63.5 The tax auditor should maintain the information in the following format for the purpose of reporting in the format provided in the e-filing utility:

S. No.	Total Amount of distributed profits	Amount of reduction as referred to in section 115-O(1A)(i)	Amount of reduction as referred to in section 115-O(1A)(ii)	Total tax paid	Date of payments with Amount	
					Date of Payment	Amount
1	2	3	4	5	6	7

64. Whether any cost audit was carried out, if yes, give the details, if any, of disqualification or disagreement on any matter/item/value/ quantity as may be reported/identified by the cost auditor

[Clause 37]

64.1 The tax auditor should ascertain from the management whether cost audit was carried out and if yes, a copy of the same should be obtained from the assessee. Even though the tax auditor is not required to make any detailed study of such report, he has to take note of the details of disqualification or disagreement on any matter/item/value/quantity as may be reported/identified by the cost auditor. The tax auditor need not express any opinion in a case where such audit has been ordered but the same has not been carried out.

64.2 In cases where cost audit which might have been ordered is not completed by the time the tax auditor issues his report, he has to report appropriately in this report stating that since cost audit is not completed and the cost audit report is not available with the assessee.

64.3 The tax auditor should examine the time period for which the cost audit if any has been required to be carried out. Information is required to be given only in respect of such cost audit report the time period of which falls within the relevant previous year. In effect the information is required to be given in respect of that cost audit report which is received upto the date of tax audit report.

65. Whether any audit was conducted under the Central Excise Act, 1944, if yes, give the details, if any, of disqualification or disagreement on any matter/item/value/quantity as may be reported/ identified by the auditor

[Clause 38]

65.1 The tax auditor should ascertain from the management whether any audit was conducted under the Central Excise Act, 1944 and if such audit was carried out, obtain a copy of the report. Even though the tax auditor is not required to make any detailed study of such report, he has to take note of the details if any, of disqualification or disagreement on any matter/item/value/quantity as may be reported/identified by the auditor. The tax auditor need not express any opinion in a case where such audit has been ordered but the same has not been carried out.

III.330 Auditing Pronouncements

65.2 In cases where excise audit which might have been ordered is not completed by the time the tax auditor gives his report, he has to report appropriately in this report stating that since excise audit is not completed and the excise audit report is not available with the assessee.

65.3 The tax auditor should examine the time period for which the excise audit, if any, has been required to be carried out. Information is required to be given only in respect of such excise audit report the time period of which falls within the relevant previous year. In effect the information is required to be given in respect of that excise audit report which is received upto the date of tax audit report.

66. Whether any audit was conducted under section 72A of the Finance Act, 1994 in relation to valuation of taxable services, if yes, give the details, if any, of disqualification or disagreement on any matter/item/value/quantity as may be reported/identified by the auditor.

[Clause 39]

66.1 The tax auditor should ascertain from the management whether any audit was conducted under section 72A of the Finance Act, 1994 and if such audit was carried out, obtain a copy of the report. Even though the tax auditor is not required to make any detailed study of such report, he has to take note of the details of disqualification or disagreement on any matter/item/value/quantity as may be reported/identified by the auditor.. The tax auditor need not express any opinion in a case where such audit has been ordered but the same has not been carried out.

66.2 In cases where service tax audit, which might have been ordered is not completed by the time the tax auditor gives his report, he has to report appropriately in this report stating that since service tax audit is not completed and the service tax audit report is not available with the assessee.

66.3 The tax auditor should examine the time period for which the service tax audit, if any, has been required to be carried out. Information is required to be given only in respect of such service tax audit report the time period of which falls within the relevant previous year. In effect the information is required to be given in respect of that service tax audit report which is received upto the date of tax audit report.

67. Details regarding turnover, gross profit, etc., for the previous year and preceding previous year:

Serial number	Particulars	Previous year	Preceding previous year
1.	Total turnover of the assessee		
2.	Gross profit/turnover		
3.	Net profit/turnover		

4.	Stock-in-trade/turnover		
5.	Material consumed/finished goods produced		

(The details required to be furnished for principal items of goods traded or manufactured or services rendered)

[Clause 40]

67.1 These ratios have to be calculated only for assesseees who are engaged in manufacturing or trading activities. Moreover, the ratios have to be given for the business as a whole and need not be given product wise. Further, the ratio mentioned in (5) need not be given for trading concern or service provider.

67.2 While calculating these ratios, the tax auditor should assign a meaning to the terms used in the above ratios having due regard to the generally accepted accounting principles. All the ratios mentioned in this clause are to be calculated in terms of value only.

67.3 The following definitions given by the ICAI in its Guidance Note on the Terms Used in Financial Statements may be noted.

- (a) **Gross Profit:** The excess of the proceeds of goods sold and services rendered during a period over their cost, before taking into account administration, selling, distribution and financing expenses. When the result of this computation is negative it is referred to as gross loss.
- (b) **Turnover:** The aggregate amount for which sales are effected or services rendered by an enterprise. The terms gross turnover and net turnover (or gross sales and net sales) are sometimes used to distinguish the sales aggregate before and after deduction of returns and trade discounts. Attention is also invited to Para 5 (Sales, Turnover, Gross receipts) of this Guidance Note.
- (c) **Net Profit:** The excess of revenue over expenses during a particular accounting period. When the result of this computation is negative, it is referred to as net loss. The net profit may be shown before or after tax.

It may be noted that the net profit to be shown here in this clause is net profit before tax.

67.4 For the purpose of calculating the ratio mentioned in (4), only closing stock is to be considered. The term 'stock-in-trade' used therein does not include stores and spare parts or loose tools. The term "stock-in-trade" would include only finished goods and would not include the stock of raw material and work-in-progress since the objective here is to compute the stock-turnover ratio.

67.5 Material consumed would, apart from raw material consumed, include stores, spare parts and loose tools.

III.332 Auditing Pronouncements

67.6 The value of finished goods produced may be arrived at by using the following formula:

(a) Raw material consumption	-
(b) Stores and spare parts consumption	-
(c) Wages	-
(d) Other manufacturing expenses excluding depreciation.	-
Sub total	-
Add : Opening stock in process	-
Deduct : Closing stocks in process-	
Value of finished goods produced	

67.7 Under this clause, calculation of the ratios are also to be stated. As such, computation of various components based upon which these ratios have been worked out is required to be stated under this clause. However, if any of the above component is stated in the financial statements themselves, a reference to the same may be made, to the extent possible.

67.8 There should be consistency between the numerator and the denominator while calculating the above ratios. Any significant deviation thereof should be pointed out.

67.9 The relevant previous year figures are to be taken from last previous year audit report. In case the preceding previous year is not subject to audit, nothing should be mentioned in the relevant column.

68. Please furnish the details of demand raised or refund issued during the previous year under any tax laws other than Income Tax Act, 1961 and Wealth tax Act, 1957 along with details of relevant proceedings.

[Clause 41]

68.1 The auditee may be assessed under various tax laws other than Income-tax Act, 1961 and Wealth-tax Act, 1956 resulting into a demand order or a refund order. The tax auditor should obtain a copy of all the demand/ refund orders issued by the governmental authorities during the previous year under any tax laws other than Income Tax Act and Wealth Tax Act. Normally, the Indirect tax laws such as Central Excise Duty, Service Tax, Customs Duty, Value Added Tax, CST, Professional Tax etc would be covered as other tax laws. Hence, the cess or duty like Marketing Cess, Cess on Royalty, Octroi Duty, Entry Tax etc. would not be covered as other tax laws. However, the auditor should exercise his professional judgment in determining the applicability to relevant tax laws for reporting under this clause.

68.2 It may be noted that even though the demand/refund order is issued during the previous year, it may pertain to a period other than the relevant previous year. In such cases also, reporting has to be done under this clause. . The tax auditor should verify the books of account and the orders passed by the respective Department for ascertaining whether any

such demand has been raised or refund order has been issued under any other tax law and accordingly report the same. If there is any adjustment of refund against any demand, the auditor shall also report the same under this clause.

68.3 The tax auditor should maintain the following information in his working papers for the purpose of reporting against this clause in the format provided in the e-filing utility.

S. No.	Name of the applicable Act	Demand/ Refund Order No., if any	Date of Demand raised/ refund issued	Financial Year to which the Demand / refund relates	Amount of demand raised/ refund issued	Adjustment of refund against demand, if any	Remarks
1	2	3	4	5	6	7	8

69. Signature and stamp/Seal of the signatory

69.1 Form 3CD has to be signed by the person competent to sign Form No. 3CA or Form No.3CB as the case may be. He has also to give his full name, address, membership number, firm registration number, wherever applicable, place and date. Further, the e-filing portal requires the tax auditor to affix his Digital Signature while registering himself. He is also required to put his stamp/Seal as well.

70. Code of Ethics and other matters

70.1 Some of the issues which are commonly raised in regard to different aspects of tax audit vis-à-vis the liability/ obligations of the tax auditor are considered hereunder.

70.2 The liability of the tax auditor in respect of tax audit will be the same as in any other audit assignment. It may be noted that when any question relating to the audit conducted by a tax auditor arises, he is answerable to the Council of the Institute under the Chartered Accountants Act. In all matters concerning tax audit, ICAI's disciplinary jurisdiction will prevail.

70.3 In case the assessee is found guilty of having concealed the particulars of his income it would not ipso facto mean that the tax auditor is also responsible. If the Assessing Officer comes to the conclusion that the tax auditor was grossly negligent in the performance of his duties, he can refer the matter to the ICAI so that appropriate action can be taken against the tax auditor under the Chartered Accountants Act.

70.4 The Assessing Officer or any other authority who is authorised to issue summons and to call for evidence or documents, can call upon the tax auditor who has audited the accounts to give any evidence or produce documents. For this purpose notice under section 131 can be issued by the Assessing Officer or other tax authority mentioned in the said section.

70.5 If the actual work relating to examination of books and records is done by a qualified assistant in a firm of chartered accountants and the partner of the firm signing the audit report has relied upon this work, action, if any, for professional negligence can be initiated against the member who has signed the report and in such an event, it would be open for the member

III.334 Auditing Pronouncements

concerned to prove that he has taken due care and diligence in the performance of his duties and is not aware of any reason to believe that he should not have so relied.

70.6 If the qualified assistant (whether or not holding the certificate of practice) is found to be grossly negligent in the performance of his duties, the Council of the Institute can take disciplinary action against him.

70.7 A tax auditor can accept the assignment of tax representation.

70.8 Under the Code of Ethics, no tax auditor can charge professional fees by way of percentage of profits or which are contingent upon findings, or results of such employment, except as permitted under any regulation made under this Act. In this connection, reference is invited to Clause (10) of Part I of the First Schedule to the Chartered Accountants Act and the commentary on the subject at page 210 of the Code of Ethics (2009 Edition). Certain exceptions are made in Regulation 192, but these exceptions do not apply for charging of fees for tax audit.

70.9 Since the figures in Form No. 3CD are duly verified by a chartered accountant, they should normally be accepted by tax authorities. If, however, there is a specific reason for differing from the view taken by tax auditor, the Assessing Officer may compute the income of the assessee by adopting different figures.

70.10 The opinion expressed by the tax auditor is not binding on the assessee. If the tax auditor has qualified his report and expressed an opinion on a particular item, the assessee may take a different view while preparing his return of income. In such cases, it is advisable for the assessee to state his viewpoint and support the same by any judicial pronouncements on which he wants to rely.

71. Format of Financial Statements

71.1 The tax auditor of a person who carries on business or profession but who is not required by or under any other law to get his accounts audited has to give his report in Forms No. 3CB/3CD and will have to ensure that the financial statements i.e. balance sheet and profit and loss account/ income and expenditure statement, are prepared in such a manner that adequate information which is necessary to convey a true and fair view of the state of affairs of the assessee is given. So far as a person whose accounts of the business or profession have been audited under any other law is concerned, the information to be given in the financial statements is normally provided in the particular statute by which the assessee is governed. Since there is no such legislation in respect of a person who carries on business or profession but who is not required by or under any other law to get his accounts audited, it is necessary to achieve some uniformity in respect of information to be provided in the financial statements.

71.2 It should be noted that the responsibility for maintenance of books and records and that for preparation of financial statements is that of the assessee. It is, therefore, desirable that guidance is given to a person who carries on business or profession but who is not required

by or under any other law to get his accounts audited about the maintenance of books of accounts and records as well as about the requirements of auditing. Similarly, guidance is also required to be given about the preparation of financial statements and the information to be provided in such statements. (See “Monograph on Compulsory Maintenance of Accounts” published by ICAI)

71.3 Two separate sets of forms of balance sheet and profit and loss account have, therefore, been prepared and given as Appendices to this Guidance Note. **Appendix XV (Page no. 278)** gives the recommended format of the balance sheet and also the information to be provided in the profit and loss account, in case of an assessee engaged in trading business. This format can be used in the case of an assessee, who is engaged in profession and other service activities, by making such changes as may be considered to suit the circumstances. **Appendix XVI (Page no. 286)** gives the recommended format of the balance sheet and the requirements of the profit and loss account in the case of an assessee engaged in the manufacturing activities. It is suggested that the balance sheet and the profit and loss account can be prepared either in the vertical or in the horizontal form according to the circumstances of each case. If the information required to be given in any item or sub-item of the financial statements cannot conveniently be given on the face of the financial statements, the same may be given by way of footnotes/ annexures to and forming part of such financial statements. Since the formats are designed also for accounts of non-corporate borrowers from banks, they may be modified so as to exclude the information, which may not be relevant for accounts for tax audit. For presentation and disclosure requirements, applicable AS and AS (IT) should be kept in mind.

APPENDICES

NOTE

- ◆ The appendices published hereinafter do not form part of the Statement. These are intended for the ease of reference to the readers.
- ◆ These appendices, among other things, also contain reproduction of texts of various sections of relevant statutes and notifications issued by the Government of India. While every effort has been made to avoid errors or omissions in reproduction, some errors are likely to creep in. It is, therefore, suggested that to avoid any doubt, the reader should cross-check all the facts, law and contents of the publication with original Government publication or notifications.

APPENDIX I

[PARA 5.12]

CIRCULAR NO. 452, DATED 17.3.1986

Subject: Section 44AB of the Income-tax Act, 1961- Clarification regarding applicability in the cases of Commission Agents, arathias etc. (Para 5.12).

1. Section 44AB of the Income-tax Act, 1961, as inserted by the Finance Act, 1984, casts an obligation on every person carrying on business to get his accounts audited, if his total sales, turnover or gross receipts, as the case may be, exceed Rs.40 lakhs (substituted by Rs. 1 crore by Finance Act, 2012 w.e.f. A.Y. 2013-14) in any previous year relevant to the assessment year commencing on 1.4.1985 or any subsequent assessment year.
2. The Board have received representations from various persons, trade associations, etc., to clarify whether in cases where an agent effects sales/turnover on behalf of his principal, such sales/turnover have to be treated as the sales/turnover of the agent for the purpose of Section 44AB of the Income-tax Act, 1961.
3. The matter was examined in consultation with the Ministry of Law. There are various trade practices prevalent in the country in regard to agency business and no uniform pattern is followed by the commission agents, consignment agents, brokers, kachha arhatias and pacca arhatias dealing in different commodities in different parts of the country. The primary necessity in each instance is to ascertain with precision what are the express terms of the particular contract under consideration. Each transaction, therefore, requires to be examined with reference to its terms and conditions and no hard and fast rule can be laid down as to whether an agent is acting only as an agent or also as a principal.

III.338 Auditing Pronouncements

4. Board are advised that so far as kachha arhatias are concerned, the turnover does not include the sales effected on behalf of the principals and only the gross commission has to be considered for the purpose of Section 44AB. But the position is different with regard to pacca arhatia. A pacca arhatia is not, in the proper sense of the word, an agent or even del credere agent. The relation between him and his constituent is substantially that between the two principals. On the basis of various Court pronouncements, following principles of distinction can be laid down between a kachha arhatia and a pacca arhatia:
 - (1) A kachha arhatia acts only as an agent of his constituent and never acts as a principal. A pacca arhatia, on the other hand, is entitled to substitute his own goods towards the contract made for the constituent and buy the constituent's goods on his personal account and thus he acts as a principal as regards his constituent.
 - (2) A kachha arhatia brings a privity of contract between his constituent and the third party so that each becomes liable to the other. The pacca arhatia, on the other hand, makes himself liable upon the contract not only to the third party but also to his constituent.
 - (3) Though the kachha arhatia does not communicate the name of his constituent to the third party, he does communicate the name of the third party to the constituent. In other words, he is an agent for an unnamed principal. The pacca arhatia, on the other hand, does not inform his constituent as to the third party with whom he has entered into a contract on his behalf.
 - (4) The remuneration of kachha arhatia consists solely of commission and he is not interested in the profits and losses made by his constituent as is not the case with the pacca arhatia.
 - (5) The kaccha arhatia, unlike the pacca arhatia does not have any dominion over the goods.
 - (6) The kaccha arhatia has no personal interest of his own when he enters into a transaction and his interest is limited to the commission agent's charges and certain out of pocket expenses whereas a pacca arhatia has a personal interest of his own when he enters into a transaction.
 - (7) In the event of any loss, the kachha arhatia is entitled to be indemnified by his principal as is not the case with pacca arhatia.
5. The above distinction between a kachha arhatia and pacca arhatia may also be relevant for determining the applicability of Section 44AB in cases of other type of agents. In the case of agents whose position is similar to that of kachha arhatia, the turnover is only the commission and does not include the sales on behalf of the principals. In the case of agents of the type of pacca arhatia, on the other hand, the

total sales/turnover of the business should be taken into consideration for determining the applicability of the provisions of Section 44AB of the Income-tax Act.

Circular No. 452 [F.No.201/3/85-IT(A-II) dated 17th March 1986.

JUDICIAL ANALYSIS

EXPLAINED IN - In *Jeyar Consultant & Investment (P.) Ltd. v. Assistant Commissioner* [1993] 46 ITD 71 (Mad.-Trib.), it was observed that it is *ex facie* clear from the CBDT Circular No. 452 of 17-3-1986 which came to be issued in relation to *kacha* and *pacca arhatias*, who are an integral part of the trading sector, that instructions issued by the Board as respects *kacha* and *pacca arhatias* could not be applied to the case of the assessee who has arranged finances for other for a fee. The assessee may choose to label the fee as brokerage or even as commission. But the fee or to use a generic expression 'receipt' could not be regarded as turnover proper.

RELIED ON IN - The above circular was relied on in *ITO v. Shantilal Chunilal & Co.* [1993] 45 ITD 581 (Pune - Trib.), with the following observations:

“ . . . Further, reference was made by assessee to pages 52 to 54 which contains Board's Circular No. 452, dated 17-3-1986 which has been issued in connection with section 44AB of the Income-tax Act, 1961. Reliance was placed on para 4 of the said circular according to which the Board were advised that so far as *kachha arahatias* were concerned, the turnover did not include sales effected on behalf of the principals and only gross commission has to be considered for the purpose of section 44AB. The submission of the learned counsel for the assessee was that the case of the assessee is one of *kachha arahatia* and not a *pucca arahatia* and, therefore, only gross commission has to be considered for the purpose of section 44AB of the Income-tax Act, 1961. . . . The CIT (Appeals) has excluded the adad receipt as well as interest receipt from the purview of turnover for the purpose of section 44AB. Relying on the clarifications given by the Board in its Circular No. 452, dated 17-3-1986, he has categorised the assessee as *kachha arahatia* and he has charged expenses incurred on such business which resulted in gross profit rate of 1.09 per cent. Therefore, it is very much relevant to clinch the issue whether the assessee is a *kachha arahatia* or not. Going by the clarification issued by the Board in the aforesaid Circular No. 452, dated 17-3-1986 the case of the assessee fits in with the *kachha arahatia vis-a-vis* case of *pucca arahatia*. . . .” (pp. 585-586).

REFERRED TO IN - *Manish Textiles v. ACIT* [1991] 38 ITD 365 (Bom.).

Circular No. 4/2007, dated 15th June, 2007

F.No.149/287/2005-TPL

Distinction between shares held as stock-in-trade and shares held as investment - tests for such a distinction

1. The Income-tax Act, 1961 makes a distinction between a “capital asset” and a “trading asset”.
2. Capital asset is defined in Section 2(14) of the Act. Long-term capital assets and gains are dealt with under Section 2(29A) and Section 2(29B). Short-term capital assets and gains are dealt with under Section 2(42A) and Section 2(42B).
3. Trading asset is dealt with under Section 28 of the Act.
4. The Central Board of Direct Taxes (CBDT) through Instruction No.1827 dated August 31, 1989 had brought to the notice of the assessing officers that there is a distinction between shares held as investment (capital asset) and shares held as stock-in-trade (trading asset). In the light of a number of judicial decisions pronounced after the issue of the above instructions, it is proposed to update the above instructions for the information of assessees as well as for guidance of the assessing officers.
5. In the case of *Commissioner of Income Tax (Central), Calcutta Vs Associated Industrial Development Company (P) Ltd (82 ITR 586)*, the Supreme Court observed that:

“Whether a particular holding of shares is by way of investment or forms part of the stock-in-trade is a matter which is within the knowledge of the assessee who holds the shares and it should, in normal circumstances, be in a position to produce evidence from its records as to whether it has maintained any distinction between those shares which are its stock-in-trade and those which are held by way of investment.”
6. In the case of *Commissioner of Income Tax, Bombay Vs H. Holck Larsen (160 ITR 67)*, the Supreme Court observed :

“The High Court, in our opinion, made a mistake in observing whether transactions of sale and purchase of shares were trading transactions or whether these were in the nature of investment was a question of law. This was a mixed question of law and fact.”
7. The principles laid down by the Supreme Court in the above two cases afford adequate guidance to the assessing officers.
8. The Authority for Advance Rulings (AAR) (288 ITR 641), referring to the decisions of the Supreme Court in several cases, has culled out the following principles:

- “(i) Where a company purchases and sells shares, it must be shown that they were held as stock-in-trade and that existence of the power to purchase and sell shares in the memorandum of association is not decisive of the nature of transaction;
- (ii) the substantial nature of transactions, the manner of maintaining books of accounts, the magnitude of purchases and sales and the ratio between purchases and sales and the holding would furnish a good guide to determine the nature of transactions;
- (iii) ordinarily the purchase and sale of shares with the motive of earning a profit, would result in the transaction being in the nature of trade/adventure in the nature of trade; but where the object of the investment in shares of a company is to derive income by way of dividend etc. then the profits accruing by change in such investment (by sale of shares) will yield capital gain and not revenue receipt”.

9. Dealing with the above three principles, the AAR has observed in the case of Fidelity group as under:-

“We shall revert to the aforementioned principles. The first principle requires us to ascertain whether the purchase of shares by a FII in exercise of the power in the memorandum of association/trust deed was as stock-in-trade as the mere existence of the power to purchase and sell shares will not by itself be decisive of the nature of transaction. We have to verify as to how the shares were valued/held in the books of account i.e. whether they were valued as stock-in-trade at the end of the financial year for the purpose of arriving at business income or held as investment in capital assets. The second principle furnishes a guide for determining the nature of transaction by verifying whether there are substantial transactions, their magnitude, etc., maintenance of books of account and finding the ratio between purchases and sales. It will not be out of place to mention that regulation 18 of the SEBI Regulations enjoins upon every FII to keep and maintain books of account containing true and fair accounts relating to remittance of initial corpus of buying and selling and realizing capital gains on investments and accounts of remittance to India for investment in India and realizing capital gains on investment from such remittances. The third principle suggests that ordinarily purchases and sales of shares with the motive of realizing profit would lead to inference of trade/adventure in the nature of trade; where the object of the investment in shares of companies is to derive income by way of dividends etc., the transactions of purchases and sales of shares would yield capital gains and not business profits.”

10. CBDT also wishes to emphasise that it is possible for a tax payer to have two portfolios, i.e., an investment portfolio comprising of securities which are to be treated as capital assets and a trading portfolio comprising of stock-in-trade which are to be treated as trading assets. Where an assessee has two portfolios, the assessee may have income under both heads i.e., capital gains as well as business income.

III.342 Auditing Pronouncements

11. Assessing officers are advised that the above principles should guide them in determining whether, in a given case, the shares are held by the assessee as investment (and therefore giving rise to capital gains) or as stock-in-trade (and therefore giving rise to business profits). The assessing officers are further advised that no single principle would be decisive and the total effect of all the principles should be considered to determine whether, in a given case, the shares are held by the assessee as investment or stock-in-trade.

12. These instructions shall supplement the earlier Instruction no. 1827 dated August 31, 1989.

APPENDIX III

[PARA 9.8]

Mandatory Communication - Relevant Extracts from the Code of Ethics *(In view of the fact that with effect from 01.04.2014 the Companies Act, 1956 has been replaced with Companies Act, 2013, the "Code of Ethics" issued by ICAI is under revision. The members may refer the revised "Code of Ethics" as and when published.)*

(11th Edition - January, 2009)

(Pages 163 to 168)

Clause (8): accepts a position as auditor previously held by another chartered accountant or a certified auditor who has been issued certificate under the Restricted Certificate Rules, 1932 without first communicating with him in writing;

It must be pointed out that professional courtesy alone is not the major reason for requiring a member to communicate with the existing accountant who is a member of the Institute or a certified auditor. The underlying objective is that the member may have an opportunity to know the reasons for the change in order to be able to safeguard his own interest, the legitimate interest of the public and the independence of the existing accountant. It is not intended, in any way, to prevent or obstruct the change. When making the enquiry from the retiring auditor, the one proposed to be appointed or already appointed should primarily find out whether there are any professional or other reasons why he should not accept the appointment.

It is important to remember that every client has an inherent right to choose his accountant; also that he may, subject to compliance with the statutory requirements in the case of limited Companies, make a change whenever he chooses, whether or not the reasons which had impelled him to do so are good and valid. The change normally occurs where there has been a change of venue of business and a local accountant is preferred or where the partner who has been dealing with the clients affairs retires or dies; or where temperaments clash or the client has some good reasons to feel dissatisfied. In such cases, the retiring auditor should

always accept the situation with good grace.

The existence of a dispute as regards the fees may be root cause of an auditor being changed. This would not constitute valid professional reasons on account of which an audit should not be accepted by the member to whom it is offered. However, in the case of an undisputed audit fees for carrying out the statutory audit under the Companies Act, 1956 or various other statutes having not been paid, the incoming auditor should not accept the appointment unless such fees are paid. In respect of other dues, the incoming auditor should in appropriate circumstances use his influence in favour of his predecessor to have the dispute as regards the fees settled. The professional reasons for not accepting an audit would be:

- (i) Non-compliance of the provisions of Sections 224 and 225 of the Companies Act as mentioned in Clause (9);
- (ii) Non-payment of undisputed audit fees by auditees other than in case of sick units for carrying out the statutory audit under the Companies Act, 1956 or various other statutes; and
- (iii) Issuance of a qualified report.

In the first two cases, an auditor who accepts the audit would be guilty of professional misconduct. In this connection, attention of members is invited to the Council Guidelines No. 1-CA/(7)/02/2008 dated 08.08.08 appearing in Chapter-3 of the book and also published at page 686 of October, 2008 issue of the Journal. In the said guidelines, Council has explained that the provision for audit fee in accounts signed by both the auditee or the auditor shall be considered as “undisputed” audit fee and “sick unit” shall mean where the net worth is negative.

In the last case, however, he may accept the audit if he is satisfied that the attitude of the retiring auditor was not proper and justified. If, on the other hand, he feels that the retiring auditor had qualified the report for good and valid reasons, he should refuse to accept the audit. There is no rule, written or unwritten, which would prevent an auditor from accepting the appointment offered to him in these circumstances. However, before accepting the audit, he should ascertain the full facts of the case. For nothing will bring the profession to disrepute so much as the knowledge amongst the public that if an auditor is found to be “inconvenient” by the client, he could readily be replaced by another who would not displease the client and this point cannot be too over-emphasised.

What should be the correct procedure to adopt when a prospective client tells you that he wants to change his auditor and wants you to take up his work? There being two persons involved, the Company and the old auditor, the former should be asked whether the retiring auditor had been informed of the intention to change. If the answer is in the affirmative, then a communication should be addressed to the retiring auditor. If, however, it is learnt that the old auditor has not been informed, and the client is not willing to make the first move, it would be

III.344 Auditing Pronouncements

necessary to ask him the reason for the proposed change. If there is no valid reason for a change, it would be healthy practice not to accept the audit. If he decides to accept the audit he should address a communication to the retiring auditor.

As stated earlier, the object of the incoming auditor, in communicating with the retiring auditor is to ascertain from him whether there are any circumstances which warrant him not to accept the appointment. For example, whether the previous auditor has been changed on account of having qualified his report or he had expressed a wish not to continue on account of something inherently wrong with the administration of the business. The retiring auditor may even give out information regarding the condition of the accounts of the client or the reason that impelled him to qualify his report. In all these cases it would be essential for the incoming auditor to carefully consider the facts before deciding whether or not he should accept the audit, and should he do so, he must also take into account the information while discharging his duties and responsibilities.

Sometimes, the retiring auditor fails without justifiable cause except a feeling of hurt because of the change, to respond to the communication of the incoming auditor. So that it may not create a deadlock, the auditor appointed can act, after waiting for a reasonable time for a reply.

The Council has taken the view that a mere posting of a letter under certificate of posting is not sufficient to establish communication with the retiring auditor unless there is some evidence to show that the letter has in fact reached the person communicated with. A Chartered Accountant who relies solely upon a letter posted under certificate of posting therefore does so at his own risk.

The view taken by the Council has been confirmed in a decision by the *Rajasthan High Court in J.S. Bhati vs. The Council of the Institute of the Chartered Accountants of India* and another. (Pages 72-79 of Vol. V of Disciplinary Cases published by the Institute - Judgement delivered on 29th August, 1975). The following observations of the Court are relevant in this context:-

“Mere obtaining a certificate of posting in my opinion does not fulfill the requirements of clause (8) of Schedule I as the presumption under Section 114 of the Evidence Act that the letter in due course reached the addressee cannot replace that positive degree of proof of the delivery of the letter to the addressee which the letters of the law in this case require. The expression ‘in communication with’ when read in the light of the instructions contained in the booklet ‘Code of Conduct’ cannot be interpreted in any other manner but to mean that there should be positive evidence of the fact that the communication addressed to the outgoing auditor by the incoming auditor reached his hands. Certificate of posting of a letter cannot, in the circumstances, be taken as positive evidence of its delivery to the addressee.”

Members should therefore communicate with a retiring auditor in such a manner as to retain in their hands positive evidence of the delivery of the communication to the addressee. In the

opinion of the Council, communication by a letter sent "Registered Acknowledgement due" or by hand against a written acknowledgement would in the normal course provide such evidence.

The Council is of the opinion that it would be a healthy practice to communicate with the member who had done the work previously in every case where a Chartered Accountant is required to give a certificate or in respect of a verification of the books of account for special purpose as well as in cases where he is appointed as a Liquidator, Trustee, or Receiver and his predecessor was a Chartered Accountant.

As a matter of professional courtesy and professional obligation it is necessary for the new auditor appointed to act jointly with the earlier auditor and to communicate with such earlier auditor.

It would also be a healthy practice if a tax auditor appointed for conducting special audit under the Income-tax Act, communicates with the member who has conducted the statutory audit.

It is desirable that a member, on receiving communication from the auditor who has been appointed in his place, should send a reply to him as soon as possible setting out in detail the reasons, which according to him had given rise to the change and other attendant circumstances but without disclosing any information as regards the affairs of the client which he is not competent to do.

The Council has taken the view that it is not obligatory for the auditor appointed to conduct a Special Audit under Section 233A of Companies Act, 1956 to communicate with the previous auditor who had conducted the regular audit for the period covered by the Special Audit.

The Council has also laid down the detailed guidelines on the subject as under:-

1. The requirement for communicating with the previous auditor being a Chartered Accountant in practice would apply to all types of audit viz., statutory audit, tax audit, internal audit, concurrent audit or any other kind of audit.
2. Various doubts have been raised by the members about the terms "audit", "previous auditor", "Certificate" and "report", normally while interpreting the aforesaid Clause (8). These terms need to be clarified.
3. As per para 2 of the Institute's publication viz. Standard on Auditing (SA) 200, *Overall Objectives of the Independent Auditor and Conduct of an Audit in Accordance with Standards on Auditing* an "audit" is the independent examination of financial information of any entity, whether profit oriented or not, and irrespective of its size or legal form, when such an examination is conducted with a view to expressing an opinion thereon.
4. The term "previous auditor" means the immediately preceding auditor who held same or similar assignment comprising same/similar scope of work. For example, a Chartered Accountant in practice appointed for an assignment of physical verification of inventory of raw materials, spares, stores and finished goods, before acceptance of appointment,

III.346 Auditing Pronouncements

must communicate with the previous auditor being a Chartered Accountant in practice who was holding the appointment of physical verification of inventory of raw materials, stores, finished goods and fixed assets. The mandatory communication with the previous auditor being a Chartered Accountant is required even in a case where the previous auditor happens to be an auditor for a year other than the immediately preceding year.

5. As explained in para 2.2 of the Institute's publication viz., 'Guidance Note on Audit Reports and Certificates for Special Purposes', a "certificate" is a written confirmation of the accuracy of the facts stated therein and does not involve any estimate or opinion. A "report", on the other hand, is a formal statement usually made after an enquiry, examination or review of specified matters under report and includes the reporting auditor's opinion thereon. Thus, when a reporting auditor issues a certificate, he is responsible for the factual accuracy of what is stated therein. On the other hand, when a reporting auditor gives a report, he is responsible for ensuring that the report is based on factual data, that his opinion is in due accordance with facts, and that it is arrived at by the application of due care and skill.
6. A communication is mandatorily required for all types of audit/report where the previous auditor is a Chartered Accountant. For certification, it would be healthy practice to communicate. In case of assignments done by other professionals not being Chartered Accountants, it would also be a healthy practice to communicate.
7. Although the mandatory requirement of communication with previous auditor being Chartered Accountant applies, in uniform manner, to audits of both government and non government entities, yet in the case of audit of government Companies/banks or their branches, if the appointment is made well in time to enable the obligation cast under this clause to be fulfilled, such obligation must be complied with before accepting the audit. However, in case the time schedule given for the assignment is such that there is no time to wait for the reply from the outgoing auditor, the incoming auditor may give a conditional acceptance of the appointment and commence the work which needs to be attended to immediately after he has sent the communication to the previous auditor in accordance with this clause. In his acceptance letter, he should make clear to the client that his acceptance of appointment is subject to professional objections, if any, from the previous auditors and that he will decide about his final acceptance after taking into account the information received from the previous auditor.

APPENDIX IV
[PARA 9.8, 9.9, 9.10, 9.23]

Council Guidelines No.1-CA(7)/02/2008, dated 8th August,2008

GUIDELINES FOR THE MEMBERS OF ICAI

(Issued under the provisions of The Chartered Accountants Act, 1949)

Chapter I

Preliminary

1.0 Short title, commencement, etc.

- (a) These Guidelines have been issued by the Council of the Institute of Chartered Accountants of India under the provisions of The Chartered Accountants Act, 1949, as amended by The Chartered Accountants (Amendment) Act 2006, in supersession of the Notifications issued by the Council under erstwhile Clause (ii) of Part II of the Second Schedule to the Chartered Accountants Act, 1949.
- (b) These Guidelines be called the 'Council General Guidelines, 2008'.

1.1 Definitions.

1.1.1 For the purpose of these Guidelines:

- (a) 'Act' means the Chartered Accountants Act, 1949.
- (b) "Chartered accountant" means a person who is a member of the Institute.
- (c) "Council" means the Council of the Institute constituted under section 9 of the Act.
- (d) "Institute" means the Institute of Chartered Accountants of India constituted under the Act.

1.1.2 All other words and expressions used but not defined herein have the same meaning as assigned to them within the Chartered Accountants Act, 1949 and the Rules, Regulations and Guidelines made there under.

1.2 Applicability of the Guidelines

These guidelines shall be applicable to all the Members of the Institute whether in practice or not wherever the context so requires.

Chapter II

Conduct of a Member being an employee

2.0 A member of the Institute who is an employee shall exercise due diligence and shall not be grossly negligent in the conduct of his duties.

Chapter III

Appointment of a Member as Cost auditor

3.0 A member of the Institute shall not accept:

- (i) The appointment as Cost auditor of a Company under Section 233B of the Companies Act, 1956 while he-
 - (a) is an auditor of the Company appointed under Section 224 of the Companies Act; or
 - (b) is an officer or employee of the Company; or
 - (c) is a partner, of any employee or officer of the Company; or
 - (d) is a partner or is in the employment of the Company's auditor appointed under Section 224 of the Companies Act, 1956; or
 - (e) is indebted to the Company for an amount exceeding one thousand rupees, or has given any guarantee or provided any security in connection with the indebtedness of any third person to the Company for an amount exceeding one thousand rupees;

OR

- (ii) After his appointment as Cost Auditor, he becomes subject to any of the disabilities stated in items (i) (a) to (e) above and continues to function as a cost auditor thereafter.

3.1 A member of the Institute in practice shall not accept the appointment as auditor of a Company under Section 224 of the Companies Act, 1956, while he is an employee of the cost auditor of the Company appointed under Section 233B of the Companies Act, 1956.

Chapter IV

Opinion on financial statements when there is substantial interest

4.0 A member of the Institute shall not express his opinion on financial statements of any business or enterprise in which one or more persons who are his "relatives" within the meaning of Section 6 of the Companies Act, 1956 have, either by themselves or in conjunction with such member, a substantial interest in the said business or enterprise.

Explanation: For this purpose and for the purpose of compliance of Clause (4) of Part I of the Second Schedule to the Chartered Accountants Act, 1949, the expression "substantial

interest” shall have the same meaning as is assigned thereto under Appendix (9) to the Chartered Accountants Regulations, 1988.

Chapter V

Maintenance of books of accounts

5.0 A member of the Institute in practice or the firm of Chartered Accountants of which he is a partner, shall maintain and keep in respect of his / its professional practice, proper books of account including the following:-

- (i) a Cash Book;
- (ii) a Ledger.

Chapter VI

Tax Audit assignments under Section 44 AB of the Income-tax Act, 1961

6.0 A member of the Institute in practice shall not accept, relating to an assessment year, more than the “specified number of tax audit assignments” under Section 44AB of the Income-tax Act, 1961.

Provided that in the case of a firm of Chartered Accountants in practice, the “specified number of tax audit assignments” shall be construed as the specified number of tax audit assignments for every partner of the firm.

Provided further that where any partner of the firm is also a partner of any other firm or firms of Chartered Accountants in practice, the number of tax audit assignments which may be taken for all the firms together in relation to such partner shall not exceed the “specified number of tax audit assignments” in the aggregate.

Provided further that where any partner of a firm of Chartered Accountants in practice accepts one or more tax audit assignments in his individual capacity, the total number of such assignments which may be accepted by him shall not exceed the “specified number of tax audit assignments” in the aggregate.

Provided also that the audits conducted under Section 44AD, 44AE and 44AF of the Income-tax Act, 1961 shall not be taken into account for the purpose of reckoning the “specified number of tax audit assignments”.

6.1 Explanation:

For the above purpose, “the specified number of tax audit assignments” means -

- (a) in the case of a Chartered Accountant in practice or a proprietary firm of Chartered Accountant, 60 tax audit assignments, relating to an assessment year, whether in respect of corporate or non-corporate assesses.

III.350 Auditing Pronouncements

(b) in the case of firm of Chartered Accountants in practice, 60 tax audit assignments per partner in the firm, relating to an assessment year, whether in respect of corporate or non-corporate assesses.

6.1.1 In computing the “specified number of tax audit assignments” each year’s audit would be taken as a separate assignment.

6.1.2 In computing the “specified number of tax audit assignments”, the number of such assignments, which he or any partner of his firm has accepted whether singly or in combination with any other Chartered Accountant in practice or firm of such Chartered Accountants, shall be taken into account.

6.1.3 The audit of the head office and branch offices of a concern shall be regarded as one tax audit assignment.

6.1.4 The audit of one or more branches of the same concern by one Chartered Accountant in practice shall be construed as only one tax audit assignment.

6.1.5 A Chartered Accountant being a part time practicing partner of a firm shall not be taken into account for the purpose of reckoning the tax audit assignments of the firm.

6.1.6 A Chartered Accountant in practice shall maintain a record of the tax audit assignments accepted by him relating to each assessment year in the format as may be prescribed by the Council.

Chapter VII

Appointment of an Auditor in case of non-payment of undisputed fees

7.0 A member of the Institute in practice shall not accept the appointment as auditor of an entity in case the undisputed audit fee of another Chartered Accountant for carrying out the statutory audit under the Companies Act, 1956 or various other statutes has not been paid:

Provided that in the case of sick unit, the above prohibition of acceptance shall not apply.

7.1 Explanation 1:

For this purpose, the provision for audit fee in accounts signed by both - the auditee and the auditor shall be considered as “undisputed” audit fee.

7.2 Explanation 2:

For this purpose, “sick unit” shall mean where the net worth is negative.

Chapter VIII

Specified number of audit assignments

8.0 A member of the Institute in practice shall not hold at any time appointment of more than the “specified number of audit assignments” of Companies under Section 224 and/or Section 228 of the Companies Act, 1956.

Provided that in the case of a firm of Chartered Accountants in practice, the “specified number of audit assignments” shall be construed as the specific number of audit assignments for every partner of the firm.

Provided further that where any partner of the firm of Chartered Accountants in practice is also a partner of any other firm or firms of Chartered Accountants in practice, the number of audit assignments which may be taken for all the firms together in relation to such partner shall not exceed the “specified number of audit assignments” in the aggregate.

Provided further where any partner of a firm or firms of Chartered Accountants in practice accepts one or more audit of Companies in his individual capacity, or in the name of his proprietary firm, the total number of such assignments which may be accepted by all firms in relation to such Chartered Accountant and by him shall not exceed the “specified number of audit assignments” in the aggregate.

8.1 Explanation:

For the above purpose, the “specified number of audit assignments” means –

- a. in the case of a Chartered Accountant in practice or a proprietary firm of Chartered Accountant, thirty audit assignments whether in respect of private Companies or other Companies.
- b. in the case of Chartered Accountants in practice, thirty audit assignments per partner in the firm, whether in respect of private Companies or other Companies.

Provided that out of such “specified number of audit assignments, the number of audit assignments of public Companies each of which has a paid-up share capital of rupees twenty-five lakhs or more, shall not exceed ten.

8.2 In computing the “specified number of audit assignments”-

- a. the number of audit of such Companies, which he or any partner of his firm has accepted whether singly or in combination with any other Chartered Accountant in practice or firm of such Chartered Accountants, shall be taken into account.
- b. the audit of the head office and branch offices of a Company by one Chartered Accountant or firm of such Chartered Accountants in practice shall be regarded as one audit assignment.

III.352 Auditing Pronouncements

- c. the audit of one or more branches of the same Company by one Chartered Accountant in practice or by firm of Chartered Accountants in practice in which he is a partner shall be construed as one audit assignment only.
- d. the number of partners of a firm on the date of acceptance of audit assignment shall be taken into account.

8.3 A Chartered Accountant in practice, whether in full-time or part-time employment elsewhere, shall not be counted for the purpose of determination of “specified number of audit of Companies” by firms of Chartered Accountants.

8.4 A Chartered Accountant being a part time practicing partner of a firm shall not be taken into account for the purpose of reckoning the audit assignments of the firm.

8.5 A Chartered Accountant in practice as well as firm of Chartered Accountants in practice shall maintain a record of the audit assignments accepted by him or by the firm of Chartered Accountants, or by any of the partners of the firm in his individual name or as a partner of any other firm, as far as possible, in the following format:

S. No	Name of the Company	Registration Number	Date of Appointment	Date of Acceptance	Date on which Form 23-B filed with the Registrar of Companies
1	2	3	4	5	6

Chapter IX

Appointment as Statutory auditor

9.0 A member of the Institute in practice shall not accept the appointment as statutory auditor of Public Sector Undertaking(s)/ Government Company(ies)/ Listed Company(ies) and other Public Company(ies) having turnover of Rs. 50 crores or more in a year where he accepts any other work(s) or assignment(s) or service(s) in regard to the same Undertaking(s)/ Company(ies) on a remuneration which in total exceeds the fee payable for carrying out the statutory audit of the same Undertaking/company.

Provided that in case appointing authority(ies)/regulatory body(ies) specify(ies) more stringent condition(s)/ restriction(s), the same shall apply instead of the conditions/ restrictions specified under these Guidelines.

9.1 The above restrictions shall apply in respect of fees for other work(s) or service(s) or assignment(s) payable to the statutory auditors and their associate concern(s) put together.

9.2 For the above purpose,

- (i) the term “other work(s)” or “service(s)” or “assignment(s)” shall include Management Consultancy and all other professional services permitted by the Council pursuant to Section 2(2)(iv) of the Chartered Accountants Act, 1949 but shall not include: -
 - (a) audit under any other statute;
 - (b) certification work required to be done by the statutory auditors; and
 - (c) any representation before an authority;
- (ii) the term “associate concern” means any corporate body or partnership firm which renders the Management Consultancy and all other professional services permitted by the Council wherein the proprietor and/or partner(s) of the statutory auditor firm and/or their “relative(s)” is/are Director/s or partner/s and/or jointly or severally hold “substantial interest” in the said corporate body or partnership;
- (iii) the terms “relative” and “substantial interest” shall have the same meaning as are assigned thereto under Appendix (9) to the Chartered Accountants Regulations, 1988.

9.3 In regard to taking up other work(s) or service(s) or assignment(s) of the undertaking/company referred to above, it shall be open to such associate concern or corporate body to render such work(s) or service(s) or assignment(s) so long as aggregate remuneration for such other work(s) or service(s) or assignment(s) payable to the statutory auditor/s together with fees payable to its associate concern(s) or corporate body(ies) do/does not exceed the aggregate of fee payable for carrying out the statutory audit.

Chapter X

Appointment of an auditor when he is indebted to a concern

10.0 A member of the Institute in practice or a partner of a firm in practice or a firm shall not accept appointment as auditor of a concern while indebted to the concern or given any guarantee or provided any security in connection with the indebtedness of any third person to the concern, for limits fixed in the statute and in other cases for amount exceeding Rs. 10,000/-

Chapter XI

Directions in case of unjustified removal of auditors

11.0 A member of the Institute in practice shall follow the direction given, by the Council or an appropriate Committee or on behalf of any of them, to him being the incoming auditor(s) not to accept the appointment as auditor(s), in the case of unjustified removal of the earlier auditor(s).

Chapter XII

Minimum Audit Fee in respect of Audit*

12.0 A member of the Institute in practice shall not, on behalf of the firm of chartered accountants in which he is a partner, accept or carry out any audit work involving receipt of audit fees (excluding reimbursement of expenses, if any) for such work of an amount less than what is specified hereunder:-

- (a) consisting of 5 or more partners but less than 10 partners with at least one partner holding a certificate of practice for five years or more; or
- (b) consisting of 10 or more partners with at least one partner holding a certificate of practice for five years or more.

		Practising firm having 5 or more partners but less than 10 partners	Practising firm having 10 or more partners
(i)	In cities with population of 3 million and above. (as per the last census)	Rs. 6000/-p.a.	Rs. 12000/-p.a.
(ii)	In cities/towns having population of less than 3 million. (as per the last census)	Rs. 3500/-p.a.	Rs. 8000/-p.a.

Provided that such restriction shall not apply in respect of the following: -

- (i) audit of accounts of charitable institutions clubs, provident funds, etc. where the appointment is honorary i.e. without any fees;
- (ii) statutory audit of branches of banks including regional rural banks;
- (iii) audit of newly formed concerns relating to two accounting years from the date of commencement of their operations;
- (iv) certification or audit under Income-tax Act or other attestation work carried out by the Statutory Auditor; and
- (v) Sales Tax Audit and VAT Audit.

* Chapter XII – 'Minimum Audit fee in respect of Audit' was repealed by the Council at its 306th meeting held on 7th & 8th June, 2011.

12.1 Explanation:

For the purpose of these Guidelines, the expression statutory auditor means and includes a chartered accountant appointed as an auditor under a Central/State or Provincial Act as well as an auditor appointed under any agreement.

The Council has clarified that for the above purpose the audit of Provident Fund Trust, Gratuity Fund etc. carried out by the statutory auditor are to be considered as separate and distinct audit so that the above restrictions are applicable to it.

Chapter XIII

Repeal and Saving

13.0 The Notifications as specified in the Schedule hereto, issued under erstwhile Clause (ii) of Part II of the Second Schedule to the Chartered Accountants Act, 1949 by the Council from time to time shall stand repealed from the date herein.

13.1 Notwithstanding such repeal:-

- (a) Anything done or any action taken or purported to have been done or taken, any enquiry or investigation commenced or show cause notice issued in respect of the said notifications shall be deemed to have been done or taken under the corresponding provisions of these guidelines.
- (b) Any application made to the Council or Director (Discipline) under the said Notifications and pending before the Director (Discipline), Board of Discipline, Disciplinary Committee and the Council shall be deemed to have been made under the corresponding provisions of these Guidelines.

SCHEDULE

NOTIFICATIONS ISSUED BY THE COUNCIL UNDER ERSTWHILE CLAUSE (ii) OF PART II OF THE SECOND SCHEDULE TO THE CHARTERED ACCOUNTANTS ACT, 1949.

1. No.1- CA(7)/65, dated 6th November, 1965.
2. No.1- CA (37)/70, Published in Part III Section 4 of the Gazette of India dated 30th May, 1970.
3. No.1- CA (39)/70, Published in Part III Section 4 of the Gazette of India dated 24th October, 1970.
4. No.1-CA (44)/71, Published in Part III Section 4 of the Gazette of India dated 20th March, 1971.
5. No.1- CA (153)/86, Published in Part III Section 4 of the Gazette of India dated 30th August, 1986.
6. No.1- CA (7)/3/88, Published in Part III Section 4 of the Gazette of India dated 4th February, 1989.

7. No.1- CA (7)/9/89, Published in Part III Section 4 of the Gazette of India dated 19th August, 1989 (Since quashed by the Supreme Court vide Order dated 16th May, 2007).

14. No.1- CA (7)/75/2004, Published in Part III Section 4 of the Gazette of India dated 22nd May, 2004.

APPENDIX V

[PARA 9.18]

Relevant extracts from the Code of Ethics, 11th Edition, January 2009 pages 239- 243 (*In view of the fact that with effect from 01.04.2014.the Companies Act, 1956 has been replaced with Companies Act, 2013, the "Code of Ethics" issued by ICAI is under revision. The members may refer the revised "Code of Ethics" as and when published.*)

Clause (4): expresses his opinion on financial statements of any business or any enterprise in which he, his firm or a partner in his firm has a substantial interest;

If the opinion of auditors are to command respect and the confidence of the public, it is essential that it must be free of any interest which is likely to affect their independence. Since financial interest in the business can be a substantial interest and one of the important factors which may disturb independence, the existence of such an interest direct or indirect affects the opinion of the auditors. As per this clause, an auditor should not express his opinion on financial statements of any business or enterprise wherein he has a substantial interest. This is intended to assure the public as regards the faith and confidences that could be reposed on the independent opinion expressed by the auditors.

In this connection attention of members is also invited to Chapter IV of Council Guidelines No.

1-CA(7)/02/2008 dated 8th August, 2008. The said guidelines state that a member of the Institute shall not express his opinion on financial statements of any business or enterprise in which one or more persons, who are his “relatives” within the meaning of AS-18, have either by themselves or in conjunction with such members, a substantial interest in the said business or enterprise. For the purpose of said guideline and aforesaid clause, the expression “substantial interest” shall have meaning as is assigned thereto, under Appendix (9) of the Chartered Accountants Regulations, 1988. (see **Appendix-‘F’**).

The words “financial statements” used in this clause would cover both reports and certificates usually given after an examination of the accounts or the financial statement or any attest function under any statutory enactment or for purposes of income-tax assessments. This would not, however, apply to cases where such statements are prepared by members in employment purely for the information of their respective employers in the normal course of their duties and not meant to be submitted to any outside authority.

Public conscience is expected to be ahead of the law. Members, therefore, are expected to interpret the requirement as regards independence much more strictly than what the law requires and should not place themselves in positions which would either compromise or jeopardise their independence.

Member must take care to see that they do not land themselves in situations where there could be conflict of interest and duty. For example, where a Chartered Accountant is appointed the Liquidator of a Company, he should not qua a Chartered Accountant himself, audit the Statement of Accounts to be filed under Section 551(1) of the Companies Act, 1956. The audit in such circumstances should be done by a chartered Accountant other than the one who is the Liquidator of the Company.

In this connection, the Council has decided not to permit a Chartered Accountant in employment to certify the financial statements of the concern in which he is employed, or of a concern under the same management as the concern in which he is employed, even though he holds certificate of practice and that such certification can be done by any Chartered Accountant in practice. This restriction would not however apply where the certification is permitted by any law, e.g. Section 228(iv) of the Companies Act, 1956 and the Companies (Branch Audit Exemption) Rules, 1961 made thereunder. The Council has also decided that a Chartered Accountant should not by himself or in his firm name:-

- (i) accept the auditorship of a college, if he is working as a part-time lecturer in the college.
- (ii) accept the auditorship of a trust where his partner is either an employee or a trustee of the trust.

The Council has, in this connection, issued the following guidelines:

Attention of the members is invited to the provisions of Clause (4) of Part I of the Second

III.358 Auditing Pronouncements

Schedule to the Chartered Accountants Act which provides that a Chartered Accountant in practice shall be deemed to be guilty of professional misconduct if he expresses his opinion on financial statements of any business or any enterprise in which he, his firm or a partner in his firm has a substantial interest.

Many new areas of professional work have been added, e.g., Tax Audit, Concurrent Audit of Banks, Concurrent Audit of Borrowers of Financial institutions, Audit of non-corporate borrowers of banks and financial institutions, audit of stock exchange, brokers etc. The Council wishes to emphasize that the aforesaid requirement of Clause (4) are equally applicable while performing all types of attest functions by the members. Some of the situations which may arise in the applicability of Clause (4) are discussed below for the guidance of members:-

1. Where the member, his firm or his partner or his relative has substantial interest in the business or enterprise.

The independence of mind is a fundamental concept of audit and/or expression of opinion on the financial statements in any form and, therefore, must always be maintained. Nothing can substitute for the essential and fundamental requirements of independence. Therefore, the Council's views are clarified in the following circumstances.

(i) An enterprise/concern of which a member is either an owner or a partner

The holding of interest in the business or enterprise by a member himself whether as sole-proprietor or partner in a firm, in the opinion of the Council, would affect his independence of mind in the performance of professional duties in conducting the audit and/or expressing an opinion on financial statements of such enterprise. Therefore, a member should not audit financial statements of such business or enterprise.

(ii) Where the partner or relative of a member has substantial interest

The holding of substantial interest by the partner or relative of the member in the business or enterprise of which the audit is to be carried out and opinion is to be expressed on the financial statement, may also affect the independence of mind of the member, in the opinion of Council, in the performance of professional duties. Therefore, the member may, for the same reasons as not to compromise his independence, desist from undertaking the audit of financial statements of such business or enterprise.

2. Where the member or his partner or relative is a director or in the employment of an officer or an employee of the Company.

Section 226 of the Companies Act specifically prohibits a member from auditing the accounts of a Company in which he is a director or in the employment of an officer or an employee of the Company. Although the provisions of the aforesaid section are not specifically applicable in the context of audits performed under other statutes, e.g. tax audit, yet the underlying principle of independence of mind is equally applicable in those situations also. Therefore, the Council's views are clarified in the following situations.

(i) Where a member is a director

In cases where the member is a director of a Company the financial statements of which are to be audited and/or opinion is to be expressed, he should not undertake such job and/or express opinion on the financial statements of that Company.

(ii) Where a partner or relative of the member is a director in the Company who has a substantial interest.

In such cases for the reason as not to compromise with the independence of mind, the member may desist from undertaking the audit of financial statements and/or expression of opinion thereon. The meaning of the words “relative” and “substantial interest” shall be the same as are contained in the Resolution passed by the Council in pursuance to Regulation, 190A of Chartered Accountants Regulations, 1988 (see **Appendix-‘F’**).

An accountant is expected to be no less independent in the discharge of his duties as a tax consultant or as a financial adviser than as auditor. In fact, it is necessary that he should bear the same degree of integrity and independence of mind in all spheres of his work. Unless this is done, the accounts of Companies audited by Chartered Accountants or statements made by them during the course of assessment proceedings would not be relied upon as correct by the authorities.

The Council has clarified that the members are not permitted to write the books of account of their auditee clients.

A statutory auditor of a Company cannot also be its internal auditor, as it will not be possible for him to give independent and objective report issued under sub-Section 4A of Section 227 of the Companies Act read with the Companies (Auditor’s Report) Order, 2003.

A member should satisfy himself before accepting an appointment as an auditor of an entity that his appointment is in accordance with the statute governing the entity. In case the entity is constituted under a trust deed/instrument, the member should satisfy whether his appointment is valid according to the instrument constituting the entity and rules and regulations made thereunder. In case the appointment is to be authorised by the regulatory authorities such as in the case of cooperative societies, trusts etc. then the member must satisfy whether such regulatory authorities have authorised the managing committee of the society/trust for appointment of the auditors. In a case where any entity is being managed by a Managing Committee or Board of Trustees or Board of Governors by whatever name called he should ensure that his appointment is duly made by a resolution passed of such Managing Committee or Board of Trustees or Board of Governors. Even in case of partnership or sole proprietary concerns, the member must ensure that a letter of appointment/engagement is given by the firm/sole proprietor before he accepts the appointment/ engagement.

APPENDIX VI**[PARA 9.26]****FORM OF TAX AUDIT PARTICULARS TO BE FURNISHED BY MEMBERS/FIRM****Record of Tax Audit Assignments**

1. Name of the Member accepting the assignment
2. Membership No.
3. Financial year of audit acceptance
4. Name and Registration No. of the firm/ firms of which the member is a proprietor or partner.

Sl.No.	Name of the auditee	Assessment year of the auditee	Date of appointment	Date of acceptance	Name of the firm on whose behalf the member has accepted the assignment	Date of communication with the previous auditor (applicable)

XIV)	PROJECT FINANCING			
	(a)	Preparation of CMA Data	See Note 1	See Note 1
	(b)	Services relating to Financial sector	See Note 1	See Note 1

Notes:

1) Fees to be charged depending on the complexity and the time spent on the particular assignment.

2) The above recommended minimum scale of fees is as recommended by the Committee for Capacity Building of CA Firms & Small and Medium Practitioners (CCBCAF&SMP) of ICAI and duly considered by the council.

3) The aforesaid table states recommendatory minimum scale of fees works out by taking into account average time required to complete such assignments. However, members are free to charge varying rates depending upon the nature and complexity of assignment and time involved in completing the same.

4) Office time spent in travelling & out-of-pocket expenses would be chargeable. The Committee issues for general information the above recommended scale of fees which it considers reasonable under present conditions. It will be appreciated that the actual fees charged in individual cases will be matter of agreement between the member and the client.

5) Service Tax should be collected separately wherever applicable.

6) The Committee also recommends that the bill for each service should be raised separately and immediately after the services are rendered.

7) "Class A Cities here includes Delhi, Mumbai, Calcutta, Chennai, Pune, Hyderabad, Bangalore and Ahmedabad.

Class B Cities includes all other cities not included in "Class A".

8) The amount charged will be based on the location of the service provider.

Please note the above mentioned rates are as per the data available on ICAI website at below link:

http://www.icaai.org/new_post.html?post_id=7252

APPENDIX VIII

[PARA 10.3 & 10.8]

I. Harmonised Criteria for Classification of Entities

(1) Criteria for classification of non-corporate entities as decided by the Institute of Chartered Accountants of India

Level I Entities

Non-corporate entities which fall in any one or more of the following categories, at the end of the relevant accounting period, are classified as Level I entities:

- (i) Entities whose equity or debt securities are listed or are in the process of listing on any stock exchange, whether in India or outside India.

III.370 Auditing Pronouncements

- (ii) Banks (including co-operative banks), financial institutions or entities carrying on insurance business.
- (iii) All commercial, industrial and business reporting entities, whose turnover (excluding other income) exceeds rupees fifty crore in the immediately preceding accounting year.
- (iv) All commercial, industrial and business reporting entities having borrowings (including public deposits) in excess of rupees ten crore at any time during the immediately preceding accounting year.
- (v) Holding and subsidiary entities of any one of the above.

Level II Entities (SMEs)

Non-corporate entities which are not Level I entities but fall in any one or more of the following categories are classified as Level II entities:

- (i) All commercial, industrial and business reporting entities, whose turnover (excluding other income) exceeds 1 crore but does not exceed rupees fifty crore in the immediately preceding accounting year.
- (ii) All commercial, industrial and business reporting entities having borrowings (including public deposits) in excess of rupees one crore but not in excess of rupees ten crore at any time during the immediately preceding accounting year.
- (iii) Holding and subsidiary entities of any one of the above.

Level III Entities (SMEs)

Non-corporate entities which are not covered under Level I and Level II are considered as Level III entities.

Additional requirements

- (1) An SME which does not disclose certain information pursuant to the exemptions or relaxations given to it should disclose (by way of a note to its financial statements) the fact that it is an SME and has complied with the Accounting Standards insofar as they are applicable to entities falling in Level II or Level III, as the case may be.
- (2) Where an entity, being covered in Level II or Level III, had qualified for any exemption or relaxation previously but no longer qualifies for the relevant exemption or relaxation in the current accounting period, the relevant standards or requirements become applicable from the current period and the figures for the corresponding period of the previous accounting period need not be revised merely by reason of its having ceased to be covered in Level II or Level III, as the case may be. The fact that the entity was covered in Level II or Level III, as the case may be, in the previous period and it had availed of the exemptions or relaxations available to that Level of entities should be disclosed in the notes to the financial statements.

(3) Where an entity has been covered in Level I and subsequently, ceases to be so covered, the entity will not qualify for exemption/relaxation available to Level II entities, until the entity ceases to be covered in Level I for two consecutive years. Similar is the case in respect of an entity, which has been covered in Level I or Level II and subsequently, gets covered under Level III.

(4) If an entity covered in Level II or Level III opts not to avail of the exemptions or relaxations available to that Level of entities in respect of any but not all of the Accounting Standards, it should disclose the Standard(s) in respect of which it has availed the exemption or relaxation.

(5) If an entity covered in Level II or Level III desires to disclose the information not required to be disclosed pursuant to the exemptions or relaxations available to that Level of entities, it should disclose that information in compliance with the relevant Accounting Standard.

(6) An entity covered in Level II or Level III may opt for availing certain exemptions or relaxations from compliance with the requirements prescribed in an Accounting Standard:

Provided that such a partial exemption or relaxation and disclosure should not be permitted to mislead any person or public.

(7) In respect of Accounting Standard (AS) 15, *Employee Benefits*, exemptions/ relaxations are available to Level II and Level III entities, under two sub-classifications, viz., (i) entities whose average number of persons employed during the year is 50 or more, and (ii) entities whose average number of persons employed during the year is less than 50. The requirements stated in paragraphs (1) to (6) above, mutatis mutandis, apply to these sub-classifications.

(2) Criteria for classification of companies under the Companies (Accounting Standards) Rules, 2006

Small and Medium-Sized Company (SMC) as defined in Clause 2(f) of the Companies (Accounting Standards) Rules, 2006:

- (f) "Small and Medium Sized Company" (SMC) means, a company-
- (i) whose equity or debt securities are not listed or are not in the process of listing on any stock exchange, whether in India or outside India;
 - (ii) which is not a bank, financial institution or an insurance company;
 - (iii) whose turnover (excluding other income) does not exceed rupees fifty crore in the immediately preceding accounting year;
 - (iv) which does not have borrowings (including public deposits) in excess of rupees ten crore at any time during the immediately preceding accounting year; and

III.372 Auditing Pronouncements

- (v) which is not a holding or subsidiary company of a company which is not a small and medium-sized company.

Explanation: For the purposes of clause (f), a company shall qualify as a Small and Medium Sized Company, if the conditions mentioned therein are satisfied as at the end of the relevant accounting period.

Non-SMCs

Companies not falling within the definition of SMC are considered as Non-SMCs.

Instructions

A. General Instructions

1. SMCs shall follow the following instructions while complying with Accounting Standards under these Rules:-
 - 1.1 the SMC which does not disclose certain information pursuant to the exemptions or relaxations given to it shall disclose (by way of a note to its financial statements) the fact that it is an SMC and has complied with the Accounting Standards insofar as they are applicable to an SMC on the following lines:

“The Company is a Small and Medium Sized Company (SMC) as defined in the General Instructions in respect of Accounting Standards notified under the Companies Act, 1956. Accordingly, the Company has complied with the Accounting Standards as applicable to a Small and Medium Sized Company.”
 - 1.2 Where a company, being an SMC, has qualified for any exemption or relaxation previously but no longer qualifies for the relevant exemption or relaxation in the current accounting period, the relevant standards or requirements become applicable from the current period and the figures for the corresponding period of the previous accounting period need not be revised merely by reason of its having ceased to be an SMC. The fact that the company was an SMC in the previous period and it had availed of the exemptions or relaxations available to SMCs shall be disclosed in the notes to the financial statements.
 - 1.3 If an SMC opts not to avail of the exemptions or relaxations available to an SMC in respect of any but not all of the Accounting Standards, it shall disclose the standard(s) in respect of which it has availed the exemption or relaxation.
 - 1.4 If an SMC desires to disclose the information not required to be disclosed pursuant to the exemptions or relaxations available to the SMCs, it shall disclose that information in compliance with the relevant accounting standard.
 - 1.5 The SMC may opt for availing certain exemptions or relaxations from compliance with the requirements prescribed in an Accounting Standard:

Provided that such a partial exemption or relaxation and disclosure shall not be permitted to mislead any person or public.

B. Other Instructions

Rule 5 of the Companies (Accounting Standards) Rules, 2006, provides as below:

“5. An existing company, which was previously not a Small and Medium Sized Company (SMC) and subsequently becomes an SMC, shall not be qualified for exemption or relaxation in respect of Accounting Standards available to an SMC until the company remains an SMC for two consecutive accounting periods.”

II Applicability of Accounting Standards to Companies

(I) Accounting Standards applicable to all companies in their entirety for accounting periods commencing on or after 7th December, 2006

- AS 1 Disclosures of Accounting Policies
- AS 2 Valuation of Inventories
- AS 4 Contingencies and Events Occurring After the Balance Sheet Date
- AS 5 Net Profit or Loss for the Period, Prior Period Items and Changes in Accounting Policies
- AS 6 Depreciation Accounting
- AS 7 Construction Contracts (revised 2002)
- AS 9 Revenue Recognition
- AS 10 Accounting for Fixed Assets
- AS 11 The Effects of Changes in Foreign Exchange Rates (revised 2003)
- AS 12 Accounting for Government Grants
- AS 13 Accounting for Investments
- AS 14 Accounting for Amalgamations
- AS 16 Borrowing Costs
- AS 18 Related Party Disclosures
- AS 22 Accounting for Taxes on Income
- AS 24 Discontinuing Operations
- AS 26 Intangible Assets

(II) Exemptions or Relaxations for SMCs as defined in the Notification

- (A) Accounting Standards not applicable to SMCs in their entirety:*

III.374 Auditing Pronouncements

AS 3 Cash Flow Statements.

AS 17 Segment Reporting

(B) *Accounting Standards not applicable to SMCs since the relevant Regulations require compliance with them only by certain Non-SMCs³:*

(i) AS 21, Consolidated Financial Statements

(ii) AS 23, Accounting for Investments in Associates in Consolidated Financial Statements

(iii) AS 27, Financial Reporting of Interests in Joint Ventures (to the extent of requirements relating to Consolidated Financial Statements)

(C) *Accounting Standards in respect of which relaxations from certain requirements have been given to SMCs:*

(i) Accounting Standard (AS)15, Employee Benefits (revised 2005)

(a) paragraphs 11 to 16 of the standard to the extent they deal with recognition and measurement of short-term accumulating compensated absences which are non-vesting (i.e., short-term accumulating compensated absences in respect of which employees are not entitled to cash payment for unused entitlement on leaving);

(b) paragraphs 46 and 139 of the Standard which deal with discounting of amounts that fall due more than 12 months after the balance sheet date;

(c) recognition and measurement principles laid down in paragraphs 50 to 116 and presentation and disclosure requirements laid down in paragraphs 117 to 123 of the Standard in respect of accounting for defined benefit plans. However, such companies should actuarially determine and provide for the accrued liability in respect of defined benefit plans by using the Projected Unit Credit Method and the discount rate used should be determined by reference to market yields at the balance sheet date on government bonds as per paragraph 78 of the Standard. Such companies should disclose actuarial assumptions as per paragraph 120(l) of the Standard; and

³ AS 21, AS 23 and AS 27 (relating to consolidated financial statements) are required to be complied with by a company if the company, pursuant to the requirements of a statute/regulator or voluntarily, prepares and presents consolidated financial statements.

- (d) recognition and measurement principles laid down in paragraphs 129 to 131 of the Standard in respect of accounting for other long-term employee benefits. However, such companies should actuarially determine and provide for the accrued liability in respect of other long-term employee benefits by using the Projected Unit Credit Method and the discount rate used should be determined by reference to market yields at the balance sheet date on government bonds as per paragraph 78 of the Standard.
- (ii) AS 19, Leases
Paragraphs 22 (c),(e) and (f); 25 (a), (b) and (e); 37 (a) and (f); and 46 (b) and (d) relating to disclosures are not applicable to SMCs.
- (iii) AS 20, Earnings Per Share
Disclosure of diluted earnings per share (both including and excluding extraordinary items) is exempted for SMCs.
- (iv) AS 28, Impairment of Assets
SMCs are allowed to measure the 'value in use' on the basis of reasonable estimate thereof instead of computing the value in use by present value technique. Consequently, if an SMC chooses to measure the 'value in use' by not using the present value technique, the relevant provisions of AS 28, such as discount rate etc., would not be applicable to such an SMC. Further, such an SMC need not disclose the information required by paragraph 121(g) of the Standard.
- (v) AS 29, Provisions, Contingent Liabilities and Contingent Assets
Paragraphs 66 and 67 relating to disclosures are not applicable to SMCs.
- (D) *AS 25, Interim Financial Reporting, does not require a company to present interim financial report. It is applicable only if a company is required or elects to prepare and present an interim financial report. Only certain Non-SMCs are required by the concerned regulators to present interim financial results, e.g, quarterly financial results required by the SEBI. Therefore, the recognition and measurement requirements contained in this Standard are applicable to those Non-SMCs for preparation of interim financial results.*

III. Applicability of Accounting Standards to Non-corporate Entities (As on 1.4.2008)

- (I) **Accounting Standards applicable to all Non-corporate Entities in their entirety (Level I, Level II and Level III)**
AS 1 Disclosures of Accounting Policies

III.376 Auditing Pronouncements

- AS 2 Valuation of Inventories
- AS 4 Contingencies and Events Occurring After the Balance Sheet Date
- AS 5 Net Profit or Loss for the Period, Prior Period Items and Changes in Accounting Policies
- AS 6 Depreciation Accounting
- AS 7 Construction Contracts (revised 2002)
- AS 9 Revenue Recognition
- AS 10 Accounting for Fixed Assets
- AS 11 The Effects of Changes in Foreign Exchange Rates (revised 2003)
- AS 12 Accounting for Government Grants
- AS 13 Accounting for Investments
- AS 14 Accounting for Amalgamations
- AS 16 Borrowing Costs
- AS 22 Accounting for Taxes on Income
- AS 26 Intangible Assets

(II) Exemptions or Relaxations for Non-corporate Entities falling in Level II and Level III (SMEs)

(A) Accounting Standards not applicable to Non-corporate Entities falling in Level II in their entirety:

- AS 3 Cash Flow Statements
- AS 17 Segment Reporting

(B) Accounting Standards not applicable to Non-corporate Entities falling in Level III in their entirety:

- AS 3 Cash Flow Statements
- AS 17 Segment Reporting
- AS 18 Related Party Disclosures
- AS 24 Discontinuing Operations

- (C) *Accounting Standards not applicable to all Non-corporate Entities since the relevant Regulators require compliance with them only by certain Level I entities:*⁴
- (i) AS 21, Consolidated Financial Statements
 - (ii) AS 23, Accounting for Investments in Associates in Consolidated Financial Statements
 - (iii) AS 27, Financial Reporting of Interests in Joint Ventures (to the extent of requirements relating to Consolidated Financial Statements)
- (D) *Accounting Standards in respect of which relaxations from certain requirements have been given to Non-corporate Entities falling in Level II and Level III (SMEs):*
- (i) Accounting Standard (AS) 15, Employee Benefits (revised 2005)
 - (1) Level II and Level III Non-corporate entities whose average number of persons employed during the year is 50 or more are exempted from the applicability of the following paragraphs:
 - (a) paragraphs 11 to 16 of the standard to the extent they deal with recognition and measurement of short-term accumulating compensated absences which are non-vesting (i.e., short-term accumulating compensated absences in respect of which employees are not entitled to cash payment for unused entitlement on leaving);
 - (b) paragraphs 46 and 139 of the Standard which deal with discounting of amounts that fall due more than 12 months after the balance sheet date;
 - (c) recognition and measurement principles laid down in paragraphs 50 to 116 and presentation and disclosure requirements laid down in paragraphs 117 to 123 of the Standard in respect of accounting for defined benefit plans. However, such entities should actuarially determine and provide for the accrued liability in respect of defined benefit plans by using the Projected Unit Credit Method and the discount rate used should be determined by reference to market yields at the balance sheet date on government bonds as per paragraph 78 of the Standard. Such entities should disclose actuarial assumptions as per paragraph 120(I) of the Standard; and

⁴ AS 21, AS 23 and AS 27 (to the extent these standards relate to preparation of consolidated financial statements) are required to be complied with by a non-corporate entity if the non-corporate entity, pursuant to the requirements of a statute/regulator or voluntarily, prepares and presents consolidated financial statements.

III.378 Auditing Pronouncements

- (d) recognition and measurement principles laid down in paragraphs 129 to 131 of the Standard in respect of accounting for other long-term employee benefits. However, such entities should actuarially determine and provide for the accrued liability in respect of other long-term employee benefits by using the Projected Unit Credit Method and the discount rate used should be determined by reference to market yields at the balance sheet date on government bonds as per paragraph 78 of the Standard.
- (2) Level II and Level III Non-corporate entities whose average number of persons employed during the year is less than 50 are exempted from the applicability of the following paragraphs:
 - (a) paragraphs 11 to 16 of the standard to the extent they deal with recognition and measurement of short-term accumulating compensated absences which are non-vesting (i.e., short-term accumulating compensated absences in respect of which employees are not entitled to cash payment for unused entitlement on leaving);
 - (b) paragraphs 46 and 139 of the Standard which deal with discounting of amounts that fall due more than 12 months after the balance sheet date;
 - (c) recognition and measurement principles laid down in paragraphs 50 to 116 and presentation and disclosure requirements laid down in paragraphs 117 to 123 of the Standard in respect of accounting for defined benefit plans. However, such entities may calculate and account for the accrued liability under the defined benefit plans by reference to some other rational method, e.g., a method based on the assumption that such benefits are payable to all employees at the end of the accounting year; and
 - (d) recognition and measurement principles laid down in paragraphs 129 to 131 of the Standard in respect of accounting for other long-term employee benefits. Such entities may calculate and account for the accrued liability under the other long-term employee benefits by reference to some other rational method, e.g., a method based on the assumption that such benefits are payable to all employees at the end of the accounting year.
- (ii) AS 19, Leases
Paragraphs 22 (c),(e) and (f); 25 (a), (b) and (e); 37 (a) and (f); and 46 (b) and (d) relating to disclosures are not applicable to non-corporate entities falling in Level II .
Paragraphs 22 (c),(e) and (f); 25 (a), (b) and (e); 37 (a), (f) and (g); and 46 (b), (d) and (e) relating to disclosures are not applicable to Level III entities.
- (iii) AS 20, Earnings Per Share

Diluted earnings per share (both including and excluding extraordinary items) is not required to be disclosed by non-corporate entities falling in Level II and Level III and information required by paragraph 48(ii) of AS 20 is not required to be disclosed by Level III entities if this standard is applicable to these entities.

(iv) AS 28, Impairment of Assets

Non-corporate entities falling in Level II and Level III are allowed to measure the 'value in use' on the basis of reasonable estimate thereof instead of computing the value in use by present value technique. Consequently, if a non-corporate entity falling in Level II or Level III chooses to measure the 'value in use' by not using the present value technique, the relevant provisions of AS 28, such as discount rate etc., would not be applicable to such an entity. Further, such an entity need not disclose the information required by paragraph 121(g) of the Standard.

(v) AS 29, Provisions, Contingent Liabilities and Contingent Assets

Paragraphs 66 and 67 relating to disclosures are not applicable to non-corporate entities falling in Level II and Level III.

(E) *AS 25, Interim Financial Reporting, does not require a non-corporate entity to present interim financial report. It is applicable only if a non-corporate entity is required or elects to prepare and present an interim financial report. Only certain Level I non-corporate entities are required by the concerned regulators to present interim financial results, e.g., quarterly financial results required by the SEBI. Therefore, the recognition and measurement requirements contained in this Standard are applicable to those Level I non-corporate entities for preparation of interim financial results.*

APPENDIX IX

[PARA 11.11]

APPLICABILITY OF SA 700, FORMING AN OPINION AND REPORTING ON FINANCIAL STATEMENTS, TO FORMATS OF AUDITOR'S REPORTS PRESCRIBED UNDER VARIOUS LAWS AND/ OR REGULATIONS (22.08.2013)

1. The Council of ICAI, at its 326th meeting held from 27th to 29th July 2013 considered the issue relating to application of Standard on Auditing (SA) 700, Forming An Opinion And Reporting on Financial Statements to such cases where the format of the auditor's report is prescribed under the relevant law or the regulation thereunder and are per se not in line with the requirements of SA 700. The Council noted that in many cases such prescribed auditor's

III.380 Auditing Pronouncements

report were required to be filed online in a preset form and, hence, it was not possible for the auditors to make necessary changes in these reports to bring them in line with the SA 700. Similarly, many a times, even where the auditor's report were to be submitted in a physical form and not filed online, the concerned regulatory/ government agencies may not accept such audit reports which contained any changes made by the auditors to the prescribed formats to bring them in line with SA 700.

2. In view of the above, the Council decided that while the matter was being taken up by the Institute with the relevant regulatory authorities/ Government agencies, etc., to change the prescribed formats for bringing the same in line with the requirements of SA 700, the members may, in the situations described in paragraph 1 above, submit the auditor's report in the format/s prescribed under the relevant law or regulation until announcement of necessary change is made by the appropriate authority. In such cases the members would not be viewed as having not complied with the provisions of SA 700.

3. In this context, it may also be noted that paragraph A55 of the SA 200, Overall Objectives of the Independent Auditor and the Conduct of An Audit in Accordance With Standards on Auditing clearly states as follows:

"A55. In performing an audit, the auditor may be required to comply with legal or regulatory requirements in addition to the SAs. The SAs do not override laws and regulations that govern an audit of financial statements....."

4. Further, paragraph 43 of SA 700 requires that if the auditor is required by any law or regulation to use a specific layout or wording of the auditor's report, the auditor shall refer to Standards on Auditing only if the auditor's report includes, at minimum, each of the elements as prescribed in the said paragraph.

5. On a perusal of a cross section of the formats of the auditor's report prescribed under various laws, specially, the Income-tax Act, 1961 and the Value Added Tax Acts of various States, it is clear that these prescribed formats do not contain all the elements of the auditor's report as required in paragraph 43 of SA 700. In the background of the difficulties mentioned in paragraph 1 above, it may also not be possible for the auditors to suitably modify the prescribed format. Accordingly, it would not per se be possible for the auditors to state in their audit reports that the audit has been carried out in accordance with the Standards on Auditing. However, the auditors would be required to carry out the audits in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India.

The same can also be downloaded from the link below:

APPENDIX X

[PARA 13.13]

Circular No.561, dated 22nd May, 1990

Subject: Tax audit under section 44AB of the Income-tax Act, 1961, in the case of companies having accounting year other than financial year - Regarding

1. The Board have received representations regarding difficulties faced in complying with the provisions of section 44AB of the Income-tax Act, 1961, in the case of companies which follow an accounting period other than financial year.
2. Section 3 of the Income-tax Act, *inter alia*, provides that with effect from 1st April, 1989, "previous year" for the purposes of that Act means financial year immediately preceding the assessment year. In spite of the introduction of a uniform previous year for purposes of income-tax, some companies may adopt an accounting period other than the financial year, say the calendar year, under the Companies Act for other purposes.
3. In such cases, a question has arisen as to whether, under section 44AB of the Income-tax Act, the tax auditor can audit and certify the accounts for the period for which accounts have been maintained under the Companies Act (i.e., in this case the calendar year) or whether the tax auditor will have to certify the accounts for the relevant financial year which is the uniform accounting year for tax purposes.
4. The Board have considered the matter and are of opinion that as the income of the previous year is chargeable to tax and, for the purposes of Income-tax Act, the previous year is the financial year, the tax auditor would have to carry out the audit under section 44AB in respect of the period covered by the previous year, i.e., the relevant financial year. The proviso to the aforesaid section 44AB, therefore, covers only the cases where the accounts are audited under any other law in respect of the financial year. Where the accounting year is different from the financial year, the proviso to section 44AB will not apply. Consequently, the tax auditors would have to carry out the tax audit in respect of the period covered by the relevant financial year and submit his report in Form 3CB as required in rule 6G(1)(b) of the Income-tax Rules.

Sd/-
Nishi Nair
Under Secretary to the Government of India.
[F.No.205/4/90-ITA-II]

APPENDIX XI
[PARA 18.1, 32.7]

Circular No.739 dated 25-3-1996

Whether for assessment years subsequent to assessment year 1996-97, no deduction under section 40(b)(v) will be admissible unless partnership deed either specifies amount of remuneration payable to each individual working partner or lays down manner of quantifying such remuneration

1. The Board have received representations seeking clarification regarding disallowance of remuneration paid to the working partners as provided under section 40(b)(v) of the Income-tax Act. In particular, the representations have referred to two types of clauses which are generally incorporated in the partnership deeds.

These are:

- (i) The partners have agreed that the remuneration to a working partner will be the amount of remuneration allowable under the provisions of section 40(b)(v) of the Income-tax Act; and
- (ii) The amount of remuneration to working partner will be as may be mutually agreed upon between partners at the end of the year.

It has been represented that the Assessing Officers are not allowing deduction on the basis of these and similar clauses in the course of scrutiny assessments for the reason that they neither specify the amount of remuneration to each individual nor lay down the manner of quantifying such remuneration.

2. The Board have considered the representations. Since the amended provisions of section 40(b) have been introduced only with effect from the assessment year 1993-94 and these may not have been understood correctly, the Board are of the view that a liberal approach may be taken for the initial years. It has been decided that for the assessment years 1993-94 to 1996-97 deduction for remuneration to a working partner may be allowed on the basis of the clauses of the type mentioned at 1(i) above.

3. In cases where neither the amount has been quantified nor even the limit of total remuneration has been specified but the same has been left to be determined by the partners at the end of the accounting period, in such cases payment of remuneration to partners cannot be allowed as deduction in the computation of firm's income.

4. It is clarified that for the assessment years subsequent to the assessment year 1996-97, no deduction under section 40(b)(v) will be admissible unless the partnership deed either

specifies the amount of remuneration payable to each individual working partner or lays down the manner of quantifying such remuneration.

APPENDIX XII

[PARA 39.11]

THE RELEVANT EXTRACTS OF THE MICRO, SMALL AND MEDIUM ENTERPRISES DEVELOPMENT ACT, 2006

“Appointed day” means the day following immediately after the expiry of the period of fifteen days from the day of acceptance or the day of deemed acceptance of any goods or any services by a buyer from a supplier.

“Day of acceptance” means the day of actual delivery of the goods or the rendering of service or where any objection is made in writing by the buyer regarding the acceptance of goods or services within 15 days from the day of delivery of goods or rendering of services, the day on which the objection is removed by the supplier.

“Day of deemed acceptance” means , where no objection is made in writing by the buyer regarding acceptance of goods or services within fifteen days from the day of deliver of the goods or rendering of services, the day of the actual delivery of goods or the rendering of services.

“Buyer” means who so ever buys any goods or receives any services from the supplier for a consideration.

“Supplier” means a micro or small enterprise, which has filed a memorandum with the authority referred to in section 7(1)(a).

“Micro Enterprise” means:

- (a) In case of enterprises engaged in the manufacture or production of goods pertaining to any industry specified in the first schedule to the Industries(Development and Regulation) Act, 1951 an enterprise, where the investment in plant and machinery does not exceed twenty five lakh rupees;
- (b) In case of enterprises engaged in providing or rendering services, an enterprise, where the investment in equipment does not exceed ten lakh rupees.

“Small enterprise” means:

- (a) In case of enterprises engaged in the manufacture or production of goods pertaining to any industry specified in the first schedule to the Industries (Development and Regulation) Act, 1951 an enterprise, where the investment in plant and machinery is more than twenty five lakh rupees but does not exceed five crore rupees;

III.384 Auditing Pronouncements

- (b) In case of enterprises engaged in providing or rendering services, an enterprise, where the investment in equipment is more than ten lakh rupees but does not exceed two crore rupees.

“Medium enterprise” means

- (a) In case of enterprises engaged in the manufacture or production of goods pertaining to any industry specified in the first schedule to the Industries(Development and Regulation) Act, 1951 an enterprise, where the investment in plant and machinery is more than five crore rupees but does not exceed ten crore rupees;
- (b) In case of enterprises engaged in providing or rendering services, an enterprise, where the investment in equipment is more than two crore rupees but does not exceed five crore rupees.

Appendix XIII

[Para 40.1]

Chart of persons specified in Section 40A(2)(b)- (Refer Paragraph 40.1)

Part-I

Individual	Firm	Association of persons	HUF	Company
<i>His relatives</i>	<i>Its partners</i>	<i>Its members</i>	<i>Its members</i>	<i>Its directors</i>
	Their relatives	Their relatives	Their relatives	Their relatives

Part-II

Where person having substantial interest in the business or profession of the assessee is			
Individual	Association of persons	HUF	Company
His relatives	Its members	Its members	Its directors
	Their relatives	Their relatives	Their relatives
			any other company carrying on business or profession in which the first mentioned company has substantial interest

Note: Where one or more of the persons falling in any of the above categories (i.e. individual

and his relatives, firm, its partners and their relatives, etc.) have substantial interest in the business or profession carried on by any person – that person is also covered under section 40A(2)(b).

PART III

Director	Partner	Member of AOP	Member of HUF
Companies in which he is a Director	Firms in which he is a partner	AOP of which he is a member	
All other Directors of such Companies	All other partners of such firms	All other members of such AOP	All other members of such HUF
Their relatives	Their relatives	Their relatives	Their relatives

Notes:

1. Relative is defined in section 2(41) as in relation to an individual including husband, wife, brother, sister or any lineal ascendant or descendent of that individual.
2. "Person having a substantial interest" is explained in section 40A as under:
 - i. In the case of company - the person concerned is, at any time, during the previous year the beneficial owner of shares (not being shares entitled to a fixed rate of dividend whether with or without a right to participate in profits) carrying not less than 20% of the voting power.
 - ii. In other cases - such person is at any time during the previous year, beneficially entitled to not less than 20% of the profits of such business or profession.

APPENDIX XIV

[PARA 48.1]

Circular No. 208, dated 15th November, 1976

F.No. 208/7/76-ITA-II

Section 69D of the Income-tax Act, 1961 - Clarification Regarding

Whether payment on or after April 1, 1977 of amount borrowed on hundi is to comply with the section regardless of whether hundi was executed prior to the said date or on or after that date

1. The Taxation Laws (Amendment) Act, 1975, has added a new section 69D in Income-tax Act, 1961, with effect from 1st April, 1977, which provides that if any amount is borrowed from any person on a hundi or any amount due on it is repaid to any person, otherwise than through an account-payee cheque drawn on a bank, the amount so borrowed or repaid shall be assessed as the income of the tax-payer borrowing or repaying the said amount, for the previous year in which the amount is borrowed or repaid. This will also apply to the amount of interest paid on the amount borrowed on hundies. This provision is applicable only in respect of hundies and does not cover other types of loans, such as, repayment of loan by employees to employers, repayment of loan to banks, co-operative societies etc.

2. The term "hundi" has not been defined in the Income-tax Act, 1961. In common commercial parlance, it denotes an indigenous instrument in vernacular language which can be used by the holder thereof to collect money due thereon without using the medium of currency. It may also be regarded as an indigenous form of a bill of exchange expressed in vernacular language which has been in use in the mercantile community in India for the purpose of collecting dues. There are numerous varieties of hundies, for example Darshani Hundi, Muddati Hundi, Shaha Jogi Hundi, Jokhmi Hundi, Nam Jog Hundi, Dhani Jog Hundi, Jawabi Hundi and Zickri chit. The characteristics of hundies differ according to the varieties of the same. The following characteristics are found in most of the hundies:

1. A hundi is payable to a specified person or order or negotiable without endorsement by the payee.
2. A holder is entitled to sue on a hundi without an endorsement in his favour.
3. A hundi accepted by the drawee could be negotiated without endorsement.
4. If a hundi is lost, the owner could claim a duplicate or triplicate from the drawer and present it to the drawee for payment. Interest can be charged where usage is established.

3. This provision will come into force with effect from 1st April, 1977. Accordingly, any payment on or after 1st April, 1977, in respect of an amount borrowed on a hundi will have to comply with the requirements of this provision regardless of whether the hundi was executed prior to the said date or on or after that date.

Circular No. 221, dated 6-6-1977

[F. No. 208/25/76-IT(A-II)],

Whether provisions of the section are applicable to darshani hundi transactions

1. Reference is invited to Board's Circular No. 208 [F. No. 208/7/76-IT(A-II)], dated 15-11-1976 [printed at Sl. No. 478] in which the provisions of section 69D were explained.
2. A "hundi" in common commercial parlance denotes an indigenous form of bill of exchange, by and large in vernacular language, which is being used by the mercantile

community in India. The hundis can be broadly classified as (i) darshani hundis (sight or demand hundis), and (ii) muddati hundis (usance hundis payable after a stipulated period of time mentioned therein). Darshani hundis are of different varieties, viz, (i) shahjog hundis, (ii) dhanijog hundis, (iii) namjog hundis, (iv) dekharanarjog hundis, (v) farmanijog hundis, and (vi) jokhmi hundis.

3. It has been represented to the Board that a darshani hundi created solely for the purpose of remittances of funds or financing inland trade or for operating accounts through indigenous banking channels does not involve borrowal of amounts and as such does not fall within the scope of section 69D. There are more than two parties in a darshani hundi. Normally four parties are involved in the case of a darshani hundi, viz, (i) the rakhya (the holder or purchaser), (ii) the drawer (an indigenous banker or a vyapari), (iii) the drawee (normally an indigenous banker but can also be a vyapari), and (iv) the payee. If the payee is also the rakhya, the parties will be three. Darshani hundi is payable at sight, i.e, immediately on presentation. A muddati (usance) hundi generally involving two parties, is payable after a stipulated period of time mentioned in the hundi.

4. The matter has been considered by the Board. We have been advised that *the provisions of section 69D are not applicable to darshani hundi transactions mentioned hereinafter :*

- 1.(a) A, who is the rakhya obtains on payment from B, the drawer, a hundi drawn on C, the drawee, in favour of D, the payee.
- (b) A, the rakhya having a running account or an overdraft account with B, obtains from him a hundi drawn on C, the drawee, in favour of D, the payee.
- 2.(a) A, a purchaser of goods from B, draws a hundi on C, the drawee, in favour of B or a third party D for the purpose of payment of the price of goods purchased or for settling the account.
- (b) For such purposes B can also draw a hundi on A either in his own favour or in favour of a third party D.
3. A has an account with an indigenous banker C, who has granted a credit facility to A and handed over a hundi book to him. A draws amounts through such hundis payable either to self, or bearer or third party. Such an arrangement arises out of the credit facility already granted and, therefore, no debtor creditor relationship has arisen between the parties because of the drawal of a hundi.

5. Normally, borrowal on hundi arises when a person gets money by execution of a hundi but in the instances cited above the hundi is given in the nature of a security and there is no borrowal on such hundis. Thus in cases of transactions referred to at (1), (2) and (3) of para 4, section 69D is not applicable. The settlement of account between any of the parties to such a darshani hundi can, thus, be otherwise than through an account payee cheque within the meaning of section 69D.

6. This circular covers darshani hundi transactions of the types referred to at (1), (2) and (3) of para 4 above. However, it could not be said that there could be no borrowal on darshani hundi. The transactions not of the type referred to above, on darshani hundis have to be examined with reference to the facts and circumstances of such cases so as to determine whether or not there is a borrowal on such hundis.

Introduction

1. The purpose of this Guidance Note is to provide guidance on engagements which require a 'professional accountant in public practice' (hitherto known as "practitioner")¹ to issue reports other than those which are issued in audits or reviews of historical financial information². The reports which are issued pursuant to audits or reviews of historical financial information are dealt with in Standards on Auditing (SAs) and Standards on Review Engagements (SREs), respectively, issued by the Institute of Chartered Accountants of India (ICAI).

2. In some cases, Government and other authorities under various statutes or notifications require reports or certificates from practitioners in support of statements or other information provided by an entity. Such reports or certificates can also be required to be issued to fulfill a contractual reporting obligation or may be required by the management or those charged with governance of an entity for its own special purposes.

3. Sometimes, the applicable law and regulation or a contractual arrangement that an entity might have entered into, prescribe the wording of report or certificates. The wording often requires the use of word or phrase like "certify" or "true and correct" to indicate absolute level of assurance expected to be provided by the practitioner on the subject matter. Absolute assurance indicates that a practitioner has performed procedures as considered appropriate to reduce the engagement risk³ to zero.

4. A practitioner is expected to provide either a reasonable assurance (about whether the subject matter of examination is materially misstated) or a limited assurance (stating that nothing has come to the practitioner's attention that causes the practitioner to believe that the subject matter is materially misstated). A practitioner is not expected to reduce the engagement risk to zero. This is because there are inherent limitations attached to the procedures which a practitioner may perform in relation to issuance of a report or certificate, as the case may be. The inherent limitations arise from:

- (a) the nature of financial reporting;

¹ The term "Professional accountant in public practice" has the same meaning as given in the Framework for Assurance Engagements, issued by the Institute of Chartered Accountants of India in 2007.

² For meaning of the term "Historical Financial Information", refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

³ For meaning of the term "Engagement Risk", refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

- (b) the use of selective testing;
- (c) the inherent limitations of internal controls;
- (d) the fact that much of the evidence⁴ available to the practitioner is persuasive rather than conclusive;
- (e) the nature of procedures to be performed in a specific situation;
- (f) the use of professional judgment⁵ in gathering and evaluating evidence and forming conclusions based on that evidence;
- (g) in some cases, the characteristics of the underlying subject matter⁶ when evaluated or measured against the criteria⁷; and
- (h) the need for the engagement to be conducted within a reasonable period of time and at a reasonable cost.

5. In view of the above, depending upon the nature, timing and extent of procedures that can be performed based upon the facts and circumstances of the case, a report or certificate issued by a practitioner can provide either reasonable or limited level of assurance. Therefore, whenever a practitioner is required to give a “certificate” or a “report” for special purpose, the practitioner needs to undertake a careful evaluation of the scope of the engagement, i.e., whether the practitioner would be able to provide reasonable assurance or limited assurance on the subject matter.

6. The word ‘certificate’ as described in the laws and regulations or even in the contracts that an entity might have entered into can normally be associated with reasonable assurance. However, depending upon the circumstances and based upon the nature, timing and extent of the procedures which a practitioner can perform, the practitioner can conclude that a reasonable assurance cannot be expressed on the subject matter of the “certificate” and only limited assurance conclusion can be given. The practitioner’s procedures in case where reasonable assurance is to be expressed would be substantially different (and more extensive) from circumstances where limited assurance is to be expressed. The Guidance Note, at relevant places, lists the different procedures to be performed in a reasonable assurance engagement *vis a vis* limited assurance engagement. Accordingly, for the purpose of this Guidance Note, the terms, “report” / “certificate” indicates an “assurance report” issued in compliance with this Guidance Note.

7. Assurance engagements include both assertion based engagements⁸, in which a party

⁴ For meaning of the term “Evidence”, refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

⁵ For meaning of the term “Professional Judgment”, refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

⁶ For meaning of the term “Underlying Subject Matter”, refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

⁷ For meaning of the term “Criteria”, refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

⁸ For meaning of the term “Assertion based Engagements”, refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

III.450 Auditing Pronouncements

other than the practitioner measures or evaluates the underlying subject matter against the criteria, and direct reporting engagements⁹, in which the practitioner measures or evaluates the underlying subject matter against the criteria. To be meaningful, the level of assurance obtained by the practitioner is likely to enhance the intended users'¹⁰ confidence about the subject matter information¹¹ to a degree that is clearly more than inconsequential.

8. The Guidance Note should be read in the context of the Framework for Assurance Engagements, issued by the Institute of Chartered Accountants of India (ICAI). **Appendix 1** to the Guidance Note contains a glossary of certain important terms used in the Guidance Note and is an integral part of the Guidance Note. Further, for the purposes of this Guidance Note, reference to “appropriate party(ies)” should be read hereafter as “the responsible party¹², the measurer¹³ or the evaluator¹⁴, or the engaging party¹⁵, as appropriate.”

Scope

9. This Guidance Note covers assurance engagements¹⁶ other than audits or reviews of historical financial information, as described in the *Framework for Assurance Engagements* (Assurance Framework) issued by the ICAI. This Guidance Note does not apply to assurance engagements for which subject specific Standards on Assurance Engagements have been issued by the ICAI.

10. Not all engagements performed by the practitioners are assurance engagements. Some frequently performed engagements that are not assurance engagements, and therefore not covered by the Guidance Note, include:

- (a) Engagements covered by Standards on Related Services (SRS), such as agreed-upon procedures and compilation engagements;
- (b) The preparation of tax returns where no assurance opinion/conclusion is expressed; and

⁹ For meaning of the term “Direct Reporting Engagements”, refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

¹⁰ For meaning of the term “Intended Users”, refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

¹¹ For meaning of the term “Subject Matter Information”, refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

¹² For meaning of the term “Responsible Party”, refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

¹³ For meaning of the term “Measure”, refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

¹⁴ For meaning of the term “Evaluator”, refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

¹⁵ For meaning of the term “Engaging Party”, refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

¹⁶ For meaning of the term “Assurance Engagements”, refer the Glossary of Terms given in the Appendix 1 to this Guidance Note.

(c) Consulting (or advisory) engagements, such as management and tax consulting.

11. This Guidance Note can also be applied on the reports or certificates related to historical non-financial information that a practitioner may be called upon to issue from time to time. ICAI, from time to time, issues specific Guidance Notes to provide guidance on certain assurance engagements. While complying with the requirements of those specific Guidance Notes, a practitioner may also draw guidance from the principles enunciated in this Guidance Note.

Objectives

12. In conducting an assurance engagement, the objectives of the practitioner are:

(a) To obtain either reasonable assurance¹⁷ or limited assurance¹⁸, as appropriate, about whether the subject matter information is free from material misstatement¹⁹;

(b) To express an opinion (in a reasonable assurance engagement)/a conclusion (in a limited assurance engagement) regarding the outcome of the measurement or evaluation of the underlying subject matter through a written report. The report also describes the basis for the conclusion;

(c) Where the subject matter information is made up of a number of aspects, separate opinion/conclusion may be provided on each aspect. All such separate opinions/conclusions do not need to relate to the same level of assurance. Rather, each opinion/conclusion is expressed in the form that is appropriate to either a reasonable assurance engagement or a limited assurance engagement. References in this Guidance Note to the opinion/conclusion in the assurance report include each opinion/conclusion when separate opinions/conclusions are provided;

(d) To communicate further as required by this Guidance Note.

13. In all cases when reasonable assurance or limited assurance, as appropriate, cannot be obtained and a qualified opinion/conclusion in the practitioner's assurance report is insufficient in the circumstances for the purposes of reporting to the intended users, this Guidance Note requires that the practitioner disclaim an opinion / a conclusion or withdraw (or resign) from the engagement, where withdrawal is possible under applicable law or regulation.

14. The roles played by the responsible party, the measurer or evaluator, and the engaging party can vary. The management and governance structures vary by jurisdiction and by entity,

¹⁷ For meaning of the term "Reasonable Assurance Engagement", refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

¹⁸ For meaning of the term "Limited Assurance Engagement", refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

¹⁹ For meaning of the term "Misstatement", refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

III.452 Auditing Pronouncements

reflecting influences such as different cultural and legal backgrounds, and size and ownership characteristics. Such diversity means that it is not possible for the Guidance Note to specify for all engagements, the person(s) with whom the practitioner is to inquire of, request representations from, or otherwise communicate with in all circumstances. In some cases, for example, when the appropriate party(ies) is(are) only part of a complete legal entity, identifying the appropriate management personnel or those charged with governance with whom to communicate, will require the exercise of professional judgment to determine which person(s) have the appropriate responsibilities for, and knowledge of, the matters concerned.

Conduct of an Assurance Engagement in Accordance with Guidance Note

15. The Guidance Note aims to bring out the procedural differences between a limited assurance engagement *vis a vis* a reasonable assurance engagement. In this Guidance Note, guidance that applies to only limited assurance or reasonable assurance engagements have been presented in a columnar format with the letter “L” (limited assurance) or “R” (reasonable assurance) after the paragraph number. Although some procedures are required only for reasonable assurance engagements, these may nonetheless be appropriate in some limited assurance engagements.

Inability to Achieve an Objective

16. If any of the objectives enumerated in this Guidance Note (refer paragraphs 12 to 14) cannot be achieved, the practitioner should evaluate whether this requires the practitioner to modify the practitioner’s opinion/conclusion or withdraw from the engagement (where withdrawal is possible under applicable law or regulation). In case the practitioner is unable to achieve an objective, it represents a significant matter requiring documentation in accordance with paragraph 92 of this Guidance Note.

Ethical and Quality Control Requirements

17. A practitioner who performs assurance engagements covered under this Guidance Note is governed by the same ethical and quality control requirements as are described in paragraphs 4 and 5 of the Framework for Assurance Engagements.

Engagement Acceptance and Continuance

18. The practitioner needs to be satisfied that appropriate procedures regarding the acceptance and continuance of client relationships and assurance engagements have been followed, and should determine that conclusions reached in this regard are appropriate.

19. The practitioner should accept or continue an assurance engagement only when:

(a) The practitioner has no reason to believe that relevant ethical requirements, including

independence, will not be satisfied;

- (b) The practitioner is satisfied that those persons who are to perform the engagement collectively (the engagement team)²⁰ have the appropriate competence and capabilities; and
- (c) The basis upon which the engagement is to be performed has been agreed, through:
 - i. Establishing that the preconditions for an assurance engagement are present (see also paragraphs 21-22); and
 - ii. Confirming that there is a common understanding between the practitioner and the engaging party of the terms of the engagement, including the practitioner's reporting responsibilities.

20. If the practitioner obtains information that would have caused the practitioner to decline the engagement had that information been available earlier, the practitioner should take necessary action promptly. In case of a firm²¹, the practitioner (i.e., the engagement partner²²)²³ should communicate that information promptly to the firm, so that the firm and the engagement partner can take the necessary action.

Preconditions for the Assurance Engagement

21. In order to establish whether the preconditions for an assurance engagement are present, the practitioner should, on the basis of a preliminary knowledge of the engagement circumstances²⁴ and discussion with the appropriate party(ies), determine whether:

- (a) The roles and responsibilities of the appropriate parties are suitable in the circumstances; and
- (b) The engagement exhibits all of the following characteristics:
 - (i) The underlying subject matter is appropriate;
 - (ii) The criteria that the practitioner expects to be applied in the preparation of the subject matter information are suitable for the engagement circumstances, including that these exhibit the following characteristics as described in paragraph 35 of the Framework for Assurance Engagements:

²⁰ For meaning of the term "Engagement Team", refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

²¹ For meaning of the term "Firm", refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

²² For meaning of the term "Engagement Partner", refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

²³ In the context of a firm, the term practitioner would imply reference to the engagement partner.

²⁴ For meaning of the term "Engagement Circumstances", refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

III.454 Auditing Pronouncements

- a. Relevance.
 - b. Completeness.
 - c. Reliability.
 - d. Neutrality.
 - e. Understandability.
- (iii) The criteria that the practitioner expects to be applied in the preparation of the subject matter information will be available to the intended users²⁵.
- (iv) The practitioner expects to be able to obtain the evidence needed to support the member's conclusion;
- (v) The practitioner's opinion/conclusion, in the form appropriate to either a reasonable assurance engagement or a limited assurance engagement, is to be contained in a written report; and
- (vi) A rational purpose including, in the case of a limited assurance engagement, that the practitioner expects to be able to obtain a meaningful level of assurance.

22. If the preconditions for an assurance engagement are not present, the practitioner should discuss the matter with the engaging party. If changes cannot be made to meet the preconditions, the practitioner would be well advised not to accept the engagement as an assurance engagement, unless required by law or regulation to do so.

Limitation on Scope Prior to Acceptance of the Engagement

23. If the engaging party imposes a limitation on the scope of the practitioner's work in the terms of a proposed assurance engagement, such that the practitioner believes the limitation will result in the practitioner disclaiming an opinion / a conclusion on the subject matter information, the practitioner should not accept such an engagement as an assurance engagement, unless required by law or regulation to do so.

Agreeing on the Terms of the Engagement

24. The practitioner should agree the terms of the engagement with the engaging party. The agreed terms of the engagement should be specified in sufficient detail in an engagement letter or other suitable form of written agreement, written confirmation, or in law or regulation. It is in the interests of both, the engaging party and the practitioner, that the practitioner communicates in writing the agreed terms of the engagement before the commencement of the engagement to help avoid misunderstandings. The terms of engagement, at a minimum, should include the following:

- (a) the objective and scope of engagement;

²⁵ Refer Para 37 of the Framework for Assurance Engagements.

- (b) the responsibilities of the practitioner;
- (c) the responsibilities of engaging party;
- (d) the responsibilities of the responsible party (if different from the engaging party);
- (e) identification of the suitable criteria to be used;
- (f) identification of the subject matter including reference to the law or regulation or the contracts;
- (g) Unrestricted access to whatever records, documentation and other information requested in connection with the engagement;
- (h) The fact that the engagement cannot be relied upon to disclose errors, illegal acts or other irregularities, for example, fraud or defalcations that may exist;
- (i) reference to the expected form and content of report to be issued by the practitioner; and
- (j) a statement that there may be circumstances in which a report may differ from its expected form and content.

25. The agreed terms of engagement can also include other general terms of engagement so long as those terms are not inconsistent with the applicable laws and regulations.

26. The form and content of the written agreement or contract will vary with the engagement circumstances. For example, if law or regulation prescribes in sufficient detail the terms of the engagement, the practitioner need not record them in a written agreement, except for the fact that such law or regulation applies and that the appropriate party acknowledges and understands its responsibilities under such law or regulation. Law or regulation, particularly in the public sector, may mandate the appointment of a practitioner and set out specific powers, such as the power to access appropriate party(ies)'s records and other information, and responsibilities, such as requiring the practitioner to report directly to an authority, the legislature or the public, in case appropriate party(ies) attempt to limit the scope of the engagement.

27. On recurring engagements, the practitioner should assess whether the circumstances require the terms of the engagement to be revised and whether there is a need to remind the engaging party of the existing terms of the engagement.

Acceptance of a Change in the Terms of the Engagement

28. The practitioner should not agree to a change in the terms of the engagement where there is no reasonable justification for doing so. If such a change is made, the practitioner should not disregard evidence that was obtained prior to the change. A change in circumstances that affects the intended users' requirements, or a misunderstanding concerning the nature of the engagement, may justify a request for a change in the engagement, for example, from an assurance engagement to a non-assurance engagement, or from a reasonable assurance engagement to a limited assurance engagement. An inability to obtain sufficient appropriate evidence to form a

reasonable assurance opinion/conclusion is not an acceptable reason to change from a reasonable assurance engagement to a limited assurance engagement.

Assurance Report Prescribed by Law or Regulation

29. In some cases, law or regulation prescribes the layout or wording of the assurance report. In these circumstances, the practitioner would need to evaluate:

- (a) Whether intended users might misunderstand the assurance conclusion; and
- (b) If so, whether additional explanation in the assurance report can mitigate possible misunderstanding.

30. If the practitioner concludes that additional explanation in the assurance report cannot mitigate possible misunderstanding, as the law or regulation does not allow the practitioner to provide such additional explanation in the assurance report to mitigate the risk of users misunderstanding of the assurance conclusion, the practitioner should not accept the engagement, unless required by law or regulation to do so.

31. In case the practitioner is required to issue an assurance report under the applicable laws or regulations, the practitioner should discuss the matter with the engaging party. The practitioner should provide a draft of the assurance report to be issued that duly incorporates the essential elements thereof as prescribed in paragraph 80 of the Guidance Note to the layout or the wordings so prescribed. Both, the practitioner and the engaging party, should agree on the resulting modifications to the layout or wording prescribed under the laws or regulations. The agreement on layout or wording of the assurance report should be duly documented in the engagement letter. The practitioner should then accept and perform the engagement and issue the final assurance report duly incorporating therein the essential elements prescribed in the Guidance Note. If the engaging party does not agree to this approach, the practitioner should consider whether it would be appropriate to accept the engagement.

32. It may also happen that the concerned authorities reject the aforesaid assurance report issued by the practitioner on account of the modifications made to the prescribed layout or wording. In such circumstances, the practitioner should obtain the evidence of rejection of the assurance report by the concerned authorities and make it a part of the engagement documentation. The practitioner, in such a case, may issue the assurance report in the format prescribed under the law or regulation since the practitioner would have complied with the requirements of this Guidance Note while issuing the certificate in the first instance. The practitioner can also consider enclosing a statement containing essential elements of an assurance report as prescribed in paragraph 80 of this Guidance Note to the format prescribed under the law or regulation. The enclosure should also state the fact that a report issued earlier in accordance with this Guidance Note had been rejected by the concerned authorities.

32A. It is recognised that rejections of assurance reports or certificates issued might have also occurred in the past or there could be a situation where the concerned regulator has expressly indicated that any modification to the layout or the wording of the format is not acceptable and if time period available to follow the process in paragraphs 31 and 32 is not sufficient, the practitioner may issue the assurance report in the format prescribed under the law or regulation. If the practitioner has complied with all the requirements of this Guidance Note, the practitioner should also enclose a statement containing essential elements of an assurance report as prescribed in paragraph 80 of this Guidance Note, to the format prescribed under the law or regulation by giving suitable reference of the statement in the format. (e.g. “in terms of our statement of even date” or “to be read with the enclosed statement of even date” etc.)

33. Similarly, the practitioner may conclude, that even where permitted by the law/regulation or it is otherwise accepted by the concerned regulatory bodies to provide additional information/explanation in the assurance report, doing the same will not mitigate the risk of users’ misunderstanding of the assurance conclusion expressed. In such circumstance, the practitioner should mention the circumstances not allowing the practitioner to bring down the risk of users’ misunderstanding in the report being issued by the practitioner. The practitioner should also include such matters in the scope of work documented in the engagement letter.

Professional Skepticism²⁶, Professional Judgment, and Assurance Skills and Techniques

34. The practitioner would need to plan and perform an engagement with professional skepticism, recognizing that circumstances may exist that may cause the subject matter information to be materiality misstated.

35. The practitioner needs to exercise professional judgment in planning and performing an assurance engagement, including determining the nature, timing and extent of procedures.

36. The practitioner should also apply assurance skills and techniques²⁷ as part of an iterative, systematic engagement process.

Planning

37. The practitioner should plan the engagement so that it will be performed in an effective manner, including setting the scope, timing and direction of the engagement, and determining the nature, timing and extent of planned procedures that are required to be carried out in order to achieve the objective of the engagement.

38. The practitioner should determine whether the criteria are suitable for the engagement circumstances, including that they exhibit the characteristics identified in paragraph 21(b)(ii).

²⁶ For meaning of the term “Professional Skepticism”, refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

²⁷ For meaning of the term “Assurance Skills and Techniques”, refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

III.458 Auditing Pronouncements

39. If it is discovered after the engagement has been accepted that one or more preconditions for an assurance engagement is not present, the practitioner should discuss the matter with the appropriate party(ies), and determine:

- (a) Whether the matter can be resolved to the practitioner's satisfaction;
- (b) Whether it is appropriate to continue with the engagement; and
- (c) Whether and, if so, how to communicate the matter in the assurance report.

40. If it is discovered after the engagement has been accepted that some or all of the applicable criteria are unsuitable or some or all of the underlying subject matter is not appropriate for an assurance engagement, the practitioner would need to consider withdrawing from the engagement, if withdrawal is possible under applicable law or regulation. If the practitioner continues with the engagement, the practitioner should express a qualified or adverse opinion/conclusion, or disclaimer of opinion/conclusion, as appropriate in the circumstances.

Materiality

41. The practitioner would consider materiality when:

- (a) Planning and performing the assurance engagement, including when determining the nature, timing and extent of procedures; and
- (b) Evaluating whether the subject matter information is free from material misstatement.

42. Professional judgments about materiality are made in light of surrounding circumstances, but are not affected by the level of assurance, that is, for the same intended users and purpose, materiality for a reasonable assurance engagement is the same as for a limited assurance engagement because materiality is based on the information needs of intended users.

43. The applicable criteria may discuss the concept of materiality in the context of the preparation and presentation of the subject matter information and thereby provide a frame of reference for the practitioner in considering materiality for the engagement. Although applicable criteria may discuss materiality in different terms, the concept of materiality generally includes the matters discussed in paragraphs 42-50. If the applicable criteria do not include a discussion of the concept of materiality, these paragraphs provide the practitioner with a frame of reference.

44. Misstatements, including omissions, are considered to be material if they, individually or in the aggregate, could reasonably be expected to influence relevant decisions of intended users taken on the basis of the subject matter information. The practitioner's consideration of materiality is a matter of professional judgment, and is affected by the practitioner's perception of the common information needs of intended users as a group. In this context, it is reasonable for the practitioner to assume that intended users:

- (a) Have a reasonable knowledge of the underlying subject matter, and a willingness to study

the subject matter information with reasonable diligence;

- (b) Understand that the subject matter information is prepared and assured to appropriate levels of materiality, and have an understanding of any materiality concepts included in the applicable criteria;
- (c) Understand any inherent uncertainties involved in the measuring or evaluating the underlying subject matter; and
- (d) Make reasonable decisions on the basis of the subject matter information taken as a whole.

Unless the engagement has been designed to meet the particular information needs of specific users, the possible effect of misstatements on specific users, whose information needs may vary widely, is not ordinarily considered.

45. Materiality is considered in the context of qualitative factors and, when applicable, quantitative factors. The relative importance of qualitative factors and quantitative factors when considering materiality in a particular engagement is a matter for the practitioner's professional judgment.

46. Qualitative factors may include such things as:

- (a) The number of persons or entities affected by the subject matter.
- (b) The interaction between, and relative importance of, various components of the subject matter information when it is made up of multiple components, such as a report that includes numerous performance indicators.
- (c) The wording chosen with respect to subject matter information that is expressed in narrative form.
- (d) The characteristics of the presentation adopted for the subject matter information when the applicable criteria allow for variations in that presentation.
- (e) The nature of a misstatement, for example, the nature of observed deviations from a control when the subject matter information is a statement that the control is effective.
- (f) Whether a misstatement affects compliance with law or regulation.
- (g) In the case of periodic reporting on an underlying subject matter, the effect of an adjustment that affects past or current subject matter information or is likely to affect future subject matter information.
- (h) Whether a misstatement is the result of an intentional act or is unintentional.
- (i) Whether a misstatement is significant having regard to the practitioner's understanding of known previous communications to users, for example, in relation to the expected outcome of the measurement or evaluation of the underlying subject matter.
- (j) Whether a misstatement relates to the relationship between the responsible party, the

III.460 Auditing Pronouncements

measurer or evaluator, or the engaging party or their relationship with other parties.

- (k) When a threshold or benchmark value has been identified, whether the result of the procedure deviates from that value.
- (l) When the underlying subject matter is a governmental program or public sector entity, whether a particular aspect of the program or entity is significant with regard to the nature, visibility and sensitivity of the program or entity.
- (m) When the subject matter information relates to a conclusion on compliance with law or regulation, the seriousness of the consequences of non-compliance.

47. Quantitative factors relate to the magnitude of misstatements relative to reported amounts for those aspects of the subject matter information, if any, that are:

- (a) Expressed numerically; or
- (b) Otherwise related to numerical values (for example, the number of observed deviations from a control may be a relevant quantitative factor when the subject matter information is a statement that the control is effective).

48. When quantitative factors are applicable, planning the engagement solely to detect individually material misstatements overlooks the fact that the aggregate of uncorrected and undetected individually immaterial misstatements may cause the subject matter information to be materially misstated. It may therefore be appropriate when planning the nature, timing and extent of procedures for the practitioner to determine a quantity less than materiality as a basis for determining the nature, timing and extent of procedures.

49. Materiality relates to the information covered by the assurance report. Therefore, when the engagement covers some, but not all, aspects of the information communicated about an underlying subject matter, materiality is considered in relation to only that portion that is covered by the engagement.

50. Concluding on the materiality of the misstatements identified as a result of the procedures performed requires professional judgment. For example, in a compliance engagement, the entity may have complied with nine provisions of the relevant law or regulation, but did not comply with one provision. Professional judgment is needed to conclude whether the entity complied with the relevant law or regulation as a whole. For example, the practitioner may consider the significance of the provision with which the entity did not comply, as well as the relationship of that provision to the remaining provisions of the relevant law or regulation.

Understanding the Underlying Subject Matter and Other Engagement Circumstances

51. The practitioner should make inquiries of the appropriate party(ies) regarding:
- (a) Whether they have knowledge of any actual, suspected or alleged intentional misstatement or non-compliance with laws and regulations affecting the subject matter information;
 - (b) Whether the responsible party has an internal audit function²⁸ and, if so, make further inquiries to obtain an understanding of the activities and main findings of the internal audit function with respect to the subject matter information; and
 - (c) Whether the responsible party has used any experts in the preparation of the subject matter information.

Limited Assurance	Reasonable Assurance
<p>52L. The practitioner should obtain an understanding of the underlying subject matter and other engagement circumstances sufficient to:</p> <ol style="list-style-type: none"> (a) Enable the practitioner to identify areas where a material misstatement of the subject matter information is likely to arise; and (b) Thereby, provide a basis for designing and performing procedures to address the areas identified in paragraph 52L(a) and to obtain limited assurance to support the practitioner's conclusion. 	<p>52R. The practitioner should obtain an understanding of the underlying subject matter and other engagement circumstances sufficient to:</p> <ol style="list-style-type: none"> (a) Enable the practitioner to identify and assess the risks of material misstatement²⁹ in the subject matter information; and (b) Thereby, provide a basis for designing and performing procedures to respond to the assessed risks and to obtain reasonable assurance to support the practitioner's opinion.
<p>53L. In obtaining an understanding of the underlying subject matter and other engagement circumstances under paragraph 52L, the practitioner should consider the process used to prepare the subject matter information.</p>	<p>53R. In obtaining an understanding of the underlying subject matter and other engagement circumstances under paragraph 52R, the practitioner should obtain an understanding of internal control over the preparation of the subject matter information relevant to the engagement. This includes evaluating the design of those controls relevant to the</p>

Obtaining Evidence

Risk Consideration and Responses to Risks

Limited Assurance	Reasonable Assurance
<p>54L. Based on the practitioner's understanding (see paragraph 52L), the practitioner should:</p> <ul style="list-style-type: none">(a) Identify areas where a material misstatement of the subject matter information is likely to arise;(b) Design and perform procedures to address the areas identified in paragraph 54L(a) and to obtain limited assurance to support the practitioner's conclusion.	<p>54R. Based on the practitioner's understanding (see paragraph 52R) the practitioner should:</p> <ul style="list-style-type: none">(a) Identify and assess the risks of material misstatement in the subject matter information; and(b) Design and perform procedures to respond to the assessed risks and to obtain reasonable assurance to support the practitioner's opinion. In addition to any other procedures on the subject matter information that are appropriate in the engagement circumstances, the practitioner's procedures would include obtaining sufficient appropriate evidence as to the operating effectiveness of relevant controls over the subject matter information when:<ul style="list-style-type: none">(i) The practitioner's assessment of the risks of material misstatement includes an expectation that controls are operating effectively, or(ii) Procedures other than testing of controls cannot alone provide sufficient appropriate evidence.
Determining Whether Additional Procedures are necessary in a Limited Assurance Engagement	Revision of Risk Assessment in a Reasonable Assurance Engagement
55L. If the practitioner becomes aware of a matter(s) that causes the practitioner to believe	55R. The practitioner's assessment of the risks of material misstatement in the subject

<p>that the subject matter information may be materially misstated, the practitioner should design and perform additional procedures to obtain further evidence until the practitioner is able to:</p> <p>(a) Conclude that the matter is not likely to cause the subject matter information to be materially misstated; or</p> <p>(b) Determine that the matter(s) causes the subject matter information to be materially misstated.</p>	<p>matter information may change during the course of the engagement as additional evidence is obtained. In circumstances where the practitioner obtains evidence which is inconsistent with the evidence on which the practitioner originally based the assessment of the risks of material misstatement, the practitioner should revise the assessment and modify the planned procedures accordingly.</p>
---	---

56. When designing and performing procedures, the practitioner would also need to consider the relevance and reliability of the information to be used as evidence. If:

- (a) Evidence obtained from one source is inconsistent with that obtained from another; or
- (b) The practitioner has doubts about the reliability of information to be used as an evidence, the practitioner should determine what changes or additions to the procedures are necessary to resolve the matter, and should consider the effect of the matter, if any, on other aspects of the engagement.

57. The practitioner should accumulate uncorrected misstatements identified during the engagement other than those that are clearly trivial and determine the effect of the misstatement on the assurance report.

Work Performed by a Practitioner's Expert³⁰

58. When the work of a practitioner's expert is to be used, the practitioner should also:
- (a) Evaluate whether the practitioner's expert has the necessary competence, capabilities and objectivity for the practitioner's purposes. In the case of a practitioner's external expert, the evaluation of objectivity should include inquiry regarding interests and relationships that may create a threat to that expert's objectivity;
 - (b) Obtain a sufficient understanding of the field of expertise of the practitioner's expert;
 - (c) Agree with the practitioner's expert on the nature, scope and objectives of that expert's work; and
 - (d) Evaluate the adequacy of the practitioner's expert's work for the practitioner's purposes.

Work Performed by Another Practitioner, a Responsible Party's or Measurer's or Evaluator's Expert, or an Internal Auditor

³⁰ For meaning of the term "Practitioner's Expert", refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

III.464 Auditing Pronouncements

59. When the work of another practitioner is to be used, the practitioner should evaluate whether that work is adequate for the practitioner's purposes.

60. If information to be used as evidence has been prepared using the work of a responsible party's or a measurer's or evaluator's expert, the practitioner should, to the extent necessary having regard to the significance of that expert's work for the practitioner's purposes:

- (a) Evaluate the competence, capabilities and objectivity of that expert;
- (b) Obtain an understanding of the work of that expert; and
- (c) Evaluate the appropriateness of that expert's work as evidence.

61. If the practitioner plans to use the work of the internal audit function, the practitioner should evaluate the following:

- (a) The extent to which the internal audit function's organizational status and relevant policies and procedures support the objectivity of the internal auditors;
- (b) The level of competence of the internal audit function;
- (c) Whether the internal audit function applies a systematic and disciplined approach, including quality control; and
- (d) Whether the work of the internal audit function is adequate for the purposes of the engagement.

Written Representations

62. The practitioner should request from the appropriate party(ies) a written representation:

- (a) That it has provided the practitioner with all information of which the appropriate party(ies) is aware that is relevant to the engagement.
- (b) Confirming the measurement or evaluation of the underlying subject matter against the applicable criteria, including that all relevant matters are reflected in the subject matter information.

63. If, in addition to required representations, the practitioner determines that it is necessary to obtain one or more written representations to support other evidence relevant to the subject matter information, the practitioner should request such other written representations.

64. When written representations relate to matters that are material to the subject matter information, the practitioner should:

- (a) Evaluate their reasonableness and consistency with other evidence obtained, including other representations (oral or written); and

- (b) Consider whether those making the representations can be expected to be well-informed on the particular matters.
65. The date of the written representations should be as near as practicable to, but not after, the date of the assurance report.

Requested Written Representations Not Provided or Not Reliable

66. If one or more of the requested written representations are not provided or the practitioner concludes that there is sufficient doubt about the competence, integrity, ethical values, or diligence of those providing the written representations, or that the written representations are otherwise not reliable, the practitioner should:

- (a) Discuss the matter with the appropriate party(ies);
- (b) Re-evaluate the integrity of those from whom the representations were requested or received and evaluate the effect that this may have on the reliability of representations (oral or written) and evidence in general; and
- (c) Take appropriate actions, including determining the possible effect on the conclusion in the assurance report.

Subsequent Events

67. When relevant to the engagement, the practitioner should consider the effect on the subject matter information and on the assurance report of events up to the date of the assurance report, and should respond appropriately to the facts that become known to the practitioner after the date of the assurance report, that, had they been known to the practitioner at that date, may have caused the practitioner to amend the assurance report. The extent of consideration of subsequent events depends on the potential for such events to affect the subject matter information and to affect the appropriateness of the practitioner's conclusion. However, the practitioner has no responsibility to perform any procedures regarding the subject matter information after the date of the assurance report.

Other Information³¹

68. When documents containing the subject matter information and the assurance report thereon include other information, the practitioner should read that other information to identify material inconsistencies, if any, with the subject matter information or the assurance report and, if on reading that other information, the practitioner:

- (a) Identifies a material inconsistency between that other information and the subject matter information or the assurance report; or

³¹ For meaning of the term "Other Information", refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

- (b) Becomes aware of a material misstatement of fact³² in that other information that is unrelated to matters appearing in the subject matter information or the assurance report,

The practitioner should discuss the matter with the appropriate party(ies) and take further action as appropriate.

Description of Applicable Criteria

69. The practitioner would need to evaluate whether the subject matter information adequately refers to or describes the applicable criteria. The description of the applicable criteria advises intended users of the framework on which the subject matter information is based, and is particularly important when there are significant differences between various criteria regarding how particular matters may be treated in the subject matter information.

70. A description that the subject matter information is prepared in accordance with particular applicable criteria is appropriate only if the subject matter information complies with all relevant requirements of those applicable criteria that are effective. A description of the applicable criteria that contains imprecise qualifying or limiting language (for example, “the subject matter information is in substantial compliance with the requirements of XYZ”) is not an adequate description as it may mislead users of the subject matter information.

Forming the Assurance Opinion/Conclusion

71. The practitioner should evaluate the sufficiency and appropriateness of the evidence obtained in the context of the engagement and, if necessary in the circumstances, attempt to obtain further evidence. The practitioner should consider all relevant evidence, regardless of whether it appears to corroborate or to contradict the measurement or evaluation of the underlying subject matter against the applicable criteria. If the practitioner is unable to obtain necessary further evidence, the practitioner should consider the implications for the practitioner’s opinion/conclusion in paragraph 72³³.

72. The practitioner should form an opinion/a conclusion about whether the subject matter information is free of material misstatement. In forming that opinion/conclusion, the practitioner should consider the practitioner’s conclusion in paragraph 71 regarding the sufficiency and appropriateness of evidence obtained and an evaluation of whether uncorrected misstatements are material, individually or in the aggregate.

73. Evidence is necessary to support the practitioner’s opinion/conclusion and assurance report. It is cumulative in nature and is primarily obtained from procedures performed during the course of the engagement. It may, however, also include information obtained from other sources,

³²For meaning of the term “Misstatement of Fact”, refer the Glossary of Terms given in the Appendix 1 to the Guidance Note.

³³ Refer Para 41- 45 of the Framework for Assurance Engagements.

such as previous engagements (provided the practitioner has determined whether changes have occurred since the previous engagement that may affect its relevance to the current engagement) or the quality control procedures for client acceptance and continuance. Evidence may come from sources inside and outside the appropriate party(ies). Also, information that may be used as evidence may have been prepared by an expert employed or engaged by the appropriate party(ies). Evidence comprises both information that supports and corroborates aspects of the subject matter information, and any information that contradicts aspects of the subject matter information. In addition, in some cases, the absence of information (for example, refusal by the appropriate party(ies) to provide a requested representation) is used by the practitioner, and therefore, also constitutes evidence. Most of the practitioner's work in forming the assurance opinion/conclusion consists of obtaining and evaluating evidence.

74. If the practitioner is unable to obtain sufficient appropriate evidence, a scope limitation exists and the practitioner should express a qualified opinion/conclusion or disclaim an opinion/conclusion, or withdraw from the engagement, where withdrawal is possible under applicable law or regulation, as appropriate.

Preparing the Assurance Report

75. The assurance report should be in writing and should contain a clear expression of the practitioner's opinion/conclusion about the subject matter information. Where the subject matter information is made up of a number of aspects, separate opinions/conclusions may be provided on each aspect. All such separate opinions/conclusions do not need to relate to the same level of assurance. Rather, each conclusion is expressed in the form that is appropriate to either a reasonable assurance engagement or a limited assurance engagement. References in this Guidance Note to the opinion/conclusion in the assurance report include each opinion/conclusion when separate opinions/conclusions are provided.

76. The practitioner's opinion/conclusion should be clearly separated from information or explanations that are not intended to affect the practitioner's opinion/conclusion, including any Emphasis of Matter, Other Matter, findings related to particular aspects of the engagements, recommendations or additional information included in the assurance report. The wording used should make it clear that an Emphasis of Matter, Other Matter, findings, recommendations or additional information is not intended to detract from the practitioner's opinion/conclusion.

77. Oral and other forms of expressing conclusions can be misunderstood without the support of a written report. For this reason, the practitioner shall not report orally without providing a written assurance report.

78. This Guidance Note does not require a standardized format for reporting on all assurance engagements. Instead, it identifies the basic elements the assurance report is to include. Assurance reports are tailored to the specific engagement circumstances. The practitioner may use headings, paragraph numbers, typographical devices, for example the bolding of text, and other

mechanisms to enhance the clarity and readability of the assurance report.

79. The practitioner may choose a “short form” or “long form” style of reporting to facilitate effective communication to the intended users. “Short-form” reports ordinarily include only the basic elements. “Long-form” reports include other information and explanations that are not intended to affect the practitioner’s conclusion. In addition to the basic elements, long-form reports may describe in detail the terms of the engagement, the applicable criteria being used, findings relating to particular aspects of the engagement, details of the qualifications and experience of the practitioner and others involved with the engagement, disclosure of materiality levels, and, in some cases, recommendations. The practitioner may find it helpful to consider the significance of providing such information to the information needs of the intended users. As required by paragraph 76, additional information is clearly separated from the practitioner’s conclusion and phrased in such a manner so as make it clear that it is not intended to detract from that conclusion.

Assurance Report Content

80. In order to assert compliance with this Guidance Note, among other things, the assurance report should include at a minimum the following basic elements:

- (a) A *title* that clearly indicates the report is an independent assurance report. An appropriate title helps to identify the nature of the assurance report, and to distinguish it from reports issued by others, such as those who do not have to comply with the same ethical requirements as the practitioner. In case, the applicable law or regulation or the contractual arrangement entered by the entity specifies a title or phrases to identify the assurance report, the practitioner may use the title or phrases so prescribed.
- (b) An *addressee*. An addressee identifies the party or parties to whom the assurance report is directed. The assurance report is ordinarily addressed to the engaging party, but in some cases there may be other intended users.
- (c) An *identification or description of the level of assurance obtained by the practitioner, the subject matter information and, when appropriate, the underlying subject matter*. When the practitioner’s conclusion is phrased in terms of a statement made by the appropriate party, that statement should accompany the assurance report, be reproduced in the assurance report or be referenced therein to a source that is available to the intended users. Identification and description of the subject matter information and, when appropriate, the underlying subject matter may include, for example:
 - The point in time or period of time to which the measurement or evaluation of the underlying subject matter relates.
 - Where applicable, the name of the responsible party or component of the responsible party to which the underlying subject matter relates.

- An explanation of those characteristics of the underlying subject matter or the subject matter information of which the intended users should be aware, and how such characteristics may influence the precision of the measurement or evaluation of the underlying subject matter against the applicable criteria, or the persuasiveness of available evidence. For example:
 - The degree to which the subject matter information is qualitative versus quantitative, objective versus subjective, or historical versus prospective.
 - Changes in the underlying subject matter or other engagement circumstances that affect the comparability of the subject matter information from one period to the next.
- (d) *Identification of the applicable criteria.* The assurance report identifies the applicable criteria against which the underlying subject matter was measured or evaluated so that the intended users can understand the basis for the practitioner's opinion/conclusion. The assurance report may include the applicable criteria, or refer to them if they are included in the subject matter information or if they are otherwise available from a readily accessible source. It may be relevant in the circumstances, to disclose:
- The source of the applicable criteria, and whether or not the applicable criteria are embodied in law or regulation, or issued by authorized or recognized bodies of experts that follow a transparent due process, that is, whether they are established criteria in the context of the underlying subject matter (and if they are not, a description of why they are considered suitable).
 - Measurement or evaluation methods used when the applicable criteria allows for choice between a number of methods.
 - Any significant interpretations made in applying the applicable criteria in the engagement circumstances.
 - Whether there have been any changes in the measurement or evaluation methods used.
- (e) Where appropriate, a description of any *significant inherent limitations associated with the measurement or evaluation of the underlying subject matter against the applicable criteria.* While in some cases, inherent limitations can be expected to be well-understood by the intended users of an assurance report, in other cases it may be appropriate to make explicit reference to them in the assurance report. For example, in an assurance report related to the effectiveness of internal control, it may be appropriate to note that the historic evaluation of effectiveness is not relevant to future periods due to the risk that internal control may become inadequate because of changes in conditions, or that the

III.470 Auditing Pronouncements

degree of compliance with policies or procedures may deteriorate.

- (f) When the applicable criteria are designed for a specific purpose, a statement alerting readers to this fact and that, as a result, the subject matter information may not be suitable for another purpose. In some cases the applicable criteria used to measure or evaluate the underlying subject matter may be designed for a specific purpose. For example, a regulator may require certain entities to use particular applicable criteria designed for regulatory purposes. To avoid misunderstandings, the practitioner alerts readers of the assurance report to this fact and that therefore, the subject matter information may not be suitable for another purpose.

In addition to the alert as required in the preceding paragraph, the practitioner may consider it appropriate to indicate that the assurance report is intended solely for specific users. Depending on the engagement circumstances, for example, the law or regulation of the particular jurisdiction, this may be achieved by restricting the distribution or use of the assurance report. While an assurance report may be restricted in this way, the absence of a restriction regarding a particular user or purpose does not itself indicate that a legal responsibility is owed by the practitioner in relation to that user or for that purpose. Whether a legal responsibility is owed will depend on the legal circumstances of each case and the relevant jurisdiction.

- (g) *A statement to identify the responsible party and the measurer or evaluator if different, and to describe their responsibilities and the practitioner's responsibilities.* Identifying relative responsibilities informs the intended users that the responsible party is responsible for the underlying subject matter, that the measurer or evaluator is responsible for the measurement or evaluation of the underlying subject matter against the applicable criteria, and that the Practitioner's role is to independently express an opinion/conclusion about the subject matter information.
- (h) A statement that the engagement was performed in accordance with this Guidance Note.
- (i) A statement that the firm, of which the practitioner is a partner has applied SQC 1, *Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements.*
- (j) *A statement that the practitioner complies with the independence and other ethical requirements of the Code of Ethics issued by the Institute of Chartered Accountants of India.* The following is an illustration of a statement in the assurance report regarding compliance with ethical requirements:

"We conducted our engagement in accordance with the Guidance Note on Reports or Certificates for Special Purposes issued by the Institute of Chartered Accountants of India. That Guidance Note requires that we comply with the ethical requirements of the

Code of Ethics issued by the Institute of Chartered Accountants of India.”

(k) *An informative summary of the work performed* as the basis for the practitioner’s opinion/conclusion. In the case of a limited assurance engagement, an appreciation of the nature, timing, and extent of procedures performed is essential to understanding the practitioner’s opinion/conclusion. In a limited assurance engagement, the summary of the work performed should state that:

- (i) The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement; and
- (ii) Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

It is important that the summary be written in an objective way that allows intended users to understand the work done as the basis for the practitioner’s opinion/conclusion. In most cases, this will not involve detailing the entire work plan, but on the other hand it is important for it not to be so summarized as to be ambiguous, nor written in a way that is overstated or embellished.

(l) The practitioner’s opinion/conclusion:

- (i) When appropriate, the opinion/conclusion should inform the intended users of the context in which the practitioner’s opinion/conclusion is to be read.

It may be appropriate to inform the intended users of the context in which the practitioner’s opinion/conclusion is to be read when the assurance report includes an explanation of particular characteristics of the underlying subject matter of which the intended users should be aware. The practitioner’s opinion/conclusion may, for example, include wording such as: “This opinion/conclusion has been formed on the basis of the matters outlined elsewhere in this independent assurance report.”

- (ii) In a reasonable assurance engagement, the opinion is expressed in a positive form. Examples of opinion expressed in a form appropriate for a reasonable assurance engagement include:

- When expressed in terms of the underlying subject matter and the applicable criteria, “In our opinion, the entity has complied, in all material respects, with XYZ law”;
- When expressed in terms of the subject matter information and the applicable criteria, “In our opinion, the Statement of Net Worth is

III.472 Auditing Pronouncements

properly prepared, in all material respects, based on XYZ criteria”; or

- When expressed in terms of a statement made by the appropriate party, “In our opinion, the [appropriate party’s] statement that the entity has complied with XYZ law is, in all material respects, fairly stated,” or “In our opinion, the [appropriate party’s] statement that the key performance indicators are presented in accordance with XYZ criteria is, in all material respects, fairly stated”.

(iii) In a limited assurance engagement, the conclusion is expressed in a form that conveys whether, based on the procedures performed and evidence obtained, a matter(s) has come to the practitioner’s attention to cause the practitioner to believe that the subject matter information is materially misstated. Examples of conclusions expressed in a form appropriate for a limited assurance engagement include:

- When expressed in terms of the underlying subject matter and the applicable criteria, “Based on the procedures performed and evidence obtained, nothing has come to our attention that causes us to believe that [the entity] has not complied, in all material respects, with XYZ law.”
- When expressed in terms of the subject matter information and the applicable criteria, “Based on the procedures performed and evidence obtained, we are not aware of any material amendments that need to be made to the assessment of key performance indicators for them to be in accordance with XYZ criteria.”; or
- When expressed in terms of a statement made by the appropriate party, “Based on the procedures performed and evidence obtained, nothing has come to our attention that causes us to believe that the [appropriate party’s] statement that [the entity] has complied with XYZ law, is not, in all material respects, fairly stated.”

(iv) The opinion/conclusion in (ii) or (iii) should be phrased using appropriate words for the underlying subject matter and applicable criteria given the engagement circumstances and need to be phrased in terms of:

- a. The underlying subject matter and the applicable criteria;
- b. The subject matter information and the applicable criteria; or
- c. A statement made by the appropriate party.

Forms of expression which may be useful for underlying subject matters include,

for example, one, or a combination of, the following:

- For compliance engagements—“in compliance with” or “in accordance with.”
 - For engagements when the applicable criteria describe a process or methodology for the preparation or presentation of the subject matter information—“properly prepared.”
 - For engagement when the principles of fair presentation are embodied in the applicable criteria—“fairly stated.”
- (v) When the practitioner expresses a modified opinion/conclusion, the assurance report should contain:
- a. A section that provides a description of the matter(s) giving rise to the modification; and
 - b. A section that contains the practitioner’s modified opinion/conclusion
- (m) *The practitioner’s signature.* The assurance report is signed by the practitioner in his personal name. Where a Firm is appointed to carry out the engagement, the report is signed in the personal name of the practitioner and in the name of the audit firm. The partner/proprietor signing the assurance report also needs to mention the membership number assigned by the ICAI. They also include the registration number of the Firm, wherever applicable, as allotted by ICAI, in the assurance reports signed by them.
- (n) *The date of the assurance report.* The assurance report should be dated no earlier than the date on which the practitioner has obtained the evidence on which the practitioner’s opinion/conclusion is based, including evidence that those with the recognized authority have asserted that they have taken responsibility for the subject matter information.
- (o) The place of signature.

Reference to the Practitioner’s Expert in the Assurance Report

81. If the practitioner refers to the work of a practitioner’s expert in the assurance report, the wording of that report should not imply that the practitioner’s responsibility for the opinion/conclusion expressed in that report is reduced because of the involvement of that expert.

Assurance Report Prescribed by Law or Regulation

82. If the practitioner is required by law or regulation to use a specific layout or wording of the assurance report, the assurance report should refer to this Guidance Note, only if the assurance report includes, at a minimum, each of the elements identified in paragraph 80.

Unmodified and Modified Opinions/Conclusions

83. The practitioner should express an unmodified opinion/conclusion when the practitioner concludes:

- (a) In the case of a reasonable assurance engagement, that the subject matter information is prepared, in all material respects, in accordance with the applicable criteria; or
- (b) In the case of a limited assurance engagement, that, based on the procedures performed and evidence obtained, no matter(s) has come to the attention of the practitioner that causes the practitioner to believe that the subject matter information is not prepared, in all material respects, in accordance with the applicable criteria.

84. If the practitioner considers it necessary to:

- (a) Draw intended users' attention to a matter presented or disclosed in the subject matter information that, in the practitioner's judgment, is of such importance that it is fundamental to intended users' understanding of the subject matter information (an Emphasis of Matter paragraph); or
- (b) Communicate a matter other than those that are presented or disclosed in the subject matter information that, in the practitioner's judgment, is relevant to intended users' understanding of the engagement, the practitioner's responsibilities or the assurance report (an Other Matter paragraph),

and this is not prohibited by law or regulation, the practitioner may do so in a paragraph in the assurance report, with an appropriate heading, that clearly indicates the practitioner's opinion/conclusion is not modified in respect of the matter/s. In the case of an Emphasis of Matter paragraph, such a paragraph should refer only to the information presented or disclosed in the subject matter information.

85. The practitioner would need to express a modified opinion/conclusion in the following circumstances:

- (a) When, in the practitioner's professional judgment, a scope limitation exists and the effect of the matter could be material. In such cases, the practitioner should express a qualified opinion/conclusion or a disclaimer of opinion/conclusion.
- (b) When, in the practitioner's professional judgment, the subject matter information is materially misstated. In such cases, the practitioner should express a qualified opinion/conclusion or adverse opinion/conclusion.

Examples of qualified and adverse opinions/conclusions and a disclaimer of opinions/conclusion are:

- Qualified conclusion (an example for limited assurance engagements with a material misstatement) – “Based on the procedures performed and the evidence obtained, except for the effect of the matter described in the Basis for Qualified Conclusion section of our report, nothing has come to our attention that causes us to believe that the [appropriate party’s] statement does not present fairly, in all material respects, the entity’s compliance with XYZ law.”
- Adverse opinion (an example for a material and pervasive misstatement for both reasonable assurance and limited assurance engagements) – “Because of the significance of the matter described in the Basis for Adverse Opinion/Conclusion section of our report, the [appropriate party’s] statement does not present fairly the entity’s compliance with XYZ law.”
- Disclaimer of conclusion (an example for a material and pervasive limitation of scope for both reasonable assurance and limited assurance engagements) – “Because of the significance of the matter described in the Basis for Disclaimer of Opinion/Conclusion section of our report, we have not been able to obtain sufficient appropriate evidence to form an opinion/ conclusion on the [appropriate party’s] statement. Accordingly, we do not express an opinion/ conclusion on that statement.”

86. The practitioner should express a qualified opinion/conclusion when, in the practitioner’s professional judgment, the effects, or possible effects, of a matter are not so material and pervasive as to require an adverse opinion/conclusion or a disclaimer of opinion/conclusion. A qualified opinion/conclusion should be expressed as being “except for” the effects, or possible effects, of the matter to which the qualification relates.

87. The term ‘pervasive’ describes the effects on the subject matter information of misstatements or the possible effects on the subject matter information of misstatements, if any, that are undetected due to an inability to obtain sufficient appropriate evidence. Pervasive effects on the subject matter information are those that, in the practitioner’s professional judgment:

- (a) Are not confined to specific aspects of the subject matter information;
- (b) If so confined, represent or could represent a substantial proportion of the subject matter information; or
- (c) In relation to disclosures, are fundamental to the intended users’ understanding of the subject matter information.
- (d) The nature of the matter, and the practitioner’s judgment about the pervasiveness of the effects or possible effects on the subject matter information, affects the type of conclusion to be expressed.

88. If the practitioner expresses a modified opinion/conclusion because of a scope limitation

III.476 Auditing Pronouncements

but is also aware of a matter(s) that causes the subject matter information to be materially misstated, the practitioner should include in the assurance report a clear description of both the scope limitation and the matter(s) that causes the subject matter information to be materially misstated.

89. When the statement made by the appropriate party has identified and properly described that the subject matter information is materially misstated, the practitioner should either:

- (a) Express a qualified opinion/conclusion or adverse opinion/conclusion phrased in terms of the underlying subject matter and the applicable criteria; or
- (b) If specifically required by the terms of the engagement to phrase the opinion/conclusion in terms of a statement made by the appropriate party, express an unqualified opinion/conclusion but include an Emphasis of Matter paragraph in the assurance report, referring to the statement made by the appropriate party that identifies and properly describes that the subject matter information is materially misstated. In some cases, the measurer or evaluator may identify and properly describe that the subject matter information is materially misstated. For example, in a compliance engagement the measurer or evaluator may correctly describe the instances of non-compliance. In such circumstances, paragraph 88 requires the practitioner to draw the intended users' attention to the description of the material misstatement, by either expressing a qualified or adverse opinion/conclusion or by expressing an unqualified opinion/conclusion but emphasizing the matter by specifically referring to it in the assurance report.

90. **Appendix 2** to the Guidance Note contains illustrative formats of Reports/Certificates.

Other Communication Responsibilities

91. The practitioner should consider whether, pursuant to the terms of the engagement and other engagement circumstances, any matter has come to the attention of the practitioner that is to be communicated with the responsible party, the measurer or evaluator, the engaging party, those charged with governance or others.

Documentation

92. The practitioner should prepare on a timely basis engagement documentation that provides a record of the basis for the assurance report that is sufficient and appropriate to enable an experienced practitioner, having no previous connection with the engagement, to understand:

- (a) The nature, timing and extent of the procedures performed to comply with the Guidance Note and applicable legal and regulatory requirements;
- (b) The results of the procedures performed, and the evidence obtained; and
- (c) Significant matters arising during the engagement, the conclusions reached thereon, and significant professional judgments made in reaching those conclusions.

93. If the practitioner identifies information that is inconsistent with the practitioner's final opinion/conclusion regarding a significant matter, the practitioner should document how the practitioner addressed the inconsistency.

94. The practitioner should assemble the engagement documentation in an engagement file and complete the administrative process of assembling the final engagement file on a timely basis after the date of the assurance report. SQC 1 requires establishment of policies and procedures for the timely completion of the assembly of engagement files. An appropriate time limit within which to complete the assembly of the final engagement file is ordinarily not more than 60 days after the date of the assurance report.

95. The completion of the assembly of the final engagement file after the date of the assurance report is an administrative process that does not involve the performance of new procedures or the drawing of new opinion/conclusions. Changes may, however, be made to the documentation during the final assembly process if they are administrative in nature. Examples of such changes include:

- Deleting or discarding superseded documentation.
- Sorting, collating and cross-referencing working papers.
- Signing off on completion checklists relating to the file assembly process.
- Documenting evidence that the practitioner has obtained, discussed and agreed with the relevant practitioners of the engagement team before the date of the assurance report.

96. After the assembly of the final engagement file has been completed, the practitioner should not delete or discard engagement documentation of any nature before the end of its retention period. The retention period for assurance engagements ordinarily is no shorter than seven years from the date of assurance report.³⁴

97. If the practitioner finds it necessary to amend existing engagement documentation or add new engagement documentation after the assembly of the final engagement file has been completed the practitioner should, regardless of the nature of the amendments or additions, document:

- a) The specific reasons for making the amendments or additions; and
- b) When, and by whom, they were made and reviewed.

APPENDIX 1

³⁴ Refer Para 83 of SQC 1

Glossary of Terms Used in the Guidance Note

For purposes of this Guidance Note, the following terms have the meanings attributed below.

1. Assurance engagement—An engagement in which a practitioner aims to obtain sufficient appropriate evidence in order to express an opinion/conclusion, designed to enhance the degree of confidence of the intended users, other than the responsible party about the subject matter information (that is, the outcome of the measurement or evaluation of an underlying subject matter against criteria). Each assurance engagement is classified on two dimensions:

- Either a reasonable assurance engagement or a limited assurance engagement:
 - *Reasonable assurance engagement*—An assurance engagement in which the practitioner reduces engagement risk to an acceptably low level in the circumstances of the engagement, as the basis for the practitioner’s opinion. The practitioner’s opinion is expressed in a form that conveys the practitioner’s opinion on the outcome of the measurement or evaluation of the underlying subject matter against the criteria.
 - *Limited assurance engagement*—An assurance engagement in which the practitioner reduces engagement risk to a level that is acceptable in the circumstances of the engagement but where that risk is greater than for a reasonable assurance engagement, as the basis for expressing a conclusion in a form that conveys whether, based on the procedures performed and evidence obtained, a matter(s) has(have) come to the practitioner’s attention to cause the practitioner to believe that the subject matter information is materially misstated. The nature, timing, and extent of procedures performed in a limited assurance engagement is limited compared with that necessary in a reasonable assurance engagement but is planned to obtain a level of assurance that is, in the practitioner’s professional judgment, meaningful.
- Either assertion based engagement or a direct reporting engagement:
 - *Assertion based engagement*—An assurance engagement in which a party other than the practitioner measures or evaluates the underlying subject matter against the criteria. A party other than the practitioner also often presents the resulting subject matter information in a report or statement. In some cases, however, the subject matter information may be presented by the practitioner in the assurance report. In an attestation engagement, the practitioner’s conclusion addresses whether the subject matter information is free from material misstatement. The practitioner’s conclusion may be phrased in terms of:
 - (i) The underlying subject matter and the applicable criteria;
 - (ii) The subject matter information and the applicable criteria; or

- (iii) A statement made by the appropriate party.
 - *Direct reporting engagement*—An assurance engagement in which the practitioner measures or evaluates the underlying subject matter against the applicable criteria and the practitioner presents the resulting subject matter information as part of, or accompanying, the assurance report. In a direct engagement, the practitioner's conclusion addresses the reported outcome of the measurement or evaluation of the underlying subject matter against the criteria.
2. Assurance skills and techniques—Those planning, evidence gathering, evidence evaluation, communication and reporting skills and techniques demonstrated by an assurance practitioner that are distinct from expertise in the underlying subject matter of any particular assurance engagement or its measurement or evaluation. Assurance skill and techniques include:
- Application of professional skepticism and professional judgment;
 - Planning and performing an assurance engagement, including obtaining and evaluating evidence;
 - Understanding information systems and the role and limitations of internal control;
 - Linking the consideration of materiality and engagement risks to the nature, timing and extent of procedures;
 - Applying procedures as appropriate to the engagement (which may include inquiry, inspection, re-calculation, re-performance, observation, confirmation, and analytical procedures); and
 - Systematic documentation practices and assurance report-writing skills.
3. Criteria—The benchmarks used to measure or evaluate the underlying subject matter. The “applicable criteria” are the criteria used for the particular engagement. Suitable criteria are required for reasonably consistent measurement or evaluation of an underlying subject matter within the context of professional judgment. Without the frame of reference provided by suitable criteria, any conclusion is open to individual interpretation and misunderstanding. The suitability of criteria is context-sensitive, that is, it is determined in the context of the engagement circumstances. Even for the same underlying subject matter there can be different criteria, which will yield a different measurement or evaluation. For example, a measurer or evaluator might select, as one of the criteria for the underlying subject matter of customer satisfaction, the number of customer complaints resolved to the acknowledged satisfaction of the customer; another measurer or evaluator might select the number of repeat purchases in the three months following the initial purchase. The suitability of criteria is not affected by the level of assurance, that is, if criteria are unsuitable for a reasonable assurance engagement, they are also unsuitable for a limited assurance engagement, and vice versa. Suitable criteria include, when relevant, criteria for presentation and disclosure.

III.480 Auditing Pronouncements

4. Engagement circumstances — The broad context defining the particular engagement, which includes the terms of the engagement; whether it is a reasonable assurance engagement or a limited assurance engagement, the characteristics of the underlying subject matter; the measurement or evaluation criteria; the information needs of the intended users; relevant characteristics of the responsible party, the measurer or evaluator, and the engaging party and their environment; and other matters, for example events, transactions, conditions and practices, that may have a significant effect on the engagement.
5. Engagement partner — The partner or other person in the firm who is a member of the Institute of Chartered Accountants of India and is in full time practice and is responsible for the engagement and its performance, and for the assurance report that is issued on behalf of the firm, and who, where required, has the appropriate authority from a professional, legal or regulatory body.
6. Engagement risk — The risk that the practitioner expresses an inappropriate conclusion when the subject matter information is materially misstated³⁵.
7. Engaging party — The party(ies) that engages the practitioner to perform the assurance engagement. The engaging party may be under different circumstances, management or those charged with governance of the responsible party, a legislature, the intended users, the measurer or evaluator, or a different third party
8. Engagement team — All personnel performing an engagement, including any experts contracted by the firm in connection with that engagement.
9. Evidence — Information used by the practitioner in arriving at the practitioner's conclusion. Evidence includes both, information contained in relevant information systems, if any, and other information
10. Firm — A sole practitioner/proprietor, partnership or any such entity of professional accountants, as may be permitted by law.
11. Historical financial information — Information expressed in financial terms in relation to a particular entity, derived primarily from that entity's accounting system, about economic events occurring in past time periods or about economic conditions or circumstances at points in time in the past.
12. Internal audit function — A function of an entity that performs assurance and consulting activities, designed to evaluate and improve the effectiveness of the entity's governance, risk management and internal control processes.
13. Intended users — The individual(s) or organization(s), or group(s) thereof that the practitioner expects will use the assurance report.

³⁵ Refer to Para 47-48 and Para 51 of the Framework for Assurance Engagements.

In some cases there may be intended users other than those to whom the assurance report is addressed. The practitioner may not be able to identify all those who will read the assurance report, particularly, where a large number of people have access to it. In such cases, particularly where possible, users are likely to have a broad range of interests in the underlying subject matter, intended users may be limited to major stakeholders with significant and common interests. Intended users may be identified in different ways, for example, by agreement between the practitioner and the responsible party or engaging party, or by law or regulation.

Intended users or their representatives may be directly involved with the practitioner and the responsible party (and the engaging party, if different) in determining the requirements of the engagement. Regardless of the involvement of others however, and unlike an agreed-upon procedures engagement (which involves reporting factual findings based upon procedures agreed with the engaging party and any appropriate third parties, rather than a conclusion):

- (a) The practitioner is responsible for determining the nature, timing and extent of procedures; and
- (b) The practitioner may need to perform additional procedures, if information comes to the practitioner's attention that differs significantly from that on which the determination of planned procedures was based.

In some cases, intended users (for example, bankers and regulators) impose a requirement on, or request the appropriate party(ies) to arrange for an assurance engagement to be performed for a specific purpose. When engagements use criteria that are designed for a specific purpose, paragraph 80 requires a statement alerting readers to this fact. In addition, the practitioner may consider it appropriate to indicate that the assurance report is intended solely for specific users. Depending on the engagement circumstances, this may be achieved by restricting the distribution or use of the assurance report.

14. **Measurer or evaluator** — The party(ies) who measures or evaluates the underlying subject matter against the criteria. The measurer or evaluator possesses expertise in the underlying subject matter. In many attestation engagements, the responsible party may also be the measurer or evaluator, and the engaging party. The measurer or evaluator is responsible for having a reasonable basis for the subject matter information. What constitutes a reasonable basis will depend on the nature of the underlying subject matter and other engagement circumstances. In some cases, a formal process with extensive internal controls may be needed to provide the measurer or evaluator with a reasonable basis that the subject matter information is free from material misstatement. The fact that the practitioner will report on the subject matter information is not a substitute for the measurer or evaluator's own processes to have a reasonable basis for the subject matter information.

15. **Misstatement** — A difference between the subject matter information and the appropriate measurement or evaluation of the underlying subject matter in accordance with the criteria. Misstatements can be intentional or unintentional, qualitative or quantitative, and include

III.482 Auditing Pronouncements

omissions.

16. Misstatement of fact (with respect to other information)—Other information that is unrelated to matters appearing in the subject matter information or the assurance report that is incorrectly stated or presented. A material misstatement of fact may undermine the credibility of the document containing the subject matter information.

17. Other information — Information (other than the subject matter information and the assurance report thereon) which is included, either by law, regulation or custom, in a document containing the subject matter information and the assurance report thereon.

18. Practitioner's expert — An individual or organization possessing expertise in a field other than assurance, whose work in that field is used by the practitioner to assist the practitioner in obtaining sufficient appropriate evidence. A practitioner's expert may be either a practitioner's internal expert (who is a partner or staff, including temporary staff, of the practitioner's firm or a network firm), or a practitioner's external expert.

19. Professional judgment — The application of relevant training, knowledge and experience, within the context provided by assurance and ethical standards, in making informed decisions about the courses of action that are appropriate in the circumstances of the engagement.

20. Professional skepticism — An attitude that includes a questioning mind, being alert to conditions which may indicate possible misstatement, and a critical assessment of evidence.

21. Responsible party — The party(ies) responsible for the underlying subject matter. All assurance engagements have at least three parties: the responsible party, the practitioner, and the intended users. In many attestation engagements, the responsible party may also be the measurer or evaluator, and the engaging party.

22. Risk of material misstatement — The risk that the subject matter information is materially misstated prior to the engagement.

23. Subject matter information — The outcome of the measurement or evaluation of the underlying subject matter against the criteria, i.e., the information that results from applying the criteria to the underlying subject matter. In some cases, the subject matter information may be a statement that evaluates an aspect of a process, or of performance or compliance, in relation to the criteria. For example, "ABC's governance structure conformed with XYZ criteria during the period ..."

24. Underlying subject matter—The phenomenon that is measured or evaluated by applying criteria.

APPENDIX 2

Illustrative Formats of Reports/Certificates

Note: The illustrative formats of assurance reports or certificates for special purposes given in Appendix 2 should be tailored by the practitioner to meet the specific circumstances and requirements of the engagement.

Illustration 1: Practitioner's Report for Turnover/Net Worth/Net Profit/Working Capital/similar engagement pursuant to a Tender requirement

The Board of Directors
[Name of the Company]
[Company Address]

Independent Practitioner's Report on the Statement of [Annual Turnover for financial years ended.....and..... (specify periods); Current Assets; Current Liabilities; Computation of Working Capital and Computation of Net worth as at..... (specify date)]

1. This Report is issued in accordance with the terms of our engagement letter/agreement dated [specify date].
2. The accompanying Statement of Annual Turnover for financial years endedand..... (specify period) and the Statement of Current Assets; Current Liabilities; Working Capital and Net Worth as at (specify date) (hereinafter referred together as the "Statement") contains the details as required pursuant to compliance with the terms and conditions contained in [refer to the clause] of the Tender document issued by [refer to the authority] dated (specify date) with reference [specify the contract reference if available] (hereinafter referred to as the "Tender Document"), which we have initialled for identification purposes only.

Management's Responsibility for the Statement

3. The preparation of the Statement is the responsibility of the Management of [Name of the Company] (hereinafter the "Company") including the preparation and maintenance of all accounting and other relevant supporting records and documents. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the Statement and applying

III.484 Auditing Pronouncements

an appropriate basis of preparation; and making estimates that are reasonable in the circumstances.

4. The Management is also responsible for ensuring that the Company complies with the requirements of the Tender Document and provides all relevant information to [Name of the authority].

Practitioner's Responsibility

5. Pursuant to the requirements of the Tender Document, it is our responsibility to provide a reasonable assurance whether:
 - i) the amounts in the Statement of Annual Turnover for the year ended (specify period) have been accurately extracted from the audited financial statements;
 - ii) the amounts in the Statement in respect of current assets and current liabilities that form part of the working capital computation have been accurately extracted from the audited financial statements for the year ended (specify the period) and the computation of working capital is arithmetically correct;
 - iii) the amounts in the Statement that form part of the Net Worth computation have been accurately extracted from the audited financial statements for the year ended; and [month][date][year] and the computation of net worth is arithmetically correct; and
 - iv) the computation of net worth and working capital is in accordance with the method of computation set out in the clause [] of the Tender Document.
6. The audited financial statements referred to in paragraph 5 above, have been audited by us, on which we issued an unmodified audit opinion vide our report(s) dated (specify dates) respectively. Our audits of these financial statements were conducted in accordance with the Standards on Auditing and other applicable authoritative pronouncements issued by the Institute of Chartered Accountants of India. Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.
7. We conducted our examination of the Statement in accordance with the Guidance Note on Reports or Certificates for Special Purposes issued by the Institute of Chartered Accountants of India. The Guidance Note requires that we comply with the ethical requirements of the Code of Ethics issued by the Institute of Chartered Accountants of India.

8. We have complied with the relevant applicable requirements of the Standard on Quality Control (SQC) 1, Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements.

Opinion

9. Based on our examination, as above, we are of the opinion that:
- i) the amounts in the Statement in respect of Annual Turnover, Current assets and Current liabilities have been accurately extracted from the audited financial statements for the years ended [date] and [date];
 - ii) the amounts that form part of the working capital and net worth computation have been accurately extracted from the audited financial statements for the years ended[specify date] and [specify date]; and that the computation of working capital and net worth in the Statement is mathematically accurate and is in accordance with the method of computation set out in the clause [] of the Tender Document.

Restriction on Use

10. The certificate is addressed to and provided to the Board of Directors of the Company solely for the purpose to enable comply with requirement of Tender Document and to submit the accompanying Statement to [specify the authority], and should not be used by any other person or for any other purpose. Accordingly, we do not accept or assume any liability or any duty of care for any other purpose or to any other person to whom this certificate is shown or into whose hands it may come without our prior consent in writing.

Illustration 3: Auditor’s Report on the Manner of Utilization of Funds required under Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015

The Board of Directors

[Name of the Company]

[Company Address]

Independent Auditor’s Report on the manner of utilization of the funds including for purposes other than those stated in the offer document

1. This report is issued in accordance with the terms of our agreement dated [●].
2. The accompanying Statement contains details of manner of the utilization of funds including funds utilized for purposes other than those stated in the offer document for the Rights Issue (the “Statement”), as required by the Clause 32(5) of Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, by the [Name of the Company] (the “Company”), which we have initialled for identification purposes only. The Funds were raised by the Company pursuant to the rights issue of [*] equity shares of face value of Rs. [] each, at a premium of Rs. [*] each, aggregating to Rs. [*].

Managements’ Responsibility for the Statement

3. The preparation of the accompanying Statement is the responsibility of the Management of the Company. This responsibility includes designing, implementing and maintaining internal control relevant to the preparation and presentation of the Statement, and applying an appropriate basis of preparation; and making estimates that are reasonable in the circumstances.
4. The Management is also responsible for ensuring that the Company complies with the requirements of the Equity Listing Agreement and for providing all relevant information to the Securities and Exchange Board of India.

Auditor’s Responsibility

5. Pursuant to the requirements of the Equity Listing Agreement, it is our responsibility to obtain reasonable assurance and form an opinion as to whether the Statement is in agreement with the [audited financial statements for the year ended [and books and records]⁴² of the Company].⁴³
6. The financial statements referred to in paragraph 5 above, have been audited by us on which we issued an unmodified audit opinion vide our reports dated [month][date][year]. Our audits of

⁴² Strike off, if not applicable

⁴³ If the audited financial statements of the entity are not available, it may not be possible for the practitioner to provide reasonable assurance on the utilization of funds by the entity. However, in case the practitioner is required to issue a report, the practitioner should consider providing a limited assurance report. Reference should be made to paragraph 80 of this Guidance Note, which specifies the requirements to be complied with by the while preparing an assurance report that expresses a limited assurance.

these financial statements were conducted in accordance with the Standards on Auditing and other applicable authoritative pronouncements issued by the Institute of Chartered Accountants of India. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. Our audits were not planned and performed in connection with any transactions to identify matters that may be of potential interest to third parties.

7. We conducted our examination of the Statement in accordance with the Guidance Note on Reports or Certificates for Special Purposes issued by the Institute of Chartered Accountants of India. The Guidance Note requires that we comply with the ethical requirements of the Code of Ethics issued by the Institute of Chartered Accountants of India.
8. We have complied with the relevant applicable requirements of the Standard on Quality Control (SQC) 1, Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements.

Opinion

9. Based on our examination as above, and the information and explanations given to us, in our opinion, the Statement is in agreement with the audited financial statements for the year ended of the Company and fairly presents, in all material respects, the manner of the utilization of funds including funds utilized for purposes other than those stated in the offer document.

Restriction on Use

10. This report is addressed to and provided to the Board of Directors of the Company solely for the purpose of enabling it to comply with its obligations under the Equity Listing Agreement to submit the accompanying Statement to the Audit Committee accompanied by a report thereon from the statutory auditors and should not be used by any other person or for any other purpose. Accordingly, we do not accept or assume any liability or any duty of care for any other purpose or to any other person to whom this report is shown or into whose hands it may come without our prior consent in writing.

GUIDANCE NOTE ON REPORTING UNDER SECTION 143(3)(f) AND (h) OF THE COMPANIES

Introduction

1. Section 143 of the Companies Act, 2013 (hereinafter referred to as the "Act") deals with the powers and duties of the auditors of companies. Section 143(1) of the Act requires the auditor to make certain specific enquiries during the course of the audit. Section 143(2) of the Act requires the auditor to, *inter alia*, give his report to the members of company on the accounts examined by him, and on every financial statement which are laid before the company in a general meeting. Sub-section (3) of section 143 of the Act also lays down certain matters required to be reported upon by the auditor in his report. Sub-section (3) of section 143 of Act provides as follows:

"(3) The auditor's report shall also state -

- (a) whether he has sought and obtained all the information and explanations which to the best of his knowledge and belief were necessary for the purpose of his audit and if not, the details thereof and the effect of such information on the financial statements;
- (b) whether, in his opinion, proper books of account as required by law have been kept by the company so far as appears from his examination of those books and proper returns adequate for the purposes of his audit have been received from branches not visited by him;
- (c) whether the report on the accounts of any branch office of the company audited under sub-section (8) by a person other than the company's auditor has been sent to him under the proviso to that sub-section and the manner in which he has dealt with it in preparing his report;
- (d) whether the company's balance sheet and profit and loss account dealt with in the report are in agreement with the books of account and returns;
- (e) whether, in his opinion, the financial statements comply with the accounting standards;
- (f) the observations or comments of the auditors on financial transactions or matters which have any adverse effect on the functioning of the company;
- (g) whether any director is disqualified from being appointed as a director under sub-section (2) of section 164;
- (h) any qualification, reservation or adverse remark relating to the maintenance of accounts and other matters connected therewith;

- (i) whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls;
- (j) such other matters as may be prescribed.¹

Scope of the Guidance Note

2. This Guidance Note is intended to assist the auditors in discharging their duties in respect of clauses (f) and (h) of sub-section (3) of section 143 of the Act. Clause (f) of the said sub-section creates a requirement for the auditor to consider observations or comments of the auditor on financial transactions or matters which have an adverse effect on the functioning of the company. Such observations or comments would ordinarily lead to the modification of or an emphasis of matter in the auditor's report on financial statements. It may be noted that the matters that lead to modification in the auditor's report on financial statements are matters that give rise to a qualified opinion, adverse opinion or a disclaimer of opinion². Further, matters that lead to an emphasis of matter paragraphs are matters appropriately presented or disclosed in the financial statements that, in the auditor's judgement, are of such importance that they are fundamental to the users' understanding of the financial statements³. If the matter leading to the modification of the auditor's opinion or an emphasis of matter in the auditor's report on financial statements is likely to have an adverse effect on the functioning of the company, the auditor is required to report such matter. Under clause (h) of sub-section (3) of section 143 of the Act, the auditor is required to state whether any matter leading to a qualification, reservation or adverse remark, that is, effectively the modification of the auditor's report on financial statements, relates to the maintenance of accounts and other matters connected therewith.

Reporting under Section 143(3)(f) of the Act

3. The relevant extracts of section 143(3)(f) of the Act are reproduced below:

“(3). The auditor's report shall also state –

.....

(f) the observations or comments of the auditors on financial transactions or matters which have any adverse effect on the functioning of the company;”
4. Clause (f) requires the auditor to report "the observations or comments of the auditors on financial transactions or matters which have any adverse effect on the functioning of the company". An auditor's report may contain matters leading to modifications to the auditor's opinion or emphasis of matter in the auditor's report on the financial statements.

¹ Refer Rule 11 of Companies (Audit and Auditors) Rules, 2014.

² Reference may be made to Standard on Auditing (SA) 705, "Modifications to the Opinion in the Independent Auditor's Report."

³ Reference may be made to paragraphs 6 and 7 of Standard on Auditing (SA) 706, "Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report."

III.494 Auditing Pronouncements

Such matters may be related to issues which may have an adverse effect on the functioning of the company. The words “observations” or “comments” as appearing in clause (f) of section 143(3) are construed to have the same meaning as referring to “emphasis of matter paragraphs, situations leading to modification in the auditor’s report. Accordingly, the auditor should have made an “observation” or “comment” in the auditor’s report in order to determine the need to report under clause (f) of section 143(3). Therefore, only such “observations” or “comments” of the auditors on financial transactions or matters that have been made by the auditor in the auditor’s report which have an adverse effect on the functioning of the company are required to be reported under this clause. For the sake of clarity, it may be noted that neither the auditor’s observations nor the comments made by him have any adverse effect on the functioning of a company. These observations or comments made by the auditor might contain matters which might have an adverse effect on the functioning of a company.

5. The Act does not specify the meaning of the phrase ‘adverse effect on the functioning of the company’. The expression should not be interpreted to mean that any event affecting the functioning of the company, observed by the auditor, should be reported upon even though it does not affect the financial statements, e.g., revocation of a license to manufacture one out of the many products during the year to which the financial statements relate, where such product that does not have any material contribution to the revenues of the company, etc. Such an interpretation would not only be beyond the scope of the audit of financial statements of the company but would also not be in accordance with the objective and concept of audit stipulated under the Act. A more logical and harmonious interpretation is that this reporting requirement does not intend to change the basic objective and the concept of audit of financial statements of a company, which is to examine the financial statements with a view to express an opinion thereon.
6. The scope of the audit and auditor’s role remains as contemplated under the Standards on Auditing (SAs) and other relevant pronouncements issued by the Institute of Chartered Accountants of India as well as laid down in the Act, i.e., to lend credibility to the financial statements by reporting whether they reflect a true and fair view. SA 200, *Objective of the Independent Auditor and the Conduct of an Audit in Accordance with Standards of Auditing*, specifies that the purpose of an audit is to enhance the degree of confidence of intended users in the financial statements. This is achieved by the expression of an opinion by the auditor on whether the financial statements are prepared, in all material respects, in accordance with an applicable financial reporting framework. An audit conducted in accordance with SAs and relevant ethical requirements enables the auditor to form the opinion of the true and fair view of the financial position and operating result of an enterprise. The auditor’s opinion, therefore, does not assure, for example, the future viability of the entity nor the efficiency or effectiveness with which management has conducted the affairs of the entity. SAs require auditor to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error. Reasonable assurance is a high

level of assurance. It is obtained when the auditor has obtained sufficient appropriate audit evidence to reduce audit risk (i.e., the risk that the auditor expresses an inappropriate opinion when the financial statements are materially misstated) to an acceptably low level. However, reasonable assurance is not an absolute level of assurance because there are inherent limitations of an audit which result in most of the audit evidence on which the auditor draws conclusions and bases the auditor's opinion being persuasive rather than conclusive. At this juncture, it may also be noted that SA 200 also clearly states that the concept of materiality is applied by the auditor both in planning and performing the audit, and in evaluating the effect of identified misstatements on the audit and of uncorrected misstatements, if any, on the financial statements.

7. There is no change in the objective and scope of an audit of financial statements because of inclusion of clause (f) in sub-section (3) of section 143 of the Act. The auditor expresses his opinion on the true and fair view presented by the financial statements through his report which may be modified in certain circumstances. However, the auditor would now have to evaluate the subject matters leading to modification of the audit report or emphasis of matter in the auditor's report to make judgement as to which of them has an adverse effect on the functioning of the company within the overall context of audit of financial statements of the company. Only such matters which, in the opinion of the auditor, have an adverse effect on the functioning of the company should be reported under this clause. Conversely, such qualifications or adverse opinions or disclaimer of opinion or emphasis of matters of the auditor, which do not deal with matters that have adverse effect on the functioning of the company, need not be reported under this clause.
8. As far as inquiries under section 143(1) are concerned, the auditor is not required to report on these matters unless he has any comments to make on any of the items referred to therein. If the auditor has any comments or observations on any of the matters stated in section 143(1), the auditor should consider such comments or observations when reporting under this clause if they contain matters that may have any adverse effect on the functioning of the company.
9. Auditor's will need to apply professional judgement in considering matters of emphasis that may have an adverse effect on the functioning of the company. Ordinarily matters that are pervasive in nature such as going concern or matters that will significantly impact the operations of the company due to its size and nature will need to be reported under clause (f) of sub-section (3) of section 143 of the Act. Examples of emphasis of matter which may have an adverse effect on the functioning of the company include situations where:
 - the going concern assumption is appropriate but there are several factors leading to a material uncertainty that may cast a significant doubt about the Company's ability to continue as a going concern; or

III.496 Auditing Pronouncements

- a material uncertainty regarding the outcome of a litigation wherein an unfavourable decision could result in a significant outflow of resources for the company, etc.

Examples of emphasis of matter which may not have an adverse effect on the functioning of the company include a situation where there is an emphasis of matter:

- on managerial remuneration which is subject to the approval of the Central Government;
 - relating to accrual of a contractually receivable claim based on management estimate where the ultimate realisation could be different from the amount accrued;
 - on frauds that have been dealt with in the financial statements of the company and would not have any continuing effect on the financial statements.
10. Another issue which arises is whether any observations or comments made by the auditor under clause (i) of section 143(3) in respect of the company's internal financial controls over financial reporting, which may have any adverse effect on the functioning of the company, should also be reported in terms of this clause. In this regard, it is noted that reporting under section 143(3)(i) is part of the auditor's report though it may be reported in an annexure to the auditor's report. Accordingly, if any observations or comments made by the auditor on the adequacy or operating effectiveness of internal financial controls over financial reporting contain such matters, which, in his opinion, may have any adverse effect on the functioning of the company, should also be reported under clause (f) of section 143(3) even if such observation did not result in a modification to the audit opinion on the financial statements of the company. An example in this regard may be where an auditor reports that the company did not have an appropriate internal control system for inventory with regard to receipts, issue for production and physical verification.

Reporting under Section 143(3)(h) of the Act

11. The relevant extracts of section 143(3)(h) of the Act are reproduced below:

“(3). The auditor's report shall also state –

.....

(h) any qualification, reservation or adverse remark relating to the maintenance of accounts and other matters connected therewith;”

12. Clause (h) requires the auditor to report "any qualification, reservation or adverse remark" relating to the maintenance of accounts and other matters connected therewith. An auditor's report may contain matters leading to modifications in the auditor's report on financial statements. The matters that cause such modification may have a consequential effects or possible effects on the books of account maintained by the company and other matters connected therewith.
13. Section 128 of the Act, *inter alia*, states that every company shall prepare and keep its

books of account and other relevant books and papers and financial statements that give a true and fair view of the state of affairs of the company. Section 129(1) of the Act, *inter alia*, states that the financial statements shall comply with the accounting standards notified under section 133 of the Act. Section 2(13) of the Act defines “books of account” to include records maintained in respect of—

- (i) all sums of money received and expended by a company and matters in relation to which the receipts and expenditure take place;
- (ii) all sales and purchases of goods and services by the company;
- (iii) the assets and liabilities of the company; and
- (iv) the items of cost as may be prescribed under section 148 in the case of a company which belongs to any class of companies specified under that section;

Clause (b) of section 143(3) requires the auditor to, *inter alia*, state whether, in his opinion, proper books of account as required by law have been kept by the company so far as appears from his examination of those books.

14. Matters to be reported under clause (h) of section 143(3) needs to be evaluated based on the financial statements prepared under the Act. This is also consistent with the other reporting responsibilities of the auditor on books of account and compliance with notified/specified accounting standards that are reported by him under section 143(3). Accordingly, reporting under this clause is determined based on the financial statements prepared i.e., as at the balance sheet date.
15. The words “qualification”, “adverse remark” and “reservation” used in clause (h) of section 143(3) should be considered to be similar to the terms “qualified opinion”, “adverse opinion” and “disclaimer of opinion”, respectively, referred to in SA 705 “Modifications to the Opinion in the Independent Auditor’s Report”.
16. Accordingly, the auditor would need to report under clause (h) of section 143(3) any matter that causes a qualification, adverse remark or disclaimer of opinion on the financial statements since such matters will or possibly will have an effect on the books of account maintained by the company.
17. Further, reporting under clause (h) of section 143(3) will be required if the auditor makes any observation under clause (b) of section 143(3) relating to whether proper books of account as required by law have been kept by the company. For example, the auditor may have made an observation on maintenance of cost records under clause (b) of section 143(3) and this may not have had an effect on the financial statements of the company or the auditor’s opinion on the financial statements.
18. As a corollary, reporting under clause (h) of section 143(3) will not be required if there are no modifications, i.e., no qualified, adverse or disclaimer of opinion, and there are no such observations under clause (b) of section 143(3) regarding books of account kept by the company.

III.498 Auditing Pronouncements

19. Since clause (h) of section 143(3) requires the auditor to report under this clause only if the auditor has "any qualification, reservation or adverse remark", it is appropriate to conclude that a matter reported under emphasis of matter paragraph in the audit report need not be considered for reporting under this clause as an emphasis of matter is not in the nature of a qualification, reservation (disclaimer) or adverse remark.
20. Any material weakness in internal financial controls that is reported by the auditor under clause (i) of section 143(3) may not have an impact on the maintenance of books of account if such material weakness did not result in a modification to the opinion on the financial statements of the company. However, if the material weakness in internal financial controls resulted in a modification to the audit opinion on the financial statements, then such modification may be covered for reporting under clause (h) of section 143(3) as stated in paragraph 17 above.
21. The Appendix to this Guidance Note contains illustrations on matters that may give rise to reporting under section 143(3)(f) and/or section 143(3)(h) of the Companies Act, 2013.

APPENDIX

Illustrative Matters Forming Basis For Modified Opinion Or Emphasis Of Matter Paragraph in the Auditor's Report and Requiring Reporting Under Section 143(3)(f) and/or Section 143(3)(h) of the Companies Act, 2013

ILLUSTRATION 1

Basis for Qualified Opinion

The Company's inventories are carried in the Balance Sheet at Rs. XXX (*As at 31st March 20YY: Rs. YYY*). The Management has not stated the inventories at the lower of cost and net realisable value but has stated them solely at cost, which constitutes a departure from the Accounting Standard - 2 "Valuation of Inventories". The Company's records indicate that had the Management stated the inventories at the lower of cost and net realisable value, an amount of Rs. XXX (*As at 31st March 20YY: Rs. YYY*) would have been required to write the inventories down to their net realisable value. Accordingly, cost of sales would have been increased by Rs. XXX (*Previous year ended 31st March, 20YY: Rs. YYY*), and income tax, profit for the year and shareholders' funds would have been reduced by Rs. X, Rs. XX and Rs. XXX, respectively (*Previous year ended 31st March, 20YY: Rs. Y, Rs. YY and Rs. YYY, respectively*). This matter was also qualified in our report/ the report of the predecessor auditors on the financial statements for the year ended 31st March 20YY.⁴

Qualified Opinion

In our opinion and to the best of our information and according to the explanations given to us, except for the effects of the matter described in the Basis for Qualified Opinion paragraph above, the aforesaid standalone financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 20XX, and its profit/loss and its cash flows for the year ended on that date.

.....

.....

Report on Other Legal and Regulatory Requirements

As required by Section 143 (3) of the Act, we report that:

- (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;

⁴ Where applicable and only in such case, disclosure of previous year figures is required - Attention of the readers is drawn to the provisions of Standard on Auditing (SA) 710, *Comparative Information—Corresponding Figures And Comparative Financial Statements* .

III.500 Auditing Pronouncements

.....
.....
(f) The matter described in the Basis for Qualified Opinion paragraph above, in our opinion, may have an adverse effect on the functioning of the Company.

.....
.....
(h) The qualification relating to the maintenance of accounts and other matters connected therewith are as stated in the Basis for Qualified Opinion paragraph above.”

ILLUSTRATION 2#

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 20XX, and its profit/loss and its cash flows for the year ended on that date.

Emphasis of Matters

We draw attention to the following matters in the Notes to the financial statements:

a) Note X to the financial statements which, describes the uncertainty related to the outcome of the lawsuit filed against the Company by XYZ Company.

b) Note Y in the financial statements which indicates that the Company has accumulated losses and its net worth has been fully / substantially eroded, the Company has incurred a net loss/net cash loss during the current and previous year(s) and, the Company's current liabilities exceeded its current assets as at the balance sheet date. These conditions, along with other matters set forth in Note Y, indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern. However, the financial statements of the Company have been prepared on a going concern basis for the reasons stated in the said Note.

Our opinion is not modified in respect of these matters.

Report on Other Legal and Regulatory Requirements

As required by Section 143 (3) of the Act, we report that:

.....
(f) The going concern matter described in sub-paragraph (b) under the Emphasis of Matters paragraph above, in our opinion, may have an adverse effect on the functioning of the Company.

In this case there is nothing reportable under sec 143(3)(h).

ILLUSTRATION 3**Basis for Qualified Opinion**

ABC Company Limited's investment in XYZ Company, a foreign associate whose net worth has been fully/substantially eroded, is carried at Rs. XXX in the Balance Sheet as at March 31, 20XX. We were unable to obtain sufficient appropriate audit evidence about the carrying amount of ABC Company Limited's investment in XYZ Company as at March 31, 20XX because we were denied access to the financial information, management, and the auditors of XYZ Company. Consequently, we were unable to determine whether any adjustments to these amounts were necessary.

Qualified Opinion

In our opinion and to the best of our information and according to the explanations given to us, except for the possible effects⁵ of the matter described in the Basis for Qualified Opinion paragraph, the aforesaid standalone financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India of the state of affairs of the Company as at 31st March 20XX, and its profit/loss and its cash flows for the year ended on that date.

Report on Other Legal and Regulatory Requirements

As required by section 143 (3) of the Act, we report that:

.....

(f) The matter described in the Basis for Qualified Opinion paragraph above, in our opinion, may have an adverse effect on the functioning of the Company.

.....

(h) The qualification relating to the maintenance of accounts and other matters connected therewith are as stated in the Basis for Qualified Opinion paragraph above.

ILLUSTRATION 4**Basis for Adverse Opinion**

The Company's financing arrangements expired and the amount outstanding was payable on March 31, 20XX. The Company has been unable to re-negotiate or obtain replacement financing and is considering filing for bankruptcy. These events indicate a material uncertainty that may cast significant doubt on the Company's ability to continue as a going concern and, therefore, it may be unable to realise its assets and discharge its liabilities in the normal course of business. The financial statements (and notes thereto) do not disclose this fact.

⁵ Note the use of words "possible effects" as the auditor was unable to obtain sufficient appropriate audit evidence.

Adverse Opinion

In our opinion, because of the omission of the information mentioned in the Basis for Adverse Opinion paragraph, the financial statements do not give the information required by the Companies Act, 2013 in the manner so required and also do not give a true and fair view in conformity with the accounting principles generally accepted in India of the state of affairs of the Company as at 31st March, 20XX, and its profit/loss and its cash flows for the year ended on that date.

.....
Report on Other Legal and Regulatory Requirements

As required by section 143 (3) of the Act, we report that:

.....
(f) The matter described in the Basis for Adverse Opinion paragraph above, in our opinion, may have an adverse effect on the functioning of the Company.

.....
(h) The adverse remarks relating to the maintenance of accounts and other matters connected therewith are as stated in the Basis for Adverse Opinion paragraph above.

ILLUSTRATION 5

Basis for Disclaimer of Opinion

We were appointed as auditors of the Company after March 31, 20X1 and thus could not observe the counting of physical inventories at the beginning and end of the year. Accordingly, we were unable to satisfy ourselves by alternative means concerning the inventory quantities held at March 31, 20X0 and March 31, 20X1 which are stated in the Balance Sheet at Rs. XXX and Rs. XXX, respectively.

In addition, the introduction of a new computerised accounts receivable system in September 20X0 resulted in numerous errors in accounts receivable. As of the date of our audit report, Management was still in the process of rectifying the system deficiencies and correcting the errors. We were unable to confirm or verify by alternative means accounts receivable included in the Balance Sheet at a total amount of Rs. XXX as at March 31, 20X1.

As a result of these matters, we were unable to determine whether any adjustments might have been found necessary in respect of recorded or unrecorded inventories and accounts receivable in the Balance Sheet, and the corresponding elements making up the Statement of Profit and Loss and Cash Flow Statement.

Opinion

Because of the significance of the matters described in the Basis for Disclaimer of Opinion paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on the financial statements.

Report on Other Legal and Regulatory Requirements

As required by section 143 (3) of the Act, we report that:

.....

.....

(f) The matter described in the Basis for Disclaimer of Opinion paragraph above, in our opinion, may have an adverse effect on the functioning of the Company.

.....

(h) The reservation relating to the maintenance of accounts and other matters connected therewith are as stated in the Basis for Disclaimer of Opinion paragraph above.

Guidance Note on Audit of Consolidated Financial Statements (Revised 2016)

Introduction

1. The Council of the Institute of Chartered Accountants of India had issued Accounting Standard (AS) 21 'Consolidated Financial Statements' which was subsequently notified as a part of the Companies (Accounting Standards) Rules, 2006 by the Ministry of Corporate Affairs and subsequently amended vide the Companies (Accounting Standards) Amendment Rules, 2016. Also Indian Accounting Standard (Ind AS) 110, 'Consolidated Financial Statements' has been issued as a part of the Companies (Indian Accounting Standards) Rules, 2015 by the Ministry of Corporate Affairs. AS 21 and Ind AS 110 lay down principles and procedures for preparation and presentation of consolidated financial statements under AS and Ind AS respectively¹. In other words, whenever a parent decides to or is required to prepare and present consolidated financial statements, it should do so in accordance with the requirements of applicable Accounting Standards² under the relevant financial reporting framework. This Guidance Note does not provide guidance in relation to amalgamation/business combination.

2. Consolidated financial statements normally include consolidated balance sheet, consolidated statement of profit and loss, consolidated cash flow statement, a consolidated statement of change in equity (if applicable) and any explanatory notes annexed to, or forming part thereof. Consolidated financial statements are presented, to the extent possible, in the same format as adopted by the parent for its separate financial statements. The formats for preparation of balance sheet, statement of profit and loss and a statement of change in equity (if applicable) are prescribed under the Schedule III of the Companies Act, 2013.

¹ MCA has issued a road map for convergence with Ind AS. Those companies which are required to follow Ind AS will prepare their consolidated financial statements as per Ind AS 110 on Consolidated Financial Statements. Companies which are not covered by Ind AS road map and don't voluntarily elect to follow Ind AS are required to follow AS 21 on Consolidated Financial Statements notified under Companies (Accounting Standards) Rules, 2006 as amended upto date (recently AS 21 has been amended as per Notification No. G.S.R. 364(E) dated March 30, 2016). It may also be noted that Section 129 of the Companies Act, 2013 now mandates preparation of consolidated financial statements by all companies having subsidiaries and/associates and /joint ventures or joint operations. Similarly, paragraph 9 of AS 21(Revised) requires enterprises which do not have a subsidiary but have an associate and/or a joint venture to also prepare consolidated financial statements in accordance with AS 23 and AS 27 respectively.

For non-corporate entities, accounting standards issued by ICAI are applicable.

² For Companies covered by Ind AS, the relevant accounting standards are Ind AS 27 – Separate Financial Statements, Ind AS 28 – Investments in Associates and Joint Ventures, Ind AS 110 – Consolidated Financial Statements, Ind AS 111 – Joint Arrangements and Ind AS 112 – Disclosure of Interest in Other Entities, notified under the Companies (Indian Accounting Standards) Rules, 2015. For Companies not covered by Ind AS, the relevant accounting standards are AS 21 - Consolidated Financial Statements, AS 23 – Accounting for Investments in Associates in Consolidated Financial Statements and AS 27 – Financial Reporting of Interests in Joint Ventures, notified under the Companies (Accounting Standards) Rules, 2006. For non-corporate entities, the relevant accounting standards are AS 21, 23 and 27 issued by ICAI.

3. An entity which prepares the consolidated financial statements, either under any law or regulation governing the entity or *suo motu*, might be required to or otherwise engage the auditor for conducting the audit of consolidated financial statements. However, a law or regulation governing the entity may require the consolidated financial statements to be audited by the statutory auditor of the entity. This Guidance Note provides guidance on the specific issues and audit procedures to be applied in an audit of consolidated financial statements. This Guidance Note can also be used while auditing consolidated financial statements prepared for special purpose, to the extent applicable.

4. This Guidance Note does not deal with accounting matters arising on consolidation of financial statements.

Definitions

5. Various terms used in this Guidance Note, have the same meaning as defined in applicable accounting standards. The same have been given in **Appendix II** to the Guidance Note.

Responsibility of Parent

6. The responsibility for the preparation and presentation of consolidated financial statements, among other things, is that of the management of the parent. This includes:

- (a) identifying components, and including the financial information of the components to be included in the consolidated financial statements;
- (b) where appropriate, identifying reportable segments for segment reporting;
- (c) identifying related parties and related party transactions for reporting;
- (d) obtaining accurate and complete financial information from components;
- (e) making appropriate consolidation adjustments.
- (f) harmonization of accounting policies and accounting framework; and.
- (g) GAAP conversion, where applicable.

7. Apart from the above, the parent ordinarily issues instructions to the management of the components specifying the parent's requirements relating to financial information of the components to be included in the consolidated financial statements. The instructions ordinarily cover the accounting policies to be applied, statutory and other disclosure requirements applicable to the parent, including the identification of and reporting on reportable segments, and related parties and related party transactions, and a reporting timetable.

Responsibility of the Auditor of the Consolidated Financial Statements

8. Section 129(4) of the Companies Act, 2013 requires that the provisions of this Act applicable to the preparation, adoption and audit of the financial statements of a holding

company shall, *mutatis mutandis*, apply to the consolidated financial statements. Besides other matters, the principal auditor of the consolidated financial statements is responsible for expressing an opinion on whether the consolidated financial statements are prepared, in all material respects, in accordance with the financial reporting framework under which the parent prepares the consolidated financial statements in addition to reporting on the additional matters as required under the Companies Act, 2013 and any other statute to the extent applicable.

9. Therefore, the auditor's objectives in an audit of consolidated financial statements are:

- (a) to satisfy himself that the consolidated financial statements have been prepared in accordance with the requirements of applicable financial reporting framework;
- (b) to enable himself to express an opinion on the true and fair view presented by the consolidated financial statements.
- (c) to enquire into the matters as specified in section 143(1) of the Companies Act, 2013; and.
- (d) to report on the matters given in the clauses (a) to (i) of section 143(3) of the Companies Act, 2013; for other matters under section 143(3)(j) read with rule 11 of the Companies (Audit and Auditors) Rules, 2014, to comment on the matters specified in sub-rule (a),(b) and (c)³ to the extent applicable.

10. Standards on Auditing⁴, Statements and Guidance Notes on auditing issued by the Institute of Chartered Accountants of India apply in the same manner to audit of consolidated financial statements as they apply to audit of separate financial statements. It means that the auditors, while conducting the audit of consolidated financial statements are, *inter alia*, expected to:

- (a) plan their work to enable them to conduct an effective audit in an efficient and timely manner;
- (b) obtain an understanding of the accounting and internal control systems including IT system like consolidation tool, sufficient to plan the audit and determine the nature, timing and extent of his audit procedures. Such an understanding would help the auditors to develop an effective audit approach;
- (c) use professional judgment to assess audit risk and to design audit procedures to ensure that the risk is reduced to an acceptable level; etc.

³ The auditor of the consolidated financial statements generally report on the matters pertaining to the component, on the basis of auditors' report of the respective component.

⁴ As specified under the Companies Act, 2013.

Audit Considerations

11. The following features of consolidated financial statements have an impact on the related audit procedures:

- (a) The consolidated financial statements are prepared on the basis of separate financial statements of the parent and its components, using the consolidation procedures prescribed by Accounting Standards⁵ under applicable financial reporting framework; and
- (b) The auditor of the consolidated financial statements may use the work of other auditors as per requirement of Standards on Auditing unless the auditor of consolidated financial statements is also the auditor of the other components of the group.

12. The consolidated financial statements (including the intermediate consolidated financial statements prepared internally)⁶ are prepared using the separate financial statements of the parent and its components and also other financial information, which might not be covered by the separate financial statements of these entities. The 'other financial information' would include disclosures to be made in the consolidated financial statements about the components, proportion of items included in the consolidated financial statements to which different accounting policies have been applied where permitted, adjustments made for the effects of significant transactions or other events that occur between the financial statements of parent and its components, as the case may be, etc. Thus, this 'other financial information' would be required to be additionally disclosed.

13. When an auditor accepts the audit of consolidated financial statements, the auditor should assess whether based on his work alone he would be able to express an opinion on the true and fair view presented by the consolidated financial statements. If the auditor is of the view that his own participation may not be enough or sufficient, he should consider using the work of 'other auditors'.

14. Such 'other auditors' might be the statutory auditors of the separate financial statements of one or more of the components or the auditors appointed specifically for assisting the auditor of the consolidated financial statements (the principal auditor).

15. Where the statutory auditors of one or more of the components of the parent are also requested to assist the principal auditor, the work to be performed by such statutory auditors

⁵ Accounting Standard (AS) 21, Consolidated Financial Statements, Accounting Standard (AS) 23- Accounting for Investments in Associates in Consolidated Financial Statements and Accounting Standard (AS) - 27, Financial Reporting of Interests in Joint Ventures OR Indian Accounting Standard (Ind AS) 110 – Consolidated Financial Statements, Indian Accounting Standard (Ind AS) 111- Joint Arrangements, Indian Accounting Standard (Ind AS) 112 –Disclosure of Interests in Other Entities and Indian Accounting Standard (Ind AS) 28 – Investments in Associates and Joint Ventures.

⁶ Intermediate consolidated financial statements are the consolidated financial statements of an intermediate parent, e.g., Company A has one subsidiary Company B. Company B has a subsidiary Company C. In this case, Company B is the intermediate parent and the consolidated financial statements prepared by Company B will be intermediate consolidated financial statements.

for use by the principal auditor would constitute an assignment separate from the assignment to conduct the statutory audit of the respective component.

16. Standard on Auditing (SA) 600, 'Using the Work of Another Auditor' establishes standards when an auditor, reporting on the financial statements of an entity (the group—in the case of consolidated financial statements), uses the work of another auditor on the financial information of one or more components included in the financial statements of the entity (Paragraph 2 of SA 600). The principal auditor, if he decides to use the work of another auditor in relation to the audit of consolidated financial statements, should comply with the requirements of SA 600.

17. In carrying out the audit of the standalone financial statements, the computation of materiality for the purpose of issuing an opinion on the standalone financial statements of each component would be done component-wise on a standalone basis. However, with regard to determination of materiality during the audit of consolidated financial statements (CFS), the auditor should consider the following:

- The auditor is required to compute the materiality for the group as a whole. This materiality should be used to assess the appropriateness of the consolidation adjustments (i.e. permanent consolidation adjustments and current period consolidation adjustments) that are made by the management in the preparation of CFS. (Refer paragraph 27 and 30 of this Guidance Note).
- The parent auditor can also use the materiality computed on the group level to determine whether the component's financial statements are material to the group to determine whether they should scope in additional components, and consider using the work of other auditors as applicable⁷.
- However, while considering the observations (for instance modification and /or emphasis of matter in accordance with SA 705/706) of the component auditor in his report on the standalone financial statements, the concept of materiality would not be considered. Thus, the component auditor's observations, if any, on the component's financial statements, irrespective of whether the auditors of the component are also the auditors of the CFS or not, are required to be included in the parent auditor's report on the CFS, regardless of materiality. (Refer paragraph 46 of this Guidance Note)

Auditing the Consolidation

18. Before commencing an audit of consolidated financial statements, the auditor should plan his work to enable him to conduct an effective audit in an efficient and timely manner. The auditor should make plans, among other things, for the following:

⁷ Refer ICAI's Announcement on the Manner of Disclosure in the Auditor's Report of the Fact of Inclusion of Unaudited Financial Statements/ Information of Component/s in the Financial Statements Audited by the Principal Auditor(s) issued in February 2014.

- (a) Understanding of the group structure and group-wide controls⁸ including assessment of Information Technology (IT) system and related general and applications IT related controls (manual and automated) for consolidation process;
- (b) understanding of accounting policies of the parent and its components as well as of the consolidation process including the process of translation of financial statements of foreign components;
- (c) determining and programming the nature, timing, and extent of the audit procedures to be performed based on the assessment of the risk of material misstatement in the consolidation process;
- (d) determining the extent of use of other auditor's work in the audit; and
- (e) coordinating the work to be performed.

19. A parent which presents consolidated financial statements is required to consolidate all its components in the consolidated financial statements other than those for which exceptions have been provided in the relevant accounting standards under the applicable financial reporting framework.

20. The auditor should obtain a listing of all the components included in the consolidated financial statements and review the information provided by the management of the parent identifying the components. The auditor should verify that all the components have been included in the consolidated financial statements unless these components meet criterion for exclusion as referred to in paragraph 19 above. In respect of completeness of this information, the auditor should perform the following procedures:

- (a) review his working papers for the prior years for the known components;
- (b) review the parent's procedures for identification of various components;
- (c) make inquiries of management to identify any new components or any component which goes out of consolidated financial statements.

⁸ Group-wide controls may include a combination of the following:

- a. group management's risk assessment process, that is, the process for identifying, analysing and managing business risks, including the risk of fraud, that may result in material misstatement of the group financial statements
- b. monitoring, controlling, reconciling, and eliminating intra-group transactions and unrealized profits, and intra-group account balances at group level
- c. a process for monitoring the timeliness and assessing the accuracy and completeness of financial information received from components
- d. a central IT system controlled by the same general IT controls for all or part of the group
- e. control activities within an IT system that is common for all or some components
- f. monitoring of controls, including activities of the internal audit function and self-assessment programs
- g. consistent policies and procedures, including a group financial reporting procedures manual
- h. group-wide programs, such as codes of conduct and fraud prevention programs, and
- i. arrangements for assigning authority and responsibility to component management.

III.510 Auditing Pronouncements

- (d) review the investments of parent as well as its components to determine the shareholding in other entities;
- (e) review the joint ventures and joint arrangements as applicable;
- (f) review the other arrangements entered into by the parent that have not been included in the consolidated financial statements of the group.
- (g) review the statutory records maintained by the parent, for example registers under section 186, 190 of the Companies Act, 2013.
- (h) also identify the changes in the shareholding that might have taken place during the reporting period.

21. The auditor should document procedures performed for assessing completeness of the components to be consolidated.

22. There would be various means by which control, joint control or significant influence can be obtained. In this regard, the auditor may verify the Board's minutes, shareholder agreements entered into by the parent, agreements with the entities to which the parent might have provided any technology or know how, enforcement of statute, as the case may be, etc. The auditor may also review the minutes of the meetings of the Board of Directors subsequent to the year-end to understand if there has been any liquidation of investments or any further investments have been made as these may provide further evidence to understand if the control was meant to be temporary in nature or otherwise.

23. Where a component is excluded from the consolidated financial statements, the auditor should examine the reasons for exclusion and whether such exclusion is in conformity with the applicable financial reporting framework, for example, under the Companies (Accounting Standards) Rules, 2006, there could be two reasons for exclusion of a subsidiary, associate or jointly controlled entity – one, that the relationship of parent with the subsidiary, associate or jointly controlled entity is intended to be temporary or the subsidiary, associate or joint venture operates under severe long-term restrictions which significantly impair its ability to transfer funds to the parent. Similarly, under the Companies Act, 2013, intermediate subsidiary in India is not required to present consolidated financial statements. Ind AS 110 also prescribes certain criteria⁹ where consolidated financial statements are not required. In such cases, the

⁹(a) A parent need not present consolidated financial statements if it meets all the following conditions:

- (i) it is a wholly-owned subsidiary or is a partially-owned subsidiary of another entity and all its other owners, including those not otherwise entitled to vote, have been informed about, and do not object to, the parent not presenting consolidated financial statements;
 - (ii) its debt or equity instruments are not traded in a public market (a domestic or foreign stock exchange or an over-the-counter market, including local and regional markets);
 - (iii) it did not file, nor is it in the process of filing, its financial statements with a securities commission or other regulatory organisation for the purpose of issuing any class of instruments in a public market; and
 - (iv) its ultimate or any intermediate parent produces consolidated financial statements that are available for public use and comply with Ind ASs.
- (b) post-employment benefit plans or other long-term employee benefit plans to which Ind AS 19, *Employee Benefits*, applies.

auditor should satisfy himself that the exclusion made by the management falls within these categories, e.g. in the case of an entity which is excluded from consolidation on the ground that the relationship of parent with the other entity as subsidiary, associate or joint venture is temporary, the auditor should verify that the intention of the parent, to dispose off the subsidiary, investment in associate or interest in jointly controlled entity, in the near future, existed at the time of acquisition of the subsidiary, making investment in associate or jointly controlled entity. The auditor should also verify that the reasons for exclusion are given in the consolidated financial statements. If an entity is excluded from the consolidated financial statements for reasons other than those allowed by the applicable financial reporting framework, the auditor should consider its effect on the auditor's report to be issued.

24. The auditor should also examine whether there is any change in the status of a component (e.g., subsidiary to associate, JV to associates or vice – versa). The auditor, in such cases, should examine whether these changes have been appropriately accounted for in the consolidated financial statements as required by the relevant accounting standards under the applicable financial reporting framework.

25. (a) In preparing consolidated financial statements in accordance with the Companies (Accounting Standards) Rules, 2006, the financial statements of the parent and its subsidiaries are combined on a line by line basis by adding together like items of assets, liabilities, income, expenses and cash flows and then certain calculations like determination of goodwill or capital reserve, minorities interest and adjustments like elimination of intra group transactions, balances and unrealised profits etc. are made in accordance with the requirements of Accounting Standard (AS) 21, "Consolidated Financial Statements". Investments in associates are accounted for using the Equity Method as prescribed in Accounting Standard (AS) 23, "Accounting for Investments in Associates in Consolidated Financial Statements". A parent that has an interest in a jointly controlled entity, reports its interest in the consolidated financial statements using proportionate consolidation method in accordance with Accounting Standard (AS) 27, "Financial Reporting of Interests in Joint Ventures". Many of the procedures appropriate for the application of equity method and the proportionate consolidation method are similar to the consolidation procedures set out in Accounting Standard (AS) 21, "Consolidated Financial Statements".

(b) For consolidation of subsidiaries in accordance with the Companies (Indian Accounting Standards) Rules, 2015:

- the financial statements of the parent and its subsidiaries are combined as per Ind AS 110, "Consolidated Financial Statements" on a line by line basis by adding together like items of assets, liabilities, income, expenses and cash flows;
- related goodwill/ capital reserve and non-controlling interest is determined as per Ind As 103;

(c) an investment entity need not present consolidated financial statements if it is required, in accordance with paragraph 31 of this Ind AS, to measure all of its subsidiaries at fair value through profit or loss.

III.512 Auditing Pronouncements

- adjustments like elimination of intra group transactions, balances, unrealised profits and deferred tax etc. are made in accordance with the requirements of Ind AS 110.
- Investments in associates and joint ventures are accounted for using the Equity Method as prescribed in Indian Accounting Standard (Ind AS) 28, "Investments in Associates and Joint Ventures". Interests in assets, liabilities, revenues and expenses in a joint operation are accounted for as part of separate financial statements of the entity in accordance with Indian Accounting Standard (Ind AS) 111, "Joint Arrangements".

26. The auditor should verify that the adjustments warranted by the relevant accounting standards under the applicable financial reporting framework have been made wherever required and have been properly approved by the management of the parent. The preparation of consolidated financial statements gives rise to permanent consolidation adjustments and current period consolidation adjustments. No adjustments, other than those envisaged in this Guidance Note, can be carried out in the preparation of CFS at the group level.

Special Considerations

Permanent Consolidation Adjustments

27. Permanent consolidation adjustments are those adjustments that are made only on the first occasion or subsequent occasions in which there is a change in the shareholding of a particular entity which is consolidated. Permanent consolidation adjustments are:

- (a) Determination of goodwill or capital reserve as per applicable accounting standards.
- (b) Determination of amount of equity attributable to minority/ non- controlling interests.

28. The auditor should verify that the above calculations have been made appropriately. The auditor should pay particular attention to the determination of pre-acquisition reserves of the components. Date(s) of investment in components assumes importance in this regard. The auditor should also examine whether the pre-acquisition reserves have been allocated appropriately between the parent and the minority interests/ non-controlling interests of the subsidiary. The auditor should also verify the changes that might have taken place in these permanent consolidation adjustments on account of subsequent acquisition of shares in the components, disposal of the components in the subsequent years.

29. It may happen that while working out the permanent consolidation adjustments, in the case of one subsidiary, goodwill arises and in the case of another subsidiary a capital reserve arises. The parent may choose to net off these amounts to disclose a single amount in the consolidated balance sheet where permitted by the applicable financial reporting framework. In such cases, the auditor should verify that the gross amounts of goodwill and capital reserves arising on acquisition of various subsidiaries have been disclosed in the notes to the consolidated financial statements to reflect the excess/shortage over the parents' portion of the subsidiary's equity.

Current Period Consolidation Adjustments

30. Current period consolidation adjustments are those adjustments that are made in the accounting period for which the consolidation of financial statements is done. Current period

consolidation adjustments primarily relate to elimination of intra-group transactions and account balances including:

- (a) intra-group interest paid and received, or management fees, etc.;
- (b) unrealised intra-group profits on assets acquired/ transferred from/ to other subsidiaries;
- (c) intra-group indebtedness;
- (d) adjustments related to harmonising the different accounting policies being followed by the parent and its components;
- (e) adjustments to the financial statements (of the parent and the components being consolidated) for recognized subsequent events or transactions that occur between the balance sheet date and the date of the auditor's report on the consolidated financial statements of the group.

There are two types of subsequent events:

- a. The first type of subsequent events consists of events or transactions that provide additional evidence about conditions that existed at the date of the financial statements, including the estimates inherent in the process of preparing financial statements (i.e. adjusting events).
- b. The second type of subsequent events consists of events that provide evidence about conditions that did not exist at the date of the financial statements but arose subsequent to that date (i.e. non-adjusting events).

Events occurring after balance sheet date which do not require adjustments would not normally require disclosure, although they may be of such significance that they may require a disclosure in the report of approving authority in the case of accounting standards and in the financial statements in case of Ind AS. For such events, the following shall be disclosed:

- a. The nature of the event; and
 - b. An estimate of its financial effect or a statement that such an estimate cannot be made.
- (f) adjustments for the effects of significant transactions or other events that occur between the date of the components balance sheet and not already recognised in its financial statements and the date of the auditor's report on the group's consolidated financial statements when the financial statements of the component to be used for consolidation are not drawn upto the same balance sheet date as that of the parent;
 - (g) In case of a foreign component, adjustments to convert a component's audited financial statements prepared under the component's local GAAP to the GAAP under which the consolidated financial statements are prepared.
 - (h) determination of movement in equity attributable to the minorities interest/non-controlling interest since the date of acquisition of the subsidiary.
 - (i) adjustments of deferred tax on account of temporary differences arising out of elimination of profit and losses resulting from intragroup transactions and undistributed profits of the component in case of consolidated financial statements prepared under Ind AS.

III.514 Auditing Pronouncements

31. The adjustments required for preparation of consolidated financial statements are made in memorandum records kept for the purpose by the parent. The auditor should review the memorandum records to verify the adjustment entries made in the preparation of consolidated financial statements. Apart from reviewing the memorandum records, the auditor should inter alia:

- (a) verify that the intra group transactions and account balances have been eliminated;
- (b) verify that the consolidated financial statements have been prepared using uniform accounting policies for like transactions and other events in similar circumstances;
- (c) verify that adequate disclosures have been made in the consolidated financial statements of application of different accounting policies in case, it was impracticable to harmonize them. Applying a requirement is impracticable when the entity cannot apply it after making every reasonable effort to do so¹⁰.
- (d) verify the adjustments made to harmonise the different accounting policies including adjustments made by management to convert a component's financial statements prepared under the component's GAAP to the GAAP under which the consolidated financial statements are prepared;
- (e) verify the calculation of minorities/non-controlling interest;
- (f) verify adjustments relating to deferred tax on account of temporary differences arising out of elimination of profit and losses resulting from Intergroup transactions (where the parent's accounts are maintained in Ind AS);
- (g) verify that income and expenses of the subsidiary are included in consolidated financial statements from the date it gains control until the date when the entity ceases to control the subsidiary and further such income and expenses are based on the amounts of the assets and liabilities recognised in consolidated financial statements at the acquisition date¹¹.

32. The auditor should gain an understanding of the procedures adopted by the management of the enterprise to make the above mentioned adjustments. This helps the auditor in reducing the audit risk to an acceptably low level.

33. One of the important adjustment that may be required in the current period is determination of impairment loss that might exist for goodwill arising on consolidation. Goodwill arising on consolidation is carried at the value determined at the date of acquisition of the component, and the same is to be tested for impairment loss at every balance sheet date.

¹⁰ AS 21/ AS 23/ AS 27 permit application of different accounting policies, if it is impractical to use uniform accounting policies, that fact should be disclosed together with the proportion of the items in the consolidated financial statements to which the different accounting policies have been applied. Ind AS 28 permits that financial statement of an associate can be prepared using different accounting policies if it is impractical to do so however adjustment shall be made to make the accounting policies conform to those of parent when the financial statements are used by parent in applying the equity method.

¹¹ Where the consolidated financial statements are prepared under Indian Accounting Standards.

34. The auditor should examine whether any impairment loss has been determined by the parent. If yes, the auditor should examine the procedure followed for determination of impairment loss. The auditor should satisfy himself that the amount of impairment loss determined is fair. In case the impairment loss in goodwill of a component has been determined in foreign currency, the auditor should verify if any amount of loss in local currency need to be adjusted from currency translation reserve on account of movement in the exchange rate from the date when the goodwill was first accounted for in the consolidated financial statement of parent, to the date of determination of impairment loss.

35. The auditor should also perform audit procedures to understand and verify whether Intragroup losses are indicating an impairment loss that requires recognition in the consolidated financial statements.

36. Apart from verifying that the calculation and disclosures regarding minorities/non-controlling interest have been made appropriately, the auditor also determines, in cases where the minority interests' share of the losses exceed the minority /non-controlling interests' share of the equity, the excess, and any further losses applicable to the minority interest, have been accounted for in accordance with the relevant accounting standards.

37. The financial statements of the components used in the consolidation should be drawn up to the same reporting date as that of the parent. If it is not practicable to draw up the financial statements of one or more components to such date and, accordingly, those financial statements are drawn up to different reporting dates, adjustments should be made for the effects of significant transactions or other events that occur between those dates and the date of the parent's financial statements. In any case, the difference between reporting dates should not be more than six months in case of financial statements under AS and three months in case of financial statements under Ind AS. The auditor of the consolidated financial statements should review other components' results between its financial reporting date and that of the parent for significant transactions or other events that have taken place during the period and, therefore, need to be reflected in the consolidated financial statements. Recognition should be given by disclosure or otherwise to the effect of intervening events which materially affect the financial position, results of operations or cash flows.

38. The fundamental accounting assumption of "consistency" requires the auditor of the consolidated financial statements to consider whether the length of the reporting periods and any difference in financial year-ends are the same from period to period. If there have been any changes in the respective reporting periods of the components included in the consolidated financial statements that have a material effect on the financial statements, the auditor should ensure that the entity discloses such changes and the manner of treatment in the financial statements.

39. The Ministry of Corporate Affairs has issued a Circular number 39/2014 dated October 14, 2014 stating that Schedule III to the Act read with the applicable Accounting Standards does not envisage that a company while preparing its consolidated financial statements merely repeats the disclosures made by it under separate financial statements being consolidated. In the consolidated financial statements, the company would need to give all disclosures relevant to consolidated financial statements only.

III.516 Auditing Pronouncements

40. Further, Accounting Standard (AS) 21 also lays down certain principles that should be observed while giving the information which is part of the separate financial statements of the Components but that need not be reported in the notes and other explanatory material of the consolidated financial statements. The auditor should:

- (a) examine that the notes required by the applicable standards which are necessary for presenting a true and fair view of the consolidated financial statements have been included in the consolidated financial statements as an integral part thereof; and
- (b) examine that additional statutory information disclosed in the separate financial statements of the subsidiary and/or a parent having bearing on the true and fair view of the consolidated financial statements have been disclosed in the consolidated financial statements.

41. In addition, the information required pursuant to Schedule III to the Companies Act, 2013 ('general instructions for the preparation of consolidated financial statements') should be disclosed. For example, following information is also required to be disclosed in the consolidated financial statements separately for the parent and each of its components (including foreign component) which has been consolidated:

- (i) amount of net assets and net assets as a percentage of consolidated net assets;
- (ii) amount of share in profit or loss and the percentage share in profit or loss as a percentage of consolidated profit or loss;
- (iii) amount in other comprehensive income (OCI) and the percentage of OCI as a percentage of Consolidated OCI.¹²

42. As regards consolidation adjustments (including elimination of intra group transactions), it should be ensured that these are either disclosed as a single line item separately or adjusted in the information (e.g. net assets) disclosed for the parent and its each component.

43. The Ind AS 110 does not give a list of information which is part of the separate financial statement of the components but that need not be reported in the notes and other explanatory material of the consolidated financial statements, however, based on section 129(4) and MCA circular 39/2014 as referred above, it can be construed that, even in consolidated financial statements under Ind AS, only those disclosures should be given which are relevant to consolidated financial statements.

44. Based on the above discussion, in case of companies, the information such as the following given in the notes to the separate financial statements of the parent and/or the subsidiary, need not be included in the consolidated financial statements.

- (i) Source from which bonus shares are issued, e.g., capitalisation of profits or Reserves or from Securities Premium Account.

¹² For companies which are covered by Ind AS.

- (ii) Disclosure of all unutilised monies out of the issue indicating the form in which such unutilised funds have been invested.
- (iii) Disclosure required under Micro, Small and Medium Enterprises Development Act, 2006.
- (iv) A statement of investments (whether shown under “financial assets or non-financial assets as stock-in-trade) separately classifying trade investments and other investments, showing the names of the bodies corporate (indicating separately the names of the bodies corporate under the same management) in whose shares or debentures, investments have been made (including all investments, whether existing or not, made subsequent to the date as at which the previous balance sheet was made out) and the nature and extent of the investment so made in each such body corporate.
- (v) Value of imports calculated on C.I.F. basis by the company during the financial year in respect of:
 - (a) raw materials;
 - (b) components and spare parts;
 - (c) capital goods.
- (vi) Expenditure in foreign currency during the financial year on account of royalty, know-how, professional and consultation fees, interest, and other matters.
- (vii) Value of all imported raw materials, spare parts and components consumed during the financial year and the value of all indigenous raw materials, spare parts and components similarly consumed and the percentage of each to the total consumption.
- (viii) The amount remitted during the year in foreign currencies on account of dividends, with a specific mention of the number of non-resident shareholders, the number of shares held by them on which the dividends were due and the year to which the dividends related.
- (ix) Earnings in foreign exchange classified under the following heads, namely:-
 - (a) export of goods calculated on F.O.B. basis;
 - (b) royalty, know-how, professional and consultation fees;
 - (c) interest and dividend;
 - (d) other income, indicating the nature thereof.

However, notwithstanding the above, the auditor needs to ensure compliance with disclosure requirements of applicable accounting standards and other applicable laws for consolidated financial statements.

Management Representations

45. Standard on Auditing (SA) 580, “Written Representations” requires the auditor to obtain appropriate representations from management. The auditor of the consolidated financial statements should obtain evidence that the management of the parent acknowledges its responsibility for a true and fair presentation of the consolidated financial statements in accordance with the financial reporting framework applicable to the parent and that parent’s

III.518 Auditing Pronouncements

management has approved the consolidated financial statements. In addition, the auditor of the consolidated financial statements should obtain written representations from parent's management on matters material to the consolidated financial statements. Examples of such representations include:

- (a) Completeness of components included in the consolidated financial statements;
- (b) Identification of reportable segments for segment reporting;
- (c) Identification of related parties and related party transactions for reporting;
- (d) Appropriateness and completeness of permanent and current period consolidation adjustments, including the elimination of intra-group transactions.

Reporting

46. With reference to the auditor's responsibility under paragraph 8, there could be two situations in an audit of consolidated financial statements—when the parent's auditor is also the auditor of all the components to be included in the consolidated financial statements and when the parent's auditor is not the auditor of one or more components and therefore, uses the work of other auditors in the audit. The auditor should, while preparing the report, consider the requirements of Standard on Auditing (SA) 700, "Forming an Opinion and Reporting on Financial Statements", SA 705, "Modifications to the Opinion in the Independent Auditor's Report and SA 706, "Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report. Where, the auditor uses the work of other auditors in the audit of consolidated financial statements, the requirements of Standard on Auditing (SA) 600, "Using the Work of Another Auditor" should also be considered. Reference may also be made to paragraph 16 for using the work of another auditor.

When the Parent's Auditor is also the Auditor of All its components

47. While drafting the audit report, the auditor should report whether principles and procedures for preparation and presentation of consolidated financial statements as laid down in the relevant accounting standards have been followed. In case of any departure, the auditor should consider the same while drafting the audit report.

48. Auditor should issue an audit report expressing an opinion whether the consolidated financial statements give a true and fair view of the state of affairs of the Group as on balance sheet date and as to whether consolidated profit and loss statement gives true and fair view of the results of consolidated profit or losses of the Group for the period under audit. Where the consolidated financial statements also include a cash flow statement, the auditor should also give his opinion on the true and fair view of the cash flows presented by the consolidated cash flow statement. Suggested format of the audit report to be issued in such circumstance is given in **Appendix I** to this Guidance Note.

When the Parent's Auditor is not the Auditor of All its Components

49. In a case where the parent's auditor is not the auditor of all the components included in the consolidated financial statements, the auditor of the consolidated financial statements should consider the requirements of SA 600.

50. As prescribed in SA 706, if the auditor considers it necessary to make reference to the audit of the other auditors, the auditor's report on the consolidated financial statements should disclose clearly the magnitude of the portion of the financial statements audited by the other auditor(s). This may be done by stating aggregate rupee amounts or percentages of total assets, revenues and cash flows of components included in the consolidated financial statements not audited by the parent's auditor. Total assets, revenues and cash flows not audited by the parent's auditor should be presented before giving effect to permanent and current period consolidation adjustments. Reference in the report of the auditor on the consolidated financial statements to the fact that part of the audit of the group was made by other auditor(s) is not to be construed as a qualification of the opinion but rather as an indication of the divided responsibility between the auditors of the parent and its subsidiaries. Suggested format of the audit report to be issued by the auditor of the consolidated financial statements in this circumstance is given in **Appendix I** to this Guidance Note.

When the Component(s) Auditor Reports on Financial Statements under an Accounting Framework Different than that of the Parent

51. The parent may have components located in multiple geographies outside India applying an accounting framework (GAAP) that is different than that of the parent in preparing its financial statements. Foreign components prepare financial statements under different financial reporting frameworks, which may be a well-known framework (such as US GAAP or IFRS) or the local GAAP of the jurisdiction of the component. Local component auditors may be unable to report on financial statements prepared using the parent's GAAP because of their unfamiliarity with such GAAP.

52. When a component's financial statements are prepared under an accounting framework that is different than that of the framework used by the parent in preparing group's consolidated financial statements, the parent's management perform a conversion of the components' audited financial statements from the framework used by the component to the framework under which the consolidated financial statements are prepared. The conversion adjustments are audited by the principal auditor to ensure that the financial information of the component(s) is suitable and appropriate for the purposes of consolidation. Suggested format of the audit report to be issued by the auditor of the consolidated financial statements in this circumstance is given in **Appendix I** to this Guidance Note.

53. A component may alternatively prepare financial statements on the basis of the parent's accounting policies, as outlined in the group accounting manual, to facilitate the preparation of the group's consolidated financial statements. The group accounting manual would normally contain all accounting policies, including relevant disclosure requirements, which are consistent with the requirements of the financial reporting framework under which the group's consolidated financial statements are prepared. The local component auditor can then audit and issue an audit report on the components financial statements prepared in accordance with "group accounting policies".

54. When applying the approach in paragraph 53 above of using group accounting policies as the financial accounting framework for components to report under, the principal/parent auditors should perform procedures necessary to determine compliance of the group accounting policies with the

GAAP applicable to the parent's financial statements. This ensures that the information prepared under the requirements of the group accounting policies will be directly usable and relevant for the preparation of consolidated financial statements by the parent entity, eliminating the need for auditing by the auditor, the differences between the basis used for the component's financial statements and that of the consolidated financial statements. The Principal auditor can then decide whether or not to rely on the components' audit report and make reference to it in the auditor's report on the consolidated financial statements. See paragraph 50 for additional guidance.

When the Component(s) Auditor Reports under an Auditing Framework Different than that of the Parent

55. Normally, audits of financial statements, including consolidated financial statements, are performed under auditing standards generally accepted in India ("Indian GAAS"). In order to maintain consistency of the auditing framework and to enable the parent auditor to rely and refer to the other auditor's audit report in their audit report on the consolidated financial statements, the components' financial statements should also be audited under a framework that corresponds to Indian GAAS.

Components Not Audited

56. Generally, the financial statements of all components included in consolidated financial statements should be audited or subjected to audit procedures in the context of a multi-location group audit. Such audits and audit procedures can be performed by the auditor reporting on the consolidated financial statements or by the components' auditor.

57. Where the financial statements of one or more components continue to remain unaudited, the auditor reporting on the consolidated financial statements should consider unaudited components in evaluating a possible modification to his report on the consolidated financial statements. The evaluation is necessary because the auditor (or other auditors, as the case may be) has not been able to obtain sufficient appropriate audit evidence in relation to such consolidated amounts/balances. In such cases, the auditor should evaluate both qualitative and quantitative factors on the possible effect of such amounts remaining unaudited when reporting on the consolidated financial statements using the guidance provided in SA 705, "Modifications to the Opinion in the Independent Auditor's Report"¹³.

¹³ Refer Announcement on the Manner of Disclosure in the Auditor's Report of the Fact of Inclusion of Unaudited Financial Statements / Information of Component/s in the Financial Statements audited by the Principal Auditor(s) issued by ICAI in February 2014.

ILLUSTRATIVE FORMAT OF INDEPENDENT AUDITOR'S REPORT ON THE CONSOLIDATED FINANCIAL STATEMENTS OF A GROUP UNDER THE COMPANIES ACT, 2013 AND THE RULES THEREUNDER

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF ABC COMPANY LIMITED

Report on the Consolidated Financial Statements

We have audited the accompanying consolidated Ind AS¹⁴ financial statements of ABC Company Limited (hereinafter referred to as "the Holding Company") and its subsidiaries (the Holding Company and its subsidiaries together referred to as "the Group") its associates and its jointly controlled entities/joint ventures and joint operations¹⁵, comprising the Consolidated Balance Sheet as at 31st March, 20XX, the Consolidated Statement of Profit and Loss (including other comprehensive income)¹⁶, the Consolidated Cash Flow Statement, the Consolidated Statement of Changes in Equity¹⁷, for the year then ended, and a summary of the significant accounting policies and other explanatory information (hereinafter referred to as "the consolidated financial statements").

Management's Responsibility for the Consolidated Financial Statements

The Holding Company's Board of Directors is responsible for the preparation of these consolidated financial statements in terms of the requirements of the Companies Act, 2013 (hereinafter referred to as "the Act") that give a true and fair view of the consolidated financial position, consolidated financial performance (including other comprehensive income)¹⁸,

¹⁴ if applicable.

¹⁸ if applicable.

III.522 Auditing Pronouncements

consolidated cash flows and consolidated statement of changes in equity¹⁹ of the Group including its Associates and Jointly controlled entities/ Joint ventures and Joint operations²⁰ in accordance with the accounting principles generally accepted in India, including the Accounting Standards prescribed under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014 / Indian Accounting Standards specified under Section 133 of the Act²¹. The respective Board of Directors of the companies included in the Group and of its associates and jointly controlled entities /joint ventures and joint operations²² are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Group and its associates and its jointly controlled entities/joint ventures and joint operations²³ and for preventing and detecting frauds and other irregularities; the selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Holding Company, as aforesaid.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. While conducting the audit, we have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Holding Company's preparation of the consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the

²² As the case may be as per the relevant accounting standards.

²³ As the case may be as per the relevant accounting standards.

accounting estimates made by the Holding Company's Board of Directors, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the consolidated financial statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid consolidated financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the consolidated state of affairs (financial position) of the Group, its associates and jointly controlled entities /joint ventures and joint operations²⁴ as at 31st March, 20XX, and their consolidated profit/loss (financial performance including other comprehensive income)²⁵, their consolidated cash flows and consolidated statement of changes in equity²⁶ for the year ended on that date.

Report on Other Legal and Regulatory Requirements

As required by Section 143(3) of the Act, we report, to the extent applicable, that:

- (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit of the aforesaid consolidated financial statements.
- (b) In our opinion, proper books of account as required by law relating to preparation of the aforesaid consolidated financial statements have been kept so far as it appears from our examination of those books and the reports of the other auditors.
- (c) The Consolidated Balance Sheet, the Consolidated Statement of Profit and Loss, the Consolidated Cash Flow Statement, and Consolidated Statement of Changes in Equity²⁷ dealt with by this Report are in agreement with the relevant books of account maintained for the purpose of preparation of the consolidated financial statements.
- (d) In our opinion, the aforesaid consolidated financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014 /Indian Accounting Standards specified under Section 133 of the Act²⁸.

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF ABC COMPANY LIMITED

Report on the Consolidated Financial Statements

We have audited the accompanying consolidated Ind AS³⁹ financial statements of ABC Company Limited (hereinafter referred to as "the Holding Company") and its subsidiaries (the Holding Company and its subsidiaries together referred to as "the Group") its associates and its jointly controlled entities/joint ventures and joint operations⁴⁰, comprising the Consolidated Balance Sheet as at 31st March, 20XX, the Consolidated Statement of Profit and Loss (including other comprehensive income)⁴¹, the Consolidated Cash Flow Statement, Consolidated Statement of Changes in Equity⁴², for the year then ended, and a summary of the significant accounting policies and other explanatory information (hereinafter referred to as "the consolidated financial statements").

³⁹ if applicable.

⁴⁰ As the case may be as per the relevant accounting standards.

⁴¹ if applicable.

⁴² if applicable.

Management's Responsibility for the Consolidated Financial Statements

The Holding Company's Board of Directors is responsible for the preparation of these consolidated financial statements in terms of the requirements of the Companies Act, 2013 (hereinafter referred to as "the Act") that give a true and fair view of the consolidated financial position, consolidated financial performance (including other comprehensive income)⁴³, consolidated cash flows and consolidated statement of changes in equity⁴⁴ of the Group including its Associates and Jointly controlled entities /Joint ventures and Joint operations⁴⁵ in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014 / Indian Accounting Standards prescribed under Section 133 of the Act⁴⁶. The respective Board of Directors of the companies included in the Group and of its associates and jointly controlled entities /joint ventures and joint operations⁴⁷ are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Group and its associates and its jointly controlled entities/joint ventures and joint operations⁴⁸ and for preventing and detecting frauds and other irregularities; the selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Holding Company, as aforesaid.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. While conducting the audit, we have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the

consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Holding Company's preparation of the consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Holding Company's Board of Directors, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence obtained by us and the audit evidence obtained by the other auditors in terms of their reports referred to in sub-paragraph (a) of the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the consolidated financial statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us and based on the consideration of reports of other auditors on separate financial statements and on the other financial information of the subsidiaries, associates and jointly controlled entities/joint ventures and joint operations⁴⁹, the aforesaid consolidated financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the consolidated state of affairs (financial position) of the Group, its associates and jointly controlled entities /joint ventures and joint operations⁵⁰ as at 31st March, 20XX, and their consolidated profit/loss (financial performance including other comprehensive income)⁵¹, their consolidated cash flows and consolidated statement of changes in equity⁵² for the year ended on that date.

Other Matters

(a) We did not audit the financial statements/ financial information of _____ subsidiaries, and _____ jointly controlled entities /joint operations⁵³, whose financial statements/ financial information reflect total assets of Rs. _____ and net assets of Rs. _____ as at 31st March, 20XX, total revenues of Rs. _____ and net cash outflows/(inflows)⁵⁴ amounting to Rs. _____ for the year ended on that date, as considered in the consolidated financial statements. The consolidated financial statements also include the Group's share of net profit/loss of Rs. _____ for the year ended 31st March, 20XX, as considered in the consolidated financial statements, in respect of _____ associates and joint ventures, whose financial statements / financial information have not been audited by us. These financial statements / financial information have been audited by other auditors whose reports have been furnished to us by the Management and our opinion on the consolidated financial

statements, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries, jointly controlled entities /joint ventures and joint operations⁵⁵ and associates, and our report in terms of sub-section (3) of Section 143 of the Act, insofar as it relates to the aforesaid subsidiaries, jointly controlled entities /joint ventures and joint operations⁵⁶ and associates, is based solely on the reports of the other auditors.

Certain of these subsidiaries/associates/ joint ventures and joint operations are located outside India whose financial statements and other financial information have been prepared in accordance with accounting principles generally accepted in their respective countries and which have been audited by other auditors under generally accepted auditing standards applicable in their respective countries. The Company's management has converted the financial statements of such subsidiaries/associates/ joint ventures and joint operations located outside India from accounting principles generally accepted in their respective countries to accounting principles generally accepted in India. We have audited these conversion adjustments made by the Company's management. Our opinion in so far as it relates to the balances and affairs of such subsidiaries/associates/ joint ventures and joint operations located outside India is based on the report of other auditors and the conversion adjustments prepared by the management of the Company and audited by us.

- (b) We did not audit the financial statements / financial information of _____ subsidiaries and _____ jointly controlled entities/ joint operations⁵⁷, whose financial statements/ financial information reflect total assets of Rs. _____ and net assets of Rs. _____ as at 31st March, 20XX, total revenues of Rs. _____ and net cash outflows/(inflows)⁵⁸ amounting to Rs. _____ for the year ended on that date, as considered in the consolidated financial statements. The consolidated financial statements also include the Group's share of net profit/loss of Rs. _____ for the year ended 31st March, 20XX, as considered in the consolidated financial statements, in respect of _____ associates and joint ventures, whose financial statements / financial information have not been audited by us. These financial statements / financial information are unaudited and have been furnished to us by the Management and our opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries, jointly controlled entities /joint ventures and joint operations⁵⁹ and associates, and our report in terms of sub-section (3) of Section 143 of the Act in so far as it relates to the aforesaid subsidiaries, jointly controlled entities /joint ventures and joint operations⁶⁰ and associates, is based solely on such unaudited financial statements / financial information. In our opinion and according to the information and explanations given to us by the Management, these financial statements/financial information are not material to the Group.

ILLUSTRATIVE FORMAT OF INDEPENDENT AUDITOR'S REPORT ON THE CONSOLIDATED FINANCIAL STATEMENTS OF A GROUP UNDER THE COMPANIES ACT, 2013 AND THE RULES THEREUNDER

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF ABC COMPANY LIMITED

Report on the Consolidated Financial Statements

We have audited the accompanying consolidated Ind AS⁷⁴ financial statements of ABC Company Limited (hereinafter referred to as "the Holding Company") and its subsidiaries (the Holding Company and its subsidiaries together referred to as "the Group") its associates and its jointly controlled entities/joint ventures and joint operations⁷⁵, comprising the Consolidated Balance Sheet as at 31st March, 20XX, the Consolidated Statement of Profit and Loss (including other comprehensive income)⁷⁶, the Consolidated Cash Flow Statement, Consolidated Statement of Changes in Equity⁷⁷, for the year then ended, and a summary of the significant accounting policies and other explanatory information (hereinafter referred to as "the consolidated financial statements").

Management's Responsibility for the Consolidated Financial Statements

The Holding Company's Board of Directors is responsible for the preparation of these

⁷⁴ if applicable.

⁷⁵ As the case may be as per the relevant accounting standards.

⁷⁶ if applicable.

⁷⁷ if applicable.

consolidated financial statements in terms of the requirements of the Companies Act, 2013 (hereinafter referred to as "the Act") that give a true and fair view of the consolidated financial position, consolidated financial performance (including other comprehensive income)⁷⁸, consolidated cash flows and consolidated statement of changes in equity⁷⁹ of the Group including its Associates and Jointly controlled entities /Joint ventures and Joint operations⁸⁰ in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014 / Indian Accounting Standards prescribed under Section 133 of the Act⁸¹. The respective Board of Directors of the companies included in the Group and of its associates and jointly controlled entities /joint ventures and joint operations⁸² are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Group and its associates and its jointly controlled entities/joint ventures and joint operations⁸³ and for preventing and detecting frauds and other irregularities; the selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Holding Company, as aforesaid.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. While conducting the audit, we have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Holding Company's

preparation of the consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Holding Company's Board of Directors, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence obtained by us and the audit evidence obtained by the other auditors in terms of their reports referred to in sub-paragraph (a) of the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our qualified audit opinion on the consolidated financial statements.

Basis for Qualified Opinion

We draw your attention to the following qualification to the audit opinion of the financial statements of [Name of the subsidiary company], a subsidiary of the Holding Company issued by an independent firm of Chartered Accountants vide its Report dated [date] reproduced by us as under:

“[State the Basis for Qualified Opinion as included by the component auditor in his report]”

Qualified Opinion

In our opinion and to the best of our information and according to the explanations given to us and based on the consideration of reports of other auditors on separate financial statements and on the other financial information of the subsidiaries, associates and jointly controlled entities/joint ventures and joint operations⁸⁴, the aforesaid consolidated financial statements give the information required by the Act in the manner so required and except for the effects of the matter referred to in the Basis for Qualified Opinion paragraph above, give a true and fair view in conformity with the accounting principles generally accepted in India, of the consolidated state of affairs (financial position) of the Group, its associates and jointly controlled entities /joint ventures and joint operations⁸⁵ as at 31st March, 20XX, and their consolidated profit/loss (financial performance including other comprehensive income)⁸⁶, their consolidated cash flows and consolidated statement of changes in equity⁸⁷ for the year ended on that date.

Other Matters

- (a) We did not audit the financial statements / financial information of _____ subsidiaries, and _____ jointly controlled entities /joint operations⁸⁸, whose financial statements/ financial information reflect total assets of Rs. _____ and net assets of Rs. _____ as at 31st March, 20XX, total revenues of Rs. _____ and net cash outflows/(inflows)⁸⁹ amounting to Rs. _____ for the year ended on that date, as considered in the consolidated financial statements. The consolidated financial statements also include the Group's share of net profit/loss of Rs. _____

____ for the year ended 31st March, 20XX, as considered in the consolidated financial statements, in respect of ____ associates and joint ventures, whose financial statements / financial information have not been audited by us. These financial statements / financial information have been audited by other auditors whose reports have been furnished to us by the Management and our opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries, jointly controlled entities / joint ventures and joint operations⁹⁰ and associates, and our report in terms of sub-section (3) of Section 143 of the Act, insofar as it relates to the aforesaid subsidiaries, jointly controlled entities / joint ventures and joint operations⁹¹ and associates, is based solely on the reports of the other auditors.

Certain of these subsidiaries/associates/ joint ventures and joint operations are located outside India whose financial statements and other financial information have been prepared in accordance with accounting principles generally accepted in their respective countries and which have been audited by other auditors under generally accepted auditing standards applicable in their respective countries. The Company's management has converted the financial statements of such subsidiaries/associates/ joint ventures and joint operations located outside India from accounting principles generally accepted in their respective countries to accounting principles generally accepted in India. We have audited these conversion adjustments made by the Company's management. Our opinion in so far as it relates to the balances and affairs of such subsidiaries/associates/ joint ventures and joint operations located outside India is based on the report of other auditors and the conversion adjustments prepared by the management of the Company and audited by us.

- (b) We did not audit the financial statements / financial information of subsidiaries and jointly controlled entities/ joint operations⁹², whose financial statements/financial information reflect total assets of Rs. ____ and net assets of Rs. ____ as at 31st March, 20XX, total revenues of Rs. ____ and net cash outflows/(inflows)⁹³ amounting to Rs. ____ for the year ended on that date, as considered in the consolidated financial statements. The consolidated financial statements also include the Group's share of net profit/loss of Rs. ____ for the year ended 31st March, 20XX, as considered in the consolidated financial statements, in respect of ____ associates and joint ventures, whose financial statements / financial information have not been audited by us. These financial statements / financial information are unaudited and have been furnished to us by the Management and our opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries, jointly controlled entities / joint ventures and joint operations⁹⁴ and associates, and our report in terms of sub-section (3) of Section 143 of the Act in so far as it relates to the aforesaid subsidiaries, jointly controlled

entities /joint ventures and joint operations⁹⁵ and associates, is based solely on such unaudited financial statements/ financial information. In our opinion and according to the information and explanations given to us by the Management, these financial statements/ financial information are not material to the Group.

Our opinion above on the consolidated financial statements, and our report on Other Legal and Regulatory Requirements below, is not modified in respect of the above matters with respect to our reliance on the work done and the reports of the other auditors and the financial statements/ financial information certified by the Management.

Report on Other Legal and Regulatory Requirements

As required by Section 143(3) of the Act, based on our audit and on the consideration of report of the other auditors on separate financial statements and the other financial information of subsidiaries, associates and jointly controlled entities/joint ventures and joint operations⁹⁶, as noted in the 'other matter' paragraph, we report, to the extent applicable, that:

- (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit of the aforesaid consolidated financial statements.
- (b) In our opinion, proper books of account as required by law relating to preparation of the aforesaid consolidated financial statements have been kept so far as it appears from our examination of those books and the reports of the other auditors, except as stated in the auditor's report dated [date] on the financial statements of [Name of the component], a subsidiary of the Holding Company, issued by an independent firm of Chartered Accountants which is reproduced as below:
"[State the remark as included by the component auditor in his report]."
- (c) The Consolidated Balance Sheet, the Consolidated Statement of Profit and Loss, the Consolidated Cash Flow Statement and Consolidated Statement of Changes in Equity⁹⁷ dealt with by this Report are in agreement with the relevant books of account maintained for the purpose of preparation of the consolidated financial statements.
- (d) In our opinion, the aforesaid consolidated financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014 /Indian Accounting Standards specified under Section 133 of the Act⁹⁸.
- (e) The audit report on the financial statements of [Name of the subsidiary], a subsidiary of the Holding Company, issued by an independent firm of Chartered Accountants *vide* its audit report dated [date] contains the following remark, which is reproduced by us as below:

“The matter described in the Basis for Qualified Opinion paragraph above, in our opinion, may have an adverse effect on the functioning of the Group.”

(f) On the basis of the written representations received from the directors of the Holding Company as on 31st March, 20XX taken on record by the Board of Directors of the Holding Company and the reports of the statutory auditors of its subsidiary companies, associate companies and jointly controlled entities/ joint ventures and joint operations⁹⁹ incorporated in India, none of the directors of the Group companies, its associate companies and jointly controlled companies/joint venture incorporated in India is disqualified as on 31st March 20XX from being appointed as a director in terms of Section 164(2) of the Act.

(g) The audit report on the financial statements of [Name of the subsidiary], a subsidiary of the Holding Company, issued by an independent firm of Chartered Accountants *vide* its audit report dated [date] contains the following remark, which is reproduced by us as below:

“The qualification relating to maintenance of accounts and other matters connected therewith are as stated in the Basis for Qualified Opinion paragraph above.”

(h) With respect to the adequacy of the internal financial controls over financial reporting of the Holding Company, its subsidiary companies, associate companies and jointly controlled entities/ joint ventures and joint operations¹⁰⁰ incorporated in India and the operating effectiveness of such controls, refer to our separate Report in “Annexure A”.

(i) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditor's) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us and based on the consideration of the report of the other auditors on separate financial statements as also the other financial information of the subsidiaries, associates and jointly controlled entities/joint ventures and joint operations¹⁰¹, as noted in the ‘Other matter’ paragraph:

i. The consolidated financial statements disclose the impact of pending litigations on the consolidated financial position of the Group, its associates and jointly controlled entities /joint ventures and joint operations¹⁰². Refer Note XX to the consolidated financial statements.

Or

There were no pending litigations as at 31st March 20XX which would impact the consolidated financial position of the Group, its associates and jointly controlled entities/joint ventures and joint operations¹⁰³

ii. Provision has been made in the consolidated financial statements, as required under the applicable law or accounting standards, for material foreseeable losses, if any, on

⁹⁹ As the case may be as per the relevant accounting standards.

¹⁰⁰ As the case may be as per the relevant accounting standards.

¹⁰¹ As the case may be as per the relevant accounting standards.

¹⁰² As the case may be as per the relevant accounting standards.

¹⁰³ As the case may be as per the relevant accounting standards.

long-term contracts including derivative contracts - Refer (a) Note XX to the consolidated financial statements in respect of such items as it relates to the Group, its associates and jointly controlled entities /joint ventures and joint operations¹⁰⁴ and (b) the Group's share of net profit/loss in respect of its associates.

Or

The Group, its associates and jointly controlled entities /joint ventures and joint operations¹⁰⁵ did not have any material foreseeable losses on long-term contracts including derivative contracts during the year ended 31st March 20XX.

- iii. There are no amounts which are required to be transferred to the Investor Education and Protection Fund by the Holding Company and its subsidiary companies, associate companies and jointly controlled entities/ joint ventures and joint operations¹⁰⁶ incorporated in India during the year ended 31st March 20XX.

Or

There has been no delay in transferring amounts to the Investor Education and Protection Fund by the Holding Company and its subsidiary companies, associate companies and jointly controlled entities/ joint ventures and joint operations¹⁰⁷ incorporated in India during the year ended 31st March 20XX.

Or

The following are the instances of delay in transferring amounts, to the Investor Education and Protection Fund by the Holding Company and its subsidiary companies, associate companies and jointly controlled companies incorporated in India during the year ended 31st March 20XX: [describe the delays, covering date of payment, amount involved and number of days' delay.]

Appendix II

Definitions of Terms used in the Guidance Note

(This Appendix form part of the Guidance Note. The purpose of this Appendix is to define the terms which have been used in this Guidance Note)

Terms defined under Accounting Standards

1. **Associate:** An associate is an enterprise in which the investor has significant influence and which is neither a subsidiary nor a joint venture of the investor.
2. **Consolidated financial statements:** Consolidated financial statements are the financial statements of a group presented as those of a single enterprise.
3. **Control:**
 - a. The ownership, directly or indirectly through subsidiary(ies), of more than one-half of the voting power of an enterprise; or
 - b. control of the composition of the board of directors in the case of a company or of the composition of the corresponding governing body in case of any other enterprise so as to obtain economic benefits from its activities.
4. **Group:** A group comprises a parent and its subsidiaries.
5. **Joint control:** Joint control is the contractually agreed sharing of control over an economic activity.
6. **Joint venture:** A joint venture is a contractual arrangement whereby two or more parties undertake an economic activity, which is subject to joint control.
7. **Minority interest:** Minority interest is that part of the net results of operations and of net assets of a subsidiary attributable to interests which are not owned, directly or indirectly, through subsidiary(ies), by the parent.
8. **Parent:** A parent is an enterprise that has one or more subsidiaries.
9. **Significant influence:** Significant influence is the power to participate in the financial and/ or operating policy decisions of the investee but not control over those policies.
10. **Subsidiary:** A subsidiary is an enterprise that is controlled by another enterprise (known as the parent).

Terms defined under Ind AS

1. **Associate:** An associate is an entity over which the investor has significant influence.
2. **Control of an investee:** An investor controls an investee when the investor is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.
3. **Consolidated financial statements:** The financial statements of a group in which the assets, liabilities, equity, income, expenses and cash flows of the parent and its subsidiaries are presented as those of a single economic entity.

4. **Group:** A parent and its subsidiaries.
5. **Joint Control:** Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control.
6. **Joint Venture:** A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement.
7. **Non-controlling Interest:** Equity in a subsidiary not attributable, directly or indirectly, to a parent.
8. **Parent:** An entity that controls one or more entities.
9. **Power:** Existing rights that give the current ability to direct the relevant activities.
10. **Relevant Activities:** Relevant activities are activities of the investee that significantly affect the investee's returns.
11. **Significant influence:** Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control of those policies.
12. **Subsidiary:** An entity that is controlled by another entity.
13. **Separate Financial Statements:** separate financial statements are those presented by a parent (i.e. an investor with control of a subsidiary) or an investor with joint control of, or significant influence over, an investee, in which the investments are accounted for at cost or in accordance with Ind AS 109, 'Financial Instruments'.

Terms defined under SA 600, "Using the Work of Another Auditor"

1. **Component:** It is a division, branch, subsidiary, joint venture, associated enterprises or other entity whose financial information is included in the financial information audited by principal auditor.

Guidance Note on Audit of Internal Financial Controls Over Financial Reporting

SECTION I: BACKGROUND

Introduction

1. Internal control helps entities achieve important objectives and sustain and improve performance.

Paragraph 4(c) of the Standard on Auditing (SA) 315 “Identifying and Assessing the Risks of Material Misstatement Through Understanding the Entity and Its Environment” defines the term ‘internal control’ as “the process designed, implemented and maintained by those charged with governance, management and other personnel to provide reasonable assurance about the achievement of an entity’s objectives with regard to reliability of financial reporting, effectiveness and efficiency of operations, safeguarding of assets, and compliance with applicable laws and regulations. The term “controls” refers to any aspects of one or more of the components of internal control.”

SA 315 requires the auditor to identify and assess the risks of material misstatement, whether due to fraud or error, at the financial statement and assertion levels, through understanding the entity and its environment, including the entity’s internal control, thereby providing a basis for designing and implementing responses to the assessed risks of material misstatement and help the auditor to reduce the risks of material misstatement to an acceptably low level.

2. Section 217(2AA) of the Companies Act, 1956 required the Directors of a company to specifically state in the Directors’ responsibility statement that they have taken proper and sufficient care for the maintenance of adequate accounting records in accordance with the provisions of the (1956) Act, for safeguarding the assets of the company and for preventing and detecting fraud and other irregularities.

The Act, 2013 has significantly expanded the scope of internal controls to be considered by the management of companies to cover all aspects of the operations of the company. Clause (e) of Sub-section 5 of Section 134 to the Act requires the directors responsibility statement to state that the directors, in the case of a listed company, had laid down internal financial controls to be followed by the company and that such internal financial controls are adequate and were operating effectively.

Clause (e) of Sub-section 5 of Section 134 explains the meaning of internal financial controls as “the policies and procedures adopted by the company for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information.”

Rule 8(5)(viii) of the Companies (Accounts) Rules, 2014 requires the board report of all companies to state the details in respect of adequacy of internal financial controls with reference to the financial statements.

The inclusion of the matters relating to internal financial controls in the directors responsibility statement is in addition to the requirement of the directors stating that they have taken proper and sufficient care for the maintenance of adequate accounting records in accordance with the provisions of the 2013 Act for safeguarding the assets of the company and for preventing and detecting fraud and other irregularities.

3. The concept of internal financial controls is not new in India for listed companies. Clause 49 of the Equity Listing Agreement requires certification by the CEO / CFO stating that they accept responsibility for establishing and maintaining internal controls for financial reporting and that they have evaluated the effectiveness of internal control systems of the company pertaining to financial reporting and they have disclosed to the auditors and the audit committee, deficiencies in the design or operation of such internal controls, if any, of which they are aware and the steps they have taken or propose to take to rectify those deficiencies.

Auditors' Responsibility for Reporting on Internal Financial Controls over Financial Reporting in India

4. Clause (i) of Sub-section 3 of Section 143 of the Act requires the auditors' report to state whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.

It may be noted that auditor's reporting on internal financial controls is a requirement specified in the Act and, therefore, will apply only in case of reporting on financial statements prepared under the Act and reported under Section 143.

Accordingly, reporting on internal financial controls will not be applicable with respect to interim financial statements, such as quarterly or half-yearly financial statements, unless such reporting is required under any other law or regulation.

Reporting on internal financial controls over financial reporting under the 2013 Act vis-à-vis reporting on internal controls under the Companies (Auditor's Report) Order, 2015 (CARO)

5. The scope for reporting on internal financial controls over financial reporting is significantly larger and wider than the reporting on internal controls under CARO. Under CARO the reporting on internal controls is limited to the "adequacy" of controls over purchase of inventory and fixed assets and sale of goods and services. As such, CARO does not require reporting on all controls relating to financial reporting and also does not require reporting on the "adequacy and operating effectiveness" of such controls.

Reporting on internal financial controls over financial reporting – global

scenario : In June 2003, the Securities and Exchange Commission (SEC) of the United States of America adopted Rules for the implementation of Sarbanes – Oxley Act, 2002 (SOX) that required certification of the Internal Controls over Financial Reporting (ICFR) by the management and by the auditors.

The Public Company Accounting Oversight Board (PCAOB) has issued its Auditing Standard (AS) 5 on "An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of

III.544 Auditing Pronouncements

Financial Statements". This Standard establishes requirements and provides direction that applies when an auditor is engaged to also perform an audit of the internal controls over financial reporting in addition to the audit of the financial statements.

6. In June 2006, the Financial Instruments and Exchange Act (J-SOX) was passed by the Diet, the National Legislature of Japan. The requirements of this legislation are similar to the requirements of internal controls over financial reporting under SOX.

Reporting by the Auditors

8. Where auditors are required to express an opinion on the effectiveness of an entity's internal controls over financial reporting, such opinion is in addition to and distinct from the opinion expressed by the auditor on the financial statements.

Combined audit of internal financial controls over financial reporting and financial statements

9. In a combined audit of internal financial controls over financial reporting and financial statements, the auditor should design his or her testing of controls to accomplish the objectives of both audits simultaneously. In a combined audit of internal controls over financial reporting and financial statements, the auditor expresses opinion on the following aspects:

- a. Opinion on internal control over financial reporting, which requires:
 - Evaluating and opining on management's assessment of the effectiveness of internal financial controls (In Japan based on the requirements of the Financial Instruments and Exchange Act).
 - Evaluating and opining on the effectiveness of internal controls over financial reporting (In USA based on the requirements of Section 404 of the Sarbanes – Oxley Act).
- b. Opinion on the financial statements.

10. While the objectives of the audit of internal controls over financial reporting and audit of financial statements are not identical, the auditor plans and performs the work to achieve the objectives of both the audits in an integrated manner. Therefore, in a combined audit of internal financial controls over financial reporting and financial statements, the auditor should design his or her testing of controls to accomplish the objectives of both audits simultaneously.

11. In such an audit, the auditor plans and conducts the audit:

- To obtain sufficient evidence to support the auditor's opinion on the internal financial controls as of the year-end, and
- To obtain sufficient evidence to support the auditor's control risk assessments for purposes of the audit of the financial statements.

12. Obtaining sufficient evidence to support control risk assessments of "Low" for purposes of the financial statements audit ordinarily allows the auditor to reduce the amount of audit work that otherwise would have been necessary to opine on the financial statements.

13. Unlike the requirements in Japan referred in paragraph 9 above, in India, auditors are not required to report on the management's assertion of effectiveness on internal financial controls. Reporting under the Act will be an independent assessment and assertion by the auditor on the adequacy and effectiveness of the entity's system of internal financial controls.

SECTION II :REPORTING ON INTERNAL FINANCIAL CONTROLS UNDER THE COMPANIES ACT, 2013

Criteria to be considered by companies for developing, establishing and reporting on internal financial controls over financial reporting

14. Internal controls are a system consisting of specific policies and procedures designed to provide management with reasonable assurance that the goals and objectives it believes important to the entity will be met. "Internal Control System" means all the policies and procedures (internal controls) adopted by the management of an entity to assist in achieving management's objective of ensuring, as far as practicable, the orderly and efficient conduct of its business, including adherence to management policies, the safeguarding of assets, the prevention and detection of fraud and error, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information.

15. To state whether a set of financial statements presents a true and fair view, it is essential to benchmark and check the financial statements for compliance with the framework. The Accounting Standards specified under the Companies Act, 1956 (which are deemed to be applicable as per Section 133 of the 2013 Act, read with Rule 7 of Companies (Accounts) Rules, 2014) is one of the criteria constituting the financial reporting framework on which companies prepare and present their financial statements under the Act and against which the auditors evaluate if the financial statements present a true and fair view of the state of affairs and the results of operations of the company in an audit of the financial statements carried out under the Act.

16. Similarly, a benchmark system of internal control, based on suitable criteria, is essential to enable the management and auditors to assess and state adequacy and compliance of the system of internal control.

17. In the Indian context, for example, the Appendix 1 "Internal Control Components" of SA 315, Identifying and Assessing the Risks of Material Misstatement Through Understanding the Entity and Its Environment"¹, issued by ICAI, provides the necessary criteria for Internal financial controls over financial reporting for companies.

18. Internal control is a process/set of processes designed to facilitate and support the achievement of business objectives. Any system of internal control is based on a consideration of significant risks in operations, compliance and financial reporting. Objectives such as improving business effectiveness are included, as are compliance and reporting objectives.

¹ Refer Section III of this Guidance Note.

III.546 Auditing Pronouncements

19. The fundamental therefore is that effective internal control is a process effected by people that supports the organization in several ways, enabling it to provide reasonable assurance regarding risk and to assist in the achievement of objectives.

20. Fundamental to a system of internal control is that it is integral to the activities of the company, and not something practiced in isolation.

21. **An internal control system:**

- Facilitates the effectiveness and efficiency of operations.
- Helps ensure the reliability of internal and external financial reporting.
- Assists compliance with laws and regulations.
- Helps safeguarding the assets of the entity.

22. In general, a system of internal control to be considered adequate should include the following five components:

- Control environment
- Risk assessment
- Control activities
- Information system and communication
- Monitoring.

The components of internal control are discussed in more detail in Section III of this Guidance Note.

23. Internal financial controls system needs to be dynamic to address the changes in entity's operating environment, including:

- Business developments, including changes in information technology and business processes, changes in key management, and acquisitions, mergers and divestments.
- Legal and regulatory developments such as changes in industry regulations and new regulatory reporting requirements.
- Changes in the financial reporting framework, such as changes in accounting standards.

24. Internal financial controls should not be confused with Enterprise Risk Management (ERM). Internal control is an integral part of enterprise risk management. The following are some of the key differences between internal controls over financial reporting and ERM:

- ERM is applied in strategy setting while internal financial controls operate more at the process level.
- ERM is applied across the enterprise, at every level and unit, and includes taking an entity level portfolio view of risk while internal financial controls are applied for the processes which contribute to financial reporting.

25. It may be noted that Clause (n) of Sub-section 3 of Section 134 of the Act requires the board report to include a statement indicating development and implementation of a risk management policy for the company including identification therein of elements of risk, if any, which in the opinion of the board may threaten the existence of the company. The existence of an appropriate system of internal financial control does not by itself provide an assurance to the board of directors that the company has developed and implemented an appropriate risk management policy.

Objective in an audit of internal financial controls over financial reporting and interpretation of the term 'internal financial controls' for auditor's reporting under Section 143(3)(i)

26. Meaning of internal financial controls under the Act

Clause (e) of Sub-section 5 of Section 134 which explains the meaning of internal financial controls specifically states that the meaning is for the purpose of that clause. The explanation provided in clause (e) of Sub-section 5 of Section 134, inter alia, states that the internal financial controls system includes policies and procedures for ensuring efficiency and effectiveness of business and ensuring accuracy of accounting records.

27. Meaning of internal control

Standard on Auditing 315 "Identifying and Assessing the Risks of Material Misstatement Through Understanding the Entity and its Environment" defines Internal Control as follows:

"The process **designed, implemented and maintained** by those charged with governance, management and other personnel **to provide reasonable assurance** about the achievement of an entity's objectives with regard to reliability of financial reporting, effectiveness and efficiency of operations, safeguarding of assets, and compliance with applicable laws and regulations. The term "controls" refers to any aspects of one or more of the components of internal control." (Emphasis added)

28. Objectives of an auditor in an audit of internal financial controls over financial reporting

The auditor's objective in an audit of internal financial controls over financial reporting is to express an opinion on the effectiveness of the company's internal financial controls over financial reporting. It is carried out along with an audit of the financial statements. Because a company's internal controls cannot be considered effective if one or more material weakness exists, to form a basis for expressing an opinion, the auditor must plan and perform the audit to obtain sufficient appropriate evidence to obtain reasonable assurance about whether material weakness exists as of the balance sheet date. A material weakness in internal financial controls may exist even when the financial statements are not materially misstated.

29. Paragraph A1 of Standard on Auditing (SA) 200 "Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with Standards on Auditing" states "The auditor's opinion on the financial statements deals with whether the financial statements are prepared, in all material respects, in accordance with the applicable financial reporting framework. Such an opinion is common to all audits of financial statements. **The auditor's opinion therefore does not assure, for example, the future viability of the entity nor the efficiency or effectiveness with which management has conducted the affairs of the entity.**" (Emphasis added)

30. Paragraph A1 of the SA 200, Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with Standards on Auditing further states that “in some cases, however, the applicable laws and regulations may require auditors to provide opinions on other specific matters, such as the effectiveness of internal control, or the consistency of a separate management report with the financial statements. While the SAs include requirements and guidance in relation to such matters to the extent that they are relevant to forming an opinion on the financial statements, the auditor would be required to undertake further work if the auditor had additional responsibilities to provide such opinions.” Thus, it may be noted that even if the auditor performs his or her audit in accordance with the Standards on Auditing, the auditor will not be able to express an opinion on the adequacy or effectiveness with which management has conducted the affairs (business) of the entity.

31. Reporting under Section 143(3)(i)

The reporting by the auditor is dependent on the underlying criteria for internal financial controls over financial reporting adopted by the management. However, any system of internal controls provides only a reasonable assurance on achievement of the objectives for which it has been established. Also, the auditor shall use the concept of materiality in determining the extent of testing such controls.

As discussed above, establishing an appropriate criteria and system of internal financial controls over financial reporting to, inter alia, ensure efficiency and effectiveness of business and accuracy of accounting records is the responsibility of the company’s management.

32. Globally also, auditor’s reporting on internal controls is together with the reporting on the financial statements and such internal controls reported upon relate only to internal controls over financial reporting. For example, in USA, Section 404 of the Sarbanes Oxley Act of 2002, prescribes that the registered public accounting firm (auditor) of the specified class of issuers (companies) shall, in addition to the attestation of the financial statements, attest the internal controls over financial reporting.

33. It may be noted that in India too, the Act specifies the auditor’s reporting on internal financial controls only in the context of the audit of financial statements.

Further, **Rule 8(5)(viii) of the Companies (Accounts) Rules, 2014 requires the board report of all companies to state the details in respect of adequacy of internal financial controls with reference to the “financial statements” only.**

34. Consistent with the above requirements of the Act and the Rules thereunder as well as the practice prevalent globally, **the term ‘internal financial controls’ wherever used in this Guidance Note in the context of the responsibility of the auditor for reporting on such controls under Section 143(3)(i) of the Act, per se implies and relates to “internal financial controls over financial reporting”.**

For this purpose, “internal financial controls over financial reporting” shall mean,

“A process designed by, or under the supervision of, the company’s principal executive and principal financial officers, or persons performing similar functions, and effected by the company’s board of directors, management, and other personnel, to provide reasonable assurance regarding

the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.”²

The process may also be designed by, or under the supervision of a committee or group of the aforesaid persons.

35. Considering the above, the auditor should obtain reasonable assurance to state whether an adequate internal financial controls system was maintained and whether such internal financial controls system operated effectively in the company in all material respects with respect to financial reporting only.

Applicability of standards on auditing for the audit of internal financial controls over financial reporting

36. Paragraph A1 of SA 200, *inter alia*, states “In some cases, however, the applicable laws and regulations may require auditors to provide opinions on other specific matters, such as the effectiveness of internal control, or the consistency of a separate management report with the financial statements. While the SAs include requirements and guidance in relation to such matters to the extent that they are relevant to forming an opinion on the financial statements, the auditor would be required to undertake further work if the auditor had additional responsibilities to provide such opinions.”

Accordingly, the Standards on Auditing do not fully address the auditing requirements for reporting on the system of internal financial controls over financial reporting. However, relevant portions of the Standards on Auditing need to be considered by the auditor when performing an audit of internal financial controls over financial reporting. For example, the auditor should consider the requirements of SA 230, “Audit Documentation” when documenting the work performed on internal financial controls; the auditor should consider and apply the requirements of SA 315 when understating internal controls, etc.

37. This guidance aims to provide the supplementary procedures that would need to be considered by the auditor for planning, performing and reporting in an audit of internal financial controls over financial reporting under Clause (i) of Sub-section 3 of Section 143 of the 2013 Act. The applicable standards on auditing which, *inter alia*, need to be considered by the auditor when

² This definition of the term “Internal Controls Over Financial Reporting” has been reproduced from the Auditing Standard (AS) 5, *An Audit of Internal Control Over Financial Reporting that Is Integrated with An Audit of Financial Statements* issued by the Public Company Accounting Oversight Board (PCAOB), USA. The other text in this Guidance Note which has been reproduced from the aforesaid AS 5 of PCAOB has been identified in *italics* text in the relevant sections of the Guidance Note. The copyright of the so reproduced material rests with the PCAOB.

performing an audit of internal financial controls is given in the respective paragraphs of this guidance.

Specified date for reporting on the adequacy and operating effectiveness of internal financial controls over financial reporting

38. The reporting by the auditor on internal financial controls under clause (i) of Sub-section 3 of Section 143 of the Act does not specify whether the auditor's report should state if such internal financial controls existed and operated effectively during the period under reporting of the financial statements or as at the balance sheet date up to which the financial statements are prepared.

39. Reporting on internal financial controls system is similar to reporting on operations of the company. Whilst the testing is carried out on the transactions recorded during the year, the reporting is as at the balance sheet date. For example, if the company's revenue recognition was erroneous through the year under audit but was corrected, including for matters relating to internal control that caused the error, as at the balance sheet date, the auditor is not required to report on the errors in revenue recognition during the year.

40. Attention is invited to paragraph (k) of Clause 57 of the Statement on the Companies (Auditor's Report) Order, 2003 issued by the Institute of Chartered Accountants of India on the auditor's responsibility for reporting on internal control and continuing failure in the internal control under CARO. The said paragraph states that "The auditor, while commenting on the clause, makes an assessment whether the major weakness noted by him has been corrected by the management as at the balance sheet date. If the auditor is of the opinion that the weakness has not been corrected, then the auditor should report the fact while commenting upon the clause."

41. Accordingly, the auditor should report if the company has an adequate internal financial controls system in place and whether the same was operating effectively as at the balance sheet date. It should be noted that when forming the opinion on internal financial controls, the auditor should test the same during the financial year under audit and not just as at the balance sheet date, though the extent of testing at or near the balance sheet date may be higher.

42. It may also be noted that auditor's reporting on internal financial controls is a requirement specified in the Act and, therefore, will apply only in case of reporting on financial statements prepared under the Act and reported under Section 143.

Accordingly, reporting on internal financial controls will not be applicable with respect to interim financial statements, such as quarterly or half-yearly financial statements, unless such reporting is required under any other law or regulation.

Auditors' responsibility for reporting on internal financial controls over financial reporting in the case of unlisted companies

43. Under the Act, the directors statement of responsibility over establishing adequate internal financial controls and asserting operating effectiveness of such controls of the company is required only in case of listed companies. However, it appears that the auditor is required to report on adequacy and operating effectiveness of such internal financial controls even in the case of

unlisted companies since Clause (i) of Sub-section 3 of Section 143 of the 2013 Act does not specifically state that it is applicable only in the case of listed companies.

44. It may be noted that the management has the primary responsibility for the design, implementation and maintenance of internal control relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error. Consequently, the responsibility of designing, implementing and maintaining appropriate internal financial controls also rests with the management. It may also be noted that Clause (vii) of Sub-section 4 of Section 177 of the Act states that every audit committee shall act in accordance with the terms of reference specified in writing by the board which shall, inter alia, include, "evaluation of internal financial controls and risk management systems". Further, Sub-section 5 of Section 177 provides that the audit committee may call for the comments of the auditors about internal control systems including the observations of the auditors and may also discuss any related issues with the internal and auditors and the management of the company.

In addition, Rule 8(5)viii) of the Companies (Accounts) Rules, 2014 requires the board report of all companies to state the details in respect of adequacy of internal financial controls with reference to the financial statements.

Consequently, even if a specific statement of responsibility of the directors over internal financial controls is not made in the board's report to the members of unlisted companies, ensuring adequacy and operating effectiveness of the internal financial controls system still remains with the management and the persons charged with governance in the company.

45. Therefore, this guidance also applies for reporting on internal financial controls in respect of unlisted companies and small companies and one person companies as defined in the Companies Act, 2013. Further, a small or a one person company typically possesses qualitative characteristics such as:

- a) Concentration of ownership and management in a small number of individuals (often a single individual – either a natural person or another enterprise that owns the entity provided the owner exhibits the relevant qualitative characteristics); and
- b) One or more of the following:
 - i. Straightforward or uncomplicated transactions;
 - ii. Simple record-keeping;
 - iii. Few lines of business and few products within business lines;
 - iv. Few internal controls;
 - v. Few levels of management with responsibility for a broad range of controls; or
 - vi. Few personnel, many having a wide range of duties.

It may, however, also be noted that these qualitative characteristics are not exhaustive, nor are they exclusive to small or one person companies. Also, all small and one person companies need not necessarily display all of these characteristics.³

³ Attention of the readers is also drawn to Section IG 19 of the Guidance Note.

Auditors' responsibility for reporting on internal financial controls over financial reporting in case of consolidated financial statements

46. Section 129(4) of the 2013 Act states that the provisions of the 2013 Act applicable to the preparation, adoption and audit of the financial statements of a holding company shall, *mutatis mutandis*, apply to the consolidated financial statements.

As such, on a strict reading of the aforesaid provision in the 2013 Act, it appears that the auditor will be required to report under Section 143(3)(i) of the 2013 Act on the adequacy and operating effectiveness of the internal financial controls over financial reporting, even in the case of consolidated financial statements.

47. In the case of components included in the consolidated financial statements of the parent company, reporting on the adequacy and operating effectiveness of internal financial controls over financial reporting would apply for the respective components only if it is a company under the 2013 Act. Accordingly, in line with the approach adopted in case of reporting on the consolidated financial statements on the clauses of section 143(3) and reporting on the Companies (Auditor's Report) Order, 2015 notified under section 143(11) of the 2013 Act, the reporting on adequacy and operating effectiveness of internal financial controls would also be on the basis on the reports on section 143(3)(i) as submitted by the statutory auditors of components that are Indian companies under the Act. The auditors of the parent company should apply the concept of materiality and professional judgment as provided in the Standards on Auditing and this Guidance Note while reporting under section 143(3)(i) on the matters relating to internal financial controls over financial reporting that are reported by the component auditors.

SECTION III: OVERVIEW OF INTERNAL CONTROLS AS PER SA 315

48. Components of Internal Control

Appendix I to SA 315 explains the five components of any internal control as they relate to a financial statement audit. The five components are:

- i. Control environment
- ii. Entity's risk assessment process
- iii. Control activities
- iv. Information system and communication
- v. Monitoring of controls

I. Control environment

49. The control environment encompasses the following elements:

- (a) **Communication and enforcement of integrity and ethical values.** The effectiveness of controls cannot rise above the integrity and ethical values of the people who create, administer, and monitor them. Integrity and ethical behavior are the product of the entity's ethical and behavioral standards, how they are communicated, and how they are reinforced in practice. The enforcement of integrity and ethical values includes, for example, management actions to eliminate or mitigate incentives or temptations that might prompt personnel to engage in dishonest, illegal, or unethical acts. The communication of entity policies on

integrity and ethical values may include the communication of behavioral standards to personnel through policy statements and codes of conduct and by example.

- (b) **Commitment to competence.** Competence is the knowledge and skills necessary to accomplish tasks that define the individual's job.
- (c) **Participation by those charged with governance.** An entity's control consciousness is influenced significantly by those charged with governance. The importance of the responsibilities of those charged with governance is recognised in codes of practice and other laws and regulations or guidance produced for the benefit of those charged with governance. Other responsibilities of those charged with governance include oversight of the design and effective operation of whistle blower procedures and the process for reviewing the effectiveness of the entity's internal control.
- (d) **Management's philosophy and operating style.** Management's philosophy and operating style encompass a broad range of characteristics. For example, management's attitudes and actions toward financial reporting may manifest themselves through conservative or aggressive selection from available alternative accounting principles, or conscientiousness and conservatism with which accounting estimates are developed.
- (e) **Organisational structure.** Establishing a relevant organizational structure includes considering key areas of authority and responsibility and appropriate lines of reporting. The appropriateness of an entity's organisational structure depends, in part, on its size and the nature of its activities.
- (f) **Assignment of authority and responsibility.** The assignment of authority and responsibility may include policies relating to appropriate business practices, knowledge and experience of key personnel, and resources provided for carrying out duties. In addition, it may include policies and communications directed at ensuring that all personnel understand the entity's objectives, know how their individual actions interrelate and contribute to those objectives, and recognize how and for what they will be held accountable.
- (g) **Human resource policies and practices.** Human resource policies and practices often demonstrate important matters in relation to the control consciousness of an entity. For example, standards for recruiting the most qualified individuals – with emphasis on educational background, prior work experience, past accomplishments, and evidence of integrity and ethical behavior – demonstrate an entity's commitment to competent and trustworthy people. Training policies that communicate prospective roles and responsibilities and include practices such as training schools and seminars illustrate expected levels of performance and behavior. Promotions driven by periodic performance appraisals demonstrate the entity's commitment to the advancement of qualified personnel to higher levels of responsibility.

Entity's risk assessment process

50. For financial reporting purposes, the entity's risk assessment process includes how management identifies business risks relevant to the preparation of financial statements in accordance with the entity's applicable financial reporting framework, estimates their significance,

III.554 Auditing Pronouncements

assesses the likelihood of their occurrence, and decides upon actions to respond to and manage them and the results thereof. For example, the entity's risk assessment process may address how the entity considers the possibility of unrecorded transactions or identifies and analyses significant estimates recorded in the financial statements.

51. Risks relevant to reliable financial reporting include external and internal events, transactions or circumstances that may occur and adversely affect an entity's ability to initiate, record, process, and report financial data consistent with the assertions of management in the financial statements. Management may initiate plans, programs, or actions to address specific risks or it may decide to accept a risk because of cost or other considerations. Risks can arise or change due to circumstances such as the following:

- a) Changes in operating environment. Changes in the regulatory or operating environment can result in changes in competitive pressures and significantly different risks.
- b) New personnel. New personnel may have a different focus on or understanding of internal control.
- c) New or revamped information systems. Significant and rapid changes in information systems can change the risk relating to internal control.
- d) Rapid growth. Significant and rapid expansion of operations can strain controls and increase the risk of a breakdown in controls.
- e) New technology. Incorporating new technologies into production processes or information systems may change the risk associated with internal control.
- f) New business models, products, or activities. Entering into business areas or transactions with which an entity has little experience may introduce new risks associated with internal control.
- g) Corporate restructurings. Restructurings may be accompanied by staff reductions and changes in supervision and segregation of duties that may change the risk associated with internal control.
- h) Expanded foreign operations. The expansion or acquisition of foreign operations carries new and often unique risks that may affect internal control, for example, additional or changed risks from foreign currency transactions.
- i) New accounting pronouncements. Adoption of new accounting principles or changing accounting principles may affect risks in preparing financial statements.

II. Control activities

52. Generally, control activities that may be relevant to an audit may be categorised as policies and procedures that pertain to the following:

- a) Performance reviews. These control activities include reviews and analyses of actual performance versus budgets, forecasts, and prior period performance; relating different sets of data – operating or financial – to one another, together with analyses of the relationships and investigative and corrective actions; comparing internal data with external sources of information; and review of functional or activity performance.

- b) Information processing. The two broad groupings of information systems control activities are application controls, which apply to the processing of individual applications, and general IT-controls, which are policies and procedures that relate to many applications and support the effective functioning of application controls by helping to ensure the continued proper operation of information systems. Examples of application controls include checking the arithmetical accuracy of records, maintaining and reviewing accounts and trial balances, automated controls such as edit checks of input data and numerical sequence checks, and manual follow-up of exception reports. Examples of general IT-controls are program change controls, controls that restrict access to programs or data, controls over the implementation of new releases of packaged software applications, and controls over system software that restrict access to or monitor the use of system utilities that could change financial data or records without leaving an audit trail.
- c) Physical controls. Controls that encompass:
- The physical security of assets, including adequate safeguards such as secured facilities over access to assets and records.
 - The authorisation for access to computer programs and data files.
 - The periodic counting and comparison with amounts shown on control records (for example, comparing the results of cash, security and inventory counts with accounting records). The extent to which physical controls intended to prevent theft of assets are relevant to the reliability of financial statement preparation, and therefore the audit, depends on circumstances such as when assets are highly susceptible to misappropriation.
- d) Segregation of duties. Assigning different people the responsibilities of authorising transactions, recording transactions, and maintaining custody of assets. Segregation of duties is intended to reduce the opportunities to allow any person to be in a position to both perpetrate and conceal errors or fraud in the normal course of the person's duties.

53. Certain control activities may depend on the existence of appropriate higher level policies established by management or those charged with governance. For example, authorisation controls may be delegated under established guidelines, such as, investment criteria set by those charged with governance; alternatively, non-routine transactions such as, major acquisitions or divestments may require specific high level approval, including in some cases that of shareholders.

III. Information system, including the related business processes, relevant to financial reporting, and communication

54. An information system consists of infrastructure (physical and hardware components), software, people, procedures, and data. Many information systems make extensive use of information technology (IT).

55. The information system relevant to financial reporting objectives, which includes the financial reporting system, encompasses methods and records that:

- a) Identify and record all valid transactions.

III.556 Auditing Pronouncements

- b) Describe on a timely basis the transactions in sufficient detail to permit proper classification of transactions for financial reporting.
- c) Measure the value of transactions in a manner that permits recording their proper monetary value in the financial statements.
- d) Determine the time period in which transactions occurred to permit recording of transactions in the proper accounting period.
- e) Present properly the transactions and related disclosures in the financial statements.

56. The quality of system-generated information affects management's ability to make appropriate decisions in managing and controlling the entity's activities and to prepare reliable financial reports.

57. Communication, which involves providing an understanding of individual roles and responsibilities pertaining to internal control over financial reporting, may take such forms as policy manuals, accounting and financial reporting manuals, and memoranda. Communication also can be made electronically, orally, and through the actions of management.

V. Monitoring of controls

58. An important management responsibility is to establish and maintain internal control on an ongoing basis. Management's monitoring of controls includes considering whether they are operating as intended and that they are modified as appropriate for changes in conditions. Monitoring of controls may include activities such as, management's review of whether bank reconciliations are being prepared on a timely basis, internal auditors' evaluation of sales personnel's compliance with the entity's policies on terms of sales contracts, and a legal department's oversight of compliance with the entity's ethical or business practice policies. Monitoring is done also to ensure that controls continue to operate effectively over time. For example, if the timeliness and accuracy of bank reconciliations are not monitored, personnel are likely to stop preparing them.

59. Internal auditors or personnel performing similar functions may contribute to the monitoring of an entity's controls through separate evaluations. Ordinarily, they regularly provide information about the functioning of internal control, focusing considerable attention on evaluating the effectiveness of internal control, and communicate information about strengths and deficiencies in internal control and recommendations for improving internal control.

60. Monitoring activities may include using information from communications from external parties that may indicate problems or highlight areas in need of improvement. Customers implicitly corroborate billing data by paying their invoices or complaining about their charges. In addition, regulators may communicate with the entity concerning matters that affect the functioning of internal control, for example, communications concerning examinations by bank regulatory agencies. Also, management may consider communications relating to internal control from external auditors in performing monitoring activities.

61. Components of internal control and guidance provided

Refer Table below to see the mapping of internal control components with relevant references in this guidance:

Internal Control Component	Guidance reference*
Control environment	Paragraphs 88 – 93 – Identifying entity-level controls Paragraph 84 – Using the work of others
Risk assessment	Paragraph 76-78 – Role of risk assessment Paragraph 80-81 – Addressing the risk of fraud Paragraph 105-107 – Selecting controls to test Paragraphs 113, 119, 122 – Relationship of risk to the evidenced obtained Paragraph 124 and 127 – Special considerations for subsequent years' audit Paragraphs 144 and 145 – Subsequent events
Control activities	Paragraphs 100-104 – Understanding likely sources of misstatement Paragraphs 105 – 107 – Selecting controls to test IG 2.4 – Process flow diagrams IG 4 – Understanding IT Environment
Information system and communication	IG 2.4 – Process flow diagram IG 8 – Information Produced by the Entity (IPE) IG 2.9 to 2.13 – IPE Diagrams IG 9.3 and 9.4 - Situation in which service organisations are relevant for internal financial controls
Monitoring activities	Paragraphs 90, 91 and 93 – Identifying entity-level controls Paragraph 135 – Indicators of material weakness

* These references are not exhaustive. The purpose of these references is to help the reader understand the requirements of the components of internal control system in a better manner.

Effective Internal Control

62. The control environment sets the tone of an organization, influencing the control consciousness of its people. The control environment includes the governance and management functions and the attitudes, awareness, and actions of those charged with governance and management concerning the entity's internal control and its importance in the entity.

63. Evaluating the design of a control involves considering whether the control, individually or in combination with other controls, is capable of effectively preventing, or detecting and correcting, material misstatements. Implementation of a control means that the control exists and that the entity is using it. There is little point in assessing the implementation of a control that is not

effective, and so the design of a control is considered first. An improperly designed control may represent a material weakness or significant deficiency in the entity's internal control.

64. An entity's system of internal control contains manual elements and often contains automated elements. The use of manual or automated elements in internal control also affects the manner in which transactions are initiated, recorded, processed, and reported. An entity's mix of manual and automated elements in internal control varies with the nature and complexity of the entity's use of information technology. Manual elements in internal control may be more suitable where judgment and discretion are required such as for the following circumstances:

- Large, unusual or non-recurring transactions.
- Circumstances where errors are difficult to define, anticipate or predict.
- In changing circumstances that require a control response outside the scope of an existing automated control.
- In monitoring the effectiveness of automated controls.

65. The extent and nature of the risks to internal control vary depending on the nature and characteristics of the entity's information system. The entity responds to the risks arising from the use of IT or from use of manual elements in internal control by establishing effective controls in light of the characteristics of the entity's information system.

Limitations of internal control system

66. Internal control, no matter how effective, can provide an entity with only reasonable assurance and not absolute assurance about achieving the entity's operational, financial reporting and compliance objectives. Internal control systems are subject to certain inherent limitations, such as:

- Management's consideration that the cost of an internal control does not exceed the expected benefits to be derived.
- The fact that most internal controls do not tend to be directed at transactions of unusual nature. The potential for human error, such as, due to carelessness, distraction, mistakes of judgement and misunderstanding of instructions.
- The possibility of circumvention of internal controls through collusion with employees or with parties outside the entity.
- The possibility that a person responsible for exercising an internal control could abuse that responsibility, for example, a member of management overriding an internal control.
- Manipulations by management with respect to transactions or estimates and judgements required in the preparation of financial statements.

SECTION IV: TECHNICAL GUIDANCE ON AUDIT OF INTERNAL FINANCIAL CONTROLS OVER FINANCIAL REPORTING⁴

Introduction

67. This guidance provides direction that applies when an auditor is required to report under Clause (i) of Sub-section 3 of Section 143 of the 2013 Act on whether the company has in place adequate internal financial controls over financial reporting and the operating effectiveness of such controls.

68. Effective internal financial controls over financial reporting provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes. If one or more material weaknesses exist, the company's internal financial controls cannot be considered effective.

69. Because a company's internal financial controls over financial reporting cannot be considered effective if one or more material weaknesses exist, to form a basis for expressing an opinion, the auditor must plan and perform the audit to obtain appropriate evidence that is sufficient to obtain reasonable assurance about whether the material weaknesses exist as of the balance sheet date. A significant deficiency or material weakness in internal financial controls over financial reporting may exist even when financial statements are not materially misstated.

70. This guidance establishes the fieldwork and reporting requirements applicable for expressing an audit opinion to internal financial controls over financial reporting.

71. The auditor should use the same system of internal financial controls over financial reporting to perform his or her audit of internal financial controls over financial reporting as management uses for its annual evaluation of the adequacy and effectiveness of the company's internal financial controls.

Combining the audits

72. The audit of internal financial controls over financial reporting should be combined with the audit of the financial statements. The objectives of the audits are not identical, however, and the auditor must plan and perform the work to achieve the objectives of both audits.

73. In a combined audit of internal financial controls over financial reporting and financial statements, the auditor should design his or her testing of controls to accomplish the objectives of both audits simultaneously:

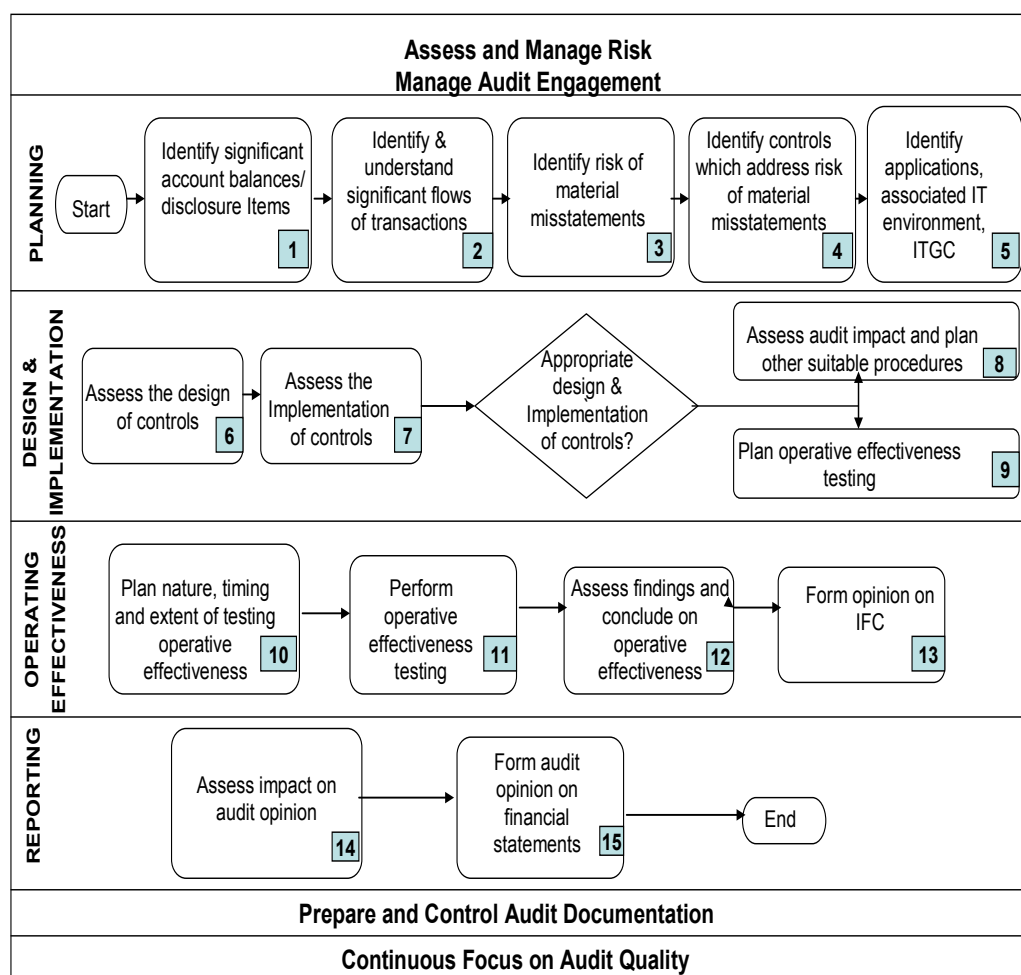

- To obtain sufficient evidence to support the auditor's opinion on internal financial controls over financial reporting as of year-end, and
- To obtain sufficient evidence to support the auditor's control risk assessments for purposes of the audit of financial statements.

⁴ The text shown in *italics* in this Section of the Guidance Note has been reproduced from Auditing Standard (AS) 5, An Audit Of Internal Control Over Financial Reporting That Is Integrated With An Audit Of Financial Statements, issued by the Public Company Accounting Oversight Board (PCAOB), in June 2007. The copyright of the so reproduced material rests with the PCAOB.

III.560 Auditing Pronouncements

74. Obtaining sufficient evidence to support control risk assessments for purposes of the financial statement audit ordinarily allows the auditor to reduce the amount of audit work that otherwise would have been necessary to opine on the financial statements.

Flowchart below Illustrates Typical Flow of Audit of Internal Financial Controls over Financial Reporting

Internal Financial Controls over Financial Reporting - Flowchart legends

Planning the Audit

75. The auditor should properly plan the audit of internal financial controls over financial reporting and properly supervise any assistants. The activities will include pre-engagement activities such as agreeing the terms of the engagement. (Refer **Appendix I** for illustrative format of the engagement letter). When planning a combined audit of internal financial controls over financial reporting and financial statements, the auditor should evaluate whether the following matters are important to the company's financial statements and internal financial controls over financial reporting and, if so, how they will affect the auditor's procedures:

- Knowledge of the company's internal financial controls over financial reporting obtained during other engagements performed by the auditor;
- Matters affecting the industry in which the company operates, such as financial reporting practices, economic conditions, laws and regulations, and technological changes;
- Matters relating to the company's business, including its organisation, operating characteristics, and capital structure;
- The extent of recent changes, if any, in the company, its operations, or its internal financial controls over financial reporting;
- The auditor's preliminary judgements about materiality, risk, and other factors relating to the determination of material weaknesses;
- Control deficiencies previously communicated to the audit committee or management by the auditor or the internal auditor;
- Legal or regulatory matters of which the company is aware;
- The type and extent of available evidence related to the effectiveness of the company's internal financial controls over financial reporting;

III.562 Auditing Pronouncements

- Preliminary judgements about the effectiveness of internal financial controls over financial reporting;
- Public information about the company relevant to the evaluation of the likelihood of material financial statement misstatements and the effectiveness of the company's internal financial controls over financial reporting;
- Knowledge about risks related to the company evaluated as part of the auditor's KYC guidelines; and
- The relative complexity of the company's operations.

Note: *Many smaller companies have less complex operations. Additionally, some larger, complex companies may have less complex units or processes. Factors that might indicate less complex operations include: fewer business lines; less complex business processes and financial reporting systems; more centralised accounting functions; extensive involvement by senior management in the day-to-day activities of the business; and fewer levels of management, each with a wide span of control.*

Role of Risk Assessment

76. Risk assessment underlies the entire audit process described by this guidance, including the determination of significant accounts and disclosures and relevant assertions, the selection of controls to test, and the determination of the evidence necessary for a given control.

77. A direct relationship exists between the degree of risk that a significant deficiency or material weakness could exist in a particular area of the company's internal financial controls over financial reporting and the amount of audit attention that should be devoted to that area. In addition, the risk that a company's internal financial controls over financial reporting will fail to prevent or detect a misstatement caused by fraud usually is higher than the risk of failure to prevent or detect error. The auditor should focus more of his or her attention on the areas of highest risk. On the other hand, it is not necessary to test controls that, even if deficient, would not present a reasonable possibility of material misstatement to the financial statements.

*An illustrative list of risks of material misstatement, related control objectives and control activities is given in **Appendix IV**.*

78. *The complexity of the organisation, business unit, or process, will play an important role in the auditor's risk assessment and the determination of the necessary procedures.*

Further, the auditor needs to consider SA 315, for detailed procedures in connection with risk assessment.

Customising the Audit

79. *The size and complexity of the company, its business processes, and business units, may affect the way in which the company achieves many of its control objectives. The size and complexity of the company also might affect the risks of misstatement and the controls necessary to address those risks. Customising is most effective as a natural extension of the risk-based approach and applicable to the audits of all companies. Accordingly, a smaller, less complex*

company, or even a larger, less complex company might achieve its control objectives differently than a more complex company.

Addressing the Risk of Fraud

80. When planning and performing the audit of internal financial controls, the auditor should take into account the results of his or her fraud risk assessment. As part of identifying and testing entity-level controls, as discussed beginning at paragraph 88 of this Section, and selecting other controls to test, as discussed beginning at paragraph 105 of this Section, the auditor should evaluate whether the company's controls sufficiently address identified risks of material misstatement due to fraud and controls intended to address the risk of management override of other controls. Controls that might address these risks include:

- Controls over significant, unusual transactions, particularly those that result in late or unusual journal entries;
- Controls over journal entries and adjustments made in the period-end financial reporting process;
- Controls over related party transactions;
- Controls related to significant management estimates; and
- Controls that mitigate incentives for, and pressures on, management to falsify or inappropriately manage financial results.

81. If the auditor identifies deficiencies in controls designed to prevent or detect fraud during the audit of internal financial controls over financial reporting, the auditor should take into account those deficiencies when developing his or her response to risks of material misstatement during the financial statement audit, as provided in SA 240 "The Auditor's Responsibilities Relating to Fraud in An Audit of Financial Statements".

Further the auditor would also need to consider the requirements of other guidance issued by ICAI for the procedures to be performed in connection with fraud risk factors.

Using the Work of Others (Refer IG 18)

82. The auditor should evaluate the extent to which he or she will use the work of others to reduce the work the auditor might otherwise perform himself or herself. SA 610 "Using the Work of Internal Auditors" and SA 620 "Using the Work of an Auditor's Expert" apply in a combined audit of internal financial controls over financial reporting and financial statements.

83. Irrespective of the degree of autonomy and objectivity of the internal audit function, such function is not independent of the entity as is required of the auditor when expressing an opinion on financial statements and internal financial controls over financial reporting. The auditor has sole responsibility for the audit opinion expressed, and that responsibility is not reduced by the auditor's use of the work of the internal auditors.

84. The auditor should assess the competence and objectivity of the persons whose work the auditor plans to use to determine the extent to which the auditor may use their work. The higher the degree of competence and objectivity, the greater use the auditor may make of the work.

III.564 Auditing Pronouncements

Note: For purposes of using the work of others, competence means the attainment and maintenance of a level of understanding and knowledge that enables that person to perform ably the tasks assigned to them, and objectivity means the ability to perform those tasks impartially and with intellectual honesty. To assess competence, the auditor should evaluate factors about the person's qualifications and ability to perform the work the auditor plans to use. To assess objectivity, the auditor should evaluate whether factors are present that either inhibit or promote a person's ability to perform with the necessary degree of objectivity the work the auditor plans to use.

Note: The auditor should not use the work of persons who have a low degree of objectivity, regardless of their level of competence. Likewise, the auditor should not use the work of persons who have a low level of competence regardless of their degree of objectivity. Personnel whose core function is to serve as a testing or compliance authority at the company, such as internal auditors, normally are expected to have greater competence and objectivity in performing the type of work that will be useful to the auditor.

85. The extent to which the auditor may use the work of others in an audit of internal financial controls over financial reporting also depends on the risk associated with the control being tested. As the risk associated with a control increases, the need for the auditor to perform his or her own work on the control increases.

Materiality

86. In planning the audit of internal financial controls over financial reporting, the auditor should use the same materiality considerations he or she would use in planning the audit of the company's annual financial statements as provided in SA 320 "Materiality in Planning and Performing an Audit".

Note: Since the audit of internal financial controls is in connection with the financial reporting, the concept of materiality will be applicable even in such audit. The auditor may consider materiality when he or she makes judgments about the size of misstatements that will be considered material. These judgments provide a basis for:

- (a) Determining the nature, timing and extent of risk assessment procedures;
- (b) Identifying and assessing the risks of material misstatement;
- (c) Identifying classes of transactions, account balances and disclosures that need to be considered for testing; and
- (d) Determining the nature, timing and extent of audit procedures.

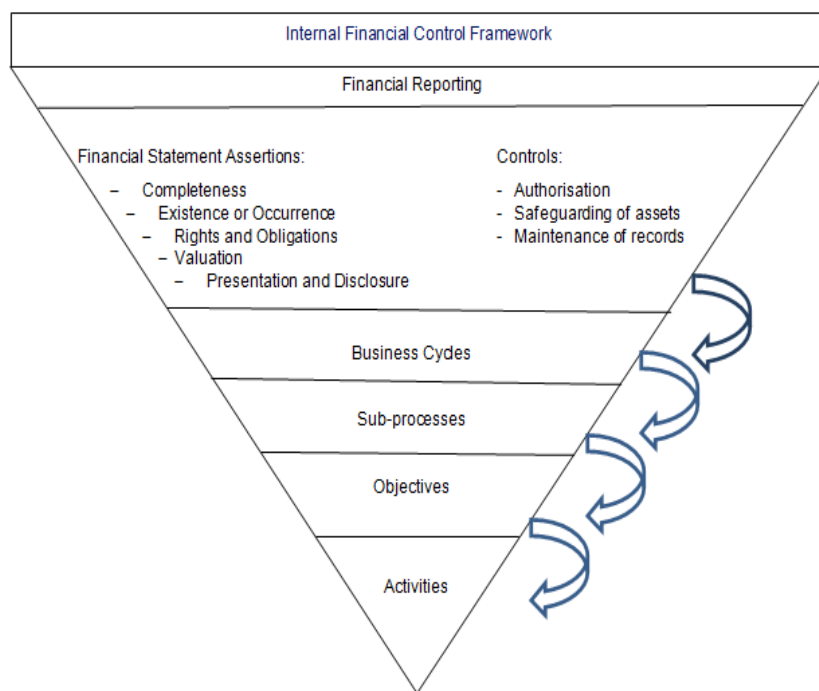

Using a Top-down Approach

87. The auditor should use a top-down approach to the audit of internal financial controls over financial reporting to select the controls to test. A top-down approach begins at the financial statement level and with the auditor's understanding of the overall risks to internal financial controls over financial reporting. The auditor then focuses on entity-level controls and works down to significant accounts and disclosures and their relevant assertions. This approach directs the

auditor's attention to accounts, disclosures, and assertions that present a reasonable possibility of material misstatement to the financial statements and related disclosures. The auditor then verifies his or her understanding of the risks in the company's processes and selects for testing those controls that sufficiently address the assessed risk of misstatement to each relevant assertion.

Note: The top-down approach describes the auditor's sequential thought process in identifying risks and the controls to test, not necessarily the order in which the auditor will perform the auditing procedures.

Top-Down Approach to Internal Financial Controls Over Financial Reporting

Identifying Entity-level Controls (Refer IG 5, IG 19.7, IG 19.8, 19.15 & 19.20)

88. The auditor must test those entity-level controls that are important to the auditor's conclusion about whether the company has effective internal financial controls over financial reporting. The auditor's evaluation of entity-level controls can result in increasing or decreasing the testing that the auditor otherwise would have performed on other controls.

89. Entity-level controls vary in nature and precision:

- Some entity-level controls, such as certain control environment controls, have an important, but indirect, effect on the likelihood that a misstatement will be detected or prevented on a timely basis. These controls might affect the other controls the auditor

III.566 Auditing Pronouncements

selects for testing and the nature, timing, and extent of procedures the auditor performs on other controls.

- Some entity-level controls monitor the effectiveness of other controls. Such controls might be designed to identify possible breakdowns in lower-level controls, but not at a level of precision that would, by themselves, sufficiently address the assessed risk that misstatements to a relevant assertion will be prevented or detected on a timely basis. These controls when operating effectively, might allow the auditor to reduce the testing of other controls.
- Some entity-level controls might be designed to operate at a level of precision that would adequately prevent or detect on a timely basis misstatements to one or more relevant assertions. If an entity-level control sufficiently addresses the assessed risk of misstatement, the auditor need not test additional controls relating to that risk.

90. Entity-level controls include:

- Controls related to the control environment;
- Controls over management override;

Note: *Controls over management override are important to effective internal financial controls over financial reporting for all companies, and may be particularly important at smaller companies because of the increased involvement of senior management in performing controls and in the period-end financial reporting process. For smaller companies, the controls that address the risk of management override might be different from those at a larger company. For example, a smaller company might rely on more detailed oversight by the audit committee that focuses on the risk of management override. Similarly, in case of a small company as defined in the 2013 Act, since there is no requirement for an Audit Committee, the Board of Directors could be providing such detailed oversight that focuses on the risk of management override.*

- The company's risk assessment process;
- Centralised processing and controls, including shared service environments; (Refer IG 9)
- *Controls to monitor results of operations;*
- *Controls to monitor other controls, including activities of the internal audit function, the audit committee, and self-assessment programs;*
- *Controls over the period-end financial reporting process;*
- *Controls over recording of unusual transactions; and*
- *Policies that address significant business control and risk management practices.*

91. Control environment. Because of its importance to effective internal financial controls over financial reporting, the auditor must evaluate the control environment at the company. As part of evaluating the control environment, the auditor should assess:

- *Whether management's philosophy and operating style promote effective internal financial controls over financial reporting;*

- Whether sound integrity and ethical values, particularly of top management, are developed and understood; and
- Whether the board or audit committee understands and exercises oversight responsibility over financial reporting and internal control.

92. *Period-end financial reporting process. Because of its importance to the auditor's opinions on internal financial controls over financial reporting and the financial statements, the auditor must evaluate the period-end financial reporting process. The period-end financial reporting process includes the following:*

- *Procedures used to enter transaction totals into the general ledger;*
- *Procedures related to the selection and application of accounting policies;*
- *Procedures used to initiate, authorise, record, and process journal entries in the general ledger;*
- *Procedures used to record recurring and non-recurring adjustments to the annual and quarterly / interim financial statements / results, if any;*
- *Procedures for preparing annual and quarterly financial statements and related disclosures.*

93. *As part of evaluating the period-end financial reporting process, the auditor should assess:*

- *Inputs, procedures performed, and outputs of the processes the company uses to produce its annual and interim financial statements;*
- *The extent of information technology ("IT") involvement in the period-end financial reporting process;*
- *Who participates from management;*
- *The locations involved in the period-end financial reporting process;*
- *The types of adjusting and closing entries; and*
- *The nature and extent of the oversight of the process by management, the board of directors, and the audit committee.*

Note: *Because the annual period-end financial reporting process normally occurs after the balance sheet date, management's assessment of those controls usually cannot be tested until after the balance sheet date.*

Note: *The auditor should obtain sufficient evidence of the effectiveness of those interim controls that are important to determining whether the company's controls sufficiently address the assessed risk of misstatement to each relevant assertion as of the interim balance sheet dates for the purpose of evaluating the annual period-end financial reporting process. However, the auditor is not required to obtain sufficient evidence for each interim period financial reporting process individually, since the auditor would be reporting on the adequacy and operating effectiveness of the internal financial controls over financial reporting as at the year-end balance sheet date.*

Identifying significant accounts and disclosures and their relevant assertions

94. *The auditor should identify significant accounts and disclosures and their relevant assertions. Relevant assertions are those financial statement assertions that have a reasonable possibility of containing a misstatement that would cause the financial statements to be materially misstated. The financial statement assertions include:*

- *Existence or occurrence;*
- *Completeness;*
- *Valuation or allocation;*
- *Rights and obligations;*
- *Assertions relating to presentation and disclosure*

95. *To identify significant accounts and disclosures and their relevant assertions, the auditor should evaluate the qualitative and quantitative risk factors related to the financial statement line items and disclosures. Risk factors relevant to the identification of significant accounts and disclosures and their relevant assertions include:*

- *Size and composition of the account;*
- *Susceptibility to misstatement due to errors or fraud;*
- *Volume of activity, complexity, and homogeneity of the individual transactions processed through the account or reflected in the disclosure;*
- *Nature of the account or disclosure;*
- *Accounting and reporting complexities associated with the account or disclosure;*
- *Exposure to losses in the account;*
- *Possibility of significant contingent liabilities arising from the activities reflected in the account or disclosure;*
- *Existence of related party transactions in the account; and*
- *Changes from the prior period in account or disclosure characteristics.*

96. As part of identifying significant accounts and disclosures and their relevant assertions, the auditor should also determine the likely sources of potential misstatements that would cause the financial statements to be materially misstated. The auditor might determine the likely sources of potential misstatements by asking himself or herself "what could go wrong?" within a given significant account or disclosure.

97. The risk factors that the auditor should evaluate in the identification of significant accounts and disclosures and their relevant assertions are the same in the audit of internal financial controls over financial reporting as in the audit of the financial statements; accordingly, significant accounts and disclosures and their relevant assertions are the same for both audits.

Note: In the financial statements audit, the auditor might perform substantive auditing procedures on financial statement accounts, disclosures and assertions that are determined not to be significant accounts, disclosures and relevant assertions.

98. The components of a potential significant account or disclosure might be subject to significantly differing risks. If so, different controls might be necessary to adequately address those risks.

99. When a company has multiple locations or business units, the auditor should identify significant accounts and disclosures and their relevant assertions based on the financial statements of the company as a whole. Having made those determinations, the auditor should then apply the guidance provided in paragraph IG 1 for multiple locations scoping decisions.

Understanding likely sources of misstatement

100. To further understand the likely sources of potential misstatements, and as a part of selecting the controls to test, the auditor should achieve the following objectives:

- *Understand the flow of transactions related to the relevant assertions, including how these transactions are initiated, authorised, processed, and recorded; (Refer IG 2 and IG 3)*
- *Verify that he/she has identified the points within the company's processes at which a misstatement – including a misstatement due to fraud – could arise that, individually or in combination with other misstatements, would be material;*
- *Identify the controls that management has implemented to address these potential misstatements; and*
- *Identify the controls that management has implemented over the prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could result in a material misstatement of the financial statements.*

*An illustrative list of risks of material misstatement, related control objectives and control activities is given in **Appendix IV**.*

101. Because of the degree of judgement required, the auditor should perform the procedures that achieve the objectives in paragraph 100 either by himself or herself or supervise the work of others who provide direct assistance to the auditor.

102. The auditor should also understand how Information Technology (IT) affects the company's flow of transactions. The auditor should apply the requirements of SA 315, which discuss the effect of information technology on internal financial controls and the risks to assess. (Refer IG 4)

Note: *The identification of risks and controls within IT is not a separate evaluation. Instead, it is an integral part of the top-down approach used to identify significant accounts and disclosures and their relevant assertions, and the controls to test, as well as to assess risk and allocate audit effort as described by this guidance.*

103. Performing walkthroughs. Performing walkthroughs will frequently be the most effective way of achieving the objectives in paragraph 100. In performing a walkthrough, the auditor follows a transaction from origination through the company's processes, including information systems, until

III.570 Auditing Pronouncements

it is reflected in the company's financial records, using the same documents and information technology that company personnel use. Walkthrough procedures usually include a combination of inquiry, observation, inspection of relevant documentation, and re-performance of controls. (Refer IG 12)

104. In performing a walkthrough, at the points at which important processing procedures occur, the auditor questions the company's personnel about their understanding of what is required by the company's prescribed procedures and controls. These probing questions, combined with the other walkthrough procedures, allow the auditor to gain a sufficient understanding of the process and to be able to identify important points at which a necessary control is missing or not designed effectively. Additionally, probing questions that go beyond a narrow focus on the single transaction used as the basis for the walkthrough allow the auditor to gain an understanding of the different types of significant transactions handled by the process.

Selecting controls to test

105. The auditor should test those controls that are important to the auditor's conclusion about whether the company's controls sufficiently address the assessed risk of misstatement to each relevant assertion.

106. There might be more than one control that addresses the assessed risk of misstatement to a particular relevant assertion; conversely, one control might address the assessed risk of misstatement to more than one relevant assertion. It is neither necessary to test all controls related to a relevant assertion nor necessary to test redundant controls, unless redundancy is itself a control objective.

107. The decision as to whether a control should be selected for testing depends on which controls, individually or in combination, sufficiently address the assessed risk of misstatement to a given relevant assertion rather than on how the control is labeled (e.g., entity-level control, transaction-level control, control activity, monitoring control, preventive control, detective control).

Testing controls-testing design effectiveness (Refer IG 11 and IG 12)

108. The auditor should test the design effectiveness of controls by determining whether the company's controls, if they are operated as prescribed by persons possessing the necessary authority and competence to perform the control effectively, satisfy the company's control objectives and can effectively prevent or detect errors or fraud that could result in material misstatements in the financial statements. This would also enable the auditor to conclude if the company has *an adequate internal financial controls system over financial reporting in place*.

Note: *A smaller, less complex company might achieve its control objectives in a different manner from a larger, more complex organisation. For example, a smaller, less complex company might have fewer employees in the accounting function, limiting opportunities to segregate duties and leading the company to implement alternative controls to achieve its control objectives. In such circumstances, the auditor should evaluate whether those alternative controls are effective.*

109. Procedures the auditor performs to test design effectiveness include a mix of inquiry of appropriate personnel, observation of the company's operations, and inspection of relevant

documentation. Walkthroughs that include these procedures ordinarily are sufficient to evaluate design effectiveness.

Testing controls-testing operating effectiveness (Refer IG 13)

110. The auditor should test the operating effectiveness of a control by determining whether the control is operating as designed and whether the person performing the control possesses the necessary authority and competence to perform the control effectively.

Note: *In some situations, particularly in smaller companies, a company might use a third party to provide assistance with certain financial reporting functions. When assessing the competence of personnel responsible for a company's financial reporting and associated controls, the auditor may take into account the combined competence of company personnel and other parties that assist with functions related to financial reporting.*

111. Procedures the auditor performs to test operating effectiveness include a mix of inquiry of appropriate personnel, observation of the company's operations, inspection of relevant documentation, and re-performance of the control.

Relationship of risk to the evidence to be obtained

112. For each control selected for testing, the evidence necessary to persuade the auditor that the control is effective depends upon the risk associated with the control. The risk associated with a control consists of the risk that the control might not be effective and, if not effective, the risk that a significant deficiency or material weakness would result. As the risk associated with the control being tested increases, the evidence that the auditor should obtain also increases.

Note: *Although the auditor must obtain evidence about the effectiveness of controls for each relevant assertion, the auditor is not responsible for obtaining sufficient evidence to support an opinion about the effectiveness of each individual control. Rather, the auditor's objective is to express an opinion on the company's overall internal financial controls over financial reporting. This allows the auditor to vary the evidence obtained regarding the effectiveness of individual controls selected for testing based on the risk associated with the individual control.*

113. Factors that affect the risk associated with a control include:

- The nature and materiality of misstatements that the control is intended to prevent or detect;
- The inherent risk associated with the related account(s) and assertion(s);
- Whether there have been changes in the volume or nature of transactions that might adversely affect control design or operating effectiveness;
- Whether the account has a history of errors;
- The effectiveness of entity-level controls, especially controls that monitor other controls;
- The nature of the control and the frequency with which it operates;

III.572 Auditing Pronouncements

- The competence of the personnel who perform the control or monitor its performance and whether there have been changes in key personnel who perform the control or monitor its performance; (Refer IG 6)
- The degree to which the control relies on the effectiveness of other controls (e.g., the control environment or information technology general controls); (Refer IG 7 and IG 8)
- Whether the control relies on performance by an individual or is automated (i.e., an automated control would generally be expected to be lower risk if relevant information technology general controls are effective); and

Note: *A less complex company or business unit with simple business processes and centralised accounting operations might have relatively simple information systems that make greater use of off-the-shelf packaged software without modification. In the areas in which off-the-shelf software is used, the auditor's testing of information technology controls might focus on the application controls built into the pre-packaged software that management relies on to achieve its control objectives and the IT general controls that are important to the effective operation of those application controls.*

- *The complexity of the control and the significance of the judgements that must be made in connection with its operation.*

Note: *Generally, a conclusion that a control is not operating effectively can be supported by less evidence than is necessary to support a conclusion that a control is operating effectively.*

114. When the auditor identifies deviations from the company's controls, he or she should determine the effect of the deviations on his or her assessment of the risk associated with the control being tested and the evidence to be obtained, as well as on the operating effectiveness of the control.

Note: *Because effective internal financial controls over financial reporting cannot, and does not, provide absolute assurance of achieving the company's control objectives over the period-end financial reporting process, an individual control does not necessarily have to operate without any deviation to be considered effective.*

115. The evidence provided by the auditor's tests of the effectiveness of controls depends upon the mix of the nature, timing, and extent of the auditor's procedures. Further, for an individual control, different combinations of the nature, timing, and extent of testing may provide sufficient evidence in relation to the risk associated with the control.

Note: *Walkthroughs usually consist of a combination of inquiry of appropriate personnel, observation of the company's operations, inspection of relevant documentation, and re-performance of the control and might provide sufficient evidence of operating effectiveness, depending on the risk associated with the control being tested, the specific procedures performed as part of the walkthrough and the results of those procedures.*

116. Nature of tests of controls. Some types of tests, by their nature, produce greater evidence of the effectiveness of controls than other tests. The following tests that the auditor might perform are

presented in order of the evidence that they ordinarily would produce, from least to most: inquiry, observation, inspection of relevant documentation, and re-performance of a control. (Refer IG 10)

Note: *Inquiry alone does not provide sufficient evidence to support a conclusion about the effectiveness of a control.*

117. The nature of the tests of effectiveness that will provide competent evidence depends, to a large degree, on the nature of the control to be tested, including whether the operation of the control results in documentary evidence of its operation. Documentary evidence of the operation of some controls, such as management's philosophy and operating style, might not exist.

Note: *A smaller, less complex company or unit might have less formal documentation regarding the operation of its controls. In those situations, testing controls through inquiry combined with other procedures, such as observation of activities, inspection of less formal documentation, or re-performance of certain controls, might provide sufficient evidence about whether the control is effective.*

118. Timing of tests of controls. Testing controls over a greater period of time provides more evidence of the effectiveness of controls than testing over a shorter period of time. Further, testing performed closer to the balance sheet date provides more evidence than testing performed earlier in the year. The auditor should balance performing the tests of controls closer to the balance sheet date with the need to test controls over a sufficient period of time to obtain sufficient evidence of operating effectiveness. (Refer IG 16)

119. Prior to the balance sheet date, management might implement changes to the company's controls to make them more effective or efficient or to address control deficiencies. If the auditor determines that the new controls achieve the related objectives of the control criteria and have been in effect for a sufficient period to permit the auditor to assess their design and operating effectiveness by performing tests of controls, he or she will not need to test the design and operating effectiveness of the superseded controls for purposes of expressing an opinion on internal financial controls over financial reporting. If the operating effectiveness of the superseded controls is important to the auditor's control risk assessment, the auditor should test the design and operating effectiveness of those superseded controls, as appropriate. (Refer IG 17)

120. Extent of tests of controls. The more extensively a control is tested, the greater the evidence obtained from that test. (Refer IG 14)

121. Roll forward procedures. When the auditor reports on the effectiveness of controls as of the balance sheet date and obtains evidence about the operating effectiveness of controls at an interim date, he or she should determine what additional evidence concerning the operation of the controls for the remaining period is necessary. (Refer IG 15)

122. The additional evidence that is necessary to update the results of testing from an interim date to the company's year-end depends on the following factors:

- The specific control tested prior to the balance sheet date, including the risks associated with the control and the nature of the control, and the results of those tests;
- The sufficiency of the evidence of effectiveness obtained at an interim date;

III.574 Auditing Pronouncements

- The length of the remaining period; and
- The possibility that there have been any significant changes in internal financial controls subsequent to the interim date.

Note: In some circumstances, such as when evaluation of the foregoing factors indicates a low risk that the controls are no longer effective during the roll-forward period, inquiry alone might be sufficient as a roll-forward procedure.

Special considerations for subsequent years' audits (Refer IG 16 and IG 20)

123. In subsequent years' audits, the auditor should incorporate knowledge obtained during past audits he or she performed of the company's internal financial controls over financial reporting into the decision-making process for determining the nature, timing, and extent of testing necessary. This decision-making process is described in paragraphs 112 to 122.

124. Factors that affect the risk associated with a control in subsequent years' audits include those in paragraph 113 and the following:

- The nature, timing, and extent of procedures performed in previous audits,
- The results of the previous years' testing of the control, and
- Whether there have been changes in the control or the process in which it operates since the previous audit.

125. After taking into account the risk factors identified in paragraphs 113 and 124, the additional information available in subsequent years' audits might permit the auditor to assess the risk as lower than in the initial year. This, in turn, might permit the auditor to reduce testing in subsequent years.

When planning the nature, timing and extent of testing for reporting on internal financial controls over financial reporting in a subsequent year, the auditor is normally not expected to adopt a rotation / cyclical plan for testing controls i.e., the auditor cannot choose to defer testing of certain controls for the reason that they were tested in the immediate previous year. Rotation / cyclical plan for testing internal financial controls over financial reporting may be permitted in limited circumstances as more fully described in IG 16.

126. The auditor may also use a benchmarking strategy for automated application controls in subsequent years' audits. Benchmarking is described further beginning at paragraph IG 7.6.

127. In addition, the auditor should vary the nature, timing, and extent of testing of controls from year to year to introduce unpredictability into the testing and respond to changes in circumstances. For this reason, each year the auditor might test controls at a different interim period, increase or reduce the number and types of tests performed or change the combination of procedures used.

Evaluating identified deficiencies

128. The auditor must evaluate the severity of each control deficiency that comes to his or her attention to determine whether the deficiencies, individually or in combination, are significant

deficiencies or material weaknesses as of the balance sheet date. In planning and performing the audit, however, the auditor is not required to search for deficiencies that, individually or in combination, are less severe than a significant deficiency.

Note: For purpose of this guidance,

- A 'deficiency' in internal financial control over financial reporting exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis.
- A 'significant deficiency' is a deficiency, or a combination of deficiencies, in internal financial control over financial reporting that is important enough to merit attention of those charged with governance since there is a reasonable possibility that a misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.
 - A deficiency in design exists when (a) a control necessary to meet the control objective is missing or (b) an existing control is not properly designed so that, even if the control operates as designed, the control objective would not be met.
 - A deficiency in operation exists when a properly designed control does not operate as designed, or when the person performing the control does not possess the necessary authority or competence to perform the control effectively.
- A 'material weakness' is a deficiency, or a combination of deficiencies, in internal financial control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.

129. The severity of a deficiency depends on:

- Whether there is a reasonable possibility that the company's controls will fail to prevent or detect a misstatement of an account balance or disclosure; and
- The magnitude of the potential misstatement resulting from the deficiency or deficiencies.

130. The severity of a deficiency does not depend on whether a misstatement actually has occurred but rather on whether there is a reasonable possibility that the company's controls will fail to prevent or detect a misstatement.

131. Risk factors affect whether there is a reasonable possibility that a deficiency, or a combination of deficiencies, will result in a misstatement of an account balance or disclosure. The factors include, but are not limited to, the following:

- The nature of the financial statement accounts, disclosures, and assertions involved;
- The susceptibility of the related asset or liability to loss or fraud;
- The subjectivity, complexity, or extent of judgement required to determine the amount involved;
- The interaction or relationship of the control with other controls, including whether they are interdependent or redundant;

III.576 Auditing Pronouncements

- The interaction of the deficiencies; and
- The possible future consequences of the deficiency.

Note: The evaluation of whether a control deficiency presents a reasonable possibility of misstatement can be made without quantifying the probability of occurrence as a specific percentage or range.

Note: Multiple control deficiencies that affect the same financial statement account balance or disclosure increase the likelihood of misstatement and may, in combination, constitute a material weakness, even though such deficiencies may individually be less severe. Therefore, the auditor should determine whether individual control deficiencies that affect the same significant account or disclosure, relevant assertion, or component of internal control collectively result in a material weakness.

132. Factors that affect the magnitude of the misstatement that might result from a deficiency or deficiencies in controls include, but are not limited to, the following:

- The financial statement amounts or total of transactions exposed to the deficiency; and
- The volume of activity in the account balance or class of transactions exposed to the deficiency that has occurred in the current period or that is expected in future periods.

133. In evaluating the magnitude of the potential misstatement, the maximum amount that an account balance or total of transactions can be overstated is generally the recorded amount, while understatements could be larger. Also, in many cases, the probability of a small misstatement will be greater than the probability of a large misstatement.

134. The auditor should evaluate the effect of compensating controls when determining whether a control deficiency or combination of deficiencies is a significant deficiency or material weakness. To have a mitigating effect, the compensating control should operate at a level of precision that would prevent or detect a misstatement that could be material.

Indicators of Material Weakness

135. Indicators of material weaknesses in internal financial controls over financial reporting include:

- Identification of fraud, whether or not material, on the part of senior management;
- Errors observed in previously issued financial statements in the current financial year;
- Identification by the auditor of a material misstatement of financial statements in the current period in circumstances that indicate that the misstatement would not have been detected by the company's internal financial controls over financial reporting; and
- Ineffective oversight of the company's external financial reporting and internal financial controls over financial reporting by the company's audit committee.

136. When evaluating the severity of a deficiency, or combination of deficiencies, the auditor should also determine the level of detail and degree of assurance that would satisfy prudent officials in the conduct of their own affairs that they have reasonable assurance that transactions

are recorded as necessary to permit the preparation of financial statements in conformity with generally accepted accounting principles. If the auditor determines that a deficiency, or combination of deficiencies, might prevent prudent officials in the conduct of their own affairs from concluding that they have reasonable assurance that transactions are recorded as necessary to permit the preparation of financial statements in conformity with generally accepted accounting principles, then the auditor should treat the deficiency, or combination of deficiencies, as an indicator of a material weaknesses.

Communicating Certain Matters

137. The auditor must communicate, in writing, to management and those charged with governance all material weaknesses and any deficiencies, or combinations of deficiencies that are significant deficiencies identified during the audit. Where possible, the written communication should be made prior to the issuance of the auditor's report on internal financial controls over financial reporting to provide an opportunity for the company to remediate the material weakness. If such remediation is done before or as at the balance sheet date, the auditor could test the same before forming his/her final opinion.

138. Based on an evaluation of the implementation of the components of internal control which make up the system of internal financial controls over financial reporting established by the company, if the auditor concludes that the oversight of the company's external financial reporting and internal financial controls over financial reporting by the company's audit committee is ineffective, the auditor must communicate that conclusion in writing to the board of directors.

139. The auditor should also communicate to management, in writing, all deficiencies in internal financial controls over financial reporting (i.e., those deficiencies in internal financial controls over financial reporting that are of a lesser magnitude than significant deficiency) identified during the audit and inform the audit committee when such a communication has been made. When making this communication, it is not necessary for the auditor to repeat information about such deficiencies that has been included in previously issued written communications, whether those communications were made by the auditor, internal auditors, or others within the organisation.

140. The auditor is not required to perform procedures that are sufficient to identify all control deficiencies; rather, the auditor communicates deficiencies in internal financial controls over financial reporting of which he or she is aware.

141. Because the audit of internal financial controls over financial reporting does not provide the auditor with assurance that he or she has identified all deficiencies less severe than a significant deficiency, the auditor should not issue a report stating that no such deficiencies were noted during the audit.

142. With respect to communications relating to the audit of internal financial controls over financial reporting, the auditor should also consider and suitably adapt the requirements and principles of SA 260 "Communication with Those Charged with Governance" and SA 265 "Communicating Deficiencies in Internal Control to Those Charged with Governance and Management".

143. When auditing internal financial controls over financial reporting, the auditor may become aware of fraud or possible illegal acts. In such circumstances, the auditor must determine his or her responsibilities under the Companies Act, 2013 and SA 240 and SA 250 "Consideration of Laws and Regulations in an Audit of Financial Statements".

Subsequent Events

144. Changes in internal financial controls over financial reporting or other factors that might significantly affect internal financial controls over financial reporting might occur subsequent to the date as of which internal financial controls over financial reporting is being audited but before the date of the auditor's report. The auditor should inquire of management whether there were any such changes or factors and obtain written representations from management relating to such matters, as described in paragraph 150.

145. To obtain additional information about whether changes have occurred that might affect the effectiveness of the company's internal financial controls over financial reporting and, therefore, the auditor's report, the auditor should inquire about and examine, for this subsequent period, the following:

- *Relevant internal audit (or similar functions, such as loan review in a financial institution) reports issued during the subsequent period,*
- *Regulatory agency reports on the company's internal financial controls over financial reporting, and*
- *Information about the effectiveness of the company's internal financial controls over financial reporting obtained through other engagements.*

146. The auditor might inquire about and examine other documents for the subsequent period. SA 560 "Subsequent Events", provides direction on subsequent events for a financial statement audit that may also be helpful to the auditor performing an audit of internal financial controls over financial reporting.

147. If the auditor obtains knowledge about subsequent events that materially and adversely affect the effectiveness of the company's internal financial controls over financial reporting as of the balance sheet date, the auditor should issue an adverse opinion on internal financial controls. If the auditor is unable to determine the effect of the subsequent event on the effectiveness of the company's internal financial controls over financial reporting, the auditor should disclaim an opinion.

148. The auditor may obtain knowledge about subsequent events with respect to conditions that did not exist at the date specified in the assessment but arose subsequent to that date and before issuance of the auditor's report. If a subsequent event of this type has a material effect on the company's internal financial controls reporting over financial reporting, the auditor should include in his or her report an explanatory paragraph describing the event and its effects.

149. After the issuance of the report on internal financial controls over financial reporting, the auditor may become aware of conditions that existed at the report date that might have affected the auditor's opinion had he or she been aware of them. The auditor's evaluation of such subsequent

information is similar to the auditor's evaluation of information discovered subsequent to the date of the report on an audit of financial statements, as described in SA 560.

Obtaining Written Representations

150. *In an audit of internal financial controls over financial reporting, the auditor should obtain written representations from management:*

- *Acknowledging management's responsibility for establishing and maintaining adequate internal financial controls over financial reporting that were operating effectively;*
- *Stating that management has performed an evaluation and made an assessment of the adequacy and effectiveness of the company's internal financial controls over financial reporting and specifying the control criteria;*
- *Stating that management did not use the auditor's procedures performed during the audits of internal financial controls over financial reporting or the financial statements as part of the basis for management's assessment of the adequacy and effectiveness of internal financial controls over financial reporting;*
- *Stating management's conclusion, as set forth in its assessment, about the adequacy and effectiveness of the company's internal financial controls over financial reporting based on the control criteria as of the balance sheet date;*
- *Stating that management has disclosed to the auditor all deficiencies in the design or operation of internal financial controls over financial reporting identified as part of management's evaluation, including separately disclosing to the auditor all such deficiencies that it believes to be significant deficiencies or material weaknesses in internal financial controls over financial reporting;*
- *Describing any fraud resulting in a material misstatement to the company's financial statements and any other fraud that does not result in a material misstatement to the company's financial statements but involves senior management or management or other employees who have a significant role in the company's internal financial controls over financial reporting;*
- *Stating whether control deficiencies identified and communicated to the audit committee during previous engagements pursuant to paragraphs 137 and 139 have been resolved, and specifically identifying any that have not; and*
- *Stating whether there were, subsequent to the date being reported on, any changes in internal financial controls over financial reporting or other factors that might significantly affect internal financial controls over financial reporting, including any corrective actions taken by management with regard to significant deficiencies and material weaknesses.*

SA 580 "Written Representations" explains matters such as who should sign the letter, the period to be covered by the letter, and when to obtain an updated letter. (Refer **Appendix II** for illustrative format of the management representation letter)

III.580 Auditing Pronouncements

151. Inability to obtain written representations from management, including management's refusal to furnish them, constitutes a limitation on the scope of the audit. When the scope of the audit is limited, the auditor should either disclaim the audit opinion or resign from the engagement.

152. Since the primary responsibility for establishing and maintaining an adequate internal financial controls system over financial reporting is that of the management and the board of directors of the company, the auditor should ensure that the board of directors approving the financial statements of the company also approve the management assertion and conclusion on the adequacy and operating effectiveness of internal financial controls over financial reporting and also take on record the deficiencies, significant deficiencies and material weaknesses identified by the management, internal auditors and the auditor.

Note: Since the board report under Section 134 of the Act, which would include the directors responsibility statement, inter alia, on internal financial controls, may be prepared after the date of the audit report, it is essential that the auditor obtains the assertion of the board of directors on the internal financial controls over financial reporting prior to issuance of the audit report.

Forming an Opinion (Refer IG 20)

153. The auditor should form an opinion on the adequacy and operating effectiveness of internal financial controls over financial reporting by evaluating evidence obtained from all sources, including the auditor's testing of controls, misstatements detected during the financial statement audit, and any identified control deficiencies.

Note: As part of this evaluation, the auditor should review reports issued during the year by internal audit (or similar functions) that address controls related to internal financial controls over financial reporting and evaluate control deficiencies identified in those reports.

154. After forming an opinion on the adequacy and operating effectiveness of the company's internal financial controls over financial reporting, the auditor should evaluate the disclosures that the management and board of directors is required to make, under the Act on internal financial controls. In this connection, the auditor should apply the requirements of SA 720 "The Auditor's Responsibility In Relation To Other Information In Documents Containing Audited Financial Statements" for matters relating to internal financial controls over financial reporting included in the documents of the Company.

155. If the auditor determines that any required elements of the board's report on internal financial controls over financial reporting are incomplete or improperly presented, the auditor should follow the requirements of SA 720.

156. The auditor may form an opinion on the adequacy and operating effectiveness of internal financial controls over financial reporting only when there have been no restrictions on the scope of the auditor's work. A scope limitation requires the auditor to disclaim an opinion or withdraw from the engagement.

Reporting on Internal Financial Controls over Financial Reporting

157. The auditor's report on the audit of internal financial controls over financial reporting must include the following elements:

- a. *A title that includes the word independent;*
- b. *A statement that management is responsible for maintaining adequate and effective internal financial controls over financial reporting and for assessing the adequacy and effectiveness of internal financial controls over financial reporting as per the meaning of internal financial controls provided in the Act;*
- c. *An identification of the benchmark criteria used by the management for establishing internal financial controls over financial reporting;*
- d. *A statement that the auditor's responsibility is to express an opinion on the company's internal financial controls over financial reporting based on his or her audit;*
- e. *A statement that the audit was conducted in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting and the Standards on Auditing, to the extent applicable to an audit of internal financial controls over financial reporting, both issued by the Institute of Chartered Accountants of India;*
- f. *A statement that the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting and Standards on Auditing require that the auditor plan and perform the audit to obtain reasonable assurance about whether adequate and effective internal financial controls over financial reporting were maintained in all material respects;*
- g. *A statement that an audit includes obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the adequacy and operating effectiveness of internal control over financial reporting based on the assessed risk, and performing such other procedures as the auditor considered necessary in the circumstances;*
- h. *A statement that the auditor believes the audit provides a reasonable basis for his or her opinion;*
- i. *A paragraph stating that, because of inherent limitations, internal financial controls over financial reporting may not prevent or detect misstatements and that projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate;*

Note: In an audit of financial statements, it is presumed that the going concern assumption for the company is appropriate and the auditor evaluates the appropriateness of such assumption. In case such assumption is not appropriate or a material uncertainty exists, the auditor is required to comply with the requirements of SA 570 "Going Concern". Correspondingly, in an audit of internal financial controls over financial reporting, the auditor needs to make appropriate disclosures to state the inherent limitations on internal financial controls over financial reporting and the limitations in consideration of such controls operating as at the balance sheet date for the future operations of the company.

- j. *The auditor's opinion on whether the company maintained, in all material respects, adequate internal financial controls over financial reporting and whether they were operating effectively as of the balance sheet date, based on the control criteria;*
- k. *The signature of the auditor with firm name, where applicable;*

I. The place and date of the audit report.

Audit Report

158. The auditor may issue separate reports on the company's financial statements and on internal financial controls over financial reporting.

159. Examples of separate unmodified report on internal financial controls over financial reporting in the case of the standalone and consolidated financial statements are given in **Appendix III – Example 1 and 5**, respectively.

160. Examples of separate modified report on internal financial controls over financial reporting in the case of the standalone financial statements are given in **Appendix III – Examples 2 to 4**.

Modified Opinion

161. Paragraphs 128 to 136 describe the evaluation of deficiencies. If there are deficiencies that, individually or in combination, result in one or more material weaknesses, the auditor must evaluate the need to express a modified opinion – qualified or adverse on the company's internal financial controls over financial reporting, unless there is a restriction on the scope of the engagement.

162. When expressing a modified opinion on internal financial controls because of material weakness, the auditor's report must include:

- The definition of a material weakness as provided in this Guidance Note.
- A statement that a material weakness has been identified.
- A description of the material weakness, which should provide the users of the audit report with specific information about the nature of the material weakness and its actual and potential effect on the presentation of the company's financial statements issued during the existence of the weakness.

163. The auditor should determine the effect his or her modified opinion on internal financial controls over financial reporting has on his or her opinion on the financial statements. Additionally, the auditor should disclose whether his or her opinion on the financial statements was affected by the modified opinion on internal financial controls over financial reporting. (Refer IG 20)

***Note:** When the auditor issues a separate report on internal financial controls over financial reporting in this circumstance, the disclosure required by this paragraph may be combined with the report language described in paragraphs 160 and 162. The auditor may present the combined language either as a separate paragraph or as part of the paragraph that identifies the material weakness.*

Report Date

164. The auditor should date the audit report no earlier than the date on which the auditor has obtained sufficient appropriate evidence to support the auditor's opinion. Because the auditor's reporting on internal financial controls over financial reporting is specified in the same Section as that of the opinion on financial statements viz. Section 143(3) of the Act, the date of the audit report

on internal financial controls over financial reporting should be the same as that of the date of the audit report on the financial statements.

Audit Documentation

165. The auditor should document the work performed on internal financial controls over financial reporting such that it provides:

- (a) A sufficient and appropriate record of the basis for the auditor's report; and
- (b) Evidence that the audit was planned and performed in accordance with this guidance, applicable Standards on Auditing and applicable legal and regulatory requirements.

In this regard, the auditor should comply with the requirements of SA 230 "Audit Documentation" to the extent applicable.

Considerations for Joint Audits and Branch Audits

166. Where applicable, the auditor should comply with the requirements of SA 299 "Responsibility of Joint Auditors" to the extent applicable when performing an audit of internal financial control over financial reporting. The following may be considered in case of both joint audits and branch audits, as applicable:

- (a) Division of work
- (b) Coordination
- (c) Relationship among joint auditor / branch auditor
- (d) Reporting responsibilities

Considerations for using this Guidance for Internal Financial Controls Over Financial Reporting Assessments on behalf of Company's Management

167. Any member or other professionals should consider this guidance to the extent applicable in carrying out internal financial control over financial reporting assessments on behalf of the company's management.

SECTION V :IMPLEMENTATION GUIDANCE⁵

IG 1 Multiple Locations Scoping Decisions (Refer Paragraph 99):

IG 1.1 In determining the locations or business units at which to perform tests of controls, the auditor should assess the risk of material misstatement to the financial statements associated with

⁵ The text shown in *italics* in this Section of the Guidance Note has been reproduced from the following documents issued by the Staff of the Public Company Accounting Oversight Board (PCAOB):

- Staff Views - An Audit Of Internal Control Over Financial Reporting That Is Integrated With An Audit Of Financial Statements: Guidance For Auditors Of Smaller Public Companies (*January 2009*)
- Staff Audit Practice Alert No. 11, Considerations for Audits of Internal Control Over Financial Reporting (*October 2013*)

The copyright of the material so reproduced rests with the PCAOB. It may also be noted that the above cited documents are not "Rules" of the PCAOB *per se* and have not been approved by it.

III.584 Auditing Pronouncements

the location or business unit and correlate the amount of audit attention devoted to the location or business unit with the degree of risk.

Note: *The auditor may eliminate from further consideration locations or business units that, individually or when aggregated with others, do not present a reasonable possibility of material misstatement to the company's financial statements.*

IG 1.2 In assessing and responding to risk, the auditor should test controls over specific risks that present a reasonable possibility of material misstatement to the company's financial statements. In lower-risk locations or business units, the auditor might first evaluate whether testing entity-level controls, including controls in place to provide assurance that appropriate controls exist throughout the organisation, provides the auditor with sufficient evidence.

IG 1.3 In determining the locations or business units at which to perform tests of controls, the auditor may take into account work performed by others on behalf of management. For example, if the internal auditors' planned procedures include relevant audit work at various locations, the auditor may coordinate work with the internal auditors and plan the number of locations or business units at which the auditor would otherwise need to perform auditing procedures, subject to compliance with the requirements of SA 610 "Using the Work of Internal Auditors".

IG 1.4 The direction regarding special considerations for subsequent years' audits means that the auditor should vary the nature, timing, and extent of testing of controls at locations or business units from year to year.

IG 1.5 Special Situations: The scope of the audit should include businesses that are acquired on or before the balance sheet date and operations that are accounted for as discontinued operations on the balance sheet date.

IG 2 Process Flow Diagrams (Refer Paragraph 100)

Understanding process flows

IG 2.1 To enhance the understanding of the likely sources of potential misstatements, and as a part of selecting the controls to test, the auditor should achieve the following objectives:

- *Understand the flow of transactions related to the relevant assertions, including how these transactions are initiated, authorised, processed, and recorded;*
- *Verify that he/she has identified the points within the company's processes at which a misstatement—including a misstatement due to fraud—could arise that, individually or in combination with other misstatements, would be material;*
- *Identify the controls that management has implemented to address these potential misstatements; and*
- *Identify the controls that management has implemented over the prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could result in a material misstatement of the financial statements.*

Information system relevant to financial reporting

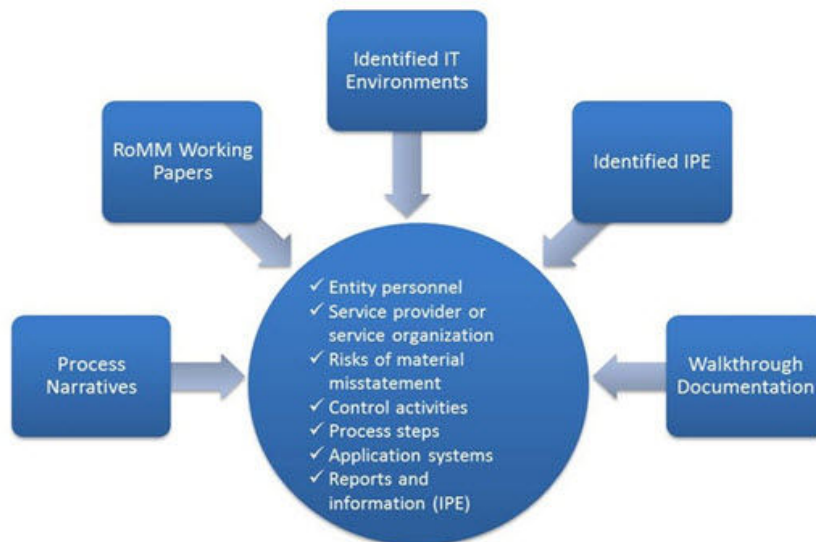

IG 2.2 The auditor should obtain an understanding of the information system, including the related business processes, relevant to financial reporting, including:

- The classes of transactions in the company's operations that are significant to the financial statements;
- The procedures, within both automated and manual systems, by which those transactions are initiated, authorised, processed, recorded, and reported;
- The related accounting records, supporting information, and specific accounts in the financial statements that are used to initiate, authorise, process, and record transactions;
- How the information system captures events and conditions, other than transactions, that are significant to the financial statements; and
- The period-end *financial reporting process*.

Process flow diagrams

IG 2.3 Process flow diagrams may be a helpful form of documentation for auditors to depict the process to initiate, authorise, process, record and report transactions; the points within the process at which misstatements could occur; and control activities that are designed to prevent or detect such misstatements, including providing greater transparency to segregation of duties. These diagrams also depict the relevant systems and Information Produced by the Entity (IPE).

Refer figure below on sources and linkage of information for internal financial controls purposes:

IG 2.4 When considering and reviewing the relevant information to developing process flow diagrams, the following questions may be helpful:

- Who is involved in the process (e.g., departments, roles, and people)?
- Are there segregations of duties that are relevant to the process?
- What is the general objective of the processes and what are the related sub-processes?
- When does the process occur?
- Does the process involve, or impact, multiple locations?

III.586 Auditing Pronouncements

- What are the tasks within the process and in what sequence do they occur?
- What are the points in the process at which a misstatement, including a misstatement due to fraud, could arise?
- What control activities address the risks?
- What IPE is involved?
- How are application systems involved within the process?

Audit-specific Elements to be Added to the Process Flow Diagram

IG 2.5 Additional detail may be added to represent the audit-specific elements. The following are the general steps for consideration:

1. Insertion of risks of material misstatement
 - a. The auditor may insert symbols for risk of material misstatement at the point(s) in the process flow where the risk is present. It is possible that, due to the nature of the risk of material misstatement, it may appear at multiple points in the process flow diagram.
 - b. The auditor may use different symbols for significant and normal risk of material misstatement as necessary.
2. Attaching control activity symbols
 - a. Symbols may be placed for control activity that address risks of material misstatement on the diagram.
 - b. Automated and manual control symbols may be used as necessary
3. Identification of applications in the process flow diagram
 - a. If a task relies on an application system when performing an action, the auditor may use a symbol for such applications on the diagram
 - b. If formatting and space allows, the auditor may attach the application symbol directly on the task which it relates
4. Associating the IPE symbol where appropriate
 - a. If IPE is used in the execution of a control activity or IPE that is produced as part of the process that is important to the audit (e.g., IPE that an auditor uses in his or her substantive procedures), the auditor may attach a separate symbol for the IPE as a document symbol.

System Overview Diagrams

IG 2.6 The information system relevant to financial reporting can be complex; a visual representation may assist the auditor in understanding how information flows between systems related to the financial transactions of the entity.

IG 2.7 For complex entities, several system overview diagrams may be useful to depict the different systems relevant for a particular process (or across processes). A system overview diagram may also be useful when system complexities and interrelationships demand more visual space to depict the systems that are relevant to the process.

IG 2.8 The following types of information may be useful in this process:

- Applications relevant to the audit;
- Service providers, or service provider systems, involved in entity processes that are determined to be relevant to the audit (e.g., a payroll service organisation and the outsourced systems relevant to the process).

IPE diagrams

IG 2.9 When a control activity is dependent upon IPE that is generated from systems or other sources, it is important that the auditor understands what could go wrong in the generation of the IPE. Illustrative diagrams that depict the auditor's understanding of the report logic, parameters, and source data may be helpful when trying to understand and articulate the risks related to IPE.

IG 2.10 It may be helpful to involve Information Technology (IT) specialists in the creation of IPE diagrams, especially if the IPE is system generated, as much of the information may be generated from the IT systems of the entity. It is important that IT specialists collaborate with the auditors who use the IPE for audit purposes so everyone gains an appropriate understanding of the purpose and intended use of the IPE.

IG 2.11 IPE may be relevant to the audit due to its relationship with the auditor's tests of controls or substantive procedures. The following are the general reasons that IPE is relevant to the audit:

- IPE is used by entity personnel to perform a relevant control.
- IPE is used by the auditor to test a relevant control.
- IPE is used by the auditor to perform substantive procedures.

IG 2.12 Regardless of the use of the IPE in the context of an audit, the auditor may consider creating IPE diagrams to document his or her understanding of the IPE and assist in determining appropriate procedures to test the accuracy and completeness of the information.

IG 2.13 The following general steps to be performed by auditors to build an IPE diagram assume that the auditor has already identified relevant IPE to the audit:

Step 1 — Identification of and Understanding Report Logic and Parameters

The auditor should begin by obtaining an understanding of the business purposes of the IPE. Before gaining a detailed understanding of the parameters and report logic, it may be helpful to understand what specific information in the IPE is relevant to the audit. Auditors may then proceed to identify inputs that could impact the IPE and determine how the IPE is used during the performance of the control activity.

IPE parameters — the criterion for selecting data, such as date ranges, company codes, or specified thresholds:

- If the IPE can be modified by the user to produce a desired or different result, then parameters most likely are used in the generation of the IPE.
- The auditor should determine what parameters are available and have a direct impact to the information that is produced.

III.588 Auditing Pronouncements

IPE report logic — the computer code that contains the algorithms for creating the report:

- The auditor should have discussions with the business users and technical owners of the IPE. He should understand what information is generated and gain an understanding of how the logic was developed to create the output.
- The auditor should gain an understanding if the IPE is generated through custom or standard reporting capabilities of the system.

The auditor should identify if there are general IT controls that address the risks arising from IT relevant to the system that generates the IPE.

Step 2 — Identification and Understanding Source Data

After understanding the report logic associated with IPE, it is also necessary for the auditor to consider the accuracy and completeness of source data. As the engagement teams begin to understand the source data used in the generation of a report, it is important that they consider the accuracy of the data for their intended use. The overall goal of developing IPE diagrams is to help understand and evaluate how the IPE might be inaccurate or incomplete. If the source data is not appropriate for its intended use, indicate the same in the IPE diagram and describe further details in annotation to inform others as to the challenges that might exist.

It is also important for the auditor to determine the origination of the IPE data source (e.g., tables), if applicable, and annotate such in the IPE diagram.

For example, while IPE information may be extracted from a single reporting table in a system, the reporting table may have been created by consolidating information from several other system tables. Depicting the relationships between the tables that ultimately generate the IPE is important when understanding and evaluating the risks that the IPE might be inaccurate or incomplete because of issues related to source data. Such interrelationship of the source data in the IPE diagram should be depicted by the auditor.

Step 3 — Building the IPE Diagrams

After the IPE parameters, report logic and source data have been understood, the auditor can develop the IPE diagram.

The following basic elements may be depicted in the diagram to represent the auditor's understanding of the IPE:

- IPE parameters
 - Identification of relevant parameters that impact the results of the IPE.
 - Common parameter combinations used to generate IPE (if there are recurring uses).
- IPE logic
 - Identification of standard or custom IPE logic.
 - Location information on where the source logic is maintained in the system.

- If a benchmarking strategy is used to test logic, identification of the date that logic was last changed.
- Information that indicates whether general IT controls are relevant.
- IPE source data
 - Relevant application systems.
 - Sources of information used to generate IPE (e.g., system tables).
 - Information that indicates whether general IT controls are relevant.
 - If general IT controls are not relevant, document alternative methods for validating the accuracy and completeness of the data.
- Reference to IPE on process flow diagram, if applicable.

Automated control diagrams

IG 2.14 When automated control activities exist, it may be relatively easy to describe broadly how they function; however, it can be difficult to describe the detailed attributes of the control that are relevant to the audit and how they operate in sufficient detail to facilitate designing effective tests of such controls. Pictorial diagrams may enhance the auditor's understanding of how automated control activities are designed to address risks of material misstatement, and may therefore better facilitate planning effective tests of such controls. The purpose of the automated control diagram is to demonstrate how the control operates logically to prevent or detect risks of material misstatement from occurring.

The following general steps are helpful into building an automated control diagram:

Step 1 — Understanding Relevant Automated Controls

The auditor should begin by obtaining an understanding of the purposes of the automated control; he may consider performing the following:

- Have discussions with the business process owners and technical owners who interact with the automated control.
- Understand what the system is evaluating to prevent or detect errors from occurring. Identify if the automated control logic can be applied differently across the entity based on changing the configurations.
- Identify if there are general IT controls that address the risks arising from IT relevant to the application system with automated controls.

Step 2 — Building the Automated Control Diagram

After the automated controls are understood, the automated control diagram can be developed. The following basic elements may be depicted on the diagram to represent the auditor's understanding of the automated control:

- Control activity reference

III.590 Auditing Pronouncements

- Depicting control activities in the form of task boxes with a description of the action enforced by the automated control.
- Connecting the automated control symbol to the task box and use the same reference number that is depicted on the process flow diagram.
- System references
 - Depicting systems on the diagram when associated with a control activity task.
 - If data sources are shown in the diagram, depicting the source system.
- Automated control logic
 - The auditor should document what the automated control relies upon from a logic perspective to perform the desired action.
 - The auditor should illustrate what happens as a result of the automated control; decision boxes show what the possible paths might be based on the conditions that could be met.

Validate understanding

IG 2.15 A final step in developing the process flow diagrams, as well as any other supplemental diagrams, is to validate the auditor's understanding and determine whether the diagrams are accurate and complete for their intended purpose. Because processes can be complex and multiple information sources may be used in the development of supporting diagrams, it is important to validate the consistency of the diagrams with other sources of information used during the audit to determine that the auditor's understanding is consistent with respect to the identified risks of material misstatement, control activities, and IPE.

Figure

The auditor's process flow diagrams may also be reviewed with the entity personnel to validate that they accurately represent the entity's processes. Discussions with the entity using graphical representations of their process flows may lead to further enhancement of the auditor's understanding of the entity, their flow of transactions, and the likely sources of misstatement (for a combined audit of internal financial controls over financial reporting and financial statements), and in some cases might necessitate revisions to the auditor's first drafts of the process flow diagrams.

As part of the risk assessment procedures, evaluate process flow diagrams, and other supplemental diagrams, on an on-going basis and update as necessary. As the entity evolves and changes its systems, controls, and business processes, the risks of material misstatement might change, thereby leading to an update of the auditor's process flow diagrams.

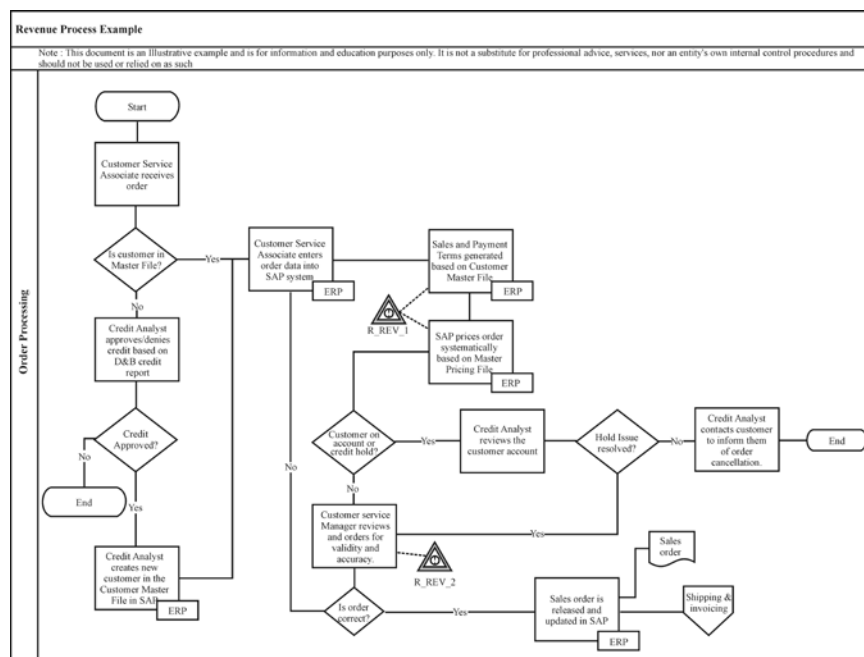

Illustrative example of process flow documentation for revenue business cycle

IG 2.16 Below is the detailed illustrative example of process flow diagrams for the Revenue process (which assumes an automated application system (ERP) used by the entity). The Revenue process covers the following sub-processes: Order Processing, Shipping and Invoicing, and Sales Returns. This illustrative example consists of three process flow diagrams and related narratives:

- Diagram 1 — Order Processing
- Diagram 2 — Shipping and Invoicing
- Diagram 3 — Sales Returns
- Revenue Narrative 1 — Order Processing
- Revenue Narrative 2 — Shipping and Invoicing
- Revenue Narrative 3 — Sales Returns

Diagram 1 — Order Processing

III.592 Auditing Pronouncements

Revenue Narrative 1 — Order Processing

Orders can be received via fax, mail, email, or phone. Customer Service Associates are responsible for monitoring incoming orders that arrive at the Business Centre. All faxes and postal mail are electronically converted by Customer Service Associates. Phone-based orders are directed to a central call number which rings the next available Customer Service Associate to take order information.

All orders must be created with reference to a customer that is established in the customer master file within SAP. If an order is received for a non-existent account, the new account procedure is followed, whereby a Credit Analyst reviews credit worthiness based on a Dun & Bradstreet credit report. In the event that a decision is taken to not extend credit, the processing of the order ends and the customer is contacted to inform them of the credit decision. If credit is extended to the customer, the Credit Analyst creates a new customer in the customer master file and notifies the Customer Service Associates to process the order.

When entering an order, "Sold to" and "Ship to" fields must be populated with a valid customer number that matches an existing customer number established in the customer master file. Sales and payment terms are automatically populated through the information contained in the customer master file in SAP (R_REV_1). All line items on the sales order are systematically populated based on the information in the master pricing file (R_REV_1).

Sales orders are configured with the following key mandatory fields: Sales Order Type (Rush Order or Stock Order), Order Source (fax, mail, email, phone), Sales Organisation, Sold to/Ship to account numbers, item quantities, material numbers, and purchase order number. The balance of the information is automatically extracted from the customer master or pricing master file records. Sales to customers with non-standard payment or shipping terms are automatically flagged in SAP;

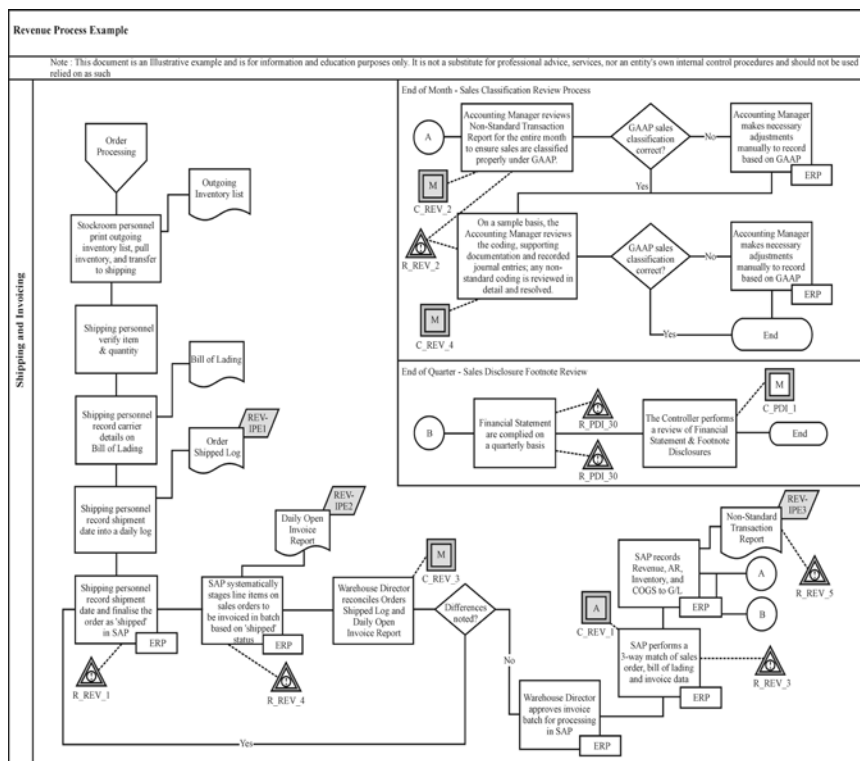

the flags are used in the shipping and invoicing process to generate exception reports for management to review. Pricing for each customer may be different based on negotiated contracts which are configured against the master pricing file with customer-specific discounts applied.

For orders on hold due to an account or credit hold, the credit department is notified. A Credit Analyst will review the hold and make a determination if the hold can be resolved. If the hold cannot be resolved, the Credit Analyst will contact the customer and notify them of order cancellation, ending the order entry process. If the hold can be resolved after investigation, the Credit Analyst will release the hold and submit the order to the Customer Service Manager to review. All processed orders must be reviewed and approved by the Customer Service Manager prior to being submitted to the shipping and invoicing process. If any errors are noted, they are resolved by the Customer Service Associates and resubmitted through the process. After the order is approved, the sales order is released and updated in SAP (R_REV_1).

The following is the IPE identified in the process flow:

- Orders Shipped Log (REV-IPE1)

Diagram 2 — Shipping and Invoicing

Revenue narrative 2 — Shipping and Invoicing

After the sales order is approved, the data is transferred automatically from the order entry system to the shipping and invoicing modules in SAP. Outgoing inventory lists are printed by the

III.594 Auditing Pronouncements

stockroom personnel. Outgoing inventory list quantities are populated systematically based on information defined in the approved sales orders.

The product is pulled from the warehouse by shipping personnel based on the information defined on the outgoing inventory lists. Shipping personnel will verify the information, such as item and quantity, and then package the items in preparation of shipment.

After the order is prepared for shipment, the bill of lading is printed with the carrier information recorded on the document; a carbon copy is forwarded on to shipping data entry personnel where the order is confirmed as shipped, completing the shipping process within the system (R_REV_1). Shipments of goods to customers are logged just prior to marking the orders as shipped in SAP; this is completed by taking carbon copies of the bill of lading documents and manually logging them in a spreadsheet that is maintained by the shipping clerks. The spreadsheet is referred to as the "Orders Shipped Log."

Once marked as shipped, line items in the sales order will change automatically in the system, which will result in closing the shipped lines and staging of the line items to be invoiced (R_REV_4). Only the lines on the sales order that ship will be invoiced. Open lines are back-ordered and will remain open until those items are shipped. The only other way to close a line on an order is to reject the line(s), which requires approval by a Customer Service Manager.

The SAP system compiles the staged invoices on a daily basis in a "Daily Open Invoice Report." The Orders Shipped Log and the Daily Open Invoice Report are both reviewed by the Warehouse Director on a daily basis to validate that all orders shipped have also been included in the invoicing batch. The Warehouse Director matches the shipments recorded in the Daily Open Invoice Report to the shipments logged in the manual Orders Shipped Log as being shipped to a customer (C_REV_3). If differences are noted, the Warehouse Director works with shipping personnel to ensure shipments are recorded in the system accurately. If no differences are noted, the batch is approved in SAP for invoice processing.

Invoicing is performed nightly in SAP through a systematic batch process. The SAP system performs a 3-way match; invoices can only be processed when there is a systematic matching of the purchase order, bill of lading/shipped status, and completing a 3-way match to generate the invoice (C_REV_1 | R_REV_3). The invoice generation process updates the general ledger, records the sale (recognises the revenue) and the receivable, relieves the inventory, and records cost of goods sold. As part of the nightly batch process, the SAP system generates a report that lists every flagged transaction that contained non-standard sales or shipping terms. This report is called the "Non-standard Transaction Report" (R_REV_5).

Revenue is recognised at the time of invoicing because the Company's standard sales terms are defined as free on board (FOB) shipping point. At the end of the month, the Accounting Manager reviews all non-standard transaction reports on a daily basis that were generated during the month; any non-standard sales terms (e.g., FOB destination) are reviewed in detail to ensure sales are classified properly under GAAP (C_REV_2 | R_REV_1). If corrections are necessary, the Accounting Manager makes manual adjustments to reflect proper GAAP classification of the transaction. After non-standard terms are reviewed, the Accounting Manager samples 50 sales transactions to evaluate the coding, supporting documentation, and journal entries made to the

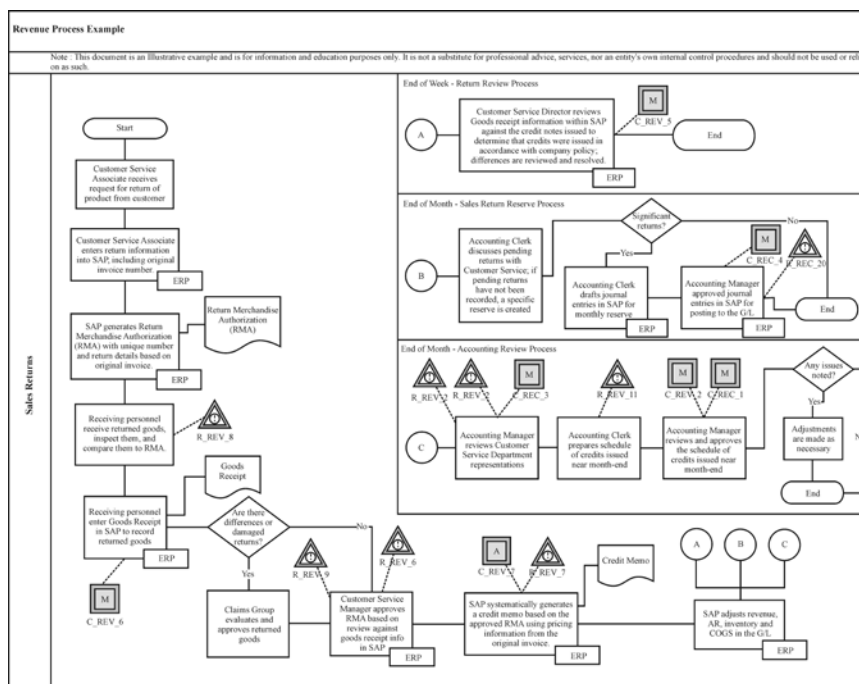

general ledger for all sales that are booked; any non-standard coding is reviewed in detail and resolved to ensure sales are classified properly under GAAP (C_REV_4 | R_REV_1). If corrections are necessary, the Accounting Manager makes manual adjustments necessary to reflect proper GAAP classification of the transaction.

On quarterly basis, once the financial statements have been compiled, the Controller performs a review of the financial statements, including all footnote disclosures. Included in this review are the sales-related disclosures in the footnotes of the financial statements. As part of this review, the Controller checks references to supporting documents (R_PDI_38 | R_PDI_39 | C_PDI_1).

The following is the IPE identified in the process flow:

- Daily Open Invoice Report (REV-IPE2)

Diagram 3 — Sales Returns

Revenue narrative 3 — Sales returns

Customer Service Associates receive requests for return of product. Customer Service Associates enter information into SAP at the time of request and use the original invoice number as a unique lookup code to generate base information for the return. SAP generates the Return Merchandise Authorisation (RMA) with unique number and listing of material(s) requested to be returned, with pricing obtained from original invoice data.

Upon receipt of the returned items, receiving personnel inspect the items and compare them to the RMA (R_REV_8). Receiving personnel enter goods receipts within SAP to record the quantity received for the sales return associated with the RMA (C_REV_6). If there are differences or

damaged returns, the RMA is forwarded to the Claims Group for review and approval. All RMAs are submitted to the Customer Service Manager for final review and approval of the return based on review against goods receipt information in SAP (R_REV_6) (R_REV_9). Upon approval of the RMA in the SAP system, a credit memo is generated systematically based on pricing information obtained from the original invoice that was recorded on the RMA (R_REV_7 | C_REV_7). Based on the credit memo that is issued, SAP automatically adjusts the general ledger to reverse the sales transaction; accounts receivable, sales, inventory, and cost of goods sold are reversed for the returned goods.

On a weekly basis, the Customer Service Director reviews the return details on the Goods Receipt information within SAP against the credit notes issued to determine that credits were issued in accordance with company policy. Any differences are resolved and corrective actions are taken (C_REV_5).

On a monthly basis, the Accounting Clerk evaluates the end-of-month position on returns through discussions with Customer Service Associates. If any significant pending returns are known but not recorded, a specific reserve is created to cover the anticipated exposure. The Accounting Clerk creates the journal entries in SAP to book the monthly return reserve; the Accounting Manager must post/approve the journal entry to record the reserve (R_REV_10 | C_REC_4).

On a monthly basis, the Accounting Manager obtains representations from the Customer Service Director who handles sales orders and credit notes. The representations are obtained to indicate that no verbal or unrecorded credit memos exist that have not been reported to finance management (R_REV_2, R_REV_7 | C_REC_3). After receiving the representations on unrecorded credit memos, the Accounting Clerk prepares a schedule of credit memos issued 3 days before and after the end of the month for analysis and review to make certain the sales and returns are recorded in the appropriate accounting period (R_REV_11). The Accounting Manager reviews and approves the schedule to ensure that sales returns are recorded in the correct period (C_REV_8) (C_REC_1). If any issues are noted regarding the cut-off or completeness of the sales returns, necessary adjustments are made by the Accounting department and support documentation is maintained.

The following is the IPE identified in the process flow:

- Non-standard Transaction Report (REV-IPE3)

IG 3 Difference between Process and Control (Refer Paragraph 100)

IG 3.1 Process and controls are two very different aspects. Often they are used interchangeably; hence it is important to understand the difference between them.

A **Process** describes the action of taking a transaction or an event through an established and usually a routine set of procedures or steps.

A **Control** is an action or activity taken to prevent or detect misstatements within the process.

The following examples distinguish a process from a control:

Example 1:

Control description: Company engages an Actuary Firm to prepare the actuarial report.

Pitfall: Hiring a specialist may add competency to management's control and is a process, but it is not a control in itself.

Improved control description: Management reviews and discusses the Actuarial Report, including key assumptions, with the specialist to assess the appropriateness of the assumptions and conclusions reached.

Example 2:

Control description: The Financial Controller prepares a memo documenting the basis for the entity's conclusions regarding impairment.

Pitfall: Preparing an analysis is typically a process step and not a control; the control is the activities performed to verify that the analysis is appropriate.

Improved control description: The CFO reviews the Impairment Analysis Memo and supporting documentation prepared by the Controller to assess the appropriateness of the conclusions reached.

Example 3:

Control description: The billed revenue file is summarised at the month end and the total is recorded into revenue.

Pitfall: Recording an event or transaction is a process step; the control is the activity that is performed to verify that the recording was appropriately performed.

Improved control description: The Accounting Manager verifies that the billed revenue was properly recorded to revenue by comparing the billed revenue file to the revenue recorded in the general ledger.

Example 4:

Control description: When new contracts are entered into or existing contracts are modified, the accounting manager determines and documents in a memo, the applicable revenue recognition model to be used for the contract.

Pitfall: Determining the revenue recognition model and documenting the same are process steps. They do not have any preventive or detective action steps.

Improved control description: The controller reviews and approves the revenue recognition memo prepared by the accounting manager. As part of the review process, the controller reads all the relevant excerpts from the contract and applicable professional standards as well as reviews and challenges, as appropriate, the conclusions documented in the memo.

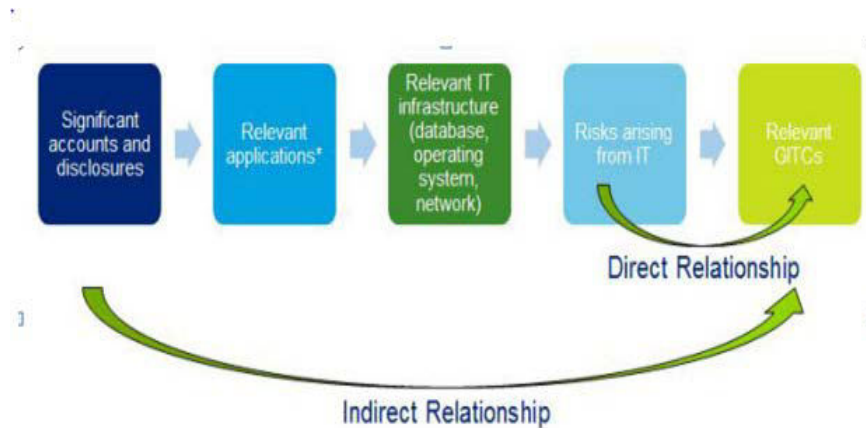

IG 4 Understanding IT Environment (Refer Paragraph 102)

IG 4.1 Based on the identification of the relevant flows of transactions or processes, the auditor also identifies the relevant IT environment related to those flows or processes to understand the

III.598 Auditing Pronouncements

effect of IT and the risks arising from IT. The term IT environment includes both the application systems and the IT infrastructure supporting those applications systems, including the database, operating system and network.

IG 4.2 The auditor identifies the relevant applications and IT infrastructure to identify the relevant risks arising from IT (IT risks) that need to be addressed for purposes of opining on internal financial controls and for purposes of being able to use a control reliance strategy for those accounts that are impacted by the IT risks (i.e., those accounts where the risks of material misstatement are addressed by controls that are dependent upon the relevant application systems and IT infrastructure.) He or she then identifies and tests the relevant general IT controls that address those IT risks. The relationship between risks of material misstatement, IT risks and relevant GITCs is depicted in figure below.

IG 4.3 The auditor's procedures related to IT risks and controls are performed in the context of the relevant flows of transactions related to significant accounts and disclosures. In other words, the auditor is not required to obtain an understanding of all the entity's IT systems; instead, he or she focuses on those aspects of the entity's IT environment that may pose risks to the entity's financial statements. Even when a control-reliance strategy is not planned, the auditor's understanding of IT's role in the entity's processes is important to the identification and assessment of risks of material misstatement and to plan further substantive procedures.

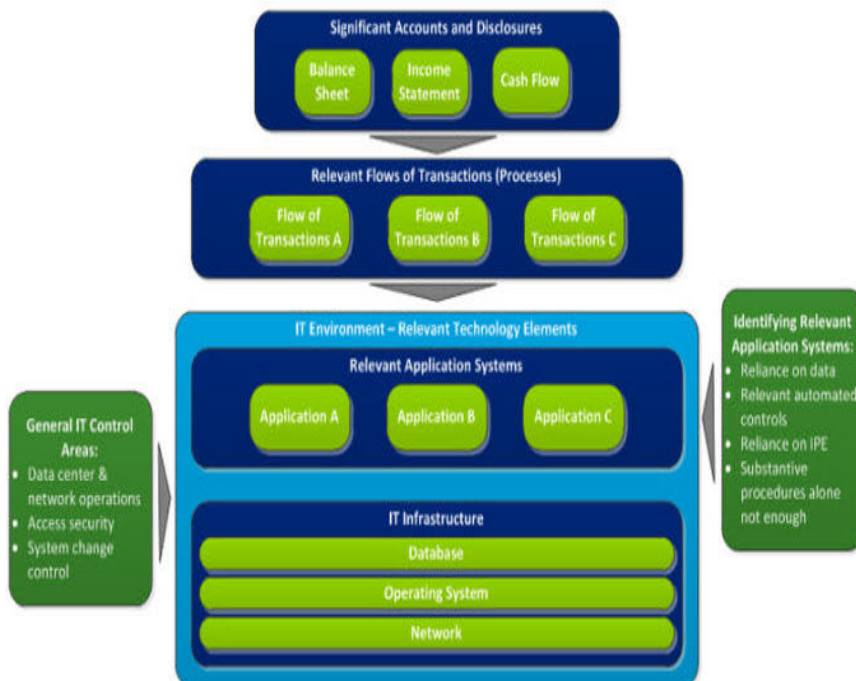

IG 4.4 The auditor should obtain an understanding of the information system, including the related business processes relevant to financial reporting, including the following areas:

- The classes of transactions in the entity's operations that are significant to the financial statements.
- The procedures within both IT and manual systems by which those transactions are initiated, authorised, recorded, processed, corrected as necessary, transferred to the general ledger, and reported in the financial statements.
- The related accounting records supporting information and specific accounts in the financial statements that are used to initiate, authorise, record, process, and report transactions. This includes the correction of incorrect information and how information

is transferred to the general ledger. The records may be in either manual or electronic form.

- How the information system captures events and conditions, other than transactions, that are significant to the financial statements.
- The financial reporting process used to prepare the entity's financial statements, including significant accounting estimates and disclosures.
- Controls surrounding journal entries, including non-standard journal entries used to record non-recurring, unusual transactions, or adjustments.

IG 4.5 The diagram below depicts a typical IT environment, including the relationship between the significant accounts and disclosures, the related flow of transactions, the related application systems, the IT infrastructure supporting those applications, and the relevant GITCs, modified to align with the auditor's terminology. Notably, the diagram illustrates that the identification of the relevant aspects of the IT environment follows the auditor's identification of significant accounts and disclosures, further emphasising that the relevant aspects of the IT environment are identified based on the effect they may have on the entity's internal control, and ultimately on the financial statements.

IG 4.6 In understanding the entity's control activities, the auditor should obtain an understanding of how the entity has responded to risks arising from IT. IT also poses specific risks to an entity's internal control, including, for example:

- Reliance on systems or programs that are inaccurately processing data, processing inaccurate data, or both.

III.600 Auditing Pronouncements

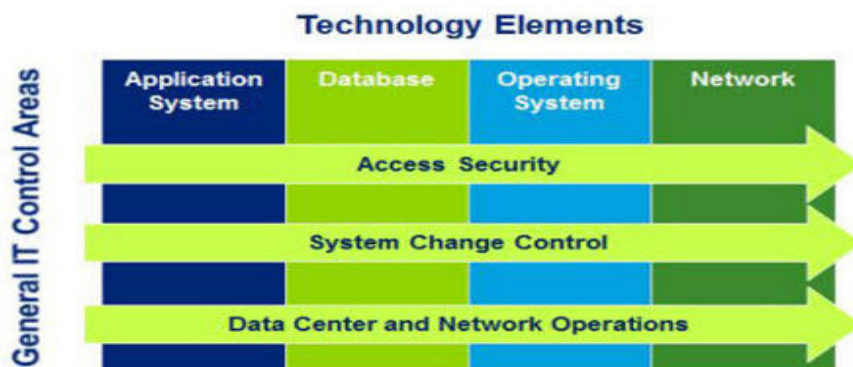

- *Unauthorised access to data that may result in destruction of data or improper changes to data, including the recording of unauthorised or non-existent transactions or inaccurate recording of transactions. Particular risks may arise when multiple users access a common database.*
- *The possibility of IT personnel gaining access privileges beyond those necessary to perform their assigned duties, thereby breaking down segregation of duties.*
- *Unauthorised changes to data in master files.*
- *Unauthorised changes to systems or programs.*
- *Failure to make necessary changes to systems or programs.*
- *Inappropriate manual intervention.*
- *Potential loss of data or inability to access data as required.*

Understanding general information technology controls (GITCs)

IG 4.7 General IT controls are policies and procedures that relate to many applications and support the effective functioning of application controls. They apply to mainframe, miniframe, and end-user environments. General IT controls that maintain the integrity of information and security of data commonly include controls over the following:

- Data centre and network operations.
- System software acquisition, change, and maintenance.
- Program change.
- Access security.
- Application system acquisition, development, and maintenance.

IG 4.8 GITCs include controls in the three areas of access security, system change control, and data centre and network operations. GITCs also include controls over each of the relevant technology elements within the entity's IT environment, including the application systems, databases, operating systems, and networks. As depicted in Figure below, GITCs are typically structured such that there are similar controls in place for each of the GITC areas across each of the technology elements.

Access security

IG 4.9 GITCs related to access security include logical access controls to prevent or detect unauthorised use of, and changes to, data, systems, or programs, including the establishment of system-based segregation of duties.

IG 4.10 An entity will typically have numerous controls in place to address logical access security, such as implementing user authentication to its systems through the use of unique user IDs and passwords; controlling the process for assigning, modifying, and terminating user access; monitoring the use of privileged-level access; and periodically reviewing user access privileges for appropriateness.

IG 4.11 Entities also control access to their systems through establishing segregation of duties controls. From an IT perspective, the auditor typically considers segregation of duties as it relates to each of the following types of users:

- End user system access — End users may be defined as entity personnel outside of the IT department who use the entity's application system (e.g., to process transactions or perform controls related to significant accounts and disclosures).

For example, a control over end-user access that prevents a single user from having access to both enter and approve journal entries may address risks of material misstatement related to the recording of fictitious or fraudulent journal entries for various significant accounts and disclosures.

- IT personnel system access — IT personnel may be defined as entity personnel responsible for administering the entity's IT systems (e.g., system administrators, security administrators). Segregation of duties controls over IT personnel system access are typically controls that address IT risks. It is typically appropriate for the auditor to test segregation of duties whenever testing user access to the entity's IT systems.

For example, a control over IT personnel system access that prevents a single IT system administrator from having access to both make changes to systems and promote those changes to the production environment may address an IT risk related to the promotion of unauthorised changes into the production environment, resulting in inappropriate modifications to systems or data.

System change control

IG 4.12 GITCs related to system change control include controls within the following categories:

- Program change: Controls to provide assurance that changes to the application systems and database management systems are implemented in a controlled manner.
- System software acquisition, change and maintenance: Controls to provide that network and communication software, systems software, and hardware are effectively acquired, changed, and maintained.
- Application system acquisition, development, and maintenance: Controls to provide that application systems and database management systems are effectively acquired,

developed, implemented, and maintained. System change controls address implementation and integration of programs or systems within the IT environment to verify the integrity of processing, performance, and controls over the computerised application systems that it supports.

Data centre and network operations

IG 4.13 GITCs related to data centre and network operations include controls to provide for the integrity of information as it is processed, stored, or communicated by the relevant aspects of the IT infrastructure.

IG 5 Entity-level Controls (ELCs) (Refer Paragraph 88-93)

IG 5.1 ELCs may be categorised into three “buckets”. These “buckets” align with the distinction of direct controls and indirect controls and are described as follows:

- Indirect entity-level controls — Those ELCs that do not themselves directly address risks of material misstatement at the account/assertion level but are important to effective internal control and therefore relevant in an audit of internal financial controls. These include controls that typically fall within the control environment, risk assessment, monitoring, and information and communication components of internal control system, including the general IT controls.
- Direct entity-level controls that are not precise enough — Those ELCs that directly address a risk of material misstatement but are not precise enough *on their own* to fully address a risk of material misstatement at the account/assertion level. While the auditor may identify these as relevant controls and test them, the auditor should also identify and test the effectiveness of other controls that in combination with the entity-level control address the risk of material misstatement.
- Direct entity-level controls that *are precise enough* — Those ELCs that directly address a risk of material misstatement at the account/assertion level and are precise enough on their own to fully address the risks of material misstatements.

IG 5.2 *Entity-level controls vary in nature and precision:*

- *Some entity-level controls, such as certain control environment controls, have an important, but indirect, effect on the likelihood that a misstatement will be detected or prevented on a timely basis. These controls might affect the other controls the auditor selects for testing and the nature, timing, and extent of procedures the auditor performs on other controls.*
- *Some entity-level controls monitor the effectiveness of other controls. Such controls might be designed to identify possible breakdowns in lower level controls, but not at a level of precision that would, by themselves, sufficiently address the assessed risk that misstatements to a relevant assertion will be prevented or detected on a timely basis. These controls, when operating effectively, might allow the auditor to reduce the testing of other controls.*

- *Some entity-level controls might be designed to operate at a level of precision that would adequately prevent or detect on a timely basis misstatements to one or more relevant assertions. If an entity-level control sufficiently addresses the assessed risk of misstatement, the auditor need not test additional controls relating to that risk.*

IG 5.3 An auditor makes inquiries and applies his or her knowledge of the business and organisational structure to understand and identify ELCs across all three “buckets,” as the nature and effectiveness of ELCs affects the audit plan in three important respects, as follows:

- In terms of their impact on the scope of testing in case of multi-location or multi-business entities.

For example, the effectiveness (or ineffectiveness) of the ELCs is a relevant factor for determining the audit plan for an entity as a whole for both the audit of the financial statements and the audit of internal financial controls.

- In terms of their impact on the scope of testing of other controls.

For example, the effectiveness (or ineffectiveness) of the ELCs is a relevant factor for assessing risk associated with the control and the auditor’s determination of the nature, timing and extent of testing of the operating effectiveness of such controls, including roll forward procedures to the balance-sheet date.

IG 5.4 The auditor must test those entity-level controls that are important to the auditor’s conclusion about whether the company has effective internal financial controls. The auditor’s evaluation of entity-level controls can result in increasing or decreasing the testing that the auditor otherwise would have performed on other controls.

- In terms of whether the ELCs are sufficiently direct and precise to address one or more assessed risks of material misstatement.

Direct and precise entity-level controls (D&P ELCs)

IG 5.5 D&P ELCs are typically review-type (detective) controls that can exist at any level in an organisation (and often exist in multiple layers). To identify those D&P ELCs that may be relevant, the auditor should make inquiries, beginning at the top of the organisation (e.g., Corporate Financial Reporting Department), regarding how the entity determines that its financial statements are prepared in accordance with the applicable financial reporting framework and are free of material misstatement and then work down through the various layers in the organisation. In larger organisations, ELCs that operate at the segment/division or location level are generally more direct and precise than those that operate at the group level.

D&P ELCs at multiple levels within an entity often have different purposes or focus, and therefore may be relevant in addressing different risks of material misstatement.

For example, in an entity with more than 300 components, the balance sheet and income statement of each component are reviewed in detail at the segment level by segment controllers, while the monthly financial reporting package, which includes key performance indicators and trend lines, is analysed at the group level by a financial analysis team. Since the focus of the reviews is different, both ELCs may be relevant controls in the context of an audit.

III.604 Auditing Pronouncements

IG 5.6 The form of an ELC may be very narrow in scope such as the review of a specific analysis related to a specific account/assertion (e.g., an analysis supporting a material accounting estimate) or may be broad in scope such as the review of a financial reporting package that may depict actual trends lines, actual to budget/forecast, and key performance measures for the balance sheet and income statement (including analyses of certain accounts and commentary about unusual transactions or variances).

When a review is broader in scope, it may not be precise enough to address all the risks of material misstatement related to the accounts subject to the review but may be precise enough to address the risks of material misstatement related to some accounts.

For example, a direct and precise ELC that consists of a monthly review of the monthly financial reporting package may be sufficiently precise for some of the accounts where more detailed analyses are performed but may not be precise enough for others where the review activities are more high-level.

IG 5.7 Examples of “direct but not precise enough” ELCs may include:

- Variance analysis of actual to budget, where budget is a “target” established at the beginning of the year but not a valid expectation against which to measure actual results in order to conclude positively that there is no material misstatements in the actual balance or amounts recorded. Budget versus actual analyses are often intended to be used for the primary purpose of explaining variances from budget for operational purposes, not to detect misstatements; therefore, these analyses are generally not effective in detecting misstatements when actual approximates budget. For a budget versus actual analysis to be an effective D&P ELC, the budget needs to represent a sufficiently precise expectation of the actual balance or amount.
- Trend-line analyses (e.g., current-year to prior-year comparisons) of an account balance, as this kind of analysis typically would not identify misstatements if there were no significant fluctuations between amounts recorded in the current and prior year.

IG 5.8 Examples of direct and precise ELCs may include:

- A variance analysis of rent expense to budget where budget is a valid expectation (e.g., based on the actual lease provisions) that is not expected to materially change during the applicable reporting period.
- Detailed analysis of prepaid expenses such that the reviewer, with sufficient knowledge of the accounts and related transactions and therefore a basis for an independent expectation, would reasonably be expected to identify a material misstatement in the recorded amount.

IG 6 Segregation of Duties (Refer Paragraph 113)

IG 6.1 Segregation of duties means assigning different people the responsibilities of authorising transactions, recording transactions, and maintaining custody of assets. Segregation of duties is intended to reduce the opportunities to allow any person to be in a position to both perpetrate and conceal errors or fraud in the normal course of the person’s duties.

IG 6.2 *Business case of implementing segregation of duties:*

- *Mitigating fraud risks.*
- *Compliance with regulatory requirements.*
- *Implementation of meaningful control strategies.*
- *Pivotal for adequate access controls in an ERP scenario.*
- *Integral in case of outsourced operations.*

IG 6.3 *The following are the typical set of tasks / activities that need to be segregated from a generic perspective:*

- *Initiating a transaction (including developing appropriate documentation).*
- *Authorising the transaction.*
- *Recording the transaction.*
- *Monitoring custody of the physical asset.*
- *Reconciling subsidiary ledgers with the general ledger.*
- *Processing master file transactions.*
- *Authorising master file transactions.*
- *Following up on issues or discrepancies.*
- *Controlling systems development and daily operations in computer-based accounting systems.*

IG 7 Automated Controls (Refer Paragraph 113)

Application controls defined

IG 7.1 Application controls are a subset of internal controls that relate to an application system and the information managed by that application. Timely, accurate and reliable information is critical to enable informed decision making. The timeliness, accuracy and reliability of the information are dependent on the underlying application systems that are used to generate, process, store and report the information. Application controls are those controls that achieve the business objectives of timely, accurate and reliable information. They consist of the manual and automated activities that ensure that information conforms to certain criteria that is referred to as business requirements for information. Those criteria are effectiveness, efficiency, confidentiality, integrity, availability, compliance and reliability.

Automated control in a way is technology used to automate control activities

IG 7.2 Many control activities in an entity are partially or wholly automated using technology. These procedures are also known as automated control activities or automated controls. Automated controls include financial process-related automated transaction controls, such as a three-way match performed within an ERP system supporting the procurement and payables sub-processes, and computerised controls in operational or compliance processes, such as checking the proper functioning of a power plant. Sometimes the control activity is purely automated, such as when a system detects an error in the transmission of data, rejects the transmission, and

III.606 Auditing Pronouncements

automatically requests a new transmission. Other times there is a combination of automated and manual procedures. For example, the system automatically detects the error in transmission, but someone has to manually initiate the re-transmission. In other cases, a manual control depends on information from a system, such as computer-generated reports supporting a budget-to-actual analysis.

IG 7.3 Most business processes have a mix of manual and automated controls, depending on the availability of technology in the entity. Automated controls tend to be more reliable, subject to whether technology general controls, discussed later in this Section, are implemented and operating, since they are less susceptible to human judgement and error, and are typically more efficient.

Assurance on automated controls

IG 7.4 Application controls relate to the transactions and master file, or standing data pertaining to each automated application system, and are specific to each application. They ensure the accuracy, integrity, reliability and confidentiality of the information and the validity of the entries made in the transactions and standing data resulting from both manual and automated processing.

IG 7.5 The objectives relevant for application controls generally involve ensuring that:

- Data prepared for entry are authorised, complete, valid and reliable.
- Data are converted to an automated form and entered into the application accurately, completely and on time.
- Data are processed by the application accurately, completely and on time, and in accordance with established requirements.
- Data are protected throughout processing to maintain integrity and validity.
- Output is protected from unauthorised modification or damage and distributed in accordance with prescribed policies.

Benchmarking of automated controls

IG 7.6 *Entirely automated application controls are generally not subject to breakdowns due to human failure. This feature allows the auditor to use a "benchmarking" strategy.*

IG 7.7 *If general controls over program changes, access to programs, and computer operations are effective and continue to be tested, and if the auditor verifies that the automated application control has not changed since the auditor established a baseline (i.e., last tested the application control), the auditor may conclude that the automated application control continues to be effective without repeating the prior year's specific tests of the operation of the automated application control. The nature and extent of the evidence that the auditor should obtain to verify that the control has not changed may vary depending on the circumstances, including depending on the strength of the company's program change controls.*

IG 7.8 *The consistent and effective functioning of the automated application controls may be dependent upon the related files, tables, data, and parameters. For example, an automated application for calculating interest income might be dependent on the continued integrity of a rate table used by the automated calculation.*

IG 7.9 To determine whether to use a benchmarking strategy, the auditor should assess the following risk factors. As these factors indicate lower risk, the control being evaluated might be well-suited for benchmarking. As these factors indicate increased risk, the control being evaluated is less suited for benchmarking. These factors are –

- *The extent to which the application control can be matched to a defined program within an application.*
- *The extent to which the application is stable (i.e., there are few changes from period to period).*
- *The availability and reliability of a report of the compilation dates of the programs placed in production. (This information may be used as evidence that controls within the program have not changed.)*

IG 7.10 Benchmarking automated application controls can be especially effective for companies using purchased software when the possibility of program changes is remote – e.g., when the vendor does not allow access or modification to the source code.

IG 7.11 After a period of time, the length of which depends upon the circumstances, the baseline of the operation of an automated application control should be re-established.

IG 7.12 To determine when to re-establish a baseline, the auditor should evaluate the following factors –

- *The effectiveness of the IT control environment, including controls over application and system software acquisition and maintenance, access controls and computer operations.*
- *The auditor's understanding of the nature of changes, if any, on the specific programs that contain the controls.*
- *The nature and timing of other related tests.*
- *The consequences of errors associated with the application control that was benchmarked.*
- *Whether the control is sensitive to other business factors that may have changed. For example, an automated control may have been designed with the assumption that only positive amounts will exist in a file. Such a control would no longer be effective if negative amounts (credits) begin to be posted to the account.*

IG 8 Information Produced by the Entity (Refer Paragraph 113)

IG 8.1 The auditing standards do not provide a definition of information produced by the entity (IPE) or describe what constitutes IPE. IPE is typically in the form of a "report" which may be either system-generated, manually-prepared, or a combination of both (e.g., a download of system accumulated data that is then manipulated in an Excel spreadsheet). Examples of different forms of reports include:

- *Standard "out of the box" or default reports or templates that either:*

III.608 Auditing Pronouncements

- May not be modified and therefore don't allow for customisation of inputs/outputs (e.g., a system generated standard Debtors aging report with no configurable settings or user optionality, that in today's IT environment of ERP systems is fairly rare), or
- May be configurable upon installation (e.g., by adding custom fields to a report design or removing fields on a report that are not required to be displayed) and can be modified thereafter through established program change processes (e.g., a system generated standard Debtors aging report with configurable settings such as user defined aging categories and user options for specifying the logic, such as the manner in which the aging is computed, that is more typical in today's IT environments).
- Custom-developed reports that are not standard to the application and that are defined and generated by user-operated tools such as scripts, report writers, programming language and query tools (e.g., a monthly user-initiated extract of inventory sales by SKU).
- Output from end-user applications such as automated spreadsheets or other similar applications that house and extract relevant information (i.e., data).
- Entity-prepared analyses, schedules and spreadsheets that are manually prepared by entity personnel either from information generated from the entity's system or from other internal or external sources.

IG 8.2 As there may be a large amount of information that is generated by an entity for use in managing the business and to analyse and prepare financial information, the auditor is only required to test the accuracy and completeness of IPE that is relevant to the audit and used as audit evidence, not all information that is produced by the entity.

IG 8.3 IPE that is relevant to the audit and used as audit evidence generally falls into one of three "buckets" as depicted in below:

IPE that the entity uses	When performing relevant controls
IPE that the auditor uses as an audit evidence	When performing tests of operative effectiveness of relevant controls
IPE that the auditor uses as an audit evidence	When performing substantive procedures

Understanding IPEs

IG 8.4 In order to design appropriate procedures to test the accuracy and completeness of IPE, it is important to first obtain an appropriately detailed understanding of the IPE. The auditor begins with a thorough understanding of what the IPE is, how the IPE is generated, and how the auditor intends to use it as audit evidence. This allows the auditor to design the most appropriate testing approach to determine whether the IPE is sufficient and appropriate for purposes of the audit.

IG 8.5 IPE typically consists of three elements: (1) source data, (2) report logic, and (3) parameters.

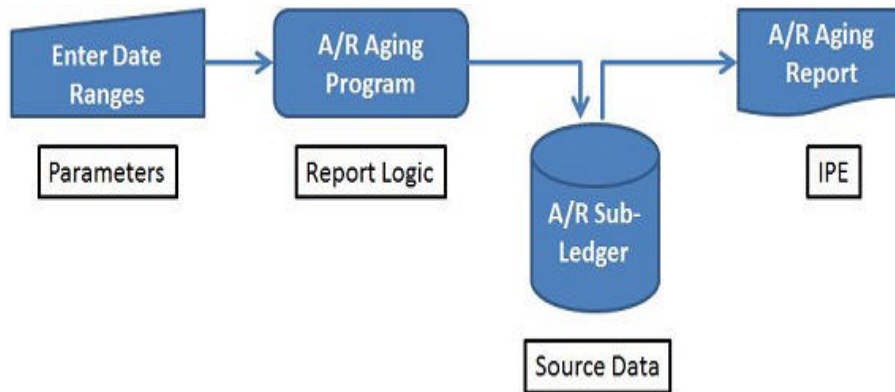

Accordingly, it is important that the auditor obtains an understanding of each of these three elements to determine the testing strategy for IPE. These three elements are further described as follows:

Element	Description
Source Data	<p>The information from which the IPE is created. This may include data maintained in the IT system (e.g., within an application system or database) or external to the system (e.g., data maintained in an Excel spreadsheet or manually maintained), which may or may not be subject to general IT controls.</p> <p>For example, for a report of all sales greater than Rs. 1,000,000, the source data is the database of all sales transactions.</p>
Report Logic	<p>The computer code, algorithms, or formulas for transforming, extracting or loading the relevant source data and creating the report. Report logic may include standardised report programs, user-operated tools (e.g., query tools and report writers) or Excel spreadsheets, which may or may not be subject to the general IT controls.</p> <p>For example, for the Debtors Aging report, the report logic is typically a program in the Debtors application that contains the code and algorithms for creating the Debtors Aging (report) from the Debtors sub-ledger detail (source data).</p>
Report Parameters	<p>Report parameters allow the user to look at only the information that is of interest to them. Common uses of report parameters including defining the report structure, specifying or filtering data used in a report or connecting related reports (data or output) together. Depending on the report structure, report parameters may be created manually by the user (user-entered parameters) or they may be pre-set (there is significant flexibility in the configuration of parameters, depending on the application system), and they may or may not be subject to the general IT controls.</p> <p>For example, for a monthly report of slow moving inventory by warehouse location, the user enters the month and location code parameters to generate the reports.</p>

IG 8.6 Figure below portrays the process and the three elements of IPE to generate a typical Debtors aging report: (1) the user-entered parameters (i.e., date ranges), (2) the source data (i.e., the Debtors sub-ledger), and (3) the report logic that generates the Debtors aging report (which includes both the extraction of the source data from the Debtors sub-ledger and the aging of the items).

Figure

III.610 Auditing Pronouncements

IG 8.7 The auditor's objective when performing procedures on IPE is to determine if these three elements, when applicable, produce IPE that is accurate and complete. As IPE is generated in many different forms and through many different methods, the testing strategy may vary depending on the intended purpose of the IPE, the nature of the IPE (e.g., a standard pre-coded report versus a custom ad-hoc report) and how it is created (e.g., the degree of automation which typically increases reliability when subject to effective general IT controls).

For example, Entity A and Entity B both use the same ERP system; however, Entity A uses an Debtors aging report from the system to determine its allowance for doubtful accounts, and Entity B takes the same Debtors aging report, downloads it into Excel, and then manually manipulates the report. The downloading and manipulation of Entity B's report likely introduces additional possibilities that the IPE may be inaccurate or incomplete compared to the Debtors aging report used by Entity A and therefore, it would likely be necessary to perform additional procedures on Entity B's report to determine its accuracy and completeness as compared to Entity A's report.

IG 8.8 The following considerations related to accuracy and completeness of IPE may assist the auditor in obtaining an appropriate understanding to plan the testing approach to IPE:

- Not all data is captured.
 - For example, if all revenue transactions are not captured in the system, a report of revenue data that is derived from the system would likely be incomplete.
- The data is input incorrectly.
 - For example, data entry errors (e.g., a number that is transposed or entered incorrectly) into an Excel spreadsheet may result in incorrect totals in the spreadsheet.
 - For example, SAP maintains a central exchange rate table which is used to translate foreign currency transactions into the local reporting currency. The table is manually updated and therefore subject to human error (e.g., incorrect exchange rates may be input). Therefore, the system-generated report identifying the exchange rates may be incorrect.
- The report logic is incorrect.

- For example, a report is designed to include sales transactions for which the variation between the actual selling price of an item and the price of that same item in the entity's standard price list is in excess of 15 percent; however, the report was incorrectly configured to only include transactions for which the variance is in excess of 20 percent.
- For example, the system performs a consolidation of the various reporting entities based on company codes. If a new entity is not initially coded correctly, the manner in which it is consolidated into the overall results of all the reporting entities may not be correct.
- For example, the entity relies on a report of average selling prices to monitor compliance with its pricing policies; however, the algorithm that calculates the average selling prices was inadvertently applied to sales occurring at only certain business units (i.e., the calculation was not applied to the entire population).
- The report logic or source data could be changed inappropriately or without authorisation.
 - For example, IT management runs a report of all changes to the entity's ERP application as part of a control to determine whether all changes were properly tested and approved prior to implementation. In order to conceal an error that he had made, an employee in the IT department, who had administrator access to the system, manipulated the report to exclude an unauthorised change he made.
 - For example, the report is an Excel spreadsheet that is not subject to general IT controls or otherwise protected and, therefore, may be subject to unauthorised changes.
- The user-entered parameters entered are incorrect.
 - For example, user-entered parameters related to the date range are required when generating a Debtors aging report. If the user-entered parameters are not entered correctly, the data on the report will not likely be correct (e.g., the report may not contain the expected or intended data).
 - For example, consider the circumstance in which a query tool is utilised by a user to extract receivables account detail related only to a particular customer. If the user-entered parameters are not set up to specifically and properly extract all the detail for the specified customer and only the specified customer, then the IPE may not be accurate and complete.

Evaluating IPE

IG 8.9 The auditor is required to "evaluate whether the IPE is sufficiently precise and detailed for purposes of the audit." This involves evaluating whether the IPE is appropriate for its intended purpose (e.g., the objectives of the specific control or substantive procedures for which it is being used).

IG 8.10 If the IPE is not sufficiently precise or detailed for the purpose, it is likely that the auditor cannot use it as audit evidence; however, the auditor may work with the entity to determine if the original IPE can be modified by the entity to meet his or her needs or identify other audit evidence

III.612 Auditing Pronouncements

to achieve the intended purpose. Typically, the auditor evaluates whether IPE is sufficiently precise and detailed for the stated purposes based on his or her understanding of IPE and the results of the procedures the auditor performs to address accuracy and completeness of the IPE.

For example, when the auditor is testing program change controls and the client provides a listing of application system changes in a Word document that does not provide sufficient information to identify the related changes made in the source code library for the application system (i.e., the listing is not sufficiently precise), the auditor may require management to either modify the report or to identify an alternative source or form of the information (e.g., a program change listing from the source code library management tool) that will be sufficiently precise and detailed for testing purposes.

IPE in the context of internal financial controls testing

IG 8.11 IPE in the context of internal control testing is IPE that the auditor uses as audit evidence to perform his or her tests of controls and, therefore, the auditor needs to perform procedures to determine that the IPE is accurate and complete.

For example, when testing the effectiveness of an entity's program change controls, the auditor may request the entity to provide a system-generated report that identifies the modifications made to a specific application during a specified time period and use such a report to identify and select items for testing of the entity's program change controls. The testing of change controls relies on the report being accurate and complete; therefore, the auditor needs to perform procedures to address the accuracy and completeness of the report.

IG 8.12 When the auditor uses a report (IPE) to identify the population of items of interest from which to draw the sample for testing, the tests of the items selected from the report typically address the accuracy of the report; however, such procedures often do not address the completeness of the report.

For example, when testing the effectiveness of an entity's program change controls, the auditor obtains a report listing the changes logged during the period of audit interest. When the auditor makes selections from that report and tests them to determine if the entity's controls over program changes are effective, the auditor is also obtaining evidence of the accuracy of the report. The auditor should design and perform other procedures to address the completeness of the report (e.g., the auditor may select program changes that the auditor identified from an independent population and trace them to the report of program changes or the auditor could test the effectiveness of the controls over the completeness of the report of program changes).

IG 8.13 The auditor may test IPE that he proposes to use to perform tests of controls by either:

- Performing "direct testing" procedures to address the accuracy and completeness of IPE. In a combined audit of internal financial controls over financial reporting and financial statements, the auditor may directly test IPE that the auditor uses to perform tests of controls only when management is not using the IPE in the performance of its controls.
- Perform procedures to test controls that address the accuracy and completeness of the IPE.

- A combination of these approaches (i.e., performing direct testing and tests of controls to address the accuracy and completeness of IPE).

Testing accuracy and completeness of IPE that the entity's controls are dependent upon

IG 8.14 The auditor obtains evidence that such IPE is sufficiently reliable throughout the period of intended reliance. For a combined audit of internal financial controls over financial reporting and financial statements, the auditor is required to identify and test the effectiveness of controls addressing the accuracy and completeness of the information the controls are dependent upon.

IPE that the auditor uses in tests of operating effectiveness of relevant controls

IG 8.15 The auditor may obtain information to use in performing tests of certain controls, such as reports on system settings (e.g., access, profiles, passwords) or reports used to define the population of interest (e.g., a list of program changes). The auditor also performs procedures to test the accuracy and completeness of such IPE since the integrity of the tests of operating effectiveness of the relevant controls depends on the accuracy and completeness of that information.

Direct testing of IPE

IG 8.16 The appropriate procedures and sample size for directly testing IPE is a matter of professional judgement based on the nature of the IPE and may vary depending upon the specific facts and circumstances.

IG 8.17 In order to determine whether "directly" testing IPE is the most effective and efficient testing method, the auditor considers whether and to what extent his tests of controls or substantive procedures address the accuracy or completeness of the IPE. For example:

1. Consider if the IPE is the starting point of the substantive procedures, and therefore, whether the substantive procedures for testing the relevant assertions for the class of transactions, account balance, or disclosure also address the accuracy and completeness of the three elements of the IPE. In such cases, additional procedures may not be necessary.

For example, the auditor may use a property roll forward schedule prepared by the entity as the starting point to perform the substantive testing of the property account balance. The substantive procedures of the property account balance (either tests of details or substantive analytical procedures) would likely include procedures that would address the accuracy and completeness of the information on the roll forward schedule, such as agreeing totals from the schedule to the beginning and ending general ledger balances, footing the schedule, and making selections from the various totals reflected on the schedule (e.g., additions, disposals, depreciation) to test by agreeing back to source documents or by recalculation. In this case, additional procedures to address the completeness and accuracy of the elements of the IPE are not likely necessary.

2. Consider if the IPE is extracted from data related to classes of transactions, account balances, or disclosures that is already being tested as part of the audit — either by testing the relevant controls or through substantive procedures. If so, the auditor may need to only plan

III.614 Auditing Pronouncements

additional testing of the remaining IPE elements (i.e., the report logic and, if applicable, the user-entered parameters).

For example, the auditor tests the relevant controls over sales, billing, and cash receipts, including the relevant general IT controls, for control reliance purposes and substantive procedures validate that the transaction data in the Debtors sub-ledger is accurate and complete and protected from unauthorised access or changes. Accordingly, when testing the Debtors aging report which is derived from the Debtors sub-ledger detail, the auditor does not need to trace selections back to source documents as the auditor has already determined through tests of relevant controls that the Debtors sub-ledger detail is accurate and complete.

IG 8.18 However, even when the auditor may have tested the controls related to the underlying source data or substantively tested the source data; he may still need to perform procedures to address the appropriateness of the report logic and user-entered parameters used in producing the IPE. In some cases, the auditor may be able to use the same items tested (or a subset thereof) for control tests or substantive procedures to perform procedures specifically directed at the accuracy and completeness of the process to extract the relevant data into the report.

For example, although the auditor has already determined through tests of relevant controls that the Debtors sub-ledger detail is complete and accurate, he still needs to perform procedures to address the appropriateness of the report logic. Therefore, to validate that the data in the Debtors aging report was properly extracted, the auditor may reconcile the Debtors aging report to the Debtors sub-ledger in the aggregate and then trace into the Debtors aging report the relevant information for the items (or subset thereof) that were selected for Debtors confirmations.

IG 8.19 Consider if the IPE consists of source data that may be tested for accuracy and completeness in conjunction with other tests of controls or substantive procedures for the relevant flows of transactions.

For example, when performing substantive test of sales transactions the auditor may also include testing that the product codes/SKUs were properly coded and input into the system in order to validate that the data at the sales by product code/SKU level is accurate and complete.

For example, when performing tests of controls, the auditor may also assess whether the identified controls specifically address the recording and reporting of revenue and expenses by location.

Example of IPE testing

Data/ Report Description	Terminated Employee Listing
Background	The Terminated Employee Listing is a standard parameter-driven report generated directly from the HR application and provided to auditors. The report pulls the names of employees terminated during a particular date range (i.e., the period under audit), as well as other pertinent information about the employees, such as their employee IDs and the effective dates of their separations from the entity. This report will be used by the auditor to determine

	<p>whether there are active user accounts in the system for any of the terminated employees in order to test GITCs related to timely deactivation and/or removal of user accounts when employees terminate employment with the entity.</p>
Example Testing Approach 1	<p>The auditor compares the Terminated Employee Listing on a sample basis to relevant information in the system, and vice versa, to determine that:</p> <ol style="list-style-type: none"> 1. The report was created from the appropriate production system during the period under audit. 2. The appropriate user-entered parameters were used to generate the report (e.g., date range). 3. The employee information in the system is consistent with that in the report. <p>Additional audit evidence is obtained that the report accurately includes a complete population of terminations that occurred during the period under audit:</p> <ul style="list-style-type: none"> • For example, inquiry is made of entity personnel to obtain the names of X individuals who were terminated in the period under audit and the timeframe during which these individuals were terminated (e.g., if the auditor knows the entity did layoffs at a certain time during the year). The Terminated Employee Listing is inspected to determine that the individuals identified during the auditor's inquiries appear on the list and the termination dates on the listing are consistent with those communicated to the auditor during his or her inquiries. • For example, a selection is made of terminated employees from the source where termination status is maintained and it is validated that the terminated employees appear on the Terminated Employee Listing.
Example Testing Approach 2	<p>The auditor should test the relevant controls that provide audit evidence of the timely and accurate processing of terminations in the HR application, including the employment status of employees (e.g., active, terminated) and termination dates.</p> <p>As the report logic had been tested in the prior year, the auditor may apply a benchmarking strategy (e.g., carry forward a summary of direct testing of the report logic and user-entered parameters performed upon initial installation of the system, including describing the Terminated Employee Listing, how it was tested, and the conclusions reached. The auditor should also obtain evidence in the change management system that validates that the source code underlying the report has not been changed since it was originally tested in the prior year</p>

IG 9 Use of Service Organisations (Refer Paragraph 90)

Service organisations

IG 9.1 The auditor's understanding of the flows of transactions includes an understanding of the entity's use of service organisations to perform processes relevant to financial reporting (e.g., payroll processing, processing of insurance or medical claims) and, from an IT perspective, the systems that are being used by the service organisations to perform those processes. In addition to outsourcing certain business processes to a service organisation, an entity may also outsource administration of one or more of its systems to a service organisation or use a service organisation to "host" its systems.

Identifying relevant service organisations

IG 9.2 Regardless of whether a service organisation is being used to perform business processes or IT functions, to the extent that these processes are relevant to the audit, the systems used by or administered by the service organisation (and the related general IT controls) may also be relevant to the audit. In determining whether these systems are relevant, the auditor considers the controls the user entity (i.e., an entity that uses a service organisation) and the service organisation have in place to address the related risks of material misstatement or IT risks. These may include controls at the service organisation when the service organisation is performing processes relevant to financial reporting or when a service organisation is hosting systems for the user entity. However, to the extent that the entity has controls in place that are sufficiently precise to address the relevant risks and these controls do not rely on automated controls, data, or reports from the systems used by or administered by the service organisation, the auditor may determine that the service organisation controls are not relevant to the audit.

For example, an entity outsources the processing of its payroll transactions to a service organisation; however, the entity has the following controls in place that are sufficiently precise to address the relevant risks of material misstatement related to payroll and the entity does not rely on reports or other information it receives from the service organisation to perform these controls:

- Comparing the payroll data submitted to the service organisation with reports of information received from the service organisation after the data has been processed.
- Re-computing a sample of the payroll amounts for clerical accuracy and reviewing the total amount of the payroll for reasonableness.

Situation in which service organisations are relevant for internal financial controls

IG 9.3 If the service organisation's services are part of a company's information system, then they are part of the information and communication component of the company's internal financial controls. When the service organisation's services are part of the company's internal financial controls, the auditor should include the activities of the service organisation when determining the evidence required to support his or her opinion.

IG 9.4 The following are the procedures that the auditor should perform with respect to the activities performed by the service organisation –

- *Obtaining an understanding of the controls at the service organisation that are relevant to the entity's internal control and the controls at the user organisation over the activities of the service organisation, and*
- *Obtaining evidence that the controls that are relevant to the auditor's opinion are operating effectively.*

IG 9.5 Evidence that the controls that are relevant to the auditor's opinion are operating effectively may be obtained by following:

- *Obtaining a service auditor's report on controls placed in operation and tests of operating effectiveness, or a report on the application of agreed upon procedures that describes relevant tests of controls.*

Note: *The service auditor's report referred to above means a report with the service auditor's opinion on the service organisation's description of the design of its controls, the tests of controls, and results of those tests performed by the service auditor, and the service auditor's opinion on whether the controls tested were operating effectively during the specified period. A service auditor's report that does not include tests of controls, results of the tests, and the service auditor's opinion on operating effectiveness does not provide evidence of operating effectiveness. Furthermore, if the evidence regarding operating effectiveness of controls comes from an agreed-upon procedures report rather than a service auditor's report, the auditor should evaluate whether the agreed-upon procedures report provides sufficient evidence in the same manner described in the following paragraph.*

- *Performing tests of the user organisation's controls over the activities of the service organisation (e.g., testing the user organisation's independent re-performance of selected items processed by the service organisation or testing the user organisation's reconciliation of output reports with source documents).*
- *Performing tests of controls at the service organisation.*

IG 9.6 If a service auditor's report on controls placed in operation and tests of operating effectiveness is available, the auditor may evaluate whether this report provides sufficient evidence to support his or her opinion. In evaluating whether such a service auditor's report provides sufficient evidence, the auditor should assess the following factors –

- *The time period covered by the tests of controls and its relation to the as of date of management's assessment,*
- *The scope of the examination and applications covered, the controls tested, and the way in which tested controls relate to the company's controls, and*
- *The results of those tests of controls and the service auditor's opinion on the operating effectiveness of the controls.*

Note: *If the service auditor's report on controls placed in operation and tests of operating effectiveness contains a qualification that the stated control objectives might be achieved only if the company applies controls contemplated in the design of the system by the service organisation, the auditor should evaluate whether the company is applying the necessary procedures.*

III.618 Auditing Pronouncements

IG 9.7 In determining whether the service auditor's report provides sufficient evidence to support the auditor's opinion, the auditor should make inquiries concerning the service auditor's reputation, competence, and independence.

IG 9.8 When a significant period of time has elapsed between the time period covered by the tests of controls in the service auditor's report and the date specified in management's assessment, additional procedures should be performed. The auditor should inquire of management to determine whether management has identified any changes in the service organisation's controls subsequent to the period covered by the service auditor's report (such as changes communicated to management from the service organisation, changes in personnel at the service organisation with whom management interacts, changes in reports or other data received from the service organisation, changes in contracts or service level agreements with the service organisation, or errors identified in the service organisation's processing). If management has identified such changes, the auditor should evaluate the effect of such changes on the effectiveness of the company's internal financial controls. The auditor should also evaluate whether the results of other procedures performed indicate that there have been changes in the controls at the service organisation.

IG 9.9 The auditor should determine whether to obtain additional evidence about the operating effectiveness of controls at the service organisation based on the procedures performed by management or the auditor and the results of those procedures and on an evaluation of the following risk factors. As risk increases, the need for the auditor to obtain additional evidence increases.

- *The elapsed time between the time period covered by the tests of controls in the service auditor's report and the date specified in management's assessment,*
- *The significance of the activities of the service organisation,*
- *Whether there are errors that have been identified in the service organisation's processing, and*
- *The nature and significance of any changes in the service organisation's controls identified by management or the auditor.*

IG 9.10 If the auditor concludes that additional evidence about the operating effectiveness of controls at the service organisation is required, the auditor's additional procedures might include –

- *Evaluating procedures performed by management and the results of those procedures.*
- *Contacting the service organisation, through the user organisation, to obtain specific information.*
- *Requesting that a service auditor be engaged to perform procedures that will supply the necessary information.*
- *Visiting the service organisation and performing such procedures.*

IG 9.11 The auditor should not refer to the service auditor's report when expressing an opinion on internal financial controls.

IG 10 Techniques of Control Testing (Refer Paragraph 116)

IG 10.1 Tests of controls are usually performed using the following techniques, often in combination:

Corroborative enquiry: This procedure, consisting of detailed interviews to obtain evidence about the effectiveness of controls, is performed in tandem with other procedures (e.g., examination of documentary evidence) to corroborate the information derived from the inquiry.

Observation: Observing the performance of a control activity often provides substantial evidence of its effectiveness. For example, the auditor may test controls over inventory by observing that employees who perform and record the counts follow management's written instructions. But observation of a control activity in action ordinarily does not, in itself, provide sufficient evidence of the effectiveness of the control activity, mainly because observations may not be representative of the usual performance of a control activity because management and staff may perform their tasks more diligently if they know they are being observed.

Examination of Documentation: If performance of a control activity is documented, the auditor can obtain evidence of its performance by examining the documentation, both electronic and written.

Re-performance: Re-performance may be effective for testing application controls, because the computer processes transactions systematically.

IG 11 Internal Financial Controls – Testing of Design (Refer Paragraph 108 -109)

IG 11.1 The objective of testing the design of a control is to determine if a deficiency in design exists. A deficiency in design exists when:

- A control necessary to meet the control objective (i.e., a control that mitigates the risk of material misstatement) is missing.
- An existing control is not properly designed so that, even if the control operates as designed, the control objective would not be met (i.e., the risk of material misstatement would not be mitigated).

IG 11.2 Therefore, it is important to consider and to specifically conclude with respect to both aspects based on the auditor's procedures and evaluation. Professional judgement is necessary to evaluate the design of relevant controls

IG 11.3 The auditor should test the design effectiveness of controls by determining whether the company's controls, if they are operated as prescribed by persons possessing the necessary authority and competence to perform the control effectively, satisfy the company's control objectives and can effectively prevent or detect errors or fraud that could result in material misstatements in the financial statements.

Note: A smaller, less complex company might achieve its control objectives in a different manner from a larger, more complex organisation. For example, a smaller, less complex company might have fewer employees in the accounting function, limiting opportunities to segregate duties and

III.620 Auditing Pronouncements

leading the company to implement alternative controls to achieve its control objectives. In such circumstances, the auditor should evaluate whether those alternative controls are effective.

IG 11.4 To appropriately evaluate the design of relevant controls, the auditor considers the following elements:

- The nature and significance of the risks of material misstatement addressed by the control.
- The characteristics or details of the control.
- Factors to determine whether the control is appropriately designed (i.e., the precision of a control) to address the identified risk.

Factors to consider when determining whether control is appropriately designed

The following factors will likely be a good starting point for evaluating the effectiveness of the design of many controls. (Note: these are not intended to be a complete list of considerations, nor is it intended that each of these is always relevant or needs to be considered for each control.)

IG 11.5 Appropriateness of the purpose of the control and its correlation to the risk/assertion

A procedure that functions to prevent or detect misstatements generally is more precise than a procedure that merely identifies and explains differences. Additionally, a control that is indirectly related to an assertion normally is less likely to prevent or detect misstatements in the assertion than a control that is directly related to an assertion. A control that identifies and explains differences may identify an unusual fluctuation but would not identify misstatements if there were no fluctuations.

For example, the purpose of a budget to actual revenue review is to typically identify and explain variances for operating purposes, not necessarily for the purpose of identifying misstatements.

It is important that this assessment be applied for each risk/assertion that a control addresses.

For example, if a control addresses six risks of material misstatement, then the purpose of the control and correlation to the risk/assertion is considered separately for each risk of material misstatement.

IG 11.6 Appropriateness of the control considering the nature and significance of the risk

The greater the inherent risk, the more precise the controls are expected to be.

For example, a higher-level D&P ELC may be appropriately precise for payroll expense, which is typically a normal risk of misstatement, but would likely not be sufficient by itself for a significant risk of material misstatement, such as a significant accounting estimate.

IG 11.7 Competence and authority of the person(s) performing the control

The experience level of the person performing the control and their organisational position affects the effectiveness of a control.

For example, if the assistant controller performs a review of a document prepared by the controller, the assistant controller's authority in performing such a review might be questioned, given the direct reporting relationship of the assistant controller to the controller.

For example, a junior clerk may not have the requisite knowledge of the business or stature within the organisation to perform an effective review control that requires an in-depth understanding of the business and the ability to raise challenges with superiors and others within the organisation.

For example, SAP security is administered by a Senior Analyst. The Senior Analyst is a Certified Information Systems Security Professional (CISSP), has ten years of IT experience and has been in his current position for two years. The auditor interacted with the Senior Analyst as he or she executed audit tests and found him to be knowledgeable of SAP security and controls. Based on these factors, it appears he has the competence and authority to operate SAP security controls.

For example, a control related to the review of user access privileges in a relevant application system is performed by a Manager, in the Information Compliance and Risk Management department of the entity. The auditor interacted with the Manager throughout the audit and noted she demonstrated sufficient knowledge of control processes related to the application system. The Manager has been responsible for overseeing the review of access and monitoring of the relevant application for the past three years. The auditor noted she appears to be competent to perform the controls for the relevant application system and has proper authority based upon her role, which was also confirmed by the auditor by reviewing an organisational chart.

Note: In some situations, particularly in smaller companies, a company might use a third party to provide assistance with certain financial reporting functions. When assessing the competence of personnel responsible for a company's financial reporting and associated controls, the auditor may take into account the combined competence of company personnel and other parties that assist with functions related to financial reporting.

IG 11.8 Frequency and consistency with which the control is performed

A control that is performed routinely and consistently is generally more precise than one performed sporadically.

For example, a review control that has clearly defined procedures and which is designed to be performed each quarter would be more precise than a review control that has undefined process steps and which is performed infrequently or on an ad-hoc basis. Similarly, when general IT controls are effective, an automated control is expected to operate more consistently than a manual control.

IG 11.9 Level of aggregation and predictability

A control that is performed at a more detailed level generally is more precise than one performed at a higher level. The precision of those controls also depends on the predictability (i.e., the more predictable the expected result, the greater the precision to identify potential material misstatements).

For example, an analysis of revenue by location or product line is likely to be more precise than an analysis of total entity revenue.

IG 11.10 Criteria for investigation and process for follow-up

For review-type controls (unless the review is performed with regard to each transaction), the threshold for investigating deviations or differences and its relationship to materiality is an important but subjective determination of a control's precision. It is equally important that there is an appropriate process to follow-up on any exceptions or unusual items noted from the review, including tracking open items for timely resolution and determining that responses are appropriate and supported as necessary.

For example, a control that investigates items that are near the selected materiality has less precision and a greater risk of failing to prevent or detect misstatements that could be material than a control that investigates items that are smaller relative to materiality.

Review-type controls require the reviewer to make significant judgements when determining what requires further investigation. Accordingly, when evaluating the design of a review-type control the auditor considers the risk of implicit or explicit bias in the reviewer's judgements in identifying a deviation or difference for investigation and follow-up. The auditor may also need to consider whether there are other controls that operate in conjunction with the review-type control that specifically address or mitigate the potential for bias (e.g., further review and challenge by others).

IG 11.11 Dependency on other controls or information

If the control is dependent upon other controls (e.g., the effective operation of general IT controls) or IPE, the design of the control cannot be concluded upon without also considering the effectiveness of the other control(s) or the accuracy and completeness of the IPE. When evaluating the design of a control that is dependent on IPE, the auditor should identify and test the effectiveness of relevant controls that address the accuracy and completeness of the IPE that the controls is dependent upon.

Testing design effectiveness

IG 11.12 The purpose of a test of design of a relevant control is to obtain a sufficient understanding of each control (and the related risk that the control addresses) to:

- Conclude on the effectiveness of its design to address the risk.
- Plan the nature, timing, and extent of the tests of operating effectiveness of the control.

A "test of design" of a relevant control includes inquiry of personnel involved in the performance of the control, supplemented by a mix of observation of how the control is performed (e.g., demonstration by entity personnel to the auditor what they do) and inspection of the relevant documentation related to the performance of the control (which may include either IPE used in the performance of the control or documentation resulting from the performance of the control). The test of design of a relevant control confirms the auditor's understanding of the controls (e.g., the detailed control description) and provides the basis to evaluate whether the controls are designed effectively (i.e., the auditor determines whether each risk is appropriately mitigated by the controls as designed).

IG 12 Internal Financial Controls–Walk Through(Refer Paragraph 103, 104, 108, 109)

Performing walkthroughs

IG 12.1 Walkthroughs are not required by the auditing standards; however, they are often an efficient means to:

- Obtain or update understanding of the entity's flow of transactions.
- Identify controls that are relevant to the audit and gain an understanding (evaluate design and implementation) of those controls.

IG 12.2 In some instances, when the auditor is testing controls, the walkthrough procedures may be used to obtain evidence about the operating effectiveness of a control.

IG 12.3 The term "walkthrough," while not specifically defined, refers to (1) the following of a transaction through the entity's process and (2) the procedures the auditor might perform to validate the points in the process at which a material misstatement could occur and identify controls that may be relevant to the audit.

IG 12.4 In performing a walkthrough, the auditor generally follows a single transaction from its origination through the procedures or steps in the process to the transaction's ultimate recording in the general ledger. Following the transaction through the procedures or steps in the process helps validate the auditor's understanding of how transactions are initiated, authorised, recorded, processed, and recorded. The procedures or steps addressed in the walkthrough would correspond to those in the process narratives or the narratives combined with process flow diagrams.

IG 12.5 It is important to differentiate between a step in the process and a control. A process describes the action of taking a transaction or event through an established and usually routine set of procedures or steps. A control is an action or activity taken to prevent or detect misstatements within the process. The following is the description and examples of control activities:

IG 12.6 Control activities are the policies and procedures that help ensure that management directives are carried out. Control activities, whether within IT or manual systems, have various objectives and are applied at various organisational and functional levels. Examples of specific control activities include those relating to the following:

- Authorisation;
- Performance reviews;
- Information processing;
- Physical controls;
- Segregation of duties.

IG 12.7 To perform a walkthrough, the auditor would generally:

- Select a single transaction and trace it through the procedures or steps in the process, and the relevant control activities, from initiation to recording in the general ledger. The

III.624 Auditing Pronouncements

walkthrough would generally begin with the original source document for a selected transaction (e.g., a revenue walkthrough might begin with a sales order, rather than the sales invoice).

- Make inquiries of the individuals who perform the procedures or steps in the process.

IG 12.8 As a result, for the relevant controls within the process, the auditor would corroborate his or her inquiries of individuals who perform the controls with additional procedures, such as inspection of relevant documents or accounting records used by entity personnel in performing the control and/or observation of individuals performing the control.

Extent of a walkthrough

IG 12.9 Just as the extent of the auditor's understanding of the entity's processes is a matter of professional judgement, so too is the extent of the walkthroughs.

IG 12.10 In a first year audit, the auditor might perform walkthroughs of all of the entity's processes related to significant accounts and disclosures. In subsequent years, the extent of walkthroughs may be again evaluated, especially for non-complex processes. However, in those situations, the auditor's understanding of the process still needs to be accurate and complete and reflect any significant changes since the prior audit, because those changes might result in changes to his or her identification and assessment of risks of material misstatement and identification of relevant controls.

For example, when performing a walkthrough in a continuing audit, rather than walk through every step in the process, the auditor may instead focus inquiries on identifying any significant changes in the process or on validating that no significant changes have occurred.

For example, the auditor might inquire as to whether there have been any changes to the information and reports used in the process, changes to IT applications, or changes in the way entity personnel perform the steps in the process. [Note that inquiries are often used to obtain or update understanding of the steps in a process; however, for purposes of evaluating design and implementation of relevant controls in the process, inquiry alone is not appropriate and the auditor would corroborate his or her inquiries with other risk assessment procedures, such as inspection and observation.]

IG 12.11 Regardless of the approach the auditor takes to update his or her understanding of the process and relevant controls, he or she should evaluate the design and implementation of relevant controls in every audit by performing procedures in addition to inquiry.

Note: Walkthroughs usually consist of a combination of inquiry of appropriate personnel, observation of the company's operations, inspection of relevant documentation, and re-performance of the control and might provide sufficient evidence of operating effectiveness, depending on the risk associated with the control being tested, the specific procedures performed as part of the walkthrough and the results of those procedures.

IG 13 Internal Financial Controls – Testing of Operative Effectiveness (Refer Paragraph 110 - 111)

IG 13.1 This Section provides an overview of testing the operating effectiveness of relevant controls. When testing the operating effectiveness of a control, the auditor obtains evidence about whether it is operating as designed.

IG 13.2 If a control is not designed properly, it cannot operate effectively; therefore, there is no need to test the operating effectiveness of controls that are improperly designed.

IG 13.3 The auditor should test the operating effectiveness of a control by determining whether the control is operating as designed and whether the person performing the control possesses the necessary authority and competence to perform the control effectively.

IG 13.4 If the control does not operate effectively (e.g., the auditor is unable to obtain sufficiently persuasive evidence that the control is operating as designed), then it is a “deficiency in operating effectiveness.”

IG 13.5 A deficiency in internal financial controls exists when the operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A deficiency in operation exists when a properly designed control does not operate as designed, or the person performing the control does not possess the necessary authority or competence to perform the control effectively.

Process flow for testing operative effectiveness of controls

IG 13.6 This process flow illustrates the steps applicable to testing the operating effectiveness of a control. It is applied for each relevant control for which the auditor is required, or for which the auditor elects, to test operating effectiveness. Applying each of these steps requires professional judgement.

Assess the risks associated with the controls

IG 13.7 When the auditor has determined that it is necessary to test the operating effectiveness of a control, both for purposes of reporting on internal financial controls and when relying on the operating effectiveness of the control to reduce the extent of substantive procedures for purposes of the financial statement audit, he or she considers the risk associated with the control. The risk associated with the control is the risk that the control might not be effective. The assessment of risk associated with the control determines the persuasiveness of the evidence to be obtained about

III.626 Auditing Pronouncements

the effectiveness of the control. The auditor should assess the risk associated with the control as either “higher” or “not higher” and use this assessment to plan the nature, timing, and extent of the testing of each control.

IG 13.8 For each control selected for testing, the evidence necessary to persuade the auditor that the control is effective depends upon the risk associated with the control. The risk associated with a control consists of the risk that the control might not be effective and, if not effective, the risk that a significant deficiency or material weakness would result. As the risk associated with the control being tested increases, the evidence that the auditor should obtain also increases.

Factors considered when assessing the risk associated with the control

IG 13.9 Factors that affect the risk associated with a control include:

- The nature and materiality of misstatements that the control is intended to prevent or detect;
- The inherent risk associated with the related account(s) and assertion(s);
- Whether there have been changes in the volume or nature of transactions that might adversely affect control design or operating effectiveness;
- Whether the account has a history of errors;
- The effectiveness of entity-level controls, especially controls that monitor other controls;
- The nature of the control and the frequency with which it operates;
- The degree to which the control relies on the effectiveness of other controls (e.g., the control environment or information technology general controls);
- The competence of the personnel who perform the control or monitor its performance and whether there have been changes in key personnel who perform the control or monitor its performance;
- Whether the control relies on performance by an individual or is automated (i.e., an automated control would generally be expected to be lower risk if relevant information technology general controls are effective); and

Note: A less complex company or business unit with simple business processes and centralised accounting operations might have relatively simple information systems that make greater use of off-the-shelf packaged software without modification. In the areas in which off-the-shelf software is used, the auditor's testing of information technology controls might focus on the application controls built into the pre-packaged software that management relies on to achieve its control objectives and the IT general controls that are important to the effective operation of those application controls.

- The complexity of the control and the significance of the judgements that must be made in connection with its operation.

Note: Generally, a conclusion that a control is not operating effectively can be supported by less evidence than is necessary to support a conclusion that a control is operating effectively.

Some of these factors relate to the risks of material misstatement that the control addresses, while others relate directly to the characteristics of the control itself. Therefore, it may be helpful to consider the factors in those two groups.

Factors related to the risks of material misstatement the control addresses

IG 13.10 The inherent risk associated with the risk of material misstatement

For example, controls that address risks of material misstatement that the auditor classifies as a significant risk have a higher risk associated with them, because determining the effective operation of such controls is more important due to the significance of the risks of material misstatement they address.

IG 13.11 The nature and materiality of misstatements that the control is intended to prevent or detect

For example, controls that address risks of material misstatement for accounts with smaller rupee values and routine transactions would typically have a lower risk associated with them than controls that address accounts with large transactions that occur on a non-routine basis.

IG 13.12 Whether there have been changes in the volume or nature of transactions that might adversely affect the controls design or operating effectiveness

For example, a significant increase in sales volume may stress the capacity of the manual controls that address the sales account, which likely increases the risk associated with such manual controls.

IG 13.13 Whether the account has a history of errors

For example, errors in an account are indicators that relevant controls that address the risks of material misstatement relating to such an account may not be operating effectively, which likely increases the risk associated with such controls.

Factors related to the characteristics of the control activity

IG 13.14 The complexity of the control and the significance of the judgements that must be made in connection with its operation

For example, controls that operate routinely, with little subjectivity, at the transaction level typically have lower risk associated with them as contrasted to highly subjective review-type controls that are complex because of the subject matter they address and the significant judgements involved (including the possibility for implicit or explicit bias in the reviewer's judgements in identifying deviations or differences for investigation and follow-up.)

IG 13.15 The effectiveness of entity-level controls, especially controls that monitor other controls

For example, if an entity effectively monitors the periodic preparation of account reconciliations throughout the year, the risk associated with the control may be lower.

IG 13.16 The nature of the control and the frequency with which it operates

For example, the auditor may assess the risk associated with controls that operate more frequently as lower than those that operate only on an ad hoc basis (e.g., controls related to accounting for an acquisition or a divestiture, when the entity enters into such transactions on an infrequent basis, may have a higher risk associated with them than other controls that operate more frequently and on a routine basis).

IG 13.17 The degree to which the control relies on the effectiveness of other controls (e.g., the control environment or GITCs)

For example, automated controls depend upon the effectiveness of general IT Controls, and if such general IT controls are determined to be ineffective, the risk associated with the automated controls is likely to be higher.

IG 13.18 The competence of the personnel who perform the control or monitor its performance and whether there have been changes in key personnel who perform the control or monitor its performance

For example, if a new assistant controller is performing a control for the first time or if the person performing the control has not been trained either in how to perform the control or in the subject matter to which it pertains, there may be a higher risk associated with the control, as there is greater likelihood the control might not be performed appropriately, particularly as the complexity of the subject matter of the control increases (e.g., financial instruments).

IG 13.19 Whether the control relies on performance by an individual or is automated

For example, an automated control generally would be expected to have a lower risk associated with it when general IT controls (e.g., program change controls and security access controls) are effective.

IG 13.20 Although all of the factors listed above are potentially relevant when assessing the risk associated with a particular control, the auditor's consideration could begin with the inherent risk (i.e., whether or not the control addresses a significant risk of material misstatement) and the consideration of the complexity of the control and the significance of the judgements that must be made in connection with its operation will, in most cases, provide a sound foundation for consideration of the other factors.

For example, a control that comprises a three-way match (i.e., a control whereby invoices are matched to a valid purchase order and an approved packing slip or receiver) generally is not complex and requires minimal judgement in its operation, even if it is performed manually. Alternatively, a review-type control related to an asset impairment analysis performed by an impairment committee will be much more likely to have a higher risk associated with it, because much more can go wrong with the review of an asset impairment due to the complexity and significant judgements that are likely to be involved in the operation of the review. Accordingly the nature, timing, and extent of operating effectiveness tests for the three-way match and the review-type control will likely be different in order to respond to each of these controls' assessment of the risk that the control might not be effective.

Plan the nature, timing, and extent of tests of operating effectiveness of controls

IG 13.21 When the auditor plans the nature, timing, and extent of substantive tests, he or she designs substantive tests that address the risks of material misstatement. When the auditor plans the nature, timing and extent of tests of operating effectiveness of a relevant control that addresses one or more risks of material misstatement, he or she should design tests to address the risk associated with the control.

IG 13.22 As the risk associated with the control increases, the auditor may do one or more of the following:

- Increase the persuasiveness of the nature of the audit evidence that will be obtained from the tests (e.g., utilise a combination of procedure types or perform more persuasive procedures),
- Increase the extent of testing,
- Perform procedures closer to the balance sheet or obtain more persuasive evidence of the operation of the control during the roll forward period,
- Identify and test other redundant controls, and
- Perform the procedures themselves rather than using the work of others.

IG 13.23 The planning for tests of operating effectiveness begins with the detailed description of the control procedure [i.e., the details of how the control is performed (e.g., who, what, and when)] to determine which characteristics of each control need to be tested.

IG 13.24 When the auditor tests the design effectiveness of the control, he or she concludes whether the control procedure as documented is designed effectively. Testing operating effectiveness simply means testing to determine whether the control procedure was performed properly (i.e., whether all of the important steps or characteristics identified in the detailed control description, in fact, operated as designed or intended, and for the period of intended reliance).

IG 13.25 The characteristics of the control that the auditor considers when planning and performing tests of operating effectiveness also include IPE. In the case of tests of operating effectiveness of controls, IPE may include:

- IPE that a control is dependent upon: The auditor obtains evidence that such IPE is sufficiently reliable throughout the period of intended reliance.
- IPE that the auditor uses in tests of operating effectiveness of relevant controls: The auditor may obtain information to use in performing tests of certain controls, such as reports on system settings (e.g., access, profiles, passwords) or reports used to define

III.630 Auditing Pronouncements

the population of interest (e.g., a list of program changes). The auditor also performs procedures to test the accuracy and completeness of such IPE since the integrity of the tests of operating effectiveness of the relevant controls depends on the accuracy and completeness of that information.

IG 13.26 In addition to considering the risk associated with the control when planning the nature, timing, and extent of the operating effectiveness testing, the auditor also considers the requirement to introduce an element of unpredictability into the testing each year.

Nature of procedures

IG 13.27 Planning the nature of the operating effectiveness tests that the auditor is going to perform depends on two considerations:

(1) The risk associated with the control

The assessment of risk associated with the control influences the persuasiveness of the evidence that the auditor needs to obtain to support a conclusion that the control is operating effectively. Certain procedures will, by their nature, provide more persuasive evidence than other procedures. Inquiry alone will not provide sufficient appropriate audit evidence to conclude that a control is operating effectively. Depending on the auditor's assessment of the risk associated with the control and the nature of the control, auditor therefore performs other audit procedures in combination with inquiry, including observation, inspection of documentation, or re-performance of the control.

(2) The availability of evidence

When determining the nature of the procedures the auditor plans to perform, it is important to select procedures that will provide evidence that the control procedure operated as designed (i.e., address each of the important steps or characteristics of the control identified in the detailed control description). Obtaining evidence for only a portion of the control procedure (e.g., limiting tests of operating effectiveness to one step of the procedure, such as evidence of a sign-off) will often be insufficient evidence that the control operated as designed. Obtaining evidence of one step of the procedure (e.g., the sign-off) does not, in most cases, provide evidence of other relevant characteristics, including who performed the control and how it was performed (e.g., what the person performing the control analysed, reviewed, or did in support of his or her sign-off evidencing the completion of the control).

The reliability of evidence depends on the nature and source of the evidence and the circumstances under which it is obtained. For example, in general:

- Evidence obtained from a knowledgeable source that is independent of the company is more reliable than evidence obtained only from internal company sources.
- The reliability of information generated internally by the company is increased when the company's controls over that information are effective.
- Evidence obtained directly by the auditor is more reliable than evidence obtained indirectly.

- Evidence provided by original documents is more reliable than evidence provided by photocopies or facsimiles, or documents that have been filmed, digitised, or otherwise converted into electronic form, the reliability of which depends on the controls over the conversion and maintenance of those documents.

Because evidence of operating effectiveness may be obtained from various activities (e.g., performing walkthroughs, testing design, using the work of others, and the auditor's own operating effectiveness testing), it is also important to clearly identify the nature of the evidence that the auditor plans to obtain and the location of that evidence, or the description thereof, in the working papers on risk of material misstatement or other working papers.

Timing of tests of controls

IG 13.28 The timing of tests of controls is typically influenced by the following considerations:

(1) The period that is to be covered by the tests

This consideration includes balancing the need to obtain evidence throughout the period for control-reliance purposes with obtaining sufficiently persuasive evidence nearer to or at the balance-sheet date in support of the opinion on internal financial controls. These objectives may be summarised as follows.

- Evidence obtained to support the opinion on internal financial controls: The auditor obtains audit evidence of the operating effectiveness of relevant controls at the balance-sheet date. Testing performed closer to the balance sheet date provides more evidence than testing performed earlier in the year and testing controls over a greater period of time provides more evidence of the effectiveness of controls than would be provided by testing the controls over a shorter period of time.
- Evidence obtained to support a control reliance strategy: When relying on operating effectiveness of controls to reduce extent of substantive testing, the auditor obtains audit evidence of the operating effectiveness of the control for the period of intended reliance.

Prior to the period end, the entity might implement changes to their controls to make them more effective or efficient or to address control deficiencies. In that case, the auditor may consider how such changes affect reliance on controls for specific relevant assertions and the period of time in which the control was operating effectively. The auditor need not test the design and implementation and operating effectiveness of the superseded control for purposes of expressing an opinion on internal financial controls, however, he or she may decide to test the superseded control for purposes of relying on that control for specific relevant assertions over the period of time in which the control was effective.

(2) The risk associated with the control

The assessment of the risk associated with the control influences the timing of when the auditor obtains evidence. As the risk associated with the control increases, it may be more likely that the auditor will plan to test operating effectiveness without using roll forward procedures. Alternatively,

III.632 Auditing Pronouncements

if the auditor plans to use roll forward procedures, such procedures need to provide more persuasive evidence as the risk associated with the control increases.

(3) When the auditor chooses to perform the tests

The testing of the operating effectiveness of controls generally is performed after the control has operated. However, for some controls, it may be necessary to obtain the evidence when the control operates (or soon thereafter) as the evidence the auditor needs to perform the testing may not be accessible at a later date.

For example, the evidence of certain IT controls may exist only in the system. If the system is updated on a daily basis, the evidence may not be accessible after the control has operated. Similarly, a relevant control may comprise a meeting; if the auditor plans to obtain evidence of the operation of the control by attending the meeting, the auditor will not be able to obtain such evidence after the meeting has occurred.

The timing of the tests may also be affected by the frequency with which specific controls operate and specific policies are applied. Some controls operate continuously or many times a day (e.g., controls over sales transactions), while others operate only at certain times or at periodic intervals (e.g., controls over the preparation of monthly or quarterly financial statements and controls over physical inventory counts) or even only after the balance-sheet date (e.g., controls over the preparation of certain notes to financial statements disclosures). Evidence of the operation of a control that relates to a period subsequent to the balance-sheet or period-end date cannot be considered evidence of its operating effectiveness at the balance-sheet or period-end date unless the control is designed to operate only after the balance-sheet date or period-end.

For example, as controls over the March 31, 20X5 year-end financial close and reporting process only operate in April 20X5, the auditor may use the evidence of the controls operating in April 20X5 to conclude on operating effectiveness of such controls "as of" March 31, 20X5.

When the auditor chooses to test the operating effectiveness of controls as of an interim date, there are typically two alternative approaches he or she may consider:

- Apportion the control test over the year (i.e., spread the total number of selections throughout the year). Under this approach, the operating effectiveness result is determined only upon completion of the test at year-end. Performing testing in this manner provides the basis to support conclusions as to the effectiveness of the controls throughout the period of intended reliance and as of the balance-sheet date. As the testing is apportioned over the entire year, roll forward procedures are not necessary.

For example, for a test of a relevant control using a sample size of 25, the auditor may choose to perform a portion of the test at interim date by selecting 20 items over the first nine months and then selecting the 5 remaining items in the fourth quarter. The auditor cannot reach a conclusion on the operating effectiveness of the control at the interim date (September 30) since he or she did not test all 25 items; the auditor can only reach a conclusion on the operating effectiveness of the control when the testing

of all sample selections is complete at year-end. Since the sample covered the entire period, the auditor is not required to perform separate roll forward procedures.

- Perform a complete test of the control (i.e., test all selections) at an interim date. This approach requires the auditor to perform sufficient testing to enable him or her to reach a preliminary conclusion regarding the operating effectiveness of the control tested at the interim date. Under this approach, additional procedures are required to be performed to assess the operating effectiveness of the control during the roll forward period or the balance-sheet date. The earlier in the year the interim tests are performed, the more persuasive the roll forward procedures will likely need to be, particularly when the risk associated with the control is higher.

For example, for a test of a relevant control using a sample size of 25, the auditor may choose to perform the entire test at interim date by selecting 25 items over the first nine months. Therefore, the auditor can reach a conclusion on the operating effectiveness of the control at the interim date (September 30) since the auditor tested all 25 items; however, the auditor needs to perform separate roll forward procedures to determine whether the control continues to be effective through the fourth quarter and near to or at the balance sheet date.

Extent of procedures

IG 13.29 Matters that may affect the necessary extent of testing of a control in relation to the degree of reliance on a control, in addition to the risk associated with the control, include the following factors:

- The frequency of the performance of the control by the entity during the audit period.
- The length of time during the audit period that the auditor is relying on the operating effectiveness of the control.
- The expected rate of deviation from a control: Typically, for testing efficiency purposes, the auditor does not plan for deviations when designing the tests.
- The relevance and reliability of the audit evidence to be obtained regarding the operating effectiveness of the control: When the evidence the auditor plans to obtain is less persuasive (e.g., observing a control operate), the auditor may consider increasing the sample size.
- The extent to which audit evidence is obtained from tests of other controls related to the assertion: This may relate to the evidence the auditor has about the effectiveness of other controls that monitor the control the auditor is testing, which may in turn provide a basis for lowering the assessment of risk associated with the control such that a lower extent of testing may be appropriate.
- The nature of the control, including, in particular, whether it is a manual control or an automated control: Automated controls are by nature more reliable than a manual control; however, their reliability depends on effective general IT controls — see next factor.

III.634 Auditing Pronouncements

- For an automated control, the effectiveness of relevant general IT controls: A reduced level of testing of an automated control is appropriate when effective general IT controls operate throughout the period of reliance. General IT controls help ensure the continued proper operation of information systems and support the effective functioning of application controls, including the automated controls. If general IT controls are not effective, then it is generally necessary to test the automated control at or near the balance-sheet date in support of the opinion on internal financial controls. However, even when effective general IT controls exist, automated controls are retested when changes are made to the control during the period in order to validate that the change was made appropriately and to test the control's effectiveness. Testing and relying solely on program change controls generally would not constitute direct evidence of the effectiveness of an automated control that had been changed.
- Higher risk associated with the control (including any control that addresses a significant risk).
- When one or more exceptions are identified that clearly indicate that the control is not operating effectively, it is generally not necessary to complete the test.

Dual-purpose tests

IG 13.30 In some situations, the auditor might perform a substantive test of a transaction concurrently with a test of a control relevant to that transaction (a "dual purpose test").

Typically, dual-purpose testing means that two tests, with different purposes and objectives, are planned to be performed concurrently and there may or may not be some level of "overlap."

For example, a substantive test of fixed-asset additions has the primary purpose of assessing whether the transaction selected for testing has been properly recorded in accordance with GAAP to validate occurrence, accuracy, and cut-off. The operating effectiveness test of relevant controls over fixed asset additions has the primary purpose of assessing whether the control(s) operated as designed which may include testing procedures or characteristics such as:

- i) Evidence of authorisation.
- ii) Review of the proper recording for occurrence, accuracy, and cut-off.
- iii) Process for follow up on exceptions.

Performing the substantive test may also include reperforming the review control (ii) but would likely not address control characteristics (i) or (iii).

There are two main objectives when using dual-purpose tests for control purposes:

Objective 1: The test directly provides evidence that the control procedure operated (i.e., it addresses the important steps and characteristics identified in the detailed control description).

Objective 2: The test is contemplated and documented as a dual-purpose test when the work was planned and performed, not after the fact, such that the documentation clearly demonstrates how the combined test addresses both the substantive test and internal control test objectives.

Auditor's planning to use dual-purpose testing are advised to carefully consider whether a single test results in obtaining sufficient appropriate audit evidence for both the intended substantive test and the control test or whether it would be more appropriate to design and apply separate procedures to the same sample selections that more specifically meet the applicable objectives of the substantive test and the control test. Also, the performance of substantive tests that results in no misstatements being identified does not provide sufficient evidence of the effectiveness of related controls. However, the identification of misstatements during the performance of substantive tests may indicate that related controls are not effective.

In certain situations, the auditor should design the dual-purpose test to achieve the objectives of both the test of the control and the substantive test. Also, when performing a dual-purpose test, the auditor should evaluate the results of the test in forming conclusions about both the assertion and the effectiveness of the control being tested.

Perform tests of operating effectiveness of controls

IG 13.31 Considerations when performing tests of operating effectiveness include:

- Clearly defining the test objective, including establishing a clear understanding of what constitutes a deviation.
- Identifying the population to be sampled.
- Selecting the sample such that all items in the population have a chance of selection.
- Obtaining sufficient and appropriate audit evidence, including related to IPE upon which the control is dependent.
- Applying professional scepticism when evaluating the persuasiveness of the evidence obtained, including what constitutes a deviation or exception.

As estimates are based on subjective as well as objective factors, it may be difficult for management to establish controls over them. Even when management's estimation process involves competent personnel using relevant and reliable data, there is potential for bias in the subjective factors. Accordingly, when planning and performing procedures to evaluate accounting estimates the auditor should consider, with an attitude of professional scepticism, both the subjective and objective factors.

The auditor considers the risk associated with the control when assigning personnel to perform testing (e.g., generally more experienced personnel may be assigned to test the more complex controls with significant judgements, while less experienced personnel may assist with performance of tests of less complex controls). Review of tests of controls (i.e., detailed, primary, overriding) is performed by team members who have sufficient knowledge of the entity's controls and risks to properly assess the planning and performance of the tests of controls, as well as the sufficiency of audit evidence to support the conclusions reached.

Testing review-type controls

IG 13.32 The auditor should assess the risk associated with review-type controls, whether performed by individuals or groups, as higher due to the subjectivity and complexity of such controls. Usually, the level of aggregation and the criteria for investigation are important characteristics of these types of controls. In addition, these controls are often dependent upon other controls or IPE. Accordingly, the testing for review-type controls would typically include a combination of procedures, such as:

- Inquiry of the persons involved in the performance of the control, including persons to whom questions are directed.
- Inspection of the reports and documents used in performing the control.
- Inspection of documentary evidence of conclusions reached and follow-up actions taken.
- Observation of meetings in which the control is performed.
- Re-performance of the review.

IG 13.33 Documentation associated with these controls often includes items such as meeting preparation materials, invitations sent to attendees, correspondence about issues discussed, and documentation of follow-up actions. However, such documentation commonly does not include descriptions of the discussions that are sufficient for the auditor to obtain evidence about the substance and completeness of the discussions and thought processes that led to the conclusions reached in the meeting (e.g., inquiry of participants and examination of calendars indicating that a meeting was held will not be sufficient evidence about the nature and effectiveness of the activities performed in the meeting).

Accordingly, observation of these meetings may be an important means of testing the effectiveness of the actual activities undertaken in the meeting. When observation is not possible (e.g., a meeting involving management's discussion with counsel regarding the reserve for legal matters), inspection of documentation evidencing that the important characteristics of the control were performed, if available, or re-performance of the control often are necessary to obtain sufficient persuasive evidence.

For example, a review-type control whereby the monthly financial results are discussed and differences are investigated has been identified as a relevant control for certain accounts that are stable and predictable. Inspecting evidence that the meeting occurred is generally not sufficient evidence to determine to what extent the other important characteristics of the control operated at the meeting, such as evidence of (1) the purpose of the control (operationally focused versus financial-reporting focused), (2) the depth of the discussion at an appropriate level of disaggregation, and (3) the criteria for investigation and the nature of items questioned, including the follow-up process.

IG 13.34 Evidence of matters identified for follow-up and their resolution often provides additional evidence of the performance of the review control. Inquiry of the persons performing the control in addition to documentation of such findings and follow-up will increase the reliability of the audit

evidence, while incomplete or altogether lacking documentation will diminish the reliability of audit evidence.

Accordingly, it may be useful to encourage management to retain documentation of reviews (e.g., notes, drafts, e-mails), including establishing a process for tracking matters identified for follow-up. In situations where there were no matters for follow-up, other procedures, such as observation, may be necessary to obtain sufficient evidence of effectiveness. It may be necessary to reconsider the effectiveness of a review-type control that seldom, if ever, identifies matters for follow-up, as this may be an indication that the control is not operating effectively or is not suitably designed to prevent or detect material misstatements.

IG 14 Sampling in Tests of Controls (Refer Paragraph 120)

IG 14.1 The auditor should test the operating effectiveness of a control by determining whether the control is operating as designed and whether the person performing the control possesses the necessary authority and competence to perform the control effectively.

Note: In some situations, particularly in smaller companies, a company might use a third party to provide assistance with certain financial reporting functions. When assessing the competence of personnel responsible for a company's financial reporting and associated controls, the auditor may take into account the combined competence of company personnel and other parties that assist with functions related to financial reporting.

IG 14.2 Procedures the auditor performs to test operating effectiveness include a mix of inquiry of appropriate personnel, observation of the company's operations, inspection of relevant documentation, and re-performance of the control.

IG 14.3 When planning a particular audit sample for a test of controls, the auditor should consider:

- The relationship of the sample to the objective of the test of controls.
- The maximum rate of deviations from prescribed controls that would support the planned assessed level of control risk.
- The auditor's allowable risk of assessing control risk too low.
- Characteristics of the population, that is, the items comprising the account balance or class of transactions of interest.

IG 14.4 For many tests of controls, sampling does not apply. Procedures performed to obtain an understanding of internal control sufficient to plan an audit do not involve sampling. Sampling generally is not applicable to tests of controls that depend primarily on appropriate segregation of duties or that otherwise provide no documentary evidence of performance. In addition, sampling may not apply to tests of certain documented controls. Sampling may not apply to tests directed toward obtaining evidence about the design or operation of the control environment or the accounting system. For example, inquiry or observation of explanation of variances from budgets when the auditor does not desire to estimate the rate of deviation from the prescribed control.

IG 14.5 When designing samples for tests of controls the auditor ordinarily should plan to evaluate operating effectiveness in terms of deviations from prescribed controls, as to either the rate of such deviations or the monetary amount of the related transactions. In this context, pertinent controls are

III.638 Auditing Pronouncements

ones that, had they not been included in the design of internal control would have adversely affected the auditor's planned assessed level of control risk. The auditor's overall assessment of control risk for a particular assertion involves combining judgements about the prescribed controls, the deviations from prescribed controls, and the degree of assurance provided by the sample and other tests of controls.

IG 14.6 The auditor should determine the maximum rate of deviations from the prescribed control that he or she would be willing to accept without altering his planned assessed level of control risk. This is the tolerable rate. In determining the tolerable rate, the auditor should consider (a) the planned assessed level of control risk, and (b) the degree of assurance desired by the evidential matter in the sample. For example, if the auditor plans to assess control risk at a low level, and desires a high degree of assurance from the evidential matter provided by the sample for tests of controls (i.e., not perform other tests of controls for the assertion), he or she might decide that a tolerable rate of 5 percent or possibly less would be reasonable. If the auditor either plans to assess control risk at a higher level, or desires assurance from other tests of controls along with that provided by the sample (such as inquiries of appropriate entity personnel or observation of the application of the policy or procedure), the auditor might decide that a tolerable rate of 10 percent or more is reasonable.

IG 14.7 In assessing the tolerable rate of deviations, the auditor should consider that, while deviations from pertinent controls increase the risk of material misstatements in the accounting records, such deviations do not necessarily result in misstatements. For example, a recorded disbursement that does not show evidence of required approval may nevertheless be a transaction that is properly authorised and recorded. Deviations would result in misstatements in the accounting records only if the deviations and the misstatements occurred on the same transactions. Deviations from pertinent controls at a given rate ordinarily would be expected to result in misstatements at a lower rate.

IG 14.8 In some situations, the risk of material misstatement for an assertion may be related to a combination of controls. If a combination of two or more controls is necessary to affect the risk of material misstatement for an assertion, those controls should be regarded as a single procedure, and deviations from any controls in combination should be evaluated on that basis.

IG 14.9 Samples taken to test the operating effectiveness of controls are intended to provide a basis for the auditor to conclude whether the controls are being applied as prescribed. When the degree of assurance desired by the evidential matter in the sample is high, the auditor should allow for a low level of sampling risk (that is, the risk of assessing control risk too low).

IG 14.10 To determine the number of items to be selected for a particular sample for a test of controls, the auditor should consider the tolerable rate of deviation from the controls being tested, the likely rate of deviations, and the allowable risk of assessing control risk too low. When circumstances are similar, the effect on sample size of those factors should be similar regardless of whether a statistical or non-statistical approach is used. Thus, when a non-statistical sampling approach is applied properly, the resulting sample size ordinarily will be comparable to, or larger than, the sample size resulting from an efficient and effectively designed statistical sample.

The auditor may also apply the provisions of Standard on Internal Audit (SIA) 5 on “Sampling” and the sample sizes indicated in Appendix 4 of the above Standard. Refer the full text of SIA 5 in **Appendix VI** to this Guidance Note.

Sample selection

IG 14.11 Sample items should be selected from the appropriate population that is representative of the risk being tested. For example, a risk that sales may not be recorded for all goods despatched (relevant to the assertion ‘completeness’) should be tested based on the population of despatch documents and not from the population of recorded sales. Similarly for testing the risk of sales being recorded without corresponding despatch of goods (relevant to the assertions ‘existence’ and ‘cut off’), the sample should be selected from the recorded population of sales. Sample items should be selected in such a way that the sample can be expected to be representative of the population. Therefore, all items in the population should have an opportunity to be selected. Random-based selection of items represents one means of obtaining such samples. Ideally, the auditor should use a selection method that has the potential for selecting items from the entire period under audit.

Assess findings and conclude on the operating effectiveness of controls

IG 14.12 Considerations when assessing findings and concluding on the operating effectiveness of controls include:

- Determining whether a deviation is identified.
- Determining the nature and cause of the deviation(s).
- Evaluating whether the deviation is a control deficiency.

IG 14.13 When the auditor identifies a deviation (or exception), he or she should consider the circumstances and reasons for the deviation and evaluate the effect of the deviation to determine whether:

- The tests of controls that have been performed provide an appropriate basis for reliance on the controls (e.g., the deviation is not a deficiency);
- To obtain additional evidence to obtain a better estimate of the projected deviation rate to determine if the deviation is a deficiency (e.g., the auditor may consider increasing sample sizes which, since a deviation was identified, would include considering whether to increase the risk associated with the control); or
- The deviation is a deficiency and in the absence of other redundant or compensating controls, the potential risks of misstatement need to be addressed using substantive procedures (e.g. the control is not effective and thus control reliance is not appropriate).

Determining whether a deviation exists

IG 14.14 In designing an audit sample to test controls, the auditor defines the objective of the audit procedure (i.e., the test objective) and the characteristics of the population from which the sample will be drawn. The determination of the objective of a test of a control includes a clear understanding of what constitutes a deviation so that all, and only, those deviations that are relevant to the purpose of the test are included in the evaluation of deviations.

IG 14.15 Generally, any failure in the operation of a control from (1) established policy and procedure, (2) a regulatory requirement or (3) the expectation of the operation based on peer or industry comparison is likely a deviation (which is then further evaluated as described below). Examples of instances in which a failure in the operation of a control may not be a deviation may include the following circumstances:

- When the control operates effectively in mitigating the risk, even though the control does not operate completely in accordance with the prescribed procedure (e.g., an authorisation form was not properly completed and signed off, but there is other evidence that clearly reflects the transaction was authorised).
- When the departure from policy or procedure is authorised by the appropriate level of management based on particular circumstances (e.g., in an employee's absence, the normal control process was not followed; however, management is aware of this and has compensated for it).
- If a document is selected that has been validly cancelled prior to operation of the control (i.e., the document does not constitute a deviation), it may be excluded from the sample and an appropriately chosen replacement may be examined. However, if the deviation relates to a document that cannot be located, the auditor makes every possible effort to locate it or to ascertain, using suitable alternative procedures that the control in this specific instance was operating properly. If evidence supporting operation of the control for the selected sampling unit is not available, another sampling unit cannot be substituted for the missing unit and it is generally necessary to treat this item as a deviation from the prescribed control.

Determining the nature and cause of the deviation

IG 14.16 When investigating the nature and cause of a deviation, the auditor may consider the following questions:

- Is the nature of the deviation limited to certain types of transactions (e.g., infrequent exceptions as opposed to the norm)? The auditor should consider the nature and volume of the exceptions that may be subject to other deviations.
- Has a change in roles or responsibilities of the person performing or monitoring the control contributed to the deviation? The auditor should consider the significance and breadth of the role and responsibility of the new person and the likelihood that other deviations in other controls operated by the new person could exist.

- Has a lack of competency of the person performing the control contributed to the deviation? The auditor should consider the significance and breadth of the role and responsibility of the person for which other deviations could exist.
- Was management aware of the circumstances causing the deviation? A deviation that management is not aware of and not monitoring may result in an increased likelihood that other deviations will occur.
- Have changes in volume of activity or transactions (e.g., significant seasonal fluctuations) contributed to the deviation? A deviation during a limited period of heavy volume may not be indicative of what might more typically occur during normal volume periods.

Evaluate whether the deviation is a control deficiency

IG 14.17 The concept of effectiveness of the operation of controls recognises that some deviations in the way controls are applied by the entity may occur. Deviations from prescribed controls may be caused by factors such as changes in key personnel, significant seasonal fluctuations in volume of transactions, and human error. Accordingly, it is acknowledged that a control could still be concluded to be effective, even when some level of deviation may exist. Because effective internal financial controls cannot, and does not, provide absolute assurance of achieving the company's control objectives, an individual control does not necessarily have to operate without any deviation to be considered effective.

IG 14.18 The following considerations are relevant when considering the level of "acceptable" deviations (i.e., such that a control deficiency does not exist):

- Risk associated with the control: The higher the risk, the more reliable the control needs to be.
- Extent of reliance on the control: When a risk of material misstatement is addressed solely by one control, the control generally needs to be more reliable, particularly when the risk being addressed is a significant risk.
- Testing approach: When the auditor tests the operating effectiveness of a control by sampling, the sample sizes are based on an acceptable tolerable deviation rate; therefore, when the auditor discovers more deviations than planned for, the test objective is generally not met. At this point the auditor cannot conclude the control is effective and therefore, the existence of deviations beyond what was planned for would generally represent a deficiency, in absence of performing additional testing. The auditor may then consider whether additional testing is necessary or appropriate. For controls that operate less frequently, given the small sample sizes, the auditor typically would not expand the sample size.

For example, if a test of a control that operates many times a day is designed to not allow for any deviations and the actual number of deviations is one or more, the test objective is generally not met. The auditor may either conclude that the control is not effective or may decide to increase the sample sizes to obtain a better estimate of the projected deviation rate, in which case, the auditor should also reconsider whether to increase the risk associated with the control.

III.642 Auditing Pronouncements

- If the auditor is able to test the entire population, he or she uses professional judgement to determine whether the actual deviation rate is indicative of a deficiency based on the risk associated with the control (e.g., an actual deviation rate up to 5 percent may be concluded to be acceptable).

For example, the auditor assessed the appropriateness of access privileges for all 300 system users and noted 3 exceptions. The auditor evaluated the exceptions qualitatively and noted no significant concerns as the 3 users' inappropriate access was limited to one application. As it is not expected that the control would operate without deviation, and as the actual rate of deviation in the entire population is quantified or known (3 out of 300, or 1percent), the auditor may conclude that the deviation rate is acceptable and not indicative of a deficiency.

- Nature of the control: Relevant points when considering the nature of the control include:
 - The relative importance of the deviations to the overall performance of the control (i.e., the deviation is related to only one of many characteristics or attributes tested when assessing the related control).

For example, review controls typically have multiple characteristics that need to be tested; therefore, testing of such controls may result in deviations related to certain characteristics and not others. Determining whether such controls are nevertheless effective, even if some level of deviation has been identified, requires significant professional judgement.
 - Whether misstatements have actually occurred.
 - Whether the deviation has a potential effect on the effectiveness of other controls.

IG 14.19 Based on the above considerations, deviations are evaluated and concluded upon to be either:

- Only a deviation and not a deficiency: In this case, no further consideration is necessary (this is expected to be rare, particularly when the auditor is using a sampling approach); or
- A deficiency: In this case, the deficiency is further evaluated to assess its severity and implications on the financial statements audit (i.e., risk assessment and control reliance strategy).

IG 15 Roll Forward Testing (Refer Paragraph 121)

IG 15.1 This Section highlights considerations when the auditor rolls-forward the conclusions of the effectiveness of those relevant controls which were tested and concluded to be effectiveness as at an interim date. The roll forward procedures to be performed and evidence to be obtained are based on the auditor's assessment of certain factors related to the risk that controls that have been tested as of an interim date will not continue to operate effectively during the roll forward period. The roll forward period (also sometimes referred to as the "remaining" period) is the period from the

date of the interim conclusion about the effectiveness of a control up to, and including, the balance sheet date for the report on internal financial controls.

IG 15.2 The auditor typically performs procedures to understand the likely sources of misstatements and conclude on design effectiveness at an interim date for many of the relevant controls. The roll forward procedures the auditor performs are focused on changes to the business or the entity's financial reporting that may give rise to a new risk or may affect an existing risk of material misstatement, which, in turn, would necessitate the entity's implementing new controls or modifying the design of existing controls.

IG 15.3 The auditor may also decide to perform tests of operating effectiveness of relevant controls at an interim date. Timing of tests of controls and the necessity of performing roll forward procedures to update conclusions about operating effectiveness of relevant controls depends on which testing approach the auditor applies:

- Apportion the test of operating effectiveness of a relevant control over the year, or
- Perform a complete test of the operating effectiveness of a relevant control (i.e., test all selections) at an interim date and conclude as to the effectiveness of the control as of the interim date.

IG 15.4 When the auditor apportions the control test over the year, he or she does not need to plan roll forward procedures because the testing plan will include selections up to or near the balance sheet date. However, when the auditor performs a complete test at an interim date, he or she has to perform procedures to roll forward those conclusions to the balance sheet date to support the opinion on the effectiveness of internal financial controls and to support reliance on controls for substantive purposes (i.e., to reduce the evidence the auditor needs to obtain from the substantive procedures).

IG 15.5 There are factors to be considered when making such determination. Because controls have different characteristics and operate with differing levels of reliability, these factors are considered for each relevant control to determine the persuasiveness of the evidence the auditor needs to obtain to conclude that a control continues to operate effectively through the balance sheet date (i.e., to support the opinion on the effectiveness of internal financial controls and to support the reliance on controls for substantive purposes). The auditor plans the nature, timing, and extent of the roll forward procedures for each relevant control (or groups of controls that possess similar characteristics) tested as of an interim date based on the consideration of the factors.

Key activities in the process for planning and performing procedures to roll forward conclusions of design and operating effectiveness

IG 15.6 Key activities for planning procedures to roll forward interim conclusions of design and operating effectiveness:

- Identify relevant controls which were tested (i.e., both design and operating effectiveness were tested) and concluded at interim date and therefore subject to roll forward procedures.

III.644 Auditing Pronouncements

- Consider management's ongoing monitoring processes and activities to identify changes that may give rise to new risks of material misstatement or modifications to existing risks, as well as new controls, or modifications to existing controls.
- Consider the evidence obtained by management during the roll forward period related to the controls that were tested at an interim date.
- Plan the nature, timing, and extent of the roll forward procedures.

IG 15.7 Key activities for performing procedures to roll forward interim conclusions of design and operating effectiveness:

- Perform procedures to determine whether there have been any significant changes to the business or the entity's financial reporting that would give rise to new or affect existing risks of material misstatement, which would necessitate the entity's implementing new controls or modifying the design of existing controls.
- Test the design and operating effectiveness of new or modified relevant controls.
- Obtain appropriate evidence of operating effectiveness that the controls tested at interim date continue to operate effectively for the roll forward period.
- Document the roll forward procedures performed, basis for professional judgements, and conclusions for each of the relevant controls.
- Log any deficiencies for classification as to severity and further evaluation of their impact on the risk assessment and audit of the financial statements.

Plan roll forward procedures

IG 15.8 Factors to consider when planning roll forward procedures:

The additional evidence that is necessary to roll forward the interim conclusion about the operating effectiveness of each relevant control tested as of an interim date is based on consideration of the factors as explained in more detail in the discussion that follows.

IG 15.9 The specific control tested prior to the balance sheet date, including the risk associated with the control and the nature of the control, and the results of the tests.

IG 15.10 The higher the risk associated with the control (which includes considerations related to the nature of the control and the results of tests of such control in prior years and the current year to date), the more persuasive the evidence the auditor needs to obtain from the roll forward procedures.

For example, the auditor would design more persuasive roll forward procedures for a control where he or she has assessed the risk associated with the control as "higher."

IG 15.11 The auditor may also need to obtain more persuasive evidence from the roll forward procedures when the risk associated with a control is assessed as "not higher."

For example, if the risk associated with a control related to a review-type control (or a more subjective control) in the revenue process has been assessed as "not higher," the auditor may nonetheless conclude that more persuasive evidence is needed during the roll forward period due to the subjectivity of the operation of the control. In contrast, the auditor may decide that he or she

needs less persuasive evidence for a routine control in the payroll process where the risk associated with the control is assessed as “not higher,” and the control has operated effectively in the past with no changes identified during the roll forward period that may affect the operation of the control.

IG 15.12 The sufficiency of the evidence of effectiveness obtained at an interim date

This factor means that the more persuasive the evidence that has been obtained to support conclusions reached at an interim date, the less persuasive the evidence that may be needed for the roll forward period.

For example, performing procedures such as inspection of documentation or re-performance may produce more persuasive evidence of the operating effectiveness of a relevant control at an interim date, and accordingly, the auditor may decide that procedures that produce less persuasive evidence (such as inquiry or observation) are appropriate for the roll forward period. However in certain circumstances (e.g., for controls where the risk associated with the control is higher), the auditor may decide that notwithstanding that more persuasive evidence was obtained as of the interim date, he or she would also need to obtain more persuasive evidence for the roll forward period.

IG 15.13 The length of the remaining period

As the length of the remaining period increases, the more persuasive the evidence that may be needed from the roll forward procedures (e.g., when the roll forward period exceeds three to four months) and the less likely that the auditor will be able to conclude that roll forward procedures that are comprised of inquiry alone are sufficient. Additionally, for certain controls (e.g., controls where the risk associated with the control is higher) for which the interim testing was completed within three to four months prior to the balance sheet date, performing additional roll forward procedures (i.e., beyond inquiries) may, nonetheless, be necessary.

IG 15.14 The possibility that there have been any significant changes in internal financial controls subsequent to the interim date

This factor is in the context of whether there are significant changes in the business during the roll forward period that could impact the operating effectiveness of the relevant controls that the auditor tested as of an interim date (e.g., changes in the person performing the control); in this case, more persuasive evidence may be necessary to determine that the controls continued to operate effectively during the roll forward period.

For example, subsequent to the interim testing, a new Controller is hired who had no previous experience with the entity or its processes and controls; however, given the nature of the role and the related responsibilities, this new person is responsible for the operation of certain relevant controls. The auditor would consider the nature of each of the controls for which the Controller is responsible, and determine whether more persuasive evidence of continued operating effectiveness during the roll forward period is necessary, given the Controller’s inexperience relative to the entity’s business and the controls (which may require retesting the controls), as they are equivalent to the implementation of “new controls.”

IG 15.15 The planned degree of reliance on the control

III.646 Auditing Pronouncements

This factor means that more persuasive evidence may be necessary from the roll forward procedures when (1) a relevant control is the only control mitigating a risk of material misstatement (i.e., as opposed to one of a combination of controls that might collectively address the risk) or (2) the auditor is relying on the control to reduce the extent of the substantive procedures (i.e., take a control reliance approach).

Planning the approach to roll forward procedures

IG 15.16 The auditor should assess each of the factors identified in paragraphs IG 15.8 to IG 15.15 above for each relevant control tested as of an interim date (or groups of controls that possess similar characteristics) to determine:

- Whether inquiry alone is sufficient evidence of the continuing operating effectiveness; or
- Whether additional procedures beyond inquiry alone are necessary and, if so, the auditor considers the nature, extent, and timing of those procedures.

IG 15.17 After determining whether inquiry alone is sufficient or whether additional procedures need to be performed, the auditor should then plan the nature, extent, and timing of the roll forward procedures. The following two examples of approaches to planning roll forward procedures are discussed below:

- When inquiry alone is sufficient evidence of the continuing operating effectiveness of relevant controls tested as of an interim date.
- When additional procedures beyond inquiry are necessary.

IG 15.18 When inquiry alone is sufficient evidence of the continuing operating effectiveness of relevant controls tested as of an interim date

There may be a portion of the controls tested as of interim dates (and for which the auditor needs to update the interim conclusions) where (1) the risk associated with the controls is assessed as “not higher” (e.g., the controls are routine in nature, typically operating many times a day and with a history of operating effectively) and (2) the roll forward period is sufficiently short (e.g., typically no more than three to four months). In this case, the auditor may determine that there is a sufficiently low risk that these controls will be ineffective during the roll forward period such that inquiry alone may provide sufficiently persuasive evidence.

For example, the auditor tested within three months before the balance sheet date certain payroll controls that operate routinely many times a day (risk associated with the controls is “not higher”). The auditor concluded that inquiry alone will be sufficiently persuasive to update the interim conclusions through the remaining period. However, as the length of the roll forward period increases (e.g., extending beyond three to four months prior to the balance sheet date), the more likely it will be necessary for the roll forward procedures to include additional procedures beyond inquiry.

IG 15.19 When additional procedures beyond inquiry are necessary

For those controls tested as of an interim date where the auditor has concluded that additional procedures beyond inquiry are necessary to roll forward the interim conclusions, he or she may consider segregating the controls as follows:

- a. For controls where the auditor has assessed risk associated with the control as “higher” (including controls that address significant risks), the auditor typically plans to perform more extensive additional procedures for each of these controls, given the higher risk associated with the control.

For example, a manual control related to complex revenue transactions, where the risk associated with the control has been assessed as “higher”, (due to the complexity and subjectivity of the judgements involved), was tested through the third quarter and found to be effective. The roll forward procedures consist of performing inquiries combined with appropriately extensive additional procedures (e.g., observation, inspection of documentation or re-performance).

- b. For controls where the auditor has assessed risk associated with the control as “not higher”, the auditor typically plans to perform less extensive additional procedures for each of these controls. It is generally not appropriate to only select a sample of these controls to test in the roll forward period and then extrapolate the results of that testing to the remaining population of controls not tested.

For example, 30 relevant controls for which the risk associated with the control has been assessed as not higher are tested six months prior to the balance sheet date. Given the length of the remaining period, inquiry alone was determined to provide insufficient evidence. Accordingly, the auditor plans to perform additional procedures, in addition to inquiry, to obtain evidence that each of the 30 controls continue to operate effectively during the roll forward period.

Alternatively, when management has effective ongoing monitoring activities that directly monitor the controls for which the auditor is seeking to obtain evidence during the roll forward period, the auditor may test the design and operating effectiveness of the monitoring controls, which may include selecting and testing a sample of the controls that he or she is rolling forward in order to provide evidence of the effectiveness of the monitoring controls.

Perform roll forward procedures

IG 15.20 The objective of the roll forward procedures is to identify whether (1) any changes to the business occurred that could give rise to new, or affect existing risks of material misstatement, which would necessitate implementing new controls or modifying the design of existing controls and (2) existing controls continue to operate effectively during the roll forward period. Accordingly, the procedures the auditor typically performs at this phase include a mix of inquiry, observation, inspection of documentation, and re-performance to obtain sufficient evidence to determine whether changes have occurred. The evidence the auditor seeks to gather generally consists of:

- Evidence from management’s ongoing monitoring and risk assessment processes to identify and manage change. If there have been changes that affect the design or operating effectiveness of a control, either manual or automated controls, during the

III.648 Auditing Pronouncements

roll forward period, the auditor is required to obtain audit evidence about the effectiveness of the new or modified control without giving consideration to the evidence the auditor had obtained before the change occurred.

- Evidence from the planned roll forward tests of operating effectiveness.
- The determination of sample sizes for roll forward procedures is a matter of judgement considering the factors mentioned above. The auditor may also consider using the work of others, when applicable and appropriate.
- Evidence from the other auditing procedures.

Documentation considerations in roll forward procedures

IG 15.21 The purpose of this Section is to provide auditors with documentation considerations relative to planning and performing roll forward procedures.

Considerations include:

- i) A description of the planned procedures that clearly describes the (a) nature, (b) timing, and (c) extent of roll forward procedures for each control, including procedures to test relevant IPE.
- ii) Assessment of monitoring controls that the auditor intends to test and rely upon, including the rationale for how the controls selected to corroborate the operating effectiveness of the monitoring controls were chosen, giving consideration to the different business processes and controls within the business process and how that sample is representative of the population.
- iii) The roll forward procedures performed and the evidence obtained, including:
 - A description of the procedures performed, including whether they were inquiry, observation, examination of documents, re-performance, or some combination. The documentation of inquiries includes (1) to whom the auditor made inquiries, (2) the specific inquiries made, and (3) the results of those inquiries.
 - When the interim testing of the controls was performed (e.g., the month or quarter).
 - Identification of and reference to testing of any IPE.
 - A statement that there were no exceptions or a clear description of any deviations noted.
- iv) The procedures, findings, and conclusions related to assessing findings and concluding on design and operating effectiveness, including:
 - A clear statement about whether the control is effectively designed and operated.
 - If auditor's conclusion is that the control is ineffective, consideration of the effect of the conclusion on tests of other controls that may depend on the control tested and the design of the substantive tests.

- The basis for the conclusions reached.

IG 16 Rotation Plan for Testing Internal Financial Controls (Refer Paragraph 118 and 125)

IG 16.1 Rotation plan for testing of internal controls may be relevant to efficiently perform an audit of internal financial controls. One of the important consideration in this regard is that control environment within a company is somewhat enduring in nature and hence in case there are no changes in the underlying controls the auditors may be able to leverage on the work carried out in the previous periods. The internal control testing work can broadly be categorised into following:

- Understanding the process flows.
- Testing design and implementation of controls.
- Testing operative effectiveness of controls.

IG 16.2 From the perspective of adopting a rotation plan for testing of internal controls, understanding the process flows and testing design and implementation of controls are required to be covered in every audit period. However, a rotation plan may be considered for testing operating effectiveness of controls subject to the criteria specified in paragraph IG 16.3 below.

IG 16.3 The following is the broad criteria to be met for adopting a rotation plan for testing operating effectiveness of controls:

- The auditor may be able to utilise the tests of controls performed in prior audits in the current audit. In determining the strategy for testing the operating effectiveness of controls upon which the auditor intends to rely, the auditor may plan an approach whereby he or she will use audit evidence about operating effectiveness of certain controls obtained in previous audits in combination with the evidence obtained from the understanding of controls in the current audit and tests of operating effectiveness of other controls performed in the current audit.
- In these circumstances, the auditor is required to establish the continuing relevance of that evidence by obtaining audit evidence about whether significant changes in those controls have occurred subsequent to the previous audit.
- The auditor is required to obtain this evidence by performing inquiry combined with observation or inspection, to confirm the understanding of those specific controls.
- If there have been changes that affect the continuing relevance of the audit evidence from the previous audit, the auditor is required to test the controls in the current audit.
- If there have not been such changes, it is recommended that the auditor tests the controls at least once in every third audit and need to test some controls each audit to avoid the possibility of testing all the controls on which the auditor intends to rely in a single audit period with no testing of controls in the subsequent two audit periods.

IG 17 Remediation Testing (Refer Paragraph 119)

IG 17.1 Auditors are required to express an opinion on the effectiveness of the entity's internal financial controls as of the balance sheet date.

IG 17.2 Accordingly, any issues or deficiencies either relating to design or operative effectiveness of controls if they are remediated before the period under consideration, then the auditor can still express an unqualified opinion. It would be important to note that the remediation has to happen within the financial period which is under consideration.

IG 17.3 Sufficient time should be allowed to evaluate and test controls. If deficiencies are discovered, management may have the opportunity to correct and address these deficiencies prior to the reporting date. However, once a new control is in place, management should allow enough time for its operations to validate the control's operating effectiveness. The amount of time that a control should be in place and operating effectively depends on the nature of the control and how frequently it operates. The amount of time a remediation control should be in existence for placing reliance on the control by the auditor is a matter of professional judgement. Under ordinary circumstances, control remediation that occurs after year-end will not mitigate an identified deficiency for reporting purposes. Auditor should not express an opinion on management's disclosure about corrective actions taken by the company after the balance sheet date.

IG 18 Using the Work of Internal Auditors and an Auditor's Expert (Refer Paragraph 82 - 85)

IG 18.1 The role and objectives of the internal audit function are determined by management and, where applicable, those charged with governance. While the objectives of the internal audit function and the auditor are different insofar as it relates to financial statements, the ways in which the internal audit function and the auditor achieve their respective objectives in an audit of internal financial controls may be similar.

IG 18.2 The auditor's consideration of the internal audit function in an audit of internal financial controls, applies in a combined audit of internal financial controls over financial reporting and financial statements.

IG 18.3 The objectives of the auditor, where the entity has an internal audit function that the auditor has determined is likely to be relevant to the audit, are to determine:

- (a) Whether, and to what extent, to use specific work of the internal auditors; and
- (b) If so, whether such work is adequate for the purposes of the audit.

IG 18.4 In determining whether and to what extent to use the work of the internal auditors, the auditor shall determine:

- (a) Whether the work of the internal auditors is likely to be adequate for purposes of the audit; and
- (b) If so, the planned effect of the work of the internal auditors on the nature, timing or extent of the auditor's procedures.

IG 18.5 The auditor should apply the requirements of paragraphs 8, 9 and A4 of SA 610 “Using the Work of Internal Auditors” to assess the competence and objectivity of internal auditors. The auditor should apply the principles underlying those paragraphs to assess the competence and objectivity of persons other than internal auditors whose work the auditor plans to use.

IG 18.6 The auditor may also use the work of an auditor’s expert in an audit of internal financial controls. In this regard the auditor should apply the requirements of SA 620 “Using the Work of an Auditor’s Expert”.

IG 18.7 Auditor’s expert is an individual or organisation possessing expertise in a field other than accounting or auditing, whose work in that field is used by the auditor to assist the auditor in obtaining sufficient appropriate audit evidence. An auditor’s expert may be either an auditor’s internal expert (who is a partner or staff, including temporary staff, of the auditor’s firm or a network firm), or an auditor’s external expert.

IG 18.8 The key considerations for an auditor in using the work of an auditor’s expert are:

- Determining the need for the expert.
- Nature, timing and extent of audit procedures to be performed by the expert and the auditor.
- The competence, capability and objectivity of the auditor’s expert.
- Obtaining an understanding of the field of expertise of the auditor’s expert.
- Agreement with the auditor’s expert.
- Evaluating the adequacy of the auditor’s expert’s work.

IG 18.9 The extent to which the auditor may use the work of others in an audit of internal control also depends on the risk associated with the control being tested. As the risk associated with a control increases, the need for the auditor to perform his or her own work on the control increases.

IG 19 Additional Considerations for Auditing Internal Financial Controls Over Financial Reporting

IG 19.1 The complexity of a company is an important factor in the auditor’s risk assessment and determination of the necessary audit procedures. Customising the audit is important for audits of internal control of all companies, especially smaller, less complex companies.

IG 19.2 The audit of internal financial controls should be integrated with the audit of the financial statements, so the auditor must plan and perform the work to achieve the objectives of both audits. This direction applies to all aspects of the audit, and it is particularly relevant to tests of controls.

Customising the audit of internal financial controls

IG 19.3 Customising the audit of internal financial controls involves tailoring the audit approach to fit the individual facts and circumstances of the company. Many smaller companies have less complex operations, and they typically share many of the following attributes:

- Fewer business lines.
- Less complex business processes and financial reporting systems.

III.652 Auditing Pronouncements

- More centralised accounting functions.
- Extensive involvement by the owners and senior management in the day-to-day activities of the business.
- Fewer levels of management, each with a wide span of control.

IG 19.4 The attributes of a smaller, less complex company can affect the particular risks that could result in material misstatement of the company's financial statements and the controls that a company might establish to address those risks. Consequently, these attributes have a pervasive effect on the audit of internal financial control, including assessing risk, determining significant accounts and disclosures and relevant assertions, selecting controls to test, and testing the design and operating effectiveness of controls. The following are examples of internal control-related matters that might be particularly affected by the attributes of a smaller, less complex company –

- Use of entity-level controls to achieve control objectives. In smaller, less complex companies, owners and / or senior management are often involved in many day-to-day business activities and perform duties that are important to effective internal financial controls. Consequently, the auditor's evaluation of entity-level controls can provide a substantial amount of evidence about the effectiveness of internal financial controls.
- Risk of management override. The extensive involvement of owners and/or senior management in day-to-day activities and fewer levels of management can provide additional opportunities for management to override controls or intentionally misstate the financial statements in smaller, less complex companies. In a combined audit of internal financial controls over financial reporting and financial statements, the auditor should consider the risk of management override and company actions to address that risk in connection with assessing the risk of material misstatement due to fraud and evaluating entity-level controls.
- Implementation of segregation of duties and alternative controls. By their nature, smaller, less complex companies have fewer employees, which limit the opportunity to segregate incompatible duties. Smaller, less complex companies might use alternative approaches to achieve the objectives of segregation of duties, and the auditor should evaluate whether those alternative controls achieve the control objectives.
- Use of Information Technology (IT). A smaller, less complex company with less complex business processes and centralised accounting operations might have less complex information systems that make greater use of off the shelf packaged software without modification. In the areas in which off-the-shelf software is used, the auditor's testing of information technology controls might focus on the application controls built into the pre-packaged software that management relies on to achieve its control objectives and the testing of IT general controls might focus on those controls that are important to the effective operation of the selected application controls.
- Maintenance of financial reporting competencies. Smaller, less complex companies might address their needs for financial reporting competencies through means other than internal staffing, such as engaging outside professionals. The auditor may take into consideration the use of those third parties when assessing financial reporting competencies of the company.

- Nature and extent of documentation. A smaller, less complex company typically needs less formal documentation to run the business, including maintaining effective internal financial controls. The auditor may take that into account when selecting controls to test and planning tests of controls.
- In some audits of internal control, auditors might encounter companies with numerous or pervasive control deficiencies. Smaller, less complex companies can be particularly affected by ineffective entity-level controls, as these companies typically have fewer employees and fewer process-level controls. The auditor's strategy can be influenced by the nature of the control deficiencies and factors such as the availability of audit evidence and the effect of the deficiencies on other controls.

Test of controls in a combined audit of internal financial controls over financial reporting and financial statements

IG 19.5 Selection of controls to test

Appropriate selection of controls helps focus the auditor's testing on those controls that are important to the auditor's conclusion about whether the company's internal financial controls are effective. The decision about whether to select a control for testing depends on which controls, individually or in combination, sufficiently address the assessed risk of misstatement in a given relevant assertion rather than on how the control is labelled (e.g., entity-level control, transaction-level control, control activity, monitoring control, preventive control, or detective control).

A practical starting point for identifying these controls, is to consider the controls that management relies on to achieve its objectives for reliable financial reporting. Besides the overriding consideration of whether a control addresses the risk of misstatement, as a practical matter, the auditor might also consider the following factors when selecting controls to test:

- Is the control likely to be effective?
- What evidence exists regarding operation of the control?

When selecting controls to test, the auditor could seek to select controls that are more likely to be effective in addressing the risk of misstatement in one or more relevant assertions. If none of the controls that are intended to address a risk for a relevant assertion is likely to be effective, the auditor can take that into account in determining the evidence needed to support a conclusion about the effectiveness of controls for this assertion.

The auditor needs to be able to obtain enough evidence about a control's operation to conclude on its effectiveness. The auditor could take into account the nature and availability of audit evidence when selecting controls to test and determining the nature, timing, and extent of tests of controls. For example, if two or more controls adequately address the risk of misstatement for a relevant assertion, the auditor may select the control for which evidence of operating effectiveness can be obtained more readily.

IG 19.6 Tests of operating effectiveness of controls

Historically, the approach for financial statement audits of smaller, less complex companies has been to focus primarily on testing accounts and disclosures, with little or no testing of controls.

III.654 Auditing Pronouncements

Auditors have the latitude to determine an appropriate testing strategy to –

- (a) Obtain sufficient evidence to support the auditor's opinion on internal financial controls as of year-end, and
- (b) Obtain sufficient evidence to support the auditor's control risk assessments in the audit of the financial statements.

To express an opinion on internal financial controls taken as a whole, the auditor must obtain evidence about the effectiveness of selected controls over all relevant financial statement assertions. Because the auditor's opinion on internal financial controls is as of a point in time, he or she should obtain evidence that internal financial controls has operated effectively for a sufficient period of time, which may be less than the entire period (ordinarily one year) covered by the company's financial statements.

In an audit of financial statements, the objective of tests of controls is to assess control risk. To assess control risk at less than the maximum, the auditing standards require the auditor to obtain evidence that the relevant controls operated effectively during the entire period upon which the auditor plans to place reliance on those controls. However, the auditor is not required to assess control risk at less than the maximum for all relevant assertions, and, for a variety of reasons, the auditor may choose not to do so.

The auditor's assessment of control risk at the maximum for one or more relevant assertions in an audit of financial statements does not necessarily preclude the auditor from issuing an unqualified opinion in an audit of internal control. The objectives of the two audits are not identical. The auditor could obtain sufficient evidence to support his or her opinion on internal financial controls, even if the auditor decides not to test controls over the entire period of reliance to support a control risk assessment below the maximum. However, if the auditor assesses control risk at the maximum because of identified control deficiencies, the auditor should evaluate the severity of the deficiencies, individually or in combination, to determine whether a significant deficiency or material weakness exists.

The auditor's decision about relying on controls in an audit of financial statements may depend on the particular facts and circumstances. In some areas, the auditor might decide to rely on certain controls to reduce the substantive testing of accounts and disclosures. For other areas, the auditor might perform primarily substantive tests of the assertions without relying on controls. For example, the auditor might test a company's controls over billings and cash receipts processing to cover the entire period of reliance in order to reduce the extent of confirmation of accounts receivable balances but might perform primarily substantive tests of the allowance for doubtful accounts. In this case, the auditor might perform the tests of controls over the allowance for doubtful accounts only as necessary for the audit of internal financial controls.

For some significant accounts, the auditor might decide that a relevant assertion can be tested effectively and efficiently through substantive procedures without relying on controls. For example, the auditor might decide to confirm an outstanding loan payable with the lender rather than rely on controls. In that situation, the auditor may test controls of the relevant assertions only as necessary to support his or her opinion on the company's internal financial controls at year-end.

To obtain evidence about whether a selected control is effective, the control must be tested; the effectiveness of a control cannot be inferred from the absence of misstatements detected by substantive procedures. The absence of misstatements detected by substantive procedures, however, is one of a number of factors that inform the auditor's risk assessments in determining the testing necessary to conclude on the effectiveness of a control.

Evaluating entity-level controls

IG 19.7 An important aspect of performing an audit of internal financial control is the process of identifying and evaluating entity-level controls. This Section discusses entity-level controls and explains how they can affect the nature, timing, and extent of the auditor's procedures in an audit of internal financial control for a smaller, less complex company.

IG 19.8 For the purposes of this discussion, entity-level controls are controls that have a pervasive effect on a company's internal control. These controls include:

- *Controls related to the control environment;*
- *Controls over management override;*
- *The company's risk assessment process;*
- *Centralised processing and controls, including shared service environments;*
- *Controls to monitor results of operations;*
- *Controls to monitor other controls, including activities of the audit committee and self-assessment programs;*
- *Controls over the period-end financial reporting process; and*
- *Policies that address significant business control and risk management practices.*

In smaller, less complex companies, owner and/or senior management often is involved in many day-to-day business activities and performs many controls – including entity-level controls – that are important to effective internal financial controls. When this is the case, the auditor's evaluation of entity-level controls can be an important source of evidence about the effectiveness of internal financial controls.

Effective controls related to the control environment and controls that address the risk of management override are particularly important to the effective functioning of controls performed by senior management.

Auditors might find that limited formal documentation is available regarding the operation of some entity-level controls.

Identifying entity-level controls

IG 19.9 The process of identifying relevant entity-level controls could begin with discussions between the auditor and appropriate management personnel for the purpose of obtaining a preliminary understanding of each component of internal financial controls (e.g., control environment, risk assessment, control activities, monitoring, and information and communication).

While evaluating entity-level controls, auditors might identify controls that are capable of preventing or detecting misstatements in the financial statements. The period-end financial reporting process and management's monitoring of the results of operations are potential sources of such controls.

Assessing the precision of entity-level controls

IG 19.10 The key consideration in assessing the level of precision is whether the control is designed in a manner to prevent or detect on a timely basis misstatements in one or more assertions that could cause the financial statements to be materially misstated and whether such control is operating effectively.

Factors that auditors might consider when judging the level of precision of an entity-level control include the following:

- *Purpose of the control. A procedure that functions to prevent or detect misstatements generally is more precise than a procedure that merely identifies and explains differences.*
- *Level of aggregation. A control that is performed at a more granular level generally is more precise than one performed at a higher level. For example, an analysis of revenue by location or product line normally is more precise than an analysis of total company revenue.*
- *Consistency of performance. A control that is performed routinely and consistently generally is more precise than one performed sporadically.*
- *Correlation to relevant assertions. A control that is indirectly related to an assertion normally is less likely to prevent or detect misstatements in the assertion than a control that is directly related to an assertion.*
- *Criteria for investigation. For detective controls, the threshold for investigating deviations or differences from expectations relative to materiality is an indication of a control's precision. For example, a control that investigates items that are near the threshold for financial statement materiality has less precision and a greater risk of failing to prevent or detect misstatements that could be material than a control with a lower threshold for investigation.*
- *Predictability of expectations. Some entity-level controls are designed to detect misstatements by using key performance indicators or other information to develop expectations about reported amounts. The precision of those controls depends on the ability to develop sufficiently precise expectations to highlight potentially material misstatements.*

When forming an opinion on the effectiveness of a company's internal financial controls, the auditor should evaluate evidence obtained from all sources, including misstatements detected during the financial statement audit. Evidence regarding detected misstatements also might be relevant in assessing the level of precision of entity-level controls.

Effect of entity-level controls on testing of other controls

IG 19.11 *The auditor's evaluation of entity-level controls can result in increasing or decreasing the testing that the auditor otherwise might have performed on other controls. For example, if the*

auditor has designed an audit approach with an expectation that certain entity-level controls (e.g., controls in the control environment) will be effective and those controls are not effective, the auditor might re-evaluate the planned audit approach and decide to expand his or her audit procedures.

On the other hand, the auditor's evaluation of some entity-level controls can result in a reduction of his or her testing of other controls, such as controls over corresponding relevant assertions. The degree to which the auditor might be able to reduce testing of controls over relevant assertions in such cases depends on the precision of the entity-level controls.

Example – Monitoring the effectiveness of other controls

IG 19.12 Scenario: A small niche software developer conducts business in India and other countries, requiring the company to maintain many bank accounts. An Accounts Officer is charged with performing bank reconciliations for the accounts according to a predetermined schedule (some of the accounts have a different closing date). Through inquiries of management, the auditor learns that the company's chief financial officer ("CFO"), who is an experienced accountant, reviews on a monthly basis, the bank reconciliations prepared by the Accounts Officer as a means to determine:

- whether reconciliations are being prepared on a timely basis,
- the nature of reconciling items identified through the process, and
- whether reconciling items are investigated and resolved on a timely basis.

Audit Approach: In this example, the purpose of the control is one of the factors that the auditor considers in assessing precision of the CFO's review. The auditor has noted that the purpose of the CFO's review is to check that the staff has performed the reconciliations as described above. Therefore, the auditor does not expect the CFO's review of the reconciliations to be sufficiently precise to detect misstatements by itself. However, the CFO's review could still influence the auditor's assessment of risk because it provides additional information about the nature and consistency of the reconciliation procedures. The auditor obtains evidence about the CFO's review through inquiry and document inspection, evaluates the review's effectiveness, and determines the amount of direct testing of the reconciliation controls that is needed based on the assessed level of risk. If the auditor concludes that the CFO's review is effective, he or she could reduce the direct testing of the reconciliation controls, absent other indications of risk.

Example – Entity-level controls related to payroll processing

IG 19.13 Scenario: A manufacturer of spares and parts for the transportation market has union labor, supervisors, managers, and executives. All plants run two shifts six days a week, with each having approximately the same number of employees.

The CFO has been with the company for 10 years and thoroughly understands its business processes, including the payroll process, and reviews monthly payroll summary reports prepared by the centralised accounting function. With the company's flat organisational design and smaller size, the CFO's background with the company and his understanding of the seasons, cycles, and workflows, and close familiarity with the budget and reporting processes, the CFO quickly identifies any sign of improprieties with payroll and their underlying cause whether related to a particular project, overtime, hiring, layoffs, and so forth. The CFO investigates as needed to determine

III.658 Auditing Pronouncements

whether misstatements have occurred and whether any internal control has not operated effectively, and takes corrective action.

Based on the results of audit procedures relating to the control environment and controls over management override, the auditor observes that the CFO demonstrates integrity and a commitment to effective internal financial controls.

Audit Approach: *The auditor evaluates the effectiveness of the CFO's reviews, including the precision of those reviews. He or she inquires about the CFO's review process and obtains other evidence of the review. He or she notes that the CFO's threshold for investigating significant differences from expectations is adequate to detect misstatements that could cause the financial statements to be materially misstated. He or she selects some significant differences from expectations that were flagged by the CFO and determines that the CFO appropriately investigated the differences to determine whether the differences were caused by misstatements. Also, in considering evidence obtained throughout the audit, the auditor observes that the results of the financial statement audit procedures did not identify likely misstatements in payroll expense.*

The auditor decides that the reviews could detect misstatements related to payroll processing because the CFO's threshold for investigating significant differences from expectations is adequate. However, he or she determines that the control depends on reports produced by the company's IT system, so the CFO's review can be effective only if controls over the completeness and accuracy of those reports are effective.

After performing the tests of the relevant computer controls, the auditor concludes that the review performed by the CFO, when coupled with relevant controls over the reports, meets the control objectives for the relevant aspects of payroll processing described above.

Assessing the risk of management override and evaluating mitigating actions

IG 19.14 The risk of management override of controls exists in all organisations, but the extensive involvement of owners and/or senior management in day-to-day activities and fewer levels of management can provide additional opportunities for management to override controls in smaller, less complex companies. Company actions to mitigate the risk of management override are important to the consideration of the effectiveness of internal financial controls.

In a combined audit of internal financial controls over financial reporting and financial statements, the auditor should consider the risk of management override in connection with assessing the risk of material misstatement due to fraud, as he or she evaluates mitigating actions in connection with the evaluation of entity-level controls and selecting other controls to test.

Assessing the risk of management override

IG 19.15 SA 240 requires the auditor to assess the risk of material misstatement due to fraud ("fraud risk"). As part of that assessment, the auditor is directed to perform the following procedures to obtain information to be used in identifying fraud risks, which includes procedures to assess the risk of management override:

- *Conducting an engagement team discussion regarding fraud risks. This discussion includes brainstorming about how and where management could override controls to engage in or conceal fraudulent financial reporting.*
- *Making inquiries of management, the audit committee, if any, and others in the company to obtain their views about the risks of fraud and how those risks are addressed. These inquiries can provide information about the possibility of management override of controls.*
- *Considering fraud risk factors. Fraud risk factors include events or conditions that indicate incentives and pressures for management to override controls, opportunities for management override, and attitudes or rationalisations that enable management to justify override of controls.*

After identifying fraud risks, the auditor should assess those risks, taking into account an evaluation of the company's programs and controls that are intended to address those risks.

Because of the characteristics of fraud, the auditor's exercise of professional skepticism is particularly important when considering the risk of material misstatement due to fraud, including the risk of management override of controls.

Evaluating mitigating controls

IG 19.16 Smaller, less complex companies can take a number of actions to address the risk of management override. The following are examples of some of the controls that might address the risk of management override:

- *Maintaining integrity and ethical values;*
- *Active oversight by the audit committee;*
- *Maintaining a whistleblower program; and*
- *Controls over certain journal entries.*

When assessing a company's anti-fraud programs and controls, the auditor should evaluate whether the company has appropriately addressed the risk of management override. Often, a combination of actions might be implemented to address the risk of management override.

Evaluating integrity and ethical values

IG 19.17 An important part of an effective control environment is sound integrity and ethical values, particularly of top management, which are communicated and practiced throughout the company. A code of conduct or ethics policy is one way that a company can communicate its policies with respect to ethical behavior. This type of control can be effective if employees are aware of the company's policies and observe the policies in practice.

Auditors should evaluate integrity and ethical values as part of the assessment of the control environment component of internal control. One approach for testing the effectiveness of the company's communications regarding integrity and ethical values is to gain an understanding of what the company believes it is communicating to employees and interview employees to

III.660 Auditing Pronouncements

determine if they are aware of the existence of the company's policies for ethical behavior and what they understand those policies to be. A discussion with employees regarding observed behaviors can assist the auditor further in understanding management's past actions and determining whether management's behavior demonstrates and enforces the principles in its code of conduct. The auditor's experience with the company can also be an important source of information about whether management demonstrates integrity and ethical values in its business practices and supports the achievement of effective internal control in its day to day activities.

Evaluating audit committee oversight

IG 19.18 An active and independent audit committee evaluates the risk of management override, including identifying areas in which management override of internal control could occur, and assesses whether those risks are appropriately addressed within the company. As part of their oversight duties, the audit committee might perform duties such as meeting with management to discuss significant accounting estimates and reviewing the reasonableness of significant assumptions and judgements. The consideration of the effectiveness of the audit committee's oversight is part of the evaluation of the control environment.

In connection with the auditor's inquiries of the audit committee, the auditor may interview audit committee members to determine their level of involvement and their activities regarding the risk of management override. For example, the auditor might read minutes of audit committee discussions on matters related to the committee's oversight or might observe some of those discussions if the auditor attends the meetings in connection with the audit. In addition, the auditor can examine evidence of the board of directors or audit committee's activities that address the risk of management override, such as monitoring of certain transactions.

Evaluating whistleblower programs

IG 19.19 A whistleblower program provides an outlet for employees or others to report behaviors that might have violated company policies and procedures, including management override of controls. A key aspect of an effective whistleblower program is the appropriateness of responses to concerns expressed by employees through the program. The audit committee may review reports of significant matters and consider the need for corrective actions.

Audit procedures relating to a whistleblower program are intended to assess whether the program is appropriately designed, implemented, monitored, and maintained. Such procedures might include inquiry of employees, inspection of communications to employees about the program, and, if tips or complaints have been received, follow-up procedures to evaluate whether remedial actions were taken as necessary.

Evaluating controls over journal entries

IG 19.20 Controls that prevent or detect unauthorised journal entries can reduce the opportunity for the quarterly and annual financial statements to be intentionally misstated. Such controls might include, among other things, restricting access to the general ledger system, requiring dual authorisations for manual entries, or performing periodic reviews of journal entries to identify unauthorised entries.

As part of obtaining an understanding of the financial reporting process, the auditor should consider how journal entries are recorded in the general ledger and whether the company has controls that would either prevent unauthorised journal entries from being made to the general ledger or directly to the financial statements or detect unauthorised entries.

Considering the effects of other evidence

IG 19.21 The auditor might identify indications of management override in other phases of the combined audit of internal financial controls over financial reporting and financial statements. For example, the auditor is required to perform procedures in response to the risk of management override, including examining journal entries for evidence of fraud, reviewing accounting estimates for bias, and evaluating the business rationale for significant, unusual transactions. Also, if the auditor performs walkthroughs during the audit of internal control, he or she could obtain information about potential management override by asking employees about their knowledge of override. Also, the auditor might identify indications of management override when evaluating the results of tests of controls or other audit procedures. If the auditor identifies indications of management override of controls, he or she should take such indications into account when evaluating the risk of override and the effectiveness of mitigating actions.

Example – Audit committee oversight

IG 19.22 **Scenario:** The audit committee of a small IT services company discusses in executive session at least annually its assessment of the risks of management override of internal control, including motivations for management override and how those activities could be concealed. The audit committee performs the following procedures to address the risk of management override: (a) reviews the reasonableness of management's assumptions and judgements used to develop significant estimates; and (b) reviews the functioning of the company's whistleblower process and related reports, and from time to time, inquires of managers not directly responsible for financial reporting (including personnel in sales, procurement, and human resources, among others), obtaining information regarding concerns about ethics or indications of management override of internal controls.

Audit approach: In this situation, the auditor can draw upon several sources of evidence to evaluate the audit committee's oversight. The auditor might attend selected meetings of the audit committee where the risks of override and whistleblower programs are discussed or review minutes of meetings where those matters are discussed. In connection with its inquiries of the audit committee about the risk of fraud, the auditor can discuss matters relating to the risk of override, including how the audit committee assesses the risk of management override, what information, if any, the audit committee has obtained about possible management override, and how the audit committee's concerns about the risk of management override have been addressed. This information can inform the auditor's consideration of the risk of management override and the testing of mitigating controls.

Evaluating segregation of duties and alternative controls

IG 19.23 Segregation of duties refers to dividing incompatible functions among different people to reduce the risk that a potential material misstatement of the financial statements would occur

III.662 Auditing Pronouncements

without being prevented or detected. Assigning different people responsibility for authorising transactions, recording transactions, reconciling information, and maintaining custody of assets reduces the opportunity for any one employee to conceal errors or perpetrate fraud in the normal course of his or her duties.

When a person performs two or more incompatible duties, the effectiveness of some controls might be impaired. For example, reconciliation procedures may not effectively meet the control objectives if they are performed by someone who also has responsibilities for transaction recording or asset custody.

Smaller, less complex companies' approach to segregation of duties

IG 19.24 By their nature, smaller, less complex companies have fewer employees, which limit their opportunities to implement segregation of duties. Due to these personnel restrictions, smaller, less complex companies might approach the control objectives relevant to segregation of duties in a different manner from larger, more complex companies. Despite personnel limitations, some smaller, less complex companies might still divide incompatible functions by using the services of external parties. Other smaller, less complex companies might implement alternative controls intended to achieve the same objectives as segregation of duties for certain processes.

Audit strategy considerations related to segregation of duties

IG 19.25 It is generally beneficial for the auditor and the company to identify concerns related to segregation of duties early in the audit process to allow the auditor to design procedures that effectively respond to those concerns. Also, management might have already identified, as part of its risk assessment, risks relating to inadequate segregation of duties and alternative controls that respond to those risks. Where walkthroughs are performed, those procedures can help identify matters related to segregation of duties.

When management implements an alternative control or combination of controls that address the same objectives as segregation of duties, the auditor should evaluate whether the alternative control or controls effectively meet the related control objectives. The auditor's approach to evaluating those alternative control or controls depends on the control objectives, the nature of the controls, and the associated risks.

Use of external resources

IG 19.26 Some small companies use external parties to assist with some of their financial reporting-related functions. Use of external parties can also help achieve segregation of certain incompatible duties without investing in additional full-time resources.

A company might use one or more types of external-party arrangements in meeting its control objectives. Consultants, other professionals, or temporary employees can assist companies in performing some controls or other duties. For more complex or specialised portions of internal control, such as cash receipts handling, payroll processing, or securities recordkeeping, the company might use an external party to perform an entire function.

When controls over a relevant assertion depend on the use of an external party to perform a particular function, the auditor could evaluate that function in relation to the company's other

relevant controls and procedures. The audit approach used with respect to the externally performed function depends on the circumstances. For those controls that are documented or are observable by the auditor (e.g., controls performed by external professionals at the company's premises), the auditor's evaluation may be similar to what he or she could perform for the company's other controls. For some externally performed functions, the direction relating to use of service organisations may be relevant.

Management oversight and review

IG 19.27A smaller, less complex company might address some segregation of duties matters through alternative controls involving management oversight and review activities, e.g., reviewing transactions, checking reconciliations, reviewing transaction reports, or taking periodic asset counts. Many of those types of management activities could be entity-level controls.

When the auditor applies a top-down approach to select the controls to test, starting at the financial statement level and evaluating entity-level controls, the auditor might identify entity-level controls that are designed to operate at a level of precision to effectively address the risk of misstatement for one or more relevant assertions. In those cases, the auditor could select and test those entity-level controls rather than test the process controls that could be affected by inadequate segregation of duties.

Example – Alternative controls over inventory

IG 19.28 Scenario: A provider of office furnishings and equipment uses a locked storeroom to store certain key components. The person responsible for the components has access to both the storeroom and the related accounting records. To address the risks related to undetected loss of components, the manager responsible for purchasing performs periodic spot-checks of the components and reconciles them to the general ledger in addition to the inventory ledger. The components are also included in the company's year-end inventory count. IT access controls are implemented to prevent the person responsible for the components from entering transactions or modifying related account balances in the general ledger.

Audit approach: The auditor observes the company's year-end inventory counting process. He or she inspects documentation for some of the periodic spot-checks and the related reconciliations. For discrepancies in the counts or reconciliations inspected, he or she performs inquiries and inspects the accounting records to determine whether those items were appropriately resolved. Relevant IT access controls are evaluated in connection with the evaluation of IT general controls.

Auditing information technology controls in a less complex information technology environment

IG 19.29A company's use of information technology (IT) can have a significant effect on the audit of internal financial control. The IT environment is a consideration in the auditor's risk assessments, selection of controls to test, tests of controls, and other audit procedures. This Section discusses the auditor's evaluation of IT controls in a smaller company with a less complex IT environment. It explains how the auditor could decide which IT controls to evaluate and how the auditor could evaluate those controls. In addition, it provides an overview of the major categories of IT controls and related testing considerations for a smaller, less complex IT environment.

Characteristics of less complex IT environments

IG 19.30 In smaller companies, less complex IT environments tend to have the following characteristics:

- *Transaction processing. Data inputs can be readily compared or reconciled to system outputs. Management tends to rely primarily on manual controls over transaction processing.*
- *Software. The company typically uses off-the-shelf packaged software without programming modification. The packaged software requires relatively little user configuration to implement.*
- *Systems configurations and security administration. Computer systems tend to be centralised in a single location, and there are a limited number of interfaces between systems. Access to systems is typically managed by a limited number of personnel.*
- *End-user computing. The company is relatively more dependent on spreadsheets and other user-developed applications, which are used to initiate, authorise, record, process, and report the results of business operations, and, in many instances, perform straightforward calculations using relatively simple formulas.*

The complexity of the IT environment has a significant effect on the risks of misstatement and the controls implemented to address those risks. The auditor's approach in an environment with the preceding characteristics may be different from the approach in a more complex IT environment.

Determining the scope of the evaluation of IT controls

IG 19.31 The following matters affect the scope of the auditor's evaluation of IT controls in a smaller company with a less complex IT environment –

- *The risks, i.e., likely sources of misstatement, in the company's IT processes or systems relevant to financial reporting, and the controls that address those risks.*
- *The reports produced by IT systems that are used by the company for performing important controls over financial reporting.*
- *The automated controls that the company relies on to maintain effective internal financial controls.*

The IT controls that are important to effective internal financial controls generally relate to at least one of the preceding matters, which are discussed in more detail in the following paragraphs. IT control categories and testing procedures are discussed later in this Section.

The following types of IT-related risks that could affect the reliability of financial reporting –

- *Reliance on systems or programs that are inaccurately processing data, processing inaccurate data, or both;*
- *Unauthorised access to data that may result in destruction of data or improper changes to data, including the recording of unauthorised or non-existent transactions or inaccurate recording of transactions;*
- *Unauthorised changes to data in master files;*

- *Unauthorised changes to systems or programs;*
- *Failure to make necessary changes to systems or programs;*
- *Inappropriate manual intervention;*
- *Potential loss of data.*

The IT-related risks that are reasonably possible to result in material misstatement of the financial statements depend on the nature of the IT environment. In a less complex environment, the auditor could identify many of the risks by understanding the software being used and how it is installed and used by the company. After understanding the relevant IT-related risks, the auditor should identify the controls that address those risks. These controls could include automated controls and IT-dependent controls and the IT general controls that are important to the effective operation of the selected controls. For example, even the simplest IT environments generally rely on controls that are designed to make sure that necessary software updates are appropriately installed, access controls that are designed to prevent unauthorised changes to financial data, and other controls that address potential loss of data necessary for financial statement preparation.

As the complexity of the software or environment increases, the type and number of potential IT risks increase, which could lead the auditor to devote more attention to IT controls.

IT-dependent controls

IG 19.32 Many controls that smaller, less complex companies rely on are manual controls. Some of those controls are designed to use information in reports generated by IT systems, and the effectiveness of those controls depends on the accuracy and completeness of the information in the reports. When those IT-dependent controls are selected for testing, it may also be necessary to select controls over the completeness and accuracy of the information in the reports in order to address the risk of misstatement.

Other automated controls

IG 19.33 Although smaller, less complex companies tend to rely primarily on manual controls, they could rely on certain automated controls built into the packaged software to achieve some control objectives. For example, software controls can be used to maintain segregation of duties, prevent certain data input errors, or to help make sure that certain types of transactions are properly recorded. The auditor might focus some of his or her testing on these automated controls and the IT general controls that are important to the effective operation of the automated controls.

Consideration of deficiencies in general IT controls on tests of other controls

IG 19.34 IT general controls support operation of the application controls by ensuring the proper access to, and functioning of, the company's IT systems. Deficiencies in the IT general controls may result in deficiencies in the operation of the automated or IT dependent controls. One of the factors in the auditor's evaluation of the identified deficiencies in the IT general controls is the interaction of an IT general control and the related automated or IT-dependent controls.

In some situations, an automated or IT-dependent control might be effective even if deficiencies exist in IT general controls. For example, despite the presence of deficient program change

controls, the auditor might directly test the related automated or IT-dependent manual control, giving consideration to the risk associated with the deficient change controls in his or her risk assessment and audit strategy. If the testing results were satisfactory, the auditor could conclude that the automated or IT-dependent manual controls operated effectively at that point in time e.g., as of the issuer's fiscal year end. On the other hand, deficient program change controls might result in unauthorised changes to application controls, in which case the auditor could conclude that the application controls are ineffective.

Example – IT-dependent controls

IG 19.35 Scenario: A company has a small finance department. For the accounting processes that have a higher risk of misstatement, senior management performs a number of business process reviews and analyses to detect misstatements in transaction processing.

The company has a small IT department that supports a packaged financial reporting system whose software code cannot be altered by the user. Since the company uses packaged software, and there have been no changes to the system or processes in the past year, the IT general controls relevant to the audit of the internal financial controls are limited to certain access controls and certain computer operation controls related to identification and correction of processing errors. Management uses several system-generated reports in the business performance reviews, but these reports are embedded in the application and programmed by the vendor and cannot be altered.

Audit Approach: The auditor determines that senior management personnel performing the business process reviews and analyses are not involved with incompatible functions or duties that impair their ability to detect misstatements. Based on the auditor's knowledge of the financial reporting system and understanding of the transaction flows affecting the relevant assertions, the auditor selects for testing certain process reviews and analysis and certain controls over the completeness and accuracy of the information in the reports used in management's reviews. The tests of controls could include, for example –

- *Evaluating management's review procedures including assessing whether those controls operate at an appropriate level of precision.*
- *Evaluating how the company assures itself regarding the completeness and accuracy of the information in the reports used by management in the reviews. Matters that might be relevant to this evaluation include how the company determines that –*
 - *The data included in the report are accurate and complete. This evaluation might be accomplished through testing controls over the initiation, authorisation, processing, and recording of the respective transactions that feed into the report.*
 - *The relevant computer settings established by the software user are consistent with the objectives of management's review. For example, if management's review is based on items in an exception report, the reliability of the report depends on whether the settings for reporting exceptions are appropriate.*

The auditor verifies that the code in the packaged software cannot be changed by the user. The auditor also evaluates the IT general controls that are important to the effective operation of the IT-dependent controls (such as the access controls and operations controls previously described).

Categories of IT controls

IG 19.36 The remaining paragraphs of this Section discuss major categories of IT controls and considerations for testing them in a smaller, less complex IT environment.

General IT controls

IG 19.37 IT general controls are broad controls over general IT activities, such as security and access, computer operations, and systems development and system changes.

Security and access

Security and access controls are controls over operating systems, critical applications, supporting databases, and networks that help ensure that access to applications and data is restricted to authorised personnel.

In a small, less complex IT environment, security administration is likely to be centralised, and policies and procedures might be documented informally. A small number of people or a single individual typically supports security administration and monitoring on a part-time basis. Controls for mitigating the risk caused by a lack of segregation of duties over operating systems, data, and applications tend to be detective controls rather than preventive. Access controls tend to be monitored informally.

Tests of security and access controls could include evaluating the general system security settings and password parameters; evaluating the process for adding, deleting, and changing security access; and evaluating the access capabilities of various types of users.

Computer operations

Computer operations controls relate to day-to-day operations and help ensure that computer operational activities are performed as intended, processing errors are identified and corrected in a timely manner, and continuity of financial reporting data is maintained through effective data backup and recovery procedures.

A smaller, less complex IT environment might not have a formal operations function. There might not be formal policies regarding problem management or data storage and retention, and backup procedures tend to be initiated manually.

Tests of controls over computer operations could include evaluating the backup and recovery processes, reviewing the process of identifying and handling operational problems, and, if applicable, assessing control over job scheduling.

Systems development and system changes

Systems development and system change controls are controls over systems selection, design, implementation, and configuration changes that help ensure that new systems are appropriately developed, configured, approved, and migrated into production, and controls over changes – whether to applications, supporting databases, or operating systems – that help to ensure that those changes are properly authorised and approved, tested, and implemented. Although they might be viewed as separate categories, in less complex environments, systems development and

III.668 Auditing Pronouncements

system change procedures often are combined for ease of implementation, training, and ongoing maintenance.

A smaller, less complex IT environment typically includes a single or small number of off-the-shelf packaged applications that do not allow for modification of source code. Modifications to software are prepared by and, in some cases, implemented by, the software vendor in the form of updates or patches or via a network connection between the vendor and the organisation. Typically, a small number of individuals or a single individual (employees or consultants) support all development and production activities.

Examples of possible tests of controls over systems development and system changes include examining the processes for selecting, acquiring, and installing new software; evaluating the process for implementing software upgrades or patches; determining whether upgrades and patches are authorised and implemented on a timely basis; and assessing the process for testing new applications and updates.

Application controls

Application controls are automated or IT-dependent controls intended to help ensure that transactions are properly initiated, authorised, recorded, processed, and reported. For example, in a three-way match process, received vendor invoices are entered into the system, which matches them automatically to the purchase order and goods receipt based on the document reference numbers, price, and quantity. The system's simultaneous matching of the information within the three documents upon their entry to authorise a payment to the vendor is an automated application control.

Management's review and reconciliation of an exception report generated by the system is an example of an IT-dependent manual control. The general nature of application controls tends to be similar in most IT environments, although in less complex environments, the controls tend to be manual and detective rather than automated and preventive. The testing procedures could also be similar. In most IT environments, the auditor could focus on error correction procedures over inputting, authorising, recording, processing, and reporting of transactions when evaluating application controls. However, in less complex IT environments there might be fewer financial applications affecting relevant assertions and fewer application controls within those applications.

Regardless of the complexity of the IT environment, the audit plan for testing application controls could include a combination of inquiry, observation, document inspection, and re-performance of the controls. Efficiencies can be achieved through altering the nature, timing, and extent of testing procedures performed related to automated and IT-dependent application controls if IT general controls are designed and operating effectively. In some situations, benchmarking of certain automated controls might be an appropriate audit strategy.

End-user computing controls

End-user computing refers to a variety of user-based computer applications, including spreadsheets, databases, ad-hoc queries, stand-alone desktop applications, and other user-based applications. These applications might be used as the basis for making journal entries or preparing

other financial statement information. End-user computing is especially prevalent in smaller, less complex companies.

End-user computing controls are controls over spreadsheets and other user developed applications that help ensure that such applications are adequately documented, secured, backed up, and reviewed regularly for process integrity. End user computing controls include general and application controls over user-developed spreadsheets and applications.

Tests of controls over end-user computing could include assessing access controls to prevent unauthorised access; testing of controls over spreadsheet formulas or logic of queries and scripts; testing of controls over the completeness and accuracy of information reported by the end-user computing applications; and reviewing the procedures for backing up the applications and data.

Considering financial reporting competencies and their effects on internal financial controls

IG 19.38 To maintain effective internal financial controls, a company needs to retain individuals who are competent in financial reporting and related oversight roles. Smaller, less complex companies can face challenges in recruiting and retaining individuals with sufficient experience and skill in accounting and financial reporting. Also, resource limitations might prevent a smaller, less complex company from employing personnel who are familiar with the accounting required for unique, complex, or non-routine transactions or relevant changes in rules, regulations, and accounting practices.

Smaller, less complex companies might address their needs for financial reporting competencies through means other than internal staffing, such as engaging outside professionals.

The following Section discusses the auditor's consideration of financial reporting competencies at a smaller, less complex company, including situations in which a smaller, less complex company enlists outside assistance in financial reporting matters.

Understanding and evaluating a company's financial reporting competencies

IG 19.39 The evaluation of competence is one aspect of evaluating the control environment and the operating effectiveness of certain controls. For example, when evaluating entity-level controls, such as risk assessment and the period-end financial reporting process, the auditor could obtain information about whether –

- Management identifies the relevant financial reporting issues on a timely basis (e.g., issues arising from new transactions or lines of business or changes to accounting standards); and
- Management has the competence to ensure that events and transactions are properly accounted for and that financial statements and related disclosures are presented in conformity with generally accepted accounting principles ("GAAP").

For recurring clients, the auditor's experience in prior audit engagements can be a source of information regarding management's financial reporting competencies. The auditor could be aware of specific accounts or disclosures that have caused problems in prior engagements, or of management's response to past changes in accounting pronouncements. These experiences can

III.670 Auditing Pronouncements

inform the auditor about management's financial reporting competencies, including whether and how management identifies and responds to financial reporting risks. The procedures performed to evaluate the period-end financial reporting process could also be valuable to the evaluation of financial reporting competency.

The auditor's inquiries and observations pertaining to the company's overall commitment to competence, which is part of the evaluation of the control environment, can also inform the auditor's assessment of financial competency. The auditor can consider whether and how the company and management –

- *Establish and agree on the knowledge, skills and abilities needed to carry out the required responsibilities prior to hiring individuals for key financial reporting positions,*
- *Train employees involved in financial reporting processes and provide them with the appropriate tools and resources to perform their responsibilities, and*
- *Periodically review and evaluate employees relative to their assigned roles, including whether the audit committee (or board of directors) evaluates the competencies of individuals in key financial reporting roles, such as the chief executive and financial reporting officers.*

Auditors may keep in mind that company financial reporting personnel do not need to be experts in all areas of accounting and financial reporting but need to be sufficiently competent with respect to the accounting for current and anticipated transactions and changes in accounting standards to identify and address the risks of misstatement.

Supplementing competencies with assistance from outside professionals

IG 19.40 Some smaller, less complex companies might not have personnel on staff with experience in certain complex accounting matters that are encountered. In these circumstances, a company might engage outside professionals to provide the necessary expertise (i.e., an individual or firm possessing special skill or knowledge in the particular accounting and financial reporting matter). When assessing the competence of the personnel responsible for the company's financial reporting and associated controls, the auditor may consider the combined competence of company personnel and other parties that assist with functions related to financial reporting.

When an outside professional provides accounting assistance related to relevant assertions or the period-end financial reporting process, the auditor might begin by considering how the company assures itself that events and transactions are properly accounted for and that financial statements and the related disclosures are free of material misstatement. The company might have differing levels of involvement with outside professionals, depending upon the nature of the services provided. The auditor could evaluate management's oversight to determine whether the company, with the assistance of the professional, is adequately identifying and responding to risks. In performing this evaluation, the auditor can consider –

- *Whether management recognises situations for which additional expertise is needed to adequately identify and address risks of misstatement.*

- *How management determines that the outside professionals possess the necessary qualifications. For example, management might obtain information from the professional about his or her skills and competence.*
- *Whom management designates to oversee the services and whether they possess the suitable skill, knowledge, or experience to sufficiently oversee the outside professionals. (Note: Management is not required to possess the expertise to perform or re-perform the services.)*
- *Whether management has established controls over the work of the outside accounting professional and over the completeness and accuracy of the information provided to the outside professional. For example, in addition to reviewing the work of the outside professional, management might inquire about the professional's monitoring and review procedures related to the work performed by the professional for the company.*
- *How management participates in matters involving judgement, for example, whether management understands and makes significant assumptions and judgements underlying accounting calculations prepared by an outside professional.*
- *How management evaluates the adequacy and the results of the services performed, including the form and content of the outside accounting professional's findings, and accepts responsibility for the results of the services.*

In gathering evidence to support this evaluation, the auditor could hold discussions with both management and the outside professional, perhaps while obtaining an understanding of the period-end financial reporting process. The auditor could also inspect documentation that provides support for management's oversight of the outside professional.

Example – Assistance from outside professionals

IG 19.41 Scenario: A small developer of analytical software products does not have an individual with strong tax accounting expertise on staff. The company retains a third party accounting firm (not its auditor) to prepare the income tax provision, including deferred tax. Management obtains information from the third-party accounting firm about the training and experience of the staff assigned to do this work. The company's CFO, who has basic knowledge of tax accounting, reviews and discusses the tax provision with the accounting firm that prepared it, and compares the provision to CFO's expectations based on past periods, budgets, and knowledge of business operations.

Audit Approach: The auditor observes that management identifies risks to financial reporting related to accounting for income taxes and engages an outside professional to provide technical assistance. Further, the auditor evaluates management's oversight to determine whether the company, with the assistance of the professional, is adequately identifying and responding to risks of material misstatement regarding the income tax provision. As part of this evaluation, the auditor inspects the engagement letter, other correspondence between the company and the third-party firm, and the tax schedules and other information produced by the third-party firm. The auditor also evaluates the controls over the completeness and accuracy of the information furnished by the

III.672 Auditing Pronouncements

company to the third-party firm. The auditor also assesses whether the third-party accounting firm has the proper skills and staff assigned to do this work.

Obtaining sufficient appropriate evidence when the company has less formal documentation

IG 19.42 Implementing and assessing effective internal financial controls by a company's management generally involves some level of documentation. A smaller, less complex company often has different needs for documentation, and the nature of that documentation might differ from that of a larger or more complex organisation. Differences in the form and extent of control documentation of smaller, less complex companies generally relate to their operating characteristics, particularly to fewer resources and more direct interaction of senior management with controls.

The nature and extent of a company's documentation of internal financial controls can have a significant effect on the auditor's strategy regarding the audit of internal financial control. This Section discusses how the auditor could adapt his or her audit strategy to obtain sufficient appropriate evidence in an environment with less formal documentation.

Audit strategy considerations relating to audit evidence

IG 19.43 The auditor must plan and perform the audit to obtain evidence that is sufficient to obtain reasonable assurance about whether significant deficiencies or material weaknesses exist as of the date specified in management's assessment. The auditor can obtain this evidence through direct testing or using the work of others, as appropriate. Procedures the auditor could perform to test operating effectiveness include a mix of inquiry of appropriate personnel, observation of the company's operations, inspection of relevant documentation, and re-performance of the control. The nature, timing, and extent of tests of controls depend on the risk associated with the controls. As the risk associated with the control being tested increases, the evidence that the auditor should obtain also increases.

Documentation of processes and controls

IG 19.44 Larger companies with complex operations are more likely to have formal documentation of their processes and controls, such as in-depth policy manuals and systems flowcharts of processes. In a smaller, less complex company, documentation of processes and controls might take a variety of forms. For example, information about processes and controls might be found in other documentation, such as memoranda, questionnaires, software manuals, source documents, or job descriptions. This documentation might not cover every process and might not be in a consistent form across all processes.

Where walkthroughs are performed, auditors could use those procedures to obtain an understanding of the flow of transactions affecting relevant assertions and to assess the design effectiveness of certain controls, even when documentation is limited.

Documentation of operating effectiveness of controls

IG 19.45 In a smaller, less complex business, the nature and extent of documentation of the operating effectiveness of controls may vary. Also, evidence of a control's operation might exist

only for a limited period. The type and availability of evidence regarding controls to be tested can affect the auditor's testing strategy. In particular, company documentation can influence the nature and timing of audit procedures performed. For example, the nature of some audit procedures e.g., document inspection, requires documentation. Also, the timing of some tests of controls might be determined, in part, based on when the evidence of the controls' operation is available.

Obtaining sufficient evidence about the operating effectiveness of controls can be challenging when there is limited documentation of their operation. In those situations, inquiry combined with other procedures, such as observation of activities, inspection of documentation produced or used by the controls, and re-performance of certain controls, might provide sufficient evidence about whether a control is effective.

As a practical matter, the auditor also needs to obtain documentation of the work of others to use that work to reduce the auditor's own testing.

Other considerations

IG 19.46 When auditing a smaller, less complex company with limited documentation, generally it is helpful to obtain an understanding of the nature and availability of audit evidence relating to internal financial controls as early in the audit process as practical. This understanding ordinarily includes consideration of existing documentation regarding –

- Company processes and procedures, particularly for transactions affecting relevant assertions and controls that the auditor is likely to select for testing.
- Monitoring of other controls performed by management or others. The auditor can then identify gaps in important documentation so alternatives can be explored. For example, if the CFO prepares contemporaneous documentation of certain controls and retains it for a limited period, the auditor might arrange to obtain access to that documentation for testing purposes. Early conversations with management about these matters can help provide auditors with the most flexibility in developing efficient and effective audit strategies.

If the company does not have formal documentation of its processes and controls, the auditor may consider whether other documentation is available before drafting formal descriptions of processes and controls for the audit documentation. A practical way to identify such other documentation is to look at the information that the company uses to run the business.

One of the practical considerations when selecting controls to test and determining the nature, timing, and extent of testing is the nature and availability of evidence of operating effectiveness. For example, if two or more controls adequately address the risk of misstatement for a relevant assertion, the auditor could select the control for which evidence of operating effectiveness can be obtained more readily.

Example - Obtaining information about processes and controls

IG 19.47 Scenario: A small manufacturer in the electronics industry periodically makes large purchases of specialty components. The company has established procedures covering the initiation, authorisation, and recording of these purchases, although the company has not

III.674 Auditing Pronouncements

developed in-depth policies and procedures manual. The company's procedures provide for completion of a form that describes the product requirements and payment terms and indicates how to record the purchase. The forms are reviewed and approved by the CEO and CFO before the purchase is executed.

When the goods are received, they are matched with the purchase form and accounted for as indicated on the form.

Audit Approach: The auditor inspects a copy of a completed purchase form and related documentation to obtain an initial understanding of the flow of the purchase transactions. He or she follows up with inquiries of personnel involved in the process of authorising, sending, and accounting for the purchases and traces the recording of the transactions through the accounting system. He or she summarises understanding of the transaction flow in a memo and includes a copy of a purchase form in the work papers.

The auditor uses his or her understanding of the purchase process to plan and perform tests of selected controls over the purchases.

Example – Obtaining evidence about operating effectiveness of controls

IG 19.48 Scenario: One control that management relies on with respect to the period-end financial reporting process is the CFO's review of the quarterly financial statements prepared by the controller. The CFO does not create separate documentation of the review but does retain copies of the financial statements with handwritten notes and other markings for reference purposes. The review comments are sent to the controller via email, and the company's email system retains the email messages. If errors are identified, the controller prepares adjusting entries, which are approved by the CFO.

Each quarter, the CFO and controller prepare and present to the audit committee a financial package, explaining significant trends in the company's financial condition, operating results, and cash flows, as well as comparisons to budgeted amounts and comparable prior periods.

Audit Approach: The auditor can draw upon multiple sources of audit evidence to evaluate whether the control is in place and operating effectively to detect errors in the period-end financial reporting process. The auditor can make inquiries of the CFO to obtain an understanding of the frequency, nature, timing, and level of precision of the CFO's review. He or she can corroborate this understanding and evaluate the operating effectiveness of the review by, for selected items, inspecting copies of the reviewed drafts of the financial statements, reviewing comments sent to the controller, and reviewing adjusting entries and supporting information. He or she can also talk to other employees to find out if the CFO contacts them to ask questions, what types of questions are asked, and how those questions are resolved. In addition, he or she can read the information in the financial package delivered to the audit committee and might observe the CFO's financial review with the audit committee, if the auditor attends the meetings in connection with the audit.

Auditing smaller, less complex companies with pervasive control deficiencies

IG 19.49 In some audits of internal financial control, auditors might encounter companies with numerous or pervasive deficiencies in internal financial controls. Smaller, less complex companies

can be particularly affected by ineffective entity-level controls, as these companies typically have fewer employees and fewer process-level controls.

Auditing internal financial controls in companies with pervasive deficiencies can be challenging. The auditor's strategy is influenced by the nature of the control deficiencies and factors such as the effect of the deficiencies on other controls and the availability of audit evidence. Although the facts and circumstances can vary significantly, the auditor might not be able to express an unqualified opinion on the effectiveness of internal financial controls in some of these situations.

Pervasive deficiencies that result in material weaknesses

IG 19.50 The auditor's objective in an audit of internal financial control is to express an opinion on the adequacy and operating effectiveness of the company's internal financial controls over financial reporting. Because a company's internal financial controls cannot be considered effective if one or more material weaknesses exist, to form a basis for expressing an opinion, the auditor must plan and perform the audit to obtain competent evidence that is sufficient to obtain reasonable assurance about whether material weaknesses exist as of the date specified in management's assessment.

Ordinarily, the auditor's strategy should include tests of controls as necessary to support a conclusion that internal financial controls are adequate and effective. However, the auditor's existing knowledge of the company or information obtained early in the audit process might lead an auditor to a preliminary judgement that internal financial controls is likely to be ineffective because of the presence of pervasive control deficiencies that result in one or more material weaknesses. In those situations, the auditor's strategy for testing selected controls may depend on the effect of the pervasive deficiencies on other controls, as discussed in the following paragraphs.

Considering the effect of pervasive control deficiencies on other controls

IG 19.51 When the auditor encounters pervasive control deficiencies, he or she might decide that those deficiencies also impair the effectiveness of other controls by rendering their design ineffective or by keeping them from operating effectively. For example, certain deficient entity-level controls, such as the following, might impair the effectiveness of other controls over relevant assertions:

- *Ineffective control environment (considering the risk profile of the company). An ineffective control environment can increase the risk associated with a control by rendering its design ineffective or preventing it from operating effectively. Also, certain controls in the control environment, such as maintaining financial reporting competencies, might be necessary for the effective functioning of other controls.*
- *Ineffective IT controls or information systems. Ineffective information systems could impair the effectiveness of certain IT-dependent controls (e.g., monitoring controls that rely on the reports produced by an ineffective information system).*
- *Pervasive lack of segregation of duties without appropriate alternative controls. When a person performs two or more incompatible duties, the design of some controls might be ineffective without appropriate alternative controls.*

III.676 Auditing Pronouncements

- *Frequent management override of controls. A control that is frequently overridden is less likely to operate effectively. The effectiveness of controls that depend on an overridden control also might be impaired.*

The top-down audit approach can help the auditor identify pervasive control deficiencies earlier in the audit process and take them into account in determining the audit approach for testing other controls.

The auditor's preliminary judgements regarding the effect of the pervasive control deficiencies can help determine the approach to gathering audit evidence. When the pervasive control deficiencies adversely affect other controls, the auditor may modify the planned testing of the other controls because less evidence generally is needed to support a conclusion that controls are not effective than a conclusion that controls are effective. For example, if a control is likely to be impaired because of another control's deficiency, the inquiries and observations during walkthroughs might provide enough evidence to conclude that the design of a control is deficient and thus could not prevent or detect misstatements. In some cases, limited testing of a control might be necessary (e.g., if a walkthrough has not been performed) to conclude that a control is not operating effectively. Also, detected misstatements from the audit of the financial statements could indicate that a control is not effective.

Some companies might have pervasive control deficiencies and still have effective controls over some relevant assertions. For the selected controls that are likely to be effective, the auditor should test those controls to obtain the evidence necessary to support a conclusion about their operating effectiveness. The pervasive control deficiencies may affect the risk associated with the controls selected for testing, and, in turn, the amount of audit evidence needed.

Scope limitation due to lack of sufficient audit evidence

IG 19.52 Pervasive deficiencies in a company's internal financial controls do not necessarily prevent an auditor from obtaining sufficient audit evidence to express an opinion on internal financial controls. If the auditor determines that sufficient evidence is available to express an opinion, the auditor should perform tests of those controls that are important to the auditor's conclusion about the effectiveness of the company's internal financial controls and evaluate the severity of the identified control deficiencies.

In some audits of companies with pervasive control deficiencies, the auditor could become aware that there is minimal available evidence about the design and operation of internal financial controls. Such situations could lead the auditor to conclude that the lack of available evidence constitutes a scope limitation that will prevent him or her from obtaining reasonable assurance necessary to express an opinion on internal financial controls, including identification of existing material weaknesses.

The auditor may issue a report disclaiming an opinion on internal financial controls as soon as the auditor concludes that a scope limitation will prevent the auditor from obtaining the reasonable assurance necessary to express an opinion.

The auditor is not required to perform any additional work before issuing a disclaimer when the auditor concludes that he or she will not be able to obtain sufficient evidence to express an opinion.

The auditor's report should disclaim an opinion on internal control and disclose the substantive reasons for the disclaimer. The report should also disclose the material weaknesses of which the auditor is aware.

Even if the auditor lacks sufficient evidence to express an opinion on internal financial control, the auditor might still be able to obtain sufficient evidence to perform an audit of the financial statements. The auditor should, however, take into account the control deficiencies and issues encountered in the audit of internal financial control in assessing control risk and determining the nature, timing, and extent of tests of accounts and disclosures in the audit of the financial statements.

Example – Pervasive deficiencies and testing of controls

IG 19.53 Scenario: A small company has a two-person staff that handles all of the accounting and financial reporting duties. The staff is competent in routine financial reporting matters but has difficulty with more complex accounting matters, such as valuation of stock-based compensation and income tax calculations and disclosures.

The lack of competencies in these areas has resulted in adjustments based on the auditor's identification of material misstatements.

Audit Approach: Based on the auditor's experience with the company, he or she expects that controls over the valuation/allocation and disclosures related to stock based compensation and income taxes will not be effective. For those assertions, the auditor obtains evidence about the respective controls during a walkthrough of the related process. Also, misstatements in those assertions were detected in the financial statement audit, and he or she observes that the controls failed to prevent or detect those misstatements. Based on this evidence, auditor concludes that the controls over those assertions are not effective.

With respect to routine financial reporting processes, such as cash receipts and disbursements, the auditor plans to perform tests of the selected controls to obtain enough evidence to support a conclusion that the respective controls are effective.

Example – Lack of sufficient audit evidence

IG 19.54 Scenario: A development stage company is devoted exclusively to research and development for a new product and currently generates no revenue. The financial staff consists of a CFO and accounting clerk. The company's principal accounting records consist of a bank book and payroll records, and the company has no documentation of policies and procedures. Most of its controls are undocumented supervisory checks by the CFO.

Late in the fourth quarter, a management dispute results in the resignation of the CFO and termination of the accounting clerk. Management hires an accountant on a temporary contract basis to prepare financial statements from the company's existing records and to help the company establish appropriate controls over its financial reporting functions. However, most of these controls were implemented near or shortly after year-end.

III.678 Auditing Pronouncements

Audit Approach: As the auditor begins trying to obtain an understanding of the company's internal financial controls and evaluate entity-level controls, he or she notes that there is minimal information available about the controls that existed at year-end.

Because of the turnover in financial reporting personnel, the auditor is unable to perform inquiries, observations, or other procedures to understand the flow of transactions and related controls in significant processes. The auditor identifies some material weaknesses, but he or she determines that the lack of evidence results in a scope limitation because he or she cannot obtain reasonable assurance that all of the existing material weaknesses are identified.

Accordingly, the auditor ceases further audit procedures in the audit of internal financial control. The auditor's report on internal financial controls contains a disclaimer of opinion and disclosure of the substantive reasons for the disclaimer and the material weaknesses that he or she identified.

IG 20 Reporting Considerations (Refer Paragraph 153–156 and 163)

IG 20.1 The auditor should modify the audit report on internal financial controls if any of the following conditions exist:

- a. The auditor has identified deficiencies in the design or operation of internal controls, which individually or in combination has been assessed as material weakness.
- b. There is a restriction on the scope of the engagement.

IG 20.2 A deficiency in internal control exists if a control is designed, implemented or operated in such a way that it is unable to prevent, or detect and correct, misstatements in the financial statements on a timely basis; or the control is missing. Such a misstatement may occur on an annual basis (either before or after an audit), or through interim financial reporting (e.g., quarterly results, which are un-audited).

IG 20.3 In evaluating the severity of a deficiency in internal financial controls, the auditor should primarily consider two factors: the likelihood that the deficiency will result in a financial misstatement, and the magnitude of such an outcome. Thus, this process is, in essence, an exercise of risk analysis. Like the generally accepted accounting principles (GAAP) that govern the preparation of financial statements, there are no clear bright-line tests based solely on quantitative measures for assessing a deficiency or combination of deficiencies as a significant deficiency or material weakness; qualitative measures must also be considered, and professional judgement is required.

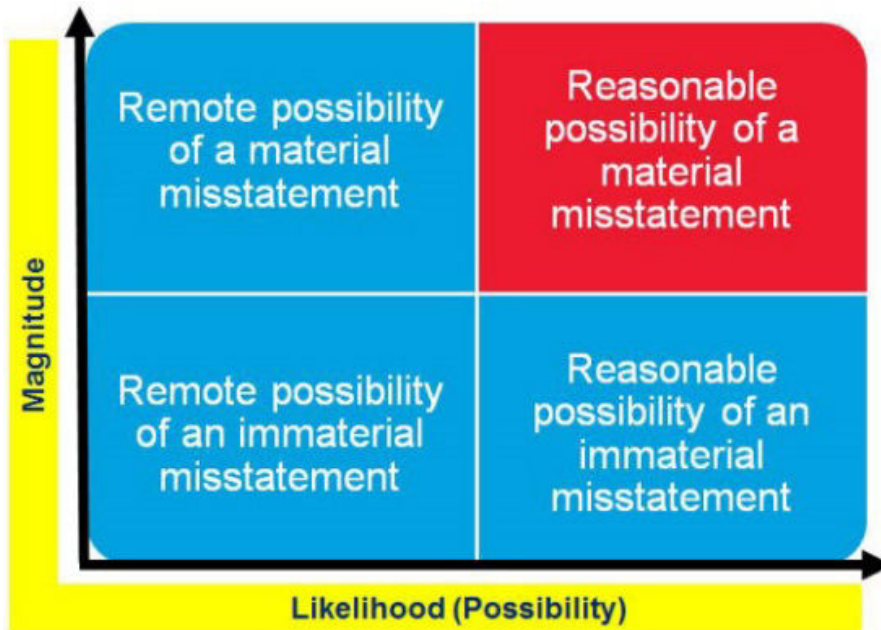

Figure: Evaluation of Deficiencies

Refer **Appendix V** for additional factors for evaluating deficiencies and examples of different categories of deficiencies.

Modified opinion on internal financial controls over financial reporting

IG 20.4 For purposes of this Guidance Note, the following terms have the meanings attributed below:

- (a) Pervasive – A term used, in the context of control deficiencies, to describe the effects on the financial statements of misstatements or the possible effects on the financial statements of misstatements, if any, that are undetected due to the internal controls not being adequate and / or not operating effectively. Pervasive effects on the internal financial controls over financial reporting are those that, in the auditor’s judgment:
- (i) are not confined to internal controls over specific elements, accounts or items of the financial statements;
 - (ii) if so confined, represent or could represent a substantial proportion of the financial statements or impacts the audit opinion on the financial statements of the company; or
 - (iii) in relation to disclosures, are fundamental to users’ understanding of the financial statements.
- (b) Modified opinion – A qualified opinion, an adverse opinion or a disclaimer of opinion.

Circumstances When a Modification to the Auditor’s Opinion on Internal Financial Controls Over Financial Reporting Is Required

III.680 Auditing Pronouncements

IG 20.5 The auditor shall modify the opinion in the auditor's report on internal financial controls over financial reporting when:

- (a) The auditor concludes that, based on the audit evidence obtained, the internal financial controls over financial reporting is designed, implemented or operated in such a way that it is unable to prevent, or detect and correct material misstatements in the financial statements on a timely basis; or the control is missing; or
- (b) The auditor is unable to obtain sufficient appropriate audit evidence to conclude that the internal financial controls over financial reporting is adequate and / or operating effectively to provide reasonable assurance that it is designed, implemented or operated in such a way that it is able to prevent, or detect and correct material misstatements in the financial statements on a timely basis.

Determining the Type of Modification to the Auditor's Opinion on Internal Financial Controls Over Financial Reporting

Qualified Opinion

IG 20.6 The auditor shall express a qualified opinion on Internal Financial Controls Over Financial Reporting when the auditor, having obtained sufficient appropriate audit evidence, concludes that such controls are designed, implemented or operated in such a way that it is unable to prevent, or detect and correct material misstatements in the financial statements on a timely basis; or the control is missing, but the effects/possible effects of the material weakness in such internal controls are material but is not pervasive to the financial statements. (Refer Scenario 1 and 3 in Example 2 of Appendix III)

Adverse Opinion

IG 20.7 The auditor shall express an adverse opinion on Internal Financial Controls Over Financial Reporting when the auditor, having obtained sufficient appropriate audit evidence, concludes that:

- (a) such controls are designed, implemented or operated in such a way that it is unable to prevent, or detect and correct material misstatements in the financial statements on a timely basis; or the control is missing, and the effects/possible effects of the material weakness in such internal controls are both material and pervasive to the financial statements, even if the audit opinion on the financial statements is unmodified; (Refer Scenario 2 and 4 in Example 2 of Appendix III)
- (b) the system of internal financial controls over financial reporting adopted by the Company does not consider / adequately consider the essential components of internal control as stated in Section III of Part B of this Guidance Note (Refer Scenario 5 in Example 2 of Appendix III); or
- (c) the audit opinion on the financial statements is required to be modified and such modification is also consequent to the material weakness in the company's internal financial controls over financial reporting. (Refer Example 4 of Appendix III) .

IG 20.8 The qualified or adverse opinion on internal financial controls over financial reporting may relate only to the operating effectiveness of such controls or may relate to both the adequacy and operating effectiveness of such controls, based on the audit evidence obtained.

Disclaimer of Opinion

IG 20.9 The auditor shall disclaim an opinion on the company's internal financial controls over financial reporting:

- (a) if the company has not established its system of internal financial control over financial reporting considering the essential components of internal control stated in this Guidance Note (Refer Scenario 1 in Example 3 of Appendix III); or
- (b) the auditor is unable to obtain sufficient appropriate audit evidence to express an opinion on the internal financial controls over financial reporting but is able to perform appropriate substantive procedures to express an opinion on the financial statements (Refer Scenario 2 in Example 3 of Appendix III); or
- (c) when the auditor is unable to obtain sufficient appropriate audit evidence on which to base the opinion on the company's internal financial controls over financial reporting, and / or the auditor concludes that consequent to the material weakness in such internal controls the possible effects on the financial statements of undetected misstatements, if any, could be both material and pervasive. (Refer Scenario 3 in Example 3 of Appendix III)

IG 20.10 When the auditor plans to issue a modified opinion and the limited procedures performed by the auditor caused the auditor to conclude that a material weakness exists, the auditor's report should also include –

- The definition of a material weakness as stated in this Guidance Note.
- The description of the material weakness identified in the company's internal financial controls over financial reporting. This description should provide the users of the audit report with specific information about the nature of the material weakness and its actual and potential effect on the preparation and presentation of the company's financial statements issued during the existence of the deficiency. This description should also address the requirements in paragraph 157.
- The consideration of the effect of the modified opinion on internal financial controls over financial reporting on the audit opinion on the financial statements of the company.

Effect of a modified report on internal financial controls over financial reporting on the audit of financial statements

IG 20.11 A modified report on internal financial controls over financial reporting does not in effect imply that the audit report on financial statements should also be qualified. In an audit of financial statements, the assurance obtained by the auditor is through both internal controls and substantive procedures.

III.682 Auditing Pronouncements

IG 20.12 Effect of Tests of Controls on Substantive Procedures: If, during the audit of internal financial controls, the auditor identifies a deficiency, he or she should determine the effect of the deficiency, if any, on the nature, timing, and extent of substantive procedures to be performed to reduce audit risk in the audit of the financial statements to an appropriately low level.

IG 20.13 Regardless of the assessed level of control risk or the assessed risk of material misstatement in connection with the audit of the financial statements, the auditor should perform substantive procedures for all relevant assertions. Performing procedures to express an opinion on internal financial controls does not diminish this requirement.

IG 20.14 If, as a result of the substantive procedures, the auditor is of the opinion that sufficient reliable audit evidence has been obtained to address the risk identified or gain assurance on the account balance being tested, the auditor should not qualify the audit opinion on the financial statements.

For example, if a material weakness is identified with respect to customer acceptance, credit evaluation and establishing credit limits for customers resulting in a risk of revenue recognition where potential uncertainty exists for ultimate realisation of the sale proceeds, the auditor may modify the opinion on internal financial controls in that respect. However, in an audit of financial statements, the auditor when performing substantive procedures obtains evidence of confirmation of customer balances and also observes that all debtors as at the balance sheet date have been subsequently realised by the date of the audit, the audit opinion on the financial statements should not be qualified, though the internal control deficiency exists.

Effect of Substantive Procedures on the Auditor's Conclusions About the Operating Effectiveness of Controls:

IG 20.15 In an audit of internal financial controls, the auditor should evaluate the effect of the findings of the substantive auditing procedures performed in the audit of financial statements on the effectiveness of internal financial controls. This evaluation should include, at a minimum:

- The auditor's risk assessments in connection with the selection and application of substantive procedures, especially those related to fraud.
- Findings with respect to illegal acts and related party transactions.
- Indications of management bias in making accounting estimates and in selecting accounting principles.
- Misstatements detected by substantive procedures - The extent of such misstatements might alter the auditor's judgement about the effectiveness of controls.

IG 20.16 To obtain evidence about whether a selected control is effective, the control must be tested directly; the effectiveness of a control cannot be inferred from the absence of misstatements detected by substantive procedures. The absence of misstatements detected by substantive procedures, however, should guide the auditor's risk assessments, and in determining the testing necessary to conclude on the effectiveness of a control.

Interpretation of an unmodified report on financial statements with a modified report on internal financial controls over financial reporting

IG 20.17 When an auditor issues an unmodified opinion on the company's financial statements, this is a representation to the users of financial statements that the auditor has followed applicable auditing and related professional standards so as to allow the auditor to conclude with reasonable assurance that the financial statements are in conformity with the generally accepted accounting principles in all material respects. An unmodified audit opinion is not a guarantee of error-free financials, but is rather the conclusion by an auditor – using audit procedures and professional judgement that are reasonable to the circumstances – that the statements are fairly presented.

IG 20.18 Neither the auditor nor the company is required to disclose whether the audit process itself revealed financial statement errors that were corrected before the statements were approved. The degree to which the auditor is involved in requiring management to correct financial statements prior to their issuance is an indication of whether the company – using only its own personnel (either employees or third party consultants) – will produce financial information that is materially accurate.

IG 20.19 Whilst the auditors apply both test of controls and substantive testing to gain assurance on the financial statements, the management relies solely on its internal financial controls when preparing financial statements. The ability of a company to accurately describe its own financial condition is particularly relevant when the company discloses un-audited financial information, as in quarterly result filed with the Stock Exchanges. Thus, while the audit report of a company's financial statements may be unmodified, this provides little information to those outside the company as to whether other financial information (such as interim financial information) is of similar reliability.

Scope limitations

IG 20.20 The auditor can express an opinion on the company's internal financial controls only if the auditor has been able to apply the procedures necessary in the circumstances. If there are restrictions on the scope of the engagement, the auditor should withdraw from the engagement or disclaim an opinion. A disclaimer of opinion states that the auditor does not express an opinion on the adequacy or effectiveness of internal financial controls.

IG 20.21 When disclaiming an opinion because of a scope limitation, the auditor should state that the scope of the audit was not sufficient to warrant the expression of an opinion and, in a separate paragraph or paragraphs, the substantive reasons for the disclaimer. The auditor should not identify the procedures that were performed nor include the statements describing the characteristics of an audit of internal financial controls (paragraph 157 (f), (g), and (h)); to do so might overshadow the disclaimer.

IG 20.22 If the auditor concludes that he or she cannot express an opinion because there has been a limitation on the scope of the audit, the auditor should communicate, in writing, to management

and the audit committee⁶ that the audit of internal financial controls cannot be satisfactorily completed.

Impact of modified opinion on internal financial controls over financial reporting in subsequent interim period financial reporting

IG 20.23 As stated in paragraph IG 20.19, the management relies solely on its internal financial controls when preparing financial statements and as such the ability of a company to accurately describe its own financial condition is dependent on the adequacy and operating effectiveness of the internal financial controls.

IG 20.24 If the auditor's report for the audit of internal financial controls under the Act for the financial year proceeding the interim period was modified consequent to material weakness, the auditor should consider the effect of such modification when carrying out a review of interim financial statements / information under SRE 2400 or SRE 2410 issued by the Institute of Chartered Accountants of India.

IG 20.25 Accordingly, the auditor should carry out additional procedures to determine if the material weakness and the significant deficiency in the internal financial controls as reported in the previous financial year have been remediated. The auditor should consider the guidance provided for testing design of controls, testing operating effectiveness of controls and remediation testing in determining the timing, nature and extent of testing.

IG 20.26 If after performing such additional procedures as explained in paragraph IG 20.25, the auditor concludes that the significant deficiency or material weakness in internal control reported earlier has not been remediated, the auditor shall modify his or her report on the interim financial statements / information describing the material weakness reported earlier and stating that based on the procedures carried out by him or her, the said material weakness in internal control does not appear to have been remediated. If any of the significant deficiencies reported to those charged with governance in the earlier year has not been remediated and such deficiency in control is considered as a material weakness in the current period, the report of the auditor on the interim financial statements / information should describe the deficiency and state that the same is viewed as a material weakness in the current interim period.

IG 20.27 If the interim financial statements are subject to audit, the auditor should comply with the Standards on Auditing for reporting on such interim financial statements. In planning and performing the audit, the auditor should consider the effect of the significant deficiency or material weakness reported in the previous financial year on the interim financial statements. Since such audit is not carried out as per the provisions of the Act, the auditor is not required to separately test and report on the internal financial controls in the interim period.

IG 21 Understanding and Evaluating Financial Reporting Process

IG 21.1 The financial reporting process, while an undefined term in the professional standards, generally refers to the process that begins when the underlying flows of transactions at the

⁶ In case of a small or a one person company as defined in the Act, since there is no requirement to have an audit committee, the auditor would make such communication to the Board of Directors.

account/ assertion level culminate (e.g., typically in a subsidiary ledger or the general ledger). For a company, the financial reporting process encompasses the activities necessary to prepare, review, and approve the quarterly and annual financial statements, including the required disclosures, for filing in accordance with the required rules and regulations.

IG 21.2 Because of its importance to financial reporting and to the auditor's opinions on internal financial controls and the financial statements, the auditor must evaluate the period-end financial reporting process. The period-end financial reporting process includes the following:

- Procedures used to enter transaction totals into the general ledger;
- Procedures related to the selection and application of accounting policies;
- Procedures used to initiate, authorize, record, and process journal entries in the general ledger;
- Procedures used to record recurring and non-recurring adjustments to the annual and quarterly financial statements; and
- Procedures for preparing annual and quarterly financial statements and related disclosures.
- With regard to the consolidated financial statements, the understanding the financial reporting process would include understanding the procedures for:
 - a) identification of subsidiaries, associates and joint ventures that would form part of the consolidation process;
 - b) identification of inter-company transactions for elimination and elimination of any unrealised profits on such transactions;
 - c) identification and quantification of minority interest;
 - d) ensuring consistency of accounting policies amongst the consolidating entities;
 - e) ensuring consistency of the classification of account balances amongst the consolidating entities;
 - f) recording recurring and non-recurring adjustments to the annual and quarterly consolidated financial statements; and
 - g) ensuring appropriate disclosures in the consolidated financial statements.
- In addition to the above, the auditor should also assess the impact, if any, of the subject matter of any qualification, adverse opinion or disclaimer stated by any of the component auditors in their respective components, and any remedial measures effected by the parent company to mitigate the effect of such observations in the component audit reports on the financial reporting process for the consolidated financial statements.

IG 21.3 As part of evaluating the period-end financial reporting process, the auditor should assess:

- Inputs, procedures performed, and outputs of the processes the company uses to produce its annual and quarterly financial statements;

III.686 Auditing Pronouncements

- The extent of information technology ("IT") involvement in the period-end financial reporting process;
- Who participates from management;
- The locations involved in the period-end financial reporting process;
- The types of adjusting and eliminating entries; and
- The nature and extent of the oversight of the process by management, the board of directors, and the audit committee.

Note: The auditor should obtain sufficient evidence of the effectiveness of those quarterly controls that are important to determining whether the company's controls sufficiently address the assessed risk of misstatement to each relevant assertion as of the date of management's assessment. However, the auditor is not required to obtain sufficient evidence for each quarter individually.

Understanding the financial reporting process

IG 21.4 The auditor is required to obtain a sufficient understanding of the processes and flows of transactions for significant accounts and disclosures to validate the points at which a material misstatement could occur, and for identifying the controls that mitigate those potential misstatements. His/her understanding of the flows of transactions and processes of the significant accounts and disclosures begins at the initiation of a transaction and concludes with its presentation in the financial statements. For practical purposes, the auditor typically bifurcate understanding of significant accounts and disclosures (including the process for consolidating and preparing the financial statements) into two parts: (1) the account/assertion level process and (2) the financial reporting process (depicted in Figure below):

- **Significant Accounts:** Separately understand the flows of transactions and processes (and related controls) for each significant account as part of the account /assertion level process until the transactions reach an appropriate "hand-off" point to the financial reporting process (e.g., a subsidiary ledger or the general ledger).
- **Disclosures:** Understand the flows of transactions and processes (and related controls) for the preparation of each disclosure as part of the financial reporting process (although the controls related to the underlying transactions and events may have already been addressed at the account/assertion level).

Note: Disclosures may alternatively be addressed in conjunction with the related significant account balance at the account/assertion level until they are accumulated at the financial reporting process level.

- **Preparation of the Financial Statements:** Understand the processes (and related controls) for the preparation, review, and approval of the financial statements as part of the financial reporting process.

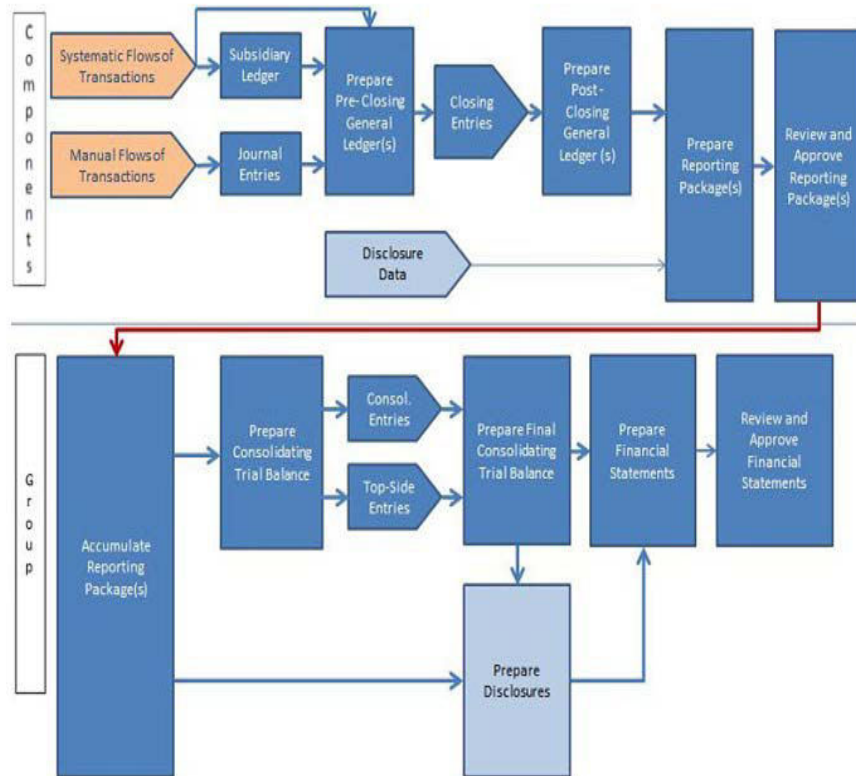

Figure: Understanding financial reporting process

IG 21.5 Similar to how the auditor obtains an understanding of the processes and relevant controls relating to individual account balances and disclosures, performing a walkthrough of the financial reporting process is likely to be the most effective way to understand the financial reporting process from beginning-to-end, and provides the basis for identifying the risks of material misstatement and the relevant controls, any relevant IPE, and any relevant application systems.

IG 21.6 Reviews and financial analysis of the draft financial statements and related disclosures by management, the disclosure committee, the audit committee, or the board of directors are important controls that support their assertion and certifications. However, while these controls may be considered “direct” controls, they are often not designed to operate at a sufficient level of precision to address a risk of material misstatement by themselves (e.g., the purpose of such a control is to identify anomalies, not verify that the amounts are fairly stated). Nonetheless, these controls are typically selected for testing, as they are important to the overall reliability of financial reporting even when they are not sufficiently precise on their own.

Understanding the application systems and controls over financial reporting process

IG 21.7 Many entities use technology to automate aspects of the financial reporting process. Identifying the relevant application systems that support the financial reporting processes is

III.688 Auditing Pronouncements

necessary to identify the IT risks and general IT controls or other controls (e.g., direct controls) that are relevant to the financial reporting process.

Considerations when identifying controls relevant to the financial reporting process may include:

- Automated interfaces: Data typically flows into the general ledger either systematically through automated interfaces or via journal entries that are manually input. When the system users rely on automated interfaces (i.e., the electronic transfer of transactions and data between systems), similar to an automated control, auditor subject the automated interface to testing. The extent of testing depends in part on whether the application is subject to effective general IT controls.
- Consolidation applications/tools: Financial reporting application systems (e.g., Hyperion) may be used to automate the consolidation process and may interface with one or more data warehouses or other application systems. Accordingly, when the system users rely on the application's automated controls, the reliability of the data, and/or the reports generated by the application systems (which are IPE), the application is relevant to ICFR and the relevant IT risks and controls (e.g., general IT or other similar controls) are identified.

For example, the entity uploads the financial data received from its branches into Hyperion in which the consolidation with head office is performed as well as the output of financial data for analysis. Hyperion (including the underlying data warehouse) is within the scope of the general IT controls; therefore, the identified IT risks are addressed by the general IT controls that operate over Hyperion.

For example, the entity uploads data from the general ledger system into a data warehouse that is not within the scope of the general IT controls. Therefore, the entity implemented controls such as manual input/output controls to verify that the data coming out of the data warehouse agrees with the data that was uploaded into the data warehouse and we test the reports (which are IPE) more extensively since the application is not subject to general IT controls.

In addition, review-type controls (e.g., a review of financial information and data by management, the disclosure committee or the board of directors) are often dependent upon the accuracy and completeness of the reporting packages and data (which are IPE) derived from these applications/tools; therefore, consideration and testing of the design and operating effectiveness of the relevant controls, including the general IT controls, may also be relevant for purposes of evaluating the effectiveness of such review-type controls.

IG 21.8 The auditor should obtain an understanding of the information system, including the related business processes, relevant to financial reporting, including:

- The classes of transactions in the company's operations that are significant to the financial statements;
- The procedures, within both automated and manual systems, by which those transactions are initiated, authorized, processed, recorded, and reported;

- The related accounting records, supporting information, and specific accounts in the financial statements that are used to initiate, authorize, process, and record transactions;
- How the information system captures events and conditions, other than transactions that are significant to the financial statements; and
- The period-end financial reporting process.

Understanding accounting policies

IG 21.9 The company's process and controls to select and apply its accounting principles, financial reporting policies, and related disclosures, underpin effective financial reporting. Accordingly, the auditor is required to obtain an understanding of the entity's selection and application of accounting policies and principles, including related disclosures.

The following matters, if present, are relevant to the necessary understanding of the company's selection and application of accounting principles, including related disclosures:

- Significant changes in the company's accounting principles, financial reporting policies, or disclosures and the reasons for such changes;
- The financial reporting competencies of personnel involved in selecting and applying significant new or complex accounting principles;
- The accounts or disclosures for which judgment is used in the application of significant accounting principles, especially in determining management's estimates and assumptions;
- The effect of significant accounting principles in controversial or emerging areas for which there is a lack of authoritative guidance or consensus;
- The methods the company uses to account for significant and unusual transactions; and
- Financial reporting standards and laws and regulations that are new to the company, including when and how the company will adopt such requirements.

For internal financial reporting purposes, the auditor considers the company's controls over the selection and application of GAAP (i.e., the company's controls over applying GAAP to new transactions or events or implementing new GAAP requirements). Implicit in this evaluation is the auditor's evaluation of the competence of those individuals responsible for the selection, development, and application of such policies and principles.

Understanding the process for recording journal entries

IG 21.10 The process for initiating, reviewing, authorizing and recording journal entries is integral to the financial reporting process. For many entities, this process may involve a combination of automated and manual procedures for transferring transactions and data from a source (e.g., sub-ledger, manual spreadsheet, analysis) to the general ledger.

Many entities utilise different journal entry types, for example:

III.690 Auditing Pronouncements

- Entries to record transaction activity
- Routine closing entries
- Non-routine closing entries
- Consolidating and eliminating entries
- Top-side entries

When such entries are subject to different processes and controls, they are evaluated and tested separately; that is, it is not appropriate to design a testing strategy on the basis of the controls being common if the characteristics of a common control are not met.

IG 21.11 In understanding and testing the relevant controls over the journal entry process, area based considerations specific to journal entries include the following:

- Segregation of duties (e.g., who prepares, reviews and posts entries)
- The review and approval process, including the purpose of the review (e.g., the level of management at which the review is performed “reasonableness” review versus a detailed review of the supporting documentation)
- Adequacy of the supporting documentation for the journal entry to enable a reviewer to determine whether the entry is appropriate
- Competence of the preparer
- Competence and authority of the reviewer.

IG 21.12 Management override of controls over journal entries is a presumed risk of fraud (and therefore a significant risk) that is addressed by controls at either the financial statement level (e.g., entity-level controls designed to address the risk of management override of controls) or the account balance level for each account. Accordingly, auditor focuses additional attention on the effectiveness of the design and the operating effectiveness of controls that mitigate such risk.

Understanding the process for disclosures

IG 21.13 The auditor identifies which disclosures are significant disclosures (and therefore included in the scope of a combined audit of internal financial controls over financial reporting and financial statements), then identify the relevant assertions for each significant disclosure. As the GAAP requirements are not applicable to immaterial items, it would be rare for a disclosure in an entity's financial statements not to be considered a significant disclosure. The relevant assertions for presentation and disclosure are as follows:

- Occurrence and rights and obligations — Disclosed events, transactions, and other matters have occurred and pertain to the entity.
- Completeness — All disclosures that should have been included in the Financial Statements have been included.
- Classification and understandability — Financial information is appropriately presented and described, and disclosures are clearly expressed.

- Accuracy and valuation — Financial and other information are disclosed fairly and at appropriate amounts.

There are two key considerations when developing the audit approach for disclosures:

- Identify the process steps (and controls) that are unique to each disclosure (i.e., when the process, risks and controls are not common).

For example, the preparation of the legal disclosure may be subject to different processes, risks and controls than the preparation of the stock compensation disclosures, in which case those relevant controls would be subject to testing separately. However, the use of a GAAP disclosure checklist is an example of a control that is performed on an overall basis (and therefore the control operates with respect to all disclosures).

- Identify which disclosures are derived from transactions or events for which auditor has already tested the relevant controls.

For example, the inventory footnote is typically derived from data within the general ledger. Since auditor has already tested the relevant controls over inventory into the general ledger, auditor only needs to test the controls over the accuracy and completeness of the presentation of the footnote in the draft financial statements for ICFR purposes.

Illustrative Engagement Letter

(Referred to in Paragraph 75)

Agreeing the terms of audit engagement for the audit of internal financial controls

The following factors need to be considered by an auditor when agreeing the terms of an audit engagement for the audit of internal financial controls. These factors are in addition to those stated in SA 210 "Agreeing the terms of Audit Engagements" for an audit of the financial statements.

1. In order to establish whether the preconditions for an audit of internal financial controls are present, the auditor shall:

- (a) Obtain the agreement of management that it acknowledges and understands its responsibility:
 - (i) For laying down internal financial controls to be followed by the company;
 - (ii) For ensuring that such internal financial controls are adequate and are operating effectively; (this is in addition to the requirement in Paragraphs A15 to A18 of SA 210;
 - (iii) To provide the auditor with:
 - Access to all information, such as records and documentation, and other matters that are relevant to their assessment of internal financial controls;
 - Additional information that the auditor may request from management for the purpose of the audit; and
 - Unrestricted access to persons within the entity from whom the auditor determines it necessary to obtain audit evidence.

Determining the acceptability of the internal financial controls criteria

2. Factors that are relevant to the auditor's determination of the acceptability of the internal financial controls criteria include:

- a) Whether the aforesaid controls are based on the essential components of internal controls as stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.
- b) The nature of the entity (for example, whether it is a business enterprise, or not for profit organization);

- c) The size of the entity (for example, internal controls in a smaller entity are comparatively lesser than that of a large entity);
- d) Whether the entity is listed or unlisted; and
- e) Whether law or regulation prescribes any requirement for internal financial controls.

Limitation on scope prior to audit engagement acceptance

3. If management or those charged with governance impose a limitation on the scope of the auditor's work in the terms of a proposed audit engagement such that the auditor believes the limitation will result in the auditor disclaiming an opinion on the internal financial controls, the auditor shall not accept such a limited engagement as an audit engagement, unless required by law or regulation to do so.

Agreement on audit engagement terms

4. The agreed terms of the audit engagement shall be recorded in an audit engagement letter or other suitable form of written agreement and shall include:

- (a) The objective and scope of the audit of the internal financial controls;
- (b) The responsibilities of the auditor;
- (c) The responsibilities of management;
- (d) Identification of the applicable criteria to be applied for establishing the internal financial controls; and
- (e) Reference to the expected form and content of any reports to be issued by the auditor and a statement that there may be circumstances in which a report may differ from its expected form and content.

Form and content of the audit engagement letter

5. The form and content of the audit engagement letter may vary for each entity. Information included in the audit engagement letter may be based on SA 210. The auditor may issue a combined engagement letter for reporting on financial statements and reporting on internal financial controls or a separate engagement letter for each. In addition to including the matters required by SA 210, an audit engagement letter may make reference to, for example:

- The agreement of management's responsibilities for establishing and maintaining adequate and effective internal financial controls based on the control criteria [for example, "the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India".] for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information.

III.694 Auditing Pronouncements

- The agreement of management to make available to the auditor their evaluation and assessment of the adequacy and effectiveness of the company's internal financial controls, based on the control criteria as mentioned above.
- The agreement of management to inform the auditor of any communications from regulatory agencies concerning non-compliance with or deficiencies in financial reporting practices.
- The agreement of providing management's conclusion over the company's internal financial controls based on the control criteria set above as of the balance sheet date;
- The agreement of providing the component auditors' report under section 143(3)(i) in the case of components that are companies covered under the Companies Act, 2013 that form part of the consolidated financial statements of the parent company

Example of a Separate Audit Engagement Letter for Audit of Internal financial controls over financial reporting

The following is an example of an engagement letter for an audit of internal financial controls over financial reporting in the case of standalone financial statements that is separate from the engagement letter for an audit of the financial statements prepared in accordance with the Accounting Standards notified under Section 133 of the Companies Act, 2013. This letter is not authoritative but is intended only to be a guide that may be used in conjunction with the considerations outlined in this Guidance Note and SA 210. It will need to be varied according to individual requirements and circumstances.

To the Board of Directors of ABC Company Limited:

The objective and scope of the audit

You have requested that I / we carry out an audit of the internal financial controls over financial reporting of ABC Company Limited (the 'Company') as at March 31, 20X1 [balance sheet date] in conjunction with our audit of the standalone and consolidated financial statements of the Company for the year ended on that date.

I am/We are pleased to confirm my / our acceptance and my / our understanding of the audit engagement by means of this letter. My / Our audits will be conducted with the objective of expressing our opinion under Section 143(3)(i) of the Companies Act, 2013 ("2013 Act") on the adequacy of the internal financial controls system over financial reporting and the operating effectiveness of such controls as at March 31, 20X1 based on the internal control *criteria* established by you.

Audit of internal financial controls over financial reporting

I / We will conduct our audit of the internal financial controls over financial reporting in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting ("the

Guidance Note”) and the Standards on Auditing issued by the Institute of Chartered Accountants of India (ICAI) and deemed to be prescribed by the Central Government in accordance with Section 143(10) of the 2013 Act, to the extent applicable to an audit of internal financial controls over financial reporting. These Guidance Note and Standards require that I / we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness as at the balance sheet date.

An audit of internal financial controls over financial reporting involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness.

The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

Inherent limitations in an audit of internal financial controls over financial reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management’s responsibility

My / Our audit will be conducted on the basis that [management and, where appropriate, those charged with governance] acknowledge and understand that they have responsibility:

- (a) For establishing and maintaining adequate and effective internal financial controls based on [state criteria] [for example, “the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India”] for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.
- (b) To provide me / us with:
 - (i) Access, at all times, to all information, including the books, account, vouchers and other records and documentation, of the Company, whether kept at the head office of the company or elsewhere, of which [management] is aware that is

III.696 Auditing Pronouncements

relevant to the preparation of the financial statements such as records, documentation and other matters;

- (ii) All information, such as records and documentation, and other matters that are relevant to my / our assessment of internal financial controls;
 - (iii) Management's evaluation and assessment of the adequacy and effectiveness of the company's internal financial controls, based on the control criteria [mention the control criteria] and all deficiencies, significant deficiencies and material weaknesses in the design or operations of internal financial controls identified as part of management's evaluation.
 - (iv) Additional information that I / we may request from [management] for the purpose of the audit.
 - (v) Unrestricted access to persons within the entity from whom I / we determine it necessary to obtain audit evidence. This includes my / our entitlement to require from the officers of the Company such information and explanations as I / we may think necessary for the performance of my / our duties as auditor.
 - (vi) Any communications from regulatory agencies concerning non-compliance with or deficiencies in financial reporting practices.
 - (vii) Management's conclusion over the company's internal financial controls based on the control criteria set above as at the balance sheet date [insert date].
 - (viii) Informing me / us of significant changes in the design or operation of the Company's internal financial controls that occurred during or subsequent to the date being reported on, including proposed changes being considered.
 - (ix) Providing me / us with the component auditors' report under section 143(3)(i) in the case of components that are companies covered under the Companies Act for the purposes of our reporting in the case of the consolidated financial statements of the Company.
- (c) As part of my / our audit process, I / we will request from [management and, where appropriate, those charged with governance], written confirmation concerning representations made to me / us in connection with the audit.

I / We also wish to invite your attention to the fact that my / our audit process is subject to 'peer review' / 'quality review' under the Chartered Accountants Act, 1949 to be conducted by an Independent reviewer. The reviewer may inspect, examine or take abstract of my / our working papers during the course of the peer review.

Reporting

My / Our audit report will be issued pursuant to the requirements of Section 143(3)(i) of the Act. The form and content of my / our report may need to be amended in the light of my / our audit findings.

Our opinion on the adequacy and operating effectiveness of internal financial controls over financial reporting in the case of the consolidated financial statements of the Company, in so far as it relates to subsidiary companies, jointly controlled companies and associate companies incorporated in India, will be based solely on the reports of the auditors of such companies.

[Insert any other information, such as fee arrangements, billings and other specific terms, as appropriate.]

[Any other relevant information]

This letter should be read in conjunction with my / our letter dated ___ for the audit of the standalone and consolidated financial statements of the Company under the Act.

I / We look forward to full cooperation from your staff during my / our audits.

Please sign and return the attached copy of this letter to indicate your acknowledgement of, and agreement with, the arrangements for my / our audit of the internal financial controls over financial reporting including our respective responsibilities.

Illustrative Management Representation Letter for Matters Relating to Audit of internal financial controls over financial reporting

(Referred to in paragraphs 150 - 152)

The following illustrative letter includes written representations that are required by this Guidance Note and SA 580 “Written Representations” and other Standards on Auditing as applicable to an audit of internal financial controls over financial reporting, which are in effect as at _____ [balance sheet date]. It is assumed in this illustration that the relevant internal financial controls are based on the essential components of internal control identified in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting, issued by the Institute of Chartered Accountants of India; and that there are no exceptions to the requested written representations. If there were exceptions, the representations would need to be modified to reflect the exceptions.

(Entity Letterhead)

(To Auditor)

(Date)

This representation letter is provided in connection with your audit of the internal financial controls over financial reporting in the audit of ABC Company Limited (“the Company”) in conjunction with your audit of the standalone/ consolidated financial statements of the Company for the year ended March 31, 20X1, for the purpose of expressing an opinion as to whether the Company had, in all material respects, an adequate internal financial controls system over financial reporting and the operating effectiveness of such controls in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (“the Guidance Note”) and the Standards on Auditing issued by the Institute of Chartered Accountants of India (ICAI) and deemed to be prescribed by the Central Government in accordance with Section 143(10) of the 2013 Act, to the extent applicable to an audit of internal financial controls over financial reporting.

We confirm that to the best of our knowledge and belief, having made such inquiries as we considered necessary for the purpose of appropriately informing ourselves:

1. We are responsible for establishing and maintaining adequate and effective internal financial controls based on [mention control criteria] and the preparation and presentation of the financial statements as set out in the terms of the audit engagement dated [insert date] and, in particular, the assertions to you on the internal financial controls in accordance with the _____ [for example, “the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India”].

2. We have performed an evaluation and made an assessment of the adequacy and effectiveness of the company’s internal financial controls and based on the following control criteria [mention the control criteria].

3. We have not used the procedures performed by you during the audit of internal financial controls over financial reporting as part of the basis for our assessment of the effectiveness of internal financial controls.
4. Based on the assessment carried out by us and the evaluation of the results of the assessment, we conclude that the Company has adequate internal financial controls system that was operating effectively as at the March 31, 20X1 [balance sheet date] (or) Except for the below mentioned deficiencies noted during our assessment and evaluation of internal financial controls, the other relevant controls were determined adequate and were operating effectively as at March 31, 20X1 [balance sheet date].
 - a. (brief of design deficiencies)
 - b. (brief of deficiencies in operating effectiveness)
5. We have disclosed to you all deficiencies in the design or operation of internal financial controls identified as part of management's evaluation, including separately disclosing to you all such deficiencies that we believe to be significant deficiencies or material weaknesses in internal financial controls in paragraph [4].
6. There were no instances of fraud resulting in a material misstatement to the company's financial statements and any other fraud that does not result in a material misstatement to the company's financial statements but involves senior management or management or other employees who have a significant role in the company's internal financial controls. (or) The following instances of fraud that resulted in material misstatement of financial statements in earlier years and frauds involving senior management or management or other employees who have a significant role in the company's internal financial controls were noted: (list instances and amounts involved).
7. The control deficiencies identified in the previous engagement of audit of internal financial controls and communicated to the Company and those charged with governance have been remediated, except for the following: (list control deficiencies not remediated as at the balance sheet date) (This issue is not applicable in the first year when the Company is subject to an audit of internal financial controls under the Companies Act, 2013)
8. There have been no communications from regulatory agencies concerning non-compliance with or deficiencies in financial reporting practices.
9. We have provided you with:
 - All information, such as records and documentation, and other matters that are relevant to your assessment of internal financial controls;
 - Additional information that you have requested from us; and
 - Unrestricted access to those within the entity.
 - Audit reports of the component auditors, including their report under Section 143(3)(i) of the Act for the following subsidiary companies, jointly controlled companies and associate companies to whom reporting under Section 143(3)(i) is applicable:

III.700 Auditing Pronouncements

- There are no other subsidiary companies, jointly controlled companies and associate companies of the company to whom reporting under Section 143(3)(i) is applicable and whose auditors have not issued their report under Section 143(3)(i) of the Act.
- In the case of the following subsidiary companies, jointly controlled companies and associate companies of the company to whom reporting under Section 143(3)(i) is applicable, the respective component's year end is other than that of the Company:

With respect to these components, we have provided to you the audit reports of the component auditors, including their report under Section 143(3)(i) of the Act for their respective financial year under the Act that has been considered in the preparation of the consolidated financial statements of the Company.

10. There are no changes in the internal financial controls system from March 31, 20X1 [balance sheet date] till the date of this representation letter. (or) The following changes have been made to the internal financial controls system since March 31, 20X1 [balance sheet date] and the date of this letter: (list changes and reason for the change).

11. These changes include corrective actions taken by us with regard to significant deficiencies or material weaknesses noted with respect to the following: (list significant deficiency or the material weakness and the related change in internal controls).

12. The following changes to internal financial controls system have been proposed as on date of this representation letter but have not yet been implemented: (list proposed changes and reason for the proposed change).

13. The changes to the internal financial controls since March 31, 20X1 [balance sheet date] and the proposed changes that are under consideration by the Company do not impact our assessment, evaluation and conclusion of the internal financial controls system as at March 31, 20X1 [balance sheet date]

14. [Any other matters that the auditor may consider appropriate.]

APPENDIX III

Illustrative Reports on Internal Financial Controls Over Financial Reporting

(Referred to in paragraphs 157 - 164)

Example 1 – Separate Reports

The following is an **example of separate unmodified audit report for an audit of internal financial controls over financial reporting in the case of standalone financial statements**. This report is not authoritative but is intended only to be a guide that may be used in conjunction with the considerations outlined in this Guidance Note and SA 700 “Forming an Opinion and Reporting on financial Statements”. The report is also not an exhaustive report which includes all aspect of reporting by the auditor under Sub-sections 2 and 3 of Section 143 of the Companies Act, 2013. It will need to be varied according to individual requirements and circumstances.

ANNEXURE TO THE INDEPENDENT AUDITOR’S REPORT OF EVEN DATE ON THE STANDALONE FINANCIAL STATEMENTS OF ABC COMPANY LIMITED

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

I / We have audited the internal financial controls over financial reporting of ABC Company Limited (“the Company”) as of March 31, 20X1 in conjunction with my / our audit of the standalone financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on _____ [for example, “the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India”.] These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors’ Responsibility

My / Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on my / our audit. I / We conducted my / our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance

III.702 Auditing Pronouncements

Note”) and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that I/we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

My/Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. My/Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

I / We believe that the audit evidence I/we have obtained is sufficient and appropriate to provide a basis for my /our audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In my / our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 20X1, based on _____ [for example, “the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India”].

Example 2 – Separate Reports

The following is an example of separate modified (qualified / adverse) audit report for an audit of internal financial controls over financial reporting and not impacting the audit opinion on the standalone financial statements of the company. This report is not authoritative but is intended only to be a guide that may be used in conjunction with the considerations outlined in this Guidance Note and SA 700 “Forming an Opinion and Reporting on Financial Statements”. The report is also not an exhaustive report which includes all aspect of reporting by the auditor under Sub-sections 2 and 3 of Section 143 of the Companies Act, 2013. It will need to be varied according to individual requirements and circumstances.

ANNEXURE TO THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE STANDALONE FINANCIAL STATEMENTS OF ABC COMPANY LIMITED

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

I / We have audited the internal financial controls over financial reporting of ABC Company Limited ("the Company") as of March 31, 20X1 in conjunction with my / our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on _____ [for example, "the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India"]. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

My / Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on my/our audit. I/We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, to the extent applicable to an audit of internal financial controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that I / we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

My / Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. My / Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

I / We believe that the audit evidence I / we have obtained is sufficient and appropriate to provide a basis for my / our qualified / adverse audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Scenario 1 - Qualified Opinion on adequacy (and therefore operating effectiveness) of Internal Financial Controls Over Financial Reporting

Qualified opinion

According to the information and explanations given to me / us and based on my / our audit, the following material weakness/es has / have been identified as at March 31, 20X1:

- a) The Company did not have an appropriate internal control system for customer acceptance, credit evaluation and establishing customer credit limits for sales, which could potentially result in the Company recognising revenue without establishing reasonable certainty of ultimate collection.
- b) [list other deficiencies identified]

A 'material weakness' is a deficiency, or a combination of deficiencies, in internal financial control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.

In my / our opinion, except for the effects/possible effects of the material weakness/es described above on the achievement of the objectives of the control criteria, the Company has maintained, in all material respects, adequate internal financial controls over financial reporting and such internal financial controls over financial reporting were operating effectively as of March 31, 20X1, based on _____ [for example "the internal control over financial reporting criteria established by the

III.706 Auditing Pronouncements

Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India”].

I / We have considered the material weakness/es identified and reported above in determining the nature, timing, and extent of audit tests applied in my / our audit of the March 31, 20X1 standalone financial statements of the Company, and the / these material weakness/es does not / do not affect my / our opinion on the standalone financial statements of the Company.

Scenario 2 - Adverse Opinion on adequacy (and therefore operating effectiveness) of Internal Financial Controls Over Financial Reporting

Adverse opinion

According to the information and explanations given to me / us and based on my / our audit, the following material weakness/es has / have been identified as at March 31, 20X1:

- a) The Company did not have an appropriate internal control system for customer acceptance, credit evaluation and establishing customer credit limits for sales, which could potentially result in the Company recognising revenue without establishing reasonable certainty of ultimate collection.
- b) The Company did not have an appropriate internal control system for inventory with regard to receipts, issue for production and physical verification. Further, the internal control system for identification and allocation of overheads to inventory was also not adequate. These could potentially result in material misstatements in the Company’s trade payables, consumption, inventory and expense account balances.
- c) list other deficiencies identified]

A ‘material weakness’ is a deficiency, or a combination of deficiencies, in internal financial control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company’s annual or interim financial statements will not be prevented or detected on a timely basis.

In my / our opinion, because of the effects/possible effects of the material weakness/es described above on the achievement of the objectives of the control criteria, the Company has not maintained adequate internal financial controls over financial reporting and such internal financial controls over financial reporting were not operating effectively as of March 31, 20X1, based on _____ [for example “the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India”].

I / We have considered the material weakness/es identified and reported above in determining the nature, timing, and extent of audit tests applied in my / our audit of the March 31, 20X1 standalone financial statements of the Company, and the / these material weakness/es does not / do not affect my / our opinion on the financial statements of the Company.

Scenario 3 - Qualified Opinion on operating effectiveness of Internal Financial Controls Over Financial Reporting and unmodified opinion on adequacy of such controls

Qualified opinion

According to the information and explanations given to me / us and based on my / our audit, the following material weakness/es has / have been identified in the operating effectiveness of the Company's internal financial controls over financial reporting as at March 31, 20X1:

- a) The Company's internal financial controls over customer acceptance, credit evaluation and establishing customer credit limits for sales, were not operating effectively which could potentially result in the Company recognising revenue without establishing reasonable certainty of ultimate collection.
- b) [list other deficiencies identified]

A 'material weakness' is a deficiency, or a combination of deficiencies, in internal financial control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.

In my / our opinion, the Company has, in all material respects, maintained adequate internal financial controls over financial reporting as of March 31, 20X1, based on _____ [for example, "the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India"], and except for the effects/possible effects of the material weakness/es described above on the achievement of the objectives of the control criteria, the Company's internal financial controls over financial reporting were operating effectively as of March 31, 20X1.

I / We have considered the material weakness/es identified and reported above in determining the nature, timing, and extent of audit tests applied in my / our audit of the March 31, 20X1 financial statements of the Company, and the / these material weakness/es does not / do not affect my / our opinion on the standalone financial statements of the Company.

Scenario 4 - Adverse Opinion on operating effectiveness of Internal Financial Controls Over Financial Reporting and unmodified opinion on adequacy of such controls

Adverse opinion

According to the information and explanations given to me / us and based on my / our audit, the following material weakness/es has / have been identified in the operating effectiveness of the Company's internal financial controls over financial reporting as at March 31, 20X1:

- a) The Company's internal control system for customer acceptance, credit evaluation and establishing customer credit limits for sales, were not operating effectively which could potentially result in the Company recognising revenue without establishing reasonable certainty of ultimate collection.

III.708 Auditing Pronouncements

- b) The Company's internal control system for inventory with regard to receipts, issue for production and physical verification were not operating effectively. Further, the internal control system for identification and allocation of overheads to inventory was also not operating effectively. These could potentially result in material misstatements in the Company's trade payables, consumption, inventory and expense account balances.
- c) [list other deficiencies identified]

A 'material weakness' is a deficiency, or a combination of deficiencies, in internal financial control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.

In my / our opinion, the Company has, in all material respects, maintained adequate internal financial controls over financial reporting as of March 31, 20X1, based on _____ [for example, "the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India"], and because of the effects/possible effects of the material weakness/es described above on the achievement of the objectives of the control criteria, the Company's internal financial controls over financial reporting were not operating effectively as of March 31, 20X1.

I / We have considered the material weakness/es identified and reported above in determining the nature, timing, and extent of audit tests applied in my / our audit of the March 31, 20X1 standalone financial statements of the Company, and the / these material weakness/es does not / do not affect my / our opinion on the financial statements of the Company.

Scenario 5 - Adverse Opinion on Internal Financial Controls Over Financial Reporting – essential components of internal controls not adequately considered in the internal financial controls established by the company

Adverse opinion

According to the information and explanations given to me / us and based on my / our audit, the following material weakness/es has / have been identified as at March 31, 20X1:

- a) The Company did not have an appropriate internal financial control system over financial reporting since the internal controls adopted by the Company did not adequately consider risk assessment, which is one of the essential components of internal control, with regard to the potential for fraud when performing risk assessment,
- b) [list other deficiencies identified]

A 'material weakness' is a deficiency, or a combination of deficiencies, in internal financial control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.

In my / our opinion, because of the effects/possible effects of the material weakness/es described above on the achievement of the objectives of the control criteria, the Company has not maintained

adequate and effective internal financial controls over financial reporting as of March 31, 20X1, based on _____ [for example, “the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India”].

I / We have considered the material weakness/es identified and reported above in determining the nature, timing, and extent of audit tests applied in my / our audit of the March 31, 20X1 standalone financial statements of the Company, and the / these material weakness/es does not / do not affect my / our opinion on the standalone financial statements of the Company.

Example 3 – Separate Reports

The following is an example of separate modified (disclaimer) audit report for an audit of internal financial controls over financial reporting with / without impact on audit opinion on the standalone financial statements. This report is not authoritative but is intended only to be a guide that may be used in conjunction with the considerations outlined in this Guidance Note and SA 700 “Forming an Opinion and Reporting on Financial Statements”. The report is also not an exhaustive report which includes all aspect of reporting by the auditor under Sub-sections 2 and 3 of Section 143 of the Companies Act, 2013. It will need to be varied according to individual requirements and circumstances.

ANNEXURE TO THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE STANDALONE FINANCIAL STATEMENTS OF ABC COMPANY LIMITED

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

I / We were engaged to audit the internal financial controls over financial reporting of ABC Company Limited ("the Company") as of March 31, 20X1 in conjunction with my / our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on [.....for example, "the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India"]. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

My / Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on my/our audit conducted in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, to the extent applicable to an audit of internal financial controls, both issued by the Institute of Chartered Accountants of India.

Because of the matter described in Disclaimer of Opinion paragraph below, I / we was / were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on internal financial controls system over financial reporting of the Company.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors

of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Disclaimer of Opinion

Scenario 1 – Framework for internal financial control over financial reporting not established but does not impact the audit opinion on financial statements

According to the information and explanation given to us, the Company has not established its internal financial control over financial reporting on criteria based on or considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. Because of this reason, we are unable to obtain sufficient appropriate audit evidence to provide a basis for my / our opinion whether the Company had adequate internal financial controls over financial reporting and whether such internal financial controls were operating effectively as at March 31, 20X1.

I / We have considered the disclaimer reported above in determining the nature, timing, and extent of audit tests applied in my / our audit of the standalone financial statements of the Company, and the disclaimer does not affect my / our opinion on the standalone financial statements of the Company.

Scenario 2 – Auditor unable to obtain sufficient appropriate audit evidence on internal financial controls over financial reporting but does not impact audit opinion on the financial statements

The system of internal financial controls over financial reporting with regard to one of the significant branches of the Company at _____ were not made available to me / us to enable me / us to determine if the Company has established adequate internal financial control over financial reporting at the aforesaid branch and whether such internal financial controls were operating effectively as at March 31, 20X1.

I / We have considered the disclaimer reported above in determining the nature, timing, and extent of audit tests applied in my / our audit of the financial statements of the Company, and the disclaimer does not affect my / our opinion on the financial statements of the Company.

Scenario 3 – Auditor unable to obtain sufficient appropriate audit evidence on internal financial controls over financial reporting and impacting audit opinion on the financial statements

The system of internal financial controls over financial reporting with regard to the Company were not made available to me / us to enable me / us to determine if the Company has established adequate internal financial control over financial reporting and whether such internal financial controls were operating effectively as at March 31, 20X1.

I / We have considered the disclaimer reported above in determining the nature, timing, and extent of audit tests applied in my / our audit of the standalone financial statements of the Company, and

III.712 Auditing Pronouncements

the disclaimer has affected my / our opinion on the financial statements of the standalone Company and I / we have issued a qualified (/ adverse / disclaimer of) opinion on the financial statements.

Example 4 – Separate Reports

The following is an example of separate modified (adverse) audit report for an audit of internal financial controls over financial reporting causing a modified report on the standalone financial statements. This report is not authoritative but is intended only to be a guide that may be used in conjunction with the considerations outlined in this Guidance Note and SA 700 “Forming an Opinion and Reporting on Financial Statements”. The report is also not an exhaustive report which includes all aspect of reporting by the auditor under Sub-sections 2 and 3 of Section 143 of the Companies Act, 2013. It will need to be varied according to individual requirements and circumstances.

ANNEXURE TO THE INDEPENDENT AUDITOR’S REPORT OF EVEN DATE ON THE STANDALONE FINANCIAL STATEMENTS OF ABC COMPANY LIMITED

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

I / We have audited the internal financial controls over financial reporting of ABC Company Limited (“the Company”) as of March 31, 20X1 in conjunction with my / our audit of the financial statements of the Company for the year ended on that date

Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on ____ [for example “the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India”]. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and

errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

My / Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on my/our audit. I/We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, to the extent applicable to an audit of internal financial controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that I / we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

My / Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. My / Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

I / We believe that the audit evidence I / we have obtained is sufficient and appropriate to provide a basis for my / our adverse audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the

III.714 Auditing Pronouncements

internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Adverse Opinion

According to the information and explanations given to me / us and based on my / our audit, the following material weakness/es has / have been identified as at March 31, 20X1:

- (a) The Company did not have appropriate internal controls for reconciliation of physically inventory with the inventory records, which has resulted in misstatement of inventory values in the books of account.
- (b) [list other deficiencies identified]

A 'material weakness' is a deficiency, or a combination of deficiencies, in internal financial control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.

In my / our opinion, because of the effect of the material weakness/es described above on the achievement of the objectives of the control criteria, the Company has not maintained adequate and effective internal financial controls over financial reporting as of March 31, 20X1, based on _____ [for example, "the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India".

I / We have considered the material weakness/es identified and reported above in determining the nature, timing, and extent of audit tests applied in my / our audit of the March 31, 20X1 standalone financial statements of the Company, and the / these material weakness/es has / have affected my / our opinion on the standalone financial statements of the Company and I / we have issued a qualified (/ adverse / disclaimer of) opinion on the standalone financial statements.

Example 5 – Separate Report in case of Consolidated Financial Statements

Note:

The following illustrative format is based on the assumptions that

- The Group has:
 - Certain components which have been audited by auditor/s other than the Principal Auditor and such component/s is/ are material to the consolidated financial statements of the Group. The auditors of such components which are Indian companies, have submitted report on section 143(3)(i) of the Companies Act, 2013.
 - Certain components which are unaudited and such component/s is/ are not material to the consolidated financial statements of the Group.
- The independent auditor of Consolidated Financial Statements
 - Gives a clean opinion in respect of section 143(3)(i) of the Companies Act, 2013
 - Discloses the aforementioned facts about the Components in the “Other Matters” Paragraph in accordance with the Announcement issued by the Auditing and Assurance Standards Board under the authority of the Council of ICAI in February 2014.

Illustrative Report on Internal Financial Controls Over Financial Reporting in the case of Consolidated financial statements

(Referred to in paragraphs 157 - 164)

The following is an **example of unmodified audit report for an audit of internal financial controls over financial reporting in the case of consolidated financial statements**. This report is not authoritative but is intended only to be a guide that may be used in conjunction with the considerations outlined in this Guidance Note and SA 700 “Forming an Opinion and Reporting on financial Statements”. The report is also not an exhaustive report which includes all aspect of reporting by the auditor under Sub-sections 2 and 3 of Section 143 of the Companies Act, 2013. It will need to be varied according to individual requirements and circumstances.

ANNEXURE TO THE INDEPENDENT AUDITOR’S REPORT OF EVEN DATE ON THE CONSOLIDATED FINANCIAL STATEMENTS OF ABC COMPANY LIMITED

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

In conjunction with my / our audit of the consolidated financial statements of the Company as of and for the year ended March 31, 20X1, I / We have audited the internal financial controls over financial reporting of ABC Company Limited (hereinafter referred to as “the Holding Company”) and

III.716 Auditing Pronouncements

its subsidiary companies, its associate companies and jointly controlled companies, which are companies incorporated in India, as of that date.

Management's Responsibility for Internal Financial Controls

The respective Board of Directors of the of the Holding company, its subsidiary companies, its associate companies and jointly controlled companies, which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on _____ [for example, "the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI)].] These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

My / Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on my / our audit. I / We conducted my / our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the ICAI and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that I/we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

My / Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. My / Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

I / We believe that the audit evidence I / we have obtained and the audit evidence obtained by the other auditors in terms of their reports referred to in the Other Matters paragraph below, is

sufficient and appropriate to provide a basis for my /our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In my / our opinion, the Holding Company, its subsidiary companies, its associate companies and jointly controlled companies, which are companies incorporated in India, have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 20X1, based on _____ [for example, "the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India"].

Other Matters

Our aforesaid reports under Section 143(3)(i) of the Act on the adequacy and operating effectiveness of the internal financial controls over financial reporting insofar as it relates to ___(number) subsidiary companies, ___(number) associate companies and ___(number) jointly

III.718 Auditing Pronouncements

controlled companies, which are companies incorporated in India, is based on the corresponding reports of the auditors of such companies incorporated in India.

Appendix IV*

Illustrative Risks of Material Misstatement, Related Control Objectives and Control Activities

(Referred to in paragraphs 77 and 100)

Standard on Auditing (SA) 315 requires understanding of the entity in order to identify and respond to the risks of material misstatement in the financial statements. In doing so, auditors focus their risk-assessment process on the classes of transactions; account balances, including transaction types within account balances; and disclosures that are material and, thus, have a reasonable possibility of containing a misstatement that, individually or when aggregated with others, has a material effect on the financial statements. The determination of whether a class of transactions, account balance, or disclosure is material is a matter of professional judgment that takes into account quantitative and qualitative factors and is made without regard to the effectiveness of controls.

Once the material classes of transactions, account balances, and disclosures [significant accounts and disclosures] are identified, one needs to identify and assess the risks of material misstatement at the financial-statement level and the assertion level for those classes of transactions, account balances, and disclosures. Following the identification of risks of material misstatement, one has to identify relevant controls that may address the risks of material misstatement that are responsive to the risks of material misstatement and the related assertion.

This appendix has been developed to provide guidance and examples to assist in identifying risks of material misstatement at the assertion level and relevant controls that may address the applicable risks of material misstatement.

For each class of transactions and account balance, risks of material misstatement and relevant controls are divided into two categories: “Core Risks and Controls,” which may be applicable for normal risks of material misstatement on most entities, and “Other Possible Risks and Controls,” which may or may not be applicable.

The risks of material misstatement included in this appendix are illustrative only and are intended to provide examples of common risks. As a result, the risks of material misstatement are described using generic terminology. It is critical that users identify the risks of material misstatement that are relevant to the entity based on professional judgment and not rely solely on the risks of material misstatement provided in this appendix. Additionally, when the risk of material misstatement is considered significant, further tailoring or complete customisation is often appropriate.

The Example Controls included in this appendix are illustrative only and are intended to provide examples of controls that may address the relevant risks of material misstatement. Actual controls in place at the entity that address the relevant risks of material misstatement may and often do differ; thus, the Example Controls may (1) require some degree of tailoring to describe the control more specifically or (2) be replaced entirely by a control in place at the entity that addresses the risk of material misstatement. Users who use this appendix should not interpret the existence of

* The complete Appendix IV is given in CD along with this Guidance Note.

III.720 Auditing Pronouncements

more than one Example Control to indicate that all controls would need to be tested to address the risk of material misstatement. It is critical that practitioners identify the actual controls in place at the entity that address the risks of material misstatement and not rely solely on the Example Controls provided in this appendix.

This appendix will assist in the identification of relevant controls that may address the applicable risks of material misstatement. This includes specific application or general IT controls.

This appendix also illustrates the risk of material misstatement and the control related to the risk that is likely to be reflected in the Other Affected Accounts.

Material classes of transactions or account balances relevant to the entity may not be included in this appendix. Therefore, it is critical that users identify the relevant transaction types for each material class of transaction, account balance, and disclosure for the specific circumstances of the entity.

Certain example controls illustrated in this appendix may use computer-generated information as source data. Users should consider the controls related to this computer-generated information and tailor the control description accordingly.

Certain example controls involve an application control. Users should identify specific controls at the entity related to application controls and tailor the control description accordingly.

Certain reports relevant to example controls may be electronically generated by an ERP system. If such reports are generated from an ERP system, users should consider the controls related to this computer-generated information and tailor the control description accordingly.

Illustrative list of Risks of Material Misstatement - Control Objectives - Control Activities and illustrative work paper templates for testing controls have been provided in a CD along with this Guidance Note for the following account balances and processes:

1. Cash/Bank Balances
2. Prepaid Expenses
3. Trade Receivables
4. Inventory
5. Fixed Assets
6. Goodwill and Intangible Assets
7. Trade payables
8. Provision for expenses
9. Loans/Borrowings
10. Employee Benefits
11. Income Taxes
12. Deferred Taxes
13. Provision for Income taxes/Advance Income taxes

14. Share Capital
15. Revenue from Operations
16. Cost of Sales
17. Depreciation/ Amortisation and Other Expenses
18. Finance Cost
19. Journal Entries
20. Financial Reporting

Examples of Control Deficiencies

(Referred to in paragraph IG 20)

(Depending on severity could also be significant deficiencies and material weaknesses)

Examples of Deficiencies in the Design of Controls

- Inadequate design of internal control over the preparation of the financial statements being audited.
- Inadequate design of internal control over a significant account or process.
- Inadequate documentation of the components of internal control.
- Insufficient control consciousness within the organization, for example, the tone at the top and the control environment.
- Absent or inadequate segregation of duties within a significant account or process.
- Absent or inadequate controls over the safeguarding of assets (this applies to controls that the auditor determines would be necessary for effective internal control over financial reporting).
- Inadequate design of information technology (IT) general and application controls that prevent the information system from providing complete and accurate information consistent with financial reporting objectives and current needs.
- Employees or management who lack the qualifications and training to fulfill their assigned functions. For example, in an entity that prepares financial statements in accordance with generally accepted accounting principles, the person responsible for the accounting and reporting function lacks the skills and knowledge to apply generally accepted accounting principles in recording the entity's financial transactions or preparing its financial statements.
- Inadequate design of monitoring controls used to assess the design and operating effectiveness of the entity's internal control over time.
- The absence of an internal process to report deficiencies in internal control to management on a timely basis.

Examples of Failures in the Operation of Internal Control

- Failure in the operation of effectively designed controls over a significant account or process, for example, the failure of a control such as dual authorization for significant disbursements within the purchasing process.

- Failure of the information and communication component of internal control to provide complete and accurate output because of deficiencies in timeliness, completeness, or accuracy, for example, the failure to obtain timely and accurate consolidating information from remote locations that is needed to prepare the financial statements.
- Failure of controls designed to safeguard assets from loss, damage, or misappropriation. This circumstance may need careful consideration before it is evaluated as a significant deficiency or material weakness. For example, assume that a company uses security devices to safeguard its inventory (preventive controls) and also performs periodic physical inventory counts (detective control) timely in relation to its financial reporting. Although the physical inventory count does not safeguard the inventory from theft or loss, it prevents a material misstatement of the financial statements if performed effectively and timely. Therefore, given that the definitions of material weakness and significant deficiency relate to likelihood of misstatement of the financial statements, the failure of a preventive control such as inventory tags will not result in a significant deficiency or material weakness if the detective control (physical inventory) prevents a misstatement of the financial statements. Material weaknesses relating to controls over the safeguarding of assets would only exist if the company does not have effective controls (considering both safeguarding and other controls) to prevent or detect a material misstatement of the financial statements.
- Failure to perform reconciliations of significant accounts. For example, accounts receivable subsidiary ledgers are not reconciled to the general ledger account in a timely or accurate manner.
- Undue bias or lack of objectivity by those responsible for accounting decisions, for example, consistent understatement of expenses or overstatement of allowances at the direction of management.
- Misrepresentation by client personnel to the auditor (an indicator of fraud).
- Management override of controls.
- Failure of an application control caused by a deficiency in the design or operation of an IT general control.

Examples of Significant Deficiencies

Deficiencies in the following areas ordinarily are at least significant deficiencies in internal control:

- Controls over the selection and application of accounting principles that are in conformity with generally accepted accounting principles. Having sufficient expertise in selecting and applying accounting principles is an aspect of such controls.
- Antifraud programs and controls.
- Controls over non-routine and non-systematic transactions.

III.724 Auditing Pronouncements

- Controls over the period end financial reporting process, including controls over procedures used to enter transaction totals into the general ledger; initiate, authorize, record, and process journal entries into the general ledger; and record recurring and non-recurring adjustments to the financial statements.

Examples of Material Weaknesses

Each of the following is an indicator of a control deficiency that should be regarded as at least a significant deficiency and a strong indicator of a material weakness in internal control:

- Ineffective oversight of the entity's financial reporting and internal control by those charged with governance.
- Restatement of previously issued financial statements to reflect the correction of a material misstatement. (The correction of a misstatement includes misstatements due to error or fraud; it does not include restatements to reflect a change in accounting principle to comply with a new accounting principle or a voluntary change from one generally accepted accounting principle to another generally accepted accounting principle.)
- Identification by the auditor of a material misstatement in the financial statements for the period under audit that was not initially identified by the entity's internal control.
- This includes misstatements involving estimation and judgment for which the auditor identifies likely material adjustments and corrections of the recorded amounts. (This is a strong indicator of a material weakness even if management subsequently corrects the misstatement.)
- An ineffective internal audit function or risk assessment function at an entity for which such functions are important to the monitoring or risk assessment component of internal control, such as for very large or highly complex entities.
- For complex entities in highly regulated industries, an ineffective regulatory compliance function. This relates solely to those aspects of the ineffective regulatory compliance function for which associated violations of laws and regulations could have a material effect on the reliability of financial reporting.
- Identification of fraud of any magnitude on the part of senior management. (The auditor has a responsibility to plan and perform procedures to obtain reasonable assurance about whether the financial statements are free of material misstatement caused by error or fraud. However, for the purposes of evaluating and communicating deficiencies in internal control, the auditor should evaluate fraud of any magnitude including fraud resulting in immaterial misstatements on the part of senior management, of which he or she is aware.)

- Failure by management or those charged with governance to assess the effect of a significant deficiency previously communicated to them and either correct it or conclude that it will not be corrected.
- An ineffective control environment. Control deficiencies in various other components of internal control could lead the auditor to conclude that a significant deficiency or material weakness exists in the control environment.

The following is the text of the Standard on Internal Audit (SIA) 5, Sampling, issued by the Council of the Institute of Chartered Accountants of India. These Standards should be read in conjunction with the Preface to the Standards on Internal Audit, issued by the Institute.

In terms of the decision of the Council of the Institute of Chartered Accountants of India taken at its 260th meeting held in June 2006, the following Standard on Internal Audit shall be recommendatory in nature in the initial period. The Standards shall become mandatory from such date as notified by the Council.

* Published in the October 2008 issue of The Chartered Accountant.

Introduction

1. The purpose of this Standard on Internal Audit (SIA) is to establish standards on the design and selection of an audit sample and provide guidance on the use of audit sampling in internal audit engagements.

The SIA also deals with the evaluation of the sample results. This SIA applies equally to both statistical and non-statistical sampling methods. Either method, when properly applied, can provide sufficient appropriate audit evidence.

2. When using either statistical or non-statistical sampling methods, the internal auditor should design and select an audit sample, perform audit procedures thereon, and evaluate sample results so as to provide sufficient appropriate audit evidence to meet the objectives of the internal audit engagement unless otherwise specified by the client.

Definitions

3. "Audit sampling" means the application of audit procedures to less than 100% of the items within an account balance or class of transactions to enable the internal auditor to obtain and evaluate audit evidence about some characteristic of the items selected in order to form a conclusion concerning the population. Certain testing procedures, however, do not come within the definition of sampling. Tests performed on 100% of the items within a population do not involve sampling. Likewise, applying internal audit procedures to all items within a population which have a particular characteristic (for example, all items over a certain amount) does not qualify as audit sampling with respect to the portion of the population examined, nor with regard to the population as a whole, since the items were not selected from the total population on a basis that was expected to be representative. Such items might imply some characteristic of the remaining portion of the population but would not necessarily be the basis for a valid conclusion about the remaining portion of the population.

4. "Error" means either control deviations when performing tests of controls, or misstatements, when performing tests of details.

5. "Population" means the entire set of data from which the sample is selected and about which the internal auditor wishes to draw conclusions. A population may be divided into various strata, or subpopulations, with each stratum being examined separately.

6. "Sampling risk" means the risk that from the possibility that the internal auditor's conclusions, based on examination of a sample may be different from the conclusion reached if the entire population was subjected to the same types of internal audit procedure. The two types of sampling risk are –

(a) The risk that the internal auditor concludes, in the case of tests of controls (TOC), that controls are more effective than they actually are, or in the case of tests of details (TOD), that a material error or misstatement does not exist when in fact it does.

III.728 Auditing Pronouncements

- (b) The risk that the internal auditor concludes, in the case of tests of controls (TOC), that controls are less effective than they actually are, or in the case of tests of details (TOD), that a material error or misstatement exists when in fact it does not.

The mathematical complements of these risks are termed confidence levels.

7. "Sampling unit" means the individual items or units constituting a population, for example, credit entries in bank statements, sales invoices or debtors' balances.
8. "Statistical sampling" means any approach to sampling procedure which has the following characteristics –
- (a) Random selection of a sample; and
- (b) Use of theory of probability to evaluate sample results, including measurement of sampling risk.
9. "Tolerable error" means the maximum error in a population that the internal auditor is willing to accept.

Use of Sampling in Risk Assessment Procedures and Tests of Controls

10. The internal auditor performs risk assessment procedures to obtain an understanding of the entity, business and its environment, including the mechanism of its internal control. Ordinarily, risk assessment procedures do not involve the use of sampling. However, there are cases, where the internal auditor often plans and performs tests of controls concurrently with obtaining an understanding of the design of controls and examining whether they have been implemented.

11. Tests of controls are performed when the internal auditor's risk assessment includes an expectation of the operating effectiveness of controls. Sampling of tests of controls is appropriate when application of the control leaves audit evidence of performance (for example, initials of the credit manager on a sales invoice indicating formal credit approval).

12. Sampling risk can be reduced by increasing sample size for both tests of controls and tests of details. Non-sampling risk can be reduced by proper engagement planning, supervision, monitoring and review.

Design of the Sample

13. **When designing an audit sample, the internal auditor should consider the specific audit objectives, the population from which the internal auditor wishes to sample, and the sample size.**

Internal Audit Objectives

14. The internal auditor would first consider the specific audit objectives to be achieved and the internal audit procedures which are likely to best achieve those objectives. In addition, when internal audit sampling is appropriate, consideration of the nature of the audit evidence sought and

possible error conditions or other characteristics relating to that audit evidence will assist the internal auditor in defining what constitutes an error and what population to use for sampling. For example, when performing tests of controls over an entity's purchasing procedures, the internal auditor will be concerned with matters such as whether an invoice was clerically checked and properly approved.

On the other hand, when performing substantive procedures on invoices processed during the period, the internal auditor will be concerned with matters such as the proper reflection of the monetary amounts of such invoices in the periodic financial statements. When performing tests of controls, the internal auditor makes an assessment of the rate of error the internal auditor expects to find in the population to be tested. This assessment is on the basis of the internal auditor's understanding of the design of the relevant controls, and whether they have actually been implemented or the examination of a small number of items from the population.

Population

15. The population is the entire set of data from which the internal auditor wishes to sample in order to reach a conclusion. The internal auditor will need to determine that the population from which the sample is drawn is appropriate for the specific audit objective. For example, if the internal auditor's objective were to test for overstatement of accounts receivable, the population could be defined as the accounts receivable listing. On the other hand, when testing for understatement of accounts payable, the population would not be the accounts payable listing, but rather subsequent disbursements, unpaid invoices, suppliers' statements, unmatched receiving reports, or other populations that would provide audit evidence of understatement of accounts payable.

16. The individual items that make up the population are known as sampling units. The population can be divided into sampling units in a variety of ways. For example, if the internal auditor's objective were to test the validity of accounts receivables, the sampling unit could be defined as customer balances or individual customer invoices. The internal auditor defines the sampling unit in order to obtain an efficient and effective sample to achieve the particular audit objectives.

17. It is important for the internal auditor to ensure that the population is appropriate to the objective of the internal audit procedure, which will include consideration of the direction of testing. The population also needs to be complete, which means that if the internal auditor intends to use the sample to draw conclusions about whether a control activity operated effectively during the financial reporting period, the population needs to include all relevant items from throughout the entire period.

18. When performing the audit sampling, the internal auditor performs internal audit procedures to ensure that the information upon which the audit sampling is performed is sufficiently complete and accurate.

Stratification

19. To assist in the efficient and effective design of the sample, stratification may be appropriate. Stratification is the process of dividing a population into sub-populations, each of which is a group of sampling units, which have similar characteristics (often monetary value). The strata need to be explicitly defined so that each sampling unit can belong to only one stratum. This process reduces the variability of the items within each stratum. Stratification, therefore, enables the internal auditor to direct audit efforts towards the items which, for example, contain the greatest potential monetary error. For example, the internal auditor may direct attention to larger value items for accounts receivable to detect overstated material misstatements. In addition, stratification may result in a smaller sample size.

Sample Size

20. **When determining the sample size, the internal auditor should consider sampling risk, the tolerable error, and the expected error.** The lower the risk that the internal auditor is willing to accept, the greater the sample size needs to be. Examples of some factors affecting sample size are contained in Appendix 1 and Appendix 2 to the Standard.

21. The sample size can be determined by the application of a statistically based formula or through exercise of professional judgment applied objectively to the circumstances of the particular internal audit engagement.

Statistical and Non-Statistical Approaches

22. The decision of using either statistical or non-statistical sampling approach is a matter for the internal auditor's professional judgment. In the case of tests of controls, the internal auditor's analysis of the nature and cause of errors will often be of more importance than the statistical analysis of the mere presence or absence of errors. In such case, non-statistical sampling approach may be preferred.

23. When applying statistical sampling, sample size may be ascertained using either probability theory or professional judgment. Sample size is a function of several factors. Appendices 1 and 2 discuss some of these factors.

Tolerable Error

24. Tolerable error is the maximum error in the population that the internal auditor would be willing to accept and still conclude that the result from the sample has achieved the objective(s) of the internal audit.

Tolerable error is considered during the planning stage and, for substantive procedures, is related to the internal auditor's judgement about materiality. The smaller the tolerable error, the greater the sample size will need to be.

25. In tests of controls, the tolerable error is the maximum rate of deviation from a prescribed control procedure that the internal auditor would be willing to accept, based on the preliminary assessment of control risk. In substantive procedures, the tolerable error is the maximum monetary error in an account balance or class of transactions that the internal auditor would be willing to accept so that when the results of all audit procedures are considered, the internal auditor is able to conclude, with reasonable assurance, that the financial statements are not materially misstated.

Expected Error

26. If the internal auditor expects error to be present in the population, a larger sample than when no error is expected ordinarily needs to be examined to conclude that the actual error in the population is not greater than the planned tolerable error. Smaller sample sizes are justified when the population is expected to be error free. In determining the expected error in a population, the internal auditor would consider such matters as error levels identified in previous internal audits, changes in the entity's procedures, and evidence available from other procedures.

Selection of the Sample

27. **The internal auditor should select sample items in such a way that the sample can be expected to be representative of the population. This requires that all items or sampling units in the population have an opportunity of being selected.**

28. While there are a number of selection methods, three methods commonly used are:

- a. Random selection and use of CAATs
- b. Systematic selection
- c. Haphazard selection

Appendix 3 to the Standard discusses these methods.

Evaluation of Sample Results

29. **Having carried out, on each sample item, those audit procedures that are appropriate to the particular audit objective, the internal auditor should:**

- (a) **analyse the nature and cause of any errors detected in the sample;**
- (b) **project the errors found in the sample to the population;**
- (c) **reassess the sampling risk; and**
- (d) **consider their possible effect on the particular internal audit objective and on other areas of the internal audit engagement.**

30. **The internal auditor should evaluate the sample results to determine whether the assessment of the relevant characteristics of the population is confirmed or whether it needs to be revised.**

Analysis of Errors in the Sample

31. In analysing the errors detected in the sample, the internal auditor will first need to determine that an item in question is in fact an error. In designing the sample, the internal auditor will have defined those conditions that constitute an error by reference to the audit objectives.

For example, in a substantive procedure relating to the recording of accounts receivable, a mis-posting between customer accounts does not affect the total accounts receivable. Therefore, it may be inappropriate to consider this an error in evaluating the sample results of this particular procedure, even though it may have an effect on other areas of the audit such as the assessment of doubtful accounts.

32. When the expected audit evidence regarding a specific sample item cannot be obtained, the internal auditor may be able to obtain sufficient appropriate audit evidence through performing alternative procedures. For example, if a positive account receivable confirmation has been requested and no reply was received, the internal auditor may be able to obtain sufficient appropriate audit evidence that the receivable is valid by reviewing subsequent payments from the customer. If the internal auditor does not, or is unable to, perform satisfactory alternative procedures, or if the procedures performed do not enable the internal auditor to obtain sufficient appropriate audit evidence, the item would be treated as an error.

33. The internal auditor would also consider the qualitative aspects of the errors. These include the nature and cause of the error and the possible effect of the error on other phases of the audit.

34. In analysing the errors discovered, the internal auditor may observe that many have a common feature, for example, type of transaction, location, product line, or period of time. In such circumstances, the internal auditor may decide to identify all items in the population which possess the common feature, thereby producing a sub-population, and extend audit procedures in this area. The internal auditor would then perform a separate analysis based on the items examined for each sub-population.

Projection of Errors

35. The internal auditor projects the error results of the sample to the population from which the sample was selected. There are several acceptable methods of projecting error results. However, in all the cases, the method of projection will need to be consistent with the method used to select the sampling unit. When projecting error results, the internal auditor needs to keep in mind the qualitative aspects of the errors found. When the population has been divided into sub-population, the projection of errors is done separately for each sub-population and the results are combined.

36. For tests of controls, no explicit projection of errors is necessary since the sample error rate is also the projected rate of error for the population as a whole.

Reassessing Sampling Risk

37. The internal auditor needs to consider whether errors in the population might exceed the tolerable error. To accomplish this, the internal auditor compares the projected population error to the tolerable error taking into account the results of other audit procedures relevant to the specific control or financial statement assertion. The projected population error used for this comparison in the case of substantive procedures is net of adjustments made by the entity. When the projected error exceeds tolerable error, the internal auditor reassesses the sampling risk and if that risk is unacceptable, would consider extending the audit procedure or performing alternative internal audit procedures.

38. If the evaluation of sample results indicate that the assessment of the relevant characteristic of the population needs to be revised, the internal auditor, may:

- (a) Request management to investigate the identified errors and the potential for any further errors, and to make necessary adjustments, in cases where management prescribes the sample size; and / or
- (b) Modify the nature, timing and extent of internal audit procedures. In case of tests of controls, the internal auditor might extend the sample size, test an alternative control or modify related substantive procedures; and / or
- (c) Consider the effect on the Internal Audit Report.

Documentation

39. Documentation provides the essential support to the opinion and/ or findings of the internal auditor. In the context of sampling, the internal auditor's documentation may include aspects such as:

- i. Relationship between the design of the sample vis-à-vis specific audit objectives, population from which sample is drawn and the sample size.
- ii. Assessment of the expected rate of error in the population to be tested vis-à-vis auditor's understanding of the design of the relevant controls
- iii. Assessment of the sampling risk and the tolerable error.
- iv. Assessment of the nature and cause of errors.
- v. Rationale for using a particular sampling technique and results thereof.
- vi. Analysis of the nature and cause of any errors detected in the sample.
- vii. Projection of the errors found in the sample to the population.
- viii. Reassessment of sampling risk, where appropriate.
- ix. Effect of the sample results on the internal audit's objective(s).
- x. Projection of sample results to the characteristics of the population.

Appendix 1 to SIA 5 – Sampling

Examples of Factors Influencing Sample Size for Tests of Controls

The following are some factors which the internal auditor considers when determining the sample size required for tests of controls (TOC). These factors need to be considered together assuming the internal auditor does not modify the nature or timing of TOC or otherwise modify the approach to substantive procedures in response to assessed risks.

Factor to be considered by Internal Auditor	Effect on sample size
An increase in the extent to which the risk of material misstatement is reduced by the operating effectiveness of controls	Increase
An increase in the rate of deviation from the prescribed control activity that the internal auditor is willing to accept	Decrease
An increase in the rate of deviation from the prescribed control activity that the internal auditor expects to find in the population	Increase
An increase in the internal auditor's required confidence level	Increase
An increase in the number of sampling units in the population	Negligible effect

Notes –

1. Other things being equal, the more the internal auditor relies on the operating effectiveness of controls in risk assessment, the greater is the extent of the internal auditor's tests of controls, and hence the sample size is increased.
2. The lower the rate of deviation that the internal auditor is willing to accept, the larger the sample size needs to be.
3. The higher the rate of deviation that the internal auditor expects, the larger the sample size needs to be so as to make a reasonable estimate of the actual rate of deviation.
4. The higher the degree of confidence that the internal auditor requires that the results of the sample are indicative of the actual incidence of errors in the population, the larger the sample size needs to be.
5. For large populations, the actual population size has little effect on sample size. For small populations, sampling is often not as efficient as alternative means of obtaining sufficient appropriate audit evidence.

Appendix 2 to SIA 5 - Sampling**Examples of Factors Influencing Sample Size for Tests of Details (TOD)**

The following are some factors which the internal auditor considers when determining the sample size required for tests of details (TOD). These factors need to be considered together assuming the internal auditor does not modify the nature or timing of TOD or otherwise modify the approach to substantive procedures in response to assessed risks.

Factor to be considered by Internal Auditor	Effect on sample size
An increase in the internal auditor's assessment of the risk of material misstatement	Increase
An increase in the use of other substantive procedures by the internal auditor, directed at the same assertion	Decrease
An increase in the total error that the internal auditor is willing to accept (Tolerable Error)	Decrease
Stratification of the population when appropriate	Decrease
An increase in the amount of error which the internal auditor expects to find in the Population	Increase
An increase in the internal auditor's required confidence level	Increase
The number of sampling units in the population	Negligible effect

Appendix 3 to SIA 5 - Sampling

Methods of Sample Selection

The principal methods of sample selection are as –

1. **Using a computerised random number generator** or through random number tables.
2. **Systematic selection** – In this method, the number of sampling units in the population is divided by the sample size to give a sampling interval, for example 20, and having thus determined a starting point within the first 20, each 20th sampling unit thereafter is selected. Although the starting point may be haphazardly determined, the sample is likely to be truly random if the same is determined by using a computerised random number generator or random number tables. In this method, the internal auditor would need to determine that sampling units within the population are not structured in such a way that the sampling interval corresponds with any particular pattern within the population.
3. **Haphazard selection** – In this method, the internal auditor selects the sample without following any structured technique. **The internal auditor should attempt to ensure that all items within the population have a chance of selection, without having any conscious bias or predictability.** This method is not appropriate when using statistical sampling technique.
4. **Block selection** – This method involves selection of a block(s) of adjacent or contiguous items from within the population. Block selection normally cannot be used in internal audit sampling because most populations are structured in such a manner that items forming a sequence can be expected to have similar characteristics to each other, but different characteristics from items elsewhere in the population. This method would not be an appropriate sample selection technique when the internal auditor intends to draw valid inferences about the entire population, based on the sample.

Appendix 4 to SIA 5 - Sampling**Frequency of Control Activity and Sample Size**

The following guidance related to the frequency of the performance of control may be considered when planning the extent of tests of operating effectiveness of manual controls for which control deviations are not expected to be found. The internal auditor may determine the appropriate number of control occurrences to test based on the following minimum sample size for the frequency of the control activity dependant on whether assessment has been made on a lower or higher risk of failure of the control.

Frequency of control activity	Minimum sample size Risk of failure	
	Lower	Higher
Annual	1	1
Quarterly (including period- end, i.e., +1)	1+1	1+1
Monthly	2	3
Weekly	5	8
Daily	15	25
Recurring manual control (multiple times per day)	25	40

Note: Although +1 is used to indicate that the period–end control is tested, this does not mean that for more frequent control operations the year-end operation cannot be tested.

Guidance Note on the Companies (Auditor's Report) Order, 2016

Introduction

1. The Central Government, in exercise of the powers conferred, under sub-section (11) of section 143 of the Companies Act, 2013* (hereinafter referred to as "the Act"), issued the Companies (Auditor's Report) Order, 2016, (CARO, 2016/ "the Order") *vide* Order No. S.O. 1228(E) dated 29th March, 2016. CARO, 2016 contains certain matters on which the auditors of companies (except of those categories of companies which are specifically exempted under the Order) have to make a statement in their audit report. The text of the CARO, 2016 is given in **Appendix I** to this Guidance Note.

2. This Order is in supersession of the earlier Order issued in 2015, viz., the Companies (Auditor's Report) Order, 2015 (CARO 2015). **Appendix II** to this Guidance Note contains a clause-by-clause comparison of the reporting requirements of the Order and the erstwhile CARO 2015.

3. The purpose of this Guidance Note is to enable the members to comply with the reporting requirements of the Order. It should, however, be noted that the clarifications and explanations contained in this Guidance Note are not intended to be exhaustive and the auditors should exercise their professional judgment and experience on various matters on which they are required to report under the Order.

General Provisions Regarding Auditor's Report

4. The requirements of the Order are supplemental to the existing provisions of section 143 of the Act regarding the auditor's report. In this regard the following points may be noted:

- (i) the provisions of sub-sections (1), (2) & (3) of section 143 are applicable to all companies while the Order exempts certain categories of companies from its application; and
- (ii) the provisions of sub-section (1) require the auditor to make certain specific enquiries during the course of his audit. The auditor is, however, not required to report on any of the matters specified in the sub-section unless he has any special comments to make on the said matters. In other words, if he is satisfied with the results of his enquiries, he has no further duty to report that he is so satisfied. The Order, on the other hand, requires a statement on each of the matters specified

*Readers' attention is invited to the fact that the Companies (Amendment) Bill 2016 is before the Parliament for approval. This Guidance Note does not take into account the amendments to the Companies Act, 2013 as proposed in the aforesaid Bill.

therein, as applicable to the company.

5. Another question that arises is about the status of the Order *vis a vis* the directions given by the Comptroller and Auditor General of India under section 143(5) of the Act. In this regard, it may be noted that the Order is supplemental to the directions given by the Comptroller and Auditor General of India under section 143(5) in respect of government companies. These directions continue to be in force. Therefore, in respect of government companies, the matters specified in the Order will form part of the auditor's report submitted to the members and the replies to the aforesaid questionnaire issued by the Comptroller and Auditor General of India will be governed by the requirements of section 143(5) of the Act.

6. The Order is not intended to limit the duties and responsibilities of auditors but only requires a statement to be included in the audit report in respect of the matters specified therein.

Applicability of the Order

Companies Covered by the Order

7. The Order applies to all companies except certain categories of companies specifically exempted from the application of the Order.

8. The Order also applies to foreign companies as defined in clause (42) of section 2 of the Act. According to the aforesaid section, a "foreign company" means:

"Any company or body corporate incorporated outside India which -

- (a) has a place of business in India whether by itself or through an agent, physically or through electronic mode; and
- (b) conducts any business activity in India in any other manner."

9. In the case of a foreign company, wherever under any of the provisions of the Act, an audit under Chapter X of the Act is required to be carried out, the Order would be applicable.

10. The Order is also applicable to the audits of branch(es) of a company since sub-section 8 of section 143 of the Act read with Rule 12 of the Companies (Audit and Auditors) Rules, 2014 clearly specifies that a branch auditor has the same duties in respect of audit as the company's auditor. It is, therefore, necessary that the report submitted by the branch auditor contains a statement on all the matters specified in the Order, as applicable to the company, except where the company is exempt from the applicability of the Order, to enable the company's auditor to consider the same while complying with the provisions of the Order.

Companies Not Covered by the Order

11. The Order provides that it shall not apply to:
- (i) a banking company as defined in clause (c) of section 5 of the Banking Regulation Act, 1949 (10 of 1949);
 - (ii) an insurance company as defined under the Insurance Act, 1938 (4 of 1938);
 - (iii) a company licensed to operate under section 8 of the Act;
 - (iv) a One person Company as defined under clause (62) of section 2 of the Act and a Small Company as defined under clause (85) of the section 2 of the Act; and
 - (v) a private limited company, not being a subsidiary or holding company of a public company, having a paid-up capital and reserves and surplus not more than rupees one crore as on the balance sheet date and which does not have total borrowings exceeding rupees one crore from any bank or financial institution at any point of time during the financial year and which does not have a total revenue as disclosed in Schedule III to the Act, (including revenue from discontinuing operations) exceeding rupees ten crores during the financial year as per the financial statements.

12. The Order specifically exempts banking companies, insurance companies and companies which have been licensed to operate under section 8 of the Act. The Order also exempts One Person Company and a Small Company from its application. The applicability of the Order would be based on the status of the company as at the balance sheet date. It may also be noted that in case a company is covered under the definition of small company, it will remain exempted from the applicability of the Order even if it falls under any of the criteria specified for private company.

13. The specific exemption under the Order is given to companies licensed under section 8 of the Act. However, it would appear that in view of the provisions of section 465 of the Act, the exemption would also extend to companies licensed to operate under section 25 of the Companies Act 1956.

14. A private limited company, in order to be exempt from the applicability of the Order, must satisfy all the conditions mentioned above collectively. In other words, even if one of the conditions is not satisfied, a private limited company's auditor has to report on the matters specified in the Order.

Private Limited Company

15. The term "private limited company", as used in the Order, should be construed to mean a company registered as a "private company" (as defined in sub-section (68) of

section 2 of the Act}.

Paid-up Capital and Reserves and Surplus

16. Sub-section (64) of section 2 of the Act defines the term “paid-up capital” as such aggregate amount of money credited as paid-up as is equivalent to the amount received as paid up in respect of shares issued and also includes any amount credited as paid up in respect of shares of the company, but does not include any other amount received in respect of such shares, by whatever name called.

The Guidance Note on Terms Used in Financial Statements, issued by the Institute of Chartered Accountants of India, defines the term “paid-up share capital” as, “that part of the subscribed share capital for which consideration in cash or otherwise has been received. This includes bonus shares allotted by the corporate enterprise”. Paid-up share capital would include both equity share capital as well as the preference share capital. While calculating the paid-up capital, amount of calls unpaid should be deducted from and the amount originally paid-up on forfeited shares should be added to the figure of paid-up capital. Share application money received should not be considered as part of the paid-up capital.

The Guidance Note on Terms Used in Financial Statements defines the term “reserve” as, “The portion of earnings, receipts or other surplus of an enterprise (whether capital or revenue) appropriated by management for a general or specific purpose other than provision for depreciation or diminution in the value of assets or for a known liability.

17. As per schedule III of Companies Act 2013 “Reserves & Surplus” consists of:-

- Capital Reserves;
- Capital Redemption Reserve;
- Securities Premium Reserve;
- Debenture Redemption Reserve;
- Revaluation Reserve;
- Share Options Outstanding Account;
- Other Reserves—(specify the nature and purpose of each reserve and the amount in respect thereof);
- Surplus i.e., balance in Statement of Profit and Loss

(Debit balance of Statement of Profit and Loss shall be shown as a negative figure under the head “Surplus”.)

Reserves are primarily of two types—capital reserves and revenue reserves. According to the Guidance Note on Terms Used in Financial Statements, the term “capital reserve”

III.742 Auditing Pronouncements

means “a reserve of a corporate enterprise which is not available for distribution as dividend”. The said Guidance Note defines the term “revenue reserve” as “any reserve other than capital reserve”. For determining the applicability of the Order to a private limited company, both capital as well as revenue reserves should be taken into consideration while computing the limit of rupees one crore; prescribed for paid-up capital and reserves & surplus. Revaluation reserve, if any, should also be taken into consideration while determining the figure of reserves for the limited purpose of determining the applicability of the Order. In case of debit balance of profit and loss, the same shall be netted for computing reserves & surplus. To summarise, total of reserves and surplus as disclosed in the financial statements should be considered in evaluating the threshold.

Borrowings

18. Borrowings from banks or financial institutions can be long term or short term and are normally in the form of term loans, demand loans, export credits, cash credits, overdraft facilities, bills purchased or discounted. Outstanding balances of such borrowings should be considered as borrowing outstanding for the purpose of computing the limit of rupees one crore. Non-fund based credit facilities, to the extent such facilities have devolved and have been converted into fund-based credit facilities, should also be considered as outstanding borrowings. The figures of outstanding borrowing would also include the amount of bank guarantees issued by the company where such guarantee(s) has (have) been invoked and encashed or where, say, a letter of credit has been devolved on the company. In case of term loans, interest accrued and due is considered as a borrowing whereas interest accrued but not due is not considered as a borrowing. Further, in case the company enjoys a facility, say, a cash credit facility, whose balance is fluctuating in nature, the Order would apply to the company in case on any day during the financial year concerned, the amount outstanding in the cash credit facility exceeds Rs. one crore as per books of the company along with other borrowings. The condition laid down in the Order is that the private company does not have total borrowing exceeding rupees one crore from any bank or financial institution at any point of time during the financial year. There is no stipulation in the Order that the borrowing should be a long-term borrowing or a short-term borrowing or that it should be a secured borrowing or an unsecured borrowing. Further, the condition would also apply notwithstanding the fact that the company has been granted an overdraft facility against, say, fixed deposits, of the company with the concerned bank. Current maturity of long term borrowings will also form part of borrowings. Moreover, outstanding dues in respect of credit cards would also be considered while calculating the limit of Rs. one crore; in respect of borrowings outstanding from a bank or financial institution. It is clarified that since the words used by the Order are ‘any bank or financial institution’, the limit of “exceeding one crore rupees” would apply in aggregate to all borrowings and not with reference to each

bank or financial institution.

Financial Institution

19. Sub section (39) of section 2 of the Act defines the term “financial institution” to include a scheduled bank, and any other financial institution defined or notified under the Reserve Bank of India Act, 1934 (2 of 1934)”. The term financial institution has been defined under clause (c) of Section 45I of the RBI Act 1934 as under:-

“45I (c) “financial institution” means any **non-banking institution** which carries on as its business or part of its business any of the following activities, namely:–

- (i) the financing, whether by way of making loans or advances or otherwise, of any activity other than its own;
- (ii) the acquisition of shares, stock, bonds, debentures or securities issued by a Government or local authority or other marketable securities of a like nature;
- (iii) letting or delivering of any goods to a hirer under a hire-purchase agreement as defined in clause (c) of section 2 of the Hire-Purchase Act, 1972;
- (iv) the carrying on of any class of insurance business;
- (v) managing, conducting or supervising, as foreman, agent or in any other capacity, of chits or kuries as defined in any law which is for the time being in force in any State, or any business, which is similar thereto;
- (vi) collecting, for any purpose or under any scheme or arrangement by whatever name called, monies in lumpsum or otherwise, by way of subscriptions or by sale of units, or other instruments or in any other manner and awarding prizes or gifts, whether in cash or kind, or disbursing monies in any other way, to persons from whom monies are collected or to any other person, [but does not include any institution, which carries on as its principal business;
 - (a) agricultural operations; or
 - (aa) industrial activity; or]
 - (b) the purchase or sale of any goods (other than securities) or the providing of any services; or
 - (c) the purchase, construction or sale of immovable property, so however, that no portion of the income of the institution is derived from the financing of purchases, constructions or sales of immovable property by other persons;

III.744 Auditing Pronouncements

Explanation.– For the purposes of this clause, “industrial activity” means any activity specified in sub-clauses (i) to (xviii) of clause (c) of section 2 of the Industrial Development Bank of India Act, 1964;

Further “non-banking institution” has been defined under clause (e) of Section 45I of RBI Act 1934 as under:-

45I (e) “non-banking institution” means a company, corporation (cooperative society).

Further, the term “financial institution” is also referred to in the context of the definition of a non-banking financial company as defined by the RBI Act, 1934. The term “non-banking financial company” has been defined under clause (f) of Section 45I of RBI Act 1934 as under:-

“45I (f) “non-banking financial company” means–

- (i) a financial institution which is a company;
- (ii) a non-banking institution which is a company and which has as its principal business the receiving of deposits, under any scheme or arrangement or in any other manner, or lending in any manner;
- (iii) such other non-banking institution or class of such institutions, as the Bank may, with the previous approval of the Central Government and by notification in the Official Gazette, specify;”

Accordingly the term “financial institution” shall also cover a non-banking financial company (NBFC). A list of financial institutions covered under the Companies (Acceptance of Deposits) Rules, 2014 is given in **Appendix III** to this Guidance Note. Further, private banks or foreign banks are banking institutions under the Banking Regulation Act, 1949. Therefore, loans taken from a private bank or a foreign bank would also be taken into consideration while examining the applicability of the Order.

Revenue

20. The term, “revenue”, has been defined by the Order as total revenue disclosed in Schedule III of the Act. Accordingly, the total revenue would include other income as per Schedule III. Here revenue will also include revenue from discontinuing operations as specified in the Order.

Auditor's Report to Contain Matters Specified in Paragraphs 3 and 4 of the Order

21. Every report made by the auditor under section 143 of the Act on the accounts of every company audited by him, to which this Order applies, for the financial year

commencing on or after 1st April 2015 shall, in addition, contain the matters specified in paragraphs 3 and 4 of the Order **as may be applicable**. Accordingly, the reporting under this Order shall be applicable for the financial year 2015-16 and onwards. In case the auditor has to report on the financial statements for the financial year prior to 2015-16, then the relevant earlier Order shall be applicable.

Here it is pertinent to mention that the Order specify the applicability of the matters by the words “as may be applicable”, reporting on the matters specified in paragraph 3 and 4 of the Order are to be made only on those matters which are applicable to the Company.

Non-applicability to the Consolidated Financial Statements

The Order specifically provides that it shall not apply to the auditor’s report on consolidated financial statements.

Period of Compliance

22. A question might arise as to the period in relation to which the auditor should comment or report upon the matters specified in the Order. For example, several of the questions relate to the maintenance of proper records. What should be the position of the auditor when records were improperly maintained for some part of the financial year but have been properly maintained at the balance sheet date? One view of the matter would be that no adverse report is necessary since the deficiencies existing during the year have been rectified before the auditor makes his report. However, this view does not recognise the fact that maintenance of records is not an end by itself but is a necessary condition for the auditor to satisfy himself regarding the authenticity of the transactions on which he is reporting. The better view, therefore, is to consider that the auditor is reporting on the state of affairs as they existed during the accounting year and compliance with the requirements of the Order should be judged with reference to the whole accounting year and not merely with reference to the position existing at the balance sheet date or the date at which he makes his report. However, in deciding whether or not to make an unfavourable comment, the auditor should consider what detrimental effect, if any, has been caused by the failure to comply with the requirements of the Order for any part of the year. For example, if records for fixed assets were not properly maintained for some part of the year but were properly maintained at the balance sheet date and physical verification was made after the records were properly maintained, there is no detrimental effect on the company. However, if internal control with respect to the items specified in the relevant clause of the Order was inadequate during a part of the year, some detrimental effect on the company could have occurred.

At the same time, the auditor cannot ignore the position existing at the balance sheet date or at the time at which he makes his report. The auditor might consider, in the light of the

III.746 Auditing Pronouncements

circumstances and provided he is able to satisfy himself regarding the facts, as to whether a reference to the state of affairs existing at the balance sheet date or at the date when he makes his report would be necessary to give a more complete picture to the members to whom he is reporting.

It is not necessary that the auditor should refer individually to each of the transactions throughout the year where there has not been compliance with the requirements of the Order unless the non-compliance is so significant as to merit individual attention. Normally, it should be sufficient if he indicates in general terms whether or not the requirements have been complied with.

General Approach

23. In formulating a general approach to the requirements of the Order, it is necessary to take a view regarding the objective behind the issuance of the Order. The Order does not replace an audit by an investigation in respect of the matters specified therein. Many of these matters, in any case, are covered by an auditor in the normal course of his audit and the emphasis of the Order is not, therefore, on requiring the auditor to carry out an investigation but on requiring him to give specific information on certain aspects of his work.

24. The reporting under the Order, issued under section 143(11) of the Act, is only supplemental to the audit of financial statements of the company and the auditor's report issued in terms of section 143(2) and 143(3) of the Act. Reporting under the Order should not, therefore, be construed as a separate reporting engagement. Section 143(9) of the Act, casts a duty on the auditor to comply with the auditing standards specified under section 143(10) of the Act. Hence, it should be noted that the auditor's procedures for reporting on the Order would, as in the case of audit of financial statements, need to be within the framework of the principles enunciated in the aforementioned Standards on Auditing.

25. It is possible that for the purposes of the Order, the auditor needs greater information from the management and, therefore, closer interaction with the management becomes necessary. This will ensure that there is sufficient advance planning regarding the manner in which the examination necessary for reporting on matters specified in the Order would be carried out by the auditor and the form in which the company should maintain its records so that they provide the necessary information and evidence to the auditor. An example of this would be the documents and records to be maintained by the company to provide the requisite evidence to the auditor regarding verification of fixed assets or inventories. It is, therefore, suggested that the auditor should intimate to the management, in writing, his requirements before the commencement of each audit. The auditor should also consider intimating additional requirements, if any, during the course of the audit. The auditor should also consider obtaining management representations, on

matters on which the Order requires the auditor to make a statement on certain aspects.

26. For a number of reasons, the necessity for preserving working papers by the auditors assumes greater importance in the context of the requirements of the Order. Firstly, there should be evidence that the opinion expressed by the auditor is based on an examination made by him. Secondly, there should be evidence to show that in arriving at his opinion, the auditor has given due cognisance to the information and explanations given by the company and that his opinion is not arbitrary. Thirdly, there should be evidence to show that the information and explanations obtained were full and complete, that is, the auditor has sought and obtained all the information and explanations which to the best of his knowledge and belief were necessary to be considered before arriving at his opinion. Finally, there should be evidence to show that the auditor did not merely rely upon the information or explanations given by the company but that he subjected such information and explanations to reasonable tests to verify their accuracy and completeness.

27. As the auditor needs to comply with the requirements of Standard on Auditing (SA) 230, "Audit Documentation", the auditor may take the following steps to ensure that he has adequate working papers to support the conclusions drawn in his report:

- (a) submit to the company, a questionnaire on all important matters covered by the Order.
- (b) make specific inquiries in writing on all important matters not covered by the questionnaire.
- (c) insist that replies of the company are furnished in writing and are signed by a responsible officer of the company.
- (d) where the explanations are not already separately recorded, maintain a record of the discussions with the management.
- (e) prepare his own "check-list" in respect of the requirements of the Order and record the names of the members of his staff who made the examination and the name of the company's staff who provided the information. An illustrative check-list in respect of the requirements of the Order is given in **Appendix IV** to this Guidance Note.

28. Where a requirement of the Order is not complied with but the auditor decides not to make an adverse comment, in view of the immateriality of the item, he should record rationale for the same in his working papers.

29. The mere fact that the Order is confined to certain specific matters should not be

III.748 Auditing Pronouncements

interpreted to imply that the auditor's duties in respect of other matters normally covered in the course of an audit of the financial statements are, in any way, limited or abridged by the Order. At the same time, it should be recognised that the reporting obligations under the Order are confined to the specific items stated in the Order.

30. Many of the matters covered by the Order require exercise of judgement by the auditor rather than the application of a purely objective test. For example, the auditor is required to state whether any material discrepancy noticed on physical verification of fixed assets have been properly dealt with in the accounts. This requires the exercise of judgement—firstly, in determining whether the discrepancies are material, and secondly, in deciding whether the accounting treatment is proper.

31. It may be noted that while reporting on matters specified in the Order, the auditor should consider the **materiality**, in accordance with the principles enunciated in Standard on Auditing (SA) 320(Revised), *Materiality in Planning and Performing an Audit*. The auditor obtains reasonable assurance by obtaining audit evidences to reduce audit risk to an acceptable low level. Materiality and audit risk are considered throughout the audit, in particular, when determining the nature, timing and extent of further audit procedures to be performed. For example, the auditor, in case of loans granted by the company, as referred to in Clause 3(iii) of the Order, while reporting, on the repayment schedule of various loans granted, the auditor examines the loan documentation of all large loans and conducts a test check examination of the rest, having regard to the materiality.

32. It is necessary to remember that the exercise of judgement is bound to be a somewhat subjective matter. This is, in fact, recognised by the provisions of the Act which require the expression of an opinion by the auditor. When a professional expresses an opinion, he does not guarantee that his opinion is infallible nor does he hold out that his opinion will invariably agree with the opinion of another professional on the same facts. The test of an auditor's liability in a matter which involves the exercise of judgement is not whether his opinion coincides with that of another person or authority, but whether he has expressed his opinion in good faith and after the exercise of reasonable care and skill. No liability can attach to an auditor in a matter involving the expression of an opinion based on the exercise of judgement, merely because there is a difference of opinion between him and some other person or authority or merely because some other person or authority comes to the conclusion that in expressing the opinion the auditor committed an error of judgement. The auditor may be liable, however, if it is found that he has expressed his opinion without exercising reasonable care and skill, or without applying his mind to the facts, or if he has expressed his opinion recklessly, in complete disregard of the facts.

Matters to be Included in the Auditor's Report

33. The matters to be included in the auditor's report are specified in paragraph 3 of the Order. It has sixteen clauses in all. The Clause-wise Comments are given below:-

34. Whether the company is maintaining proper records showing full particulars, including quantitative details and situation of fixed assets; [Paragraph 3(i)(a)]

Relevant Provisions

- (a) The clause requires the auditor to comment whether the company is maintaining proper records showing full particulars, including quantitative details and situation of fixed assets. Accounting Standard (AS) 10¹, "Accounting for Fixed Assets" defines "Fixed Asset" as an "asset held with the intention of being used for the purpose of producing or providing goods or services and is not held for sale in the normal course of business".²
- (b) The Order does not define as to what constitutes 'proper records'. In general, however, the records relating to fixed assets should contain, *inter alia*, the following details:
- (i) sufficient description of the asset to make identification possible;
 - (ii) classification, that is, the head under which it is shown in the accounts, e.g., plant and machinery, office equipment, etc;
 - (iii) situation;
 - (iv) quantity, i.e., number of units;
 - (v) original cost;
 - (vi) year of purchase;
 - (vii) useful life;
 - (viii) residual Value;
 - (ix) component-wise breakup; (Wherever applicable)
 - (x) adjustment for revaluation or for any increase or decrease in cost;

¹ Here it may be noted that the revised Accounting Standard (AS) 10, *Property Plant and Equipment* (issued as per MCA's Notification No. 364(E) dated 30th March 2016 and effective for the accounting periods commencing on or after the date of the said Notification *vide* circular no. 04/2016 dated 27th April, 2016[#]) that replaces the Accounting Standard (AS) 10, *Fixed Assets*, (issued under the Companies (Accounting Standards) Rules, 2006) defines the term "*Property, plant and equipment*" as "*tangible items that:*

(a) *are held for use in the production or supply of goods or services, for rental to others, or for administrative purposes; and*

(b) *are expected to be used during more than a period of twelve months."*

[#] Inserted at the time of printing.

² As per AS 26, Intangible Assets, an Intangible Asset is an identifiable non-monetary asset, without physical substance, held for use in the production or supply of goods or services, for rental to others, or for administrative purposes.

III.750 Auditing Pronouncements

- (xi) date of revaluation, if any;
 - (xii) rate(s)/basis of depreciation or amortisation, as the case may be;
 - (xiii) depreciation/amortisation for the current year;
 - (xiv) accumulated depreciation/amortisation;
 - (xv) particulars regarding impairment;
 - (xvi) particulars regarding sale, discarding, demolition, destruction, etc.
- (c) The records should contain the above-mentioned particulars in respect of all items of fixed assets, whether tangible or intangible, self-financed or acquired through finance lease. These records should also contain particulars in respect of those items of fixed assets that have been fully depreciated or amortised or have been retired from active use and held for disposal. The records should also contain necessary particulars in respect of items of fixed assets that have been fully impaired during the period covered by the audit report.

Thus, what constitutes proper records is a matter of professional judgment made by the auditor after considering the facts and circumstances of each case.

- (d) It is necessary that the aggregate original cost, depreciation or amortisation to date, and impairment loss, if any, as per these records under individual heads should reconcile with the figures shown in the books of account.
- (e) It is not possible to specify any single form in which the records should be maintained. This would depend upon the mode of account keeping (manual or computerized), the number of operating locations, the systems of control, etc. It may be noted that with the widespread use of the information technology, many companies maintain electronic records. In fact, section 2(12) of the Act, defines the terms “book and paper” and “book or paper” as including books of account, deeds, vouchers, writings, documents, minutes and registers maintained on paper or in electronic form”. Rule 3 of the Companies (Accounts) Rules, 2014 dealing with the “manner of books of account to be kept in electronic mode” states as under:
- “(1) The books of account and other relevant books and papers maintained in electronic mode shall remain accessible in India so as to be usable for subsequent reference.
 - (2) The books of account and other relevant books and papers referred to in sub-rule (1) shall be retained completely in the format in which they were originally generated, sent or received, or in a format which shall present accurately the information generated, sent or received and the information contained in the electronic records shall remain complete and unaltered.
 - (3) The information received from branch offices shall not be altered and shall be

kept in a manner where it shall depict what was originally received from the branches.

- (4) The information in the electronic record of the document shall be capable of being displayed in a legible form.
- (5) There shall be a proper system for storage, retrieval, display or printout of the electronic records as the Audit Committee, if any, or the Board may deem appropriate and such records shall not be disposed of or rendered unusable, unless permitted by law.”

The Rule further explains that the term “electronic mode” includes “electronic form” as defined in section 2(1)(r) of the Information Technology Act, 2000 and also includes an electronic record as defined in section 2(1)(t) of the Information Technology Act, 2000 (as amended by the Amendment Act of 2008)³. Accordingly, where any law requires that any information or matter should be in the typewritten or printed form, then such requirement shall be deemed to be satisfied if it is in an electronic form. However, it will have to be ensured that the information contained in the electronic records remains accessible and unaltered and its origin, destination, date, etc., can be identified.

Audit Procedures and Reporting

- (f) The auditor may, therefore, accept fixed assets register in electronic form if the following two conditions are satisfied:
 - (i) The controls and security measures in the company are such that once finalised, the fixed assets register cannot be altered without proper authorization and audit trail.⁴
 - (ii) The fixed assets register is in such a form that it can be retrieved in a legible form. In other words, the emphasis is on whether it can be read on the screen or a hard copy can be taken. If this is so, one can contend that it is capable of being retrieved in a legible form.

³ Section 2(1)(r) of the Information Technology Act, 2000 defines “electronic form” as follows: “electronic form” with reference to information means any information generated, sent, received or stored in media, magnetic, optical, computer memory, micro film, computer generated micro fiche or similar device”

Section 2(1)(t) of the information Technology Act, 2000 defines “electronic records” as follows: “electronic record” means data, record or data generated, image or sound stored, received or sent in an electronic form or micro film or computer generated micro fiche.”

⁴ In this context, attention of the members is also drawn to Standard on Auditing (SA) 315, Identifying and Assessing the Risks of Material Misstatement Through Understanding the Entity and Its Environment” as also the “Guidance Note on Audit of Internal Financial Controls Over Financial Reporting”, issued by ICAI.

III.752 Auditing Pronouncements

In case the above two conditions or either of the two conditions are not satisfied, the auditor should obtain a duly authenticated print-out of the fixed assets register. In case the auditor decides to rely on electronically maintained fixed assets register, he should maintain adequate documentation evidencing the evaluation of controls that seek to ensure the completeness, accuracy and security of the register.

- (g) The purpose of showing the situation of the assets is to make verification possible. There may, however, be certain classes of fixed assets whose situation keeps changing, for example, construction equipment which has to be moved to sites. In such circumstances, it should be sufficient if record of movement/custody of the equipment is maintained.
- (h) Where assets like furniture, etc., are located in the residential premises of members of the staff, the fixed assets register should indicate the name & designation of the person who has custody of the asset for the time being.
- (i) While, generally, the quantity, value and situation have to be recorded item-wise, assets of small individual value, e.g., chairs, tables, etc., may be conveniently grouped for purposes of entry in the register. Similarly, for assets having same useful life, it may not be necessary to indicate the accumulated depreciation for each item; instead, depreciation for the group as a whole may be shown.
- (j) Quantitative details in respect of fixed assets may be maintained on the following lines:
 - (i) Land may be identified by survey numbers and by deeds of conveyance.
 - (ii) Leaseholds can be identified by individual leases.
 - (iii) Buildings may, initially, be classified into factory buildings, office buildings, township buildings, service buildings (like water works), etc. These may then be further sub-divided. Factory buildings may be further classified into individual buildings which house a manufacturing unit or a plant or sub-plant. Service buildings may be similarly classified according to nature of service and location. Township buildings can be further classified into individual units or into groups of units taking into consideration the type of construction, the location and the year of construction. For example, if a company's township has four categories of quarters, e.g., A, B, C and D, the fixed assets register may not record each individual quarter but may have a single entry for all 'A' type quarters constructed in a particular year and located in a particular area and show only the number of quarters covered by the entry.
 - (iv) Railway sidings can be identified by length and location.
 - (v) Plant and Machinery may be sub-divided into fixed and movable. For

movable machinery, a separate record may be kept for each individual item. Movable machinery would include, for this purpose, items of plant which are for the moment fixed to the shop-floor but which can be moved, e.g., machine tools. In respect of fixed plant and machinery, a sub-division can be made according to the process, a plant for each separate process being considered as a separate identifiable unit. A further sub-division may be useful when within a process, there are plants which are capable of working independently of each other. The degree to which a sub-division of fixed plant and machinery should be made depends upon the circumstances of each case bearing in mind the objectives of sub-division, namely, the determination of individual cost and the facility for physical verification and componentisation⁵.

- (vi) Furniture and fittings and assets like office appliances, air-conditioners, water coolers, etc., consist of individual items which can be easily identified. Some difficulty may, however, be faced with regard to the large number of items and their relative mobility. In such cases, a distinction by value may be necessary, individual identification being made for high-value items and by groups for other items.
- (vii) Development of property is an asset head which can be easily sub-divided according to the buildings or plant for which the development work is undertaken.
- (viii) Patents, trademarks and designs are normally identifiable by the purchase agreements or the letters granting patent and by registration references in case of trademarks and designs. Intangible assets can be identified by reference to the purchase agreements (in case an intangible asset has been purchased) and by reference to the records and documents that substantiate the costs incurred by the company in the generation and development of an intangible asset.
- (ix) Vehicles can be identified by reference to the registration books.
- (k) In cases where the details regarding allocation of cost over identified units of assets are not available, it would have to be made by an analysis of the purchases and the disposals of the preceding years. Among the difficulties which may be faced could be: (i) records for some of the years may not be available; (ii) the description in the records may not be complete; (iii) details of disposals may not have been properly recorded; (iv) subsequent additions to an existing asset may have been shown as a separate asset; (v) a single figure of cost may be assigned to a number of assets

⁵ Attention of the readers is invited to the requirements of Schedule II to the Companies Act 2013 in respect of componentisation.

III.754 Auditing Pronouncements

which have to be separately identified; (vi) assets purchased for one department may have been moved to other departments, and so on. The management, in consultation with the auditor, should make the best effort possible under the circumstances to identify the cost of each asset. In doing so, reasonable assumptions or approximations may be made, where necessary. For example, when details of disposals are not available, it may be assumed that the asset sold is the asset which was acquired earliest in point of time. Similarly, when the individual cost of a large number of small items is not available, one can estimate the cost of each item and pro-rate the total cost in the proportion of the estimated cost of the item to the aggregate estimated cost.

- (l) It may be useful if initial identification of assets is done by persons who are familiar with them, e.g., the maintenance staff. At the point of identification, a code number may be affixed on the asset which would give sufficient details for future identification.
- (m) The initial identification of assets will often reveal a number of discrepancies between the assets as verified and the details compiled from the records. This may be on account of the features already considered in (k) above. This may also be due to the fact that assets might have been scrapped in earlier years but proper documentation may not have been made or that assets may have been broken up into smaller units or amalgamated into larger units or otherwise modified without changing the asset records. The degree of further inquiry necessary to reconcile these discrepancies would depend upon the nature of the asset, its cost, the age of the asset, the extent of accounting or other records available and other relevant factors. However, the concept of materiality should be borne in mind in making these further inquiries, greater attention being devoted to assets which are of large value or of relatively recent purchase. Any adjustments that finally have to be made should be properly documented. The auditor should request the appropriate level of management to carry out necessary adjustments.

35. *Whether these fixed assets have been physically verified by the management at reasonable intervals; whether any material discrepancies were noticed on such verification and if so, whether the same have been properly dealt with in the books of account; [Paragraph 3(i)(b)]*

Relevant Provisions

- (a) The clause requires the auditor to comment whether the fixed assets of the company have been physically verified by the management at reasonable intervals. The clause further requires the auditor to comment whether any material discrepancies were noticed on such verification and if so, whether those discrepancies have been properly dealt with in the books of account.

- (b) Physical verification of the assets is the responsibility of the management and, therefore, has to be carried out by the management itself and not by the auditor. It is, however, necessary that the auditor satisfies himself that such verification was done and that there is adequate evidence on the basis of which he can arrive at such a conclusion. The auditor may prefer to observe the verification, particularly when verification of all assets can be made by the management on a single day or within a relatively short period of time. If, however, verification is a continuous process or if the auditor is not present when verification is made, then he should examine the instructions issued to the staff (which should, therefore, be in writing) by the management and should examine the working papers of the staff to substantiate the fact that verification was done and to determine the name and competence of the person who did the verification. In making this examination, it is necessary to ensure that the person making the verification had the necessary technical knowledge where such knowledge is required. It is not necessary that only the company's staff should make verification. It is also possible for verification to be made by outside expert agencies engaged by the management for the purpose.

Audit Procedures and Reporting

- (c) The auditor should examine whether the method of verification was reasonable in the circumstances relating to each asset. For example, in the case of certain process industries, verification by direct physical check may not be possible in the case of assets which are in continuous use or which are concealed within larger units. It would not be realistic to expect the management to suspend manufacturing operations merely to conduct a physical verification of the fixed assets, unless there are compelling reasons which would justify such an extreme procedure. In such cases, indirect evidence of the existence of the assets may suffice. For example, the very fact that an oil refinery is producing at normal levels of efficiency may be sufficient to indicate the existence of the various process units even where each such unit cannot be verified by physical or visual inspection. It may not be necessary to verify assets like building by measurement except where there is evidence of alteration/demolition. At the same time, in view of the possibility of encroachment, adverse possession, etc., it may be necessary for a survey to be made periodically of open land.
- (d) It is advisable that the assets are marked with "distinctive numbers" especially where assets are movable in nature and where verification of all assets is not being conducted at the same time.
- (e) The Order requires the auditor to report whether the management has verified the fixed assets at reasonable intervals. What constitutes "reasonable intervals" depends upon the circumstances of each case. The factors to be taken into consideration in this regard include the number of assets, the nature of assets, the relative value of

III.756 Auditing Pronouncements

assets, difficulty in verification, situation and geographical spread of the location of the assets, etc. The management may decide about the periodicity of physical verification of fixed assets considering the above factors. While an annual verification may be reasonable, it may be impracticable to carry out the same in some cases. Even in such cases, the verification programme should be such that all assets are verified at least once in every three years. Where verification of all assets is not made during the year, it will be necessary for the auditor to report that fact, but if he is satisfied regarding the frequency of verification he should also make a suitable comment to that effect.

- (f) The auditor is required to state whether any material discrepancies were noticed on verification and, if so, whether the same have been properly dealt with in the books of account. The latter part of the statement is required to be made only if the discrepancies are material. The auditor has, therefore, to use his judgement to determine whether a discrepancy is material or not. In making this judgement, the auditor should consider not merely the cost of the asset and its relationship to the total cost of all assets but also the nature of the asset, its situation and other relevant factors. If a material discrepancy has been properly dealt with in the books of account (which may or may not imply a separate disclosure in the accounts depending on the circumstances of the case), it is not necessary for the auditor to give details of the discrepancy or of its treatment in the accounts but he is required to make a statement that a material discrepancy was noticed on the verification of fixed assets and that the same has been properly dealt with in the books of account.

36. *Whether the title deeds of immovable properties are held in the name of the company. If not, provide the details thereof; [Paragraph 3(i)(c)]*

Relevant Provision

- (a) The clause requires the auditor to comment whether the title deeds of immovable properties are held in the name of the company, if not, to provide the details thereof. This clause shall cover the immovable properties which are included under the head Fixed Assets, as the reporting under Clause 3(i)(a) & 3(i)(b) pertains to Fixed Assets only.
- (b) The Act does not define the term "Immovable Property". However, as per General Clauses Act, 1897, "Immovable Property" shall include land, benefits to arise out of land, and things attached to the earth, or permanently fastened to anything attached to the earth.

Audit Procedures and Reporting

- (c) Based on review of the Fixed Assets Register, the auditor is required to identify immovable properties and verify the title deeds of such immovable properties. TDRs

(Transfer Development Rights), Plant and Machinery embedded in land etc., are not considered as an immovable property.

- (d) The Order is silent as to what constitutes 'title deeds'. In general, title deeds means a legal deed or document constituting evidence of a right, especially to the legal ownership of the immovable property.
- (e) Following documents mainly constitute title deeds of the immovable property:-
 - (i) Registered sale deed / transfer deed / conveyance deed, etc. of land, land & building together, etc. purchased, allotted, transferred by any person including any government, government authority / body/ agency / corporation, etc. to the company.
 - (ii) In case of leasehold land and land & buildings together, covered under the head fixed assets, the lease agreement duly registered with the appropriate authority.
- (f) The auditor should carry out detailed examination in the cases where immovable property is transferred as a result of conversion of partnership firm or LLP into company or amalgamation of companies, as in such cases title deeds may be in the name of the erstwhile entity.
- (g) Where the title deeds of the immovable property have been mortgaged with the Banks/ Financial Institutions, etc., for securing the borrowings and loan raised by the company, a confirmation about the same should be sought from the respective institution to this effect. The auditor may also consider verifying this information from the online records, if available, of the relevant State.
- (h) There may be instances where the title deeds were lost accidentally or otherwise. In such cases, the certified copies of the documents, as available with the company, and details about the FIR filed, about loss of such documents needs to be obtained and documented. The auditor should also seek written representation from the management in this regard.
- (i) The management is responsible for legal determination of the validity of title deeds, the auditor may refer SA 250 "Consideration of Laws and Regulations in an audit of Financial Statements" to the extent considered relevant and obtain sufficient and appropriate audit evidence. Further any discrepancy, including any pending/disputed court cases relating to ownership, needs detailed discussion with the management and should be properly documented. In this context, the auditor may also consider communicating with the legal counsel, whether in-house or external, in accordance with the principles enunciated in SA 501, *Audit Evidence* –

III.758 Auditing Pronouncements

Specific Considerations for Selected Items. The auditor may also consider disclosing the dispute while reporting under this clause.

- (j) The auditor should verify the title deeds available and reconcile the same with the fixed assets register. The scrutiny of the title deeds of the immovable property may reveal a number of discrepancies between the details in the fixed assets register and the details available in the title deeds. This may be due to various reasons which needs to be examined.
- (k) The reporting under this clause, where the title deeds of the immovable property are not held in the name of the Company, may be made incorporating following details, in the form of a table or otherwise:
 - a. **In case of land:-**
 - total number of cases,
 - whether leasehold / freehold,
 - gross block and net block, (as at Balance Sheet date), and
 - remarks, if any.
 - b. **In case of Buildings:-**
 - total number of cases,
 - gross block & net block, (as at Balance Sheet date) and
 - remarks, if any.

37. *Whether physical verification of inventory has been conducted at reasonable intervals by the management and whether any material discrepancies were noticed and if so, whether they have been properly dealt with in the books of account; [Paragraph 3(ii)]*

Relevant Provisions

- (a) The clause requires the auditor to comment whether the management has conducted physical verification of inventory at reasonable intervals. The clause also requires the auditor to comment whether any material discrepancies were noticed on physical verification of inventory and if so, whether those material discrepancies have been properly dealt with in the books of account.
- (b) According to Accounting Standard (AS) 2, "Valuation of Inventories":

"Inventories are assets:

 - (a) held for sale in the ordinary course of business;
 - (b) in the process of production for such sale; or
 - (c) in the form of materials or supplies to be consumed in the production process

or in the rendering of services.”

- (c) Inventories encompass goods purchased and held for resale, for example, merchandise purchased by a retailer and held for resale, computer software held for resale, or land and other property held for resale. Inventories also encompass finished goods produced, or work in progress being produced, by the enterprise and include materials, maintenance supplies, stores and spares, consumables and loose tools awaiting use in the production process. It may be noted that packing materials are also included in inventories. Inventories do not include machinery spares covered by Accounting Standard (AS) 10, “Accounting for Fixed Assets”, which can be used only in connection with an item of fixed asset and the use of which is expected to be irregular⁶.

Audit Procedures and Reporting

- (d) Physical verification of inventory is the responsibility of the management of the company which should verify all material items at least once in a year and more often in appropriate cases. It is, however, necessary that the auditor satisfies himself that the physical verification of inventories has been conducted at reasonable intervals by the management and that there is adequate evidence on the basis of which the auditor can arrive at such a conclusion. For example, the auditor may examine the documents relating to physical verification conducted by the management during the year as also at the end of the financial year covered by the auditor’s report.
- (e) What constitutes “reasonable intervals” depends on circumstances of each case. The periodicity of the physical verification of inventories depends upon the nature of inventories, their location and the feasibility of conducting a physical verification. The management of a company normally determines the periodicity of the physical verification of inventories considering these factors. Normally, wherever practicable, all the items of inventories should be verified by the management of the company at least once in a year. It may be useful for the company to determine the frequency of verification by ‘A-B-C’ classification of inventories, ‘A’ category items being verified more frequently than ‘B’ category and the latter more frequently than ‘C’ category

⁶ Here it may be noted that paragraph 4 of the revised Accounting Standard (AS) 2, *Valuation of Inventories*, (issued as per MCA’s Notification No. 364(E) dated 30th March 2016 and effective for the accounting periods commencing on or after the date of the said Notification vide circular no. 04/2016 dated 27th April, 2016[#]) states that:

“Inventories do not include spare parts, servicing equipment and standby equipment which meet the definition of property, plant and equipment as per AS 10, *Property, Plant and Equipment*. Such items are accounted for in accordance with Accounting Standard (AS) 10, *Property, Plant and Equipment*.”

[#] Inserted at the time of printing.

III.760 Auditing Pronouncements

items.

- (f) The Order further requires the auditor to examine whether material discrepancies have been noticed on verification of inventories when compared with book records. Such an examination is possible when quantitative records are maintained for inventories but in many cases circumstances may warrant that records of individual issues (particularly for stores items) are not separately maintained and the closing inventory is established only on the basis of a year-end physical verification. Where such day-to-day records are not maintained, the auditor will not be able to arrive at book inventories except on the basis of an annual reconciliation of opening inventory, purchases and consumption. This reconciliation is possible when consumption in units can be co-related to the production, or can be established with reasonable accuracy. Where such reconciliation is not possible, the auditor would be unable to determine the discrepancies. If the item for which the discrepancy cannot be established is not material, the discrepancy, if any, will also not be material. For example, an item categorised as 'C' in ABC analysis might not be material and therefore, the discrepancy, if any, in regard to such an item would not be material. In other cases, however, the auditor will have to report that he is unable to determine the discrepancy, if any, on physical verification for the item or class of items to be specified.

38. *Whether the company has granted any loans, secured or unsecured to companies, firms, Limited Liability Partnerships or other parties covered in the register maintained under section 189 of the Companies Act, 2013. If so,*

- a) **whether the terms and conditions of the grant of such loans are not prejudicial to the company's interest;**
- b) **whether the schedule of repayment of principal and payment of interest has been stipulated and whether the repayments or receipts are regular;**
- c) **if the amount is overdue, state the total amount overdue for more than ninety days, and whether reasonable steps have been taken by the company for recovery of the principal and interest; [Paragraph 3(iii)]**

Relevant Provisions

- (a) There are three clauses under paragraph 3(iii) of the Order. It is clarified that the auditor's comments on all the three clauses are to be made with reference to the loans granted to companies, firms, limited liability partnerships or other parties covered in the register maintained under section 189 of the Act.
- (b) Clause 3(iii)(a) covers determination of terms and conditions at the time of the grant of the loan. In this regard it may be noted that though the clause uses the term "grant" which would ordinarily be understood to mean loans granted/given during the year, however, it may be appropriate to include such loans also that were renewed

during the year. Clauses 3(iii)(b) and 3(iii)(c) cover the loans granted during the year and also all loans having opening balances.

Audit Procedures and Reporting

- (c) The duty of the auditor, under this clause, is to determine whether the company has granted any loans, secured or unsecured to companies, firms, limited liability partnerships or other parties covered in the register maintained under section 189 of the Act. If the company has done so, the auditor should report on the matters specified in sub-clauses (a), (b) and (c) of the clause 3(iii). The auditor is required to disclose the requisite information in his report in respect of all parties covered in the register maintained under section 189 of the Act irrespective of the period to which such loan relates. Further, there is no stipulation regarding the loan being given in cash or in kind. In the absence of such stipulation, the auditor is required to disclose the requisite information as specified in sub-clauses (a), (b) and (c) of the clause 3(iii), in his report in respect of all kind of loans whether long term or short term, whether given in cash or in kind to the parties covered in the register maintained under section 189 of the Act.
- (d) Under section 189 of the Act, every company is required to maintain one or more registers which contain the particulars of all contracts or arrangements to which sub-section (2) of section 184 or section 188 of the Act applies. The particulars of all contracts or arrangements in which directors are interested is required to be maintained by every company in Form MBP-4 as specified in Rule 16(1) of the Companies (Meetings of Board and its Powers) Rules, 2014. It is, however, suggested that the auditor should acquaint himself with all the requirements of sections 184, 188 and 189 of the Act and rules there under.
- (e) The auditor should obtain a list of companies, firms, limited liability partnerships or other parties covered in the register maintained under section 189 of the Act from the management. The auditor may also consider verifying returns filed or certificates obtained by the management in this regard. The auditor should examine all loans (secured or unsecured) granted by the company to identify those loans granted to companies, firms, limited liability partnerships or other parties covered in the register maintained under section 189 of the Act.
- (f) It may so happen that a party listed in the register maintained under section 189 of the Act might have taken a loan from a company and repaid it during the same financial year. Therefore, while examining the loans, the auditor should also take into consideration the loan transactions that have been squared-up during the year and report such transactions under this clause. For example, the company has, during the financial year, granted a loan of Rs. 1,00,000/- to a firm in which one of the directors of the company is interested and the firm repays the loan during the

III.762 Auditing Pronouncements

financial year concerned. The auditor is also required to consider such transaction while commenting upon this clause of the Order.

A. Whether the terms and conditions of the grant of such loans are not prejudicial to the company's interest; [Paragraph 3(iii)(a)]

Relevant Provision

- (a) This clause, read with Paragraph 3(iii) of the Order, requires the auditor to examine and comment whether the terms and conditions of loans granted by the company (whether secured or unsecured) to companies, firms, Limited Liability Partnerships or other parties covered in the register maintained under section 189 of the Act are prejudicial to the interest of the company.

Audit Procedures and Reporting

- (b) The auditor should examine agreements entered into by the company with the parties covered in the register maintained under section 189 of the Act or any other supporting documents available for ascertaining the terms and conditions of all loans granted by the company to such companies, firms, Limited Liability Partnerships or other parties.
- (c) The auditor's duty is to determine whether, in his opinion, the terms and conditions of the loans given are prejudicial to the interest of the company. The "terms and conditions" would primarily include rate of interest, security, terms and period of repayment and restrictive covenants, if any. In determining whether the terms of the loans are prejudicial, the auditor would have to give due consideration to the other factors connected with the loan, including its ability to lend, terms of its borrowings, borrower's financial standing, credit rating, if available, the nature of the security, rate of interest and so on.

For the purpose of reporting under this clause the auditor may consider clause (7) of Section 186 of the Act wherein it is specified that no loan, covered under this section, shall be given at a rate of interest lower than the prevailing yield of one year, three year, five year or ten year government security closest to the tenor of the loan, to the extent applicable.

- (d) It may be mentioned that clause (a) of sub-section (1) of section 143 of the Act also requires the auditor to inquire whether loans and advances made by the company on the basis of security have been properly secured and whether the terms on which they have been made are prejudicial to the interests of the company or its members. The auditor's inquiry under the aforesaid clause may also be useful for the purposes of reporting under this clause.
- (e) Further, the auditor may also come across a situation where the company has a policy of providing loans at concessional rates of interest to its employees and such

a loan has been given to a relative of the director who is also an employee of the company. In such a case also, the auditor would be required to examine and comment whether loan is prejudicial to the interests of the company. It may, however, be noted that normally such terms as per the policy followed by the company cannot be said to be prejudicial to the interest of the company if other employees of the company also receive the loan on the same terms.

- (f) The following is an example of an unfavourable comment by the auditor under this clause:

“According to the information and explanations given to us and based on the audit procedures conducted by us, we are of the opinion that the terms and conditions of loans granted by the company to two parties covered in the register maintained under section 189 of the Companies Act, 2013, (total loan amount granted Rs ---- and balance outstanding as at balance sheet date Rs -----) are prejudicial to the company’s interest on account of the fact that the loans have been granted at an interest rate of X% per annum which is significantly lower than the cost of funds to the company and also lower than the prevailing yield of government security close to the tenor of the loan”

B. Whether the schedule of repayment of principal and payment of interest has been stipulated and whether the repayments or receipts are regular; [Paragraph 3(iii)(b)]

Relevant Provision

- (a) This part of the clause requires the auditor to report upon the stipulation of schedule of repayment of principal and payment of interest and on regularity of repayments of principal amount of loans and receipts of interest thereon. The scope of auditor’s inquiry under this clause is restricted in respect of companies, firms, Limited Liability partnerships or other parties covered in the register maintained under section 189 of the Act.

Audit Procedures and Reporting

- (b) The auditor has to examine from the loan agreements / mutually agreed letter of arrangement, as the case may be, whether the schedule of repayment of principal and payment of interest has been stipulated at the time of sanction. If there is no such agreement / arrangement or the agreement / arrangement does not contain the schedule of repayment of principal and payment of interest, the auditor shall report that there is no stipulation of schedule of repayment of principal and payment of interest.
- (c) The auditor has to examine whether the repayment of principal and receipt of interest are regular. The word ‘regular’ should be taken to mean that the principal and interest should normally be received whenever they fall due, respectively.

III.764 Auditing Pronouncements

- (d) In case where the auditee company is a non-banking financial company, the auditor, for reporting under this clause, would also need to refer various directions for non-banking financial companies issued by Reserve Bank of India.
- (e) In case of non-stipulation of schedule of repayment of principal & payment of Interest, the auditor should state the fact and may report that he is unable to make specific comment on the regularity of repayment of principal & payment of interest, in such cases.
- (f) In case where the schedule of repayment of principal & payment of interest is stipulated but repayment of principal or payment of interest is not regular then the auditor may report the fact and may give no. of cases and remarks, if any.

C. If the amount is overdue, state the total amount overdue for more than ninety days, and whether reasonable steps have been taken by the company for recovery of the principal and interest; [Paragraph 3(iii)(c)]

Relevant Provision

- (a) This clause requires the auditor to state the total amount overdue for more than 90 days and whether reasonable steps have been taken by the company for recovery of the principal and interest. An amount is considered to be overdue when the payment has not been received on the due date as per the lending arrangement. In such cases, the auditor has to examine the steps, if any, taken for recovery of this amount. It may, however, be noted that the scope of the auditor's inquiry under this clause is restricted to loans given by the company to parties covered in the register maintained under section 189 of the Act.

Audit Procedures and Reporting

- (b) Under this clause, the auditor is required to disclose total amount overdue for more than 90 days. The auditor should examine the agreement or other documents containing the schedule of repayment of the loans granted to parties covered in the register maintained under section 189 of the Act. The auditor should then verify whether the repayments as per the books of account are in accordance with the schedule of repayment of the loans as per agreement or arrangement. This examination would enable the auditor to determine the total amount overdue (principal and interest) for more than 90 days from such parties as at balance sheet date. The auditor should disclose the aggregate of the total amount of overdue for more than 90 days in respect of loans granted to such parties.
- (c) While examining whether reasonable steps have been taken by the company for recovery of principal and interest, the auditor would have to consider the facts and circumstances of each case, including the amounts involved. It is not necessary that steps to be taken must necessarily be legal steps. Depending upon the

circumstances, the degree of delay in recovery and other similar factors, issue of reminders or the sending of an advocate's or solicitor's notice, may amount to "reasonable steps" even though no legal action is taken. The auditor is not, therefore, required to comment on the mere absence of legal steps if he is otherwise satisfied that reasonable steps have been taken by the company. The auditor should obtain sufficient appropriate audit evidence to support the fact that reasonable steps have been taken for recovery of the principal and interest of loans granted by the company. The auditor should ask the management to give in writing, the steps which have been taken. The auditor should arrive at his opinion only after consideration of the management's representations and other relevant evidence.

- (d) Reporting of such cases may be made incorporating following details:

No. of Cases

Principal Amount Overdue

Interest Overdue

Total Amount Overdue

Remarks, if any (specify whether reasonable steps have been taken by the Company for recovery of principal amount and interest)

39. In respect of loans, investments, guarantees, and security whether provisions of section 185 and 186 of the Companies Act, 2013 have been complied with. If not, provide the details thereof. [Paragraph 3(iv)]

A. Compliance of Section 185 of the Companies Act 2013: Loan to directors, etc.

Relevant Provisions

- (a) Under this clause the auditor is required to report on the compliance of Section 185 of the Act. The text of section 185 is reproduced in **Appendix V** to this Guidance Note.

Audit Procedures and Reporting

- (b) For this purpose, the auditor should carry out the following procedures:
- (i) Obtain from the management the details of the directors or any other person in whom the director is interested. He may also check the details of the persons covered under this clause from Form MBP-1 and from the Register maintained u/s 189 of the Act.

III.766 Auditing Pronouncements

- (ii) Obtain and check the details of the transactions carried out with such persons, including of any guarantee given and security provided.
 - (iii) Further examine the details to find out whether any of the transaction is attracting the provisions of section 185 of the Act.
 - (iv) In case of transactions that are covered under the exceptions as provided under section 185, the auditor should obtain the necessary evidence in support of such exception.
- (c) Section 185 prohibits advance of any loan to directors, etc., directly or indirectly. What is an indirect loan is not defined in section 185 or elsewhere in the Act. Indirect is interpreted in case of *Dr. Freddie Ardeshir Mehta v. Union of India* [1991] 70 Comp. Cas. 210 (Bom.) to mean a loan to a director through the agency of one or more intermediaries. For example, if company A borrows from company B and lends the same to company C and loan from B to C is covered by section 185. In this case section 185 shall also be applicable in case of lending from company A to C because it would be construed as an indirect loan from B to C.
- (d) The auditor should report the nature of non-compliance, the maximum amount outstanding during the year and the amount outstanding as at the balance sheet date in respect of
- (i) the Directors; and
 - (ii) persons in whom directors are interested (specify the relationship with the Director concerned).

B. Compliance of Section 186 of the Companies Act 2013: Loan and investment by company

Relevant Provisions

- (a) Under this clause the auditor is also required to report on the compliance of Section 186 of the Act, which governs giving of loans, and guarantee or providing and security in connection with a loan, by a company to any person or other body corporate and acquiring securities of any other body corporate by a company. The section also prohibits a company from making investments through more than two layers of investment companies. The text of Section 186 and relevant extract of Rules 11, 12 & 13 of Companies (Meeting of Board and its Powers) Rules, 2014 is reproduced in **Appendix V** to this Guidance Note.

Audit Procedures and Reporting

- (b) The duty of the auditor under this clause is to determine whether the loans and investments made by the company comply with the requirements of the provisions of Section 186 of the Act.

For this purpose, the auditor should:

- (i) Obtain the details of, loans given to any person or other body corporate, guarantee given or security provided in connection with a loan to any other body corporate or person and securities acquired of any other body corporate by way of subscription, purchase or otherwise, made during the year as well as the outstanding balances as at the beginning of the year.
- (ii) Check whether, at any point of time during the year in case of aforesaid transactions, the company has exceeded the limit of sixty per cent of its paid-up share capital, free reserves and securities premium account or one hundred per cent of its free reserves (as defined in section 2(43) of the Act and securities premium account, whichever is more.

If it exceeds the limits specified above, whether prior approval by means of a special resolution passed at a general meeting has been obtained.

- (iii) Check whether the company has made investments through more than two layers of investment companies.⁷
- (iv) Check whether the company has disclosed the full particulars of the loan given, investment made or guarantee given or security provided in the financial statement including the purpose for which the same is proposed to be utilized by the recipient.
- (v) Check whether the company has passed the board resolution as prescribed and obtained the prior approval, wherever required, from the public financial institution concerned where any term loan is subsisting.
- (vi) Check whether the loan has been given to company registered under section 12 of the Securities and Exchange Board of India Act, 1992, if so, whether the inter-corporate loan or deposits taken by such company are within the limits prescribed, if so, obtain the certificate of statutory auditors of that company from the management to ensure the compliance.

⁷ The Sub section 1 of Section 186 which restricts investment through more than two layers of investment companies is proposed to be deleted by Companies (Amendment) Bill, 2016 pending at appropriate level for approval.

III.768 Auditing Pronouncements

- (vii) Check whether rate of interest is not lower than the prevailing yield of one year, three year, five year or ten year government security closest to the tenor of the loan granted.
 - (viii) Check if the company is in default in the repayment of any deposits accepted or in payment of interest thereon, then the company is not allowed to give any loan or guarantee or any security or an acquisition till such default is subsisting.
 - (ix) Check whether the company has maintained a register (as per Form MBP-2) in the manner as prescribed and also check the compliances of other provisions and relevant rules.
 - (x) It may be noted that the aforesaid section is not applicable in respect of loan made, guarantee given or security provided by banking company or an insurance company or a housing finance company in the ordinary course of its business or a company engaged in the business of financing of companies or of providing infrastructural facilities. However the restriction with regard to the investment through more than two layers of investment companies would be applicable for such companies also. The auditor may ensure compliance accordingly.
- (c) It may also be noted that the provisions of section 186 of the Act shall not apply to a government company engaged in defence production and a government company, other than a listed company, in case such company obtains approval of the ministry or department of the central government which is administratively in charge of the company, or, as the case may be, the State Government before making any loan or giving any guarantee or providing any security or making any investment under the section. [vide Notification F. No. 1/2/2014-CL.V dated 5th June 2015]

Non-compliance may be reported incorporating following details:-

S. No.	Non-compliance of Section 186			Remarks, if any
	Name of Company/ Party	Amount Involved	Balance as Balance at Balance Sheet Date	
1.	Investment through more than two layers of investment companies			
2.	Loan given or guarantee given			

	or security provided or acquisition of securities exceeding the limits without prior approval by means of a special resolution				
3.	Loan given at rate of interest lower than prescribed				
4.	Any other default				

40. In case, the company has accepted deposits, whether the directives issued by the Reserve Bank of India and the provisions of sections 73 to 76 or any other relevant provisions of the Companies Act, 2013 and the rules framed thereunder, where applicable, have been complied with? If not, the nature of such contraventions be stated; If an order has been passed by Company Law Board or National Company Law Tribunal or Reserve Bank of India or any court or any other tribunal, whether the same has been complied with or not? [Paragraph 3(v)]⁸

Relevant Provisions

- (a) The clause, in addition to requiring the auditors to report on compliance with the requirements of sections 73 to 76 of the Act, and the directives of the Reserve Bank of India for acceptance of public deposits, also requires the auditor to report on compliance with the order, if any, passed by the Company Law Board or National Company Law Tribunal or Reserve Bank of India or any Court or any other Tribunal.
- (b) Section 2(31) has defined 'deposit' to include any receipt of money by way of deposit or loan or in any other form by a company, but does not include such categories of amount as may be prescribed in consultation with the Reserve Bank of India.
- (c) Section 73 of the Act, prohibits a company (other than a banking company, non-banking financial company (NBFC) and such other company as may be specified by the central government in consultation with the Reserve Bank of India), to invite,

⁸ The text of sections 73 to 76 of the Act is reproduced in **Appendix XII** to this Guidance Note. The text of the Companies (Acceptance of Deposits) Rules, 2014 is given in **Appendix XIII** to this Guidance Note.

III.770 Auditing Pronouncements

accept or renew deposits from the public except in the manner provided in this section and the Companies (Acceptance of Deposits) Rules, 2014.

- (d) Section 76 of the Act, permits the public companies having specified net worth or turnover, to accept deposits from persons other than its members subject to compliance with section 73 and the Companies (Acceptance of Deposits) Rules, 2014.
- (e) The central government in consultation with the Reserve Bank of India has notified the Companies (Acceptance of Deposits) Rules, 2014. These Rules are not applicable to a banking company, a NBFC, a housing finance company and a company specified by the central government under the proviso to sub-section (1) of section 73 of the Act.
- (f) The Companies (Acceptance of Deposits) Rules, 2014 cover the following main items:
 - (i) the nature of deposits which may be accepted;
 - (ii) the terms and conditions of acceptance of deposits by companies from its members and persons other than its members;
 - (iii) the limits up to which the deposits can be accepted;
 - (iv) the form and particulars of advertisement for deposits;
 - (v) the form of application for deposits;
 - (vi) furnishing of deposit receipts to depositors;
 - (vii) Maintenance of liquid assets, creation of security and appointment of trustee for depositors;
 - (viii) maintenance of register(s) of depositors;
 - (ix) Manner and extent of deposit insurance;
 - (x) general provisions regarding the repayment of deposits and payment of interest;
 - (xi) the returns to be filed with the Registrar of Companies.

Audit Procedures and Reporting

- (g) The auditor should plan to test for compliance with the provisions of sections 73 to 76 of the Act and the Rules made thereunder i.e. the Companies (Acceptance of Deposits) Rules, 2014. For such purpose, the auditor should also obtain an understanding of the requirements of sections 73 to 76 and rules thereunder.
- (h) The auditor should examine compliance by the company with regard to all the matters specified in the sections and the Rules and not merely to the limits of the deposits. Where the number of deposits is very large, it is obviously not feasible for the auditor to satisfy himself that every single deposit complies with the rules. He should, therefore, examine the system by which deposits are accepted and records

are maintained and make a reasonable test check to ensure the correctness of the system. The auditor may also make a “check list” to ensure that all the requirements of the Rules regarding the records to be maintained, returns to be filed, etc., are complied with.

- (i) The auditor should examine the efficacy of the internal controls instituted by the company so that the deposits accepted by the company remain within the limits. It may be difficult for the auditor to ascertain that deposits accepted by the company are within the limits on each day of the accounting year. He would, therefore, be justified in making a reasonable test check to ensure that the company has not accepted deposits during the year in excess of the limits. For financing companies, the auditor should make a similar examination having regard to the Reserve Bank directives in force from time to time.
- (j) Apart from the audit procedures mentioned above, the auditor should also enquire from the management about the possible instances of non-compliance with sections 73 to 76 or any other relevant provisions of the Act and the relevant rules. The auditor should also enquire from the management about any order passed by the Company Law Board or National Company Law Tribunal or Reserve Bank of India or any Court or any other Tribunal for contravention of these sections or any other relevant provision(s) of the Act and the relevant rules. The auditor should obtain a management representation to the effect whether:
 - (i) the company has complied with the directives issued by the Reserve Bank of India and the provision of section 73 to 76 (as the case may be) of the Act and the relevant rules; and
 - (ii) where an order has been passed by any of the relevant authorities mentioned in the clause, and if so, the company has complied with the requirements of the Order.
- (k) In case where the auditor is of the view that any kind of contravention of sections 73 to 76 or any other relevant provisions of the Act or relevant rules or directives from Reserve Bank of India, if any, has taken place, the auditor should state in his report that the provisions of that section(s) and/or relevant rules, as the case may be, have not been complied with. The auditor should also report the nature of contraventions.
- (l) The auditor, under this clause, is required to verify whether the company has complied with the order passed by Company Law Board or National Company Law Tribunal or Reserve Bank of India or any Court or any other Tribunal. Where any of such authorities has passed an order, the auditor should examine the steps taken by the company to comply with the said order. If the company has not complied with the order, the same is to be reported stating therein the nature of contravention and the fact that the company has not complied with the order issued by the Company

III.772 Auditing Pronouncements

Law Board or National Company Law Tribunal or Reserve Bank of India or any Court or any other Tribunal.

41. *Whether maintenance of cost records has been specified by the Central Government under sub-section (1) of Section 148 of the Companies Act, 2013 and whether such accounts and records have been so made and maintained. [Paragraph 3(vi)]*

Relevant Provisions

(a) Section 148(1) of the Act, specifies that the Central Government may, by order, in respect of such class of companies engaged in production of such goods or providing such services as may be prescribed, direct that particulars relating to the utilization of material or labour or to other items of cost as may be prescribed shall also be included in the books of account kept by that class of companies. Pursuant to this requirement and in exercise of the powers conferred by sub-section (1) of section 469 of the Act, the Central Government has made rules in respect of a number of classes of companies. These books of account and records form part of the books of account of the company within the meaning of Section 2(13) of the Act.

In exercise of the power conferred by sub-section (1) and (2) of section 469 and section 148 of the Act, the Central Government has issued the Companies (Cost Records and Audit) Rules, 2014 which has specified the list of class of companies in which maintenance of cost record is prescribed under section 148 of the Act. The Companies (Cost Records and Audit) Rules, 2014 are reproduced in **Appendix VI** to this Guidance Note.

(b) The Companies (Cost Records and Audit) Rules, 2014 has defined “cost records” as books of account relating to utilization of materials, labour and other items of cost as applicable to the production of goods or provision of services as provided in section 148 of the Act, and these rules. These rules also prescribed the items of cost to be included in the Books of Account.

(c) Sub-section (2) of Section 148 of the Act, also provides that where, in the opinion of the Central Government, it is necessary to do so it may by order, direct that the audit of cost records of class of companies, which are covered under sub-section (1) and which have a net worth of such amount as may be prescribed or a turnover of such amount as may be prescribed, shall be conducted in the manner specified in the order.

(d) Rule 4 of the aforesaid Rules lays down the conditions subject to which the companies covered by these Rules need to get their cost records audited.

Audit Procedures and Reporting

(e) The Order requires the auditor to report whether cost accounts and records have

been made and maintained. The word “made” applies in respect of cost accounts (or cost statements) and the word “maintained” applies in respect of cost records relating to materials, labour, overheads, etc. The auditor has to report under the clause irrespective of whether a cost audit has been ordered by the central government. The auditor should obtain a written representation from the management stating (a) whether cost records are required to be maintained for any product(s) or services of the company under section 148 of the Act, and the Companies (Cost Records and Audit) Rules, 2014; and (b) whether cost accounts and records are being made and maintained regularly. The auditor should also obtain a list of books/records made and maintained in this regard. The Order does not require a detailed examination of such records. The auditor should, therefore, conduct a general review of the cost records to ensure that the records as prescribed are made and maintained. He should, of course, make such reference to the records as is necessary for the purposes of his audit.

- (f) It is necessary that the extent of the examination made by the auditor is clearly brought out in his report. The following wording is, therefore, suggested:

“We have broadly reviewed the books of account maintained by the company pursuant to the Rules made by the Central Government for the maintenance of cost records under section 148 of the Act, and are of the opinion that *prima facie*, the prescribed accounts and records have been made and maintained.”

- (g) Where the auditor finds that the records have not been written or are not *prima facie* complete, it will be necessary for the auditor to make a suitable comment in his report.

42. *Whether the company is regular in depositing undisputed statutory dues including provident fund, employees’ state insurance, income-tax, sales-tax, service tax, duty of customs, duty of excise, value added tax, cess and any other statutory dues to the appropriate authorities and if not, the extent of the arrears of outstanding statutory dues as on the last day of the financial year concerned for a period of more than six months from the date they became payable, shall be indicated; [Paragraph 3(vii)(a)]*

Relevant Provisions

- (a) This clause requires the auditor to report upon the regularity of the company in depositing undisputed statutory dues including provident fund, employees’ state insurance, income-tax, sales-tax, service tax, duty of custom, duty of excise, value added tax, cess and any other statutory dues to appropriate authorities. If the company is not regular in depositing the above mentioned undisputed statutory dues, the auditor is required to state the extent of arrears of statutory dues which

III.774 Auditing Pronouncements

have remained outstanding as at the last day of the financial year concerned for a period of more than six months from the date they became payable.

- (b) It may be noted that the use of the words “any other statutory dues” indicates that the clause covers all type of dues under various statues which may be applicable to a company having regard to its nature of business. Apart from the statutory dues listed, the auditor is required to report on the regularity of the company in depositing “any other statutory dues” payable by the company to appropriate authorities under the statutes applicable to the company.
- (c) The intention of the government, in this clause is to ascertain how regular the company is in depositing statutory dues with the appropriate authorities. Since the emphasis of the clause is on the regularity, the scope of auditor’s inquiry is restricted to only those statutory dues, which the company is required to deposit regularly to an authority. The auditor is not required to ascertain whether the company is regular in depositing amounts, which may be levied by an appropriate authority from time to time upon occurrence or non-occurrence of certain events and therefore are not required to be paid regularly. Any sum, which is to be regularly paid to an appropriate authority under a statute (whether Central, State or Local or Foreign) applicable to the company, should be considered as a “statutory due” for the purpose of this clause. In other words, obligation to pay a statutory due is created or arises out of a statute, rather than being based on an independent contractual or legal relationship. Thus, examples of “statutory dues” would include municipal taxes, taxes deducted at source, fees payable to the licensing authority in respect of business being carried on under license granted by an authority, say a cinema hall. Accordingly, any sum payable to an electricity company as electricity bill would not constitute a statutory due despite the fact that such a company has been established under a statute. This is so because the due has arisen on account of contract of supply of goods or services between the parties. However, care shall have to be taken that in case any dues are recoverable as arrears of land revenue by the concerned authority, the same shall be treated as a statutory due.
- (d) With reference to regularity, it is also important to distinguish amongst the various items stated in the clause. The auditor should very clearly understand the nature of each statutory due payable by the company while examining the aspect of regularity before commenting on the same. For instance, the regularity is a normal feature in case of certain statutory dues such as, provident fund, employees’ state insurance, sales tax, etc., because the companies are required to deposit the money with appropriate authorities on a monthly or quarterly basis. But this is not the case in respect of, say, duty of custom on import of goods or demands arising on account of assessment orders etc., which a company is required to pay as and when an event giving rise to the liability of the company occurs. Such dues should be construed to

have been paid regularly if the company deposits them as and when they become due. However, the auditor would be required to comment upon the regularity of the company in depositing the installments, if any, granted by an authority in respect of a demand against the company.

- (e) An important issue to consider is the question of regularity of payment of import duty where the goods had been imported, say, five years back and were placed in the bonded warehouse and even till the end of the financial year under audit, the goods have not been removed from such warehouse. It may be noted that when the imported goods are lodged in a bonded warehouse, the payment of import duty is to be made when the goods are removed from the bonded warehouse. Till the time⁹ the importer opts to remove the goods from the warehouse, the importer is required to incur the rent and interest expenditure on the amount of customs duty payable. Since the payment of the custom duty is not due in the current case, the question of regularity does not arise in respect of custom duty. However, it may be noted that the interest and rent that are required to be incurred under section 61 of the Customs Act, 1962 would come under other statutory dues and the auditor would have to examine and comment upon the regularity of the company in depositing such interest and rent.
- (f) Non-payment of advance income tax would constitute default in payment of statutory dues. It may, however, happen that the company might not have any taxable income on the due dates on which advance tax is required to be paid. If such a company has an income after the last date on which the advance tax was required to be paid and consequently the company incurs interest under the relevant provisions of the Income Tax Act, 1961, it should not be construed that the company is not regular in depositing advance tax.
- (g) It may be noted that the auditor has to report on the regularity of deposit of statutory dues irrespective of the fact whether or not there are any arrears on the balance sheet date. This is because there may be situations where a company has deposited the relevant dues before the end of the year while it has been in default in the matter for a significant part of the year. In cases where there are no arrears on the balance sheet date but the company has been irregular during the year in depositing the statutory dues, the auditor should state this fact while reporting under this clause.
- (h) For the purpose of this clause, the auditor should consider a matter as “disputed”

⁹ It may be noted that section 61 of the Customs Act, 1962 provides that any goods deposited in the warehouse may be stored upto a period of one year in the bonded warehouse. The time limit is five years in case of capital goods and for other good three years which are intended for use in any 100% EOU. The said Act, however, also provides for extension of the warehousing period by the relevant authorities subject to certain prescribed conditions.

III.776 Auditing Pronouncements

where there is a positive evidence or action on the part of the company to show that it has not accepted the demand for payment of tax or duty, e.g., where it has gone into appeal. For this purpose, where an application for rectification of mistake (e.g., under section 154 of the Income Tax Act, 1961) has been made by the company, the amount should be regarded as disputed. Where the demand notice/intimation for the payment of a statutory due is for a certain amount and the dispute relates only to a part and not the whole of such amount, only such amount should be treated as disputed and the balance amount should be regarded as undisputed. It is not necessary for the auditor to examine the sustainability or otherwise of the claim of the company regarding disputed amounts. It is sufficient for his purpose if the evidence available shows that the amount is disputed by the company. It may also be noted that the Order has clarified that mere representation to the concerned Department shall not be treated as a dispute.

- (i) A question may arise that when do the statutory dues become payable. There can be two views with regard to the question. On the one hand, it can be argued that the statutory dues referred to in this clause become payable on the last date by which payment can be made without attracting penalty and/or interest under the relevant law. On the other hand, it can also be argued that the amounts referred to in the clause become so payable as at the date of the expiry of the stay granted by the authorities or, where installments have been granted for the payment of statutory dues referred to in the clause, the date on which the default occurs and the amount becomes payable to the authorities. As the purpose of this clause is to indicate the amounts which have become actually payable and are outstanding as at the last day of the financial year concerned for a period of more than six months from the date they became payable, the latter view seems to conform more closely to the requirements of the Order.
- (j) It may be noted that penalty and/or interest levied under the respective laws would be covered within the term "amounts payable".
- (k) The report should be restricted to the actual arrears and should not include the amounts which have not fallen due for payment to appropriate authority and have been recognised as outstanding dues at the balance sheet date.
- (l) It is possible that in a large company where there are a number of departments with separate payrolls and where payments are spread over a number of days, the collection of data regarding the provident fund/employees' state insurance collections and the company's contribution thereto may take some time. In order to ensure that deposit of the dues is made in time, the company may make lump-sum deposits of estimated amounts and adjust the excess or deficit against the following month's deposit. If this method is consistently followed and the difference between the total dues and the lump-sum deposit is not significant, it need not be considered

that dues have not been regularly deposited and no unfavorable comment is necessary.¹⁰

Audit Procedures and Reporting

- (m) The auditor should make plans to test whether the company is regular in depositing undisputed statutory dues. The auditor, in order to be able to comment on this clause, should have a general understanding of the various statutes governing the company and the dues payable by the company under those statutes. The auditor should also enquire of the management of the company about the statutes under which the company is required to pay any statutory dues. The auditor should also discuss with the management, the policies or procedures adopted for identification and payment of statutory dues. The auditor may also obtain from the management or himself prepare a calendar of dates for submission of various statutory dues by the company for his reference.
- (n) The information necessary to comply with this requirement of the Order may be obtained from the company in the form of a statement. The statement should contain a list of various statutes under which the company is required to make payments regularly to appropriate authorities, the kind of payments under each statute, the due date for making the payment to the appropriate authority, the date on which the payment is made by the company, the arrears not due and the arrears overdue for more than six months. The auditor should verify the statement provided by the management with the underlying documents and records. The auditor's general understanding of the various statutes governing the company and the dues payable by the company under those statutes would help the auditor in assessing the completeness of the statement. The auditor should recognise that there could be a situation that a statutory due might have become payable but has not been captured by the accounting and internal control systems established by the enterprise and, therefore, the auditor should perform procedures to mitigate risk arising from such a situation.
- (o) The auditor should obtain a written representation with reference to the date of the balance sheet from the management:
 - (i) specifying the cases and the amounts considered disputed;
 - (ii) containing a list of the cases and the amounts in respect of the statutory dues which are undisputed and have remained outstanding for a period of more

¹⁰ The concept of materiality – which is fundamental to the entire auditing process – should be borne in mind while reporting on this clause as in case of other clauses of the Order.

III.778 Auditing Pronouncements

- than six months from the date they became payable; and
- (iii) containing a statement as to the completeness of the information provided by the management.
- (p) While the auditor has to report upon the regularity of the deposit, he is not required to specify in detail each instance where there has been a delay or the extent of the delay. It should be sufficient if he indicates whether generally the deposits have been regular or otherwise. The following are examples of the wordings, which may be used in relevant situations:
- (i) “undisputed statutory dues including provident fund, employees’ state insurance, income-tax, sales-tax, service tax, duty of custom, duty of excise, value added tax, cess have been regularly deposited by the company with the appropriate authorities in all cases during the year”.
 - (ii) “undisputed statutory dues including provident fund, employees’ state insurance, income-tax, sales-tax, service tax, duty of custom, duty of excise, value added tax, cess have generally been regularly deposited with the appropriate authorities though there has been a slight delay in a few cases”.
 - (iii) “undisputed statutory dues including provident fund, employees’ state insurance, income-tax, sales-tax, service tax, duty of custom, duty of excise, value added tax, cess have not generally been regularly deposited with the appropriate authorities though the delays in deposit have not been serious”.
 - (iv) “undisputed statutory dues including provident fund, employees’ state insurance, income-tax, sales-tax, service tax, duty of custom, duty of excise, value added tax, cess have not been regularly deposited with the appropriate authorities and there have been serious delays in a large number of cases”.
- (q) If the auditor is of the opinion that the company is not regular in depositing undisputed statutory dues including provident fund, employees’ state insurance, income-tax, sales-tax, service tax, duty of custom, duty of excise, value added tax, cess and any other statutory dues with the appropriate authorities, the extent of the arrears of outstanding statutory dues as at the last day of the financial year concerned for a period of more than six months from the date they became payable, are required to be mentioned by the auditor in his audit report. In indicating the arrears, the period to which the arrears relate should also preferably be given and further, wherever possible, the fact of subsequent clearance or otherwise may also be indicated. The auditor may report in the following format:-

Statement of Arrears of Statutory Dues Outstanding for More than Six Months

Name of the Statute	Nature of the Dues	Amount (Rs.)	Period to which the amount relates	Due Date	Date of Payment	Remarks, if any
---------------------	--------------------	--------------	------------------------------------	----------	-----------------	-----------------

43. Where dues of income tax or sales tax or service tax or duty of customs or duty of excise or value added tax have not been deposited on account of any dispute, then the amounts involved and the forum where dispute is pending shall be mentioned. {A mere representation to the concerned Department shall not be treated as a dispute.} [Paragraph 3(vii)(b)]

Relevant Provisions

- (a) This clause requires that in case of disputed statutory dues, the amounts involved should be stated along with the forum where the dispute is pending. Therefore, even minor amounts would be required to be reported under this clause. The amount should be reported in a manner so that the reader is able to understand the dispute and the amount involved therein.

Audit Procedures and Reporting

- (b) The audit procedures applied by the auditor for commenting on the previous clause, including obtaining a statement from the management in regard to the matters specified in the clause, would help the auditor in determining the dues of sales tax/income tax/duty of customs/service tax/duty of excise that have not been deposited on account of any dispute, the amounts involved and the forum where dispute is pending. The auditor should also obtain a management representation about the disputed dues, the amounts involved and the forum where the dispute is pending. The auditor should carry out necessary audit procedures to verify the information provided by the management.
- (c) A show-cause or similar notice generally contains the requirements/queries of the assessing officer. Normally, issuance of a show cause notice by the concerned department should not be construed to be a demand payable by the company. However, in some cases, a show cause notice and demand may be combined in one document. Normally, in such cases, the demand would not be construed to have arisen till the time the assessee has disposed off the requirements of the show cause order. Hence, it would be necessary to evaluate each situation individually.
- (d) Tax demands that have been set aside are clearly not 'dues'. Similarly, if a demand has been referred for reassessment and the effect of such referral is the

III.780 Auditing Pronouncements

cancellation of the earlier demand, this too would not constitute an amount due. The wording of the order would be of significance; if the demand is not cancelled, it will remain disputed dues. As far as demands that have been stayed are concerned, these should be regarded as disputed dues. These should be disclosed along with a disclosure of the fact of stay. The fact that a stay has been granted does not mean that the authority granting the stay has held that the amount in question is not a valid demand against the company. The stay normally is a concession that the amount may not be deposited immediately or that it may be deposited in installments. Sometimes a stay is granted if the assessee provides a bank guarantee. It may also be noted that there may be a situation that the appellate authority has decided a case in favour of the company but the Department may prefer to make an appeal to a higher authority. In such a case, there is considered to be no dispute until the time the Department makes an appeal to the relevant appellate authority. Further, in case where the amount under the dispute is pending for an appeal to be filed and the time limit for filing the appeal has lapsed, the disputed amount would become a statutory due and the reporting responsibilities of the auditor as are applicable to any other undisputed statutory due under clause 3(vii)(a) of the Order would become applicable. Further, in case where the amount under dispute has not been paid before filing the appeal and no appeal is filed within the time allowed and the time limit for filing the appeal has expired, the disputed amount would become a statutory due.

- (e) It is possible that in respect of same nature of statutory dues, there may be more than one dispute pertaining to different periods for which, appeals might have been filed separately. For example, different years' income tax liabilities might have been disputed at different levels of appellate authorities. Hence, in such cases, the information required by the clause should be given separately in respect of each period. In the case of a large company having a number of manufacturing and marketing divisions, it would be quite normal that many cases relating to sales tax, income tax, excise, customs, value added tax, etc., are disputed and are pending at various stages. It cannot be the intention of the clause that each case is listed separately. It is, therefore, proper to summarise the cases stage-wise under each broad head, e.g., sales tax, income-tax, duty of customs, duty of excise, and give the particulars as indicated in paragraph (f) below.
- (f) The information required by the clause may be reported in the following format:

Statement of Disputed Dues

<i>Name of the Statute</i>	<i>Nature of the Dues</i>	<i>Amount (Rs.)</i>	<i>Period to which the amount</i>	<i>Forum where dispute is</i>	<i>Remarks, if any</i>
----------------------------	---------------------------	---------------------	-----------------------------------	-------------------------------	------------------------

			<i>relates</i>	<i>pending</i>	
--	--	--	----------------	----------------	--

- (g) Further, a plain reading of the clause suggests that the amounts to be reported under clause 3(vii)(b) of the Order are those which have not been deposited on account of any dispute, irrespective of the treatment of such disputed amounts in accounts. It is quite possible that an amount is disputed and has not been deposited but on consideration of the likely outcome of the dispute, a provision has been made in the accounts. Such an amount will need to be reported, notwithstanding that it has been provided for. Similarly, even if it had not been provided for, it would have to be reported as long as it is not deposited. It is also possible that an amount is disputed, has been deposited and on consideration of the likely outcome of the dispute, has been shown as a recoverable. Though such an amount is not contemplated for reporting under the clause, since it has been deposited, the fact of such deposit having been made under protest should be brought out by the auditor in his report under the clause.

Whether a disputed amount should be provided for in the accounts or not will need to be judged in the context of Accounting Standard (AS) 4, "Contingencies and Events Occurring After the Balance Sheet Date and/or Accounting Standard (AS) 29, "Provisions, Contingent Liabilities and Contingent Assets".

44. Whether the company has defaulted in repayment of loans or borrowing to a financial institution, bank, Government or dues to debenture holders? If yes, the period and the amount of default to be reported (in case of defaults to banks, financial institutions, and Government, lender wise details to be provided). [Paragraph 3(viii)]

Relevant Provisions

- (a) Under this clause, the auditor is required to report whether the company has defaulted in repayment of loans or borrowings¹¹ to a financial institution or bank or Government or dues to debenture holders. If the answer is in the affirmative, the auditor is also required to mention the period of default and the amount of default, lender wise.
- (b) A question that arises is whether the scope of the auditor's inquiry would cover defaults made by the company during the year only or whether the defaults committed in previous years and continuing until the year end would also be covered. It is clarified that the auditor should report the period and amount of all defaults existing at the balance sheet date irrespective of when those defaults have

¹¹ The term "Borrowings" has been explained in paragraph 18 of this Guidance Note.

III.782 Auditing Pronouncements

occurred.

- (c) Though the word “default” has not been defined, in this regard, the word “default” would mean non-payment of dues to banks, Government, financial institutions or debenture holders on the last dates specified in loan documents or debentures trust deed, as the case may be.

For example, in the case of term loans, fixed dates are prescribed for repayment in the agreement or terms and conditions of the loans. The dates prescribed for repayments would operate as the last date of payments and any delay after this fixed date would amount to default and reporting required in case of aggregate default on account of repayment of loan.

- (d) Section 2(39) of the Act defines “financial institution” to include a scheduled bank, and any other financial institution defined or notified under the Reserve Bank of India Act, 1934. Text of Section 45-I(c) of RBI Act, 1934 is given in **Appendix III** to this Guidance Note.

In view of the said definition, Financial Institution includes all Banks, Public Financial Institutions, as well as Non-Banking Institutions and also includes Non-Banking Financial Companies.¹²

- (e) This clause also requires reporting on default in repayment of loans or borrowings taken from the Government. The term “Government” means the department of the Central Government, a State Government and its department and a Union Territory and its department, but shall not include any entity, whether created by a statute or otherwise, the accounts of which are not required to be kept in accordance with article 150 of the constitution or the rules made there under. (As defined u/s 65B(26A) of the Finance Act 1994). Accordingly, the term “Government” does not include Government Company/ Public Sector Undertaking / Boards / Authority / Corporation and Foreign Government.

Audit Procedures and Reporting

- (f) The auditor should obtain the schedule of repayments to banks, financial institutions, government and debenture holders from the management of the company. The schedule should indicate the amount and the due dates of the payments that the company is required to make to banks, financial institutions, government and debenture holders.
- (g) The auditor should examine the agreement or other documents containing the terms and conditions of the loans and borrowings of the company taken from banks, Government and financial institutions. The auditor should also examine the

¹² Attention of the readers is invited to paragraphs 7 to 21 relating to applicability of the Order.

debenture trust deed. This examination would enable the auditor in verifying the amount and due dates of the payments mentioned in schedule of repayments provided by the management of the company. The auditor should then verify whether the repayments as per the books of account are in accordance with the terms and conditions of the relevant agreement.

- (h) The auditor should obtain the confirmation of the concerned bank or financial institution as to the status of the loan account including the overdue position as at the balance sheet date.
- (i) It may happen that the company might have submitted application for reschedulement/restructuring proposals to the lenders, which may be in different stages of processing. Submission of application for reschedulement/restructuring does not mean that no default has occurred. Accordingly, in such situations also the auditor should report the period of default and the amount of default. However, if the application for reschedulement of loan has been approved by the concerned bank or financial institution or if the default has been made good by the company during the year covered by the auditor's report, the auditor should state in his audit report the fact of reschedulement of loan or the fact of default having been made good.
- (j) It may be noted that for the purposes of reporting of default under this clause the term "borrowings" may be construed as the principal amount since it has been used in the context of the word "repayment" and the term "dues" would mean the principal and the interest.
- (k) The auditor may come across a situation where there may be disputes between the company and the lender on certain issues relating to repayments. In such situations, the auditor should consider the prevailing terms and conditions only. However, he may give a brief nature of the dispute while reporting under this clause.
- (l) Under this clause the auditor is required to give lender wise details in case of banks, financial institutions and Government only and not in respect of individual debenture holders and may incorporate the following details:-

Particulars	Amount of default as at the balance sheet date	Period of default	Remarks, if any.
i) Name of the Lenders: In case of:			

III.784 Auditing Pronouncements

Bank Financial Institution & Government			
ii) Debentures			

45. Whether moneys raised by way of initial public offer or further public offer (including debt instruments) and term loans were applied for the purposes for which those are raised. If not, the details together with delays or default and subsequent rectification, if any, as may be applicable, be reported; [Paragraph 3(ix)]

Under this clause the auditor is required to report whether money raised by the company through Initial Public Offer or Further Public Offer (including debt instruments) and term loans have been utilised for the purposes for which those were raised.

Relevant Provisions

- (a) In case the company has made an Initial Public Offer or Further Public Offer (including debt instruments) the auditor is required to report upon the disclosure of end-use of the money by the management in the financial statements. The auditor is also required to state whether he has verified the disclosure made by the management in this regard. 'Securities' has been defined in Section 2(81) of the Act which refers to the definition of 'securities' in section 2(h) of the Securities Contracts (Regulation) Act, 1956. Initial public offer or further public offer shall cover issue of equity shares, convertible securities, non-convertible debt securities, non-convertible redeemable preference shares, perpetual debt instruments, perpetual non-cumulative preference shares, Indian depository receipts, and securitized debt instruments.
- (b) Part 1 of Chapter III of the Act consisting of Sections 23 to 41 deals with Public Offer. Section 23(1)(a) of the said Act, provides that, "a public company may issue securities to public through prospectus which is also referred to as "public offer". Explanation to Section 23 states that for the purpose of aforesaid Chapter III, the expression, "public offer" includes initial public offer or further public offer of securities to public by a company, or an offer for sale of securities to the public by an existing shareholder, through issue of prospectus. In terms of Section 24 of the said Act, the Securities & Exchange Board of India (SEBI) is empowered to regulate issue of securities by making regulations on that behalf. Therefore, a company raising moneys by way of Initial Public Offer or Further Public Offer shall have to follow the requirements of the applicable provisions of the Act, as well as the relevant SEBI Regulations.
- (c) Currently, there is no legal requirement under the Act to disclose the end use of money raised by Initial Public Offer or Further Public Offer (including debt

instruments) in the financial statements. The companies, however, make such a disclosure in the Board's Report. Schedule III to the Act requires that only unutilized amount of any Initial Public Offer or Further Public Offer (including debt instruments) made by the company should be disclosed in the financial statements of a company. In the absence of any legal requirement of such disclosure, it appears that the clause envisages that the companies should disclose the end use of money raised by the Initial Public Offer or Further Public Offer (including debt instruments) in the financial statements by way of notes and the auditor should verify the same.

Audit Procedures and Reporting

- (d) Normally, the companies do mention the end-use of the money proposed to be raised through the Initial Public Offer or Further Public Offer (including debt instruments) in the offer document. An examination of the offer document would provide the auditor an understanding of the proposed end-use of money raised from public. The auditor should verify that the amount of end-use of money disclosed in the financial statements by the management is not materially different from the proposed and actual end use. The auditor should obtain a representation from the management as to the completeness of the disclosure with regard to the end-use of money raised as well as actual end utilization of money raised by Initial Public Offer or Further Public Offer (including debt instruments). If, for any reason, the auditor is not able to verify the end-use of money raised from Initial Public Offer or Further Public Offer (including debt instruments), he should state that he is not able to comment upon the disclosure of end-use of money by the company since he could not verify the same. He should also mention the reasons which resulted in the auditor's inability to verify the disclosure.
- (e) It may be noted that while reporting under this clause, the auditor should also have regard to the SEBI (Listing Obligations & Disclosure Requirements) Regulations, 2015 (hereinafter referred as "LODR"), which contain a number of disclosure requirements in the balance sheet with respect to utilization of proceeds of monies raised from public, whether by shares or debentures, as also disclosure requirements in respect of unutilized monies from such proceeds. From a perusal of the LODR, it would be apparent that the details have to be given of both 'utilised' and 'unutilised' monies. Since the purpose is to provide a picture to the reader of 'utilisation of issue proceeds', it is only logical that the sum total of utilised and unutilised portions equal the total issue size. This implies that the figure of 'utilised' money should be cumulative.
- (f) It may also be noted that according to the LODR, the issuer company is required to make arrangements for the use of proceeds of the issue to be monitored by financial

III.786 Auditing Pronouncements

institutions. The monitoring agency so appointed is required to submit its report to the SEBI, on a half-yearly basis, till the completion of the project. In case, the company has appointed a monitoring agency for the purpose of the issue, reports of the monitoring agency would also be helpful to the auditor while reporting under the clause.

- (g) The expression “debt instrument” is neither defined in the Order nor under the Act. However, SEBI (Issue and Listing of Debt Securities), Regulations, 2008 which apply to public issue of debt securities and its listing, define the term “debt securities”. In terms of Regulation 2(1)(e) of the said regulations, it means a non-convertible debt securities which create or acknowledge indebtedness, and include debenture, bonds and such other securities of a body corporate or any statutory body constituted by virtue of a legislation, whether constituting a charge on the assets of the body corporate or not, but excludes bonds issued by Government or such other bodies as may be specified by the Board, security receipts and securitized debt instruments. Further, in terms of the Explanation to Section 23 of the Act, “Public Offer” would include ADRs and GDRs.
- (h) In view of the aforesaid, the reporting by an auditor as stated in paragraph (a) above should only relate to moneys raised by the company by way of initial public offer or further public offer of equity shares, convertible securities (defined above) and debt securities (defined above). Since, offer for sale of specified securities (i.e. equity shares and convertible securities) to the public by any existing holder does not result in any moneys raised in a company, the same is outside the purview of the reporting requirement under this clause. It seems that strictly in terms of the definitions of public offer, initial public offer and further public offer cited above, moneys raised from foreign capital markets and by way of issuance of Global Depository Receipts and American Depository Receipts may not fall within the scope of reporting under this clause.
- (i) This clause also requires the auditor to examine whether term loans were applied for the purpose for which these loans were obtained. First of all, the auditor should ascertain whether the company has taken any “term loans”. Term loans normally have a fixed or pre-determined maturity period or a repayment schedule. In the banking industry, for example, loans with repayment period beyond 36 months are usually known as “term loans”. Cash credit, overdraft and call money accounts/deposits are, therefore, not covered by the expression “term loans”. Term loans are generally provided by banks and financial institutions for acquisition of capital assets which then become the security for the loan, i.e., end use of funds is normally fixed.
- (j) The Order is silent as to whether this clause also covers term loans obtained from entities/persons other than banks/financial institutions. A strict interpretation of the

clause would mean that the term loan obtained from entities/persons other than banks/financial institutions would also have to be examined by the auditor for the purpose of reporting under the clause.

- (k) The auditor should examine the terms and conditions subject to which the company has obtained the term loans. The auditor may also examine the proposal for grant of loan made to the bank. As mentioned above, normally, the end use of the funds raised by term loans is mentioned in the sanction letter or documents containing the terms and conditions of the loan. The auditor should ascertain the purpose for which term loans were sanctioned. The auditor should also compare the purpose for which term loans were sanctioned with the actual utilisation of the loans. The auditor should obtain sufficient appropriate audit evidence regarding the utilisation of the amounts raised. If the auditor finds that the funds have not been utilized for the purpose for which they were obtained, the auditor's report should state the fact.
- (l) It is not necessary to establish a one-to-one relationship with the amount of term loan and its utilisation. It is quite often found that the amount of term loan disbursed by the bank is deposited in the common account of the company from which subsequently the utilisation is made. In such cases, it should not be construed that the amount has not been utilised for the purpose it was raised.
- (m) It may happen that the company might have acquired improved version/model of assets as against the assets for which the loan had been sanctioned. For example, if out of a loan sanctioned for purchase of machinery to be used for manufacture of shoe upper is instead used to purchase a machine, which apart from manufacturing shoe uppers has certain additional manufacturing facilities. In such cases, it should not be construed that the loan has not been applied for the purpose for which it was raised.
- (n) Normally, the term lenders directly make the payment to the vendors/suppliers. In such cases, it becomes easier for the auditor to comment on the application of term loans.
- (o) It may so happen that the term loans taken during the year might not have been applied for the stated purpose during the year, for example, the loan was disbursed at the fag end of the year. In such a case, the auditor should mention in his audit report that the term loan obtained during the year has not been utilised. This also implies that the auditor, while making inquiry in respect of this clause, should also consider the term loans which although were taken in the previous accounting period but have been actually utilised during the current accounting period.
- (p) In case of term loans, raised against title deeds, long term FDRs, NSCs etc., where the lender is not concerned with the purpose for which it is being obtained, the

III.788 Auditing Pronouncements

auditor should clearly mention the fact that in absence of any stipulation regarding the utilization of loans from the lender, he is unable to comment as to whether the term loans have been applied for the purposes for which they were obtained. In case the specific purpose is not recorded and the general purpose/ bone fide business use is stated; in such cases the auditor should verify whether the company has invested or utilized the money for purposes other than objects of the company.

- (q) During construction phase, companies, may, temporarily invest the surplus funds to reduce the cost of capital or for other business reasons. However, subsequently the same are utilised for the stated objectives. In such cases, the auditor should mention the fact that pending utilisation of the funds raised through Initial Public Offer or Further Public Offer (including debt instruments) or term loans for the stated purpose, the funds were temporarily used for the purpose other than for which they were raised but were ultimately utilised for the stated end-use.
- (r) Where the auditor concludes that the initial public offer or the further public offer (including debt instruments) or the term loans were not applied for the purpose for which the same were raised/obtained, the auditor should mention in his report that the amount involved as well as the nature of default including delay in utilization. The auditor is also required to report the details of any subsequent rectifications made by the company.
- (s) A suggested reporting format under this cause is as follows:

In our opinion and according to the information and explanations given to us, the Company has utilized the money raised by way of initial public offer/ further public offer (including debt instruments) and the term loans during the year for the purposes for which they were raised, except for:

Nature of the fund raised	Details of default (Reason /Delay)	Amount (Rs.)	Subsequently rectified (Yes/No) and details

46. Whether any fraud by the company or any fraud on the company by its officers or employees has been noticed or reported during the year; If yes, the nature and the amount involved is to be indicated; [Paragraph 3(x)]

Relevant Provisions

- (a) This clause requires the auditor to report whether any fraud by the company or any fraud on the company by its officers or employees has been noticed or reported

during the year. If yes, the auditor is required to state the amount involved and the nature of fraud. The clause does not require the auditor to discover such frauds. The scope of auditor's inquiry under this clause is restricted to frauds 'noticed or reported' during the year. The use of the words "noticed or reported" indicates that the management of the company should have the knowledge about the frauds by the company or on the company by its Officer and employees that have occurred during the period covered by the auditor's report. It may be noted that this clause of the Order, by requiring the auditor to report whether any fraud by the company or on the company by its Officer or employees has been noticed or reported, does not relieve the auditor from his responsibility to consider fraud and error in an audit of financial statements. In other words, irrespective of the auditor's comments under this clause, the auditor is also required to comply with the requirements of Standard on Auditing (SA) 240, "The Auditor's Responsibility Relating to Fraud in an Audit of Financial Statements". In this context, the auditor should also have regard to the Guidance Note on Reporting on Fraud under Section 143(12) of the Companies Act, 2013, issued by ICAI.

- (b) The term "fraud" refers to an intentional act by one or more individuals among management, those charged with governance, employees, involving the use of deception to obtain an unjust or illegal advantage. Although fraud is a broad legal concept, the auditor is concerned with fraudulent acts that cause a material misstatement in the financial statements. Misstatement of the financial statements may not be the objective of some frauds. Auditors do not make legal determinations of whether fraud has actually occurred. Fraud involving one or more members of management or those charged with governance is referred to as "management fraud"; fraud involving only employees including officers of the entity is referred to as "employee fraud". In either case, there may be collusion with third parties outside the entity. In fact, generally speaking, the "management fraud" can be construed as "fraud by the company".
- (c) Two types of intentional misstatements are relevant to the auditor's consideration of fraud - misstatements resulting from fraudulent financial reporting and misstatements resulting from misappropriation of assets.
- (d) Fraudulent financial reporting involves intentional misstatements or omissions of amounts or disclosures in financial statements to deceive financial statement users. Fraudulent financial reporting may involve:
 - (i) Deception such as manipulation, falsification, or alteration of accounting records or supporting documents from which the financial statements are prepared.

III.790 Auditing Pronouncements

- (ii) Misrepresentation in, or intentional omission from, the financial statements of events, transactions or other significant information.
 - (iii) Intentional misapplication of accounting principles relating to measurement, recognition, classification, presentation, or disclosure.
- (e) Misappropriation of assets involves the theft of an entity's assets. Misappropriation of assets can be accomplished in a variety of ways (including embezzling receipts, stealing physical or intangible assets, or causing an entity to pay for goods and services not received); it is often accompanied by false or misleading records or documents in order to conceal the fact that the assets are missing.
- (f) Fraudulent financial reporting may be committed by the company because management is under pressure, from sources outside or inside the entity, to achieve an expected (and perhaps unrealistic) earnings target particularly when the consequences to management of failing to meet financial goals can be significant. The auditor must appreciate that a perceived opportunity for fraudulent financial reporting or misappropriation of assets may exist when an individual believes internal control could be circumvented, for example, because the individual is in a position of trust or has knowledge of specific weaknesses in the internal control system.

Audit Procedures and Reporting

- (g) While planning the audit, the auditor should discuss with other members of the audit team, the susceptibility of the company to material misstatements in the financial statements resulting from fraud. While planning, the auditor should also make inquiries of management to determine whether management is aware of any known fraud or suspected fraud that the company is investigating.
- (h) The auditor should examine the reports of the internal auditor with a view to ascertain whether any fraud has been reported or noticed by the management. The auditor should examine the minutes of the audit committee, if available, to ascertain whether any instance of fraud pertaining to the company has been reported and actions taken thereon. The auditor should enquire from the management about any frauds on the company that it has noticed or that have been reported to it. The auditor should also discuss the matter with other employees including officers of the company. The auditor should also examine the minute book of the board meeting of the company in this regard.
- (i) The auditor should obtain written representations from management that:
- (i) it acknowledges its responsibility for the implementation and operation of accounting and internal control systems that are designed to prevent and

- detect fraud and error;
- (ii) it believes the effects of those uncorrected misstatements in financial statements, aggregated by the auditor during the audit are immaterial, both individually and in the aggregate, to the financial statements taken as a whole. A summary of such items should be included in or attached to the written representation;
 - (iii) it has disclosed to the auditor all significant facts relating to any frauds or suspected frauds known to management that may have affected the entity; and
 - (iv) it has disclosed to the auditor the results of its assessment of the risk that the financial statements may be materially misstated as a result of fraud.
- (j) Because management is responsible for adjusting the financial statements to correct material misstatements, it is important that the auditor obtains written representation from management that any uncorrected misstatements resulting from fraud are, in management's opinion, immaterial, both individually and in the aggregate. Such representations are not a substitute for obtaining sufficient appropriate audit evidence. In some circumstances, management may not believe that certain of the uncorrected financial statement misstatements aggregated by the auditor during the audit are misstatements. For that reason, management may want to add to their written representation words such as, "We do not agree that items constitute misstatements because [description of reasons]."
- (k) The auditor should consider if any fraud has been reported by them during the year under section 143(12) of the Act and if so whether that same would be reported under this Clause. It may be mentioned here that section 143(12) of the Act requires the auditor has reasons to believe that a fraud is being committed or has been committed by an employee or officer. In such a case the auditor needs to report to the Central Government or the Audit Committee. However, this Clause will include only the reported frauds and not suspected fraud.
- (l) Where the auditor notices that any fraud by the company or on the company by its officers or employees has been noticed by or reported during the year, the auditor should, apart from reporting the existence of fraud, also required to report, the nature of fraud and amount involved. For reporting under this clause, the auditor may consider the following:
- (i) This clause requires all frauds noticed or reported during the year shall be reported indicating the nature and amount involved. As specified the fraud by the company or on the company by its officers or employees are only covered.

III.792 Auditing Pronouncements

- (ii) Of the frauds covered under section 143(12) of the Act, only noticed frauds shall be included here and not the suspected frauds.
- (iii) While reporting under this clause with regard to the nature and the amount involved of the frauds noticed or reported, the auditor may also consider the principles of materiality outlined in Standards on Auditing.

47. Whether managerial remuneration has been paid or provided in accordance with the requisite approvals mandated by the provisions of section 197 read with Schedule V to the Companies Act? If not, state the amount involved and steps taken by the Company for securing refund of the same; [Paragraph 3(xi)]

Relevant Provisions

- (a) This clause requires the auditor to examine the compliance of Section 197 read with Schedule V of the Act, in respect of managerial remuneration paid or provided by the company and if not, then to report the amount involved along with the steps taken to secure refund of such amount. The text of section 197, the relevant extract of the Rules 4 & 5 of the Companies (Appointment & Remuneration of Managerial Personnel) Rules 2014 and Schedule V is reproduced in **Appendix VII** to this Guidance Note.

Audit Procedures and Reporting

- (b) Section 197 of the Act prescribes that the maximum ceiling for payment of managerial remuneration by a public company to its directors, including managing director and whole-time director and its manager which shall not exceed 11% of the net profit of the company in that financial year, computed in accordance with section 198 of the Act, except that the remuneration of the directors shall not be deducted from the gross profits.
- (c) It may be noted that section 197 applies only to a public company. The term “public company” has been defined under section 2(71) of the Act. Thereby, section 197 of the Act is not applicable to a Private Company, and, accordingly, reporting under this clause would not be required.
- (d) The term “Remuneration” under section 2(78) is defined to mean any money or its equivalent given or passed to any person for services rendered by him and includes perquisites as defined under the Income Tax Act, 1961. It may be noted that for the purposes of the Act, the term remuneration would include salaries, perquisites and commission on profits but would not include:
 - (i) Sitting fees paid to directors in accordance with the provisions of the Act (sub-sections 2 and 5 of Section 197).
 - (ii) Remuneration payable to directors for services rendered by him of a professional nature (sub-section 4 of Section 197).

- (e) The auditor's duty is to determine whether requisite approval mandated by the provisions of Section 197 read with Schedule V to the Act has been complied with:-
- (i) The overall managerial remuneration and requisite approval is summarized as under:-

S. No	Person entitled for remuneration	Maximum Remuneration in any financial year	If remuneration exceeds maximum remuneration in any financial year as provided under column (b)
	(a)	(b)	(c)
1.	Directors including managing director, whole time director and managers of public company (for all such directors and manager together)	11% of the net profits* of the company for that financial year	Company in general meeting with approval of Central Government subject to provisions of Schedule V may pay remuneration in excess of 11% of the net profits of the company.
2	One managing Director/ Whole time director/ manager	5% of the net profits* of the company for that financial year	With the approval of the company in general meeting this limit may be exceeded.
3	More than one managing Director/ Whole time director/ manager (for all such directors and manager together)	10% of the net profits* of the company for that financial year	With the approval of the company in general meeting this limit may be exceeded.
4	Directors who are neither managing director nor whole time directors	1% of the net profits* of the company, (if there is a Managing or whole time director or Manager) for that financial year. In any other case 3% of net profits.	With the approval of the company in general meeting this limit may be exceeded.

III.794 Auditing Pronouncements

*Net profits as computed in the manner referred to in section 198.

The above percentage will be exclusive of any fees (sitting fees) payable to the directors under Section 197(5) of the Act.

- (ii) Where remuneration (other than sitting fees) is paid in case company has no profits or inadequate profits, the same should be in accordance with the limits prescribed in section II of Part II of Schedule V to the Act by passing a resolution as prescribed and when there is no default in repayment of any of its debts (including public deposits) or debentures or interest thereon for a continuous period of thirty days in the preceding financial year before the appointment of such managerial personnel. The limit as prescribed shall be doubled if the resolution passed by the shareholder is a special resolution and passed in the manner prescribed complying with conditions specified in Schedule V itself. The auditor needs to examine the conditions prescribed including required disclosures in the financial statements and compliance of such provisions.
 - (iii) If the company pays remuneration to a managerial person in excess of the amounts in section II of Part II of schedule V, the approval from Central Government is also required in the manner prescribed in section III.
- (f) If the managerial remuneration has been paid or provided which is not in accordance with the requisite approval mandated by the provisions of section 197 read with Schedule V to the Act, the clause requires that the auditor should disclose the “amount involved” and report the steps taken by the company to secure refund of the same. Since the Order does not clarify what constitutes “amounts involved”, the same may be construed as meaning such amount of remuneration that has been paid or provided in excess of the limits prescribed under section 197 read with Schedule V of the Act. For this purpose, any amount that may have recovered or partially recovered by the company during the year would not be reduced from the “amount involved”.
- (g) Section 197(10) of the Act provides that without the permission of Central Government, the company shall not waive recovery of the excess amount paid over and above the prescribed limit. The auditor must examine the arrangement or agreements entered by the company in respect of securing refund of excess amount paid and should ask the management to give in writing, the steps which have been taken in this regard. The auditor should obtain sufficient appropriate audit evidence to support the fact that steps have been taken by the company for securing refund of the same.
- (h) The default may be reported incorporating the following details:-

- (i) Payment made to Director/ Whole time Director / Managing Director / Manager.
- (ii) Amount paid/ provided in excess of the limits prescribed.
- (iii) Amount due for recovery as at Balance Sheet date.
- (iv) Steps taken to secure the recovery of the amount.
- (v) Remarks, if any.

48. Whether the Nidhi Company has complied with the Net Owned Funds to Deposits in the ratio of 1:20 to meet out the liability and whether the Nidhi Company is maintaining ten per cent unencumbered term deposits as specified in the Nidhi Rules, 2014 to meet out the liability; [Paragraph 3(xii)]

Relevant Provisions

- (a) This clause requires the auditor to report whether, in the case of a Nidhi Company, net-owned funds to deposit liability ratio is more than 1:20 and the Nidhi Company is maintaining ten per cent unencumbered term deposits as specified in the Nidhi Rules 2014 to meet out the liability.
- (b) Section 406(1) of the Act defines “Nidhi” to mean a company which has been incorporated as a Nidhi with the object of cultivating the habit of thrift and savings amongst its members, receiving deposits from, and lending to, its members only, for their mutual benefit, and which complies with such rules as are prescribed by the Central Government for regulation of such class of companies.
- (c) It may be noted that Ministry of Corporate Affairs on 31st March 2014, vide its Notification No. GSR 258(E) notified the ‘Nidhi Rules 2014’, which came into force on the first day of April 2014. The said Rules are reproduced in the **Appendix VIII** to this Guidance Note. These Rules apply to Nidhi company incorporated as a Nidhi pursuant to the provisions of Section 406 of the Act and also to the Nidhi companies declared under sub-section (1) of section 620A of the Companies Act 1956.

Audit Procedures and Reporting

- (d) It may be noted that Rule 5(1) prescribes the requirements for minimum number of members, net owned fund etc. As per Rule 5(1) every Nidhi shall, within a period of one year from the commencement of these rules, ensure that it has—
 - (i) not less than two hundred members;
 - (ii) net owned funds of ten lakh rupees or more;

III.796 Auditing Pronouncements

- (iii) unencumbered term deposits of not less than ten per cent of the outstanding deposits as specified in Rule 14; and
- (iv) ratio of net owned funds to deposits of not more than 1:20.

The auditor should note that as such a Nidhi Company can accept deposits not exceeding twenty times of its net owned funds as per last audited balance sheet. Furthermore as per Rule 14, every Nidhi is to invest and continue to keep invested, in encumbered term deposits with a Scheduled commercial bank (other than a co-operative bank or a regional rural bank), or post office deposits in its own name an amount which shall not be less than ten per cent of the deposits outstanding at the close of business on the last working day of the second preceding month, which needs to be examined.

- (e) As per Rule 3(d) Net Owned Funds are defined as the aggregate of paid up equity share capital and free reserves as reduced by accumulated losses and intangible assets appearing in the last audited balance sheet:

Provided that, the amount representing the proceeds of issue of preference shares, shall not be included for calculating Net Owned Funds.

- (f) A Nidhi company can accept fixed deposits, recurring deposits accounts and savings deposits from its members in accordance with the directions notified by the Central Government. The aggregate of such deposits is referred to as "deposit liability".
- (g) The auditor should ask the management to provide the computation of the deposit liability and net owned funds on the basis of the requirements contained herein above. This would enable him to verify that the ratio of deposit liability to net owned funds is in accordance with the requirements prescribed in this regard. The auditor should verify the ratio using the figures of net owned funds and deposit liability computed in accordance with what is stated above. The comments of the auditor should be based upon such a statement provided by the management and verification of the same by the auditor.
- (h) The auditor may report, incorporating the following as at the balance sheet date:-
 - (i) In case of shortfall in the ratio of net owned funds to the deposits, report the amount of shortfall and state the actual ratio of net owned funds to the deposits.
 - (ii) In case of shortfall with regard to the minimum amount of 10% as unencumbered term deposits, as specified in Nidhi Rules 2014, report the amount thereof.

49. Whether all transactions with the related parties are in compliance with section 177 and 188 of Companies Act, 2013 where applicable and the details have been disclosed in the Financial Statements etc., as required by the applicable accounting standards; [Paragraph 3(xiii)]

Relevant Provisions

- (a) The duty of the auditor, under this clause is to report:
- (i) Whether all transactions with the related parties are in compliance with section 177 and 188 of the Companies Act, 2013 (“Act”)
 - (ii) Whether related party disclosures as required by relevant Accounting Standards (AS 18, as may be applicable) are disclosed in the financial statements
- (b) Section 188 of the Act is applicable to all classes of companies (including private companies). The Act envisages the approval of Board of Directors and/or the approval of the shareholders (by way of resolution passed in the general meeting of the company), as the case may be, in accordance with the provisions of section 188. However:-
- (i) approval of shareholders by way of resolution is not required for transactions entered into between a holding company and its wholly owned subsidiary whose accounts are consolidated with such holding company and placed before the shareholders at the general meeting for approval.
 - (ii) approval of the Board of Directors and shareholders is not required in respect of related party transactions entered into by the company in its ordinary course of business and on an arm’s length basis.
- (c) The Related Party, with reference to a company is defined in section 2(76) of the Act. The transactions which are covered by section 188 are:
- (i) sale, purchase or supply of any goods or materials;
 - (ii) selling or otherwise disposing of, or buying, property of any kind;
 - (iii) leasing of property of any kind;
 - (iv) availing or rendering of any services;
 - (v) appointment of any agent for purchase or sale of goods, materials, services or property;

III.798 Auditing Pronouncements

- (vi) related party's appointment to any office or place of profit in the company, its subsidiary company or associate company; and
 - (vii) Underwriting the subscription of any securities or derivatives thereof, of the company.
- (d) Explanation (b) to Section 188(1) defines 'arm's length transaction' to mean a transaction between two related parties that is conducted as if they were unrelated, so that there is no conflict of interest. Standard on Auditing (SA) 550, "Related Parties" defines arm's length transaction as "a transaction conducted on such terms and conditions as between a willing buyer and a willing seller who are unrelated and are acting independently of each other and pursuing their own best interest." The decision as to whether a transaction is at an arm's length or not would need considering several factors such as benefits/ consideration for each of the parties to enter into the agreement, the prevalent market/industry practice, economic circumstances, the specific contractual understanding and / or terms between the parties, similar contracts executed between other unrelated parties, etc. For the purpose of this Clause the auditor may test the transaction of arm's length basis based on the transfer pricing mechanism in use for the purposes of Income Tax Act, 1961.
- (e) The phrase 'ordinary course of business' is not defined under the Act. It seems that the ordinary course of business will cover the usual transactions, customs and practices of a business and of a Company. In many cases, it may be obvious that a transaction is in the 'ordinary course of business.' For example, a car manufacturing company sells a car to its group company. The price charged for the sale is the same as what it charges to other corporate customers who are unrelated parties. In this case, one may be able to conclude, without much difficulty, that the transaction has been entered into by the company in its ordinary course of business. Similarly, in certain extreme cases, it may be clear that the transaction is highly unusual and/ or extraordinary from the perspective of the company as well as its line of business. Hence, it may not be construed as being in the 'ordinary course of business. SA 550, "Related Parties" (Paragraph A25) has listed certain examples of transactions outside the entity's normal course of business:
- (i) Complex equity transactions, such as corporate restructurings or acquisitions.
 - (ii) Transactions with offshore entities in jurisdictions with weak corporate laws.
 - (iii) The leasing of premises or the rendering of management services by the entity to another party if no consideration is exchanged.
 - (iv) Sales transactions with unusually large discounts or returns.

- (v) Transactions with circular arrangements, for example, sales with a commitment to repurchase.
- (vi) Transactions under contracts whose terms are changed before expiry.
- (f) The above examples are just illustrative and are not conclusive for the purposes of analysis under the Act. However, it provides some indicators based on which one may consider following aspects while performing evaluation of 'ordinary course of business':
 - (i) Whether the transaction is covered in the objects of the company as envisaged in the Memorandum of Association;
 - (ii) Whether a transaction is usual or unusual, both from the company and its line of business perspective;
 - (iii) Frequency: If a transaction is happening quite frequently over a period of time, it is more likely to be treated as an ordinary course of business. However, the inverse does not necessarily hold true;
 - (iv) Whether transaction is taking place at arm's length;
 - (v) Business purpose of the transaction;
 - (vi) Whether transaction is done on similar basis with other third parties; and
 - (vii) Size and volume of transaction.

The assessment of whether a transaction is in the ordinary course of business is likely to be very subjective, judgmental and will vary on case-to-case basis. The factors mentioned above may help in making this assessment.

Audit Procedures and Reporting

- (g) The auditor should obtain written representations from management and, where appropriate, those charged with governance that:
 - (i) They have disclosed to the auditor the identity of the entity's related parties and all the related party relationships and transactions of which they are aware; and
 - (ii) They have appropriately accounted for and disclosed such relationships and transactions in accordance with the requirements of the framework.
- (h) Circumstances in which it may be appropriate to obtain written representations from those charged with governance include:

III.800 Auditing Pronouncements

- (i) When they have approved specific related party transactions that
 - a) materially affect the financial statements, or
 - b) involve management.
 - (ii) When they have made specific oral representations to the auditor on details of certain related party transactions.
 - (iii) When they have financial or other interests in the related parties or the related party transactions.
 - (iv) Management's assertion of responsibility that related party transactions were conducted on terms equivalent to those prevailing in an arm's length transaction.
- (i) The auditor may also decide to obtain written representations regarding specific assertions that management may have made, such as a representation that specific related party transactions do not involve undisclosed side agreements.
 - (j) The auditor should obtain a list of companies, firms or other parties, the particulars of which are required to be entered in the register maintained under section 189 of the Act. The auditor should verify the entries made in the register maintained under section 189 of the Act from the declarations made by the directors in Form MBP-1 i.e., general notice received from a director under Rule 9(1) of the Companies (Meetings of Board and Power) Rules, 2014. The auditor should also obtain a written representation from the management concerning the completeness of the information so provided to the auditor. The auditor should review the information provided by the management. The auditor should also perform the following procedures in respect of the completeness of this information:
 - (i) review his working papers for the prior years, if any, for names of known companies, firms or other parties the particulars of which are required to be entered in the register maintained under section 189 of the Act; and
 - (ii) review the entity's procedures for identification of companies, firms or other parties the particulars of which are required to be entered in the register maintained under section 189 of the Act.
 - (k) A difficulty in judging the arm's length of prices may also arise in cases where transactions are entered with sole suppliers. In such cases, the auditor may examine the prices paid with reference to list prices of the supplier concerned, other trade terms of the supplier, etc. It may be noted that the Company while determining whether the transactions entered into by it in its ordinary course of business with its

related parties are on an arm's length basis must have documentary proof of same while entering into the transaction.

- (l) Section 177(4)(iv) of the Act requires that audit committee (of every listed companies and other classes of companies which is required to constitute audit committee) to approve transactions of the company with related parties.
- (m) The auditor is required to perform appropriate procedures to satisfy himself as regards compliance with section 177 and 188 of the Act so that auditor is able to appropriately report under this clause. Auditor can refer SA 550, "Related Parties" which has prescribed auditor's responsibilities regarding related party relationships and transactions when performing an audit of financial statements, including guidance on the procedures to be performed by auditors. The key aspects of SA 550 which would be relevant for reporting on this clause are:
 - (i) Identified significant related party transactions outside the entity's normal course of business, detailed guidance is available in paragraph A38 to A41 of SA 550.
 - (ii) Assertions that related party transactions were conducted on terms equivalent to those prevailing in an arm's length transaction, detailed guidance is available in paragraph A42 to A45 of SA 550.
 - (iii) Evaluation of the accounting for and disclosure of identified related party relationships and transactions, detailed guidance is available in paragraph A46 to A47 of SA 550.
- (n) A smaller entity may not have the same controls provided by different levels of authority and approval that may exist in a larger entity. Accordingly, when auditing a smaller entity, the auditor may rely to a lesser degree on authorization and approval for audit evidence regarding the validity of significant related party transactions outside the entity's normal course of business. Instead, the auditor may consider performing other audit procedures such as inspecting relevant documents, confirming specific aspects of the transactions with relevant parties, or observing the owner-manager's involvement with the transactions.
- (o) Based on the procedures performed by the auditor, if auditor comes across any non-compliance, then, it should be duly reported. The following particulars may be incorporated:

Nature of the related party relationship and the underlying transaction	Amount involved (Rs.)	Remarks (<i>details of non-compliance may be given</i>)

III.802 Auditing Pronouncements

--	--	--

50. Whether the company has made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year under review and if so, as to whether the requirement of Section 42 of the Companies Act, 2013 have been complied with and the amount raised have been used for the purposes for which the funds were raised. If not, provide the details in respect of the amount involved and nature of non-compliance; [Paragraph 3(xiv)]

Relevant Provisions

- (a) This clause requires that in case of private placement of shares or fully or partly convertible debentures, during the year under review, whether the requirements of section 42 of the Act and the Rules framed thereunder have been complied with. Further this clause also requires the auditor to report upon the utilization of the said funds for the purposes for which it has been raised, if not, the reporting is required giving details of the amount involved and nature of non-compliance.

Audit Procedures and Reporting

- (b) (i) The term 'Private Placement' has been defined under the Explanation (ii) to section 42(2) to mean any offer of securities or invitation to subscribe securities to a select group of persons by a company (other than by way of public offer) through issue of a private placement offer letter and which satisfies the conditions specified in section 42 of the Act. In addition, the provisions of Rule 14 of the Companies (Prospectus and Allotment of Securities) Rules, 2014 also need to be complied with while reporting under this clause.

The text of Section 42 of the Act and Rule 14 of the Companies (Prospectus & Allotment of Securities) Rules, 2014 are reproduced in **Appendix IX** and **Appendix X** to this Guidance Note.

- (ii) It may be noted that the term "preferential allotment" is not defined under the Act. Further this clause specifically relates to the compliance under section 42 of the Act only with respect to equity shares, preference share and fully or partly convertible debenture issued. The auditor needs to examine the compliance of the requirements of section 42 of the Act which deals with the private placement.
- (c) Section 42 of the Act requires, *inter alia*, as under:

- (i) Such private placement, i.e., offer of securities or invitation to subscribe securities should be made to a select group of persons by a company (other than by way of public offer) through issue of a private placement offer letter.

The offer of securities or invitation to subscribe securities shall be made to such number of persons not exceeding two hundred, [excluding qualified institutional buyers and employees of the company being offered securities under a scheme of employees stock option as per provisions of clause (b) of sub-section (1) of section 62], in a financial year and on such conditions (including the form and manner of private placement) as may be prescribed.

Qualified institutional buyer means as defined in the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2009. Section 42 provides maximum number of persons 50 or higher number which is prescribed by rule 14 of the Companies (Prospectus & Allotment of Securities) Rules, 2014 as 200 persons.

- (ii) If a company, listed or unlisted, makes an offer to allot or invites subscription, or allots, or enters into an agreement to allot, securities to more than the prescribed number of persons, whether the payment for the securities has been received or not or whether the company intends to list its securities or not on any recognised stock exchange in or outside India, the same shall be deemed to be an offer to the public and shall accordingly be governed by the provisions of Public offer.
- (iii) No fresh offer or invitation of private placement shall be made unless the allotments with respect to any offer or invitation made earlier have been completed or that offer or invitation has been withdrawn or abandoned by the company.
- (iv) Any offer or invitation not in compliance with the provisions of section 42 of the Act shall be treated as a public offer and respective provisions of the Act, the Securities Contracts (Regulation) Act, 1956 and the Securities and Exchange Board of India Act, 1992 shall be required to be complied with.
- (v) All monies payable towards subscription of securities under section 42 of the Act shall be paid through cheque or demand draft or other banking channels but not by cash.
- (vi) A company making an offer or invitation on private placement shall allot its securities within sixty days from the date of receipt of the application money for such securities and if the company is not able to allot the securities within that period, it shall repay the application money to the subscribers within fifteen days from the date of completion of sixty days and if the company fails

III.804 Auditing Pronouncements

to repay the application money within the aforesaid period, it shall be liable to repay that money with interest at the rate of twelve percent per annum from the expiry of the sixtieth day.

- (vii) Also monies received on application under private placement shall be kept in a separate bank account in a scheduled bank and shall not be utilised for any purpose other than (a) for adjustment against allotment of securities; or (b) for the repayment of monies where the company is unable to allot securities.
 - (viii) All offers covered under section 42 of the Act shall be made only to such persons whose names are recorded by the company prior to the invitation to subscribe, and that such persons shall receive the offer by name, and that a complete record of such offers shall be kept by the company in such manner as may be prescribed and complete information about such offer shall be filed with the Registrar within a period of thirty days of circulation of relevant private placement offer letter.
 - (ix) No company offering securities under section 42 of the Act shall release any public advertisements or utilise any media, marketing or distribution channels or agents to inform the public at large about such an offer.
 - (x) The company making any allotment of securities under section 42 of the Act shall file with the Registrar a return of allotment in such manner as may be prescribed, including the complete list of all security-holders, with their full names, addresses, number of securities allotted and such other relevant information as may be prescribed.
 - (xi) If a company makes an offer or accepts monies in contravention of section 42 of the Act and an order imposing the penalty for such contravention is passed, then the company shall also refund all monies to subscribers within a period of thirty days of the order imposing the penalty.
- (d) In case the requirements of section 42 of the Act and rules framed in this regard are not complied with, the auditor should report incorporating following details:

Nature of securities viz. Equity shares/ Preference shares/ Convertible debentures	Amount Involved	Nature of non-compliance

- (e) This clause also requires the auditor to examine whether funds so raised from private placement of shares or fully or partly convertible debentures were applied for the purpose for which these securities were issued. The examination of auditor

may cover following aspects:

- (i) Paragraph 2(i) of the Form PAS-4, Private Placement Offer Letter¹³, requires the company to provide particulars in respect of the purposes and objects of the offer. Accordingly, the auditor should compare such information provided by the Company in Form PAS-4 with the actual utilization of the monies as per the books of account of the Company.
 - (ii) It is not necessary to establish a one-to-one relationship with the amount of fund raised and its utilisation. It is quite often found that the amount of fund raised is not deposited in a separate bank account of the company from which subsequent utilisation is made. In such cases, it should not be construed that the amount has not been utilised for the purpose for which it was raised.
 - (iii) During construction phase, companies may temporarily invest the surplus funds prudently. However, subsequently the same are utilised for the stated objectives. In such cases, the auditor should mention the fact that pending utilisation of the fund raised for the stated purpose, the funds were temporarily used for the purpose other than for which the funds was raised.
 - (iv) However if the funds were ultimately utilised for the stated end-use, the reporting for the same may be made as and when the same have been utilized.
 - (v) It may so happen that the funds raised during the year might not have been applied for the stated purpose during the year, for example, the funds were raised at the fag-end of the year. In such a case, the auditor should mention in his audit report that the funds raised during the year has not been utilised. This also implies that the auditor, while making inquiry in respect of this clause, should also consider that the funds raised, which were raised in the previous accounting period but have been actually utilised during the current accounting period.
 - (vi) In case the specific purpose is not recorded and the general purpose/*bona-fide* business use etc., are stated then in such cases, auditor should verify that the company has invested or utilized the money for general purpose/*bona-fide* business use of the company.
- (f) The auditor may report the non-compliances incorporating the following details:

¹³ Prescribed in the Companies (Prospectus of Securities) Rules, 2014.

III.806 Auditing Pronouncements

Nature of Securities viz. Equity shares /Preference shares /Convertible debentures	Purpose for which funds raised	Total Amount Raised /opening un-utilized balance	Amount utilized for the other purpose	Un-utilized balance as at Balance sheet date	Remarks, if any

51. Whether the company has entered into any non-cash transactions with directors or persons connected with him and if so, whether the provisions of section 192 of Companies Act, 2013 have been complied with; [Paragraph 3(xv)]

Relevant Provisions

- (a) Section 192 of the Act deals with restriction on non-cash transactions involving directors or persons connected with them. The section prohibits the company from entering into following types of arrangements unless it meets the conditions laid out in the said section:
- (i) An arrangement by which a director of the company or its holding, subsidiary or associate company or a person connected with such director acquires or is to acquire assets for consideration other than cash, from the company.
 - (ii) An arrangement by which the company acquires or is to acquire assets for consideration other than cash, from such director or person so connected.
- (b) Arrangements, as discussed herein above, can only be entered by the company on fulfillment of the conditions laid out in Section 192 of the Act which are as under:
- (i) The company should have obtained prior approval for such arrangement through a resolution of the company in general meeting.
 - (ii) In case the concerned director or the person connected therewith, is also a director of its holding company, a similar approval should have been obtained by the holding company through a resolution at its general meeting.
- (c) The reporting requirements under this clause are in two parts. The first part requires the auditor to report on whether the company has entered into any non-cash transactions with the directors or any persons connected with such director/s. The second part of the clause requires the auditor to report whether the provisions of section 192 of the Act have been complied with. Therefore, the second part of the clause becomes reportable only if the answer to the first part is in affirmative.

- (d) In other words, such transactions involving change in the assets or liabilities of a company but not involving “cash” or cash equivalents” as defined under Accounting Standard (AS) 3, “Cash Flow Statement” may be construed as non-cash transactions. At this point, it may be appropriate to also refer to the definition and discussion on “non-cash transactions” & “cash and cash equivalents”, as given in AS 3.
- (e) There may be a situation where the acquisition of the asset takes place in one year and the corresponding liability is created in the financial statements, the corresponding settlement in the following year. The said transaction will not be considered as non-cash transaction. Further, mergers under Court schemes would be entered into subject to requisite approvals of Court etc., would not be considered non-cash transactions.
- (f) The term “person connected with the director” has not been defined in the Act, or the Rules thereunder. Instead, the term “to any other person in whom the director is interested” is defined in the Explanation to sub section (1) of section 185 of the Act, which is reproduced as under and may be used as the reference point for reporting under this clause.
- “(a) any director of the lending company, or of a company which is its holding company or any partner or relative of any such director;
- (b) any firm in which any such director or relative is a partner;
- (c) any private company of which any such director is a director or member;
- (d) any body corporate at a general meeting of which not less than twenty-five per cent. of the total voting power may be exercised or controlled by any such director, or by two or more such directors, together; or
- (e) any body corporate, the Board of directors, managing director or manager, whereof is accustomed to act in accordance with the directions or instructions of the Board, or of any director or directors, of the lending company.”
- (g) Section 2(77) of the Companies Act, 2013 read with Rule 4 of the Companies (Specification of Definition Details) Rules, 2014 defines the term “relative”. As per the aforesaid section 2(77),
- “Relative, with reference to any person, means anyone who is related to another, if–*
- (i) *they are members of a Hindu Undivided Family;*
- (ii) *they are husband and wife; or*
- (iii) *one person is related to the other in such manner as may be prescribed”*

III.808 Auditing Pronouncements

As per Rule 4 of the Companies (Specification of Definition Details) Rules, 2014, a person shall be deemed to be the relative of another, if he or she is related to another in the following manner, namely –

- (i) Father, including step father
 - (ii) Mother, including step mother
 - (iii) Son, including step son
 - (iv) Son's wife
 - (v) Daughter
 - (vi) Daughter's husband
 - (vii) Brother, including step brother
 - (viii) Sister, including step sister
- (h) The term “acquire” simply means to come into possession of something. A thing that cannot be sold cannot be acquired¹⁴. Thus, an acquisition would necessarily involve existence of two parties and a transfer of rights and/or obligations in a thing. In the context of section 192 of the Act, this transfer is between the company and the director and/or a person connected with a director. Such “director” is not restricted to being a director of the concerned company, but extends to director of a holding company, subsidiary or associate of the company under question.
- (i) As provided in section 192, the acquisition by/from the company has to be that of an “asset”. Further, the term assets should be construed to have the same meaning as described in the Framework for Preparation and Presentation of Financial Statements, issued by the Institute of Chartered Accountants of India. The auditor would need to evaluate whether the subject matter of acquisition by/ from the company satisfies the characteristic of an “asset”.

Audit Procedures and Reporting

- (j) For reporting on the first leg of the reporting clause, the starting point of the auditor's procedures could be obtaining a management representation as to whether the company has undertaken any non-cash transactions with the directors or persons connected with the directors, as envisaged in section 192(1) of the Act. The auditor would need to corroborate the management representation with sufficient appropriate audit evidence. A scrutiny of the following books of account, records and documents could provide source of such audit evidence to the auditor as to the existence of such non cash transactions as well as persons connected with the

	Minutes book of the General Meeting and Meetings of Directors
	Report on Annual General Meeting pursuant to Companies (Management and Administration) Rules, 2014 {Ref Sec 121(1) and Rule 31(2)}

- (k) The above documents and records would provide evidence of any such non-cash transactions that have actually taken place. The language of section 192(1) also uses the term “is to acquire” in the context of such transactions, indicating the existence of intention to acquire. The management may be requested to provide details of its intention to enter into transactions covered under section 192, after the date of the financial statements under audit. The minutes of the meetings of the Board of Directors and the Audit Committee may provide evidence of such intention.

III.810 Auditing Pronouncements

Besides, a scrutiny of the information for subsequent period as contained in the aforesaid records and documents may provide corroborative audit evidence of such intention having existed as at the date of the auditor's report.

- (l) Where the company has entered into/is to enter into any non-cash transactions as discussed above, the auditor would make a report to that effect under this clause. The second leg of the clause requires the auditor to report whether the Company has complied with the provisions of section 192 in this regard. Section 192(1) and (2) envisage the following compliances in respect of such transactions:
 - (i) The company should have obtained a prior approval for such arrangement by a resolution in the General Meeting.
 - (ii) If the concerned Director or connected person is a director of the company's holding company, the latter too should have obtained a similar prior approval for the arrangement by a resolution at its General Meeting.
 - (iii) Notice for approval of the resolution should contain details of the arrangement along with the value of assets involved duly calculated by a registered valuer.

The auditor should check compliance with Section 192(2) and verify the notice of the General Meeting that it includes particulars of arrangement along with the value of the assets involved such arrangements. The said value should be calculated by the register valuer.

- (m) In case where the concerned director/connected person is also a director of the holding company, the auditor would need to check whether the holding company has complied with the requirements. For this purpose, the auditor would need to obtain a management representation letter from the holding company through the management of the auditee company.

Suggested paragraph on reporting:

According to the information and explanations given to us, the Company has entered into non-cash transactions with one of the directors/ person connected with the director during the year, by the acquisition of assets by assuming directly related liabilities, which in our opinion is covered under the provisions of Section 192 of the Act, and for which approval has not yet been obtained in a general meeting of the Company.

52. Whether the company is required to be registered under section 45-IA of the Reserve Bank of India Act, 1934 and if so, whether the registration has been obtained. [Paragraph 3(xvi)]

Relevant Provisions

- (a) The auditor is required to examine whether the company is engaged in the business which attract the requirements of the registration. The registration is required where the financing activity is a principal business of the company.
- (b) The Reserve Bank of India restrict companies from carrying on the business of a non-banking financial institution without obtaining the certificate of registration. The relevant Text of the Section 45-IA is reproduced in **Appendix XI** to this Guidance Note.
- (c) A Non-Banking Financial Company (NBFC) is a company registered under the Act, engaged in the business of loans and advances, acquisition of shares/stocks/bonds/debentures/securities issued by Government or local authority or other marketable securities of a like nature, leasing, hire-purchase, insurance business, chit business but does not include any institution whose principal business is that of agriculture activity, industrial activity, purchase or sale of any goods (other than securities) or providing any services and sale/purchase/construction of immovable property.

A non-banking institution which is a company and has principal business of receiving deposits under any scheme or arrangement in one lump sum or in installments by way of contributions or in any other manner, is also a non-banking financial company (Residuary non-banking company).

- (d) What does conducting financial activity as “principal business” mean? The response to an FAQ as given by Reserve Bank of India required to be considered while examining the requirement of registration:-

“Financial activity as principal business is when a company’s financial assets constitute more than 50 per cent of the total assets and income from financial assets constitute more than 50 per cent of the gross income. A company which fulfils both these criteria will be registered as NBFC by RBI. The term 'principal business' is not defined by the Reserve Bank of India Act. The Reserve Bank has defined it so as to ensure that only companies predominantly engaged in financial activity get registered with it and are regulated and supervised by it. Hence if there are companies engaged in agricultural operations, industrial activity, purchase and sale of goods, providing services or purchase, sale or construction of immovable

III.812 Auditing Pronouncements

property as their principal business and are doing some financial business in a small way, they will not be regulated by the Reserve Bank. Interestingly, this test is popularly known as 50-50 test and is applied to determine whether or not a company is into financial business. (As per FAQ response of question - What does conducting financial activity as “principal business” mean? <https://www.rbi.org.in/Scripts/FAQView.aspx?Id=92>)”

- (e) NBFCs are doing functions similar to banks, however there exist difference between banks & NBFCs. NBFCs lend and make investments and hence their activities are akin to that of banks; however there are a few differences as given below:
- (i) NBFC cannot accept demand deposits;
 - (ii) NBFCs do not form part of the payment and settlement system and cannot issue cheques drawn on itself;
 - (iii) deposit insurance facility of Deposit Insurance and Credit Guarantee Corporation is not available to depositors of NBFCs, unlike in case of banks.

(As per FAQ response of question NBFCs are doing functions similar to banks. What is difference between banks & NBFCs?

<https://www.rbi.org.in/Scripts/FAQView.aspx?Id=92>)”

- (f) As per Reserve Bank of India Act, 1934 Section 45I Clause (c) any company carries on as its business or part of its business any activity considered as carrying on the business of Financial Institution. The relevant text of the Section 45I(c) is reproduced in **Appendix III** to this Guidance Note.
- (g) Further Section 45-I Clause (f) of the Reserve Bank of India Act, 1934 defines the Non-Banking Financial Company reproduced in **Appendix III** to this Guidance Note.
- (h) The Reserve Bank of India defined “net owned fund” as (a) the aggregate of the paid-up equity capital and free reserves as disclosed in the latest balance-sheet of the company after deducting there from (i) accumulated balance of loss; (ii) deferred revenue expenditure; and (iii) other intangible assets; and (b) further reduced by the amounts representing– (1) investments of such company in shares of– (i) its subsidiaries; (ii) companies in the same group; (iii) all other non-banking financial companies; and (2) the book value of debentures, bonds, outstanding loans and advances (including hire-purchase and lease finance) made to, and deposits with,– (i) subsidiaries of such company; and (ii) companies in the same group, to the extent such amount exceeds ten per cent of (a) above. (“Subsidiaries” and “companies in the same group” shall have the same meanings assigned to them in the Companies Act, 1956.)

Audit Procedures and Reporting

- (i) The auditor should examine the transactions of the company with relation to the activities covered under the RBI Act and directions related to the Non-Banking Financial Companies.
- (j) The financial statements should be examined to ascertain whether company's financial assets constitute more than 50 per cent of the total assets and income from financial assets constitute more than 50 per cent of the gross income.
- (k) Whether the company has net owned funds as required for the registration as NBFC.
- (l) Whether the company has obtained the registration as NBFC, if not, the reasons should be sought from the management and documented.
- (m) The auditor should report incorporating the following:-
 - (i) Whether the registration is required under section 45-IA of the RBI Act, 1934.
 - (ii) If so, whether it has obtained the registration.
 - (iii) If the registration not obtained, reasons thereof.

Comments on Form of Report

53. The Order requires that the auditor should make a statement on all such matters contained therein as are applicable to the company. The Order further provides that where an auditor is unable to express any opinion, he should indicate such fact. The auditor is also required to give reasons for any unfavourable or qualified answer. Further, where the auditor is unable to express an opinion on any such matter which is applicable to the company, he is also required to indicate in his report such fact together with the reasons as to why he is unable to express any opinion.

54. A question may also arise whether it is necessary for the auditor to include in his report the management's explanation for any matter on which he makes an unfavourable comment. Normally, such an explanation need not be included but there may be circumstances where the auditor feels such inclusion is necessary. Examples of such circumstances would be:

- (a) to make the comment itself more meaningful and complete. For example, physical verification of inventories, though planned, may not have been carried out because of a strike or a lockout. An unfavourable comment without this explanation would be misleading;
- (b) to explain the fact why in spite of an unfavourable comment, the true and fair view of

III.814 Auditing Pronouncements

the financial statements is not vitiated. For example, physical verification of a part of the inventories at the year-end may not have been carried out, but there is sufficient other evidence produced by the management which satisfies the auditor regarding the existence, condition and value of the inventories.

55. If any of the comments on matters specified in the Order are adverse, the auditor should consider whether his comments have a bearing on the true and fair view presented by the financial statements and, therefore, might warrant a modification in the report under sub-sections (2), (3) and (4) of section 143.

56. If the auditor is of the opinion that any of the unfavourable comments on matters specified in the Order results in a qualification under sub-sections (2) and (3) of section 143 the manner of reporting would have to be in accordance with the principles enunciated in SA 705, "Modifications to the Opinion in the Independent Auditor's Report".

57. Even where there are no unfavourable comments under the Order, it may be advisable for the auditor to preface his report under sub-sections (2) and (3) of section 143 with the words:

"Further to our comments in the Annexure, we state that....."

58. It should not, however, be assumed that every unfavourable comment under the Order would necessarily result in a qualification in the report under sub-sections (2) and (3) of section 143. Firstly, the unfavourable comment may be regarding a matter which has no relevance to a true and fair view presented by the financial statements, for example, the failure of the company to deposit provident fund dues in time or to comply with the requirements regarding acceptance of deposits. Secondly, while the non-compliance may be material enough to warrant an unfavourable comment under the Order, it may not be material enough to affect the true and fair view presented by the financial statements. Finally, the non-compliance may be in an area which calls for remedial action on the part of the management, and may be important for that reason but may not be sufficiently important in the context of the report under sub-sections (2) and (3). In deciding, therefore, whether a qualification in the report under sub-sections (2) & (3) is necessary, the auditor should use his professional judgement in the facts and circumstances of each case.

59. Where there is an unfavourable comment both under sub-section (1) of section 143 of the Act and under the Order, it is suggested that the qualification under sub-section (1) precede the qualification under the Order.

60. It is important to note that replies to many of the requirements of the Order will involve expression of opinion and not necessarily statement of facts. It is necessary, therefore, that this is indicated when making the report under the Order. This can be done in either of the following ways:

(a) By a general preface to the comments under the Order on the following lines:

“In terms of the information and explanations sought by us and given by the company and the books and records examined by us in the normal course of audit and to the best of our knowledge and belief, we state that.....”

or

- (b) by a preface to individual comments, for example,
“In our opinion” or “In our opinion and according to the information and explanations given to us during the course of the audit...”

61. The Order requires that where the answer to a question is unfavourable or qualified, the auditor’s report should also state the reasons for such unfavourable or qualified answer. While it is not necessary for the auditor to give very detailed reasons for an unfavourable or qualified answer, he is expected to explain the general nature of the qualification or adverse comment in clear and unambiguous terms.

62. Similar considerations would apply when the auditor is unable to express an opinion. In such circumstances, he should clearly state that he is unable to express an opinion because such records or evidence have not been produced before him.

63. In expressing an opinion, the auditor should be quite clear as to whether the circumstances of the case warrant a negative answer or whether his opinion can be expressed subject to a qualification.

64. The auditor’s report under sub-section (3) of section 143 is required to state whether the auditor has sought and obtained all the information and explanations which to the best of his knowledge and belief, were necessary for the purposes of his audit and if not, the details thereof and the effect of such information on the financial statements. The term “audit” would include the reporting requirements under the Order. Therefore, when making his report, the auditor has to consider whether he has sought and obtained the information and explanations needed not merely for the purposes of normal audit, but also for the purpose of reporting in terms of the Order. If he has sought but not received the information and explanations necessary for reporting in terms of the Order, he should mention that fact both when reporting on the specific question in the Order and also consider the impact of such non receipt of the information on the auditor’s report under section 143(3)(a) of the Act.

Board’s Report

65. Section 134(3)(f) of the Act requires that the board of directors shall be bound to give in its report the fullest information and explanations regarding every reservation, qualification or adverse remark or disclaimer contained in the auditor’s report. The auditor’s comments in terms of the Order form part of his report and, therefore, the Board

III.816 Auditing Pronouncements

will be bound to give in its report the fullest information and explanations regarding every unfavourable comment or qualification therein.

66. The auditor's comments in terms of the Order may be in respect of matters of fact or they may be an expression of opinion. It is necessary that there should be no inconsistency in the facts as stated by the auditor and as explained in the board's report. It is, therefore, suggested that wherever possible, a draft report should be submitted to the Board to verify and confirm the facts stated therein.

67. It is, however, possible that, on the same facts, there may be a genuine difference of opinion between the auditor and the Board. In such a case, each is entitled to hold his or its view. Therefore, the expression of a different opinion in the Board's report should not be regarded as any reflection on the opinion expressed by the auditor.

Appendix I

Text of the Companies (Auditor's Report) Order, 2016

MINISTRY OF CORPORATE AFFAIRS

ORDER

New Delhi, the 29th March, 2016

S.O 1228(E).—In exercise of the powers conferred by sub-section (11) of section 143 of the Companies Act, 2013 (18 of 2013) and in supersession of the Companies (Auditor's Report) Order, 2015 published in the Gazette of India, Extraordinary, Part II, Section 3, Sub-section (ii), vide number S.O. 990 (E), dated the 10th April, 2015, except as respects things done or omitted to be done before such supersession, the Central Government, after consultation with the, committee constituted under proviso to sub-section (11) of section 143 of the Companies Act, 2013 hereby makes the following Order, namely:—

1. **Short title, application and commencement.**- (1) This Order may be called the Companies (Auditor's Report) Order, 2016.

(2) It shall apply to every company including a foreign company as defined in clause (42) of section 2 of the Companies Act, 2013 (18 of 2013) [hereinafter referred to as the Companies Act], except—

- (i) a banking company as defined in clause (c) of section 5 of the Banking Regulation Act, 1949 (10 of 1949);
- (ii) an insurance company as defined under the Insurance Act, 1938 (4 of 1938);
- (iii) a company licensed to operate under section 8 of the Companies Act;

- (iv) a One Person Company as defined under clause (62) of section 2 of the Companies Act and a small company as defined under clause (85) of section 2 of the Companies Act; and
- (v) a private limited company, not being a subsidiary or holding company of a public company, having a paid up capital and reserves and surplus not more than rupees one crore as on the balance sheet date and which does not have total borrowings exceeding rupees one crore from any bank or financial institution at any point of time during the financial year and which does not have a total revenue as disclosed in Scheduled III to the Companies Act, 2013 (including revenue from discontinuing operations) exceeding rupees ten crore during the financial year as per the financial statements.

2. Auditor's report to contain matters specified in paragraphs 3 and 4. - Every report made by the auditor under section 143 of the Companies Act, 2013 on the accounts of every company audited by him, to which this Order applies, for the financial years commencing on or after 1st April, 2015, shall in addition, contain the matters specified in paragraphs 3 and 4, as may be applicable:

Provided the Order shall not apply to the auditor's report on consolidated financial statements.

3. Matters to be included in the auditor's report. - The auditor's report on the accounts of a company to which this Order applies shall include a statement on the following matters, namely:-

- (i) (a) whether the company is maintaining proper records showing full particulars, including quantitative details and situation of fixed assets;
(b) whether these fixed assets have been physically verified by the management at reasonable intervals; whether any material discrepancies were noticed on such verification and if so, whether the same have been properly dealt with in the books of account;
(c) whether the title deeds of immovable properties are held in the name of the company. If not, provide the details thereof;
- (ii) whether physical verification of inventory has been conducted at reasonable intervals by the management and whether any material discrepancies were noticed and if so, whether they have been properly dealt with in the books of account;

III.818 Auditing Pronouncements

- (iii) whether the company has granted any loans, secured or unsecured to companies, firms, Limited Liability Partnerships or other parties covered in the register maintained under section 189 of the Companies Act, 2013. If so,
 - (a) whether the terms and conditions of the grant of such loans are not prejudicial to the company's interest;
 - (b) whether the schedule of repayment of principal and payment of interest has been stipulated and whether the repayments or receipts are regular;
 - (c) if the amount is overdue, state the total amount overdue for more than ninety days, and whether reasonable steps have been taken by the company for recovery of the principal and interest;
- (iv) in respect of loans, investments, guarantees, and security whether provisions of section 185 and 186 of the Companies Act, 2013 have been complied with. If not, provide the details thereof.
- (v) in case, the company has accepted deposits, whether the directives issued by the Reserve Bank of India and the provisions of sections 73 to 76 or any other relevant provisions of the Companies Act, 2013 and the rules framed thereunder, where applicable, have been complied with? If not, the nature of such contraventions be stated; If an order has been passed by Company Law Board or National Company Law Tribunal or Reserve Bank of India or any court or any other tribunal, whether the same has been complied with or not?
- (vi) whether maintenance of cost records has been specified by the Central Government under sub-section (1) of section 148 of the Companies Act, 2013 and whether such accounts and records have been so made and maintained.
- (vii) (a) whether the company is regular in depositing undisputed statutory dues including provident fund, employees' state insurance, income-tax, sales-tax, service tax, duty of customs, duty of excise, value added tax, cess and any other statutory dues to the appropriate authorities and if not, the extent of the arrears of outstanding statutory dues as on the last day of the financial year concerned for a period of more than six months from the date they became payable, shall be indicated;
 - (b) where dues of income tax or sales tax or service tax or duty of customs or duty of excise or value added tax have not been deposited on account of any dispute, then the amounts involved and the forum where dispute is pending shall be mentioned. (A mere representation to the concerned Department shall not be treated as a dispute).
- (viii) whether the company has defaulted in repayment of loans or borrowing to a financial institution, bank, government or dues to debenture holders? If yes, the

period and the amount of default to be reported (in case of defaults to banks, financial institutions, and government, lender wise details to be provided).

- (ix) whether moneys raised by way of initial public offer or further public offer (including debt instruments) and term loans were applied for the purposes for which those are raised. If not, the details together with delays or default and subsequent rectification, if any, as may be applicable, be reported;
- (x) whether any fraud by the company or any fraud on the Company by its officers or employees has been noticed or reported during the year; If yes, the nature and the amount involved is to be indicated;
- (xi) whether managerial remuneration has been paid or provided in accordance with the requisite approvals mandated by the provisions of section 197 read with Schedule V to the Companies Act? If not, state the amount involved and steps taken by the company for securing refund of the same;
- (xii) whether the Nidhi Company has complied with the Net Owned Funds to Deposits in the ratio of 1: 20 to meet out the liability and whether the Nidhi Company is maintaining ten per cent unencumbered term deposits as specified in the Nidhi Rules, 2014 to meet out the liability;
- (xiii) whether all transactions with the related parties are in compliance with section 177 and 188 of Companies Act, 2013 where applicable and the details have been disclosed in the Financial Statements etc., as required by the applicable accounting standards;
- (xiv) whether the company has made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year under review and if so, as to whether the requirement of section 42 of the Companies Act, 2013 have been complied with and the amount raised have been used for the purposes for which the funds were raised. If not, provide the details in respect of the amount involved and nature of non-compliance;
- (xv) whether the company has entered into any non-cash transactions with directors or persons connected with him and if so, whether the provisions of section 192 of Companies Act, 2013 have been complied with;
- (xvi) whether the company is required to be registered under section 45-IA of the Reserve Bank of India Act, 1934 and if so, whether the registration has been obtained.

III.820 Auditing Pronouncements

4. Reasons to be stated for unfavourable or qualified answers.- (1) Where, in the auditor's report, the answer to any of the questions referred to in paragraph 3 is unfavourable or qualified, the auditor's report shall also state the basis for such unfavourable or qualified answer, as the case may be.

(2) Where the auditor is unable to express any opinion on any specified matter, his report shall indicate such fact together with the reasons as to why it is not possible for him to give his opinion on the same.

[F. No. 17/45/2015-CL-V]

AMARDEEP SINGH BHATIA, Jt. Secy

Appendix II

Clause-by-clause comparison of the reporting requirements of the Order and the erstwhile CARO 2015

1. Short title, application and commencement. -

- (1) This order may be called the Companies (Auditor's Report) Order, 2016.
- (2) It shall apply to every company including a foreign company as defined in clause (42) of section 2 of the Companies Act, 2013 (18 of 2013) [hereinafter referred to as the Companies Act], except -
 - (i) a banking company as defined in clause (c) of section 5 of the Banking Regulation Act, 1949 (10 of 1949);
 - (ii) an insurance company as defined under the Insurance Act, 1938 (4 of 1938);
 - (iii) a company licensed to operate under section 8 of the Companies Act;
 - (iv) a One Person Company as defined under clause (62) of section 2 of the Companies Act, and a small company as defined under clause (85) of section 2 of the Companies Act, 2013; and
 - (v) a private limited company, not being a subsidiary or holding company of a public company, having a paid up capital and reserves and surplus not more than rupees one crore as on the balance sheet date and which does not have total borrowings exceeding rupees one crore from any bank or financial institution at any point of time during the financial year; and which does not have a total revenue as disclosed in Schedule III to the Companies Act, 2013

(including revenue from discontinuing operations) exceeding rupees ten crore during the financial year as per the financial statements.

2. Auditor's report to contain matters specified in paragraphs 3 and 4. - Every report made by the auditor under section 143 of the Companies Act, 2013 on the accounts of every company audited by him to which this Order applies for the financial year commencing on or after 1st April, 2015, shall contain the matters specified in paragraphs 3 and 4.

Provided the Order shall not apply to the auditor's report on consolidated financial statements.

3. Matters to be included in the auditor's report. - The auditor's report on the account of a company to which this Order applies shall include a statement on the following matters, namely:

- (i) (a) whether the company is maintaining proper records showing full particulars, including quantitative details and situation of fixed assets;
(b) whether these fixed assets have been physically verified by the management at reasonable intervals; whether any material discrepancies were noticed on such verification and if so, whether the same have been properly dealt with in the books of account;
(c) whether the title deeds of immovable properties are held in the name of the company. If not, provide the details thereof.
- (ii) (a) whether physical verification or inventory has been conducted at reasonable intervals by the management
and whether any material discrepancies were noticed and if so, whether the same have been properly dealt with in the books of account;
- (iii) whether the company has granted any loans, secured or unsecured to companies, firms, limited liability partnerships or other parties covered in the register maintained under section 189 of the Companies Act, 2013. If so,
 - (a) whether the terms and conditions of the grant of such loans are not prejudicial to the company's interest;
 - (b) whether the schedule of repayment the principal and payment of interest has been stipulated and whether repayments or receipts are regular; (c) if the amount is overdue, state the total amount overdue for more than ninety days, and whether reasonable steps have been taken by the company for recovery of the principal and interest;

III.822 Auditing Pronouncements

- (iv) in respect of loans, investments, guarantees and security whether provisions of section 185 and 186 of the Companies Act 2013 have been complied with. If not, provide the details thereof.
- (v) in case the company has accepted deposits, whether the directives issued by the Reserve Bank of India and the provisions of sections 73 to 76 or any other relevant provisions of the Companies Act and the rules framed there under, where applicable, have been complied with? if not, the nature of contraventions should be stated; If an order has been passed by Company Law Board or National Company Law Tribunal or Reserve Bank of India or any court or any other tribunal, whether the same has been complied with or not?
- (vi) where maintenance of cost records has been specified by the Central Government under sub-section (1) of section 148 of the Companies Act, whether such accounts and records have been made and maintained;
- (vii) (a) Whether the company regular in depositing undisputed statutory dues including provident fund, employees' state insurance, income-tax, sales-tax, service tax, duty of customs, duty of excise, value added tax, cess and any other statutory dues with the appropriate authorities and if not, the extent of the arrears of outstanding statutory dues as on the last day of the financial year concerned for a period of more than six months from the date they became payable, shall be indicated.

(b) where dues of income tax or sales tax or service tax or duty of customs or duty of excise or value added tax or cess have not been deposited on account of any dispute, then the amounts involved and the forum where dispute is pending shall be mentioned. (A mere representation to the concerned Department shall not constitute a dispute).

(viii) whether the company has defaulted in repayment of loans or borrowing to a financial institution, bank, government or dues to debenture holders? If yes, the period and amount of default to be reported (in case of defaults to banks, financial institutions, and government, lender wise details to be provided);
- (ix) whether moneys raised by way of initial public offer or further public offer (including debt instruments) and term loans were applied for the purpose for which those are raised? If not, the details together with delays or defaults and subsequent rectification, if any, as may be applicable, be reported;
- (x) whether any fraud by the company or any fraud on the company by its officers or employees has been noticed or reported during the year; If yes, the nature and the amount involved is to be indicated.

- (xi) Whether managerial remuneration has been paid or provided in accordance with the requisite approvals mandated by the provisions of section 197 read with schedule V to the Companies Act? If not, the amount involved and steps taken by the company for securing refund of the same.
- (xii) whether the Nidhi Company has complied with the Net Owned Funds to Deposits in the ratio of 1:20 to meet out the liability and whether the Nidhi Company is maintaining ten percent unencumbered term deposits as specified in the Nidhi Rules, 2014 to meet out the liability;
- (xiii) whether all transactions with the related parties are in compliance with section 177 and 188 of the Companies Act, 2013 where applicable and the details have been disclosed in the financial statements etc., as required by the applicable accounting standards;(xiv) Whether the company has made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year under review and if so, as to whether the requirement of section 42 of the Companies Act 2013 have been complied with and the amount raised have been used for the purposes for which the funds were raised. If not, provide the details in respect of the amount involved and nature of non-compliance;
- (xv) whether the company has entered into any non-cash transactions with directors or persons connected with him and if so, whether the provisions of section 192 of Companies Act 2013 have been complied with;
- (xvi) whether the company is required to be registered under section 45-IA of the Reserve Bank of India Act, 1934 and if so, whether the registration has been obtained.

4. Reasons to be stated for unfavourable or qualified answers.-(1) Where, in the auditor's report, the answer to any of the questions referred to in paragraph 3 is unfavourable or qualified, the auditor's report shall also state the reasons for such unfavourable or qualified answer, as the case may be.

(2) Where the auditor is unable to express any opinion on any specified matter, his report shall indicate such fact together with the reasons why it is not possible for him to give his opinion on the same.

**List of Financial Institutions Covered Under
the Companies (Acceptance of Deposit) Rules, 2014**

1. Sub section (39) of section 2 of Companies Act, 2013 defines the term “financial institution” as, it includes a scheduled bank, and any other financial institution defined or notified under the Reserve Bank of India Act, 1934 (2 of 1934). The term financial institution has been defined under Section 45I clause (c) of the RBI Act 1934 as under:-

45I (c) “financial institution” means any non-banking institution which carries on as its business or part of its business any of the following activities, namely:-

- (i) the financing, whether by way of making loans or advances or otherwise, of any activity other than its own;
- (ii) the acquisition of shares, stock, bonds, debentures or securities issued by a Government or local authority or other marketable securities of a like nature;
- (iii) letting or delivering of any goods to a hirer under a hire-purchase agreement as defined in clause (c) of section 2 of the Hire-Purchase Act, 1972;
- (iv) the carrying on of any class of insurance business;
- (v) managing, conducting or supervising, as foreman, agent or in any other capacity, of chits or kuries as defined in any law which is for the time being in force in any State, or any business, which is similar thereto;
- (vi) collecting, for any purpose or under any scheme or arrangement by whatever name called, monies in lumpsum or otherwise, by way of subscriptions or by sale of units, or other instruments or in any other manner and awarding prizes or gifts, whether in cash or kind, or disbursing monies in any other way, to persons from whom monies are collected or to any other person, 2 [but does not include any institution, which carries on as its principal business,-
 - (a) agricultural operations; or
 - (aa) industrial activity; or]
 - (b) the purchase or sale of any goods (other than securities) or the providing of any services; or
 - (c) the purchase, construction or sale of immovable property, so however, that no portion of the income of the institution is derived from the financing of purchases, constructions or sales of immovable property by other persons;

Explanation.– For the purposes of this clause, “industrial activity” means any activity specified in sub-clauses (i) to (xviii) of clause (c) of section 2 of the Industrial Development Bank of India Act, 1964;

Further “non-banking institution” has been defined under clause (e) of Section 45-I of RBI Act 1934 as under:-

45-I (e) “non-banking institution” means a company, corporation or cooperative society.

Further “non-banking financial company” has been defined under clause (f) of Section 45-I of RBI Act 1934 as under:-

45-I (f) “non-banking financial company” means–

- (i) a financial institution which is a company;
- (ii) a non-banking institution which is a company and which has as its principal business the receiving of deposits, under any scheme or arrangement or in any other manner, or lending in any manner;
- (iii) such other non-banking institution or class of such institutions, as the Bank may, with the previous approval of the Central Government and by notification in the Official Gazette, specify;

2. Section 2(72) of the Companies Act, 2013 defines “public financial institutions “as follows:

- (i) the Life Insurance Corporation of India, established under section 3 of the Life Insurance Corporation Act, 1956;
- (ii) the Infrastructure Development Finance Company Limited, referred to in clause (vi) of sub-section (1) of section 4A of the Companies Act, 1956 so repealed under section 465 of this Act;
- (iii) specified company referred to in the Unit Trust of India (Transfer of Undertaking and Repeal) Act, 2002;
- (iv) institutions notified by the Central Government under sub-section (2) of section 4A of the Companies Act, 1956 so repealed under section 465 of this Act;
- (v) such other institution as may be notified by the Central Government in consultation with the Reserve Bank of India:

Provided that no institution shall be so notified unless—

III.826 Auditing Pronouncements

- (A) it has been established or constituted by or under any Central or State Act; or
 - (B) not less than fifty-one per cent of the paid-up share capital is held or controlled by the Central Government or by any State Government or Governments or partly by the Central Government and partly by one or more State Governments;
3. Sub-section (72) of section 2 of the Act, empowers the Central Government to notify in the Official gazette such other institution as it may think fit to be a public financial institution. The Central Government has so far notified the following 58 public financial institutions:

Appendix IV

This checklist does not form part of the Guidance Note and is only illustrative in nature. Members are expected to exercise their professional judgment while making its use

depending upon facts and circumstances of each case and read this check list in conjunction with the Guidance Note on Companies (Auditor's Report) Order 2016.

**An Illustrative Checklist
on Companies (Auditor's Report) Order, 2016**

Client :

Audit Period :

Manager In-Charge:

Clause no.	Particulars	Remarks	Working Paper Reference
3(i)(a)	Whether the company is maintaining proper records showing full particulars, including quantitative details and situation of fixed assets;		
(a)	Whether records of Fixed Assets (tangible, intangible and leased assets) are maintained showing the following particulars:		
	(i) Sufficient description (distinctive numbers, purchase agreement, documents, records and registration references, etc.) of the asset to make identification possible.		
	(ii) Classification, that is, the head under which it is shown in the accounts, e.g., plant and machinery, office equipment, etc. component-wise, as applicable		
	(iii) Location/situation.		
	(iv) Quantity, i.e., number of units.		
	(v) Original cost.		
	(vi) Year of purchase.		
	(vii) Adjustment for revaluation or for any increase or decrease in cost, e.g., on revaluation of foreign exchange liabilities.		
	(viii) Date of revaluation, if any.		
	(ix) Rate and basis of depreciation, useful life, particulars regarding amortisation and impairment		
	(x) Depreciation, amortisation and impairment for the current year.		

III.830 Auditing Pronouncements

- (xi) Accumulated depreciation, amortisation and impairment loss.
 - (xii) Particulars regarding sale, discarding, demolition, destruction etc.
 - (xiii) Particulars of fixed assets that have been retired from active use and held for disposal.
 - (xiv) Particulars of fixed assets that have been fully depreciated or amortised or impaired.
- (b) Whether aggregate original cost, depreciation or amortisation to date and impairment loss, if any, as per the register/records agrees with General Ledger balances? If not, note the disagreements in respect of each class of assets.

Conclusion:

3(i)(b) Whether these fixed assets have been physically verified by the management at reasonable intervals; whether any material discrepancies were noticed on such verification and if so, whether the same have been properly dealt with in the books of account;

- (a)
- (i) Whether Fixed Assets were physically verified at any time during the year or earlier years according to a phased program?
 - (ii) What is the periodicity of physical verification and whether the same is reasonable?
 - (iii) Whether assets physically verified agreed/ reconciled with book figures?
If not, note the discrepancies against each class of assets in terms of value, and state how the discrepancies have been dealt with.
 - (iv) Instructions to officials for carrying out physical verification to include procedures, timing, competency of team members, count sheets/tags, formats etc.
- (b) Physically verify few items from the fixed asset register & vice versa.

(c) Whether management representation is obtained confirming that:

- ◆ fixed assets are physically verified by the company in accordance with the policy of the company.

- ◆ periodicity of the physical verification of fixed assets.

- ◆ details of the material discrepancies noticed during the physical verification of the fixed assets.

- ◆ If no discrepancies were noted during physical verification, the same should be clearly mentioned.

Conclusion:

3(i)(c) Whether the title deeds of immovable properties are held in the name of the company. If not, provide the details thereof;

(a) Does the company have any immovable properties (land and buildings)?

Has the Company identified the land and building on the basis of Fixed Asset Register.

(b) Whether the title deeds of these immovable properties are in the name of the company?

Whether the details as per title deeds reconcile with the details in Fixed assets register, if not, is there any material difference to be reported here

(c) Has the management provided details of immovable properties not held in company's name (for example, location, description, and reasons for not being held in the company's name?

(i) In case the title deeds are lost, assess whether the certified copies of such documents are available with the company and what actions have been taken by the management in this regard?

III.832 Auditing Pronouncements

(ii) In case the title deeds are mortgaged with the lenders, assess if the confirmation from the lenders is obtained for the same.

(iii) The discrepancies observed should be reported in the CARO report.

3(ii) Whether physical verification of inventory has been conducted at reasonable intervals by the management and whether any material discrepancies were noticed and if so, whether they have been properly dealt with in the books of account;

(a) Has the management physically verified the inventory, as defined in AS 2? Inventory normally includes-

- ◆ Raw materials and Components
- ◆ Packing materials
- ◆ Maintenance supplies
- ◆ Work in progress
- ◆ Finished Goods
- ◆ Stores and Spares
- ◆ Consumables and Loose tools

(b) Whether evidence of physical verification has been seen and reasonableness of periodicity of physical verification evaluated? If yes, verify:

- ◆ written instructions issued by the management.
- ◆ duly authenticated physical verification sheets.
- ◆ duly authenticated summary sheets/ consolidation sheet
- ◆ internal memo etc. regarding issues arising on physical verification.
- ◆ any other documents evidencing physical verification.

(c) Whether the original physical verification sheets have been reviewed and selected items traced into the final inventories? (including the more valuable ones as per ABC

- classification)
- (d) Whether the comparison of final inventories with stock has been done? Whether records and other corroborative evidence, e.g. inventory statements submitted to banks?
 - (e) In case of continuous stock taking method, whether management:
 - (i) maintains adequate and up-to-date stock records;
 - (ii) has established adequate procedures for physical verification of inventories, so that in the normal circumstances, the programme of physical verification will cover all material items of inventory at least once during the year; and
 - (iii) check/examine thoroughly and corrects all material differences between the book records and the physical counts.
 - (f) Whether stock register is updated and value of inventory extracted from it tally with the books of account.
 - (g) If any material discrepancies were found as compared to stock records, what were the extent of discrepancies (in terms of value) and how the same have been dealt with in the books of account as well as in the stock records?

Conclusion:

- 3(iii)(a) Whether the company has granted any loans, secured or unsecured to companies, firms, Limited Liability Partnerships or other parties covered in the register maintained under section 189 of the Companies Act, 2013. If so, whether the terms and conditions of the grant of such loans are not prejudicial to the company's interest;**

- (i) Has the Company granted any loans (Secured or Unsecured) to companies, firms, limited liability partnerships or other parties covered in the register maintained under

III.834 Auditing Pronouncements

Section 189 of the Companies Act 2013?

(ii) Where the company has granted any loans to parties covered in the register maintained under section 189 of the Act and squared off during the year, obtain details of such transactions.

(iii) Whether the terms of the above loans are prima facie prejudicial, due consideration to be given to the factors mentioned below:

- ◆ terms & condition of the loan repayment, rate of interest, restrictive covenants etc.,
- ◆ company's financial standing, its ability to lend, and terms of its borrowings
- ◆ borrower's financial standing
- ◆ the nature of the security,
- ◆ prevailing rate of interest, etc.

Conclusion:

3(iii)(b) Whether the schedule of repayment of principal and payment of interest has been stipulated and whether the repayments or receipts are regular;

- (a) Whether the schedule of repayment of principal and payment of interest has been stipulated in the loan agreements / mutually agreed letter of arrangement at the time of sanction?
- (b) Whether repayment of principal amount and interest thereon are received regularly on the due date or immediately thereafter?
- (c) If not, the fact and details should be Obtained.

Conclusion:

3(iii)(c) If the amount is overdue, state the total amount overdue for more than ninety days, and whether reasonable steps have been taken by the company for recovery of the principal and interest;

- (a) Whether list of overdue amount has been prepared & recorded and reasonable steps taken for recovery of amount of loan which is overdue more than ninety days?

- (b) Following documents may be seen for verification of reasonableness of steps taken by the company for recovery of principal and accrued interest on loan granted:

- ◆ Facts of each case including amounts involved
- ◆ Issue of reminder
- ◆ Sending of advocates or solicitor's notice

In absence of legal steps whether auditor is satisfied that reasonable steps have been taken

- (c) Obtain management's representation regarding steps that have been taken for recovery of total amount overdue more than ninety days.

Conclusion:

- 3(iv) In respect of loans, investments, guarantees, and security whether provisions of section 185 and 186 of the Companies Act, 2013 have been complied with. If not, provide the details thereof.**

- (a) Where Companies has given loans to directors etc.:

(i) Whether any loans given to directors or any other person in whom the director is interested, or given any guarantee or provided any security in connection with any loan taken by directors or such other person?

(ii) Whether any of the transaction is attracting the provisions of section 185?

(iii) Whether any of such transactions are covered under the exceptions provided under section 185? If so, obtain the relevant evidences ensuring such exemption.

- (b) Where company has made loan/ investment

(i) Obtain the details of loans and investment made by the Company including opening balances

III.836 Auditing Pronouncements

(ii) Whether company has made investment through more than two layers of investment companies?

(iii) Whether the company has exceeded the limit of sixty per cent of its paid-up share capital, free reserves and securities premium account or one hundred per cent of its free reserves and securities premium account, whichever is more?

(iv) If so, whether prior approval by means of a special resolution passed at a general meeting has been obtained?

(v) Whether the rate of interest charges is more or at par to the rates specified in subsection (7) of section 186 of the Act, if not, the reasons thereof,

Conclusion:

3(v) In case, the company has accepted deposits, whether the directives issued by the Reserve Bank of India and the provisions of sections 73 to 76 or any other relevant provisions of the Companies Act, 2013 and the rules framed thereunder, where applicable, have been complied with? If not, the nature of such contraventions be stated; If an order has been passed by Company Law Board or National Company Law Tribunal or Reserve Bank of India or any Court or any other tribunal, whether the same has been complied with or not?

(a) If the Company has accepted deposits from the public state whether:

(i) The directives issued by the Reserve Bank of India have been complied with and also that:

(ii) The provisions of Section 73 to 76 of the Companies Act, 2013 and the rules framed there under have been complied with.

(iii) List out contraventions, if any.

(b) Where an order has been passed by the CLB or National Company Law Tribunal or Reserve Bank of India or any Court or any other Tribunal in respect of above, examine the steps taken by the company to comply with

the order, and if not, report briefly stating there in the nature of contravention and the fact that Company has not complied with the order.

Conclusion:

3(vi) Whether maintenance of cost records has been specified by the Central Government under sub-section (1) of section 148 of the Companies Act, 2013 and whether such accounts and records have been so made and maintained.

- (a) Whether cost accounting records have been prescribed for the company under section 148(1) of the Companies Act, 2013? If so verify whether proper cost accounts and records are made and maintained by the Company as specified.

Conclusion:

3(vii)(a) Whether the company is regular in depositing undisputed statutory dues including provident fund, employees' state insurance, income-tax, sales-tax, service tax, duty of customs, duty of excise, value added tax, cess and any other statutory dues to the appropriate authorities and if not, the extent of the arrears of outstanding statutory dues as on the last day of the financial year concerned for a period of more than six months from the date they became payable, shall be indicated;

- (a) Whether a list of statutory dues which company is required to deposit regularly has been obtained.
- (b) In case where there are no arrears on the balance sheet date but the company has been irregular during the year in depositing the statutory dues, the fact should be stated.
- (c) Whether the Company has been generally regular in depositing statutory dues or otherwise, indicate the same.

Note: A matter is disputed where there is a positive evidence or action on the part of the company to show that it has not accepted the demand for payment of tax or duty, e.g., where it has gone into appeal.

III.838 Auditing Pronouncements

- (d) Whether penalty and/or interest levied under the respective law is included under amounts payable.
- (e) Ensure that disclosure is restricted to the actual arrears and should not include the amounts which have not fallen due for deposit and have been shown as arrears at the balance sheet date.
- (f) Whether the information about arrears of outstanding statutory dues is provided in the format:
- ◆ Name of the Statute
 - ◆ Nature of the dues
 - ◆ Amount (Rs.)
 - ◆ Period to which amount relates
 - ◆ Due date
 - ◆ Date of Payment
- (g) Whether a written representation with reference to the date of the balance sheet from the management obtained:
- ◆ specifying the cases and the amounts considered disputed;
 - ◆ containing a list of the cases and the amounts in respect of the statutory dues which are undisputed and have remained outstanding for a period of more than six months from the date they became payable;
 - ◆ containing a statement as to the completeness of the information provided by the management.
- (h) Whether any register of significant laws with which the entity has to comply within its particular industry and a record of complaints in respect of non-compliance been maintained
- Conclusion:
- 3(vii)(b) Where dues of income tax or sales tax or service tax or duty of customs or duty of excise or value added tax have not been deposited on account of**

any dispute, then the amounts involved and the forum where dispute is pending shall be mentioned. (A mere representation to the concerned department shall not be treated as a dispute.)

- (a) Review internal audit report, minutes of the meeting of the board of Directors and audit committee
- (b) Ensure that information about arrears of disputed statutory dues is provided in the format:
 - ◆ Name of the Statute
 - ◆ Nature of the dues
 - ◆ Amount (Rs.)
 - ◆ Period to which amount relates
 - ◆ Forum where dispute is pending

Conclusion:

- 3(viii) Whether the company has defaulted in repayment of loans or borrowings to a financial institution, bank, government or dues to debenture holders? If yes, the period and the amount of default to be reported (in case of defaults to banks, financial institutions, and government, lender wise details to be provided).**
- (a) Whether all defaults existing at the balance sheet date are reported irrespective of when those defaults have occurred.
 - (b) In case of defaults to banks, financial institutions, and government, whether lender wise details reported?
 - (c) If application of reschedulement of loan has been made/accepted or default has been made good during the accounting period, whether the fact has been stated.
 - (d) Whether the disputes between the company and the lender on various issues give rise to disclaimer stating the fact there is a dispute between the company and the lender and auditor is unable to determine whether there is a default in repayment of dues to the lender concerned.

Conclusion:

- 3(ix) Whether moneys raised by way of initial public offer or further public offer (including debt instruments) and the term loans were applied for the purposes for which those were raised. If not, the details together with delays or default and subsequent rectification, if any, as may be applicable, be reported;**
- (a) Whether the company raised money by way of initial public offer or further public offer of equity shares, convertible securities and debt securities?
 - (b) Examine the terms and conditions stated in the offer document subject to which the company has raised the above mentioned money.
 - (c) Whether the end use of the money raised (as mentioned above) is capable of being determined? If not state the fact.
 - (d) Whether the said end-use of money disclosed in the financial statements by way of a Note is significantly different from the actual end use? If so, state the fact.
 - (e) Examine the various documents submitted to SEBI, offer document and also examine the report of board of directors, if available, to find out whether funds raised have been utilized for the purpose for which they were raised.
 - (f) Whether a representation of the management has been obtained as to the completeness of the disclosures with regard to the end-use of moneys raised by initial public offer and further public offer?
 - (g) Whether the fund flow statement has been reviewed where one to one correlation is not possible.
 - (h) Whether the company has taken any term loan?
 - (i) Examine the terms and conditions subject to which the company has obtained the term

loans including purpose for which term loans were sanctioned?

- (j) Compare the purpose for which term loans were sanctioned with the actual utilisation of the loans and obtain sufficient appropriate audit evidence regarding the utilisation of the amounts raised.
 - (k) In case during a construction phase surplus funds were temporarily invested, however, subsequently the same are utilised for the stated objectives, mention the fact that the funds were temporarily used for the purpose other than for which the loan was sanctioned but were ultimately utilised for the stated end-use.
 - (l) Whether term loans taken were not applied for stated purpose during the year for any reason? If yes, mention the facts and amount. Also disclose the fact about utilization of term loan of earlier year in current year.
 - (m) Whether the fund flow statement has been reviewed where one to one correlation was not possible.
Conclusion:
- 3(x) Whether any fraud by the company or any fraud on the company by its officers or employees has been noticed or reported during the year. If yes, the nature and the amount involved is to be indicated;**
- (a) Has SA 240 been complied with? (Attach the check list for compliance of SA 240 with this check list also).
 - (b) Examine the following to ascertain whether any fraud has been reported or noticed by the management?
 - ◆ the reports of the internal Audit
 - ◆ the auditor should enquire from the management about any frauds by the company or any fraud on the company by

III.842 Auditing Pronouncements

its officers or employees, that it has noticed or that have been reported to it.

- ◆ discuss the matter with other employees including officers of the company.
- ◆ examine the minutes book of the board meeting, audit committee etc., of the company in this regard.

- (c) Where any fraud by the company or any fraud on the company by its officers or employees has been noticed or reported, determine the nature and amount of frauds and disclose the same. Obtain management representation to this effect.
- (d) Whether any fraud has been reported by the auditor during the year under section 143(12)? If so, determine whether that same would be reported under this clause?

Conclusion:

3 (xi) whether managerial remuneration has been paid or provided in accordance with the requisite approvals mandated by the provisions of section 197 read with Schedule V to the Companies Act? If not, state the amount involved and steps taken by the company for securing refund of the same;

- (a) Has the company paid or provided for any managerial remuneration?
- (b) Obtain from management the details of managerial remuneration paid/ provided by the Company

Ensure that the computation of managerial remuneration is done in accordance with the provisions of section 197 read with Schedule V of Companies Act, 2013. The remuneration does not include :

- ◆ Sitting Fees (within prescribed limits) (sub section 2 and 5 of Section 197)
 - ◆ Remuneration for professional services rendered (Sub section 4 of Section 197)
- (c) Obtain a general understanding of Section 197 read with Schedule V to the Act. Ascertain the

system and procedures of the company to ensure compliance with the provisions of section 197 and Schedule V

- (d) Based on the understanding so gained, perform a reasonable test check of compliance with the aforesaid requirements of the Act.
- (e) Examine the steps taken by the company to comply with requirements of the Act with respect to managerial remuneration. Examine the correspondence and documents filed with the Registrar of Companies, Company Law Board, legal correspondence for orders passed, minutes of the meetings of the Board and shareholders.
- (f) Examine whether the Company has obtained requisite approvals mandated by section 197 read with Schedule V to the Act.
- (g) Obtain a listing of managerial remuneration rejected/ partially approved. Examine the same with underlying documents and obtain understanding of the steps taken by the Company for refund of unapproved managerial remuneration for reporting along with the amount involved.
Assess if the management has waived recovery of the excess amount paid over and above the prescribed limit.
- (h) Consider the implications of non-compliances above also in the auditors' opinion on the financial statements.

In case of non-compliance, the amount involved would be the total amount involved which is in excess of the limit prescribed even though during the year the company may have recovered or partially recovered such amount. Obtain, examine and record the steps taken to secure the refund also

3(xii) Whether the Nidhi Company has complied with the Net Owned Funds to

Deposits in the ratio of 1:20 to meet out the liability and whether the Nidhi Company is maintaining ten per cent unencumbered term deposits as specified in the Nidhi Rules, 2014 to meet out the liability;

- (a) Is the Company a nidhi company?

Assess if the Company is registered as a Nidhi Company as per provisions of Section 406 of the Companies Act 2013 or Section 620A of the Companies Act, 1956.

- (b) To check compliance with the following:

a) Whether the net owned funds to deposits ratio is more than 1:20 to meet out the liability as on the date of balance sheet?

b) Examine whether the Nidhi Company is maintaining ten per cent unencumbered term deposits as specified in the Nidhi Rules, 2014 to meet out the liability

Whether the calculation of net owned funds is done as per Rule 3(d) which includes equity share capital, and free reserves as reduced by accumulated losses and intangible assets appearing in the last audited balance sheet:

Assess if the proceeds of issue of preference shares have been included in the net owned funds.

Ensure that ratio is computed by using the figures of net owned funds and deposit liability computed in accordance with as stated under this clause.

Conclusion:

- 3 (xiii) Whether all transactions with the related parties are in compliance with sections 177 and 188 of Companies Act, 2013 where applicable and the details have been disclosed in the Financial Statements etc., as required by the applicable accounting standards;**

- (a) Obtain a statement containing details of transactions with related parties

Obtain a list of companies, firms or other parties, the particulars of which are required to be entered in the register maintained under

section 189 of the Act.

Obtain declarations made by the directors in Form MBP-1 i.e., general notice received from a director under Rule 9(1) of The Companies (Meetings of Board and Power) Rules, 2014

Verify the entries made in the register under section 189 with such statement from management and declarations received from directors.

Assess the additions/ deletions to such list for appropriateness based on relevant declarations

- (b) Obtain understanding of requirements of section 177 and 188 of the Act in relation to related party transactions
- (c) Perform reasonable check to ascertain completeness and accuracy of details in the statement.
- (d) Ascertain the system and procedures of the company to ensure compliance with the provisions of section 177 and 188 of the Act Including the assessment of identification of related parties and whether the transaction is at arm's length and basis of such conclusion.
- (e) Based on the understanding so gained, perform a reasonable test check of compliance with the aforesaid requirements of the Act.
- (f) Examine minutes of meetings of the audit committee and agreements underlying related party transactions to ascertain audit committee approval for the transactions.
- (g) Examine the minutes of Board meetings to ascertain whether requisite approvals of Board is obtained for certain related party transactions as required under section 188 of the Act.

III.846 Auditing Pronouncements

- (h) Where shareholders' approval is required, check whether the requisite approvals have been obtained as required under Section 188 of the Act
 - (i) Examine whether related party disclosures are made in the financial statements as per the requirements of Accounting Standard 18
 - (j) Examine whether disclosure related to contracts or arrangements with related parties as mandated by section 188 are made in Board's report
Including the assessment of identification of related parties and whether the transaction is at arm's length and basis of such conclusion.
 - (k) Consider the implications of non-compliances above also in the auditors' opinion on the financial statements.
- 3 (xiv) Whether the company has made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year under review and if so, as to whether the requirement of section 42 of the Companies Act, 2013 have been complied with and the amount raised have been used for the purposes for which the funds were raised. If not, provide the details in respect of the amount involved and nature of non-compliance;**
- (a) Has the Company made any preferential allotment or private placement of shares or fully convertible debentures during the year.
 - (b) Obtain a statement containing the specific terms of offer for private placement, including purpose for which funds were raised, and the details of subsequent application-amounts, dates and the purpose.
 - (c) Ascertain whether the offer and allotment of securities referred in 1 above are in compliance with the requirements mandated by section 42 of the Act.
 - (d) Based on the understanding so gained, perform a reasonable test check of

compliance with the requirements of the Act.

- (e) Consider the implications of non-compliances above also in the auditors' report on the financial statements.

Note: Reporting under this Clause is required also in instances where the amounts have been raised in earlier year(s) and is being utilized under the year under review.

3 (xv) Whether the company has entered into any non-cash transactions with directors or persons connected with him and if so, whether the provisions of section 192 of Companies Act, 2013 have been complied with;

- (a) Obtain a statement containing list of directors of the company, its holding company, subsidiary and associate companies and persons connected with the directors

- (b) Scrutinise the following books of account, records and documents could provide source of such audit evidence to the auditor as to the existence of such non-cash transactions as well as persons connected with the Directors:

(i) Form No. MBP 1, Notice of Interest by Director, filed pursuant to the Companies (Meetings of Board and Its Powers) Rules, 2014

(ii) Form No. MBP 2, Register of Loans, Guarantee, Security and Acquisition Made by the Company, filed pursuant to the Companies (Meetings of Board and Its Powers) Rules, 2014

(iii) Form No. MBP 4, Register of Contracts with Related Party and Contracts and Bodies etc. in which Directors are Interested, filed pursuant to the Companies (Meetings of Board and Its Powers) Rules, 2014

(iv) Movements in the Fixed Asset Register

(v) Minutes book of the General Meeting

III.848 Auditing Pronouncements

and Meetings of Directors

(vi) Report on Annual General Meeting pursuant to Companies (Management and Administration) Rules, 2014

Minutes of meetings of Board of Directors and Audit committee

- (c) Obtain a statement from management containing transactions between the Company and director(s) referred to above
- (d) Perform reasonable check to ascertain non cash transactions
- (e) Obtain understanding of requirements of section 192 of the Act.
- (f) Based on the understanding so gained, perform a reasonable test check of compliance with the aforesaid requirements of the Act.
- (g) Consider the implications of non-compliances above also in the auditors' opinion on the financial statements.

3 (xvi) Whether the company is required to be registered under section 45-IA of the Reserve Bank of India Act, 1934 and if so, whether the registration has been obtained.

- (a) Examine the financial statements of the Company and assess whether the company has financial assets and financial income
Note: According to the RBI press release 1998-99/1269 dated 08.04.1999, a company will be treated as NBFC if its financial assets are more than 50% of its total assets (netted off by intangible assets) and income from financial assets should be more than 50% of its gross income.
- (b) Check whether the company has financing activity as a principal business of the Company.
- (c) Obtain understanding of the requirements of section 45-IA of RBI Act, 1934 with regard to

- registration of the company with RBI
- (d) Examine whether the Company is carrying out NBFC activity / Core investment company.
 - (e) Examine the steps taken by the company to comply with requirements of the RBI Act, 1934 with respect to registration as a NBFC. Also examine the correspondence and documents filed with the RBI, minutes of the Board meeting.
 - (f) Examine whether the Company has obtained Certificate of Registration from RBI in terms of section 45-IA of the RBI Act, 1934.
 - (g) Consider the implications of non-compliances above also in the auditors' opinion on the financial statements.

Text of Sections 185 and 186 of the Companies Act, 2013 and Relevant Extract of the Rules

Text of Section 185 of the Companies Act, 2013¹⁵

- (1) Save as otherwise provided in this Act, no company shall, directly or indirectly, advance any loan, including any loan represented by a book debt, to any of its directors or to any other person in whom the director is interested or give any guarantee or provide any security in connection with any loan taken by him or such other person:

Provided that nothing contained in this sub-section shall apply to—

¹⁵ MCA *vide* its Notification No. GSR 464(E) dated 5-6-2015 provides that in case of private companies section 185 shall not apply to a private company –

- (a) in whose share capital no other body corporate has invested any money;
- (b) if the borrowings of such a company from banks or financial institutions or any body corporate is less than twice of its paid up share capital or fifty crore rupees, whichever is lower; and
- (c) such a company has no default in repayment of such borrowings subsisting at the time of making transactions under this section.

III.850 Auditing Pronouncements

- (a) the giving of any loan to a managing or whole-time director—
 - (i) as a part of the conditions of service extended by the company to all its employees; or
 - (ii) pursuant to any scheme approved by the members by a special resolution; or
- (b) a company which in the ordinary course of its business provides loans or gives guarantees or securities for the due repayment of any loan and in respect of such loans and interest is charged at a rate not less than the bank rate declared by the Reserve Bank of India; or
- (c) any loan made by a holding company to its wholly owned subsidiary company or any guarantee given or security provided by a holding company in respect of any loan made to its wholly owned subsidiary company; or
- (d) any guarantee given or security provided by a holding company in respect of loan made by any bank or financial institution to its subsidiary company:
Provided that the loans made under clauses (c) and (d) are utilised by the subsidiary company for its principal business activities.

Explanation.—For the purposes of this section, the expression “to any other person in whom director is interested” means—

- (a) any director of the lending company, or of a company which is its holding company or any partner or relative of any such director;
 - (b) any firm in which any such director or relative is a partner;
 - (c) any private company of which any such director is a director or member;
 - (d) any body corporate at a general meeting of which not less than twenty five per cent. of the total voting power may be exercised or controlled by any such director, or by two or more such directors, together; or
 - (e) any body corporate, the Board of directors, managing director or manager, whereof is accustomed to act in accordance with the directions or instructions of the Board, or of any director or directors, of the lending company.
- (2) If any loan is advanced or a guarantee or security is given or provided in contravention of the provisions of sub-section (1), the company shall be punishable with fine which shall not be less than five lakh rupees but which may extend to twenty-five lakh rupees, and the director or the other person to whom any loan is advanced or guarantee or security is given or provided in connection with any loan taken by him or the other person, shall be punishable with imprisonment which may extend to six months or with fine which shall not be less than five lakh rupees but which may extend to twenty-five lakh rupees, or with both.

Text of Section 186 of the Companies Act, 2013 and Relevant Extract of the Rules

- (1) Without prejudice to the provisions contained in this Act, a company shall unless otherwise prescribed, make investment through not more than two layers of investment companies:

Provided that the provisions of this sub-section shall not affect,—

- (i) a company from acquiring any other company incorporated in a country outside India if such other company has investment subsidiaries beyond two layers as per the laws of such country;
 - (ii) a subsidiary company from having any investment subsidiary for the purposes of meeting the requirements under any law or under any rule or regulation framed under any law for the time being in force.
- (2) No company shall directly or indirectly —
- (a) give any loan to any person or other body corporate;
 - (b) give any guarantee or provide security in connection with a loan to any other body corporate or person; and
- (c) acquire by way of subscription, purchase or otherwise, the securities of any other body corporate, exceeding sixty per cent. of its paid-up share capital, free reserves and securities premium account or one hundred per cent. of its free reserves and securities premium account, whichever is more.
- (3) Where the giving of any loan or guarantee or providing any security or the acquisition under sub-section (2) exceeds the limits specified in that sub-section, prior approval by means of a special resolution passed at a general meeting shall be necessary.
- (4) The company shall disclose to the members in the financial statement the full particulars of the loans given, investment made or guarantee given or security provided and the purpose for which the loan or guarantee or security is proposed to be utilised by the recipient of the loan or guarantee or security.
- (5) No investment shall be made or loan or guarantee or security given by the company unless the resolution sanctioning it is passed at a meeting of the Board with the consent of all the directors present at the meeting and the prior approval of the public financial institution concerned where any term loan is subsisting, is obtained:

Provided that prior approval of a public financial institution shall not be required where the aggregate of the loans and investments so far made, the amount for which guarantee or security so far provided to or in all other bodies corporate, along

III.852 Auditing Pronouncements

with the investments, loans, guarantee or security proposed to be made or given does not exceed the limit as specified in sub-section (2), and there is no default in repayment of loan instalments or payment of interest thereon as per the terms and conditions of such loan to the public financial institution.

- (6) No company, which is registered under section 12 of the Securities and Exchange Board of India Act, 1992 and covered under such class or classes of companies as may be prescribed, shall take inter-corporate loan or deposits exceeding the prescribed limit and such company shall furnish in its financial statement the details of the loan or deposits.
- (7) No loan shall be given under this section at a rate of interest lower than the prevailing yield of one year, three year, five year or ten year Government Security closest to the tenor of the loan.
- (8) No company which is in default in the repayment of any deposits accepted before or after the commencement of this Act or in payment of interest thereon, shall give any loan or give any guarantee or provide any security or make an acquisition till such default is subsisting.
- (9) Every company giving loan or giving a guarantee or providing security or making an acquisition under this section shall keep a register which shall contain such particulars and shall be maintained in such manner as may be prescribed.
- (10) The register referred to in sub-section (9) shall be kept at the registered office of the company and —
 - (a) shall be open to inspection at such office; and
 - (b) extracts may be taken therefrom by any member, and copies thereof may be furnished to any member of the company on payment of such fees as may be prescribed.
- (11) Nothing contained in this section, except sub-section (1), shall apply—
 - (a) to a loan made, guarantee given or security provided by a banking company or an insurance company or a housing finance company in the ordinary course of its business or a company engaged in the business of financing of companies or of providing infrastructural facilities;
 - (b) to any acquisition—
 - (i) made by a non-banking financial company registered under Chapter IIIB of the Reserve Bank of India Act, 1934 and whose principal business is acquisition of securities:
Provided that exemption to non-banking financial company shall be in respect of its investment and lending activities;
 - (ii) made by a company whose principal business is the acquisition of

securities; of shares allotted in pursuance of clause (a) of sub-section (1) of section 62.

- (iii) made by a banking company or an insurance company or a housing finance company, making acquisition of securities in the ordinary course of its business.

- (12) The Central Government may make rules for the purposes of this section.
- (13) If a company contravenes the provisions of this section, the company shall be punishable with fine which shall not be less than twenty-five thousand rupees but which may extend to five lakh rupees and every officer of the company who is in default shall be punishable with imprisonment for a term which may extend to two years and with fine which shall not be less than twenty-five thousand rupees but which may extend to one lakh rupees.

Explanation.—For the purposes of this section,—

- (a) the expression “investment company” means a company whose principal business is the acquisition of shares, debentures or other securities;
- (b) the expression “infrastructure facilities” means the facilities specified in Schedule VI.

Rules 11, 12 and 13 of the Companies (Meeting of Board and its Powers) Rules, 2014

Rule.11. Loan and investment by a company under section 186 of the Act.-

- (1) Where a loan or guarantee is given or where a security has been provided by a company to its wholly owned subsidiary company or a joint venture company, or acquisition is made by a holding company, by way of subscription, purchase or otherwise of, the securities of its wholly owned subsidiary company, the requirement of sub-section (3) of section 186 shall not apply.

Provided that the company shall disclose the details of such loans or guarantee or security or acquisition in the financial statement as provided under sub-section (4) of section 186.

- (2) For the purposes of clause (a) of sub-section (11) of section 186, the expression “business of financing of companies” shall include, with regard to a Non-Banking Financial Company registered with the Reserve Bank of India, “business of giving of any loan to a person or providing any guaranty or security for due repayment of any loan availed by any person in the ordinary course of its business”.
- (3) No company registered under section 12 of the Securities and Exchange Board of India Act, 1992 and also covered under such class or classes of companies which may be notified by the Central Government in consultation with the Securities and

III.854 Auditing Pronouncements

Exchange Board, shall take any inter-corporate loan or deposits, in excess of the limits specified under the regulations applicable to such company, pursuant to which it has obtained certificate of registration from the Securities and Exchange Board of India.

Rule.12. Register.-

- (1) Every company giving loan or giving guarantee or providing security or making an acquisition of securities shall, from the date of its incorporation, maintain a register in Form MBP 2 and enter therein separately, the particulars of loans and guarantees given, securities provided and acquisitions made as aforesaid
- (2) The entries in the register shall be made chronologically in respect of each such transaction within seven days of making such loan or giving guarantee or providing security or making acquisition.
- (3) The register shall be kept at the registered office of the company and the register shall be preserved permanently and shall be kept in the custody of the company secretary of the company or any other person authorised by the Board for the purpose.
- (4) The entries in the register (either manual or electronic) shall be authenticated by the company secretary of the company or by any other person authorised by the Board for the purpose.
- (5) For the purpose of sub-rule (4), the register can be maintained either manually or in electronic mode.
- (6) The extracts from the register maintained under sub-section (9) of section 186 may be furnished to any member of the company on payment of such fee as may be prescribed in the Articles of the company which shall not exceed ten rupees for each page.

Rule 13.Special Resolution.-

- (1) Where the aggregate of the loans and investment so far made, the amount for which guarantee or security so far provided to or in all other bodies corporate along with the investment, loan, guarantee or security proposed to be made or given by the Board, exceed the limits specified under section 186, no investment or loan shall be made or guarantee shall be given or security shall be provided unless previously authorised by a special resolution passed in a general meeting.

Explanation.-For the purpose of this sub-rule, it is clarified that it would sufficient compliance if such special resolution is passed within one year from the date of notification of this section.

- (2) A resolution passed at a general meeting in terms of sub-section (3) of section 186 to give any loan or guarantee or investment or providing any security or the

acquisition under sub section (2) of section 186 shall specify the total amount up to which the Board of Directors are authorised to give such loan or guarantee, to provide such security or make such acquisition:

Provided, that the company shall disclose to the members in the financial statement the full particulars in accordance with the provision of sub-section (4) of section 186.

Clarification with regard to section 185 and 186 of the Companies Act 2013 - loans and advances to employees-

Ministry of Corporate Affairs vide General Circular No, 04/2015 dated 10th March, 2015 has clarified that loans and/or advances made by the companies to their employees, other than the managing or whole time directors (which is governed by section 185) are not governed by the requirements of section 186 of the Companies Act, 2013. This clarification will, however, be applicable if such loans/advances to employees are in accordance with the conditions of service applicable to employees and are also in accordance with the remuneration policy, in cases where such policy is required to be formulated.

Appendix VI

Text of the Companies (Cost Records and Audit) Rules, 2014

1. **Short title and commencement.-** (1) These rules may be called the Companies (Cost Records and Audit) Rules, 2014.
 - (2) They shall come into force on the date of publication in the Official Gazette.
2. **Definitions:** In these rules, unless the context otherwise requires –
 - (a) “Act” means the Companies Act, 2013 (18 of 2013);
 - (aa) “Central Excise Tariff Act Heading” means the heading as referred to in the additional notes in the first schedule to the Central Excise Tariff Act, 1985;
 - (b) “Cost Accountant in practice” means a cost accountant as defined in clause (b) of sub-section (1) of section 2 of the Cost and Works Accountants Act, 1959 (23 of 1959), who holds a valid certificate of practice under sub-section (1) of section 6 of that Act and who is deemed to be in practice under sub-section (2) of section 2 thereof, and includes a firm or limited liability partnership of cost accountants;
 - (c) “cost auditor” means a Cost Accountant in practice, as defined in clause (b), who is appointed by the Board;
 - (d) “cost audit report” means the report duly audited and signed by the cost auditor including attachment, annexure, qualifications or observations etc. to cost audit report;

III.856 Auditing Pronouncements

- (e) “cost records” means books of account relating to utilisation of materials, labour and other items of cost as applicable to the production of goods or provision of services as provided in section 148 of the Act and these rules;
- (f) “form” means a form annexed to these rules;
- (g) “institute” means the Institute of Cost Accountants of India constituted under the Cost and Works Accountants Act, 1959 (23 of 1959);
- (h) all other words and expressions used in these rules but not defined, and defined in the Act or in the Companies (Specification of Definition Details) Rules, 2014 shall have the same meanings as assigned to them in the Act or in the said rules.

3. Application of cost records.—For the purposes of sub-section (1) of section 148 of the Act, the class of companies, including Foreign Companies defined clause (42) of section 2 of the Act, engaged in the production of the goods or providing services, specified in the table below, having an overall turnover from all its products and services of rupees thirty five crore or more during the immediately preceding financial year, shall include cost records for such products or services in their books of account, namely:-

Note - Readers may refer the table as given in the Rules for further details.

4. Applicability for cost audit.-

- (1) Every company specified in item (A) of the rule of rule 3 shall get its cost records audited in accordance with these rules if the overall annual turnover of the company from all its products and services during the immediately preceding financial year is rupees fifty crore or more and the aggregate turnover of the individual product or products or service or services for which cost records are required to be maintained under rule 3 is rupees twenty five crore or more.
- (2) Every company specified in item (B) of rule 3, shall get its cost records audited in accordance with these rules if the overall annual turnover of the company from all its products and services during the immediately preceding financial year is rupees one hundred crore or more and the aggregate turnover of the individual product or products or service or services for which cost records are required to be maintained under rule 3 is rupees thirty five crore or more.
- (3) The requirement for cost audit under these rules shall not apply to a company which is covered in rule 3 and –
 - (i) whose revenue from exports, in foreign exchange, exceeds, seventy five percent of its total revenue; or
 - (ii) which is operating from a special economic zone.

5. Maintenance of records.-

- (1) Every company under these rules including all units and branches thereof, shall, in respect of each of its financial year commencing on or after the 1st day of April, 2014, maintain cost records in form CRA-1.

Provided that in case of company covered in serial numbers 12 and serial numbers 24 to 32 of item (B) of rule 3, the requirement under this rule shall apply in respect of each of its financial year commencing on or after 1st day of April, 2015.

- (2) The cost records referred to in sub-rule (1) shall be maintained on regular basis in such manner as to facilitate calculation of per unit cost of production or cost of operations, cost of sales and margin for each of its products and activities for every financial year on monthly or quarterly or half-yearly or annual basis.
- (3) The cost records shall be maintained in such manner so as to enable the company to exercise, as far as possible, control over the various operations and costs to achieve optimum economies in utilization of resources and these records shall also provide necessary data which is required to be furnished under these rules.

6. Cost audit.-

- (1) The category of companies specified in rule 3 and the thresholds limits laid down in rule 4, shall within one hundred and eighty days of the commencement of every financial year, appoint a cost auditor.
- (2) Every company referred to in sub-rule (1) shall inform the cost auditor concerned of his or its appointment as such and file a notice of such appointment with the Central Government within a period of thirty days of the Board meeting in which such appointment is made or within a period of one hundred and eighty days of the commencement of the financial year, whichever is earlier, through electronic mode, in form CRA-2, along with the fee as specified in Companies (Registration Offices and Fees) Rules, 2014.
- (3) Every cost auditor appointed as such shall continue in such capacity till the expiry of one hundred and eighty days from the closure of the financial year or till he submits the cost audit report, for the financial year for which he has been appointed.
- (3A) Any casual vacancy in the office of a cost auditor, whether due to resignation, death or removal, shall be filled by the Board of Director within thirty days of occurrence of such vacancy and the company shall inform the central government in Form CRA-2 within thirty days of such appointment of cost auditor;
- (4) Every cost auditor, who conducts an audit of the cost records of a company, shall submit the cost audit report along with his or its reservations or qualifications or observations or suggestions, if any, in form CRA-3.

III.858 Auditing Pronouncements

- (5) Every cost auditor shall forward his report to the Board of Directors of the company within a period of one hundred and eighty days from the closure of the financial year to which the report relates and the Board of Directors shall consider and examine such report particularly any reservation or qualification contained therein.
- (6) Every company covered under these rules shall, within a period of thirty days from the date of receipt of a copy of the cost audit report, furnish the Central Government with such report along with full information and explanation on every reservation or qualification contained therein, in form CRA-4 along with fees specified in the Companies (Registration Offices and Fees) Rules, 2014.
- (7) The provisions of sub-section (12) of section 143 of the Act and the relevant rules made thereunder shall apply mutatis mutandis to a cost auditor during performance of his functions under section 148 of the Act and these rules.

Appendix VII

Text of Section 197 of Companies Act, 2013 and Relevant Extract of the Rules and Schedule V

197. (1) The total managerial remuneration payable by a public company, to its directors, including managing director and whole-time director, and its manager in respect of any financial year shall not exceed eleven per cent of the net profits of that company for that financial year computed in the manner laid down in section 198 except that the remuneration of the directors shall not be deducted from the gross profits:

Provided that the company in general meeting may, with the approval of the Central Government, authorise the payment of remuneration exceeding eleven per cent of the net profits of the company, subject to the provisions of Schedule V:

Provided further that, except with the approval of the company in general meeting,—

- (i) the remuneration payable to any one managing director; or whole-time director or manager shall not exceed five per cent of the net profits of the company and if there is more than one such director remuneration shall not exceed ten per cent of the net profits to all such directors and manager taken together;
- (ii) the remuneration payable to directors who are neither managing directors nor whole-time directors shall not exceed,—

- (A) one per cent of the net profits of the company, if there is a managing or whole-time director or manager;
- (B) three per cent of the net profits in any other case.

(2) The percentages aforesaid shall be exclusive of any fees payable to directors under sub-section (5).

(3) Notwithstanding anything contained in sub-sections (1) and (2), but subject to the provisions of Schedule V, if, in any financial year, a company has no profits or its profits are inadequate, the company shall not pay to its directors, including any managing or whole time director or manager, by way of remuneration any sum exclusive of any fees payable to directors under sub-section (5) hereunder except in accordance with the provisions of Schedule V and if it is not able to comply with such provisions, with the previous approval of the Central Government.

(4) The remuneration payable to the directors of a company, including any managing or whole-time director or manager, shall be determined, in accordance with and subject to the provisions of this section, either by the articles of the company, or by a resolution or, if the articles so require, by a special resolution, passed by the company in general meeting and the remuneration payable to a director determined aforesaid shall be inclusive of the remuneration payable to him for the services rendered by him in any other capacity:

Provided that any remuneration for services rendered by any such director in other capacity shall not be so included if—

- (a) the services rendered are of a professional nature; and
- (b) in the opinion of the Nomination and Remuneration Committee, if the company is covered under sub-section (1) of section 178, or the Board of Directors in other cases, the director possesses the requisite qualification for the practice of the profession.

(5) A director may receive remuneration by way of fee for attending meetings of the Board or Committee thereof or for any other purpose whatsoever as may be decided by the Board:

Provided that the amount of such fees shall not exceed the amount as may be prescribed:

Provided further that different fees for different classes of companies and fees in respect of independent director may be such as may be prescribed.

III.860 Auditing Pronouncements

(6) A director or manager may be paid remuneration either by way of a monthly payment or at a specified percentage of the net profits of the company or partly by one way and partly by the other.

(7) Notwithstanding anything contained in any other provision of this Act but subject to the provisions of this section, an independent director shall not be entitled to any stock option and may receive remuneration by way of fees provided under sub-section (5), reimbursement of expenses for participation in the Board and other meetings and profit related commission as may be approved by the members.

(8) The net profits for the purposes of this section shall be computed in the manner referred to in section 198.

(9) If any director draws or receives, directly or indirectly, by way of remuneration any such sums in excess of the limit prescribed by this section or without the prior sanction of the Central Government, where it is required, he shall refund such sums to the company and until such sum is refunded, hold it in trust for the company.

(10) The company shall not waive the recovery of any sum refundable to it under sub-section (9) unless permitted by the Central Government.

(11) In cases where Schedule V is applicable on grounds of no profits or inadequate profits, any provision relating to the remuneration of any director which purports to increase or has the effect of increasing the amount thereof, whether the provision be contained in the company's memorandum or articles, or in an agreement entered into by it, or in any resolution passed by the company in general meeting or its Board, shall not have any effect unless such increase is in accordance with the conditions specified in that Schedule and if such conditions are not being complied, the approval of the Central Government had been obtained.

(12) Every listed company shall disclose in the Board's report, the ratio of the remuneration of each director to the median employee's remuneration and such other details as may be prescribed.

(13) Where any insurance is taken by a company on behalf of its managing director, whole-time director, manager, Chief Executive Officer, Chief Financial Officer or Company Secretary for indemnifying any of them against any liability in respect of any negligence, default, misfeasance, breach of duty or breach of trust for which they may be guilty in relation to the company, the premium paid on such insurance shall not be treated as part of the remuneration payable to any such personnel:

Provided that if such person is proved to be guilty, the premium paid on such insurance shall be treated as part of the remuneration.

(14) Subject to the provisions of this section, any director who is in receipt of any commission from the company and who is a managing or whole-time director of the company shall not be disqualified from receiving any remuneration or commission from any holding company or subsidiary company of such company subject to its disclosure by the company in the Board's report.

(15) If any person contravenes the provisions of this section, he shall be punishable with fine which shall not be less than one lakh rupees but which may extend to five lakh rupees.

Rule 4 and 5 of Companies (Appointment and Remuneration of Managerial Personnel) Rules, 2014.

Rule 4. Sitting fees.- A company may pay a sitting fee to a director for attending meetings of the Board or committees thereof, such sum as may be decided by the Board of directors thereof which shall not exceed one lakh rupees per meeting of the Board or committee thereof:

Provided that for Independent Directors and Women Directors, the sitting fee shall not be less than the sitting fee payable to other directors.

Rule 5. Disclosure in Board's report.-(1) Every listed company shall disclose in the Board's report-

- (i) the ratio of the remuneration of each director to the median remuneration of the employees of the company for the financial year;
- (ii) the percentage increase in remuneration of each director, Chief Financial Officer, Chief Executive Officer, Company Secretary or Manager, if any, in the financial year;
- (iii) the percentage increase in the median remuneration of employees in the financial year;
- (iv) the number of permanent employees on the rolls of company;
- (v) the explanation on the relationship between average increase in remuneration and company performance;
- (vi) comparison of the remuneration of the Key Managerial Personnel against the performance of the company;
- (vii) variations in the market capitalisation of the company, price earnings ratio as at the closing date of the current financial year and previous financial year and percentage increase over decrease in the market quotations of the shares of the company in comparison to the rate at which the company came out with the last public offer in

III.862 Auditing Pronouncements

case of listed companies, and in case of unlisted companies, the variations in the net worth of the company as at the close of the current financial year and previous financial year;

- (viii) average percentile increase already made in the salaries of employees other than the managerial personnel in the last financial year and its comparison with the percentile increase in the managerial remuneration and justification thereof and point out if there are any exceptional circumstances for increase in the managerial remuneration;
- (ix) comparison of the each remuneration of the Key Managerial Personnel against the performance of the company;
- (x) the key parameters for any variable component of remuneration availed by the directors;
- (xi) the ratio of the remuneration of the highest paid director to that of the employees who are not directors but receive remuneration in excess of the highest paid director during the year; and
- (xii) affirmation that the remuneration is as per the remuneration policy of the company.

Explanation.- For the purposes of this rule.- (i) the expression “median” means the numerical value separating the higher half of a population from the lower half and the median of a finite list of numbers may be found by arranging all the observations from lowest value to highest value and picking the middle one;

- (ii) if there is an even number of observations, the median shall be the average of the two middle values.
- (2) The Board’s report shall include a statement showing the name of every employee of the company, who-
- (i) if employed throughout the financial year, was in receipt of remuneration for that year which, in the aggregate, was not less than sixty lakh rupees;
 - (ii) if employed for a part of the financial year, was in receipt of remuneration for any part of that year, at a rate which, in the aggregate, was not less than five lakh rupees per month;
 - (iii) if employed throughout the financial year or part thereof, was in receipt of remuneration in that year which, in the aggregate, or as the case may be, at a rate which, in the aggregate, is in excess of that drawn by the managing director or whole-time director or manager and holds by himself or along with his spouse and dependent children, not less than two percent of the equity shares of the company.

- (3) The statement referred to in sub-rule (2) shall also indicate -
- (i) designation of the employee;
 - (ii) remuneration received;
 - (iii) nature of employment, whether contractual or otherwise;
 - (iv) qualifications and experience of the employee;
 - (v) date of commencement of employment;
 - (vi) the age of such employee;
 - (vii) the last employment held by such employee before joining the company;
 - (viii) the percentage of equity shares held by the employee in the company within the meaning of clause (iii) of sub-rule (2) above; and
 - (ix) whether any such employee is a relative of any director or manager of the company and if so, name of such director or manager:

Provided that the particulars of employees posted and working in a country outside India, not being directors or their relatives, drawing more than sixty lakh rupees per financial year or five lakh rupees per month, as the case may be, as may be decided by the Board, shall not be circulated to the members in the Board's report, but such particulars shall be filed with the Registrar of Companies while filing the financial statement and Board Reports:

Provided further that such particulars shall be made available to any shareholder on a specific request made by him in writing before the date of such Annual General Meeting wherein financial statements for the relevant financial year are proposed to be adopted by shareholders and such particulars shall be made available by the company within three days from the date of receipt of such request from shareholders:

Provided also that, in case of request received even after the date of completion of Annual General Meeting, such particulars shall be made available to the shareholders, within seven days from the date of receipt of such request.

Schedule V

PART II - REMUNERATION

Section I.— Remuneration payable by companies having profits:

III.864 Auditing Pronouncements

Subject to the provisions of section 197, a company having profits in a financial year may pay remuneration to a managerial person or persons not exceeding the limits specified in such section.

Section II.— Remuneration payable by companies having no profit or inadequate profit without Central Government approval:

Where in any financial year during the currency of tenure of a managerial person, a company has no profits or its profits are inadequate, it may, without Central Government approval, pay remuneration to the managerial person not exceeding the higher of the limits under (A) and (B) given below:—

(A):

(1)	(2)
Where the effective capital is	Limit of yearly remuneration payable shall not exceed (Rupees)
(i) Negative or less than 5 crores	30 lakhs
(ii) 5 crores and above but less than 100 crores	42 lakhs
(iii) 100 crores and above but less than 250 crores	60 lakhs
(iv) 250 crores and above	60 lakhs <i>plus</i> 0.01% of the effective capital in excess of Rs. 250 crores:

Provided that the above limits shall be doubled if the resolution passed by the shareholders is a special resolution.

Explanation.—It is hereby clarified that for a period less than one year, the limits shall be pro-rated.

(B) In the case of a managerial person who was not a security holder holding securities of the company of nominal value of rupees five lakh or more or an employee or a director of the company or not related to any director or promoter at any time during the two years prior to his appointment as a managerial person, — 2.5% of the current relevant profit:

Provided that if the resolution passed by the shareholders is a special resolution, this limit shall be doubled:

Provided further that the limits specified under this section shall apply, if—

- (i) payment of remuneration is approved by a resolution passed by the Board and, in the case of a company covered under sub-section (1) of section 178 also by the Nomination and Remuneration Committee;
- (ii) the company has not made any default in repayment of any of its debts (including public deposits) or debentures or interest payable thereon for a continuous period of thirty days in the preceding financial year before the date of appointment of such managerial person;
- (iii) a special resolution has been passed at the general meeting of the company for payment of remuneration for a period not exceeding three years;
- (iv) a statement along with a notice calling the general meeting referred to in clause (iii) is given to the shareholders containing the following information, namely:—

I. General Information:

- (1) Nature of industry
- (2) Date or expected date of commencement of commercial production
- (3) In case of new companies, expected date of commencement of activities as per project approved by financial institutions appearing in the prospectus
- (4) Financial performance based on given indicators
- (5) Foreign investments or collaborations, if any.

II. Information about the appointee:

- (1) Background details
- (2) Past remuneration
- (3) Recognition or awards
- (4) Job profile and his suitability
- (5) Remuneration proposed
- (6) Comparative remuneration profile with respect to industry, size of the company, profile of the position and person (in case of expatriates the relevant details would be with respect to the country of his origin)

III.866 Auditing Pronouncements

- (7) Pecuniary relationship directly or indirectly with the company, or relationship with the managerial personnel, if any.

III. Other information:

- (1) Reasons of loss or inadequate profits
- (2) Steps taken or proposed to be taken for improvement
- (3) Expected increase in productivity and profits in measurable terms.

IV. Disclosures:

The following disclosures shall be mentioned in the Board of Director's report under the heading "Corporate Governance", if any, attached to the financial statement:—

- (i) all elements of remuneration package such as salary, benefits, bonuses, stock options, pension, etc., of all the directors;
- (ii) details of fixed component and performance linked incentives along with the performance criteria;
- (iii) service contracts, notice period, severance fees;
- (iv) stock option details, if any, and whether the same has been issued at a discount as well as the period over which accrued and over which exercisable.

Section III.— Remuneration payable by companies having no profit or inadequate profit without Central Government approval in certain special circumstances:

In the following circumstances a company may, without the Central Government approval, pay remuneration to a managerial person in excess of the amounts provided in Section II above:—

- (a) where the remuneration in excess of the limits specified in Section I or II is paid by any other company and that other company is either a foreign company or has got the approval of its shareholders in general meeting to make such payment, and treats this amount as managerial remuneration for the purpose of section 197 and the total managerial remuneration payable by such other company to its managerial persons including such amount or amounts is within permissible limits under section 197.
- (b) where the company—
 - (i) is a newly incorporated company, for a period of seven years from the date of its incorporation, or
 - (ii) is a sick company, for whom a scheme of revival or rehabilitation has been ordered by the Board for Industrial and Financial Reconstruction or National Company Law

Tribunal, for a period of five years from the date of sanction of scheme of revival, it may pay remuneration up to two times the amount permissible under Section II.

- (c) where remuneration of a managerial person exceeds the limits in Section II but the remuneration has been fixed by the Board for Industrial and Financial Reconstruction or the National Company Law Tribunal:

Provided that the limits under this Section shall be applicable subject to meeting all the conditions specified under Section II and the following additional conditions:—

- (i) except as provided in para (a) of this Section, the managerial person is not receiving remuneration from any other company;
- (ii) the auditor or Company Secretary of the company or where the company has not appointed a Secretary, a Secretary in whole-time practice, certifies that all secured creditors and term lenders have stated in writing that they have no objection for the appointment of the managerial person as well as the quantum of remuneration and such certificate is filed along with the return as prescribed under sub-section (4) of section 196.
- (iii) the auditor or Company Secretary or where the company has not appointed a secretary, a secretary in whole-time practice certifies that there is no default on payments to any creditors, and all dues to deposit holders are being settled on time.
- (d) a company in a Special Economic Zone as notified by Department of Commerce from time to time which has not raised any money by public issue of shares or debentures in India, and has not made any default in India in repayment of any of its debts (including public deposits) or debentures or interest payable thereon for a continuous period of thirty days in any financial year, may pay remuneration up to Rs. 2,40,00,000 per annum.

Section IV.— Perquisites not included in managerial remuneration:

1. A managerial person shall be eligible for the following perquisites which shall not be included in the computation of the ceiling on remuneration specified in Section II and Section III:—

- (a) contribution to provident fund, superannuation fund or annuity fund to the extent these either singly or put together are not taxable under the Income-tax Act, 1961(43 of 1961);
- (b) gratuity payable at a rate not exceeding half a month's salary for each completed year of service; and
- (c) encashment of leave at the end of the tenure.

III.868 Auditing Pronouncements

2. In addition to the perquisites specified in paragraph 1 of this section, an expatriate managerial person (including a non-resident Indian) shall be eligible to the following perquisites which shall not be included in the computation of the ceiling on remuneration specified in Section II or Section III—

- (a) *Children's education allowance:* In case of children studying in or outside India, an allowance limited to a maximum of Rs. 12,000 per month per child or actual expenses incurred, whichever is less. Such allowance is admissible up to a maximum of two children.
- (b) *Holiday passage for children studying outside India or family staying abroad:*
Return holiday passage once in a year by economy class or once in two years by first class to children and to the members of the family from the place of their study or stay abroad to India if they are not residing in India, with the managerial person.
- (c) *Leave travel concession:* Return passage for self and family in accordance with the rules specified by the company where it is proposed that the leave be spent in home country instead of anywhere in India.

Explanation I.— For the purposes of Section II of this Part, "effective capital" means the aggregate of the paid-up share capital (excluding share application money or advances against shares); amount, if any, for the time being standing to the credit of share premium account; reserves and surplus (excluding revaluation reserve); long-term loans and deposits repayable after one year (excluding working capital loans, over drafts, interest due on loans unless funded, bank guarantee, etc., and other short-term arrangements) as reduced by the aggregate of any investments (except in case of investment by an investment company whose principal business is acquisition of shares, stock, debentures or other securities), accumulated losses and preliminary expenses not written off.

Explanation II.— (a) Where the appointment of the managerial person is made in the year in which company has been incorporated, the effective capital shall be calculated as on the date of such appointment;

- (b) In any other case the effective capital shall be calculated as on the last date of the financial year preceding the financial year in which the appointment of the managerial person is made.

Explanation III.— For the purposes of this Schedule, "family" means the spouse, dependent children and dependent parents of the managerial person.

Explanation IV.— The Nomination and Remuneration Committee while approving the remuneration under Section II or Section III, shall—

- (a) take into account, financial position of the company, trend in the industry, appointee's qualification, experience, past performance, past remuneration, etc.;
- (b) be in a position to bring about objectivity in determining the remuneration package while striking a balance between the interest of the company and the shareholders.

Explanation V.— For the purposes of this Schedule, “negative effective capital” means the effective capital which is calculated in accordance with the provisions contained in *Explanation I* of this Part is less than zero.

Explanation VI.— For the purposes of this Schedule:—

- (A) “current relevant profit” means the profit as calculated under section 198 but without deducting the excess of expenditure over income referred to in sub-section 4(l) thereof in respect of those years during which the managerial person was not an employee, director or shareholder of the company or its holding or subsidiary companies.
- (B) “Remuneration” means remuneration as defined in clause (78) of section 2 and includes reimbursement of any direct taxes to the managerial person.

Section V. —Remuneration payable to a managerial person in two companies:

Subject to the provisions of sections I to IV, a managerial person shall draw remuneration from one or both companies, provided that the total remuneration drawn from the companies does not exceed the higher maximum limit admissible from any one of the companies of which he is a managerial person.

PART III

Provisions applicable to Parts I and II of this Schedule

1. The appointment and remuneration referred to in Part I and Part II of this Schedule shall be subject to approval by a resolution of the shareholders in general meeting.
2. The auditor or the Secretary of the company or where the company is not required to appoint a Secretary, a Secretary in whole-time practice shall certify that the requirement of this Schedule have been complied with and such certificate shall be incorporated in the return filed with the Registrar under sub-section (4) of section 196.

PART IV

The Central Government may, by notification, exempt any class or classes of companies from any of the requirements contained in this Schedule.

Text of Nidhi Rules, 2014

1. **Short title and commencement.**—(1) These Rules may be called Nidhi Rules, 2014. (2) They shall come into force on the 1st day of April, 2014.
2. **Application.**—These rules shall apply to,—
 - (a) every company which had been declared as a Nidhi or Mutual Benefit Society under sub-section (1) of Section 620A of the Companies Act, 1956;
 - (b) every company functioning on the lines of a Nidhi company or Mutual Benefit Society but has either not applied for or has applied for and is awaiting notification to be a Nidhi or Mutual Benefit Society under sub-section (1) of Section 620A of the Companies Act, 1956; and
 - (c) every company incorporated as a Nidhi pursuant to the provisions of Section 406 of the Act.
3. **Definitions.**—(1) In these rules, unless the context otherwise requires,—
 - (a) “Act” means the Companies Act, 2013 (18 of 2013);
 - (b) “Doubtful Asset” means a borrowal account which has remained a Non-performing asset for more than two years but less than three years;
 - (c) “Loss Asset” means a borrowal account which has remained a Non-performing asset for more than three years or where in the opinion of the Board, a shortfall in the recovery of the loan account is expected because the documents executed may become invalid if subjected to legal process or for any other reason;
 - (d) “Net Owned Funds” means the aggregate of paid up equity share capital and free reserves as reduced by accumulated losses and intangible assets appearing in the last audited balance sheet:

Provided that the amount representing the proceeds of issue of preference shares shall not be included for calculating Net Owned Funds.
 - (e) “Non-Performing Asset” means a borrowal account in respect of which interest income or instalment of loan towards re payment of principal amount has remained unrealised for twelve months;
 - (f) “Standard Asset” means the asset in respect of which no default in re-payment of principal or payment of interest has occurred or is perceived and

which has neither shown signs of any problem relating to re-payment of principal sum or interest nor does it carry more than normal risk attached to the business;

- (g) “Sub-Standard Asset” means a borrowal account which is a Non-performing asset:

Provided that reschedulement or re-negotiation or re-phasing of the loan instalment or interest payment shall not change the classification of an asset unless the borrowal account has satisfactorily performed for at least twelve months after such reschedulement or renegotiation or rephasing.

- (2) Words and expressions used herein, but not defined in these rules and defined in the Act or in the Companies (Specification of definitions details) Rules, 2014 shall have the same meaning as assigned to them in the Act or in the said Rules.
- 4. Incorporation and incidental matters.—**(1) A Nidhi to be incorporated under the Act shall be a public company and shall have a minimum paid up equity share capital of five lakh rupees.
- (2) On and after the commencement of the Act, no Nidhi shall issue preference shares.
- (3) If preference shares had been issued by a Nidhi before the commencement of this Act, such preference shares shall be redeemed in accordance with the terms of issue of such shares.
- (4) Except as provided under the proviso to sub-rule (e) to rule 6, no Nidhi shall have any object in its Memorandum of Association other than the object of cultivating the habit of thrift and savings amongst its members, receiving deposits from, and lending to, its members only, for their mutual benefit.
- (5) Every Company incorporated as a “Nidhi” shall have the last words ‘Nidhi Limited’ as part of its name.
- 5. Requirements for minimum number of members, net owned fund etc.—**(1) Every Nidhi shall, within a period of one year from the commencement of these rules, ensure that it has—
- (a) not less than two hundred members;
- (b) Net Owned Funds of ten lakh rupees or more;
- (c) unencumbered term deposits of not less than ten per cent of the outstanding deposits as specified in rule 14; and

III.872 Auditing Pronouncements

- (d) ratio of Net Owned Funds to deposits of not more than 1:20.
- (2) Within ninety days from the close of the first financial year after its incorporation and where applicable, the second financial year, Nidhi shall file a return of statutory compliances in Form NDH-1 along with such fee as provided in Companies (Registration Offices and Fees) Rules, 2014 with the Registrar duly certified by a company secretary in practice or a chartered accountant in practice or a cost accountant in practice.
- (3) If a Nidhi is not complying with clauses (a) or (d) of sub-rule (1) above, it shall within thirty days from the close of the first financial year, apply to the Regional Director in Form NDH-2 along with fee specified in Companies (Registration Offices and Fees) Rules, 2014 for extension of time and the Regional Director may consider the application and pass orders within thirty days of receipt of the application.

Explanation.—For the purpose of this rule “Regional Director” means the person appointed by the Central Government in the Ministry of Corporate Affairs as a Regional Director;

- (4) If the failure to comply with sub-rule (1) of this rule extends beyond the second financial year, Nidhi shall not accept any further deposits from the commencement of the second financial year till it complies with the provisions contained in sub-rule (1), besides being liable for penal consequences as provided in the Act.

6. General restrictions or prohibitions.—No Nidhi shall—

- (a) carry on the business of chit fund, hire purchase finance, leasing finance, insurance or acquisition of securities issued by any body corporate;
- (b) issue preference shares, debentures or any other debt instrument by any name or in any form whatsoever;
- (c) open any current account with its members;
- (d) acquire another company by purchase of securities or control the composition of the Board of Directors of any other company in any manner whatsoever or enter into any arrangement for the change of its management, unless it has passed a special resolution in its general meeting and also obtained the previous approval of the Regional Director having jurisdiction over such Nidhi;

Explanation.—For the purposes of this sub-rule, “control” shall have the same meaning assigned to it in clause (27) of section 2 of the Act;

- (e) carry on any business other than the business of borrowing or lending in its own name:

Provided that Nidhis which have adhered to all the provisions of these rules may provide locker facilities on rent to its members subject to the rental income from such facilities not exceeding twenty per cent of the gross income of the Nidhi at any point of time during a financial year.

- (f) accept deposits from or lend to any person, other than its members;
- (g) pledge any of the assets lodged by its members as security;
- (h) take deposits from or lend money to any body corporate;
- (i) enter into any partnership arrangement in its borrowing or lending activities;
- (j) issue or cause to be issued any advertisement in any form for soliciting deposit:

Provided that private circulation of the details of fixed deposit Schemes among the members of the Nidhi carrying the words "for private circulation to members only" shall not be considered to be an advertisement for soliciting deposits.

- (k) pay any brokerage or incentive for mobilising deposits from members or for deployment of funds or for granting loans.

7. **Share capital and allotment.**—(1) Every Nidhi shall issue equity shares of the nominal value of not less than ten rupees each:

Provided that this requirement shall not apply to a company referred to in sub-rules (a) and (b) of rule 2.

- (2) No service charge shall be levied for issue of shares.
- (3) Every Nidhi shall allot to each deposit holder at least a minimum of ten equity shares or shares equivalent to one hundred rupees:

Provided that a savings account holder and a recurring deposit account holder shall hold at least one equity share of rupees ten.

8. **Membership.**—(1) A Nidhi shall not admit a body corporate or trust as a member.

- (2) Except as otherwise permitted under these rules, every Nidhi shall ensure that its membership is not reduced to less than two hundred members at any time.

III.874 Auditing Pronouncements

- (3) A minor shall not be admitted as a member of Nidhi:
- Provided that deposits may be accepted in the name of a minor, if they are made by the natural or legal guardian who is a member of Nidhi.
9. **Net owned funds.**—Every Nidhi shall maintain Net Owned Funds (excluding the proceeds of any preference share capital) of not less than ten lakh rupees or such higher amount as the Central Government may specify from time to time.
10. **Branches.**—(1) A Nidhi may open branches, only if it has earned net profits after tax continuously during the preceding three financial years.
- (2) Subject to the provisions contained in sub-rule (1), a Nidhi may open up to three branches within the district.
- (3) If a Nidhi proposes to open more than three branches within the district or any branch outside the district, it shall obtain the prior permission of the Regional Director and an intimation is to be given to the Registrar about opening of every branch within thirty days of such opening.
- (4) No Nidhi shall open branches or collection centres or offices or deposit centres, or by whatever name called outside the State where its registered office is situated.
- (5) No Nidhi shall open branches or collection centres or offices or deposit centres, or by whatever name called unless financial statement and annual return (up to date) are filed with the Registrar.
- (6) A Nidhi shall not close any branch unless it—
- (a) publishes an advertisement in a newspaper in vernacular language in the place where it carries on business at least thirty days prior to such closure, informing the public about such closure;
- (b) fixes a copy of such advertisement or a notice informing such closure of the branch on the notice board of Nidhi for a period of at least thirty days from the date on which advertisement was published under clause (a); and
- (c) gives an intimation to the Registrar within thirty days of such closure.
11. **Acceptance of deposits by Nidhis.**—(1) A Nidhi shall not accept deposits exceeding twenty times of its Net Owned Funds (NOF) as per its last audited financial statements.

- (2) In the case of companies covered under clauses (a) and (b) of rule 2 and existing on or before 26th July, 2001 and which have accepted deposits in excess of the aforesaid limits, the same shall be restored to the prescribed limit by increasing the Net Owned Funds position or alternatively by reducing the deposit according to the table given below:

TABLE

<i>Ratio of Net Owned Funds to Deposits (as on 31.3. 2013)</i>	<i>Date by which the company has to achieve prescribed ceiling of 1:20</i>
a) More than 1:20 but up to 1:35	By 31.3. 2015
b) More than 1:35 but up to 1:45	By 31.3. 2016
c) More than 1:45	By 31.3. 2017

- (3) The companies which are covered under the Table in sub-rule (2) above shall not accept fresh deposits or renew existing deposits if such acceptance or renewal leads to violation of the prescribed ratio.
- (4) The ratio specified in sub-rule (2) above shall also apply to incremental deposits.
12. **Application form for deposit.**—(1) Every application form for placing a deposit with a Nidhi shall contain the following particulars, namely:—
- Name of Nidhi;
 - Date of incorporation of Nidhi;
 - The business carried on by Nidhi with details of branches, if any;
 - Brief particulars of the management of Nidhi (name, addresses and occupation of the directors, including DIN);
 - Net profits of Nidhi before and after making provision for tax for the preceding three financial years;
 - Dividend declared by Nidhi during the preceding three financial years;
 - Mode of repayment of the deposit;
 - Maturity period of the deposit;
 - Interest payable on the deposit;

III.876 Auditing Pronouncements

- (j) The rate of interest payable to the depositor in case the depositor withdraws the deposit prematurely;
 - (k) The terms and conditions subject to which the deposit may be accepted or renewed;
 - (l) A summary of the financials of the company as per the latest two audited financial statements as given below:
 - (i) Net Owned Funds
 - (ii) Deposits accepted
 - (iii) Deposits repaid
 - (iv) Deposits claimed but remaining unpaid
 - (v) Loans disbursed against—
 - (a) immovable property;
 - (b) deposits; and
 - (c) gold and jewellery
 - (vi) Profit before tax
 - (vii) Provision for tax
 - (viii) Profit after tax
 - (ix) Dividend per share
 - (m) any other special features or terms and conditions subject to which the deposit is accepted or renewed.
- (2) The application form shall also contain the following statements, namely:—
- (a) in case of Non-payment of the deposit or part thereof as per the terms and conditions of such deposit, the depositor may approach the Registrar of companies having jurisdiction over Nidhi; (b) in case of any deficiency of Nidhi in servicing its depositors, the depositor may approach the National Consumers Disputes Redressal Forum, the State Consumers Disputes Redressal Forum or District Consumers Disputes Redressal Forum, as the case may be, for redressal of his relief;

- (c) a declaration by the Board of Directors to the effect that the financial position of Nidhi as disclosed and the representations made in the application form are true and correct and that Nidhi has complied with all the applicable rules;
 - (d) a statement to the effect that the Central Government does not undertake any responsibility for the financial soundness of Nidhi or for the correctness of any of the statement or the representations made or opinions expressed by Nidhi;
 - (e) the deposits accepted by Nidhi are not insured and the repayment of deposits is not guaranteed by either the Central Government or the Reserve Bank of India; and
 - (f) a verification clause by the depositor stating that he had read and understood the financial and other particulars furnished and representations made by Nidhi in his application form and after careful consideration he is making the deposit with Nidhi at his own risk and volition.
- (3) Every Nidhi shall obtain proper introduction of new depositors before opening their accounts or accepting their deposits and keep on its record the evidence on which it has relied upon for the purpose of such introduction.
- (4) For the purposes of introduction of depositors, a Nidhi shall obtain documentary evidence of the depositor in the form of proof of identity and address as under:
- (a) Proof of Identity (any one of the following)
 - (i) Passport
 - (ii) Unique Identification Number
 - (iii) Income-tax PAN card
 - (iv) Elector Photo Identity Card
 - (v) Driving licence
 - (vi) Ration card
 - (b) Proof of address (any one of the following)
 - (i) Passport
 - (ii) Unique Identification Number
 - (iii) Elector Photo Identity Card
 - (iv) Driving licence
 - (v) Ration card

III.878 Auditing Pronouncements

- (vi) Telephone bill
- (vii) Bank account statement
- (viii) Electricity bill

(documents referred to serial numbers (vi), (vii) and (viii) above shall not be more than two months old)

- 13. Deposits.**—(1) The fixed deposits shall be accepted for a minimum period of six months and a maximum period of sixty months.
- (2) Recurring deposits shall be accepted for a minimum period of twelve months and a maximum period of sixty months.
 - (3) In case of recurring deposits relating to mortgage loans, the maximum period of recurring deposits shall correspond to the repayment period of such loans granted by Nidhi.
 - (4) The maximum balance in a savings deposit account at any given time qualifying for interest shall not exceed one lakh rupees at any point of time and the rate of interest shall not exceed two per cent above the rate of interest payable on savings bank account by nationalised banks.
 - (5) A Nidhi may offer interest on fixed and recurring deposits at a rate not exceeding the maximum rate of interest prescribed by the Reserve Bank of India which the Non-Banking Financial Companies can pay on their public deposits.
 - (6) A fixed deposit account or a recurring deposit account shall be foreclosed by the depositor subject to the following conditions, namely:—
 - (a) a Nidhi shall not repay any deposit within a period of three months from the date of its acceptance;
 - (b) where at the request of the depositor, a Nidhi repays any deposit after a period of three months, the depositor shall not be entitled to any interest up to six months from the date of deposit;
 - (c) where at the request of the depositor, a Nidhi makes repayment of a deposit before the expiry of the period for which such deposit was accepted by Nidhi, the rate of interest payable by Nidhi on such deposit shall be reduced by two per cent from the rate which Nidhi would have ordinarily paid, had the deposit been accepted for the period for which such deposit had run:

Provided that in the event of death of a depositor, the deposit may be repaid prematurely to the surviving depositor or depositors in the case of joint holding with survivor clause, or to the nominee or to legal heir with interest up to the date of repayment at the rate which the company would have ordinarily paid, had such deposit been accepted for the period for which such deposit had run.

- 14. Un-encumbered term deposits.**—Every Nidhi shall invest and continue to keep invested, in unencumbered term deposits with a Scheduled commercial bank (other than a co-operative bank or a regional rural bank), or post office deposits in its own name an amount which shall not be less than ten per cent of the deposits outstanding at the close of business on the last working day of the second preceding month:

Provided that in cases of unforeseen commitments, temporary withdrawal may be permitted with the prior approval of the Regional Director for the purpose of repayment to depositors, subject to such conditions and time limit which may be specified by the Regional Director to ensure restoration of the prescribed limit of ten per cent.

- 15. Loans.**—(1) A Nidhi shall provide loans only to its members.
- (2) The loans given by a Nidhi to a member shall be subject to the following limits, namely:—
- (a) two lakh rupees, where the total amount of deposits of such Nidhi from its members is less than two crore rupees;
 - (b) seven lakh fifty thousand rupees, where the total amount of deposits of such Nidhi from its members is more than two crore rupees but less than twenty crore rupees;
 - (c) twelve lakh rupees, where the total amount of deposits of such Nidhi from its members is more than twenty crore rupees but less than fifty crore rupees; and
 - (d) fifteen lakh rupees, where the total amount of deposits of such Nidhi from its members is more than fifty crore rupees:

Provided that where a Nidhi has not made profits continuously in the three preceding financial years, it shall not make any fresh loans exceeding fifty per cent of the maximum amounts of loans specified in clauses (a), (b), (c) or (d).

III.880 Auditing Pronouncements

Provided further that, a member shall not be eligible for any further loan if he has borrowed any earlier loan from the Nidhi and has defaulted in repayment of such loan.

(3) For the purposes of sub-rule (2), the amount of deposits shall be calculated on the basis of the last audited annual financial statements.

(4) A Nidhi shall give loans to its members only against the following securities, namely:—

(a) gold, silver and jewellery:

Provided that the re-payment period of such loan shall not exceed one year.

(b) immovable property:

Provided that the total loans against immovable property [excluding mortgage loans granted on the security of property by registered mortgage, being a registered mortgage under section 69 of the Transfer of Property Act, 1882 (IV of 1882)] shall not exceed fifty per cent of the overall loan outstanding on the date of approval by the board, the individual loan shall not exceed fifty per cent of the value of property offered as security and the period of repayment of such loan shall not exceed seven years.

(c) fixed deposit receipts, National Savings Certificates, other Government Securities and insurance policies:

Provided that such securities duly discharged shall be pledged with Nidhi and the maturity date of such securities shall not fall beyond the loan period or one year whichever is earlier:

Provided further that in the case of loan against fixed deposits, the period of loan shall not exceed the unexpired period of the fixed deposits.

16. Rate of interest.—The rate of interest to be charged on any loan given by a Nidhi shall not exceed seven and half per cent above the highest rate of interest offered on deposits by Nidhi and shall be calculated on reducing balance method:

Provided that Nidhi shall charge the same rate of interest on the borrowers in respect of the same class of loans and the rates of interest of all classes of loans shall be prominently displayed on the notice board at the registered office and each branch office of Nidhi.

17. Rules relating to Directors.—(1) The Director shall be a member of Nidhi.

- (2) The Director of a Nidhi shall hold office for a term up to ten consecutive years on the Board of Nidhi.
 - (3) The Director shall be eligible for re-appointment only after the expiration of two years of ceasing to be a Director.
 - (4) Where the tenure of any Director in any case had already been extended by the Central Government, it shall terminate on expiry of such extended tenure.
 - (5) The person to be appointed as a Director shall comply with the requirements of sub-section (4) of Section 152 of the Act and shall not have been disqualified from appointment as provided in section 164 of the Act.
- 18. Dividend.**- A Nidhi shall not declare dividend exceeding twenty five per cent or such higher amount as may be specifically approved by the Regional Director for reasons to be recorded in writing and further subject to the following conditions, namely:—
- (a) an equal amount is transferred to General Reserve;
 - (b) there has been no default in repayment of matured deposits and interest; and
 - (c) it has complied with all the rules as applicable to Nidhis.
- 19. Auditor.**—(1) No Nidhi shall appoint or re-appoint an individual as auditor for more than one term of five consecutive years.
- (2) No Nidhi shall appoint or re-appoint an audit firm as auditor for more than two terms of five consecutive years: Provided that an auditor (whether an individual or an audit firm) shall be eligible for subsequent appointment after the expiration of two years from the completion of his or its term:
- Explanation: For the purposes of this proviso:
- (i) in case of an auditor (whether an individual or audit firm), the period for which he or it has been holding office as auditor prior to the commencement of these rules shall be taken into account in calculating the period of five consecutive years or ten consecutive years, as the case may be;
 - (ii) appointment includes re-appointment.
- 20. Prudential norms.**—(1) Every Nidhi shall adhere to the prudential norms for revenue recognition and classification of assets in respect of mortgage loans or jewel loans as contained hereunder.

III.882 Auditing Pronouncements

- (2) Income including interest or any other charges on non-performing assets shall be recognised only when it is actually realised and any such income recognised before the asset became non-performing and which remains unrealised in a year shall be reversed in the profit and loss account of the immediately succeeding year.
- (3) (a) In respect of mortgage loans, the classification of assets and the provisioning required shall be as under:

NATURE OF ASSET	PROVISION REQUIRED
Standard Asset	No provision
Sub-standard Asset	10% of the aggregate outstanding amount
Doubtful Asset	25% of the aggregate outstanding amount
Loss Asset	100% of the aggregate outstanding amount

Provided that a Nidhi may make provision for exceeding the percentage specific herein.

- (b) The estimated realisable value of the collateral security to which a Nidhi has valid recourse may be reduced from the aggregate outstanding amount, if the proceedings for the sale of the mortgaged property have been initiated in a court of law within the previous two years of the interest, income or instalment remaining unrealised.
- (4) In case of companies which were incorporated on or before 26-07-2001, such companies shall make provisions in respect of loans disbursed and outstanding as on 31-03-2002 for income reversal and non-performing assets as per table given below:

For the year ended	Extent of provision
31-03-2015	Un-provided balance on equal basis over the three years as specified in the preceding column.
31-03-2016	
31-03-2017	

- (5) (a) The Notes on the financial statements of a year shall disclose-
- (i) the total amount of provisions, if any, to be made on account of income reversal and non-performing assets remaining unrealised;
- (ii) the cumulative amount provided till the previous year;

- (iii) the amount provided in the current year; and
- (iv) the balance amount to be provided.
- (b) Such disclosure shall continue to be made until the entire amount to be provided has been provided for.
- (6) In respect of loans against gold or jewellery—
 - (a) the aggregate amount of loan outstanding against the security of gold or jewellery shall either be recovered or renewed within three months from the due date of repayment;
 - (b) if the loan is not recovered or renewed and the security is not sold within the aforesaid period of three months, the company shall make provision in the current year's financial statements to the extent of unrealised amount or the aggregate outstanding amount of loan including interest as applicable;
 - (c) no income shall be recognised on such loans outstanding after the expiry of the three months period specified in (a) above or sale of gold or jewellery, whichever is earlier; and
 - (d) the loan to value ratio shall not exceed 80 per cent.

Explanation.- For the purposes of this rule, the term 'loan to value ratio' means the ratio between the amount of loan given and the value of gold or jewellery against which such loan is given.

- 21. **Filing of half yearly return.**—Every company covered under rule 2 shall file half yearly return with the Registrar in Form NDH-3 along with such fee as provided in Companies (Registration Offices and Fees) Rules, 2014 within thirty days from the conclusion of each half year duly certified by a company secretary in practice or chartered accountant in practice or cost accountant in practice.
- 22. **Auditor's certificate.**—The Auditor of the company shall furnish a certificate every year to the effect that the company has complied with all the provisions contained in the rules and such certificate shall be annexed to the audit report and in case of non-compliance, he shall specifically state the rules which have not been complied with.
- 23. **Power to enforce compliance.**—(1) For the purposes of enforcing compliance with these rules, the Registrar of companies may call for such information or returns from Nidhi as he deems necessary and may engage the services of chartered

III.884 Auditing Pronouncements

accountants, company secretaries in practice, cost accountants, or any firm thereof from time to time for assisting him in the discharge of his duties.

- (2) In respect of any Nidhi which has violated these rules or has failed to function in terms of the Memorandum and Articles of Association, the concerned Regional Director may appoint a Special Officer to take over the management of Nidhi and such Special Officer shall function as per the guidelines given by such Regional Director:

Provided that an opportunity of being heard shall be given to the concerned Nidhi by the Regional Director before appointing any Special Officer.

24. **Penalty for non-compliance.**- If a company falling under rule 2 contravenes any of the provisions of the rules prescribed herein, the company and every officer of the company who is in default shall be punishable with fine which may extend to five thousand rupees, and where the contravention is a continuing one, with a further fine which may extend to five hundred rupees for every day after the first during which the contravention continues.

Appendix IX

Text of Section 42 of the Companies Act, 2013

42. Offer or invitation for subscription of securities on private placement¹⁶.

- (1) Without prejudice to the provisions of section 26, a company may, subject to the provisions of this section, make private placement through issue of a private placement offer letter.
- (2) Subject to sub-section (1), the offer of securities or invitation to subscribe securities, shall be made to such number of persons not exceeding fifty or such higher number as may be prescribed, [excluding qualified institutional buyers and employees of the company being offered securities under a scheme of employees stock option as per provisions of clause (b) of sub-section (1) of section 62], in a financial year and on such conditions (including the form and manner of private placement) as may be prescribed.

Explanation I.—If a company, listed or unlisted, makes an offer to allot or invites subscription, or allots, or enters into an agreement to allot, securities to more than the prescribed number of persons, whether the payment for the securities has been received or not or whether the company intends to list its securities or not on any recognised stock exchange in or outside India, the same shall be deemed to be an

¹⁶ Ministry of Corporate Affairs vide its notification no. GSR 465(E) dated 5th June, 2015 has specified that Section 42 except sub-section (1), explanation (II) to sub-section (2), sub-sections (4), (6), (t), (9) and (10) shall not apply to Nidhis.

offer to the public and shall accordingly be governed by the provisions of Part I of this Chapter.

Explanation II.— For the purposes of this section, the expression—

- (i) "qualified institutional buyer" means the qualified institutional buyer as defined in the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2009 as amended from time to time.
 - (ii) "private placement" means any offer of securities or invitation to subscribe securities to a select group of persons by a company (other than by way of public offer) through issue of a private placement offer letter and which satisfies the conditions specified in this section.
- (3) No fresh offer or invitation under this section shall be made unless the allotments with respect to any offer or invitation made earlier have been completed or that offer or invitation has been withdrawn or abandoned by the company.
 - (4) Any offer or invitation not in compliance with the provisions of this section shall be treated as a public offer and all provisions of this Act, and the Securities Contracts (Regulation) Act, 1956 and the Securities and Exchange Board of India Act, 1992 shall be required to be complied with.
 - (5) All monies payable towards subscription of securities under this section shall be paid through cheque or demand draft or other banking channels but not by cash.
 - (6) A company making an offer or invitation under this section shall allot its securities within sixty days from the date of receipt of the application money for such securities and if the company is not able to allot the securities within that period, it shall repay the application money to the subscribers within fifteen days from the date of completion of sixty days and if the company fails to repay the application money within the aforesaid period, it shall be liable to repay that money with interest at the rate of twelve per cent. per annum from the expiry of the sixtieth day:

Provided that monies received on application under this section shall be kept in a separate bank account in a scheduled bank and shall not be utilised for any purpose other than—
 - (a) for adjustment against allotment of securities; or
 - (b) for the repayment of monies where the company is unable to allot securities.
 - (7) All offers covered under this section shall be made only to such persons whose names are recorded by the company prior to the invitation to subscribe, and that such persons shall receive the offer by name, and that a complete record of such offers shall be kept by the company in such manner as may be prescribed and

III.886 Auditing Pronouncements

complete information about such offer shall be filed with the Registrar within a period of thirty days of circulation of relevant private placement offer letter.

- (8) No company offering securities under this section shall release any public advertisements or utilise any media, marketing or distribution channels or agents to inform the public at large about such an offer.
- (9) Whenever a company makes any allotment of securities under this section, it shall file with the Registrar a return of allotment in such manner as may be prescribed, including the complete list of all security-holders, with their full names, addresses, number of securities allotted and such other relevant information as may be prescribed.
- (10) If a company makes an offer or accepts monies in contravention of this section, the company, its promoters and directors shall be liable for a penalty which may extend to the amount involved in the offer or invitation or two crore rupees, whichever is higher, and the company shall also refund all monies to subscribers within a period of thirty days of the order imposing the penalty.

Appendix X

Rule 14 of the Companies (Prospectus & Allotment of Securities) Rules, 2014

Rule 14 of The Companies (Prospectus and Allotment of Securities) Rules, 2014, as amended by notification dated 30.6.2014

14. Private Placement.—

- (1) (a) For the purposes of sub-section (1) of section 42, a company may make an offer or invitation to subscribe to securities through issue of a private placement offer letter in Form PAS-4.

(b) A private placement offer letter shall be accompanied by an application form serially numbered and addressed specifically to the person to whom the offer is made and shall be sent to him, either in writing or in electronic mode, within thirty days of recording the names of such persons in accordance with sub-section (7) of section 42:

Provided that no person other than the person so addressed in the application form shall be allowed to apply through such application form and any application not conforming to this condition shall be treated as invalid.

- (2) A company shall not make a private placement of its securities unless –

(a) the proposed offer of securities or invitation to subscribe securities has been previously approved by the shareholders of the company, by a Special Resolution, for each of the Offers or Invitations:

Provided that in the explanatory statement annexed to the notice for the general meeting the basis or justification for the price (including premium, if any) at which the offer or invitation is being made shall be disclosed:

Provided further that in case of offer or invitation for non-convertible debentures, it shall be sufficient if the company passes a previous special resolution only once in a year for all the offers or invitation for such debentures during the year.

Provided also that in case of an offer or invitation for non convertible debenture referred to in the second proviso, made within a period of six months from the date of commencement of these rules, the special resolution referred to in the second proviso may be passed within the said period of six months from the date of commencement of these rules.

(b) such offer or invitation shall be made to not more than two hundred persons in the aggregate in a financial year:

Provided that any offer or invitation made to qualified institutional buyers, or to employees of the company under a scheme of employees stock option as per provisions of clause (b) of sub-section (1) of section 62 shall not be considered while calculating the limit of two hundred persons;

Explanation.– For the purposes of this sub-rule, it is hereby clarified that –

(i) the restrictions under sub-clause (b) would be reckoned individually for each kind of security that is equity share, preference share or debenture;

(ii) the requirement of provisions of sub-section (3) of section 42 shall apply in respect of offer or invitation of each kind of security and no offer or invitation of another kind of security shall be made unless allotments with respect to offer or invitation made earlier in respect of any other kind of security is completed;

(c) the value of such offer or invitation per person shall be with an investment size of not less than twenty thousand rupees of face value of the securities;

(d) the payment to be made for subscription to securities shall be made from the bank account of the person subscribing to such securities and the company shall keep the record of the Bank account from where such payments for subscriptions have been received:

III.888 Auditing Pronouncements

Provided that monies payable on subscription to securities to be held by joint holders shall be paid from the bank account of the person whose name appears first in the application.

- (3) The company shall maintain a complete record of private placement offers in Form PAS-5:

Provided that a copy of such record along with the private placement offer letter in Form PAS-4 shall be filed with the Registrar with fee as provided in Companies (Registration Offices and Fees) Rules, 2014 and where the company is listed, with the Securities and Exchange Board within a period of thirty days of circulation of the private placement offer letter.

Explanation.- For the purpose of this rule, it is hereby clarified that the date of private placement offer letter shall be deemed to be the date of circulation of private placement offer letter.

- (4) A return of allotment of securities under section 42 shall be filed with the Registrar within thirty days of allotment in Form PAS-3 and with the fee as provided in the Companies (Registration Offices and Fees) Rules, 2014 along with a complete list of all security holders containing-

- (i) the full name, address, Permanent Account Number and E-mail ID of such security holder;
- (ii) the class of security held;
- (iii) the date of allotment of security ;
- (iv) the number of securities held, nominal value and amount paid on such securities; and particulars of consideration received if the securities were issued for consideration other than cash.

- (5) The provisions of clauses (b) and (c) of sub-rule (2) shall not be applicable to –

- (a) non-banking financial companies which are registered with the Reserve Bank of India under Reserve Bank of India Act, 1934; and
- (b) housing finance companies which are registered with the National Housing Bank under National Housing Bank Act, 1987,

if they are complying with regulations made by Reserve Bank of India or National Housing Bank in respect of offer or invitation to be issued on private placement basis:

Provided that such companies shall comply with sub-clauses (b) and (c) of

sub-rule (2) in case the Reserve Bank of India or the National Housing Bank have not specified similar regulations.

Appendix XI

Text of Section 45-IA of the Reserve Bank of India Act, 1934

45-IA. Requirement of Registration and Net Owned Fund

- (1) Notwithstanding anything contained in this Chapter or in any other law for the time being in force, no non-banking financial company shall commence or carry on the business of a non-banking financial institution without—
 - (a) obtaining a certificate of registration issued under this Chapter; and
 - (b) having the net owned fund of twenty-five lakh rupees or such other amount, not exceeding two hundred lakh rupees, (Rs. 200 Lakhs since April 1999) as the Bank may, by notification in the Official Gazette, specify.
- (2) Every non-banking financial company shall make an application for registration to the Bank in such form as the Bank may specify:

Provided that a non-banking financial company in existence on the commencement of the Reserve Bank of India (Amendment) Act, 1997 shall make an application for registration to the Bank before the expiry of six months from such commencement and notwithstanding anything contained in sub-section (1) may continue to carry on the business of a non-banking financial institution until a certificate of registration is issued to it or rejection of application for registration is communicated to it.

- (3) Notwithstanding anything contained in sub-section (1), a non-banking financial company in existence on the commencement of the Reserve Bank of India (Amendment) Act, 1997 and having a net owned fund of less than twenty-five lakh rupees may, for the purpose of enabling such company to fulfil the requirement of the net owned fund, continue to carry on the business of a non-banking financial institution—
 - (i) for a period of three years from such commencement; or
 - (ii) for such further period as the Bank may, after recording the reasons in writing for so doing, extend, subject to the condition that such company shall, within three months of fulfilling the requirement of the net owned fund, inform the Bank about such fulfilment:

III.890 Auditing Pronouncements

Provided that the period allowed to continue business under this sub-section shall in no case exceed six years in the aggregate.

- (4) The Bank may, for the purpose of considering the application for registration, require to be satisfied by an inspection of the books of the non-banking financial company or otherwise that the following conditions are fulfilled:—
 - (a) that the non-banking financial company is or shall be in a position to pay its present or future depositors in full as and when their claims accrue;
 - (b) that the affairs of the non-banking financial company are not being or are not likely to be conducted in a manner detrimental to the interest of its present or future depositors;
 - (c) that the general character of the management or the proposed management of the non-banking financial company shall not be prejudicial to the public interest or the interest of its depositors;
 - (d) that the non-banking financial company has adequate capital structure and earning prospects;
 - (e) that the public interest shall be served by the grant of certificate of registration to the non-banking financial company to commence or to carry on the business in India;
 - (f) that the grant of certificate of registration shall not be prejudicial to the operation and consolidation of the financial sector consistent with monetary stability, economic growth and considering such other relevant factors which the Bank may, by notification in the Official Gazette, specify; and
 - (g) any other condition, fulfilment of which in the opinion of the Bank, shall be necessary to ensure that the commencement of or carrying on of the business in India by a non-banking financial company shall not be prejudicial to the public interest or in the interest of the depositors.
- (5) The Bank may, after being satisfied that the conditions specified in sub-section (4) are fulfilled, grant a certificate of registration subject to such conditions which it may consider fit to impose.
- (6) The Bank may cancel a certificate of registration granted to a non-banking financial company under this section if such company—
 - (i) ceases to carry on the business of a non-banking financial institution in India; or

- (ii) has failed to comply with any condition subject to which the certificate of registration had been issued to it; or
- (iii) at any time fails to fulfil any of the conditions referred to in clauses (a) to (g) of sub-section (4); or
- (iv) fails—
 - (a) to comply with any direction issued by the Bank under the provisions of this chapter; or
 - (b) to maintain accounts in accordance with the requirements of any law or any direction or order issued by the Bank under the provisions of this Chapter; or
 - (c) to submit or offer for inspection its books of account and other relevant documents when so demanded by an inspecting authority of the Bank; or
- (v) has been prohibited from accepting deposit by an order made by the Bank under the provisions of this Chapter and such order has been in force for a period of not less than three months:

Provided that before cancelling a certificate of registration on the ground that the non-banking financial company has failed to comply with the provisions of clause (ii) or has failed to fulfil any of the conditions referred to in clause (iii) the Bank, unless it is of the opinion that the delay in cancelling the certificate of registration shall be prejudicial to public interest or the interest of the depositors or the non-banking financial company, shall give an opportunity to such company on such terms as the Bank may specify for taking necessary steps to comply with such provision or fulfillment of such condition;

Provided further that before making any order of cancellation of certificate of registration, such company shall be given a reasonable opportunity of being heard.

- (7) A company aggrieved by the order of rejection of application for registration or cancellation of certificate of registration may prefer an appeal, within a period of thirty days from the date on which such order of rejection or cancellation is communicated to it, to the Central Government and the decision of the Central Government where an appeal has been preferred to it, or of the Bank where no appeal has been preferred, shall be final:

Provided that before making any order of rejection of appeal, such company shall be given a reasonable opportunity of being heard.

Explanation.— For the purposes of this section,—

III.892 Auditing Pronouncements

- (I) “net owned fund” means–
 - (a) the aggregate of the paid-up equity capital and free reserves as disclosed in the latest balance-sheet of the company after deducting therefrom–
 - (i) accumulated balance of loss;
 - (ii) deferred revenue expenditure; and
 - (iii) other intangible assets; and
 - (b) further reduced by the amounts representing–
 - (1) investments of such company in shares of–
 - (i) its subsidiaries;
 - (ii) companies in the same group;
 - (iii) all other non-banking financial companies; and
 - (2) the book value of debentures, bonds, outstanding loans and advances (including hire-purchase and lease finance) made to, and deposits with,–
 - (i) subsidiaries of such company; and
 - (ii) companies in the same group,
- to the extent such amount exceeds ten per cent of (a) above.
- (II) “subsidiaries” and “companies in the same group” shall have the same meanings assigned to them in the Companies Act, 1956.

Appendix XII

Text of Sections 73 to 76 of the Companies Act, 2013

Prohibition on acceptance of deposits from public

73. (1) On and after the commencement of this Act, no company shall invite, accept or renew deposits under this Act from the public except in a manner provided under this Chapter:

Provided that nothing in this sub-section shall apply to a banking company and non-banking financial company as defined in the Reserve Bank of India Act, 1934 and to such other company as the Central Government may, after consultation with the Reserve Bank of India, specify in this behalf.

- (2) A company may, subject to the passing of a resolution in general meeting and subject to such rules as may be prescribed in consultation with the Reserve Bank of India, accept deposits from its members on such terms and conditions, including the provision of security, if any, or for the repayment of such deposits with interest, as may be agreed upon between the company and its members, subject to the fulfilment of the following conditions, namely:—
- (a) issuance of a circular to its members including therein a statement showing the financial position of the company, the credit rating obtained, the total number of depositors and the amount due towards deposits in respect of any previous deposits accepted by the company and such other particulars in such form and in such manner as may be prescribed;
 - (b) filing a copy of the circular along with such statement with the Registrar within thirty days before the date of issue of the circular;
 - (c) depositing such sum which shall not be less than fifteen per cent of the amount of its deposits maturing during a financial year and the financial year next following, and kept in a scheduled bank in a separate bank account to be called as deposit repayment reserve account;
 - (d) providing such deposit insurance in such manner and to such extent as maybe prescribed;
 - (e) certifying that the company has not committed any default in the repayment of deposits accepted either before or after the commencement of this Act or payment of interest on such deposits; and
 - (f) providing security, if any for the due repayment of the amount of deposit or the interest thereon including the creation of such charge on the property or assets of the company:

Provided that in case where a company does not secure the deposits or secures such deposits partially, then, the deposits shall be termed as “unsecured deposits” and shall be so quoted in every circular, form, advertisement or in any document related to invitation or acceptance of deposits.

III.894 Auditing Pronouncements

- (3) Every deposit accepted by a company under sub-section (2) shall be repaid with interesting accordance with the terms and conditions of the agreement referred to in that sub-section.
- (4) Where a company fails to repay the deposit or part thereof or any interest thereon under sub-section (3), the depositor concerned may apply to the Tribunal for an order directing the company to pay the sum due or for any loss or damage incurred by him as a result of such non-payment and for such other orders as the Tribunal may deem fit.
- (5) The deposit repayment reserve account referred to in clause (c) of sub-section (2) shall not be used by the company for any purpose other than repayment of deposits.

Repayment of deposits, etc., accepted before commencement of this Act

74. (1) Where in respect of any deposit accepted by a company before the commencement of this Act, the amount of such deposit or part thereof or any interest due thereon remains unpaid on such commencement or becomes due at any time thereafter, the company shall—
 - (a) file, within a period of three months from such commencement or from the date on which such payments, are due, with the Registrar a statement of all the deposits accepted by the company and sums remaining unpaid on such amount with the interest payable thereon along with the arrangements made for such repayment, notwithstanding anything contained in any other law for the time being in force or under the terms and conditions subject to which the deposit was accepted or any scheme framed under any law; and
 - (b) repay within one year from such commencement or from the date on which such payments are due, whichever is earlier.
- (2) The Tribunal may on an application made by the company, after considering the financial condition of the company, the amount of deposit or part thereof and the interest payable thereon and such other matters, allow further time as considered reasonable to the company to repay the deposit.
- (3) If a company fails to repay the deposit or part thereof or any interest thereon within the time specified in sub-section (1) or such further time as may be allowed by the Tribunal under sub-section (2), the company shall, in addition to the payment of the amount of deposit or part thereof and the interest due, be punishable with fine which shall not be less than one crore rupees but which may extend to ten crore rupees and every officer of the company who is in default shall be punishable with imprisonment which may extend to seven years or with fine which shall not be less than twenty-five lakh rupees but which may extend to two crore rupees, or with both.

Damages for fraud

75. (1) Where a company fails to repay the deposit or part thereof or any interest thereon referred to in section 74 within the time specified in sub-section (1) of that section or such further time as may be allowed by the Tribunal under sub-section (2) of that section, and it is proved that the deposits had been accepted with intent to defraud the depositors or for any fraudulent purpose, every officer of the company who was responsible for the acceptance of such deposit shall, without prejudice to the provisions contained in sub-section(3) of that section and liability under section 447, be personally responsible, without any limitation of liability, for all or any of the losses or damages that may have been incurred by the depositors.
- (2) Any suit, proceedings or other action may be taken by any person, group of persons or any association of persons who had incurred any loss as a result of the failure of the company to repay the deposits or part thereof or any interest thereon.

Acceptance of deposits from Public by certain companies

76. (1) Notwithstanding anything contained in section 73, a public company, having such net worth or turnover as may be prescribed, may accept deposits from persons other than its members subject to compliance with the requirements provided in sub-section (2) of section 73 and subject to such rules as the Central Government may, in consultation with the Reserve Bank of India, prescribe:

Provided that such a company shall be required to obtain the rating (including its net worth, liquidity and ability to pay its deposits on due date) from a recognised credit rating agency for informing the public the rating given to the company at the time of invitation of deposits from the public which ensures adequate safety and the rating shall be obtained for every year during the tenure of deposits:

Provided further that every company accepting secured deposits from the public shall within thirty days of such acceptance, create a charge on its assets of an amount not less than the amount of deposits accepted in favour of the deposit holders in accordance with such rules as may be prescribed.

- (2) The provisions of this Chapter shall, *mutatis mutandis*, apply to the acceptance of deposits from public under this section.

Appendix XIII

Text of the Companies (Acceptance of Deposits) Rules, 2014

III.896 Auditing Pronouncements

1. **Short title, commencement and application.**- (1) These rules may be called the Companies (Acceptance of Deposits) Rules, 2014.
 - (2) They shall come into force on the 1st day of April, 2014.
 - (3) These rules shall apply to a company other than –
 - (i) a banking company;
 - (ii) a non-banking financial company as defined in the Reserve Bank of India Act, 1934 (2 of 1934) registered with the Reserve Bank of India;
 - (iii) a housing finance company registered with the National Housing Bank established under the National Housing Bank Act, 1987 (53 of 1987); and
 - (iv) a company specified by the Central Government under the proviso to sub-section (1) of section 73 of the Act.
2. **Definitions.**- (1) In these rules, unless the context otherwise requires, ___
 - (a) “Act” means the Companies Act, 2013 (18 of 2013);
 - (b) “Annexure” means the Annexure attached to these rules;
 - (c) “deposit” includes any receipt of money by way of deposit or loan or in any other form, by a company, but does not include –
 - (i) any amount received from the Central Government or a State Government, or any amount received from any other source whose repayment is guaranteed by the Central Government or a State Government, or any amount received from a local authority, or any amount received from a statutory authority constituted under an Act of Parliament or a State Legislature ;
 - (ii) any amount received from foreign Governments, foreign or international banks, multilateral financial institutions (including, but not limited to, International Finance Corporation, Asian Development Bank, Commonwealth Development Corporation and International Bank for Industrial and Financial Reconstruction), foreign Governments owned development financial institutions, foreign export credit agencies, foreign collaborators, foreign bodies corporate and foreign citizens, foreign authorities or persons resident outside India subject to the provisions of Foreign Exchange Management Act, 1999 (42 of 1999) and rules and regulations made there under;
 - (iii) any amount received as a loan or facility from any banking company or from the State Bank of India or any of its subsidiary banks or from a

banking institution notified by the Central Government under section 51 of the Banking Regulation Act, 1949 (10 of 1949), or a corresponding new bank as defined in clause (d) of section 2 of the Banking Companies (Acquisition and Transfer of Undertakings) Act, 1970 (5 of 1970) or in clause (b) of section (2) of the Banking Companies (Acquisition and Transfer of Undertakings) Act, 1980 (40 of 1980) , or from a co-operative bank as defined in clause (b-ii) of section 2 of the Reserve Bank of India Act, 1934 (2 of 1934) ;

- (iv) any amount received as a loan or financial assistance from Public Financial Institutions notified by the Central Government in this behalf in consultation with the Reserve Bank of India or any regional financial institutions or Insurance Companies or Scheduled Banks as defined in the Reserve Bank of India Act, 1934 (2 of 1934);
- (v) any amount received against issue of commercial paper or any other instruments issued in accordance with the guidelines or notification issued by the Reserve Bank of India;
- (vi) any amount received by a company from any other company;
- (vii) any amount received and held pursuant to an offer made in accordance with the provisions of the Act towards subscription to any securities, including share application money or advance towards allotment of securities pending allotment, so long as such amount is appropriated only against the amount due on allotment of the securities applied for;

Explanation.- For the purposes of this sub-clause, it is hereby clarified that –

- (a) Without prejudice to any other liability or action, if the securities for which application money or advance for such securities was received cannot be allotted within sixty days from the date of receipt of the application money or advance for such securities and such application money or advance is not refunded to the subscribers within fifteen days from the date of completion of sixty days, such amount shall be treated as a deposit under these rules.

“Provided that unless otherwise required under the Companies Act, 1956 (1 of 1956) or the Securities and Exchange Board of India Act, 1992 (15 of 1992) or rules or regulations made there

III.898 Auditing Pronouncements

under to allot any share, stock, bond, or debenture within a specified period, if a company had received any amount by way of subscriptions to any shares, stock, bonds or debentures before the 1st April, 2014 and disclosed it in the balance sheet for the financial year ending on or before the 31st March, 2014 against which the allotment is pending on the 31st March, 2015, the company shall, by the 1st June 2015, either return such amounts to the persons from whom these were received or allot shares, stock, bonds or debentures or comply with these rules."

- (b) any adjustment of the amount for any other purpose shall not be treated as refund.
- (viii) any amount received from a person who, at the time of the receipt of the amount, was a director of the company: or a relative of the director of the private company

Provided that the director of the company or relative of the director of the private company, as the case may be from whom money is received, furnished, to the company at the time of giving the money, a declaration in writing to the effect that the amount is not being given out of funds acquired by him by borrowing or accepting loans or deposits from others and the company shall disclose the details of money so accepted in the Board's Reports;

- (ix) any amount raised by the issue of bonds or debentures secured by a first charge or a charge ranking *pari passu* with the first charge on any assets referred to in Schedule III of the Act excluding intangible assets of the company or bonds or debentures compulsorily convertible into shares of the company within five years:

Provided that if such bonds or debentures are secured by the charge of any assets referred to in Schedule III of the Act, excluding intangible assets, the amount of such bonds or debentures shall not exceed the market value of such assets as assessed by a registered valuer;

- (x) any amount received from an employee of the company not exceeding his annual salary under a contract of employment with the company in the nature of non-interest bearing security deposit;
- (xi) any non-interest bearing amount received or held in trust;
- (xii) any amount received in the course of, or for the purposes of, the business of the company,

- (a) as an advance for the supply of goods or provision of services accounted for in any manner whatsoever provided that such advance is appropriated against supply of goods or provision of services within a period of three hundred and sixty five days from the date of acceptance of such advance:

Provided that in case of any advance which is subject matter of any legal proceedings before any court of law, the said time limit of three hundred and sixty five days shall not apply:

- (b) as advance, accounted for in any manner whatsoever, received in connection with consideration for an immovable property under an agreement or arrangement, provided that such advance is adjusted against such property in accordance with the terms of agreement or arrangement;
- (c) as security deposit for the performance of the contract for supply of goods or provision of services;
- (d) as advance received under long term projects for supply of capital goods except those covered under item (b) above:

Provided that if the amount received under items (a), (b) and (d) above becomes refundable (with or without interest) due to the reasons that the company accepting the money does not have necessary permission or approval, wherever required, to deal in the goods or properties or services for which the money is taken, then the amount received shall be deemed to be a deposit under these rules:

Explanation.- For the purposes of this sub-clause the amount referred to in the proviso shall be deemed to be deposits on the expiry of fifteen days from the date they become due for refund.

- (xiii) any amount brought in by the promoters of the company by way of unsecured loan in pursuance of the stipulation of any lending financial institution or a bank subject to fulfillment of the following conditions, namely:
 - (a) the loan is brought in pursuance of the stipulation imposed by the lending institutions on the promoters to contribute such finance;
 - (b) the loan is provided by the promoters themselves or by their relatives or by both; and

III.900 Auditing Pronouncements

- (c) the exemption under this sub-clause shall be available only till the loans of financial institution or bank are repaid and not thereafter;
- (xiv) any amount accepted by a Nidhi company in accordance with the rules made under section 406 of the Act.

Explanation.- For the purposes of this clause, any amount.

- (a) received by the company, whether in the form of instalments or otherwise, from a person with promise or offer to give returns, in cash or in kind, on completion of the period specified in the promise or offer, or earlier, accounted for in any manner whatsoever, or
- (b) any additional contributions, over and above the amount under item (a) above, made by the company as part of such promise or offer, shall be treated as a deposit;
- (d) “depositor” means,
 - (i) any member of the company who has made a deposit with the company in accordance with the provisions of subsection (2) of section 73 of the Act, or
 - (ii) any person who has made a deposit with a public company in accordance with the provisions of section 76 of the Act;
- (e) “eligible company” means a public company as referred to in sub-section (1) of section 76, having a net worth of not less than one hundred crore rupees or a turnover of not less than five hundred crore rupees and which has obtained the prior consent of the company in general meeting by means of a special resolution and also filed the said resolution with the Registrar of Companies before making any invitation to the Public for acceptance of deposits:

Provided that an eligible company, which is accepting deposits within the limits specified under clause (c) of subsection (1) of section 180, may accept deposits by means of an ordinary resolution;
- (f) “fees” means fees as specified in the Companies (Registration Offices and Fees) Rules, 2014;
- (g) “Form” or ‘e-Form” means a form set forth in Annexure to these rules which shall be used for the matter to which it relates;
- (h) “section” means section of the Act;

- (i) "trustee" means the trustee as defined in section 3 of the Indian Trusts Act, 1882 (12 of 1882).
- (2) Words and expressions used in these rules but not defined and defined in the Act or in the Reserve Bank of India Act, 1934 (2 of 1934) or in the Companies (Specification of definitions details) Rules, 2014, shall have the meanings respectively assigned to them in the said Acts or in the said rules.
- 3. Terms and conditions of acceptance of deposits by companies.-** (1) On and from the commencement of these rules,—
 - (a) no company referred to in sub-section (2) of section 73 and no eligible company shall accept or renew any deposit, whether secured or unsecured, which is repayable on demand or upon receiving a notice within a period of less than six months or more than thirty-six months from the date of acceptance or renewal of such deposit:

Provided that a company may, for the purpose of meeting any of its short-term requirements of funds, accept or renew such deposits for repayment earlier than six months from the date of deposit or renewal, as the case may be, subject to the condition that - (a) such deposits shall not exceed ten per cent of the aggregate of the paid up share capital, free reserves and securities premium account of the company, and
 - (b) such deposits are repayable not earlier than three months from the date of such deposits or renewal thereof.
- (2) Where depositors so desire, deposits may be accepted in joint names not exceeding three, with or without any of the clauses, namely, "Jointly", "Either or Survivor", "First named or Survivor", "Anyone or Survivor".
- (3) No company referred to in sub-section (2) of section 73 shall accept or renew any deposit from its members, if the amount of such deposits together with the amount of other deposits outstanding as on the date of acceptance or renewal of such deposits exceeds twenty five per cent. of the aggregate of the paid up share capital, free reserves and securities premium account of the company.
- (4) No eligible company shall accept or renew
 - (a) any deposit from its members, if the amount of such deposit together with the amount of deposits outstanding as on the date of acceptance or renewal of such deposits from members exceeds ten per cent of the aggregate of the

III.902 Auditing Pronouncements

paid up share capital, free reserves and securities premium account of the company;

- (b) any other deposit, if the amount of such deposit together with the amount of such other deposits, other than the deposit referred to in clause (a), outstanding on the date of acceptance or renewal exceeds twenty-five per cent. Of aggregate of the paid up share capital, free reserves and securities premium account of the company.
- (5) No Government company eligible to accept deposits under section 76 shall accept or renew any deposit, if the amount of such deposits together with the amount of other deposits outstanding as on the date of acceptance or renewal exceeds thirty five per cent of the aggregate of its paid up share capital, free reserves and securities premium account of the company.
- (6) No company referred to in sub-section (2) of section 73 or any eligible company shall invite or accept or renew any deposit in any form, carrying a rate of interest or pay brokerage thereon at a rate exceeding the maximum rate of interest or brokerage prescribed by the Reserve Bank of India for acceptance of deposits by non-banking financial companies.

Explanation:- For the purposes of this sub-rule, it is hereby clarified that the person who is authorised, in writing, by a company to solicit deposits on its behalf and through whom deposits are actually procured shall only be entitled to the brokerage and payment of brokerage to any other person for procuring deposits shall be deemed to be in violation of these rules.

- (7) The company shall not reserve to itself either directly or indirectly a right to alter, to the prejudice or disadvantage of the depositor, any of the terms and conditions of the deposit, deposit trust deed and deposit insurance contract after circular or circular in the form of advertisement is issued and deposits are accepted.
- (8) Every eligible company shall obtain, at least once in a year, credit rating for deposits accepted by it in the manner specified herein below and a copy of the rating shall be sent to the registrar of the companies along with the return of the deposits in form DPT-3.

Name of the agency	Minimum investment grade rating
(a) The credit rating information services of India Ltd.	FA- (FA Minus)
(b) ICRA Ltd.	MA- (MA Minus)

(c) Credit Analysis and Research Ltd.	CARE BBB(FD)
(d) Fitch Rating India Private Ltd.	tA(ind)(FD)
(e) Brickwork Rating India Private Ltd.	BWR FBBB]
(f) SME Rating Agency of India Ltd.	SMERAA

4. **Form and particulars of advertisements or circulars.-** (1) Every company referred to in sub-section (2) of section 73 intending to invite deposit from its members shall issue a circular to all its members by registered post with acknowledgement due or speed post or by electronic mode in Form DPT-1:

Provided that in addition to issue of such circular to all members in the manner specified above, the circular may be published in English language in an English newspaper and in vernacular language in a vernacular newspaper having wide circulation in the State in which the registered office of the company is situated.

- (2) Every eligible company intending to invite deposits shall issue a circular in the form of an advertisement in Form DPT-1 for the purpose in English language in an English newspaper and in vernacular language in one vernacular newspaper having wide circulation in the State in which the registered office of the company is situated.
- (3) Every company inviting deposits from the public shall upload a copy of the circular on its website, if any.
- (4) No company shall issue or allow any other person to issue or cause to be issued on its behalf, any circular or a circular in the form of advertisement inviting deposits, unless such circular or circular in the form of advertisement is issued on the authority and in the name of the Board of directors of the company.
- (5) No circular or a circular in the form of advertisement shall be issued by or on behalf of a company unless, not less than thirty days before the date of such issue, there has been delivered to the Registrar for registration a copy thereof signed by a majority of the directors of the company as constituted at the time the Board approved the circular or circular in the form of advertisement, or their agents, duly authorised by them in writing.
- (6) A circular or circular in the form of advertisement issued shall be valid until the expiry of six months from the date of closure of the financial year in which it is issued or until the date on which the financial statement is laid before the company in annual general meeting or, where the annual general meeting for any year has not been held, the latest day on which that meeting should have been held in

III.904 Auditing Pronouncements

accordance with the provisions of the Act, whichever is earlier, and a fresh circular or circular in the form of advertisement shall be issued, in each succeeding financial year, for inviting deposits during that financial year.

Explanation: For the purpose of this rule, the date of the issue of the newspaper in which the advertisement appears shall be taken as the date of issue of the advertisement and the effective date of issue of circular shall be the date of dispatch of the circular.

- 5. Manner and extent of deposit insurance.**- (1) Every company referred to in sub-section (2) of section 73 and every other eligible company inviting deposits shall enter into a contract for providing deposit insurance at least thirty days before the issue of circular or advertisement or at least thirty days before the date of renewal, as the case may be.

"Provided that the companies may accept deposit without deposit insurance contract till the 31st March, 2016 or till the availability of a deposit insurance product, whichever is earlier."

Explanation- For the purposes of this sub-rule, the amount as specified in the deposit insurance contract shall be deemed to be the amount in respect of both principal amount and interest due thereon.

- (2) The deposit insurance contract shall specifically provide that in case the company defaults in repayment of principal amount and interest thereon, the depositor shall be entitled to the repayment of principal amount of deposits and the interest thereon by the insurer up to the aggregate monetary ceiling as specified in the contract:

Provided that in the case of any deposit and interest not exceeding twenty thousand rupees, the deposit insurance contract shall provide for payment of the full amount of the deposit and interest and in the case of any deposit and the interest thereon in excess of twenty thousand rupees, the deposit insurance contract shall provide for payment of an amount not less than twenty thousand rupees for each depositor.

- (3) The amount of insurance premium paid on the insurance of such deposits shall be borne by the company itself and shall not be recovered from the depositors by deducting the same from the principal amount or interest payable thereon.
- (4) If any default is made by the company in complying with the terms and conditions of the deposit insurance contract which makes the insurance cover ineffective, the company shall either rectify the default immediately or enter into a fresh contract within thirty days and in case of non-compliance, the amount of deposits covered under the deposit insurance contract and interest payable thereon shall be repaid within the next fifteen days and if such a company does not repay the amount of

deposits within said fifteen days it shall pay fifteen per cent. interest per annum for the period of delay and shall be treated as having defaulted and shall be liable to be punished in accordance with the provisions of the Act.

- 6. Creation of security.**- (1) For the purposes of providing security, every company referred to in sub-section (2) of section 73 and every eligible company inviting secured deposits shall provide for security by way of a charge on its assets as referred to in Schedule III of the Act excluding intangible assets of the company for the due repayment of the amount of deposit and interest thereon for an amount which shall not be less than the amount remaining unsecured by the deposit insurance:

Provided that in the case of deposits which are secured by the charge on the assets referred to in Schedule III of the Act excluding intangible assets, the amount of such deposits and the interest payable thereon shall not exceed the market value of such assets as assessed by a registered valuer.

Explanation. I – For the purposes of this sub-rule it is clarified that the company shall ensure that the total value of the security either by way of deposit insurance or by way of charge or by both on company's assets shall not be less than the amount of deposits accepted and the interest payable thereon.

Explanation. II- For the purposes of proviso to sub-clause (ix) of clause (c) of sub-rule (1) of rule 2 and this sub-rule, it is hereby clarified that pending notification of sub-section (1) of section 247 of the Act and finalisation of qualifications and experience of valuers, valuation of stocks, shares, debentures, securities etc. shall be conducted by an independent merchant banker who is registered with the Securities and Exchange Board of India or an independent chartered accountant in practice having a minimum experience of ten years.

- (2) The security (not being in the nature of a pledge) for deposits as specified in sub-rule (1) shall be created in favour of a trustee for the depositors on:
- (a) specific movable property of the company, or
 - (b) specific immovable property of the company wherever situated, or any interest therein.

- 7. Appointment of trustee for depositors.**- (1) No company referred to in sub-section (2) of section 73 or any eligible company shall issue a circular or advertisement inviting secured deposits unless the company has appointed one or more trustees for depositors for creating security for the deposits:

III.906 Auditing Pronouncements

Provided that a written consent shall be obtained from the trustee for depositors before their appointment and a statement shall appear in the circular or circular in the form of advertisement with reasonable prominence to the effect that the trustees for depositors have given their consent to the company to be so appointed.

- (2) The company shall execute a deposit trust deed in Form DPT-2 at least seven days before issuing the circular or circular in the form of advertisement.
- (3) No person including a company that is in the business of providing trusteeship services shall be appointed as a trustee for the depositors, if the proposed trustee –
 - (a) is a director, key managerial personnel or any other officer or an employee of the company or of its holding, subsidiary or associate company or a depositor in the company;
 - (b) is indebted to the company, or its subsidiary or its holding or associate company or a subsidiary of such holding company;
 - (c) has any material pecuniary relationship with the company;
 - (d) has entered into any guarantee arrangement in respect of principal debts secured by the deposits or interest thereon;
 - (e) is related to any person specified in clause (a) above.
- (4) No trustee for depositors shall be removed from office after the issue of circular or advertisement and before the expiry of his term except with the consent of all the directors present at a meeting of the board.

Provided that in case the company is required to have independent directors, at least one independent director shall be present in such meeting of the Board

8. Duties of trustees. - It shall be the duty of every trustee for depositors to

- (a) ensure that the assets of the company on which charge is created together with the amount of deposit insurance are sufficient to cover the repayment of the principal amount of secured deposits outstanding and interest accrued thereon;
- (b) satisfy himself that the circular or advertisement inviting deposits does not contain any information which is inconsistent with the terms of the deposit scheme or with the trust deed and is in compliance with the rules and provisions of the Act;
- (c) ensure that the company does not commit any breach of covenants and provisions of the trust deed;

- (d) take such reasonable steps as may be necessary to procure a remedy for any breach of covenants of the trust deed or the terms of invitation of deposits;
 - (e) take steps to call a meeting of the holders of depositors as and when such meeting is required to be held;
 - (f) supervise the implementation of the conditions regarding creation of security for deposits and the terms of deposit insurance;
 - (g) do such acts as are necessary in the event the security becomes enforceable;
 - (h) carry out such acts as are necessary for the protection of the interest of depositors and to resolve their grievances.
- 9. Meeting of depositors.-** The trustee for depositors shall call a meeting of all the depositors on
- (a) requisition in writing signed by at least one-tenth of the depositors in value for the time being outstanding;
 - (b) the happening of any event, which constitutes a default or which, in the opinion of the trustee for depositors, affects the interest of the depositors.
- 10. Form of application for deposits.-** (1) On and from the commencement of these rules, no company shall accept, or renew any deposit, whether secured or unsecured, unless an application, in such form as specified by the company, is submitted by the intending depositor for the acceptance of such deposit.
- (2) The form of application referred to in sub-rule (1) shall contain a declaration by the intending depositor to the effect that the deposit is not being made out of any money borrowed by him from any other person.
- 11. Power to nominate.-** Every depositor may, at any time, nominate any person to whom his deposits shall vest in the event of his death and the provisions of section 72 shall, as far as may be, apply to the nomination made under this rule.
- 12. Furnishing of deposit receipts to depositors.-** (1) Every company shall, on the acceptance or renewal of a deposit, furnish to the depositor or his agent a receipt for the amount received by the company, within a period of twenty one days from the date of receipt of money or realisation of cheque or date of renewal.
- (2) The receipt referred to in sub-rule (1) shall be signed by an officer of the company duly authorised by the Board in this behalf and shall state the date of deposit, the

III.908 Auditing Pronouncements

name and address of the depositor, the amount received by the company as deposit, the rate of interest payable thereon and the date on which the deposit is repayable.

- 13. Maintenance of liquid assets and creation of deposit repayment reserve account.**- Every company referred to in sub-section (2) of section 73 and every eligible company shall on or before the 30th day of April of each year deposit the sum as specified in clause (c) of the said sub-section with any scheduled bank and the amount so deposited shall not be utilised for any purpose other than for the repayment of deposits:

Provided that the amount remaining deposited shall not at any time fall below fifteen per cent. of the amount of deposits maturing, until the end of the current financial year and the next financial year.

- 14. Registers of deposits.**- (1) Every company accepting deposits shall maintain at its registered office one or more separate registers for deposits accepted or renewed, in which there shall be entered separately in the case of each depositor the following particulars, namely:

- (a) name, address and PAN of the depositor/s;
- (b) particulars of guardian, in case of a minor;
- (c) particulars of the nominee;
- (d) deposit receipt number;
- (e) date and the amount of each deposit;
- (f) duration of the deposit and the date on which each deposit is repayable;
- (g) rate of interest or such deposits to be payable to the depositor;
- (h) due date for payment of interest;
- (i) mandate and instructions for payment of interest and for non-deduction of tax at source, if any;
- (j) date or dates on which the payment of interest shall be made;
- (k) details of deposit insurance including extent of deposit insurance;
- (l) particulars of security or charge created for repayment of deposits;
- (m) any other relevant particulars;

- (2) The entries specified in sub-rule (1) shall be made within seven days from the date of issuance of the receipt duly authenticated by a director or secretary of the company or by any other officer authorised by the Board for this purpose.
- (3) The register referred to in sub-rule (1) shall be preserved in good order for a period of not less than eight years from the financial year in which the latest entry is made in the register.

- 15. General provisions regarding premature repayment of deposits.-** Where a company makes a repayment of deposits, on the request of the depositor, after the expiry of a period of six months from the date of such deposit but before the expiry of the period for which such deposit was accepted, the rate of interest payable on such deposit shall be reduced by one per cent from the rate which the company would have paid had the deposit been accepted for the period for which such deposit had actually run and the company shall not pay interest at any rate higher than the rate so reduced :

Provided that nothing contained in this rule shall apply to the repayment of any deposit before the expiry of the period for which such deposit was accepted by the company, if such repayment is made solely for the purpose of—

- (a) complying with the provisions of rule 3; or
- (b) providing war risk or other related benefits to the personnel of the naval, military or air forces or to their families, on an application made by the associations or societies formed by such personnel, during the period of emergency declared under article 352 of the Constitution :

Provided further that where a company referred to in under sub-section (2) of section 73 or any eligible company permits a depositor to renew his deposit, before the expiry of the period for which such deposit was accepted by the company, for availing of a higher rate of interest, the company shall pay interest to such depositor at the higher rate if such deposit is renewed in accordance with the other provisions of these rules and for a period longer than the unexpired period of the deposit.

Explanation: For the purposes of this rule, where the period for which the deposit had run contains any part of a year, then, if such part is less than six months, it shall be excluded and if such part is six months or more, it shall be reckoned as one year.

- 16. Return of deposits to be filed with the Registrar.-** Every company to which these rules apply, shall on or before the 30th day of June, of every year, file with the Registrar, a return in Form DPT-3 along with the fee as provided in Companies (Registration Offices and Fees) Rules, 2014 and furnish the information contained

III.910 Auditing Pronouncements

therein as on the 31st day of March of that year duly audited by the auditor of the company.

17. **Penal rate of interest.**- Every company shall pay a penal rate of interest of eighteen per cent. per annum for the overdue period in case of deposits, whether secured or unsecured, matured and claimed but remaining unpaid.
18. **Power of Central Government to decide certain questions.** If any question arises as to the applicability of these rules to a particular company, such question shall be decided by the Central Government in consultation with the Reserve Bank of India.
19. **Applicability of sections 73 and 74 to eligible companies.**- Pursuant to provisions of sub-section (2) of section 76 of the Act, the provisions of sections 73 and 74 shall, mutatis mutandis, apply to acceptance of deposits from public by eligible companies.

Explanation.- For the purposes of this rule, it is hereby clarified that in case of a company which had accepted or invited public deposits under the relevant provisions of the Companies Act, 1956 and rules made under that Act (hereinafter known as "Earlier Deposits") and has been repaying such deposits and interest thereon in accordance with such provisions, the provisions of clause (b) of sub-section (1) of section 74 of the Act shall be deemed to have been complied with if the company complies with requirements under the Act and these rules and continues to repay such deposits and interest due thereon on due dates for the remaining period of such deposit in accordance with the terms and conditions and period of such Earlier Deposits and in compliance with the requirements under the Act and these rules;

Provided further that the fresh deposits by every eligible company shall have to be in accordance with the provisions of Chapter V of the Act and these rules;

20. **Statement regarding deposits existing as on the date of commencement of the Act.**- For the purposes of clause (a) of sub-section (1) of section 74, the statement shall be in Form DPT-4.
21. **Punishment for contravention.**- If any company referred to in sub-section (2) of section 73 or any eligible company inviting deposits or any other person contravenes any provision of these rules for which no punishment is provided in the Act, the company and every officer of the company who is in default shall be punishable with fine which may extend to five thousand rupees and where the contravention is a continuing one, with a further fine which may extend to five hundred rupees for every day after the first day during which the contravention continues.

Guidance Note on Reporting on Fraud under Section 143(12) of the Companies Act, 2013 (Revised 2016)

OVERVIEW

I. Persons Covered for Reporting on Fraud under Section 143(12) of the Companies Act, 2013

Sub-section 12 of Section 143 of the Companies Act, 2013 (“the 2013 Act” or “the Act”), as amended, states, “Notwithstanding anything contained in this section, if an auditor of a company, in the course of the performance of his duties as auditor, has reason to believe that an offence of fraud involving such amount or amounts as may be prescribed, is being or has been committed in the company by its officers or employees, the auditor shall report the matter to the Central Government within such time and in such manner as may be prescribed:

Provided that in case of fraud involving lesser than the specified amount, the auditor shall report the matter to the audit committee constituted under section 177 or to the Board in other cases within such time and in such manner as may be prescribed:

Provided further that the companies, whose auditors have reported frauds under this sub-section to the audit committee or the Board but not reported to the Central Government, shall disclose the details about such frauds in the Board’s report in such manner as may be prescribed.”¹

The reporting requirement under Section 143(12) is for the statutory auditors of the company and also equally applies to the cost accountant in practice, conducting cost audit under Section 148 of the Act; and to the company secretary in practice, conducting secretarial audit under Section 204 of the Act.

However, **the provisions of Section 143(12) do not apply to other professionals who are rendering other services to the company.** For example, Section 143(12) does not apply to auditors appointed under other statutes for rendering other services such as tax auditor appointed for audit under Income-tax Act; Sales Tax or VAT auditors appointed for audit under the respective Sales Tax or VAT legislations.

It may also be noted that internal auditors covered under Section 138 are not specified as persons who are required to report under Section 143(12).

As per sub-rule (3) of Rule 12 of the Companies (Audit and Auditors) Rules, 2014, **the provisions of sub-section (12) of Section 143 read with Rule 13 of the Companies (Audit and Auditors) Rules, 2014 regarding reporting of frauds by the auditor shall also extend to a branch auditor appointed under Section 139 to the extent it relates to the concerned branch.**

It may be noted that **Section 143(12) includes only fraud by officers or employees of the company and does not include fraud by third parties such as vendors and customers.**

¹ The amendments to Section 143(12) have come into force on December 14, 2015.

III.912 Auditing Pronouncements

II. Thresholds and Manner of Reporting

The Companies (Audit and Auditors) Amendment Rules, 2015, issued by the Ministry of Corporate Affairs, on 14th December 2015, amended Rule 13 of the Companies (Audit and Auditors) Rules, 2014. The amended Rule 13 has introduced the thresholds for the purpose of reporting on frauds and a differential reporting responsibilities of the statutory auditor with respect to the fraud/s above or below the notified threshold.

As per the amended Rule 13, if an auditor of a company, in the course of performance of his duties as statutory auditor, has reason to believe that an offence of fraud, which involves or is expected to involve individually an amount of rupees one crore or above, is being or has been committed against the company by its officers or employees, the auditor shall report the matter to the Central Government.

The amended Rule 13 provides the following manner of reporting to the Central Government:

- (a) the auditor shall report to the Board or the Audit Committee, as the case may be, immediately but not later than two days of his knowledge of the fraud, seeking their reply or observations within forty-five days;
- (b) on receipt of such reply or observations the auditor shall forward his report and the reply or observations of the Board or the Audit Committee along with his comments (on such reply or observations of the Board or the Audit Committee) to the Central Government within fifteen days from the date of receipt of such reply or observations;
- (c) in case the auditor fails to get any reply or observations from the Board or the Audit Committee within the stipulated period of forty-five days, he shall forward his report to the Central Government along with a note containing the details of his report that was earlier forwarded to the Board or the Audit Committee for which he has not received any reply or observations;
- (d) The report shall be sent to the Secretary, Ministry of Corporate Affairs in a sealed cover by Registered Post with Acknowledgement Due or by Speed post followed by an e-mail in confirmation of the same.
- (e) The report shall be on the letter-head of the auditor containing postal address, e-mail address and contact telephone number or mobile number and be signed by the auditor with his seal and shall indicate his Membership Number; and
- (f) The report shall be in the form of a statement as specified in Form **ADT-4**.

In case of a fraud involving lesser than rupees one crore, the auditor shall report the matter to Audit Committee constituted under section 177 or to the Board immediately but not later than two days of his knowledge of the fraud and he shall report the matter specifying the following:-

- a) Nature of Fraud with description;
- b) Approximate amount involved; and
- c) Parties involved.

The following details of each of the fraud reported to the Audit Committee or the Board under sub-rule (3) of amended Rule 13 during the year shall be disclosed in the Board's Report:-

- a) Nature of Fraud with description;
- b) Approximate Amount involved;
- c) Parties involved, if remedial action not taken; and
- d) Remedial action taken.

III. Auditors' Responsibility for Consideration of Fraud in an Audit of Financial Statements

Section 143(12) requires an auditor to report on fraud if ***in the course of performance of his duties as an auditor***, the auditor has reason to believe that an offence of fraud is being or has been committed in the company by its officers or employees.

It may be noted that under section 143(9) read with Section 143(10), the duty of the auditor, *inter alia*, in an audit is to comply with the Standards on Auditing (SAs). Further, Section 143(2) requires the auditor to make out his report after taking into account, *inter alia*, the auditing standards. Accordingly, the term, "in the course of performance of his duties as an auditor" implies in the course of performing an audit as per the SAs.

The definition of fraud as per SA 240 and the explanation of fraud as per Section 447 of the 2013 Act are similar, except that ***under Section 447, fraud includes 'acts with an intent to injure the interests of the company or its shareholders or its creditors or any other person, whether or not there is any wrongful gain or wrongful loss.'***

However, an auditor may not be able to detect acts that have intent to injure the interests of the company or cause wrongful gain or wrongful loss, unless the financial effects of such acts are reflected in the books of account/financial statements of the company. For example,

- an auditor may not be able to detect if an employee is receiving pay-offs for favoring a specific vendor, which is a fraudulent act, since such pay-offs would not be recorded in the books of account of the company;
- if the password of a key managerial personnel is stolen and misused to access confidential/restricted information, the effect of the same may not be determinable by the management or by the auditor;
- if an employee is alleged to be carrying on business parallel to the company's business and has been diverting customer orders to his company, the auditor may not be able to detect the same since such sales transactions are not recorded in the books of the company.

Therefore, ***the auditor shall consider the requirements of the SAs, insofar as it relates to the risk of fraud, including the definition of fraud as stated in SA 240, in planning and performing his audit procedures in an audit of financial statements to address the risk of material misstatement due to fraud.***

IV. Reporting on Suspected Offence Involving Frauds Identified/Noted during Audit/Limited Review of Interim period Financial Statements/Results, Other Attest Services and Permitted Non-attest Services

III.914 Auditing Pronouncements

Section 143 of the 2013 Act was notified and is effective from April 1, 2014. Whilst Section 143 deals with auditor's duties and responsibilities under the Act with respect to financial statements prepared under the Act, the auditors perform other attest services in their capacity as auditors of the company. For example, (a) Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements), Regulations 2015 requires the statutory auditor to perform limited review/audit of the quarterly financial results published by the listed companies; (b) the auditor may also be engaged by the Board of directors of the company to carry out the audit of interim financial statements prepared by the management as per Accounting Standard 25 and report on such interim financial statements to the Board of Directors; (c) the auditor may also perform tax audit under the Income-tax Act, 1961; or (d) the auditor may be engaged to issue certificates, etc.

In the case of the aforesaid attest services for financial years beginning on or after 1st April, 2014, the following needs to be considered:

- (a) Such attest services may not be pursuant to any requirement of the 2013 Act. They may rather be rendered to meet the specific requirements of the company (such as complying with the Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements), Regulations 2015, to meet the requirements of the Board of Directors of the company, etc.).
- (b) Wherever a statute or regulation requires such attest services to be performed by the auditor of the company, the auditor should consider the requirements and provisions of Section 143(12) since any such work carried out by the auditor during such attest services could be construed as being in the course of performing his duties as an auditor, albeit not under the Companies Act, 2013.
- (c) The objective and scope of such attest services and the procedures performed by the auditor may not be of the same extent and level as in the case of the audit of the financial statements prepared under the 2013 Act. For example, the quarterly results under Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements), Regulations 2015 may be subject to a limited review performed in accordance with the Standards on Review Engagements and hence would not have been performed in accordance with the SAs.

Auditors could be engaged to provide non-attest services that are not prohibited under Section 144 of the Act. It is possible that the auditor, when providing such non-attest services may become aware of a fraud that is being or has been committed in the company by its officers or employees.

A question that arises is – should the auditor report under Section 143(12) on frauds noted in the course of providing such other attest or non-attest services?

If an offence of fraud in the company by its officers or employees that is identified/noted by the auditor in the course of providing such attest or non-attest services as referred above, is of such amount/s as specified in Rule 13 of the Companies (Audit and Auditors) Rules, 2014 {as amended by the Companies (Audit and Auditors) Amendment Rules, 2015} which the auditor uses or intends to use the information that is obtained in the course of performing such attest or non-attest services when performing the audit under the 2013 Act,

then in such cases, the matter may become reportable under Section 143(12), read with the Rules thereunder, as specified in this Guidance Note.

V. Reporting on Frauds Detected by the Management or Other Persons and already Reported under Section 143(12) by Such Other Person

Paragraph 4 of SA 240 states and clarifies that the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management. In the context of the 2013 Act, this position is reiterated in Section 134(5) which states that the Board report shall include a responsibility statement, *inter alia*, that the directors had taken proper and sufficient care for safeguarding the assets of the company and for preventing and detecting fraud and other irregularities. ***Based on the above, it may be considered that Section 143(12) envisages the auditor to report to the Audit Committee under section 177 of the Companies Act, 2013 or to the Board of Directors and thereafter, where applicable, to the Central Government an offence of fraud in the company by its officers or employees only if he is the first person to identify/note such instance in the course of performance of his duties as an auditor.***

Accordingly, in case a fraud has already been reported or has been identified/detected by the management or through the company's vigil/whistle blower mechanism and has been/is being remediated/dealt with by them and such case is informed to the auditor, he will not be required to report the same under Section 143(12) since he has not per se identified the fraud.

The auditor should apply professional skepticism to evaluate/verify that the fraud was indeed identified/detected in all aspects by the management or through the company's vigil/whistle blower mechanism so that distinction can be clearly made with respect to frauds identified/detected due to matters raised by the auditor vis-à-vis those identified/detected by the company through its internal control mechanism.

Since reporting on fraud under Section 143(12) is required even by the cost auditor and the secretarial auditor of the company, it is possible that a suspected offence involving fraud may have been reported by them even before the auditor became aware of the fraud. Here too, ***if a suspected offence of fraud has already been reported under Section 143(12) by such other person, and the auditor becomes aware of such suspected offence involving fraud, he need not report the same to the Audit Committee under section 177 of the Companies Act 2013 or the Board of Directors and thereafter, where applicable, to the Central Government under the section since he has not per se identified the suspected offence of fraud.***

However, in case of a fraud which involves or is expected to involve individually, an amount of rupees one crore or more, the auditor should review the steps taken by the management/those charged with governance with respect to the reported instance of suspected offence of fraud stated above, and if he is not satisfied with such steps, he should state the reasons for his dissatisfaction in writing and request the management/those charged with governance to perform additional procedures to enable the auditor to satisfy himself that the matter has been appropriately addressed. If the management/those charged with governance fail to undertake appropriate additional

procedures within 45 days of his request, the auditor would need to evaluate if he should report the matter to the Central Government in accordance with Rule 13 of the Companies (Audit and Auditors) Amendment Rules, 2015.

VI. Reporting on Suspected Offence Involving Fraud in case of Consolidated Financial Statements

As per Section 129(4) of the 2013 Act, the provisions relating to audit of the standalone financial statements of the holding company shall also apply to the audit of the consolidated financial statements. Since the audit of the consolidated financial statements has also been made one of the duties of the auditor, a question that arises is – should the auditor report on suspected offence involving frauds that may have taken place in any of the subsidiaries, joint ventures, associates of the company?

Reporting under Section 143(12) arises only if a suspected offence of fraud is being or has been committed in the company by its officers or employees.

Accordingly, the auditor of the parent company is not required to report on frauds under Section 143(12) if they are not being or have not been committed in the parent company by the officers or employees of the parent company but relate to frauds in:

- a) ***A component that is an Indian company, since the auditor of that Indian company is required to report on suspected offence involving frauds under Section 143 (12) in respect of such company; and***
- b) ***A foreign corporate component or a component that is not a company since the component auditors' of such components are not covered under Section 143(12).***

However, the auditor of the parent company in India will be required to report on suspected offence involving frauds in the components of the parent company, if the suspected offence of fraud in the component is being or has been committed by employees or officers of the parent company and if such suspected offence involving fraud in the component is against the parent company, if:

- a) ***the principal auditor identifies/detects such suspected offence involving fraud in the component "in the course of the performance of his duties as an auditor" of the consolidated financial statements; or***
- b) ***the principal auditor is directly informed of such a suspected offence involving fraud in the component by the component auditor and the management had not identified/is not aware of such suspected offence involving fraud in the component; or***
- c) ***a component that is not a company since the component auditors of such components are not covered under Section 143(12).***

VII. Reporting under Section 143(12) when the Suspected Offence Involving Fraud relates to periods prior to coming into effect of the 2013 Act

Requirements similar to Section 143(12) of the 2013 Act were not prescribed in the 1956 Act. Even the reporting under the Companies (Auditor's Report) Order, 2003 (CARO) only required the auditors to report to the members on any fraud on or by the company that had been noticed or reported during the year.

As such, auditors would not have reported on frauds as envisaged under Section 143(12) in those periods prior to coming into effect of the 2013 Act. Accordingly, ***in case of fraud relating to earlier years to which the Companies Act, 1956 was applicable, reporting under Section 143(12) will arise only if the suspected offence of fraud is identified by the auditor in the course of performance of his duties as an auditor during the financial years beginning on or after April 1, 2014 and to the extent that the same was not dealt with in the prior financial years either in the financial statements or in the audit report or in the Board's report under the Companies Act, 1956.***

VIII. When does an Auditor Commence Reporting under Section 143(12) – Based on Suspicion - Reason to Believe – Knowledge – or on Determination of Offence?

Section 143(12) states that an auditor should report under the Section if he has "reason to believe" that an offence of fraud has or is being committed in the company by its officers or employees. Rule 13 of the Companies (Audit and Auditors) Amendment Rules, 2015 specifies the threshold for reporting as "reason to believe" and "knowledge". The Form ADT – 4 in which the auditor is required to report to the Central Government uses the term "suspected offence involving fraud".

It is important to understand the terms "reason to believe", "knowledge" and "suspected offence involving fraud" to determine the point of time when the reporting requirement is triggered for an auditor under Section 143(12) read with Rule 13 of the Companies (Audit and Auditors) Amendment Rules, 2015.

- 'Suspicion' is a state of mind more definite than speculation, but falls short of knowledge based on evidence. It must be based on some evidence, even if that evidence is tentative – simple speculation that a person may be engaged in fraud is not sufficient grounds to form a suspicion. Suspicion is a slight opinion but without sufficient evidence.
- For 'reason to believe' to come into existence, it cannot be based on suspicion. There needs to be sufficient information or convincing evidence to advance beyond suspicion that it is possible someone is committing or has committed a fraud. For example, identification of fraud risk factors in itself cannot cause 'reason to believe' that a fraud exists.
- The term 'reason to believe' creates an objective test. SA 240, "The Auditor's Responsibilities Relating to Frauds in an Audit of Financial Statements" specifies the requirements to be complied by the auditors in assessing and responding to the risk of fraud in an audit of financial statements. For example, when complying with the requirements of SA 240, an auditor might be considered to have reasons to believe that a fraud has been or is being committed if he had actual knowledge of, or possessed information which would indicate to a reasonable person, that another person was committing or had committed a fraud.

III.918 Auditing Pronouncements

- The term 'reason to believe' which has been used in the SAs indicate that it arises when:
 - Evaluating audit evidence and information provided; or
 - Evaluating misstatements, including deviations noted on audit sampling and further audit procedures carried out; or
 - Exercising professional skepticism.
- **Rule 13 of the Companies (Audit and Auditors) Amendment Rules, 2015 has used the terms 'reason to believe' and 'knowledge' (of fraud). The condition of 'reason to believe' would be met if on evaluation of all the available information with the auditor and applying appropriate level of skepticism the auditor concludes that a fraud is being or has been committed on the company.**
- **Having 'knowledge' means knowing 'that' something. In the case of reporting on fraud under Section 143(12), it occurs when the auditor has sufficient reason to believe that a fraud has been or is being committed on the company by its officers or employees. This implies that there exists a fraud.**
- Whilst Section 143(12) uses the term 'offence of fraud' and the Form ADT – 4 uses the term "suspected offence involving fraud". **As per paragraph 3 of SA 240, although the auditor may suspect or, in rare cases, identify the occurrence of fraud, the auditor does not make legal determination of whether fraud has actually occurred.** Determination of "offence" is legal determination and accordingly, the auditor will not be able to legally determine that an "offence or suspected offence involving fraud" has been or is being committed against the company by its officers or employees.

Accordingly, **based on a harmonious reading of Section 143(12), Rule 13 of the Companies (Audit and Auditors) Amendment Rules, 2015 and Form ADT - 4, reporting on fraud in the course of performance of duties as auditor, is applicable only when the auditor has reason to believe and has knowledge that a fraud has occurred or is occurring i.e., when the auditor has evidence that a fraud exists.**

IX. Can the Auditor apply the Concept of Materiality for Reporting on Fraud?

The concept of materiality is fundamental for setting up an appropriate system of internal control, preparation of financial statements and its audit. Due to its inherent limitations, internal control systems cannot provide absolute assurance that no fraud or error has taken place. Since the auditor is required to comply with the SAs in performance of duties as an auditor, the audit will be performed applying the concept of materiality provided in the SAs.

Section 143(9) requires the auditor to comply with the SAs, which, *inter alia*, includes consideration of materiality, applying materiality in evaluating misstatements and disposition of the same.

The auditor should continue to apply the concept of materiality in performing the audit in accordance with SA 320 "Materiality in Planning and Performing an Audit".

Fraud results in misstatement of financial statements. The SAs outline the procedures to be performed by an auditor in case a misstatement due to fraud is identified by the auditor. For example, paragraph A52 of SA 240 states that in evaluating and disposing the misstatements

identified, the auditor should consider the requirements of SA 450 "Evaluation of Misstatements Identified during the Audit".

SA 450 considers the concept of materiality in classifying the manner of disposition of misstatements, including those arising from fraud. Misstatements arising from fraud, will need to be communicated to the management and/or those charged with governance as required under paragraphs A21 to A23 of SA 450 and also reported to the Central Government in accordance with the requirements specified in Rule 13 of the Companies (Audit and Auditors) Rules, 2014, as amended, in case the amount involved or expected to involve is individually Rupees One Crore or more.

Materiality is applicable wherever the amount is quantifiable. Where the amount is not quantifiable, the auditor should apply professional judgement to estimate the likelihood of the amount exceeding the aforesaid limit of Rupees One Crore prescribed for reporting to the Central Government. For this purpose it can be based on management estimate or reasonable range of estimate made by the auditor. Subsequent reporting may be required if the amount initially estimated was lower than the aforesaid limit but was eventually determined to be higher than such limit. Under these circumstances, the timeline for reporting under Rule 13 of the Companies (Audit and Auditors) Rules, 2014, as amended by the Companies (Audit and Auditors) Amendment Rules, 2015, will commence when the amount involved is determined to be in excess of such limit.

X. Should the Auditor Report under Section 143(12) in case of Corruption, Bribery, Money Laundering and Non-compliance with other Laws and Regulations

In case of corruption, bribery and money laundering, the direct effect of such act (benefit or penal consequence) is on the company.

The auditor should comply with the relevant SAs with regard to illegal acts (e.g. SA 240 and SA 250, "Consideration of Laws and Regulations in an Audit of Financial Statements") when performing the audit. If the auditor, in the course of performance of his/her duties as the auditor, comes across instances of corruption, bribery and money laundering and other intentional non-compliances with laws and regulations, the auditor would need to evaluate the impact of the same in accordance with SA 250 to determine whether the same would have a material effect on the financial statements.

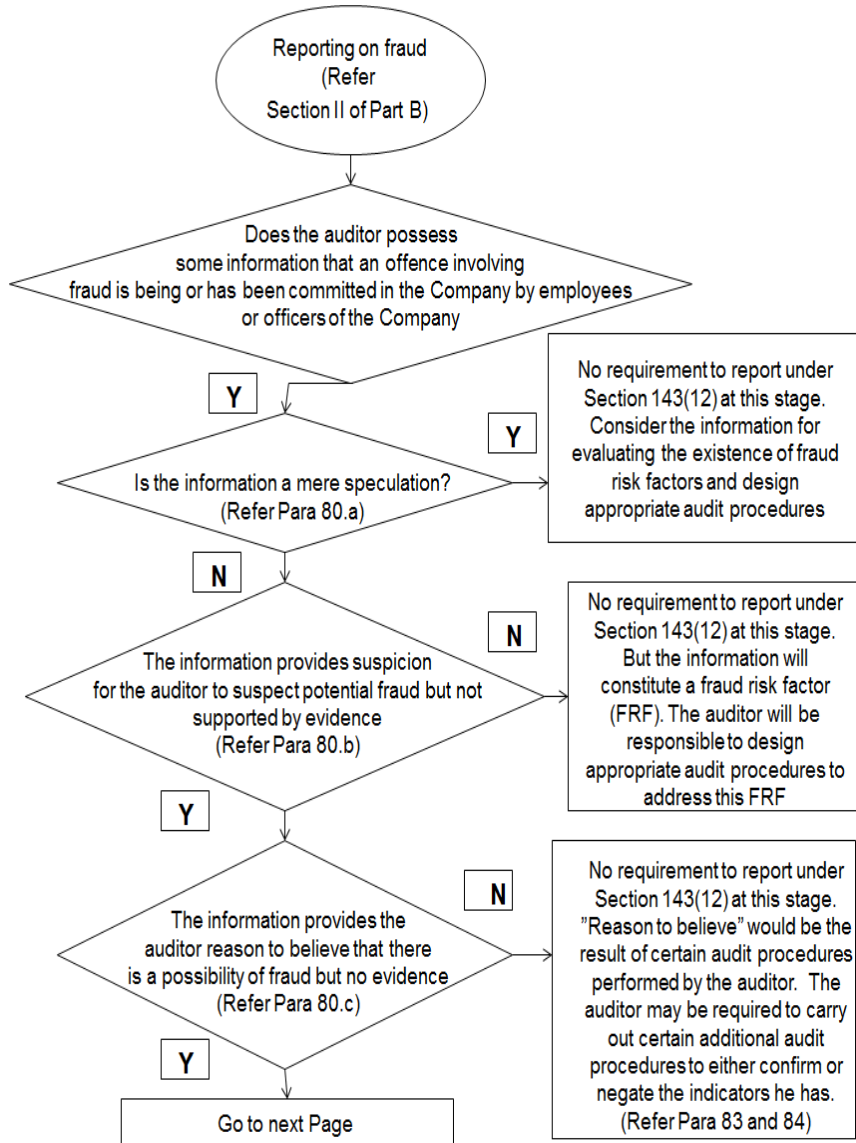

With respect to reporting under Section 143(12), consequent to corruption, bribery, money laundering and other intentional non-compliance with other laws and regulations, the auditor should consider whether such acts have been carried out by officers or employees of the company for the purpose of reporting and also take into account the requirements of SA 250, particularly paragraph 28 of SA 250 read with paragraphs A19 and A20.

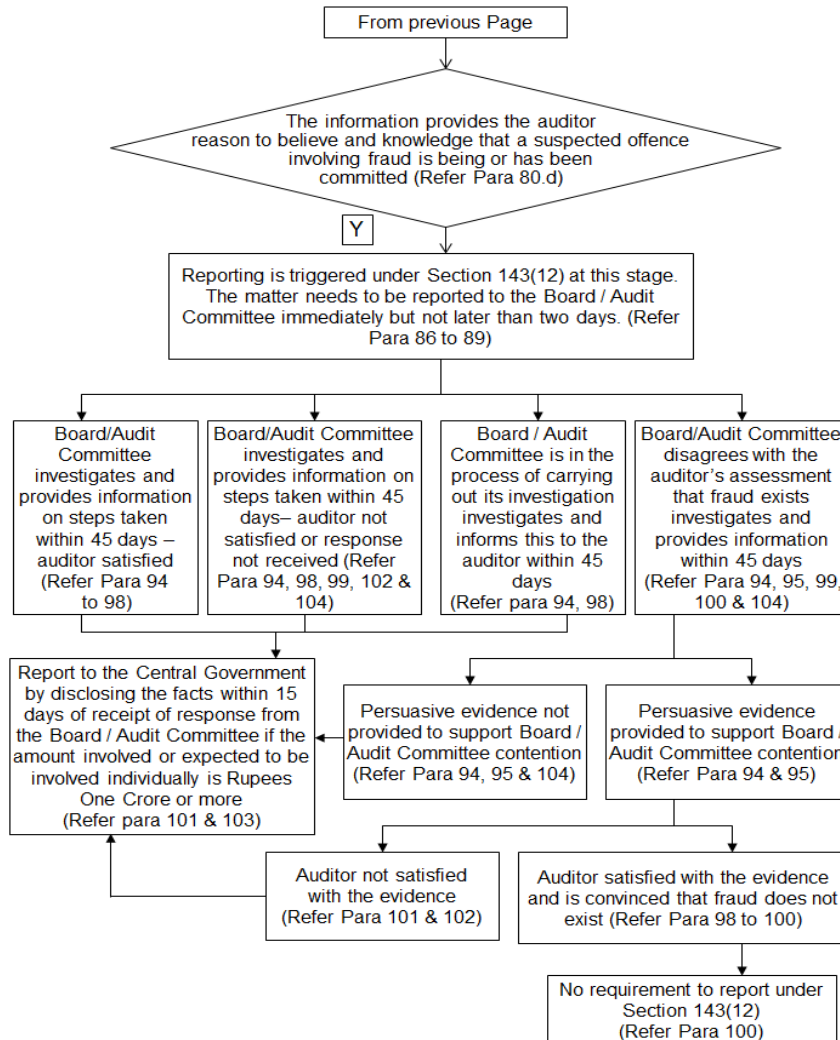

For example, if the auditor comes to know that the company has filed a fraudulent return of income to evade income tax, he may have to report this fraud under Section 143(12) irrespective of whether adequate provision has been made in the books of accounts or not.

It may be noted that the proviso to Section 147(2) in the context of punishment to auditors for contravention with the provisions, inter alia, of Section 143 of the 2013 Act, states, "if an auditor has contravened such provisions knowingly or willfully with the intention to deceive the company or its shareholders or creditors or tax authorities, he shall be punishable with

imprisonment for a term which may extend to one year and with fine which shall not be less than one lakh rupees but which may extend to twenty-five lakh rupees.”

XI. Reporting on Fraud under Section 143(12) – Decision Tree/Flow Chart

SECTION I: INTRODUCTION

1. Fraud has the capacity to undermine the confidence of stakeholders in an organisation and there is a strong nexus between prevention of fraud and good corporate governance.
2. Consideration of fraud in financial reporting and the auditor's responsibility on reporting on fraud has always been an integral part of an audit of financial statements carried out in accordance with the Standards on Auditing. Misstatements in the financial statements can arise from either fraud or error and the distinguishing factor between the two is whether the underlying action that results in the misstatement of the financial statements is intentional or unintentional. **The auditor is**

required to consider fraud as a risk that could cause a material misstatement in the financial statements and plan and perform such procedures that mitigate the risk of material misstatement due to fraud. These requirements are specified in Standard on Auditing (SA) 240, "The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements".

Requirements for Reporting on Fraud under the Companies Act, 2013

3. Section 143(12) of the Companies Act, 2013 ('the 2013 Act' or 'the Act'), as amended, states that "Notwithstanding anything contained in this section, if an auditor of a company, in the course of the performance of his duties as auditor, has reason to believe that an offence of fraud involving such amount or amounts as may be prescribed, is being or has been committed in the company by its officers or employees, the auditor shall report the matter to the Central Government within such time and in such manner as may be prescribed:

Provided that in case of fraud involving lesser than the specified amount, the auditor shall report the matter to the audit committee constituted under section 177 or to the Board in other cases within such time and in such manner as may be prescribed:

Provided further that the companies, whose auditors have reported frauds under this sub-section to the audit committee or the Board but not reported to the Central Government, shall disclose the details about such frauds in the Board's report in such manner as may be prescribed."²

Rule 13 of the Companies (Audit and Auditors) Rules, 2014, as amended by the Companies (Audit and Auditors) Amendment Rules, 2015 specifies the manner in which the auditor is required to report on fraud to the Central Government and Form ADT 4 to these Rules (Refer **Appendix 6**) provides the format and information to be included in such report.

4. ***In terms of provisions of Section 143(14) of the 2013 Act, the reporting requirement under Section 143(12) is for auditors of the company and also equally applies to the cost accountant in practice conducting cost audit under Section 148 of the Act; as well as the company secretary in practice conducting secretarial audit under Section 204 of the Act. However, the provisions of Section 143(12) do not apply to other professionals who are rendering other services to the company. Further, Section 143(12) also does not apply to auditors appointed under other statutes for rendering services such as Tax Audit under the Income-tax Act, 1961; Sales Tax audit or VAT audit.***

It may be noted that internal auditors covered under Section 138 are not specified as persons who are required to report under Section 143(12.)

5. ***Section 143(12) includes only fraud by officers or employees of the company and does not include fraud by third parties such as vendors and customers.***

Suspected fraud by vendors, customers and other third parties should be dealt with in accordance with SA 240.

² The amendments to Section 143(12) have come into force on December 14, 2015.

Section 2(59) of the 2013 Act, defines the term “officer” to include any director, manager or key managerial personnel or any person in accordance with whose directions or instructions the Board of Directors or any one or more of the directors is or are accustomed to act.

The 2013 Act does not define the term “employees”. However, in common parlance, the term “employees” implies those persons who are on the payroll of the company. **Employees would, therefore, not include those persons who are engaged on a contract basis e.g. security, house-keeping, canteen staff, who work in the company premises on behalf of a contractor who has been given the contract to provide such services to the company. In this instance, the contract workers will be considered as vendors and not employees.**

6. This Guidance Note aims to provide guidance to the auditors on matters that may arise pursuant to the reporting requirements on fraud under Section 143(12) of the Act. Section 143(12) specifically states that the auditor should report to the Audit Committee under section 177 of the Companies Act, 2013 or the Board of Directors and, where applicable, to the Central Government if he has reason to believe that an offence of fraud is being or has been committed in the company by its officers or employees if the auditor has noted it “in the course of the performance of his duties as auditor”. Accordingly, the Guidance Note should be read in conjunction with the Standards on Auditing (SAs), issued by the Institute of Chartered Accountants of India (ICAI) since Section 143(9) of the 2013 Act read with Section 143(10) casts a duty and responsibility on the auditor to comply with the SAs.

7. Reporting by the auditor on fraud is not a new concept in India. Such reporting exists under the SAs, the Companies Act, 1956, RBI Regulations, etc. The guidance provided by the ICAI in these contexts continues to be relevant and applicable even in the case of reporting by the auditor on fraud under Section 143(12) of the 2013 Act.

8. **The requirements for reporting by auditors under Section 143(12) would apply even if the fraud is required to be/has been reported under any other statute or to any other Regulator.** For example, in case of a fraud identified in a Bank, the auditor of the Bank should report the fraud to the RBI as per the requirements of the RBI Regulations on audit of Banks (Refer paragraph 11 below). If the Bank is a company and is governed by the provisions of the 2013 Act, in addition to the reporting to the RBI, the auditor may also be required to report the offence involving fraud to the Central Government if such instance is covered under Section 143(12) of the 2013 Act, as specified in this Guidance Note.

9. Consideration of Fraud in an Audit of Financial Statements as required by Standards on Auditing

Various SAs state the requirements for the auditor to consider the risk of fraud in an audit of financial statements and the manner of dealing with the same:

a. SA 240, *inter alia*, states the following:

Paragraph 5 - ‘An auditor conducting an audit in accordance with SAs is responsible for obtaining reasonable assurance that the financial statements taken as a whole are free

III.924 Auditing Pronouncements

from material misstatement, whether caused by fraud or error. Owing to the inherent limitations of an audit, there is an unavoidable risk that some material misstatements of the financial statements may not be detected, even though the audit is properly planned and performed in accordance with the SAs.'

Paragraph 40 - 'If the auditor has identified a fraud or has obtained information that indicates that a fraud may exist, the auditor shall communicate these matters on a timely basis to the appropriate level of management in order to inform those with primary responsibility for the prevention and detection of fraud of matters relevant to their responsibilities'.

Paragraph 43 - 'If the auditor has identified or suspects a fraud, the auditor shall determine whether there is a responsibility to report the occurrence or suspicion to a party outside the entity. Although the auditor's professional duty to maintain the confidentiality of client information may preclude such reporting, the auditor's legal responsibilities may override the duty of confidentiality in some circumstances'.

Paragraph A66 - 'In some clients, requirements for reporting fraud, whether or not discovered through the audit process, may be subject to specific provisions of the audit mandate or related legislation or regulation'.

- b. Paragraphs 22 and 23 of SA 250 – "Consideration of Laws and Regulations in an Audit of Financial Statements", requires the auditor, *inter alia*, to communicate to those charged with governance (the Audit Committee/Board of Directors) when there is a non – compliance with laws and regulations, that come to the auditor's attention during the course of the audit, which he/she believes is intentional and material, without delay.
- c. Paragraph 27 of SA 315 – "Identifying and Assessing the Risks of Material Misstatement through Understanding the Entity and its Environment", requires the auditor to consider the risk of fraud in determining which risks are significant risks.

10. Reporting on Fraud under Section 227 (4A) of the Companies Act, 1956 as per the Companies (Auditor's Report) Order, 2003 ('CARO')

(Note: The following guidance is included here only to briefly explain the erstwhile reporting requirements of the statutory auditor relating to fraud for a better understanding of and comparison with the current reporting requirements).

Clause 4 (xxi) of CARO required the auditor to report whether any fraud on or by the company has been noticed or reported during the year. If yes, the nature and the amount involved is to be indicated. The Statement on the Companies (Auditor's Report) Order, 2003 ('the Statement') issued by the ICAI specified the responsibilities of the auditor when reporting under clause 4(xxi) of CARO. As per the Statement:

- a. Clause 4(xxi) does not require the auditor to discover the frauds on the company and by the company. The scope of auditor's inquiry under this clause is restricted to frauds 'noticed or reported' during the year. The use of the words "noticed or reported" indicates that the management of the company should have the knowledge about the frauds on the company or by the company that have occurred during the period covered by the auditor's report. It may be noted that this clause of the Order, by requiring the auditor to report

whether any fraud on or by the company has been noticed or reported, does not relieve the auditor from his responsibility to consider fraud and error in an audit of financial statements. In other words, irrespective of the auditor's comments under this clause, the auditor is also required to comply with the requirements of Standard on Auditing (SA) 240, "The Auditor's Responsibility to Consider Fraud and Error in an Audit of Financial Statements".

- b. Although fraud is a broad legal concept, the auditor is concerned with fraudulent acts that cause a material misstatement in the financial statements. Misstatement of the financial statements may not be the objective of some frauds. Auditors do not make legal determinations of whether fraud has actually occurred. Fraud involving one or more members of management or those charged with governance is referred to as "management fraud"; fraud involving only employees of the entity is referred to as "employee fraud". In either case, there may be collusion with third parties outside the entity. In fact, generally speaking, the "management fraud" can be construed as "fraud by the company" while fraud committed by the employees or third parties may be termed as "fraud on the company".
- c. Two types of intentional misstatements are relevant to the auditor's consideration of fraud—misstatements resulting from fraudulent financial reporting and misstatements resulting from misappropriation of assets.
- d. Fraudulent financial reporting involves intentional misstatements or omissions of amounts or disclosures in financial statements to deceive financial statement users. Fraudulent financial reporting may involve:
 - Deception such as manipulation, falsification, or alteration of accounting records or supporting documents from which the financial statements are prepared.
 - Misrepresentation in, or intentional omission from, the financial statements of events, transactions or other significant information.
 - Intentional misapplication of accounting principles relating to measurement, recognition, classification, presentation, or disclosure.
- e. Misappropriation of assets involves the theft of an entity's assets. Misappropriation of assets can be accomplished in a variety of ways (including embezzling receipts, stealing physical or intangible assets, or causing an entity to pay for goods and services not received); it is often accompanied by false or misleading records or documents in order to conceal the fact that the assets are missing.
- f. Fraudulent financial reporting may be committed by the company because management is under pressure, from sources outside or inside the entity, to achieve an expected (and perhaps unrealistic) earnings target particularly when the consequences to management

* Now known as SA 240, "The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements"

of failing to meet financial goals can be significant. The auditor must appreciate that a perceived opportunity for fraudulent financial reporting or misappropriation of assets may exist when an individual believes internal control could be circumvented, for example, because the individual is in a position of trust or has knowledge of specific weaknesses in the internal control system.

- g. While planning the audit, the auditor should discuss with other members of the audit team, the susceptibility of the company to material misstatements in the financial statements resulting from fraud. While planning, the auditor should also make inquiries of management to determine whether management is aware of any known fraud or suspected fraud that the company is investigating.
- h. The auditor should examine the reports of the internal auditor with a view to ascertain whether any fraud has been reported or noticed by the management. The auditor should examine the minutes of the audit committee, if available, to ascertain whether any instance of fraud pertaining to the company has been reported and actions taken thereon. The auditor should enquire of the management about any frauds on or by the company that it has noticed or that have been reported to it. The auditor should also discuss the matter with other employees of the company. The auditor should also examine the minutes book of the Board meeting of the company in this regard.
- i. The auditor should obtain written representations from the management, stating, *inter alia*, (i) it acknowledges its responsibility for the implementation and operation of accounting and internal control systems that are designed to prevent and detect fraud and error; (ii) it has disclosed to the auditor all significant facts relating to any frauds or suspected frauds known to management that may have affected the entity; and (iii) it has disclosed to the auditor the results of its assessment of the risk that the financial statements may be materially misstated as a result of fraud.
- j. Because management is responsible for adjusting the financial statements to correct material misstatements, it is important that the auditor obtains written representation from management that any uncorrected misstatements resulting from fraud are, in management's opinion, immaterial, both individually and in the aggregate.

11. Reporting to RBI in case of Fraud noted in Audit of Banks

The RBI issued Circular No. DBS.FGV.(F).No. BC/23.08.001/2001-02 dated May 3, 2002 relating to implementation of recommendations of the Committee on Legal Aspects of Bank Frauds (Mitra Committee) and the recommendations of the High Level Group set-up by the Central Vigilance Commission applicable to all scheduled commercial banks (excluding RRBs). Regarding responsibility and liability of accounting and auditing professionals, the said Circular provides as under:

“If an accounting professional, whether in the course of internal or external audit or in the process of institutional audit finds anything susceptible to be fraud or fraudulent activity or act of excess

power or smell any foul play in any transaction, he should refer the matter to the regulator. Any deliberate failure on the part of the auditor should render himself liable for action”.

Paragraphs 2.32 to 2.38 of Chapter 2 of Part I of the Guidance Note on Audit of Banks 2016 edition provides guidance to the auditors with respect to fraud noted in an audit of Banks and, *inter alia*, states as follows.

- a. As per the above requirement, the member shall be required to report the kind of matters stated in the circular to the regulator, i.e., RBI. In this regard, attention of the members is also invited to Clause 1 of Part I of the Second Schedule to the Chartered Accountants Act, 1949, which states that “A chartered accountant in practice shall be deemed guilty of professional misconduct, if he discloses information acquired in the course of his professional engagement to any person other than his client, without the consent of his client or otherwise than as required by any law for the time being in force.”
- b. Under the said provision, if a member of the Institute *suo moto* discloses any information regarding any actual or possible fraud or foul play to the RBI, the member would be liable for disciplinary action by the Institute. However, a member is not held guilty under the said clause if the client explicitly permits the auditor to disclose the information to a third party. If the above-mentioned requirement of the Circular is included in the letter of appointment (which constitutes the terms of audit engagement) then it would amount to the explicit permission by the concerned bank (client) to disclose information to the third party, i.e., the RBI.
- c. Thus, auditors while reporting such a matter to the Bank should also report the matter simultaneously to the Department of Banking Supervision, RBI, provided the terms of the audit engagement require him to do so.
- d. Auditor should also consider the provisions of SA 250, “Consideration of Laws and Regulations in an Audit of Financial Statements”. Para A19 of the said Standard explains that the duty of confidentiality may be over-ridden by statute, law or by courts (for example, the auditor is required to report certain matters of non-compliance to RBI as per the requirements of the Non-Banking Financial Companies Auditor’s Report (Reserve Bank) Directions, 1988, issued by the RBI).
- e. RBI has issued a Master Circular no. DBS.CO.CFMC.BC.No. 1/23.04.001/2015-16 dated July 1, 2015 on “Frauds–Classification and Reporting” on the matters relating to classification and reporting of frauds and laying down a suitable reporting system. As per the said circular, the primary responsibility for preventing frauds is that of the Bank management. Banks are required to report frauds to the Board of Directors and also to the RBI.
- f. In the aforesaid context, it may be emphasised that such a requirement does not extend the responsibilities of an auditor in any manner whatsoever as far as conducting the audit is concerned. The requirement has only extended the reporting responsibilities of the

auditor. As far as conduct of audit is concerned, the auditor is expected to follow the Standards on Auditing issued by the ICAI and perform his functions within that framework. SA 240 (Revised), "The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements" states that an auditor conducting an audit in accordance with SAs is responsible for obtaining reasonable assurance that the financial statements taken as a whole are free from material misstatement, whether caused by fraud or error.

- g. The auditor should also refer to reports of internal auditors, concurrent auditors, inspectors, etc., which may point out significant weaknesses in the internal control system. Such an evaluation would also provide the auditor about the likelihood of occurrence of transactions involving exercise of powers much beyond those entrusted to an official. It must be noted that the auditor is not expected to look into each and every transaction but to evaluate the system as a whole. Therefore, if the auditor while performing his normal duties comes across any instance, he should report the matter to the RBI in addition to the Chairman/Managing Director/Chief Executive of the concerned Bank.

Responsibility of Management

12. It may be noted that the primary responsibility to establish adequate internal control systems to prevent and detect frauds and errors is that of the management of the entity. In the case of a company, the Board of Directors, in terms of the provisions of Section 134(5) of the 2013 Act, are required to, *inter alia*, state as a part of the directors' responsibility statement in the Board report to the shareholders, that they had taken proper and sufficient care for safeguarding the assets of the company and for preventing and detecting fraud and other irregularities.

In the case of a listed company, clause (e) of Sub-section 5 of Section 134 to the Act requires the directors' responsibility statement to also state that the directors, had laid down internal financial controls to be followed by the company and that such internal financial controls are adequate and were operating effectively. This clause explains the meaning of internal financial controls as "the policies and procedures adopted by the company for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information."

13. Audit Committee's Responsibility on Vigil Mechanism

Sections 177(9) and (10) of the 2013 Act requires every listed company and the specified class or classes of companies³, to establish a vigil mechanism for directors and employees to report

³ As per Rule 7(1) of the Companies (Meetings of Board and Its Powers) Rules, 2014, the following classes of companies are also required to establish a vigil mechanism:

- (i) companies which accept deposits from the public.
- (ii) companies which have borrowed money from banks and public financial institutions in excess of Rs. 50 crores.

genuine concerns in the manner as prescribed under the Companies (Meetings of Board and its Powers) Rules, 2014. The vigil mechanism needs to provide for adequate safeguards against victimisation of persons who use such mechanism and make provision for direct access to the chairperson of the Audit Committee in appropriate or exceptional cases. The details of establishment of such mechanism are required to be disclosed by the company on its website, if any, and in the Board's report.

14. Code of Conduct for Independent Directors

Section 149(8) of the 2013 Act deals with appointment and qualification of directors and prescribes the code of conduct for independent directors (Schedule IV to the Act). The Code provides a broad framework for, among other things, role and responsibilities of the independent directors, including:

- a. paying sufficient attention and ensuring that adequate deliberations are held before approving related party transactions and assure themselves that the same are in the interest of the company;
- b. ascertaining and ensuring that the company has an adequate and functional vigil mechanism and to ensure that the interests of a person who uses such mechanism are not prejudicially affected on account of such use;
- c. reporting concerns about unethical behaviour, actual or suspected fraud or violation of the company's code of conduct or ethics policy;
- d. satisfying themselves on the integrity of the financial information and that the financial controls and the systems of risk management are robust and defensible;
- e. safeguarding the interests of all the stakeholders, particularly, the minority shareholders;
- f. ensuring that their concern about the running of the company or a proposed action are addressed by the Board and to the extent they are not resolved, insist that their concerns are recorded in the minutes of the meeting of the Board

Various Definitions of Fraud

15. In the 2013 Act, the meaning of fraud has been considered in two specific sections *viz.* Section 143(10), where the SAs specified by the ICAI are deemed to be the auditing standards for purposes of the Act, which, *inter alia*, define fraud, and in Section 447, where punishment for fraud has been prescribed.

- a. Fraud has been defined in paragraph 11(a) of SA 240 as 'an intentional act by one or more individuals among management, those charged with governance, employees, or third parties, involving the use of deception to obtain an unjust or illegal advantage.'
- b. ***In the context of stating the provisions for punishment for fraud, Section 447 of the Act has explained the term 'fraud'*** as "fraud in relation to affairs of a company or any body corporate, includes any act, omission, concealment of fact or abuse of position committed by any person or any other person with the connivance in any manner, with

III.930 Auditing Pronouncements

intent to deceive, to gain undue advantage from, or to injure the interests of, the company or its shareholders or its creditors or any other person, whether or not there is any wrongful gain or wrongful loss.”

This Section further explains the terms ‘wrongful gain’ and ‘wrongful loss’ to mean the gain by unlawful means of property to which the person gaining is not legally entitled; and the loss by unlawful means of property to which the person losing is legally entitled, respectively.

16. Fraud has also been defined by various other regulators/statutes.
- a. The Insurance Fraud Monitoring Framework of the IRDA defines fraud in insurance as ‘an act or omission intended to gain dishonest or unlawful advantage for a party committing the fraud or for other related parties.’
 - b. Reserve Bank of India, *per se*, has not defined the term ‘fraud’ in its guidelines on Frauds. A definition of fraud was, however, suggested in the context of electronic banking in the Report of RBI Working Group on Information Security, Electronic Banking, Technology Risk Management and Cyber Frauds, which reads as, ‘a deliberate act of omission or commission by any person, carried out in the course of a banking transaction or in the books of accounts maintained manually or under computer system in banks, resulting into wrongful gain to any person for a temporary period or otherwise, with or without any monetary loss to the bank’.
 - c. Fraud, under Section 17 of the Indian Contract Act, 1872, includes any of the following acts committed by a party to a contract, or with his connivance, or by his agents, with intent to deceive another party thereto or his agent, or to induce him to enter into the contract:
 - the suggestion as a fact, of that which is not true, by one who does not believe it to be true;
 - the active concealment of a fact by one having knowledge or belief of the fact;
 - a promise made without any intention of performing it;
 - any other act fitted to deceive;
 - any such act or omission as the law specially declares to be fraudulent.

SECTION II: AUDITORS' REPORTING ON FRAUD UNDER SECTION 143(12)

17. Sections 143(12) to 143(15) of the 2013 Act states the provisions of the 2013 Act with regard to auditor's reporting on fraud. Rule 13 of the Companies (Audit and Auditors) Rules, 2014, as amended by the Companies (Audit and Auditors) Amendment Rules, 2015, provides the timeline and manner in which the auditor should report on fraud.

18. As per Section 143(12), **Notwithstanding anything contained in this section**, if an auditor of a company, **in the course of the performance of his duties as auditor**, has **reason to believe that an offence of fraud** involving such amount or amounts as may be prescribed, is being or has been committed in the company by its officers or employees, the auditor shall report the matter to the Central Government within such time and in such manner as may be prescribed. *(emphasis added)*

Provided that in case of fraud involving lesser than the specified amount, the auditor shall report the matter to the audit committee constituted under section 177 or to the Board in other cases within such time and in such manner as may be prescribed:

Provided further that the companies, whose auditors have reported frauds under this sub-section to the audit committee or the Board but not reported to the Central Government, shall disclose the details about such frauds in the Board's report in such manner as may be prescribed."

19. As per Rule 13 of the Companies (Audit and Auditors) Rules, 2014, as amended by the Companies (Audit and Auditors) Amendment Rules, 2015:

- (1) If an auditor of a company, in the course of the performance of his duties as **statutory auditor, has reason to believe** that an **offence of fraud**, which involves or is expected to involve individually an amount of Rupees One Crore or above, is being or has been committed against the company by its officers or employees, the auditor shall report the matter to the Central Government. *(emphasis added)*
- (2) The auditor shall report the matter to the Central Government as under:-
 - (a) the auditor shall report to the Board or the Audit Committee, as the case may be, immediately but not later than two days of his knowledge of the fraud, seeking their reply or observations within forty-five days;
 - (b) on receipt of such reply or observations the auditor shall forward his report and the reply or observations of the Board or the Audit Committee along with his comments (on such reply or observations of the Board or the Audit Committee) to the Central Government within fifteen days from the date of receipt of such reply or observations;
 - (c) in case the auditor fails to get any reply or observations from the Board or the Audit Committee within the stipulated period of forty-five days, he shall forward his report to the Central Government along with a note containing the details of his report that was earlier forwarded to the Board or the Audit Committee for which he has not received any reply or observations;
 - (d) The report shall be sent to the Secretary, Ministry of Corporate Affairs in a sealed cover

III.932 Auditing Pronouncements

by Registered Post with Acknowledgement Due or by Speed post followed by an e-mail in confirmation of the same.

- (e) The report shall be on the letter-head of the auditor containing postal address, e-mail address and contact telephone number or mobile number and be signed by the auditor with his seal and shall indicate his Membership Number; and
 - (f) The report shall be in the form of a statement as specified in Form **ADT-4**.
- (3) In case of a fraud involving lesser than the amount specified in sub-rule (1), the auditor shall report the matter to Audit Committee constituted under section 177 or to the Board immediately but not later than two days of his knowledge of the fraud and he shall report the matter specifying the following:-
- (a) Nature of Fraud with description;
 - (b) Approximate amount involved; and
 - (c) Parties involved.
- (4) The following details of each of the fraud reported to the Audit Committee or the Board under sub-rule (3) during the year shall be disclosed in the Board's Report:-
- (a) Nature of Fraud with description;
 - (b) Approximate Amount involved;
 - (c) Parties involved, if remedial action not taken; and
 - (d) Remedial action taken.

20. Section 143(13) states that 'No duty to which an auditor of a company may be subject to shall be regarded as having been contravened by reason of his reporting the matter referred to in Sub-section (12) if it is done in good faith'.

Accordingly, the auditor will not be subject to professional misconduct if he discloses information acquired in the course of his professional engagement with respect to compliance with Section 143(12), since it is as required by law.

21. Further, Section 456 of the Act also, *inter alia*, provides that no suit, prosecution or other legal proceeding shall lie against any person in respect of anything which is in good faith done or intended to be done in pursuance of this Act or of any rules or orders made thereunder.

22. As per Section 143(15), if any auditor does not comply with the provisions of Sub-section 143(12), he shall be punishable with fine of at least one lakh rupees, which may extend to twenty-five lakh rupees.

23. As per Sub-rule (3) of Rule 12 of the Companies (Audit and Auditors) Rules, 2014, ***the provisions of Sub-section (12) of Section 143 read with Rule 13 of the Companies (Audit and Auditors) Rules, 2014 regarding reporting of fraud by the auditor also extend to a branch auditor appointed under Section 139 to the extent it relates to the concerned branch.***

24. **While the reporting responsibility under Section 143(12) is to the Audit Committee or the Board of Directors of the Company and / or to the Central Government, the auditor would also need to consider whether such matter also needs to be disclosed in the auditor's report under Section 143(3)(f) which requires the auditor to state his/her observations on financial transactions/matters, which have any adverse effect on the functioning of the company.**

25. It is pertinent to note that the auditor is also required to report on fraud in terms of paragraph 3 (xii) of the Companies (Auditors Report) Order, 2015 on all frauds during the year whether noticed or reported by the auditor or the Company or by any others, even if reporting as required under Section 143(12) has been made by the auditor.

Issues for Consideration by Auditors for Reporting under Section 143(12)

Auditors' Responsibility for Consideration of Fraud in an Audit of Financial Statements

26. Paragraph 10 of SA 240 states that the objectives of the auditor are:

- (a) To identify and assess the risks of material misstatement in the financial statements due to fraud;
- (b) To obtain sufficient appropriate audit evidence about the assessed risks of material misstatement due to fraud, through designing and implementing appropriate responses; and
- (c) To respond appropriately to identified or suspected fraud.

27. Paragraph 4 of SA 240 also states and clarifies that the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.

28. In the context of the 2013 Act, this position is reiterated in Section 134(5) which states that the Board report shall include a responsibility statement, *inter alia*, that the directors had taken proper and sufficient care for safeguarding the assets of the company and for preventing and detecting fraud and other irregularities.

29. Section 143(9) read with Section 143(10), requires the auditor to comply with the SAs issued by ICAI. Further, Section 143(2) requires the auditor to make out his report after taking into account, *inter alia*, the auditing standards. Accordingly, the term "in the course of performance of his duties as an auditor" may be understood to mean in the course of performing an audit in accordance with the SAs.

30. Based on the above, it is reasonable to conclude that the objective of an auditor in the course of performance of duties as an auditor in accordance with the SAs, is to perform such

III.934 Auditing Pronouncements

procedures that provide sufficient appropriate audit evidence about the risks of material misstatement in the financial statements due to fraud that have been assessed by him through designing and implementing appropriate responses, and to respond appropriately to identified or suspected fraud.

31. The definition of fraud as per SA 240 and the explanation of fraud as per Section 447 of the 2013 Act are similar, except that under Section 447, fraud includes ‘acts with an intent to injure the interests of, the company or its shareholders or its creditors or any other person, whether or not there is any wrongful gain or wrongful loss.’

However, an auditor may not be able to detect acts that have intent to injure the interests of the company or cause wrongful gain or wrongful loss, unless the financial effects of such acts are reflected in the books of account/financial statements of the company. For example,

- an auditor may not be able to detect if an employee is receiving pay-offs for favoring a specific vendor, which is a fraudulent act, since such pay-offs would not be recorded in the books of account of the company;
- if the password of a key managerial personnel is stolen and misused to access confidential/restricted information, the effect of the same may not be determinable by the management or by the auditor;
- if an employee is alleged to be carrying on business parallel to the company’s business and has been diverting customer orders to his company, the auditor may not be able to detect the same since such sales transactions would not be recorded in the books of the company.

32. Therefore, for the purpose of Section 143(12) the auditor would need to consider the requirements of the SAs, insofar as they relate to the risk of fraud, including the definition of fraud as stated in SA 240, in planning and performing his audit procedures in an audit of financial statements to address the risk of material misstatement due to fraud.

Reporting on Suspected Offence involving Frauds noted during Audit/Limited Review of Interim period Financial Statements/Results and Other Attest Services

33. Section 143(12) of the 2013 Act, as amended by the Companies (Amendment) Act, 2015 is effective from December 14, 2015. Whilst Section 143 deals with auditor’s duties and responsibilities under the Act with respect to financial statements prepared under the Act, the auditors, normally, also perform other attest services in their capacity as auditors of the company. For example, Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 requires the statutory auditor to perform limited review/audit of the quarterly financial results published by the listed companies. The auditor may also be engaged by the Board of Directors of the company to carry out the audit of interim financial statements prepared by the management and report on such interim financial statements to the Board of Directors. The auditor may also have been engaged to perform tax audit under the Income-tax Act, 1961.

34. In the case of the aforesaid attest services for financial years beginning on or after 1st April, 2014, the following needs to be considered:

- a. Such attest services may not be pursuant to any requirement of the 2013 Act. They may rather be rendered to meet the specific requirements of the company (such as complying with the Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, to meet the requirements of the Board of Directors of the company, etc.).
- b. Wherever a statute or regulation requires such attest services to be performed by the auditor of the company, the auditor should consider the requirements and provisions of Section 143(12) since any such work carried out by the auditor during such attest services could be construed as being in the course of performing his duties as an auditor, albeit not under the Companies Act, 2013.
- c. The objective and scope of such attest services and the procedures performed by the auditor may not be of the same extent and level as in the case of the audit of the financial statements prepared under the 2013 Act. For example, the quarterly results under Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements), Regulations 2015 may be subject to a limited review performed in accordance with the Standards on Review Engagements and hence would not have been performed in accordance with the SAs.

35. ***If an offence of fraud in the company by its officers or employees that is identified/noted by the auditor in the course of providing such attest services as referred above, is of such amount/s as specified in Rule 13 of the Companies (Audit and Auditors) Rules, 2014 [as amended by the Companies (Audit and Auditors) Amendment Rules, 2015] which the auditor uses or intends to use when performing the audit under the 2013 Act, then in such cases, the matter may become reportable under Section 143(12), read with the Rules thereunder, as specified in this Guidance Note.***

Reporting Responsibility in case of Suspected Offence involving Fraud noted during Performance of Permitted Non-attest Services

36. Auditors could be engaged to provide non-attest services that are not prohibited under Section 144 of the Act. It is possible that the auditor, when providing such non-attest services may become aware of a fraud that is being or has been committed against the company by its officers or employees. A question that arises is – should the auditor report under Section 143(12) on frauds noted in the course of providing non-attest services?

37. It may be noted that reporting under Section 143(12) arises only if an auditor of a company, in the course of the performance of his duties as auditor, has reason to believe that an offence involving fraud is being or has been committed against the company by officers or employees of the company.

38. *If an offence of fraud in the company by its officers or employees that is identified/noted by the auditor in the course of providing such non-attest services as referred above, is of such amount/s as specified in Rule 13 of the Companies (Audit and Auditors) Rules, 2014 [as amended by the Companies (Audit and Auditors) Amendment Rules, 2015] which the auditor uses or intends to use when performing the audit under the 2013 Act, then in such cases, the matter may become reportable under Section 143(12), read with the Rules thereunder, as specified in this Guidance Note.*

Reporting on Frauds detected by the Management or Other Persons and already Reported under Section 143(12) by Such Other Person

39. Paragraph 4 of SA 240 states and clarifies that the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management. In the context of the 2013 Act, this position is reiterated in Section 134(5) which states that the Board report shall include a responsibility statement, *inter alia*, that the directors had taken proper and sufficient care for safeguarding the assets of the company and for preventing and detecting fraud and other irregularities. ***Based on the above, it may be considered that Section 143(12) envisages the auditor to report to the Audit Committee or the Board of Directors and, where applicable, to the Central Government an offence involving fraud/suspected fraud against the company by its officers or employees only if he is the first person to identify/note such instance in the course of performance of his duties as an auditor.***

The auditor, in the course of the performance of his duties as an auditor, is required to make inquiries with the management and the Board or Audit Committee about reported or identified/detected instances of fraud through any other internal or external sources and, consequently, the auditor may become aware of those frauds which have been/are being remediated/dealt with by them. Though the auditor becomes aware of such frauds when he/she is informed of the same by the management, he/she, *per se*, has not identified them on his/her own and is, therefore, not the first person to identify the fraud in those cases.

For example, in the case of Banks and NBFCs there is a requirement of reporting frauds to the Audit Committee/Board and to the Reserve Bank of India and, hence, to the extent such cases have already been identified and reported by the management, the auditor cannot be considered as the person who first identified them. Further, many companies have or are required to have a vigil/whistle blower mechanism through which instances of fraud may have already been reported.

Accordingly, in case a fraud has already been reported or has been identified/detected by the management or through the company's vigil/whistle blower mechanism and has been/is being remediated/dealt with by them and such case is informed to the auditor, the latter will not be required to report the same under Section 143(12) since he has not per se identified the fraud.

The auditor should apply professional skepticism to evaluate/verify that the fraud was indeed identified/detected in all aspects by the management or through the company's vigil/whistle blower mechanism so that distinction can be clearly made with respect to frauds identified/detected due to matters raised by the auditor vis-à-vis those identified/detected by the company through its internal control mechanism.

For example, in a fraud involving vendor payments, if the company identified the fraud and its nature and cause through its internal control mechanism but did not identify all the vendor accounts involved in the fraud that were identified by the auditor, it may need to be considered that the fraud was not identified in all aspects by the management and the auditor may need to report the same under Section 143(12) of the 2013 Act.

40. Since reporting on fraud under Section 143(12) is required even by the cost auditor and the secretarial auditor of the company, it is possible that a suspected offence involving fraud may have been reported by them even before the auditor became aware of the fraud. Here too, ***if a suspected offence involving fraud has already been reported under Section 143(12) by such other person, and the auditor becomes aware of such suspected offence involving fraud, he need not report the same to the Central Government under the section since he has not per se identified the suspected offence involving fraud.***

41. ***In case the fraud involves or is expected to involve an amount of rupees one crore or more, the auditor should review the steps taken by the management/those charged with governance with respect to the reported instance of suspected offence involving fraud stated above, and if he is not satisfied with such steps, he should state the reasons for his dissatisfaction in writing and request the management/those charged with governance to perform additional procedures to enable the auditor to satisfy himself that the matter has been appropriately addressed (Refer paragraphs 96 to 100). If the management/those charged with governance fail to undertake appropriate additional procedures within 45 days of his request, the auditor would need to evaluate if he should report the matter to the Central Government in accordance with Rule 13 of the Companies (Audit and Auditors) Rules, 2014.***

Reporting on Suspected Offence Involving Fraud in case of Consolidated Financial Statements

42. As per Section 129(4) of the 2013 Act, the provisions relating to audit of the standalone financial statements of the holding company shall also apply to the audit of the consolidated financial statements. Since the audit of the consolidated financial statements has also been made one of the duties of the auditor, a question that arises is – should the auditor report on suspected offence involving frauds that may have taken place in any of the subsidiaries, joint ventures, associates of the company?

III.938 Auditing Pronouncements

43. In the case of an audit of consolidated financial statements, as per paragraph 1 of SA 600 "Using the Work of Another Auditor" read with paragraph 9 of SA 200, when the principal auditor has to base his opinion on the financial information of the entity as a whole relying upon the statements and reports of the other auditors, his report should state clearly the division of responsibility for the financial information of the entity by indicating the extent to which the financial information of components audited by the other auditors have been included in the financial information of the entity, e.g., the number of divisions/branches/subsidiaries or other components audited by other auditors.

It may be noted that the auditors of foreign components and those components that are not companies as defined under the 2013 Act are not covered under the requirements of Section 143(12), since it applies only to the auditor of the company under the Companies Act 2013.

Accordingly, the auditor of the parent company is not required to report on frauds under Section 143(12) which are not being or have not been committed against the parent company by the officers or employees of the parent company and relate only to:

- a) ***A component that is an Indian company, since the auditor of that Indian company is required to report on suspected offence involving fraud under Section 143(12) in respect of such company; or***
- b) ***A foreign corporate component since they are not covered by the Companies Act, 2013; or***
- c) ***A component that is not a company since the component auditors' of such components are not covered under Section 143(12).***

However, the auditor of the parent company in India will be required to report on suspected offence involving fraud in the components of the parent company, if (a) such fraud is being or has been committed by employees or officers of the parent company; (b) if such suspected offence involving fraud in the component is against the parent company; and (since the requirement for reporting under Section 143(12) arises only if the suspected offence involving fraud is being or has been committed against the company by officers or employees of the company), if:

- (i) ***the principal auditor identifies/detects such suspected offence involving fraud in the component "in the course of the performance of his duties as an auditor" of the consolidated financial statements; or***
- (ii) ***the principal auditor is directly informed of such a suspected offence involving fraud in the component by the component auditor and the management had not identified/is not aware of such suspected offence involving fraud in the component. (Also refer paragraphs 36 to 38 above.)***

Reporting under Section 143(12) When the Suspected Offence Involving Fraud Relates to Periods prior to Coming into Effect of the 2013 Act

44. An auditor, in the current year, may identify a possible or committed fraud that relates to an earlier year covered under the 1956 Act. The question that arises is - whether such frauds should also be reported under Section 143(12).

45. Requirements similar to Section 143(12) of the 2013 Act were not prescribed in the 1956 Act. Even the reporting under CARO, 2003 only required the auditors to report to the members on any fraud on or by the company that had been noticed or reported during the year.

As such, auditors would not have reported on frauds as envisaged under Section 143(12) in those years. Accordingly, ***in case of fraud relating to earlier years to which the Companies Act, 1956 was applicable, reporting under Section 143(12) will arise only if the suspected offence involving fraud is identified by the auditor in the course of performance of his duties as an auditor during the financial years beginning on or after April 1, 2014 and to the extent that the same was not dealt with in the prior financial years either in the financial statements or in the audit report or in the Board's report under the Companies Act, 1956.***

When does an Auditor Commence Reporting under Section 143(12) – Based on Suspicion - Reason to Believe – Knowledge – or on Determination of Offence?

46. Section 143(12) states that an auditor should report under the Section if he has “reason to believe” that an offence involving fraud is being or has being committed in the company by its officers or employees. Similarly, Rule 13 of the Companies (Audit and Auditors) Rules, 2014 as amended by the Companies (Audit and Auditors) Amendment Rules, 2015, also specifies the threshold for reporting as “reason to believe”. The Form ADT – 4 in which the auditor is required to report to the Central Government uses the term “suspected offence involving fraud”.

47. ***It is important to understand the terms “reason to believe”, “knowledge” and “suspected offence involving fraud” to determine the point of time when the reporting requirement is triggered for an auditor under Section 143(12) read with Rule 13 of the Companies (Audit and Auditors) Rules, 2014, as amended by the Companies (Audit and Auditors) Amendment Rules, 2015.***

- ‘Suspicion’ is a state of mind more definite than speculation, but falls short of knowledge based on evidence. It must be based on some evidence, even if that evidence is tentative – simple speculation that a person may be engaged in fraud is not sufficient grounds to form a suspicion. Suspicion is a slight opinion but without sufficient evidence.
- For 'reason to believe' to come into existence, it cannot be based on suspicion. There needs to be sufficient information or convincing evidence to advance beyond suspicion that it is possible someone is committing or has committed a fraud. For example,

III.940 Auditing Pronouncements

identification of fraud risk factors in itself cannot cause 'reason to believe' that a fraud exists.

- The term 'reason to believe' creates an objective test. SA 240 specifies the requirements to be complied by the auditors in assessing and responding to the risk of fraud in an audit of financial statements. For example, when complying with the requirements of SA 240, an auditor might be considered to have reasons to believe that a fraud has been or is being committed if he had actual knowledge of, or possessed information which would indicate to a reasonable person, that another person was committing or had committed a fraud.
- The term 'reason to believe' which has been used in the SAs indicate that it arises when
 - Evaluating audit evidence and information provided; or
 - Evaluating misstatements, including deviations noted on audit sampling and further audit procedures carried out; or
 - Exercising professional skepticism.
- ***Rule 13 of the Companies (Audit and Auditors) Rules, 2014, as amended by the Companies (Audit and Auditors) Amendment Rules, 2015, has used the terms 'reason to believe' and 'knowledge' (of fraud). The condition of 'reason to believe' would be met if on evaluation of all the available information with the auditor and applying appropriate level of professional skepticism the auditor concludes that a fraud is being or has been committed in the company.***
- ***Having 'knowledge' means knowing 'that' something. In the case of reporting on fraud under Section 143(12), it occurs when the auditor has sufficient reason to believe that a fraud has been or is being committed on the company by its officers or employees. This implies that there exists a fraud.***
- Whilst Section 143(12) uses the term 'offence involving fraud' and the Form ADT-4 uses the term "suspected offence involving fraud". ***As per paragraph 3 of SA 240, although the auditor may suspect or, in rare cases, identify the occurrence of fraud, the auditor does not make legal determinations of whether fraud has actually occurred.*** Determination of "offence" is legal determination and accordingly, the auditor will not be able to determine whether under legal parlance an "offence or suspected offence involving fraud" has been or is being committed against the company by its officers or employees,

48. Accordingly, ***based on a harmonious reading of Section 143(12), Rule 13 of the Companies (Audit and Auditors) Rules, 2014, as amended by the Companies (Audit and Auditors) Amendment Rules, 2015 and Form ADT - 4, reporting on fraud in the course of performance of duties as auditor, would be applicable only when the auditor has reason to***

believe and has knowledge that a fraud has occurred or is occurring i.e., when the auditor has evidence that a fraud exists.

Can the Auditor apply the Concept of Materiality for Reporting on Fraud?

49. The concept of materiality is fundamental for setting up an appropriate system of internal control, preparation of financial statements and its audit. Due to its inherent limitations, internal control systems cannot provide absolute assurance that no fraud or error has taken place. Since the auditor is required to comply with the SAs in performance of duties as an auditor, the audit will be performed applying the concept of materiality provided in the SAs.

50. Section 143(9) requires the auditor to comply with the SAs, which, *inter alia*, includes consideration of materiality, applying materiality in evaluating misstatements and disposition of the same.

51. The auditor should continue to apply the concept of materiality in performing the audit in accordance with SA 320 "Materiality in Planning and Performing an Audit".

52. Fraud results in misstatement of financial statements. The SAs outline the procedures to be performed by an auditor in case a misstatement due to fraud is identified by the auditor. For example, paragraph A52 of SA 240 states that in evaluating and disposing the misstatements identified, the auditor should consider the requirements of SA 450 "Evaluation of Misstatements Identified during the Audit".

53. SA 450 considers the concept of materiality in classifying the manner of disposition of misstatements, including those arising from fraud. Misstatements arising from fraud, will need to be communicated to the management and/or those charged with governance as required under paragraphs A21 to A23 of SA 450 and also reported to the Central Government in accordance with the requirements specified in Rule 13 of the Companies (Audit and Auditors) Rules, 2014, as amended, in case the amount involved or expected to involve is individually Rupees One Crore or more.

54. Materiality is applicable wherever the amount is quantifiable. Where the amount is not quantifiable, the auditor should apply professional judgement to estimate the likelihood of the amount exceeding the aforesaid limit of Rupees One Crore prescribed for reporting to the Central Government. For this purpose it can be based on management estimate or reasonable range of estimate made by the auditor.

55. Subsequent reporting may be required if the amount initially estimated was lower than the aforesaid limit but was eventually determined to be higher than such limit. Under these circumstances, the timeline for reporting under Rule 13 of the Companies (Audit and Auditors) Rules, 2014, as amended by the Companies (Audit and Auditors) Amendment Rules, 2015, will commence when the amount involved is determined to be in excess of such limit.

Should the Auditor Report under Section 143(12) in case of Corruption, Bribery, Money Laundering and Non-compliance with Other Laws and Regulations

56. In case of corruption, bribery and money laundering, the direct effect of such act (benefit or penal consequence) is on the company.

57. The auditor should comply with the relevant SAs with regard to illegal acts (e.g. SA 240 and SA 250) when performing the audit. If the auditor, in the course of performance of his/her duties as the auditor, comes across instances of corruption, bribery and money laundering and other intentional non-compliances with laws and regulations, the auditor would need to evaluate the impact of the same in accordance with SA 250 to determine whether the same would have a material effect on the financial statements.

58. ***With respect to reporting under Section 143(12), consequent to corruption, bribery, money laundering and other intentional non-compliance with other laws and regulations, the auditor should consider, for the purpose of reporting, whether such acts have been carried out by officers or employees of the company for the purpose of reporting and also take into account the requirements of SA 250, particularly paragraph 28 of SA 250 read with paragraphs A19 and A20 thereof.***

For example, if the auditor comes to know that the company has filed a fraudulent return of income to evade income tax, he may have to report this fraud under Section 143(12) irrespective of whether adequate provision has been made in the books of accounts or not.

It may be noted that the proviso to Section 147(2) in the context of punishment to auditors for contravention with the provisions, inter alia, of Section 143 of the 2013 Act, states "if an auditor has contravened such provisions knowingly or willfully with the intention to deceive the company or its shareholders or creditors or tax authorities, he shall be punishable with imprisonment for a term which may extend to one year and with fine which shall not be less than one lakh rupees but which may extend to twenty-five lakh rupees."

SECTION III :APPLICABILITY OF STANDARDS ON AUDITING

59. Since reporting on fraud arises only in the course of performing duties as an auditor, the auditor should, *inter alia*, take into consideration the requirements of the following provisions of the SAs (Refer paragraphs 60 to 73 below) for purposes of designing audit procedures which are effective in identifying and assessing the risks of material misstatement due to fraud. ***These are in addition to SA 240 and SA 250 which Standards are required to be mandatorily complied in entirety insofar as they relate to audit of the financial statements and also for reporting on fraud under Section 143(12), as amended by the Companies (Amendment) Act, 2015 and Rule 13 of the Companies (Audit and Auditors) Rules, 2014, as amended by the Companies (Audit and Auditors) Amendment Rules, 2015.***

60. Professional Skepticism (SA 200)

Paragraph 13(l) – An attitude that includes a questioning mind, being alert to conditions which may indicate possible misstatement due to error or fraud, and a critical assessment of audit evidence.

Paragraph A18 - Professional skepticism includes being alert to, for example:

- Audit evidence that contradicts other audit evidence obtained.
- Information that brings into question the reliability of documents and responses to inquiries to be used as audit evidence.
- Conditions that may indicate possible fraud.
- Circumstances that suggest the need for audit procedures in addition to those required by the SAs.

Paragraph A19 - Maintaining professional skepticism throughout the audit is necessary if the auditor is, for example, to reduce the risks of:

- Overlooking unusual circumstances.
- Over generalising when drawing conclusions from audit observations.
- Using inappropriate assumptions in determining the nature, timing, and extent of the audit procedures and evaluating the results thereof.

Paragraph A20 - Professional skepticism is necessary to the critical assessment of audit evidence. This includes questioning contradictory audit evidence and the reliability of documents and responses to inquiries and other information obtained from management and those charged with governance. It also includes consideration of the sufficiency and appropriateness of audit evidence obtained in the light of the circumstances, for example, in the case where fraud risk factors exist

III.944 Auditing Pronouncements

and a single document, of a nature that is susceptible to fraud, is the sole supporting evidence for a material financial statement amount.

Paragraph A21 - The auditor may accept records and documents as genuine unless the auditor has reason to believe the contrary. Nevertheless, the auditor is required to consider the reliability of information to be used as audit evidence. In cases of doubt about the reliability of information or indications of possible fraud (for example, if conditions identified during the audit cause the auditor to believe that a document may not be authentic or that terms in a document may have been falsified), the SAs require that the auditor investigate further and determine what modifications or additions to audit procedures are necessary to resolve the matter.

Paragraph A22 - The auditor cannot be expected to disregard past experience of the honesty and integrity of the entity's management and those charged with governance. Nevertheless, a belief that management and those charged with governance are honest and have integrity does not relieve the auditor of the need to maintain professional skepticism or allow the auditor to be satisfied with less-than-persuasive audit evidence when obtaining reasonable assurance.

61. Audit Documentation

As per paragraph 44 of SA 240 and paragraph 32 of SA 315, the auditor's documentation of the understanding of the entity and its environment and the assessment of the risks of material misstatement required by SA 315 would include:

- a) The significant decisions reached during the discussion among the engagement team regarding the susceptibility of the entity's financial statements to material misstatement due to fraud; (Refer **Appendix 1**) and
- b) The identified and assessed risks of material misstatement due to fraud at the financial statement level and at the assertion level.

As per paragraph 45 of SA 240 and paragraph 28 of SA 330, the auditor's documentation of the responses to the assessed risks of material misstatement required by SA 330 shall include:

- a) The overall responses to the assessed risks of material misstatement due to fraud at the financial statement level and the nature, timing and extent of audit procedures, and the linkage of those procedures with the assessed risks of material misstatement due to fraud at the assertion level; and
- b) The results of the audit procedures, including those designed to address the risk of management override of controls.

The auditor should document communications about fraud made to management, those charged with governance, regulators and others.

When the auditor has concluded that the presumption that there is a risk of material misstatement due to fraud related to revenue recognition is not applicable in the circumstances of the engagement, the auditor shall document the reasons for that conclusion.

62. Inquiries with those Charged with Governance

Paragraph 20 of SA 240 states that unless all of those charged with governance are involved in managing the entity, the auditor shall obtain an understanding of how those charged with governance exercise oversight of management's processes for identifying and responding to the risks of fraud in the entity and the internal control that management has established to mitigate these risks.

Paragraph 21 of SA 240 requires that the auditor makes inquiries of those charged with governance to determine whether they have knowledge of any actual, suspected or alleged fraud affecting the entity. These inquiries are made in part to corroborate the responses to the inquiries of management. (Refer **Appendix 2**)

Paragraph A20 of SA 240 states that an understanding of the oversight exercised by those charged with governance may provide insights regarding the susceptibility of the entity to management fraud, the adequacy of internal control over risks of fraud, and the competency and integrity of the management.

63. Communications with those Charged with Governance

Paragraph 40 of SA 240 states that if the auditor has identified a fraud or has obtained information that indicates that a fraud may exist, the auditor shall communicate these matters on a timely basis to the appropriate level of management in order to inform those with primary responsibility for the prevention and detection of fraud of matters relevant to their responsibilities.

Paragraph 41 of SA 240 requires that unless all of those charged with governance are involved in managing the entity, if the auditor has identified or suspect's fraud involving:

- a) Management;
- b) Employees who have significant roles in internal control; or
- c) Others where the fraud results in a material misstatement in the financial statements.

The auditor should communicate these matters to those charged with governance on a timely basis. If the auditor suspects fraud involving management, the auditor should communicate these suspicions to those charged with governance and discuss with them the nature, timing and extent of audit procedures necessary to complete the audit.

Paragraph 42 of SA 240 requires the auditor to communicate with those charged with governance any other matters related to fraud that are, in the auditor's judgment, relevant to their responsibilities.

64. Risk Assessment Procedures and Related Activities

Paragraphs 5 to 24 of SA 315 require the auditor to perform risk assessment procedures to provide a basis for the identification and assessment of risks of material misstatement at the financial statement and assertion levels. When performing risk assessment procedures and related activities to obtain an understanding of the entity and its environment, including the entity's internal control, the auditor is required to perform procedures to obtain information for use in identifying the risks of material misstatement due to fraud.

65. Inquiries with Management and Others within the Entity

Paragraph 17 of SA 240 requires the auditor to make enquiries of management regarding:

- a) Management's assessment of the risk that the financial statements may be materially misstated due to fraud, including the nature, extent and frequency of such assessments;
- b) Management's process for identifying and responding to the risks of fraud in the entity, including any specific risks of fraud that management has identified or that have been brought to its attention, or classes of transactions, account balances, or disclosures for which a risk of fraud is likely to exist;
- c) Management's communication, if any, to those charged with governance regarding its processes for identifying and responding to the risks of fraud in the entity; and
- d) Management's communication, if any, to employees regarding its views on business practices and ethical behavior.

Paragraph 18 of SA 240 requires the auditor to make inquiries of management, and others within the entity as appropriate, to determine whether they have knowledge of any actual, suspected or alleged fraud affecting the entity. (Refer **Appendix 2**)

66. Identification and Assessment of the Risks of Material Misstatement Due to Fraud

In accordance with paragraph 25 of SA 315, the auditor needs to identify and assess the risks of material misstatement due to fraud at the financial statement level, and at the assertion level for classes of transactions, account balances and disclosures.

When identifying and assessing the risks of material misstatement due to fraud, the auditor should, based on a presumption that there are risks of fraud in revenue recognition, evaluate which types of revenue, revenue transactions or assertions give rise to such risks. Paragraph 47 of SA 240 specifies the documentation required when the auditor concludes that the presumption is not applicable in the circumstances of the engagement and, accordingly, has not identified revenue recognition as a risk of material misstatement due to fraud. As per paragraph 27 of SA 240, the auditor shall treat those assessed risks of material misstatement due to fraud as significant risks and accordingly, to the extent not already done so, the auditor shall obtain an understanding of the entity's related controls, including control activities, relevant to such risks.

67. Responses to the Assessed Risks of Material Misstatement

In accordance with paragraph 5 of SA 330, “The Auditor’s Responses to Assessed Risks”, the auditor shall determine overall responses to address the assessed risks of material misstatement due to fraud at the financial statement level.

Paragraph 29 of SA 240 requires that in determining overall responses to address the assessed risks of material misstatement due to fraud at the financial statement level, the auditor should:

- a) Assign and supervise personnel taking account of the knowledge, skill and ability of the individuals to be given significant engagement responsibilities and the auditor’s assessment of the risks of material misstatement due to fraud for the engagement;
- b) Evaluate whether the selection and application of accounting policies by the entity, particularly those related to subjective measurements and complex transactions, may be indicative of fraudulent financial reporting resulting from management’s effort to manage earnings; and
- c) Incorporate an element of unpredictability in the selection of the nature, timing and extent of audit procedures.

Further, in accordance with Paragraph 6 of SA 330, the auditor is also required to design and perform further audit procedures whose nature, timing and extent are based on and are responsive to the assessed risks of material misstatement due to fraud at the assertion level.

68. Evaluation of Misstatements Identified during the Audit

Paragraph A52 of SA 240 states - “SA 450, “Evaluation of Misstatements Identified during the Audit”, and SA 700, “Forming an Opinion and Reporting on Financial Statements”, establish requirements and provide guidance on the evaluation and disposition of misstatements and the effect on the auditor’s opinion in the auditor’s report.”

Paragraph A50 of SA 240 states - Since fraud involves incentive or pressure to commit fraud, a perceived opportunity to do so or some rationalization of the act, an instance of fraud is unlikely to be an isolated occurrence. Accordingly, misstatements, such as numerous misstatements at a specific location even though the cumulative net effect is not material, may be indicative of a risk of material misstatement due to fraud.

69. Analytical Procedures

The use of analytical procedures as risk assessment procedures is dealt with in SA 315. Use of analytical procedures as substantive procedures (substantive analytical procedures) and as procedures near the end of the audit that assist the auditor when forming an overall conclusion on the financial statements is dealt with in SA 520. Analytical procedures may help identify the existence of unusual transactions or events, and amounts, ratios, and trends that might indicate

III.948 Auditing Pronouncements

matters that have audit implications. Unusual or unexpected relationships that are identified may assist the auditor in identifying risks of material misstatement especially risks of material misstatement due to fraud.

The auditor should apply analytical procedures at the planning stage to assist in understanding the business and in identifying areas of potential risk.

The auditor shall design and perform analytical procedures near the end of the audit that assist the auditor when forming an overall conclusion as to whether the financial statements are consistent with the auditor's understanding of the entity. (Paragraph 6 of SA 520)

If analytical procedures performed in accordance with this SA identify fluctuations or relationships that are inconsistent with other relevant information or that differ from expected values by a significant amount, the auditor shall investigate such differences by:

- (a) Inquiring of management and obtaining appropriate audit evidence relevant to management's responses; and
- (b) Performing other audit procedures as necessary in the circumstances. (Paragraph 7 of SA 520)

The auditor should evaluate whether unusual or unexpected relationships that have been identified in performing analytical procedures, including those related to revenue accounts, may indicate risks of material misstatement due to fraud (Paragraph 22 of SA 240).

70. Review of Accounting Estimates

Paragraph 6 of SA 540, "Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures" requires the auditor to obtain sufficient appropriate audit evidence whether in the context of the applicable financial reporting framework, the accounting estimates, including fair value accounting estimates, in the financial statements, whether recognised or disclosed, are reasonable, and related disclosures in the financial statements are adequate.

The auditor should review accounting estimates for biases and evaluate whether the circumstances producing the bias, if any, represent a risk of material misstatement due to fraud (Paragraph 32(b) of SA 240).

71. Related Parties

Related parties, by virtue of their ability to exert control or significant influence, may be in a position to exert dominant influence over the entity or its management. Consideration of such behavior is relevant when identifying and assessing the risk of material misstatement due to fraud (Paragraph A6 of SA 550)

If the auditor identifies fraud risk factors (including circumstances relating to the existence of a related party with dominant influence) when performing the risk assessment procedures and related activities in connection with related parties, the auditor shall consider such information when identifying and assessing the risk of material misstatement due to fraud in accordance with SA 240 (Paragraph 19 of SA 550)

If the auditor has assessed a significant risk of material misstatement due to fraud as a result of the presence of a related party with dominant influence, the auditor may, in addition to the general requirements of SA 240, perform certain audit procedures to obtain an understanding of the business relationships that such a related party may have established directly or indirectly with the entity and to determine the need for further appropriate substantive audit procedures (Paragraph A33 of SA 550).

72. Written Representations

SA 580, "Written Representations", establishes requirements and provides guidance on obtaining appropriate representations from management and, where appropriate, those charged with governance in the audit. As per paragraph A57 of SA 240, in addition to acknowledging that they have fulfilled their responsibility for the preparation of the financial statements, it is important that, irrespective of the size of the entity, management and, where appropriate, those charged with governance acknowledge their responsibility for internal control designed, implemented and maintained to prevent and detect fraud.

73. Inquiries with Internal Auditors

SA 610, "Using the Work of Internal Auditors", establishes requirements and provides guidance in audits of those entities that have an internal audit functions. For those entities that have an internal audit function, paragraph 19 of SA 240 states that the auditor shall make inquiries of internal audit to determine whether it has knowledge of any actual, suspected or alleged fraud affecting the entity, and to obtain its views about the risks of fraud.

SECTION IV: TECHNICAL GUIDANCE ON REPORTING ON FRAUD UNDER SECTION 143(12)

74. The duty of auditor with respect to fraud in the course of his performance of duties as an auditor is to comply with the requirements of SA 240 "The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements".

75. Therefore, the auditor is required to carry out the following procedures as specified in SA 240:

- a) To identify and assess the risks of material misstatement in the financial statements due to fraud;
- b) To obtain sufficient appropriate audit evidence about the assessed risks of material misstatement due to fraud, through designing and implementing appropriate responses; and

III.950 Auditing Pronouncements

c) To respond appropriately to identified or suspected fraud.

76. In addition to the above procedures, the auditor is required to report on fraud in accordance with Section 143(12) of the 2013 Act. For purposes of reporting under Section 143(12) to the Audit Committee/Board and the Central Government, the auditor is required to carry out certain specific procedures with respect to the identified offence involving fraud against the company by its officers or employees.

The objective of this part of the Guidance Note is to provide supplementary guidance to the SAs for consideration by auditors when complying with the requirements of Section 143(12) of the 2013 Act.

77. Modifications to terms of Engagement with regard to Reporting on Fraud under Section 143(12)

Reporting by the auditor on fraud is not a separate engagement and is a part of the performance of the duties as an auditor of the financial statements of the company under the 2013 Act.

The terms of engagement between the auditor and the client as required under SA 210 will require certain modifications to incorporate the management's responsibility with regard to fraud and the auditor's reporting responsibility for reporting under Section 143(12).

The following clauses may be added to the auditor's engagement letter with regard to reporting on fraud under Section 143(12):

As part of Auditor's Reporting Responsibilities:

In accordance with the provisions of Section 143(12) and 143(13) of the 2013 Act, if in the course of performance of my/our duties as auditor, I/we have reason to believe that an offence of fraud is being or has been committed in the Company by officers or employees of the Company, I/we will be required to report to the Central Government, in accordance with the rules prescribed in this regard which, *inter alia*, requires me/us to

In case of a fraud involving or expected to involve less than rupees one crore, to report the matter to the Audit Committee constituted under section 177 of the Companies Act, 2013 or to the Board immediately but not later than two days of my/our knowledge of the fraud and our report would specify the following:

- Nature of fraud
- Approximate amount involved; and
- Parties involved

In case of a fraud involving rupees one crore or more, I/we shall make a report to the Board or Audit Committee, as the case may be, seeking their reply or observations, to enable me/us to forward the same to the Central Government. Such reporting will be made in good faith and, therefore, cannot be considered as breach of maintenance of client confidentiality requirements or

be subject to any suit, prosecution or other legal proceeding since it is done in pursuance of the 2013 Act or of any rules or orders made thereunder.

Because of the inherent limitations of an audit, including the possibility of collusion or improper management override of controls, there is an unavoidable risk that material misstatements due to fraud or error may occur and not be detected, even though the audit is properly planned and performed in accordance with the SAs.

As part of Management's Responsibility:

Management is responsible for taking proper and sufficient care for the maintenance of adequate accounting records in accordance with the provisions of the 2013 Act for safeguarding the assets of the Company and for preventing and detecting fraud and other irregularities.

Management is responsible to provide me/us access to reports, if any, relating to internal reporting on frauds (e.g., vigil mechanism reports etc.), including those submitted by cost accountant or company secretary in practice to the extent it relates to their reporting on frauds in accordance with the requirements of Section 143(12) of the Act.

78. Fraud Risk Factors – Assessed Risk of Material Misstatement due to Fraud

SA 240 provides examples of fraud risk factors that may be faced by auditors in a broad range of situations, specifically relating to the two types of frauds relevant to the auditor's consideration, i.e., fraudulent financial reporting and misappropriation of assets.

Examples of fraud risk factors stated in SA 240 and additional examples of fraud risk factors are given in **Appendix 3** for consideration by auditors during the course of their audit.

Although the fraud risk factors cover a broad range of situations, they are only examples and, accordingly, the auditor may identify additional or different fraud risk factors. Not all of these examples are relevant in all circumstances, and some may be of greater or lesser significance in entities of different size or with different ownership characteristics or circumstances. Also, the order of the examples of fraud risk factors provided is not intended to reflect their relative importance or frequency of occurrence.

79. Audit Procedures to Address Assessed Risk of Material Misstatement due to Fraud

Based on the nature, size and circumstances of the fraud risk factors, the auditor will have to design appropriate audit procedures to address the assessed risk of material misstatement due to fraud. SA 240 provides examples of possible audit procedures to address the assessed risk of material misstatement due to fraud.

III.952 Auditing Pronouncements

Additional examples of possible audit procedures to address the assessed risk of material misstatement due to fraud are given in **Appendix 4** for consideration by auditors during the course of their audit.

Although these procedures cover a broad range of situations, they are only examples and, accordingly they may not be the most appropriate nor necessary in each circumstance.

80. Stages of Identification of Fraud

The information about possible offence involving fraud, obtained by the auditor during the course of his audit, can be classified into four stages:

- a) Speculation.
 - b) Suspicion.
 - c) Reason to Believe.
 - d) Knowledge.
- a) **Speculation** - "Speculation" refers to information from unrelated source which is a rumour, hearsay, gossip, assumption, guess, thought or supposition. Examples of information which could be classified as speculation are provided below:
- Rumours about management accepting kick-backs from suppliers/service providers for awarding contracts, but no proof.
 - Based on specific industry risk, there is an assumption that there will be transactions involving cash and money laundering.
 - Media reports indicating that the company is planning to invest in totally unrelated, high-risk business.
 - Board of Directors consisting of some persons exposed to illegal acts.
 - Gossip that certain business groups/entities are front end for an undisclosed owner.
 - Rumour that promoters of certain companies have accounts in tax havens and are involved in circulating monies through such tax havens.

At this stage, the auditor may have to perform engagement risk assessment procedures to determine if there is any merit in the speculation and whether or not to accept or continue with the engagement and the level of staffing that will be required to address any fraud risk factors identified from the above.

- b) **Suspicion** – 'Suspicion' is a state of mind more definite than speculation, but falls short of knowledge based on evidence. It must be based on some evidence, even if that evidence is tentative. Suspicion is a slight opinion but without sufficient evidence.

In other words, a “suspicion” will lead to identification of fraud risk factors during the course of audit. Examples of information which could be classified as suspicion are provided below:

- Recurring negative cash flows from operations or an inability to generate cash flows from operations while reporting earnings and earnings growth.
- There is excessive pressure on management or operating personnel to meet financial targets established by those charged with governance, including sales or profitability incentive goals.
- Accounting and information systems those are not effective, including situations involving significant deficiencies in internal control.
- Known history of violations of securities laws or other laws and regulations, or claims against the entity, its senior management, or those charged with governance alleging fraud or violations of laws and regulations.
- Use of business intermediaries for which there appears to be no clear business justification.
- Domination of management by a single person or small group (in a non-owner managed business) without compensating controls.
- Overly complex organisational structure involving unusual legal entities or managerial lines of authority.
- The practice by management in maintaining or increasing the entity’s stock price or earnings trend.
- Significant, unusual, or highly complex transactions, especially those close to period end that pose difficult “substance over form” questions.
- Significant related party transactions which appear to be not in the ordinary course of business or with related entities not audited or over which the auditor does not have information.

At this stage, the auditor will have to identify the information leading to “suspicion” as “fraud risk factor” and design appropriate audit procedures to address this assessed risk of misstatement due to fraud.

c) **Reason to Believe** - ‘Reason to believe’ indicates that the matter should be more than just a suspicion. ‘Suspicion’ when corroborated with supporting evidence can provide ‘reason to believe’.

Examples of information which could be classified as “reason to believe” are provided below:

- Material misstatement identified during the course of audit.
- Identification of any material weakness in the internal controls.

III.954 Auditing Pronouncements

- Significant related party transactions not at arm's length and not supported by a proper business rationale.
- Sudden resignation of an employee belonging to the senior management and when proper reason is not assigned for his leaving.
- Resistance from the management with regard to certain disclosures in the financial statement.
- Material discrepancies between book stock and physical stock.
- Acquisition of significant assets which are unrelated to the business.
- During the course of perusal of the bank statements, when the auditor observes frequent transfer in and transfer out of funds from a particular account balance belonging to the promoter or an employee.
- Matters reported through the whistle blower mechanism on an incidence of fraud.
- Notices from regulators and government authorities on violations of laws and regulations.
- E-mail or written communication received directly by the auditor from a whistle blower.

At this stage the auditor has performed planned procedures to address the assessed risk of misstatement due to fraud. Certain evidences, which he obtained and evaluated during this process, indicate that there is a "reason to believe" that an offence involving fraud has been or is being committed. The auditor would now be required to carry out procedures as referred to in paragraphs 83 and 84 with a higher level of professional skepticism with a view to obtain more persuasive evidence to enable him to conclude whether he has "reason to believe" or has "knowledge" of fraud.

d) **Knowledge** – "Knowledge" indicates "reason to believe" with more persuasive evidence based on further procedures performed by the auditor. Examples of information which could be classified as "knowledge" are provided below:

- Material misstatement identified during the course of audit not supported by appropriate rationale/explanation from the management, indicating that the misstatement was intentional.
- Identification of any material weakness in the internal controls which has resulted in material damage/huge loss for the company.
- Significant related party transactions not at arm's length and not supported by appropriate evidence. Management is not able to provide appropriate rationale/substantiation for undertaking such transactions and such transactions may be prejudicial to the interests of the shareholders, based on the materiality determined by the auditor.
- Sudden resignation of an employee belonging to the senior management. On performing further procedures, it is noted that the employee had committed an offence involving fraud.

- Resistance from the management with regard to certain disclosures in the financial statements. On further inquiry, it comes to light that management had concealed certain information from the bankers/regulators and hence the resistance to disclose.
- Material discrepancies between book stock and physical stock. On examination, the auditor noted that the unit of measures were misstated for several items as against a one-off instance, which indicates that the misstatement could be intentional.
- Acquisition of significant assets which are unrelated to the business. On further inquiry with the project department, it appears that the acquisition was made to accommodate a related party or boost the sales of a related party.
- During the course of perusal of the bank statements, when the auditor observes frequent transfer in and transfer out of funds from a particular account balance belonging to the promoter or an employee. On further inquiry and procedures, the auditor notes that the employee involved was the person who is involved in preparing bank reconciliation statements (BRS) and there is no review of the work performed by this staff.
- Matters reported through the whistle blower mechanism on an incidence of fraud and the procedures performed by the management to investigate the reported matter were biased to protect the interests of the persons against whom the allegations were made.

At this stage, the auditor has “knowledge” of fraud and therefore, the auditor’s responsibility to report on the suspected offence of fraud to the Audit Committee constituted under section 177 / to the Board or to the Central Government, as applicable, based on the amount involved or expected to be involved, is triggered.

81. Section 143(1) of the Act requires the auditor, *inter-alia*, to perform the following inquiries and determine if any specific reporting to the members of the company is required under the said section:

- (a) Whether loans and advances made by the company on the basis of security have been properly secured and whether the terms on which they have been made are prejudicial to the interests of the company or its members;
- (b) Whether transactions of the company which are represented merely by book entries are prejudicial to the interests of the company;
- (c) Where the company not being an investment company or a banking company, whether so much of the assets of the company as consist of shares, debentures and other securities have been sold at a price less than that at which they were purchased by the company;
- (d) Whether loans and advances made by the company have been shown as deposits;
- (e) Whether personal expenses have been charged to revenue account;
- (f) Where it is stated in the books and documents of the company that any shares have been allotted for cash, whether cash has actually been received in respect of such allotment,

III.956 Auditing Pronouncements

and if no cash has actually been so received, whether the position as stated in the account books and the balance sheet is correct, regular and not misleading.

Any adverse comment on the above may also be considered as matters where the auditor has sufficient reason to believe that a suspected offence involving fraud is being or has been committed.

82. A decision tree summarising the action required to be carried out by an auditor at different stages of information/extent of evidence obtained is provided as part of the overview to this Guidance Note.

83. Audit Procedures If Auditor has reasons to Believe a Fraud has Occurred or is being Carried Out

As discussed in the earlier sections of this Guidance Note, Section 143(12) of the 2013 Act requires the auditor to report to the Audit Committee constituted under section 177 / to the Board or to the Central Government, as applicable, if he has “reason to believe” that an offence of fraud is being or has been committed in the company by officers or employees of the company, based on the amount involved or expected to be involved. Clearly, section 143(12) does not envisage reporting in Form ADT 4 by the statutory auditor during the “speculation” and “suspicion” stages. During these stages, the auditor’s procedures would be as provided under the SA 240. Having reached the stage of “reason to believe”, the auditor would be guided by the requirements of paragraphs 83 and 84 of this Guidance Note.

Examples of audit procedures which the auditor can perform when he has “reason to believe” that an offence involving fraud is being or has been committed is given below:

- a. Evaluating the evidences obtained or misstatements identified with professional skepticism.
- b. Introducing elements of unpredictability/surprise in carrying out specific audit procedures (for example, visiting certain sales locations normally not visited at year end to evaluate if there are any “Billed but Not Delivered” sales transactions).
- c. If considered necessary, recommending to the Board or Audit Committee to involve experts such as information technology specialists, forensic experts or fair valuation experts, etc., to carry out data analytics and investigation (Refer paragraph 84 below).
- d. Seeking additional audit evidence from sources outside of the entity being audited. For example, external confirmations which could be tailored to specific circumstances such as confirming the terms and conditions relating to sale, confirming the occurrence of specific transactions, etc.
- e. Focussed testing on period-end and year-end journal entries by a senior member of the engagement team.

- f. Carrying out a more critical evaluation and retrospective testing of accounting estimates to evaluate the reasonableness of management's judgement and existence of management bias.
- g. Consulting with experts to evaluate unusual and complex transactions.
- h. Performing certain procedures specific to account balance when such evidences particularly relate to any specific class of transaction or account balance. For example, in addition to sending written confirmations, major customers and suppliers could be directly contacted in order to seek more or different information.
- i. Where related party transactions are involved, critically evaluating the business rationale of the transactions and arm's length nature of such transactions.
- j. Re-performing certain critical reconciliations carried out by the entity.

84. Working with the Board or the Audit Committee in case the Auditor has Reasons to Believe a Fraud may Exist

There could be circumstances where the auditor identifies misstatements in account balance where a fraud or a significant risk factor was identified by him and therefore has reason to believe that a fraud may exist. However, the auditor may not have "knowledge" that a fraud actually exists. As per the SAs, the auditor may communicate such misstatements to the management and request them to carry out additional reviews to ensure that there are no other undetected misstatements.

The auditor may perform parallel procedures or work with the management to identify any other misstatement due to fraud within those account balances that may have remained undetected.

The outcome of such audit procedures will help the auditor conclude whether he has knowledge, that the suspected offence involving fraud has been or is being committed.

85. It may be noted that the above procedures (Refer paragraphs 83 and 84) represent enhanced audit procedures which the auditor carries out in the course of his audit with professional skepticism with the primary objective to ensure that the financial statements are not materially misstated due to fraud. The objective of the auditor is to obtain sufficient appropriate audit evidence about the assessed risks of material misstatement due to fraud, through designing and implementing appropriate responses.

Further, although the auditor may suspect or, in rare cases, identify the occurrence of fraud, the auditor does not make legal determination of whether fraud has actually occurred. Therefore, an auditor cannot make an assertion that an 'offence' involving fraud has been or is being committed against the company. Accordingly, in Form ADT – 4 the terminology used is 'suspected offence involving fraud'.

86. Reporting to the Board or Audit Committee on Auditor's Reason to Believe and Knowledge of Fraud against the Company by Officers or Employees of the Company

Sub-Rules (2) and (3) of Rule 13 of the Companies (Audit and Auditors) Rules, 2014 as amended by the Companies (Audit and Auditors) Amendment Rules, 2015, requires the auditor to report to the Board or the Audit Committee, as the case may be, immediately but not later than two days, after he comes to (have) knowledge of the fraud.

Sub-Rules (3) and (4) of Rule 13 of the Companies (Audit and Auditors) Rules, 2014 [as amended by the Companies (Audit and Auditors) Amendment Rules, 2015], require that in case of fraud involving an amount less than Rupees One Crore, the auditor should report the matter to the Audit Committee constituted under section 177 of the Companies Act, 2013 or the Board of Directors. The report should specify the following:

- Nature of fraud with description
- Approximate amount involved; and
- Parties involved

If the amount involved in the fraud or is expected to be involved is Rupees One Crore or more, the auditor is required to seek the reply or observations of the Board or the Audit Committee within forty-five days of such reporting.

The Rule does not prescribe the form or format in which the auditor should communicate to the Board or the Audit Committee.

87. Therefore, the auditor may use the Form ADT – 4 itself to report to the Board or Audit Committee duly filling in the necessary details, other than those relating to items (11), (12) and (14) of the Form relating to date of receipt of response from the Board or Audit Committee; the auditor's opinion if the reply of the Board or Audit Committee was satisfactory; and the details of steps taken by the company in this regard. Refer **Appendix 5** for illustrative format of reporting to the Board or the Audit Committee.

88. The auditor may send additional details of the basis on which the fraud is suspected, the period to which it relates to and the basis of estimating the amounts involved, to enable the Board or Audit Committee to pursue the matter further.

89. It may be noted that the timeline for reporting under Section 143(12) starts immediately as soon as the auditor has knowledge of the fraud. The auditor is not required to investigate the fraud so as to establish the entire magnitude, the period, the *modus operandi* and the persons involved since the requirement of Section 143(12) read with the Rule 13 of the Companies (Audit and Auditors) Rules, 2014, as amended by the Companies (Audit and Auditors) Amendment Rules, 2015, is not that the auditor has to perform a forensic audit.

90. Obtaining Response from the Board or Audit Committee

When a fraud, individually involving or expected to involve Rupees One Crore or more, is reported by the auditor to the Board or Audit Committee, they are required to evaluate the matter, where applicable and take appropriate action on the matter, including, where required an investigation/forensic audit conducted either by appropriate internal specialists of the company or external specialists/experts, and respond to the auditor within 45 days of the date of the auditor's communication.

The Companies (Audit and Auditors) Amendment Rules, 2015 do not specify that the auditor should obtain response from the Board or the Audit Committee in case a suspected offence of fraud involving or expected to involve an individual amount of less than Rupees One Crore is reported to them. However, as a matter of prudence and professional skepticism, the auditor should obtain the response from the Board or the Audit Committee even for such fraud, as this will enable the auditor to obtain further assurance and management's assertion that the amount involved or expected to be involved in the fraud was less than Rupees One Crore.

91. It will be the responsibility of the Board or Audit Committee to have appropriate procedures performed, including, where required an investigation/forensic audit. The action taken by the Board or Audit Committee pursuant to receipt of communication from the auditor may involve investigation/forensic audit by their internal auditors, internal team of senior management or by an external agency. Based on the steps taken, including any investigation/forensic audit on the matter reported, they are required to reply to the auditors.

92. An investigation will include a planning stage, a period when evidence is gathered, a review process, and a report to the client. The purpose of the investigation, in the case of an alleged fraud, would be to discover if a fraud had actually taken place, to identify those involved, to quantify the monetary amount of the fraud (i.e., the financial loss suffered by the client), and to ultimately present findings to the client and potentially to court. It is normally not as in-depth as a forensic audit and in fact may not be performed by forensic auditors.

93. 'Forensic audit' refers to the specific procedures carried out in order to produce evidence. Specialised audit techniques are used to identify and to gather evidence to prove, for example, use of information technology and data retrieval tools, data analytics, interrogation (not interview), critical evaluation of evidence, motive, evaluating patterns of information, duration of the alleged fraud and how it was conducted and concealed by the perpetrators, etc.. Evidence may also be gathered to support other issues which would be relevant in the event of a court case. Such issues could include:

- the suspect's motive and opportunity to commit fraud;
- whether the fraud involved collusion between several suspects;
- any physical evidence at the scene of the crime or contained in documents;
- comments made by the suspect during interviews and/or at the time of arrest; and
- attempts to destroy evidence.

Forensic audit is a very specialised engagement, which requires highly skilled team members who have experience not only of accounting and auditing techniques, but also, among other things, of the relevant legal framework.

III.960 Auditing Pronouncements

94. Rule 13 of the Companies (Audit and Auditors) Rules, 2014, as amended by the Companies (Audit and Auditors) Amendment Rules, 2015, does not state what should be the contents of the reply of the Board or Audit Committee in case a report on a suspected offence involving fraud is received by them from the auditor where the amount involved in the fraud or is expected to be involved is Rupees One Crore or more. However, it would be reasonable to presume that the reply of the Board or Audit Committee will include the following:

- An acknowledgement of having received the report on fraud from the auditor.
- Brief description of the fraud or suspected fraud.
- The steps taken by them pursuant to receipt of the report, including:
 - a. The manner in which they have followed up on the matter reported to them;
 - b. Involvement of specialists, internal and/or external, who have carried out investigation/forensic audit on their behalf;
 - c. The period covered by such investigation/forensic audit;
 - d. Their assessment of areas impacted by the fraud – company locations, account balances, categories of assets/liabilities/income/expenses, categories of customers/vendors, off-balance sheet items, etc.
 - e. The conclusion drawn by them based on such investigation/forensic audit:
 - *If the Board or Audit Committee is in agreement with the auditor's conclusion on fraud* – the cause of the fraud, persons involved, estimate of amounts involved, the period to which the fraud relates to, steps taken by them to remediate the reasons which caused the occurrence of the fraud, including changes to the internal control systems or plans thereto, the action taken on the persons involved in the fraud (including filing of civil/criminal complaints with law enforcement agencies, disciplinary actions, etc.), the status of reporting the matter to any other regulator (e.g. RBI, Tax authorities, etc.).
 - *If the investigation/forensic audit ordered by them is in progress as on the date of the reply* - the status of the investigation, the persons allegedly involved in the fraud, any preliminary amounts quantified on the fraud, steps taken in the interim including any action taken on the persons allegedly involved in the fraud (including filing of civil/criminal complaints with law enforcement agencies, disciplinary actions, etc.), the status of reporting the matter to any other regulator (e.g. RBI, Tax authorities, etc.), remediation plan to prevent further occurrences, etc.
- A copy of the investigation report/report on the forensic audit (preliminary/draft/final) or the procedures performed/being performed by them to substantiate the items stated above.

95. There may be instances where the Board or the Audit Committee does not concur with the auditor's belief that a suspected offence involving fraud is being or has been committed. If the Board or Audit Committee is not in agreement with the auditor's belief that a suspected offence

involving fraud has been or is being committed, the persuasive reasons therefor with supporting evidence should be provided in their reply to the auditor along with the other matters described in paragraph 94 above.

96. Evaluating Reply of the Board or Audit Committee

The auditor should evaluate the reply of the Board or Audit Committee received by him in response to his report to them on the suspected offence involving fraud. Such evaluation is required to enable the auditor to state if he is satisfied or not satisfied with the reply of the Board or Audit Committee on the matter reported to them.

97. Whilst Sub-Rule (2)(b) of Rule 13 of the Companies (Audit and Auditors) Rules, 2014, as amended by the Companies (Audit and Auditors) Amendment Rules, 2015, requires the auditor to forward his report along with his comments on the reply received from the Board or the Audit Committee, Form ADT-4 requires the auditor to only state if he is satisfied or not satisfied with the reply of the Board or the Audit Committee. Accordingly, the comments of the auditor as specified in the Sub-rule implies the statement of the auditor in Form ADT – 4 about his satisfaction or otherwise with the reply of the Board or the Audit Committee. For this purpose, the auditor should review the reply from the Board or the Audit Committee with the supporting evidence provided to determine the reasonability of the same.

98. Where the Board or the Audit Committee has provided its reply on the basis of an investigation/forensic audit, the auditor is not expected to re-perform or carry out an independent investigation/forensic audit to validate the same. The auditor should, however, review the process followed by the investigation/forensic audit to gain comfort on:

- the scope of the investigation/forensic audit,
- the period covered,
- the persons covered,
- information gathered/obtained,
- specific scope exclusions or limitations, if any, in the investigation/forensic audit,
- the reasonableness of the amounts identified as involved based on his professional judgement and his understanding of the suspected offence involving fraud, and
- the competence, experience and seniority of the persons who conducted the investigation/forensic audit and their independence and objectivity.

99. If the Board or the Audit Committee disagrees with the belief of the auditor that a suspected offence involving fraud exists and provides evidence in this regard, the auditor would consider such evidence and perform such further procedures as may be necessary to determine if his initial belief was appropriate under the circumstances. In addition to reviewing the matters stated in paragraph 98 above with increased professional skepticism, the following additional factors should also be considered by the auditor:

III.962 Auditing Pronouncements

- Whether the evidence provided in the reply was available when the auditor initially concluded that there was a fraud or is it new evidence. If it was an evidence or information that was previously considered by the auditor, the reason why the company has considered the same evidence or information differently.
- The reliability of the evidence now provided considering the risk of bias to overlook a fraud that is existing.
- The persuasiveness of the company's evidence or information that the suspected offence involving fraud does not exist, that is included in the company's reply.

100. Based on the additional procedures carried out by the auditor after considering the factors stated in paragraph 99 above, pursuant to the reply of the company disagreeing with the initial belief of the auditor that a suspected offence involving fraud is being or has been committed, if the auditor is convinced that his initial suspicion was incorrect, the need for reporting the matter to the Central Government would not be applicable. This situation would arise only if the auditor did not have the evidence or information that is now provided as part of the reply or additional information has now been provided to the auditor and there is persuasive evidence now available to convince the auditor that the suspected offence involving fraud does not exist.

Reporting to the Central Government in Form ADT-4

101. It may be noted that Sub-rule (2)(b) of Rule 13 of the Companies (Audit and Auditors) Rules, 2014, as amended by the Companies (Audit and Auditors) Amendment Rules, 2015, requires the auditor to forward his report and the reply or observations of the Board or the Audit Committee along with his comments (on such reply or observations) to the Central Government within 15 days of receipt of such reply. Consequently, it is not necessary that the auditor will always have 60 days to submit the Form ADT-4 to the Central Government since if the Board or the Audit Committee replies prior to 45 days of the date of the auditor reporting to them on the suspected offence involving fraud, the Form ADT - 4 will need to be submitted within 15 days of the receipt of reply from the Board or the Audit Committee. For example, if the Board or the Audit Committee replies in 24 days, the auditor will need to report in Form ADT-4 within 39 days i.e., 15 days of receipt of reply from the company.

102. If the auditor does not receive a reply to his communication to the Board or Audit Committee within 45 days, he shall forward his report to the Central Government along with a note containing the details of his report that was earlier forwarded to the Board or the Audit Committee for which he has not received any reply or observations within 15 days of the expiry of the 45 days.

103. If the auditor receives a reply from the Board or Audit Committee within the stipulated time of 45 days of his communication to them, the auditor should within 15 days of receipt of the reply send his report in Form ADT-4 (Refer **Appendix 6**) to the Central Government stating the following:

- the date on which he received the reply;
- a gist of the reply or observations of the Board or the Audit Committee to his report;

- whether he is satisfied or not satisfied with the reply of the Board or Audit Committee;
- details of steps, if any, taken by the company in this regard (furnishing full details with references); and
- any other relevant information.

A copy of the reply received from the Board or Audit Committee should also be attached to the Form ADT-4 when submitting to the Central Government.

104. In case the auditor is not satisfied with the reply of the Board or the Audit Committee, he should state the reasons for the same in the Form ADT-4 as part of item 15 to the Form “Any other relevant information”. The reasons the auditor may not be satisfied with the reply of the Board or the Audit Committee may, *inter alia*, include any of the following:

- He is not satisfied with the competence or seniority/experience of the person who has carried out the investigation/forensic audit on behalf of the Board or the Audit Committee.
- If only an investigation was carried out but considering the nature, size, complexity, motive of the suspected offence involving fraud, it needed a forensic audit to be carried out, thereby impacting the comprehensiveness of the procedures performed by the Board or the Audit Committee. (Refer paragraphs 92 and 93)
- Facts produced by the auditor in his report were overlooked by the Board or the Audit Committee resulting in differing conclusions with that of the auditor.
- Based on further procedures performed and evaluation of the additional evidence or information provided, if the auditor is not convinced with the Board or the Audit Committee reply that the suspected offence involving fraud does not exist.
- Period of coverage, persons covered, and areas covered or scope of the investigation/forensic audit was not adequate or appropriate.
- If the reply of the Board or the Audit Committee does not include any of the matters referred to in paragraph 94 above and the auditor considers such matter to be significant for the Board or the Audit Committee to have considered in their reply.

105. Management Representation

SA 580 - “Written Representations”, establishes requirements and provides guidance on obtaining appropriate representations from management. Because of the nature of fraud and the difficulties encountered by auditors in detecting material misstatements in the financial statements resulting from fraud, it is important that the auditor obtains a written representation from management and, where appropriate, those charged with governance confirming that they have disclosed to the auditor:

- a) The results of management’s assessment of the risk that the financial statements may be materially misstated as a result of fraud; and
- b) Their knowledge of actual, suspected or alleged fraud affecting the entity.

In addition to the management representations as discussed above, the auditor will be required to obtain certain specific representations with regard to the following:

III.964 Auditing Pronouncements

- a) Steps taken on fraud committed or being committed against the company.
- b) Matters included in the reply to the report of the auditor on suspected fraud.

Further when management is involved or suspected to be involved, the auditor should insist that the representations need to be provided by the Board or Audit Committee of the company.

Illustrative Management Representation Letter for steps taken by the Board or the Audit Committee on fraud reported by the auditor is provided in **Appendix 7**.

In the exceptional circumstances where the auditor has doubts about the integrity or honesty of those charged with governance, the auditor may consider it appropriate to obtain legal advice to assist in determining the appropriate course of action.

106. Audit Documentation and Quality Control

The documentation of the audit procedures performed from identifying the fraud risk till the identification of existence of fraud is critical as this would form the basis for matters reported to the Board or the Audit Committee and thereafter to the Central Government in Form ADT-4. This would also enable the auditor to demonstrate reporting in good faith to ensure protection under Section 143(13) and Section 456.

107. Auditors should, taking into account the provisions of SA 230, *inter alia*, consider the following items for being maintained as part of the audit documentation in connection with reporting under Section 143(12):

- a) Minutes of inquiries conducted with those charged with governance, internal auditors, senior management and relevant employees during the course of planning and minutes of engagement team discussions on fraud risk factors. (Refer paragraphs 61 and 62)
- b) The fraud risk factor or suspicion which led to identification of evidences which provided the knowledge to the auditor that a suspected offence involving fraud is being or has been committed. (Refer paragraphs 80.a and 80.b)
- c) Specific and additional audit procedures carried out by the auditor to address the assessed risk of material misstatement due to fraud. (Refer paragraphs 80.c, 80.d, 83 and 84)
- d) Memo documenting the professional judgement exercised by the auditor at various stages of performing the planned procedures.
- e) Details of evidences obtained during the course of performing the planned procedures. (Refer paragraphs 80.c, 80.d, 83 and 84)
- f) Copies of correspondences with the Board or Audit Committee on the procedures/investigations carried out, to conclude on matters reported by the auditor. (Refer paragraph 84)
- g) Copy of the report to the Board or Audit Committee along with attachments thereto. (Refer paragraphs 86 to 89)
- h) Copy of response received from the Board or the Audit Committee along with the supporting documents provided by them in their response. (Refer paragraphs 90 to 95)

- i) If an investigation/forensic audit was carried out by the Board or Audit Committee, how the auditor evaluated the competency and independence of the person who carried out the investigation and adequacy of the scope of work provided to them. (Refer paragraphs 96 to 100)
- j) Details of other procedures carried out to evaluate the reasonableness of investigation/forensic audit/action taken by the Board or Audit Committee in respect of the matter reported. (Refer paragraphs 96 to 100)
- k) Conclusions on whether or not the auditor was satisfied with the procedures carried out by the Board or the Audit Committee along with the basis and reasons therefor. (Refer paragraphs 98 to 104)
- l) If the auditor is satisfied with the Board or the Audit Committee response that the suspected offence involving fraud does not exist, the details of additional procedures performed, supporting evidence and additional evidence received by the auditor in this regard.(Refer paragraphs 99 and 100)
- m) Copy of the report submitted to the Central Government. The matters included in this report needs to be appropriately cross-referenced to the source documents. (Refer paragraphs 102,104 and paragraph 109)
- n) Management representations.(Refer paragraph 105)
- o) Documentation on how the auditor evaluated the implications of the suspected offence involving fraud on other aspects of audit and on the financial statements– whether the impact is isolated occurrence or pervasive (Refer paragraphs 106 and 110).
- p) If experts and specialists were involved in carrying out these procedures, then their work papers should also form part of the auditor’s work papers.
- q) Any memo on consultations the auditor had during the course of carrying out the procedures with regard to fraud.
- r) Evidence of a quality control review having been performed on the audit procedures carried out and the report submitted to the Board or Audit Committee and the Central Government. (Refer paragraph 108)

108. Whilst reporting under Section 143(12) is not a separate engagement from an audit of financial statements, it arises from such an audit, since reporting under Section 143(12) is consequent to any fraud noted in the course of performance of duties as auditor. Further, since the auditor is required to report to the Central Government in case of fraud against the company, and given the exceptional nature of circumstances, the auditor should ensure that the reporting under Section 143(12) is subject to quality control considering the provisions of SA 220 – “Quality Control for an Audit of Financial Statements”.

109. Whilst the Act or the Rules do not specify that the auditor should send a copy of the Form ADT-4 sent to the Central Government to the Board or the Audit Committee, the Act or the Rules do not prohibit the same. Accordingly, the auditor may send a copy of the Form ADT-4 and the documents annexed thereto to the Board or the Audit Committee for their information and records.

110. Evaluation of Impact on the Financial Statements, Audit Opinion on the Financial Statements and Internal Financial Controls

If a fraud has been noted and reported under Section 143(12), the auditor will have to evaluate the implications of the matter reported in the financial statements, on his audit opinion on the financial statements and on any other matter to be included in his report under Sections 143(1) to (3) including with regard to reporting on the adequacy and operating effectiveness of the internal financial controls. The following will need to be considered by the auditor in this regard:

- When the auditor has reason to believe that the management is involved in the fraud, how the auditor re-evaluated the risks of material misstatement due to fraud and reliability of the evidences previously obtained.
- When the auditor confirms that, or is unable to conclude whether the financial statements are materially misstated due to fraud, how the auditor evaluated the implications for the audit.

111. Consideration in Joint Audits

In case of joint audits, where a suspected offence involving fraud against the company by its officers or employees is identified/noted by one of the joint auditors, such joint auditor should communicate the same to the other joint auditor(s) to enable them to consider and evaluate if the same could exist in the areas/account balances audited by them and each of the joint auditor should individually comply with the requirements of this Guidance Note.

The reporting to those charged with governance and to the Central Government as required under Rule 13 of the Companies (Audit and Auditors) Rules, 2014, as amended by the Companies (Audit and Auditors) Amendment Rules, 2015, may be carried out by the joint auditor who identified/noted the suspected fraud or by any or all of the joint auditors together.

When the reporting in Form ADT – 4 is carried out only by the joint auditor who identified/noted the suspected fraud, such joint auditor should provide a copy of the Form ADT – 4 to the other joint auditors.

112. Consideration of Disclosure of Frauds in the Board's Report

SA 720 – “The Auditor's Responsibility in Relation to Other Information in Documents Containing Audited Financial Statements” requires the auditor to read the other information in documents that contain audited financial statements because the credibility of the audited financial statements may be undermined by material inconsistencies between the audited financial statements and other information.

Pursuant to the amendments to Section 143(12) of the Companies Act, 2013 read with Rule 13(3) and (4) of the Companies (Audit and Auditors) Rules, 2014 [as amended by the Companies (Audit and Auditors) Amendment Rules, 2015], the auditor is required to report a fraud involving less than Rupees One Crore only to the Audit Committee or the Board of Directors. Such frauds may have been appropriately dealt with in the audited financial statements of the company. However, as per the aforesaid Rules, the Board of Directors' report is required to disclose the following information in respect of such frauds:

- Nature of fraud with description
- Approximate amount involved
- Parties involved, if remedial action not taken; and
- Remedial action taken

Since the Board's report also includes audited financial statements, the auditor should read the disclosures relating to fraud in the Board's report to determine if they are consistent with the matter reported by the auditor and dealt with in the audited financial statements. In case the auditor observes any material inconsistency in the disclosure in the Board' report in this regard, the auditor should consider the requirements of SA 720 to determine the manner of dealing with the inconsistency observed.

SECTION V: APPENDICES

APPENDIX 1

(Refer paragraph 61)

Illustrative Matters for Engagement Team Discussion on Fraud

Discussion among the engagement team

A discussion among the engagement team members and a determination by the engagement partner of matters which are to be communicated to those team members not involved in the discussion should place particular emphasis on how and where the entity's financial statements may be susceptible to material misstatement due to fraud, including how fraud might occur.

The discussion should occur notwithstanding the engagement team members' beliefs that management and those charged with governance are honest and have integrity.

Discussing the susceptibility of the entity's financial statements to material misstatement due to fraud with the engagement team:

- Provides an opportunity for more experienced engagement team members to share their insights about how and where the financial statements may be susceptible to material misstatement due to fraud.
- Enables the auditor to consider an appropriate response to such susceptibility and to determine which members of the engagement team will conduct certain audit procedures.
- Permits the auditor to determine how the results of audit procedures will be shared among the engagement team and how to deal with any allegations of fraud that may come to the auditor's attention.

The discussion may include such matters as:

III.968 Auditing Pronouncements

- An exchange of ideas among engagement team members about how and where they believe the entity's financial statements may be susceptible to material misstatement due to fraud, how management could perpetrate and conceal fraudulent financial reporting, and how assets of the entity could be misappropriated.
- A consideration of circumstances that might be indicative of earnings management and the practices that might be followed by management to manage earnings that could lead to fraudulent financial reporting.
- A consideration of the known external and internal factors affecting the entity that may create an incentive or pressure for management or others to commit fraud, provide the opportunity for fraud to be perpetrated, and indicate a culture or environment that enables management or others to rationalise committing fraud.
- A consideration of management's involvement in overseeing employees with access to cash or other assets susceptible to misappropriation.
- A consideration of any unusual or unexplained changes in behavior or lifestyle of management or employees which have come to the attention of the engagement team.
- An emphasis on the importance of maintaining a proper state of mind throughout the audit regarding the potential for material misstatement due to fraud.
- A consideration of the types of circumstances that, if encountered, might indicate the possibility of fraud.
- A consideration of how an element of unpredictability will be incorporated into the nature, timing and extent of the audit procedures to be performed.
- A consideration of the audit procedures that might be selected to respond to the susceptibility of the entity's financial statement to material misstatement due to fraud and whether certain types of audit procedures are more effective than others.
- A consideration of any allegations of fraud that have come to the auditor's attention.
- A consideration of the risk of management override of controls.

Illustrative matters for consideration during engagement team discussions on fraud risk factors

- What are the business risks that the entity is subject to?
- How might fraud, including fraudulent financial reporting, occur at the entity? How can it be concealed?

- Have there been any frauds that have been reported in the same industry as the entity? If so, is it possible that the fraud identified is applicable to the entity and should be considered?
- Where are the financial statements susceptible to material misstatement as a result of fraud or error?
- How could assets at the entity be misappropriated?
- Is there a high risk of management override of controls?
- What is the susceptibility of financial statements to material misstatement due to fraud or error that could result from the entity's related party relationships and transactions?
- Are there circumstances that indicate earnings management and the practices that might be followed by management to manage earnings that could lead to fraudulent financial reporting?
- Are there known external or internal factors affecting the entity that may create an incentive or pressure for management and others to commit fraud, provide the opportunity for fraud to be perpetrated, indicate a culture or environment that enables management or others to rationalise committing fraud?
- Is the financial stability or profitability of the entity threatened by economic, industry, or other operating conditions?
- Does the nature of the entity's operations provide opportunities to engage in fraudulent financial reporting?
- Does the entity have a complex or unstable organisational structure?
- Are there any unusual or unexplained changes in behavior or lifestyle of management and/or others?
- Have there been any actual frauds uncovered at the entity?
- If so, what was the circumstances surrounding the fraud and what was the outcome of the investigation?
- Did management and others take the appropriate actions to address the fraud?
- Have there been any allegations of fraud?

In addition to assessing the susceptibility to fraud, engagement teams may consider the following matters in addressing the fraud risk factors:

- What insights can be shared amongst engagement team members based on the knowledge of the entity?

III.970 Auditing Pronouncements

- Does each engagement team member understand the potential for material misstatements related to each audit area they have been assigned to?
- What types of circumstances, if encountered, during the engagement could indicate a possibility of fraud?
- What type of procedures might be selected to respond to possible fraud?
- Are there certain types of procedures that are more effective than others?
- Is the engagement team aware of the importance of maintaining a proper state of mind throughout the audit regarding the potential for material misstatement due to fraud?
- How will the element of unpredictability be incorporated into the nature, timing and extent of the audit procedures to be performed?
- What happens if fraud is identified during the engagement?

APPENDIX 2

(Refer paragraphs 62 and 65)

Illustrative Checklist for Inquiries with Board/ Audit Committee, Management and Internal Auditor

Inquiries of Management and Others regarding the risk of fraud:

Document responses after each chart within the space provided.

Questions Regarding the Identification of Fraud Risks and Other Risks of Material Misstatement

The following questions are designed to identify fraud risks that are known to management. Questions may be directed to those individuals indicated:

Questions	Board/ Audit Committee	CEO	CFO	Internal Audit	Others
What are your views regarding the risks of fraud?	*	*	*	*	
Do you have knowledge of any actual or suspected fraud affecting the entity? If so, describe each instance including:	*	*	*	*	

Questions	Board/ Audit Committee	CEO	CFO	Internal Audit	Others
a. The individual's position within or relationship to the entity.					
b. Identification of others involved or that may have been involved in the matter and their relationship to the entity or any of its employees.					
c. The scheme used or possibly used to misstate the financial statement amounts and/or disclosures.					
d. Whether the misstatement or potential misstatement was detected in a timely manner by the internal controls, especially the antifraud programs and controls, established by management.					
e. If the misstatement or potential misstatement was not detected in a timely manner, indicate whether it was because the programs and controls were: <ul style="list-style-type: none"> i. Not in place ii. Improperly designed iii. Properly designed but not operating effectively. 					
f. How management (or others, such as the Audit Committee) became aware of the scheme used or possibly used to misstate the financial statements.					
g. The actual or potential effect on the financial statement amounts and/or disclosures.					
h. The actions that management and/or those charged with governance (e.g., the Audit Committee) took in response to each instance described (e.g., investigation, restating the financial statements). If no action was taken, please explain the reasons for that decision.					
i. Any disciplinary actions that management and/or those charged with governance (e.g., the Audit Committee) took with respect to the individual(s) involved in the matters described. If there was no disciplinary action taken, please indicate such and explain why no action was considered necessary.					
j. How management plans to prevent, deter, and detect the risks relating to such schemes in the future.					
Provide copies of reports on suspected fraud received from the cost	*				

III.972 Auditing Pronouncements

Questions	Board/ Audit Committee	CEO	CFO	Internal Audit	Others
auditors, secretarial auditors and erstwhile statutory auditors in the last year in terms of Section 143(12) of the Companies Act, 2013 and the Rules thereunder, along with the responses of the company provided to such persons and copies of reporting on fraud to any other regulatory authority.					
Are you aware of allegations of fraud or suspected fraud affecting the entity (e.g., received in communications from employees, former employees, analysts, regulators, short sellers, or other investors)? If so, describe each instance, addressing items (a) through (j) from the above question as applicable.	*	*	*	*	
Is the entity in compliance with laws and regulations that may have a material effect on the financial statements?	*	*	*		
Are you aware of tips or complaints regarding the entity's financial reporting (including those received through any internal whistleblower program, if such program exists) and, if so, what were your responses to such tips and complaints?	*	*	*		
Have you reported to those charged with governance on how the entity's internal control serves to prevent and detect material misstatements due to fraud?		*	*		
Are you aware of instances of management override of controls and the nature and circumstances of such overrides?				*	
<i>[To the extent necessary, expand inquiries of the audit committee, or equivalent (or its chair), management, the internal audit function, and others within the entity who might reasonably be expected to have information that is important to the identification and assessment of risks of material misstatement;]</i>	*	*	*	*	*

Documentation

Questions Regarding Processes to Prevent or Mitigate Fraud Risks

The following questions are designed to identify the processes, including absence thereof or weaknesses therein, to prevent or mitigate fraud risks. Questions may be directed to those individuals indicated:

Questions	Board or the Audit Committee	CEO	CFO	Internal Audit	Others
Does management perform an assessment of the risk that the financial statements may be materially misstated due to fraud (e.g., processes used to identify, analyse, and manage fraud faced by the entity)? If so, describe such processes, including the nature, extent, and frequency of such assessments.		*	*		
Describe your understanding about management's process for identifying, responding to, and monitoring the risks of fraud in the entity, including any specific risks of fraud that management has identified or that have been brought to its attention, or classes of transactions, account balances, or disclosures for which a risk of fraud is likely to exist.	*	*	*	*	
Has the entity established programs and controls to mitigate specific fraud risks the entity has identified, or that otherwise help to prevent, deter, and detect fraud? If so, describe such programs and controls, including how management monitors them.		*	*		
Describe how those charged with governance exercise oversight of management's processes for identifying and responding to the risks of fraud in the entity and the internal control that management has established to mitigate these risks.	*	*	*		
Has management communicated with those charged with governance (e.g., Audit Committee; others with equivalent authority and responsibility such as the Board of Directors, the board of trustees, or the owner-manager of the entity) regarding its processes for identifying and responding to the risks of fraud in the entity? Describe the frequency, nature, and extent of such communications.		*	*		
Has management communicated to employees its		*	*		

III.974 Auditing Pronouncements

Questions	Board or the Audit Committee	CEO	CFO	Internal Audit	Others
views on business practices and ethical behavior? If so, how?					
Does the entity have a compliance-monitoring process? If so, describe the process.		*	*		
Describe controls that the entity has established to address risks of fraud the entity has identified, or that otherwise help to prevent and detect fraud, including how management monitors those controls.		*	*		
For entities with multiple locations, describe (a) the nature and extent of monitoring of operating locations or business segments, and (b) whether there are particular operating locations or business segments for which a risk of fraud may be more likely to exist.		*	*		
Has the entity established policies and procedures regarding compliance with laws and regulations (including the prevention of non-compliance)? If so, describe those policies. If not, explain why. What do you do to check compliance with this policy?		*	*		
Has the entity issued directives requiring periodic representations from management at appropriate levels of authority concerning compliance with laws and regulations? If not, why?		*	*		
Has the entity obtained periodic representations from management at appropriate levels of authority concerning compliance with laws and regulations?		*	*		
Has internal audit performed any procedures during the year to identify or detect fraud? If yes, has management satisfactorily responded to any findings resulting from those procedures performed? Note: Consider any significant risks identified when describing the role of those charged with governance (e.g., the Audit Committee) in addressing the risk that management may commit fraud through an override of existing controls.				*

APPENDIX 3

(Refer paragraph 78)

Illustrative Fraud Risk Factors

(Refer Appendix I of SA 240)

The fraud risk factors identified in this Appendix are examples of such factors that may be faced by auditors in a broad range of situations. Separately presented are examples relating to the two types of fraud relevant to the auditor's consideration, i.e., fraudulent financial reporting and misappropriation of assets. For each of these types of fraud, the risk factors are further classified based on the three conditions generally present when material misstatements due to fraud occur: (a) incentives/pressures, (b) opportunities, and (c) attitudes/rationalizations. Although the risk factors cover a broad range of situations, they are only examples and, accordingly, the auditor may identify additional or different risk factors. Not all of these examples are relevant in all circumstances, and some may be of greater or lesser significance in entities of different size or with different ownership characteristics or circumstances. Also, the order of the examples of risk factors provided is not intended to reflect their relative importance or frequency of occurrence.

Risk Factors Relating to Misstatements Arising from Fraudulent Financial Reporting

The following are examples of risk factors relating to misstatements arising from fraudulent financial reporting.

Incentives/Pressures

Financial stability or profitability is threatened by economic, industry, or entity operating conditions, such as (or as indicated by):

- High degree of competition or market saturation, accompanied by declining margins.
- High vulnerability to rapid changes, such as changes in technology, product obsolescence, or interest rates.
- Significant declines in customer demand and increasing business failures in either the industry or overall economy.
- Operating losses making the threat of bankruptcy, foreclosure, or hostile takeover imminent.
- Recurring negative cash flows from operations or an inability to generate cash flows from operations while reporting earnings and earnings growth.

III.976 Auditing Pronouncements

- Rapid growth or unusual profitability especially compared to that of other companies in the same industry.
- New accounting, statutory, or regulatory requirements.

Excessive pressure exists for management to meet the requirements or expectations of third parties due to the following:

- Profitability or trend level expectations of investment analysts, institutional investors, significant creditors, or other external parties (particularly expectations that are unduly aggressive or unrealistic), including expectations created by management in, for example, overly optimistic press releases or annual report messages.
- Need to obtain additional debt or equity financing to stay competitive - including financing of major research and development or capital expenditures.
- Marginal ability to meet exchange listing requirements or debt repayment or other debt covenant requirements.
- Perceived or real adverse effects of reporting poor financial results on significant pending transactions, such as business combinations or contract awards.

Information available indicates that the personal financial situation of management or those charged with governance is threatened by the entity's financial performance arising from the following:

- Significant financial interests in the entity.
- Significant portions of their compensation (for example, bonuses, stock options, and earn-out arrangements) being contingent upon achieving aggressive targets for stock price, operating results, financial position, or cash flow.
- Personal guarantees of debts of the entity.
- There is excessive pressure on management or operating personnel to meet financial targets established by those charged with governance, including sales or profitability incentive goals.

Opportunities

The nature of the industry or the entity's operations provides opportunities to engage in fraudulent financial reporting that can arise from the following:

- Significant related-party transactions not in the ordinary course of business or with related entities not audited or audited by another firm.

- A strong financial presence or ability to dominate a certain industry sector that allows the entity to dictate terms or conditions to suppliers or customers that may result in inappropriate or non-arm's-length transactions.
- Assets, liabilities, revenues, or expenses based on significant estimates that involve subjective judgments or uncertainties that are difficult to corroborate.
- Significant, unusual, or highly complex transactions, especially those close to period end that pose difficult "substance over form" questions.
- Significant operations located or conducted across international borders in jurisdictions where differing business environments and cultures exist.
- Use of business intermediaries for which there appears to be no clear business justification.
- Significant bank accounts or subsidiary or branch operations in tax-haven jurisdictions for which there appears to be no clear business justification.

The monitoring of management is not effective as a result of the following:

- Domination of management by a single person or small group (in a non-owner managed business) without compensating controls.
- Oversight by those charged with governance over the financial reporting process and internal control is not effective.

There is a complex or unstable organizational structure, as evidenced by the following:

- Difficulty in determining the organization or individuals that have controlling interest in the entity.
- Overly complex organizational structure involving unusual legal entities or managerial lines of authority.
- High turnover of senior management, legal counsel, or those charged with governance.

Internal control components are deficient as a result of the following:

- Inadequate monitoring of controls, including automated controls and controls over interim financial reporting (where external reporting is required).
- High turnover rates or employment of accounting, internal audit, or information technology staff that are not effective.
- Accounting and information systems that are not effective, including situations involving significant deficiencies in internal control.

Attitudes/Rationalizations

III.978 Auditing Pronouncements

- Communication, implementation, support, or enforcement of the entity's values or ethical standards by management, or the communication of inappropriate values or ethical standards, that are not effective.
- Non-financial management's excessive participation in or preoccupation with the selection of accounting policies or the determination of significant estimates.
- Known history of violations of securities laws or other laws and regulations, or claims against the entity, its senior management, or those charged with governance alleging fraud or violations of laws and regulations.
- Excessive interest by management in maintaining or increasing the entity's stock price or earnings trend.
- The practice by management of committing to analysts, creditors, and other third parties to achieve aggressive or unrealistic forecasts.
- Management failing to remedy known significant deficiencies in internal control on a timely basis.
- An interest by management in employing inappropriate means to minimize reported earnings for tax-motivated reasons.
- Low morale among senior management.
- The owner-manager makes no distinction between personal and business transactions.
- Dispute between shareholders in a closely held entity.
- Recurring attempts by management to justify marginal or inappropriate accounting on the basis of materiality.
- The relationship between management and the current or predecessor auditor is strained, as exhibited by the following:
 - Frequent disputes with the current or predecessor auditor on accounting, auditing, or reporting matters.
 - Unreasonable demands on the auditor, such as unrealistic time constraints regarding the completion of the audit or the issuance of the auditor's report.
 - Restrictions on the auditor that inappropriately limit access to people or information or the ability to communicate effectively with those charged with governance.
 - Domineering management behavior in dealing with the auditor, especially involving attempts to influence the scope of the auditor's work or the selection or continuance of personnel assigned to or consulted on the audit engagement.

Risk Factors Arising from Misstatements Arising from Misappropriation of Assets

Risk factors that relate to misstatements arising from misappropriation of assets are also classified according to the three conditions generally present when fraud exists: incentives/pressures, opportunities, and attitudes/rationalization. Some of the risk factors related to misstatements arising from fraudulent financial reporting also may be present when misstatements arising from misappropriation of assets occur. For example, ineffective monitoring of management and other deficiencies in internal control may be present when misstatements due to either fraudulent financial reporting or misappropriation of assets exist. The following are examples of risk factors related to misstatements arising from misappropriation of assets.

Incentives/Pressures

- Personal financial obligations may create pressure on management or employees with access to cash or other assets susceptible to theft to misappropriate those assets.
- Adverse relationships between the entity and employees with access to cash or other assets susceptible to theft may motivate those employees to misappropriate those assets. For example, adverse relationships may be created by the following:
 - Known or anticipated future employee layoffs.
 - Recent or anticipated changes to employee compensation or benefit plans.
 - Promotions, compensation, or other rewards inconsistent with expectations.

Opportunities

Certain characteristics or circumstances may increase the susceptibility of assets to misappropriation. For example, opportunities to misappropriate assets increase when there are the following:

- Large amounts of cash on hand or processed.
- Inventory items that are small in size, of high value, or in high demand.
- Easily convertible assets, such as bearer bonds, diamonds, or computer chips.
- Fixed assets which are small in size, marketable, or lacking observable identification of ownership.
- Inadequate internal control over assets may increase the susceptibility of misappropriation of those assets. For example, misappropriation of assets may occur because there is the following:
 - Inadequate segregation of duties or independent checks.

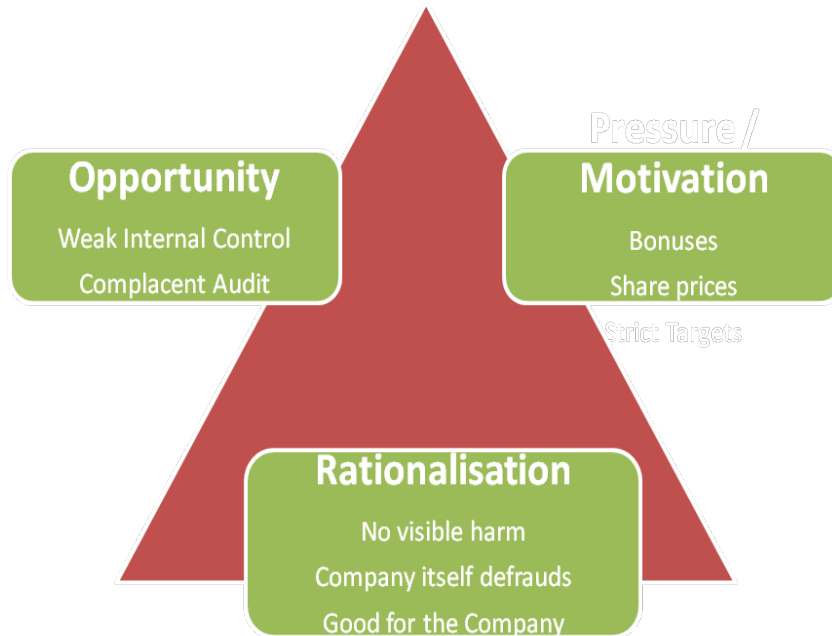

III.980 Auditing Pronouncements

- Inadequate oversight of senior management expenditures, such as travel and other reimbursements.
- Inadequate management oversight of employees responsible for assets, for example, inadequate supervision or monitoring of remote locations.
- Inadequate job applicant screening of employees with access to assets.
- Inadequate record keeping with respect to assets.
- Inadequate system of authorization and approval of transactions (for example, in purchasing).
- Inadequate physical safeguards over cash, investments, inventory, or fixed assets.
- Lack of complete and timely reconciliations of assets.
- Lack of timely and appropriate documentation of transactions, for example, credits for merchandise returns.
- Lack of mandatory vacations for employees performing key control functions.
- Inadequate management understanding of information technology, which enables information technology employees to perpetrate a misappropriation.
- Inadequate access controls over automated records, including controls over and review of computer systems event logs.

Attitudes/Rationalizations

- Disregard for the need for monitoring or reducing risks related to misappropriations of assets.
- Disregard for internal control over misappropriation of assets by overriding existing controls or by failing to take appropriate remedial action on known deficiencies in internal control.
- Behavior indicating displeasure or dissatisfaction with the entity or its treatment of the employee.
- Changes in behavior or lifestyle that may indicate assets have been misappropriated.
- Tolerance of petty theft.

The Fraud Triangle – Risk factors

Additional Examples of Fraud Risk Factors for Consideration by Auditors (these are in addition to those stated in SA 240)

Probable areas where fraud may occur:

- Improper Disclosures.
- Expenses.
- Liabilities.
- Reserves.
- Bribery and kickbacks.
- Cash and bank balances.
- Inflating the purchase consideration for acquisition of business and thereby recording fictitious Goodwill.
- Investments.
- Asset misappropriation.
- Trade Receivable.
- Inventory.
- Revenue Recognition.

Adverse situations impacting the company:

III.982 Auditing Pronouncements

- Heavy rejections of stores, spares and equipment in a factory could be used as means for smuggling good stocks.
- Situation of disorderliness.
- Non-reconciliation of Bank Statements for a long period of time.
- Disaster situations like floods or fire whereby assets are deliberately pilfered.
- Sudden profits in otherwise loss making business not supported by any reasonable change in environment.
- Consistent losses in otherwise thriving industry.
- Situation of incomplete information like missing records.
- Absence of rotation of duties or prolonged exposure in the same area.
- Close nexus with vendors, clients or external parties whereby preference is given to one party over the other though the terms of trade may be unfavorable.
- Domination of management by a single person.

Favorable situations that could also be indicative of fraud:

- One way errors – Where the store keeper always show excessive inventory and has never reported shortages.
- Inefficient accountant suddenly turns very responsible and undertakes extraordinary work such as a reconciliation of long-outstanding/overdue receivable or payable balances, which bears fruits.
- An accountant/employee pays up from his own pocket to make up for the lapse.
- Employee does not take advances/cash float when he goes on outstation tours for company purposes.
- Extreme behavior of being very obedient or friendly or compliant.
- No significant over-dues/delinquencies not commensurate with industry norms.

Common situations in computerised environments where frauds are likely to take place:

- Migration from manual system to computerised system or migration from one application to a new one where migration is enforced on staff, the timeline for migration appears inadequate or parallel alternate records in the erstwhile system are not maintained.
- Implementing computerised system without staff orientation.
- Teething problems in implementation or customisation of computerised systems could be used as camouflaging or cloaking devices for frauds or hiding one's own inefficiencies.
- Frauds using excel spread sheets – cells with values hidden but included in totals; values directly input in cells which normally have formulas or values added in cells which have formulas, etc.

Discrepancies/unusual transactions in the accounting records, including:

- Transactions that are not recorded in a complete or timely manner or are improperly recorded as to amount, accounting period, classification, or entity policy.
- Unsupported or unauthorised balances or transactions.
- Inter-company funding arrangements not in a transparent manner.
- Funding from unknown parties or at valuations that do not appear arm's length.
- Ownership changes in a dormant company or significant business activity in an otherwise dormant company.
- Last-minute adjustments that significantly affect financial results.
- Evidence of employees' access to systems and records inconsistent with that necessary to perform their authorised duties.
- Tips or complaints to the auditor about alleged fraud.

Conflicting or missing evidence, including:

- Missing documents.
- Documents that appear to have been altered.
- Unavailability of other than photocopied or electronically transmitted documents when documents in original form are expected to exist.
- Significant unexplained items on reconciliations.
- Unusual balance sheet changes or changes in trends or important financial statement ratios or relationships, for example, receivables growing faster than revenues.
- Inconsistent, vague, or implausible responses from management or employees arising from inquiries or analytical procedures.
- Unusual discrepancies between the entity's records and confirmation replies.
- Large numbers of credit entries and other adjustments made to accounts receivable records.

Common fraud schemes in revenue recognition:

- Recording of fictitious revenues.
- Recognition of revenue when products or services are not delivered, delivery is incomplete, or delivered without customer acceptance.
- Recognition of revenue from sales transactions billed, but not shipped ("bill and hold").
- Recognition of revenue from excessive shipments to resellers beyond actual demand ("channel stuffing").
- Recognition of revenue from sales where collectability is not reasonably assured.
- Recognition of revenue from sales improperly financed by the selling entity.

III.984 Auditing Pronouncements

- Recognition of revenue for goods on consignment.
- Recognition of revenue when disputes or claims exist.
- Recognition by a lessor of revenue from an operating lease as a sale.
- Failure to establish appropriate provisions for sales discounts and other allowances.
- Failure to establish appropriate provisions for rights to refunds or exchange, cancellation or refusal rights, or liberal unconditional rights of return granted through undisclosed verbal or written agreement (“side agreements”).
- Recognizing inappropriate amount of revenue from swaps or barter arrangements.
- Improper recognition of revenue from long-term contracts (including those accounted for using percentage of completion).
- Recognition of revenue in the wrong period either by holding the books open after period-end or by closing the books prior to period-end.
- Recognition of revenue where there are contingencies associated with the transactions that have not yet been resolved.
- Recognition of revenue associated with undelivered elements of multiple-elements contracts (“bundled contracts”).

APPENDIX 4

(Refer paragraph 79)

Illustrative Possible Audit Procedures to Address the Assessed Risks of Material Misstatement due to Fraud

(Refer Appendix 2 of SA 240)

The following are examples of possible audit procedures to address the assessed risks of material misstatement due to fraud resulting from both fraudulent financial reporting and misappropriation of assets. Although these procedures cover a broad range of situations, they are only examples and, accordingly they may not be the most appropriate nor necessary in each circumstance. Also the order of the procedures provided is not intended to reflect their relative importance.

Consideration at the Assertion Level

Specific responses to the auditor’s assessment of the risks of material misstatement due to fraud will vary depending upon the types or combinations of fraud risk factors or conditions identified, and the classes of transactions, account balances, disclosures and assertions they may affect. The following are specific examples of responses:

- Visiting locations or performing certain tests on a surprise or unannounced basis. For example, observing inventory at locations where auditor attendance has not been previously announced or counting cash at a particular date on a surprise basis.

- Requesting that inventories be counted at the end of the reporting period or on a date closer to period end to minimize the risk of manipulation of balances in the period between the date of completion of the count and the end of the reporting period.
- Altering the audit approach in the current year. For example, contacting major customers and suppliers orally in addition to sending written confirmation, sending confirmation requests to a specific party within an organization, or seeking more or different information.
- Performing a detailed review of the entity's quarter-end or year-end adjusting entries and investigating any that appear unusual as to nature or amount.
- For significant and unusual transactions, particularly those occurring at or near year-end, investigating the possibility of related parties and the sources of financial resources supporting the transactions.
- Performing substantive analytical procedures using disaggregated data. For example, comparing sales and cost of sales by location, line of business or month to expectations developed by the auditor.
- Conducting interviews of personnel involved in areas where a risk of material misstatement due to fraud has been identified, to obtain their insights about the risk and whether, or how, controls address the risk.
- When other independent auditors are auditing the financial statements of one or more subsidiaries, divisions or branches, discussing with them the extent of work necessary to be performed to address the assessed risk of material misstatement due to fraud resulting from transactions and activities among these components.
- If the work of an expert becomes particularly significant with respect to a financial statement item for which the assessed risk of misstatement due to fraud is high, performing additional procedures relating to some or all of the expert's assumptions, methods or findings to determine that the findings are not unreasonable, or engaging another expert for that purpose.
- Performing audit procedures to analyse selected opening balance sheet accounts of previously audited financial statements to assess how certain issues involving accounting estimates and judgments, for example, an allowance for sales returns, were resolved with the benefit of hindsight.
- Performing procedures on account or other reconciliations prepared by the entity, including considering reconciliations performed at interim periods.
- Performing computer-assisted techniques, such as data mining to test for anomalies in a population.
- Testing the integrity of computer-produced records and transactions.
- Seeking additional audit evidence from sources outside of the entity being audited.

Specific Responses—Misstatement Resulting from Fraudulent Financial Reporting

III.986 Auditing Pronouncements

Examples of responses to the auditor's assessment of the risks of material misstatement due to fraudulent financial reporting are as follows:

Revenue Recognition

- Performing substantive analytical procedures relating to revenue using disaggregated data, for example, comparing revenue reported by month and by product line or business segment during the current reporting period with comparable prior periods. Computer-assisted audit techniques may be useful in identifying unusual or unexpected revenue relationships or transactions.
- Confirming with customers certain relevant contract terms and the absence of side agreements, because the appropriate accounting often is influenced by such terms or agreements and basis for rebates or the period to which they relate are often poorly documented. For example, acceptance criteria, delivery and payment terms, the absence of future or continuing vendor obligations, the right to return the product, guaranteed resale amounts, and cancellation or refund provisions often are relevant in such circumstances.
- Inquiring of the entity's sales and marketing personnel or in-house legal counsel regarding sales or shipments near the end of the period and their knowledge of any unusual terms or conditions associated with these transactions.
- Being physically present at one or more locations at period end to observe goods being shipped or being readied for shipment (or returns awaiting processing) and performing other appropriate sales and inventory cut-off procedures.
- For those situations for which revenue transactions are electronically initiated, processed, and recorded, testing controls to determine whether they provide assurance that recorded revenue transactions occurred and are properly recorded.

Inventory Quantities

- Examining the entity's inventory records to identify locations or items that require specific attention during or after the physical inventory count.
- Observing inventory counts at certain locations on an unannounced basis or conducting inventory counts at all locations on the same date.
- Conducting inventory counts at or near the end of the reporting period to minimize the risk of inappropriate manipulation during the period between the count and the end of the reporting period.
- Performing additional procedures during the observation of the count, for example, more rigorously examining the contents of boxed items, the manner in which the goods are stacked (for example, hollow squares) or labelled, and the quality (that is, purity, grade, or concentration) of liquid substances such as perfumes or specialty chemicals. Using the work of an expert may be helpful in this regard.

- Comparing the quantities for the current period with prior periods by class or category of inventory, location or other criteria, or comparison of quantities counted with perpetual records.
- Using computer-assisted audit techniques to further test the compilation of the physical inventory counts - for example, sorting by tag number to test tag controls or by item serial number to test the possibility of item omission or duplication.

Management Estimates

- Using an expert to develop an independent estimate for comparison to management's estimate.
- Extending inquiries to individuals outside of management and the accounting department to corroborate management's ability and intent to carry out plans that are relevant to developing the estimate.

Specific Responses - Misstatements Due to Misappropriation of Assets

Differing circumstances would necessarily dictate different responses. Ordinarily, the audit response to an assessed risk of material misstatement due to fraud relating to misappropriation of assets will be directed toward certain account balances and classes of transactions. Although some of the audit responses noted in the two categories above may apply in such circumstances, the scope of the work is to be linked to the specific information about the misappropriation risk that has been identified.

Examples of responses to the auditor's assessment of the risk of material misstatements due to misappropriation of assets are as follows:

- Counting cash or securities at or near year-end.
- Confirming directly with customers the account activity (including credit memo and sales return activity as well as dates payments were made) for the period under audit.
- Analysing recoveries of written-off accounts.
- Analysing inventory shortages by location or product type.
- Comparing key inventory ratios to industry norm.
- Reviewing supporting documentation for reductions to the perpetual inventory records.
- Performing a computerized match of the vendor list with a list of employees to identify matches of addresses or phone numbers.
- Performing a computerized search of payroll records to identify duplicate addresses, employee identification or taxing authority numbers or bank accounts.
- Reviewing personnel files for those that contain little or no evidence of activity, for example, lack of performance evaluations.

III.988 Auditing Pronouncements

- Analysing sales discounts and returns for unusual patterns or trends.
- Confirming specific terms of contracts with third parties.
- Obtaining evidence that contracts are being carried out in accordance with their terms.
- Reviewing the propriety of large and unusual expenses.
- Reviewing the authorization and carrying value of senior management and related party loans.
- Reviewing the level and propriety of expense reports submitted by senior management.

Possible other audit procedures for consideration by auditors

A. Illustrative Q & A for Evaluating the Fraud Risk Assessment process of the company

Fraud Risk Assessment

1. Does the company have formal and regularly scheduled procedures to perform fraud risk assessments?
2. Are appropriate personnel involved in the fraud risk assessments?
3. Are fraud risk assessments performed at all appropriate levels of the organization (such as the entity level, significant locations or business units, significant account balance or major process level)?
4. Does the fraud risk assessment include consideration of internal and external risk factors (including pressures or incentives, rationalizations or attitudes, and opportunities)?
5. Does the fraud risk assessment include the identification and evaluation of past occurrences and allegations of fraud within the entity and industry? Does it include the evaluations of unusual financial trends or relationships identified from analytical procedures or techniques?
6. Does the fraud risk assessment consider the risk of management's override of controls?
7. Does management consider the type, likelihood, significance, and pervasiveness of identified fraud risks?
8. Are fraud risk assessments updated periodically to include considerations of changes in operations, new information systems, acquisitions, changes in job roles and responsibilities, employees in new positions, results from self-assessments of controls, monitoring activities, internal audit findings, new or evolving industry trends, and revisions to identified fraud risks within the organization?
9. Does management assess the design and operating effectiveness of the fraud risk assessments?
10. Does management adequately document its assessments and conclusions regarding the design and operating effectiveness of the fraud risk assessments?

11. Is the fraud risk assessment designed and operating effectively?

Control Environment

1. Does the company maintain a proper tone at the top? Did management assess the tone of the organisation to determine if the culture encourages ethical behaviour, consultation, and open communication? (This assessment can be made through inquiries and interviews, or by internal audit review.)
2. Do the audit committee and the Board of Directors have sufficient oversight of management's anti-fraud programs and controls?
3. Does the internal audit function have sufficient involvement in anti-fraud programs and controls, including monitoring of the effectiveness of anti-fraud programs and controls, given the size and complexity of the organization? Does the internal audit function reports directly to the audit committee?
4. Does the company have a published code of ethics/conduct (with provisions related to conflicts of interest, related-party transactions, illegal acts, and fraud) made available to all personnel and does management require employees to confirm that they accept and agree to follow it? Does the frequency of exceptions undermine the code's effectiveness? Does the code comply with all applicable rules and regulations?
5. Does the company have an ethics/whistle blower hotline with adequate procedures to handle anonymous complaints (received from inside and outside the company), and to accept confidential submission of concerns about questionable accounting, internal accounting control, or auditing matters? Are tips and whistle blower complaints investigated and resolved in a timely manner?
6. Does the company have formal hiring and promotion policies, including background checks for those employees with influence over financial reporting or involved in the preparation of the financial statements?
7. Does the company have formal and effective training for employees and new hires on issues of fraud, ethics, and the code of ethics/conduct?
8. Does the company respond in a timely and appropriate manner to significant control deficiencies, allegations or concerns of fraud, and violations of the code of ethics/conduct?
9. Does management assess the design and operating effectiveness of the control environment?
10. Does management adequately document its assessments and conclusions regarding the design and operating effectiveness of the control environment?

III.990 Auditing Pronouncements

11. Is the control environment designed and operating effectively?

Anti-fraud Control Activities

1. Does the company adequately map or link identified fraud risks to control activities designed to mitigate the fraud risks?
2. Does management design and implement preventative and detective controls (preventative controls are designed to stop fraud from occurring and detective controls are designed to identify the fraud if it occurs)?
3. Does the company have controls that restrain the misappropriation of company assets that could result in a material misstatement of the financial statements?
4. Does the company have controls that address the risk of management's override of controls (including controls over journal entries and adjustments, estimates, and unusual or non-routine transactions)?
5. Does the company consider security controls (including IT controls and limited access to accounting systems), and consider the adequacy of fraud detection and monitoring activities utilizing information systems?
6. Does management assess the design and operating effectiveness of anti-fraud control activities?
7. Does management adequately document its assessments and conclusions regarding the design and operating effectiveness of antifraud control activities?
8. Are anti-fraud control activities designed and operating effectively?

Information & Communication

1. Is information on ethics and management's commitment to anti-fraud programs and controls effectively communicated throughout the organisation to all employees?
2. Does management have procedures to disseminate and collect information regarding anti-fraud programs and controls, fraud risks, allegations of fraud, and concerns of improper accounting to and from all levels of the organization and external parties (where appropriate)?
3. Does management assess the design and operating effectiveness of information and communication?
4. Does management adequately document its assessments and conclusions regarding the design and operating effectiveness of information and communication?

5. Are procedures and activities for communicating information regarding anti-fraud programs and controls designed and operating effectively?

Monitoring Activities

1. Are internal audit and others actively involved in monitoring and assessing anti-fraud programs and controls?
2. Is the internal audit activity adequate for the size and operations of the organization?
3. Are findings and weaknesses identified during monitoring activities incorporated back into the fraud risk assessment, the design of the control environment and anti-fraud control activities?
4. Does the audit committee have oversight of monitoring activities?
5. Does management assess the design and operating effectiveness of monitoring activities?
6. Does management adequately document its assessments and conclusions regarding the design and operating effectiveness of the monitoring activities?
7. Are monitoring and assessment activities designed and operating effectively?

B. Additional examples of audit procedures to address fraud risk factors

Incorporate “element of surprise” in the audit procedures and timeliness

- Existence of assets is generally confirmed through physical verification. To re-verify the existence of assets at a later date to ensure that they were not borrowed or temporarily created.
- Compliance tests of internal controls, disbursement of wages, procedures for obtaining quotations for sale and disposal of scrap, material weighments, etc. can be verified repeatedly. Such procedures may reveal inconsistencies, if any.
- Element of unpredictability/surprise should be incorporated in physically verifying stocks with third parties.
- Rotate the components between audit team members to overcome familiarity threat with regard to audit procedures.
- Visiting locations or performing certain tests on a surprise or unannounced basis.

Apply test of reasonableness and test of absurdity

III.992 Auditing Pronouncements

- Existence of vendor/customer website for all huge value bills and payments. Also check the date on which the website was hosted. A recently uploaded webpage is also suspicious.
- Two or more employees arriving and departing at the same time consistently.
- Are stocks ordered irrespective of large existing balances.
- Whether value of property acquired is within the acceptable range of prevailing market value.
- Check for inconsistent facts while reading the contracts and agreements.

Search for mutually exclusive events

- Production quantity cannot be greater than machine capacity; sales cannot be quantitatively greater than opening stocks plus purchases/production.
- Production cannot be possible in periods of strike, downtime etc.
- Fuel for diesel cars cannot be supported by petrol bills or *vice versa*.
- Stocks cannot be physically greater than the volumetric capacity of storage place.
- An employee who has left cannot approve any transactions after the date of departure or before the date of appointment.
- Yield and rejection ratio for identical machines in different locations should theoretically be the same.
- Sales returns and warranty claims for the same products across different sales locations should be more or less consistent. If they are grossly inconsistent, analyse reasons.

Possible Other Audit Procedures – Cash and Bank

Risks	Audit Procedures
Cheque signing mandate given to more number of persons which is not commensurate with the nature, size of the business. This may increase the risk of collusion between cheque signing authorities in remote locations	Review the cheque signing mandate for both crossed and bearer cheque. Evaluate whether the authority levels set are strong and is commensurate with the nature and size of the business.

Possibilities of cheques being forged and payment vouchers being approved by unauthorised persons	Obtain specimen signatures of all authorised signatories and share it with the engagement team members during the planning stage.
Snowballing of bank charges and forex gains/losses	Check all cash contras and inter-back transfers – Ensure that cash withdrawals as per the bank statement is reflected as cash withdrawal in the bank book as well on the same date.
Duplicates in cheque numbers could indicate double accounting of expense or payment.	The “IF” function in Excel along with its derivative usage with “And/or” can be useful for detecting gaps, finding duplicates and locating multiple records.
Gaps in cheque numbers may indicate that some cheques have been deliberately kept aside for some other motives which certainly is a concern	The “IF” function in Excel along with its derivative usage with “And/or” can be useful for detecting gaps, finding duplicates and locating multiple records.
Cash withdrawals or other transactions as per bank statement accounted differently in the bank book	Obtain a list of bank accounts held and ascertain the purpose for which each bank account is used. On a sample basis, select one month each for each of the bank accounts, obtain bank statements directly from the bank and re-perform bank reconciliation statements.

Possible Other Audit Procedures – Test of Details

Tests	Purpose	Procedures
-------	---------	------------

III.994 Auditing Pronouncements

Physical voucher consistency test in a series	<ul style="list-style-type: none">• Helps identify replacement or insertion of a new voucher.• Can be applied for cash and bank payments, supplier invoices from the same supplier, purchase vouchers, journal vouchers etc.	<p>a) Is the paper relatively new or has it yellowed less in comparison with other vouchers around the same date.</p> <p>b) Are the routine ticks missing.</p> <p>c) Is the paid stamp missing.</p>
Specimen signatures comparison test	Helps to identify simple forgeries or fictitious transactions.	To obtain specimen signatures of all signatories and keep them for comparison during vouching.
Chronological test of supporting vouchers	Helps in identifying fraudulent/fictitious bills when huge bunches of supporting vouchers are attached to a single voucher.	Check if the supporting vouchers are dated subsequent to the payment voucher date or the date relates to earlier periods?
Chronological test of approvals	Helps to identify if any vouchers were approved by the resigned/newly joined employee after the resignation date or before the joining date.	If any of the authorised signatories had resigned or newly joined during the year, along with the specimen signatures also obtain their date of resignation or joining.

Possible Other Audit Procedures – Management Override of Controls

- Performing a detailed review of the entity's quarter-end or year-end adjusting entries and verifying any that appear unusual as to nature or amount.
- For significant and unusual transactions, particularly those occurring at or near year-end, verifying the possibility of related parties and the sources of financial resources supporting the transactions.
- Use of statistical tool for sample selection.
- Reviewing large and unusual expenses.
- Reviewing the authorisation and carrying value of senior management and related party loans.

- Reviewing the level and propriety of expense reports submitted by senior management.

Possible Other Audit Procedures – Revenue Recognition

- Comparing revenue reported by month/product line/remote locations during the current reporting period with comparable prior periods.
- Computer-assisted audit techniques may be useful in identifying unusual or unexpected revenue relationships or transactions.
- Inquiring of the entity's sales and marketing personnel or in-house legal counsel to corroborate information relating to sales returns, discounts, shipments near the end of the period etc.
- Being physically present at one or more locations at period end to observe goods being shipped or being readied for shipment
- Risk of understating/not accounting scrap sales.

Possible Other Audit Procedures – Inventory

- Examining the entity's inventory records to identify locations or items that require specific attention during or after the physical inventory count.
- Observing inventory counts at certain locations on an unannounced basis or conducting inventory counts at all locations on the same date.
- Analysing inventory shortages by location or product type.
- Performing additional procedures during the observation of the count, for example:
 - more rigorously examining the contents of boxed items,
 - the manner in which the goods are stacked (for example, hollow squares) or labeled,
 - the quality (that is, purity, grade, or concentration) of liquid substances such as oil or specialty chemicals.
 - take the help of technical experts to weigh/measure inventory.

Possible Other Audit Procedures – Vendor and Customer

- Check for duplicate vendor IDs, contact number, bank account number.
- Obtaining back dated cheques from customers and credit to customer based on instrument date and not the deposit date to reduce the outstanding debtors and also to reduce the penal interest.

III.996 Auditing Pronouncements

- Unidentified credit balances have possibility of being misused by way of wrong credits to suppliers, customers, accomplices and could also facilitate teeming and lading of collections.
- Analysing recoveries of written-off accounts.
- Receivables growing faster than revenues.

Possible Other Audit Procedures – Employees

- Reviewing personnel files for those that contain little or no evidence of activity, for example, lack of performance evaluations.

Appendix 5

(Refer paragraph 87)

Illustrative Format for Reporting to Board or the Audit Committee on Fraud

(As required by Rule 13(2)(a) and Rule 13(3) of the Companies (Audit and Auditors) Rules, 2014
[as amended by the Companies (Audit and Auditors) Amendment Rules, 2015

Date:

Subject: Report under Sub-section (12) of Section 143 of the Companies Act, 2013 on suspected offence involving fraud being committed or having been committed against the company by its officers or employees.

S.No	Particulars	Details
1(a)	Name of the Company ⁴	
1(b)	CIN	
1(c)	Address of the Registered Office	
2(a)	Name of the auditor or auditor's Firm ⁵	
2(b)	Membership number	
2(c)	Address	

⁴ Where the suspected offence relates to any component (subsidiary, associate, joint venture) forming part of the consolidated financial statements, to include and specify accordingly.

⁵ Where the period of offence dates back to an earlier time period, where the current auditor was different, to indicate the name of the predecessor auditor.

S.No	Particulars	Details
3	Date of the annual general meeting when the auditor was appointed or reappointed	
4	SRN and date of filing	
5	Address of the office or location where the suspected offence is believed to have been or is being committed	
6	Full details of the suspected offence involving fraud (attach documents in support) ⁶ (Refer Note 1)	
7	Particulars of the officers or employees who are suspected to be involved in the commission of the offence, if any:	
7(a)	Name (s)	
7(b)	Designation	
7(c)	If Director, his DIN	
7(d)	PAN	
8	Basis on which fraud is suspected ⁷	
9	Period during which the suspected fraud has occurred	
10	Date of sending report to the Board or Audit Committee as per rule 13(2)(a)	
11	Estimated amount involved in the suspected fraud (Refer Note 2)	
12	Any other relevant information	

Notes:

- The details of suspected offence involving fraud are those that have arisen during the course of performance of duties by the auditor and hence the auditors do not offer any assurance on completeness of the said matter or any other matter that may not be knowledgeable to the auditor.

⁶ Supports would relate to the convincing evidence that supported the suspicion of the auditor.

⁷ With respect to the suspected fraud, briefly state procedures performed, the audit evidence obtained and the conclusions on evaluation of the audit evidence.

III.998 Auditing Pronouncements

2. The estimated amount indicated in Point No. 11 in the table above is based on the available information and evidence relating to the suspected fraud that supports the suspicion of the auditor. It is expected that based on this reporting by the auditors, Those Charged with Governance would initiate an investigation/forensic audit and provide complete details to the auditor to enable him to report to the Central Government and also to assess the impact of the same on the financial statements.

APPENDIX 6

(Refer paragraphs 3 and 103)

Form No. ADT-4		
REPORT TO THE CENTRAL GOVERNMENT		
(See rule 13(2)(f) of the Companies (Audit and Auditors) Rules, 2014) [as amended by the Companies (Audit and Auditors) Amendment Rules, 2015]		
Date:

(Refer paragraph 105)

Illustrative Management Representation Letter

(for the reply of the Board or the Audit Committee on fraud reported by the auditor under Rule 13(2)(b) and (d) and Rule 13(3) and (4) of Companies (Audit and Auditors)

III.1000 Auditing Pronouncements

Rules, 2014) [as amended by the Companies (Audit and Auditors) Amendment Rules, 2015]

[Letterhead of the Entity]

Messrs. *Name of the Audit Firm*

Chartered Accountants

Dear Sirs,

This representation letter is provided in connection with our reply dated ___ to you pursuant to your letter dated ___ on fraud suspected by you and reported to us under Rule 13 of the Companies (Audit and Auditors) Rules, 2014, as amended by the Companies (Audit and Auditors) Amendment Rules, 2015.

We understand that the fraud reported by you is as follows:

(Details of fraud reported by the Auditors)

We acknowledge that because of the inherent limitations of an audit, together with the inherent limitations of internal controls, there is an unavoidable risk that material misstatements due to fraud or error may occur and not be detected, even though the audit is properly planned and performed by the auditor in accordance with the Standards on Auditing and that the matter reported by you in your letter dated ___ is not exhaustive or complete list of frauds against the Company that may exist.

We acknowledge our responsibility for the prevention and detection of fraud. Our responsibility also includes informing you about any fraud detected and remedied by the management, any incidence of fraud reported through the vigil mechanism or through any other internal or external sources. We acknowledge that we are also responsible to take appropriate action when a fraud is detected or reported through any of the sources.

In particular we confirm that we are responsible for the following:

- a) Designing, implementing, and maintaining internal controls relevant to the preparation and fair presentation of the financial statements which are free from material misstatements, whether due to fraud or error.
- b) To set up a vigil mechanism for reporting suspected fraud and administer the mechanism effectively.
- c) Take appropriate action to detect the fraud and wrongful gain or loss, if any, incurred on account of the fraud.
- d) Take appropriate action against the fraudsters.

- e) Address the control weaknesses which were the root cause for fraud and strengthen the internal control system.

We confirm the following representations in respect of fraud noted and reported during the year/period, other than for the matters reported by you:

1. There have been no communications from regulatory agencies concerning non-compliance with or deficiencies in financial reporting practices [except for (*insert appropriate description*)].
2. We have disclosed to you all changes/deficiencies in the design or operation of internal controls over financial reporting identified as part of our assessment, including separately disclosing to you all such deficiencies that we believe to be significant deficiencies or material weaknesses in internal controls over financial reporting.
3. We acknowledge our responsibilities for the implementation and operation of accounting and internal control systems that are designed to prevent and detect fraud and error. We have disclosed to you the results of our assessment of the risk that the financial statements may be materially misstated as a result of fraud.
4. We are not aware of any/We have disclosed to you all significant facts relating to any frauds or suspected frauds known that may have involved (i) Management; (ii) Employees who have significant roles in accounting and internal control; or (iii) Others.
5. To the best of our knowledge and belief, the Company has not made any improper payments or payments which are illegal or against public policy.
6. The Company has complied with all aspects of contractual agreements which could have a material effect on the financial statements in the event of non-compliance. There has been no non-compliance with requirements of regulatory authorities that could have a material effect on the financial statements in the event of non-compliance.
7. We have no plans or intentions which may materially affect the carrying value or classification of assets and liabilities reflected in the financial statements.
8. We have made available to you all books of account, supporting documentation and minutes of all meetings of the shareholders and the Board of Directors and Committees of the Board and all other details with regard to action taken by the management to evaluate the fraud reported by you.
9. We have acted in good faith and in the best interests of the Company regarding the action taken by the management to evaluate the fraud reported by you.

III.1002 Auditing Pronouncements

10. We have not withheld from you any relevant information that we are aware of and would have an implication on the process of your responsibilities to report fraud under the statute.
11. The conclusions reached by us are based on the rationale of facts and data that were identified during the investigation/other action taken by us to evaluate the fraud reported by you.
12. We believe that appropriate action has been taken against employees/officers involved in the fraud and we confirm that appropriate controls have been put in place to ensure that such incidences are avoided in the future.

With effect from 1st April 2014, the provisions of the Companies Act, 2013 ('the Act') have become applicable to the Company. We understand that Section 143(12) of the said Act read with Rule 13 of the Companies (Audit and Auditors) Rules, 2014, as amended by the Companies (Audit and Auditors) Amendment Rules, 2015 requires the auditors to report on fraud to the Board or the Audit Committee prior to reporting the same to the Central Government. We are aware that the Board or the Audit Committee is required to consider the report of the auditor and respond on the matter reported within 45 days of the date of the report of the auditor.

Insofar as the matter reported by you in your letter dated ___ and our reply thereto dated ____, we confirm the following:

1. We have carried out an investigation into the matter reported by you towards which ____, an independent agency/the Company's internal auditor/Senior Management of the Company were engaged to investigate the matter.
2. Status of the investigation commissioned by the Board or the Audit Committee.

I. Investigation complete and Board or the Audit Committee concurs with the auditor on the suspected fraud

1. We concur with your assessment of suspected fraud based on the following: (State details and the reasons for occurrence).
2. The persons allegedly involved in the matter are: (list names and designations, DIN (if a Director is involved) and PAN of the person).
3. Based on the investigation carried out, we confirm that the period to which the fraud relates is _____.
4. The estimate of amounts involved in the fraud as determined by the investigation is Rs. _____.
5. We have initiated the following steps with immediate effect to mitigate the recurrence of such fraud. (State steps taken to mitigate such risk in future).

6. We have initiated the following actions on the persons involved in the fraud (List action taken on the concerned persons.) [or] Pending closure of the internal hearings of the Committee of Ethics of the Company, no action has been taken on the persons involved.

II. Investigation complete and Board or the Audit Committee does not concur with the auditor on the suspected fraud

1. State reasons for not concurring with the auditor's assessment of suspected fraud with persuasive evidence supporting the Board or the Audit Committee conclusion.
2. We believe that the investigation commissioned by us was independent, comprehensive, objective, unbiased and did not involve any scope limitations. Specifically, the investigation focused on the following areas that are impacted by the suspected fraud reported by you: (list areas)
3. We confirm that no fraud has been or is being committed against the Company by its officers or employees as reported by you.

III. Investigation is in progress

1. As on date of this letter, the investigation commissioned by the Board or the Audit Committee is in progress.
2. Management to state items in I.3 to I.8 to the extent applicable.

We acknowledge that your report on suspected fraud under Section 143(12) of the Act is made in good faith to comply with the requirements of the law and, therefore, cannot be considered as breach of maintenance of client confidentiality requirements or be subject to any suit, prosecution or other legal proceeding since it is done in pursuance of the Act or of any rules or orders made thereunder.

Yours faithfully,

Chairman of the Audit Committee/Board
