphs 6 and 7 are in addition to procedures that the auditor may perform for other purposes that, nevertheless, may provide evidence about subsequent events (for example, to obtain audit evidence for account balances as at the date of the financial statements, such as cut-off procedures or procedures in relation to subsequent receipts of accounts receivable).

A7. Paragraph 7 stipulates certain audit procedures in this context that the auditor is required to perform pursuant to paragraph 6. The subsequent events procedures that the auditor performs may, however, depend on the information that is available and, in particular, the extent to which the accounting records have been prepared since the date of the financial statements. When the accounting records are not up-to-date, and accordingly no interim financial statements (whether for internal or external purposes) have been prepared, or minutes of meetings of management or those charged with governance have not been prepared, relevant audit procedures may take the form of inspection of available books and records,

⁶ SA 700, paragraph 41.

I.390 Auditing Pronouncements

including bank statements. Paragraph A8 gives examples of some of the additional matters that the auditor may consider in the course of these inquiries.

A8. In addition to the audit procedures required by paragraph 7, the auditor may consider it necessary and appropriate to:

- Read the entity's latest available budgets, cash flow forecasts and other related management reports for periods after the date of the financial statements;
- Inquire, or extend previous oral or written inquiries, of the entity's legal counsel concerning litigation and claims; or
- Consider whether written representations covering particular subsequent events may be necessary to support other audit evidence and thereby obtain sufficient appropriate audit evidence.

Inquiry (Ref: Para. 7(b))

A9. In inquiring of management and, where appropriate, those charged with governance, as to whether any subsequent events have occurred that might affect the financial statements, the auditor may inquire as to the current status of items that were accounted for on the basis of preliminary or inconclusive data and may make specific inquiries about the following matters:

- Whether new commitments, borrowings or guarantees have been entered into.
- Whether sales or acquisitions of assets have occurred or are planned.
- Whether there have been increases in capital or issuance of debt instruments, such as the issue of new shares or debentures, or an agreement to merge or liquidate has been made or is planned.
- Whether any assets have been appropriated by government or destroyed, for example, by fire or flood.
- Whether there have been any developments regarding contingencies.
- Whether any unusual accounting adjustments have been made or are contemplated.
- Whether any events have occurred or are likely to occur that will bring into question the appropriateness of accounting policies used in the financial statements, as would be the case, for example, if such events call into question the validity of the going concern assumption.
- Whether any events have occurred that are relevant to the measurement of estimates or provisions made in the financial statements.
- Whether any events have occurred that are relevant to the recoverability of assets.

Reading Minutes (Ref: Para. 7(c))

A10. In case of certain entities, such as, Central/State governments and related government entities (for example, agencies, boards, commissions), the auditor may read the official records of relevant proceedings of the legislature and inquire about matters addressed in proceedings for which official records are not yet available.

Facts Which Become Known to the Auditor After the Date of the Auditor's Report but Before the Date the Financial Statements are Issued

Management Responsibility Towards Auditor (Ref: Para. 10)

A11. As explained in SA 210, the terms of the audit engagement include the agreement of management to inform the auditor of facts that may affect the financial statements, of which management may become aware

during the period from the date of the auditor's report to the date the financial statements are issued.⁷

Dual Dating (Ref: Para. 12(a))

A12. When, in the circumstances described in paragraph 12(a), the auditor amends the auditor's report to include an additional date restricted to that amendment, the date of the auditor's report on the financial statements prior to their subsequent amendment by management remains unchanged because this date informs the reader as to when the audit work on those financial statements was completed. However, an additional date is included in the auditor's report to inform users that the auditor's procedures subsequent to that date were restricted to the subsequent amendment of the financial statements. The following is an illustration of such an additional date:

“(Date of auditor's report), except as to Note Y, which is as of (date of completion of audit procedures restricted to amendment described in Note Y)”.

No Amendment of Financial Statements by Management (Ref: Para. 13)

A13. In some entities, management may not be required by the applicable law, regulation or the financial reporting framework to issue amended financial statements. This is often the case when issuance of the financial statements for the following period is imminent, provided appropriate disclosures are made in such statements.

A14. In case of certain entities, such as, Central/State governments and related government entities (for example, agencies, boards, commissions), the actions taken in accordance with paragraph 13 when management does not amend the financial statements may also include reporting separately to the legislature, or other relevant body in the reporting hierarchy, on the implications of the subsequent event for the financial statements and the auditor's report.

Auditor Action to Seek to Prevent Reliance on Auditor's Report (Ref: Para. 13(b))

A15. The auditor may need to fulfill additional legal obligations even when the auditor has notified management not to issue the financial statements and management has agreed to this request.

A16. When management has issued the financial statements despite the auditor's notification not to issue the financial statements to third parties, the auditor's course of action to prevent reliance on the auditor's report on the financial statements depends upon the auditor's legal rights and obligations. Consequently, the auditor may consider it appropriate to seek legal advice.

Facts Which Become Known to the Auditor After the Financial Statements have been Issued

No Amendment of Financial Statements by Management (Ref: Para. 15)

A17. In some circumstances, the entities, such as, Central/State governments and related government entities (for example, agencies, boards, commissions) may be prevented from issuing amended financial statements by law or regulation. In such circumstances, the appropriate course of action for the auditor may be to report to the appropriate statutory body.

Auditor Action to Seek to Prevent Reliance on Auditor's Report (Ref: Para. 17)

A18. When the auditor believes that management, or those charged with governance, have failed to take the necessary steps to prevent reliance on the auditor's report on financial statements previously issued by the entity despite the auditor's prior notification that the auditor will take action to seek to prevent such reliance, the auditor's course of action depends upon the auditor's legal rights and obligations. Consequently, the auditor may consider it appropriate to seek legal advice.

⁷ SA 210, "Agreeing the Terms of Audit Engagements", paragraph A23.

Material Modifications to ISA 560, “Subsequent Events”

Deletion

1. Paragraph A5 of ISA 560 provides that in the case of public sector entities, the date the financial statements are issued may be the date the audited financial statements and the auditor’s report thereon are presented to the legislature or otherwise made public. Paragraph A10 of ISA 560 provides that in the case of public sector, the auditor may read the official records of relevant proceedings of the legislature and inquire about matters addressed in proceedings for which official records are not yet available. Paragraph A14 of ISA 560 provides that in the case of public sector, the actions taken in accordance with paragraph 13 of ISA when management does not amend the financial statements may also include reporting separately to the legislature, or other relevant body in the reporting hierarchy, on the implications of the subsequent event for the financial statements and the auditor’s report. Paragraph A17 of ISA 560 provides that in some circumstances, the entities in the public sector may be prevented from issuing amended financial statements by law or regulation. In such circumstances, the appropriate course of action for the auditor may be to report to the appropriate statutory body. Since as mentioned in the “Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services”, the Standards issued by the Auditing and Assurance Standards Board, apply equally to all entities, irrespective of their form, nature and size, a specific reference to applicability of the Standard to public sector entities has been deleted.

Further, it is also possible that such situations may also exist in case of certain entities pursuant to a requirement under the statute or regulation under which they operate. Accordingly, the spirit of erstwhile A5, A10, A14 and A17, highlighting such fact, has been retained though a specific reference to public sector entities has been deleted.

SA 570*
Going Concern
*(Effective for audits of financial statements
for periods beginning on or after April 1, 2017)*

Introduction

Scope of this SA

1. This Standard on Auditing (SA) deals with the auditor's responsibilities in the audit of financial statements relating to going concern and the implications for the auditor's report. (Ref: Para. A1)

Going Concern Basis of Accounting

2. Under the going concern basis of accounting, the financial statements are prepared on the assumption that the entity is a going concern and will continue its operations for the foreseeable future. General purpose financial statements are prepared using the going concern basis of accounting, unless management either intends to liquidate the entity or to cease operations, or has no realistic alternative but to do so. Special purpose financial statements may or may not be prepared in accordance with a financial reporting framework for which the going concern basis of accounting is relevant (e.g., the going concern basis of accounting is not relevant for some financial statements prepared on a tax basis). When the use of the going concern basis of accounting is appropriate, assets and liabilities are recorded on the basis that the entity will be able to realize its assets and discharge its liabilities in the normal course of business. (Ref: Para. A2)

Responsibility for Assessment of the Entity's Ability to Continue as a Going Concern

3. Some financial reporting frameworks contain an explicit requirement for management to make a specific assessment of the entity's ability to continue as a going concern, and standards regarding matters to be considered and disclosures to be made in connection with going concern. The detailed requirements regarding management's responsibility to assess the entity's ability to continue as a going concern and related financial statement disclosures may also be set out in law or regulation.

4. In other financial reporting frameworks, there may be no explicit requirement for management to make a specific assessment of the entity's ability to continue as a going concern. Nevertheless, where the going concern basis of accounting is a fundamental principle in the preparation of financial statements as discussed in paragraph 2, the preparation of the financial statements requires management to assess the entity's ability to continue as a going concern even if the financial reporting framework does not include an explicit requirement to do so.

5. Management's assessment of the entity's ability to continue as a going concern involves making a judgment, at a particular point in time, about inherently uncertain future outcomes of events or conditions. The following factors are relevant to that judgment:

- The degree of uncertainty associated with the outcome of an event or condition increases significantly the further into the future an event or condition or the outcome occurs. For that reason, most financial reporting frameworks that require an explicit management assessment specify the period for which management is required to take into account all available information.

* Published in October, 2008 issue of the Journal.

I.394 Auditing Pronouncements

- The size and complexity of the entity, the nature and condition of its business and the degree to which it is affected by external factors affect the judgment regarding the outcome of events or conditions.
- Any judgment about the future is based on information available at the time at which the judgment is made. Subsequent events may result in outcomes that are inconsistent with judgments that were reasonable at the time they were made.

Responsibilities of the Auditor

6. The auditor's responsibilities are to obtain sufficient appropriate audit evidence regarding, and conclude on, the appropriateness of management's use of the going concern basis of accounting in the preparation of the financial statements, and to conclude, based on the audit evidence obtained, whether a material uncertainty exists about the entity's ability to continue as a going concern. These responsibilities exist even if the financial reporting framework used in the preparation of the financial statements does not include an explicit requirement for management to make a specific assessment of the entity's ability to continue as a going concern.

7. However, as described in SA 200,¹ the potential effects of inherent limitations on the auditor's ability to detect material misstatements are greater for future events or conditions that may cause an entity to cease to continue as a going concern. The auditor cannot predict such future events or conditions. Accordingly, the absence of any reference to a material uncertainty about the entity's ability to continue as a going concern in an auditor's report cannot be viewed as a guarantee as to the entity's ability to continue as a going concern.

Effective Date

8. This SA is effective for audits of financial statements for periods beginning on or after April 1, 2017.

Objectives

9. The objectives of the auditor are:
- (a) To obtain sufficient appropriate audit evidence regarding, and conclude on, the appropriateness of management's use of the going concern basis of accounting in the preparation of the financial statements;
 - (b) To conclude, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the entity's ability to continue as a going concern; and
 - (c) To report in accordance with this SA.

Requirements

Risk Assessment Procedures and Related Activities

10. When performing risk assessment procedures as required by SA 315,² the auditor shall consider whether events or conditions exist that may cast significant doubt on the entity's ability to continue as a going concern. In so doing, the auditor shall determine whether management has already performed a preliminary assessment of the entity's ability to continue as a going concern, and: (Ref: Para. A3–A6)

- (a) If such an assessment has been performed, the auditor shall discuss the assessment with management and determine whether management has identified events or conditions that, individually or collectively, may cast significant doubt on the entity's ability to continue as a going

¹ SA 200, Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with Standards on Auditing, paragraphs A51–A52

² SA 315, *Identifying and Assessing the Risks of Material Misstatement through Understanding the Entity and Its Environment*, paragraph 5

concern and, if so, management's plans to address them; or

- (b) If such an assessment has not yet been performed, the auditor shall discuss with management the basis for the intended use of the going concern basis of accounting, and inquire of management whether events or conditions exist that, individually or collectively, may cast significant doubt on the entity's ability to continue as a going concern.

11. The auditor shall remain alert throughout the audit for audit evidence of events or conditions that may cast significant doubt on the entity's ability to continue as a going concern. (Ref: Para. A7)

Evaluating Management's Assessment

12. The auditor shall evaluate management's assessment of the entity's ability to continue as a going concern. (Ref: Para. A8–A10, A12–A13)

13. In evaluating management's assessment of the entity's ability to continue as a going concern, the auditor shall cover the same period as that used by management to make its assessment as required by the applicable financial reporting framework, or by law or regulation if it specifies a longer period. If management's assessment of the entity's ability to continue as a going concern covers less than twelve months from the date of the financial statements as defined in SA 560,3 the auditor shall request management to extend its assessment period to at least twelve months from that date. (Ref: Para. A11–A13)

14. In evaluating management's assessment, the auditor shall consider whether management's assessment includes all relevant information of which the auditor is aware as a result of the audit.

Period beyond Management's Assessment

15. The auditor shall inquire of management as to its knowledge of events or conditions beyond the period of management's assessment that may cast significant doubt on the entity's ability to continue as a going concern. (Ref: Para. A14–A15)

Additional Audit Procedures When Events or Conditions Are Identified

16. If events or conditions have been identified that may cast significant doubt on the entity's ability to continue as a going concern, the auditor shall obtain sufficient appropriate audit evidence to determine whether or not a material uncertainty exists related to events or conditions that may cast significant doubt on the entity's ability to continue as a going concern (hereinafter referred to as "material uncertainty") through performing additional audit procedures, including consideration of mitigating factors. These procedures shall include: (Ref: Para. A16)

- (a) Where management has not yet performed an assessment of the entity's ability to continue as a going concern, requesting management to make its assessment.
- (b) Evaluating management's plans for future actions in relation to its going concern assessment, whether the outcome of these plans is likely to improve the situation and whether management's plans are feasible in the circumstances. (Ref: Para. A17)
- (c) Where the entity has prepared a cash flow forecast, and analysis of the forecast is a significant factor in considering the future outcome of events or conditions in the evaluation of management's plans for future actions: (Ref: Para. A18–A19)
 - (i) Evaluating the reliability of the underlying data generated to prepare the forecast; and
 - (ii) Determining whether there is adequate support for the assumptions underlying the forecast.
- (d) Considering whether any additional facts or information have become available since the date on which

³ SA 560, *Subsequent Events*, paragraph 5(a)

management made its assessment.

- (e) Requesting written representations from management and, where appropriate, those charged with governance, regarding their plans for future actions and the feasibility of these plans. (Ref: Para. A20)

Auditor Conclusions

17. The auditor shall evaluate whether sufficient appropriate audit evidence has been obtained regarding, and shall conclude on, the appropriateness of management's use of the going concern basis of accounting in the preparation of the financial statements.

18. Based on the audit evidence obtained, the auditor shall conclude whether, in the auditor's judgment, a material uncertainty exists related to events or conditions that, individually or collectively, may cast significant doubt on the entity's ability to continue as a going concern. A material uncertainty exists when the magnitude of its potential impact and likelihood of occurrence is such that, in the auditor's judgment, appropriate disclosure of the nature and implications of the uncertainty is necessary for: (Ref: Para. A21–A22)

- (a) In the case of a fair presentation financial reporting framework, the fair presentation of the financial statements, or
- (b) In the case of a compliance framework, the financial statements not to be misleading.

Adequacy of Disclosures When Events or Conditions Have Been Identified and a Material Uncertainty Exists

19. If the auditor concludes that management's use of the going concern basis of accounting is appropriate in the circumstances but a material uncertainty exists, the auditor shall determine whether the financial statements: (Ref: Para. A22–A23)

- (a) Adequately disclose the principal events or conditions that may cast significant doubt on the entity's ability to continue as a going concern and management's plans to deal with these events or conditions; and
- (b) Disclose clearly that there is a material uncertainty related to events or conditions that may cast significant doubt on the entity's ability to continue as a going concern and, therefore, that it may be unable to realize its assets and discharge its liabilities in the normal course of business.

Adequacy of Disclosures When Events or Conditions Have Been Identified but No Material Uncertainty Exists

20. If events or conditions have been identified that may cast significant doubt on the entity's ability to continue as a going concern but, based on the audit evidence obtained the auditor concludes that no material uncertainty exists, the auditor shall evaluate whether, in view of the requirements of the applicable financial reporting framework, the financial statements provide adequate disclosures about these events or conditions. (Ref: Para. A24–A25)

Implications for the Auditor's Report

Use of Going Concern Basis of Accounting Is Inappropriate

21. If the financial statements have been prepared using the going concern basis of accounting but, in the auditor's judgment, management's use of the going concern basis of accounting in the preparation of the financial statements is inappropriate, the auditor shall express an adverse opinion. (Ref: Para. A26–A27)

Use of Going Concern Basis of Accounting Is Appropriate but a Material Uncertainty Exists

Adequate Disclosure of a Material Uncertainty Is Made in the Financial Statements

22. If adequate disclosure about the material uncertainty is made in the financial statements, the auditor shall express an unmodified opinion and the auditor's report shall include a separate section under the heading "Material Uncertainty Related to Going Concern" to: (Ref: Para. A28–A31, A34)

- (a) Draw attention to the note in the financial statements that discloses the matters set out in paragraph 19; and
- (b) State that these events or conditions indicate that a material uncertainty exists that may cast significant doubt on the entity's ability to continue as a going concern and that the auditor's opinion is not modified in respect of the matter.

Adequate Disclosure of a Material Uncertainty Is Not Made in the Financial Statements

23. If adequate disclosure about the material uncertainty is not made in the financial statements, the auditor shall: (Ref: Para. A32–A34)

- (a) Express a qualified opinion or adverse opinion, as appropriate, in accordance with SA 705 (Revised)⁴; and
- (b) In the Basis for Qualified (Adverse) Opinion section of the auditor's report, state that a material uncertainty exists that may cast significant doubt on the entity's ability to continue as a going concern and that the financial statements do not adequately disclose this matter.

Management Unwilling to Make or Extend Its Assessment

24. If management is unwilling to make or extend its assessment when requested to do so by the auditor, the auditor shall consider the implications for the auditor's report. (Ref: Para. A35)

Communication with Those Charged with Governance

25. Unless all those charged with governance are involved in managing the entity,⁵ the auditor shall communicate with those charged with governance events or conditions identified that may cast significant doubt on the entity's ability to continue as a going concern. Such communication with those charged with governance shall include the following:

- (a) Whether the events or conditions constitute a material uncertainty;
- (b) Whether management's use of the going concern basis of accounting is appropriate in the preparation of the financial statements;
- (c) The adequacy of related disclosures in the financial statements; and
- (d) Where applicable, the implications for the auditor's report.

Significant Delay in the Approval of Financial Statements

26. If there is significant delay in the approval of the financial statements by management or those charged with governance after the date of the financial statements, the auditor shall inquire as to the reasons for the delay. If the auditor believes that the delay could be related to events or conditions relating to the going concern assessment, the auditor shall perform those additional audit procedures necessary, as described in paragraph 16, as well as consider the effect on the auditor's conclusion regarding the existence of a material uncertainty, as described in paragraph 18.

Application and Other Explanatory Material

Scope of this SA (Ref: Para 1)

A1. SA 701⁶ deals with the auditor's responsibility to communicate key audit matters in the auditor's report.

⁴ SA 705 (Revised), *Modifications to the Opinion in the Independent Auditor's Report*.

⁵ SA 260 (Revised), *Communication with Those Charged with Governance*, paragraph 13.

⁶ SA 701, *Communicating Key Audit Matters in the Independent Auditor's Report*.

That SA acknowledges that, when SA 701 applies, matters relating to going concern may be determined to be key audit matters, and explains that a material uncertainty related to events or conditions that may cast significant doubt on the entity's ability to continue as a going concern is, by its nature, a key audit matter.⁷

Going Concern Basis of Accounting (Ref: Para. 2)

Considerations Specific to Public Sector Entities

A2. Management's use of the going concern basis of accounting is also relevant to public sector entities. Going concern risks may arise, but are not limited to, situations where public sector entities operate on a for-profit basis, where government support may be reduced or withdrawn, or in the case of privatization. Events or conditions that may cast significant doubt on an entity's ability to continue as a going concern in the public sector may include situations where the public sector entity lacks funding for its continued existence or when policy decisions are made that affect the services provided by the public sector entity.

Risk Assessment Procedures and Related Activities

Events or Conditions That May Cast Significant Doubt on the Entity's Ability to Continue as a Going Concern (Ref: Para. 10)

A3. The following are examples of events or conditions that, individually or collectively, may cast significant doubt on the entity's ability to continue as a going concern. This listing is not all-inclusive nor does the existence of one or more of the items always signify that a material uncertainty exists.

Financial

- Net liability or net current liability position.
- Fixed-term borrowings approaching maturity without realistic prospects of renewal or repayment; or excessive reliance on short-term borrowings to finance long-term assets.
- Indications of withdrawal of financial support by creditors.
- Negative operating cash flows indicated by historical or prospective financial statements.
- Adverse key financial ratios.
- Substantial operating losses or significant deterioration in the value of assets used to generate cash flows.
- Arrears or discontinuance of dividends.
- Inability to pay creditors on due dates.
- Inability to comply with the terms of loan agreements.
- Change from credit to cash-on-delivery transactions with suppliers.
- Inability to obtain financing for essential new product development or other essential investments.

Operating

- Management intentions to liquidate the entity or to cease operations.
- Loss of key management without replacement.
- Loss of a major market, key customer(s), franchise, license, or principal supplier(s).
- Labor difficulties.
- Shortages of important supplies.

⁷ See paragraphs 15 and A41 of SA 701.

- Emergence of a highly successful competitor.

Other

- Non-compliance with capital or other statutory or regulatory requirements, such as solvency or liquidity requirements for financial institutions.
- Pending legal or regulatory proceedings against the entity that may, if successful, result in claims that the entity is unlikely to be able to satisfy.
- Changes in law or regulation or government policy expected to adversely affect the entity.
- Uninsured or underinsured catastrophes when they occur.

The significance of such events or conditions often can be mitigated by other factors. For example, the effect of an entity being unable to make its normal debt repayments may be counter-balanced by management's plans to maintain adequate cash flows by alternative means, such as by disposing of assets, rescheduling loan repayments, or obtaining additional capital. Similarly, the loss of a principal supplier may be mitigated by the availability of a suitable alternative source of supply.

A4. The risk assessment procedures required by paragraph 10 help the auditor to determine whether management's use of the going concern basis of accounting is likely to be an important issue and its impact on planning the audit. These procedures also allow for more timely discussions with management, including a discussion of management's plans and resolution of any identified going concern issues.

Considerations Specific to Smaller Entities (Ref: Para. 10)

A5. The size of an entity may affect its ability to withstand adverse conditions. Small entities may be able to respond quickly to exploit opportunities, but may lack reserves to sustain operations.

A6. Conditions of particular relevance to small entities include the risk that banks and other lenders may cease to support the entity, as well as the possible loss of a principal supplier, major customer, key employee, or the right to operate under a license, franchise or other legal agreement.

Remaining Alert throughout the Audit for Audit Evidence about Events or Conditions (Ref: Para. 11)

A7. SA 315 requires the auditor to revise the auditor's risk assessment and modify the further planned audit procedures accordingly when additional audit evidence is obtained during the course of the audit that affects the auditor's assessment of risk.⁸ If events or conditions that may cast significant doubt on the entity's ability to continue as a going concern are identified after the auditor's risk assessments are made, in addition to performing the procedures in paragraph 16, the auditor's assessment of the risks of material misstatement may need to be revised. The existence of such events or conditions may also affect the nature, timing and extent of the auditor's further procedures in response to the assessed risks. SA 330⁹ establishes requirements and provides guidance on this issue.

Evaluating Management's Assessment

Management's Assessment and Supporting Analysis and the Auditor's Evaluation (Ref: Para. 12)

A8. Management's assessment of the entity's ability to continue as a going concern is a key part of the auditor's consideration of management's use of the going concern basis of accounting.

A9. It is not the auditor's responsibility to rectify the lack of analysis by management. In some circumstances, however, the lack of detailed analysis by management to support its assessment may not prevent the auditor from concluding whether management's use of the going concern basis of accounting is

⁸ SA 315, paragraph 31

⁹ SA 330, *The Auditor's Responses to Assessed Risks*

I.400 Auditing Pronouncements

appropriate in the circumstances. For example, when there is a history of profitable operations and a ready access to financial resources, management may make its assessment without detailed analysis. In this case, the auditor's evaluation of the appropriateness of management's assessment may be made without performing detailed evaluation procedures if the auditor's other audit procedures are sufficient to enable the auditor to conclude whether management's use of the going concern basis of accounting in the preparation of the financial statements is appropriate in the circumstances.

A10. In other circumstances, evaluating management's assessment of the entity's ability to continue as a going concern, as required by paragraph 12, may include an evaluation of the process management followed to make its assessment, the assumptions on which the assessment is based and management's plans for future action and whether management's plans are feasible in the circumstances.

The Period of Management's Assessment (Ref: Para. 13)

A11. Most financial reporting frameworks requiring an explicit management assessment specify the period for which management is required to take into account all available information.

Considerations Specific to Smaller Entities (Ref: Para. 12–13)

A12. In many cases, the management of smaller entities may not have prepared a detailed assessment of the entity's ability to continue as a going concern, but instead may rely on in-depth knowledge of the business and anticipated future prospects. Nevertheless, in accordance with the requirements of this SA, the auditor needs to evaluate management's assessment of the entity's ability to continue as a going concern. For smaller entities, it may be appropriate to discuss the medium and long-term financing of the entity with management, provided that management's contentions can be corroborated by sufficient documentary evidence and are not inconsistent with the auditor's understanding of the entity. Therefore, the requirement in paragraph 13 for the auditor to request management to extend its assessment may, for example, be satisfied by discussion, inquiry and inspection of supporting documentation, for example, orders received for future supply, evaluated as to their feasibility or otherwise substantiated.

A13. Continued support by owner-managers is often important to smaller entities' ability to continue as a going concern. Where a small entity is largely financed by a loan from the owner-manager, it may be important that these funds are not withdrawn. For example, the continuance of a small entity in financial difficulty may be dependent on the owner-manager subordinating a loan to the entity in favor of banks or other creditors, or the owner-manager supporting a loan for the entity by providing a guarantee with his or her personal assets as collateral. In such circumstances, the auditor may obtain appropriate documentary evidence of the subordination of the owner-manager's loan or of the guarantee. Where an entity is dependent on additional support from the owner-manager, the auditor may evaluate the owner-manager's ability to meet the obligation under the support arrangement. In addition, the auditor may request written confirmation of the terms and conditions attaching to such support and the owner-manager's intention or understanding.

Period beyond Management's Assessment (Ref: Para. 15)

A14. As required by paragraph 11, the auditor remains alert to the possibility that there may be known events, scheduled or otherwise, or conditions that will occur beyond the period of assessment used by management that may bring into question the appropriateness of management's use of the going concern basis of accounting in preparing the financial statements. Since the degree of uncertainty associated with the outcome of an event or condition increases as the event or condition is further into the future, in considering events or conditions further in the future, the indications of going concern issues need to be significant before the auditor needs to consider taking further action. If such events or conditions are identified, the auditor may need to request management to evaluate the potential significance of the event or condition on its assessment of the entity's ability to continue as a going concern. In these circumstances, the procedures in

paragraph 16 apply.

A15. Other than inquiry of management, the auditor does not have a responsibility to perform any other audit procedures to identify events or conditions that may cast significant doubt on the entity's ability to continue as a going concern beyond the period assessed by management, which, as discussed in paragraph 13, would be at least twelve months from the date of the financial statements.

Additional Audit Procedures When Events or Conditions Are Identified (Ref: Para.16)

A16. Audit procedures that are relevant to the requirement in paragraph 16 may include the following:

- Analyzing and discussing cash flow, profit and other relevant forecasts with management.
- Analyzing and discussing the entity's latest available interim financial statements.
- Reading the terms of debentures and loan agreements and determining whether any have been breached.
- Reading minutes of the meetings of shareholders, those charged with governance and relevant committees for reference to financing difficulties.
- Inquiring of the entity's legal counsel regarding the existence of litigation and claims and the reasonableness of management's assessments of their outcome and the estimate of their financial implications.
- Confirming the existence, legality and enforceability of arrangements to provide or maintain financial support with related and third parties and assessing the financial ability of such parties to provide additional funds.
- Evaluating the entity's plans to deal with unfilled customer orders.
- Performing audit procedures regarding subsequent events to identify those that either mitigate or otherwise affect the entity's ability to continue as a going concern.
- Confirming the existence, terms and adequacy of borrowing facilities.
- Obtaining and reviewing reports of regulatory actions.
- Determining the adequacy of support for any planned disposals of assets.

Evaluating Management's Plans for Future Actions (Ref: Para. 16(b))

A17. Evaluating management's plans for future actions may include inquiries of management as to its plans for future action, including, for example, its plans to liquidate assets, borrow money or restructure debt, reduce or delay expenditures, or increase capital.

The Period of Management's Assessment (Ref: Para. 16(c))

A18. In addition to the procedures required in paragraph 16(c), the auditor may compare:

- The prospective financial information for recent prior periods with historical results; and
- The prospective financial information for the current period with results achieved to date.

A19. Where management's assumptions include continued support by third parties, whether through the subordination of loans, commitments to maintain or provide additional funding, or guarantees, and such support is important to an entity's ability to continue as a going concern, the auditor may need to consider requesting written confirmation (including of terms and conditions) from those third parties and to obtain evidence of their ability to provide such support.

Written Representations (Ref: Para. 16(e))

A20. The auditor may consider it appropriate to obtain specific written representations beyond those

I.402 Auditing Pronouncements

required in paragraph 16 in support of audit evidence obtained regarding management's plans for future actions in relation to its going concern assessment and the feasibility of those plans.

Auditor Conclusions

Material Uncertainty Related to Events or Conditions that May Cast Significant Doubt on the Entity's Ability to Continue as a Going Concern (Ref: Para. 18-19)

A21. The phrase "material uncertainty" means the uncertainties related to events or conditions which may cast significant doubt on the entity's ability to continue as a going concern that should be disclosed in the financial statements. In some other financial reporting frameworks the phrase "significant uncertainty" is used in similar circumstances.

Adequacy of Disclosure when Events or Conditions Have Been Identified and a Material Uncertainty Exists

A22. Paragraph 18 explains that a material uncertainty exists when the magnitude of the potential impact of the events or conditions and the likelihood of occurrence is such that appropriate disclosure is necessary to achieve fair presentation (for fair presentation frameworks) or for the financial statements not to be misleading (for compliance frameworks). The auditor is required by paragraph 18 to conclude whether such a material uncertainty exists regardless of whether or how the applicable financial reporting framework defines a material uncertainty.

A23. Paragraph 19 requires the auditor to determine whether the financial statement disclosures address the matters set forth in that paragraph. This determination is in addition to the auditor determining whether disclosures about a material uncertainty, required by the applicable financial reporting framework, are adequate. Disclosures required by some financial reporting frameworks that are in addition to matters set forth in paragraph 19 may include disclosures about:

- Management's evaluation of the significance of the events or conditions relating to the entity's ability to meet its obligations; or
- Significant judgments made by management as part of its assessment of the entity's ability to continue as a going concern.

Some financial reporting frameworks may provide additional guidance regarding management's consideration of disclosures about the magnitude of the potential impact of the principal events or conditions, and the likelihood and timing of their occurrence.

Adequacy of Disclosures When Events or Conditions Have Been Identified but No Material Uncertainty Exists (Ref: Para. 20)

A24. Even when no material uncertainty exists, paragraph 20 requires the auditor to evaluate whether, in view of the requirements of the applicable financial reporting framework, the financial statements provide adequate disclosure about events or conditions that may cast significant doubt on the entity's ability to continue as a going concern. Some financial reporting frameworks may address disclosures about:

- Principal events or conditions;
- Management's evaluation of the significance of those events or conditions in relation to the entity's ability to meet its obligations;
- Management's plans that mitigate the effect of these events or conditions; or
- Significant judgments made by management as part of its assessment of the entity's ability to continue as a going concern.

A25. When the financial statements are prepared in accordance with a fair presentation framework, the auditor's evaluation as to whether the financial statements achieve fair presentation includes the

consideration of the overall presentation, structure and content of the financial statements, and whether the financial statements, including the related notes, represent the underlying transactions and events in a manner that achieves fair presentation.¹⁰ Depending on the facts and circumstances, the auditor may determine that additional disclosures are necessary to achieve fair presentation. This may be the case, for example, when events or conditions have been identified that may cast significant doubt on the entity's ability to continue as a going concern but, based on the audit evidence obtained, the auditor concludes that no material uncertainty exists, and no disclosures are explicitly required by the applicable financial reporting framework regarding these circumstances.

Implications for the Auditor's Report

Use of Going Concern Basis of Accounting is Inappropriate (Ref: Para. 21)

A26. If the financial statements have been prepared using the going concern basis of accounting but, in the auditor's judgment, management's use of the going concern basis of accounting in the financial statements is inappropriate, the requirement in paragraph 21 for the auditor to express an adverse opinion applies regardless of whether or not the financial statements include disclosure of the inappropriateness of management's use of the going concern basis of accounting.

A27. When the use of the going concern basis of accounting is not appropriate in the circumstances, management may be required, or may elect, to prepare the financial statements on another basis (e.g., liquidation basis). The auditor may be able to perform an audit of those financial statements provided that the auditor determines that the other basis of accounting is acceptable in the circumstances. The auditor may be able to express an unmodified opinion on those financial statements, provided there is adequate disclosure therein about the basis of accounting on which the financial statements are prepared, but may consider it appropriate or necessary to include an Emphasis of Matter paragraph in accordance with SA 706 (Revised)¹¹ in the auditor's report to draw the user's attention to that alternative basis of accounting and the reasons for its use.

Use of the Going Concern Basis of Accounting Is Appropriate but a Material Uncertainty Exists (Ref: Para. 22-23)

A28. The identification of a material uncertainty is a matter that is important to users' understanding of the financial statements. The use of a separate section with a heading that includes reference to the fact that a material uncertainty related to going concern exists alerts users to this circumstance.

A29. The Appendix to this SA provides illustrations of the statements that are required to be included in the auditor's report on the financial statements when "the Accounting Principles generally accepted in India" is the applicable financial reporting framework. If an applicable financial reporting framework other than above-mentioned framework is used, the illustrative statements presented in the Appendix to this SA may need to be adapted to reflect the application of the other financial reporting framework in the circumstances.

A30. Paragraph 22 establishes the minimum information required to be presented in the auditor's report in each of the circumstances described. The auditor may provide additional information to supplement the required statements, for example to explain:

- That the existence of a material uncertainty is fundamental to users' understanding of the financial statements;¹² or

¹⁰ SA 700 (Revised), *Forming an Opinion and Reporting on Financial Statements*, paragraph 14

¹¹ SA 706 (Revised), *Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report*

¹² SA 706(Revised), paragraph A2

I.404 Auditing Pronouncements

- How the matter was addressed in the audit. (Ref: Para. A1)

Adequate Disclosure of a Material Uncertainty Is Made in the Financial Statements (Ref: Para. 22)

A31. Illustration 1 of the Appendix to this SA is an example of an auditor's report when the auditor has obtained sufficient appropriate audit evidence regarding the appropriateness of management's use of the going concern basis of accounting but a material uncertainty exists and disclosure is adequate in the financial statements. The Appendix of SA 700 (Revised) also includes illustrative wording to be included in the auditor's report for all entities in relation to going concern to describe the respective responsibilities of those responsible for the financial statements and the auditor in relation to going concern.

Adequate Disclosure of a Material Uncertainty is Not Made in the Financial Statements (Ref: Para. 23)

A32. Illustrations 2 and 3 of the Appendix to this SA are examples of auditor's reports containing qualified and adverse opinions, respectively, when the auditor has obtained sufficient appropriate audit evidence regarding the appropriateness of the management's use of the going concern basis of accounting but adequate disclosure of a material uncertainty is not made in the financial statements.

A33. In situations involving multiple uncertainties that are significant to the financial statements as a whole, the auditor may consider it appropriate in extremely rare cases to express a disclaimer of opinion instead of including the statements required by paragraph 22. SA 705 (Revised) provides guidance on this issue.¹³

Communication with Regulators (Ref: Para. 22–23)

A34. When the auditor of a regulated entity considers that it may be necessary to include a reference to going concern matters in the auditor's report, the auditor may have a duty to communicate with the applicable regulatory, enforcement or supervisory authorities.

Management Unwilling to Make or Extend Its Assessment (Ref: Para. 24)

A35. In certain circumstances, the auditor may believe it necessary to request management to make or extend its assessment. If management is unwilling to do so, a qualified opinion or a disclaimer of opinion in the auditor's report may be appropriate, because it may not be possible for the auditor to obtain sufficient appropriate audit evidence regarding management's use of the going concern basis of accounting in the preparation of the financial statements, such as audit evidence regarding the existence of plans management has put in place or the existence of other mitigating factors.

Appendix

(Ref: Para. A29, A31–A32)

Illustrations of Auditor's Reports Relating to Going Concern

- Illustration 1: An auditor's report containing an unmodified opinion when the auditor has concluded that a material uncertainty exists and disclosure in the financial statements is adequate.
- Illustration 2: An auditor's report containing a qualified opinion when the auditor has concluded that a material uncertainty exists and that the financial statements are materially misstated due to inadequate disclosure.
- Illustration 3: An auditor's report containing an adverse opinion when the auditor has concluded that a material uncertainty exists and the financial statements omit the required disclosures relating to a material uncertainty.

¹³ SA 705(Revised), paragraph 10

Illustration 1 – Unmodified Opinion When a Material Uncertainty Exists and Disclosure in the Financial Statements Is Adequate

For purposes of this illustrative auditor's report, the following circumstances are assumed:

- Audit of a complete set of financial statements of a listed company (registered under the Companies Act, 2013) using a fair presentation framework. The audit is not a group audit (i.e., SA 600 does not apply).
- The financial statements are prepared by management of the entity in accordance with the accounting Standards prescribed under section 133 of the Companies Act, 2013.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in SA 210.14
- The auditor has concluded an unmodified (i.e., "clean") opinion is appropriate based on the audit evidence obtained.
- The relevant ethical requirements that apply to the audit are those of the jurisdiction.
- Based on the audit evidence obtained, the auditor has concluded that a material uncertainty exists related to events or conditions that may cast significant doubt on the entity's ability to continue as a going concern. The disclosure of the material uncertainty in the financial statements is adequate.
- Key audit matters have been communicated in accordance with SA 701.
- Those responsible for oversight of the financial statements differ from those responsible for the preparation of the financial statements.
- In addition to the audit of the financial statements, the auditor has other reporting responsibilities required under the Companies Act, 2013.

INDEPENDENT AUDITOR'S REPORT

To the Members of ABC Company Limited

Report on the Audit of the Standalone Financial Statements¹⁵**Opinion**

We have audited the standalone financial statements of ABC Company Limited ("the Company"), which comprise the balance sheet as at 31st March 20XX, and the statement of Profit and Loss, (*statement of changes in equity*)¹⁶ and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information [in which are included the Returns for the year ended on that date audited by the branch auditors of the Company's branches located at (location of branches)]¹⁷.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 20XX, and profit/loss, (*changes in equity*)¹⁸ and its cash flows for the year ended on that date.

Basis for Opinion

¹⁴ SA 210, *Agreeing the Terms of Audit Engagements*

¹⁵ The sub-title "Report on the Audit of the Standalone Financial Statements" is unnecessary in circumstances when the second sub-title "Report on Other Legal and Regulatory Requirements" is not applicable.

¹⁶ Where applicable.

¹⁷ Where applicable.

¹⁸ Where applicable

I.406 Auditing Pronouncements

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the *Code of Ethics* issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material Uncertainty Related to Going Concern

We draw attention to Note XX in the financial statements, which indicates that the Company incurred a net loss of ZZZ during the year ended December 31, 20X1 and, as of that date, the Company's current liabilities exceeded its total assets by YYY. As stated in Note 6, these events or conditions, along with other matters as set forth in Note XX, indicate that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. In addition to the matter described in the *Material Uncertainty Related to Going Concern* section, we have determined the matters described below to be the key audit matters to be communicated in our report.

[Description of each key audit matter in accordance with SA 701.]

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Illustration 2 – Qualified Opinion When a Material Uncertainty Exists and the Financial Statements Are Materially Misstated Due to Inadequate Disclosure

For purposes of this illustrative auditor's report, the following circumstances are assumed:

- Audit of a complete set of financial statements of a listed company using a fair presentation framework. The audit is not a group audit (i.e., SA 600 does not apply).
- The financial statements are prepared by management of the entity in accordance with the accounting Standards prescribed under section 133 of the Companies Act, 2013.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in SA 210.
- The relevant ethical requirements that apply to the audit are those of the jurisdiction.
- Based on the audit evidence obtained, the auditor has concluded that a material uncertainty exists related to events or conditions that may cast significant doubt on the entity's ability to continue as a going concern. Note YY to the financial statements discusses the magnitude of financing arrangements, the expiration and the total financing arrangements; however the financial statements do not include discussion on the impact or the availability of refinancing or characterize this situation as a material uncertainty.
- The financial statements are materially misstated due to the inadequate disclosure of the material uncertainty. A qualified opinion is being expressed because the auditor concluded that the effects on the financial statements of this inadequate disclosure are material but not pervasive to the financial statements.
- Key audit matters have been communicated in accordance with SA 701.
- Those responsible for oversight of the financial statements differ from those responsible for the preparation of the financial statements.
- In addition to the audit of the financial statements, the auditor has other reporting responsibilities required under the Companies Act, 2013.

INDEPENDENT AUDITOR'S REPORT

To the Members of ABC Company Limited

Report on the Audit of the Standalone Financial Statements²¹

Qualified Opinion

We have audited the standalone financial statements of ABC Company Limited ("the Company"), which comprise the balance sheet as at 31st March 20XX, and the statement of Profit and Loss, (*statement of changes in equity*)²² and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information [in which are included the Returns for the year ended on that date audited by the branch auditors of the Company's branches located at (location of branches)]²³.

In our opinion and to the best of our information and according to the explanations given to us, except for the incomplete disclosure of the information referred to in the Basis for Qualified Opinion section of our report, the aforesaid standalone financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India,

²¹ The sub-title "Report on the Audit of the Standalone Financial Statements" is unnecessary in circumstances when the second sub-title "Report on Other Legal and Regulatory Requirements" is not applicable.

²² Where applicable.

²³ Where applicable.

I.408 Auditing Pronouncements

of the state of affairs of the Company as at March 31, 20XX, and profit/loss, (*changes in equity*)²⁴ and its cash flows for the year ended on that date.

Basis for Qualified Opinion

As discussed in Note YY, the Company's financing arrangements expire and amounts outstanding are payable on April 30, 20X2. The Company has been unable to conclude re-negotiations or obtain replacement financing. This situation indicates that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. The financial statements do not adequately disclose this matter.

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the *Code of Ethics* issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. In addition to the matter described in the *Basis for Qualified Opinion* section, we have determined the matters described below to be the key audit matters to be communicated in our report.

Illustration 3 – Adverse Opinion When a Material Uncertainty Exists and Is Not Disclosed in the Financial Statements

For purposes of the illustrative auditor's report, the following circumstances are assumed:

- Audit of a complete set of financial statements of a non corporate entity using a fair presentation framework. The audit is not a group audit (i.e., SA 600 does not apply).
- The financial statements are prepared by management of the entity in accordance with the Accounting Standards issued by the Institute of Chartered Accountants of India.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in SA 210.
- The relevant ethical requirements that apply to the audit are those of the jurisdiction.
- Based on the audit evidence obtained, the auditor has concluded that a material uncertainty exists related to events or conditions that may cast significant doubt on the entity's ability to continue as a going concern, and the entity is considering bankruptcy. The financial statements omit the required disclosures relating to the material uncertainty. An adverse opinion is being expressed because the effects on the financial statements of such omission are material and pervasive.
- The auditor is not required, and has otherwise not decided, to communicate key audit matters in accordance with SA 701.
- Those responsible for oversight of the financial statements differ from those responsible for the preparation of the financial statements.
- In addition to the audit of the financial statements, the auditor has other reporting responsibilities required under local law.

INDEPENDENT AUDITOR'S REPORT

To the Partners of ABC & Associates [or Other Appropriate Addressee]

Report on the Audit of the Financial Statements²⁷**Adverse Opinion**

We have audited the financial statements of ABC & Associates (the entity), which comprise the balance sheet at March 31st 20XX, and the profit and loss account, (*and statement of cash flows*)²⁸ for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, because of the omission of the information mentioned in the *Basis for Adverse Opinion* section of our report, the accompanying financial statements do not present fairly (*or do not give a true and fair view of*), the financial position of the entity as at March 31, 20X1, and of its financial performance and its cash flows for the year then ended in accordance with the Accounting Standards issued by the Institute of Chartered Accountants of India.

Basis for Adverse Opinion

The entity's financing arrangements expired and the amount outstanding was payable on March 31, 20X1. The entity has been unable to conclude re-negotiations or obtain replacement financing and is considering filing for bankruptcy. This situation indicates that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. The financial statements do not adequately disclose this fact.

²⁷ The sub-title "Report on the Audit of the Financial Statements" is unnecessary in circumstances when the second sub-title "Report on Other Legal and Regulatory Requirements" is not applicable.

²⁸ Where applicable.

I.410 Auditing Pronouncements

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) issued by ICAI. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the entity in accordance with the ethical requirements that are relevant to our audit of the financial statements in [jurisdiction], and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

SA 580*

Written Representations
***(Effective for audits of financial statements
for periods beginning on or after April 1, 2009)***

Introduction

Scope of this SA

1. This Standard on Auditing (SA) deals with the auditor's responsibility to obtain written representations from management and, where appropriate, those charged with governance.

Written Representations as Audit Evidence

2. Audit evidence is all the information used by the auditor in arriving at the conclusions on which the audit opinion is based.¹ Written representations are necessary information that the auditor requires in connection with the audit of the entity's financial statements. Accordingly, similar to responses to inquiries, written representations are audit evidence. (*Ref: Para. A1*)
3. Although written representations provide necessary audit evidence, they do not provide sufficient appropriate audit evidence on their own about any of the matters with which they deal. Furthermore, the fact that management has provided reliable written representations does not affect the nature or extent of other audit evidence that the auditor obtains about the fulfillment of management's responsibilities, or about specific assertions.

Effective Date

4. This SA is effective for audits of financial statements for periods beginning on or after 1st April, 2009.

Objectives

5. The objectives of the auditor are:
 - (a) To obtain written representations from management and, where appropriate, those charged with governance that they believe that they have fulfilled their responsibility for the preparation of the financial statements and for the completeness of the information provided to the auditor;
 - (b) To support other audit evidence relevant to the financial statements or specific assertions in the financial statements by means of written representations, if determined necessary by the auditor or required by other SAs; and
 - (c) To respond appropriately to written representations provided by management and, where appropriate, those charged with governance, or if management or, where appropriate, those charged with governance do not provide the written representations requested by the auditor.

Definition

6. For purposes of the SAs, the following term has the meaning attributed below:

* Published in October, 2008 issue of the Journal.

¹ SA 500, "Audit Evidence", paragraph 5 (c).

I.412 Auditing Pronouncements

Written representations – A written statement by management provided to the auditor to confirm certain matters or to support other audit evidence. Written representations in this context do not include financial statements, the assertions therein, or supporting books and records.

7. For purposes of this SA, references to “management” should be read as “management and, where appropriate, those charged with governance.” Furthermore, in the case of a fair presentation framework, management is responsible for the preparation and *fair* presentation of the financial statements in accordance with the applicable financial reporting framework; or the preparation of financial statements *that give a true and fair view* in accordance with the applicable financial reporting framework.

Requirements

Management from Whom Written Representations Requested

8. The auditor shall request written representations from management with appropriate responsibilities for the financial statements and knowledge of the matters concerned. (Ref: Para. A2-A6)

Written Representations about Management’s Responsibilities

Preparation of the Financial Statements

9. The auditor shall request management to provide a written representation that it has fulfilled its responsibility for the preparation of the financial statements in accordance with the applicable financial reporting framework, including where relevant their fair presentation, as set out in the terms of the audit engagement.² (Ref: Para. A7-A9, A14, A22)

Information Provided and Completeness of Transactions

10. The auditor shall request management to provide a written representation that:
 - (a) It has provided the auditor with all relevant information and access as agreed in the terms of the audit engagement,³ and
 - (b) All transactions have been recorded and are reflected in the financial statements. (Ref: Para. A7-A9, A14, A22)

Description of Management’s Responsibilities in the Written Representations

11. Management’s responsibilities shall be described in the written representations required by paragraphs 9 and 10 in the manner in which these responsibilities are described in the terms of the audit engagement.

Other Written Representations

12. Other SAs require the auditor to request written representations. If, in addition to such required representations, the auditor determines that it is necessary to obtain one or more written representations to support other audit evidence relevant to the financial statements or one or more specific assertions in the financial statements, the auditor shall request such other written representations. (Ref: Para. A10-A13, A14, A22)

Date of and Period(s) Covered by Written Representations

13. The date of the written representations shall be as near as practicable to, but not after, the date of the auditor’s report on the financial statements. The written representations shall be for all financial statements and period(s) referred to in the auditor’s report. (Ref: Para. A15-A18)

² SA 210, “Agreeing the Terms of Audit Engagements,” paragraph 6(b)(i)

³ SA 210, “Agreeing the Terms of Audit Engagements,” paragraph 6(b)(iii).

Form of Written Representations

14. The written representations shall be in the form of a representation letter addressed to the auditor. If law or regulation requires management to make written public statements about its responsibilities, and the auditor determines that such statements provide some or all of the representations required by paragraphs 9 or 10, the relevant matters covered by such statements need not be included in the representation letter. (Ref: Para. A19-A21)

Doubt as to the Reliability of Written Representations and Requested Written Representations Not Provided

Doubt as to the Reliability of Written Representations

15. If the auditor has concerns about the competence, integrity, ethical values or diligence of management, or about its commitment to or enforcement of these, the auditor shall determine the effect that such concerns may have on the reliability of representations (oral or written) and audit evidence in general. (Ref: Para. A24-A25)
16. In particular, if written representations are inconsistent with other audit evidence, the auditor shall perform audit procedures to attempt to resolve the matter. If the matter remains unresolved, the auditor shall reconsider the assessment of the competence, integrity, ethical values or diligence of management, or of its commitment to or enforcement of these, and shall determine the effect that this may have on the reliability of representations (oral or written) and audit evidence in general. (Ref: Para. A23)
17. If the auditor concludes that the written representations are not reliable, the auditor shall take appropriate actions, including determining the possible effect on the opinion in the auditor's report in accordance with SA 705⁴, having regard to the requirement in paragraph 19 of this SA.

Requested Written Representations Not Provided

18. If management does not provide one or more of the requested written representations, the auditor shall:
- (a) Discuss the matter with management;
 - (b) Re-evaluate the integrity of management and evaluate the effect that this may have on the reliability of representations (oral or written) and audit evidence in general; and
 - (c) Take appropriate actions, including determining the possible effect on the opinion in the auditor's report in accordance with SA 705, having regard to the requirement in paragraph 19 of this SA.

Written Representations about Management's Responsibilities

19. The auditor shall disclaim an opinion on the financial statements in accordance with SA 705 if: (Ref: Para. A26-A27)
- (a) The auditor concludes that there is sufficient doubt about the integrity of management such that the written representations required by paragraphs 9 and 10 are not reliable; or
 - (b) Management does not provide the written representations required by paragraphs 9 and 10.

Application and Other Explanatory Material

Written Representations as Audit Evidence (Ref: Para. 2)

- A1. Written representations are an important source of audit evidence. If management modifies or does not provide the requested written representations, it may alert the auditor to the possibility that one or more

⁴ SA 705, "Modifications to the Opinion in the Independent Auditor's Report".

I.414 Auditing Pronouncements

significant issues may exist. Further, a request for written, rather than oral, representations in many cases may prompt management to consider such matters more rigorously, thereby enhancing the quality of the representations.

Management from Whom Written Representations Requested (Ref: Para. 8)

- A2. Written representations are requested from those responsible for the preparation and presentation of the financial statements. Those individuals may vary depending on the governance structure of the entity, and relevant law or regulation; however, management (rather than those charged with governance) is often the responsible party. Written representations may therefore be requested from the entity's chief executive officer and chief financial officer, or other equivalent persons in entities that do not use such titles. In some circumstances, however, other parties, such as those charged with governance, are also responsible for the preparation and presentation of the financial statements.
- A3. Due to its responsibility for the preparation and presentation of the financial statements, and its responsibilities for the conduct of the entity's business, management would be expected to have sufficient knowledge of the process followed by the entity in preparing and presenting the financial statements and the assertions therein on which to base the written representations.
- A4. In some cases, however, management may decide to make inquiries of others who participate in preparing and presenting the financial statements and assertions therein, including individuals who have specialized knowledge relating to the matters about which written representations are requested. Such individuals may include:
- An actuary responsible for actuarially determined accounting measurements.
 - Staff engineers who may have responsibility for and specialized knowledge about environmental liability measurements.
 - Internal counsel who may provide information essential to provisions for legal claims.
- A5. In some cases, management may include in the written representations qualifying language to the effect that representations are made to the best of its knowledge and belief. It is reasonable for the auditor to accept such wording if the auditor is satisfied that the representations are being made by those with appropriate responsibilities and knowledge of the matters included in the representations.
- A6. To reinforce the need for management to make informed representations, the auditor may request that management include in the written representations, confirmation that it has made such inquiries as it considered appropriate to place it in the position to be able to make the requested written representations. It is not expected that such inquiries would usually require a formal internal process beyond those already established by the entity.

Written Representations about Management's Responsibilities (Ref: Para. 9-10)

- A7. Audit evidence obtained during the audit that management has fulfilled the responsibilities referred to in paragraphs 10 and 11 is not sufficient without obtaining confirmation from management that it believes that it has fulfilled those responsibilities. This is because the auditor is not able to judge solely on other audit evidence whether management has prepared and presented the financial statements and provided information to the auditor on the basis of the agreed acknowledgement and understanding of its responsibilities. For example, the auditor could not conclude that management has provided the auditor with all relevant information agreed in the terms of the audit engagement without asking it whether, and receiving confirmation that, such information has been provided.
- A8. The written representations required by paragraphs 9 and 10 draw on the agreed acknowledgement and understanding of management of its responsibilities in the terms of the audit engagement by

requesting confirmation that it has fulfilled them. The auditor may also ask management to reconfirm its acknowledgement and understanding of those responsibilities in written representations. This is particularly appropriate when:

- Those who signed the terms of the audit engagement on behalf of the entity no longer have the relevant responsibilities;
- The terms of the audit engagement were prepared in a previous year;
- There is any indication that management misunderstands those responsibilities; or
- Changes in circumstances make it appropriate to do so.

Consistent with the requirement of SA 210,⁵ such reconfirmation of management's acknowledgement and understanding of its responsibilities is not made subject to the best of management's knowledge and belief (as discussed in paragraph A5 of this SA).

A9. The mandates for audits of the financial statements of certain entities may be broader than those of other entities. As a result, the premise, relating to management's responsibilities, on which an audit of the financial statements of such an entity is conducted may give rise to additional written representations. These may include written representations confirming that transactions and events have been carried out in accordance with legislation or proper authority.

Other Written Representations (Ref: Para. 12)

Additional Written Representations about the Financial Statements

A10. In addition to the written representation required by paragraph 9, the auditor may consider it necessary to request other written representations about the financial statements. Such written representations may supplement, but do not form part of, the written representation required by paragraph 9. They may include representations about the following:

- Whether the selection and application of accounting policies are appropriate; and
- Whether matters such as the following, where relevant under the applicable financial reporting framework, have been recognized, measured, presented or disclosed in accordance with that framework:
 - Plans or intentions that may affect the carrying value or classification of assets and liabilities;
 - Liabilities, both actual and contingent;
 - Title to, or control over, assets, the liens or encumbrances on assets, and assets pledged as collateral; and
 - Aspects of laws, regulations and contractual agreements that may affect the financial statements, including non-compliance.

Additional Written Representations about Information Provided to the Auditor

A11. In addition to the written representation required by paragraph 10, the auditor may consider it necessary to request management to provide a written representation that it has communicated to the auditor all deficiencies in internal control of which management is aware.

⁵ SA 210, "Agreeing the Terms of Audit Engagements," paragraph 6(b).

I.416 Auditing Pronouncements

Written Representations about Specific Assertions

A12. When obtaining evidence about, or evaluating, judgments and intentions, the auditor may consider one or more of the following:

- The entity's past history in carrying out its stated intentions.
- The entity's reasons for choosing a particular course of action.
- The entity's ability to pursue a specific course of action.
- The existence or lack of any other information that might have been obtained during the course of the audit that may be inconsistent with management's judgment or intent.

A13. In addition, the auditor may consider it necessary to request management to provide written representations about specific assertions in the financial statements; in particular, to support an understanding that the auditor has obtained from other audit evidence of management's judgment or intent in relation to, or the completeness of, a specific assertion. For example, if the intent of management is important to the valuation basis for investments, it may not be possible to obtain sufficient appropriate audit evidence without a written representation from management about its intentions. Although such written representations provide necessary audit evidence, they do not provide sufficient appropriate audit evidence on their own for that assertion.

Communicating a Threshold Amount (Ref: Para. 9-10, 12)

A14. SA 450⁶ requires the auditor to accumulate misstatements identified during the audit, other than those that are clearly trivial. The auditor may determine a threshold above which misstatements cannot be regarded as clearly trivial. In the same way, the auditor may consider communicating to management a threshold for purposes of the requested written representations.

Date of and Period(s) Covered by Written Representations (Ref: Para. 13)

A15. Because written representations are necessary audit evidence, the auditor's opinion cannot be expressed, and the auditor's report cannot be dated, before the date of the written representations. Furthermore, because the auditor is concerned with events occurring up to the date of the auditor's report that may require adjustment to or disclosure in the financial statements, the written representations are dated as near as practicable to, but not after, the date of the auditor's report on the financial statements.

A16. In some circumstances it may be appropriate for the auditor to obtain a written representation about a specific assertion in the financial statements during the course of the audit. Where this is the case, it may be necessary to request an updated written representation.

A17. The written representations are for all periods referred to in the auditor's report because management needs to reaffirm that the written representations it previously made with respect to the prior periods remain appropriate. The auditor and management may agree to a form of written representation that updates written representations relating to the prior periods by addressing whether there are any changes to such written representations and, if so, what they are.

A18. Situations may arise where current management were not present during all periods referred to in the auditor's report. Such persons may assert that they are not in a position to provide some or all of the written representations because they were not in place during the period. This fact, however, does not diminish such persons' responsibilities for the financial statements as a whole. Accordingly, the

⁶ SA 450, "Evaluation of Misstatements Identified during the Audit", paragraph 5.

requirement for the auditor to request from them written representations that cover the whole of the relevant period(s) still applies.

Form of Written Representations (Ref: Para. 14)

A19. Written representations are required to be included in a representation letter addressed to the auditor. Some laws or regulations may, however, require management to make a written public statement about its responsibilities. Although such statement is a representation to the users of the financial statements, or to relevant authorities, the auditor may determine that it is an appropriate form of written representation in respect of some or all of the representations required by paragraph 9 or 10. Consequently, the relevant matters covered by such statement need not be included in the representation letter. Factors that may affect the auditor's determination include:

- Whether the statement includes confirmation of the fulfillment of the responsibilities referred to in paragraphs 10 and 11.
- Whether the statement has been given or approved by those from whom the auditor requests the relevant written representations.
- Whether a copy of the statement is provided to the auditor as near as practicable to, but not after, the date of the auditor's report on the financial statements (see paragraph 13).

A20. A formal statement of compliance with law or regulation, or of approval of the financial statements, would not contain sufficient information for the auditor to be satisfied that all necessary representations have been consciously made. The expression of management's responsibilities in law or regulation is also not a substitute for the requested written representations.

A21. The Appendix to this Standard provides an illustrative example of a representation letter.

Communication with Those Charged with Governance (Ref: Para. 9-10, 12)

A22. SA 260⁷ requires the auditor to communicate with those charged with governance the written representations which the auditor has requested from management.

Doubt as to the Reliability of Written Representations and Requested Written Representations Not Provided

Doubt as to the Reliability of Written Representations (Ref: Para. 15-16)

A23. In the case of identified inconsistencies between one or more written representations and audit evidence obtained from another source, the auditor may consider whether the risk assessment remains appropriate and, if not, revise the risk assessment and determine the nature, timing and extent of further audit procedures to respond to the assessed risks.

A24. Concerns about the competence, integrity, ethical values or diligence of management, or about its commitment to or enforcement of these, may cause the auditor to conclude that the risk of management misrepresentation in the financial statements is such that an audit cannot be conducted. In such a case, the auditor may consider, where possible, withdrawing from the engagement, unless those charged with governance put in place appropriate corrective measures. Such measures, however, may not be sufficient to enable the auditor to issue an unmodified audit opinion.

A25. SA 230⁸ requires the auditor to document significant matters arising during the audit, the conclusions reached thereon, and significant professional judgments made in reaching those conclusions. The

⁷ SA 260, "Communication with Those Charged with Governance", paragraph 12(c)(ii).

⁸ SA 230, "Audit Documentation", refer paragraph 8 and 10.

I.418 Auditing Pronouncements

auditor may have identified significant issues relating to the competence, integrity, ethical values or diligence of management, or about its commitment to or enforcement of these, but concluded that the written representations are nevertheless reliable. In such a case, this significant matter is documented in accordance with SA 230.

Written Representations about Management's Responsibilities (Ref: Para. 19)

A26. As explained in paragraph A7, the auditor is not able to judge solely on other audit evidence whether management has fulfilled the responsibilities referred to in paragraphs 10 and 11. Therefore, if, as described in paragraph 19(a), the auditor concludes that the written representations about these matters are unreliable, or if management does not provide those written representations, the auditor is unable to obtain sufficient appropriate audit evidence. The possible effects on the financial statements of such inability are not confined to specific elements, accounts or items of the financial statements and are hence pervasive. SA 705 requires the auditor to disclaim an opinion on the financial statements in such circumstances.⁹

A27. A written representation that has been modified from that requested by the auditor does not necessarily mean that management did not provide the written representation. However, the underlying reason for such modification may affect the opinion in the auditor's report. For example:

- The written representation about management's fulfillment of its responsibility for the preparation and presentation of the financial statements may state that management believes that, except for material non-compliance with a particular requirement of the applicable financial reporting framework, the financial statements are prepared and presented in accordance with that framework. The requirement in paragraph 19 does not apply because the auditor concluded that management has provided reliable written representations. However, the auditor is required to consider the effect of the non-compliance on the opinion in the auditor's report in accordance with SA 705.
- The written representation about the responsibility of management to provide the auditor with all relevant information agreed in the terms of the audit engagement may state that management believes that, except for information destroyed in a fire, it has provided the auditor with such information. The requirement in paragraph 19 does not apply because the auditor concluded that management has provided reliable written representations. However, the auditor is required to consider the effects of the pervasiveness of the information destroyed in the fire on the financial statements and the effect thereof on the opinion in the auditor's report in accordance with SA 705.

Material Modifications to ISA 580, "Written Representations"

Deletions

Paragraph A9 of the Application Section of ISA 580 deals with the application of the requirements of ISA 580 to the audits of public sector entities regarding the premise, relating to management's responsibilities which may give rise to additional written representations. Since as mentioned in the *"Preface to the Standards on Quality Control, Auditing, Review, Other Assurance and Related Services"*, the Standards issued by the Auditing and Assurance Standards Board, apply equally to all entities, irrespective of their form, nature and size, a specific reference to applicability of the Standard to public sector entities has been deleted.

Since it is also possible that even in case of non public sector entities, management responsibilities may give rise to additional representations, accordingly, the spirit of erstwhile A9, highlighting the fact that in case of certain entities, the need of additional representations may arise, has been retained.

⁹ SA 705, paragraph 9.

Appendix

(Ref: Para. A23)

Illustrative Representation Letter

The following illustrative letter includes written representations that are required by this and other SAs in effect for audits of financial statements for period beginning on or after as at [date]. It is assumed in this illustration that the applicable financial reporting framework is applicable accounting standards in India; the requirement of SA 570¹⁰ to obtain a written representation is not relevant; and that there are no exceptions to the requested written representations. If there were exceptions, the representations would need to be modified to reflect the exceptions.

(Entity Letterhead)

(To Auditor)

(Date)

This representation letter is provided in connection with your audit of the financial statements of ABC Company for the year ended March 31, 20XX¹¹ for the purpose of expressing an opinion as to whether the financial statements are presented fairly, in all material respects, (or *give a true and fair view*) in accordance with the applicable accounting standards in India.

We confirm that (*to the best of our knowledge and belief, having made such inquiries as we considered necessary for the purpose of appropriately informing ourselves*):

Financial Statements

- We have fulfilled our responsibilities, as set out in the terms of the audit engagement dated [insert date], for the preparation of the financial statements in accordance with Financial Reporting Standards; in particular the financial statements are fairly presented (or *give a true and fair view*) in accordance with the applicable accounting standards in India.
- Significant assumptions used by us in making accounting estimates, including those measured at fair value, are reasonable. (SA 540)
- Related party relationships and transactions have been appropriately accounted for and disclosed in accordance with the requirements of applicable accounting standards in India. (SA 550)¹²
- All events subsequent to the date of the financial statements and for which applicable accounting standards in India require adjustment or disclosure have been adjusted or disclosed. (SA 560)
- The effects of uncorrected misstatements are immaterial, both individually and in the aggregate, to the financial statements as a whole. A list of the uncorrected misstatements is attached to the representation letter. (SA 450)
- [Any other matters that the auditor may consider appropriate (see paragraph A10 of this SA).]

Information Provided

- We have provided you with:

¹⁰ SA 570, "Going Concern".

¹¹ Where the auditor reports on more than one period, the auditor adjusts the date so that the letter pertains to all periods covered by the auditor's report.

¹² SA 550, "Related Parties".

I.420 Auditing Pronouncements

- Access to all information of which we are aware that is relevant to the preparation of the financial statements such as records, documentation and other matters;
- Additional information that you have requested from us for the purpose of the audit; and
- Unrestricted access to persons within the entity from whom you determined it necessary to obtain audit evidence.
- All transactions have been recorded in the accounting records and are reflected in the financial statements.
- We have disclosed to you the results of our assessment of the risk that the financial statements may be materially misstated as a result of fraud. (SA 240).
- We have disclosed to you all information in relation to fraud or suspected fraud that we are aware of and that affects the entity and involves:
 - Management;
 - Employees who have significant roles in internal control; or
 - Others where the fraud could have a material effect on the financial statements. (SA 240)
- We have disclosed to you all information in relation to allegations of fraud, or suspected fraud, affecting the entity's financial statements communicated by employees, former employees, analysts, regulators or others. (SA 240)
- We have disclosed to you all known instances of non-compliance or suspected non-compliance with laws and regulations whose effects should be considered when preparing financial statements. (SA 250)¹³
- We have disclosed to you the identity of the entity's related parties and all the related party relationships and transactions of which we are aware. (SA 550)¹⁴
- [Any other matters that the auditor may consider necessary (see paragraph A11 of this SA).]

SA 600

Using the Work of Another Auditor

*(Effective for all audits relating to
accounting periods beginning on or after April 1, 2002)*

Introduction

1. The Standard on Auditing (SA) 200, "Basic Principles Governing an Audit", states (paragraph 9):
"When the auditor delegates work to assistants or uses work performed by other auditors and experts, he will continue to be responsible for forming and expressing his opinion on the financial information. However, he will be entitled to rely on work performed by others, provided he exercises adequate skill and care and is not aware of any reason to believe that he should not have so relied. In the case of any independent statutory appointment to perform the work on which the auditor has to rely in forming his opinion, such as in the case of the work of branch auditors appointed under the Companies Act, 1956 the auditor's report should expressly state the fact of such reliance."
2. The purpose of this Standard on Auditing (SA) is to establish standards to be applied in situations where an auditor (referred to herein as the 'principal auditor'), reporting on the financial information of an entity, uses the work of another auditor (referred to herein as the 'other auditor') with respect to the financial information of one or more components included in the financial information of the entity. This Standard also discusses the principal auditor's responsibility in relation to his use of the work of the other auditor. In this Standard, the term 'financial information' encompasses 'financial statements'.
3. This Standard does not deal with those instances where two or more auditors are appointed as joint auditors¹ nor does it deal with the auditor's relationship with a predecessor auditor.
4. When the principal auditor concludes that the financial information of a component is immaterial, the procedures outlined in this Statement do not apply. When several components, immaterial in themselves, are together material in relation to the financial information of the entity as a whole, the procedures outlined in this Statement should be considered.
5. **When the principal auditor uses the work of another auditor, the principal auditor should determine how the work of the other auditor will affect the audit.**
6. "Principal auditor" means the auditor with responsibility for reporting on the financial information of an entity when that financial information includes the financial information of one or more components audited by another auditor.
7. "Other auditor" means an auditor, other than the principal auditor, with responsibility for reporting on the financial information of a component which is included in the financial information audited by the principal auditor.

¹ Standard on Auditing (SA) 299, "Responsibility of Joint Auditors", deals with the audit procedures to be employed where two or more auditors are appointed as joint auditors.

I.422 Auditing Pronouncements

8. "Component" means a division, branch, subsidiary, joint venture, associated enterprises or other entity whose financial information is included in the financial information audited by the principal auditor.

Acceptance as Principal Auditor

9. **The auditor should consider whether the auditor's own participation is sufficient to be able to act as the principal auditor.** For this purpose the auditor would consider:

- (a) the materiality of the portion of the financial information which the principal auditor audits;
- (b) the principal auditor's degree of knowledge regarding the business of the components;
- (c) the risk of material misstatements in the financial information of the components audited by the other auditor; and
- (d) the performance of additional procedures as set out in this SA regarding the components audited by other auditor resulting in the principal auditor having significant participation in such audit.

The Principal Auditor's Procedures

10. In certain situations, the statute governing the entity may confer a right on the principal auditor to visit a component and examine the books of account and other records of the said component, if he thinks it necessary to do so. Where another auditor has been appointed for the component, the principal auditor would normally be entitled to rely upon the work of such auditor unless there are special circumstances to make it essential for him to visit the component and/or to examine the books of account and other records of the said component.

11. **When planning to use the work of another auditor, the principal auditor should consider the professional competence of the other auditor in the context of specific assignment if the other auditor is not a member of the Institute of Chartered Accountants of India.**

12. **The principal auditor should perform procedures to obtain sufficient appropriate audit evidence, that the work of the other auditor is adequate for the principal auditor's purposes, in the context of the specific assignment.** When using the work of another auditor, the principal auditor should ordinarily perform the following procedures:

- (a) advise the other auditor of the use that is to be made of the other auditor's work and report and make sufficient arrangements for co-ordination of their efforts at the planning stage of the audit. The principal auditor would inform the other auditor of matters such as areas requiring special consideration, procedures for the identification of inter-component transactions that may require disclosure and the time-table for completion of audit; and
- (b) advise the other auditor of the significant accounting, auditing and reporting requirements and obtain representation as to compliance with them.

13. The principal auditor might discuss with the other auditor the audit procedures applied or review a written summary of the other auditor's procedures and findings which may be in the form of a completed questionnaire or check-list. The principal auditor may also wish to visit the other auditor. The nature, timing and extent of procedures will depend on the circumstances of the engagement and the principal auditor's knowledge of the professional competence of the other auditor. This knowledge may have been enhanced from the review of the previous audit work of the other auditor.

14. The principal auditor may conclude that it is not necessary to apply procedures such as those described in paragraph 13 because sufficient appropriate audit evidence previously obtained that acceptable quality control policies and procedures are complied with in the conduct of other auditor's practice.

15. The principal auditor should consider the significant findings of the other auditor.

16. The principal auditor may consider it appropriate to discuss with the other auditor and the management of the component, the audit findings or other matters affecting the financial information of the components. He may also decide that supplemental tests of the records or the financial statements of the component are necessary. Such tests may, depending upon the circumstances, be performed by the principal auditor or the other auditor.

17. In certain circumstances, the other auditor may happen to be a person other than a professionally qualified auditor. This may happen, for instance, where a component is situated in a foreign country and the applicable laws permit a person other than a professionally qualified auditor to audit the financial statements of such component. In such circumstances, the procedures outlined in paragraphs 10 to 16 assume added importance.

18. The principal auditor should document in his working papers the components whose financial information was audited by other auditors; their significance to the financial information of the entity as a whole; the names of the other auditors; and any conclusions reached that individual components are not material. The principal auditor should also document the procedures performed and the conclusions reached. For example, the auditor would document the results of discussions with the other auditor and review of the written summary of the other auditor's procedures. However, the principal auditor need not document the reasons for limiting the procedures in the circumstances described at 14 above, provided those reasons are summarised elsewhere in the documentation maintained by the principal auditor. Where the other auditor's report is other than unmodified², the principal auditor should also document how he has dealt with the qualifications or adverse remarks contained in the other auditor's report in framing his own report.

Co-ordination Between Auditors

19. **There should be sufficient liaison between the principal auditor and the other auditor.** For this purpose, the principal auditor may find it necessary to issue written communication(s) to the other auditor.

20. **The other auditor, knowing the context in which his work is to be used by the principal auditor, should co-ordinate with the principal auditor.** For example, by bringing to the principal auditor's immediate attention any significant findings requiring to be dealt with at entity level, adhering to the time-table for audit of the component, etc. He should ensure compliance with the relevant statutory requirements. Similarly, the principal auditor should advise the other auditor of any matters that come to his attention that he thinks may have an important bearing on the other auditor's work.

21. When considered necessary by him, the principal auditor may require the other auditor to answer a detailed questionnaire regarding matters on which the principal auditor requires information for discharging his duties. The other auditor should respond to such questionnaire on a timely basis.

² Standard on Auditing (SA) 700, "The Auditor's Report on Financial Statements", deals with the concept of "modified audit report". An auditor's report is considered to be modified when it includes:

"Matters that do not affect the auditor's opinion

(a) emphasis of matter

Matters that do affect the auditor's opinion

(a) qualified opinion,

(b) disclaimer of opinion, or

(c) adverse opinion".

Reporting Considerations

22. **When the principal auditor concludes, based on his procedures, that the work of the other auditor cannot be used and the principal auditor has not been able to perform sufficient additional procedures regarding the financial information of the component audited by the other auditor, the principal auditor should express a qualified opinion or disclaimer of opinion because there is a limitation on the scope of audit.**

23. In all circumstances, if the other auditor issues, or intends to issue, a modified auditor's report, the principal auditor should consider whether the subject of the modification is of such nature and significance, in relation to the financial information of the entity on which the principal auditor is reporting that it requires a modification of the principal auditor's report.

Division of Responsibility

24. The principal auditor would not be responsible in respect of the work entrusted to the other auditors, except in circumstances which should have aroused his suspicion about the reliability of the work performed by the other auditors.

25. **When the principal auditor has to base his opinion on the financial information of the entity as a whole relying upon the statements and reports of the other auditors, his report should state clearly the division of responsibility for the financial information of the entity by indicating the extent to which the financial information of components audited by the other auditors have been included in the financial information of the entity, e.g., the number of divisions/branches/subsidiaries or other components audited by other auditors.**

Effective Date

26. This Standard on Auditing becomes operative for all audits relating to accounting periods beginning on or after April 1, 2002.

Compatibility with International Standard on Auditing (ISA) 600

The auditing standards established in this Standard on Auditing (SA) are generally consistent, in all material respects, with those set out in ISA 600 "Using the Work of Another Auditor".

SA 610*

Using the Work of Internal Auditors
*(Effective for all audits relating to
accounting periods beginning on or after April 1, 2016)*

Introduction

Scope of this SA

1. This Standard on Auditing (SA) deals with the external auditor's responsibilities if using the work of internal auditors. This includes (a) using the work of the internal audit function in obtaining audit evidence and (b) using internal auditors to provide direct assistance under the direction, supervision and review of the external auditor.
2. This SA does not apply if the entity does not have an internal audit function. (Ref: Para. A2)
3. If the entity has an internal audit function, the requirements in this SA relating to using the work of that function do not apply if:
 - (a) The responsibilities and activities of the function are not relevant to the audit; or
 - (b) Based on the auditor's preliminary understanding of the function obtained as a result of procedures performed under SA 315,¹ the external auditor does not expect to use the work of the function in obtaining audit evidence.

Nothing in this SA requires the external auditor to use the work of the internal audit function to modify the nature or timing, or reduce the extent, of audit procedures to be performed directly by the external auditor; it remains a decision of the external auditor in establishing the overall audit strategy.

4. Furthermore, the requirements in this SA relating to direct assistance do not apply if the external auditor does not plan to use internal auditors to provide direct assistance.
5. In some cases, the external auditor may be prohibited, or restricted to some extent, by law or regulation from using the work of the internal audit function or using internal auditors to provide direct assistance. The SAs do not override laws or regulations that govern an audit of financial statements.² Such prohibitions or restrictions will therefore not prevent the external auditor from complying with the SAs. (Ref: Para. A31)

* Published in August, 2009 issue of the Journal.

¹ Please see the conforming amendments to Revised SA 315, Identifying and Assessing the Risks of Material Misstatement through Understanding the Entity and Its Environment, arising pursuant to issuance of this SA 610 (Revised). These are given at the end of the document.

² SA 200, Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with Standards on Auditing, paragraph A55.

Relationship between SA 315 and SA 610 (Revised)

6. Many entities establish internal audit functions as part of their internal control and governance structures. The objectives and scope of an internal audit function, the nature of its responsibilities and its organizational status, including the function's authority and accountability, vary widely and depend on the size and structure of the entity and the requirements of management and, where applicable, those charged with governance.

7. SA 315 addresses how the knowledge and experience of the internal audit function can inform the external auditor's understanding of the entity and its environment and identification and assessment of risks of material misstatement. SA 315³ also explains how effective communication between the internal and external auditors also creates an environment in which the external auditor can be informed of significant matters that may affect the external auditor's work.

8. Depending on whether the internal audit function's organizational status and relevant policies and procedures adequately support the objectivity of the internal auditors, the level of competency of the internal audit function, and whether the function applies a systematic and disciplined approach, the external auditor may also be able to use the work of the internal audit function in a constructive and complementary manner. This SA addresses the external auditor's responsibilities when, based on the external auditor's preliminary understanding of the internal audit function obtained as a result of procedures performed under SA 315, the external auditor expects to use the work of the internal audit function as part of the audit evidence obtained⁴. Such use of that work modifies the nature or timing, or reduces the extent, of audit procedures to be performed directly by the external auditor.

9. In addition, this SA also addresses the external auditor's responsibilities if considering using internal auditors to provide direct assistance under the direction, supervision and review of the external auditor.

10. There may be individuals in an entity that perform procedures similar to those performed by an internal audit function. However, unless performed by an objective and competent function that applies a systematic and disciplined approach, including quality control, such procedures would be considered internal controls and obtaining evidence regarding the effectiveness of such controls would be part of the auditor's responses to assessed risks in accordance with SA 330⁵.

The External Auditor's Responsibility for the Audit

11. The external auditor has sole responsibility for the audit opinion expressed, and that responsibility is not reduced by the external auditor's use of the work of the internal audit function or internal auditors to provide direct assistance on the engagement. Although they may perform audit procedures similar to those performed by the external auditor, neither the internal audit function nor the internal auditors are independent of the entity as is required of the external auditor in an audit of financial statements in accordance with SA 200⁶. This SA, therefore, defines the conditions that are necessary for the external auditor to be able to use the work of internal auditors. It also defines the necessary work effort to obtain sufficient appropriate evidence that the work of the internal audit function, or internal auditors providing direct assistance, is

³ Please see the conforming amendments to Revised SA 315, Identifying and Assessing the Risks of Material Misstatement through Understanding the Entity and Its Environment, arising pursuant to issuance of this SA 610 (Revised). These are given at the end of the document. (Para A116 of SA 315 in those conforming amendments)

⁴ See paragraphs 15–25

⁵ SA 330, The Auditor's Responses to Assessed Risks.

⁶ SA 200, paragraph 14.

adequate for the purposes of the audit. The requirements are designed to provide a framework for the external auditor's judgments regarding the use of the work of internal auditors to prevent over or undue use of such work.

Effective Date

12. This SA is effective for audits of financial statements for periods beginning on or after 01st April, 2016.

Objectives

13. The objectives of the external auditor, where the entity has an internal audit function and the external auditor expects to use the work of the function to modify the nature or timing, or reduce the extent, of audit procedures to be performed directly by the external auditor, or to use internal auditors to provide direct assistance, are:

- (a) To determine whether the work of the internal audit function or direct assistance from internal auditors can be used, and if so, in which areas and to what extent; and having made that determination:
- (b) If using the work of the internal audit function, to determine whether that work is adequate for purposes of the audit; and
- (c) If using internal auditors to provide direct assistance, to appropriately direct, supervise and review their work.

Definitions

14. For purposes of the SAs, the following terms have the meanings attributed below:

- (a) Internal audit function – A function of an entity that performs assurance and consulting activities designed to evaluate and improve the effectiveness of the entity's governance, risk management and internal control processes. (Ref: Para. A1–A4)
- (b) Direct assistance – The use of internal auditors to perform audit procedures under the direction, supervision and review of the external auditor.

Requirements

Determining Whether, in Which Areas, and to What Extent the Work of the Internal Audit Function Can Be Used

Evaluating the Internal Audit Function

15. The external auditor shall determine whether the work of the internal audit function can be used for purposes of the audit by evaluating the following:

- (a) The extent to which the internal audit function's organizational status and relevant policies and procedures support the objectivity of the internal auditors; (Ref: Para. A5–A9)
- (b) The level of competence of the internal audit function; and (Ref: Para. A5–A9)
- (c) Whether the internal audit function applies a systematic and disciplined approach, including quality control. (Ref: Para. A10–A11)

16. The external auditor shall not use the work of the internal audit function if the external auditor determines that:

- (a) The function's organizational status and relevant policies and procedures do not adequately support

I.428 Auditing Pronouncements

the objectivity of internal auditors;

- (b) The function lacks sufficient competence; or
- (c) The function does not apply a systematic and disciplined approach, including quality control. (Ref: Para. A12–A14)

Determining the Nature and Extent of Work of the Internal Audit Function that Can Be Used

17. As a basis for determining the areas and the extent to which the work of the internal audit function can be used, the external auditor shall consider the nature and scope of the work that has been performed, or is planned to be performed, by the internal audit function and its relevance to the external auditor's overall audit strategy and audit plan. (Ref: Para. A15–A17)

18. The external auditor shall make all significant judgments in the audit engagement and, to prevent undue use of the work of the internal audit function, shall plan to use less of the work of the function and perform more of the work directly: (Ref: Para. A15–A17)

- (a) The more judgment is involved in:
 - (i) Planning and performing relevant audit procedures; and
 - (ii) Evaluating the audit evidence gathered; (Ref: Para. A18–A19)
- (b) The higher the assessed risk of material misstatement at the assertion level, with special consideration given to risks identified as significant; (Ref: Para. A20–A22)
- (c) The less the internal audit function's organizational status and relevant policies and procedures adequately support the objectivity of the internal auditors; and
- (d) The lower the level of competence of the internal audit function.

19. The external auditor shall also evaluate whether, in aggregate, using the work of the internal audit function to the extent planned would still result in the external auditor being sufficiently involved in the audit, given the external auditor's sole responsibility for the audit opinion expressed. (Ref: Para. A15–A22)

20. The external auditor shall, in communicating with those charged with governance an overview of the planned scope and timing of the audit in accordance with SA 260⁷, communicate how the external auditor has planned to use the work of the internal audit function. (Ref: Para. A23)

Using the Work of the Internal Audit Function

21. If the external auditor plans to use the work of the internal audit function, the external auditor shall discuss the planned use of its work with the function as a basis for coordinating their respective activities. (Ref: Para. A24–A26)

22. The external auditor shall read the reports of the internal audit function relating to the work of the function that the external auditor plans to use to obtain an understanding of the nature and extent of audit procedures it performed and the related findings.

23. The external auditor shall perform sufficient audit procedures on the body of work of the internal audit function as a whole that the external auditor plans to use to determine its adequacy for purposes of the audit, including evaluating whether:

⁷ SA 260, Communication with Those Charged with Governance, paragraph 11.

- (a) The work of the function had been properly planned, performed, supervised, reviewed and documented;
 - (b) Sufficient appropriate evidence had been obtained to enable the function to draw reasonable conclusions; and
 - (c) Conclusions reached are appropriate in the circumstances and the reports prepared by the function are consistent with the results of the work performed. (Ref: Para. A27–A30)
24. The nature and extent of the external auditor's audit procedures shall be responsive to the external auditor's evaluation of:
- (a) The amount of judgment involved;
 - (b) The assessed risk of material misstatement;
 - (c) The extent to which the internal audit function's organizational status and relevant policies and procedures support the objectivity of the internal auditors; and
 - (d) The level of competence of the function;⁸ (Ref: Para. A27–A29) and shall include reperformance of some of the work. (Ref: Para. A30)
25. The external auditor shall also evaluate whether the external auditor's conclusions regarding the internal audit function in paragraph 15 of this SA and the determination of the nature and extent of use of the work of the function for purposes of the audit in paragraphs 18–19 of this SA remain appropriate.

Determining Whether, in Which Areas, and to What Extent Internal Auditors Can Be Used to Provide Direct Assistance

Determining Whether Internal Auditors Can Be Used to Provide Direct Assistance for Purposes of the Audit

26. The external auditor may be prohibited by law or regulation from obtaining direct assistance from internal auditors. If so, paragraphs 27–35 and 37 do not apply. (Ref: Para. A31)
27. If using internal auditors to provide direct assistance is not prohibited by law or regulation, and the external auditor plans to use internal auditors to provide direct assistance on the audit, the external auditor shall evaluate the existence and significance of threats to objectivity and the level of competence of the internal auditors who will be providing such assistance. The external auditor's evaluation of the existence and significance of threats to the internal auditors' objectivity shall include inquiry of the internal auditors regarding interests and relationships that may create a threat to their objectivity. (Ref: Para. A32–A34)
28. The external auditor shall not use an internal auditor to provide direct assistance if:
- (a) There are significant threats to the objectivity of the internal auditor; or
 - (b) The internal auditor lacks sufficient competence to perform the proposed work. (Ref: Para. A32–A34)

Determining the Nature and Extent of Work that Can Be Assigned to Internal Auditors Providing Direct Assistance

⁸ See paragraph 18.

I.430 Auditing Pronouncements

29. In determining the nature and extent of work that may be assigned to internal auditors and the nature, timing and extent of direction, supervision and review that is appropriate in the circumstances, the external auditor shall consider:

- (a) The amount of judgment involved in:
 - (i) Planning and performing relevant audit procedures; and
 - (ii) Evaluating the audit evidence gathered;
- (b) The assessed risk of material misstatement; and
- (c) The external auditor's evaluation of the existence and significance of threats to the objectivity and level of competence of the internal auditors who will be providing such assistance. (Ref: Para. A35–A39)

30. The external auditor shall not use internal auditors to provide direct assistance to perform procedures that:

- (a) Involve making significant judgments in the audit; (Ref: Para. A19)
- (b) Relate to higher assessed risks of material misstatement where the judgment required in performing the relevant audit procedures or evaluating the audit evidence gathered is more than limited; (Ref: Para. A38)
- (c) Relate to work with which the internal auditors have been involved and which has already been, or will be, reported to management or those charged with governance by the internal audit function; or
- (d) Relate to decisions the external auditor makes in accordance with this SA regarding the internal audit function and the use of its work or direct assistance. (Ref: Para. A35–A39)

31. Having appropriately evaluated whether and, if so, to what extent internal auditors can be used to provide direct assistance on the audit, the external auditor shall, in communicating with those charged with governance an overview of the planned scope and timing of the audit in accordance with SA 260,⁹ communicate the nature and extent of the planned use of internal auditors to provide direct assistance so as to reach a mutual understanding that such use is not excessive in the circumstances of the engagement. (Ref: Para. A39)

32. The external auditor shall evaluate whether, in aggregate, using internal auditors to provide direct assistance to the extent planned, together with the planned use of the work of the internal audit function, would still result in the external auditor being sufficiently involved in the audit, given the external auditor's sole responsibility for the audit opinion expressed.

Using Internal Auditors to Provide Direct Assistance

33. Prior to using internal auditors to provide direct assistance for purposes of the audit, the external auditor shall:

- (a) Obtain written agreement from an authorized representative of the entity that the internal auditors will be allowed to follow the external auditor's instructions, and that the entity will not intervene in the work the internal auditor performs for the external auditor; and
- (b) Obtain written agreement from the internal auditors that they will keep confidential specific matters as instructed by the external auditor and inform the external auditor of any threat to their objectivity.

⁹ SA 260, paragraph 11.

34. The external auditor shall direct, supervise and review the work performed by internal auditors on the engagement in accordance with SA 220¹⁰. In doing:

- (a) The nature, timing and extent of direction, supervision, and review shall recognize that the internal auditors are not independent of the entity and be responsive to the outcome of the evaluation of the factors in paragraph 29 of this SA; and
- (b) The review procedures shall include the external auditor checking back to the underlying audit evidence for some of the work performed by the internal auditors.

The direction, supervision and review by the external auditor of the work performed by the internal auditors shall be sufficient in order for the external auditor to be satisfied that the internal auditors have obtained sufficient appropriate audit evidence to support the conclusions based on that work. (Ref: Para. A40–A41)

35. In directing, supervising and reviewing the work performed by internal auditors, the external auditor shall remain alert for indications that the external auditor's evaluations in paragraph 27 are no longer appropriate.

Documentation

36. If the external auditor uses the work of the internal audit function, the external auditor shall include in the audit documentation:

- (a) The evaluation of:
 - (i) Whether the function's organizational status and relevant policies and procedures adequately support the objectivity of the internal auditors;
 - (ii) The level of competence of the function; and
 - (iii) Whether the function applies a systematic and disciplined approach, including quality control;
- (b) The nature and extent of the work used and the basis for that decision; and
- (c) The audit procedures performed by the external auditor to evaluate the adequacy of the work used.

37. If the external auditor uses internal auditors to provide direct assistance on the audit, the external auditor shall include in the audit documentation:

- (a) The evaluation of the existence and significance of threats to the objectivity of the internal auditors, and the level of competence of the internal auditors used to provide direct assistance;
- (b) The basis for the decision regarding the nature and extent of the work performed by the internal auditors;
- (c) Who reviewed the work performed and the date and extent of that review in accordance with SA 230¹¹;
- (d) The written agreements obtained from an authorized representative of the entity and the internal auditors under paragraph 33 of this SA; and
- (e) The working papers prepared by the internal auditors who provided direct assistance on the audit engagement.

¹⁰ SA 220, Quality Control for an Audit of Financial Statements.

¹¹ SA 230, Audit Documentation.

Application and Other Explanatory Material

Definition of Internal Audit Function (Ref: Para. 2, 14(a))

A1. The objectives and scope of internal audit functions typically include assurance and consulting activities designed to evaluate and improve the effectiveness of the entity's governance processes, risk management and internal control such as the following:

Activities Relating to Governance

- The internal audit function may assess the governance process in its accomplishment of objectives on ethics and values, performance management and accountability, communicating risk and control information to appropriate areas of the organization and effectiveness of communication among those charged with governance, external and internal auditors, and management.

Activities Relating to Risk Management

- The internal audit function may assist the entity by identifying and evaluating significant exposures to risk and contributing to the improvement of risk management and internal control (including effectiveness of the financial reporting process).
- The internal audit function may perform procedures to assist the entity in the detection of fraud.

Activities Relating to Internal Control

- Evaluation of internal control. The internal audit function may be assigned specific responsibility for reviewing controls, evaluating their operation and recommending improvements thereto. In doing so, the internal audit function provides assurance on the control. For example, the internal audit function might plan and perform tests or other procedures to provide assurance to management and those charged with governance regarding the design, implementation and operating effectiveness of internal control, including those controls that are relevant to the audit.
- Examination of financial and operating information. The internal audit function may be assigned to review the means used to identify, recognize, measure, classify and report financial and operating information, and to make specific inquiry into individual items, including detailed testing of transactions, balances and procedures.
- Review of operating activities. The internal audit function may be assigned to review the economy, efficiency and effectiveness of operating activities, including non-financial activities of an entity.
- Review of compliance with laws and regulations. The internal audit function may be assigned to review compliance with laws, regulations and other external requirements, and with management policies and directives and other internal requirements.

A2. Activities similar to those performed by an internal audit function may be conducted by functions with other titles within an entity. Some or all of the activities of an internal audit function may also be outsourced to a third-party service provider. Neither the title of the function, nor whether it is performed by the entity or a third-party service provider, are sole determinants of whether or not the external auditor can use the work of the function. Rather, it is the nature of the activities; the extent to which the internal audit function's organizational status and relevant policies and procedures support the objectivity of the internal auditors; competence; and systematic and disciplined approach of the function that are relevant. References in this SA

to the work of the internal audit function include relevant activities of other functions or third-party providers that have these characteristics.

A3. In addition, those in the entity with operational and managerial duties and responsibilities outside of the internal audit function would ordinarily face threats to their objectivity that would preclude them from being treated as part of an internal audit function for the purpose of this SA, although they may perform control activities that can be tested in accordance with SA 330¹². For this reason, monitoring controls performed by an owner-manager would not be considered equivalent to an internal audit function.

A4. While the objectives of an entity's internal audit function and the external auditor differ, the function may perform audit procedures similar to those performed by the external auditor in an audit of financial statements. If so, the external auditor may make use of the function for purposes of the audit in one or more of the following ways:

- To obtain information that is relevant to the external auditor's assessments of the risks of material misstatement due to error or fraud. In this regard, SA 315¹³ requires the external auditor to obtain an understanding of the nature of the internal audit function's responsibilities, its status within the organization, and the activities performed, or to be performed, and make inquiries of appropriate individuals within the internal audit function (if the entity has such a function); or
- Unless prohibited, or restricted to some extent, by law or regulation, the external auditor, after appropriate evaluation, may decide to use work that has been performed by the internal audit function during the period in partial substitution for audit evidence to be obtained directly by the external auditor¹⁴.

In addition, unless prohibited, or restricted to some extent, by law or regulation, the external auditor may use internal auditors to perform audit procedures under the direction, supervision and review of the external auditor (referred to as "direct assistance" in this SA)¹⁵.

Determining Whether, in Which Areas, and to What Extent the Work of the Internal Audit Function Can Be Used

Evaluating the Internal Audit Function

Objectivity and Competence (Ref: Para. 15(a)–(b))

A5. The external auditor exercises professional judgment in determining whether the work of the internal audit function can be used for purposes of the audit, and the nature and extent to which the work of the internal audit function can be used in the circumstances.

A6. The extent to which the internal audit function's organizational status and relevant policies and procedures support the objectivity of the internal auditors and the level of competence of the function are particularly important in determining whether to use and, if so, the nature and extent of the use of the work of the function that is appropriate in the circumstances.

¹² See paragraph 10.

¹³ Please see the conforming amendments to Revised SA 315, Identifying and Assessing the Risks of Material Misstatement through Understanding the Entity and Its Environment, arising pursuant to issuance of this SA 610 (Revised). These are given at the end of the document. (please see SA 315, paragraph 6(a) therein)

¹⁴ See paragraphs 15–25.

¹⁵ See paragraphs 26–35

I.434 Auditing Pronouncements

A7. Objectivity refers to the ability to perform those tasks without allowing bias, conflict of interest or undue influence of others to override professional judgments. Factors that may affect the external auditor's evaluation include the following:

- Whether the organizational status of the internal audit function, including the function's authority and accountability, supports the ability of the function to be free from bias, conflict of interest or undue influence of others to override professional judgments. For example, whether the internal audit function reports to those charged with governance or an officer with appropriate authority, or if the function reports to management, whether it has direct access to those charged with governance.
- Whether the internal audit function is free of any conflicting responsibilities, for example, having managerial or operational duties or responsibilities that are outside of the internal audit function.
- Whether those charged with governance oversee employment decisions related to the internal audit function, for example, determining the appropriate remuneration policy.
- Whether there are any constraints or restrictions placed on the internal audit function by management or those charged with governance, for example, in communicating the internal audit function's findings to the external auditor.
- Whether the internal auditors are members of relevant professional bodies and their memberships obligate their compliance with relevant professional standards relating to objectivity, or whether their internal policies achieve the same objectives.
