

FINAL COURSE STUDY MATERIAL

PAPER 3

**Advanced Auditing and
Professional Ethics**

MODULE – 1

**BOARD OF STUDIES
THE INSTITUTE OF CHARTERED ACCOUNTANTS OF INDIA**

This Study Material has been prepared by the faculty of the Board of Studies. The objective of the Study Material is to provide teaching material to the students to enable them to obtain knowledge and skills in the subject. In case students need any clarifications or have any suggestions to make for further improvement of the material contained herein, they may write to the Director of Studies.

All care has been taken to provide interpretations and discussions in a manner useful for the students. However, the Study Material has not been specifically discussed by the Council of the Institute or any of its Committees and the views expressed herein may not be taken to necessarily represent the views of the Council or any of its Committees.

Permission of the Institute is essential for reproduction of any portion of this material.

SYLLABUS

PAPER 3: ADVANCED AUDITING AND PROFESSIONAL ETHICS

(One Paper- Three hours - 100 marks)

Level of Knowledge: Advanced knowledge

Objectives:

- (a) To gain expert knowledge of current auditing practices and procedures and apply them in auditing engagements,
- (b) To develop ability to solve cases relating to audit engagements.

Contents:

1. **Auditing Standards, Statements and Guidance Notes**
Auditing and Assurance Standards (AASs); Statements and Guidance Notes on Auditing issued by the ICAI; Significant differences between Auditing and Assurance Standards and International Standards on Auditing.
2. **Audit strategy, planning and programming**
Planning the flow of audit work; audit strategy, planning programme and importance of supervision: review of audit notes and working papers; drafting of reports; principal's ultimate responsibility; extent of delegation; control over quality of audit work; reliance on the work of other auditor, internal auditor or an expert.
3. **Risk Assessment and Internal Control**
Evaluation of internal control procedures; techniques including questionnaire, flowchart; internal audit and external audit, coordination between the two.
4. **Audit under computerized information system (CIS) environment**
Special aspects of CIS Audit Environment, need for review of internal control especially procedure controls and facility controls. Approach to audit in CIS Environment, use of computers for internal and management audit purposes: audit tools, test packs, computerized audit programmes; Special Aspects in Audit of E-Commerce Transaction.
5. **Special audit techniques**
 - (a) Selective verification; statistical sampling; Special audit procedures; physical verification of assets, direct confirmation of debtors and creditors
 - (b) Analytical review procedures
 - (c) Risk-based auditing.
6. **Audit of limited companies**
Relevant provisions under the Companies Act, 2013 relating to Audit and Auditors and Rules made thereunder; Audit of branches; joint audits; Dividends and divisible profits-financial, legal, and policy considerations.

7. Rights, duties, and liabilities of auditors; third party liability.
8. Audit reports; Qualifications, notes on accounts, distinction between notes and qualifications, detailed observations by the statutory auditor to the management *vis-a-vis* obligations of reporting to the members.
9. Audit Committee and Corporate Governance
10. Provisions under the Companies Act, 2013 in respect of Accounts of Companies and Rules made thereunder. Audit of Consolidated Financial Statements, Audit Reports and Certificates for Special Purpose engagements; Certificates under the Payment of Bonus Act, import/export control authorities, etc.; Specific services to non-audit clients; Certificate on Corporate Governance.
11. Special features of audit of banks, insurance companies, co-operative societies and non-banking financial companies.
12. Audit under Fiscal Laws, viz, Direct and Indirect Tax Laws.
13. Cost audit
14. Special audit assignments like audit of bank borrowers, audit of stock and commodity exchange intermediaries and depositories; inspection of special entities like banks, financial institutions, mutual funds, stock brokers.
15. Special features in audit of public sector companies. Directions of Comptroller and Auditor General of India to statutory auditors; Concepts of propriety and efficiency audit.
16. Internal audit, management and operational audit. Nature and purpose, organisation, audit programme, behavioural problems; Internal Audit Standards issued by the ICAI; Specific areas of management and operational audit involving review of internal control, purchasing operations, manufacturing operations, selling and distribution, personnel policies, systems and procedures. Aspects relating to concurrent audit.
17. Investigation and Due Diligence.
18. Concept of peer review
19. Salient features of Sarbanes – Oxley Act, 2002 with special reference to reporting on internal control.
20. **Professional Ethics**
Code of Ethics with special reference to the relevant provisions of The Chartered Accountants Act, 1949 and the Regulations thereunder.

Note:

- (i) **The provisions of the Companies Act, 1956 which are still in force would form part of the syllabus till the time their corresponding or new provisions of the Companies Act, 2013 are enforced.**
- (ii) **If new legislations are enacted in place of the existing legislations, the syllabus would include the corresponding provisions of such new legislations with effect from a date notified by the Institute.**

A WORD ABOUT STUDY MATERIAL

Auditing is, perhaps, one of the most practical-oriented subjects in the C.A. curriculum. This paper aims to provide working knowledge of generally accepted auditing procedures and of techniques and skills needed to apply them in audit engagements. A good knowledge of the subject would provide a strong foundation to students while pursuing the Chartered Accountancy course. A good understanding of the theoretical concepts, particularly, in the context of auditing standards would make practical training an enriching and enjoying experience. While studying this paper, students are advised to integrate the knowledge acquired in other subjects, specifically, accounting and corporate laws in a meaningful manner. Such learning would only help a student to become a better professional.

The study material deals with the conceptual theoretical framework in detail. Its main features are as under:

- The entire syllabus has been divided into twenty two chapters.
- In each chapter, the topic has been covered in a step by step approach. The text has been explained, where appropriate, through illustrations and practical problems. You should go through the chapter carefully ensuring that you understand the topic and then can tackle the exercises.

Handbook on Auditing Pronouncements comprises of Standards on Auditing and Guidance Notes.

The Practice Manual aims to provide guidance as to the manner of writing an answer in the examination. Main features of Practice Manual are as under:

- After completing the Chapters of Study Material, Students are expected to attempt the questions and then compare it with the actual answers.
- Compilation of questions appearing during last twenty examinations.
- Exercises have been given at the end of each topic for independent practice.

This study material has been revised in view of Companies Act, 2013, Reporting under CARO, 2016, Notification/Circulars issued by MCA, CBDT, SEBI, RBI, ICAI including Listing Order Disclosure Requirements, Consolidated Financial Statements, Internal Controls, ICDS, Tax Audit Form 3CD, New and Revised Standards on Auditing etc. This revised study material contains the 'highlights of changes' in the tabular form to aid the students to know what and where the updates are made in the module. It may also be noted that Chapter 8, 9 and 10 are majorly revised therefore relevant page numbers are not given in table. The changes have been inserted in the bold italics for convenience of the students.

It is important to note that till the time Statements, Engagement and Quality Control Standards,

Guidance Notes, Code of Ethics etc. bare documents get updated from Auditing and Assurance Standard Board, Ethical Standard Board of ICAI and other Competent Authority in pursuance of the Companies Act, 2013, students are required to understand the basic nature of the provision and quote the same along with the new corresponding provisions.

- Attention is invited to the **Significant Additions/Modifications** made in this edition of the study material which are given on the next page.
- Please note that the changes over the previous edition have been indicated in **bold and italics** in the chapters.
- New case studies and Examples have been added to explain the application of the existing concepts in and these have been indicated in grey background.
- Diagrammatic Presentation has been made in most of Chapters for quick revision of described concept.
- Feedback form is given at the end of this study material wherein students are encouraged to give their feedback/suggestions.

In case you need any further clarification/guidance, please send your queries at karuna.bhansali@icai.in and Rajeev.sachdeva@icai.in.

SIGNIFICANT ADDITIONS IN THE REVISED EDITION

Chapter No.	Chapter Name	Section / Sub-Section wherein Additions / updation have been done	Page Number
1	Auditing Standards, Statements and Guidance Notes – An Overview	1.5 Quality Control and Engagement Standards 1.6.2 Guidance Note on Audit Reports and Certificates for Special Purposes 1.6.15 Guidance Note on Audit of Consolidated Financial Statements(CFS) 1.6.16 Guidance Note on CARO 2016 1.6.17 Guidance Notes on Audit of Internal Financial Controls over Financial Reporting 1.6.18 Guidance Note on Reporting on Fraud under section 143(12) of the Companies Act, 2013 1.8.5 Ind AS (Indian Accounting Standards)	1.6 1.9 1.15 1.16 1.16 1.16 1.21
3	Risk Assessment and Internal Control	3.2 Internal Control System - Nature, Scope, Objectives and Structure 3.3 Components of Internal Controls 3.4 Review of the System of Internal Controls	3.2 3.7 3.13

		6.9 Duties of Auditors	6.29
		6.14 Cost Audit	6.43
		6.16.1 Financial Statements	6.47
		6.16.2 Consolidated Financial Statement	6.48
		6.16.5 Form of the Balance Sheet	6.51
		Appendix- General Instructions for preparation of Balance Sheet	6.71
7	Liabilities of Auditor	7.5 Criminal Liability under the Companies Act	7.20
8	Audit Report	Almost Complete Chapter	
9	Audit Committee and Corporate Governance	Almost Complete Chapter	
10	Audit of Consolidated Financial Statements	Almost Complete Chapter	
11	Audit of Banks	11.1 Introduction	11.1
		11.3 Form and Content of Financial Statements	11.2
		11.4 Audit of Accounts	11.4
		Announcement on Demonetisation	11.10
		11.5.11 Compliance with CRR and SLR requirements	11.16
		11.6 Verification of Assets and Balances	11.21
14	Audit of Non-Banking Financial Companies	14.5.2 Compliance with CARO 2016:	14.16
15	Audit under Fiscal Laws	15.3.2 Income Computation and Disclosure Standards (ICDS)	15.11
		15.3.4 Clause 13 (d), (e), (f) of Form 3CD	15.26
16	Cost Audit	16.6 Cost Audit under the Companies Act	16.10
17	Special Audit Assignments	17.9.2 Audit Report	17.23

18	Audit of Public Sector Undertakings	18.9.3 Propriety elements under CARO,2016	18.23
19	Internal Management Audit, and Operational Audit	19.6 Relationship between Internal and External Auditors	19.12
20	Investigation and Due Diligence	Reporting of Fraud under section 143(12)	20.3
22	Professional Ethics	<p>22.4.5 MEMBER IN PRACTICE PROHIBITED FROM USING A DESIGNATION OTHER THAN CHARTERED ACCOUNTANT</p> <p>22.8 Schedules to the Act:</p> <p>(i) The First Schedule-Part 1: Insertion of Proviso in Clause 6</p> <p>(ii) Website Guidelines in Clause 6</p> <p>(iii) Regulation 192. Restriction on fees</p> <p>(iv) Insertion in General Resolution in Clause 11</p>	<p>22.11</p> <p>22.22</p> <p>22.24</p> <p>22.46</p> <p>22.48</p>

STUDY PLAN – KEY TO EFFECTIVE LEARNING

As Benjamin Franklin said, “By failing to prepare, you are preparing to fail.” Preparation is first and very important step towards success. For doing preparation of CA. Final Paper 3 - Advanced Auditing and Professional Ethics Examination, one has to be very careful as preparation consists of Study as well as Revision.

When you are starting for studies you must have all relevant material for subject and strategy to study. Study includes all relevant and reference material whereas strategy tells us how to effectively use the same. In absence of any of both it will be difficult to get through.

Refer the diagram given above it is important to note that Latest Study Material and Practice Manual which is further divided in into twenty two chapters in our study material covering in detail, principles of Auditing, Standards on Auditing issued by the ICAI, reporting on internal control as a part of Risk Assessment and Internal Control,

specific audit issues classified by organizations like Company Audit, Audit of Banks, Audit of General Insurance Business, Audit of Co-Operative Societies, NBFCs and Audit of Public Sector Undertakings, special audit issues like audit under Fiscal Laws, role of auditor as per Listing Order and Disclosure Requirements, Audit of Consolidated Financial Statements, Investigation and Due Diligence and Salient features of Sarbanes Oxley Act, 2002. In addition to above, Peer Review is considered as an important step towards maintenance and improvement of audit quality. Similarly, Professional Ethics are regarded as a foundation to the audit function, which is essentially developed on the foundation of ethical norms, which has so far brought name and fame to the profession. All students of Final course should read these chapters with sincerity and imbibe the norms explained. These Chapters are comprehensively covered in our Latest Study Material incorporating all relevant changes.

Students may also note that relevant notified Sections of the Companies Act, 2013 and other legislative amendments i.e. Rules, significant notifications and circulars issued by SEBI, RBI, NBFC, MCA etc up to 31st October, 2016 are applicable for May, 2017 and up to 30th April, 2017 are applicable for November, 2017 & onward Examination.

Students must go through the Study Material along with other reference materials. It is important to note that auditing is largely a practical and application discipline. Students should learn the Auditing concepts and techniques as also their intricacies purely for purposes of applying them in practice in their audit work.

For the purpose of its full coverage syllabus of this paper may be segregated into following seven parts for preparation:

Part I	Engagements and Quality Control Standards on Auditing (SA/SRS/SRE/SAE) and Guidance Notes
Part II	Audit strategy, planning and programming, Risk Assessment and Internal Control, Audit under computerized information system (CIS) environment, Special audit techniques
Part III	Audit of limited companies, Rights, duties, and liabilities of auditors; third party liability, Audit Committee and Corporate Governance
Part IV	Audit Reports, Audit of Consolidated Financial Statements, Certificate on Corporate Governance
Part V	Special features of audit of banks, insurance companies, co-operative societies and non-banking financial companies, Audit under Fiscal Laws, viz, Direct and Indirect Tax Laws, Cost audit, Special audit assignments like audit of bank borrowers, audit of stock and commodity exchange intermediaries and depositories; inspection of special entities like banks,

	financial institutions, mutual funds, stock brokers.
Part VI	Special features in audit of public sector companies, Internal Audit, Management and Operational Audit, Investigation and Due Diligence, Concept of Peer Review.
Part VII	Professional Ethics

In first part you may prepare Engagements and Quality Control Standards on Auditing (SA/SRS/SRE/SAE) and Guidance Notes for which list of applicable standards are published by ICAI from time to time. For doing preparation for Part First, read the bare standard along with its application and other explanatory material. After reading this you are advised to draw a flow chart or some diagrammatic presentation for your better understanding and revision purpose. You are also expected to focus on the application aspects of each of the Auditing Standards and guidance notes. As it is important to have the basic understanding, the objective is to the gain the ability to practice the same in the working scenario.

In part two, you may prepare audit strategy, planning and programming, risk assessment and internal control evaluation, audit under computerized information system (CIS) environment, special audit techniques like selective verification; statistical sampling; special audit procedures; physical verification of assets, direct confirmation of debtors and creditors, analytical review procedures, risk-based auditing etc. While doing preparation for this part, you may interlink it with Auditing Standards, specially the series of SA 300 – 499 i.e. Risk Assessment and Response to Assessed Risks and series of SA 500 – 599 Audit Evidence.

For the preparation of Audit Strategy, Planning and Programming, you should practice developing an “Engagement Approach Document”. The Approach document should primarily outline the activity based scoping of an engagement and planning of the procedures for each of the activity. An Approach Document should treat each engagement as a project which would highlight the resource requirements in each activity area and scheduling as well. Similarly for the Risk Assessment and Internal Control Evaluation you should gain understanding of the Risk Management Framework, relevance of control procedures, control assessment questionnaires and the complementary role that the internal and external audit plays. Further you should apply the accounting knowledge; and business intelligence framework along with the ratio analysis and trend reviews for any un-reasonable gaps in inputs provided / made available.

In part three, you may incorporate audit of limited companies, rights, duties and liabilities of auditors, third party liability and Audit Committee and corporate governance. For better understanding, you must have good knowledge of the Companies Act which is pre-requisite. Not only knowledge but updation of knowledge is also required on time to time basis.

In part four, you may include Audit Reports, Reporting under CARO, 2016 and Audit of Consolidated Financial Statements. While doing study of Audit Reports, you may interlink this with series of SA 700-799 i.e. Audit Conclusion and Reporting and sections 143 of the Companies Act, 2013. You are also required to practice the drafting of qualifications. You may also scan through the Annual Financial Statements of Companies to analyse the notes and qualifications, if any, incorporated by the Auditors in their Audit Report.

In part five, you may include miscellaneous audits like audit of banks, insurance companies, co-operative societies, NBFCs, audit under fiscal laws, cost audit and special audit assignments. For the preparation of part five, deep knowledge of statutory requirements is a pre-requisite for validation to adherence of the business with applicable laws. For this you should follow a check-list approach ensuring completeness of compliance validations. Further, you should update yourself with latest notification, circulars etc. You may also interlink the above part with guidance notes already covered in part one.

In part six, you should prepare special features in audit of public sector companies, internal audit, management and operational audit, investigation and due diligence and concept of peer review. For the preparation of this part, you are again required to have sound knowledge of statutory requirements.

Last but not the least; in the seventh part you may prepare Professional Ethics. Generally it has been observed that there is one question i.e. case studies based question of 16 marks in the examination paper. For better preparation of this part you are advised to read the 22 Chapter of the Study Material in detail which elaborates this topic along with examples. Further, you may write down all the clauses in notes form for the revision purpose.

While answering the case studies based question, answer should be split in to two parts, first one is Facts of the case and second one is the relevant concept and finally give your own conclusion. In this way the case study and application oriented theory questions can be answered.

Diagram showing Steps for Answering of Case Study

As in all other subjects of CA course, to excel in Audit proper preparation and planning is very much required to avoid failure. Further Audit is a paper which requires a

practical approach towards actual Audit work. You should in the first instance focus on studying Auditing concepts, procedures and techniques from the study material. The knowledge being so derived may be related by the students to the practical work in the field of Auditing which they do as part of their Articles training.

Part three, five and six are based on statutory requirements. Therefore, you must be cautious about the amendments and updates happened at least six months before the exam and also go through the other amendments. Further, you should also take a keen interest in updating yourself on contemporary developments in the field of auditing by regularly referring to articles on Auditing in CA Journal, Students' monthly Journal and other relevant professional journals, publications and books. It is also advisable to mention applicable Engagement Quality Control Standards or Accounting Standards or Sections in audit paper wherever required. Answers should be crisp, precise and to the point to secure good marks.

Audit is a subject that requires a lot of quick and logical application of mind to answer practical problems. Hence, give a reading to ICAI audit study material and Practice Manual to understand the depth and figure out the efforts and time required for preparation. In addition to study material suggested answers of past examination, Revisionary Test Papers, Standard books should also be read.

Your study and preparation should be in such manner that you are able to revise the same in one day time span. Finally don't forget to revise as already shown in diagram Study and Revision both are essential for Preparation for Examination.

“Give me six hours to chop down a tree and I will spend the first four sharpening the axe.” – Abraham Lincoln

Happy Reading and Best Wishes!

CONTENTS

MODULE – 1

- Chapter 1 – Auditing Standards, Statements and Guidance Notes – An Overview
- Chapter 2 – Audit Strategy, Planning and Programming
- Chapter 3 – Risk Assessment and Internal Control
- Chapter 4 – Audit under Computerised Information System (CIS) Environment
- Chapter 5 – Special Audit Techniques
- Chapter 6 – The Company Audit
- Chapter 7 – Liabilities of Auditors
- Chapter 8 – Audit Report
- Chapter 9 – Audit Committee and Corporate Governance
- Chapter 10 – Audit of Consolidated Financial Statements

MODULE – 2

- Chapter 11 – Audit of Banks
- Chapter 12 – Audit of General Insurance Companies
- Chapter 13 – Audit of Co-Operative Societies
- Chapter 14 – Audit of Non Banking Financial Companies
- Chapter 15 – Audit under Fiscal Laws
- Chapter 16 – Cost Audit

MODULE – 3

- Chapter 17 – Special Audit Assignments
- Chapter 18 – Audit of Public Sector Undertakings
- Chapter 19 – Internal Audit, Management and Operational Audit
- Chapter 20 – Investigation and Due Diligence
- Chapter 21 – Peer Review
- Chapter 22 – Professional Ethics

DETAILED CONTENTS: MODULE – 1

CHAPTER 1 : AUDITING STANDARDS, STATEMENTS AND GUIDANCE NOTES - AN OVERVIEW

1.1	Introduction	1.1
1.2	Historical Retrospect.....	1.1
1.3	Auditing and Assurance Standards Board – Scope and Functions.....	1.2
1.4	Framework of Standards and Guidance Notes on Related Services	1.5
1.5	Quality Control and Engagement Standards	1.6
1.6	Guidance Notes	1.8
1.7	Guidance Note(s) on Related Services	1.17
1.8	Authority Attached to the Documents issued by the Institute	1.17

CHAPTER 2: AUDIT STRATEGY, PLANNING AND PROGRAMMING

2.1	Commencing an Audit	2.1
2.2	Overall Audit Strategy	2.4
2.3	Audit Programme	2.8

CHAPTER 3: RISK ASSESSMENT AND INTERNAL CONTROL

3.1	Introduction	3.1
3.2	Internal Control System - Nature, Scope, Objective and Structure.....	3.2
3.3	Components of Internal Control	3.7
3.4	Review of the System of Internal Controls	3.13
3.5	Methods of Recording	3.15
3.6	Internal Control and Risk Assessment	3.26
3.7	Internal control in Small Business Enterprises	3.34
3.8	Reporting to clients on Internal Control Weaknesses	3.34
	Annexure -The Sarbanes – Oxley Act of 2002.....	3.37

CHAPTER 4: AUDIT UNDER COMPUTERISED INFORMATION SYSTEM (CIS) ENVIRONMENT

4.1	Introduction	4.1
4.2	Scope of Audit in a CIS Environment.....	4.2
4.3	Impact of changes on Business Processes (for shifting from manual to electronic medium).....	4.3
4.4	Audit Approach in a CIS environment	4.5
4.5	Effect of Computers on Internal Controls	4.7
4.6	Effects of Computers on Auditing	4.9
4.7	Internal controls in a CIS environment.....	4.10
4.8	Consideration of Control Attributes by the Auditors	4.11
4.9	Internal control requirement under CIS Environment.....	4.12
4.10	Auditing in a CIS Environment.....	4.13
4.11	Review of Checks and Controls in a CIS Environment	4.16
4.12	Computer assisted audit techniques (CAATs)	4.22

CHAPTER 5: SPECIAL AUDIT TECHNIQUES

5.1	Introduction	5.1
5.2	Statistical Sampling in Auditing	5.11
5.3	Risk-Based Audit	5.23

CHAPTER 6: THE COMPANY AUDIT

6.1	Eligibility, Qualifications and Disqualifications of an Auditor	6.1
6.2	Appointment of auditor	6.8
6.3	Rotation of Auditor.....	6.12
6.4	Provisions relating to Audit Committee.....	6.17
6.5	Auditor's Remuneration	6.19
6.6	Removal of Auditors	6.19
6.7	Ceiling on number of audits	6.20
6.8	Powers/Rights of Auditors.....	6.23

6.9	Duties of Auditors.....	6.27
6.10	Audit Report.....	6.38
6.11	Disclosure in the Auditor Report	6.38
6.12	Joint Audit.....	6.39
6.13	Audit of Branch Office Accounts.....	6.41
6.14	Cost Audit	6.43
6.15	Punishment for non-compliance	6.46
6.16	Financial Accounts Preparation and Presentation.....	6.46
6.17	Significance of True and Fair	6.51
6.18	Divisible Profits, Dividends and Reserves	6.54
6.19	Depreciation.....	6.69
	Appendix- Schedule III to the Companies Act, 2013	6. 71

CHAPTER 7: LIABILITIES OF AUDITORS

7.1	Nature of Auditor's Liability	7.1
7.2	Professional Negligence.....	7.3
7.3	Cases Concerning the Civil Liability of Auditors for Negligence.....	7.12
7.4	Civil Liabilities under the Companies Act.....	7.14
7.5	Criminal Liability under the Companies Act.....	7.19
7.6	Cases Concerning the Misconduct of Auditors under the Chartered Accountants Act.....	7.22
7.7	Liabilities under Income Tax Act, 1961	7.25

CHAPTER 8: AUDIT REPORT

8.1	Auditor's opinion	8.1
8.2	The Auditor's Report on Financial Statements	8.1
8.3	Reporting Under CARO, 2016	8.27
8.4	Distinction between Audit Report and Certificate	8.32
8.5	Audit Reports and Certificates for Special Purposes	8.34
8.6	Reporting Requirements in case of Comparative Information	8.37

Appendix 1: Comprehensive Format on the Audit Report.....	8.41
Appendix 2: Comprehensive Case Studies on CARO 2016	8.49
Appendix 3: Key Aspects discussed in Guidance Note on Reporting of Fraud under section 143(12) of the Companies Act 2013.....	8.58
Appendix 4: Key Aspects Discussed in Guidance Note on Reporting Under Section 143(3) (F) and (H) of the Companies Act, 2013.....	8.60
Appendix 5: Key Aspects discussed in Guidance Note on Internal Financial Control over Financial Reporting.....	8.63

CHAPTER 9: AUDIT COMMITTEE AND CORPORATE GOVERNANCE

9.1	Introduction	9.1
9.2	Corporate Governance	9.1
9.3	The Legal Framework	9.1
9.4	Audit Committee under LODR Regulations	9.3
9.5	Audit Committee under Section 177 of the Companies Act, 2013	9.6
9.6	Functions of the Audit Committee	9.6
9.7	Review of Information by Audit Committee	9.8
9.8	Role of Auditor in Audit Committee and Certification of Compliance of Conditions of Corporate Governance	9.8
9.9	Remuneration of Directors [Part C of Schedule V]	9.11
9.10	Obligations of Director and Senior Management [Regulations 17(2) to 17(4), 25(5) to 25(6), 26(1) to 26 (2), 26(4) to 26(5)]	9.13
9.11	Code of Conduct [Regulations 17(5), 26(3), 46(2) and Part D of Schedule V]	9.15
9.12	Vigil Mechanism [Regulations 22 and 46 and Part C of Schedule V].....	9.15
9.13	Subsidiary of Listed Entity [Regulations 16(c), 24 and 46 and Part C of Schedule V]	9.15
9.14	Statement of Deviation(s) or Variation(s) [Regulation 32 and Part C of Schedule II].....	9.17
9.15	Disclosures - Management Discussion and Analysis [Schedule V]	9.17
9.16	Information to Shareholders [Regulation 36]	9.18
9.17	Stakeholders Relationship Committee [Regulation 20 and Part D of Schedule II].....	9.18
9.18	Transfer or Transmission or Transposition of Securities [Regulation 40]	9.19

9.19	Compliance Certificate [Part B of Schedule II]	9.19
9.20	Disclosures	9.21
9.21	Risk Management Committee [Regulation 21].....	9.21
9.22	Nomination and Remuneration Committee [Regulation 19 and Part D of Schedule II]	9.22
9.23	Report on Corporate Governance [Regulation 27 and Schedule II]	9.23
9.24	Auditors' Certificate	9.23
	Appendix: Corporate Governance – Schedule II to the SEBI (LODR) Regulations, 2015	9.26

CHAPTER 10: AUDIT OF CONSOLIDATED FINANCIAL STATEMENTS

10.1	Introduction	10.1
10.2	Definitions	10.3
10.3	Responsibility of Parent	10.4
10.4	Responsibility of the Auditor of the Consolidated Financial Statements	10.5
10.5	Audit Considerations	10.6
10.6	Auditing the Consolidation.....	10.8
10.7	Special Considerations	10.11
10.8	Management Representations	10.17
10.9	Reporting.....	10.17

Auditing Standards, Statements and Guidance Notes – An Overview

1.1 Introduction

The past decade has been one of unprecedented change in the global economy and capital markets. Key aspects of the current business environment include a globalized, highly competitive, expanding economy; explosive growth in the development and use of technology; dramatic increases in new economy service- and technology-based businesses with predominantly intangible assets; unparalleled expansion in the number of public entities; large increases in the number of individuals who directly or indirectly own equity securities; and unprecedented growth in the market value of those securities.

The expanded use of technology in both the operating and financial systems of companies also has significantly affected the audit environment, forcing audit firms to recruit, train and deploy a large number of information technology specialists to support their audit efforts. It also has caused firms to reconsider their audit methods and techniques in an effort to harness technology to improve audit efficiency and effectiveness.

In the changing environment, it is obvious that a professional accountant should to adhere to standards and procedures laid down by the professional accountancy bodies of which he is a member while discharging his duties in a responsible manner. In this direction, the role of a professional accounting body is to lay down such standards and procedures with the aim of providing guidance to members. The Institute of Chartered Accountants of India (ICAI) has been formulating auditing and accounting standards for the guidance of its members on its own volition in the larger interests of the society. In this chapter, we provide an overview of auditing standards and guidance notes issued by the Institute from time to time. Though these standards and guidance notes have been dealt at appropriate places, the main purpose is to acquaint and inculcate appreciation on the part of students in a focused manner as to significance of the standards in their day to day auditing activities. Towards the end of the Chapter, the clarification issued by the Council of the Institute is also included, which would go a long way in understanding as well as significance to the mandatory status of “Statements” and “Standards”.

1.2 Historical Retrospect

The Institute, since its inception, has been committed to research in the field of accountancy. As early as in 1955, the Council set up the Research Committee. The Council at that point of time felt the necessity to establish such a Committee to deal with the growing complexities of

1.2 Advanced Auditing and Professional Ethics

the problems faced by membership at large and with a view to ensuring the highest of traditions and technical competence in the discharge of the duties by chartered accountants.

As back as in 1964, the Council published the “Statement on Auditing Practices” as prepared by the Research Committee not only for the benefit of its members but also for others outside the profession, who might be interested in this subject. It was hoped that this Statement would provide valuable guidance in the performance of audits, particularly of companies. The Council of the Institute fully realised that techniques of accounting and auditing had undergone and were undergoing important changes. Since the members were expected to keep pace with recent developments, this Statement attempted to set out practices which were generally accepted in other countries and which the Council considered desirable in the light of prevailing circumstances in India. The issuance of the Statement on Auditing Practices might be considered as a path break as far as establishing sound auditing practices is concerned. The Statement was further revised in 1968 and 1977.

Prior to establishment of the Auditing Practices Committee (APC), the Research Committee issued the following Statements in Auditing:

- ◆ Statements on Qualifications in Auditor’s Report.
- ◆ Statement on the Manufacturing and Other Companies (Auditor’s Report) Order, 1975/1988 (Issued under Section 227(4A) of the Companies Act, 1956).
- ◆ Statement on Responsibilities of Joint Auditors.
- ◆ Statement on Payments to Auditors for Other Services.

1.3 Auditing and Assurance Standards Board – Scope and Functions

The Following are the important points as regards scope and functions of Auditing and Assurance Standards Board –

1.3.1 Setting up of AASB

The International Federation of Accountants (IFAC) came into existence in 1977 and constituted International Auditing Practices Committee (IAPC) to formulate International Auditing Guidelines. These guidelines were later on converted into International Standards on Auditing (ISA). Considering the developments in the field of auditing at international level, the need for issuing Standards and Guidance Notes in tandem with international standards but conforming to national laws, customs, usages and business environments was felt. With this objective, our Institute constituted the Auditing Practices Committee (APC) on September 17, 1982, to spearhead the new framework of Statements on Standard Auditing Practices (SAPs) and Guidance Notes (GNs) *inter alia* to replace various chapters of the old omnibus Statement on Auditing Practices issued in 1964.

In July, 2002, the Auditing Practices Committee has been converted into an Auditing and Assurance Standards Board by the Council of the Institute, to be in line with the international trend. A significant step has been taken aimed at bringing in the desired transparency in the working of the Auditing and Assurance Standards Board, through participation of

representatives of various segments of the society and interest groups, such as, regulators, industry and academics. The nomenclature of SAPs had been changed to Auditing and Assurance Standards (AASs). As per the Preface to Standards on Quality Control Auditing Review, other Assurance and Related Services w.e.f. April 1, 2008, the nomenclature of AASs under the authority of the Council are collectively known as the Engagement Standards and Quality Control Standards which include the following:

-  Standards on Auditing (SAs), to be applied in the audit of historical financial information.
-  Standards on Review Engagements (SREs), to be applied in the review of historical financial information.
-  Standards on Assurance Engagements (SAEs), to be applied in assurance engagements, dealing with subject matters other than historical financial information.
-  Standards on Related Services (SRSs), to be applied to engagements involving application of agreed-upon procedures to information, compilation engagements, and other related services engagements, as may be specified by the ICAI.
-  Standard on Quality Control which contains extensive requirements in relation to establishment and maintenance of a system of quality control in the audit firms as well as even for sole practitioners.

1.3.2 Scope and Functions of AASB

The main function of the AASB is to review the existing auditing practices in India and to develop Statements on Standards on Auditing (SAs) so that these may be issued by the Council of the Institute. While formulating the SAs, the AASB takes into consideration the ISAs issued by the IAPC, applicable laws, customs, usages and business environment in India. The SAs are issued under the authority of the Council of the Institute. The AASB also issues Guidance Notes on the issues arising from the SAs wherever necessary. The AASB has also been entrusted with the responsibility to review the SAs at periodical intervals.

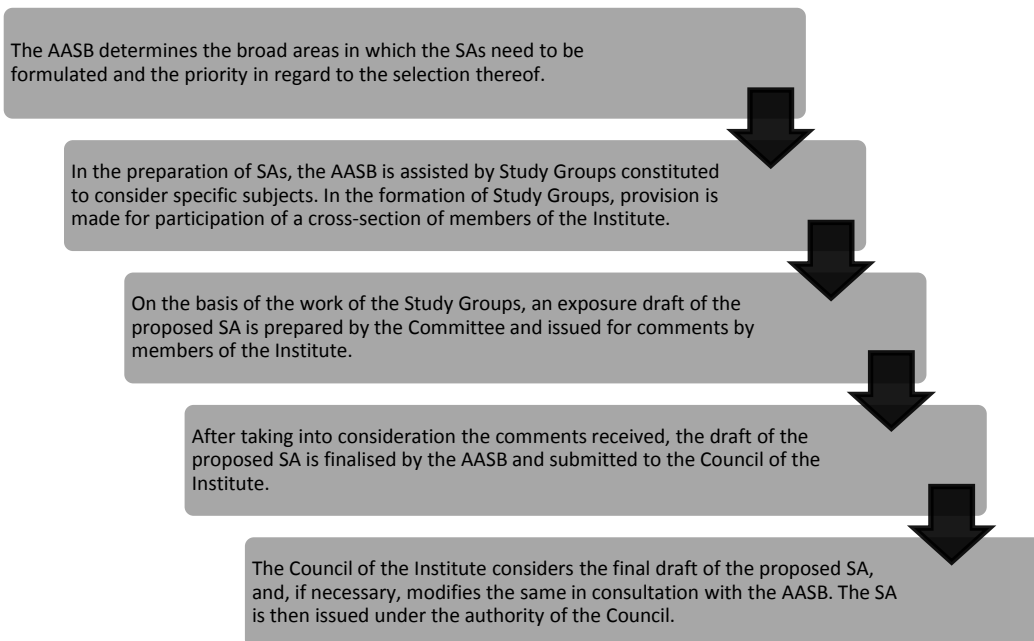

1.3.3 Scope of SAs

The SAs apply whenever an independent audit is carried out; that is, in the independent examination of financial information of any entity, whether profit oriented or not, and irrespective of its size, or legal form (unless specified otherwise) when such an examination is conducted with a view to expressing an opinion. The SAs may also have application, as appropriate, to other related functions of auditors. Any limitation on the applicability of a specific SA is made clear in the introductory paragraph of the SA.

1.4 Advanced Auditing and Professional Ethics

1.3.4 Procedure for issuing SAs

Broadly, the following procedure is adopted for the formulation of SAs:

1.3.5 Compliance with the SAs

While discharging their attest function, it is the duty of the members of the Institute to ensure that the SAs are followed in the audit of financial information covered by their audit reports. If for any reason a member has not been able to perform an audit in accordance with the SAs, his report should draw attention to the material departures therefrom. Auditors are expected to follow SAs in the audits commencing on or after the date specified in the Standard. Further, compliance of SAs are mandatory requirement as per the Companies Act, 2013.

1.3.6 Linkage between SAs and Disciplinary Proceedings

The SAs (as well as other statements on auditing) represent the generally accepted procedure(s) of audit. As such, a member who does not perform his audit in accordance with these statements and fails to disclose the material departures there from, becomes liable to the disciplinary proceedings of the Institute under Clause (9) of Part I of the Second Schedule to the Chartered Accountants Act, 1949 (as amended by the Chartered Accountants (Amendment) Act, 2006), which specifies that a member of the Institute engaged into practice shall be guilty of professional misconduct if he “fails to invite attention to any material departure from the generally accepted procedure of audit applicable to the circumstances”.

1.4 Framework of Standards and Guidance Notes on Related Services

Framework of Standards on Auditing and Guidance Notes on Related Services issued recently distinguishes audits from related services. Related services comprise reviews, agreed-upon procedures and compilations. As illustrated in the diagram below, audits and reviews are designed to enable the auditor to provide high and moderate levels of assurance respectively, such terms being used to indicate their comparative ranking. Engagements to undertake agreed-upon procedures and compilations are not intended to enable the auditor to express assurance.

	Auditing	Related Services			
Nature of service	Audit	Review	Agreed-upon Procedures	Compilation	
Comparative level of assurance provided by the auditor	High, but not absolute assurance	Moderate assurance	No assurance	No assurance	
Report provided	Positive assurance on assertion(s)	Negative assurance on assertion(s)	Factual findings of procedures	Identification of information compiled	

Assurance in the above context refers to the auditor's satisfaction as to the reliability of an assertion being made by one party for use by another party. To provide such assurance, the auditor assesses the evidence collected as a result of procedures conducted and expresses a conclusion. The degree of satisfaction achieved and, therefore, the level of assurance which may be provided is determined by the procedures performed and their results. In an audit engagement, the auditor provides a high, but not absolute, level of assurance (i.e. reasonable level of assurance) that the information subject to audit is free of material misstatement expressed positively in the audit report. In a review engagement, the auditor provides a moderate level of assurance that the information subject to review is free of material misstatement. This is expressed in the form of negative assurance (also known as limited assurance). For agreed-upon procedures, auditor simply provides a report of the factual findings, no assurance is expressed. Instead, users of the report draw their own conclusions from the auditor's work. In a compilation engagement, although the users of the compiled information derive some benefit from the involvement of a member of the Institute, no assurance is expressed in the report. Objective of an audit is to enable the auditor to express an opinion whether the financial statements are prepared, in all material respects, in accordance with an identified financial reporting framework "give a true and fair view". Absolute assurance in auditing is not attainable as a result of such factors as the need for judgement, the use of test checks, the inherent limitations of any accounting and internal control systems and the fact that most of the evidence available to the auditor is persuasive, rather than conclusive, in nature. The objective of a review of financial statements is to enable

1.6 Advanced Auditing and Professional Ethics

an auditor to state whether, on the basis of procedures which do not provide all the evidence that would be required in an audit, anything has come to the auditor's attention that causes the auditor to believe that the financial statements are not prepared, in all material respects, in accordance with an identified financial reporting framework. While a review involves the application of audit skills and techniques and the gathering of evidence, it does not ordinarily involve an assessment of accounting and internal control systems, tests of records and of responses to inquiries by obtaining corroborating evidence through inspection, observation, confirmation and computation, the auditor attempts to become aware of all significant matters, the procedures of a review make the achievement less likely than in an audit engagement, thus the level of assurance provided in a review report is correspondingly less than that given in an audit report. In an engagement to perform agreed-upon procedures and auditor is engaged to carry out those procedures of an audit nature to which the auditor and the entity and any appropriate third parties have agreed and to report on factual findings. The report is restricted to those parties that have agreed to the procedures to be performed since others, unaware of the reasons for the procedures, may misinterpret the results. In a compilation engagement, a member of the Institute is engaged to use accounting expertise as opposed to auditing expertise to collect, classify, and summarize financial information. The procedures employed are not designed and do not enable the member to express any assurance on the financial information. However, users derive some benefit as a result of the member's involvement because the service has been performed with due professional skill and care. An auditor is associated with financial information when the auditor attaches a report to that information or consents to the use of the auditor's name in a professional connection. If the auditor is not associated in this manner, third parties can assume no responsibility of the auditor.

1.5 Quality Control and Engagement Standards

The Council of the ICAI has issued following Quality Control and Engagement Standards:

S. No.	No. of Standard	Title of the Standard
1	SQC 1	Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements
2	SA 200	Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with Standards on Auditing
3	SA 210	Agreeing the Terms of Audit Engagements
4	SA 220	Quality Control for an Audit of Financial Statements
5	SA 230	Audit Documentation
6	SA 240	The Auditor's responsibilities Relating to Fraud in an Audit of Financial Statements

7	SA 250	Consideration of Laws and Regulations in an Audit of Financial Statements
8	SA 260	Communication with Those Charged with Governance
9	SA 265	Communicating Deficiencies in Internal Control to Those Charged with Governance and Management
10	SA 299	Responsibility of Joint Auditors
11	SA 300	Planning an Audit of Financial Statements
12	SA 315	Identifying and Assessing the Risks of Material Misstatement through Understanding the Entity and its Environment
13	SA 320	Materiality in Planning and Performing an Audit
14	SA 330	The Auditor's Responses to Assessed Risks
15	SA 402	Audit Considerations Relating to an Entity Using a Service Organization
16	SA 450	Evaluation of Misstatements Identified during the Audits
17	SA 500	Audit Evidence
18	SA 501	Audit Evidence - Specific Considerations for Selected Items
19	SA 505	External Confirmations
20	SA 510	Initial Audit Engagements-Opening Balances
21	SA 520	Analytical Procedures
22	SA 530	Audit Sampling
23	SA 540	Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures
24	SA 550	Related Parties
25	SA 560	Subsequent Events
26	SA 570	Going Concern
27	SA 580	Written Representations
28	SA 600	Using the Work of Another Auditor
29	SA 610	Using the Work of Internal Auditors
30	SA 620	Using the Work of an Auditor's Expert
31	SA 700	Forming an Opinion and Reporting on Financial Statements
32	SA 701	<i>Communicating Key Audit Matters in the Independent Auditor's Report</i>
33	SA 705	Modifications to the Opinion in the Independent Auditor's Report
34	SA 706	Emphasis of Matter Paragraphs and Other Matter Paragraphs in

1.8 Advanced Auditing and Professional Ethics

		the Independent Auditor's Report
35	SA 710	Comparative Information – Corresponding Figures and Comparative Financial Statements
36	SA 720	The Auditor's Responsibility in Relation to Other Information in Documents Containing Audited Financial Statements
37	SA 800	Special Considerations-Audits of Financial Statements Prepared in Accordance with Special Purpose Framework
38	SA 805	Special Considerations-Audits of Single Purpose Financial Statements and Specific Elements, Accounts or Items of a Financial Statement
39	SA 810	Engagements to Report on Summary Financial Statements
40	SRE 2400	Engagements to Review Historical Financial Statements
41	SRE 2410	Review of Interim Financial Information Performed by the Independent Auditor of the Entity
42	SAE 3400	The Examination of Prospective Financial Information
43	SAE 3402	Assurance Reports on Controls At a Service Organisation
44	SAE 3420 (New)	<i>Assurance Engagements to Report on the Compilation of Pro Forma Financial Information Included in a Prospectus</i>
45	SRS 4400	Engagements to Perform Agreed Upon Procedures Regarding Financial Information
46	SRS 4410	Compilations Engagements

(Students may note that the abovementioned Quality Control and Engagement Standards are reproduced in Auditing Pronouncements)

1.6 Guidance Notes

Various technical committees of the Institute are involved in the task of issuing guidance notes on topics relating to accounting and auditing for guidance of the members. Some of the important topics in auditing on which guidance notes have been issued are discussed below:

1.6.1 Guidance Note on Independence of Auditors

Professional integrity and independence is an essential characteristic of any member of the accounting profession. A detailed note on this topic was first published by the Council in 1968. In the light of the experience gained over a period of years, this note was revised by the Council and published as a guidance note in 1975. The revised Guidance Note contains essentially a discussion on relevant section of the Companies Act and the provisions of the Chartered Accountants Act, 1949 which aim at ensuring independence of auditors.

1.6.2 Guidance Note on Audit Reports and Certificates for Special Purposes

The purpose of this Guidance Note is to provide guidance on engagements which require a ‘professional accountant in public practice’ (hitherto known as “practitioner”) to issue reports other than those which are issued in audits or reviews of historical financial information. The reports which are issued pursuant to audits or reviews of historical financial information are dealt with in Standards on Auditing (SAs) and Standards on Review Engagements (SREs), respectively, issued by the Institute of Chartered Accountants of India (ICAI).

In some cases, Government and other authorities under various statutes or notifications require reports or certificates from practitioners in support of statements or other information provided by an entity. Such reports or certificates can also be required to be issued to fulfill a contractual reporting obligation or may be required by the management or those charged with governance of an entity for its own special purposes.

Sometimes, the applicable law and regulation or a contractual arrangement that an entity might have entered into, prescribe the wording of report or certificates. The wording often requires the use of word or phrase like “certify” or “true and correct” to indicate absolute level of assurance expected to be provided by the practitioner on the subject matter. Absolute assurance indicates that a practitioner has performed procedures as considered appropriate to reduce the engagement risk to zero.

The increasing involvement of members in giving audit reports or certificates on special purpose statements or other information prepared by an enterprise necessitated the need for guidance to the auditor regarding various facets of such assignments including the form and contents of audit reports and certificates for special purposes. In view of this, the Institute brought out this Guidance Note on Audit Reports and Certificates for Special Purposes.

The following is an overview of the areas touched upon by the Guidance Note:

- ◆ Scope of special purpose reports and certificates
- ◆ Responsibility for preparation of special purpose statements
- ◆ Scope of the reporting auditor’s functions
- ◆ Contents of such reports and certificates
- ◆ Reports and certificates on specific items of financial statements
- ◆ Communication of report or certificate
- ◆ Communication with previous auditor.

The Guidance Note also contains examples of such reports and certificates.

1.6.3 Guidance Note on Tax Audit under Section 44AB of the Income-Tax Act

This Guidance Note was first issued by the Taxation Committee in 1985 and was revised from time to time by the Direct Taxes Committee. Refer to Chapter 15 for a detailed discussion.

1.6.4 Guidance Note on Audit of Inventories

The Guidance Note deals with procedures of the auditor in respect of audit of inventories. It outlines the peculiar features of inventories, which impact the audit procedures. The following is a gist of the important aspects of audit of inventories covered by the Guidance Note:

- ◆ *Internal Control Evaluation*: segregation of incompatible functions, standard form for recording movement of inventory, cross checking of data generated by different departments.
- ◆ *Verification*: management's responsibility for physical verification, sufficient appropriate audit evidence for existence, ownership and valuation, procedures for verification by auditor.
- ◆ *Examination of Records*: type of records, extent of auditor's examination, auditor's procedures in case of absence or insufficiency of records.
- ◆ *Attendance at Stock Taking*: need for auditor's attendance at stock taking, methods and procedures for stock taking, factors to be considered and procedures to be adopted in assessing the adequacy of stock taking, movement of stocks during stock taking, cut off procedures.
- ◆ *Confirmation from Third Parties*: factors to be seen, confirmations from third parties.
- ◆ *Examination of Valuation and Disclosures*: basis for valuation of inventories and methods of applying the basis, compliance with Accounting Standard (AS) 2, "Valuation of Inventories", use of standard costing, examination of the disclosure in financial statements.
- ◆ *Analytical Review Procedures*: illustrative analytical procedures, comprising mainly of comparison of various elements.
- ◆ *Work in Progress*: assessing appropriateness of its valuation etc.
- ◆ Management Representations.
- ◆ Documentation by the auditor.

The Guidance Note also gives illustrated set of instructions to be issued by the client to its staff responsible for stock taking, illustrative letter of confirmation of inventories held by others, illustrative letter of confirmation of inventories held by the entity on behalf of others and an illustrative management representation letter for inventories.

The Clarification issued by the Institute on the auditor's duties where inventories are stated to be "As Valued and Certified by the Management" in the financial statements, issued in September, 1999, has also been given.

1.6.5 Guidance Note on Audit of Debtors, Loans and Advances

The Guidance Note deals with the audit procedures that might be adopted by the auditor in case of audit of debtors, loans and advances. A gist of the relevant areas covered by the Guidance Note is as follows:

- ◆ *Internal Control Evaluation in Respect of Debtors:* fixing of credit/ loan/ advance limits, procedure for recording, realising and correlating outstandings from parties, aging schedule, periodic balance confirmation, authority for material adjustments to parties' account, periodic reconciliation statements, form and adequacy of security, recognition and realisation of interest income.
- ◆ *Verification:* audit evidence regarding existence, completeness, valuation and disclosure.
- ◆ *Examination of Records:* audit procedures for examining records.
- ◆ Indications of doubtful debts/ loans.
- ◆ *Direct Confirmation Procedures:* methods of obtaining confirmations, types of confirmations, timing of confirmations.
- ◆ *Analytical Review Procedures:* comparison of some important elements of debtors/loans and advances.
- ◆ Disclosure.
- ◆ Management Representations.
- ◆ Documentation.

The Guidance Note also contains an illustrative confirmation letters to be sent to debtors and management representation letter for debtors, loans and advances.

1.6.6 Guidance Note on Audit of Investments

This Guidance Note deals with the procedures that might be adopted by the auditor for auditing investments. The Guidance Note also throws light on the exceptional features of investments which have an impact on the audit procedures. The important aspects of audit of investments covered by the Guidance Note are highlighted as follows:

- ◆ *Internal Control Evaluation:* control over acquisition, accretion and disposal of investments, safeguarding of investments, controls in respect of title of investments, information controls.
- ◆ *Verification of Transactions:* authority to invest, legal requirements, supporting documents, terms of sale or purchase (ex or cum dividend/interest), rights issues, bonus issues.
- ◆ *Physical Verification:* responsibility of auditor, use of depository/ custodial services by the client, scripless trading, timing of physical examination, investments held by others, investments not held in the name of the client vis a vis legal requirements, procedure in finance/chit fund/nidhi companies etc., immovable properties held as investments.
- ◆ *Examination of Valuation or Disclosures:* valuation and disclosure of investments vis a vis, compliance with Accounting Standard (AS) 13 and statutory requirements, method of valuation.
- ◆ *Analytical Procedures:* comparison of various ratios.
- ◆ Management Representations.

1.12 Advanced Auditing and Professional Ethics

- ◆ Documentation by the auditor.

The Guidance Note, for the benefit of the members, also give a gist of legal requirements, including disclosure norms, relating to investments under certain prominent statutes, illustrative letter of confirmation for investments held by banks, and management representation letter for investments.

1.6.7 Guidance Note on Audit of Cash and Bank Balances

The Guidance Note deals with the audit procedures that might be adopted while auditing cash and bank balances. The following is a gist of the relevant areas covered by the Guidance Note:

- ◆ *Internal Control Evaluation*: segregation of incompatible functions, authorisation, recording of transactions, safe custody of cash, chequebooks etc., reconciliation statements, etc.
- ◆ *Verification of Cash Balances*: timing of carrying out verifications, procedure for verification, situations of unduly large cash balances, IOUs, procedures in case of discrepancies, frequency of verification.
- ◆ *Verification of Bank Balances*: procedures for verification, examination of bank reconciliation statements and unusually old outstandings therein, post dated cheques, obtaining confirmations from banks, inoperative bank accounts, fixed deposits, remittance in transit, treatment of stale cheques, valuation of foreign exchange transactions.
- ◆ *Examination of Valuation and Disclosure*: compliance with recognised accounting policies, practices, statutory requirements.

The Guidance Note also gives an illustrative letter of confirmation for bank balances.

1.6.8 Guidance Note on Audit of Liabilities

This Guidance Note contains recommended audit procedures in case of audit of liabilities. The following is an outline of the relevant areas discussed in the Guidance Note:

- ◆ *Internal Control Evaluation in Respect of Loans and Borrowings*: credit limits/borrowing powers and limits, authority, terms of borrowing, compliance with statutory requirements, variation in terms, security against loans, documentation, reporting of non compliance, balance confirmations, foreign exchange loans.
- ◆ *Internal Control Evaluation in Respect of Trade Creditors, Current Liabilities, Provisions, Trade Deposits*: in addition to those above, payment on duplicate invoices, schedule of creditors, adjustments to creditors, accounts to be authorised, cut off procedures.
- ◆ *Examination of Records of Loans and Borrowings*: validity and accuracy, agreement with the statements from creditors and loanees, loan agreements, change in the value of security, deferred payment credits.

- ◆ *Examination of Records of Trade Creditors and Other Current Liabilities:* cut off procedures, control accounts, documentary evidence, important aspects to be seen in the schedule of creditors etc., year end transactions, subsequent events.
- ◆ *Examination of Records of Provisions:* meaning of provision, objectives of audit of provisions, provision for taxes and duties, provision for gratuity, provision for bonus, provision for dividend, other provisions.
- ◆ *Examination of Records of Contingent Liabilities:* meaning, general procedures for verifying contingencies.
- ◆ *Direct Confirmation Procedures:* meaning, types – negative/ positive, suitability of each type, discrepancies in books of account vis a vis confirmations.
- ◆ *Examination of Disclosures.*
- ◆ *Analytical Review Procedures:* comparison of various ratios.
- ◆ *Special Considerations in case of a Company:* compliance with the relevant sections of the Companies Act.
- ◆ *Management Representations.*
- ◆ *Documentation.*

The Guidance Note also contains illustrative letter of confirmation to be sent to creditors and management representation letter for liabilities and contingencies.

1.6.9 Guidance Note on Audit of Revenue

The Guidance Note contains recommended audit procedures in case of audit of liabilities. The following is an outline of the areas covered by the Guidance Note:

- ◆ *Assertions Regarding Revenue:* occurrence, completeness, measurement, presentation and disclosure.
- ◆ Internal Control Evaluation.
- ◆ *Examination of Records:* compliance with AS 9, cut-off procedures, sales journal, dispatch documents, sales to intermediate parties, realisation in installments, export sales, revenue from services rendered.
- ◆ Examination of Presentation and Disclosure.
- ◆ *Analytical Procedures:* comparison of various relevant components of revenue.
- ◆ *Special Considerations in case of a Company:* compliance with relevant statutory requirements.
- ◆ Documentation.

1.6.10 Guidance Note on Audit of Expenses

This Guidance Note deals with the illustrative audit procedures that might be adopted by the auditors in auditing various items of expenses. The introductory part of the Guidance Note

1.14 Advanced Auditing and Professional Ethics

deals with the explanation of the term “expense” and the different approaches to identify the expense. It also deals with the peculiar features of “expenses” which impact the audit procedures as also the assertions to be examined in respect thereof.

The following is a gist of the relevant aspects of audit of expenses covered by the Guidance Note:

- ◆ Internal Control Evaluation
- ◆ Verification – Examining Records and Analytical Procedures
- ◆ Examination of Presentation and Disclosure
- ◆ Management Representation
- ◆ Documentation
- ◆ Special Considerations in the Case of a Company

The Guidance Note also contains illustrative audit procedures for the following items of expenses, viz., goods and raw materials consumed, purchases and purchase returns, wages and salaries, bonus, retirement benefits, other conversion costs, establishment and general administrative expenses, interest and financial charges, depreciation, research and development expenses, repairs and maintenance, contingencies, and taxes on income.

1.6.11 Guidance Note on Computer Assisted Audit Techniques (CAATs.)

Recognising the developments in the field of technology and its impact on the accounting profession in India, Auditing and Assurance Standards Board had issued Standard on Auditing (SA) 315, “Identifying and Assessing the Risks of Material Misstatement through Understanding the Entity and Its Environment” and SA 330, “The Auditor’s Responses to Assessed Risks”. The Guidance Note deals extensively, with the concept of CAATs and related pertinent issues such what CAATs are, where they may be used, considerations in use of CAATs, how to use CAATs, testing of CAATs, controlling application of CAATs, documentation required when using CAATs, use of CAATs in small entities, etc. The Guidance Note also contains a comprehensive appendix containing examples of CAATs, their description and comparable advantages and disadvantages of each of these CAATs.

1.6.12 Guidance Note on Audit of Payment of Dividends

The Auditing and Assurance Standards Board of India have issued the Guidance Note on Audit of Payment of dividend in order to keep the members abreast in resolving the technical intricacies involved in auditing payment of dividend. The Guidance Note deals, in detail, about internal control evaluation and various verification procedures required to be done by the auditor. The Guidance Note takes in to account both, corporate as well as non-corporate entities. The Appendix to the Guidance Note contains extracts of various relevant Acts and Rules relating to payment of dividend, the objective being to make the publication a complete, self-contained document for use by the members and others.

1.6.13 Guidance Note on Audit of Capital and Reserves

The Auditing and Assurance Standards Board of India has issued Guidance Note on Audit of Capital and Reserves in order to keep the members abreast in resolving the technical intricacies involved in auditing of capital and reserves. The Guidance Note discusses the auditing aspect of capital and reserves separately. It deals in detail, with different principle related aspects dealing with the audit of capital and reserves including implications of key legal requirements. This Guidance Note not only gives special consideration to companies but partnerships and sole proprietary concerns as well. The Guidance Note also incorporates circulars issued by the Government and other regulatory authorities wherever applicable.

The Guidance Note on Audit of Capital and Reserves discusses significant aspects of their audit such as evaluation of internal controls and verification, the audit evidence, the auditing procedure to be followed in case of issue of shares for consideration other than cash and in case of issue of Sweat Equity shares etc. The Guidance Note also deals with various types of reserves and their accounting treatment while discussing auditing aspects. It also lays down the documentation requirements for the audit of capital and reserves.

1.6.14 Guidance Note on Reporting under section 143(3)(f) and (h) of the Companies Act, 2013

This Guidance Note is intended to assist the auditors in discharging their duties in respect of clauses (f) and (h) of sub-section (3) of section 143 of the Act. Clause (f) of the said sub-section creates a requirement for the auditor to consider observations or comments of the auditor on financial transactions or matters which have an adverse effect on the functioning of the company. Such observations or comments would ordinarily lead to the modification of or an emphasis of matter in the auditor's report on financial statements. It may be noted that the matters that lead to modification in the auditor's report on financial statements are matters that give rise to a qualified opinion, adverse opinion or a disclaimer of opinion. Further, matters that lead to an emphasis of matter paragraphs are matters appropriately presented or disclosed in the financial statements that, in the auditor's judgement, are of such importance that they are fundamental to the users' understanding of the financial statements. If the matter leading to the modification of the auditor's opinion or an emphasis of matter in the auditor's report on financial statements is likely to have an adverse effect on the functioning of the company, the auditor is required to report such matter.

Under clause (h) of sub-section (3) of section 143 of the Act, the auditor is required to state whether any matter leading to a qualification, reservation or adverse remark, that is, effectively the modification of the auditor's report on financial statements, relates to the maintenance of accounts and other matters connected therewith.

1.6.15 Guidance Note on Audit of Consolidated Financial Statements(CFS)

An entity which prepares the consolidated financial statements, either under any law or regulation governing the entity or suo motu, might be required to or otherwise engage the auditor for conducting the audit of consolidated financial statements. However, a law or regulation governing the entity may require the consolidated financial statements

to be audited by the statutory auditor of the entity. This Guidance Note provides guidance on the specific issues and audit procedures to be applied in an audit of consolidated financial statements. This Guidance Note can also be used while auditing consolidated financial statements prepared for special purpose, to the extent applicable. However, this Guidance Note does not deal with accounting matters arising on consolidation of financial statements. Consolidated financial statements are presented, to the extent possible, in the same format as adopted by the parent for its separate financial statements. The formats for preparation of balance sheet, statement of profit and loss and a statement of change in equity (if applicable) are prescribed under the Schedule III of the Companies Act, 2013.

1.6.16 Guidance Note on CARO 2016

The purpose of this Guidance Note is to enable the members to comply with the reporting requirements of the Order. It should, however, be noted that the clarifications and explanations contained in this Guidance Note are not intended to be exhaustive and the auditors should exercise their professional judgment and experience on various matters on which they are required to report under the Order. Further, the Order is also not intended to limit the duties and responsibilities of auditors but only requires a statement to be included in the audit report in respect of the matters specified therein. Refer Chapter 8 Audit Reports and Auditing Pronouncements for details.

1.6.17 Guidance Note on Audit of Internal Financial Controls over Financial Reporting

To help the members properly understand and perform the various aspects of reporting responsibility related to audits of internal financial controls over financial reporting, the Auditing and Assurance Standards Board of the Institute of Chartered Accountants of India has brought out this Guidance Note on Audit of Internal Financial Controls Over Financial Reporting. The Guidance Note covers aspects such as Scope of reporting on internal financial controls under Companies Act 2013, essential components of internal financial controls, Technical guidance on audit of internal financial controls, Implementation guidance on audit of internal financial controls.

The Companies Act, 2013 has introduced some new requirements relating to audits and reporting by the statutory auditors of companies. One of these requirements is given under Section 143(3)(i) of the Act which requires the statutory auditor to state in his audit report whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls. The section has cast onerous responsibilities on the statutory auditors because reporting on internal financial controls is not covered under the Standards on Auditing issued by the ICAI. Student may refer Handbook on Auditing Pronouncements for more details.

1.6.18 Guidance Note on Reporting on Fraud under section 143(12) of the Companies Act, 2013

This guidance note deals with section 143(12) of the Companies Act, 2013 which states that "Notwithstanding anything contained in this section, if an auditor of a company, in the

course of the performance of his duties as auditor, has reason to believe that an offence of fraud involving such amount or amounts as may be prescribed, is being or has been committed in the company by its officers or employees, the auditor shall report the matter to the Central Government within such time and in such manner as may be prescribed:

It is also provided that in case of fraud involving lesser than the specified amount, the auditor shall report the matter to the audit committee constituted under section 177 or to the Board in other cases within such time and in such manner as may be prescribed: It also provide guidance that the companies, whose auditors have reported frauds under this sub-section to the audit committee or the Board but not reported to the Central Government, shall disclose the details about such frauds in the Board's report in such manner as may be prescribed." Student may refer Handbook on Auditing Pronouncements for more details.

1.7 Guidance note(s) on Related Services

The framework for auditing and related services makes it clear that there can be different layers of assurance depending upon the nature of services being performed by the chartered accountant. Related Services comprise of Review engagements, Agreed upon Procedures and Compilation Engagement. Reviews engagements involve providing moderate assurance (or negative assurance) but other two services, viz., and compilation and agreed upon procedures provide no assurance at all. The Institute has issued guidance notes covering these aspects of related services in a comprehensive manner.

1.8 Authority Attached to the Documents Issued by the Institute/MCA

The Institute has, from time to time, issued 'Statements' and 'Guidance Notes' on a number of matters. With the formation of the Accounting Standards Board and the Auditing and Assurance Standards Board, Accounting Standards and *Standards on Auditing* have also been issued. The level of authority attached to these documents and the degree of compliance required in respect thereof has been explained by the Institute through its various announcements issued from time to time.

1.8.1 Statements

The 'statements' have been issued with a view to securing compliance by members on matters which in the opinion of the council of the institute are critical for the proper discharge of their functions. 'statements' therefore are mandatory. Accordingly, while discharging their attest function, it is the duty of the members of the institute.

- (a) to examine whether 'Statements' relating to accounting matters are complied with in the presentation of financial statements covered by their audit. In the event of any deviation from such 'Statements', it is their duty to make adequate disclosures in their audit reports so that the users of financial statements may be aware of such deviations; and
- (b) to ensure that the 'Statements' relating to auditing matters, are followed in the audit of financial information covered by their audit reports. If, for any reason, a member, has not been able to perform an audit in accordance with such 'Statements' his report should

1.18 Advanced Auditing and Professional Ethics

draw attention to the material departures there from.

1.8.2 Guidance Notes

'guidance notes' are primarily designed to provide guidance to members on matters which may arise in the course of their professional work and on which they may desire assistance in resolving issues which may pose difficulty. Guidance notes are recommendatory in nature. A member should ordinarily follow recommendations in a guidance note relating to an auditing matter except where he is satisfied that in the circumstances of the case, it may not be necessary to do so. Similarly, while discharging his attest function, a member should examine whether the recommendations in a guidance note relating to an accounting matter have been followed or not. If the same have not been followed, the member should consider whether keeping in view the circumstances of the case, a disclosure in his report is necessary. There are, however a few guidance notes in case of which the Council has specifically stated that they should be considered as **mandatory** on members while discharging their **attest** function.

1.8.3 Accounting Standards and Standards on Auditing

The 'accounting standards' and '*Standards on Auditing*' establish standards which have to be complied with to ensure that financial statements are prepared in accordance with generally accepted accounting standards and that auditors carry out their audit in accordance with the generally accepted auditing practices. They become mandatory on the dates specified in the respective document or notified by the council.

There can be situations in which certain matters are covered both by a 'Statement' and by an 'Accounting Standard'/'*Standards on Auditing*'. In such a situation, the 'Statement' prevails till the time the relevant 'Accounting Standard'/'*Standards on Auditing*' becomes mandatory. Once an 'Accounting Standard'/'*Standards on Auditing*' becomes mandatory, the concerned 'Statement' or the relevant part thereof automatically stands withdrawn.

Standards on Auditing (SAs) establish standards, which have to be complied with to ensure that auditors carry out their duties in accordance with the generally accepted auditing practices. They become operative (i.e., mandatory) in respect of audit of all enterprises on the dates specified in the respective SAs or notified by the Council. The duties of the members of the Institute in relation to operative SAs are similar to those in respect of 'Statements' relating to auditing matters.

1.8.4 Accounting Standards

Accounting Standards are formulated by the Accounting Standards Board and issued by the Council of the Institute. The Accounting Standards are issued for use in the presentation of 'general purpose financial statements' which are issued to the public by such 'commercial, industrial or business enterprises' as may be specified by the Institute from time to time and subject to the attest function of its members. They become mandatory on the dates specified in the respective Accounting Standards or notified by the Council in this behalf.

- (a) The term 'General Purpose Financial Statements' includes balance sheet, statement of profit and loss and other statements and explanatory notes which form part thereof,

issued for the use of shareholders/members, creditors, employees and public at large.

- (b) The reference to 'commercial, industrial or business enterprises' is in the context of the nature of activities carried on by an enterprise rather than with reference to its objects. The Accounting Standards apply in respect of commercial, industrial or business activities of any enterprise, irrespective of whether it is profit oriented or is established for charitable or religious purposes. Accounting Standards will not, however, apply to those activities which are not of commercial, industrial or business nature (e.g. an activity of collecting donations and giving them to flood affected people). The exclusion of an entity from the applicability of the Accounting Standards is permissible only if no part of the activity of entity is commercial, industrial or business in nature. In other words, even if a very small proportion of the activities of an entity is considered to be commercial, industrial or business in nature, then it cannot claim exemption from the application of Accounting Standards. In such a case the Accounting Standards will apply to all its activities including those which are not commercial, industrial or business in nature.

The Companies Act as well as many other statutes require that the financial statements of an enterprise should give a true and fair view of its financial position and working results. This requirement is implicit even in the absence of a specific statutory provision to this effect. However, what constitutes 'true and fair' view has not been defined either in the Companies Act or in any other statute. The Accounting Standards (as well as other pronouncements of the Institute on accounting matters) seek to describe the accounting principles and the methods of applying these principles in the preparation and presentation of financial statements so that they give a true and fair view.

The 'Preface to the Statements of Accounting Standards' issued by the Institute in 2004 states (paragraphs 6.1 and 6.3):

"6.1 While discharging their attest function, it will be the duty of the members of the Institute to examine whether the Accounting Standard is complied with in the presentation of financial statements covered by their audit. In the event of any deviation from the Accounting Standard, it will be their duty to make adequate disclosures in their reports so that the users of such statements may be aware of financial deviations."

"6.3 Financial Statements cannot be described as complying with the Accounting Standards unless they comply with all the requirements of each applicable standard."

Once an Accounting Standard becomes mandatory, the duties of an auditor with respect to such standard are the same as those specified at paragraph 2(a) above.

While discharging their attest function, the members of the Institute may keep the following in mind with regard to mandatory Accounting Standards.

AS 1 - Disclosure of Accounting Policies - In the case of a company, members should qualify their audit reports in case:

- (a) accounting policies required to be disclosed under Schedule III or any other provisions of

1.20 Advanced Auditing and Professional Ethics

- the Companies Act, 2013, have not been disclosed, or
- (b) accounts have not been prepared on accrual basis, or
 - (c) the fundamental accounting assumption of going concern has not been followed and this fact has not been disclosed in the financial statements, or
 - (d) proper disclosures regarding changes in the accounting policies have not been made.

Where a company has been given a specific exemption regarding any of the matters stated in paragraph 16 above but the fact of such exemption has not been adequately disclosed in the accounts, the member should mention the fact of exemption in his audit report without necessarily making it a subject matter of audit qualification.

If accounting policies have not been disclosed at one place or if certain significant accounting policies have not been disclosed, by a company on the ground that their disclosure is not required under the Companies Act, 2013, the member should disclose the fact in his audit report without necessarily making it a subject matter of audit qualification. Such a disclosure would not constitute a reservation, qualification or adverse remark except where the auditor has specifically made it a subject matter of audit qualification. Accordingly in the case of a company, the Board of Directors need not provide information or explanation with regard to such a disclosure (except where the same constitutes a qualification) in their report under sub-section (3) of Section 134 of the Companies Act, 2013.

In the case of enterprises not governed by the Companies Act, 2013, the member should examine the relevant statute and make suitable qualification in his audit report in case adequate disclosures regarding accounting policies have not been made as per the statutory requirements. Similarly, the member should examine if the fundamental accounting assumptions have been followed in preparing the financial statements or not. In appropriate cases, he should consider whether, keeping in view the requirements of the applicable laws, a qualification in his report is necessary. In the event of non-compliance, by enterprises not governed by the Companies Act, 2013, with the disclosure requirements of AS1 in situations where the relevant statute does not require such disclosures to be made, the member should make adequate disclosure in his audit report without necessarily making it a subject matter of audit qualification.

Other Mandatory Accounting Standards - While making a qualification, the auditor should follow the requirements of the 'Statement on Qualifications in Auditor's Report' issued by the Institute. Subject to this, non-compliance with any of the requirements of a mandatory Accounting Standard other than AS 1 by any enterprise should be a subject matter of qualification except that, to the extent that the disclosure requirements in the relevant standard are in addition to the requirements of the Companies Act, 2013, or any other applicable statute, the member should disclose the fact of non-compliance with such disclosure requirements in his audit report without necessarily making it a subject matter of audit qualifications.

Financial Statements Prepared on a Basis other than Accrual - With regard to the fundamental accounting assumption of accrual, the Council of the Institute has made a

specific announcement that in respect of individuals/bodies covered by para AS 1 - *Disclosure of Accounting Policies* above, the auditor should examine whether the financial statements have been prepared on accrual basis. In cases where the statute governing the enterprise requires the preparation and presentation of financial statements on accrual basis but the financial statements have not been so prepared, the auditor should qualify his report. On the other hand, where there is no statutory requirement for preparation and presentation of financial statements on accrual basis, and the financial statements have been prepared on a basis other than 'accrual', the auditor should describe in his audit report, the basis of accounting followed, without necessarily making it a subject matter of a qualification. In such a case the auditor should also examine whether those provisions of the accounting standards which are applicable in the context of basis of accounting followed by the enterprise have been complied with or not and consider making suitable disclosures/qualifications in his audit report accordingly.

1.8.5 Ind AS

Indian Accounting Standards (Ind-AS) are the International Financial Reporting Standards (IFRS) converged standards issued by the Central Government of India under the supervision and control of Accounting Standards Board (ASB) of ICAI and in consultation with National Advisory Committee on Accounting Standards (NACAS). The Ind AS are named and numbered in the same way as the corresponding International Financial Reporting Standards (IFRS).

In July 2014, the Finance Minister of India at that time, Shri Arun Jaitely ji, in his Budget Speech, announced an urgency to converge the existing accounting standards with the International Financial Reporting Standards (IFRS) through adoption of the new Indian Accounting Standards (Ind AS) by the Indian companies from the financial year 2015-16 voluntarily and from the financial year 2016-17 on a mandatory basis.

Pursuant to the above announcement, various steps have been taken to facilitate the implementation of IFRS-converged Indian Accounting Standards (Ind AS). Moving in this direction, the Ministry of Corporate Affairs (MCA) has issued the Companies (Indian Accounting Standards) Rules, 2015 vide Notification dated February 16, 2015 covering the revised roadmap of implementation of Ind AS for companies other than Banking companies, Insurance Companies and NBFCs and Indian Accounting Standards (Ind AS). As per the Notification, Indian Accounting Standards (Ind AS) converged with International Financial Reporting Standards (IFRS) shall be implemented on voluntary basis from 1st April, 2015 and mandatorily from 1st April, 2016.

Manner of Making Qualification Disclosure in the Audit Report - In making a qualification/disclosure in the audit report in respect of non-compliance with a Statement, SA, Accounting Standard or Guidance Note, the auditor should consider the materiality of the relevant item. Thus, the auditor need not make qualification/disclosure in respect of items which, in his judgement, are not material.

1.22 Advanced Auditing and Professional Ethics

While making a qualification, the auditor should follow the requirements of the 'Statement on Qualifications in Auditor's Report' issued by the Institute.

A disclosure, which is not a subject matter of audit qualification, should be made in the auditor's report in a manner that it is clear to the reader that the disclosure does not constitute an audit qualification. The paragraph containing the auditor's opinion on true and fair view should not include a reference to the paragraph containing the aforesaid disclosure.

Examples of Qualifications/Disclosures in the Audit Report - Given below are some examples which illustrate the manner of making qualification/disclosure in the audit report. It may be clarified that these examples are aimed only at illustrating the manner of making qualifications/disclosures and are not intended in any way to be exhaustive.

Examples of Qualifications

- (a) Where proper disclosures regarding changes in accounting policies have not been made by a company.

"The statement of profit and loss and balance sheet comply with the accounting standards referred to Section 133 of the Companies Act, 2013, except Accounting Standard (AS) 5, 'Net Profit or Loss for the Period, Prior Period Items and Changes in Accounting Policies', as the company has not disclosed in its accounts the fact of change, from this year, in the method of providing depreciation on plant and machinery from straight-line method to written-down value method, as also the effect of this change. As a result of this change, the net profit for the year, the net block as well as the reserves and surplus are lower by ₹ Each as compared to the position which would have prevailed had this change not been made.

Subject to the above, we report that"

- (b) Where a manufacturing company has accounted for interest income on receipt basis and not on time proportion basis.

"The statement of profit and loss and balance sheet comply with the accounting standards referred to in Section 133 of the Companies Act, 2013, except Accounting Standard (AS) 9, 'Revenue Recognitions', as the company has followed the policy of accounting for interest income on receipt basis rather than on time proportion basis. As a result, the net profit for the year and the current assets are understated by ₹..... each as compared to the position which would have prevailed if the company had accounted for interest income on time proportion basis.

Subject to the above, we report that"

- (c) Where an enterprise has capitalised financing costs related to certain fixed assets for periods after such assets were ready to be put to use.

"The statement of profit and loss and balance sheet comply with the accounting standards referred to in Section 133 of the Companies Act, 2013, except Accounting Standard (AS) 16, 'Borrowing Costs', as interest payable on borrowings related to the

acquisition of fixed assets has been capitalised for the periods after which the assets were put to use. Consequently, the net profit for the year, the net block of fixed assets and the reserves and surplus have been overstated by ₹..... each as compared to the position which would have prevailed if the company had complied with the requirements of AS 16.

Subject to the above, we report that"

Examples of Disclosures

- (a) Where a company has not disclosed all significant accounting policies and has also not disclosed the accounting policies at one place.

"The statement of profit and loss and balance sheet comply with the accounting standards referred to in Section 133 of the Companies Act, 2013, except Accounting Standard (AS) 1, 'Disclosure of Accounting Policies', as the company has disclosed those accounting policies the disclosure of which is required by the Companies Act, 2013. Other significant accounting policies, relating to treatment of research and development costs have not been disclosed nor have all the policies been disclosed at one place.

We report that"

- (b) Where a sole proprietary concern enterprise follows cash basis of accounting.

"It is the policy of the enterprise to prepare its financial statements on the cash receipts and disbursements basis. On this basis revenue and the related assets are recognised when received rather than when earned, and expenses are recognised when paid rather than when the obligation is incurred.

In our opinion, the financial statements give a true and fair view of the assets and liabilities arising from cash transactions of at and of the revenue collected and expenses paid during the year then ended on the cash receipts and disbursements basis as described in Note X."

Applicability of Accounting Standards to charitable and/or religious organisations - The Accounting Standards Board has received a query as to whether the accounting standards formulated by it are applicable to organisations whose objects are charitable or religious. The Board has considered this query and its views in the matter are set forth in the following paragraphs.

The Preface to the Statements of Accounting Standards states:

"The Institute will issue Accounting Standards for use in the presentation of the general purpose financial statements issued to the public by such commercial, industrial or business enterprises as may be specified by the Institute from time to time and subject to the attest function of its members".

The reference to commercial, industrial or business enterprises in the aforesaid paragraph is in the context of the nature of activities carried on by an enterprise rather than with reference to its objects. It is quite possible that an enterprise has charitable objects but it carries on,

1.24 Advanced Auditing and Professional Ethics

either wholly or in part, activities of a commercial, industrial or business nature in furtherance of its objects. The Board believes that Accounting Standards apply in respect of commercial, industrial or business activities of any enterprise, irrespective of whether it is profit oriented or is established for charitable or religious purposes. Accounting Standards will not, however, apply to those activities which are not of a commercial, industrial or business nature. (e.g. an activity of collecting donations and giving them to flood affected people).

It is also clarified that exclusion of an entity from the applicability of the Accounting Standards would be permissible only if no part of the activity of such entity was commercial, industrial or business in nature. For the removal of doubts, it is clarified that even if a very small proportion of the activities of an entity were considered to be commercial, industrial or business in nature, then it could not claim exemption from the application of Accounting Standards. The Accounting standards would apply to all its activities including those which were not commercial, industrial or business in nature.

2

Audit Strategy, Planning and Programming

2.1 Commencing an Audit

SA 200 “Overall Objectives of the Independent Auditor and the Conduct of an Audit in accordance with Standards on Auditing” states that to achieve the overall objectives of the auditor, the auditor shall use the objectives stated in relevant SAs in planning and performing the audit. Without a careful plan, the overall objective of an audit may not be achieved. The audit planning is necessary to conduct an effective audit in an efficient and timely manner.

2.1.1 Benefits/Advantages of Planning in an Audit of Financial Statements

Planning an audit involves establishing the overall audit strategy for the engagement and developing an audit plan. Adequate planning benefits the audit of financial statements in several ways described hereunder-

- (i) Attention to Important Areas - Planning would help the auditor to devote appropriate attention to important areas of the audit.
- (ii) Timely resolution of Potential Problems - It would also help the auditor identify and resolve potential problems on a timely basis.
- (iii) Proper Organisation and Management of Audit Engagement - Adequate planning would help the auditor in properly organizing and managing the audit engagement so that it is performed in an effective and efficient manner.
- (iv) Proper Selection of Engagement Team - Planning would assist the auditor in the selection of engagement team members with appropriate levels of capabilities and competence to respond to anticipated risks, and the proper assignment of work to them.
- (v) Direction and Supervision of Engagement Team - It would further facilitate the direction and supervision of engagement team members and the review of their work.
- (vi) Easy Coordination - Also, planning would be helpful to the auditor in coordination of work done by auditors of components and experts.

2.1.2 Nature and Extent of Planning

So far as the nature of planning is concerned, it would vary according to-

- (i) Size and Complexity of the Auditee - If the size and complexity of organization of which audit is to be conducted is large, then much more planning activities would be required as compared to an entity whose size and complexity is small.

2.2 Advanced Auditing and Professional Ethics

- (ii) Past Experience - The key engagement team members' previous experience also contributes towards variation in planning activities.
- (iii) Change in Circumstances - Another factor contributing towards variation in planning activities is change in circumstances.

2.1.3 Planning - A Continuous Process

Planning is not a discrete phase of an audit but rather a continual and iterative process. It often begins shortly after (or in connection with) the completion of the previous audit and continues until the completion of the current audit engagement. Planning includes consideration of the timing of certain activities and audit procedures.

For example, planning includes the need to consider such matters as:

- The analytical procedures to be applied as risk assessment procedures.
- Obtaining a general understanding of the legal and regulatory framework applicable to the entity and how the entity is complying with that framework.
- The determination of materiality.
- The involvement of experts.
- The performance of other risk assessment procedures.

2.1.4 Overall Audit Strategy and Audit Plan - Responsibility of the Auditor

The auditor may decide to discuss elements of planning with the entity's management to facilitate the conduct and management of the audit engagement. For example - to coordinate some of the planned audit procedures with the work of the entity's personnel.

Although these discussions often occur but the overall audit strategy and the audit plan remain the auditor's responsibility. When discussing matters about the overall audit strategy or audit plan, care is required in order not to compromise the effectiveness of the audit. For Example - discussing the nature and timing of detailed audit procedures with management may compromise the effectiveness of the audit by making the audit procedures too predictable.

The engagement partner and other key members of the engagement team shall be involved in planning the audit. The involvement of the engagement partner and other key members of the engagement team in planning the audit draws on their experience thereby enhancing the effectiveness and efficiency of the planning process.

2.1.5 Preliminary Engagement Activities

The auditor shall undertake the following activities at the beginning of the current audit engagement-

- (i) Performing procedures required by SA 220, "Quality Control for an Audit of Financial Statements" regarding the continuance of the client relationship and the specific audit engagement.

As per the combined reading of SA 220 and SQC 1, information and procedures such as the following assists the auditor in determining whether the conclusions reached regarding

the acceptance and continuance of client relationships and audit engagements are appropriate:

- The integrity of the principal owners, key management and those charged with governance of the entity;
- Whether the engagement team is competent to perform the audit engagement and has the necessary capabilities, including time and resources;
- Whether the firm and the engagement team can comply with relevant ethical requirements; and
- Significant matters that have arisen during the current or previous audit engagement, and their implications for continuing the relationship.

In case of certain entities, such as, Central/State governments and related government entities (for example, agencies, boards, commissions), auditors may be appointed in accordance with statutory procedures.

- (ii) Evaluating compliance with ethical requirements, including independence, as required by SA 220; and
- (iii) Establishing an understanding of the terms of the engagement, as required by SA 210.

2.1.6 Contents of an Audit Plan

The auditor shall develop an audit plan that shall include a description of-

- (i) The nature, timing and extent of planned risk assessment procedures, as determined under SA 315 "Identifying and Assessing the Risks of Material Misstatement through Understanding the Entity and Its Environment".
- (ii) The nature, timing and extent of planned further audit procedures at the assertion level, as determined under SA 330 "The Auditor's Responses to Assessed Risks".
- (iii) Other planned audit procedures that are required to be carried out so that the engagement complies with SAs.

The audit plan is more detailed than the overall audit strategy that includes the nature, timing and extent of audit procedures to be performed by engagement team members. Planning for these audit procedures takes place over the course of the audit as the audit plan for the engagement develops. For example, planning of the auditor's risk assessment procedures occurs early in the audit process. However, planning the nature, timing and extent of specific further audit procedures depends on the outcome of those risk assessment procedures. In addition, the auditor may begin the execution of further audit procedures for some classes of transactions, account balances and disclosures before planning all remaining further audit procedures.

2.1.7 Changes to Planning Decisions

The auditor shall update and change the overall audit strategy and the audit plan as necessary during the course of the audit.

2.4 Advanced Auditing and Professional Ethics

The auditor may need to modify the overall audit strategy and audit plan due to below mentioned factors-

- (i) result of unexpected events,
- (ii) changes in conditions, or
- (iii) the audit evidence obtained from the results of audit procedures.

Further, the auditor would also modify the nature, timing and extent of further audit procedures, based on the revised consideration of assessed risks.

This may be the case when information coming to the auditor differs significantly from the information when he planned the audit procedures. For example, audit evidence obtained through the performance of substantive procedures may contradict the audit evidence obtained through tests of controls.

2.2 Overall Audit Strategy

The auditor shall establish an overall audit strategy that sets the scope, timing and direction of the audit, and that guides the development of the audit plan.

2.2.1 Factors while establishing Overall Audit Strategy

Overall audit strategy would involve-

- (i) Determination of Characteristics of Audit: Identify the characteristics of the engagement that define its scope.
- (ii) Reporting Objectives: Ascertain the reporting objectives of the engagement to plan the timing of the audit and the nature of the communications required.
- (iii) Team's Efforts: Consider the factors that, in the auditor's professional judgment, are significant in directing the engagement team's efforts.
- (iv) Preliminary Work: Consider the results of preliminary engagement activities and, where applicable, whether knowledge gained on other engagements performed by the engagement partner for the entity is relevant.
- (v) Nature, timing and Resources: Ascertain the nature, timing and extent of resources necessary to perform the engagement.

2.2.2 Benefits of Overall Audit Strategy

The process of establishing the overall audit strategy assists the auditor to determine such matters as-

- (i) Employment of Qualitative Resources: The resources to deploy for specific audit areas, such as the use of appropriately experienced team members for high risk areas or the involvement of experts on complex matters.
- (ii) Allocation of Quantity of Resources: The amount of resources to allocate to specific audit areas, such as the number of team members assigned to observe the inventory count at

material locations, the extent of review of other auditors' work in the case of group audits, or the audit budget in hours to allocate to high risk areas.

- (iii) **Timing of Deployment of Resources:** When these resources are to be deployed, such as whether at an interim audit stage or at key cut-off dates.
- (iv) **Management of Resources:** How such resources are managed, directed and supervised, such as when team briefing and debriefing meetings are expected to be held, how engagement partner and manager reviews are expected to take place (for example, on-site or off-site), and whether to complete engagement quality control reviews.

2.2.3 Considerations in Establishing the Overall Audit Strategy

Some of the examples of matters that the auditor may consider in establishing the overall audit strategy are given hereunder. Many of these matters will also influence the auditor's detailed audit plan. All matters are not relevant to every audit engagement and the list is not necessarily complete.

Characteristics of the Engagement

- (i) The financial reporting framework.
- (ii) Industry-specific reporting requirements such as reports mandated by industry regulators.
- (iii) The expected audit coverage, including the number and locations of components to be included.
- (iv) The nature of the control relationships between a parent and its components that determine how the group is to be consolidated.
- (v) The extent to which components are audited by other auditors.
- (vi) The entity's use of service organizations and how the auditor may obtain evidence concerning the design or operation of controls performed by them.
- (vii) The expected use of audit evidence obtained in previous audits, for example, audit evidence related to risk assessment procedures and tests of controls.
- (viii) The effect of information technology on the audit procedures.
- (ix) The availability of client personnel and data.

Reporting Objectives, Timing of the Audit, and Nature of Communications

- (i) The entity's timetable for reporting.
- (ii) The organization of meetings with management regarding audit work (Nature, timing and extent).
- (iii) The discussion with management regarding type and timing of reports to be issued.
- (iv) The discussion with management regarding communications on the status of audit work.
- (v) Communication with auditors of components regarding types and timing of reports to be issued.

2.6 Advanced Auditing and Professional Ethics

- (vi) The nature and timing of communications among engagement team members.
- (vii) Whether there are any other expected communications with third parties, including any statutory or contractual reporting responsibilities arising from the audit.

Significant Factors, Preliminary Engagement Activities, and Knowledge Gained on Other Engagements

- (i) The determination of materiality in accordance with SA 320.
- (ii) Preliminary identification of areas where there may be a higher risk of material misstatement.
- (iii) The impact of the assessed risk of material misstatement at the overall financial statement level on direction, supervision and review.
- (iv) The manner in which engagement team members need to maintain a questioning mind and to exercise professional skepticism.
- (v) Results of previous audits including the identified deficiencies and action taken to address them.
- (vi) The discussion of matters that may affect the audit with firm personnel responsible for performing other services to the entity.
- (vii) Evidence of management's commitment to the design, implementation and maintenance of sound internal control.
- (viii) Volume of transactions which may determine reliance on internal control.
- (ix) Importance attached to internal control.
- (x) Significant business developments affecting the entity.
- (xi) Significant industry developments.
- (xii) Significant changes in the financial reporting framework, such as changes in accounting standards.
- (xiii) Other significant relevant developments, such as changes in the legal environment affecting the entity.

Nature, Timing and Extent of Resources

- (i) The selection of the engagement team and the assignment of audit work to the team members.
- (ii) Engagement budgeting.

2.2.4 Documenting the Audit Plan

The auditor shall document-

- (i) The overall audit strategy;
- (ii) The audit plan; and
- (iii) Any significant changes made during the audit engagement to the overall audit strategy or the audit plan, and the reasons for such changes as under-

- (a) **Record of Key Decisions:** The documentation of the overall audit strategy is a record of the key decisions considered necessary to properly plan the audit and to communicate significant matters to the engagement team. For example, the auditor may summarize the overall audit strategy in the form of a memorandum that contains key decisions regarding the overall scope, timing and conduct of the audit.
- (b) **Record of Nature, Timing and Extent of Risk Assessment Procedures:** The documentation of the audit plan is a record of the planned nature, timing and extent of risk assessment procedures and further audit procedures at the assertion level in response to the assessed risks. It also serves as a record of the proper planning of the audit procedures that can be reviewed and approved prior to their performance. The auditor may use standard audit programs and/or audit completion checklists, tailored as needed to reflect the particular engagement circumstances.
- (c) **Record of reasons for Change in Audit Plans:** A record of the significant changes to the overall audit strategy and the audit plan, and resulting changes to the planned nature, timing and extent of audit procedures, explains why the significant changes were made, and the overall strategy and audit plan finally adopted for the audit. It also reflects the appropriate response to the significant changes occurring during the audit.

2.2.5 Relationship between the Overall Audit Strategy and the Audit Plan

Fig 1: Audit Strategy and the Audit Plan are interrelated.*

The audit strategy is prepared before the audit plan. The audit plan contains more details than the overall audit strategy. Audit strategy and audit plan are inter-related because change in one would result into change in the other. The audit strategy provides the guidelines for developing the audit plan. It establishes the scope and conduct of the audit procedures and thereby works as basis for developing a detailed audit plan. Detailed audit plan would include the nature, timing and extent of the audit procedures so as to obtain sufficient appropriate audit evidence.

* Source : *m-sp-c.com*

Example

CA. Sapna has already developed an audit strategy for Hitesh Ltd. While a detailed audit plan is being developed, she decided that materiality levels set earlier need to be increased as weaknesses in the internal controls were highlighted in the internal audit report. Subsequently, a deviation from the audit strategy is felt necessary. Therefore, Sapna would firstly modify the overall strategy and thereafter prepare the audit plan according to the strategy. This shows that the audit strategy and audit plan are closely inter-related as change in one is resulting into change in the other.

2.3 Audit Programme

In I(IPC) study material, we have discussed audit programme generally so as to enable the students to know the utility and nature of audit programmes. An audit programme is commonly prepared to allocate work to team members which may include the list of audit procedures and instructions to be followed by the member. It also estimates the duration for completing an audit task.

2.3.1 Formulating an Audit Programme

It is very useful for students to know how to plan an audit programme. The programme may contain audit objectives for each area and should have sufficient detail to serve as a set of instructions to the assistants involved in the audit and as a means to control the proper execution of work. It may be emphasised that a clear spelling out of audit objectives for each area is important to link up the procedures with audit objectives and to ensure a purposeful audit. For example, in the area of fixed assets, audit objectives can be the following:

Procedures of verification for this purpose may include physical verification, review of working papers, document verification including verification of loan documents, checking of provisions for depreciation, review of accounting policy on fixed assets, verification of compliance with legal requirements about disclosure and verification of jobs work performed by the assets. This linkage in the mind of the assistants on job is imperative and without this the audit would be just a mechanical performance. They should be able to identify the assertions made in the Balance Sheet and Profit and Loss Account because that provides key to the auditor's selection of the procedures. The important matters which need to be considered in this regard are:

(a) Nature of business in which the organisation is engaged: On his first appointment, the auditor should examine in detail the financial and accounting organisation of the business by visiting the client's office; by observing different stages through which papers pass before each transaction is authorised and recorded; the record that is kept and the titles of books in which it is kept. In the case of an industrial concern, he must also visit the factory to acquaint himself with the different processes of manufacture, the quantitative records maintained and the manner in which statistics are compiled in respect of losses in process.

The nature of business carried on by the concern has a great relevance to different audit procedures. The auditor, therefore, should draw up the programme of audit on a consideration of the technical, financial and accounting set-up of the company.

(b) Overall plan: Overall plan for the audit programme should be drawn up to ensure a systematic approach to the work. If in drawing the audit programme, any divergence from the overall plan becomes necessary, first the overall plan should be modified after due consideration and thereafter only the matter may be taken in the audit programme. The frame provided by the overall plan should be strictly adhered to.

(c) System of internal control and accounting procedures: The existence of a system of internal control is essential for every business organisation. It ensures that both financial and statistical records are checked continuously; it also unearths errors, both of omission and of commission. The auditor, in framing his opinion on financial statements needs reasonable assurance that transactions are properly authorised and recorded in the accounting records and that transactions have not been omitted. Internal control may contribute to the reasonable assurance the auditor seeks. Therefore, it has become an accepted audit practice to study and evaluate internal control. The study and evaluation of internal control helps the auditor to establish the reliance he can place on the internal control in determining the nature, timing and extent of his substantive auditing procedures. The auditor also obtains an understanding of the accounting system to identify points in processing of transaction and handling of assets where errors or fraud may occur. When the auditor relies on internal control, it is at these points that he must be satisfied that internal control procedures applied by the entity are effective for his

2.10 Advanced Auditing and Professional Ethics

purpose.

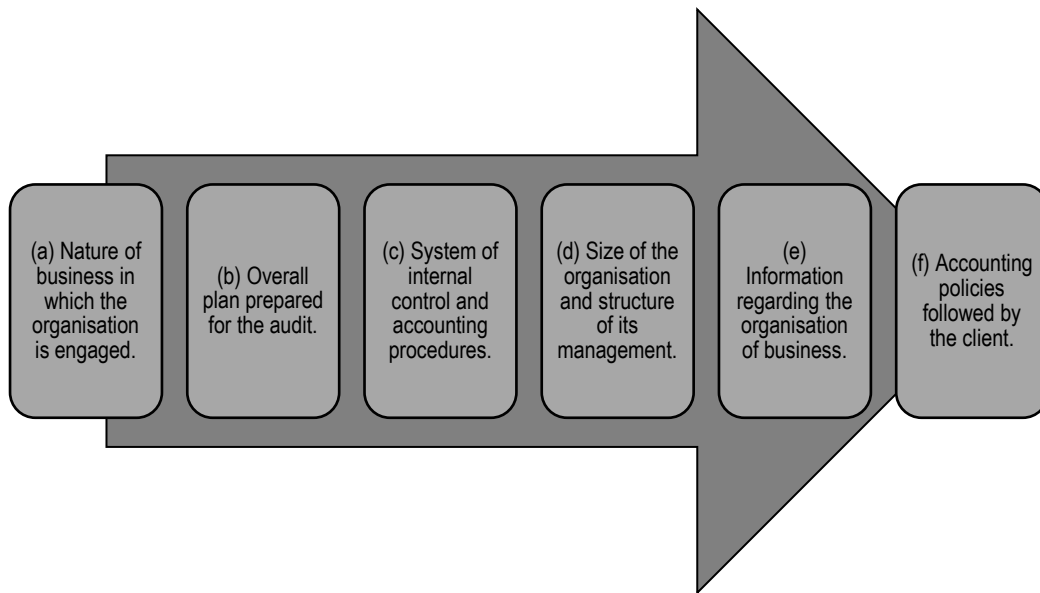

The auditor's examination of the system of internal control should have three features - review and preliminary evaluation, testing of compliance and evaluation.

- (i) **Review and preliminary evaluation** - The auditor should review the accounting system and related internal control to gain an understanding of the flow of transactions and the specific control procedures to be able to make a preliminary evaluation and identification of these aspects of internal control on which it might be efficient and effective to rely in conducting his audit.
 - (ii) **Test of compliance** - Compliance tests should be conducted by the auditor to gain evidence that those internal controls on which he intends to rely operate generally as identified by him and that they function effectively throughout the period of intended reliance. Based on the results of his compliance procedure including observed deviations, the auditor should evaluate whether the internal controls are adequate for his purposes.
 - (iii) **Evaluation** - It is essentially an objective process of application of auditor's judgement to determine whether all or any of the internal controls in the client's organisation can be relied upon in carrying out the audit. Based on the degree of reliance which may be full, partial or none, the auditor will programme for the substantive verification of transactions for expression of audit opinion. The results of compliance procedure directly provide the basis for this evaluation and, in turn, basis to determine the nature, timing and extent of the substantive audit procedure. In evaluating the auditor recognises that some deviations from compliance may have occurred.
- (d) **Size of the organisation and structure of its management:** An increase in the size of the organisation enhances the complexity of the examination of its accounting records specially when it has a number of branches, deals in several products or has a very large turnover. With the increase in the size ordinarily the scope and extent of the system of internal control also should increase but it may not be so in every case. It has been the experience that while many small businesses have excellent controls, some of the large enterprises are deficient in their operational controls. For example, the reports of the Comptroller and Auditor General on audit of accounts of Public Enterprises show that some of them have a very poor system of internal control. In such cases, the magnitude of the tasks of the auditor increases considerably.
- (e) **Information as regards organisation of the business:** To plan audit programme, it is necessary that the auditor should obtain from his client information as regards the under mentioned matters-
- ◆ Client's history and business.
 - ◆ Purpose and nature of engagement.
 - ◆ Time schedule for the completion of audit.

Before accepting a new audit, the auditor should satisfy himself as to the desirability of being associated with the job. If the concern is not known to him, he should enquire into its standing, financial background, nature of business and other similar matters. As far as practicable, he

should also try to ascertain the reputation of the concern as also the honesty and integrity of principal executive.

(f) Accounting and management policies: On the first appointment it is necessary that the auditor should review the financial statements of the past several years, audited by his predecessors specially those of the immediately preceding previous year. This would reveal to him a great deal of information regarding accounting and management policies which have been followed in the past and whether these have been employed consistently.

2.3.2 Drawing up the audit programme

After the auditor has collected the aforementioned information, he will be in a position to draw up the programme of audit. He can now decide the areas to be covered by audit, also those to be covered in detail and those which should be covered by the applications of the test checks. He will also be able to decide the specific audit procedures which should be applied in each case. These procedures vary widely because of the conditions under which each concern operates, its form of organisation, its nature of business and the condition of its accounts. On this account, it is not practicable to draw up a typical audit programme. When an auditor is appointed to audit the accounts of an entity for the first time, the audit programme should be developed in three stages stated below:

- (i) To begin with, a broad outline of the audit programme should be drawn up.
- (ii) After the internal and accounting procedures have been reviewed, the details should be filled up on a consideration of the deficiencies in the system of internal control.
- (iii) After the detailed checking formality is over, the extent to which the special procedures need to be applied should be determined, e.g., independent verification of balances of

2.12 Advanced Auditing and Professional Ethics

debtors and creditors, physical inspection of fixed assets, personal inspection of various items of stock included in closing inventories and testing their values. At times, special procedures may have to be applied on a consideration of the nature of business e.g. verification of provision for tax liability in case of a shipping company regarding freight booked in different countries or for making a provision for unexpired liability in case of an insurance company, etc.

At each subsequent engagement the programme should be reviewed and, if necessary, modified on account of:

- (i) experience gained during the previous audits;
- (ii) important changes that have taken place in the business specially in the system of internal control, accounting procedures or in the structure of management or of the scope of business; and
- (iii) evaluation of internal control made for the current year.

Given below are a few circumstances where in the audit programme would have to be suitably altered:

- (1) If the audit procedures were designed for a certain volume of turnover and subsequently the volume have substantially increased. Also, when there have been significant changes in the accounting organisation, procedures and personnel subsequent to the audit procedures.
- (2) Where during the course of an audit, it has been discovered that internal control procedures were not as effective as assumed at the time the audit programme was framed.
- (3) Where there has been an extraordinary increase in the amount of book debts or that in the value of stocks as compared to that in the previous year.
- (4) When a suspicion is aroused during the course of audit or information has been received that assets of the company have been misappropriated.

It may be noted that the audit plan and related programme should be reconsidered as the audit progresses. Such re-consideration is based on the auditor's review of internal control, his preliminary evaluation thereof and the result of his compliance and substantive procedures.

Risk Assessment and Internal Control

3.1 Introduction

Internal Controls and Risk Assessment

Audit risk means the risk that the auditor gives an inappropriate audit opinion when the financial statements are materially misstated. Thus, it is the risk that the auditor may fail to express an appropriate opinion in an audit assignment.

Fig.: Internal Control and Risk Assessment*

An auditor may consider audit risk both at overall level as well as at the level of individual account balances or classes of transactions. This means that at overall level the auditor applies their professional judgement to determine the extent of risk which he considers to be an acceptable level. At account balance level, audit risk refers to the risk that error in monetary terms exists beyond a tolerable error limit in the account balances or class of transaction which the auditor fails to detect.

The Internal Control structure in an organization is referred to as the policies and procedures established by the entity to provide reasonable assurance that the objectives are achieved. The control structure in an organization basically has the following components:

- 1. Control Environment** - Control environment covers the effect of various factors like management attitude; awareness and actions for establishing, enhancing or mitigating the effectiveness of specific policies and procedures.

* Source : SlideShare

3.2 Advanced Auditing and Professional Ethics

2. Accounting System - Accounting system means the series of task and records of an entity by which transactions are processed for maintaining financial records. Such system identifies, assemble, analyze, calculate, classify, record, summarize and report transactions and other events.

3. Control Procedure - Policies and procedures means those policies and procedures in addition to the control environment and accounting systems which the management has established to achieve the entity's specific objectives.

In this regard, the management is responsible for maintaining an adequate accounting system incorporating various internal controls to the extent that they are appropriate to the size and nature of the business. There should be reasonable assurance for the auditor that the accounting system is adequate and that all the accounting information required to be recorded has in fact been recorded. Internal controls normally contribute to such assurance. The auditor should gain an understanding of the accounting system and related internal controls and should study and evaluate the operation of those internal controls upon which he wishes to rely in determining the nature, timing and extent of other audit procedures. Where the auditor concludes that he can rely on certain internal controls, he could reduce his substantive procedures which otherwise may be required and may also differ as to the nature and timing.

Specific Requirement under **SA 315 - "Identifying and Assessing the Risks of Material Misstatement through Understanding the Entity and its Environment"** deals with the auditor's responsibility to identify and assess the risks of material misstatement in the financial statements, through understanding the entity and its environment, including the entity's internal control. SA 315 defines the system of internal control as the process designed, implemented and maintained by those charged with governance, management and other personnel to provide reasonable assurance about the achievement of an entity's objectives with regard to reliability of financial reporting, effectiveness and efficiency of operations, safeguarding of assets, and compliance with applicable laws and regulations. SA 315 further states that the auditor should identify and assess the risks of material misstatement, whether due to fraud or error, at the financial statement and assertion levels, through understanding the entity and its environment, including the entity's internal control, thereby providing a basis for designing and implementing responses to the assessed risks of material misstatement. This will help the auditor to reduce the risk of material misstatement to an acceptably low level.

3.2 Internal Control System - Nature, Scope, Objectives and Structure

Internal controls are a system consisting of specific policies and procedures designed to provide management with reasonable assurance that the goals and objectives it believes important to the entity will be met. "Internal Control System" means all the policies and procedures (internal controls) adopted by the management of an entity to assist in achieving management's objective of ensuring, as far as practicable, the orderly and efficient conduct of its business, including adherence to management policies, the safeguarding of assets, the prevention and detection of fraud and error, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information.

To state whether a set of financial statements presents a true and fair view, it is essential to benchmark and check the financial statements for compliance with the framework. The Accounting Standards specified under the Companies Act, 1956 (which are deemed to be applicable as per Section 133 of the 2013 Act, read with Rule 7 of Companies (Accounts) Rules, 2014) is one of the criteria constituting the financial reporting framework on which companies prepare and present their financial statements under the Act and against which the auditors evaluate if the financial statements present a true and fair view of the state of affairs and the results of operations of the company in an audit of the financial statements carried out under the Act.

The Following are the Nature, Scope, Objectives and Structure of an Internal Control Audit:

Nature - A set of internally generated policies and procedures adopted by the management of an enterprise is a prerequisite for an organisations efficient and effective performance. It is thus, a primary responsibility of every management to create and maintain an adequate system of internal control appropriate to the size and nature of the business entity.

SA 315 defines the system of internal control as the process designed, implemented and maintained by those charged with governance, management and other personnel to provide reasonable assurance about the achievement of an entity's objectives with regard to reliability of financial reporting, effectiveness and efficiency of operations, safeguarding of assets, and compliance with applicable laws and regulations.

Internal control is a process/set of processes designed to facilitate and support the achievement of business objectives. Any system of internal control is based on a consideration of significant risks in operations, compliance and financial reporting. Objectives such as improving business effectiveness are included, as are compliance and reporting objectives.

Scope - The scope of internal controls extends beyond mere accounting controls and includes all administrative controls concerned with the decision - making process leading to managements authorization of transaction, such controls include, production method, time and motion study, pricing policies, quality control, work standard, budgetary control, policy appraisal, quantitative controls etc. In an independent financial audit, the auditor is primarily concerned with those policies and procedures having a bearing on the assertions underlying the financial statements. These comprise primarily controls relating to safeguarding of assets, prevention and detection of fraud and error, accuracy and completeness of accounting records and timely preparation of reliable financial information. Administrative controls, on the other hand, have only a remote relationship with financial records and the auditor may evaluate only those administrative controls which have a bearing on the reliability of the financial records.

The fundamental therefore is that effective internal control is a process effected by people that supports the organization in several ways, enabling it to provide reasonable assurance regarding risk and to assist in the achievement of objectives.

Fundamental to a system of internal control is that it is integral to the activities of the company, and not something practiced in isolation.

An internal control system:

3.4 Advanced Auditing and Professional Ethics

- ***Facilitates the effectiveness and efficiency of operations.***
- ***Helps ensure the reliability of internal and external financial reporting.***
- ***Assists compliance with laws and regulations.***
- ***Helps safeguarding the assets of the entity.***

Objectives - The objectives of internal control systems are determined by the management, after considering the nature of business, scale operations, the extent of professionalism of the management etc. The objectives of internal controls relating to the accounting system are:

- (i) Transactions are executed through general or specific management authorization.
- (ii) All transactions are promptly recorded in an appropriate manner to permit the preparation of financial information and to maintain accountability of assets.
- (iii) Assets and records are safeguarded from unauthorized access, use or disposition.
- (iv) Assets are verified at reasonable intervals and appropriate action is taken with regard to the discrepancies.

Precisely, the control objectives ensure that the transactions processed are complete, valid and accurate. The basic accounting control objectives which are sought to be achieved by any accounting control system are:

- (a) whether all transactions are RECORDED;
- (b) Whether recorded transactions are REAL;
- (c) whether all recorded transactions are PROPERLY VALUED;
- (d) whether all transactions are RECORDED TIMELY;
- (e) whether all transactions are PROPERLY POSTED;
- (f) whether all transactions are PROPERLY CLASSIFIED AND DISCLOSED;
- (g) whether all transactions are PROPERLY SUMMARIZED.

If the response to all the above answer is positive, the auditor would be justified in limiting his account balance tests considerably. In case of excellent companies it may also be possible to rely on account balance with minimum of external tests, such as direct confirmation, management representation etc. Where in a system a particular control is found to be deficient, audit attention can be focused on the areas where basic accounting control objectives are not being adhered to. For example, if it found that sales transactions are not being properly valued in accordance with the price list determined by the management, the auditor would have to perform extensive searching tests on sales invoices to assure himself that the recoverable amounts are correctly posted. He may also want to expand his confirmation request at the year end to cover a large majority of trade receivables.

Limitations of Internal Control -

Internal control, no matter how effective, can provide an entity with only reasonable assurance and not absolute assurance about achieving the entity's operational, financial

reporting and compliance objectives. Internal control systems are subject to certain inherent limitations, such as:

- *Management's consideration that the cost of an internal control does not exceed the expected benefits to be derived.*
- *The fact that most internal controls do not tend to be directed at transactions of unusual nature. The potential for human error, such as, due to carelessness, distraction, mistakes of judgement and misunderstanding of instructions.*
- *The possibility of circumvention of internal controls through collusion with employees or with parties outside the entity.*
- *The possibility that a person responsible for exercising an internal control could abuse that responsibility, for example, a member of management overriding an internal control.*
- *Manipulations by management with respect to transactions or estimates and judgements required in the preparation of financial statements.*

Structure - In order to achieve the objectives of internal controls, it is necessary to establish adequate control policies and procedures. Most of these policies and procedures cover:

Segregation of duties - Transaction processing are allocated to different persons in such a manner that no one person can carry through the completion of a transaction from start to finish or the work of one person is made complimentary to the work of another person. The purpose is to minimize the occurrence of fraud and errors and to detect them on a timely basis, when they take place. The following functions are segregated -

- (a) authorization of transactions;
- (b) execution of transactions;
- (c) physical custody of related assets; and
- (d) maintenance of records and documents, while allocating duties, the considerations of cost and efficacy should be kept in mind as there is a tendency to stretch the allocation of tasks involved in a job to more persons than what is required resulting in cumbersome procedures, over elaboration of records and unduly high cost of administration.

Apart from segregation of duties, periodic rotation of duties of personnel is also desirable. The rotation of duties seeks to ensure that if a fraud and error is committed by a person, it does not remain undetected for long. It also ensures that a person cannot develop vested interest by holding a position for too long. Rotation of duties also ensures that each employee keeps his work up to date. This also makes an employee to be careful because he is aware that his performed tasks will be reviewed by others when duties are rotated.

Authorization of Transaction - Delegation of authority to different levels and to particular persons are required to establish by the management for controlling the execution of transaction in accordance with prescribed conditions. Authorization may be general or it may be specific with reference to a single transaction. It is necessary to establish procedures which provide assurance that authorizations are issued by persons acting within the scope of their

3.6 Advanced Auditing and Professional Ethics

authority, and that the transactions conform to the terms of the authorizations. This objective can be achieved by making independent comparison of transaction document with general or specific authorizations, as the case may be.

Adequacy of Records and Documents - Accounting controls should ensure that -

- (i) Transactions are executed in accordance with management's general or specific authorization.
- (ii) Transactions and other events are promptly recorded at correct amounts.
- (iii) Transactions should be classified in appropriate accounts and in the appropriate period to which it relates.
- (iv) Transaction should be recorded in a manner so as to facilitate preparation of financial statements in accordance with applicable accounting standards, other accounting policies and practices and relevant statutory requirements.
- (v) Recording of transaction should facilitate maintaining accountability for assets.
- (vi) Assets and records are required to be protected from unauthorized access, use or disposition.
- (vii) Records of assets such as sufficient description of the assets (to facilitate identification) its location should also be maintained so that the assets could be physically verified periodically.

For prompt, accurate, complete and appropriate recording of accounting transaction, several procedures are often established by the management. The assurance that transactions have been properly recorded can also be obtained through a comparison of records with an independent source of information which provides an indication of the execution of the relevant transactions.

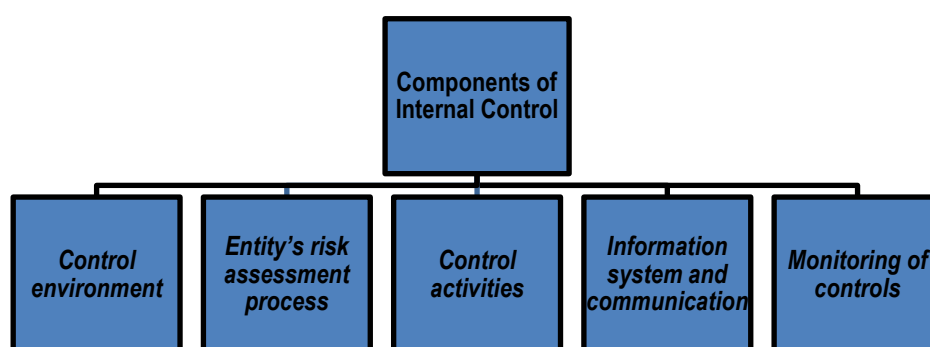

Accountability and Safeguarding of Assets - The process of accountability of assets commences from acquisitions of assets its use and final disposal. Safeguarding of assets requires appropriate maintenance of records, their periodic reconciliation with the related assets. Assets like cash, inventories, investment scrips require frequent physical verification with book records. The frequency of reconciliation would differ for different assets depending upon their nature and amount. Assets which are considered sensitive or susceptible to error need to be reconcile more frequently than others. For proper safeguarding of assets, only authorized personnel should be given access to such asset. This not only means physical access but also exercising control over processing of documents relating to authorization for use and disposal of assets. It is essential to have effective controls over physical custody of cash, inventories, investments and other fixed assets. In some cases, as per requirement, special procedures regarding physical custody of assets may have to be designed by the management.

Independent Checks - Independent verification of the control systems, designed and implemented by the management, involves periodic or regular review by independent persons to ascertain whether the control procedures are operating effectively or not. Such process may be carried out by specially assigned staff under the banner of external audit.

3.3 Components of Internal Controls

In general, a system of internal control to be considered adequate should include the following five components:

- (i) Control environment;
- (ii) Entity's Risk assessment Process;
- (iii) Control activities;
- (iv) Information system and communication;
- (v) Monitoring of Controls

I. Control environment: The control environment encompasses the following elements:

- (a) Communication and enforcement of integrity and ethical values. The effectiveness of controls cannot rise above the integrity and ethical values of the people who create, administer, and monitor them. Integrity and ethical behavior are the product of the entity's ethical and behavioral standards, how they are communicated, and how they are reinforced in practice. The enforcement of integrity and ethical values includes, for example, management actions to eliminate or mitigate incentives or temptations that might prompt personnel to engage in dishonest, illegal, or unethical acts. The communication of entity policies on integrity and ethical values may include the communication of behavioral standards to personnel through policy statements and codes of conduct and by example.***
- (b) Commitment to competence. Competence is the knowledge and skills necessary to accomplish tasks that define the individual's job.***
- (c) Participation by those charged with governance. An entity's control consciousness is influenced significantly by those charged with governance. The importance of the responsibilities of those charged with governance is recognised in codes of practice and other laws and regulations or guidance produced for the benefit of those charged with governance. Other responsibilities of those charged with***

governance include oversight of the design and effective operation of whistle blower procedures and the process for reviewing the effectiveness of the entity's internal control.

- (d) Management's philosophy and operating style. Management's philosophy and operating style encompass a broad range of characteristics. For example, management's attitudes and actions toward financial reporting may manifest themselves through conservative or aggressive selection from available alternative accounting principles, or conscientiousness and conservatism with which accounting estimates are developed.*
 - (e) Organisational structure. Establishing a relevant organizational structure includes considering key areas of authority and responsibility and appropriate lines of reporting. The appropriateness of an entity's organisational structure depends, in part, on its size and the nature of its activities.*
 - (f) Assignment of authority and responsibility. The assignment of authority and responsibility may include policies relating to appropriate business practices, knowledge and experience of key personnel, and resources provided for carrying out duties. In addition, it may include policies and communications directed at ensuring that all personnel understand the entity's objectives, know how their individual actions interrelate and contribute to those objectives, and recognize how and for what they will be held accountable.*
 - (g) Human resource policies and practices. Human resource policies and practices often demonstrate important matters in relation to the control consciousness of an entity. For example, standards for recruiting the most qualified individuals – with emphasis on educational background, prior work experience, past accomplishments, and evidence of integrity and ethical behavior – demonstrate an entity's commitment to competent and trustworthy people. Training policies that communicate prospective roles and responsibilities and include practices such as training schools and seminars illustrate expected levels of performance and behavior. Promotions driven by periodic performance appraisals demonstrate the entity's commitment to the advancement of qualified personnel to higher levels of responsibility.*
- (II) Entity's risk assessment process:** *For financial reporting purposes, the entity's risk assessment process includes how management identifies business risks relevant to the preparation of financial statements in accordance with the entity's applicable financial reporting framework, estimates their significance, assesses the likelihood of their occurrence, and decides upon actions to respond to and manage them and the results thereof. For example, the entity's risk assessment process may address how the entity considers the possibility of unrecorded transactions or identifies and analyses significant estimates recorded in the financial statements.*

Risks relevant to reliable financial reporting include external and internal events, transactions or circumstances that may occur and adversely affect an entity's ability

to initiate, record, process, and report financial data consistent with the assertions of management in the financial statements. Management may initiate plans, programs, or actions to address specific risks or it may decide to accept a risk because of cost or other considerations. Risks can arise or change due to circumstances such as the following:

- (a) Changes in operating environment. Changes in the regulatory or operating environment can result in changes in competitive pressures and significantly different risks.*
- (b) New personnel. New personnel may have a different focus on or understanding of internal control.*
- (c) New or revamped information systems. Significant and rapid changes in information systems can change the risk relating to internal control.*
- (d) Rapid growth. Significant and rapid expansion of operations can strain controls and increase the risk of a breakdown in controls.*
- (e) New technology. Incorporating new technologies into production processes or information systems may change the risk associated with internal control.*
- (f) New business models, products, or activities. Entering into business areas or transactions with which an entity has little experience may introduce new risks associated with internal control.*
- (g) Corporate restructurings. Restructurings may be accompanied by staff reductions and changes in supervision and segregation of duties that may change the risk associated with internal control.*
- (h) Expanded foreign operations. The expansion or acquisition of foreign operations carries new and often unique risks that may affect internal control, for example, additional or changed risks from foreign currency transactions.*
- (i) New accounting pronouncements. Adoption of new accounting principles or changing accounting principles may affect risks in preparing financial statements.*

(III) Control activities: *Generally, control activities that may be relevant to an audit may be categorised as policies and procedures that pertain to the following:*

- (a) Performance reviews. These control activities include reviews and analyses of actual performance versus budgets, forecasts, and prior period performance; relating different sets of data – operating or financial – to one another, together with analyses of the relationships and investigative and corrective actions; comparing internal data with external sources of information; and review of functional or activity performance.*
- (b) Information processing. The two broad groupings of information systems control activities are application controls, which apply to the processing of individual applications, and general IT-controls, which are policies and procedures that relate*

to many applications and support the effective functioning of application controls by helping to ensure the continued proper operation of information systems. Examples of application controls include checking the arithmetical accuracy of records, maintaining and reviewing accounts and trial balances, automated controls such as edit checks of input data and numerical sequence checks, and manual follow-up of exception reports. Examples of general IT-controls are program change controls, controls that restrict access to programs or data, controls over the implementation of new releases of packaged software applications, and controls over system software that restrict access to or monitor the use of system utilities that could change financial data or records without leaving an audit trail.

- (c) *Physical controls. Controls that encompass:*
- *The physical security of assets, including adequate safeguards such as secured facilities over access to assets and records.*
 - *The authorisation for access to computer programs and data files.*
 - *The periodic counting and comparison with amounts shown on control records (for example, comparing the results of cash, security and inventory counts with accounting records). The extent to which physical controls intended to prevent theft of assets are relevant to the reliability of financial statement preparation, and therefore the audit, depends on circumstances such as when assets are highly susceptible to misappropriation.*
- (d) *Segregation of duties. Assigning different people the responsibilities of authorising transactions, recording transactions, and maintaining custody of assets. Segregation of duties is intended to reduce the opportunities to allow any person to be in a position to both perpetrate and conceal errors or fraud in the normal course of the person's duties.*

Certain control activities may depend on the existence of appropriate higher level policies established by management or those charged with governance. For example, authorisation controls may be delegated under established guidelines, such as, investment criteria set by those charged with governance; alternatively, non-routine transactions such as, major acquisitions or divestments may require specific high level approval, including in some cases that of shareholders.

(IV) Information system, including the related business processes, relevant to financial reporting, and communication: *An information system consists of infrastructure (physical and hardware components), software, people, procedures, and data. Many information systems make extensive use of information technology (IT).*

The information system relevant to financial reporting objectives, which includes the financial reporting system, encompasses methods and records that:

- (a) *Identify and record all valid transactions.*

- (b) *Describe on a timely basis the transactions in sufficient detail to permit proper classification of transactions for financial reporting.*
- (c) *Measure the value of transactions in a manner that permits recording their proper monetary value in the financial statements.*
- (d) *Determine the time period in which transactions occurred to permit recording of transactions in the proper accounting period.*
- (e) *Present properly the transactions and related disclosures in the financial statements.*

The quality of system-generated information affects management's ability to make appropriate decisions in managing and controlling the entity's activities and to prepare reliable financial reports.

Communication, which involves providing an understanding of individual roles and responsibilities pertaining to internal control over financial reporting, may take such forms as policy manuals, accounting and financial reporting manuals, and memoranda. Communication also can be made electronically, orally, and through the actions of management.

(V) Monitoring of controls: *An important management responsibility is to establish and maintain internal control on an ongoing basis. Management's monitoring of controls includes considering whether they are operating as intended and that they are modified as appropriate for changes in conditions. Monitoring of controls may include activities such as, management's review of whether bank reconciliations are being prepared on a timely basis, internal auditors' evaluation of sales personnel's compliance with the entity's policies on terms of sales contracts, and a legal department's oversight of compliance with the entity's ethical or business practice policies. Monitoring is done also to ensure that controls continue to operate effectively over time. For example, if the timeliness and accuracy of bank reconciliations are not monitored, personnel are likely to stop preparing them.*

Internal auditors or personnel performing similar functions may contribute to the monitoring of an entity's controls through separate evaluations. Ordinarily, they regularly provide information about the functioning of internal control, focusing considerable attention on evaluating the effectiveness of internal control, and communicate information about strengths and deficiencies in internal control and recommendations for improving internal control.

Monitoring activities may include using information from communications from external parties that may indicate problems or highlight areas in need of improvement. Customers implicitly corroborate billing data by paying their invoices or complaining about their charges. In addition, regulators may communicate with the entity concerning matters that affect the functioning of internal control, for example, communications concerning examinations by bank regulatory agencies. Also, management may consider

3.12 Advanced Auditing and Professional Ethics

communications relating to internal control from external auditors in performing monitoring activities.

The overall systems of inter control comprises of Administrative Control and Accounting Controls, Internal Checks and Internal Audit are important constituents of Accounting Controls.

Internal Check System - Internal check system implies organization of the overall system of book-keeping and arrangement of Staff duties in such a way that no one person can carry through a transaction and record every aspect thereof. It is a part of overall control system and operates basically as a built-in-device as far as organization and job-allocation aspects of the controls are concerned. The system provides existence of checks on the day to day transactions which operate continuously as part of the routine system whereby the work of each person is either proved independently or is made complimentary to the work of another. The following are the objectives of the internal check system:

- (i) To detect error and frauds with ease.
- (ii) To avoid and minimize the possibility of commission of errors and fraud by any staff.
- (iii) To increase the efficiency of the staff working within the organization.
- (iv) To locate the responsibility area or the stages where actual fraud and error occurs.
- (v) To protect the integrity of the business by ensuring that accounts are always subject to proper scrutiny and check.
- (vi) To prevent and avoid the misappropriation or embezzlement of cash and falsification of accounts.

The effectiveness of an efficient system of internal check depends on the following considerations -

(i) Clarity of Responsibility - The responsibility of different persons engaged in various operations of business transactions should be properly identified. A well integrated organizational chart depicting the names of responsible persons associated with specific functions may help to fix up responsibility.

(ii) Division of Work - The segregation of work should be made in such a manner that the free flow of work is not interrupted and also helps to determine that the work of one person is complementary to the other. Then, it is suggested that rotation of different employees through various components of job should be effectively implemented.

(iii) Standardization - The entire process of accounting should be standardized by creating suitable policies commensurate with the nature of the business, so as to strengthen the system of internal check.

(iv) Appraisal - Periodic review should be made of the chain of operations and work flow. Such process may be carried out by preparing an audit flow chart.

The general condition pertaining to the internal check system may be summarized as under -

- (i) no single person should have complete control over any important aspect of the business operation. Every employee's action should come under the review of another person.
- (ii) Staff duties should be rotated from time to time so that members do not perform the same function for a considerable length of time.
- (iii) Every member of the staff should be encouraged to go on leave at least once a year.
- (iv) Persons having physical custody of assets must not be permitted to have access to the books of accounts.
- (v) There should exist an accounting control in respect of each class of assets, in addition, there should be periodical inspection so as to establish their physical condition.
- (vi) Mechanical devices should be used, where ever practicable to prevent loss or misappropriation of cash.
- (vii) Budgetary control should be exercised and wide deviations observed should be reconciled.
- (viii) For inventory taking, at the close of the year, trading activities should, if possible be suspended, and it should be done by staff belonging to several sections of the organization.
- (ix) The financial and administrative powers should be distributed very judiciously among different officers and the manner in which those are actually exercised should be reviewed periodically.
- (x) Procedures should be laid down for periodical verification and testing of different sections of accounting records to ensure that they are accurate.

The scope of statutory audit is limited by both time and cost. Therefore, it is increasingly being recognized that for an audit to be effective especially in case of large organization, the existence of a system of internal check is essential.

Internal Audit - Internal audit may be defined as, an independent appraisal function established within an organization to examine and evaluate its activities as a service to the organization. The scope of the internal audit is determined by the management. Internal auditing includes a series of processes and techniques through which an organizations own employees ascertain for the management, by means of on-the-job observation, whether established management controls are adequate, and are effectively maintained; records and reports financial, accounting and otherwise reflect actual operation and results accurately and properly; each division, department or other units are carrying out the plans, policies and procedures for which they are responsible.

Note: For a detailed discussion on internal audit refer to Chapter 19.

3.4 Review of the System of Internal Controls

The control environment sets the tone of an organization, influencing the control consciousness of its people. The control environment includes the governance and

3.14 Advanced Auditing and Professional Ethics

management functions and the attitudes, awareness, and actions of those charged with governance and management concerning the entity's internal control and its importance in the entity.

Evaluating the design of a control involves considering whether the control, individually or in combination with other controls, is capable of effectively preventing, or detecting and correcting, material misstatements. Implementation of a control means that the control exists and that the entity is using it. There is little point in assessing the implementation of a control that is not effective, and so the design of a control is considered first. An improperly designed control may represent a material weakness or significant deficiency in the entity's internal control.

An entity's system of internal control contains manual elements and often contains automated elements. The use of manual or automated elements in internal control also affects the manner in which transactions are initiated, recorded, processed, and reported. An entity's mix of manual and automated elements in internal control varies with the nature and complexity of the entity's use of information technology.

Manual elements in internal control may be more suitable where judgment and discretion are required such as for the following circumstances:

- *Large, unusual or non-recurring transactions.*
- *Circumstances where errors are difficult to define, anticipate or predict.*
- *In changing circumstances that require a control response outside the scope of an existing automated control.*
- *In monitoring the effectiveness of automated controls.*

The extent and nature of the risks to internal control vary depending on the nature and characteristics of the entity's information system. The entity responds to the risks arising from the use of IT or from use of manual elements in internal control by establishing effective controls in light of the characteristics of the entity's information system.

The review of the internal control system enables the auditor -

- (i) to formulate his opinion as to the reliance he may place on the system itself i.e. whether the system is such as would enable the management to produce a true and fair set of financial statements; and
- (ii) to locate the areas of weakness in the system so that the audit programme and the nature, timing and extent of substantive and compliance audit procedures can be adjusted to meet the situation. For example, if the auditor is not satisfied with the control system as regards trade receivable, he may decide to have a wider coverage for confirmation of trade receivables' balances. Normally, investments and cash are physically verified at the end of the period and this routine is known to the client and his employees. In case the auditor comes across a weakness in the control either he may provide in the programme for a surprise cash count or investment verification on a day preceding or succeeding the routine verification. In such a case, a surprise check will be more useful if it is undertaken after the routine verification is over.

Similarly, if he is of the view that because of weak controls the possibility of wrong billing to customers exists, he may extend the programme for comparison of the invoices with the forwarding notes and for checking of the extensions and castings of the invoices.

Deciding the point of time appropriate for undertaking the review of the internal controls is a matter for individual judgement of the auditor. This decision can be taken on a consideration of the size and complexity of the client's operations. If the auditor, because of his continuing relationship with his client, is already aware of the features and efficacy of internal controls, he may just review the changes that have taken place in the intervening period because of changes in the operations of the client. However, a comprehensive review in such cases must be made at an interval of, say, 3 years. Ordinarily, the review of internal controls should be undertaken as a distinct phase of audit before finalisation of the audit programme. However, if the size of operations is rather small, the review can be undertaken in conjunction with other audit procedures and the programmes can be adjusted for any extension or elimination of checking.

When the auditor finds inadequacies or weaknesses in the internal control system, he should advise his client about such inadequacies and weaknesses and the consequences that may follow. It should be the duty of the auditor to see, in the course of his audit, how far the inadequacies and weaknesses have been removed. He will take this into account in preparing his audit report. It is a useful practice to note the following after each function, set out in the audit programme -

- (a) Any change in the system of internal control from that record in the appropriate section of the internal control questionnaire.
- (b) Any further weakness noted in the internal control.
- (c) Any instance where the prescribed system or procedure has not been followed.

These should be considered in deciding whether any further modification in the audit programme is called for. Also, these should be communicated to the client and confirmation should be sought as regards changes in the system.

The review of internal control consists mainly of enquiries of personnel at various organisational levels within the enterprise together with reference to documentation such as procedures, manuals, job description and flow-charts, to gain knowledge about the controls which the auditor has identified as significant to his audit. The auditor may trace a few transactions through the accounting system to assist in understanding that system and its relation to internal controls. The auditor's preliminary evaluation of internal controls should be made on the assumption that the controls operate generally as described and that they function effectively throughout the period of intended reliance. The purpose of the preliminary evaluation is to identify the particular controls on which the auditor still intends to rely and to test through compliance procedures. Different techniques are used to record information relating to an internal control system. Selection of a particular technique is a matter for the auditor's judgement.

3.5 Methods of Recording

The following are the methods of recording:

3.5.1 Questionnaire: Because of the widespread experience that auditors possess about the

3.16 Advanced Auditing and Professional Ethics

business operations in general and the knowledge about the appropriate control, most of the auditing firms have developed their own standardised internal control questionnaire on a generally applicable basis. In developing the standard questionnaire, endeavour is made to make it as wide as possible so that all situations, generally found, are included therein but all of these may not be applicable in a particular case. A questionnaire is a set of questions framed in an organised manner, about each functional area, which has as purpose the evaluation of the effectiveness of control and detection of its weakness if any. A questionnaire usually consists of several separate sections devoted to areas such as purchases, sales, trade receivables, trade payables, wages, etc. The questionnaire is intended to be filled by the company executives who are in charge of the various areas. However, this poses some practical difficulties. The questionnaire is to travel from executives and, therefore, it may take a pretty long time to be filled; also the questions may not be readily intelligible to busy executives and there is a possibility of the questionnaire being misplaced while travelling from one table to another. Having regard to these difficulties, it is now almost an accepted practice that the auditor (or his representative) arranges meetings with the executives concerned and gets the answers filled by each executive. Sometimes, the auditor himself may be required to fill the answers. In such a case, he should ensure that the concerned executive has initiated the answers as a token of his agreement therewith.

Questions are so framed as generally to dispense with the requirement of a detailed answer to each question. For this purpose, often one general question is broken down into a number of questions and sub-questions to enable the executive to provide a just 'Yes', 'No' or 'Not applicable' form of reply. Questions are also framed in such a manner that generally a "No" answer will effect weakness in the control system. This requires giving a positive power to the question, keeping in view what the proper control should be. Consider the question 'Are all receipts recorded promptly and deposited in bank daily? If the answer to this is 'Yes', it fits with the plan of good internal control. But if it is 'No' it indicates weakness in the system in as much as the moneys received may not be recorded and may be defalcated because the cashier has continued control over the amount for an uncertain period. However, this should not be taken as an unbreakable rule. Questions may be framed also when a 'Yes' answer would indicate weakness. The only thing that should be borne in mind is that the scheme of questions should be consistent, sequential, logical, and if possible corroborative. Wherever it is necessary, slightly detailed answers also may be asked for to bring clarity to the matter. In the use of standardized internal control questionnaire, certain basic assumptions about elements of good control are taken into account. These are -

- (i) Certain procedures in general used by most business concerns are essential in achieving reliable internal control. This is a time-tested assumption. Deposit into bank of the entire receipts of a day or daily balancing of the cash book and ledgers or periodic reconciliation with the control accounts are examples of widely used practices which are considered good internal control practices. Besides, basic operations giving rise to these practices exist in all businesses irrespective of their nature.
- (ii) Organisations are such that permit an extensive division of duties and responsibilities. The larger the organisation, the greater is the scope of such division.

- (iii) Employees concerned with accounting function are not assigned any custodial function.
- (iv) No single person is thrust with the responsibility of completing a transaction all by himself.
- (v) There should always be evidence to identify the person who has done the work whether involving authorisation, implementation or checking.
- (vi) The work performed by each one is expected to come under review of another in the usual course of routine.
- (vii) There is proper documentation and recording of the transactions.

The questionnaire serves the purpose of a record so far as the auditor is concerned about the state of internal control as given to him officially. A question naturally arises as to whether it is necessary to issue questionnaire for every year of the auditor's engagement. For the first year of engagements issue of questionnaire is necessary. For subsequent years, the auditor, instead of issuing a questionnaire again, may request the client to confirm whether any change in the nature and scope of business has taken place that necessitated a corresponding change in the control system, or whether, even without a change in the nature and scope of business, the control system has undergone a change. If there has been a change, the auditor should take note of its and enter appropriate comments on the relevant part of the questionnaire. However, it would be a good practice in the case of continuing engagements to issue a questionnaire irrespective of any change, say, every third year. This will obviate unnecessary trouble of filling the answers every time and to that extent the client's and the auditor's own time will be saved. The rationale for issuance of a questionnaire every three years, in the case of even no change, lies in altering the client as regards unnoticed and unspectacular changes that might have taken place during the intervening period; also this will make the client more control-conscious. Questionnaires can be prepared for various aspects of the internal control system.

3.5.2 Check List: It is a series of instructions or questions on internal control which the auditor must follow or answer. When a particular instruction is carried out, the auditor initials the space opposite the instruction. If it is in the form of a question, the answer generally 'Yes', 'No' or 'Not Applicable' is entered opposite the question. A check list is more in the nature of a reminder to the auditor about the matters to be checked for testing the internal control system. While a questionnaire is basically a set of questions put to the client, a check list which may be in a form of instructions, questions or just points to be checked may be meant for the auditor's own staff it is a set of instructions or points; it may be meant for the client if it is in the form of questions. The question form of check list may even be meant for the auditor's own staff. For example, questions in the check list may be formed in the following manner (this is an illustrative set of questions to be answered by the audit staff).

Have you checked that the cashier-

- (i) is not responsible for opening the incoming mails;
- (ii) does not authorise any of the ledgers;
- (iii) does not authorise any expenditure or receipt;

3.18 Advanced Auditing and Professional Ethics

- (iv) does not sign cheques;
- (v) takes his annual leave regularly;
- (vi) inks and balances the cash book everyday;
- (vii) verifies physical cash balance with the book figure daily at the end of the day;
- (viii) prepares monthly bank reconciliation statement;
- (ix) holds no other funds or investment;
- (x) holds no unnecessary balance in hand;
- (xi) does not pay money without looking into compliance with proper procedure and due authorisation; and
- (xii) has tendered proper security or has executed a fidelity bond?

When the check list is in question form, it is hardly different from a questionnaire. However, generally questionnaire is a popular medium for the evaluation of the internal control system.

The basic distinction between internal control questionnaire and check list are as under:

1. The ICQ incorporates a large number of detailed questions but the check list generally contains questions relating to the main control objective with the area under review.
2. ICQ, the weaknesses are highlighted by the 'Yes' while in the check list, it is indicated by 'No'.
3. The significance of 'No' in an ICQ does indicate a weakness but the significance of that weakness is not revealed automatically. However, in the check list, a specific statement is required where an apparent weakness may prove to be material in relation to the accounts as a whole.

3.5.3 Flow chart: The flow charting technique can also be resorted to for evaluation of the internal control system. It is a graphic presentation of internal controls in the organisation and is normally drawn up to show the controls in each section or sub-section. As distinct from a narrative form, it provides the most concise and comprehensive way for reviewing the internal controls and the evaluator's findings. In a flow chart, narratives, though cannot perhaps be totally banished are reduced to the minimum and by that process, it can successfully bring the whole control structure, specially the essential parts thereof, in a condensed but wholly meaningful manner. It gives a bird's eye view of the system and is drawn up as a result of the auditor's review thereof. It should, however, not be understood that details are not reflected in a flow chart. Every detail relevant from the control point of view and the details about how an operation is performed can be included in the flow chart. Essentially a flow chart is a diagram full with lines and symbols and, if judicious use of them can be made, it is probably the most effective way of presenting the state of internal controls in the client's organisation. A properly drawn up flow chart can provide a neat visual picture of the whole activities of the section or

department involving flow of documents and activities. More specifically it can show -

- (i) at what point a document is raised internally or received from external sources;
- (ii) the number of copies in which a document is raised or received;
- (iii) the intermediate stages set sequentially through which the document and the activity pass;
- (iv) distribution of the documents to various sections, department or operations;
- (v) checking authorisation and matching at relevant stages;
- (vi) filing of the documents; and
- (vii) final disposal by sending out or destruction.

As a matter of fact a very sound knowledge of internal control requirements is imperative for, adopting flow-charting technique for evaluation of internal controls; also it demands a highly analytical mind to be able to see clearly the inter division of a job and the appropriate control at relevant points.

It has been stated earlier that flow charts should be made section-wise or department-wise. The suggestion has been made to ensure readability and intelligibility of the flow charts.

Drawing of a flow chart - A flow chart is normally a horizontal one in which documents and activities are shown to flow horizontally from section to section and the concerned sections are shown as the vertical column heads; in appropriate cases an individual also may be shown as the vertical column head. Care should be taken to see that the first column head is devoted to the section or the individual wherefrom a transaction originates and the placements of other column heads should be in the order of the actual flow of the transaction. It has been stated earlier that a flow chart is a symbolic representation the flow of activity and related documents through the section from origin to conclusion. These can be sales, purchases, wages, production, etc. Each one of the main functions is to be linked with related functions for making a complete course. Purchase is to be linked with trade payables and payments; sales with trade receivables and collections. By this process, a flow chart will become self contained, complete and meaningful for evaluation of internal controls.

3.20 Advanced Auditing and Professional Ethics

SYMBOLS	
	Documents
	Documents prepared
	If copy made
	Flow of documents
	Used for next step
	Fork (alternative possibilities)
	Dead-end (leaves charted system)
	Permanent file of documents (alphabetically, numerically, or by date)
	Serial continuity checked, unimportant, or unchecked respectively

	Book or Ledger
	Posting source
	Keyed to explanatory note
	Starting points.

Generally, a questionnaire is also enclosed with a flow chart, incorporating questions, the answers to which are to be looked into from the flow chart. This is an evaluation of the control system through the process of flow charting. The internal control questionnaire contains questions; answers are available in the flow chart and they will reveal weakness, if any, in the system. In fact, the questionnaire is a guide for the study of a control system through flow charts.

We may examine the flow charting techniques for evaluation of internal controls on the sales and trade receivables function. Let us assume that these are -

1. Order receiving function.
2. Dispatch function.
3. Billing function.
4. Accounting in the trade receivables' ledger.
5. Main accounting functions.
6. Inventory recording function.

All these functions are carried out in distinct sections. As regards the Order Receiving Section, let us further assume that the section receives orders:

- (i) through mail;
- (ii) by telephone; and
- (iii) through the company's salesmen.

Basing the receipts of orders of customers, the section raises internal "Sales advices". These sales advices are consecutively numbered (by reference to the last number on the order book) and entered in the order book with the consecutive number, date, the party and other relevant details. The orders received from customers are temporarily filed in the alphabetical order. The sales advices are prepared in sets of four with a noting for the customer's sales-tax status. All the four copies are sent to the dispatch section. The dispatch section, after dispatch of the goods, sends back to the Order receiving Section the last copy of the sales advice after entering thereon the date of dispatch and the quantity despatched. Upon receipt of the last copy, the Order receiving Section enters the date of dispatch and the quantity despatched in the order book. If the quantity despatched is fulfillment of the quantity ordered, the last copy of the sales invoices is annexed to customer's order and filed in the customer's file. If, however, the order is only partly executed, the copy of the sales advice is kept in a temporary file in numerical order. Periodically this file is checked to determine the unfulfilled orders and, if inventory is then available, the Section again initiates fresh sales advices in respect of the unfulfilled part and all the processes, as in the case of original, are repeated. The last copy of the original set is annexed to the customer's order and kept in the customer's file.

The salesmen use the same advice form as is being used by the order receiving section.

For the purpose of drawing a flow chart to incorporate the above narration it is useful to know -

1. the point for originating the flow of transaction.
2. the documents, internal and external, and the flow of the transaction, number of copies, distribution flow and the details.
3. the books, if any, maintained and the details recorded there in and the source or sources for the details.
4. that there exists an alternative possibility.

The flow chart for the above may be as under -

CHART 1

We can extend the activity flow now to the dispatch section which is the logical second stage of operation. The work and procedure content of the dispatch section is assumed to be as follows:

After the receipt of the sales advices in sets of four, the dispatch section arranges dispatch of materials and put the date of dispatch and the quantities despatched; the head of the Section initials the advices. The last copy of the advice is sent back to the Order Receiving Section. The first copy is sent as a packing slip with the goods, the second copy goes to the Billing Department and the third copy accompanies the goods when delivered to the buyer and, obtaining the buyer's acknowledgement of the receipt of the goods therein, is received back and filed date-wise. In case of goods not directly delivered to the buyers, i.e., when the goods are sent either by rail, road or water transport, the copy constitutes the basis for raising the relevant forwarding note on the basis of which R.R. etc., can be prepared.

The flow chart for the dispatch section may be as follows -

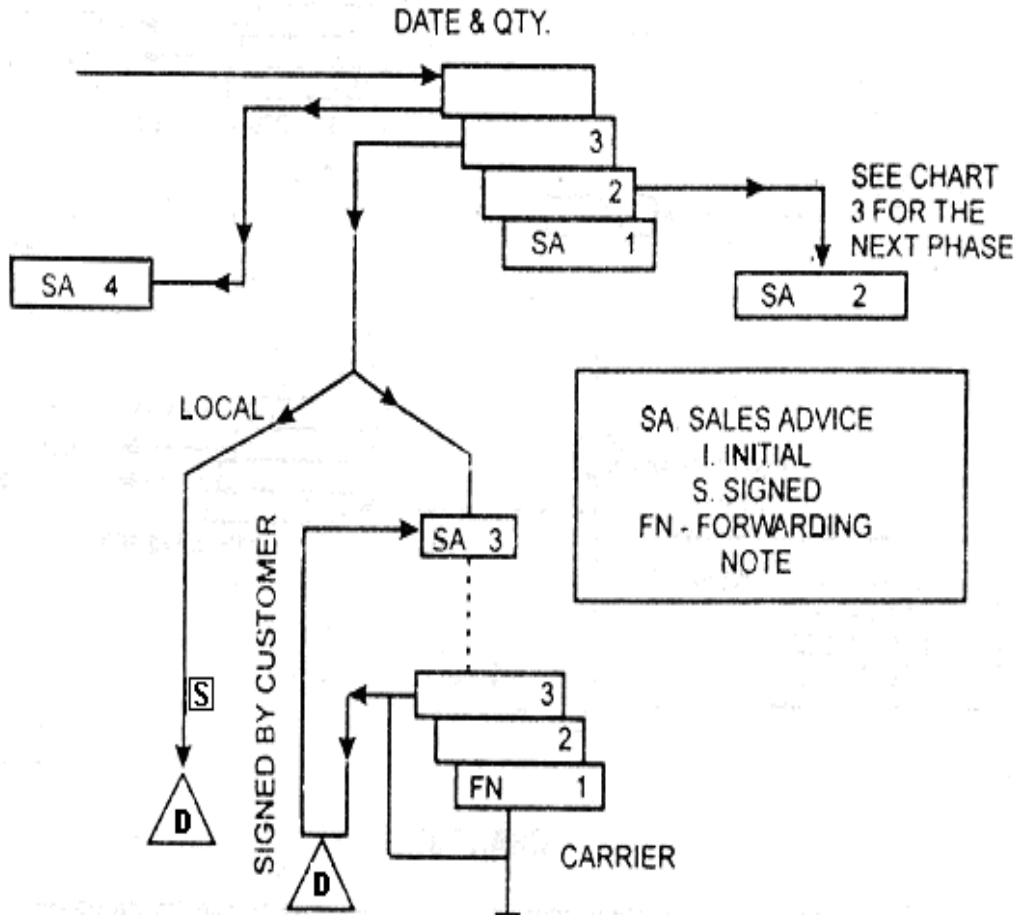

CHART 2

This flow is taken to the Billing Section. The Section generally accumulates the second copy of the Sales Advice for two or three days and prepares sales invoices in sets of four. The pricing of the sales invoice is done by reference to the company's current price list or the catalogue. The number of the sales advice is entered on the corresponding invoice which is pre-numbered, also, the number of the invoice is recorded on the copy of the sales advice which is then filed alphabetically. The first copy of the invoice is sent to the customer while the second, third and fourth copies are respectively sent to the trade receivables ledger clerk, the Inventory Section and the Accounts Section. The Billing Section also is responsible for raising credit notes on the basis of documents received. Credit notes are also prepared in sets of four and are distributed in exactly the same way as invoices. The inventories of invoice and the credit note forms remain in the Billing Section.

3.24 Advanced Auditing and Professional Ethics

The Flow Chart for this Section is given below -

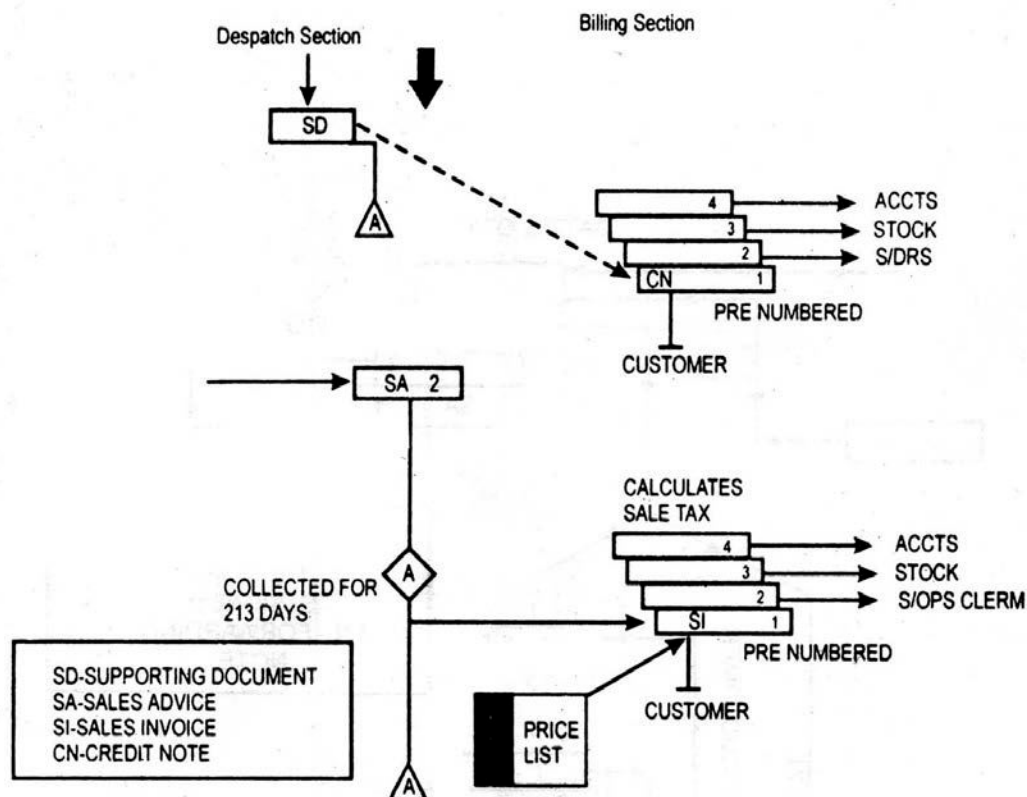

CHART 3

Now, in the order of the flow of activities, more sectional flow charts can be prepared to cover the activities in the Accounts Section and the Inventory Section and they together, when sequentially assembled, will constitute the complete flow chart for the sales transactions and trade receivables recordings.

(These flow charts have been prepared on the basis of the approach and the symbols used in the book "Analytical Auditing" by Skinner and Anderson. Students who desire to study the subject of preparation of flow charts further may refer to Chapter 4 of that book.)

It is now left for us to see how these flow charts reveal the state of internal control. A close look into flow charts will show the following:

- (i) The advices are sent by salesmen; though prepared on the same sales advice form as is prepared in the section, there is no check that all the advices sent by salesmen have been received. This may entail loss of business because of non-receipt of sales advice. (Refer

to the flow chart for the Order Receiving Section).

- (ii) The raising of sales advices on the basis of telephonic orders, irrespective of the party's standing and record of performance is risky from the business point of view. (Refer to the flow chart for the Order Receiving Section).
- (iii) There is no system of prior credit sanction to the parties; in consequence, there may be dispatch of goods to bad credit risks. (Refer to the flow chart for the Dispatch Section).
- (iv) There is no check that all the second copies of the sales advices sent by the Dispatch Section have been received by the Billing Section. The possibility of dispatch not being billed exists, (Refer to the flow chart for the Dispatch as well as the Billing Section).
- (v) There is no check in respect of pricing, extension and addition on the invoice or the credit notes. This may result in loss of revenue for wrong pricing or wrong calculation. (Refer to the flow chart for Billing Section).
- (vi) It is not clear whether the supporting documents are adequate for authorising the issue of credit notes where there is a need for a greater caution. (Refer to the flow chart for Billing Section).

So far we have seen the points of weaknesses that are evident from these flow charts. For a clearer understanding of the flow chart as a medium for evaluating internal controls, the following further points may be useful:

- (a) There exists proper numerical control over orders booked (except the case for the salesmen's orders).
- (b) There is a permanent and continuous record of the orders booked in the form of order book.
- (c) There is a definite basis for raising sales advices.
- (d) The order book record is always kept complete by entering the information about the execution of the order and this keeps the information about the pending orders ready at any moment.
- (e) Partly executed orders are reviewed from time to time so that as soon as goods are available, the same may be despatched to customers.
- (f) The customer's purchase order and the related sales advice are matched and kept together in the customer's file.
- (g) The sales advices are initialed by the Dispatch Section head as token of his having satisfied himself about the correctness of the entries as regards the quantity despatched and the date of dispatch.
- (h) Record of actual direct delivery is maintained through the copy of the sales advice bearing the customer's, acknowledgement of his having received the goods. Similarly, the record of out station deliveries is kept in the copy of the forwarding note annexed to the sales advice copy.

3.26 Advanced Auditing and Professional Ethics

- (i) Documents have as many copies as are necessary for ensuring proper flow and proper control. There is neither wastage through unnecessary copies nor any hold up because of inadequacy of copies.
- (j) There are supporting documents for raising invoices and credit notes.
- (k) The distribution of invoices and credit notes is such as would enable the recording of billing at the relevant centres independent of each other.
- (l) There is control over the number of invoices and credit notes by pre-numbering.

Thus, by flow charting has an auditor can very clearly see the inter-relationships of the activities and flows and how they are integrated from stage to stage. However, the auditor has to be careful about the readability and intelligibility of the chart. Identification of all individual functions in a section is also highly relevant for preparation of the flow chart. The smaller the segment, the better is the possibility of quick comprehension. Naturally, the auditor should try to see each section as the natural assembly of distinct and identified components.

3.6 Internal Control and Risk Assessment

The auditor should obtain an understanding of the control environment sufficient to assess management's attitudes, awareness and actions regarding internal controls and their importance in the entity. Such an understanding would also help the auditor to make a preliminary assessment of the adequacy of the accounting and internal control systems as a basis for the preparation of the financial statements, and of the likely nature, timing and extent of audit procedures.

The auditor should obtain an understanding of the control procedures sufficient to develop the audit plan. In obtaining this understanding, the auditor would consider knowledge about the presence or absence of control procedures obtained from the understanding of the control environment and accounting system in determining whether any additional understanding of control procedures is necessary. Because control procedures are integrated with the control environment and the accounting system, as the auditor obtains an understanding of the control environment and the accounting system, some knowledge about control procedures is also likely to be obtained, for example, in obtaining an understanding of the accounting system pertaining to cash, the auditor ordinarily becomes aware of whether bank accounts are reconciled regularly. Ordinarily, development of the overall audit plan does not require an understanding of control procedures for every financial statement assertion in each account balance and transaction class.

Fig.: Risks of Material Mis-statement*

An auditor's judgement as to what is sufficient and appropriate audit evidence is affected by the degree of risk of mis-statement. Audit risk is the risk that an auditor may give an inappropriate opinion on financial information which is materially misstated. For example, an auditor may give an unqualified opinion on financial statements without knowing that they are materially misstated. Such risk may exist at overall level, while verifying various transactions and balance sheet items. Audit risk is a function of the risks of material misstatement and detection risk.

As per SA 200 "Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with Standards on Auditing", the risks of material misstatement at the assertion level consist of two components: inherent risk and control risk. Inherent risk and control risk are the entity's risks; they exist independently of the audit of the financial statements. The nature of each of these types of risk and their interrelationship is discussed below:

- (i) **Inherent risk:** It is the susceptibility of an account balance or class of transactions to misstatement that could be material either individually or, when aggregated with misstatements in other balances or classes, assuming that there were no related internal controls. External circumstances giving rise to business risks may also influence inherent risk. For example, technological developments might make a particular product obsolete, thereby causing inventory to be more susceptible to overstatement.

* Source : Source : cjess1 audit class pln - WordPress.com

3.28 Advanced Auditing and Professional Ethics

- (ii) **Control Risk:** It is the risk that a misstatement that could occur in an assertion about a class of transaction, account balance or disclosure and that could be material, either individually or when aggregated with other misstatements, will not be prevented, or detected and corrected, on a timely basis by the entity's internal control. It is a function of the effectiveness of the design, implementation and maintenance of internal control by management to address identified risks that threaten the achievement of the entity's objectives relevant to preparation of the entity's financial statements.

The SAs do not ordinarily refer to inherent risk and control risk separately, but rather to a combined assessment of the "risks of material misstatement". However, the auditor may make separate or combined assessments of inherent and control risk depending on preferred audit techniques or methodologies and practical considerations.

- (iii) **Detection Risk:** It is the risk that the procedures performed by the auditor to reduce audit risk to an acceptably low level will not detect a misstatement that exists and that could be material, either individually or when aggregated with other misstatements. Detection risk relates to the nature, timing, and extent of the auditor's procedures that are determined by the auditor to reduce audit risk to an acceptably low level. It is therefore a function of the effectiveness of an audit procedure and of its application by the auditor.

Fig.: Audit Risk*

* Source: cplusglobal.com - WordPress.com

The inherent and control risks are functions of the entity's business and its environment and the nature of the account balances or classes of transactions, regardless of whether an audit is conducted. Even though inherent and control risks cannot be controlled by the auditor, the auditor can assess them and design his substantive procedures to produce on acceptable level of detection risk, thereby reducing audit risk to an acceptably low level.

3.6.1 Control Risk: Preliminary Assessment of Control Risk - After obtaining an understanding of the accounting system and internal control system, the auditor should make a preliminary assessment of control risk, at the assertion level, for each material account balance or class of transactions.

The preliminary assessment of control risk is the process of evaluating the likely effectiveness of an entity's accounting and internal control systems in preventing or detecting and correcting material misstatements. The preliminary assessment of control risk is based on the assumption that the controls operate generally as described and that they operate effectively throughout the period of intended reliance. There will always be some control risk because of the inherent limitations of any accounting and internal control system.

The auditor ordinarily assesses control risk at a high level for some or all assertions when:

- (a) the entity's accounting and internal control systems are not effective; or
- (b) evaluating the effectiveness of the entity's accounting and internal control systems would not be efficient.

In the above circumstances, the auditor would obtain sufficient appropriate audit evidence from substantive procedures and from any audit work carried out in the preparation of financial statements.

The preliminary assessment of control risk for a financial statement assertion should be high unless the auditor:

- (a) is able to identify internal controls relevant to the assertion which are likely to prevent or detect and correct a material misstatement; and
- (b) plans to perform tests of control to support the assessment.

Documentation of Understanding and Assessment of Control Risk - The auditor should document in the audit working papers:

- (a) the understanding obtained of the entity's accounting and internal control systems; and
- (b) the assessment of control risk.

When control risk is assessed at less than high, the auditor would also document the basis for the conclusions.

Different techniques may be used to document information relating to accounting and internal control systems. Selection of a particular technique is a matter for the auditor's judgement. Common techniques, used alone or in combination, are narrative descriptions, questionnaires, check lists and flow charts. The form and extent of this documentation is influenced by the size and complexity of the entity and the nature of the entity's accounting and internal control

3.30 Advanced Auditing and Professional Ethics

systems. Generally, the more complex the entity's accounting and internal control systems and the more extensive the auditor's procedures, the more extensive the auditor's documentation will need to be.

Tests of Control - Tests of control are performed to obtain audit evidence about the effectiveness of the:

- (a) design of the accounting and internal control systems, that is, whether they are suitably designed to prevent or detect and correct material misstatements; and
- (b) operation of the internal controls throughout the period.

Tests of control include tests of elements of the control environment where strengths in the control environment are used by auditors to reduce control risk.

Some of the procedures performed to obtain the understanding of the accounting and internal control systems may not have been specifically planned as tests of control but may provide audit evidence about the effectiveness of the design and operation of internal controls relevant to certain assertions and, consequently, serve as tests of control. For example, in obtaining the understanding of the accounting and internal control systems pertaining to cash, the auditor may have obtained audit evidence about the effectiveness of the bank reconciliation process through inquiry and observation.

When the auditor concludes that procedures performed to obtain the understanding of the accounting and internal control systems also provide audit evidence about the suitability of design and operating effectiveness of policies and procedures relevant to a particular financial statement assertion, the auditor may use that audit evidence, provided it is sufficient to support a control risk assessment at less than a high level.

Tests of control may include:

- ◆ Inspection of documents supporting transactions and other events to gain audit evidence that internal controls have operated properly, for example, verifying that a transaction has been authorised.
- ◆ Inquiries about, and observation of, internal controls which leave no audit trail, for example, determining who actually performs each function and not merely who is supposed to perform it.
- ◆ Re-performance of internal controls, for example, reconciliation of bank accounts, to ensure they were correctly performed by the entity.
- ◆ Testing of internal control operating on specific computerised applications or over the overall information technology function, for example, access or program change controls.

The auditor should obtain audit evidence through tests of control to support any assessment of control risk which is less than high. The lower the assessment of control risk, the more evidence the auditor should obtain that accounting and internal control systems are suitably designed and operating effectively.

When obtaining audit evidence about the effective operation of internal controls, the auditor considers how they were applied, the consistency with which they were applied during the period

and by whom they were applied. The concept of effective operation recognises that some deviations may have occurred. Deviations from prescribed controls may be caused by such factors as changes in key personnel, significant seasonal fluctuations in volume of transactions and human error. When deviations are detected the auditor makes specific inquiries regarding these matters, particularly, the timing of staff changes in key internal control functions. The auditor then ensures that the tests of control appropriately cover such a period of change or fluctuation.

In a computer information systems environment, the objectives of tests of control do not change from those in a manual environment; however, some audit procedures may change. The auditor may find it necessary, or may prefer, to use computer-assisted audit techniques. The use of such techniques, for example, file interrogation tools or audit test data, may be appropriate when the accounting and internal control systems provide no visible evidence documenting the performance of internal controls which are programmed into a computerised accounting system.

Based on the results of the tests of control, the auditor should evaluate whether the internal controls are designed and operating as contemplated in the preliminary assessment of control risk. The evaluation of deviations may result in the auditor concluding that the assessed level of control risk needs to be revised. In such cases, the auditor would modify the nature, timing and extent of planned substantive procedures.

Quality and Timeliness of Audit Evidence

Certain types of audit evidence obtained by the auditor are more reliable than others. Ordinarily, the auditor's observation provides more reliable audit evidence than merely making inquiries, for example, the auditor might obtain audit evidence about the proper segregation of duties by observing the individual who applies a control procedure or by making inquiries of appropriate personnel. However, audit evidence obtained by some tests of control, such as observation, pertains only to the point in time at which the procedure was applied. The auditor may decide, therefore, to supplement these procedures with other tests of control capable of providing audit evidence about other periods of time.

In determining the appropriate audit evidence to support a conclusion about control risk, the auditor may consider the audit evidence obtained in prior audits. In a continuing engagement, the auditor will be aware of the accounting and internal control systems through work carried out previously but will need to update the knowledge gained and consider the need to obtain further audit evidence of any changes in control. Before relying on procedures performed in prior audits, the auditor should obtain audit evidence which supports this reliance. The auditor would obtain audit evidence as to the nature, timing and extent of any changes in the entity's accounting and internal control systems since such procedures were performed and assess their impact on the auditor's intended reliance. The longer the time elapsed since the performance of such procedures the less assurance that may result.

The auditor should consider whether the internal controls were in use throughout the period. If substantially different controls were used at different times during the period, the auditor would consider each separately. A breakdown in internal controls for a specific portion of the period requires separate consideration of the nature, timing and extent of the audit procedures to be

3.32 Advanced Auditing and Professional Ethics

applied to the transactions and other events of that period.

The auditor may decide to perform some tests of control during an interim visit in advance of the period end. However, the auditor cannot rely on the results of such tests without considering the need to obtain further audit evidence relating to the remainder of the period. Factors to be considered include:

- ◆ The results of the interim tests.
- ◆ The length of the remaining period.
- ◆ Whether any changes have occurred in the accounting and internal control systems during the remaining period.
- ◆ The nature and amount of the transactions and other events and the balances involved.
- ◆ The control environment, especially supervisory controls.
- ◆ The nature, timing and extent of substantive procedures which the auditor plans to carry out.

Final Assessment of Control Risk

Before the conclusion of the audit, based on the results of substantive procedures and other audit evidence obtained by the auditor, the auditor should consider whether the assessment of control risk is confirmed. In case of deviations from the prescribed accounting and internal control systems, the auditor would make specific inquiries to consider their implications. Where, on the basis of such inquiries, the auditor concludes that the deviations are such that the preliminary assessment of control risk is not supported, he would amend the same unless the audit evidence obtained from other tests of control supports that assessment. Where the auditor concludes that the assessed level of control risk needs to be revised, he would modify the nature, timing and extent of his planned substantive procedures.

3.6.2 Relationship between the Assessments of Inherent and Control Risk: Management often reacts to inherent risk situations by designing accounting and internal control systems to prevent or detect and correct misstatements and therefore, in many cases, inherent risk and control risk are highly interrelated. In such situations, if the auditor attempts to assess inherent and control risks separately, there is a possibility of inappropriate risk assessment. As a result, audit risk may be more appropriately determined in such situations by making a combined assessment.

3.6.3 Detection Risk: The level of detection risk relates directly to the auditor's substantive procedures. The auditor's control risk assessment, together with the inherent risk assessment, influences the nature, timing and extent of substantive procedures to be performed to reduce detection risk, and therefore audit risk, to an acceptably low level. Some detection risk would always be present even if an auditor was to examine 100 percent of the account balances or class of transactions because, for example, most audit evidence is persuasive rather than conclusive.

The auditor should consider the assessed levels of inherent and control risks in determining the nature, timing and extent of substantive procedures required to reduce audit risk to an acceptably low level. In this regard the auditor would consider:

- (a) the nature of substantive procedures, for example, using tests directed toward independent parties outside the entity rather than tests directed toward parties or documentation within the entity, or using tests of details for a particular audit objective in addition to analytical procedures;
- (b) the timing of substantive procedures, for example, performing them at period end rather than at an earlier date; and
- (c) the extent of substantive procedures, for example, using a larger sample size.

There is an inverse relationship between detection risk and the combined level of inherent and control risks. For example, when inherent and control risks are high, acceptable detection risk needs to be low to reduce audit risk to an acceptably low level. On the other hand, when inherent and control risks are low, an auditor can accept a higher detection risk and still reduce audit risk to an acceptably low level.

While tests of control and substantive procedures are distinguishable as to their purpose, the results of either type of procedure may contribute to the purpose of the other. Misstatements discovered in conducting substantive procedures may cause the auditor to modify the previous assessment of control risk.

The assessed levels of inherent and control risks cannot be sufficiently low to eliminate the need for the auditor to perform any substantive procedures. Regardless of the assessed levels of inherent and control risks, the auditor should perform some substantive procedures for material account balances and classes of transactions.

The auditor's assessment of the components of audit risk may change during the course of an audit, for example, information may come to the auditor's attention when performing substantive procedures that differs significantly from the information on which the auditor originally assessed inherent and control risks. In such cases, the auditor would modify the planned substantive procedures based on a revision of the assessed levels of inherent and control risks.

The higher the assessment of inherent and control risks, the more audit evidence the auditor should obtain from the performance of substantive procedures. When both inherent and control risks are assessed as high, the auditor needs to consider whether substantive procedures can provide sufficient appropriate audit evidence to reduce detection risk, and therefore audit risk, to an acceptably low level. When the auditor determines that detection risk regarding a financial statement assertion for a material account balance or class of transactions cannot be reduced to an acceptable level, the auditor should express a qualified opinion or a disclaimer of opinion as may be appropriate.

Mathematically Audit Risk (AR) can be expressed as a product of Inherent Risk (IR), Control Risk (CR) and Detection Risk (DR), i.e. $AR = IR \times CR \times DR$

It should be noted that:

1. the combined level of Inherent Risk and Control Risk is inversely related with Detection Risk, and
2. Audit Materiality is also inversely related with audit risk.

3.34 Advanced Auditing and Professional Ethics

The relationship between different components of audit risks is given in the following table:

		Auditors' assessment of control risk		
		High	Medium	Low
Auditors' assessment of inherent risk	High	Lowest	Lower	Medium
	Medium	Lower	Medium	Higher
	Low	Medium	Higher	Highest

The shaded areas in this table relate to detection risk.

3.7 Internal Control in Small Business Enterprises

The auditor needs to obtain the same degree of assurance in order to give an unqualified opinion on the financial statements of both small and large entities. However many controls which would be relevant to large entities are not practical in small business. For example, in a small business, accounting procedures may be performed by a few persons. These persons may have both operating and custodial responsibilities and segregation of functions may be missing or severely limited. Inadequate segregation of duties may, in some cases, be offset by supervisory controls exercised by the owner. This supervisory function by the owner becomes possible because of the fact that he has direct personal knowledge of the business and involvement in the business transactions. In circumstances where segregation of duties is limited and the evidence of supervisory controls is lacking the evidence necessary to support the auditor's opinion on the financial information may have to be obtained largely through substantive procedures.

3.8 Reporting to Clients on Internal Control Weaknesses

During the course of audit work, the audit may notice material weaknesses in the internal control system. Material weaknesses are defined as absence of adequate controls on flow of transactions that increases the possibility of errors and frauds in the financial statements of the entity. For example, if monthly age-wise analysis of trade receivables is not performed then it may result in inadequate provisioning of bad debts for the fiscal year under audit.

The auditor should communicate such material weaknesses to the management or the audit committee, if any, on a timely basis. This communication should be, preferably, in writing through a letter of weakness or management letter. Important points with regard to such a letter are as follows:

- (a) The letter lists down the area of weaknesses in the system and offers suggestions for improvement.
- (b) It should clearly indicate that it discusses only weaknesses which have come to the attention of the auditor as a result of his audit and that his examination has not been

designed to determine the adequacy of internal control for management.

- (c) This letter serves as a valuable reference document for management for the purpose of revising the system and insisting on its strict implementation.
- (d) The letter may also serve to minimize legal liability in the event of a major defalcation or other loss resulting from a weakness in internal control.

It should be appreciated that by writing a letter to the management about the weaknesses in the system, the auditor is not absolved from his duty to report the shortcomings in the accounts by way of qualification where the defects have not been corrected to the auditor's satisfaction weighing the materiality of weaknesses and their impact, if considered necessary.

The practice of the issue of letter of weaknesses has a great merit in relieving the auditor from liability in case serious frauds or losses have occurred, which probably would not have taken place had the client taken due note of the auditor's points in the letter of weakness. In the case *Re S.P. Catterson & Ltd.* (1937, 81, Act L.R. 62), the auditor was acquitted of the charge of negligence for employee's fraud in view of the fact that he had already informed the client about the unsatisfactory state in the specific areas of accounts and had suggested improvements which were not acted upon by the management.

The Council of ICAI has issued SA 265 on "Communicating Deficiencies in Internal Control to Those Charged with Governance and Management" in this regard. This SA is effective for audits of financial statements for periods beginning on or after April 1, 2010. This Standard on Auditing (SA) deals with the auditor's responsibility to communicate appropriately to those charged with governance and management deficiencies in internal control that the auditor has identified in an audit of financial statements. This SA does not impose additional responsibilities on the auditor regarding obtaining an understanding of internal control and designing and performing tests of controls over and above the requirements of SA 315 and SA 330.

SA 260 "Communication with those charged with Governance" establishes further requirements and provides guidance regarding the auditor's responsibility to communicate with those charged with governance in relation to the audit.

The auditor is required to obtain an understanding of internal control relevant to the audit when identifying and assessing the risks of material misstatement. In making those risk assessments, the auditor considers internal control in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of internal control. The auditor may identify deficiencies in internal control not only during this risk assessment process but also at any other stage of the audit. This SA specifies which identified deficiencies the auditor is required to communicate to those charged with governance and management. Nothing in this SA precludes the auditor from communicating to those charged with governance and management other internal control matters that the auditor has identified during the audit.

CASE STUDY

Accounting Systems and Internal Controls[∞]

EdukIT International Ltd. runs four private colleges which provide education and training for people in the information technology industry. Its two-year course includes training in data processing, multimedia, animation, etc. M/s. Tick Tack & Co. are conducting the interim audit for the year ended 30th June 2005. The tangible fixed assets of each college are recorded in an asset register which is maintained at each college location by the respective college manager. The system operates as described below:

- In order to obtain new assets, a purchase requisition form is completed and approved by the manager at each college.
- The requisition is sent to the head office, where the purchases officer checks the requisition for approval and completes the purchase order for the new asset.
- Assets costing more than ₹ 50,000, are approved by the head of the Accounts Department. All assets over ₹ 2,00,000 require Board of Directors' approval.
- The purchase order is then sent to the supplier and a copy is sent to the central store at the location of the head office.
- The asset is received by the central store where the receiving clerk checks that all the asset details agree with those on the goods received note and the copy of the purchase order. The receiving clerk then issues the asset with its computer-generated sequential barcode number. This barcode is fixed to the asset and written on the goods received note and the supplier invoice.
- The relevant college manager inputs the new asset details into the asset register using a copy of the purchase order, the original requisition and the asset's barcode.
- For disposal or write-off of an asset, an asset disposal write-off form is completed by the relevant college manager, signed and sent to the head office. Disposals and write-offs are approved by the head of the Accounts Department. A copy of the form is filed at the head office and the approved original returned to the college manager for action. The college manager then updates the fixed asset register for the subsequent disposals/write-off.
- The asset register is maintained on tailored fixed assets accounting software systems, known as FAST and reconciled to the general ledger by each college manager monthly.
- The FAST system calculates depreciation automatically each month using the rate input by the college manager at the time the asset was added to the register.

Queries to the Readers

- i) Identify five internal control strengths in the above case on which the auditor can place reliance.
- ii) What tests of control should be designed to evaluate the effectiveness of each of the controls identified.

ANNEXURE

The Sarbanes-Oxley Act of 2002

The Sarbanes–Oxley Act of 2002, also known as the Public Company Accounting Reform and Investor Protection Act of 2002 and commonly called SOX or Sarbox; is a United States federal law passed in response to a number of major corporate and accounting scandals including those affecting Enron, Tyco International, and WorldCom.

Sarbanes Oxley Act, 2002

The Sarbanes Oxley Act of 2002 established corporate accountability and civil and criminal penalties for white – collar crimes. The act contains eleven titles, the summary of which is given hereunder:

Title I - Public Company Accounting Oversight Board (PCAOB) Established is an independent private board, to regulate the accounting profession, to be dominated by executives and experts from outside the accounting profession (a self-regulatory body so far). This setup aims at establishing Public confidence in the 'Report of independent Registered Public Accounting Firm' and to protect the interest of investors. The PCAOB requires the Public Accounting Firms to register with the Board and to follow certain regulations for audit of Public Companies.

Title II – Auditor Independence

The auditors of Public Companies to follow:

- ◆ Regulatory authorities –Securities Exchange Board (SEC) as SEC was entrusted to issue rules implementing several of the provisions of Sarbanes Oxley Act.
- ◆ To comply with the PCAOB rules and regulations.
- ◆ To enhance the rights, duties and responsibilities of the Audit Committee.

Title III – Corporate Responsibility

- ◆ The Audit Committee to be more independent through enhancement of their Oversight responsibilities and one of the Audit Committee member to be “Financial Expert”.
- ◆ Requires the Chief Executive Officer (CEO) and Chief Financial Officer (CFO) to issue certification of quarterly financial results and annual reports to SEC as part of compliance with form 10-K quarterly Report under Section 13 or 15(d) of the Security and Exchange Act of 1934 or Transition Report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.
- ◆ Provides rules of conduct for companies management and their officers regarding pension matters.
- ◆ To comply with the Securities and Exchange Board rules requiring attorneys to report violations of securities laws to the company's CEO or Chief Legal Counsel and to Audit Committee if no action is taken.

3.38 Advanced Auditing and Professional Ethics

Title IV – Enhanced Financial Disclosures

- ◆ Obligatory for the companies to provide objective and transparency in disclosure of financial results having established effectiveness of internal control systems for financial reporting and disclosures covering off balance sheet transactions.
- ◆ Disclosure the corporate mission statement and corporate ethics and their implementation.
- ◆ Disclosure by CEO, directors, management of the company and principal stockholders involving company securities.

Title V- Analyst Conflicts of Interest

- ◆ Declaration by Securities Exchange Committee (SEC) of rules to address conflicts of interest arising when securities analysts recommend equity securities buying and selling in their Research Report and announcement to public.

Title VI – Commission Resources and Authority

- ◆ To provide additional funding to SEC.
- ◆ Power to SEC and federal courts to censure and impose prohibitions on persons and corporate entities.

Title VII – Studies and Reports

- ◆ Federal regulatory bodies to conduct studies regarding Accounting firms, Credit Rating Agencies, violation of laws, rules and regulations by various agencies concerning corporate affairs and action involving securities laws.

Title VIII – Corporate and Criminal Fraud Accountability

- ◆ To enforce tougher civil and criminal penalties for fraud and accounting scandals, securities fraud and certain other forms of obstruction of justice.
- ◆ In case of violation of securities laws there may be debts non-dischargeable.
- ◆ Protect employer against corporate whistle blowers (person who provide evidence of fraud in the company).

Title IX – White- Collar Crime Penalty Enhancements

- ◆ Tougher practices for CEO's guilty of wrong doing and other fraud such as mail and wire fraud and ERISA violations.
- ◆ Chief Executive Officer (CEO) and Chief Financial Officer (CFO) to issue certification in their quarterly, Half-yearly and Annual Reports to SEC forming part of Form 10 K and 10 Q under Section 13 or 15(d) of the Securities Exchange Act of 1934 and impose penalties for certifying a misleading or fraudulent report.

Title X – Corporate Tax Returns

- ◆ CEO should sign company's federal tax returns.

Title XI – Corporate Fraud and Accountability

Provide regulatory bodies and courts to take various actions –civil and criminal proceedings in connection of misstatements amounting to accounting scandals and fraudulent financial reports, other frauds on securities matters, obstruction of justice and retaliating against corporate whistleblowers.

Overview of PCAOB'S Requirements for Auditor Attestation of Control Disclosures

Auditing Standards of the Public Company Accounting Oversight Board (PCAOB) has the following key requirements:

- ◆ The design of controls-relevant assertions related to all significant accounts and disclosures in the financial statements;
- ◆ Information about how significant transactions are initiated, authorized, supported, processed, and reported;
- ◆ Enough information about the flow of transactions to identify where material misstatements due to error or fraud could occur;
- ◆ Controls designed to prevent or detect fraud, including who performs the controls and the regulated segregation of duties;
- ◆ Controls over the period-end financial reporting process;
- ◆ Controls over safeguarding of assets;
- ◆ The results of management's testing and evaluation.

Internal controls - Under Sarbanes-Oxley, two separate certification sections came into effect – one civil and the other criminal. Section 302 of the Act mandates a set of internal procedures designed to ensure accurate financial disclosure. The signing officers must certify that they are “responsible for establishing and maintaining internal controls” and “have designed such internal controls to ensure that material information relating to the company and its consolidated subsidiaries is made known to such officers by others within those entities, particularly during the period in which the periodic reports are being prepared.” The officers must “have evaluated the effectiveness of the company’s internal controls as of a date within 90 days prior to the report” and “have presented in the report their conclusions about the effectiveness of their internal controls based on their evaluation as of that date.”

Moreover, under Section 404 of the Act, management is required to produce an “internal control report” as part of each annual Exchange Act report. The report must affirm “the responsibility of management for establishing and maintaining an adequate internal control structure and procedures for financial reporting.” The report must also “contain an assessment, as of the end of the most recent fiscal year of the Company, of the effectiveness of the internal control structure and procedures of the issuer for financial reporting.” Id. To do this, managers are generally adopting an internal control framework such as that described in COSO.

Information Technology and SOX 404

The PCAOB suggests considering the Committee of Sponsoring Organizations of the Treadway Commission (COSO) framework in management/auditor assessment of controls. Auditors have also looked to the IT Governance Institute's "COBIT: Control Objectives of Information and Related

3.40 Advanced Auditing and Professional Ethics

Technology" for more appropriate standards of measure. This framework focuses on information technology (IT) processes while keeping in mind the big picture of COSO's "control activities" and "information and communication". However, these certain aspects of COBIT are outside the boundaries of Sarbanes-Oxley regulation. Refer to the Study Material of Information System Control and Audit for a detailed discussion on COBIT.

The financial reporting processes of most organizations are driven by IT systems. Few companies manage their data manually and most companies rely on electronic management of data, documents, and key operational processes. Therefore, it is apparent that IT plays a vital role in internal control. As PCAOB's states:

"The nature and characteristics of a company's use of information technology in its information system affect the company's internal control over financial reporting."

Chief information officers are responsible for the security, accuracy and the reliability of the systems that manage and report the financial data. Systems such as ERP (Enterprise Resource Planning) are deeply integrated in the initiating, authorizing, processing, and reporting of financial data. As such, they are inextricably linked to the overall financial reporting process and need to be assessed, along with other important process for compliance with Sarbanes-Oxley Act. So, although the Act signals a fundamental change in business operations and financial reporting, and places responsibility in corporate financial reporting on the chief executive officer (CEO) and chief financial officer (CFO), the chief information officer (CIO) plays a significant role in the signoff of financial statements.

The SEC identifies the COSO framework by name as a methodology for achieving compliance. The COSO framework defines five areas, which when implemented, can help support the requirements as set forth in the Sarbanes-Oxley legislation. These five areas and their impacts for the IT Department are as follows:

Risk Assessment - *Before the necessary controls are implemented, IT management must assess and understand the areas of risk affecting the completeness and validity of the financial reports. They must examine how the company's systems are being used and the current level and accuracy of existing documentation. The areas of risk drive the definition of the other four components of the COSO framework.*

Control Environment - *An environment in which the employees take ownership for the success of their projects will encourage them to escalate issues and concerns, and feel that their time and efforts contribute to the success of the organization. This is the foundation on which the IT organization will thrive. Employees should cross train with design, implementation, quality assurance and deployment teams to better understand the entire technology lifecycle.*

Control Activities - *Design, implementation and quality assurance testing teams should be independent. ERP and CRM systems that collect data, but feed into manual spreadsheets are prone to human error. The organization will need to document usage rules and create an audit trail for each system that contributes financial information. Further, written policies should define the specifications, business requirements and other documentation expected for each project.*

Monitoring - *Auditing processes and schedules should be developed to address the high risk areas within the IT organization. IT personnel should perform frequent internal audits. In addition, personnel from outside the IT organization should perform audits on a schedule that is appropriate to the level of*

risk. Management should clearly understand and be held responsible for the outcome of these audits.

Information and Communication - Without timely, accurate information, it will be difficult for IT management to proactively identify and address areas of risk. They will be unable to react to issues as they occur. IT management must demonstrate to company management an understanding of what needs to be done to comply with Sarbanes-Oxley.

U.S. and non-U.S. public companies have been subject to the disclosure controls and procedures and the internal accounting controls certification requirements of Section 302 of the Act since August 29, 2002, when the SEC published its final rules regarding Certification of Disclosure in Companies' Quarterly and Annual Reports (the "August 29th Final Rules"). U.S and non-U.S. Public Companies have also been subject to the certification requirements of Section 906 of the Act since July 30, 2002.

Difference between Disclosure Controls and Procedures and Internal Control over Financial Reporting

Because both the August 29th Final Rules and the June 5th Final Rules deal with "Disclosure Controls And Procedures" and "Internal Control Over Financial Reporting," it is important to understand the basic difference between them.

'Disclosure Controls and Procedures' are meant to ensure, as far as possible, that all the information required by law to be included in the periodic reports filed with the SEC is made available to those responsible for preparing them in a complete and timely fashion. 'Internal Control Over Financial Reporting' is meant to ensure the integrity of the financial statements and guard the assets of the company. At the bookkeeping level, these procedures are designed to enforce the proper recording of income and expenditure so that revenues are deposited into the company's bank account and unauthorized expenditures do not leave the company's bank account. At the executive level, these procedures are designed to prevent manipulation of revenues and expenses, such as illegal transfers from expense accounts to capital accounts, in which management may be tempted to engage in order to hit the end of the period "whispered numbers".

Because most periodic reports contain financial statements, there is some inevitable overlap between the two sets of controls. Considering the accounting lapse in the US, this overlap is considered as a good procedure. The Disclosure Controls and Procedures and the Internal Control Over Financial Reporting are sometimes collectively referred to in this advisory as "the Controls and Procedures."

Evaluation of Disclosure Controls and Procedures - The disclosure committee may plan to review and evaluate the check list at least quarterly in the case of U.S. companies and annually in the case of non-U.S. companies for the following:

- ◆ staffing inadequacies in the disclosure process;
- ◆ the level of experience of those drafting the reports;
- ◆ the reliability of the information systems used;
- ◆ whether those preparing the reports have access to the persons that have the information required and whether such persons are responsive to requests for information;
- ◆ whether sufficient time was allowed for review, comment and Q&A on drafts; whether transaction files were complete or were missing documents;

3.42 Advanced Auditing and Professional Ethics

- ◆ whether material transactions and issues were included in early drafts and how long did it take for issues to surface;
- ◆ whether disclosures were accurate; whether form checks revealed any problems and if so whether they were corrected;
- ◆ whether there are adequate controls over related party transactions; and
- ◆ Whether there was sufficient time to discuss issues and maintain a sufficient dialog between the gatekeepers of the information. The results of this periodic evaluation should be discussed with the CEO, CFO, the board of directors and the audit committee.

Other Functions of the Disclosure Committee - *Other functions of the disclosure committee would include overseeing and coordinating the collection of information, resolving questions about the materiality of a development, reviewing and advising on the content of disclosure, drafting of disclosure and communication with the investing public, and recommending to the board, the audit committee, the CFO and the CEO, the filing of the report.*

Purpose of Internal Control over Financial Reporting

The establishment, maintenance and periodic evaluation of Internal Control Over Financial Reporting required by Section 404 of the Act is important in view of the fact that in auditing financial statements, outside accountants conduct and rely upon samplings and random checks rather than upon an exhaustive review of each transaction. This method of sampling and spot checking is justified if a reliable system of Internal Controls Over Financial Reporting is in place because it provides a level of comfort that there are checks and balances which monitor the day to day financial operations of the company. If on the other hand, no reliable Internal Control Over Financial Reporting exists, the accountant would have to conduct tests of transactions and perform additional analyses in order to accumulate sufficient evidence to support its opinion on the financial statements.

1 Procedures To Be Included In the Internal Control Over Financial Reporting - *Internal Control Over Financial Reporting should include policies and procedures that provide reasonable assurance that (i) records are maintained that fairly reflect purchase and sales of the company's assets, (ii) that transactions are properly recorded so as to permit the preparation of GAAP financial statements, (iii) receipts and expenditures are being made in an authorized fashion and (iv) unauthorized use of company assets that could have a material effect on the financial statements will be timely detected.*

2 Extent of Management's Duty to Assess and Report on the Company's Internal Control Over Financial Reporting - *In order to ensure the reliability of the Internal Control Over Financial Reporting at all times, management is required to evaluate the effectiveness of those controls on a periodic basis and to include a report of such evaluation in the annual report, which evaluation must be attested to by the company's outside accountants. Under the Section 404 proposed rules, management would have been required to evaluate the effectiveness of the internal controls quarterly. Recognizing that this would be too burdensome, the June 5th Final Rules only require quarterly evaluation of changes that have materially affected, or are reasonably likely to materially affect, the Company's Internal Control Over Financial Reporting. Whereas a U.S. public company would have to report these changes quarterly, a non-U.S public company would only have to report them in its annual report.*

If, in the course of the evaluation, management discovers any deficiency in the design or operation of Internal Control Over Financial Reporting that could adversely affect a company's ability to record,

process, summarize and report financial data consistent with the assertions of management in the company's financial statements, then management must disclose this material weakness in the report.

3 Procedures To Be Followed by Management in Preparing the Report of the Effectiveness of Internal Control Over Financial Reporting - *The June 5th Final Rules do not specify the method or procedures to be performed in an evaluation and such method will vary from company to company. They do, however, require management to maintain the documentation that supports its assessment of the effectiveness of the company's Internal Control Over Financial Reporting. The documentation regarding the design of internal controls and the testing process should provide reasonable support (i) for the evaluation of whether the control is designed to prevent or detect material misstatement or omissions, (ii) for the conclusion that the tests were appropriately planned and performed and (iv) that the results of the tests were appropriately considered. In performing their evaluation of the design and effectiveness of the Internal Control Over Financial Reporting, management should review (i) the company's controls over initiating, recording, processing and reconciling account balances, classes of transactions and disclosures and related assertions included in the financial statements; controls related to the initiation and processing of non-routine and non-systematic transactions; controls relating to the selection and application of appropriate accounting policies and controls relating to the prevention, identification and detection of fraud.*

4 Location in the Annual Report of the Management's Report on the Effectiveness of Internal Control Over Financial Reporting - *Form 10-K for annual reports of U.S. public companies has been amended by adding Item 9A entitled "Controls and Procedures" to the annual report on Form 10-K. Form 20-F for annual reports for non-U.S. public companies has been amended by revising Item 15 of Part II. After the Second Compliance Date, these amendments will require a company's annual report to include an internal control report of management that contains (i) a statement of managements responsibility for establishing and maintaining internal controls over financial reporting for the company, (ii) a statement identifying the framework used by management to conduct the required evaluation (iii) managements assessment of the effectiveness of the company's Internal Control Over Financial Reporting as of the end of the company's most recent fiscal year, which assessment must include disclosure of any material weakness in the company's Internal Control Over Financial Reporting identified by management and (iv) a statement that the accounting firm that audited the financial statements included in the annual report has issued an attestation report on management's assessment of the company's internal control over financial reporting, which report must be filed as part of the company's annual report with the SEC. For public companies that are Accelerated Filers, including non-U.S. public companies that are Accelerated Filers, the Second Compliance Date by which they must comply with the internal control report requirement is the date that the company files its first annual report for fiscal years ending on or after June 15, 2004. For public companies that are not Accelerated Filers, the Second Compliance Date by which they must comply with the internal control report requirement is the date that the company files its first annual report for fiscal years ending on or after April 15 2005.*

5 Framework To Be Adopted by Management in Evaluating the Internal Control Over Financial Reporting - *Although the SEC has not mandated any particular framework for the evaluation of the effectiveness of the Internal Control Over Financial Reporting, the framework used must be free of bias, permit qualitative and quantitative measurements, be sufficiently complete to include factors that would alter a conclusion about the effectiveness, and be relevant to an evaluation of internal control.*

3.44 Advanced Auditing and Professional Ethics

6 What Must the Outside Accountant's Attestation on Management's Internal Control Report Include and What Accounting Standards Will Be Used For Such Attestation?- *The June 5th Final Rules require each annual report to include an attestation by the company's outside accountants in which the accounting firm expresses an opinion, or states that an opinion cannot be expressed and if not, why not, about management's assessment of the effectiveness of the company's Internal Control Over Financial Reporting in accordance with standards on attestation engagements. The Act requires the new Public Company Accounting Oversight Board to establish standards for these attestation reports.*

7 Can Management Delegate the Evaluation of the Internal Control over Financial Reporting to the Company's Outside Accountants? - *Management cannot delegate the evaluation of the Internal Control Over Financial Reporting to the company's outside accountants because under the SEC's rules of auditor independence (see Carter Ledyard & Milburn's LLP client advisory dated May 2003 on Audit Committee and Financial Reporting for U.S. and non-U.S companies under the Sarbanes Oxley Act), one of the prohibited non-audit services that an outside accountant may not provide to its audit client is the monitoring of internal controls. Nevertheless, because under Section 404 of the Act, the outside accountant must attest to the effectiveness of management's evaluation of the internal controls, the outside accountant must be involved in the assessment. Accordingly, management must be actively involved in the evaluation of the internal controls by the outside accountants and coordinate the process with them.*

8 Do the Periodic Report Certification Requirements and the Controls and Procedures Apply to Non U.S Public Companies and to Current Reports on Form 8-K, Proxy Materials and Information Statements? - *It should be noted that the certification and Controls and Procedures apply to annual reports filed by Foreign Private issuers on Forms 20-F and 40-F. Although the certification is not required for reports of Foreign Private Issuers on Form 6-K, the Disclosure Controls and Procedures for generating a 6-K, especially those incorporating financial data, must be in place. These Controls and Procedures should be designed to ensure timely filing of Form 6-K reports via EDGAR (required since November 4, 2002) and to ensure that all information included in a Form 6-K is complete and accurate in all material respects.*

Current reports such as reports on Forms 8-K, 6-K, proxy materials and information statements are not covered by the Section 302 certification requirement. Disclosure Controls and Procedures for these reports however, are required to be designed, maintained and evaluated to ensure full and timely disclosure even though there is no certification requirement. In this connection, companies should build in to their Disclosure Controls and Procedures the mechanisms necessary to allow them to comply with a proposed amendment of the SEC which would require them to report on Form 8-K, 22 categories of events within two days of their occurrence.

Audit under Computerised Information System (CIS) Environment

4.1 Introduction

Fig.: What is Audit under Computerised Information System (CIS) Environment *

Information Technology throughout the world has revolutionized and dramatically changed the manner in which the business is conducted today. Computerization has a significant effect on organization control, flow of document information processing and so on. Auditing in a CIS environment even though has not changed the fundamental nature of auditing, it has definitely caused substantial changes in the method of evidence collection and evaluation. This also requires auditors to become knowledgeable about computer environment (Hardware, software etc.) and keep pace with rapidly changing technology, even to the extent of using sophisticated Audit

4.2 Advanced Auditing and Professional Ethics

software. Students are advised to study the technical issue relating to Information Technology from the study material of Paper 6 “Information Systems Control and Audit”.

4.2 Scope of Audit in a CIS Environment

Impact of computerisation on audit approach needs consideration of the following factors:

(1) High speed - In a CIS environment information can be generated very quickly. Even complex reports in specific report format can be generated for audit purposes without much loss of time. This cut down the time enabling the auditor to extend their analytical review for under coverage with high speed of operation, the Auditor can expand their substantive procedures for collection of more evidence in support of their judgement.

(2) Low clerical error - Computerised operation being a systematic and sequential programmed course of action the changes of commission of error is considerably reduced. Clerical error is highly minimised.

(3) Concentration of duties - In a manual environment the auditor needs to deploy separate individuals for carrying out the verification process. In a CIS environment, the traditional approach does not apply in many cases, as computer programs perform more than one set of activities at a time thereby concentrating the duties of several personnel involved in the work.

(4) Shifting of internal control base –

(i) Application systems development control - Systems development control should be designed to provide reasonable assurance that they are developed in an authorised and efficient manner, to establish control, over:

- (a) testing, conversion, implementation, and documentation of new revised system.
- (b) changes to application system.
- (c) access to system documentation.
- (d) acquisition of application system from third parties.

(ii) Systems software control - Systems software controls are designed to provide reasonable assurance that system software is acquired or developed in an authorised and efficient manner including:

- (a) authorisation, approval testing, implementation and documentation of new system software systems software modifications.
- (b) putting restriction of access to system software and documentation to authorised personnel.

(5) Disappearance of manual reasonableness - The shift from traditional manual information processing environment to computerised information systems environment needs a detailed analysis of the physical system for transformation into a logical platform. In creating such logical models many stages required under manual operations are either deleted or managed to create a focused computer system. In such creative effort, the manual reasonableness may be missing.

(6) Impact of poor system - If system analysis and designs falls short of expected standard of performance, a computerised information system environment may do more harm to integrated business operation than good. Thus, care has to be taken in adopting manual operations switch-over to computerised operations for ensuring performance quality standards.

(7) Exception reporting - This is a part of Management information system. Exception Reporting is a departure from straight reporting of all variables. Here the value of a variable is only reported if it lies outside some pre-determined normal range. This form of reporting and analysis is familiar to the accountant. The main strength of exception reporting lies in its recognition that to be effective information must be selectivity provided.

(8) Man-machine interface / human-computer interaction - Man-machine interface ensures maximum effectiveness of the information system. Organisation concentrated on presenting information that is required by the user and to present that information in the most uncluttered way. It is required to determine what information was necessary to achieve through a careful analysis of the job or task for which the user needed the information.

Human-computer interaction is a discipline concerned with the design, evaluation and implementation of interactive computing systems for human use and with the study of the major phenomena, surrounding them. The approach is user centered and integrates knowledge from a wide range of disciplines.

4.3 Impact of Changes on Business Processes (for shifting from Manual to Electronic Medium)

The effect of changes on accounting process may be stated as under:

A. Primary Changes

(1) Process of recording transactions - The process of recording transaction undergoes a major change when accounting process are computerised under CIS environment, the order of recording transaction from basic document to prime books and finally to principal book may not be followed strictly in sequential from as is observed in manual system. In many cases all the three processes Prime book of Entry, Ledger, Final accounts (Balance Sheet and Profit and Loss Account) are carried on simultaneously.

(2) Form of accounting records - Mechanisation often results in the abandonment in whole or in part of the primary records. Punch card installation or electronic data processor changes the form of both intermediate and ultimate records much more radically than manual records.

(3) Use of loose-leaf stationeries - Bound hand written records as used in manual accounting processes are replaced by loose-leaf machine written records in electronic medium. In a computerised information system, magnetic tapes, floppy disks, diskettes, print-outs replace the traditional records. This necessarily require proper control over such records to prevent their unauthorised use, destruction or substitution.

(4) Use of accounting code - In computerised information systems, alpha-numeric codes are extensively used to represent names and description. The accountants as well as the Auditors

4.4 Advanced Auditing and Professional Ethics

have to get themselves familiarised with the use of such codes which initially may pose considerable problems in understanding the various transactions.

(5) Absence of link between transaction – In a computerised information system environment, there may be an inadequacy or even total absence of cross-reference between the basic documents, primary records and the principal records. This creates special problems for the auditors. The auditors may find it difficult to trace a transaction from start to finish there by having a doubt in their mind as to loss of audit trails.

B. Recent Changes

The growth and development in the field of information technology is a fast paced one and unless the auditors are alert to such developments and take pre-emptive action in upgrading their knowledge, they may find difficulty in coping with such advancement.

Following are a few instances of the recent changes which may need to be addressed in discharging their responsibilities in such environment:

- (1) Mainframes are substituted by mini/micro users.
- (2) There is a shift from proprietary operating system to more universal ones like UNIX, LINUX, Programming in 'C' etc.
- (3) Relational Data Base Management (RDBMS) are increasingly being used.
- (4) The methodology adopted for systems development is becoming crucial and CASE (Computer Aided Software Engineering) tools are being used by many organisations.
- (5) End user computing is on the increase resulting in decentralized data processing.
- (6) The need for data communication and networking is increasing.
- (7) Common business documents are getting replaced by paperless electronic data interface (EDI).
- (8) Conventional data entry giving way to scanner, digitized image processes, voice recognition system etc.

The impact of all such change on auditing may be summarised as:

- (a) wide-spread end-user computing may result in unintentional errors creeping into systems owing to inept handling. Also coordinated program modification may not be possible.
- (b) improper use of decision support system can have serious repercussions. Also their underlying assumption must be clearly documented.
- (c) Usage of sophisticated audit software would be a necessity.
- (d) Auditors non-participation at System Development Life Cycle State (SDLC) pose considerable problem in understanding the operational controls.
- (e) Data communication and networking would introduce new audit risk.
- (f) The move toward paperless EDI would eliminate much of the traditional audit trail radically changing the nature of audit trails.

4.4 Audit Approaches in a CIS Environment

Based on The knowledge and expertise of Auditors in handling computerised data, the audit approach in a CIS environment could be either:

- A. A Black-box approach i.e., Auditing around the computer, or
- B. A White-box approach i.e., Auditing through the computer.

A. The Black Box Approach

In the Black box approach or Auditing around the computer, the Auditor concentrates on input and output and ignores the specifics of how computer process the data or transactions. If input matches the output, the auditor assumes that the processing of transaction/data must have been correct.

In testing, say, Payroll Application, the auditor might first examine selected time cards for hours worked and employee earning cards for rates and then trace these to the payroll summary output and finally compare hours, rates and extensions. The comparison of inputs and outputs may be done manually with the assistance of the computer. The computer assisted approach has the advantage of permitting the auditor to make more comparisons than would be possible, if done manually.

Auditing around the computer has the advantage of ease of comprehension as the tracing of documents to output does not require any in-depth study of application program.

A major disadvantage, however, is that the auditor not having directly tested the control, cannot make assertions about the underlying process. Moreover, in some of the more complex computer systems intermediate printout may not be available for making the needed comparisons.

B. The White Box Approach

The processes and controls surrounding the subject are not only subject to audit but also the processing controls operating over this process are investigated. In order to help the auditor to gain access to these processes computer Audit software may be used. These packages may typically contain:

- (a) interactive enquiry facilities to interrogate files.
- (b) facilities to analyze computer security logs for unusual usage of the computer.
- (c) the ability to compare source and object (compiled) program codes in order to detect dissimilarities.
- (d) the facility to execute and observe the computer treatment of "live transaction" by moving through the processing as it occurs.
- (e) the generation of test data.
- (f) the generation of aids showing the logs of application programs. The actual controls and the higher level control will be evaluated and then subjected to compliance testing and, if necessary, substantive testing before an audit report is produced.

It is obvious, that to follow this approach the auditor needs to have sufficient knowledge of computers to plan, direct-supervise and review the work performed.

The areas covered in an audit will concentrate on the following controls:

- (1) Input controls,
- (2) Processing control,
- (3) Storage control,

- (4) Output control and
- (5) Data transmission control.

The auditor will also need to be satisfied that there are adequate controls over the prevention of unauthorised access to the computer and the computerised database. The auditor's task will also involve consideration of the separation of functions between staff involved in transaction processing and the computerised system and ensuring that adequate supervision of personnel is administered.

The process of auditing is not a straight forward flow of work from start to finish to be completed by satisfying oneself against a standard checklist or a list of questions. It involves exposure, experiences and application of knowledge and expertise to differing circumstances. No two information systems are the same. From the view point of analysis of a computerised information system, the auditor needs not only have adequacy of knowledge regarding information requirements and computer data security; they must also get exposed to system analysis and design so as to facilitate post implementation audit.

4.5 Effect of Computers on Internal Controls

Internal control systems include separation of duties, delegation of authority and responsibility, a system of authorisation, adequate documents and records, physical control over assets and records, management supervision, independent checks on performance and periodic reconciliation of assets with records. In a CIS environment, all these components must exist but computers affect the implementation of these internal controls in many ways. Some of the effects are as under:

(1) Segregation of Duties - In a manual system, different persons are responsible for carrying out functions like initiating, recording of transactions, safeguarding of assets, etc. This does not always apply in a computer system. For example, in a computer system, a program may carry out reconciliation of vendor invoices against a receipt document and also prepare a cheque payable to trade payables. Such operations through a program will be considered as incompatible functions in a manual system.

In minicomputer and microcomputer environments, separation of incompatible functions could be even more difficult. Some such programs allow users to change programs and data entry without providing a record of these changes. Thus, it becomes difficult to determine whether incompatible functions have been performed by system users.

(2) Delegation of Authority and Responsibility - A structured authority and responsibility is an essential control within manual and computer environments. In a computer system however, a clear line of authority and responsibility might be difficult to establish because some resources are shared among multiple users. For instance, one objective of using a database management system is to provide multiple users with access to the same data, thereby reducing the control problems that arise with maintaining redundant data, when multiple users have access to the same data and the integrity of the data is somehow violated, it is not always easy to trace who is responsible for corrupting the data and who is responsible for identifying and correcting the error. Some organisations identify a single user as the owner of the data.

(3) Competent and Trustworthy Personnel - Skilled, competent, well-trained and experienced information system personnel have been in short supply. Since substantial power is often vested in the person responsible for the computer information system development, implementation, operation and maintenance within the organisation, competent and trustworthy personnel is very much in demand. Unfortunately, the non availability of competent personnel, forced many organisation to compromise on their choice of staff. Moreover, it is not always easy for organisation to assess the competence and integrity of their system staff. High turnover among those staff has been the norm. Some information systems personnel lack a well developed sense of ethics and some enjoy in subverting controls.

(4) System of Authorisation - Management authorisation of transaction may be either:

- (a) general authorisation to establish policies for the organisation,
- (b) specific authorisation applying to individual transactions. In manual system, auditors evaluate the adequacy of procedures for authorisation by examining the work of employees. In a computer system, authorisation procedures often are embedded within a computer program. In a computer system, it is also more difficult to assess whether the authority assigned to individual persons is constant with managements policies. Thus, in evaluating the adequacy of authorisation procedures, auditors have to examine not only the work of employees but also the veracity of the programme processing.

(5) Adequate Documents and Records - In a manual system, adequate documents and records are required to provide an audit trail of activities within the system. In computer system, document support might not be necessary to initiate, execute and records some transaction. The task of a visible audit trail is not a problem for auditors, provided the systems have been designed to maintain a record of all events and that they are easily accessible. In well-designed computer systems, audit trails are more extensive than those maintained in manual systems unfortunately not all computer systems are well designed. This creates a serious control problem.

(6) Physical Control over Assets and Records - Physical access to assets and records is critical in both manual systems and computer system. In a computer system the information system assets and records may be concentrated at a single site. The concentration of information systems assets and record also increases the losses that can arise from computer abuse or disaster. If the organisation does not have another suitable backup, it might be unable to continue operations.

(7) Adequate Management Supervision - In a computer system, supervision of employee might have to be carried out remotely. Supervisory controls must be built into the computer system to compensate for the controls that usually can be exercised through observation and in inquiring computer system also make the activities of employees less visible to management. Because many activities are electronically controlled managers must periodically access the audit trial of employee activities and examine it for unauthorised actions.

(8) Independent Checks On Performance - Checks by an independent person help to detect any errors or irregularities. In a computer system, if a program code is authorised accurate, and complete the system will always follow the laid down procedures in absence of other type of

failures like hardware or systems software failure. Thus, independent checks on the performance of programs often have little value. Instead, the control emphasis shifts to ensuring the veracity of programme code. Auditors must now evaluate the controls established for program development, modification operation and maintenance.

(9) Comparing Recorded Accountability with Assets - In a manual system, independent staff prepares the basic data used for comparison purposes. In a computer system software is used to prepare this data. If unauthorised modifications occur to the program or the data files that the program uses, an irregularity might not be discovered, because traditional separation of duties no longer applies to the data being prepared for comparison purposes.

4.6 Effects of Computers on Auditing

The objective of auditing, do not undergo a sea change in a CIS environment. Auditor must provide a competent, independent opinion as to whether the financial statements records and report a true and fair view of the state of affairs of an entity. However, computer systems have affected how auditors need to collect and evaluate evidence. These aspects are discussed below:

(1) Changes to Evidence Collection - Collecting evidence on the reliability of a computer system is often more complex than collecting evidence on the reliability of a manual system. Auditors have to face a diverse and complex range of internal control technology that did not exist in manual system, like:

- (a) accurate and complete operations of a disk drive may require a set of hardware controls not required in manual system,
- (b) system development control include procedures for testing programs that again are not necessary in manual control.

Since, Hardware and Software develop quite rapidly, understanding the control technology is not easy. With increasing use of data communication for data transfer, research is focused on cryptographic controls to protect the privacy of data. Unless auditor's keep up with these developments, it will become difficult to evaluate the reliability of communication network competently.

The continuing and rapid development of control technology also makes it more difficult for auditors to collect evidence on the reliability of controls. Even collection of audit evidence through manual means is not possible. Hence, auditors have to run through computer system themselves if they are to collect the necessary evidence. Though generalized audit softwares are available the development of these tools cannot be relied upon due to lack of information. Often auditors are forced to compromise in some way when performing the evidence collection

(2) Changes to Evidence Evaluation - With increasing complexity of computer systems and control technology, it is becoming more and more difficult for the auditors to evaluate the consequences of strength and weaknesses of control mechanism for placing overall reliability on the system.

4.10 Advanced Auditing and Professional Ethics

Auditors need to understand:

- (a) whether a control is functioning reliably or multi functioning,
- (b) traceability of control strength and weakness through the system. In a shared data environment a single input transaction may update multiple data item used by diverse, physically disparate user, which may be difficult to understand.

Consequences of errors in a computer system are a serious matter as errors in computer system tend to be deterministic, i.e., an erroneous program will always execute data incorrectly. Moreover, the errors are generated at high speed and the cost and effort to correct and rerun program may be high. Errors in computer program can involve extensive redesign and reprogramming. Thus, internal controls that ensure high quality computer systems should be designed implemented and operated upon. The auditors must ensure that these control are sufficient to maintain assets safeguarding, data integrity, system effectiveness and system efficiency and that they are in position and functioning.

4.7 Internal Controls in a CIS Environment

Internal control is an essential prerequisite for efficient and effective management of any organisation. Basically, they are the policies and procedure adopted by a management to achieve the entity's specific objectives like, physical verification of assets, periodic review and reconciliation of accounts, specific control on computer generated data etc.

An internal control in a CIS system depends on the same principal as that of manual system. Thus, the plan of organisation, delegation of powers, system authorisation, distribution of duties etc., are determined on similar consideration as in a manual system. However, in a CIS environment, due to difference in approach there is various other types of controls which are quite specific to CIS environment.

In setting up an internal control system in a CIS environment, the overall CIS operation need to be broken down into defined subsystem and controls established accordingly, addressing each function separately so that auditors can place reliance on them. The basic components that can be identified in a CIS environment are:

- ◆ Hardware (CPU, Monitor, Printers etc.)
- ◆ Software (Operating system, application programs, Data base management system etc.)
- ◆ People (Data entry operator, CIS organisation, end users)
- ◆ Transmission media

Once components have been identified, auditors must evaluate their reliability with respect to each type of error or irregularity that might occur.

The reliability of a component is a function of the controls that act on the component. A control is stated to be a set of activities designed to prevent, detect or correct errors or irregularities that affect the reliability of the components. The set of all control activities performed in a system constitutes the control subsystem within a system. Its function is to establish execute modify and maintain control activities so that the reliability of the system is maintained at an acceptable

level. In a computer system many different types of controls are used to enhance component reliability. Major classes of control that the auditor must evaluate are:

(1) Authenticity Controls - Authenticity control are exercised to verify the identity of the individuals or process involved in a system (e.g. password control, personal identification numbers, digital signatures).

(2) Accuracy Control - Accuracy control ensure the correctness of data and processes in a system (e.g. program validation check that a numeric field contains only numeric, overflow checks, control totals, hash total etc.).

(3) Completeness Control - Completeness control attempt to ensure that no data is missing and that all processing is carried through to its proper conclusion (e.g. program validation check, sequence check etc.).

(4) Redundancy Control - Redundancy controls attempts to ensure that a data is processed only once (e.g. batch cancellation stamp, circulating error files etc.).

(5) Privacy Controls - Privacy controls ensure that data is protected from inadvertent or unauthorised disclosure (e.g. cryptograph, data compaction, inference control etc.).

(6) Audit Trail Controls - Audit trail control ensure traceability of all events occurred in a system. This record is needed to answer queries, fulfil statutory requirements, minimise irregularities, detect the consequences of error etc. The accounting audit trail shows the source and nature of data and process that update the database. The operations audit trail maintains a record of attempted or actual resource consumption within a system.

(7) Existence Controls - Existence controls attempt to ensure the ongoing avail ability of all system resources (e.g., database dump and logs for recovery purposes duplicate hardware, preventive maintenance, check point and restart control).

(8) Asset Safeguarding Controls - Asset safeguarding control attempt to ensure that all resources within a system are protected from destruction or corruption (e.g. physical barriers, libraries etc.).

(9) Effectiveness Controls - Effectiveness control attempt to ensure that systems achieve their goals (e.g. monitoring of user satisfaction, post audits, periodic cost benefit analysis etc.).

(10) Efficiency Controls - Efficiency controls attempt to ensure that a system uses minimum resources to achieve its goals.

4.8 Consideration of Control Attributes by the Auditors

In evaluating the effects of a control, the auditor needs to assess the reliability by considering the various attributes of a control. Some of the attributes are:

- (1) whether the control is in place and is functioning as desired.
- (2) generality versus specificity of the control with respect to the various types of errors and irregularities that might occur.

General control inhibit the effect of a wide variety of errors and irregularities as they are more robust to change controls in the application sub-system which tend to be specific control because component in these sub-system execute activities having less variety.

4.12 Advanced Auditing and Professional Ethics

- (3) Whether the control acts to prevent, detect or correct errors.

The auditor focuses here on-

- (i) Preventive controls: Controls which stop errors or irregularities from occurring.
- (ii) Detective controls: Controls which identify errors and irregularities after they occur.
- (iii) Corrective controls: Controls which remove the effects of errors and irregularities after they have been identified.

Auditors expect to see a higher density of preventive controls at the early stages of processing or conversely they expect to see more detective and corrective controls later in system processing.

- (4) The number of components used to execute the control.

Multi-component controls are more complex and more error prone but they are usually used to handle complex errors and irregularities.

4.9 Internal Control Requirement under CIS Environment

The requirement of internal control under CIS environment may cover the following aspects:

(1) Organisation and Management Control - Controls are designed to establish an organisational frame work for CIS activities including:

- (a) Policies and procedures relating to control functions.
- (b) Appropriate segregation of incompatible functions.

(2) Application System Development and Maintenance Control - Control are designed to provide reasonable assurance that systems are developed and maintained in an authorised and efficient manner, to establish control over:

- (a) testing, conversion, implementation and documentation of new revised system.
- (b) changes made to application system.
- (c) access to system documentation.
- (d) acquisition of application system from third parties.

(3) Computer Operation Controls - Designed to control the operation of the system and to provide reasonable assurance that:

- (a) the systems are used for authorised purposes only.
- (b) access to computer operation is restricted to authorised personnel.
- (c) only authorised programs are to be used.
- (d) processing errors are detected and corrected.

(4) System Software Control - Controls are designed to provide reasonable assurance that system software is acquired or developed in an authorised and efficient manner including:

- (a) authorisation, approval, testing, implementation and documentation of new system software and system software modification.

- (b) restriction of access to system software and documentation to authorised personnel.
- (5) Data Entry and Program Control** - Designed to provide assurance:
 - (a) an authorisation structure is established over transaction being entered into the system.
 - (b) access to data and program is restricted to authorised personnel.
- (6) Control over Input** - Control are designed to provide reasonable assurance that:
 - (a) transactions are properly authorised before being processed by the computer.
 - (b) transactions are accurately converted into machine readable form and recorded in the computer data files.
 - (c) transaction are not lost, added, duplicated or improperly changed.
 - (d) incorrect transactions are rejected, corrected and if necessary, resubmitted on a timely basis.
- (7) Control over Processing and Computer Data Files** - Controls are designed to provide reasonable assurance that:
 - (a) transactions including system generated transactions are properly processed by the computer.
 - (b) transaction are not lost, added duplicated or improperly changed.
 - (c) processing errors are identified and corrected on a timely basis.
- (8) Control over Output** - Designed to provide reasonable assurance that
 - (a) results of processing are accurate.
 - (b) access to output is restricted to authorised personnel.
 - (c) output is provided to appropriate authorised personnel on a timely basis.
- (9) Other Safeguards** - Other safeguards include:
 - (a) Offsite back-up of data and program.
 - (b) Recovery procedures for use in the event of theft, loss or intentional or accidental destruction.
 - (c) Provision of offsite processing in the event of disaster.

4.10 Auditing in a CIS Environment

Auditing in a computer Information System Environment emphasis that, the overall objective and scope of an audit do not change in a CIS environment. However, the use a computer changes the processing, storage, retrieval and communication of financial information and may affect the accounting and internal control systems employed by the entity.

The auditor should consider the effect of the factor like, (a) the extent of use of computers for preparing accounting information (c) efficacy of internal control over input, processing, analysis and reporting undertaken in the CIS installation and (c) the impact of computerisation on the audit trail that could otherwise be expected to exist in a manual system.

4.14 Advanced Auditing and Professional Ethics

The approach to auditing in a CIS environment provides for the following:

(1) Skill and Competence - An auditor should have sufficient knowledge of the computer information systems to plan, direct, supervise control and review the work performed. The sufficiency of knowledge would depend on the nature and extent of the CIS environment. The auditor should consider whether any specialized CIS skills are needed in the conduct of the audit. If the answer is in affirmative the auditor would seek the assistance of an expert possessing such skills.

(2) Planning - In regard to planning, the auditor should obtain an understanding of the significance and complexity of the CIS activities and the availability of the data for use in the audit.

The auditor should also obtain an understanding of the accounting and internal control system to plan the audit and to determine the nature, timing and the extent of the audit procedures.

Auditors understanding the process would include -

- (a) The computer information systems infrastructure (hardware, operating system (s) and application software used by the entity, including changes therein since last audit, if any).
 - (b) The significance and complexity of computerized processing in each significant accounting application, Significance relates to materiality of the financial statement assertions affected by the computerized processing.
 - (c) Determination of the organizational structure of the client; CIS activities and the extent of concentration or distribution of computer processing throughout the entity, particularly, as they may affect segregation of duties.
 - (d) The auditor needs to determine extent of availability of data by reference to source documents, computer files and other evidential matters. Computer information systems may generate reports that might be useful in performing substantive tests (particularly analytical procedures). The potential for use of CAATS may permit increased efficiency in the performance of audit procedures, or may enable the auditor to economically apply certain procedures to the entire population of transactions.
- (3) Risk** - When the computer information systems are significant the auditor should assess whether it may influence the assessment of inherent and control risks.

The nature of the risks and the ICS in CIS environment include the following:

- (a) **Lack of Transaction Trails** - Some computer information systems are designed so that a complete transaction trail that is useful for audit purposes might exist for only a short period of time or only in computer readable form. Where a complex application system performs a large number of processing steps, there may not be a complete trail. Accordingly errors embedded in an application's program logic may be difficult to detect on a timely basis by manual procedures.
- (b) **Uniform processing of Transactions** - Computer programs processing transactions uniformly, virtually eliminating the occurrence of clerical errors. However, if programming error exists all transactions will be processed incorrectly.

- (c) **Lack of Segregation of functions** - Many controls becomes concentrated in a CIS environment allowing data processing of incompatible functions.
- (d) **Potential for errors and Irregularities** - The potential for human error in the development, maintenance and execution of computer information systems may be greater than in manual systems, because of the level of detail inherent in these activities. Also, the potential for individuals to gain unauthorized access to data or to alter data without visible evidence may be greater in CIS environment than in manual systems.
- (e) **Initiation or Execution of Transactions** - In a CIS process certain types of transactions are triggered internally by the system, the authorization for which may not be documented as in manual system. In such cases, management; authorization of these transactions may be implicit.
- (f) **Dependence of Other Controls over Computer Processing** - Certain manual control procedures are dependent on computer generated reports and outputs for their effectiveness. In term, the effectiveness and consistency of transaction processing controls are dependent on the effectiveness of general computer information systems controls.
- (g) **Increased management Supervision** - Computer information can offer management a variety of analytical tools that can enhance the effectiveness of the entire internal control structure.
- (h) **Use of Computer - Assisted Audit Techniques** - The Auditor may apply general or specialized computer audit techniques and tools in the execution of audit tests.

While evaluating the reliability of the accounting and internal control systems, the auditor would consider whether these systems:

- (i) Ensure that authorized, correct and complete data is made available for processing;
- (ii) Provide for timely detection and correction of errors;
- (iii) Ensure that the case of interruption in the work of the CIS environment due to power, mechanical or processing failures, the system restarts without distorting the completion of the entries and records;
- (iv) Ensure that accuracy and completeness of output;
- (v) Provide adequate data security against fire and other calamities, wrong processing, frauds etc.;
- (vi) Prevent unauthorized amendments to the program;
- (vii) Provide for safe custody of source code of application software and data files.

(4) Risk Assessment - The auditor in accordance with SA 315 "Identifying and Assessing the Risks of Material Misstatement through Understanding the Entity and its Environment", should make an assessment of inherent and control risk for material financial statement assertions.

Risk may result from deficiencies in-

- (a) Program development and maintenance;

4.16 Advanced Auditing and Professional Ethics

- (b) System software support;
- (c) Operations;
- (d) Physical CIS security;
- (e) Control over access to specialized utility programs.

These deficiencies would tend to have a negative impact on all application systems that are processed through the computer.

Risk may also increase the potential for errors or fraudulent activities in-

- (a) Specific applications,
- (b) Specific data base or master files, or
- (c) Specific processing activities.

As new CIS technologies are emerging for data processing and Clients are adopting the same for building complex computer systems, these may increase risk which needs further consideration.

(5) Documentation - The Auditor should document the audit plan, the nature, timing and extent of audit procedures performed and the conclusions drawn from the evidence obtained. In an audit in CIS environment, some of the audit evidence may be in electronic form. The auditor should satisfy himself that such evidence is adequately and safely stored and is retrievable in its entirety as and when required.

4.11 Review of Checks and Controls in a CIS Environment

General controls in a CIS environment falls under the three basic control approaches as seen under manual system, i.e. Feedback, feed-forward and preventive control. Apart from the three - fold categorization computer based information system also required different controls, though the emphasis is on preventive controls, Controls are present over many aspects of the computer system and its surrounding social environment. They operate over data moving into, through and out of the computer to ensure correct, complete and reliable processing and storage. There are other controls present over staff, staff involvement with the computer and access to data. Further controls are effective at preventing deterioration or collapse of the entire computing function.

Erroneous data processing by a computer system is likely to be the result of incorrect data input. This is the major point at which the human interfaces with the machine and it is here where important controls are placed.

Review Process -

(1) Organization Structure / Control - CIS function in an organization need to be so organized that different groups are formed to perform different duties in a large CIS installation. Some of the typical function that must be performed by select group includes:

- (a) Data Administrator** - Generates the data requirements of the users of information system services: formulates data policies, plans the evaluation of the corporate data bases, maintains data documentation.

- (b) **Database Administrator** - Responsible for the operational efficiency of corporate database, assist users to use database better.
- (c) **System Analyst** - Manages information requirement for new and existing applications, designs information systems architectures to meet these requirements, facilitates implementation of information systems, writes procedures and users documentation.
- (d) **System Programmers** - Maintains and enhances operating systems software, network software, library software, and utility software, provides when unusual systems failure occurs.
- (e) **Application Programmer** - Designs programs to meet information requirements, codes, tests and debugs programs documents programs, modify program to remove errors, improve efficiency.
- (f) **Operation Specialist** - Plans and control day-to-day operations, monitors and improves operational efficiency along with capacity planning.
- (g) **Librarian** - Maintains library of magnetic media and documentation.

Auditors should be concerned about two matters:

- (i) Responsibilities of each job position must be clear; and incumbents must fully understand their duties, authority and responsibilities.
- (ii) The jobs performed within the information system function should maintain separation of duties to the extent possible. Without separation of duties, errors and irregularities might remain undetected.

(2) **Documentation Control** - Systems and programs as well as modifications, must be adequately documented and properly approved before being used: Documentation ordinarily assumes the following form:

- (a) A system flowchart;
- (b) A program flowchart;
- (c) Program change;
- (d) Operator instructions;
- (e) Program description (explaining the purpose for each part of the program).

Adequate documentation evidencing approval of changes minimises the probability of unauthorized system and program changes that could result in loss of control and decreased reliability of financial data.

(3) **Access Control** - Access controls are usually aimed at for preventing unauthorized access. The controls may seek to prevent persons who are authorised for access from accessing restricted data and program, as well as preventing unauthorized persons from gaining access to the system as a whole.

(a) **Segregation Controls**

- ◆ Access to program documentation should be limited to those persons who require it in the performance of their duties.

4.18 Advanced Auditing and Professional Ethics

- ◆ Access to data files and programs should be limited to those individuals authorized to process data.
 - ◆ Access to computer hardware should be limited to authorized individuals (e.g. Computer operators).
- (b) Limited Physical Access to the computer Facility**
- ◆ The physical facilities that hold the computer equipment, files and documentation should have controls to limit access only to authorized individuals.
 - ◆ Types of controls may include, (a) using a guard, (b) automated key cards, (c) manual key locks, (d) new access devices like, fingerprints, palm prints, or other biometric devices.
- (c) Visitor entry Logs** - Entry logs should be used to determine and document those who have had access to the area.
- (d) Hardware and Software access controls** - Access control software like 'user identification' may be used. User identification is a frequently used control and is a combination of a unique identification code and a confidential password.
- (e) Call back** - It is a specialized form of user identification in which the user dials the system, identifies him and is disconnected from the system. Then, either an individual manually finds the authorized telephone number or the system automatically finds the authorized telephone number of the individual and finally the user is called back.
- (f) Encryption** - In encryption data is encoded when stored in computer files / and or before transmission to or from remote locations. This coding protects data because to use the data unauthorized users must not only obtain access, but must also decrypt the data i.e., decode it from encoded form.
- (g) Computer Application Controls** - Programmed application controls apply to specific application rather than multiple applications.

These controls operate to assure the proper input and processing of data. The input step converts human readable data into computer readable form. All CIS applications are classified under 3 heads: Input, Processing and output.

(4) Input Controls - Input into the CIS system should be properly authorized and approved. The system should verify all significant data fields used to record information i.e., Should perform editing of the data. Conversion of data into machine readable form should be controlled and verified for accuracy.

For validation of input controls, the following procedure can be applied:

- (a) Pre-printed form** - All constant information be printed on a source document. For example, if only limited number of responses to a question is considered appropriate then preprint the responses and have the user tick or circle the correct responses deleting those that are inappropriate.
- (b) Check Digit** - Errors made in transcribing and keying data can have serious consequences. One control used to guard against these types of errors is a 'Check Digit'.

A Check Digit is a redundant digit (s) added to a code that enables the accuracy of other characters in the code to be checked. The check digit can act as a prefix or suffix character or it can be placed somewhere in the middle of the code. When the code is entered, a program recalculates the check digit to determine whether the entered check digit and the calculated check digit are the same. If they are the same, the code is most likely to be correct.

Calculation of Check Digit

A simple way is to add the digits in a number and assign the result as a suffix.

Example: The number is 2148 the check digit is

$2+1+4+8=15$ i.e., 5 (dropping tens digit). The code is 21485

However, this does not protect transposition error, like 2814. The incorrect code will still produce the correct check digit.

This problem can be overcome by Module -11 test. The Calculation steps are as under:

- The desired number = 2148.
- Make weighed average = $2 \times 5 + 1 \times 4 + 4 \times 3 + 8 \times 2 = 42$
- Divide by Modules 11 = $42/11$ -3 with remainder 9
- Subtract the remainder from the modules = $11-9 = 2$ (check digit)
- Check digit is added as a suffix = 21482.

The check digit can be recalculated for verification as under:

- The encoded number = 21482
- Weighted average = $(2 \times 1) + (8 \times 2) + (4 \times 3) + (1 \times 4) + (2 \times 5) = 44$.
- Division by the modules = $44/11 = 4$ with no remainder.

If the remainder is zero, there is a high probability that the code is correct.

- (c) **Completeness Totals** - To input data erroneously is one type error. To leave out or lose data completely is another type of error against which controls are provided.
- (i) **Batch Control Totals** - The transactions are collected together in batches of say, 50 transactions. A total of all the data value of some important field is made. For example, if a batch of invoices is to be imputed a total of all the invoices amounts might be calculated manually. The control total is then compared with a computer generated control total, after input of batch transaction. A difference indicates either a lost transaction or the input of an incorrect invoice total. The method is not fool proof as compensating errors is possible.
 - (ii) **Batch Hash Total** - The idea is similar to control totals except that Hash totals are meaningless totals prepared purely for control purposes. The total of all customer account numbers in a batch is meaningless but may be used for control by comparing it with computer generated hash totals.
 - (iii) **Batch Record Totals** - Account is taken of the number of transactions and this is compared with the record count produced by the computer at the end of the batch.

4.20 Advanced Auditing and Professional Ethics

- (iv) **Sequence Checks** - Documents may be pre-numbered sequentially before entry and at a later stage the computer will perform a sequence check and display any missing number.
- (d) **Reasonableness Checks** - These are sophisticated forms of limit checks. An example might be a check on an electricity meter reading. The check might consist of subtracting the last reading recorded from the current reading and comparing this with the average usage for that quarter. If the reading differs by a given percentage then it is investigated before processing.
- (e) **Field Checks** - The following types of field checks may be applied:
 - (i) **Missing data / blank** - Is there any missing data in the field? If a code should contain 2 hyphens, though they might be in a variable position, can only one be detected? Does the field contain blanks when data always should be present?
 - (ii) **Alphabetic / Numeric** - Does a field that should contain only alphabetic or numeric contain alphanumeric characters?
 - (iii) **Range** - Does the data for a field fall within its allowable value range?
 - (iv) **Master Reference** - If the master file can be referenced at the same time input data is read, is there a master file match for the key field?
 - (v) **Size** - If variable - length fields are used and a set of permissible sizes is defined does the field delimiter show the field to be one of these valid sizes?
 - (vi) **Format Mask** - Data entered into a field might have to conform to a particular format, like 'yy mm dd'.
- (f) **Record Checks** - The following types of record checks can be applied:
 - (i) **Reasonableness** - Even though a field value might pass a range check, the contents of another field might determine what is a reasonable value for the field.
 - (ii) **Valid-Sign-Numeric** - The content of one field might determine which sign is valid for a numeric field.
 - (iii) **Size** - If Variable - length records are used, the size of the record is a function of the sizes of the variable length fields or the sizes of fields that optionally might be omitted from the record. The permissible size of the fixed and variable - length records also might depend on a field indicating the record type.
- (g) **File Checks** - In file checks, validation control examines whether the characteristics of a file used during data entry are matching with the stated characteristics of the file. For example if auditors validate some of the characteristic of data that is keyed into an application system against a master file, they can check whether they are using the latest version of the master file.
- (5) **Processing Controls** - When input has been accepted by the computer, it usually is processed through multiple steps. Processing controls are essential to ensure the integrity of data. Almost all of the controls mentioned under input may also be incorporated during processing stage.

Processing validation checks primarily ensure that computation performed on numeric fields are authorized, accurate, and complete. The following validation checks may be indicated in this regard.

- (i) **Overflow** - Overflow can occur if a field used for computation is not initiated to zero at start. Some error in computation occurs, or unexpected high values occur.
- (ii) **Range** - An allowable value range can apply to a field.
- (iii) **Sign Test** - The contents of one record type field might determine which sign is valid for a numeric field.
- (iv) **Cross – Footing** - Separate control totals can be developed for related fields and cross footed at the end of a run.
- (v) **Run-to-Run Control** - In a tape based system, the processing of transaction file may involve several runs, for instance, a tape based order processing system might have a transaction tape that is used to update first a inventory master file, then a sales ledger followed by a general ledger, various control totals may be passed from one run to the next as a check on completeness of processing.
- (6) **Recording Control** - Recording controls enable records to be kept free of errors and transactions details that are input into the system.
 - (a) **Error Log** - This is particularly important in batch entry and batch processing system. Many of the accuracy checks can only be carried to during run time processing. It is important that a detected error does not bring the run to a halt, on discovery, the erroneous transaction is written to a error log file, which is examined at the end of processing. The errors can then be corrected or investigated with the relevant department before being input and processed.
 - (b) **Transaction Log** - The transaction log provides a record of all transactions entered into the system as well as storing transaction details such as the transaction reference number, the date, the account number, the type of transaction the amount and the debit and credit references. The transaction will be "Stamped" with details of input. These typically include input time, input date, input day, terminal number and user number. It is used for multi-access main frame systems accounting transactions. The transaction log can form the basis of an audit trail and may be printed out for investigation during an audit.
- (7) **Storage Control** - These controls ensure the accurate and continuing and reliable storage of data. Data is a vital resource for an organization and is the heart of CIS activities. Special care must be taken to ensure the integrity of the database or file system. The controls are particularly accidental erasure of files and the precision of back-up and recovery facilities.

The following checks may be considered:

- (a) **Physical Protection against Erasure** - Magnetic tape files have rings that may be inserted if the files are to be written or erased. Read only files have the ring removed. The controls in respect of floppy disks have a plastic lever, which is switched for read only purposes.

- (b) **External Label** - These are attached to tape reels or disk packs to identify the contents.
- (c) **Magnetic Labels** - These consists of magnetic machine readable information encoded on the storage medium identifying its contents. File header labels appear at the start of a file and identify the file by name, give the date of last update and other information. This is checked by software prior to file up dating. Trailer labels at the end of files often contain controls that are checked against those calculated during file processing.
- (d) **File Back-up Routines** - Copies are held of important files for security purposes. As the process of providing back-up often involves a computer operation in which one file is used to produce another, a fault in this process would have disastrous results; if both the master and the back-up were lost.
- (e) **Database Back-up routines** - The contents of a data base held on a direct access storage device (DASD) such as magnetic disk are periodically dumped on to a back-up file. The back-up is usually a tape which is then stored together with the transaction log tape of all transactions occurring between the last and the current dump. If a fault in database, such as disk crash, happens afterwards the state of the data base can be recreated using the dumped data base tape, the stored transaction and the current log of transactions occurring between the dump and the crash point.
- (f) **Cryptographic Storage** - Data is commonly written to files in a way that uses standard coding like ASCII or EBCDIC. It can be interpreted easily by unauthorized reader gaining access to the file. If the data is confidential or sensitive then it may be scrambled prior to storage and described on reading.

The security process involves the conversion of the plain text message or data into cipher text by the use of an encryption algorithm and an encryption key. The opposite process uses a description key to reproduce the plain text or message. If the encryption and decryption key are identical the entire procedure is called Symmetric Cryptograph, otherwise, it is known as asymmetric cryptograph.

(8) **Output Control** - Output control ensures that the results of data processing are accurate, complete and are directed to authorize recipient. The auditor should examine whether audit trail relating to output was provided and the date and time when the output was so provided. This would enable the auditor to identify the consequences of any errors discovered in the output.

4.12 Computer Assisted Audit Techniques (CAATS)

The overall objectives and scope of an audit do not change when an audit is conducted in a Computer Information Systems (CIS) environment. The application of auditing procedures may, however, require the auditor to consider techniques known as Computer Assisted Audit Techniques (CAATs) that use the computer as an audit tool for enhancing the effectiveness and efficiency of audit procedures. CAATs are computer programs and data that the auditor uses as part of the audit procedures to process data of audit significance, contained in an entity's information systems.

Uses of CAATs - CAATs may be used in performing various auditing procedures, including the following:

- ◆ tests of details of transactions and balances, for example, the use of audit software for recalculating interest or the extraction of invoices over a certain value from computer records;
- ◆ analytical procedures, for example, identifying inconsistencies or significant fluctuations;
- ◆ tests of general controls, for example, testing the set-up or configuration of the operating system or access procedures to the program libraries or by using code comparison software to check that the version of the program in use is the version approved by management;
- ◆ sampling programs to extract data for audit testing;
- ◆ tests of application controls, for example, testing the functioning of a programmed control; and
- ◆ reperforming calculations performed by the entity's accounting systems.

Audit Software - CAATs allow the auditor to give access to data without dependence on the client, test the reliability of client software, and perform audit tests more efficiently. CAATs may consist of package programs, purpose-written programs, utility programs or system management program. A brief description of the programs commonly used is given below:

- ◆ Package Programs are generalized computer programs designed to perform data processing functions, such as reading data, selecting and analyzing information, performing calculations, creating data files and reporting in a format specified by the auditor.
- ◆ Purpose-Written Programs perform audit tasks in specific circumstances. These programs may be developed by the auditor, the entity being audited or an outside programmer hired by the auditor. In some cases, the auditor may use an entity's existing programs in their original or modified state because it may be more efficient than developing independent programs.
- ◆ Utility Programs are used by an entity to perform common data processing functions, such as sorting, creating and printing files. These programs are generally not designed for audit purposes, and therefore may not contain features such as automatic record counts or control totals.
- ◆ System Management Programs are enhanced productivity tools that are typically part of a sophisticated operating systems environment, for example, data retrieval software or code comparison software. As with utility programs these tools are not specifically designed for auditing use and their use requires additional care.

Considerations in the Use of CAATs - When planning an audit, the auditor may consider an appropriate combination of manual and computer assisted audit techniques. In determining whether to use CAATs, the factors to consider include:

- ◆ the IT knowledge, expertise and experience of the audit team;
- ◆ the availability of CAATs and suitable computer facilities and data;
- ◆ the impracticability of manual tests;
- ◆ effectiveness and efficiency; and

4.24 Advanced Auditing and Professional Ethics

- ◆ time constraints.

Before using CAATs the auditor considers the controls incorporated in the design of the entity's computer systems to which CAAT would be applied in order to determine whether, and if so, how, CAATs should be used.

It Knowledge, Expertise And Experience of The Audit Team: Auditing in a computer information systems environment deals with the level of skill and competence the audit team needs to conduct an audit in a cis environment. It provides guidance when an auditor delegates work to assistants with CIS skills or when the auditor uses work performed by other auditors or experts with such skills. Specifically, the audit team should have sufficient knowledge to plan, execute and use the results of the particular CAAT adopted. The level of knowledge required depends on "availability of CAATs" and "suitable computer facilities".

Availability of CAATS and Suitable Computer Facilities - The auditor considers the availability of CAATs, suitable computer facilities and the necessary computer-based information systems and data. The auditor may plan to use other computer facilities when the use of CAATs on an entity's computer is uneconomical or impractical, for example, because of an incompatibility between the auditor's package program and entity's computer. Additionally, the auditor may elect to use their own facilities, such as pcs or laptops. The cooperation of the entity's personnel may be required to provide processing facilities at a convenient time, to assist with activities such as loading and running of CAAT on the entity's system, and to provide copies of data files in the format required by the auditor.

- ◆ **Impracticability of Manual Tests -** Some audit procedures may not be possible to perform manually because they rely on complex processing (for example, advanced statistical analysis) or involve amounts of data that would overwhelm any manual procedure. In addition, many computer information systems perform tasks for which no hard copy evidence is available and, therefore, it may be impracticable for the auditor to perform tests manually. The lack of hard copy evidence may occur at different stages in the business cycle.

Effectiveness and Efficiency - The effectiveness and efficiency of auditing procedures may be improved by using CAATs to obtain and evaluate audit evidence. CAATs are often an efficient means of testing a large number of transactions or controls over large populations by:

- ◆ analyzing and selecting samples from a large volume of transactions;
- ◆ applying analytical procedures; and
- ◆ performing substantive procedures.

Matters relating to efficiency that an auditor might consider include:

- ◆ the time taken to plan, design, execute and evaluate CAAT;
- ◆ technical review and assistance hours;
- ◆ designing and printing of forms (for example, confirmations); and
- ◆ availability of computer resources.

In evaluating the effectiveness and efficiency of CAAT, the auditor considers the continuing use of CAAT application. The initial planning, design and development of CAAT will usually benefit audits in subsequent periods.

Time Constraints

Certain data, such as transaction details, are often kept for a short time and may not be available in machine-readable form by the time auditor wants them. Thus, the auditor will need to make arrangements for the retention of data required, or may need to alter the timing of the work that requires such data.

Where the time available to perform an audit is limited, the auditor may plan to use CAAT because its use will meet the auditor's time requirement better than other possible procedures.

Using CAATs - The major steps to be undertaken by the auditor in the application of CAAT are to:

- (a) set the objective of CAAT application;
- (b) determine the content and accessibility of the entity's files;
- (c) identify the specific files or databases to be examined;
- (d) understand the relationship between the data tables where a database is to be examined;
- (e) define the specific tests or procedures and related transactions and balances affected;
- (f) define the output requirements;
- (g) arrange with the user and IT departments, if appropriate, for copies of the relevant files or database tables to be made at the appropriate cut off date and time;
- (h) identify the personnel who may participate in the design and application of CAAT;
- (i) refine the estimates of costs and benefits;
- (j) ensure that the use of CAAT is properly controlled;
- (k) arrange the administrative activities, including the necessary skills and computer facilities;
- (l) reconcile data to be used for CAAT with the accounting and other records;
- (m) execute CAAT application;
- (n) evaluate the results;
- (o) document CAATs to be used including objectives, high level flowcharts and run instructions; and
- (p) assess the effect of changes to the programs/system on the use of CAAT.

Testing CAAT - The auditor should obtain reasonable assurance of the integrity, reliability, usefulness, and security of CAAT through appropriate planning, design, testing, processing and review of documentation. This should be done before reliance is placed upon CAAT. The nature, timing and extent of testing are dependent on the commercial availability and stability of CAAT.

Controlling CAAT Application - The specific procedures necessary to control the use of CAAT depend on the particular application. In establishing control, the auditor considers the need to:

4.26 Advanced Auditing and Professional Ethics

- (a) approve specifications and conduct a review of the work to be performed by CAAT;
- (b) review the entity's general controls that may contribute to the integrity of CAAT, for example, controls over program changes and access to computer files. When such controls cannot be relied on to ensure the integrity of CAAT, the auditor may consider processing CAAT application at another suitable computer facility; and
- (c) ensure appropriate integration of the output by the auditor into the audit process.

Procedures carried out by the auditor to control CAATs applications may include:

- (a) participating in the design and testing of CAAT;
- (b) checking, if applicable, the coding of the program to ensure that it conforms with the detailed program specifications;
- (c) asking the entity's staff to review the operating system instructions to ensure that the software will run in the entity's computer installation;
- (d) running the audit software on small test files before running it on the main data files;
- (e) checking whether the correct files were used, for example, by checking external evidence, such as control totals maintained by the user, and that those files were complete;
- (f) obtaining evidence that the audit software functioned as planned, for example, by reviewing output and control information; and
- (g) establishing appropriate security measures to safeguard the integrity and confidentiality of the data.

When the auditor intends to perform audit procedures concurrently with online processing, the auditor reviews those procedures with appropriate client personnel and obtains approval before conducting the tests to help avoid the inadvertent corruption of client records.

To ensure appropriate control procedures, the presence of the auditor is not necessarily required at the computer facility during the running of CAAT. It may, however, provide practical advantages, such as being able to control distribution of the output and ensuring the timely correction of errors, for example, if the wrong input file were to be used.

Special Audit Techniques

5.1 Introduction

Normally, an audit programme specifies the techniques to be employed in the specific case by relating the techniques to the respective areas of accounting. Chapter 3 of the Intermediate (IPC) Course Study Material contains various techniques generally employed for auditing the books of account. For example, the techniques of posting, checking and casting all related to the subsidiary books of account and the principal books of account. Vouching will be in respect of all the transactions whether appearing in the cash book or in any journal. The confirmation technique is appropriate in relation to personal accounts balances, bank balances or securities lodged with others. In this Chapter, we shall deal with some of these techniques in greater detail.

5.1.1 Confirmation

It is a method of collecting audit evidence which consists of the response to an inquiry to corroborate information contained in the accounting records. It may be interesting to note that the AICPA included direct confirmation of sundry debtors in its Auditing Standards after the decision of Mckesson and Robbins. Same procedure is applicable in case of creditors as well. For example, the auditor requests confirmation of receivable by direct communication with debtors. The Guidance Note on Audit of Sundry Debtors, Loans and Advances issued by the Institute of Chartered Accountants of India has recommended that balances outstanding against debtors and as loan and advances should be confirmed by a procedure of communication with the parties. The Guidance Note provides the following:

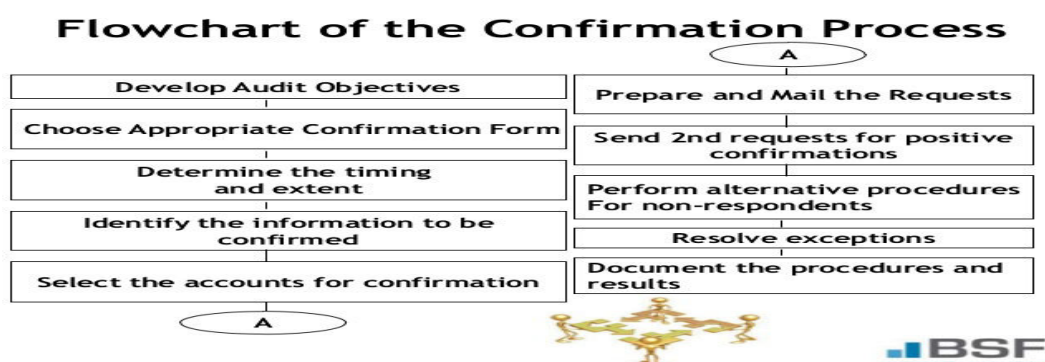

Fig.: Confirmation Process*

* Source : SlideShare

5.2 Advanced Auditing and Professional Ethics

The checking of the debtors' ledger balances does not merely involve a comparison of the balances in the ledger with those shown in the schedule. Each account should be scrutinised in order to do the 'aging' of the debtors. The debtors' schedule should have appropriate columns to indicate the period over which each account is outstanding. The auditors must not assume that any balance which is confirmed is necessarily realisable. Where debts are written off, the auditor should satisfy himself whether the write off was based on appropriate considerations of the relevant facts. Debts often include claims made against insurance companies, shipping companies, railways, etc. and the auditor should ascertain that the claims are realisable. Correspondence should be seen in all major cases in order to ascertain whether the claims have been acknowledged and whether there is a reasonable possibility of their being realised. If it appears that they are not collectible, they should be shown as doubtful. These recommendations can be applied to creditors as well. Based on the above recommendations an outline of a confirmation procedure may be as under:

1. The confirmatory letters should be sent out within a period of 15 to 21 days of the end of the year, even when the audit is taken up much later in respect of balances either as at the date of the Balance Sheet or as at another selected date before the close of the year.
2. If the number of balances is large, letters may be issued only in respect of major debtors and creditors, selected according to some system. Having selected the accounts, the balances wherein are to be confirmed, the client should be requested to prepare statements of account showing the position of the balances as at the date of confirmation. A nil balance account should also be included.
3. The statements of account prepared by the client should be compared by the auditor with the balances of debtors and creditors. Therefore, he should maintain control over them until they are posted.
4. Either each statement of account should contain a request for confirmation of the balance shown therein or it should be forwarded with a separate letter by the auditor or the client, as may have been mutually agreed upon. The letter or the statement should show the address of the auditor to which the statements of account after the confirmation are to be returned. A stamped envelope containing the auditor's name and address should be enclosed.
5. Letters or statements should be posted under the supervision of the auditor.
6. In cases where replies are not received within a reasonable time, a reminder should be sent out by the auditor. Letters received back undelivered should be sent again at the correct address.
7. On receipt of replies from the parties, it should be verified that either the balances have been confirmed or the amounts confirmed can be satisfactorily reconciled with the balances shown by the books of account of the client. The client should be requested to prepare reconciliation statements where necessary.
8. In every case, where a reconciliation statement has been prepared, it should be verified that the difference in the amount confirmed and that shown by the books of account is not the result of an omission to credit any amount received from the party or failure to debit

him with any amount of sales or to credit him with the value of goods received with a view to suppressing or inflating profit.

9. If the difference is the result of some dispute or claim for allowance or return, etc. not afforded to a party, it should be confirmed that there exists a provision equal to the difference which ultimately may have to be credited to him.

Direct confirmation procedure may be performed both for sundry creditors and sundry debtors. Special precautions in respect of creditors to be taken are as under:

- (i) The Creditors' ledger trial balance should be extracted by the client and agreed with the Control Account, if any, before balances are selected for confirmation.
- (ii) The provision made for the amount payable in respect of goods received within the last week of the close of the year should be verified by comparing entries in the Goods Inward Register with the Purchase Journal.
- (iii) A certificate should be obtained from the client that all the liabilities which have accrued up to the date of the Balance Sheet have been taken into account.

Special precautions in respect of sundry debtors to be taken are as under:

- (i) The Debtors' ledger trial balance should be extracted by the client and agreed with the Control Account, if any, before balances are selected for confirmation.
- (ii) The adjustment of sales made at the close of the year should be verified by comparing the entries in the Goods Outward Register for two weeks before the close of the year with these in the Sales Journal.
- (iii) The accounts to be verified by direct confirmation should be settled on the basis of internal control procedures.

5.1.2 Inquiry

SA 500 mentions inquiry as one of the methods of collecting audit evidence by seeking appropriate information from knowledgeable persons inside or outside the entity. Inquiries may range from formal written inquiries addressed to third parties to informal oral inquiries addressed to persons inside the entity. Responses to inquiries may provide the auditor with information which he did not previously possess or may not provide him with corroborative evidence. The need for inquiry may arise at every stage of auditing. Wherever any transaction or entry is not readily understandable or its effects are not readily apparent, the auditor should not hesitate to make enquiry from the appropriate official of the client. Apart from this, students should remember that the auditor of a company has to make a statement in his report on whether he has obtained all the information and explanations that he considered necessary for his audit. This requirement suggests that inquiry is one of the processes of the whole scheme of auditing and, accordingly, the Companies Act, 2013 has given certain powers to the auditor in Section 143(1). Besides, Section 143(1) of the Companies Act, 2013 casts upon the auditor a specific duty to inquire into certain specified transactions. How the auditor is expected to perform the duty of enquiry as contained in Section 143(1) is given in Chapter 8 "Audit Report".

5.4 Advanced Auditing and Professional Ethics

5.1.3 Observation

According to SA 500, Observation consists of looking at a process or procedure being performed by others, for example, the auditor's observation of inventory counting by the entity's personnel, or of the performance of control activities. Observation provides audit evidence about the performance of a process or procedure, but is limited to the point in time at which the observation takes place, and by the fact that the act of being observed may affect how the process or procedure is performed.

5.1.4 Analytical Review Procedures

Analytical review procedures may be defined as substantive tests of financial information made by a study of comparisons and relationship among data.

Fig.: Analytical Review Procedures*

Analytical procedures include the consideration of comparisons of the entity's financial information with, for example:

- Comparable information for prior periods.
- Anticipated results of the entity, such as budgets or forecasts, or expectations of the auditor, such as an estimation of depreciation.
- Similar industry information, such as a comparison of the entity's ratio of sales to accounts receivable with industry averages or with other entities of comparable size in the same industry.

Analytical procedures also include consideration of relationships, for example:

- Among elements of financial information that would be expected to conform to a predictable pattern based on the entity's experience, such as gross margin percentages.
- Between financial information and relevant non-financial information, such as payroll costs to number of employees.

Various methods may be used to perform analytical procedures. These methods range from performing simple comparisons to performing complex analyses using advanced statistical techniques. Analytical procedures may be applied to consolidated financial statements,

* Source : *Small Business - Houston Chronicle*

components and individual elements of information.

Essentially these procedures ensure that the various items making up the financial statements are consistent with:

- (a) Each other (for example, the relationship between debtors and sales, or current assets and current liabilities).
- (b) Known trends.
- (c) The auditor's knowledge of the business.

The auditor should ask the following questions:

- (a) What data, ratios and statistics exist which are of significance for the business?
- (b) What should they be compared with (i.e., what yard-stick)?
- (c) Are there any variations between (a) and (b) which the auditors would expect to occur?

The following table summarizes the position:

Types of data, ratios etc.	Comparison with
Financial data (e.g., items in annual statements, management accounts, budgets, etc.)	(i) Corresponding previous period. (ii) Budgets and forecasts (if available).
Non-financial data (e.g., production and employment statistics)	(i) Entries in accounting records. (ii) Other financial data.
Ratios and percentages (developed from financial and non-financial data; for example inventory turnover ratio)	(i) Preceding period. (ii) Budgets and forecasts. (iii) Industry Statistics.

Analytical procedures are used for the following purposes:

- (a) To assist the auditor in planning the nature, timing and extent of other auditing procedures.
- (b) As a substantive test to obtain evidential matter about particular assertions related to account balances or classes of transactions.
- (c) As an overall review of the financial information in the final review stage of the audit.

Analytical procedures should be applied to some extent for the purposes referred to in (a) and (c) above for all audits of financial statements. In addition, in some cases, analytical procedures can be more effective or efficient than tests of details in reducing detection risk for specific financial statement assertions.

Analytical procedures in planning the audit – In the planning stage, analytical procedures assist the auditor in understanding the client's business and in identifying areas of potential risk by indicating aspects of and developments in the entity's business of which he was previously unaware. This information will assist the auditor in determining the nature, timing and extent of his other audit procedures. Analytical procedures in planning the audit use both financial data and non-financial information, such as number of employees, square feet of selling space, volume of goods produced and similar information.

5.6 Advanced Auditing and Professional Ethics

Analytical procedures used as substantive tests – When designing and performing substantive analytical procedures, either alone or in combination with tests of details, as substantive procedures in accordance with SA 330¹, the auditor shall:

- (a) Determine the suitability of particular substantive analytical procedures for given assertions, taking account of the assessed risks of material misstatement and tests of details, if any, for these assertions;
- (b) Evaluate the reliability of data from which the auditor's expectation of recorded amounts or ratios is developed, taking account of source, comparability, and nature and relevance of information available, and controls over preparation;
- (c) Develop an expectation of recorded amounts or ratios and evaluate whether the expectation is sufficiently precise to identify a misstatement that, individually or when aggregated with other misstatements, may cause the financial statements to be materially misstated; and
- (d) Determine the amount of any difference of recorded amounts from expected values that is acceptable without further investigation.

Matters relevant to the auditor's evaluation of whether the expectation can be developed sufficiently precisely to identify a misstatement that, when aggregated with other misstatements, may cause the financial statements to be materially misstated, include:

- The accuracy with which the expected results of substantive analytical procedures can be predicted. For example, the auditor may expect greater consistency in comparing gross profit margins from one period to another than in comparing discretionary expenses, such as research or advertising.
- The degree to which information can be disaggregated. For example, substantive analytical procedures may be more effective when applied to financial information on individual sections of an operation or to financial statements of components of a diversified entity, than when applied to the financial statements of the entity as a whole.
- The availability of the information, both financial and non-financial. For example, the auditor may consider whether financial information, such as budgets or forecasts, and non-financial information, such as the number of units produced or sold, is available to design substantive analytical procedures. If the information is available, the auditor may also consider the reliability of the information.

Extent of reliance on analytical procedures – The reliability of data is influenced by its source and nature and is dependent on the circumstances under which it is obtained. Accordingly, the following are relevant when determining whether data is reliable for purposes of designing substantive analytical procedures:

- (a) Source of the information available. For example, information may be more reliable when it is obtained from independent sources outside the entity²;

¹ SA 330, paragraph 20.

² SA 500 (Revised), "Audit Evidence", paragraph A31.

- (b) Comparability of the information available. For example, broad industry data may need to be supplemented to be comparable to that of an entity that produces and sells specialised products;
- (c) Nature and relevance of the information available. For example, whether budgets have been established as results to be expected rather than as goals to be achieved; and
- (d) Controls over the preparation of the information that are designed to ensure its completeness, accuracy and validity. For example, controls over the preparation, review and maintenance of budgets.

The auditor may consider testing the operating effectiveness of controls, if any, over the entity's preparation of information used by the auditor in performing substantive analytical procedures in response to assessed risks. When such controls are effective, the auditor generally has greater confidence in the reliability of the information and, therefore, in the results of analytical procedures. The operating effectiveness of controls over non-financial information may often be tested in conjunction with other tests of controls. For example, in establishing controls over the processing of sales invoices, an entity may include controls over the recording of unit sales. In these circumstances, the auditor may test the operating effectiveness of controls over the recording of unit sales in conjunction with tests of the operating effectiveness of controls over the processing of sales invoices. Alternatively, the auditor may consider whether the information was subjected to audit testing. SA 500 (Revised) establishes requirements and provides guidance in determining the audit procedures to be performed on the information to be used for substantive analytical procedures³.

Analytical Procedures that Assist When Forming an Overall Conclusion – The conclusions drawn from the results of analytical procedures designed and performed in accordance with paragraph 6 are intended to corroborate conclusions formed during the audit of individual components or elements of the financial statements. This assists the auditor to draw reasonable conclusions on which to base the auditor's opinion.

The results of such analytical procedures may identify a previously unrecognised risk of material misstatement. In such circumstances, SA 315 requires the auditor to revise the auditor's assessment of the risks of material misstatement and modify the further planned audit procedures accordingly⁴.

The analytical procedures performed in accordance with paragraph 6 of "SA 520 Analytical Procedure" may be similar to those that would be used as risk assessment procedures.

This technique has been discussed at the Intermediate (IPC) level. However, in view of importance of this technique in the context of growing complexities, diversities and volumes of business, it requires a more detailed treatment in the specific area of ratio analysis and related matters. It should be appreciated that an audit programme will be realistic only after the auditor has modified in the light of his experience of the changes and of the state of internal controls operating in the organisation. If the auditor can perceive some of the imperatives under which

³ SA 500 (Revised), paragraph 10.

⁴ SA 315, paragraph 30.

5.8 Advanced Auditing and Professional Ethics

the management operates and the relationship of the business with the economy and environment, he would be able to make the audit programme far more objective. Conflict of interests, inflation, inter-company relations, scarcity conditions, captive market, control by the State, etc. are some of the forces that condition a company's working and management approach to a large extent.

The auditor normally performs an audit by placing reliance on the internal control system. A company's control system may provide for a maximum holding of a particular raw material but if the raw material is a controlled commodity and the supply is irregular, it is obvious that the internal control rule about the maximum or minimum holding of the raw material is of no use to the management which is concerned with the running of the business. As and when the company is allotted a quota or permit for that material irrespective of any consideration, the management will avail of the same. Besides the management will not mind even to procure such material from the open market at a price different from the controlled price, if the materials are needed. For goods to be imported it is often the practice to ask for and obtain an import license for a quantity far larger than is reasonably needed simply to avoid the procedural red tape involved in obtaining a license. Internal control systems, howsoever good, will be of no use in such cases.

It should also be understood that significant non-routine transactions are entered into sometimes in complete disregard of the laid down rules of control. The internal control system may be good as far as the transactions that have been recorded. But if certain transactions are omitted altogether, the internal control system may not be in a position to reveal anything about them. An auditor should always bear in mind these limitations of the control system. These limitations have made it even more important for the auditor to supplement his routine audit programme, by overall tests which are based on judgment of what is reasonable. Ratio analysis is an audit approach that helps the auditor to make an overall assessment of the data by reference to attendant factors.

Relevance of Ratio and Trend Analysis – Ratio analysis is an important supplement to the audit process which has the merit of bringing to focus the abnormalities, deviations and unexpected variations. A ratio measures the relative magnitude of two related factors. It does not have any significance of its own except to provide material for further analysis, interpretation and conclusion. It is a means to objectively assess or diagnose the financial health of a business. The auditor can take a broad view of the data under audit by adopting ratio analysis. He can assess whether the data is reasonable, valid and consistent. Through the process of ratio analysis, any abnormal relationship between two related matters is most likely to be disclosed. It, however, presupposes certain amount of knowledge on the part of the auditor about what should be the reasonable relationship. This may be acquired by the auditor from his knowledge and experience gained elsewhere or from the knowledge of the past relationships. In addition, if there exists certain known relationship, the matter becomes simpler. For example, if the rate of Provident Fund contribution is 10% of the basic pay and dearness allowance, either set of the data can be proved by the other having regard to the given relationship. If the auditor finds the Provident Fund contribution to be of the order of say 6% of the total of basic pay after dearness allowance, this immediately alerts him that some abnormal feature exists, though he should not hasten to the conclusion that it is an error. There may be circumstances, e.g., newly appointed employees are not entitled to the Provident Fund benefit for certain period or there

may be some retired persons re-employed who are not entitled to any provident fund benefit.

Therefore, it may be said that ratio analysis makes it possible for the auditor to locate problem areas which can thereafter be subjected to scrutiny for confirming that the problem really exists or it is manifestation of some real abnormality that business has experienced during the period covered by the audit. This may help also in forestalling an approaching danger before it has done much damage. It is felt that if, at the audit planning stage, the data are subjected to ratio analysis; the auditor would be in a position to plan his audit programme more purposefully. He will be able to devote an appropriate amount of time and effort in areas where abnormalities have been detected. The analysis of ratios and relationships has two phases:

1. The determination and measurement of changes and inter-relationships in data.
2. The scrutiny, explanation and evaluation of the changes and their significance in light of the circumstances.

It has been stated earlier that data must be inter-related for any effective ratio analysis. Apart from this, certain businesses have their own features. A business with high sales volume at a low margin of profit is expected to have a high inventory turnover ratio. If the ratio is low, it will be a pointer for further probe. Similarly, a business offering cash discount for prompt settlement of accounts will have a high debtors' turnover ratio. A business dealing with a widely needed scarce material will in most cases have customer's advances against supply rather than any debtors' balances. On the other hand, in a business where Government is the principal buyer, it is the general nature that the margin of profit is high and the debtors outstanding quite large. For the auditor to properly understand the implications of ratios, such background knowledge is essential.

Also, the auditor is expected to possess the knowledge of normal relationship between related variables in the business he is auditing so that he can discern deviation from the normal and assess significant variation in the relationship. This knowledge can be derived from either a comparison with the concerned business's past corresponding data or by reference to readymade data available about the industry from some official source or by comparing the data with the corresponding data found in another company engaged in the same line of industry in similar circumstances.

The external data are generally considered to be objective and independent in character. These, however, should be used with discretion. The basis and method of compilation, the period covered and the source and author of the data are some of the considerations needed before they are used for comparisons. In India, the Reserve Bank of India Bulletin, the Bombay Stock Exchange Directory, the Calcutta Stock Exchange Directory, Kothari's Economic and Industrial Guide are some of the publications that contain reliable financial information about companies, individually or as a class. However, they should not be considered as a readymade material for comparison because the manner of compilation, the circumstances, etc., may be dissimilar. Subject to review of these data for adjustment these may be used for comparison.

Most of the ratios known to us from our study of Advanced Accounting can be used by the auditor in evaluating different aspects of the financial health of a concern. However, the auditor should be experienced and skillful enough to know what ratio is appropriate for his purpose,

5.10 Advanced Auditing and Professional Ethics

what they would reveal and how to relate matters; also, what can be expected as a result of particular ratio. For example, to know whether the concern's cost of sales bears the normal relation to sales, the auditor may compute gross profit ratio. Now if the gross profit ratio shows any abnormality, depending upon the abnormality, further inference may be drawn for verification and confirmation. If the gross profit ratio is higher than normal, the possibilities that immediately should strike one are: (i) sales overstated, (ii) stock overstated or over valued, (iii) purchases understated, (iv) wages and other costs understated, etc. Now the auditor, having localised the problem areas, can check them extensively to find out whether the doubts are true or certain abnormal situations did prevail that accounts for the distortion. It is also natural for the auditor to expect the ratio of gross profit to net profit to be up in such circumstances unless explained by other abnormal factors working in the opposite direction. For example, the selling and distribution cost or interest on borrowings might have gone up significantly to eat up the excess margin of gross profit. Take another example: suppose the turnover ratio (Sales/Capital) shows a considerable improvement over the last year and there is no concurrent increase in the solvency or liquidity ratios. The auditor should inquire why it is so. It is quite possible that the company has evolved a better system of financial management. It is also possible that (i) sales have been inflated or (ii) the credit policy was defective to result into huge accumulation of debtors or (iii) there had been defalcation of sales proceeds. There are certain quantitative ratios which may be particularly helpful to the auditor, e.g., the ratio between the main raw material consumed to total production may prove both the figures. Auditors can use a number of other quantitative ratios like ratio of man hours to production to verify the accuracy of figures in the Profit and Loss Account and the Balance Sheet. It would thus be seen that by working out ratios, the auditor can identify areas where detailed enquiries are called for. Like a physician, he examines symptoms, analyses them and works out a diagnosis. Such a procedure may prove immensely helpful when used as a supplementing technique to the normal vouch and post audit.

Ratio analysis can be of great use for overall checks. It is to be expected that figures of sales will change together with changes in purchases, wages, expenses, etc. But the mutual relationship of most related figures can change only because of extraordinary circumstances, favourable or adverse. Working out the relationship of ratios, therefore, and comparing them with the previous years, corresponding ratios serve to establish the apparent reasonableness of the figures. To the extent reasonableness is established, the auditor may feel to be on a firm ground when he issues his report. Of course, it should be noted that ratios are one of the ways of application of overall tests.

A good approach is to study the trends. Trend analysis is of course mainly resorted to in investigations. However, it may, be developed as a useful audit tool also to locate areas showing abnormalities. If trends of sales and purchases are studied over a reasonable period say 5 years - any distortion in their relations will be apparent. Similarly, trend of cost of production can be studied along with the trend of the major components of cost. Even the trend of significant ratios can be studied by the auditor over a number of years either by plotting them on a graph paper or by setting them chronologically. The objective of comparison of absolute figures by reference to the corresponding figures of the previous year has been stated by the Government in the context of the requirement in the Pre-Revised Schedule VI to the Companies Act, as follows:

“The intention of displaying the figures relating to the previous year is to facilitate the comparative study of the items in the Balance Sheet and Profit and Loss Account, so that the significance of the figures for the current year can be more readily appreciated and understood”.

Under Schedule III except in the case of the first Financial Statements laid before the Company (after its incorporation) the corresponding amounts (comparatives) for the immediately preceding reporting period for all items shown in the Financial Statements including notes shall also be given.

These all highlight one fact: those relevant ratios may be of great value for proper financial analysis and this may bring out the problem areas on which the auditor is directly interested. Students are referred to Study Material in Advanced Accounting.

Investigating Results of Analytical Procedures – If analytical procedures performed in accordance with this SA identify fluctuations or relationships that are inconsistent with other relevant information or that differ from expected values by a significant amount, the auditor shall investigate such differences by:

- (a) Inquiring of management and obtaining appropriate audit evidence relevant to management’s responses; and
- (b) Performing other audit procedures as necessary in the circumstances.

Further investigation, by means of audit procedures designed to produce a satisfactory conclusion, would be required if management is unable to provide an explanation or if the explanation is not considered adequate.

Analytical procedures used in the overall review – The auditor shall design and perform analytical procedures near the end of the audit that assist the auditor when forming an overall conclusion as to whether the financial statements are consistent with the auditor’s understanding of the entity.

The conclusions drawn from the results of analytical procedures designed and performed are intended to corroborate conclusions formed during the audit of individual components or elements of the financial statements. This assists the auditor to draw reasonable conclusions on which to base the auditor’s opinion.

The results of such analytical procedures may identify a previously unrecognised risk of material misstatement. In such circumstances, SA 315 requires the auditor to revise the auditor’s assessment of the risks of material misstatement and modify the further planned audit procedures accordingly⁵.

The analytical procedures performed in accordance with paragraph 6 may be similar to those that would be used as risk assessment procedures.

5.2 Statistical Sampling in Auditing

The audit evidence should, in total, enable the auditor to form an opinion on the financial information. In forming such an opinion, the auditor does not normally examine all of the information that is

⁵ SA 315, paragraph 30.

5.12 Advanced Auditing and Professional Ethics

available to him because he can reach a conclusion about an account balance, class of transactions or a control by way of judgmental or statistical sampling procedures.

Fig.: Audit Sampling**

Statistical sampling technique is increasingly becoming popular with the auditors. Statistical sampling in auditing stands for the technique of forming an opinion about a group of items on the basis of an examination of a few of the items. It may be recalled that test checking technique is one of the accepted auditing techniques, which most of the professional bodies of the world, including the Institute of Chartered Accountants of India have recommended for use by the members on a proper consideration of facts and applicability. We have also seen the shortcomings of the test check technique as a basis for forming informed opinion about the accounts under audit. Statistical sampling technique may be considered as a refined application of the test check technique which has all the advantages of the latter with the shortcomings removed. The greatest merit of statistical sampling technique lies in its being based on the statistical theory of probability. It is however, not as simplistic as the test checks.

On the basis of the audit carried out, an auditor is required to give a report containing his opinion, about truth and fairness of the accounting statements. In expressing his opinion the auditor never guarantees absolute accuracy of the accounting statements; but he takes a risk of being challenged about the validity of his opinion. Even after a complete checking, he cannot be sure that the accounts and the resulting accounting statements are absolutely free from error, manipulation, fraud or mistake. However, the opinion that he expresses, represents his overall assessment of the truth and fairness of the accounting statement based on his satisfaction that he has applied all professional skill at his command to see that no material error or fraud exists to distort the true and fair view of the accounting statements.

When he checks only a part of the total accounting data in lieu of checking of all the data, it is obvious that the degree of satisfaction obtainable from the latter would not be available; however, a small loss of the degree of satisfaction will be more than compensated by the considerable savings in time and costs for having checked only a fraction of the total data. It is again true that bigger the sample, the greater would be the satisfaction, but from a practical consideration the minimum requisite sample size, if determined statistically will be adequate to express an opinion about the overall truth and fairness of the total data within a reasonable range of precision and with reasonable confidence.

It is important to recognize that certain testing procedures do not come within the definition of

* Source : *Audit Sampling*. McGraw-Hill/Irwin © 2004 The McGraw-Hill Companies.

* Source : TopCAATs

sampling. Tests performed on 100% of the items within a population do not involve sampling. Likewise the technique of selecting all items within a population which have a particular significance (e.g., all items over a certain amount) does not qualify as sampling with respect to the portion of the population examined nor with respect to the population as a whole, since the items were not selected from the total population on a basis that was expected to be representative. Such items might imply some characteristic of the remaining portion of the population but would not be the basis for a valid conclusion about the remaining portion of the population.

5.2.1 Design of the sample and its evaluation

In designing an audit sample, the auditor has to consider the following -

Audit objectives - Audit sampling enables the auditor to obtain and evaluate audit evidence about some characteristic of the items selected in order to form or assist in forming a conclusion concerning the population from which the sample is drawn. Audit sampling can be applied using either non-statistical or statistical sampling approaches.

When designing an audit sample, the auditor's consideration includes the specific purpose to be achieved and the combination of audit procedures that is likely to best achieve that purpose. Consideration of the nature of the audit evidence sought and possible deviation or misstatement conditions or other characteristics relating to that audit evidence will assist the auditor in defining what constitutes a deviation or misstatement and what population to use for sampling. In fulfilling the requirement of paragraph 8 of SA 500 (Revised), when performing audit sampling, the auditor performs audit procedures to obtain evidence that the population from which the audit sample is drawn is complete.

Population – The population is the entire set of data from which the auditor wishes to sample in order to reach a conclusion. The auditor determines that the population from which he draws the sample is appropriate for the specific audit objective. For example, if the auditor's objective were to test for overstatement of accounts receivable, his population could be defined as the accounts receivable trial balance. On the other hand, if he was testing for understatement of accounts payable, his population would not be the accounts payable trial balance but could be subsequent disbursements, unfair invoices, unmatched receiving reports or other populations that would provide evidence of understatement of accounts payable. The individual items that make up the population are known as sampling units. The population can be divided into sampling units in a variety of ways. For example, if the auditor's objective is to test the validity of the entity's accounts receivable, he could define the sampling unit for confirmation purposes as either customer balances or individual customer invoices. The auditor should define the sampling unit in order to obtain an efficient and effective sample to achieve the particular audit objective. Further regarding population, it should be noted:

- (a) 'Population', or 'field', or 'universe' (i.e. the total number of items potentially subject to scrutiny within a defined area, must be sufficiently large.
- (b) The system which produces the records to be tested must be sufficiently reliable.
- (c) All items within a particular population must be homogeneous, i.e. they must all fall within the same 'category'.

5.14 Advanced Auditing and Professional Ethics

(d) Items within the population must be both (i) identifiable; and (ii) accessible.

Such selection should therefore be entirely random, and for this purpose random number tables are often used. The difficulty often arises, however, that the items within the population are themselves not identifiable in a way which enables such random selection to take place. Petty cash vouchers, for example, are rarely preprinted with a sequential numbering series and randomness will thus have to be ensured in some other way; it will hardly be practical for the auditor himself to set about entering the numbers on the vouchers.

Confidence level – The reliability referred to is usually termed the confidence level. More precisely, in an auditing context, it is the mathematical probability that the mis-statement rate in the sample will not differ from the error rate in the population by more than a stated amount. Confidence level is conveniently expressed as a percentage. Thus, when we speak of a confidence level of 90% we mean that there are 90 chances that the item would fall within the confidence intervals of about 90 to 100, against 10 chances, i.e. the risk we take, that it will not (once again, at a specified level of precision). The confidence level is therefore seen to be complementary to risk.

Precision – The precision may be defined with which we can describe the attributes of a given population. For example, our sample may be chosen such that the mis-statement in the population can be proved to be within 5 percent of the monetary value. But how precise do we require this percentage to be? The bigger our sample, clearly the more precise we can be, but we can never be completely precise for the same reasons as we can never be 100 percent confident. The degree of precision required will depend on the materiality of the items in question. For example, if ₹ 3,000 of mis-statement in a sales ledger population of ₹ 100,000 would be considered to be just not material, then 3 percent would be our precision limits. From this you will deduce that confidence level and precision limits are essentially inter-related, and the two combined would determine the quality of testing. The auditor's assessment of the following factors will primarily be responsible for selecting total limit:

- (i) Evaluation of the functioning of the system of internal control in the area under examination.
- (ii) Materiality of the amounts involved.

Example:

Mr. X may consider that in his estimation of stores valuation, an error of 2% may not be material; he also decides that he needs at least 98% reliability of the result. He is to pick up the requisite number of items of the stores for reliability of the result. The requisite number he can get from the random number table. The question of reliability of the result is directly linked with the reliability of the internal control and of the books and records; when these are satisfactory, lesser degree of reliability of the sampling estimation may suffice — if these are not satisfactory, the auditor may have to decide upon a higher degree of reliability which can only be obtained from a larger sample.

5.2.2 Defining Mis-statement

The auditor must determine the significance of potential mis-statement as it will determine the way in which tests should be conducted. As per SA 450, a Misstatement is a difference between the amounts, classification, presentation, or disclosure of a reported financial statement item and the amount, classification, presentation, or disclosure that is required for the item to be in accordance with the applicable financial reporting framework.

Tolerable mis-statement is the maximum mis-statement in the population that the auditor would be willing to accept and still concludes that the result from the sample has achieved his audit objective. Tolerable mis-statement is considered during the planning stage and is related to the auditor's preliminary judgement about materiality. The smaller the tolerable mis-statement, the larger the sample size the auditor will require. Further, we must determine the significance of potential mis-statement, for this will in turn determine the way in which we conduct our tests. For example, in compliance testing any mis-statement will be significant irrespective of its monetary value, because any failure of internal control procedures reduces the reliance that we can place on those procedures. Hence tests of detail will have to be extended. It is not the size of the mis-statement that is significant in these circumstances, but its nature, (indeed there may be no monetarily quantifiable misstatement at all e.g. a payroll may not have been check cast, but it may still be correct). With substantive testing, on the other hand, we are interested in discovering whether there is material misstatement, so in this situation it is purely the amount of the mis-statement that is relevant.

5.2.3 Sample size

The level of sampling risk that the auditor is willing to accept affects the sample size required. The lower the risk the auditor is willing to accept, the greater the sample size will need to be. The sample size can be determined by the application of a statistically-based formula or through the exercise of professional judgment. Appendices 2 and 3 indicate the influences that various factors typically have on the determination of sample size. When circumstances are similar, the effect on sample size of factors such as those identified in Table 1 and 2 will be similar regardless of whether a statistical or non-statistical approach is chosen.

5.2.4 Sampling risk

Audit sampling enables the auditor to obtain and evaluate audit evidence about some characteristic of the items selected in order to form or assist in forming a conclusion concerning the population from which the sample is drawn. Audit sampling can be applied using either non-statistical or statistical sampling approaches.

When designing a sample, the auditor determines tolerable misstatement in order to address the risk that the aggregate of individually immaterial misstatements may cause the financial statements to be materially misstated and provide a margin for possible undetected misstatements.

The risk that the auditor's conclusion based on a sample may be different from the conclusion if the entire population were subjected to the same audit procedure. Sampling risk can lead to two types of erroneous conclusions:

5.16 Advanced Auditing and Professional Ethics

- (i) In the case of a test of controls, that controls are more effective than they actually are, or in the case of a substantive procedure i.e. test of details, that a material misstatement does not exist when in fact it does. The auditor is primarily concerned with this type of erroneous conclusion because it affects audit effectiveness and is more likely to lead to an inappropriate audit opinion.
- (ii) In the case of a test of controls, that controls are less effective than they actually are, or in the case of a substantive procedure i.e. test of details, that a material misstatement exists when in fact it does not. This type of erroneous conclusion affects audit efficiency as it would usually lead to additional work to establish that initial conclusions were incorrect.

The risk of under reliance and the risk of incorrect rejection affect audit efficiency as they would ordinarily lead to additional work being performed by the auditor, or the entity, which would establish that the initial conclusions were incorrect. The risk of over reliance and the risk of incorrect acceptance affect audit effectiveness and are more likely to lead to an erroneous opinion on the financial statements than either the risk of under reliance or the risk of incorrect rejection.

Sample size is affected by the level of sampling risk the auditor is willing to accept from the results of the sample. The lower the risk the auditor is willing to accept, the greater the sample size will need to be.

5.2.5 Tolerable misstatement

A monetary amount set by the auditor in respect of which the auditor seeks to obtain an appropriate level of assurance that the monetary amount set by the auditor is not exceeded by the actual misstatement in the population. When designing a sample, the auditor determines tolerable misstatement in order to address the risk that the aggregate of individually immaterial misstatements may cause the financial statements to be materially misstated and provide a margin for possible undetected misstatements. Tolerable misstatement is the application of performance materiality, as defined in SA 320 (Revised)⁶, to a particular sampling procedure. Tolerable misstatement may be the same amount or an amount lower than performance materiality. **Tolerable rate of deviation** is a rate of deviation from prescribed internal control procedures set by the auditor in respect of which the auditor seeks to obtain an appropriate level of assurance that the rate of deviation set by the auditor is not exceeded by the actual rate of deviation in the population.

Statistical sampling procedures – There are many different types of statistical sampling plans, but whatever type is used, procedures for conducting a test will be as follows:

- (a) decide on the relevant confidence level and precision limits;
- (b) calculate the sample size using an appropriate formula or tables designed for the purpose;
- (c) select the sample using random methods;
- (d) carry out the necessary tests;

⁶ Standard on Auditing (SA) 320 (Revised), "Materiality in Planning and Performing an Audit", paragraph 9.

- (e) appraise the results.

The most common types of plans adopted by auditors are: Acceptance sampling (with discovery sampling a variation) or Estimation sampling, which may be used to determine:

- (a) population variables, or
- (b) population attributes.

Selection with the aid of the computer – The auditor may use a computer to render considerable assistance in the performance of statistical sampling tests, employing the following methods:

- (a) **Interval sampling** – The computer is programmed to select every n th item stored on magnetic tape, and the items so selected can be copied on to a separate tape and printed out in the form required by the auditor.
- (b) **Random number selection** – The technique of random number selection can be computerised, the random numbers being stored on tape or generated by the computer separately for each application.
- (c) **Random Interval selection** – The dangers of selecting a biased example by the use of a uniform interval can be avoided through the use of random variation of the interval between successive items. Random intervals are selected from random number tables maintained on magnetic tape, or produced by means of a random number generator program.

While applying statistical sampling, it should be remembered that materiality is one of the major considerations to decide whether or not a sample should be selected. For instance in case of certain enterprises like real estate builders, agents, merchant houses, etc. the total number of transactions may be relatively very small and hence are not appropriate for the selection of a sample. Even in case of major enterprises, there are certain items which are so significant that the records relating to them should be scrutinized by the auditor at new item by item basis. For example, the year end closing entries in the journal may be manipulated and, therefore, each entry must be carefully examined and authenticated by the auditor. In actual practice many firms of Chartered Accountants have found limited use of statistical sampling than anticipated by them. The various reasons which may be attributed to this state of affairs are as under:

- (i) Audit has never been a mathematical discipline,
- (ii) Designing and sampling schemes properly take unduly long time.
- (iii) To draw valid conclusions on the basis of statistical sampling, all members of the audit team should have an excellent grasp of the statistical principles involved,

5.2.6 Selection of the sample

The auditor should select sample items in such a way that the sample can be expected to be representative of the population. This requires that all items in the population have an opportunity of being selected.

There are many methods of selecting samples. The principal methods are as follows:

5.18 Advanced Auditing and Professional Ethics

- (a) Random selection (applied through random number generators, for example, random number tables).
- (b) Systematic selection, in which the number of sampling units in the population is divided by the sample size to give a sampling interval, for example 50, and having determined a starting point within the first 50, each 50th sampling unit thereafter is selected. Although the starting point may be determined haphazardly, the sample is more likely to be truly random if it is determined by use of a computerised random number generator or random number tables. When using systematic selection, the auditor would need to determine that sampling units within the population are not structured in such a way that the sampling interval corresponds with a particular pattern in the population.
- (c) Monetary Unit Sampling is a type of value-weighted selection in which sample size, selection and evaluation results in a conclusion in monetary amounts.
- (d) Haphazard selection, in which the auditor selects the sample without following a structured technique. Although no structured technique is used, the auditor would nonetheless avoid any conscious bias or predictability (for example, avoiding difficult to locate items, or always choosing or avoiding the first or last entries on a page) and thus attempt to ensure that all items in the population have a chance of selection. Haphazard selection is not appropriate when using statistical sampling.
- (e) Block selection involves selection of a block(s) of contiguous items from within the population. Block selection cannot ordinarily be used in audit sampling because most populations are structured such that items in a sequence can be expected to have similar characteristics to each other, but different characteristics from items elsewhere in the population. Although in some circumstances it may be an appropriate audit procedure to examine a block of items, it would rarely be an appropriate sample selection technique when the auditor intends to draw valid inferences about the entire population based on the sample.

5.2.7 Performing Audit Procedures

An example of when it is necessary to perform the procedure on a replacement item is when a cancelled cheque is selected while testing for evidence of payment authorisation. If the auditor is satisfied that the cheque has been properly cancelled such that it does not constitute a deviation, an appropriately chosen replacement is examined.

An example of when the auditor is unable to apply the designed audit procedures to a selected item is when documentation relating to that item has been lost.

An example of a suitable alternative procedure might be the examination of subsequent cash receipts together with evidence of their source and the items they are intended to settle when no reply has been received in response to a positive confirmation request.

5.2.8 Nature and Cause of Deviations and Misstatements

In analysing the deviations and misstatements identified, the auditor may observe that many have a common feature, for example, type of transaction, location, product line or period of time. In such circumstances, the auditor may decide to identify all items in the population that possess

the common feature, and extend audit procedures to those items. In addition, such deviations or misstatements may be intentional, and may indicate the possibility of fraud.

5.2.9 Projecting Misstatements

The auditor is required to project misstatements for the population to obtain a broad view of the scale of misstatement but this projection may not be sufficient to determine an amount to be recorded.

When a misstatement has been established as an anomaly, it may be excluded when projecting misstatements to the population. However, the effect of any such misstatement, if uncorrected, still needs to be considered in addition to the projection of the non-anomalous misstatements.

For tests of controls, no explicit projection of deviations is necessary since the sample deviation rate is also the projected deviation rate for the population as a whole. SA 330⁷ provides guidance when deviations from controls upon which the auditor intends to rely are detected.

5.2.10 Evaluating Results of Audit Sampling

The auditor shall evaluate:

- (a) The results of the sample; and
- (b) Whether the use of audit sampling has provided a reasonable basis for conclusions about the population that has been tested.

For tests of controls, an unexpectedly high sample deviation rate may lead to an increase in the assessed risk of material misstatement, unless further audit evidence substantiating the initial assessment is obtained. For tests of details, an unexpectedly high misstatement amount in a sample may cause the auditor to believe that a class of transactions or account balance is materially misstated, in the absence of further audit evidence that no material misstatement exists.

In the case of tests of details, the projected misstatement plus anomalous misstatement, if any, is the auditor's best estimate of misstatement in the population. When the projected misstatement plus anomalous misstatement, if any, exceeds tolerable misstatement, the sample does not provide a reasonable basis for conclusions about the population that has been tested. The closer the projected misstatement plus anomalous misstatement is to tolerable misstatement, the more likely that actual misstatement in the population may exceed tolerable misstatement. Also if the projected misstatement is greater than the auditor's expectations of misstatement used to determine the sample size, the auditor may conclude that there is an unacceptable sampling risk that the actual misstatement in the population exceeds the tolerable misstatement. Considering the results of other audit procedures helps the auditor to assess the risk that actual misstatement in the population exceeds tolerable misstatement, and the risk may be reduced if additional audit evidence is obtained.

If the auditor concludes that audit sampling has not provided a reasonable basis for conclusions about the population that has been tested, the auditor may:

⁷ SA 330, "The Auditor's Responses to Assessed Risks", paragraphs 17 and A41.

5.20 Advanced Auditing and Professional Ethics

- Request management to investigate misstatements that have been identified and the potential for further misstatements and to make any necessary adjustments; or
- Tailor the nature, timing and extent of those further audit procedures to best achieve the required assurance. For example, in the case of tests of controls, the auditor might extend the sample size, test an alternative control or modify related substantive procedures.

Table 1: Examples of Factors Influencing Sample Size for Tests of Controls

The following are factors that the auditor may consider when determining the sample size for tests of controls. These factors, which need to be considered together, assume the auditor does not modify the nature or timing of tests of controls or otherwise modify the approach to substantive procedures in response to assessed risks.

FACTOR	EFFECT ON SAMPLE SIZE	
1. An increase in the extent to which the auditor's risk assessment takes into account relevant controls	Increase	The more assurance the auditor intends to obtain from the operating effectiveness of controls, the lower the auditor's assessment of the risk of material misstatement will be, and the larger the sample size will need to be. When the auditor's assessment of the risk of material misstatement at the assertion level includes an expectation of the operating effectiveness of controls, the auditor is required to perform tests of controls. Other things being equal, the greater the reliance the auditor places on the operating effectiveness of controls in the risk assessment, the greater is the extent of the auditor's tests of controls (and therefore, the sample size is increased).
2. An increase in the tolerable rate of deviation	Decrease	The lower the tolerable rate of deviation, the larger the sample size needs to be.
3. An increase in the expected rate of deviation of the population to be tested	Increase	The higher the expected rate of deviation, the larger the sample size needs to be so that the auditor is in a position to make a reasonable estimate of the actual rate of deviation. Factors relevant to the auditor's consideration of the expected rate of deviation include the auditor's understanding of the business (in particular, risk assessment procedures undertaken to obtain an

		understanding of internal control), changes in personnel or in internal control, the results of audit procedures applied in prior periods and the results of other audit procedures. High expected control deviation rates ordinarily warrant little, if any, reduction of the assessed risk of material misstatement.
4. An increase in the auditor's desired level of assurance that the tolerable rate of deviation is not exceeded by the actual rate of deviation in the population	Increase	The greater the level of assurance that the auditor desires that the results of the sample are in fact indicative of the actual incidence of deviation in the population, the larger the sample size needs to be.
5. An increase in the number of sampling units in the population	Negligible effect	For large populations, the actual size of the population has little, if any, effect on sample size. For small populations however, audit sampling may not be as efficient as alternative means of obtaining sufficient appropriate audit evidence.

Table 2: Examples of Factors Influencing Sample Size for Tests of Details

The following are factors that the auditor may consider when determining the sample size for tests of details. These factors, which need to be considered together, assume the auditor does not modify the approach to tests of controls or otherwise modify the nature or timing of substantive procedures in response to the assessed risks.

FACTOR	EFFECT ON SAMPLE SIZE	
1. An increase in the auditor's assessment of the risk of material misstatement	Increase	The higher the auditor's assessment of the risk of material misstatement, the larger the sample size needs to be. The auditor's assessment of the risk of material misstatement is affected by inherent risk and control risk. For example, if the auditor does not perform tests of controls, the auditor's risk assessment cannot be reduced for the effective operation of internal controls with respect to the particular assertion. Therefore, in order to reduce audit risk to an acceptably low level, the auditor needs a low detection risk and will rely

5.22 Advanced Auditing and Professional Ethics

		more on substantive procedures. The more audit evidence that is obtained from tests of details (that is, the lower the detection risk), the larger the sample size will need to be.
2. An increase in the use of other substantive procedures directed at the same assertion	Decrease	The more the auditor is relying on other substantive procedures (tests of details or substantive analytical procedures) to reduce to an acceptable level the detection risk regarding a particular population, the less assurance the auditor will require from sampling and, therefore, the smaller the sample size can be.
3. An increase in the auditor's desired level of assurance that tolerable misstatement is not exceeded by actual misstatement in the population	Increase	The greater the level of assurance that the auditor requires that the results of the sample are in fact indicative of the actual amount of misstatement in the population, the larger the sample size needs to be.
4. An increase in tolerable misstatement	Decrease	The lower the tolerable misstatement, the larger the sample size needs to be.
5. An increase in the amount of misstatement the auditor expects to find in the population	Increase	The greater the amount of misstatement the auditor expects to find in the population, the larger the sample size needs to be in order to make a reasonable estimate of the actual amount of misstatement in the population. Factors relevant to the auditor's consideration of the expected misstatement amount include the extent to which item values are determined subjectively, the results of risk assessment procedures, the results of tests of control, the results of audit procedures applied in prior periods, and the results of other substantive procedures.
6. Stratification of the population when appropriate	Decrease	When there is a wide range (variability) in the monetary size of items in the population, it may be useful to stratify the population. When a population can be

		appropriately stratified, the aggregate of the sample sizes from the strata generally will be less than the sample size that would have been required to attain a given level of sampling risk, had one sample been drawn from the whole population.
7. The number of sampling units in the population	Negligible effect	For large populations, the actual size of the population has little, if any, effect on sample size. Thus, for small populations, audit sampling is often not as efficient as alternative means of obtaining sufficient appropriate audit evidence. (However, when using monetary unit sampling, an increase in the monetary value of the population increases sample size, unless this is offset by a proportional increase in materiality for the financial statements as a whole (and, if applicable, materiality level or levels for particular classes of transactions, account balances or disclosures).

5.3 Risk-Based Audit

Audit should be risk-based or focused on areas of greatest risk to the achievement of the audited entity's objectives. Risk-based audit (RBA) is an approach to audit that analyzes audit risks, sets materiality thresholds based on audit risk analysis and develops audit programmes that allocate a larger portion of audit resources to high-risk areas.

The auditor does not normally need to perform specific audit procedures on all areas of audit. He only needs to design audit programmes and procedures on areas earlier identified as major risks that could result in the financial statements being materially misstated. RBA is an essential element of financial audit- both in the attest audit of the financial statements and in the audit of financial systems and transactions including evaluation of internal controls. It focuses primarily on the identification and assessment of the financial statement misstatement risks and provides a framework to reduce the impact to the financial statement of these identified risks to an acceptable level before rendering an opinion on the financial statements. It also provides indicators of risks as a basis of opportunity for improvement of auditee risk management and control processes. This affords an opportunity to the auditee to improve its operations from recommendations on risks that do not have a current impact on the financial statements but impact the audited entity's operational strategies and performance over the longer term.

In the context of performance audit, it is the risk to delivery of an activity or scheme or programme of the entity with economy, efficiency and effectiveness. Awareness of areas that puts the programme or resources at risk from the point of view of economy, efficiency and

5.24 Advanced Auditing and Professional Ethics

effectiveness helps focus audit attention on them. The risk analysis provides a framework for assurance in performance auditing.

5.3.1 Audit risk analysis

The auditor should perform an analysis of the audit risks that impact on the auditee before undertaking specific audit procedures. Risk assessment is a subjective process. It is part of the professional judgment of the auditor and of the particular circumstances. It is the risk that the auditor may unknowingly fail to appropriately modify his opinion on financial statements that are materially misstated.

Audit risks are brought about by error and fraud:

- ◆ Error is an unintentional mistake resulting from omission, as when legitimate transactions and/or balances are excluded from the financial statements; or by commission, as when erroneous transactions and/or balances are included in the financial statements.
- ◆ Fraud is an intentional misstatement in the accounting records or supporting documents from which the financial statements are prepared. It is intended to deceive financial statement users or to conceal misappropriations.

The auditor has the responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements, whether caused by error or fraud.

An error risk may arise from an error in principle, estimate, critical information processing, financial reporting process or disclosure.

Fraud risk involves manipulation, falsification of accounting records, or misrepresentation in the financial statements of events, transactions or other significant information, or misapplication of accounting principles or misappropriation of funds.

5.3.2 General Steps in the Conduct of RBA

RBA consists of four main phases starting with the identification and prioritization of risks, to the determination of residual risk, reduction of residual risk to acceptable level and the reporting to auditee of audit results. These are achieved through the following:

- ◆ Understand auditee operations to identify and prioritize risks
- ◆ Assess auditee management strategies and controls to determine residual audit risk
- ◆ Manage residual risk to reduce it to acceptable level
- ◆ Inform auditee of audit results through appropriate report

Understanding auditee operations involves processes for reviewing and understanding the audited organization's risk management processes for its strategies, framework of operations, operational performance and information process framework, in order to identify and prioritize the error and fraud risks that impact the audit of financial statements. The environment in which the auditee operates, the information required to monitor changes in the environment, and the process or activities integral to the audited entity's success in meeting its objectives are the key factors to an understanding of agency risks. Likewise, a performance review of the audited

entity's delivery of service by comparing expectations against actual results may also aid in understanding agency operations.

Assessment of management risk strategies and controls is the determination as to how controls within the auditee are designed. The role of internal audit in promoting a sound accounting system and internal control is recognized, thus the SAI should evaluate the effectiveness of internal audit to determine the extent to which reliance can be placed upon it in the conduct of substantive tests.

Management of residual risk requires the design and execution of a risk reduction approach that is efficient and effective to bring down residual audit risk to an acceptable level. This includes the design and execution of necessary audit procedures and substantive testing to obtain evidence in support of transactions and balances. More resources should be allocated to areas of high audit risks, which were earlier known through the analytical procedures undertaken.

The results of audit shall be communicated by the auditor to the audited entity. The auditor must immediately communicate to the auditee reportable conditions that have been observed even before completion of the audit, such as weaknesses in the internal control system, deficiencies in the design and operation of internal controls that affect the organization's ability to record, process, summarize and report financial data.

CASE STUDY

Using Analytical Procedures as Substantive Tests^Ψ

Great Champs, an independent, minor football team, competes in the Southern zone. The team finished in second place in 2006 with a good record. The Great Champs cumulative season attendance of 5,45,459 spectators set a new record high for the team, up from 4,90,000 in 2005. Bank-loan agreements require the Great Champs to submit audited financial statements annually to the bank. M/s. ABC & Co. has been the Great Champs' auditors for the past five years.

One of the major audit areas involved audit of ticket revenues. Those revenues reached nearly ₹ 10,88,0000 in 2005. In the prior years, the audit plan called for detailed testing of revenue accounts to gain assurance that reported ticket revenues were fairly stated.

Mr. Abhi, a new audit manager, just received the assignment to be manager on the 2006 audit. He had worked previously on the Great Champs prior-year audits as a staff auditor. When he learned that he would be managing the current-year engagement, he immediately thought back to all the hours of detailed testing of ticket sales he had performed in earlier years. One some of his other clients Mr. Abhi had been successful at redesigning the audit plans to make better use of analytical procedures as substantive tests. He is beginning to wonder if there was a more efficient way to gather substantive evidence related to ticket revenues on this audit engagement also.

^Ψ Adapted from a case study published in Auditing Cases : Buckless, Beasley, Glover, Prawitt (2000 edition), Prentice Hall, pg. 133.

5.26 Advanced Auditing and Professional Ethics

In his first meeting with the management of Great Champs for the 2006 audit, Mr. Abhi learned that the Great Champs now use an outside company, M/s. Chicklets, to operate ticket gates for home games. The terms of the contract required M/s. Chicklets to collect ticket stubs so that they could later report total tickets collected per game. Although M/s. Chicklets did not break down the total ticket sales into the various price categories, Mr. Abhi thought there might be a way to develop an analytical procedure using the independently generated total ticket numbers and data from prior audits. To investigate this possibility, he asked a staff person to gather some information related to reported sales. The information that the staff person gathered from the records of the client, M/s. Chicklets and prior-year working papers is as follows:

2006 Park Attendance

Total park attendance	5,45,459
-----------------------	----------

2006 Number of Games

Weekday games	44
---------------	----

Weekend games	29
---------------	----

Information from prior-year audit working papers indicate that average per-game attendance for weekend games was 27% higher than average per-game attendance for weekday games.

2006 Per-Game Ticket Prices

Club seats	₹ 300
------------	-------

Box seats	₹ 200
-----------	-------

General seats : Adult :	₹ 150
-------------------------	-------

Child :	₹ 75
---------	------

Sales Mix	Weekday	Weekend
-----------	---------	---------

Club seats	30%	25%
------------	-----	-----

Box seats	40%	30%
-----------	-----	-----

General seats Adults	15%	25%
-------------------------	-----	-----

Child	15%	20%
-------	-----	-----

Comparison of 2005 ticket prices to 2006 ticket prices reveals an average increase of 12% between the two years.

Information from prior-year audit working papers shows that sales mix has remained fairly constant over the past several years.

2006 Promotion :	Number of Games
------------------	-----------------

Weekday	7
---------	---

Weekend	10
---------	----

Information from prior-year audit working papers shows that attendance generally increases by 10 percent when there is a promotion (e.g., free football cap, poster, or special entertainment).

Queries to the Readers

- (i) Using the information provided, what expectation for ticket revenue for the year 2006 fiscal year should be developed by Mr. Abhi?
- (ii) How close would the Great Champs reported ticket revenue have to be to your expectation for you to consider reported ticket revenue reasonable or fairly stated?
- (iii) If reported ticket revenues are outside the “reasonable range” what could explain the difference?
- (iv) If the engagement team decides to use analytical procedures for the Great Champs audit then how will the audit plan differ from prior years?

6

The Company Audit

Companies Act, 2013 is rule based Act. Sections 138 to 148 of the Companies Act, 2013 (hereinafter referred to as the Act unless otherwise mentioned) deal with provisions relating to audit of companies. Therefore, it is quite important to understand these provisions very carefully. You may also study sections 128 to 137 relating to “Accounts” of companies for better understanding of the subject. The provisions relating to ‘audit’ broadly deal with who can be appointed as an auditor under the Act, i.e., qualifications and disqualifications, the manner of appointment and removal of an auditor and rights and duties of an auditor. A scheme of the provisions of the Act relating to audit is given below for quick reference:

SECTIONS DEAL WITH PROVISIONS RELATING TO AUDIT OF COMPANIES

- | | |
|------|---|
| 138. | Internal Audit. |
| 139. | Appointment of auditors. |
| 140. | Removal, resignation of auditor and giving of special notice. |
| 141. | Eligibility, qualifications and disqualifications of auditors. |
| 142. | Remuneration of auditors. |
| 143. | Powers and duties of auditors and auditing standards. |
| 144. | Auditor not to render certain services. |
| 145. | Auditors to sign audit reports, etc. |
| 146. | Auditors to attend general meeting. |
| 147. | Punishment for contravention. |
| 148. | Central Government to specify audit of items of cost in respect of certain companies. |

6.1 Eligibility, Qualifications and Disqualifications of an Auditor

The provisions relating to eligibility, qualifications and disqualifications of an auditor are governed by section 141 of the Companies Act, 2013 (hereinafter referred as the Act). The main provisions are stated below:

(1) A person shall be **eligible for appointment** as an auditor of a company **only if he is a chartered accountant**:

It may be noted that a firm whereof majority of partners practising in India are qualified for appointment as aforesaid may be appointed by its firm name to be auditor of a company.

(2) Where a firm including a limited liability partnership is appointed as an auditor of a

company, only the partners who are chartered accountants shall be authorised to act and sign on behalf of the firm.

(3) Under sub-section (3) of section 141 along with Rule 10 of the Companies (Audit and Auditors) Rule, 2014 (hereinafter referred as CAAR), the following persons shall not be eligible for appointment as an auditor of a company, namely:-

- (a) a body corporate other than a limited liability partnership registered under the Limited Liability Partnership Act, 2008;
- (b) an officer or employee of the company;

According to Section 2(59) of the Companies Act, 2013, the term 'Officer' includes :

- (i) Director
- (ii) Manager
- (iii) Key Managerial personnel
- (iv) Shadow Directors.

Example 1: G, a CA in practice is director in RST Ltd. On combined reading of Section 141(3)(b) and Section 2(59), it may be concluded that CA. G would be disqualified to be appointed as an auditor of RST Ltd.

Example 2: G, a CA in practice is director in Zed Ltd., holding company of RST Ltd. On combined reading of Section 141(3)(b) and Section 2(59), it may be concluded that CA. G would be disqualified to be appointed as an auditor of Zed Ltd. but would not be disqualified in case of RST Ltd.

- (c) a person who is a partner, or who is in the employment, of an officer or employee of the company;

This sub-section disqualifies the below mentioned persons from being appointed as auditor of a company :

- (i) partner of an officer of the company;
- (ii) employee of an officer of the company;
- (iii) partner of an employee of the company;
- (iv) employee of an employee of the company.

- (d) a person who, or his relative or partner -

- (i) is holding any security of or interest in the company or its subsidiary, or of its holding or associate company or a subsidiary of such holding company.

It may be noted that the relative may hold security or interest in the company of face value not exceeding rupees one lakh.

6.3 Advanced Auditing and Professional Ethics

It may also be noted that the condition of rupees one lakh shall, wherever relevant, be also applicable in the case of a company not having share capital or other securities:

Students may also note that in the event of acquiring any security or interest by a relative, above the threshold prescribed, the corrective action to maintain the limits as specified above shall be taken by the auditor **within 60** days of such acquisition or interest.

The following points may be noted in this regard

- (i) ***The value of shares of ₹ 1,00,000 that can be held by relative is the face value not the market value.***
- (ii) The limit of ₹ 1,00,000 would be applicable where the securities are held by the relative of an auditor and not where the securities are held by an auditor himself or his partner. In case of an auditor or his partner, securities of even small value shall be a disqualification.
- (iii) Grace period of 60 days for corrective action shall apply only in respect of securities held by relatives. This would not apply to auditor or his partner.
- (iv) Limit of ₹ 1,00,000 and grace period of 60 days would be applicable where securities are held in the company only.

Section 2(77) of the Companies Act, 2013 defines the term “relative” to mean anyone who is related to another as:

- (i) members of a Hindu Undivided Family;
- (ii) husband and wife; or
- (iii) one person is related to the other in such manner as may be prescribed.

Rule 4 of the Companies (Specification of Definitions Details) Rules, 2014 prescribes the list of relatives as per Section 2(77). As per the said rule, a person shall be deemed to be relative of another if he or she is related to another in the below mentioned manner;

Father (including step- father), Mother (including step-mother), Son (including step-son), Son’s wife, Daughter, Daughter’s husband, Brother (including step- brother), Sister (including step- sister).

Examples

Ex 1: “Mr. A”, a practicing Chartered Accountant, is holding securities of “XYZ Ltd.” having face value of ₹ 900/-. Whether Mr. A is qualified for appointment as an Auditor of “XYZ Ltd.”?

As per section 141(3)(d)(i), a person is disqualified to be appointed as an auditor if he, or his relative or partner is holding any security of or interest in the company or its subsidiary, or of its holding or associate company or a subsidiary of such holding company.

In the present case, Mr. A. is holding security of ₹ 900 in the XYZ Ltd, therefore he is not eligible for appointment as an auditor of "XYZ Ltd".

Ex 2: "Mr. P" is a practicing Chartered Accountant and "Mr. Q", the relative of "Mr. P", is holding securities of "ABC Ltd." having face value of ₹ 90,000/-. Whether "Mr. P" is Qualified from being appointed as an auditor of "ABC Ltd."?

As per section 141(3)(d)(i), a person is disqualified to be appointed as an auditor if he, or his relative or partner is holding any security of or interest in the company or its subsidiary, or of its holding or associate company or a subsidiary of such holding company: Further as per proviso to this Section, the relative of the person may hold the securities or interest in the company of face value not exceeding of ₹ 1,00,000.

In the present case, Mr. Q. (relative of Mr. P), is having securities of ₹ 90,000 face Value in ABC Ltd., which is as per requirement of proviso to section 141(3)(d)(i). Therefore, Mr. P will not be disqualified to be appointed as an auditor of ABC Ltd.

Ex 3: "M/s BC & Co." is an Audit Firm having partners "Mr. B" and "Mr. C", and "Mr. A" the relative of "Mr. C", is holding securities of "MWF Ltd." having face value of ₹ 1,01,000/-. Whether "M/s BC & Co." is qualified from being appointed as an auditor of "MWF Ltd."?

As per section 141(3)(d)(i), a person is disqualified to be appointed as an auditor if he, or his relative or partner is holding any security of or interest in the company or its subsidiary, or of its holding or associate company or a subsidiary of such holding company: Further as per proviso to this Section, the relative of the person may hold the securities or interest in the company of face value not exceeding of ₹ 1,00,000.

In the instant case, M/s BC & Co, will be disqualified for appointment as an auditor of MWF Ltd as the relative of Mr. C (i.e. partner of M/s BC & Co.), is holding the securities in MWF Ltd which is exceeding the limit mentioned in proviso to section 141(3)(d)(i).

Ex 4: *M/s RM & Co. is an audit firm having partners CA. R and CA. M. The firm has been offered the appointment as an auditor of Enn Ltd. for the Financial Year 2016-17. Mr. Bee, the relative of CA. R, is holding 5,000 shares (face value of ₹10 each) in Enn Ltd. having market value of ₹ 1,50,000. Whether M/s RM & Co. is disqualified to be appointed as auditors of Enn Ltd.?*

As per section 141(3)(d)(i), a person shall not be eligible for appointment as an auditor of a company, who, or his relative or partner is holding any security of or interest in the company or its subsidiary, or of its holding or associate company or

6.5 Advanced Auditing and Professional Ethics

a subsidiary of such holding company. However, as per proviso to this section, the relative of the person may hold the securities or interest in the company of face value not exceeding of ₹1,00,000.

In the instant case, M/s RM & Co. is an audit firm having partners CA. R and CA. M. Mr. Bee is a relative of CA. R and he is holding shares of Enn Ltd. of face value of ₹50,000 only (5,000 shares x ₹10 per share).

Therefore, M/s RM & Co. is not disqualified for appointment as an auditors of Enn Ltd. as the relative of CA. R (i.e. partner of M/s RM & Co.) is holding the securities in Enn Ltd. which is within the limit mentioned in proviso to section 141(3)(d)(i) of the Companies Act, 2013.

- (ii) is indebted to the company, or its subsidiary, or its holding or associate company or a subsidiary of such holding company, in excess of rupees five lakh; or
- (iii) has given a guarantee or provided any security in connection with the indebtedness of any third person to the Company or its Subsidiary, or its Holding or Associate Company or a Subsidiary of such Holding Company, in excess of one lakh rupees.

Disqualification due to indebtedness.

1. Direct Indebtedness

A person shall be disqualified to be appointed as auditor if he or his relative or his partner is indebted in excess of ₹ 5 Lakhs to -

- (i) the company; or
- (ii) its subsidiary; or
- (iii) its holding company; or
- (iv) its associate company; or
- (v) a subsidiary of such holding company.

2. Indirect Indebtedness

A person shall be disqualified to be appointed as auditor if he or his relative or his partner has given a guarantee or provided any security in connection with the indebtedness of any third person in excess of ₹ 1 lakh to -

- (i) the company; or
- (ii) its subsidiary; or
- (iii) its holding company; or
- (iv) its associate company; or
- (v) a subsidiary of such holding company.

- (e) a person or a firm who, whether directly or indirectly has business relationship with the Company, or its Subsidiary, or its Holding or Associate Company or Subsidiary of such holding company or associate company, of such nature as may be prescribed;

Students may note that for the purpose of clause (e) above, the term “business relationship” shall be construed as any transaction entered into for a commercial purpose, except -

- (i) commercial transactions which are in the nature of professional services permitted to be rendered by an auditor or audit firm under the Act and the Chartered Accountants Act, 1949 and the rules or the regulations made under those Acts;
 - (ii) commercial transactions which are in the ordinary course of business of the company at arm’s length price - like sale of products or services to the auditor, as customer, in the ordinary course of business, by companies engaged in the business of telecommunications, airlines, hospitals, hotels and such other similar businesses.
- (f) a person whose relative is a Director or is in the employment of the Company as a director or key Managerial Personnel;
- (g) a person who is in full time employment elsewhere or a person or a partner of a firm holding appointment as its auditor, if such person or partner is at the date of such appointment or reappointment holding appointment as auditor of more than twenty companies other than one person companies, dormant companies, small companies and private companies having paid-up share capital less than ` 100 crore;
- (h) a person who has been convicted by a Court of an offence involving fraud and a period of ten years has not elapsed from the date of such conviction;
- (i) any person whose subsidiary or associate company or any other form of entity, is engaged as on the date of appointment in consulting and specialized services as provided in section 144.

Section 144 of the Companies Act, 2013 prescribes certain services not to be rendered by the auditor. An auditor appointed under this Act shall provide to the company only such other services as are approved by the Board of Directors or the audit committee, as the case may be, but which shall not include any of the following services (whether such services are rendered directly or indirectly to the company or its holding company or subsidiary company), namely:

- (i) accounting and book keeping services;
- (ii) internal audit;
- (iii) design and implementation of any financial information system;
- (iv) actuarial services;
- (v) investment advisory services;
- (vi) investment banking services;

6.7 Advanced Auditing and Professional Ethics

- (vii) rendering of outsourced financial services;
- (viii) management services; and
- (ix) any other kind of services as may be prescribed.

It may be noted that an auditor or audit firm who or which has been performing any non audit services on or before the commencement of this Act shall comply with the provisions of this section before the closure of the first financial year after the date of such commencement.

Further, in case of auditor being an individual, either himself or through his relative or any other person connected or associated with such individual or through any other entity, whatsoever, in which such individual has significant influence or control, or whose name or trade mark or brand is used by such individual, shall be termed as rendering of services directly or indirectly by the auditor; and in case of auditor being a firm, either itself or through any of its partners or through its parent, subsidiary or associate entity or through any other entity, whatsoever, in which the firm or any partner of the firm has significant influence or control, or whose name or trade mark or brand is used by the firm or any of its partners, shall be termed as rendering of services directly or indirectly by the auditor.

Example: CA. Poshin is providing the services of investment banking to C Ltd. Later on, he was also offered to be appointed as an auditor of the company for the current financial year. Advise.

Section 141(3)(i) of the Companies Act, 2013 disqualifies a person for appointment as an auditor of a company who is engaged as on the date of appointment in consulting and specialized services as provided in section 144. Section 144 of the Companies Act, 2013 prescribes certain services not to be rendered by the auditor which includes investment banking services.

Therefore, CA. Poshin is advised not to accept the assignment of auditing as the service he rendering is specifically notified in the list of services not to be rendered by him as per section 141(3)(i) read with section 144 of the Companies Act, 2013.

- (4) Where a person appointed as an auditor of a company incurs any of the disqualifications mentioned in sub-section (3) after his appointment, he shall vacate his office as such auditor and such vacation shall be deemed to be a casual vacancy in the office of the auditor.

CASE STUDY

Mr. A, a chartered accountant has been appointed as an auditor of Laxman Ltd. In the Annual General Meeting of the company held in September, 2016, which assignment he accepted. Subsequently in January, 2017 he joined Mr. B, another chartered accountant, who is the Manager Finance of Laxman Ltd., as partner.

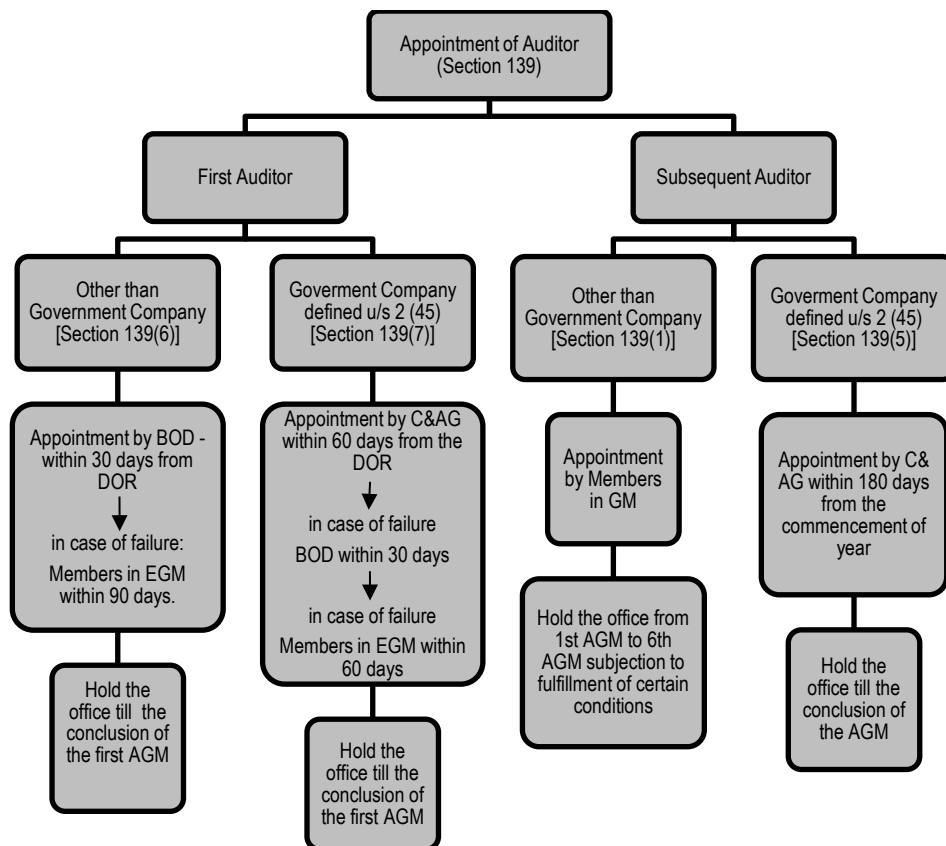

Provisions and Explanation: Section 141(3)(c) of the Companies Act, 2013 prescribes that any person who is a partner or in employment of an officer or employee of the company will be disqualified to act as an auditor of a company. Sub-section (4) of Section 141 provides that an auditor who becomes subject, after his appointment, to any of the disqualifications specified in sub-sections (3) of Section 141, he shall be deemed to have vacated his office as an auditor.

Conclusion: In the present case, Mr. A, an auditor of Laxman Ltd., joined as partner with Mr. B, who is Manager Finance of Laxman Limited. The given situation has attracted sub-section (3)(c) of Section 141 and, therefore, he shall be deemed to have vacated office of the auditor of Laxman Limited.

6.2 Appointment of Auditor

Section 139 of the Companies Act, 2013 contains provisions regarding Appointment of Auditors. Discussion on appointment of auditors may be grouped under two broad headings-

- I Appointment of First Auditors.
- II Appointment of Subsequent Auditors

6.9 Advanced Auditing and Professional Ethics

6.2.1 Appointment of First Auditor

6.2.1.1 Appointment of First Auditors in the case of a company, other than a Government Company: As per Section 139(6), the first auditor of a company, other than a Government company, shall be appointed by the Board of Directors within 30 days from the date of registration of the company.

In the case of failure of the Board to appoint the auditor, it shall inform the members of the company.

The members of the company shall within 90 days at an extraordinary general meeting appoint the auditor. Appointed auditor shall hold office till the conclusion of the first annual general meeting.

CASE STUDY

Managing Director of PQR Ltd. himself wants to appoint Shri Ganpati, a practicing Chartered Accountant, as first auditor of the company. Comment on the proposed action of the Managing Director.

Provisions and Explanation: Section 139(6) of the Companies Act, 2013 lays down that “the first auditor or auditors of a company shall be appointed by the Board of directors within 30 days from the date of registration of the company”. In the instant case, the proposed appointment of Shri Ganpati, a practicing Chartered Accountant as first auditors by the Managing Director of PQR Ltd by himself is in violation of Section 139(6) of the Companies Act, 2013, which authorizes the Board of Directors to appoint the first auditor of the company.

Conclusion: In view of the above, the Managing Director of PQR Ltd should be advised not to appoint the first auditor of the company.

6.2.1.2 Appointment of First Auditors in the case of Government Company: A “Government company” is a company in which not less than 51% of the paid-up share capital is held by the Central Government or by any State Government or Governments or partly by the Central Government and partly by one or more State Governments, and includes a company which is a subsidiary company of such a Government company.

Section 139(7) provides that in the case of a Government company or any other company owned or controlled, directly or indirectly, by the Central Government, or by any State Government, or Governments, or partly by the Central Government and partly by one or more State Governments, the first auditor shall be appointed by the Comptroller and Auditor-General of India within 60 days from the date of registration of the company.

In case the Comptroller and Auditor-General of India does not appoint such auditor within the above said period, the Board of Directors of the company shall appoint such auditor within the next 30 days. Further, in the case of failure of the Board to appoint such auditor within next 30 days, it shall inform the members of the company who shall appoint such auditor within 60 days at an extraordinary general meeting. Auditors shall hold office till the conclusion of the first annual general meeting.

CASE STUDY

The first auditor of Healthy Wealthy Ltd., a Government company, was appointed by the Board of Directors.

Provisions and Explanation: Section 139(6) of the Companies Act, 2013 (the Act) lays down that “the first auditor or auditors of a company shall be appointed by the Board of directors within 30 days from the date of registration of the company”. Thus, the first auditor of a company can be appointed by the Board of Directors within 30 days from the date of registration of the company. However, in the case of a Government Company, the appointment of first auditor is governed by the provisions of Section 139(7) of the Companies Act, 2013 which states that in the case of a Government company, the first auditor shall be appointed by the Comptroller and Auditor-General of India within 60 days from the date of registration of the company. Hence in the case of Healthy Wealthy Ltd., being a government company, the first auditors shall be appointed by the Comptroller and Auditor General of India.

Conclusion: Thus, the appointment of first auditors made by the Board of Directors of Healthy Wealthy Ltd. is null and void.

6.2.2 Appointment of Subsequent Auditor/Re-appointment of Auditor**6.2.2.1 Appointment of subsequent auditors in case of Non Government Companies:**

Section 139(1) of the Companies Act, 2013 provides that every company shall, at the first annual general meeting appoint an individual or a firm as an auditor who shall hold office from the conclusion of that meeting till the conclusion of its sixth annual general meeting and thereafter till the conclusion of every sixth meeting.

The following points need to be noted in this regard-

- (i) The company shall place the matter relating to such appointment of ratification by member at every Annual General Meeting.
- (ii) Before such appointment is made, the written consent of the auditor to such appointment, and a certificate from him or it that the appointment, if made, shall be in accordance with the conditions as may be prescribed, shall be obtained from the auditor.
- (iii) The certificate shall also indicate whether the auditor satisfies the criteria provided in section 141.
- (iv) The company shall inform the auditor concerned of his or its appointment, and also file a notice of such appointment with the Registrar within 15 days of the meeting in which the auditor is appointed.

6.2.2.2 Appointment of subsequent auditors in case of Government Companies: As per Section 139(5), in the case of a Government company or any other company owned or controlled, directly or indirectly, by the Central Government, or by any State Government or Governments, or partly by the Central Government and partly by one or more State Governments, the Comptroller and Auditor-General of India shall, in respect of a financial year,

6.11 Advanced Auditing and Professional Ethics

appoint an auditor duly qualified to be appointed as an auditor of companies under this Act, within a period of 180 days from the commencement of the financial year, who shall hold office till the conclusion of the annual general meeting.

6.2.3 Filling of a Casual Vacancy

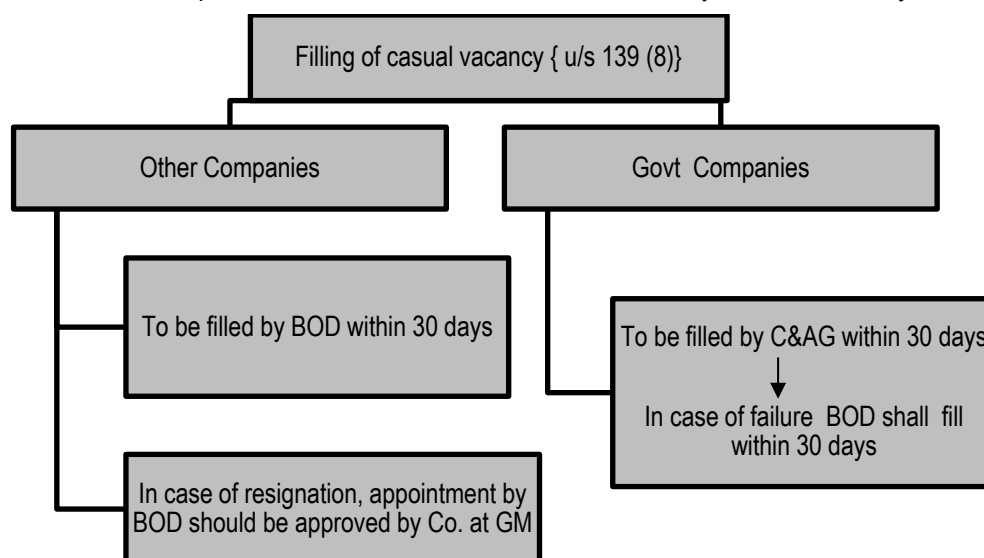

As per Section 139(8), any casual vacancy in the office of an auditor shall -

- (i) **In the case of a company other than a company whose accounts are subject to audit by an auditor appointed by the Comptroller and Auditor-General of India**, be filled by the Board of Directors within 30 days.

If such casual vacancy is as a result of the resignation of an auditor, such appointment shall also be approved by the company at a general meeting convened within three months of the recommendation of the Board and he shall hold the office till the conclusion of the next annual general meeting.

- (ii) **In the case of a company whose accounts are subject to audit by an auditor appointed by the Comptroller and Auditor-General of India**, be filled by the Comptroller and Auditor-General of India within 30 days.

It may be noted that in case the Comptroller and Auditor-General of India does not fill the vacancy within the said period the Board of Directors shall fill the vacancy within next 30 days.

6.2.3.1 Casual Vacancy by Resignation: As per section 140(2), the auditor who has resigned from the company shall file within a period of 30 days from the date of resignation, a statement in the prescribed **Form ADT-3** (as per Rule 8 of CAAR) with the company and the Registrar, and in case of the companies referred to in section 139(5) i.e. Government company, the auditor shall also file such statement with the Comptroller and Auditor-General of India,

indicating the reasons and other facts as may be relevant with regard to his resignation. In case of failure the auditor shall be punishable with fine which shall not be less than fifty thousand rupees but which may extend to five lakh rupees as per section 140(3).

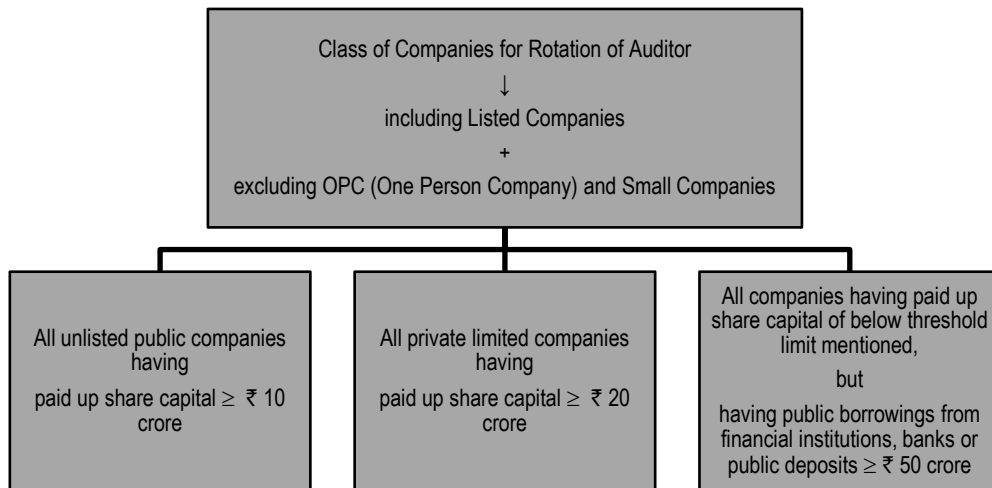

Other Important Provisions Regarding Appointment of Auditors

1. A retiring auditor may be re-appointed at an annual general meeting, if-
 - (a) he is not disqualified for re-appointment;
 - (b) he has not given the company a notice in writing of his unwillingness to be re-appointed; and
 - (c) a special resolution has not been passed at that meeting appointing some other auditor or providing expressly that he shall not be re-appointed.
2. Where at any annual general meeting, no auditor is appointed or re-appointed, the existing auditor shall continue to be the auditor of the company.

6.3 Rotation of Auditor

6.3.1 Applicability of section 139(2) Rotation of Auditor

As per rules prescribed in Companies (Audit and Auditors) Rules, 2014, for applicability of section 139(2) the **class of companies** shall mean the following classes of companies:-

- (a) all unlisted public companies having paid up share capital of rupees ten crore or more;
- (b) all private limited companies having paid up share capital of rupees twenty crore or more;
- (c) all companies having paid up share capital of below threshold limit mentioned in (a) and (b) above, but having public borrowings from financial institutions, banks or public deposits of rupees fifty crores or more.

6.13 Advanced Auditing and Professional Ethics

Example: Rano Ltd. is a private limited Company, having paid up share capital of rupees 18 crore but having public borrowing from nationalized banks and financial institutions of rupees 72 crore, manner of rotation of auditor will be applicable.

As per Section 139(2), no listed company or a company belonging to such class or classes of companies as mentioned above, shall appoint or re-appoint-

- (a) an individual as auditor for more than one term of five consecutive years; and
- (b) an audit firm as auditor for more than two terms of five consecutive years. Provided that -
 - (i) an individual auditor who has completed his term under clause (a) shall not be eligible for re-appointment as auditor in the same company for five years from the completion of his term;
 - (ii) an audit firm which has completed its term under clause (b), shall not be eligible for re-appointment as auditor in the same company for five years from the completion of such term.

Example: *Jolly Ltd., a listed company, appointed M/s Polly & Co., a Chartered Accountant firm, as the statutory auditor in its AGM held at the end of September, 2016 for 11 years. Here, the appointment of M/s Polly & Co. is not valid as the appointment can be made only for one term of five consecutive years and then another one more term of five consecutive years. It can't be appointed for two terms in one AGM only. Further, a cooling period of five years from the completion of term is required i.e. the firm can't be re-appointed for further 5 years after completion of two terms of five consecutive years.*

The following points merit consideration in this regard-

1. As on the date of appointment, no audit firm having a common partner or partners to the other audit firm, whose tenure has expired in a company immediately preceding the financial year, shall be appointed as auditor of the same company for a period of five years.

Example: M/s XYZ & Co., is an audit firm having partner Mrs. X, Mr. Y and Mr. Z, whose tenure has expired in the company immediately preceding the financial year, M/s ABZ & Co., is another audit firm in which Mr. Z is a common partner, will also be disqualified for the same company along with M/S XYZ & Co. for the period of five years.

2. Every company, existing on or before the commencement of this Act which is required to comply with provisions of this sub-section, shall comply with the requirements of this sub-section ***within a period which shall not be later than the date of the first annual general meeting of the company held, within the period specified under sub-section (1) of section 96, after three years from the date of commencement of this Act.***

Example 1: Mr. Raj, a Chartered Accountant, is an individual auditor of Binaca Limited for last 5 years as on March, 2013 (i.e. existing on or before the date of Commencement of Companies Act, 2013), here a break in the term for a continuous period of five years will not be considered as fulfilling the requirement of rotation. Thus, Mr. Raj can continue the audit of Binaca Ltd. upto

the first annual general meeting to be held after three years from the date of commencement of the Act due to transitional effect.

Example 2: M/s Raj Associates, a Chartered Accountants Audit Firm, is doing audit of Binaca Limited for last 11 years as on March, 2013 (i.e. existing on or before the date of Commencement of Companies Act, 2013), here a break in the term for a continuous period of two terms of five consecutive years will not be considered as fulfilling the requirement of rotation. Thus, M/s Raj Associates can continue the audit of Binaca Ltd. upto the first annual general meeting to be held after three years from the date of commencement of the Act due to transitional effect.

Students may interlink the above example with Illustrative table explaining rotation in case of individual auditor as well as audit firm which has been given after the 6.3.2 i.e. Manner of rotation of Auditors by the Companies on Expiry of their Term.*

The ICAI made a clarification dated 30.09.2016 on the difference in requirements relating to auditor's rotation under SQC 1 vis-à-vis Companies Act, 2013.

In case of audits of listed entities, SQC 1 requires rotation of engagement partner after a pre-defined period normally not more than seven years. Now, since SQC 1 is applicable from April 1, 2009, the provisions regarding the rotation of engagement partner would be due from April 1, 2016 as per the SQC 1 during the transition phase.

Further, the Companies Act, 2013 is also applicable from April 1, 2014 and the existing companies which is required to comply with provisions of this sub-section, shall comply with the requirements of this auditor's rotation provisions within 3 years from the date of commencement of this Act. Therefore, the provisions regarding auditor's rotation would be due from April 1, 2017 as per the Companies Act, 2013 during the transition phase

Hence, there is a difference of 1 year in the compliance of auditor's rotation provision between SQC 1 vis-à-vis the Companies Act, 2013 during the transition phase of implementation of the Companies Act, 2013.

Thus, the Council of the ICAI decided to provide relaxation in the requirement of rotation of engagement partner given in SQC 1 for the transition phase (i.e. for the financial year 2016-17).

3. It has also been provided that right of the company to remove an auditor or the right of the auditor to resign from such office of the company shall not be prejudiced.
4. Subject to the provisions of this Act, members of a company may resolve to provide that-
 - (a) in the audit firm appointed by it, the auditing partner and his team shall be rotated at such intervals as may be resolved by members; or
 - (b) the audit shall be conducted by more than one auditor.
5. The Central Government may, by rules, prescribe the manner in which the companies shall rotate their auditors.

6.15 Advanced Auditing and Professional Ethics

6.3.2 Manner of Rotation of Auditors by the Companies on Expiry of their Term

Rule 6 of the Companies (Audit and Auditors) Rules, 2014 prescribes the manner of rotation of auditors on expiry of their term which is given below:

- (1) The Audit Committee shall recommend to the Board, the name of an individual auditor or of an audit firm who may replace the incumbent auditor on expiry of the term of such incumbent.
- (2) Where a company is required to constitute an Audit Committee, the Board shall consider the recommendation of such committee, and in other cases, the Board shall itself consider the matter of rotation of auditors and make its recommendation for appointment of the next auditor by the members in annual general meeting.
- (3) For the purpose of the rotation of auditors-
 - (i) in case of an auditor (whether an individual or audit firm), the period for which the individual or the firm has held office as auditor prior to the commencement of the Act shall be taken into account for calculating the period of five consecutive years or ten consecutive years, as the case may be.
 - (ii) the incoming auditor or audit firm shall not be eligible if such auditor or audit firm is associated with the outgoing auditor or audit firm under the same network of audit firms.

Explanation I - For the purposes of these rules the term "same network" includes the firms operating or functioning, hitherto or in future, under the same brand name, trade name or common control.

Explanation II - For the purpose of rotation of auditors,-

- (a) a break in the term for a continuous period of five years shall be considered as fulfilling the requirement of rotation;
- (b) if a partner, who is in charge of an audit firm and also certifies the financial statements of the company, retires from the said firm and joins another firm of chartered accountants, such other firm shall also be ineligible to be appointed for a period of five years.

*Illustration explaining rotation in case of individual auditor

Number of consecutive years for which an individual auditor has been functioning as auditor in the same company [in the first AGM held after the commencement of provisions of section 139(2)]	Maximum number of consecutive years for which he may be appointed in the same company (including transitional period)	Aggregate period which the auditor would complete in the same company in view of column I and II
I	II	III
5 Years (or more than 5 years)	3 years	8 years or more
4 years	3 years	7 years

3 years	3 years	6 years
2 years	3 years	5 years
1 year	4 years	5 years

Note:

1. Individual auditor shall include other individuals or firms whose name or trade mark or brand is used by such individual, if any.
2. Consecutive years shall mean all the preceding financial years for which the individual auditor has been the auditor until there has been a break by five years or more.

***Illustration explaining rotation in case of audit firm**

Number of consecutive years for which an audit firm has been functioning as auditor in the same company [in the first AGM held after the commencement of provisions of section 139(2)]	Maximum number of consecutive years for which the firm may be appointed in the same company (including transitional period)	Aggregate period which the firm would complete in the same company in view of column I and II
I	II	III
10 Years (or more than 10years)	3 years	13 years or more
9 years	3 years	12 years
8 years	3 years	11 years
7 years	3 years	10 years
6 year	4 years	10 years
5 years	5 years	10 years
4 years	6 years	10 years
3 year	7 years	10 years
2 years	8 years	10 years
1 years	9 years	10 years

Note:

1. Audit Firm shall include other firms whose name or trade mark or brand is used by the firm or any of its partners.
 2. Consecutive years shall mean all the preceding financial years for which the firm has been the auditor until there has been a break by five years or more.
- (4) Where a company has appointed two or more individuals or firms or a combination thereof as joint auditors, the company may follow the rotation of auditors in such a manner that both or all of the joint auditors, as the case may be, do not complete their term in the same year.

6.4 Provisions relating to Audit Committee

6.4.1 Applicability of section 177 i.e. Constitution of Audit Committee

Where a company is required to constitute an Audit Committee under section 177, all appointments, including the filling of a casual vacancy of an auditor under this section shall be made after taking into account the recommendations of such committee.

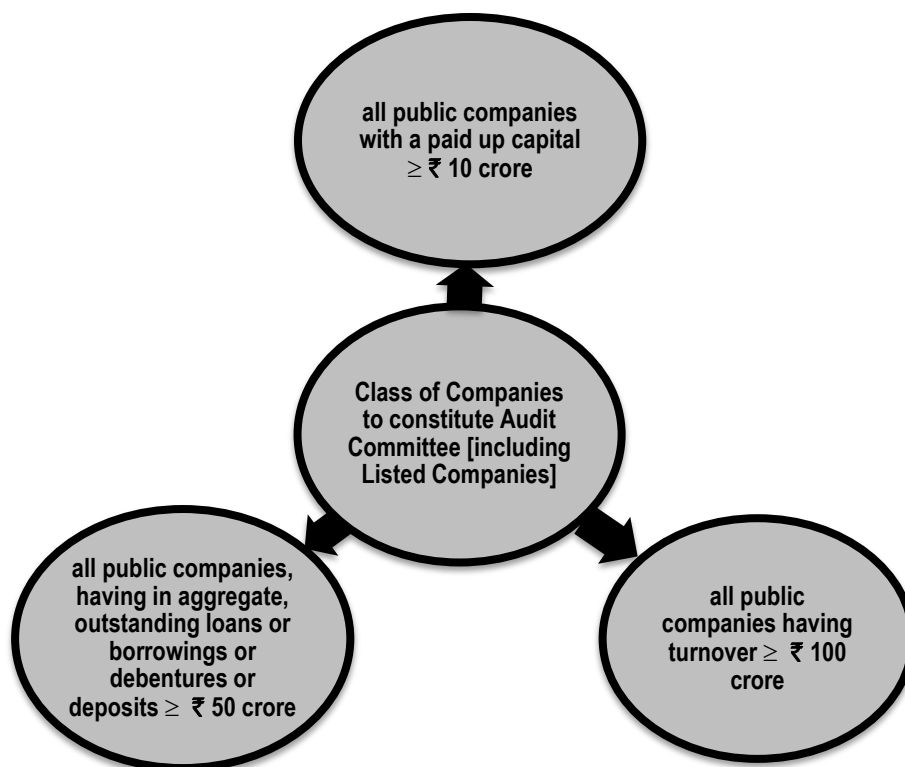

Diagram showing class of companies to constitute Audit Committee

It is important to know that in addition to listed companies, following classes of companies shall constitute an Audit Committee -

- (i) all public companies with a paid up capital of ten crore rupees or more;
- (ii) all public companies having turnover of one hundred crore rupees or more;
- (iii) all public companies, having in aggregate, outstanding loans or borrowings or debentures or deposits exceeding fifty crore rupees or more.

Explanation- The paid up share capital or turnover or outstanding loans, or borrowings or debentures or deposits, as the case may be, as existing on the date of last audited Financial Statements shall be taken into account for the purposes of this rule.

Example: XYZ Ltd., a public company having paid up capital of ₹ 9 crore but having turnover of ₹ 150 crore, will be required to constitute an Audit Committee under section 177 because the requirement for constitution of Audit Committee arises if the company falls into any of the prescribed condition.

6.4.2 Manner and procedure of selection and appointment of auditors

Rule 3 of CAAR 2014 prescribes the following manner and procedure of selection and appointment of auditors.

(1) In case of a company that is required to constitute an Audit Committee under section 177, the committee, and, in cases where such a committee is not required to be constituted, the Board, shall take into consideration the qualifications and experience of the individual or the firm proposed to be considered for appointment as auditor and whether such qualifications and experience are commensurate with the size and requirements of the company.

It may be noted that while considering the appointment, the Audit Committee or the Board, as the case may be, shall have regard to any order or pending proceeding relating to professional matters of conduct against the proposed auditor before the Institute of Chartered Accountants of India or any competent authority or any Court.

(2) The Audit Committee or the Board, as the case may be, may call for such other information from the proposed auditor as it may deem fit.

(3) Subject to the provisions of sub-rule (1), where a company is required to constitute the Audit Committee, the committee shall recommend the name of an individual or a firm as auditor to the Board for consideration and in other cases, the Board shall consider and recommend an individual or a firm as auditor to the members in the annual general meeting for appointment.

(4) If the Board agrees with the recommendation of the Audit Committee, it shall further recommend the appointment of an individual or a firm as auditor to the members in the annual general meeting.

(5) If the Board disagrees with the recommendation of the Audit Committee, it shall refer back the recommendation to the committee for reconsideration citing reasons for such disagreement.

(6) If the Audit Committee, after considering the reasons given by the Board, decides not to reconsider its original recommendation, the Board shall record reasons for its disagreement with the committee and send its own recommendation for consideration of the members in the annual general meeting; and if the Board agrees with the recommendations of the Audit Committee, it shall place the matter for consideration by members in the annual general meeting.

(7) The auditor appointed in the annual general meeting shall hold office from the conclusion of that meeting till the conclusion of the sixth annual general meeting, with the meeting wherein such appointment has been made being counted as the first meeting.

It may be noted that such appointment shall be subject to ratification in every annual general meeting till the sixth such meeting by way of passing of an ordinary resolution.

6.19 Advanced Auditing and Professional Ethics

Explanation.- For the purposes of this rule, it is hereby clarified that, if the appointment is not ratified by the members of the company, the Board of Directors shall appoint another individual or firm as its auditor or auditors after following the procedure laid down in this behalf under the Act.

6.5 Auditor's Remuneration

As per section 142 of the Act, the remuneration of the auditor of a company shall be fixed in its general meeting or in such manner as may be determined therein. However, board may fix remuneration of the first auditor appointed by it.

Further, the remuneration, in addition to the fee payable to an auditor, include the expenses, if any, incurred by the auditor in connection with the audit of the company and any facility extended to him but does not include any remuneration paid to him for any other service rendered by him at the request of the company. Therefore, it has been clarified that the remuneration to Auditor shall also include any facility provided to him.

6.6 Removal of Auditors

6.6.1 Removal of Auditor before Expiry of Term

According to Section 140(1), the auditor appointed under section 139 may be removed from his office before the expiry of his term only by a special resolution of the company, after obtaining the previous approval of the Central Government in that behalf as per Rule 7 of CAAR, 2014:

- (1) The application to the Central Government for removal of auditor shall be made in **Form ADT-2** and shall be accompanied with fees as provided for this purpose under the Companies (Registration Offices and Fees) Rules, 2014.
- (2) The application shall be made to the Central Government within 30 days of the resolution passed by the Board.
- (3) The company shall hold the general meeting within 60 days of receipt of approval of the Central Government for passing the special resolution.

It is important to note that before taking any action for removal before expiry of terms, the auditor concerned shall be given a reasonable opportunity of being heard.

Direction by Tribunal in case auditor acted in a fraudulent manner: As per sub-section (5) of the section 140, the Tribunal either suo motu or on an application made to it by the Central Government or by any person concerned, if it is satisfied that the auditor of a company has, whether directly or indirectly, acted in a fraudulent manner or abetted or colluded in any fraud by, or in relation to, the company or its directors or officers, it may, by order, direct the company to change its auditors.

However, if the application is made by the Central Government and the Tribunal is satisfied that any change of the auditor is required, it shall within fifteen days of receipt of such application, make an order that he shall not function as an auditor and the Central Government may appoint another auditor in his place.

It may be noted that an auditor, whether individual or firm, against whom final order has been passed by the Tribunal under this section shall not be eligible to be appointed as an auditor of any company for a period of five years from the date of passing of the order and the auditor shall also be liable for action under section 447.

It is hereby clarified that the case of a firm, the liability shall be of the firm and that of every partner or partners who acted in a fraudulent manner or abetted or colluded in any fraud by, or in relation to, the company or its director or officers.

6.6.2 Appointment of Auditor other than retiring Auditor

Section 140 lays down procedure to appoint an auditor other than retiring auditor who was removed:

1. Special notice shall be required for a resolution at an annual general meeting appointing as auditor a person other than a retiring auditor, or providing expressly that a retiring auditor shall not be re-appointed, except where the retiring auditor has completed a consecutive tenure of five years or as the case may be, ten years, as provided under sub-section (2) of section 139.
2. On receipt of notice of such a resolution, the company shall forthwith send a copy thereof to the retiring auditor.
3. Where notice is given of such a resolution and the retiring auditor makes with respect thereto representation in writing to the company (not exceeding a reasonable length) and requests its notification to members of the company, the company shall, unless the representation is received by it too late for it to do so,-
 - (a) in any notice of the resolution given to members of the company, state the fact of the representation having been made; and
 - (b) send a copy of the representation to every member of the company to whom notice of the meeting is sent, whether before or after the receipt of the representation by the company. and if a copy of the representation is not sent as aforesaid because it was received too late or because of the company's default, the auditor may (without prejudice to his right to be heard orally) require that the representation shall be read out at the meeting -

Students may note that if a copy of representation is not sent as aforesaid, a copy thereof shall be filed with the Registrar.

If the Tribunal is satisfied on an application either of the company or of any other aggrieved person that the rights conferred by this sub-section are being abused by the auditor, then, the copy of the representation may not be sent and the representation need not be read out at the meeting.

6.7 Ceiling on Number of Audits

It has been mentioned earlier that before appointment is given to any auditor, the company must obtain a certificate from him to the effect that the appointment, if made, will not result in an excess holding of company audit by the auditor concerned over the limit laid down in section

6.21 Advanced Auditing and Professional Ethics

141(3)(g) of the Companies Act, 2013 which prescribes that a person who is in full time employment elsewhere or a person or a partner of a firm holding appointment as its auditor, if such person or partner is at the date of such appointment or reappointment holding appointment as auditor of more than twenty companies, other than one person companies, dormant companies, small companies and private companies having paid-up share capital less than ` 100 crore, shall not be eligible for appointment as an Auditor of a Company.

In the case of a firm of auditors, it has been further provided that 'specified number of companies' shall be construed as the number of companies specified for every partner of the firm who is not in full time employment elsewhere.

This limit of 20 company audits is per person. In the case of an audit firm having 3 partners, the overall ceiling will be $3 \times 20 = 60$ company audits. Sometimes, a chartered accountant is a partner in a number of auditing firms. In such a case, all the firms in which he is partner or proprietor will be together entitled to 20 company audits on his account. Subject to the overall ceiling of company audits, how they allocate the 20 audits between themselves is their affairs.

CASE STUDY

"ABC & Co." is an Audit Firm having partners "Mr. A", "Mr. B" and "Mr. C", Chartered Accountants. "Mr. A", "Mr. B" and "Mr. C" are holding appointment as an Auditor in 4, 6 and 10 Companies respectively.

- (i) Provide the maximum number of Audits remaining in the name of "ABC & Co."
- (ii) Provide the maximum number of Audits remaining in the name of individual partner i.e. Mr. A, Mr. B and Mr. C.
- (iii) Can ABC & Co. accept the appointment as an auditor in 60 private companies having paid-up share capital less than ` 100 crore, 2 small companies and 1 dormant company?
- (iv) Would your answer be different, if out of those 60 private companies, 45 companies are having paid-up share capital of ₹ 110 crore each?

Fact of the Case: In the instant case, Mr. A is holding appointment in 4 companies, whereas Mr. B is having appointment in 6 Companies and Mr. C is having appointment in 10 Companies. In aggregate all three partners are having 20 audits.

Provisions and Explanations: As per section 141(3)(g) of the Companies Act, 2013, a person shall not be eligible for appointment as an auditor if he is in full time employment elsewhere or a person or a partner of a firm holding appointment as its auditor, if such person or partner is at the date of such appointment or reappointment holding appointment as auditor of more than twenty companies, other than one person companies, dormant companies, small companies and private companies having paid-up share capital less than ` 100 crore.

As per section 141(3)(g), this limit of 20 company audits is per person. In the case of an audit firm having 3 partners, the overall ceiling will be $3 \times 20 = 60$ company audits. Sometimes, a chartered accountant is a partner in a number of auditing firms. In such a case, all the firms in which he is partner or proprietor will be together entitled to 20 company audits on his account.

Conclusion:

- (i) Therefore, ABC & Co. can hold appointment as an auditor of 40 more companies:

Total Number of Audits available to the Firm	= 20*3	= 60
Number of Audits already taken by all the partners		
In their individual capacity	= 4+6+10	= 20
Remaining number of Audits available to the Firm		= 40
- (ii) With reference to above provisions an auditor can hold more appointment as auditor = ceiling limit as per section 141(3)(g)- already holding appointments as an auditor. Hence (1) Mr. A can hold: 20 - 4 = 16 more audits. (2) Mr. B can hold 20-6 = 14 more audits and (3) Mr. C can hold 20-10 = 10 more audits.
- (iii) In view of above discussed provisions, ABC & Co. can hold appointment as an auditor in all the 60 private companies having paid-up share capital less than ₹ 100 crore, 2 small companies and 1 dormant company as these are excluded from the ceiling limit of company audits given under section 141(3)(g) of the Companies Act, 2013.
- (iv) As per fact of the case, ABC & Co. is already having 20 company audits and they can also accept 40 more company audits. In addition they can also conduct the audit of one person companies, small companies, dormant companies and private companies having paid up share capital less than ₹ 100 crores. In the given case, out of the 60 private companies ABC & Co. is offered, 45 companies having paid-up share capital of ₹ 110 crore each.

Therefore, ABC & Co. can also accept the appointment as an auditor for 2 small companies, 1 dormant company, 15 private companies having paid-up share capital less than ₹ 100 crore and 40 private companies having paid-up share capital of ₹ 110 crore each in addition to above 20 company audits already holding.

Council General Guidelines, 2008 (Chapter VIII): In exercise of the powers conferred by clause (ii) of Part II of the Second Schedule to the Chartered Accountants Act, 1949, the Council of the Institute of Chartered Accountants of India hereby specifies that a member of the Institute in practice shall be deemed to be guilty of professional misconduct, if he holds at any time appointment of more than the “specified number of audit assignments of the companies under Section 224 and / or Section 226 of the Companies Act, 1956 (Section 141(3)(g) of the Companies Act, 2013).

It may be noted that in the case of a firm of chartered accountants in practice, the specified number of audit assignments shall be construed as the specified number of audit assignments for every partner of the firm.

It may also be noted that where any partner of the firm of chartered accountants in practice is also a partner of any other firm or firms of chartered accountants in practice, the number of audit assignments which may be taken for all the firms together in relation to such partner shall not

6.23 Advanced Auditing and Professional Ethics

exceed the specified number of audit assignments in the aggregate.

it is further provided that where any partner of a firm or firms of chartered accountants in practice accepts one or more audit assignments in his individual capacity, or in the name of his proprietary firm, the total number of such assignment which may be accepted by all firms in relation to such chartered accountant and by him shall not exceed the specified number of audit assignments in the aggregate.

1. In computing the specified number of audit assignments.
 - (a) the number of such assignments, which he or any partner of his firm has accepted whether singly or in combination with any other chartered accountant in practice or firm of such chartered accountants, shall be taken into account.
 - (b) the number of partners of a firm on the date of acceptance of audit assignment shall be taken into account.
 - (c) a chartered accountant in full time employment elsewhere shall not be taken into account.
2. A chartered accountant in practice as well as firm of chartered accountants in practice shall maintain a record of the audit assignments accepted by him or by the firm of chartered accountants, or by any of the partner of the firm in his individual name or as a partner of any other firm as far as possible, in the prescribed manner.

Ceiling on Tax Audit Assignments: The specified number of tax audit assignments that an auditor, as an individual or as a partner of a firm, can accept is 60 numbers. The ceiling limit was **increased from 45 to 60 numbers in the year 2014**. ICAI has notified that a chartered accountant in practice shall be deemed to be guilty of professional misconduct, if he accepts in a financial year, more than the specified number of tax audit assignments u/s 44AB.

6.8 Powers/Rights of Auditors

The auditor has following powers/rights while conducting an audit:

- (a) **Right of access to books, etc.**– Section 143(1) of the Act provides that the auditor of a company, at all times, shall have a right of access to the books of account and vouchers of the company, whether kept at the registered office of the company or at any other place and he is entitled to require from the officers of the company such information and explanation as he may consider necessary for the performance of his duties as auditor.

It may be noted that according to section 2(59) of the Act, the term 'officer' includes any director, manager or key managerial personnel or any person in accordance with whose directions or instructions the Board of Directors or any one or more of the directors is or are accustomed to act.

The phrase 'books, accounts and vouchers' includes all books which have any bearing, or are likely to have any bearing on the accounts, whether these be the usual financial books or the statutory or statistical books; memoranda books, e.g., inventory books, costing records and the

like may also be inspected by the auditor. Similarly the term 'voucher' includes all or any of the correspondence which may in any way serve to vouch for the accuracy of the accounts. Thus, the right of access is not restricted to books of account alone and it is for the auditor to determine what record or document is necessary for the purpose of the audit.

The right of access is not limited to those books and records maintained at the registered or head office so that in the case of a company with branches, the right also extends to the branch records, if the auditor considers it necessary to have access thereto as per section 143(8).

Further, the auditor of a company which is a holding company shall also have the right of access to the records of all its subsidiaries in so far as it relates to the consolidation of its financial statements with that of its subsidiaries.

Case Study

While conducting the audit of a limited company for the year ended 31st March, 2016, the auditor wanted to refer to the Minute Books. The Board of Directors refused to show the Minute Books to the auditor.

Provisions and Explanation: Section 143 of the Companies Act, 2013 grants powers to the auditor that every auditor has a right of access, at all times, to the books and account including all statutory records such as minute books, fixed assets register, etc. of the company for conducting the audit. In order to verify actions of the company and to vouch and verify some of the transactions of the company, it is necessary for the auditor to refer to the decisions of the shareholders and/or the directors of the company.

It is, therefore, essential for the auditor to refer to the Minute Books. In the absence of the Minute Books, the auditor may not be able to vouch/verify certain transactions of the company.

Conclusion: In case the directors have refused to produce the Minute Books, the auditor may consider extending the audit procedure as also consider qualifying his report in any appropriate manner.

(b) **Right to obtain information and explanation from officers-** This right of the auditor to obtain from the officers of the company such information and explanations as he may think necessary for the performance of his duties as auditor is a wide and important power. In the absence of such power, the auditor would not be able to obtain details of amount collected by the directors, etc. from any other company, firm or person as well as of any benefits in kind derived by the directors from the company, which may not be known from an examination of the books. It is for the auditor to decide the matters in respect of which information and explanations are required by him. When the auditor is not provided the information required by him or is denied access to books, etc., his only remedy would be to report to the members that he could not obtain all the information and explanations he had required or considered necessary for the performance of his duties as auditors.

(c) **Right to receive notices and to attend general meeting-** The auditors of a company are entitled to attend any general meeting of the company (the right is not restricted to those at

6.25 Advanced Auditing and Professional Ethics

which the accounts audited by them are to be discussed); also to receive all the notices and other communications relating to the general meetings, which members are entitled to receive and to be heard at any general meeting in any part of the business of the meeting which concerns them as auditors.

Section 146 of the Companies Act, 2013 discusses right as well as duty of the auditor. According to the section 146:

“all notices of, and other communications relating to, any general meeting shall be forwarded to the auditor of the company, and the auditor shall, unless otherwise exempted by the company, attend either by himself or through his authorised representative, who shall also be qualified to be an auditor, any general meeting and shall have right to be heard at such meeting on any part of the business which concerns him as the auditor.”

Thus, it is right of the auditor to receive notices and other communications relating to any general meeting and to be heard at such meeting, relating to the matter of his concern, however, it is duty of the auditor to attend the same or through his authorised representative unless otherwise exempted.

(d) Right to report to the members of the company on the accounts examined by him- The auditor shall make a report to the members of the company on the accounts examined by him and on every financial statements which are required by or under this Act to be laid before the company in general meeting and the report shall after taking into account the provisions of this Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of this Act or any rules made there under or under any order made under this section and to the best of his information and knowledge, the said accounts, financial statements give a true and fair view of the state of the company's affairs as at the end of its financial year and profit or loss and cash flow for the year and such other matters as may be prescribed.

(e) Right to Lien- In terms of the general principles of law, any person having the lawful possession of somebody else's property, on which he has worked, may retain the property for non-payment of his dues on account of the work done on the property. On this premise, auditor can exercise lien on books and documents placed at his possession by the client for non-payment of fees, for work done on the books and documents. The Institute of Chartered Accountants in England and Wales has expressed a similar view on the following conditions:

- (i) Documents retained must belong to the client who owes the money.
- (ii) Documents must have come into possession of the auditor on the authority of the client. They must not have been received through irregular or illegal means. In case of a company client, they must be received on the authority of the Board of Directors.
- (iii) The auditor can retain the documents only if he has done work on the documents assigned to him.
- (iv) Such of the documents can be retained which are connected with the work on which fees have not been paid.

Under section 128 of the Act, books of account of a company must be kept at the registered office. These provisions ordinarily make it impracticable for the auditor to have possession of the books and documents. The company provides reasonable facility to auditor for inspection of the books of account by directors and others authorised to inspect under the Act. Taking an overall view of the matter, it seems that though legally, auditor may exercise right of lien in cases of companies, it is mostly impracticable for legal and practicable constraints. His working papers being his own property, the question of lien, on them does not arise.

SA 230 issued by ICAI on Audit Documentation (explanatory text, A- 25), "Standard on Quality Control (SQC) 1, "Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements", issued by the Institute, provides that, unless otherwise specified by law or regulation, audit documentation is the property of the auditor. He may at his discretion, make portions of, or extracts from, audit documentation available to clients, provided such disclosure does not undermine the validity of the work performed, or, in the case of assurance engagements, the independence of the auditor or of his personnel."

6.8.1 Powers / Rights of Comptroller and Auditor-General of India

Section 143(5) of the Act states that, in the case of a Government company or any other company owned or controlled, directly or indirectly, by the Central Government, or by any State Government or Governments, or partly by the Central Government and partly by one or more State Governments, the comptroller and Auditor-General of India shall appoint the auditor under sub-section (5) or sub-section (7) of section 139 i.e. appointment of First Auditor or Subsequent Auditor (discuss in the beginning of the chapter) and direct such auditor the manner in which the accounts of the company are required to be audited and thereupon the auditor so appointed shall submit a copy of the audit report to the Comptroller and Auditor-General of India which, among other things, include the directions, if any, issued by the Comptroller and Auditor-General of India, the action taken thereon and its impact on the accounts and financial statement of the company.

The Comptroller and Auditor-General of India shall within 60 days from the date of receipt of the audit report have a right to,

- (a) **conduct a supplementary audit under section 143(6)(a)**, of the financial statement of the company by such person or persons as he may authorize in this behalf; and for the purposes of such audit, require information or additional information to be furnished to any person or persons, so authorised, on such matters, by such person or persons, and in such form, as the Comptroller and Auditor-General of India may direct; and
- (b) **comment upon or supplement such audit report under section 143(6)(b).**

It may be noted that any comments given by the Comptroller and Auditor-General of India upon, or supplement to, the audit report shall be sent by the company to every person entitled to copies of audited financial statements under sub-section (1) of section 136 i.e. every member of the company, to every trustee for the debenture-holder of any debentures

6.27 Advanced Auditing and Professional Ethics

issued by the company, and to all persons other than such member or trustee, being the person so entitled and also be placed before the annual general meeting of the company at the same time and in the same manner as the audit report.

Test Audit under section 143(6)(b): Further, without prejudice to the provisions relating to audit and auditor, the Comptroller and Auditor- General of India may, in case of any company covered under sub-section (5) or sub-section (7) of section 139, if he considers necessary, by an order, cause test audit to be conducted of the accounts of such company and the provisions of section 19A of the Comptroller and Auditor-General's (Duties, Powers and Conditions of Service) Act, 1971, shall apply to the report of such test audit.

6.9 Duties of Auditors

Sections 143 of the Companies Act, 2013 specifies the duties of an auditor of a company in a quite comprehensive manner. It is noteworthy that scope of duties of an auditor has generally been extending over all these years.

1. Duty of Auditor to Inquire on certain matters: It is the duty of auditor to inquire into the following matters-

- (a) whether loans and advances made by the company on the basis of security have been properly secured and whether the terms on which they have been made are prejudicial to the interests of the company or its members;
- (b) whether transactions of the company which are represented merely by book entries are prejudicial to the interests of the company;
- (c) where the company not being an investment company or a banking company, whether so much of the assets of the company as consist of shares, debentures and other securities have been sold at a price less than that at which they were purchased by the company;
- (d) whether loans and advances made by the company have been shown as deposits;
- (e) whether personal expenses have been charged to revenue account;
- (f) where it is stated in the books and documents of the company that any shares have been allotted for cash, whether cash has actually been received in respect of such allotment, and if no cash has actually been so received, whether the position as stated in the account books and the balance sheet is correct, regular and not misleading.

The opinion of the Research Committee of the Institute of Chartered Accountants of India on section 143(1) is reproduced below:

"The auditor is not required to report on the matters specified in sub-section (1) unless he has any special comments to make on any of the items referred to therein. If he is satisfied as a result of the inquiries, he has no further duty to report that he is so satisfied. In such a case, the content of the Auditor's Report will remain exactly the same as the auditor has to inquire and apply his mind to the information elicited by the enquiry, in deciding whether or not any reference needs to be made in his report. In our opinion, it is in this light that the auditor has to consider

his duties under section 143(1).”

Therefore, it could be said that the auditor should make a report to the members in case he finds answer to any of these matters in adverse.

2. Duty to Sign the Audit Report: As per section 145 of the Companies Act, 2013, the person appointed as an auditor of the company shall sign the auditor's report or sign or certify any other document of the company, in accordance with the provisions of sub-section (2) of section 141 and the qualifications, observations or comments on financial transactions or matters, which have any adverse effect on the functioning of the company mentioned in the auditors' report shall be read before the company in general meeting and shall be open to inspection by any member of the company.

3. Duty to comply with Auditing Standards: As per sub-section (9) of section 143 of the Companies Act, 2013, every auditor shall comply with the auditing standards. Further as per sub-section 10 of section 143 of the Act, the Central Government may prescribe the standards of auditing or any addendum thereto, as recommended by the Institute of Chartered Accountants of India, constituted under section 3 of the Chartered Accountants Act, 1949, in consultation with and after examination of the recommendations made by the National Financial Reporting Authority. Students may note that until any auditing standards are notified, any standard, or standards of auditing specified by the Institute of Chartered Accountants of India shall be deemed to be the auditing standards.

4. Duty to audit report: As per sub-section (3) of section 143, the auditor's report shall also state –

- (a) whether he has sought and obtained all the information and explanations which to the best of his knowledge and belief were necessary for the purpose of his audit and if not, the details thereof and the effect of such information on the financial statements;
- (b) whether, in his opinion, proper books of account as required by law have been kept by the company so far as appears from his examination of those books and proper returns adequate for the purposes of his audit have been received from branches not visited by him;
- (c) whether the report on the accounts of any branch office of the company audited under sub-section (8) by a person other than the company's auditors has been sent to him under the proviso to that sub-section and the manner in which he has dealt with it in preparing his report;
- (d) whether the company's balance sheet and profit and loss account dealt with in the report are in agreement with the books of account and returns;
- (e) whether, in his opinion, the financial statements comply with the accounting standards;
- (f) the observations or comments of the auditors on financial transactions or matters which have any adverse effect on the functioning of the company;
- (g) whether any director is disqualified from being appointed as a director under sub-section

6.29 Advanced Auditing and Professional Ethics

- (2) of the section 164;
- (h) any qualification, reservation or adverse remark relating to the maintenance of accounts and other matters connected therewith;
 - (i) whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls;
 - (j) such other matters as may be prescribed. Rule 11 of the Companies (Audit and Auditors) Rules, 2014 prescribes the other matters to be included in auditor's report. The auditor's report shall also include their views and comments on the following matters, namely:-
 - (i) whether the company has disclosed the impact, if any, of pending litigations on its financial position in its financial statement;
 - (ii) whether the company has made provision, as required under any law or accounting standards, for material foreseeable losses, if any, on long term contracts including derivative contracts;
 - (iii) whether there has been any delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the company.

[Notes: (1) Students may note that the auditor is also required to report on certain additional matters specified under Companies (Auditor's Report) Order, 2016 which is discussed in Chapter 8 on Audit Report.

(2) Students are also required to refer Guidance note on Reporting under section 143(3)(f) and (h) of the Companies Act, 2013.]

5. Duty to report on frauds:

A. Reporting to the Central Government- As per sub-section (12) of section 143 of the Companies Act, 2013, if an auditor of a company in the course of the performance of his duties as auditor, has reason to believe that an offence of fraud involving such amount or amounts as may be prescribed, is being or has been committed in the company by its officers or employees, the auditor shall report the matter to the Central Government within such time and in such manner as may be prescribed.

In this regard, Rule 13 of the Companies (Audit and Auditors) Rules, 2014 has been prescribed. Sub-rule (1) of the Rule 13 states that if an auditor of a company, in the course of the performance of his duties as statutory auditor, has reason to believe that an offence of fraud, which involves or is expected to involve individually an amount of ₹1 crore or above, is being or has been committed against the company by its officers or employees, the auditor shall report the matter to the Central Government.

The manner of reporting the matter to the Central Government is as follows:

- (a) **the auditor shall report the matter to the Board or the Audit Committee, as the case may be, immediately but not later than 2 days of his knowledge of the fraud, seeking their reply or observations within 45 days;**

- (b) on receipt of such reply or observations, the auditor shall forward his report and the reply or observations of the Board or the Audit Committee along with his comments (on such reply or observations of the Board or the Audit Committee) to the Central Government within 15 days from the date of receipt of such reply or observations;
- (c) in case the auditor fails to get any reply or observations from the Board or the Audit Committee within the stipulated period of 45 days, he shall forward his report to the Central Government along with a note containing the details of his report that was earlier forwarded to the Board or the Audit Committee for which he has not received any reply or observations;
- (d) the report shall be sent to the Secretary, Ministry of Corporate Affairs in a sealed cover by Registered Post with Acknowledgement Due or by Speed Post followed by an e-mail in confirmation of the same;
- (e) the report shall be on the letter-head of the auditor containing postal address, e-mail address and contact telephone number or mobile number and be signed by the auditor with his seal and shall indicate his Membership Number; and
- (f) the report shall be in the form of a statement as specified in Form ADT-4.

B. Reporting to the Audit Committee or Board- Sub-section (12) of section 143 of the Companies Act, 2013 further prescribes that in case of a fraud involving lesser than the specified amount [i.e. less than ₹1 crore], the auditor shall report the matter to the audit committee constituted under section 177 or to the Board in other cases within such time and in such manner as may be prescribed.

In this regard, sub-rule (3) of Rule 13 of the Companies (Audit and Auditors) Rules, 2014 states that in case of a fraud involving lesser than the amount specified in sub-rule (1) [i.e. less than ₹ 1 crore], the auditor shall report the matter to Audit Committee constituted under section 177 or to the Board immediately but not later than 2 days of his knowledge of the fraud and he shall report the matter specifying the following:

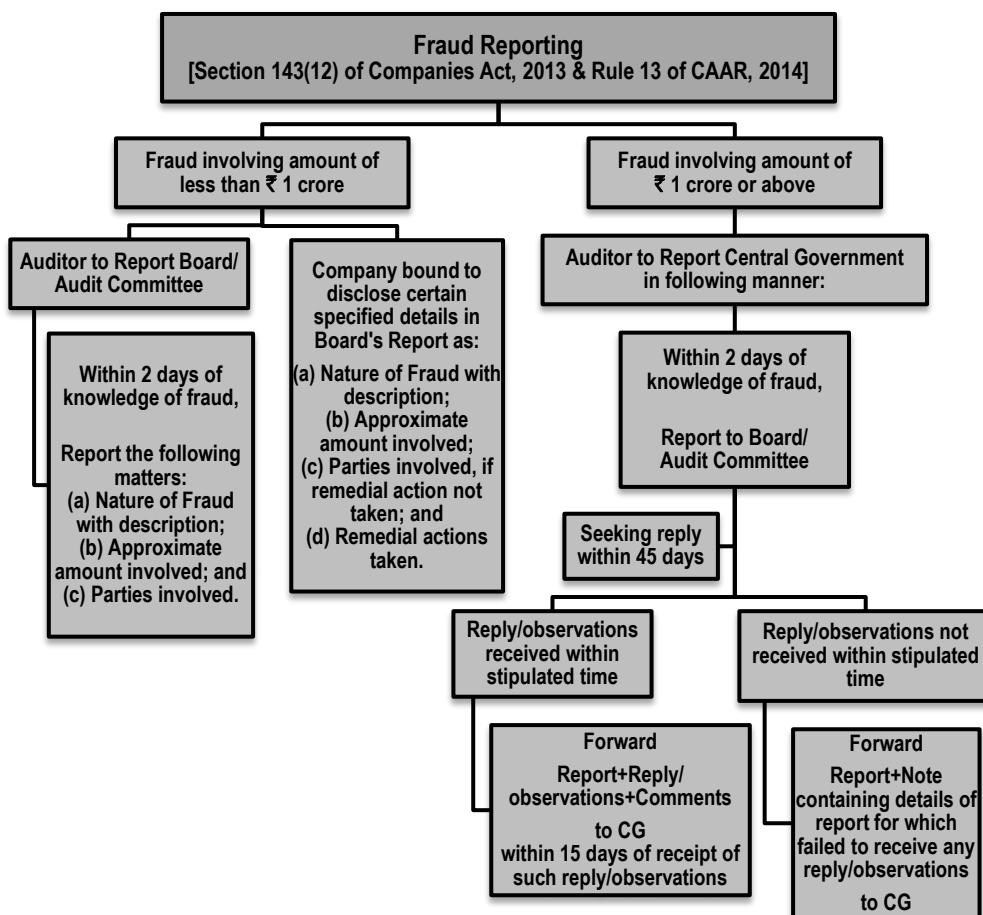

- (a) Nature of Fraud with description;
- (b) Approximate amount involved; and
- (c) Parties involved.

C. Disclosure in the Board's Report: Sub-section (12) of section 143 of the Companies Act, 2013 furthermore prescribes that the companies, whose auditors have reported frauds under this sub-section (12) to the audit committee or the Board, but not reported to the Central Government, shall disclose the details about such frauds in the Board's report in such manner as may be prescribed.

In this regard, sub-rule (4) of Rule 13 of the Companies (Audit and Auditors) Rules, 2014 states that the company is required to disclose in the Board's Report the

following details of each of the fraud reported to the Audit Committee or the Board under sub-rule (3) during the year:

- (a) Nature of Fraud with description;
- (b) Approximate Amount involved;
- (c) Parties involved, if remedial action not taken; and
- (d) Remedial actions taken.

Sub-section (13) of section 143 of the Companies Act, 2013 safeguards the act of fraud reporting by the auditor if it is done in good faith. It states that no duty to which an auditor of a company may be subject to shall be regarded as having been contravened by reason of his reporting the matter above if it is done in good faith.

It is very important to note that the provisions regarding fraud reporting shall also apply, mutatis mutandis, to a cost auditor and a secretarial auditor during the performance of his duties under section 148 and section 204 respectively. If any auditor, cost accountant or company secretary in practice do not comply with the provisions of sub-section (12) of section 143, he shall be punishable with fine which shall not be less than one lakh rupees but which may extend to twenty-five lakh rupees).

The auditor is also required to report under clause (x) of paragraph 3 of Companies (Auditor's Report) Order, 2016 [CARO, 2016], whether any fraud by the company or any fraud on the Company by its officers or employees has been noticed or reported during the year. If yes, the nature and the amount involved is to be indicated.

The Auditing and Assurance Standards Board of the ICAI has issued the Guidance Note on Reporting on Fraud under Section 143(12) of the Companies Act, 2013 to provide guidance to the members on this new reporting requirement.

The definition of fraud as per SA 240 and the explanation of fraud as per Section 447 of the 2013 Act are similar, except that under section 447, fraud includes 'acts with an intent to injure the interests of the company or its shareholders or its creditors or any other person, whether or not there is any wrongful gain or wrongful loss.' However, an auditor may not be able to detect acts that have intent to injure the interests of the company or cause wrongful gain or wrongful loss, unless the financial effects of such acts are reflected in the books of account/financial statements of the company. For example,

(i) an auditor may not be able to detect if an employee is receiving pay-offs for favoring a specific vendor, which is a fraudulent act, since such pay-offs would not be recorded in the books of account of the company;

(ii) if the password of a key managerial personnel is stolen and misused to access confidential/restricted information, the effect of the same may not be determinable by the management or by the auditor;

Therefore, the auditor shall consider the requirements of the SAs, insofar as it relates to the risk of fraud, including the definition of fraud as stated in SA 240, in planning and performing his audit procedures in an audit of financial statements to address the risk of material misstatement due to fraud.

[Note: Students are required to refer Guidance note on Reporting on Fraud under Section 143(12) of the Companies Act, 2013 for detailed knowledge.]

Example: The head accountant of a company entered fake invoices of credit purchases in the books of account aggregate of ₹ 50 lakh and cleared all the payments to such bogus creditor. Here, the auditor of the company is required to report the fraudulent activity to the Board or Audit Committee (as the case may be) within 2 days of his knowledge of fraud. Further, the company is also required to disclose the same in Board's Report.

It may be noted that the auditor need not to report the central government as the amount of fraud involved is less than ₹1 crore, however, reporting under CARO, 2016 is required.

6.33 Advanced Auditing and Professional Ethics

6. Duty to report on any other matter specified by Central Government: The Central Government may, in consultation with the National Financial Reporting Authority (NFRA), by general or special order, direct, in respect of such class or description of companies, as may be specified in the order, that the auditor's report shall also include a statement on such matters as may be specified therein.

However, as per the notification dated 29.03.2016, till the time NFRA is constituted, the Central Government may hold consultation required under this sub-section with the Committee chaired by an officer of the rank of Joint Secretary or equivalent in the MCA and the Committee shall have the representatives from the ICAI and Industry Chambers and also special invitees from the National Advisory Committee on Accounting Standards (NACAS) and the office of the C&AG.

7. Duties and powers of the company's auditor with reference to the audit of the branch and the branch auditor are discussed separately in the chapter under heading 6.13 branch audit.

8. Duty to state the reason for qualification or negative report: As per sub-section (4) of section 143, where any of the matters required to be included in the audit report is answered in the negative or with a qualification, the report shall state the reasons there for.

6.9.1 Other Duties under Companies Act, 2013

The following are the other duties of an auditor under Companies Act 2013 -

(i) **Register of charges** - Every company under Section 85 is required to keep a Register of charges at its registered office to enter therein particulars of all the charges registered with the Registrar on any of the property, assets or undertaking of the company and the particulars of any property acquired subject to a charge as well as particulars of any modification of a charge and satisfaction of charge. The entries in the register of charges maintained by the company shall be made forthwith after the creation, modification or satisfaction of charge, as the case may be. Entries in the register shall be authenticated by a director or the secretary of the company or any other person authorised by the Board for the purpose. The register of charges shall be preserved permanently and the instrument creating a charge or modification thereon shall be preserved for a period of eight years from the date of satisfaction of charge by the company. The register kept under this section shall be kept open for inspection during business hours. This register should be examined by the auditor to ascertain whether any of the assets belonging to the company except bearer securities, is subject to charge, and, if so, its nature.

Where the instrument creating or modifying a charge is not filed within a period of 300 days from the date of its creation (including acquisition of a property subject to a charge) or modification and where the satisfaction of the charge is not filed within 30 days from the date on which such payment of satisfaction, the Registrar shall not register the same unless the delay is condoned by the Central Government. The application for condonation of delay shall be filed with the Central Government in relevant Form along with the fee.

(ii) Register of contracts with companies and firms in which the directors are interested - This Register is maintained pursuant to sub-section (1) of Section 189. It contains a record of particulars of all contracts or arrangements that attract the provisions of Sections 184 and 188.

Every Director or key managerial personnel shall within a period of 30 days of his appointment, or relinquishment of his office, as the case may be disclose to the company the particulars related to his concern or interest in the associations which are required to be included in the register. The particulars of the company or companies or bodies corporate in which a director himself together with any other director holds not more than 2 percent of the paid-up share capital would not be required to be entered in the register.

The register shall be kept at the registered office of the company and the register shall be preserved permanently and shall be kept in the custody of the company secretary of the company or any other person authorised by the Board for the purpose.

The company shall provide extracts from such register to a member of the company on his request, within 7 days from the date on which such request is made upon the payment of such fee as may be specified in the articles of the company but not exceeding ten rupees per page.

The provisions of Section 189 are not applicable to; (a) contracts or arrangements for the sale or purchase or supply of goods, materials or services, if the value or cost thereof in any year does not exceed ₹ 5,00,000 in aggregate; and (b) contracts or arrangements by banking companies for the collection of bills in the ordinary course of business.

It is the duty of the auditor to examine the Register to find out whether transactions of purchase or sale of goods in which a director or directors were interested were entered into under the sanction of the Board and the directors concerned had disclosed their interest.

(iii) Register of investment or loan made, guarantee given or security provided in relation to any body corporate - In pursuance of sub-section (9) of Section 186, every company giving loan or giving guarantee or providing security or making an acquisition of securities shall, from the date of its incorporation, maintain a register in **Form MBP 2** and enter therein separately, the particulars of loans and guarantees given, securities provided and acquisitions made as aforesaid.

The register shall be kept at the registered office of the company and the register shall be preserved permanently and shall be kept in the custody of the company secretary of the company or any other person authorised by the Board for the purpose.

The entries in the register shall be made chronologically in respect of each such transaction within 7 days of making such loan or giving guarantee or providing security or making acquisition.

The extracts from the register maintained may be furnished to any member of the company on payment of such fee as may be prescribed in the Articles of the company which shall not exceed ten rupees for each page.

(iv) Register of investments held in the names of Nominees - Normally, a company is expected to hold investments in its own name [Section 187]. But where in pursuance of Section-

6.35 Advanced Auditing and Professional Ethics

187(2)(d), any shares or securities in which investments have been made by a company are not held by it in its own name, the company shall maintain a register which shall contain particulars of investments in shares or other securities beneficially held by the company but which are not held in its own name and the company shall also record the reasons for not holding the investments in its own name and the relationship or contract under which the investment is held in the name of any other person. The company is also required to record whether such investments are held in a third party's name for the time being or otherwise. The register shall be maintained at the registered office of the company. It shall be preserved permanently and shall be kept in the custody of the company secretary of the company or if there is no company secretary, any director or any other officer authorised by the Board for the purpose.

The auditor should examine the register during the course of inspection of securities.

(v) Register of directors and key managerial personnel and their shareholding - Under the provisions of Section 170(1) of the Companies Act, 2013, it is obligatory for a company to maintain a record, in a register containing particulars of the directors and key managerial personnel which shall include the details of securities held by each of them in the company or its holding, subsidiary, subsidiary of company's holding company or associate companies.

Under Sub-section (2) of the aforesaid section, a return containing the particulars of appointment of director or key managerial personnel and changes therein, shall be filed with the Registrar in **Form DIR-12** along with such fee as may be provided in the Companies (Registration Offices and Fees) Rules, 2014 within 30 days of such appointment or change, as the case may be.

The auditor should refer to this register to find out the names of persons who had held different offices during the year under audit to confirm that various transactions entered into by the company have been authorised by a competent person.

(vi) Managerial Remuneration - Disclosure in the accounts is made.

A note showing the computation of net profits in accordance with Section 198 of the Act with relevant details of calculation of the commission payable by way of such profits the directors (including managing directors or managers) should be given.

Personal expenses of Directors - All payments to directors by way of remuneration or perquisites whether in the case of a public or private company are required to be authorised both in accordance with the provisions of the Companies Act and Articles of Association of the company. In some cases, depending upon the provisions contained in the Articles, the remuneration may require sanction of the shareholders either by an ordinary or special resolution while, in other cases, it may require only approval of the Directors. If the terms of appointment of a director include payment of expenses of personal nature then such expenses can be incurred by the company. Where, however, the contract with the director or the conditions of employment does not contain any provision for payment of expenses of a personal nature, then there is no warrant for incurring or reimbursement of such expenses by the company and if such expenses are paid the auditor should disclose the fact in his report, as also in the accounts. Attention in this regard is invited to Section 143(1)(e) of the Companies Act.

(vii) Loan and investment by company (Section 186) –

(1) Section 186(1) of the Act states that a company shall make investment through not more than two layers of investment companies.

'Layer' in relation to a holding company means its subsidiary or subsidiaries [Explanation (d) of Section 2(87) of the Companies Act, 2013].

(2) No company shall directly or indirectly:

- (a) give any loan to any person or any other body corporate;
- (b) give any guarantee, or provide security in connection with a loan to any other person or body corporate; and
- (c) acquire by way of subscription, purchase or otherwise, the securities of any other body corporate,

exceeding 60 per cent of its paid-up share capital, free reserves and securities premium account or one hundred per cent of its free reserves and securities premium account, whichever is more.

It may be noted that where the giving of any loan or guarantee or providing any security or the acquisition exceeds the limits specified in that sub-section, prior approval shall be necessary by means of a special resolution passed at a general meeting.

The company is required to disclose to the members in the financial statement the full particulars of the loan given, investment made or guarantee given or security provided and the purpose for which the same mentioned above proposed to be utilized by the recipient of the loan or guarantee or security.

(3) The company cannot make investment, or give loan or guarantee or security unless the resolution sanctioning it is passed at the Board meeting with the consent of all the Directors present at the meeting and the prior approval of the public financial institution (PFI) concerned where any term loan is subsisting is obtained. It is provided that the prior approval of PFI shall not be required where the aggregate of the loans and investments so far made, the amount for which guarantee or security so far provided to or in all other bodies corporate, along with the investments, loans, guarantee or security proposed to be made or given does not exceed the limit as specified in sub-section (2), and there is no default in repayment of loan instalments or payment of interest thereon as per the terms and conditions of such loan to the PFI.

As per the Companies Act, 'Public Financial Institution' means:

- (i) the Life Insurance Corporation of India, established under section 3 of the Life Insurance Corporation Act, 1956;
- (ii) the Infrastructure Development Finance Company Limited, referred to in clause (vi) of sub-section (1) of section 4A of the Companies Act, 1956 so repealed under section 465 of this Act;
- (iii) specified company referred to in the Unit Trust of India (Transfer of Undertaking and Repeal) Act, 2002;
- (iv) institutions notified by the Central Government under sub-section (2) of section 4A of the

6.37 Advanced Auditing and Professional Ethics

Companies Act, 1956 so repealed under section 465 of this Act;

- (v) such other institution as may be notified by the Central Government in consultation with the Reserve Bank of India:

Students may note that no institution shall be so notified unless—

- (A) it has been established or constituted by or under any Central or State Act; or
(B) not less than fifty-one percent of the paid-up share capital is held or controlled by the Central Government or by any State Government or Governments or partly by the Central Government and partly by one or more State Governments.

(4) The Companies which are registered under section 12 of the Securities and Exchange Board of India act, 1992 and covered under such class or classes of companies as may be prescribed shall not take inter-corporate loan or deposits exceeding prescribed limit and such company shall furnish in its financial statement the details of the loan or deposits.

(5) No loan under this section shall be given at a rate of interest lower than the prevailing yield of one year, three year, five year or ten year Government Security closest to the tenor of the loan.

(6) No company, which has defaulted in repayment of any deposits accepted before or after the commencement of this Act or in payment of interest thereon, shall give any loan or guarantee, or provide any security or make an acquisition till such default is subsisting.

(7) Every company giving loan or giving guarantee or providing security or making an acquisition of securities shall, from the date of its incorporation, maintain a register in **Form MBP 2** and enter therein separately, the particulars of loans and guarantees given, securities provided and acquisitions made as aforesaid.

(8) The register shall be kept at the registered office of the company and the register shall be preserved permanently and shall be kept in the custody of the company secretary of the company or any other person authorised by the Board for the purpose.

The entries in the register shall be made chronologically in respect of each such transaction within 7 days of making such loan or giving guarantee or providing security or making acquisition.

The extracts from the register maintained may be furnished to any member of the company on payment of such fee as may be prescribed in the Articles of the company which shall not exceed ten rupees for each page.

(9) Nothing contained in this section, except sub-section (1) shall apply to—

- a loan made, guarantee given or security provided by a banking company or an insurance company or a housing finance company in the ordinary course of its business or a company engaged in the business of financing of companies or of providing infrastructural facilities.

- any acquisition made by a non-banking financial company registered under Chapter IIIB of the Reserve Bank of India Act, 1934 and whose principal business is acquisition of securities.
- any acquisition made by a company whose principal business is the acquisition of securities.
- any acquisition of shares allotted in pursuance of clause (a) of sub-section (1) of section 62.

(10) The Central Government may make rules for the purpose of this section from time to time.

(11) If a company contravenes the provisions of this section, the company shall be punishable with fine which shall not be less than twenty-five thousand rupees but which may extend to five lakh rupees and every officer of the company who is in default shall be punishable with imprisonment for a term which may extend to two years and with fine which shall not be less than twenty-five thousand rupees but which may extend to one lakh rupees.

[Explanation: “free reserves” means those reserves which, as per latest audited balance sheet of the company, are free for distribution as dividend and shall not include any other amount shown as a reserve or otherwise representing unrealised gains, notional gains or revaluation of assets; or any change in carrying amount of an asset or of a liability recognized in equity, including surplus in statement of profit and loss on measurement of the asset or the liability at fair value.]

6.10 Audit Report

Auditor’s Report - An audit report should be clear, specific and complete, in order that anyone who has an occasion to read it may know exactly what is wrong with the company. An Auditor who gives the shareholders “the means of information” in respect of company’s financial position, does so, at his peril and runs the serious risk of being held judicially to have failed to discharge his duty (Lindley L.J in Re London and General Bank).

The auditor should review and assess the conclusions drawn from the audit evidence obtained as the basis for the expression of an opinion on the financial statements. This review and assessment involves considering whether the financial statements have been prepared in accordance with an acceptable financial reporting framework applicable to the entity under audit. It is also necessary to consider whether the financial statements comply with the relevant statutory requirements.

The auditor’s report should contain a clear written expression of opinion on the financial statements taken as a whole.

(Students may refer Chapter 8 on Audit Report for detailed reporting requirements)

6.11 Disclosure in the Auditor’s Report

The following paragraphs deal with the manner of qualification and the manner of disclosure, if any, to be made in the auditor’s report.

AS-1 – Disclosure of Accounting Policies

In the case of a company, members should qualify their audit reports in case –

- (a) accounting policies required to be disclosed under Revised Schedule VI or any other provisions of the Companies Act, 1956 have not been disclosed (now Schedule III to the Companies Act, 2013), or
- (b) accounts have not been prepared on accrual basis, or
- (c) the fundamental accounting assumption of going concern has not been followed and this fact has not been disclosed in the financial statements, or
- (d) proper disclosures regarding changes in the accounting policies have not been made.

Where a company has been given a specific exemption regarding any of the matters stated above but the fact of such exemption has not been adequately disclosed in the accounts, the member should mention the fact of exemption in his audit report without necessarily making it a subject matter of audit qualification.

In view of the above, the auditor will have to consider different circumstances whether the audit report has to be qualified or only disclosures have to be given.

In the case of enterprises not governed by the Companies Act, the member should examine the relevant statute and make suitable qualification in his audit report in case adequate disclosures regarding accounting policies have not been made as per the statutory requirements. Similarly, the member should examine if the fundamental accounting assumptions have been followed in preparing the financial statements or not. In appropriate cases, he should consider whether, keeping in view the requirements of the applicable laws, a qualification in his report is necessary.

In the event of non-compliance by enterprises not governed by the Companies Act, in situations where the relevant statute does not require such disclosures to be made, the member should make adequate disclosure in his audit report without necessarily making it a subject matter of audit qualification.

In making a qualification/disclosure in the audit report, the auditor should consider the materiality of the relevant item. Thus, the auditor need not make qualification / disclosure in respect of items which, in his judgement, are not material.

A disclosure, which is not a subject matter of audit qualification, should be made in the auditor's report in a manner that it is clear to the reader that the disclosure does not constitute an audit qualification. The paragraph containing the auditor's opinion on true and fair view should not include a reference to the paragraph containing the aforesaid disclosure.

6.12 Joint Audit

The practice of appointing Chartered Accountants as joint auditors is quite widespread in big companies and corporations. Joint audit basically implies pooling together the resources and expertise of more than one firm of auditors to render an expert job in a given time period which may be difficult to accomplish acting individually. It essentially involves sharing of the total work.

This is by itself a great advantage.

In specific terms the **advantages** that flow may be the following:

- (i) Sharing of expertise.
- (ii) Advantage of mutual consultation.
- (iii) Lower workload.
- (iv) Better quality of performance.
- (v) Improved service to the client.
- (vi) Displacement of the auditor of the company taken over in a take - over often obviated.
- (vii) In respect of multi-national companies, the work can be spread using the expertise of the local firms which are in a better position to deal with detailed work and the local laws and regulations.
- (viii) Lower staff development costs.
- (ix) Lower costs to carry out the work.
- (x) A sense of healthy competition towards a better performance.

The general **disadvantages** may be the following:

- (i) The fees being shared.
- (ii) Psychological problem where firms of different standing are associated in the joint audit.
- (iii) General superiority complexes of some auditors.
- (iv) Problems of co-ordination of the work.
- (v) Areas of work of common concern being neglected.
- (vi) Uncertainty about the liability for the work done.

With a view to providing a clear idea of the professional responsibility undertaken by the joint auditors, the Institute of Chartered Accountants of India had issued a statement on the Responsibility of Joint Auditors which now stands withdrawn with the issuance of SA 299, "Responsibility of Joint Auditors" w.e.f. April, 1996. It requires that where joint auditors are appointed, they should, by mutual discussion, divide the audit work among themselves. The division of work would usually be in terms of audit of identifiable units or specified areas. In some cases, due to the nature of the business of the entity under audit, such a division of work may not be possible. In such situations, the division of work may be with reference to items of assets or liabilities or income or expenditure or with reference to periods of time. Certain areas of work, owing to their importance or owing to the nature of the work involved, would often not be divided and would be covered by all the joint auditors. Further, it states that in respect of audit work divided among the joint auditors, each joint auditor is responsible only for the work allocated to him, whether or not he has prepared a separate report on the work performed by him. On the other hand, all the joint auditors are jointly and severally responsible –

- (a) in respect of the audit work which is not divided among the joint auditors and is carried out

6.41 Advanced Auditing and Professional Ethics

by all of them;

(b) in respect of decisions taken by all the joint auditors concerning the nature, timing or extent of the audit procedures to be performed by any of the joint auditors. It may, however, be clarified that all the joint auditors are responsible only in respect of the appropriateness of the decisions concerning the nature, timing or extent of the audit procedures agreed upon among them; proper execution of these audit procedures is the separate and specific responsibility of the joint auditor concerned;

(c) in respect of matters which are brought to the notice of the joint auditors by any one of them and on which there is an agreement among the joint auditors;

(d) for examining that the financial statements of the entity comply with the disclosure requirements of the relevant statute; and

(e) for ensuring that the audit report complies with the requirements of the relevant statute.

If any matters of the nature referred above are brought to the attention of the entity or other joint auditors by an auditor after the audit report has been submitted, the other joint auditors would not be responsible for those matters.

[Note: Student may refer SA 299 “Responsibility of Joint Auditors” reproduced in “Auditing Pronouncements” for comprehensive knowledge.]

6.13 Audit of Branch Office Accounts

As per section 128(1) of the Companies Act, 2013, every company shall prepare and keep at its registered office books of account and other relevant books and papers and financial statement for every financial year which give a true and fair view of the state of the affairs of the company, including that of its branch office or offices, if any, and explain the transactions effected both at the registered office and its branches and such books shall be kept on accrual basis and according to the double entry system of accounting.

It may be noted that all or any of the books of account aforesaid and other relevant papers may be kept at such other place in India as the Board of Directors may decide and where such a decision is taken, the company shall, within 7 days thereof, file with the Registrar a notice in writing giving the full address of that other place.

Students may also note that the company may keep such books of account or other relevant papers in electronic mode in such manner as may be prescribed.

Sub-section (2) provides that where a company has a branch office in India or outside India, it shall be deemed to have complied with the provisions of sub-section (1), if proper books of account relating to the transactions effected at the branch office are kept at that office and proper summarised returns periodically are sent by the branch office to the company at its registered office or the other place referred in (1).

Further, **sub-section (8) of section 143 of the Companies Act, 2013**, prescribes the duties and powers of the company's auditor with reference to the audit of the branch and the branch auditor. Where a company has a branch office, the accounts of that office shall be audited either

by the auditor appointed for the company (herein referred to as the company's auditor) under this Act or by any other person qualified for appointment as an auditor of the company under this Act and appointed as such under section 139, or where the branch office is situated in a country outside India, the accounts of the branch office shall be audited either by the company's auditor or by an accountant or by any other person duly qualified to act as an auditor of the accounts of the branch office in accordance with the laws of that country and the duties and powers of the company's auditor with reference to the audit of the branch and the branch auditor, if any, shall be such as may be prescribed.

It may be noted that the branch auditor shall prepare a report on the accounts of the branch examined by him and send it to the auditor of the company who shall deal with it in his report in such manner as he considers necessary.

Further as per **Rule 12 of the Companies (Audit and Auditors) Rules, 2014**, the branch auditor shall submit his report to the company's auditor and reporting of fraud by the auditor shall also extend to such branch auditor to the extent it relates to the concerned branch.

Using the Work of another Auditor: When the accounts of the branch are audited by a person other than the company's auditor, there is need for a clear understanding of the role of such auditor and the company's auditor in relation to the audit of the accounts of the branch and the audit of the company as a whole; also, there is great necessity for a proper rapport between these two auditors for the purpose of an effective audit. In recognition of these needs, the Council of the Institute of Chartered Accountants of India has dealt with these issues in **SA 600, "Using the Work of another Auditor"**. It makes clear that in certain situations, the statute governing the entity may confer a right on the principal auditor to visit a component and examine the books of account and other records of the said component, if he thinks it necessary to do so. Where another auditor has been appointed for the component, the principal auditor would normally be entitled to rely upon the work of such auditor unless there are special circumstances to make it essential for him to visit the component and/or to examine the books of account and other records of the said component. Further, it requires that the principal auditor should perform procedures to obtain sufficient appropriate audit evidence, that the work of the other auditor is adequate for the principal auditor's purposes, in the context of the specific assignment. When using the work of another auditor, the principal auditor should ordinarily perform the following procedures:

- (a) advise the other auditor of the use that is to be made of the other auditor's work and report and make sufficient arrangements for co-ordination of their efforts at the planning stage of the audit. The principal auditor would inform the other auditor of matters such as areas requiring special consideration, procedures for the identification of inter-component transactions that may require disclosure and the time-table for completion of audit; and
- (b) advise the other auditor of the significant accounting, auditing and reporting requirements and obtain representation as to compliance with them.

The principal auditor might discuss with the other auditor the audit procedures applied or review a written summary of the other auditor's procedures and findings which may be in the form of a

6.43 Advanced Auditing and Professional Ethics

completed questionnaire or check-list. The principal auditor may also wish to visit the other auditor. The nature, timing and extent of procedures will depend on the circumstances of the engagement and the principal auditor's knowledge of the professional competence of the other auditor. This knowledge may have been enhanced from the review of the previous audit work of the other auditor.

6.14 Cost Audit

It is an audit process for verifying the cost of manufacture or production of any article, on the basis of accounts as regards utilisation of material or labour or other items of costs, maintained by the company.

Cost Audit: Cost Audit is covered by Section 148 of the Companies Act, 2013. The audit conducted under this section shall be in addition to the audit conducted under section 143.

As per section 148, the Central Government may by order specify audit of items of cost in respect of certain companies.

Further, the Central Government may, by order, in respect of such class of companies engaged in the production of such goods or providing such services as may be prescribed, direct that particulars relating to the utilisation of material or labour or to other items of cost as may be prescribed shall also be included in the books of account kept by that class of companies.

It may be noted that the Central Government shall, before issuing such order in respect of any class of companies regulated under a special Act, consult the regulatory body constituted or established under such special Act.

In this regard, the Central Government has notified the Companies (Cost Records and Audit) Rules, 2014 which prescribes the classes of companies required to include cost records in their books of account, applicability of cost audit, maintenance of records etc.

As per Rule 5 of the Companies (cost records and audit) Rules, 2014, every company under these rules including all units and branches thereof, shall, in respect of each of its financial year is required to maintain cost records in **Form CRA-1**. The cost records shall be maintained on regular basis in such manner as to facilitate calculation of per unit cost of production or cost of operations, cost of sales and margin for each of its products and activities for every financial year on monthly or quarterly or half-yearly or annual basis.

Additionally, as per clause (vi) to Paragraph 3 of the CARO, 2016, the auditor has to report whether maintenance of cost records has been specified by the Central Government under section 148(1) of the Companies Act, 2013 and whether such accounts and records have been so made and maintained.

Rule 6 of the Companies (Cost Records and Audit) Rules, 2014 requires the companies prescribed under the said Rules to appoint an Auditor within 180 days of the commencement of every financial year. ***However, before such appointment is made, the written consent of the cost auditor to such appointment and a certificate from him or it shall be obtained.*** Every referred company shall inform the cost auditor concerned of his or its appointment as such and file a notice of such

appointment with the Central Government within a period of 30 days of the Board meeting in which such appointment is made or within a period of 180 days of the commencement of the financial year, whichever is earlier, through electronic mode, in **Form CRA-2**, along with the fee as specified in Companies (Registration Offices and Fees) Rules, 2014.

The cost auditor appointed as such shall continue in such capacity till the expiry of 180 days from the closure of the financial year or till he submits the cost audit report, for the financial year for which he has been appointed.

The cost auditor shall submit the cost audit report along with his or its reservations or qualifications or observations or suggestions, if any, in **Form CRA-3**. He shall forward his duly signed report to the Board of Directors of the company within a period of 180 days from the closure of the financial year to which the report relates and the Board of Directors shall consider and examine such report particularly any reservation or qualification contained therein.

Duty to report on fraud: The provisions of sub-section (12) of section 143 of the Companies Act, 2013 and the relevant rules on duty to report on fraud shall apply *mutatis mutandis* to a cost auditor during performance of his functions under section 148 of the Act and these rules.

Cost Audit Rules not to apply in certain cases: The requirement for cost audit under these rules shall not be applicable to a company which is covered under rule 3, and,

- (i) whose revenue from exports, in foreign exchange, exceeds seventy five per cent of its total revenue; or
- (ii) which is operating from a special economic zone.
- (iii) which is engaged in generation of electricity for captive consumption through Captive Generating Plant.**

If the Central Government is of the opinion, that it is necessary to do so, it may, by order, direct that the audit of cost records of class of companies, which are covered under sub-section (1) and which have a net worth of such amount as may be prescribed or a turnover of such amount as may be prescribed, shall be conducted in the manner specified in the order.

Who can be cost auditor: The audit shall be conducted by a Cost Accountant in Practice who shall be appointed by the Board of such remuneration as may be determined by the members in such manner as may be prescribed.

Students may note that no person appointed under section 139 as an auditor of the company shall be appointed for conducting the audit of cost records.

It may also be noted that the auditor conducting the cost audit shall comply with the cost auditing standards ("cost auditing standards" mean such standards as are issued by the Institute of Cost and Works Accountants of India, constituted under the Cost and Works Accountants Act, 1959, with the approval of the Central Government).

Appointment and Remuneration of Cost Auditor: As per rule 14 of the Companies (Audit and Auditors) Rules, 2014,

6.45 Advanced Auditing and Professional Ethics

- (a) in the case of companies which are required to constitute an audit committee-
 - (i) the Board shall appoint an individual, who is a cost accountant in practice, or a firm of cost accountants in practice, as cost auditor on the recommendations of the Audit committee, which shall also recommend remuneration for such cost auditor;
 - (ii) the remuneration recommended by the Audit Committee under (i) shall be considered and approved by the Board of Directors and ratified subsequently by the shareholders;
- (b) in the case of other companies which are not required to constitute an audit committee, the Board shall appoint an individual who is a cost accountant in practice or a firm of cost accountants in practice as cost auditor and the remuneration of such cost auditor shall be ratified by shareholders subsequently.

Qualification, disqualification, rights, duties and obligations of Cost Auditor: The qualifications, disqualifications, rights, duties and obligations applicable to auditors under this Chapter shall, so far as may be applicable, apply to a cost auditor appointed under this section and it shall be the duty of the company to give all assistance and facilities to the cost auditor appointed under this section for auditing the cost records of the company.

It may be noted that the report on the audit of cost records shall be submitted by the cost accountant in practice to the Board of Directors of the company.

Submission of Cost Audit Report: A company shall within 30 days from the date of receipt of a copy of the cost audit report prepared (in pursuance of a direction issued by Central Government) furnish the Central Government with such report along with full information and explanation on every reservation or qualification contained therein, in **Form CRA-4 in Extensible Business Reporting Language (XBRL) format in the manner as specified in the Companies (Filing of Documents and Forms in Extensible Business Reporting language) Rules, 2015** along with fees specified in the Companies (Registration Offices and Fees) Rules, 2014. If, after considering the cost audit report referred to under this section and the information and explanation furnished by the company as above, the Central Government is of the opinion, that any further information or explanation is necessary, it may call for such further information and explanation and the company shall furnish the same within such time as may be specified by that Government.

Penal Provisions in case of default: If any default is made in complying with the provisions of this section,

- (a) the company and every officer of the company who is in default shall be punishable in the manner as provided in sub-section (1) of section 147. (Section 147 is discussed separately in para 6.15);
- (b) the cost auditor of the company who is in default shall be punishable in the manner as provided in sub-sections (2) to (4) of section 147. (Section 147 is discussed separately in para 6.15).

[Note: Students may refer Chapter 16 on Cost Audit for more details]

6.15 Punishment for non-compliance

Section 147 of the Companies Act, 2013 prescribes following punishments for contravention:

(1) If any of the provisions of sections 139 to 146 (both inclusive) is contravened, the company shall be punishable with fine which shall not be less than twenty-five thousand rupees but which may extend to five lakh rupees and every officer of the company who is in default shall be punishable with imprisonment for a term which may extend to one year or with fine which shall not be less than ten thousand rupees but which may extend to one lakh rupees, or with both.

(2) If an auditor of a company contravenes any of the provisions of section 139 section 143, section 144 or section 145, the auditor shall be punishable with fine which shall not be less than twenty-five thousand rupees but which may extend to five lakh rupees.

It may be noted that if an auditor has contravened such provisions knowingly or willfully with the intention to deceive the company or its shareholders or creditors or tax authorities, he shall be punishable with imprisonment for a term which may extend to one year and with fine which shall not be less than one lakh rupees but which may extend to twenty-five lakh rupees.

(3) Where an auditor has been convicted under sub-section (2), he shall be liable to:-

- (i) refund the remuneration received by him to the company;
- (ii) and pay for damages to the company statutory bodies or authorities or to any other persons for loss arising out of incorrect or misleading statements of particulars made in his audit report.

(4) The Central Government shall, by notification, specify any statutory body or authority of an officer for ensuring prompt payment of damages to the company or the persons under clause (ii) of sub-section (3) and such body, authority or officer shall after payment of damages the such company or persons file a report with the Central Government in respect of making such damages in such manner as may be specified in the said notification.

(5) Where, in case of audit of a company being conducted by an audit firm, it is proved that the partner or partners of the audit firm has or have acted in a fraudulent manner or abetted or colluded in an fraud by, or in relation to or by, the company or its directors or officers, the liability, whether civil criminal as provided in this Act or in any other law for the time being in force, for such act shall be the partner or partners concerned of the audit firm and of the firm jointly and severally.

6.16 Final Accounts Preparation and Presentation

6.16.1 Financial Statements

Statutory Requirements – Central Government to prescribe accounting standards.

Section 133 of the Companies Act, 2013

The Central Government may prescribe the standards of accounting or any addendum thereto, as recommended by the Institute of Chartered Accountants of India, constituted under section 3 of the Chartered Accountants Act, 1949, in consultation with and after examination of the

6.47 Advanced Auditing and Professional Ethics

recommendations made by the National Financial Reporting Authority (NFRA).

However, as per the notification dated 29.03.2016, till the time NFRA is constituted, the Central Government may prescribe the standards of accounting or any addendum thereto, as recommended by the ICAI in consultation with and after examination of the recommendations made by National Advisory Committee on Accounting Standards (NACAS).

The Central Government has also notified Companies (Indian Accounting Standards) Rules, 2015 dated 16.02.2015 in exercise of the powers conferred by section 133. The said rules list the Indian Accounting Standards (Ind AS) and the class of companies required to comply with the Ind AS while preparation of their financial statements.

Section 129(1) of the Companies Act, 2013, governs the requirements to be satisfied by financial statements. The provisions thereunder, however, are not applicable to an insurance or banking company or a company engaged in the generation or supply of electricity or to any other class of companies for which a form of financial statement has been specified in or under the Act governing such class of companies. The provisions that companies, other than those aforementioned, should comply with are:

(a) That financial statement shall, give a true and fair view of the state of affairs of the company or companies as at the end of financial year, comply with the notified accounting standards notified under section 133 and be in such form or forms specified in Schedule III to the Companies Act, 2013.

(b) That the items contained in such financial statements shall be in accordance with the accounting standards.

The third proviso to section 129(1) of the Act provides that the financial statements not to be treated as not disclosing true and fair view of the state of affairs of the company, merely by reason of the fact that they do not disclose—

(a) in the case of an insurance company, any matters which are not required to be disclosed by the Insurance Act, 1938, or the Insurance Regulatory and Development Authority Act, 1999;

(b) in the case of a banking company, any matters which are not required to be disclosed by the Banking Regulation Act, 1949;

(c) in the case of a company engaged in the generation or supply of electricity, any matters which are not required to be disclosed by the Electricity Act, 2003;

(d) in the case of a company governed by any other law for the time being in force, any matters which are not required to be disclosed by that law.

Section 129(2) of the Act, requires the Board of Directors of the company to lay before every annual general meeting the financial statements for the financial year.

Re-opening of accounts on Court's or Tribunal's orders: Section 130 of the Companies Act, 2013 states that a company shall not re-open its books of account and not recast its

financial statements, unless an application in this regard is made by the Central Government, the Income-tax authorities, the Securities and Exchange Board, any other statutory regulatory body or authority or any person concerned and an order is made by a court of competent jurisdiction or the Tribunal to the effect that—

- (i) the relevant earlier accounts were prepared in a fraudulent manner; or*
- (ii) the affairs of the company were mismanaged during the relevant period, casting a doubt on the reliability of financial statements.*

However, a notice shall be given by the Court or Tribunal in this regard and shall take into consideration the representations, if any.

Voluntary revision of financial statements or Board's report: Section 131 of the Companies Act, 2013 states that if it appears to the directors of a company that—

- (a) the financial statement of the company; or*
- (b) the report of the Board,*

do not comply with the provisions of section 129 (Financial statement) or section 134 (Financial statement, Board's report, etc.) they may prepare revised financial statement or a revised report in respect of any of the three preceding financial years after obtaining approval of the Tribunal on an application made by the company in such form and manner as may be prescribed and a copy of the order passed by the Tribunal shall be filed with the Registrar.

6.16.2 Consolidated Financial Statement

Section 129(3) of the Act has now made **mandatory** for consolidation of financial statement. It states that where a company has one or more subsidiaries, it shall, in addition to the financial statements provided above, prepare a consolidated financial statement of the company and of all the subsidiaries in the same form and manner so that of its own which shall also be laid before the annual general meeting of the company along with the laying of its financial statement under sub-section (2) above.

The consolidation of financial statements of the company shall be made in accordance with the provisions of Schedule III of the Act and the applicable accounting standards. And in case of a company covered under sub-section (3) of section 129 which is not required to prepare consolidated financial statements under the Accounting Standards, it shall be sufficient if the company complies with provisions on consolidated financial statements provided in Schedule III of the Act.

However, the requirement related to preparation of consolidated financial statements shall not apply to a company if it meets the following conditions:

- (i) it is a wholly-owned subsidiary, or is a partially-owned subsidiary of another company and all its other members, including those not otherwise entitled to vote, having been intimated in writing and for which the proof of delivery of such intimation is available***

with the company, do not object to the company not presenting consolidated financial statements;

(ii) it is a company whose securities are not listed or are not in the process of listing on any stock exchange, whether in India or outside India; and

(iii) its ultimate or any intermediate holding company files consolidated financial statements with the Registrar which are in compliance with the applicable Accounting Standards.

The company is also required to attach along with its financial statement, a separate statement containing the salient features of the financial statement of its subsidiary or subsidiaries in **Form AOC-1**.

[Explanation- For the purpose of sub-section (3) of section 129, the word “subsidiary” shall include associate company and joint venture.]

The provisions of this Act applicable to the preparation, adoption and audit of the financial statements of a holding company shall, mutatis mutandis, apply to the consolidated financial statements referred to in section 129(3).

Where the financial statements of the company do not comply with the accounting standards, such companies shall disclose in its financial statements, the following, namely:

- (a) the deviation from the accounting standards;
- (b) the reasons for such deviation; and
- (c) the financial effect, if any, arising due to such deviation.

The Central Government may, on its own or on an application by a class or classes of companies, by notification, exempt any class or classes of the companies from complying with any of the requirements of this section or the rules, if it is considered necessary to grant such exemption in the public interest and such exemption may be granted either conditionally or unconditionally.

6.16.3 Penalty for contravention

If a company contravenes the provisions of this section:

(a) the managing director, the whole-time director in charge of finance, the Chief Financial Officer or any other person charged by the Board with the duty of complying with the requirements of this section shall be punishable with imprisonment for a term which may extend to one year or with fine which shall not be less than fifty thousand rupees but which may extend to five lakh rupees, or with both, and

(b) in the absence of any of the officers mentioned above, all the directors shall be punishable with imprisonment for a term which may extend to one year or with fine which shall not be less than fifty thousand rupees but which may extend to five lakh rupees, or with both.

[Explanation- For the purpose of section 129, except where the context otherwise requires, any

reference to the financial statement shall include any notes annexed to or forming part of such financial statement, giving information required to be given and allowed to be given in the form of such notes under this Act.]

6.16.4 Constitution of National Financial Reporting Authority

According to Section 132¹ of the Act, the Central Government may, by notification, constitute a National Financial Reporting Authority to provide for matters relating to accounting and auditing standards for adoption by companies or class of companies under this Act.

However, the central government, vide its notification dated September 18, 2014, clarified that the chairperson and members of “National Advisory Committee on Accounting Standards” shall continue to hold office for a period of one year from the notification date or till the constitution of “National Financial Reporting Authority” whichever is earlier.

6.16.5 Form of the Balance Sheet

Only vertical format of balance sheet and statement of profit and loss is prescribed under Schedule III to the Companies Act, 2013. Only vertical format is allowed and consequently compulsory. There is no option to prepare balance sheet and statement of profit and loss in horizontal format (‘T Form’).

Some of the features of Schedule III are as under:

- (i) The disclosure requirements specified in this Schedule are in addition to and not in substitution of the disclosure requirements specified in the Accounting Standards prescribed under the Companies act, 2013. For the purpose of this Schedule, the terms used herein shall be as per the applicable Accounting Standards.
- (ii) This Schedule does not recognize presenting information in Schedules. Instead it requires presenting the information in details through notes to account.
- (iii) Each item on the face of the Balance Sheet and Statement of Profit and Loss shall be cross-referenced to any related information in the notes to accounts.
- (iv) The corresponding amount for the immediately preceding year for all the items shown in the Financial Statements including notes shall also be given [excluding the cases where first Financial Statements laid before the company (after its incorporation)].

Schedule III to the Companies Act, 2013 –

The Schedule III to the Companies Act, 2013 (brought into force with effect from 1st April, 2014) will apply to all the companies (except to the companies as referred to in the second proviso to section 129(1) of the Companies Act, 2013) uniformly for the financial statements to be prepared for the financial year 2014-15 and onwards.

The requirements of Schedule III do not apply to the Companies excused in the second proviso

¹ Section 132 of the Companies Act, 2013 is not yet notified.

6.51 Advanced Auditing and Professional Ethics

to section 129(1) of the Companies Act, 2013, namely:

- (a) an insurance company, or
- (b) banking company, or
- (c) a company engaged in the generation or supply of electricity, or
- (d) any other class of companies for which a form of financial statement has been specified in or under the Act governing such class of companies.

The Schedule III to the Companies Act, 2013 has been divided into two divisions vide notification dated 06.04.2016. Division I deals with Financial Statements for a company whose Financial Statements are required to comply with the Companies (Accounting Standards) Rules, 2006 and Division II deals with Financial Statements for a company whose financial statements are drawn up in compliance of the Companies (Indian Accounting Standards) Rules, 2015.

Division I has been divided as follows:

Part I contains the form in which the Balance Sheet of a company should be drawn up, and states the general instructions as regard to presentation of different assets and liabilities.

Part II contains the form and states the general instructions as regard to preparation and presentation of information in the Statement of Profit and Loss.

General instructions for preparation of Consolidated Financial Statements have also been provided in Schedule III where a company is required to prepare Consolidated Financial Statements. The company shall mutatis mutandis follow the requirements of this Schedule as applicable to a company in the preparation of balance sheet and statement of profit and loss.

Division II has been divided as follows:

Part I contains the form in which the Balance Sheet of a company required to comply with Ind AS and states the general instructions as regard to preparation of Balance Sheet.

Part II contains the form and states the general instructions as regard to preparation of Statement of Profit and Loss.

PART III contain general instructions for preparation of Consolidated Financial Statements.

[Note: Students are required to refer Appendix annexed at the end of this Chapter for detailed understanding of Schedule III to the Companies Act, 2013]

6.17 Significance of True and Fair

The concept of true and fair is a fundamental concept in auditing. The phrase “true and fair” in the auditor’s report signifies that the auditor is required to express his opinion as to whether the state of affairs and the results of the entity as ascertained by him in the course of his audit are truly and fairly represented in the accounts under audit. This requires that the auditor should examine the accounts with a view to verify that all assets, liabilities, income and expenses are stated as amounts which are in accordance with accounting principles and policies which are

relevant and no material amount, item or transaction has been omitted.

The importance of the concept of true and fair view can also be understood and appreciated from the fact that sections 128, 129 and 143 of the Companies Act, 2013 also discuss this concept in relation to account books, financial statements and reporting on financial statements respectively.

Section 128(1) of the Companies Act, 2013 provides that every company shall prepare and keep at its registered office books of account and other relevant books and papers and financial statement for every financial year which give a true and fair view of the state of the affairs of the company, including that of its branch office or offices, if any. The company shall be in a position to explain the transactions effected both at the registered office and its branches. Such books of Accounts shall be kept on accrual basis and according to the double entry system of accounting.

Section 129(1) of the Companies Act, 2013 provides that the financial statements shall give a true and fair view of the state of affairs of the company or companies, comply with the accounting standards notified under section 133 of the Companies Act, 2013, (in which the Central Government may prescribe the standards of accounting or any addendum thereto, as recommended by the Institute of Chartered Accountants of India, constituted under section 3 of the Chartered Accountants Act, 1949, in consultation with and after examination of the recommendations made by the National Financial Reporting Authority) and shall be in the form or forms as may be provided for different class or classes of companies in Schedule III to the said Act.

The term “financial statement” shall include any notes annexed to or forming part of such financial statement, giving information required to be given and allowed to be given in the form of such notes under the said Act.

It may be noted that nothing contained in sub-section (1) of section 129 shall apply to any insurance or banking company or any company engaged in the generation or supply of electricity, or to any other class of company for which a form of financial statement has been specified in or under the Act governing such class of company.

However, the financial statements shall not be treated as not disclosing a true and fair view of the state of affairs of the company, merely by reason of the fact that they do not disclose-

- (a) in the case of an insurance company, any matters which are not required to be disclosed by the Insurance Act, 1938, or the Insurance Regulatory and Development Authority Act, 1999;
- (b) in the case of a banking company, any matters which are not required to be disclosed by the Banking Regulation Act, 1949;
- (c) in the case of a company engaged in the generation or supply of electricity, any matters which are not required to be disclosed by the Electricity Act, 2003;

6.53 Advanced Auditing and Professional Ethics

- (d) in the case of a company governed by any other law for the time being in force, any matters which are not required to be disclosed by that law.

It may be noted that where the financial statements of a company do not comply with the accounting standards referred to in sub-section (1), the company shall disclose in its financial statements, the deviation from the accounting standards, the reasons for such deviation and the financial effects, if any, arising out of such deviation.

Further, according to section 143(2) of the said Act, the auditor is required to make a report to the members of the company indicating that, to the best of his information and knowledge, the financial statements give a true and fair view of the state of the company's affairs as at the end of its financial year and profit or loss and cash flow for the year and such other matters as may be prescribed.

SA 700 "Forming an Opinion and Reporting on Financial Statements", requires the auditor to form an opinion on the financial statements based on an evaluation of the conclusions drawn from the audit evidence obtained; and express clearly that opinion through a written report that also describes the basis for the opinion. The auditor is required to express his opinion on the financial statements that it gives a true and fair view in conformity with the accounting principles generally accepted in India (a) in the case of the Balance Sheet, of the state of affairs of the Company as at March 31, 20XX; (b) in the case of the Statement of Profit and Loss, of the profit/loss for the year ended on that date; and (c) in the case of the Cash Flow Statement, of the cash flows for the year ended on that date.

In the context of audit of a company, the accounts of a company shall be deemed as not disclosing a true and fair view, if they do not disclose any matters which are required to be disclosed by virtue of provisions of Schedule III to that Act, or by virtue of a notification or an order of the Central Government modifying the disclosure requirements. Therefore, the auditor will have to see that the accounts are drawn up in conformity with the provisions of Schedule III of the Companies Act, 2013 and whether they contain all the matters required to be disclosed therein. In case of companies which are governed by special Acts, the auditor should see whether the disclosure requirements of the governing Act are complied with. It must be noted that the disclosure requirements laid down by the law are the minimum requirements. If certain information is vital for showing a true and fair view, the accounts should disclose it even though there may not be a specific legal provision to do so. Thus, what constitutes a 'true and fair' view is a matter of an auditor's judgment in the particular circumstances of a case. In more specific terms, to ensure true and fair view, an auditor has to see: (i) that the assets are neither undervalued or overvalued, according to the applicable accounting principles, (ii) no material asset is omitted; (iii) the charge, if any, on assets are disclosed; (iv) material liabilities should not be omitted; (v) the statement of profit and loss discloses all the matters required to be disclosed by Part II of Schedule III and the balance sheet has been prepared in accordance with Part I of Schedule III; (vi) accounting policies have been followed consistently; and (vii) all unusual, exceptional or non-recurring items have been disclosed separately.

In this context, it is noteworthy that the Council of the Institute while issuing a clarification regarding authority attached to documents issued by the Institute also observed that, the Companies Act, as well as many other statutes require that the financial statements of an enterprise should give a true and fair view of its financial position and working results. This requirement is implicit even in the absence of a specific statutory provision to this effect. However, what constitutes 'true and fair' view has not been defined either in the Companies Act, 2013 or in any other statute. The pronouncements of the Institute seek to describe the accounting principles and the methods of applying these principles in the preparation and presentation of financial statements so that they give a true and fair view. The pronouncements issued by the Institute include various statements, standards and guidance notes.

6.18 Divisible Profits, Dividends and Reserves

Profit is the central theme for almost all business activities. Decision about the future of the business, i.e., whether to close down, expand or modify largely depend on the trend of profits or losses; investors' interest in a business is also dependent upon the yield that they get. For all these, determination of correct profit is obviously important and, no wonder, it is a matter to which accountants attach great importance. The auditor must necessarily have regard to generally accepted accounting practices, legal provisions and judicial pronouncements in carrying out his duties. Should more profit be distributed than is permissible, because of a wrong process of computation, it may be treated as paying a dividend out of capital which is legally not permissible unless the company is being wound up. Apart from legal consequences, the management of the business would be depleting capital of the company which may have dangerous results.

Reserves can be created only when there is profit. Some reserves can also be utilised to pay dividends. Apart from the specific law governing creation and maintenance of reserves in certain cases, the articles of association of companies generally contain provisions in this respect. In addition, accepted accounting practices suggest situations, where, even in the absence of any specific law, reserves should be maintained. Despite the existence of accounting principles, judicial rulings and legal requirements controversy in these respects cannot be considered to have come to an end. For example, though professional bodies as well as law have tried to distinguish revenue reserves from capital reserves, still there is large scope of disagreement on whether capital reserves are distributable. It is imperative that there should be a clear idea about profit, distributable profit, dividend and reserves. The auditor should, within the broad framework of available guidelines, exercise his own judgement in each case.

A special note in this connection should be taken for depreciation and valuation of stocks, the two major elements influencing the correct determination of profit or loss. These two are related to the valuation of assets of the business which directly and significantly affect the figure of profit or loss. One should be aware of the various possibilities in this regard.

6.18.1 Concept of profit

Like the term "value" in Economics, accountants have used the word 'profit' for many years

6.55 Advanced Auditing and Professional Ethics

without assigning a definite meaning to it. This state of affairs has given rise to much uninformed criticism of accountants and their work; added to this is the difficulty an economist and an accountant differ as to computation of profit of a business.

Economist's concept - Profit is the increase in the value of total net assets of a business over a period of time after making an allowance for any withdrawal or introduction of capital. This is known as the "Increased Net Worth Theory of Profit". It is ascertained by determining the market value on the two accounting dates of all the assets reduced by the amount of liabilities incurred. The increase or reduction in the net worth is the profit or loss for the intervening period.

Accountant's concept - To an accountant, profit is the margin between operating income and associated expenses as related to a given period of time. Nevertheless, he is conscious of the fact that a business is a continuing operation and its wheels do not cease to grind, as is assumed for the purpose of preparing the periodical statements of account. So, while he agrees that these should be prepared in order that proprietors may have periodical reports of the stewardship, he is conscious of their limitations. It is on this account that he is continually striving to perfect his method to evaluate the expenditure which has not resulted in an income so that, on its exclusion the accounts may become more accurate and meaningful.

In this regard some of the ideas which have dominated the thinking of accountants in the past are: the necessity of preserving the monetary value of the proprietary capital originally contributed, the unpredictable nature of the future course of events and sale as an essential step to the emergence of profit. These ideas in due course have developed into a completed fabric of "generally accepted accounting practices" which are stated below:

- (i) The book value of fixed assets should be assessed at their historical cost regardless of their market price.
- (ii) The book value of current assets should be based on their cost or net realisable value whichever is lower.
- (iii) A mere rise in market value is not a profit, but if the asset is a current asset, decline in its market value is a loss.
- (iv) No profits are earned unless the product is sold and cash is received or an enforceable obligation against a debtor is created.
- (v) In general, underestimation of prospective revenue (i.e., conservatism) is commendable: overstatement is not permissible. This is based on the dictum: anticipate no profits, provide for all losses. No a day, concept of procedure is gaining importance over the conservatism.
- (vi) In general, known expenditure or loss even though not incurred should be provided for.
- (vii) Consistency of accounting policy adopted from year to year should be ensured as far as practicable.

On a consideration of the aforementioned practices it would appear that if any of them are disregarded, the accuracy of profits disclosed by the statements of account would be vitiated and elements of guess work and uncertainty would creep in.

6.18.2 Valuation of assets

The question of determination of profits is inextricably bound up with the valuation of assets. Therefore, when the basis of valuation is altered or a wrong basis is adopted, it affects the amount of profit or loss disclosed by the Statement of Profit and Loss. Some of the significant factors which affect the determination of profit are: rate of depreciation of fixed assets, the manner in which expenditure on research is adjusted in the accounts, valuation of work in progress, provision for bad and doubtful debts, etc. The different bases on which assets are valued are briefly explained below to show that the method conventionally followed for the determination of profits does not necessarily give profit which have been actually earned. This is because a lot of estimation enters in determining the value of assets and liabilities:

(i) Fixed assets - The charge for depreciation is always approximate. There are several elements of estimation involved in its computation, e.g., the life of the asset, its residual scrap, value of obsolescence, etc. Further, the charge for depreciation is made merely to amortize the original cost. It may or may not at the end of its useful life, result in accumulating enough liquid resources to replace the asset on account of the increase which may have taken place in the replacement cost.

(ii) Intangible assets - Accounting theory so far has not sufficiently developed to prescribe a uniform method of valuation of intangible assets like goodwill, patent rights, technical know-how, etc. This class of assets is thus treated differently by different industries; sometimes even in the same industry their treatment at different units is not the same.

(iii) Deferred revenue expenditure and other fictitious assets - Again there is no uniformity of treatment of these items. Successful companies write off their preliminary expenses or development expenses, etc. immediately. Less successful ones write them off over a period of years, the argument being that such initial expenditure also benefits future years. The likely issuance of Accounting Standard on "Intangible Assets" would provide the necessary guidance.

(iv) Valuation of Work in Progress- There are several senses in which the words "cost" and "net realisable value" may be construed. The rule that profit must only be taken into account when realised by sale is again responsible for some distortion. Its application logically to companies doing long-term construction contracts may involve a great fluctuation in profits from year to year. AS-2 issued by the Institute deals with uniform approach and practice as regards valuation and presentation of inventories.

Judicial rulings on ascertainment of profits - The fact of the three cases given below should be studied carefully:

In *Re. Spanish Prospecting Co. Ltd.* (1911), the company had contracted to pay a certain salary to some of its staff subject to the condition that they shall not be entitled to draw their salary "except only out of profits" if any, arising from the business of the company. The salary was cumulative. Any arrears were to be payable out of future profits. The company dealt in shares and securities. The company went into liquidation and some of the securities held were sold by the liquidator. It was contended that the proceeds should be credited to the Statement of Profit and Loss (their book value was nil) in order to enable the staff to receive their arrears to salary.

6.57 Advanced Auditing and Professional Ethics

This contention was rejected at first but was upheld by the Court of Appeal. This case establishes the fundamental nature of profit (impliedly the economist's profit).

In *Re. Crabtree Thomas vs. Crabtree* (1912), the testator left his business to be carried on by trustees and to pay thereof to his wife while she lived and on her death, to a residuary legatee. The trustee charged in the accounts depreciation on machinery. It was contended on behalf of the life tenant that the profits before charging depreciation were paid to her. But it was ruled out on the ground that depreciation must be charged on the assets of a business to arrive at the amount of profit.

Edwards vs. Saunton Hotel Co. Ltd. (1942), a director of the company was to be paid by way of remuneration 20% of the profit "available" for distribution each year. It was held that depreciation on assets calculated on the straight line method must be deducted from the surplus to arrive at the amount of profit, 20% whereof was payable to the director, but the income tax payable by the company was not to be deducted.

6.18.3 Depreciation under Section 123 of the Companies Act, 2013 read with Schedule II to the Companies Act, 2013

Section 123 of the Act, provides that the dividend shall be declared or paid by a company for any financial year out of the profits of the company for that year arrived at after providing for depreciation in a manner prescribed under Schedule II "Useful lives to compute Depreciation", to the Companies Act, 2013.

The useful life or residual value of any specific asset as notified for accounting purpose by a Regulatory Authority constituted under an Act of Parliament or by the Central Government intend to be applied in calculating the depreciation to be provided for such asset irrespective of the requirements of Schedule II.

The Schedule II to the Companies Act, 2013 needs disclosure in the financial statements about the depreciation method used and the useful lives of the assets for computing depreciation, if they are different from the life specified in the Schedule II. [Discussed later in detail under Para 6.19 Depreciation].

6.18.4 Law relating to dividends -

6.18.4.1 Sources of dividends - The Companies Act, 2013 lays down the law relating to distribution of profits by making certain provisions under Section 123. Accordingly, dividend cannot be declared or paid by a company for any financial year except:

- (a) out of profits of the company for that year arrived at after providing for depreciation in accordance with the provisions of Section 123(2), or
- (b) out of the profits of the company for any previous financial year or years arrived at after providing for depreciation in the manner aforementioned and remaining undistributed, or
- (c) out of the balances of profit mentioned in (a) and (b) above; or
- (d) out of money provided by the Central Government or a State Government for the payment of dividend by the company pursuant to the guarantee given by that Government.

6.18.4.2 Dividends out of current profits- Transfer to Reserves is optional – The first proviso to Section 123(1) of the Act provides that a company may, before the declaration of any dividend in any financial year, transfer such percentage of its profit for that financial year as it may consider appropriate to the reserves of the company irrespective of the size of the declared dividend.

6.18.4.3 Dividends out of past profits - The second proviso to Section 123(1) of the Companies Act, 2013 read with the Companies (Declaration and Payment of Dividend) Rules, 2014 provides that in the event of inadequacy or absence of profits in any year, dividend may be declared by a company for that year out of surplus subject to the fulfillment of following conditions that:

(i) The rate of the dividend declared shall not exceed the average of the rates at which dividend was declared by it in the three years immediately preceding that year.

It is also provided that this sub-rule shall not apply to a company, which has not declared any dividend in each of the three preceding financial year.

(ii) The total amount to be drawn from such accumulated profits shall not exceed an amount equal to one-tenth of the sum of its paid-up share capital and free reserves as appearing in the latest audited financial statement.

(iii) The amount so drawn shall first be utilised to set off the losses incurred in the financial year in which dividend is declared before any dividend in respect of equity shares is declared.

(iv) The balance of reserves after such withdrawal shall not fall below 15% of its paid-up share capital as appearing in the latest audited financial statement.

The fourth proviso to section 123(1) provides that no company shall declare dividend unless carried over previous losses and depreciation not provided in previous year(s) are set off against profit of the company for the current year.

No dividend from Reserves other than Free Reserves- It is further provided under third proviso to Section 123(1) of the Companies Act, 2013 that no dividend shall be declared or paid by a company from its reserves other than free reserves.

6.18.4.4 Dividends includes Interim dividend- As per Section 2(35) of the Companies Act, 2013, dividend has been defined to include any interim dividend also.

6.18.4.5 Dividend policy and related financial considerations - Normally an auditor, in the discharge of his duties is not concerned with the policy about dividends. He is merely concerned with the legality and actual payment of the dividend. The basis of legality is provided by the Companies Act, 2013 and the related Articles of Association. However, sometimes auditors are consulted in the matter of deciding upon the quantum of dividend that can be distributed by a company. Apart from this, Chartered Accountants as such also act as consultants to various companies on a number of matters, including dividend. The basic decision about the dividend is that of the management; the shareholders do not have the authority to enhance the sum proposed by the directors unless the articles allow such a procedure. On the other hand, the management, because of its very thorough and intimate knowledge of the financial state of

affairs of the company and of the business environment, is considered to be the best equipped to deal with the matter.

Dividend is a phenomenon involved with the question of financial management of the company, rationality or feelings of the shareholders and other allied factors; it is therefore very difficult to lay down any definite policy in this regard. However, as a guiding rule a broad frame of policy has often been adopted by companies for guidance in deciding each year the quantum of dividend having regard to the specific situations faced by the company in the concerned year or situations that are in offing. In deciding upon a policy of dividend the financial considerations generally get the place of prominence, though the aspects of shareholders' aspirations are also taken into consideration. A balance is generally struck to bring about compromise and adjustment between these without unduly impairing the financial state of the company. In this context, it should be appreciated that the amount of the profit available as dividend has competing claimants. It is a source of finance so far as the company is concerned. This can often be very profitably employed to finance expansion or diversification or for setting right the adverse working capital or liquidity position.

As a general proposition, the following are determinants of dividend policy:

1. Nature of earnings.
2. Re-investment alternative.
3. Dividends and liquidity.
4. Dividends and working capital.
5. Dividends and new capital requirements.
6. Dividends and market value of shares.
7. Tax brackets of shareholders.
8. Stability of dividend.

6.18.4.6 Payment of Dividends

(1) Dividends once declared become the liability of the company and must be paid within 30 days from the date of declaration. Any failure to do so attracts a penalty for the various persons associated with the management [Section 127].

(2) Payment of dividend on any share should be made only to the registered shareholder of such share or to his order or to his banker. Dividends are not payable except in cash; or by cheque or warrant; or in any electronic mode to the shareholder entitled to the payment of the dividend.

But the profits or reserves can be capitalised for purpose of issuing fully paid-up bonus shares subject to the guidelines issued by the SEBI also they may be applied for paying up any amount for the time being unpaid on any share held by the members of the company.

(3) A company may, if so authorised by its articles, pay dividends in proportion to the amount paid-up on each share in accordance with Section 51.

(4) The Board may deduct from any dividend payable to any member all sums of money, if any, presently payable by him to the company on account of calls or otherwise in relation to the shares of the company [Table F of Schedule I to the Companies Act, 2013].

Deposit of amount of Dividend in separate bank account - The amount of the dividend, including interim dividend, should be deposited in a scheduled bank in a separate account within 5 days from the date of declaration of such dividend.

As per Section 123(6) of the Act, a company which fails to comply with the provisions of section 73 (matters to be followed while inviting, accepting or renewing deposits under the new Companies Act, 2013 from the public), and section 74² (matters to be followed for repayment of deposits etc. before the commencement of this Companies Act, 2013) shall not, so long as such failure continues, declare any dividend on its equity shares.

6.18.4.7 Punishment for failure to distribute dividends - According to Section 127 of the Companies Act, 2013, where a dividend has been declared by a company but has not been paid or the warrant in respect thereof has not been posted, within 30 days from the date of declaration to any shareholder entitled to the payment of the dividend, following shall be punishable:

- (i) every director of the company, if he is knowingly a party to the default, be punishable with imprisonment which may extend to 2 years and with fine which shall not be less than one thousand rupees for every day during which such default continues and,
- (ii) the company shall be liable to pay simple interest at the rate of 18% per annum during the period for which such default continues.

Proviso to Section 127 of the Act provides that no offence under this section shall be deemed to have been committed:-

- (a) where the dividend could not be paid by reason of the operation of any law;
- (b) where a shareholder has given directions to the company regarding the payment of the dividend and those directions cannot be complied with and the same has been communicated to him;
- (c) where there is a dispute regarding the right to receive the dividend;
- (d) where the dividend has been lawfully adjusted by the company against any sum due to it from the shareholder; or
- (e) where, for any other reason, the failure to pay the dividend or to post the warrant within the period under this section was not due to any default on the part of the company.

6.18.4.8 Unpaid Dividend Account [Section 124]

Section 124 of the Act provides that dividend declared which remains unpaid or unclaimed within 30 days from the date of declaration of such dividend shall be transferred by the company to a special account called "Unpaid Dividend Account" opened in any scheduled bank. Such transfer

² Only Sub-section (1) of Section 74 of the Companies Act, 2013 is enforced till date.

6.61 Advanced Auditing and Professional Ethics

shall be made within 7 days from the date of expiry of the said period of 30 days. In case of any default in transferring the amount unpaid/ unclaimed dividend to the Unpaid Dividend Account, the company shall pay interest at the rate of 12% per annum on the amount not transferred. The interest accrue on such amount shall endure to the benefit of the members of the company in proportion to the amount remaining unpaid to them.

Any person claiming to be entitled to any of the money transferred to the Unpaid Dividend Account of the company may apply to the company for the payment of the money claimed.

Obligation to place details of transfer to Unpaid Dividend Account on website- The company is required to prepare a statement containing the names, their last known addresses and the unpaid dividend to be paid to each person within a period of 90 days of making any transfer of an amount to the Unpaid Dividend Account and place it on the website of the company, if any, and also on any other website approved by the Central Government for this purpose, in such form, manner and other particulars as may be prescribed.

Unpaid or unclaimed amount of Unpaid Dividend Account- Any money transferred to Unpaid Dividend Account remains unpaid or unclaimed for a period of 7 years from the date of such transfer shall be transferred by the company along with interest accrued, if any, thereon to the Investor Education and Protection Fund.

The company shall send a statement of the details of such transfer to the authority in the **Form DIV 5** which administers the said fund and that authority shall issue a receipt to the company an evidence of such transfer.

All shares in respect of which unpaid or unclaimed dividend has been transferred shall also be transferred by the company in the name of Investor Education and Protection Fund along with a statement containing such details as may be prescribed. Any claimant of shares transferred shall be entitled to claim the transfer of shares from Investor Education and Protection Fund in accordance with such procedure and on submission of such documents as may be prescribed.

Sub-section (7) of Section 124 of the Act provides that the company shall be punishable with fine which shall not be less than five lakh rupees but which may be extend to twenty-five lakh rupees. Every officer of the company who is in default shall be punishable with fine which shall not be less than one lakh rupees but which may be extend to five lakh rupees.

6.18.4.9 Establishment of Investor Education and Protection Fund [Section 125³]

(1) The Central Government shall establish a fund to be called the Investor Education and Protection Fund (hereafter in this section referred to as the "Fund").

(2) There shall be credited to the Fund the following amounts, namely:

(a) the amount given by the Central Government by way of grants after due appropriation made by Parliament by law in this behalf for being utilised for the purposes of the Fund;

³ Some part of section 125 of the Companies Act, 2013 enforced with effect from 07.09.2016.

- (b) donations given to the Fund by the Central Government, State Governments, companies or any other institution for the purposes of the Fund;
- (c) the amount in the Unpaid Dividend Account of companies transferred to the Fund under sub-section (5) of section 124 of the Companies Act, 2013;
- (d) the amount in the general revenue account of the Central Government which had been transferred to that account under sub-section (5) of section 205A of the Companies Act, 1956, as it stood immediately before the commencement of the Companies (Amendment) Act, 1999, and remaining unpaid or unclaimed on the commencement of this Act;
- (e) the amount lying in the Investor Education and Protection Fund under section 205C of the Companies Act, 1956;
- (f) the interest or other income received out of investments made from the Fund;
- (g) the amount received under sub-section (4) of section 38;
- (h) the application money received by companies for allotment of any securities and due for refund;
- (i) matured deposits with companies other than banking companies;
- (j) matured debentures with companies;
- (k) interest accrued on the amounts referred to in clauses (h) to (j);
- (l) sale proceeds of fractional shares arising out of issuance of bonus shares, merger and amalgamation for seven or more years;
- (m) redemption amount of preference shares remaining unpaid or unclaimed for seven or more years; and
- (n) such other amount as may be prescribed.

It is provided that no such amounts referred to in clauses (h) to (j) shall form part of the Fund unless such amounts have remained unclaimed and unpaid for a period of seven years from the date they became due for payment.

(3) The Fund shall be utilised for the following purposes in accordance with such rules as may be prescribed:-

- (a) the refund in respect of unclaimed dividends, matured deposits, matured debentures, the application money due for refund and interest thereon;
- (b) promotion of investors' education, awareness and protection;
- (c) distribution of any disgorged amount among eligible and identifiable applicants for shares or debentures, shareholders, debenture-holders or depositors who have suffered losses due to wrong actions by any person, in accordance with the orders made by the Court which had ordered disgorgement;

6.63 Advanced Auditing and Professional Ethics

- (d) reimbursement of legal expenses incurred in pursuing class action suits under sections 37 and 245⁴ by members, debenture-holders or depositors as may be sanctioned by the Tribunal; and
- (e) any other purpose incidental thereto.

It is provided that the person whose amounts referred to in clauses (a) to (d) of sub-section (2) of section 205C of the Companies Act, 1956, transferred to Investor Education and Protection Fund, after the expiry of the period of seven years as per provisions of the Companies Act, 1956, shall be entitled to get refund out of the Fund in respect of such claims in accordance with rules made under this section.

Explanation- The disgorged amount refers to the amount received through disgorgement or disposal of securities.

- (4) Any person claiming to be entitled to the amount referred in section 125(2) may apply to the authority constituted under section 125(5) for the payment of the money claimed.
- (5) The Central Government shall constitute, by notification, an authority for administration of the fund consisting of a chairperson and such other members, not exceeding seven and a chief executive officer, as the Central Government may appoint.
- (6) The manner of administration of the Fund, appointment of chairperson, members and chief executive officer, holding of meetings of the authority shall be in accordance with such rules as may be prescribed.
- (7) The Central Government may provide to the authority such offices, officers, employees and other resources in accordance with such rules as may be prescribed.
- (8) The authority shall administer the Fund and maintain separate accounts and other relevant records in relation to the Fund in such form as may be prescribed after consultation with the C&AG of India.
- (9) It shall be competent for the authority constituted under sub-section (5) to spend money out of the Fund for carrying out the objects specified in sub-section (3) of 125.

The accounts of the Investor Education and Protection Fund is required to be audited by the C&AG of India at such interval as may be specified by him and such audited accounts together with the audit report thereon shall be forwarded annually by the authority to the Central Government.

The authority is required to prepare in such form and at such time for each financial year as may be prescribed its annual report giving a full account of its activities during the financial year and forward a copy thereof to the Central Government. The Central Government shall cause the annual report and the audit report given by the C&AG of India to be laid before each House of Parliament.

⁴ Section 245 of the Companies Act, 2013 is not yet enforced.

6.18.4.10 Right to dividend, rights shares and bonus shares to be held in abeyance pending registration of transfer of shares- As per section 126 of the Act, payment of dividend and allotment of bonus and right shares to the transferee to be held in abeyance till the title to shares is decided. This section requires that where any instrument of transfer of shares has been delivered to the company for registration and the transfer of such shares has not been registered by the company, it shall transfer the dividend in relation to such shares to the special account referred to in section 124 i.e. Unpaid Dividend Account unless the company is authorised by the registered holder of such shares in writing to pay such dividend to the transferee specified in such instrument of transfer. Further, the company shall also keep in abeyance in relation to such shares, any offer of right shares and any issue of fully paid up bonus shares.

6.18.4.11 Power to close register of members or debenture-holders or other security holders- As per section 91 of the Act, a company may close the register of members or the register of debenture-holders or the register of other security holders for any period or periods not exceeding in the aggregate 45 days in each year, but not exceeding 30 days at any one time, subject to giving of previous notice of at least 7 days or such lesser period as may be specified by Securities and Exchange Board for listed companies or the companies which intend to get their securities listed, in such manner as may be prescribed.

The auditor may take the following steps to ensure that the dividend has been paid only out of profits:

- (a) Check whether dividend was declared out of profits arrived at after providing for depreciation as per Section 123(2).
- (b) Check whether:
 - (i) the depreciation was provided according to provisions of Schedule II to the Companies Act, 2013.
 - (ii) a board resolution recommending dividend was passed.
 - (iii) the dividend was declared only in the annual general meeting.
 - (iv) no dividend declared in general meeting exceeds the amount recommended by the Board.
 - (v) amount paid or credited as paid on a share in advance of calls is not treated for the purpose of this regulation as paid on the share.
 - (vi) register of members was closed as per the provisions of section 91 of the Companies Act, 2013.
 - (vii) dividend has been paid in the prescribed manner within 30 days of time to the registered holder or to their order (Section 127).
 - (viii) Amount of dividend deposited in a separate bank account within 5 days from the date of declaration of dividend.
 - (ix) intimation sent to stock exchange, in case of listed company.

- (x) there were any complaints regarding non-payment or delay in payment of dividend? If, so, whether corrective action was taken.

6.18.4.12 Interim Dividend - The definition of term dividend has been modified to include interim dividend also. Interim dividend stands at par with the final dividend. Therefore, all aforesaid requirements applicable in case of final dividend would also apply to interim dividend.

The Board of Directors of a company may declare interim dividend during the financial year out of the surplus in the Statement of profit and loss and out of profits of the financial year in which such interim dividend is sought to be declared. Further, if in a case, the company has incurred loss during the current financial year up to the end of the quarter immediately preceding the date of declaration of interim dividend, such interim dividend shall not be declared at a rate higher than the average dividends declared by the company during the immediately preceding 3 financial years.

6.18.4.13 Payment of dividend and the Income tax Act - Payment of dividends by a company though basically governed by the provisions of the Companies Act, has to reckon with a number of provisions contained in the Income tax Act, having direct or indirect relevance to the determination of the amount of dividend. The Companies Act, 2013 has prescribed the sources from which dividend may be declared/ paid in Section 123. In particular it requires provision for depreciation, setting off of past losses etc. It also provides for the circumstances under which dividend can be paid out of past profits. The manner of payment of the dividend is also provided for in the Companies Act. It may be mentioned that any deviation from these provisions will render the dividend illegal. The payment of dividend is a corporate phenomenon based on accounting, financial and legal considerations. The accounting and legal considerations are highly related. In determining the accounting profit, as indicated above a number of provisions from the Income tax Act have got to be considered. For example, distributable profit of a company gets conditioned by the requirements to create and retain reserves e.g. investment allowance reserves. It may be pointed out that any departure from the provisions of the Income tax Act will not make the payment of dividend illegal but may increase the tax liability of the company.

6.18.4.14 Should all fictitious assets be written off before distribution of dividends? - The Accounting Standards Board of ICAI has issued a guidance note on terms used in financial statements where the term 'fictitious asset' has been described as an item grouped under assets in a balance sheet which has no real value. The guidance note cites the example of the debit balance of the statement of profit and loss. We can also give other examples like, (1) Goodwill recorded at a particular figure whereas the company may have no goodwill at all in the ordinary commercial sense, (2) Patents appearing in the balance sheet which in fact are useless.

There is no mandatory rule in accounting or any legal requirement that fictitious assets must be written off before declaration of dividend. This is more in the nature of preferable practice but is not mandatory in its nature. Accordingly it may be said that though writing off of fictitious assets on a proper accounting consideration is desirable, it is not mandatory. However, the following points must be noted in this regard:

If there exists debit balance in the Statement of profit and loss, depreciation, if any, contained therein should first be set off before declaration of dividend out of current profits.

In the case of *Verner vs. The General Commercial Investment Trust Ltd.*, it was held that a company may pay dividends if it is solvent and is acting within its articles that distribution of dividend is permissible if there exists revenue surplus even though some portion of the value of the assets disclosed in the balance sheet may turn out to be fictitious.

6.18.4.15 Audit procedure for “Payment of Dividend”: The Auditor should obtain appropriate audit evidence as regard to audit of payment of dividends. The procedure includes the following:

- (i) Check that all the rules and regulations concerning the declaration or payment of dividends have been complied with.
- (ii) Examine that the accounting and disclosure procedure has been complied with related to the declaration and payment of dividend like depreciation has been provided before declaration, disclosure has been made by way of notes to the accounts etc.
- (iii) Scrutinize that the dividends have been declared or paid only out of distributable profit i.e. profits for the current year for which dividend is declared, or accumulated profits of the previous years, or money provided by the Central or State Government as per Section 123(1) of the Act.
- (iv) Inspect that the dividend has been paid only out of “free reserves” i.e. the reserves which, as per the latest audited balance sheet of a company, are available for distribution as dividend except- any amount representing unrealized gains, notional gains or revaluation of assets, whether shown as a reserve or otherwise, or any change in carrying amount of an asset or of a liability recognized in equity, including surplus in statement of profit and loss on measurement of the asset or the liability at fair value, as laid down under third proviso to Section 123(1) read with Section 2(43) of the Act.
- (v) If dividend has been paid out of accumulated profits, earned by it in previous years and transferred to the reserves, in case of inadequacy or absence of profits in any financial years, verify that the rules related to such distribution has been complied i.e. the maximum amount allowable to be distributed as a dividend in case of inadequate or no profit as required by second proviso to Section 123(1) of the Act.
- (vi) Verify that the dividend recommended by the Board has been approved by the members at the annual general meeting.
- (vii) Verify that the dividend has been transferred to the separate scheduled bank account within 5 days from the declaration of such dividend as required by Section 123(4) of the Act.
- (viii) Verify that the dividend has been paid within 30 days from the declaration. If in case the dividend has not been claimed or paid within 30 days from the declaration, verify that the unpaid or unclaimed dividend amount has been transferred to a special account called unpaid dividend account as per Section 124(1) of the Act.
- (ix) Verify that the company has prepared a statement within a period of 90 days of making any transfer of an amount to the Unpaid Dividend Account containing the names, their last

6.67 Advanced Auditing and Professional Ethics

known addresses and the unpaid dividend to be paid to each person, and have placed it on the website of the company, if any, and also on any other website approved by the Central Government for this purpose as required under Section 124(2) of the Act.

(x) Check the procedures that have been followed for the payment of unclaimed dividend out of unpaid dividend account.

(xi) Verify that, if any money transferred to Unpaid Dividend Account has remained unpaid or unclaimed for a period of 7 years from the date of such transfer then, whether it has been transferred by the company along with interest accrued, if any, thereon to the Investor Education and Protection Fund established under section 125(1) of the Act and a statement regarding such transfer has also been sent to the authority which administers such fund.

(xii) In case the company has outsourced the activity to the Service Organisation, check that all the compliances with laws, regulations, accounting and disclosure related to the dividends have been made appropriately.

6.18.5 Reserves - The term “reserves” is not defined in Companies Act, 2013. But the term “free reserves” has been defined under section 2(43) of the Act as means such reserves which, as per the latest audited balance sheet of a company, are available for distribution as dividend except any amount representing unrealized gains, notional gains or revaluation of assets, whether shown as a reserve or otherwise, or any change in carrying amount of an asset or of a liability recognized in equity, including surplus in statement of profit and loss on measurement of the asset or the liability at fair value. Further, as per the relevant extract of the Schedule III to the Companies Act, 2013, “Reserve” has been classified as capital reserve, capital redemption reserve, securities premium reserve, debenture redemption reserve, revaluation reserve, share options outstanding account and other reserves. The Guidance Note on Terms used in Financial Statements issued by the Institute of Chartered Accountants of India defines Reserves as the portion of earnings, receipts or other surplus of an enterprise (whether capital or revenue) appropriated by the management for a general or a specific purpose other than a provision for depreciation or diminution in the value of assets or for a known liability. The reserves are primarily of two types: (a) Capital Reserves and (b) Revenue Reserves.

Such a distinction is essential for disclosing in the balance sheet the amount by which the equity of the shareholders has increased with the accumulation of undistributed profits. The distribution is carried further by segregating the reserve which is made up of fortuitous gains, unconnected with business activity (e.g., appreciation in values of fixed assets, receipts on account of share premiums), from those appropriated out of profits for credit to revenue reserve; the first is described as a capital reserve and the second merely as a reserve. The Companies Act does not specify the categories of accretions to the shareholders funds which are to be credited to the Capital Reserve, except indirectly by providing that the amounts, which in the opinion of directors cannot be distributed as a dividend through the Statement of Profit and Loss are to be credited to such a reserve. The language of the provision appears to suggest that directors are vested with an unrestricted right to decide which of the amounts to be credited to the Capital

Reserve subject only to provisions of the Act as regards certain funds not being available for distribution as dividend. But, it is not so, for they cannot violate the accepted principles of accountancy which determine whether or not an item of income is capital or revenue. It may also be remembered that an appropriation once made can be revoked.

The following are examples of amounts retained in the business that are credited to one reserve account or another:

- (1) Securities Premium Reserve (Capital Reserve).
- (2) Capital Redemption Reserve created in pursuance of provision contained in Section 55 of the Companies Act, 2013 (Capital Reserve).
- (3) Debenture Redemption Reserve created in pursuance of provision contained in Section 71 of the Companies Act, 2013 (Capital Reserve).
- (4) Profit on reissue of forfeited share (Capital Reserve).
- (5) Free Reserve available for distribution of dividend (Revenue Reserve).

Attention of the students is drawn to the provisions of Section 123 of the Companies Act, 2013, discussed earlier, about restrictions in the utilisation of past profit kept in reserves for dividend purposes.

6.18.6 Deferred Taxation

It is a common experience that the profit or loss as per the Statement of Profit and Loss will be different from the income ultimately assessed to income tax. It is also generally different from the income shown in the tax-return submitted to 'tax authorities'. Consequently the taxation liability that is provided for in the accounts does not bear any direct relationship to the profit disclosed and readers of such account are left to guess the reasons. For instance, income tax should be treated on the same footing as is done in case of other expenses i.e., accounted for on accrual basis. From a management point of view income tax is an item of expense rather than an appropriation of pre-tax profit. AS-22 on "Accounting for Taxes on Income" now requires that tax should be treated as an expense. Students are advised to go through AS-22 on "Accounting for Taxes on Income" for comprehensive understanding.

6.18.7 Non-provision of tax in the accounts

The Council of the Institute of Chartered Accountants of India has taken note of the fact that there is a practice prevalent whereby companies do not make provision for tax even when such a liability is anticipated. It has expressed the view that on an overall consideration of the relevant provisions of law, non-provision for tax (where a liability is anticipated) would amount to contravention of the provisions of Sections 128 and 129 of the Companies Act, 2013. Accordingly, it is necessary for the auditor to qualify his report and such qualification should bring out the manner in which the accounts do not disclose a "true and fair" view of the state of affairs of the company and the profit or loss of the company. An example of the manner in which the report on the balance sheet and the Statement of Profit and Loss may be qualified in this respect is given below:

“The company has not provided for taxation in respect of its profits and the estimated aggregate amount of taxation not so provided for is ₹..... including ₹..... for the Year ended onTo the extent of such non-provision for the year, the profits of the Company for the financial year under report have been overstated and to the extent of such aggregate non provision, the reserves of the company appearing in the said balance sheet have been overstated and the current liabilities and provisions appearing in the said balance sheet have been understated”.

6.19 Depreciation

Section 123 prohibits a company from declaring dividend out of its profits before providing for depreciation in the manner laid down in the section.

Section 123 provides that the dividend shall be declared or paid by a company for any financial year out of the profits of the company for that year arrived at after providing for depreciation in accordance with the provisions of Schedule II “Useful lives to compute Depreciation”, to the Companies Act, 2013.

Schedule II to the Act, provides that useful life of an asset shall not ordinarily be different from the useful life specified in Part ‘C’ to the said Schedule and the residual value of an asset shall not be more than 5% of the original cost of the asset. If a company does not use the useful life or residual value of the asset as provided in the Schedule II, then justification for the difference shall be disclosed in its financial statement.

Where during any financial year, any addition has been made to any asset, or where any asset has been sold, discarded, demolished or destroyed, the depreciation on such asset shall be calculated on a pro rata basis from the date of such addition, or as the case may be, upto the date on which such asset has been sold, discarded, demolished or destroyed.

If an asset is used for any time during the year for double shift, the depreciation will increase by 50% for that period and in case of the triple shift the depreciation shall be calculated on the basis of 100% for that period.

The useful life or residual value of any specific asset as notified for accounting purpose by a Regulatory Authority constituted under an Act of Parliament or by the Central Government shall be applied in calculating the depreciation to be provided for such asset irrespective of the requirements of Schedule II.

The Schedule II to the Companies Act, 2013 needs disclosure in the financial statements about the depreciation method used and the useful lives of the assets for computing depreciation, if they are different from the life specified in the Schedule II.

Schedule III “General Considerations for preparation of Balance Sheet and Statement of Profit and Loss of a Company”, to the Companies Act, 2013, requires separate disclosure of depreciation charged and impairment losses/reversals along with a reconciliation of the gross and net carrying amounts of each class of assets at the beginning and end of the reporting period showing additions, disposals, acquisitions through business combinations and other adjustments.

Section 123(1) of the Companies Act, 2013 also prescribes that if a company has not provided for depreciation for any previous financial year it shall, before declaring, or paying dividend, provide for such depreciation:

- (a) either out of the profits of that financial year, or
- (b) out of the profits of any other previous financial year or years.

The implication of this provision is that if, for example, the profits of a company for the year ending 31st March, 2014 are proposed to be distributed, and it is found that due to inadequacy of profits no provision for depreciation had been made for the year ended 31st March, 2013 it would be necessary to make provisions in respect of the depreciation, for the year ended 31st March, 2013 as well as 2014 and only the balance of the profits for the year 31st March, 2014 would be available for distribution as a dividend.

Ascertainment of depreciation for computing net profits for the purpose of managerial remuneration: Under Section 197(1) of the Companies Act, 2013, depreciation calculated in the manner specified in Section 198 of the Companies Act, 2013 must be deducted for arriving at the amount of net profits, on which remuneration payable to managerial personnel is to be calculated.

ANNEXURE

Schedule III to the Companies Act, 2013

(See section 129)

Division I

Financial Statements for a company whose Financial Statements are required to comply with the Companies (Accounting Standards) Rules, 2006.

GENERAL INSTRUCTION FOR PREPARATION OF BALANCE SHEET AND STATEMENT OF PROFIT AND LOSS OF A COMPANY

1. Where compliance with the requirements of the Act including Accounting Standards as applicable to the companies require any change in treatment or disclosure including addition, amendment, substitution or deletion in the head/sub-head or any changes *inter se*, in the financial statements or statements forming part thereof, the same shall be made and the requirements of this Schedule shall stand modified accordingly.
2. The disclosure requirements specified in this Schedule are in addition to and not in substitution of the disclosure requirements specified in the Accounting Standards prescribed under the Companies Act, 2013. Additional disclosures specified in the Accounting Standards shall be made in the notes to accounts or by way of additional statement unless required to be disclosed on the face of the Financial Statements. Similarly, all other disclosures as required by the Companies Act shall be made in the notes to accounts in addition to the requirements set out in this Schedule.
3. (i) Notes to accounts shall contain information in addition to that presented in the Financial Statements and shall provide where required (a) narrative descriptions or dis-aggregations of items recognized in those statements and (b) information about items that do not qualify for recognition in those statements.
(ii) Each item on the face of the Balance Sheet and Statement of Profit and Loss shall be cross-referenced to any related information in the notes to accounts. In preparing the Financial Statements including the notes to accounts, a balance shall be maintained between providing excessive detail that may not assist users of financial statements and not providing important information as a result of too much aggregation.
4. (i) Depending upon the turnover of the company, the figures appearing in the Financial Statements may be rounded off as given below:

Turnover	Rounding off
(a) less than one hundred crore rupees	to the nearest hundreds, thousands, lakhs or millions, or decimals thereof
(b) one hundred crore rupees or more	to the nearest, lakhs, millions or crores, or decimals thereof.

- (ii) Once a unit of measurement is used, it shall be used uniformly in the Financial Statements.
- Except in the case of the first Financial Statements laid before the Company (after its incorporation) the corresponding amounts (comparatives) for the immediately preceding reporting period for all items shown in the Financial Statements including notes shall also be given.
 - For the purpose of this Schedule, the terms used herein shall be as per the applicable Accounting Standards.

Note: This part of Schedule sets out the minimum requirements for disclosure on the face of the Balance Sheet, and the Statement of Profit and Loss (hereinafter referred to as “Financial Statements” for the purpose of this Schedule) and Notes. Line items, sub-line items and sub-totals shall be presented as an addition or substitution on the face of the Financial Statements when such presentation is relevant to an understanding of the company’s financial position or performance or to cater to industry/sector-specific disclosure requirements or when required for compliance with the amendments to the Companies Act or under the Accounting Standards.

Notes

GENERAL INSTRUCTIONS FOR PREPARATION OF BALANCE SHEET

1. An asset shall be classified as current when it satisfies any of the following criteria:
 - (a) it is expected to be realized in, or is intended for sale or consumption in, the company's normal operating cycle;
 - (b) it is held primarily for the purpose of being traded;
 - (c) it is expected to be realized within twelve months after the reporting date; or
 - (d) it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.

All other assets shall be classified as non-current.

2. An operating cycle is the time between the acquisition of assets for processing and their realization in cash or cash equivalents. Where the normal operating cycle cannot be identified, it is assumed to have a duration of 12 months.
3. A liability shall be classified as current when it satisfies any of the following criteria:
 - (a) it is expected to be settled in the company's normal operating cycle;
 - (b) it is held primarily for the purpose of being traded;
 - (c) it is due to be settled within twelve months after the reporting date; or
 - (d) the company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

All other liabilities shall be classified as non-current.

4. A receivable shall be classified as a 'trade receivable' if it is in respect of the amount due on account of goods sold or services rendered in the normal course of business.
5. A payable shall be classified as a 'trade payable' if it is in respect of the amount due on account of goods purchased or services received in the normal course of business.
6. A company shall disclose the following in the notes to accounts:

A. Share Capital

For each class of share capital (different classes of preference shares to be treated separately):

- (a) the number and amount of shares authorized;
- (b) the number of shares issued, subscribed and fully paid, and subscribed but not fully paid;
- (c) par value per share;

6.75 Advanced Auditing and Professional Ethics

- (d) a reconciliation of the number of shares outstanding at the beginning and at the end of the reporting period;
- (e) the rights, preferences and restrictions attaching to each class of shares including restrictions on the distribution of dividends and the repayment of capital;
- (f) shares in respect of each class in the company held by its holding company or its ultimate holding company including shares held by or by subsidiaries or associates of the holding company or the ultimate holding company in aggregate;
- (g) shares in the company held by each shareholder holding more than 5 percent shares specifying the number of shares held;
- (h) shares reserved for issue under options and contracts/commitments for the sale of shares/disinvestment, including the terms and amounts;
- (i) for the period of five years immediately preceding the date as at which the Balance Sheet is prepared:
 - (A) Aggregate number and class of shares allotted as fully paid up pursuant to contract(s) without payment being received in cash.
 - (B) Aggregate number and class of shares allotted as fully paid up by way of bonus shares.
 - (C) Aggregate number and class of shares bought back.
- (j) terms of any securities convertible into equity/preference shares issued along with the earliest date of conversion in descending order starting from the farthest such date.
- (k) calls unpaid (showing aggregate value of calls unpaid by directors and officers)
- (l) forfeited shares (amount originally paid up)

B. Reserves and Surplus

- (i) Reserves and Surplus shall be classified as:
 - (a) Capital Reserves;
 - (b) Capital Redemption Reserve;
 - (c) Securities Premium Reserve;
 - (d) Debenture Redemption Reserve;
 - (e) Revaluation Reserve;
 - (f) Share Options Outstanding Account;
 - (g) Other Reserves – (specify the nature and purpose of each reserve and the amount in respect thereof);
 - (h) Surplus i.e. balance in Statement of Profit & Loss disclosing allocations and appropriations such as dividend, bonus shares and transfer to/from reserves etc.

(Additions and deductions since last balance sheet to be shown under each of the specified heads)

- (ii) A reserve specifically represented by earmarked investments shall be termed as a 'fund'.
- (iii) Debit balance of statement of profit and loss shall be shown as a negative figure under the head 'Surplus'. Similarly, the balance of 'Reserves and Surplus', after adjusting negative balance of surplus, if any, shall be shown under the head 'Reserves and Surplus' even if the resulting figure is in the negative.

C. Long-Term Borrowings

- (i) Long-term borrowings shall be classified as:
 - (a) Bonds/debentures.
 - (b) Term loans
 - (A) From banks.
 - (B) From other parties
 - (c) Deferred payment liabilities.
 - (d) Deposits.
 - (e) Loans and advances from related parties.
 - (f) Long term maturities of finance lease obligations
 - (g) Other loans and advances (specify nature).
- (ii) Borrowings shall further be sub-classified as secured and unsecured. Nature of security shall be specified separately in each case.
- (iii) Where loans have been guaranteed by directors or others, the aggregate amount of such loans under each head shall be disclosed.
- (iv) Bonds/debentures (along with the rate of interest and particulars of redemption or conversion, as the case may be) shall be stated in descending order of maturity or conversion, starting from farthest redemption or conversion date, as the case may be. Where bonds/debentures are redeemable by instalments, the date of maturity for this purpose must be reckoned as the date on which the first instalment becomes due.
- (v) Particulars of any redeemed bonds/ debentures which the company has power to reissue shall be disclosed.
- (vi) Terms of repayment of term loans and other loans shall be stated.
- (vii) Period and amount of continuing default as on the balance sheet date in repayment of loans and interest, shall be specified separately in each case.

D. Other Long Term Liabilities

Other Long-term Liabilities shall be classified as:

- (a) Trade payables

6.77 Advanced Auditing and Professional Ethics

(b) Others

E. Long-term provisions

The amounts shall be classified as:

- (a) Provision for employee benefits.
- (b) Others (specify nature).

F. Short-term borrowings

(i) Short-term borrowings shall be classified as:

- (a) Loans repayable on demand
 - (A) From banks
 - (B) From other parties
- (b) Loans and advances from related parties.
- (c) Deposits.
- (d) Other loans and advances (specify nature).

(ii) Borrowings shall further be sub-classified as secured and unsecured. Nature of security shall be specified separately in each case.

(iii) Where loans have been guaranteed by directors or others, the aggregate amount of such loans under each head shall be disclosed.

(iv) Period and amount of default as on the balance sheet date in repayment of loans and interest shall be specified separately in each case.

FA. Trade Payables

The following details relating to Micro, Small and Medium Enterprises shall be disclosed in the notes:

- (a) the principal amount and the interest due thereon (to be shown separately) remaining unpaid to any supplier at the end of each accounting year;
- (b) the amount of interest paid by the buyer in terms of section 16 of the Micro, Small and Medium Enterprises Development Act, 2006, along with the amount of the payment made to the supplier beyond the appointed day during each accounting year;
- (c) the amount of interest due and payable for the period of delay in making payment (which have been paid but beyond the appointed day during the year) but without adding the interest specified under the Micro, Small and Medium Enterprises Development Act, 2006;
- (d) the amount of interest accrued and remaining unpaid at the end of each accounting year; and
- (e) the amount of further interest remaining due and payable even in the succeeding years, until such date when the interest dues above are actually paid to the small enterprise, for the

purpose of disallowance of a deductible expenditure under section 23 of the Micro, Small and Medium Enterprises Development Act, 2006.

Explanation The terms 'appointed day', 'buyer', 'enterprise', 'micro enterprise', 'small enterprise' and 'supplier', shall have the same meaning assigned to those under clauses (b), (d), (e), (h), (m) and (n) respectively of section 2 of the Micro, Small and Medium Enterprises Development Act, 2006.

G. Other current liabilities

The amounts shall be classified as:

- (a) Current maturities of long-term debt;
- (b) Current maturities of finance lease obligations;
- (c) Interest accrued but not due on borrowings;
- (d) Interest accrued and due on borrowings;
- (e) Income received in advance;
- (f) Unpaid dividends
- (g) Application money received for allotment of securities and due for refund and interest accrued thereon. Share application money includes advances towards allotment of share capital. The terms and conditions including the number of shares proposed to be issued, the amount of premium, if any, and the period before which shares shall be allotted shall be disclosed. It shall also be disclosed whether the company has sufficient authorized capital to cover the share capital amount resulting from allotment of shares out of such share application money. Further, the period for which the share application money has been pending beyond the period for allotment as mentioned in the document inviting application for shares along with the reason for such share application money being pending shall be disclosed. Share application money not exceeding the issued capital and to the extent not refundable shall be shown under the head Equity and share application money to the extent refundable i.e., the amount in excess of subscription or in case the requirements of minimum subscription are not met, shall be separately shown under 'Other current liabilities'
- (h) Unpaid matured deposits and interest accrued thereon
- (i) Unpaid matured debentures and interest accrued thereon
- (j) Other payables (specify nature);

H. Short-term provisions

The amounts shall be classified as:

- (a) Provision for employee benefits.
- (b) Others (specify nature).

6.79 Advanced Auditing and Professional Ethics

I. Tangible assets

- (i) Classification shall be given as:
 - (a) Land.
 - (b) Buildings.
 - (c) Plant and Equipment.
 - (d) Furniture and Fixtures.
 - (e) Vehicles.
 - (f) Office equipment.
 - (g) Others (specify nature).
- (ii) Assets under lease shall be separately specified under each class of asset.
- (iii) A reconciliation of the gross and net carrying amounts of each class of assets at the beginning and end of the reporting period showing additions, disposals, acquisitions through business combinations and other adjustments and the related depreciation and impairment losses/reversals shall be disclosed separately.
- (iv) Where sums have been written off on a reduction of capital or revaluation of assets or where sums have been added on revaluation of assets, every balance sheet subsequent to date of such write-off, or addition shall show the reduced or increased figures as applicable and shall by way of a note also show the amount of the reduction or increase as applicable together with the date thereof for the first five years subsequent to the date of such reduction or increase.

J. Intangible assets

- (i) Classification shall be given as:
 - (a) Goodwill.
 - (b) Brands /trademarks.
 - (c) Computer software.
 - (d) Mastheads and publishing titles.
 - (e) Mining rights.
 - (f) Copyrights, and patents and other intellectual property rights, services and operating rights.
 - (g) Recipes, formulae, models, designs and prototypes.
 - (h) Licenses and franchise.
 - (i) Others (specify nature).

- (ii) A reconciliation of the gross and net carrying amounts of each class of assets at the beginning and end of the reporting period showing additions, disposals, acquisitions through business combinations and other adjustments and the related amortization and impairment losses/reversals shall be disclosed separately.
- (iii) Where sums have been written off on a reduction of capital or revaluation of assets or where sums have been added on revaluation of assets, every balance sheet subsequent to date of such write-off, or addition shall show the reduced or increased figures as applicable and shall by way of a note also show the amount of the reduction or increase as applicable together with the date thereof for the first five years subsequent to the date of such reduction or increase.

K. Non-current investments

- (i) Non-current investments shall be classified as trade investments and other investments and further classified as:
 - (a) Investment property;
 - (b) Investments in Equity Instruments;
 - (c) Investments in preference shares
 - (d) Investments in Government or trust securities;
 - (e) Investments in debentures or bonds;
 - (f) Investments in Mutual Funds;
 - (g) Investments in partnership firms
 - (h) Other non-current investments (specify nature)

Under each classification, details shall be given of names of the bodies corporate [indicating separately whether such bodies are (i) subsidiaries, (ii) associates, (iii) joint ventures, or (iv) controlled special purpose entities] in whom investments have been made and the nature and extent of the investment so made in each such body corporate (showing separately investments which are partly-paid). In regard to investments in the capital of partnership firms, the names of the firms (with the names of all their partners, total capital and the shares of each partner) shall be given.

- (ii) Investments carried at other than at cost should be separately stated specifying the basis for valuation thereof.
- (iii) The following shall also be disclosed:
 - (a) Aggregate amount of quoted investments and market value thereof;
 - (b) Aggregate amount of unquoted investments;
 - (c) Aggregate provision for diminution in value of investments.

6.81 Advanced Auditing and Professional Ethics

L. Long-term loans and advances

- (i) Long-term loans and advances shall be classified as:
 - (a) Capital Advances;
 - (b) Security Deposits;
 - (c) Loans and advances to related parties (giving details thereof);
 - (d) Other loans and advances (specify nature).
- (ii) The above shall also be separately sub-classified as:
 - (a) Secured, considered good;
 - (b) Unsecured, considered good;
 - (c) Doubtful.
- (iii) Allowance for bad and doubtful loans and advances shall be disclosed under the relevant heads separately.
- (iv) Loans and advances due by directors or other officers of the company or any of them either severally or jointly with any other persons or amounts due by firms or private companies respectively in which any director is a partner or a director or a member should be separately stated.

M. Other non-current assets

Other non-current assets shall be classified as:

- (i) Long Term Trade Receivables (including trade receivables on deferred credit terms);
- (ii) Others (specify nature)
- (iii) Long term Trade Receivables, shall be sub-classified as:
 - (a) (A) Secured, considered good;
 - (B) Unsecured considered good;
 - (C) Doubtful
 - (b) Allowance for bad and doubtful debts shall be disclosed under the relevant heads separately.
 - (c) Debts due by directors or other officers of the company or any of them either severally or jointly with any other person or debts due by firms or private companies respectively in which any director is a partner or a director or a member should be separately stated.

N. Current Investments

- (i) Current investments shall be classified as:
 - (a) Investments in Equity Instruments;

- (b) Investment in Preference Shares
- (c) Investments in government or trust securities;
- (d) Investments in debentures or bonds;
- (e) Investments in Mutual Funds;
- (f) Investments in partnership firms
- (g) Other investments (specify nature).

Under each classification, details shall be given of names of the bodies corporate [indicating separately whether such bodies are (i) subsidiaries, (ii) associates, (iii) joint ventures, or (iv) controlled special purpose entities] in whom investments have been made and the nature and extent of the investment so made in each such body corporate (showing separately investments which are partly-paid). In regard to investments in the capital of partnership firms, the names of the firms (with the names of all their partners, total capital and the shares of each partner) shall be given.

- (ii) The following shall also be disclosed:
 - (a) The basis of valuation of individual investments
 - (b) Aggregate amount of quoted investments and market value thereof;
 - (c) Aggregate amount of unquoted investments;
 - (d) Aggregate provision made for diminution in value of investments.

O. Inventories

- (i) Inventories shall be classified as:
 - (a) Raw materials;
 - (b) Work-in-progress;
 - (c) Finished goods;
 - (d) Stock-in-trade (in respect of goods acquired for trading);
 - (e) Stores and spares;
 - (f) Loose tools;
 - (g) Others (specify nature).
- (ii) Goods-in-transit shall be disclosed under the relevant sub-head of inventories.
- (iii) Mode of valuation shall be stated.

6.83 Advanced Auditing and Professional Ethics

P. Trade Receivables

- (i) Aggregate amount of Trade Receivables outstanding for a period exceeding six months from the Date they are due for payment should be separately stated.
- (ii) Trade receivables shall be sub-classified as:
 - (a) Secured, considered good;
 - (b) Unsecured considered good;
 - (c) Doubtful.
- (iii) Allowance for bad and doubtful debts shall be disclosed under the relevant heads separately.
- (iv) Debts due by directors or other officers of the company or any of them either severally or jointly with any other person or debts due by firms or private companies respectively in which any director is a partner or a director or a member should be separately stated.

Q. Cash and cash equivalents

- (i) Cash and cash equivalents shall be classified as:
 - (a) Balances with banks;
 - (b) Cheques, drafts on hand;
 - (c) Cash on hand;
 - (d) Others (specify nature).
- (ii) Earmarked balances with banks (for example, for unpaid dividend) shall be separately stated.
- (iii) Balances with banks to the extent held as margin money or security against the borrowings, guarantees, other commitments shall be disclosed separately.
- (iv) Repatriation restrictions, if any, in respect of cash and bank balances shall be separately stated.
- (v) Bank deposits with more than 12 months maturity shall be disclosed separately.

R. Short-term loans and advances

- (i) Short-term loans and advances shall be classified as:
 - (a) Loans and advances to related parties (giving details thereof);
 - (b) Others (specify nature).
- (ii) The above shall also be sub-classified as:
 - (a) Secured, considered good;
 - (b) Unsecured, considered good;
 - (c) Doubtful.

- (iii) Allowance for bad and doubtful loans and advances shall be disclosed under the relevant heads separately.
- (iv) Loans and advances due by directors or other officers of the company or any of them either severally or jointly with any other person or amounts due by firms or private companies respectively in which any director is a partner or a director or a member shall be separately stated.

S. Other current assets (specify nature).

This is an all-inclusive heading, which incorporates current assets that do not fit into any other asset categories.

T. Contingent liabilities and commitments (to the extent not provided for)

- (i) Contingent liabilities shall be classified as:
 - (a) Claims against the company not acknowledged as debt;
 - (b) Guarantees;
 - (c) Other money for which the company is contingently liable
- (ii) Commitments shall be classified as:
 - (a) Estimated amount of contracts remaining to be executed on capital account and not provided for;
 - (b) Uncalled liability on shares and other investments partly paid
 - (c) Other commitments (specify nature).

U. The amount of dividends proposed to be distributed to equity and preference shareholders for the period and the related amount per share shall be disclosed separately. Arrears of fixed cumulative dividends on preference shares shall also be disclosed separately.

V. Where in respect of an issue of securities made for a specific purpose, the whole or part of the amount has not been used for the specific purpose at the balance sheet date, there shall be indicated by way of note how such unutilized amounts have been used or invested.

W. If, in the opinion of the Board, any of the assets other than fixed assets and non-current investments do not have a value on realization in the ordinary course of business at least equal to the amount at which they are stated, the fact that the Board is of that opinion, shall be stated.

GENERAL INSTRUCTIONS FOR PREPARATION OF STATEMENT OF PROFIT AND LOSS

1. The provisions of this Part shall apply to the income and expenditure account referred to in sub-clause (ii) of Clause (40) of Section 2 in like manner as they apply to a statement of profit and loss.
2. (A) In respect of a company other than a finance company revenue from operations shall disclose separately in the notes revenue from
 - (a) Sale of products;
 - (b) Sale of services;
 - (c) Other operating revenues;
 Less:
 - (d) Excise duty.
- (B) In respect of a finance company, revenue from operations shall include revenue from
 - (a) Interest; and
 - (b) Other financial services

Revenue under each of the above heads shall be disclosed separately by way of notes to accounts to the extent applicable.

3. Finance Costs

Finance costs shall be classified as:

- (a) Interest expense;
- (b) Other borrowing costs;
- (c) Applicable net gain/loss on foreign currency transactions and translation.

4. Other income

Other income shall be classified as:

- (a) Interest Income (in case of a company other than a finance company);
- (b) Dividend Income;

6.87 Advanced Auditing and Professional Ethics

- (c) Net gain/loss on sale of investments
- (d) Other non-operating income (net of expenses directly attributable to such income).

5. Additional Information

Note: Broad heads shall be decided taking into account the concept of materiality and presentation of true and fair view of financial statements.

GENERAL INSTRUCTIONS FOR THE PREPARATION OF CONSOLIDATED FINANCIAL STATEMENTS

1. Where a company is required to prepare Consolidated Financial Statements, i.e., consolidated balance sheet and consolidated statement of profit and loss, the company shall *mutatis mutandis* follow the requirements of this Schedule as applicable to a company in the preparation of balance sheet and statement of profit and loss. In addition, the consolidated financial statements shall disclose the information as per the requirements specified in the applicable Accounting Standards including the following:
 - (i) Profit or loss attributable to "minority interest" and to owners of the parent in the statement of profit and loss shall be presented as allocation for the period.
 - (ii) "Minority interests" in the balance sheet within equity shall be presented separately from the equity of the owners of the parent.

2. In Consolidated Financial Statements, the following shall be disclosed by way of additional information:

Name of the entity in the	Net Assets, i.e., total assets minus total liabilities		Share in profit or loss	
	As % of consolidated net assets	Amount	As % of consolidated profit or loss	Amount

3. All subsidiaries, associates and joint ventures (whether Indian or foreign) will be covered under consolidated financial statements.
4. An entity shall disclose the list of subsidiaries or associates or joint ventures which have not been consolidated in the consolidated financial statements along with the reasons of not consolidating.

Division II

Financial Statements for a company whose financial statements are drawn up in compliance of the Companies (Indian Accounting Standards) Rules, 2015.

GENERAL INSTRUCTIONS FOR PREPARATION OF FINANCIAL STATEMENT OF A COMPANY REQUIRED TO COMPLY WITH Ind AS

1. Every company to which Indian Accounting Standards apply, shall prepare its financial statements in accordance with this Schedule or with such modification as may be required under certain circumstances.
2. Where compliance with the requirements of the Act including Indian Accounting Standards (except the option of presenting assets and liabilities in the order of liquidity as provided by the relevant Ind AS) as applicable to the companies require any change in treatment or disclosure including addition, amendment substitution or deletion in the head or sub-head or any changes inter se, in the financial statements or statements forming part thereof, the same shall be made and the requirements under this Schedule shall stand modified accordingly.
3. The disclosure requirements specified in this Schedule are in addition to and not in substitution of the disclosure requirements specified in the Indian Accounting Standards. Additional disclosures specified in the Indian Accounting Standards shall be made in the Notes or by way of additional statement or statements unless required to be disclosed on the face of the Financial Statements. Similarly, all other disclosures as required by the Companies Act, 2013 shall be made in the Notes in addition to the requirements set out in this Schedule.
4. (i) Notes shall contain information in addition to that presented in the Financial Statements and shall provide where required-
 - (a) narrative description or disaggregation of items recognised in those statements; and
 - (b) information about items that do not qualify for recognition in those statements.

(ii) Each item on the face of the Balance Sheet, Statement of Changes in Equity and Statement of Profit and Loss shall be cross-referenced to any related information in the Notes. In preparing the Financial Statements including the Notes, a balance shall be maintained between providing excessive detail that may not assist users of Financial Statements and not providing important information as a result of too much aggregation.

5. Depending upon the turnover of the company, the figures appearing in the Financial Statements shall be rounded off as below:

Turnover	Rounding off
(i) less than one hundred crore rupees	To the nearest hundreds, thousands, lakhs or millions, or decimals thereof
(ii) one hundred crore rupees or more	To the nearest, lakhs, millions or crores, or decimals thereof.

Once a unit of measurement is used, it should be used uniformly in the Financial Statements.

6. Financial Statements shall contain the corresponding amounts (comparatives) for the immediately preceding reporting period for all items shown in the Financial Statement including Notes except in the case of first Financial Statements laid before the company after incorporation.

7. Financial Statements shall disclose all 'material' items, i.e, the items if they could, individually or collectively, influence the economic decisions that users make on the basis of the financial statements. Materiality depends on the size or nature of the item or a combination of both, to be judged in the particular circumstances.

8. For the purpose of this Schedule, the terms used herein shall have the same meanings assigned to them in Indian Accounting Standards.

9. Where any Act or Regulation requires specific disclosure to be made in the standalone financial statement of a company, the said disclosure shall be made in addition to those required under this Schedule.

Note: This Schedule sets out the minimum requirements for disclosure on the face of the Financial Statements, i.e, Balance Sheet, Statement of Changes in Equity for the period, the Statement of profit and Loss for the period (The term 'Statement of Profit and Loss' has the same meaning as Profit and Loss Account) and Notes. Cash flow statement shall be prepared, where applicable, in accordance with the requirement of the relevant Indian Accounting Standard.

Line items, sub-line items and sub-totals shall be presented as an addition or substitution on the face of the Financial Statements when such presentation is relevant to an understanding of the company's financial position or performance to cater to industry or sector-specific disclosure requirements or when required for compliance with the amendments to the Companies Act, 2013 or under the Indian Accounting Standards.

GENERAL INSTRUCTIONS FOR PREPARATION OF BALANCE SHEET:

1. An entity shall classify an asset as current when-
 - (a) it expects to realise the asset, or intends to sell or consume it, in its normal operating cycle;
 - (b) it holds the asset primarily for the purpose of trading;
 - (c) it expects to realise the asset within twelve months after the reporting period; or
 - (d) the asset is cash or a cash equivalent unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

An entity shall classify all other assets as non-current.

2. The operating cycle of an entity is the time between the acquisition of assets for processing and their realisation in cash or cash equivalents, When the entity's normal operating cycle is not clearly identifiable, it is assumed to be twelve months.

3. An entity shall classify a liability as current when-
 - (a) it expects to settle the liability in its normal operating cycle;
 - (b) it holds the liability primarily for the purpose of trading;
 - (c) the liability is due to be settled within twelve months after the reporting period; or
 - (d) it does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

An entity shall classify all other liabilities as non-current.

4. A receivable shall be classified as a 'trade receivable' if it is in respect of the amount due on account of goods sold or services rendered in the normal course of business.
5. A payable shall be classified as a 'trade payable' if it is in respect of the amount due on account of goods purchased or services received in the normal course of business.
6. A company shall disclose the following in the Notes:

A Non-Current Assets

I. Property, Plant and Equipment :

- (i) Classification shall be given as:
 - (a) Land
 - (b) Buildings
 - (c) Plant and Equipment
 - (d) Furniture and Fixtures
 - (e) Vehicles

- (f) Office equipment
- (g) Bearer Plants
- (h) Others (specify nature)
 - (ii) Assets under lease shall be separately specified under each class of assets

GENERAL INSTRUCTIONS FOR PREPARING OF STATEMENT OF PROFIT AND LOSS

1. The provisions of this Part shall apply to the income and expenditure account, in like manner as they apply to a Statement of Profit and Loss,
2. The Statement of Profit and Loss shall include:
 - (1) Profit of loss for the Period;
 - (2) Other Comprehensive Income for the periodThe sum of (1) and (2) above is "Total Comprehensive Income"
3. Revenue from operations shall disclose separately in the notes
 - (a) sale of products (including Excise Duty);
 - (b) sale of services; and
 - (c) other operating revenues.
4. Finance Costs: Finance costs shall be classified as-
 - (a) interest;
 - (b) dividend on redeemable preference shares;
 - (c) exchange differences regarded as an adjustment to borrowing costs; and
 - (d) other borrowing costs (specify nature).
5. Other income: other income shall be classified as-
 - (a) interest Income;
 - (b) dividend Income; and
 - (c) other non-operating income (net of expenses directly attributable to such income)
6. Other Comprehensive Income shall be classified into-
 - (A) Items that will not be reclassified to profit or loss
 - (i) Changes in revaluation surplus;
 - (ii) Re-measurements of the defined benefit plans;
 - (iii) Equity Instruments through Other Comprehensive Income;
 - (iv) Fair value changes relating to own credit risk of financial liabilities designated at fair value through profit or loss;
 - (v) Share of Other Comprehensive Income in Associates and Joint Ventures, to the extent not to be classified into profit or loss; and
 - (v) Share of Other Comprehensive Income in Associates and Joint Ventures, to the extent not to be classified into profit or loss; and
 - (vi) Others (specify nature).

6.111 Advanced Auditing and Professional Ethics

- (B) Items that will be reclassified to profit or loss;
 - (i) Exchange differences in translating the financial statements of a foreign operation;
 - (ii) Debt instruments through Other Comprehensive Income;
 - (iii) The effective portion of gains and loss on hedging instruments in a cash flow hedge;
 - (iv) Share of other comprehensive income in Associates and Joint Ventures, to the extent to be classified into profit or loss; and
 - (v) Others (specify nature)
- 7. Additional Information: A Company shall disclose by way of notes, additional information regarding aggregate expenditure and income on the following items:
 - (a) employee Benefits expense (showing separately (i) salaries and wages, (ii) contribution to provident and other funds, (iii) share based payments to employees, (iv) staff welfare expenses).
 - (b) depreciation and amortisation expense;
 - (c) any item of income or expenditure which exceeds one per cent of the revenue from operations or ₹ 10,00,000, whichever is higher, in addition to the consideration of 'materiality' as specified in clause 7 of the General Instructions for Preparation of Financial Statements of a Company;
 - (d) interest Income;
 - (e) interest Expense
 - (f) dividend income;
 - (g) net gain or loss on sale of investments;
 - (h) net gain or loss on foreign currency transaction and translation (other than considered as finance cost);
 - (i) payments to the auditor as (a) auditor, (b) for taxation matters, (c) for company law matters, (d) for other services, (e) for reimbursement of expenses;
 - (j) in case of companies covered under section 135, amount of expenditure incurred on corporate social responsibility activities; and
 - (k) details of items of exceptional nature;
- 8. Changes in Regulatory Deferral Account Balances shall be presented in the Statement of Profit and Loss in accordance with the relevant Indian Accounting Standards

PART III- GENERAL INSRUCTIONS FOR THE PREPARATION OF CONSOLIDATED FINANCIAL STATEMENTS

1. Where a company is required to prepare Consolidated Financial Statements, i.e., consolidated balance sheet, consolidated statement of changes in equity and consolidated statement of profit and loss, the company shall mutatis mutandis follow the requirements of this Schedule as applicable to a company in the preparation of balance sheet, statement of changes in equity and statement of profit and loss .In addition, the consolidated financial statements shall disclose the information as per the requirements specified in the applicable Indian Accounting Standards notified under the Companies (Indian Accounting Standards) Rules 2015, including the following, namely:
 - (i) Profit or loss attributable to 'non-controlling interest 'and to 'owners of the parent' in the statement of profit and loss shall be presented as allocation for the period Further, 'total comprehensive income for the period attributable to 'non-controlling interest' and to 'owners of the parent shall be presented in the statement of profit and loss as allocation for the period. The aforesaid disclosures for 'total comprehensive income shall also be made in the statement of changes in equity. In addition to the disclosure requirements in the Indian Accounting Standards, the aforesaid disclosures shall also be made in respect of 'other comprehensive Income
 - (ii) 'Non-controlling interests' in the Balance Sheet and in the Statement of Changes in Equity, within equity, shall be presented separately from the equity of the 'owners of the parent'.
 - (iii) Investments accounted for using the equity method.
2. In Consolidated Financial Statement, the following shall be disclosed by the way of additional information

Name of the entity in the Group	Net Asset i.e. total assets minus total liabilities		Share in profit or loss		Share in other comprehensive income		Share in total comprehensive income	
	As % of consolidated net assets	Amount	As % of consolidated profit or loss	Amount	As % of consolidated other comprehensive income	Amount	As % of total comprehensive income	Amount

Liabilities of Auditors

7.1 Nature of Auditor's Liability

A member of the accounting profession, when he is in practice, offers to perform a larger variety of professional services and; he also holds himself out to the public as an accountant qualified to undertake these assignments. When, therefore, he is appointed under a statute or under an agreement to carry out some professional work it is to be presumed that he shall carry them out completely and with the care and diligence expected of a member of the profession. In view, however, of the fact that the standards of competence may vary from individual to individual and also the concept of the function of an audit and that of its technique, may from time to time undergo change, the auditor is expected to discharge his duties according to "generally accepted auditing standards" obtaining at the time when the professional work is carried out.

The implications of a professional engagement have been explained in the case *Lanphire v. Phipos* (1838) & *Case & P.* 475 cited in "Professional Negligence" by J.P.Eddy, as follows:

Fig.: Auditor's Liability*

"Every person who enters into a learned profession undertakes to bring to the exercise of it a reasonable degree of care and skill. He does not undertake, if he is an attorney, that at all events he shall gain his case, nor does a surgeon undertake that he will perform a cure; nor does he undertake to use the highest degree of skill. There may be persons who have a higher education and greater advantages than he has; but he undertakes to bring a fair, reasonable and competent degree of skill."

Either absence of the requisite skill or failure to exercise reasonable skill can give rise to an action for damage for professional negligence.

7.1.1 Taking assistance in the discharge of his duties

It is a well accepted legal principle that duties under a contract can be assigned only in cases where it does not make any difference to the person to whom the obligation is owed, which of the two persons discharges it. But contracts involving personal skill, or other personal qualifications normally cannot be assigned. It, therefore, follows that the work of an auditor being of a personal character, it must be performed either by him or by his persons under his

* Source : *NovoJuris Legal*

7.2 Advanced Auditing and Professional Ethics

supervision since he himself remains finally responsible. Only to ensure that this scheme shall be adhered to in all cases, clause (12) of Part I of First Schedule to the Chartered Accountants (Amendment) Act, 2006 makes it obligatory that reports on financial statements would be signed either by the member or his partner.

An auditor who, in the discharge of his professional obligations had relied on the report or statement of his, subsequently found to be false, cannot be held liable in a criminal action brought against him (*Rex. v. Hinds Musgrave Stevens*).

This is, however, no bar to assistance being taken in the performance of a duty or engagement. It is, therefore, quite common for the auditors to engage persons some of whom are professionally qualified, while others are not, to assist them in their work. The principals, however, are expected to guide and supervise their work and are personally responsible for any dereliction of duty or absence of care or skill in performance of an audit or any other professional engagement. They cannot ordinarily shift any part of this liability to their employees.

Such legal position is clearly borne by the following extracts from the judgements in two celebrated cases:

- (1) In *Henry Squire (Cash Chemists) Ltd. v. Ball Baker & Co.*: "The principal must not excuse himself for his clerk's negligence by saying that he employed a clerk."
- (2) In the *Superintendent of Police v. M. Rajamany*: "No auditor can escape from personal liability by taking shelter under the misconduct of his own employees."

The decision in the *Rajamany's* case also places a limitation on the extent to which an auditor may delegate his duties to his assistants:

"Callowness and irresponsible abdication of his (auditor's) work can never be regarded as anything but misconduct. An auditor who does not personally look into the accounts but merely delegated it to his assistants cannot be said to be acting with due skill and care."

Despite the fact the principal is responsible for the misdemeanor and misdeeds of his employees, in order that such of them as are qualified may discharge their duties, which are assigned to them with adequate skill and care, the Council has issued the following Council General Guidelines, 2008 No. 1-CA(7)02/2008 dated 8th August 2008 in the exercise of powers vested in it by Chapter II:

"In exercise of the powers conferred by Chapter II of Council General Guidelines, 2008 No. 1-CA(7)02/2008 dated 8th August 2008, a member of the Institute who is an employee shall exercise due diligence and shall not be grossly negligent in the conduct of his duties."

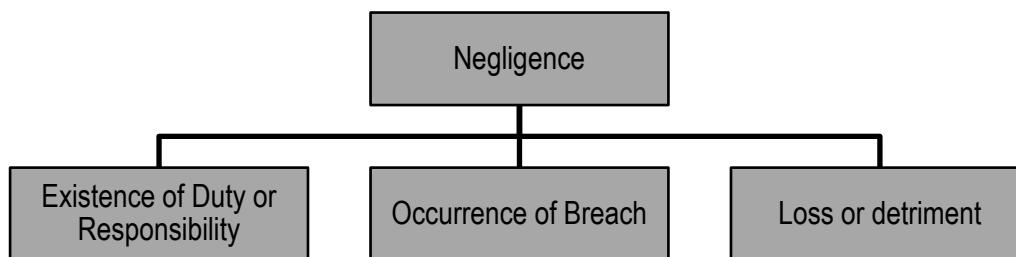

In the absence of this clause, only the Chartered Accountant who had signed the report would be liable and it would not be possible to reach the employee chartered accountant on grounds of misconduct. The above Council General Guidelines, 2008 No. 1-CA(7)02/2008 dated 8th August 2008 safeguards the interest of members who engage Chartered Accountants and issue reports on the basis of the work carried on by them.

7.1.2 Basis of liability

The liability for professional negligence may arise either under a statute or an agreement; the liability may be civil or criminal, disciplinary action for professional misconduct under section 21 of the Chartered Accountants Act can also be taken against a Chartered Accountant for failure to discharge his professional duties competently or diligently.

7.2 Professional Negligence

Negligence, which is culpable, generally consists of undermentioned three elements:

- (a) existence of duty or responsibility owed by one party to another to perform some act with certain degree of care and competence;
- (b) occurrence of a breach of such duty; and
- (c) loss or detriment, being suffered by the party to whom the duty was owed as a result of negligence.

In this context, professional negligence would constitute failure to perform duties according to “accepted professional standards”, resulting in some loss or damage to a party to whom the duty is owed.

(A) To whom is the duty owed?

A professional man is deemed to have been negligent only when he owed a duty to a person or persons and he had failed to perform or had performed it negligently. If a loss had been suffered by a client through the action of the auditor, his liability would be determined on the basis of the contract of engagement according to which the auditor had undertaken to provide service. When a loss has been suffered by a third party who is not privy to the arrangement between the clients and the auditor for determining whether he is liable, it is necessary to find out whether the auditor owed any duty to him. This will be apparent from the summary of legal decisions discussed hereinafter.

The financial statements, on which the auditors report, are designed to serve the needs of a variety of users, particularly owners and creditors. There are users who have direct economic interest in the concerned business enterprise like the owners, creditors and suppliers, potential owners, management, taxation authorities, employees and customers. There are also others who have indirect interests like financial analysts and advisers, stock exchanges, lawyers, regulatory authorities, financial press, trade associations and labour unions. Usually, these parties are not in priority with the auditor. Under what circumstances these parties not in priority

7.4 Advanced Auditing and Professional Ethics

should with the auditor be allowed to recover from the auditor losses that they incur as a result of the auditor's dereliction of duty? The solution seems difficult. To hold a negligent auditor liable "in an indeterminate amount for an indeterminate time to an indeterminate class" will be stretching the limit too far. We cannot at the same time brush aside the whole concept of auditors' liability to those parties with whom he has no privity of contract. If responsibility is to be imposed where specific users are identified, then to what extent will it be imposed and what criteria will be used to determine the specific user to whom the auditor should be responsible? Liability imposed should have some relation to the responsibility reasonably assumed and the fees charged.

The evolution of law in this regard varies widely in England and the United States. So far as our country is concerned, we should say that much headway has not been made. Hence, it will be highly instructive to analyse the situation under the following three heads:

- (1) English Scene.
- (2) American Scene.
- (3) Indian Scene.

English scene: The general rule in England is that only parties to a contract may enforce the rights under the contract.

In *Derry v. Peek* (1889) 14 A. C 337, it was held that there is no liability to third parties for negligent language that resulted only in pecuniary loss, although liability to third parties could be established if the negligent misrepresentation resulted in loss of life, limb or health. It was held that a false statement made through carelessness and without reasonable ground for believing it to be true could be evidence of fraud. However, if it was made in the honest belief that it was true, it was not fraudulent and could not render the person liable in deceit. However, this decision was the subject of great controversy.

English courts continued to follow *Derry v. Peek* until 1963. During this period there was no liability to third parties for negligent misrepresentation except when a special duty to be careful was imposed by contract a fiduciary relationship or likelihood of physical damage to person or property.

Direct case on an Accountant's liability to third parties: The question of Accountant's liability to third parties directly came up for consideration in England in the case of *Candler v. Crane Christmas & Co.* The fact to the case were that a firm of accountants had been engaged by a company to prepare the company's accounts. The accountants knew that the statements of account would be shown to third parties. Relying on the statements of account reported upon by the accountants, the plaintiff had invested money in the company and it was lost. The statements in question had been prepared negligently but there was no fraud. *Cohen and Asquith L.J.* (Denning, L.J. dissenting), held that a false statement made carelessly, as contrasted with one fraudulently made by one person to another, though acted on by that other to his detriment was not action in the able absence of any contractual or fiduciary relationship between the parties Lord Denning, however, dissented, and said:

"..... the Accountant, who certifies the accounts of his client is always called upon to

express his personal opinion whether the accounts exhibit a true and correct view of his client's affairs; and he is required to do this not so much for the satisfaction of his own client but more for the guidance of shareholders, investors, revenue authorities, and others who may have to rely on the accounts in serious matters of business. If we should decide this case in favour of the Accountants there will be no reason why Accountants should ever verify the word of the man in a one man company, because there will be no one to complain about it. The one man who gives them wrong information will not complain if they do not verify it. He wanted their backing for misleading information he gives them and he can only get it if they accept his word without verification. It is just what he wants so as to gain his own ends. And the persons who are misled cannot complain because the accountants owe no duty to them. If such be the law, I think it is to be regretted, for it means that the accountant's certificate which should be a safeguard, becomes a share for those who rely on it. I do not myself think it is the law. In my opinion Accountants owe a duty of care not only to their own clients; but also to those who they know will rely on their accounts in the transactions for which these accounts are prepared."

A turning point: *Hedley Byrne & Co. Ltd. v. Heller & Partners Ltd.* (1963) All E.R. 575: (1964). 1 Camp L.J., 14, the House of Lords. In the case, the subject of liability to third parties for negligence of a professional person has been comprehensively reviewed. The House of Lords unanimously overruled the majority decision in *Candler v. Crane, Christmas & Co.* and upheld Lord Denning's dissenting opinion in that case. Though the *Hedley Byrne* case did not directly concern an Accountant, the principle laid down in the case is applicable to Accountants.

However, for recent cases have suggested a break away from the *Hedley Byrne* 'special relationship principle.' *Jeb Fasteners* - In 1975, Marks, Bloom and Co., the defending firm of auditor reported on the annual financial statements of B.G. fasteners Ltd. for the year ended 31 October, 1974. Stock had been valued at net realisable value of £2. instead of at cost of £11,000 resulting in overstated income and balance sheet figure. The auditors were aware of the company's liquidity problems, and had discussions with *Jeb Fasteners*, the plaintiffs, at the time of takeover negotiations.

Jeb Fasteners subsequently purchased the company, but the takeover was not a success. Consequently, *Jeb* sued the auditors on the grounds that they were made into purchasing the company by the mis-stated financial statement, and that the auditors had a duty of care to persons whom they could have reasonably foreseen would rely on their audit report. Justice Woolf ruled that such a duty of care did exist, but the auditors escaped liability on the grounds that the alleged negligence was not the cause of the loss. The judge ruled that the primary purpose of the takeover appeared to be the acquisition of the services of the two B.G. directors, and that a purchase would probably have taken place on the same basis even had the true financial position been known.

Justice Woolf applied a 'reasonable foresight' test, as opposed to the 'special relationship test of *Hedley Byrne*. This was based on a judgement by Lord Woolf force in the 1977 case of *Anns v. London Borough of Merton*, in which it was held that: 'First, one has to ask whether, as between the alleged wrongdoer and person who has suffered damage there is a sufficient relationship of neighbourhood such that, in the reasonable contemplation of the former,

7.6 Advanced Auditing and Professional Ethics

carelessness on his part may be likely to cause damage to the latter, in which case a prima facie duty of care arises.

'Second, if the first question is answered affirmatively, it is necessary to consider whether there are any considerations which ought to negate, or reduce or limit the scope of the duty of the class of person to whom it is owed or the danger to which any breach of it may give rise.'

In *Jeb Fasteners*, Justice Woolf ruled that the auditors were aware of the liquidity problems of B.G. and that financial assistance would become necessary and that a takeover was certainly one method which, was within the contemplation of Mr. Marks (the auditor). Consequently, the judge decided that the events leading to the takeover of B.G. were foreseeable, although it agreed by all parties that at the time of the audit Marks, Bloom and Co. were not aware of reliance by the plaintiffs or even of the fact that a takeover was contemplated.

The Court of Appeal agreed that there was a lack of causal connection between the auditor's negligence and *Jeb's* loss. It further stated that it was not necessary for it to decide on the extent of liability to confirm in favour of the defendant.

Accordingly, Justice Woolf's ruling has some authority but leaves the extent of third party liability still unconfirmed.

A usual argument against the extension of liability to third parties is that company law requires the auditor to report to the existing shareholders, for the purposes of stewardship only. And that the accounts have not necessarily been prepared with others in mind. This latter is not a powerful argument, for it is hard to imagine a situation where accounts which are true and fair to members will be sufficiently misleading to others to provide the basis of a claim for negligence. Financial loss to creditors or other third parties will normally only occur as a result of the auditor's default, if the auditors have made some very significant 'goof.' And auditors, insurers should be well able to cover this risk, which could otherwise unfairly result in individuals bearing the loss.

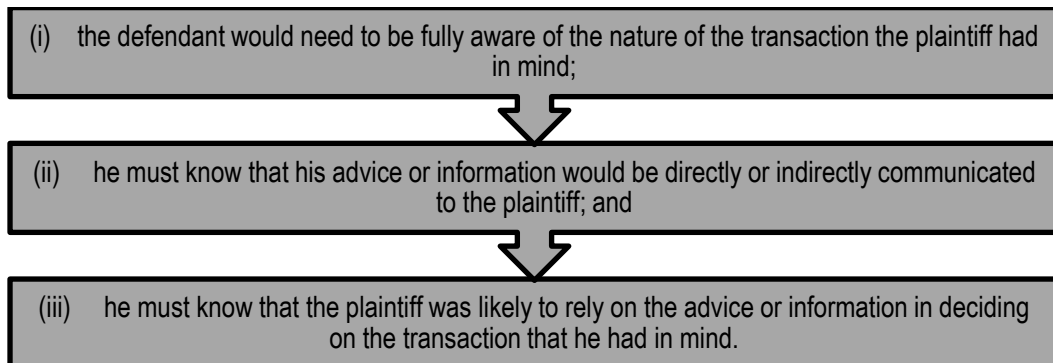

On the other hand, it can be strongly argued that if the company law wants auditors to report to creditors, and others, it should clearly say so. And tort should not be used as a backdoor approach for creating such a liability; although on grounds of equity one can question whether the auditor should in fact be held responsible for the financial loss of every potential investor and every creditor who seeks to rely on his report. In the words of Cardozo in the famous American case of the *Ultramares Corporation v. Touche*, "..... it would be wrong for accountants to be exposed 'to liability in an indeterminate amount for an indeterminate time to an indeterminate class'. The amounts involved could indeed be almost infinite, and the fact of reliance very difficult to prove projectively (herein would lie the auditors' the greatest safeguard). Furthermore, it is the directors who should really take primary responsibility for loss through misleading accounts. Yes so often they are 'men of straw' so there is no point in pursuing them; the auditors, with their insurance cover, will prove a much better bet. But should we have to entirely bear this heavy burden, via our insurance premiums, whereas directors can often escape with a suspended jail sentence and their illgotten spoils? Perhaps directors should also carry a mandatory indemnity insurance, as a requirement of holding office.

CAPARO Industries V. Touche Ross - M/s. Touche Ross, a firm of accountants had appealed to the House of Lords from a decision of the Court of Appeal which held that auditors could be

sued by an investing shareholder for inaccuracy in accounts or misleading accounts by which a pre-tax profit should have been shown as a loss. On the facts, it was alleged that CAPARO would not have bid for the takeover of Fidelity, a public company, if the true accounts were known.

The House of Lords opined that in advising his clients, the professional owed a duty to exercise the standard of skill and care appropriate to his professional status. He would be liable to contract and tort for losses his client might suffer from breach of the duty. The House of Lords observed that where a statement was put into general circulation and might forcibly be relied on by strangers for anyone of a variety of different purposes which the makers of the statement had no specific reason to anticipate, the duty to use care did not exist. The auditors owed no duty of care to the members of the public who relied on the accounts in deciding to buy shares. It was difficult to visualise a situation in which individual shareholders could claim to have sustained loss in respect of existing shareholdings referable to auditors' negligence which could not be recouped by the company. A purchaser of additional shares stood in the public to whom the auditors owed no duty. It was also held that the purpose of the auditor's certificate was to provide those entitled to the report within information to enable them to exercise their proprietary powers. It was not for individual speculation with a view to profit. The purpose of annual accounts so far as members are concerned, was to enable them to question past management, to exercise voting rights and to influence future policy management.

The learned judges disclosed that for a duty to exist the following conditions must be satisfied:

It is interesting to note that Touche Ross, the auditors in the case, made an out of court settlement with Caparo of £1.35m in July, 1994 to avoid any further legal action. They denied any negligence, a position they have maintained throughout the case.

In *Al Saudi Bank and others v Clark Pixley and another* (1990), the Caparo principles were applied and, because the auditor had not directly sent a copy of the audited statements to a bank about to grant a loan to his client, and had not been aware that the statements had been distributed, the relationship to the client was not deemed to be sufficiently close. The fact that a potential lender could foreseeably come to possess statements was not enough to create the necessary relationship.

Subsequent to the Caparo case, three more cases have endorsed its doctrine. They are *James Mc Naughton Paper Group Ltd v Hicks Anderson and Co* (1991), where a duty of care was

7.8 Advanced Auditing and Professional Ethics

denied again because, it applied to shareholders as a class not as individuals; Berg Sons and Co and others v, Adams and others (1992), which showed that the auditor's work had been performed only to satisfy the statutory audit requirement and no more, and could not support a duty of care to a finance house that had discounted Berg's bills; and Goloo and others v Bright Grahame and Murray (1993) which would not extend the classes of persons to whom the accountant might be liable and which reinforced the view that it must be proved that an auditor's negligence must be the "effective and dominant cause" of loss for a liability to exist.

Clearly these recent cases have upheld the principles established in the Caparo judgement.

Only one case, Morgan Crucible Co PLC v Hill Samuel and Co Ltd (1991) has threatened to dilute the effects of the Caparo decision. The facts of the case were that company taking over another, relying on information provided by the auditor of the target company, as in Caparo. Since the directors of the target company circularised all their shareholders forecasting a sizeable increase in pre-tax profits, supported by a letter from the auditors and the auditors' opinion was issued after the takeover had commenced, and thus the plaintiff was not relying solely on the accounts but also on these further representations. Thus, it was held the auditor had a duty of care in that, whereas in the Caparo case the audited accounts had been drafted for one purpose but had been relied upon for a different purpose, in this case, the opinion had been relied upon for the purpose for which it was issued. The degree of proximity was such that the defendant could well be liable. The case was settled out of court. Similarly, in Columbia Coffee and Tea Party Ltd v. Churchill and others (1992), the Court held that a third party investor was owed a duty of care on the basis of an assumption of responsibility flowing from statements in the defendant's auditor manual which brought a potential purchaser of shares within the ambit of persons to whom a duty of care was owed. In Possfund v. Diamond (1996), it is being argued that a duty of care is assumed and owed to these investors who (as intended) rely on the contents of the prospectus in making subsequent purchases.

American Scene: The common law liability of the auditor to third parties is important in any discussion of the auditor's legal liability. A third party may be defined as an individual who is not in privity with the parties to a contract. From a legal stand-point, there are two classes of third parties: (1) a primary beneficiary and (2) other beneficiaries, A primary beneficiary is anyone identified to the auditor by name prior to the audit who is to be the primary recipient of the auditor's report. For example, if at the time the engagement letter is signed, the client informs the auditor that the report is to be used to obtain a loan at the city national bank, the bank becomes a primary beneficiary. In contrast, other beneficiaries are unnamed third parties, such as creditors, stockholders, and potential investors.

The auditor is liable to all third parties for gross negligence and fraud under tort law. In contrast, the auditor's liability for ordinary negligence has traditionally been different between the two classes of third parties.

Liability to Primary Beneficiaries - The privity of contract doctrine extends to the primary beneficiary of the auditor's work. The landmark case, Ultramares Corp. v. Touche (now deloitte and Touche), and its major findings are as follows.

In essence, Ultramares upheld the privity of contract doctrine under which third parties cannot sue auditors for ordinary negligence. However, judge Cardozo's decision extended to primary

beneficiaries the rights of one in privity of contract. Hence, Ultramares as a primary beneficiary could sue and recover for losses suffered because of the auditor's ordinary negligence.

The defendant auditors, Touch, failed to discover fictitious transactions that overstated assets and stockholders equity by \$700,000 in the audit of Fred Stern & Co. On receiving the audited financial statements, Ultramares loaned Stern large sums of money that Stern was unable to repay because it was actually insolvent. Ultramares sued the CPA firm for negligence and fraud.

The court found the auditors guilty of negligence but ruled that accountants should not be liable to any third party for negligence except to a primary beneficiary.

An analysis of the decision reveals several significant environmental factors that are particularly interesting in view of the current legal environment. First, the judge recognized that extending liability for ordinary negligence to any third part might discourage individuals from entering the accounting profession, thus depriving society of a valuable service. Second, he feared the impact that a broader encroachment on the privity doctrine might have on other professionals such as lawyers and doctors. Third, the decision reaffirmed the auditor's liability to any third party for gross negligence or fraud.

Liability to Other Beneficiaries - The Ultramares decision remained virtually unchallenged for 37 years, and it still is followed today in many jurisdictions. However, since 1968, several court decisions have served to extend the auditor's liability for ordinary negligence beyond the privity of contract doctrine.

A Foreseen Class: The first shift away from Ultramares occurred in the form of judicial acceptance of the specifically foreseen class concept. This concept is explained as follow:

If the client informs the CPA that the audit report is to be used to obtain a bank loan, all banks are foreseen parties, but trade creditors and potential stockholders would not be part of the foreseen class. The liability is limited to losses suffered through reliance on the information in a transaction known by the auditor or a similar transaction. In the above instance, this means that the accountant would not be liable if the audit report was used by a bank to invest capital in the client's business in exchange for common stock instead of granting a loan.

The foreseen class concept does not extend to all present and future investors, stockholders, or creditors. Court decisions have not required that the injured party be specifically identified, but the class of persons to which the party belonged had to be limited and known at the time the auditor provided the information.

Foreseeable Parties: Individuals or entities whom the auditor either knew or should have known would rely on the audit report in making business and investment decisions are foreseeable parties. This concept extends the auditor's duty of due care to any foreseeable party who suffers a pecuniary loss from relying on the auditor's representation. Foreseeable parties include all creditors', Stock holders and present and future investors. Foreseeability is used extensively by the courts in cases involving physical injury. For example, foreseeability is almost universally used in product liability cases when the manufacturer's negligence causes the physical injury. This concept was first applied in an audit negligence case in the early 1980s. *Rusch Factors Inc v. Levin* (1968)

7.10 Advanced Auditing and Professional Ethics

Cases Illustrating Liability to Other Beneficiaries: The leading cases that extended the accountant's liability for ordinary negligence to foreseen parties and to foreseeable parties are as follows:

In *Rush Factors Inc. vs. Levin* (1968), the plaintiff had asked the defendant accountant to audit the financial statements of a corporation seeking a loan. The certified statements indicated that the potential borrower was solvent when, in fact, it was insolvent. Rush Factors sued the auditor for damages resulting from its reliance on negligent and fraudulent misrepresentations in the financial statements. The defendant asked for dismissal on the basis of lack of privity of contract.

The court ruled in favour of the plaintiff. While the decision could have been decided on the basis of the primary benefit rule set forth in *ultramares*, the court instead said.

The accountant should be liable in negligence for careless financial misrepresentation relied upon by actually foreseen and limited classes of persons. In this case, the defendant knew that his certification was to be used for potential financial of the corporation (emphasis added).

The Indian Scene: Commissioner of Income Tax v. G.M. Dandekar: This is the only decision on the auditor's liability to a third party by an Indian Court. The facts of the case are: Mr. Dandekar had been engaged by Messrs A. Mohamad & Co., Madras and had prepared the statements of account and Income-tax Return on the basis of account produced to him. During the course of assessment, it was discovered that Messrs. Mohamad & Co. had maintained two sets of account-regular Day Books and ledgers for the open market transactions and a separate book for the black market transactions. While the former contained detailed entries, relative to daily transactions, the latter contained only consolidated entries, made at the end of the week of the transactions of that week. At the end of the financial year, all the weekly entries in the separate sets of books of account were to called up and were entered in the regular books of account. Mr. Dandekar had examined only the regular books of account of the assessee and prepared the statements of account and the Income-tax Return on the basis of these units. All the statements were signed by him and there was also endorsement at the foot of the Balance Sheet that it had been verified and found to be correct. Mr. Dandekar had forwarded the statements of account to the Income-Tax Officer and, while doing so had stated particulars of books of account that he had examined.

On examination, the statements of account having been found to be wrong, the Income-tax department took up the matter against Mr. Dandekar and filed a complaint with the Institute of Chartered Accountants of India. When the matter was subsequently considered by the Madras High Court it was held that "he (Mr. Dandekar) was under an obligation to perform auditing with due skill and diligence; if he did that; it would be difficult to see what further obligations he had in the matter and in the favour of whom. The Accountant is under a duty to prepare and resend correct statements of account of the assessee and he should, of course, neither suggest or assist in the preparations of false accounts. But, he is under no duty to investigate whether the accounts prepared by the assesses are correct or not. The charge is that he owed a duty to the Department to himself investigate the truth and correctness of the accounts of the assessee and not merely to act as their Post Office in transmitting them. We do not agree that the respondent is under any such duty to the Department and, therefore, no question of negligence arises."

In view of the English decision (Hedley Byrne's Case) mentioned earlier, the decision in this case may any more be considered to be good law. For, very likely, the Indian Courts may hereafter follow the decision in the Hedley Byrne case and hold that the auditor is responsible to all those persons for negligence who had relied on a financial accounts or statement prepared by him which is incorrect, if he knows or ought to have known that it has been prepared for a particular person or class of persons or may be relied on by the person, or class of persons in that particular connection.

The effect of the Hedley Byrne decision is that someone possessed of a special skill may, quite irrespective of a contract, be considered to have undertaken to apply that skill for the assistance of another person and thereby to have accepted a duty of care to that person. A negligent though honest, misrepresentation which causes financial loss to another may thus, in certain circumstances, give rise to an action for damages at the suit of a person with whom no contract exists.

This doctrine is of particular concern to practising accountants, an important part of whose work consists of preparing, examining or expressing an opinion on financial statements of various kinds which may be relied on by persons other than those for whom they were originally intended; the implications should not be overlooked by any accountant who knows that his professional skill, exercised in an independent capacity, whether gratuitously or not, will be relied on by others.

(B) Breach of Duty or Negligence: To charge a professional man with breach of duty or negligence, it is necessary to prove that there has been a deviation from the standard of care which he was expected to exercise in the performance of his duties. A professional man does not guarantee the success of his professional effort. Nevertheless he is expected to possess a certain amount of knowledge and experience and he must exercise a reasonable degree of care and skill for the performance of duties. If there is any default or failure in the conduct of an audit or in carrying out any other engagement judged by professional standards the person responsible, therefore, would be guilty of negligence.

The auditor being an expert, skilled in the techniques of accounting and auditing, is expected that he would be in possession of certain standards of knowledge and experience. He also must exercise the same degree of prudence, skill and care, as any other professional person, in similar circumstances, would be expected to do. In other words, he must carry out the audit according to 'accepted professional standards' (the implications of these words are explained hereafter) and having regard to all facts known to him about the financial solvency of the client.

The auditor, however, is not expected to be a detective nor is he required to approach his work with a suspicious or pre-conceived notion that there is something wrong. He is a watch dog but not a 'blood hound'. However, if there is any thing that excites suspicion in him, he should delve deep into the matter. But, in the absence thereof, he is only required to be reasonably cautious and careful.

In the case of non-company audit, where a detailed audit is not required the scope and extent of routine checking that must be carried out is determined, on a consideration of the nature of engagement. Nevertheless, it is expected that the auditor would carry out the checking of accounts and verification of statements according to 'standards on auditing'. For example, the

7.12 Advanced Auditing and Professional Ethics

auditor who verifies the books of account of client by the application of test checks, in a case where a complete audit should have been carried out, would be held guilty of professional negligence if subsequently it is found that a mistake or fraud had remained undetected which would have been unearthed if a detailed audit had been carried out. On this account, where a detailed audit has been carried out, on the ground that it was not agreed upon, the fact should be brought to the notice of the client by the nature of checking carried out being stated in the report and area of accounts which have been covered being specified.

Likewise, under the general principles of law, the auditors have been called upon to pay compensation to their clients for the losses suffered by them through their negligence. Only in one case, i.e. *Armitage v. Brewer and Knott*, the auditors were held responsible for the amount of defalcations which arose subsequent to their failure to detect frauds in an earlier period.

7.3 Cases Concerning the Civil Liability of Auditors for Negligence

In the series of cases considered below, action was brought against the auditors for damages sustained through defalcation of employees or otherwise which, it has been alleged would have been discovered by the auditors, if they had carried out their duties with the required degree of care and skill. The plaintiffs in some cases were individuals or partners and directors in the other companies but action was not brought under misfeasance proceedings of the Companies Act. It may be observed that in general the defence was that the frauds were such that reasonable diligence and careful audit would have failed to reveal them or they were caused by lack of efficiency of the management, or in its supervision over the accounts.

1. *London Oil Storage Co. v. Seear Hasulk & Co.* (1904): In this case, the auditors were charged with negligence for failure to discover the misappropriation of the petty cash balance, which was shown by the petty cash book at 799 but in fact was only 30. The auditor was found guilty of negligence in not verifying the petty cash balance as part of the audit; but the damages awarded were limited to £5.5 sh. on the ground that the damages suffered were not due to the conduct of the auditor but that of directors who were guilty of gross negligence in allowing the balance in the hands of the Petty Cashier to increase to such a large amount.

2. *Arthur E. Green & Co. v. The Central Advance and Discount Co. Ltd.* (1901): The auditors in this case had accepted the schedule of bad debts supplied to them by the Managing Director although it was inaccurate and they were far from satisfied with it. Despite the fact, they had failed to qualify their report. The claim filed by the liquidator of the company against the auditors for negligence therefore, succeeded.

3. *Pendleburys Ltd. v. Eills Green & Co.* (1936): The charge in this case was that due to failure on the part of the auditor to verify the amount recorded and received for cash sales, the fraud of the cashier had not been discovered. But the charge did not succeed since the auditors have repeatedly brought the lack of internal check on 'cash receipts to the attention of the three directors who were the only shareholders and debenture holders of the company. In the course of judgement, the learned judge observed:

“He (the auditor) is there to see that the shareholders get a true representation of the finances of the company as disclosed by its books, this he must do with reasonable care, but in considering whether or not he has displayed reasonable care one must apply rules

of common sense. There is all the world of difference between a company which has a large body of shareholders numbering say, six or seven hundred and a company which has only three shareholders; all of whom happen to be the sole directors and the sole debenture holders..... Where the interests of a small company are confined to a very few persons and there are no outside people because all the interests in the company are held by the directors themselves, if the auditor has, in fact, reported to the directors, what more could he be expected to do?"

4. *Leads Estate and Investment Society Ltd. v. Shepherd* (1887): In this case action was brought by the liquidators against the auditors not under misfeasance proceedings, but under a civil action for the recovery for amounts paid as dividend out of capital. In examining the balance sheet, the auditor had not considered the provision in the Articles and the balance sheet was not properly drawn up. In the course of the judgement, the learned judge observed that it was the duty of the auditor in auditing the accounts of the company not to confine himself to verifying the arithmetical accuracy of the balance sheet, but to enquire into its substantial accuracy, and to ascertain that it contained the particulars specified in the Articles of Association, and was properly drawn up so as to contain a true and correct representation of the company's affairs. The auditor was found negligent by the Court.

5. *Armitage v. Brewer & Knot* (1942) ACTC (P 836): In this case, action was brought by Mr. Joseph Armitage for alleged negligence in auditing the plaintiff's books by reason of which defalcations aggregating to £1440 were not detected. The defalcations consisted in fraudulent alterations of time sheets and petty cash vouchers.

The plaintiff had arranged with the auditor that they would vouch all payments with the receipts entered in the Petty Cash Account, check calculations and additions of wages sheets, check totals of wages sheets into wages book and check weekly totals with other detailed provisions.

Such a detailed audit had been called for since the plaintiff wanted protection against his staff. A special fee was demanded and paid for this work. But it transpired after the audit had been in progress for some two and half years, that the cashier of the plaintiff, by altering systematically figures on vouchers of petty cash and making fraudulent entries on time sheets, had misappropriated a large sum of money. During the course of the hearing, it transpired that the auditors had not examined the books of account with sufficient care as a result whereof the frauds committed by the cashier had remained undetected. Mr. Justice Talbot, during the course of his judgement, observed that "Accountants undertaking duties of that kind could not be heard to excuse themselves on the ground that this or that was small matter." The auditors were held guilty of negligence and a damage of £1259 was awarded against them.

6. *Tri-Sure India Ltd. v. A.F. Ferguson & Co.*: Tri-Sure India Limited issued a prospectus of February 75 inviting public to subscribe its share. The prospectus contained, inter alia, the report of the auditors (the defendants) on the accounts of the company for the year 1973-74 which showed that there was an abnormal rise in the rate of profits for the year 1973-74. The public issue was over-subscribed and the company proceeded to allot the shares as per the term of the issue. An investigation later revealed that sales figures for 1973-74 had been manipulated by a whole time director of the company with the active co-operation of other top officials of the company. On discovery of this, the company offered to refund all moneys which were subscribed

7.14 Advanced Auditing and Professional Ethics

by the allottees and also proceeded to sue the auditors for damages of ₹ 63.85 lakhs. The company alleged that the auditors failed to examine and ascertain any satisfactory explanation for steep increase in the rate of gross and net profits. The other charges levelled against the auditors were (i) whether the consumption of raw material was commensurate with the sharp increase in sales/production; (ii) the reasons for disproportionate ratio of the total debts due by trade debtors to turnover as compared to the previous years; (iii) the reason for material variation in the ratio of the value of stock on hand to the cost of turnover for the year 1972-73 and for the year 1973-74; (iv) whether there was any change in the prices of prime raw material; (v) whether there was any improvement/deterioration in the usage of material; (vi) whether the company had got new customers and/or there was any change in the terms of credit to customers; and (vii) whether the production for the year was adequate to support the volume of sales and closing stock for the year.

The Court held that the plaintiffs were not able to prove that the auditors were negligent in the performance of their duties. The suit was, therefore, dismissed.

Regarding the duties of the auditor, the Court held that “the auditor is required to employ reasonable skill and care, but he is not required to begin with suspicion and to proceed in the manner of trying to detect a fraud or a lie, unless some information has reached which excites suspicion or ought to excite suspicion in a professional man of reasonable competence. An auditor’s duty is to see what the state of the company’s affairs actually is, and whether it is reflected truly in the accounts of the company, upon which the balance sheet and the profit and loss account are based, but he is not required to perform the functions of a detective. What is reasonable care and skill must depend upon the circumstances of each case. Where there is nothing to excite suspicion and there is an atmosphere of complete confidence, based on the record of continued success in financial matters, less care and less scrutiny may be considered reasonable.” Thus, the judgment has re-emphasised that an auditor need not proceed with suspicion unless the circumstances are such as to arouse suspicion or ought to arouse suspicion in a professional man of reasonable competence. The practice of resorting to selective verification where internal controls are found to be satisfactory by an auditor has also been upheld in his judgement.

7.4 Civil Liabilities under the Companies Act

A civil action against the auditor may either take the form of claim for damages on account of negligence or that of misfeasance proceeding for breach of trust or duty:

(I) Damages for negligence: Civil liability for mis-statement in prospectus under section 35 of the Companies Act, 2013, are:

(1) Where a person has subscribed for securities of a company acting on any statement included, or the inclusion or omission of any matter, in the prospectus which is misleading and has sustained any loss or damage as a consequence thereof, the company and every person who—

- (a) is a director of the company at the time of the issue of the prospectus;
- (b) has authorized himself to be named and is named in the prospectus as a director of the company or has agreed to become such director either immediately or after an interval of time;

- (c) is a promoter of the company;
- (d) has authorised the issue of the prospectus; and
- (e) is an expert referred to in sub-section (5) of section 26,
shall, without prejudice to any punishment to which any person may be liable under section 36, be liable to pay compensation to every person who has sustained such loss or damage.
- (2) No person shall be liable under sub-section (1), if he proves—
- (a) that, having consented to become a director of the company, he withdrew his consent before the issue of the prospectus, and that it was issued without his authority or consent; or
- (b) that the prospectus was issued without his knowledge or consent, and that on becoming aware of its issue, he forthwith gave a reasonable public notice that it was issued without his knowledge or consent.
- (3) Notwithstanding anything contained in this section, where it is proved that a prospectus has been issued with intent to defraud the applicants for the securities of a company or any other person or for any fraudulent purpose, every person referred to in subsection (1) shall be personally responsible, without any limitation of liability, for all or any of the losses or damages that may have been incurred by any person who subscribed to the securities on the basis of such prospectus.

It may be noted that the term “expert” as defined in Section 2(38) of the Companies Act, 2013 includes an engineer, a valuer, a chartered accountant, a company secretary, a cost accountant and any other person who has the power or authority to issue a certificate in pursuance of any law for the time being in force. Also that under Section 26 of the Act a statement may be considered to be untrue, not only because it is so but also if it is misleading in the form and context in which it is included.

The liability would arise if the written consent of the auditor to the issue of the prospectus, including the report purporting to have been made by him as an “expert” has been obtained.

(II) **Liability for misfeasance:** The term “misfeasance” implies a breach of trust or duty. The auditor of a company would be guilty of misfeasance if he has been guilty of any breach of trust or negligence in the performance of his duties which has resulted in some loss or damage to the company or its property.

A few cases in which action has been brought against the auditors under misfeasance provisions of the Companies Act are summarised below:

1. In *Re: The London and General Bank, (1895)*, held - The auditor who does not report, to the shareholders the facts of the case, when the balance sheet is not properly drawn up, is guilty of misfeasance.

The charge against the auditor in this case was that though he had submitted a detailed report to the directors, as regards loans and overdrafts granted to customers, in respect of which the security lodged was wholly insufficient and had expressed his misgivings as regards recovery of interest on these accounts, included in the Profit and Loss Account, he had neither disclosed

7.16 Advanced Auditing and Professional Ethics

the position to the shareholders nor he had made any reference to the report which he had laid before the directors. The words in his report, "the value of assets as shown on the Balance Sheet is dependent upon realisation etc." did not contain any warning to shareholders and the mere presence of these words was not enough to excite suspicion. The Court observed that the duty of the auditor was to convey information and not to arouse enquiry and held that the auditor, by way of damages, was liable to refund the amount of the second dividend (declared in 1892) on the ground that he was aware of the critical position of the affairs and thus had acted negligently in not reporting the facts to the shareholders although he had reported them to directors. As regards the first dividend (declared in 1891), the auditor was not held liable, as it was of the opinion that the evidence was not sufficiently strong to establish a case of misfeasance against him, though he was guilty of an error of judgement.

2. In *Re: Kingston Cotton Mills Co. Ltd.* (1896), held - That it is not the duty of the auditor to take stock and that he is not guilty of negligence if the certificate of a responsible official is accepted in the absence of suspicious circumstances.

In this case, the profits of the company had been inflated fictitiously by the deliberate manipulation of the quantities and values of stock-in-trade. The auditors had certified the balance sheet on the basis of the certificate of the manager as to the correctness of the stock-in-trade without checking the stock in detail and this fact was shown on the fact of the balance sheet. Lopes L.J. exonerating the auditors of the charge of negligence, in the course of judgement, made remarks to the following effect:

It is the duty of an auditor to bring to bear on the work, he has to perform the skill, care and caution which a reasonably competent, careful and cautious auditor ordinarily would use. What is reasonable skill, care and caution is a matter which must be judged on consideration of the special circumstances of each case. An auditor is not bound to act as a detective, or as had been said to approach his work with suspicion or with a foregone conclusion that there is something wrong. 'He is a watch dog, but not a blood hound'. He is entitled to rely on the representation made to him by the tried servants of the company in whom confidence has been placed by the company, believing them to be honest and truthful. He must, however, take reasonable care to find that the representations made by them are not palpably false. If any matter is observed which is calculated to excite suspicion, he should probe it to the bottom, but in the absence of anything of that kind he is only bound to be reasonable, cautious and careful.

3. *The Irish Woolen Co. Limited v. Tyson and others* (1900) Act L.R. 23, held - That an auditor is liable for any damages sustained by a company by reasons of falsification of accounts which might have been discovered by the exercise of reasonable care and skill in the performance of the audit.

In this case, under a special agreement with the company, the auditor was required to conduct a monthly audit, despite the fact, the profit disclosed by the profit & loss account was found to have been inflated by the suppression of certain purchase invoices outstanding at the date of the balance sheet though the goods received in respect thereof had been included in the closing stock. The learned judge hearing the case found that the suppression of invoices would have been detected if the auditor had called for the creditors' statements of account on the basis of which payment had been ordered, in the period subsequent to the audit, and had compared them with

ledger balance; also, if the entries in the ledger accounts were checked with relevant invoices, it would have been discovered that these had not been posted on the true dates. On these facts, he concluded that if due care and skill had been exercised, the suppression of the invoices would have been discovered and held the auditor liable for the damages which the company had suffered due to understatement of liability in the Balance Sheet.

4. In Re : Republic of Bolivia Exploration Syndicate Ltd. (1913), held - That the auditors of a company in liquidation may be held liable for failure to detect ultra vires payments, but only in extreme cases will the liability be fully enforced.

In this case, a claim was brought against the auditor to make good certain payments which were held to be wrong and ultra vires, though the payments had not been made by the company in consequence of any report or audit by the auditors. It was contended that they had failed in their duty in passing the accounts without drawing attention to such payments and that in consequence the Balance Sheet did not show the true financial position, a fact which had put the company to loss.

5. In Re : City Equitable Fire Insurance Co. Ltd., held - That an auditor is not justified in omitting to make personal inspection of securities that are in the custody of a person or a company with whom it is not proper that they should be left.

In this case, an action had been brought by the Official Receiver as liquidator of the company against the directors and auditors for damages arising out of misfeasance. The chairman of the company was also the senior partner in the firm of Ellis & Co., the company's stock brokers who, at all material times, were heavily indebted to the company.

The principal charge against the auditors was that they had failed to detect and report to the shareholders that a number of company's securities, which were in the custody of Ellis & Co. were being pledged by the firm to its customers. The auditor had relied on the certificate of Ellis & Co. that these securities were held by them. The master of Rolls, on a consideration of the evidence led in this case, showed that it was customary for the auditor to obtain certificate from banks in respect of securities lodged with them and that the certificates were not accepted from brokers. He made the following obiter dicta which is of great significance to auditors.

"I think he (the auditor) must take a certificate from a person who is in the habit of dealing with, and holding securities, and who he, on reasonable grounds, rightly believes to the exercise of the best judgement a trustworthy person to give such a certificate."

6. In Re: Westminster Road Construction and Engineering Co. Ltd. (1932), held- That when there is time lag between the incurring of a liability and receipt of bills and at the time of audit, sufficient time had not elapsed for the invoices relating to such a liability to have been received it was the duty of auditor to make specific enquiries as to the existence of such liabilities. He also must check the valuation of the work in progress at which it is included in the Balance Sheet.

In this case, action had been brought against the auditor by the liquidator of the company in respect of payment of dividend when there were in fact no profits of which it could be paid. Negligence was alleged in respect of over valuation of work in progress, omission of liabilities,

7.18 Advanced Auditing and Professional Ethics

etc. The Court held that the auditor was liable to refund to the company the amount of dividend wrongly declared, with interest and costs.

7. In Re: S.P. Catterson and Sons Ltd. (1947), held - That the primary responsibility for the accountant of a company is of those who are in control of the company i.e. the directors.

In the case, an application had been made by the liquidator that the auditor of the company had been negligent in the performance of his duty and thus was liable to compensate the company in respect of amounts misappropriated by an employee of the company, which had become irrecoverable. Though the fact that the defalcation had occurred was accepted, the auditor contended that he had drawn the attention of the directors to the weakness of the system of recording cash and credit sales and had recommended its alteration; notwithstanding this, the system had been continued. Also, that the directors had failed to check adequately the cash records, at the time money was duly handed over, day to day, by the manager.

8. In Re: Continental Vending Machine Corporation (1970) An American Case - This is a significant case in as much as it seeks to provide guidelines for the exercise of auditor's judgement and discretion where conclusive accounting and auditing principles are not available to guide the auditor. In this case, the auditor was held guilty of not having reported a known fact. The President of the Continental Vending Machine Corporation caused the diversion of a substantial sum of money of the Corporation to his benefit by canalising it through an associated concern the audit of which was conducted by another. A substantial part of the security for this accommodation consisted of securities of the Continental Vending Co., itself. This was not reported and since the amount advanced by this company became irrecoverable, the auditors were held guilty of gross negligence.

The judgement is significant for what it says about the weight the law will attach to the standards of accounting profession and for what it says about obligations of an auditor over and above those imposed by the standards themselves. The test that the Court applied was not whether the balance sheet was in accordance with generally accepted accounting principles but whether the balance sheet fairly represented the financial position.

The Court held that though in ordinary case disposition of funds advanced by the client to its affiliates need not be disclosed by the auditor, such a disclosure becomes necessary in cases of: (i) looting; (ii) known dishonesty by a high official; (iii) corporation being operated to a material extent for the private benefit of its President; and (iv) dishonest diversion of funds. Thus the Court laid down a special rule for disclosure and emphasised that an auditor's approach should not necessarily be limited to the mere compliance with the accepted standards but should primarily be governed by the objective to establish an honest and fair representation of financial facts.

Damages must be suffered: In the various cases considered, it will be observed that when an auditor has been found guilty of professional negligence and a loss has been suffered, the Courts have held that the amount of loss should be made good by the auditor. For instance, in the case of Leeds Estate Building and Investment Co. Ltd. v. Shepherd, under a civil action by the liquidator, the auditor was held liable to make good, jointly with directors, the dividend paid out of capital.

Where, however, the loss has been occasioned through negligence of directors, the fault of the auditor in failing to verify the asset has been considered to be only technical and only nominal penalty has been imposed. For instance, in the case of *London Oil Storage Co. Ltd. v. Seear Husluck and Co.* £ 5. 5sh was awarded as damages against the auditor, although the loss was much more, on the ground that professional negligence had not occasioned the loss. In the case of *Armitage v. Brewer and Knot*, the auditors were held responsible even for the amount of defalcations which has taken place subsequent to their failure to detect fraud with regard to petty cash in an earlier period. It is the only case in which the principle of consequential damages has been applied to audit claims, i.e. if an auditor omits to detect a defalcation by an employee and, in the following year, before there is a chance of any further audit, the employee emboldened by the non-detection of the defalcation, embezzles a larger sum, the auditor would be liable both for the original loss which he had failed to detect and the subsequent loss suffered by the employer.

Apart from the liability for professional negligence, in the discharge of duties an auditor also may be penalised under section 147 of the Companies Act, 2013 for failure to comply with any of the provisions contained in sections 143 and 145. He incurs such a liability as auditor of the company.

[Note: Students may refer Chapter 6 for Punishment for Contravention as stated in Section 147]

7.5 Criminal Liability under the Companies Act

The circumstances in which an auditor can be prosecuted under the Companies Act, and the penalties to which he may be subjected are briefly stated below:

(i) **Criminal liability for Misstatement in Prospectus-** As per Section 34 of the Companies Act, 2013, where a prospectus, issued, circulated or distributed includes any statement which is untrue or misleading in form or context in which it is included or where any inclusion or omission of any matter is likely to mislead, every person who authorises the issue of such prospectus shall be liable under section 447.

This section shall not apply to a person if he-

proves that such statement or omission was immaterial or that he had reasonable grounds to believe, and did up to the time of issue of the prospectus believe, that the statement was true or the inclusion or omission was necessary.

(ii) **Punishment for false statement** - According to Section 448 of the Companies Act, 2013 if in any return, report, certificate, financial statement, prospectus, statement or other document required by, or for, the purposes of any of the provisions of this Act or the rules made thereunder, any person makes a statement —

- (a) which is false in any material particulars, knowing it to be false; or
- (b) which omits any material fact, knowing it to be material,

he shall be liable under section 447.

Fig.: Criminal Liability*

Punishment for Fraud - As per Section 447 of the Companies Act, 2013, without prejudice to any liability including repayment of any debt under this Act or any other law for the time being in force, any person who is found to be guilty of fraud, shall be punishable with imprisonment for a term which shall not be less than six months but which may extend to ten years and shall also be liable to fine which shall not be less than the amount involved in the fraud, but which may extend to three times the amount involved in the fraud.

It may be noted that where the fraud in question involves public interest, the term of imprisonment shall not be less than three years.

Explanation — For the purposes of this section—

- (i) “fraud” in relation to affairs of a company or any body corporate, includes any act, omission, concealment of any fact or abuse of position committed by any person or any other person with the connivance in any manner, with intent to deceive, to gain undue advantage from, or to injure the interests of, the company or its shareholders or its creditors or any other person, whether or not there is any wrongful gain or wrongful loss;
- (ii) “wrongful gain” means the gain by unlawful means of property to which the person gaining is not legally entitled;
- (iii) “wrongful loss” means the loss by unlawful means of property to which the person losing is legally entitled.

Direction by Tribunal in case auditor acted in a fraudulent manner: As per sub-section (5) of the section 140, the Tribunal either suo motu or on an application made to it by the Central Government or by any person concerned, if it is satisfied that the auditor of a company has, whether directly or indirectly, acted in a fraudulent manner or abetted or colluded in any fraud by, or in relation to, the company or its directors or officers, it may, by order, direct the company to change its auditors.

* Source: CA knowledge

However, if the application is made by the Central Government and the Tribunal is satisfied that any change of the auditor is required, it shall within fifteen days of receipt of such application, make an order that he shall not function as an auditor and the Central Government may appoint another auditor in his place.

It may be noted that an auditor, whether individual or firm, against whom final order has been passed by the Tribunal under this section shall not be eligible to be appointed as an auditor of any company for a period of five years from the date of passing of the order and the auditor shall also be liable for action under section 447.

It is hereby clarified that the case of a firm, the liability shall be of the firm and that of every partner or partners who acted in a fraudulent manner or abetted or colluded in any fraud by, or in relation to, the company or its director or officers.

7.5.1 Cases in which an auditor has been held to have incurred criminal liability:

1. Dambell Banking Co. Ltd. (1900) - The directors and auditors, in the case, were prosecuted under section 221 of the Criminal Code of 1872 which is similar to Section 143 of the Companies Act, 2013, for having joined in the issue of false balance sheets, knowing them to be false in material particulars, and with the intent to deceive and defraud shareholders of the company. From the facts provided, it was clear that the accounts were not only false but materially false; letters from the auditors to the managers showed that they (the auditors) thought that overdrafts were bad although taken in as good. They had told the managers that they held strong views about the overdraft, but did not state those views in their certificates to the shareholders. The jury found all the defendants (including the auditors) guilty, and they were sentenced to various terms of imprisonment.

2. Farrow's Bank Ltd. (1921) - In this case, there had been a considerable writing up of assets, obviously to show profits available for dividends. In one case a piece of property that cost £5,500 was written up to £7,80,000. The auditor was in the company's regular employment as its accountant and was convicted on various charges of conspiracy and fraud in connection with the published accounts of the bank, and sentenced to 12 months' imprisonment.

3. Rex v. Lord Kylsant and Another (1931) - (Known as the Royal Mail Steam Packet Company's Case) This was a criminal prosecution in which Lord Kylsant who was Chairman of the Board of Directors of Royal Mail Steam Packet Company was charged on two counts (a) of publishing an annual report for 1926, which he knew to be false in a material particulars and that the said report concealed from the shareholders the true position of the company, with intent to deceive the shareholders; and (b) of publishing an annual report for the year 1927, which he knew to be false in a material particular, with intent to deceive the shareholders. Mr. H.J. Morland the auditor, was charged with aiding and abetting Lord Kylsant to commit these offences. Both the accused were acquitted of respective charges, though Lord Kylsant was found guilty and convicted on a separate charge of publishing false prospectus for the issue of fresh debenture stock.

The facts of the case briefly were that the Profit and Loss Account for the year 1926 showed, 'Balance for the year, including dividends on shares in allied and other companies, adjustment of taxation reserves, less depreciation of fleet £4,30,212. Actually this apparent surplus had

7.22 Advanced Auditing and Professional Ethics

been arrived at on including undisclosed credits of £5,50,000 from excess Profit Duty, £2,75,000 from Income tax Reserve and £25,776 from investment Profit. If this was not done there would have been a considerable deficit. In 1927, with practically identical wording, a surplus of £2,24,907 was raised to £4,37,293 by similar credits totalling £2,12,386. It must be added that almost the entire amounts of these credits had no relation to the trading of the respective years 1926 and 1927. The contention of the crown was that such item, in the accounts conveyed "a deliberate false representation to the shareholders that the company was making a trading profit when, in fact, it was making a trading loss." The company, in fact, had been drawing upon its secret or hidden reserves from 1921 to 1927. The adjustment of these special credits enabled the company to pay its debenture interest, and dividends on both the preference and ordinary stocks.

N.B. The decision in the case has been principally responsible for the change in the phraseology of the auditor's report from 'true and correct' to 'true and fair' requiring a fuller disclosure of any non-trading income or that not belonging to the year, adjusted in the Profit and Loss Account.

4. Official Liquidator Karachi Bank v. The Directors, etc. of Karachi Bank Ltd. (1932) - The directors of the Bank made a statement in the balance sheet that the profit earned by the bank in 1927 amounted to ₹ 15,608. The amount of profit had been arrived at on taking credit for a sum of ₹ 45,214, an amount held in suspense for bad or doubtful items of interest. It was held that the official Liquidator should prosecute the managing directors, manager and the auditors for an offence under section 232 of the Indian Companies Act, 1913 (now section 448) of the Companies Act, 2013.

Wild J.C. said "What the Directors of the bank have done is to show a cash profit for the year by adding in a sum which is due, no doubt, but was never paid and was never likely to be paid. The balance sheet, therefore, contains a false statement and a very material one and I am unable to see how it can be argued that it was not intended to be misled."

7.6 Cases Concerning the Misconduct of Auditors under the Chartered Accountants Act

The code of conduct for an auditor should be taken into consideration and the different circumstances under which disciplinary action can be taken against a member; the decisions in a number of cases can be referred to. It being important, however for students to understand what constitutes 'gross negligence' in terms of Clauses 5 to 8 of Part I of the Second Schedule to the Chartered Accountants Act, two decisions by Indian Courts which have become legal classics, are considered below:

Deputy Secretary of the Government of India, Ministry of Finance v. S. N. Dass Gupta: In this case, action was brought against Shri S.N. Dass Gupta, a member of the Institute, in respect of alleged negligence in the audit of accounts of Aryan Bank Limited, for the years 1942 to 1944. It was alleged that the bank had resorted to manipulation of accounts on an extensive scale. One of the charges was that in 1944 the bank has shown in its Fixed Deposit Ledger certain large sums as having been received on fixed deposit from certain concerns in which the Managing Director was interested but the Cash Book of the bank did not show any corresponding entries on the relevant dates. Another charge was that though the auditor had

certain doubts as regard loans advanced against fixed deposits, he had not stated the position clearly. It was also alleged that on a certain date in 1944 the Cash Book showed a cash balance of ₹ 5,00,000 although the actual balance on the date was a little over ₹ 1,000. The auditor in defence submitted that he had not verified the cash balance in hand and had mentioned this fact in his Special Report. The learned judge in this regard observed:

“If an auditor does not do what it is his duty to do, it is no defence for him to say in disciplinary proceedings started under Chartered Accountants Act that he had told the shareholder that he had not done it. The lapse is constituted by his failure to verify a duty without which an audit is meaningless and it is not excused by giving information of the omission to the shareholders. Authorities both legal and professional are unanimous that in a bank audit the cash balance claimed by the management must be verified by the auditor because otherwise the management might remove the greater part of the funds and show them falsely as lying in hand in cash and thereby relieve themselves of the necessity of making up accounts showing the disposition of money. In the matter of cash the auditor is not entitled to rely on the certificate of the manager of accepted integrity, according to the principles laid down in the case Re: City Equitable Fire Insurance Co.”

In the matter of the second charge against the auditor that though he had some doubts and misgivings as regards certain losses which might be suffered by the bank due to certain overdrafts accounts proving to be irrecoverable, he had failed to qualify the report in certain terms indicating the true position of the debits and, instead, had made some cryptic remarks about them in his special report. The learned judge observed, “Either he knew that some of the debts were bad and some of the so called secured loans were not genuine, but he did not wish to inform the shareholders of that fact but wanted at the same time to provide for his own safety and, therefore, he inserted certain cryptic remarks in his Special Report; or he was careless and neglected to give the shareholders the information which it was his duty to give.”

It was held that the respondent has committed a grave wrong and in consequence he was suspended from the membership of the institute for two years.

The learned judge in his judgement also made the following observation as regards the duties of auditor and methods they should follow for discharging them satisfactorily:

(a) Ascertaining reporting, not only whether the balance sheet exhibits a true and fair state of affairs of the company, as shown by the books of the company, but also whether the books of the company themselves exhibit a true and fair state of the company's affairs.

If any matter has been kept out of the books, with the result that the auditor did not have access to it, he is not responsible for its non disclosure to the shareholders. In this regard the dictum, pronounced by Rigby L.J. in the case Re : London & General Bank, that the words as shown by the books of the company, contained, in the report which the auditors make on the statements of account relieve them the responsibility as regards disclosure of the affairs of the company kept out of the books can be followed.

(b) Verifying not merely the arithmetical accuracy of the statements of account but also their substantial accuracy by confirming that they include all the particulars requiring disclosure by

7.24 Advanced Auditing and Professional Ethics

the Articles or the Companies Act and otherwise represents true and fair state of affairs of the company.

(c) Checking the accounts and verifying the financial statements with reasonable care and skill. For the purpose, the auditor may properly rely on the statements of the director-in-charge or the Mg. Director but only if he is satisfied that the representations made by him appear to be an honest and truthful. All matters which are capable of direct verification should generally be verified directly. But matters which require investigation rather than checking may be verified on the basis of representation of officers of accepted competence and integrity provided there is nothing unusual in the accounts.

(d) Examining the books of the company and obtaining such information or explanation which he considers necessary but not with suspicious mind or by proceeding in a manner he would adopt for detecting a fraud or a lie subject, however, to the fact that he is not in possession of any information which excites suspicion or ought to excite suspicion of a professional man of reasonable competence.

(e) Verifying the existence of assets and liabilities.

(f) Making a report to the shareholders as would give them information and not merely means of information, in order that the shareholders may judge the position of the company for themselves. If the auditor is not satisfied as to the accuracy of entries in the balance sheet or they are such that, if disclosed, they would show the balance sheet in a different way, these facts must be conveyed to the shareholders.

Controller of Insurance vs H. C. Das: In this case, action was brought against Messers H.C. Dass & Co. by the Central Government in the matter of audit of accounts of Bhagya Laxmi Insurance Limited. The auditors had audited the accounts of the company from 1936 until 1951 and had issued the certificate required under Regulations 7(c) and 7(d) of Part I of the First Schedule to the Insurance Act, 1938. On the appointment of the administrator subsequently under Section 52A of the Insurance Act, a number of irregularities were discovered. The principal defence of the auditor in respect of the charges was that he had relied on statements of the management in regard to matters included in the statements certified by him. During the course of the judgement, the learned judge made the following observation:

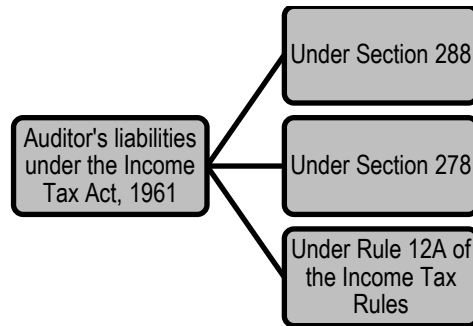

“As has been said, an auditor is not only blood hound, but he is not also an insurer. He does not certify the absolute accuracy of the accounts which he audits and approves of, but only says that he has taken all possible care and exercised reasonable skill and having done so has arrived at the conclusions which are recorded in his certificate. But if, as we find to our regret to have been the position here, an auditor does nothing at all in the way of scrutinising the books of the company, but only relies upon statements made to him by the management, as his own case find it impossible to hold that he exercised any skill or care of any kind.

“An auditor who construes his duty to shareholders or policy holders too narrowly and who passes and approves of whatever is stated to him by the management of the company whose accounts he audits does not serve the shareholders with the loyalty or efficiency expected of him and constitutes, instead of a source of security to the shareholders, a positive danger to them.”

The auditor was held guilty of gross negligence.

7.7 Liabilities under Income Tax Act 1961

In connection with proceedings under the Income Tax Act 1961, a Chartered Accountant often acts as the authorised representative of his clients and attends before an Income Tax Authority or the appellate tribunal. His liabilities under the Income Tax Act of 1961 are as below:

(i) Under Section 288: A person who has been convicted of any offence connected with any Income Tax proceeding or on whom a penalty has been imposed under the said Act (except under clause (ii) of sub section (1) of Section 271) is disqualified from representing an assessee. The Chief Commissioner/Commissioner of Income Tax has been given powers to determine the period of such disqualification of a person.

A Chartered Accountant found guilty of professional misconduct in his professional capacity by the Council of the Institute of Chartered Accountants of India, can not act as an authorised representative (for any matter within the definition of a member in practice) for such time that the order of the Council disqualifies him from practising.

(ii) Under Section 278: Any person who acts or induces, in any manner another person to make and deliver to the Income Tax Authorities a false account, statement, or declaration, relating to any income chargeable to tax which he knows to be false or does not believe to be true.

(iii) Under Rule 12A of the Income Tax Rules: Under this rule a Chartered Accountant who as an authorised representative has prepared the return filed by the assessee, has to furnish to the Assessing Officer, the particulars of accounts, statements and other documents supplied to him by the assessee for the preparation of the return.

Where the Chartered Accountant has conducted an examination of such records, he has also to submit a report on the scope and results of such examination. The report to be submitted will be a statement within the meaning of Section 277 of the Income Tax Act. Thus if this report contains any information which is false and which the Chartered Accountant either knows or believes to be false or untrue, he would be liable to rigorous imprisonment which may extend to seven years and to a fine.

8.1 Auditor's Opinion

Assuming you are an auditor and concluded the audit work, your next step will be issuance of the audit report. An audit report is very important medium of communication i.e. auditor's expert views on the financial statements and it has a significant bearing on the credibility of such statements. By expressing views in the report, the auditor takes upon himself a great responsibility because a large number of people are likely to put reliance on the financial statements. Therefore, the auditor is necessarily to be careful, clear and objective in the matter of preparation of the report. The report should also be as simple as the circumstances permit.

Fig. : Audit Opinion*

8.2 The Auditor's Report on Financial Statements:

The SA 700 series is purely dedicated to the auditor report to be issued by the auditor. There are following SAs which you need be aware of:

Particulars	Head	Purpose	Effective Date
SA-700 (Revised)	Forming an Opinion and Reporting on Financial Statements	<ul style="list-style-type: none"> Forming opinion on the financial statements. Form and content of the audit report. 	1 st April 2017
SA-701 (newly introduced)	Communicating Key Audit Matters in the Independent Auditor's Report	<ul style="list-style-type: none"> To enhance the communicative value of the auditor's report by providing greater transparency about the audit that was performed. To assist the user in 	1 st April 2017

		<i>understanding those matters that, in the auditor's professional judgment, were of most significance in the audit of the financial statements of the current period.</i>	
SA-705 (Revised)	Modifications to the Opinion in the Independent Auditor's Report	<ul style="list-style-type: none"> • <i>To issue an appropriate audit report when the auditor considers the modification in an audit report is necessary.</i> • <i>To deal with the revised form and content when the modification of the opinion take place.</i> 	1st April 2017
SA-706 (Revised)	Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report	<p><i>To draw user's attention Draw users' attention to a matter or matters:-</i></p> <ul style="list-style-type: none"> • <i>Presented or disclosed in the financial statements and which is fundamental for the understanding of the user, or</i> • <i>Not presented or disclosed in the financial statement and which is relevant for the understanding of the user.</i> 	1st April 2017

8.2.1 SA-700, "Forming an Opinion and Reporting on the Financial Statements":

It deals with the auditor's responsibility to form an opinion on the financial statements. It also deals with the form and content of the auditor's report issued as a result of an audit of financial statements.

Objective: *As per SA 700 the objectives of the auditor are:*

Fig.: Audit Report*

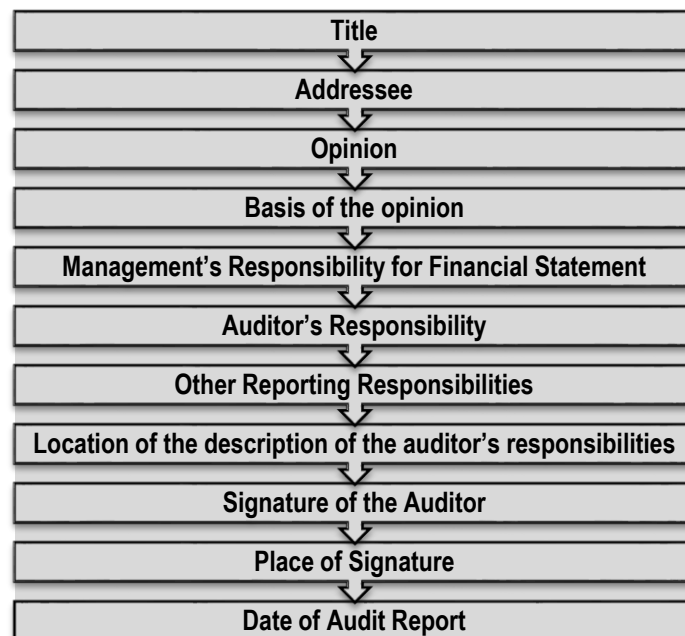

** Source: hubpages.com*

(a) To form an opinion on the financial statements based on an evaluation of the conclusions drawn from the audit evidence obtained; and

(b) To express clearly that opinion through a written report.

Purpose: The requirements of this SA are aimed at addressing an appropriate balance between the need for consistency and comparability in auditor reporting globally and the need to increase the value of auditor reporting by making the information provided in the auditor's report more relevant to users. This SA promotes consistency in the auditor's report, but recognizes the need for flexibility to accommodate particular circumstances of individual jurisdictions. Consistency in the auditor's report, when the audit has been conducted in accordance with SAs, promotes credibility in the global marketplace by making more readily identifiable those audits that have been conducted in accordance with globally recognized standards. It also helps to promote the user's understanding and to identify unusual circumstances when they occur.

Basic Elements of the Auditor's Report: As per SA 700 "Forming an opinion and reporting on financial statements", the auditor's report includes the following basic elements, which ordinarily includes in case of Auditors's Report for Audits Conducted in Accordance with Standards on Auditing:

1. **Title:** The auditor's report shall have a title that clearly indicates that it is the report of an independent auditor.

Example, "Independent Auditor's Report," distinguishes the independent auditor's report from reports issued by others.

2. **Addressee:** *The auditor's report shall be addressed as required by the circumstances of the engagement.*
3. **Auditor's Opinion :** *The first section of the auditor's report shall include the auditor's opinion, and shall have the heading "Opinion."*

The Opinion section of the auditor's report shall also:

- (a) *Identify the entity whose financial statements have been audited;*
- (b) *State that the financial statements have been audited;*
- (c) *Identify the title of each statement comprising the financial statements;*
- (d) *Refer to the notes, including the summary of significant accounting policies; and*
- (e) *Specify the date of, or period covered by, each financial statement comprising the financial statements.*

When expressing an unmodified opinion on financial statements prepared in accordance with a fair presentation framework, the auditor's opinion shall, unless otherwise required by law or regulation, use one of the following phrases, which are regarded as being equivalent:

- (i) *In our opinion, the accompanying financial statements present fairly, in all material respects, [...] in accordance with [the applicable financial reporting framework]; or*
- (ii) *In our opinion, the accompanying financial statements give a true and fair view of [...] in accordance with [the applicable financial reporting framework].*

When expressing an unmodified opinion on financial statements prepared in accordance with a compliance framework, the auditor's opinion shall be that the accompanying financial statements are prepared, in all material respects, in accordance with [the applicable financial reporting framework].

If the reference to the applicable financial reporting framework in the auditor's opinion is not to Accounting Standards, the auditor's opinion shall identify the origin of such other framework.

4. **Basis for Opinion :** *The auditor's report shall include a section, directly following the Opinion section, with the heading "Basis for Opinion", that:*
 - (a) *States that the audit was conducted in accordance with Standards on Auditing;*
 - (b) *Refers to the section of the auditor's report that describes the auditor's responsibilities under the SAs;*
 - (c) *Includes a statement that the auditor is independent of the entity in accordance with the relevant ethical requirements relating to the audit, and has fulfilled the auditor's other ethical responsibilities in accordance with these requirements. The statement shall refer to the Code of Ethics issued by ICAI*
 - (d) *States whether the auditor believes that the audit evidence the auditor has obtained is sufficient and appropriate to provide a basis for the auditor's opinion.*

5. Going Concern: Where applicable, the auditor shall report in accordance with SA 570 (Revised).¹

6. Key Audit Matters: For audits of complete sets of general purpose financial statements of listed entities, the auditor shall communicate key audit matters in the auditor's report in accordance with SA 701.

When the auditor is otherwise required by law or regulation or decides to communicate key audit matters in the auditor's report, the auditor shall do so in accordance with SA 701.

7. Responsibilities for the Financial Statements: The auditor's report shall include a section with a heading "Responsibilities of Management for the Financial Statements." The auditor's report shall use the term that is appropriate in the context of the legal framework applicable to the entity and need not refer specifically to "management". In some entities, the appropriate reference may be to those charged with governance.

This section of the auditor's report shall describe management's responsibility for:

- (a) *Preparing the financial statements in accordance with the applicable financial reporting framework, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; and*
- (b) *Assessing the entity's ability to continue as a going concern² and whether the use of the going concern basis of accounting is appropriate as well as disclosing, if applicable, matters relating to going concern. The explanation of management's responsibility for this assessment shall include a description of when the use of the going concern basis of accounting is appropriate.*

This section of the auditor's report shall also identify those responsible for the oversight of the financial reporting process, when those responsible for such oversight are different from those who fulfill the responsibilities described in next paragraph. In this case, the heading of this section shall also refer to "Those Charged with Governance" or such term that is appropriate in the context of the legal framework applicable to entity.

When the financial statements are prepared in accordance with a fair presentation framework, the description of responsibilities for the financial statements in the auditor's report shall refer to "the preparation and fair presentation of these financial statements" or "the preparation of financial statements that give a true and fair view," as appropriate in the circumstances.

8. Auditor's Responsibilities for the Audit of the Financial Statements : The auditor's report shall include a section with the heading "Auditor's Responsibilities for the Audit of the Financial Statements."

This section of the auditor's report shall:

¹ SA 570 (Revised), *Going Concern*, paragraphs 21–23

¹⁴ SA 570 (Revised), paragraph 2

- (a) **State that the objectives of the auditor are to:**
- (i) **Obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error; and**
 - (ii) **Issue an auditor's report that includes the auditor's opinion.**
- (b) **State that reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists; and**
- (c) **State that misstatements can arise from fraud or error, and either:**
- (i) **Describe that they are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements; or³**
 - (ii) **Provide a definition or description of materiality in accordance with the applicable financial reporting framework.**

The Auditor's Responsibilities for the Audit of the Financial Statements section of the auditor's report shall further:

- (a) **State that, as part of an audit in accordance with SAs, the auditor exercises professional judgment and maintains professional skepticism throughout the audit; and**
- (b) **Describe an audit by stating that the auditor's responsibilities are:**
- (i) **To identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error; to design and perform audit procedures responsive to those risks; and to obtain audit evidence that is sufficient and appropriate to provide a basis for the auditor's opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.**
 - (ii) **To obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. In circumstances when the auditor also has a responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, the auditor shall omit the phrase that the auditor's consideration of internal control is not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.**

¹⁵ SA 320, Materiality in Planning and Performing an Audit, paragraph 2

- (iii) To evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.*
 - (iv) To conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the entity's ability to continue as a going concern. If the auditor concludes that a material uncertainty exists, the auditor is required to draw attention in the auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify the opinion. The auditor's conclusions are based on the audit evidence obtained up to the date of the auditor's report. However, future events or conditions may cause an entity to cease to continue as a going concern.*
 - (v) When the financial statements are prepared in accordance with a fair presentation framework, to evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.*
- (c) When SA 600, "Using the Work of Another Auditor", applies, further describe the auditor's responsibilities in a group audit engagement by stating:*

The division of responsibility for the financial information of the entity by indicating the extent to which the financial information of components is audited by the other auditors have been included in the financial information of the entity, e.g., the number of divisions/branches/subsidiaries or other components audited by other auditors

The Auditor's Responsibilities for the Audit of the Financial Statements section of the auditor's report also shall:

- (a) State that the auditor communicates with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that the auditor identifies during the audit;*
- (b) State that the auditor provides those charged with governance with a statement that the auditor has complied with relevant ethical requirements regarding independence and communicate with them all relationships and other matters that may reasonably be thought to bear on the auditor's independence, and where applicable, related safeguards; and*
- (c) For audits of financial statements of all such entities for which key audit matters are communicated in accordance with SA 701, state that, from the matters communicated with those charged with governance, the auditor determines those matters that were of most significance in the audit of the financial statements of the current period and are*

therefore the key audit matters. In accordance with the requirements of SA 701, the auditor describes these matters in the auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, the auditor determines that a matter should not be communicated in the auditor's report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

9. Location of the description of the auditor's responsibilities for the audit of the financial statements: The description of the auditor's responsibilities for the audit of the financial statements required by this SA shall be included:

- (a) Within the body of the auditor's report;**
- (b) Within an appendix to the auditor's report, in which case the auditor's report shall include a reference to the location of the appendix; or**
- (c) By a specific reference within the auditor's report to the location of such a description on a website of an appropriate authority, where law, regulation or the auditing standards expressly permit the auditor to do so.**

When the auditor refers to a description of the auditor's responsibilities on a website of an appropriate authority, the auditor shall determine that such description addresses, and is not inconsistent with, the requirements of this SA.

10. Other Reporting Responsibilities:

- (a) If the auditor addresses other reporting responsibilities in the auditor's report on the financial statements that are in addition to the auditor's responsibilities under the SAs, these other reporting responsibilities shall be addressed in a separate section in the auditor's report with a heading titled "Report on Other Legal and Regulatory Requirements" or otherwise as appropriate to the content of the section, unless these other reporting responsibilities address the same topics as those presented under the reporting responsibilities required by the SAs in which case the other reporting responsibilities may be presented in the same section as the related report elements required by the SAs.**
- (b) If other reporting responsibilities are presented in the same section as the related report elements required by the SAs, the auditor's report shall clearly differentiate the other reporting responsibilities from the reporting that is required by the SAs.**
- (c) If the auditor's report contains a separate section that addresses other reporting responsibilities, the requirements of this SA shall be included under a section with a heading "Report on the Audit of the Financial Statements." The "Report on Other Legal and Regulatory Requirements" shall follow the "Report on the Audit of the Financial Statements."**

11. Signature of the Auditor: The auditor's report shall be signed. The report is signed by the auditor (i.e. the engagement partner) in his personal name. Where the firm is appointed as the auditor, the report is signed in the personal name of the auditor and in the name of the audit firm. The partner/proprietor signing the audit report also needs to mention the

8.9 Advanced Auditing and Professional Ethics

membership number assigned by the Institute of Chartered Accountants of India. They also include the registration number of the firm, wherever applicable, as allotted by ICAI, in the audit reports signed by them.

The report is to be signed by the maker of the report. Normally, a chartered accountant in practice signs the report in the name he is registered as a practitioner. If he is an individual, it may be his individual name or the firm name of which he is the sole proprietor. For those who practise as a partnership, it is usual for them to sign in the firm name. Under Section 145 read with Section 141(2) of the Companies Act, 2013, only the person appointed as an auditor of the company or, where a firm is so appointed, only the partner in the firm who is a chartered accountant, may sign the auditor's report or sign or authenticate any other document of the company required by law to be signed or authenticated by the auditor.

It is obvious that the person appointed makes the report; otherwise the very essence of the appointment of a particular man or firm will be lost. In a profession, the particular skill and reputation of the practitioner counts considerably and if anybody else is allowed to make the report on behalf of the person appointed, then this confidence in the person will cease to be a factor. This has other implications also from the point of view of professional responsibility; it will create an unusual legal situation. It has also implications from the standpoint of the practitioner. If in respect of appointments held by him, the reports are made by others, gradually the goodwill of the practitioner will end and the clients may shift to the person actually making the report.

Example:

If A, B and C were in practice as ABC & Co. Chartered Accountants, any of A or B or C could sign as "ABC & Co." in his own hand. But now in view of the objection raised by the Department of Company Affairs to this practice, the Council of the Institute in the SA 700 "The Auditor's Report on Financial Statements" has recommended to the members who are in practice in partnership that signature on or authentication of the auditor's report or any other document required to be signed or authenticated by the auditor should be made in the following manner.

For ABC and Co.
Chartered Accountants
Firm Registration Number
Signature
(Name of the Member Signing the Audit Report)
(Designation)⁴

In addition to the provisions of the Companies Act, 2013 referred to above, Clause (12) of Part I of the First Schedule to the Chartered Accountants Act, 1949 provides that a chartered accountant in practice shall be deemed to be guilty of professional misconduct if he allows a person, not being a member of the Institute or a member not being his partner, to sign on his

⁴ Partner or Proprietor, as the case may be.

behalf or on behalf of his firm, any balance sheet, profit and loss account, report or financial statements. The provision is intended to safeguard the professional purity by excluding non-chartered accountants from signing the aforesaid documents. By excluding chartered accountants who are not partners, it seeks to keep the line of professional responsibility clear. Partners are mutual agents and therefore, allowing a partner to sign does not interfere with the clarity of responsibility.

12. Place of Signature : *The auditor's report shall name specific location, which is ordinarily the city where the audit report is signed.*

13. Date of the Auditor's Report: *The auditor's report shall be dated no earlier than the date on which the auditor has obtained sufficient appropriate audit evidence on which to base the auditor's opinion on the financial statements, including evidence that:*

- (a) *All the statements that comprise the financial statements, including the related notes, have been prepared; and*
- (b) *Those with the recognized authority have asserted that they have taken responsibility for those financial statements.*

Auditor's Report Prescribed by Law or Regulation: *If the auditor is required by law or regulation applicable to the entity to use a specific layout, or wording of the auditor's report, the auditor's report shall refer to Standards on Auditing only if the auditor's report includes, at a minimum, each of the following elements:*

- (1) *A title.*
- (2) *An addressee, as required by the circumstances of the engagement.*
- (3) *An Opinion section containing an expression of opinion on the financial statements and a reference to the applicable financial reporting framework used to prepare the financial statements.*
- (4) *An identification of the entity's financial statements that have been audited.*
- (5) *A statement that the auditor is independent of the entity in accordance with the relevant ethical requirements relating to the audit, and has fulfilled the auditor's other ethical responsibilities in accordance with these requirements. The statement shall refer to the Code of Ethics issued by ICAI.*
- (6) *Where applicable, a section that addresses, and is not inconsistent with, the reporting requirements of SA 570 (Revised).*
- (7) *Where applicable, a Basis for Qualified (or Adverse) Opinion section that addresses, and is not inconsistent with, the reporting requirements of SA 570 (Revised).*
- (8) *Where applicable, a section that includes the information required by SA 701, or additional information about the audit that is prescribed by law or regulation and*

that addresses, and is not inconsistent with, the reporting requirements in that SA.⁵

- (9) A description of management’s responsibilities for the preparation of the financial statements and an identification of those responsible for the oversight of the financial reporting process that addresses, and is not inconsistent with, the requirements.*
- (10) A reference to Standards on Auditing and the law or regulation, and a description of the auditor’s responsibilities for an audit of the financial statements that addresses, and is not inconsistent with, the requirements.*
- (11) The auditor’s signature.*
- (12) The Place of signature*
- (13) The date of the auditor’s report.*

Auditor’s Report for Audits Conducted in Accordance with Both Standards on Auditing Issued by ICAI and International Standards on Auditing or Auditing Standards of Any Other Jurisdiction:

An auditor may be required to conduct an audit in accordance with, in addition to the Standards on Auditing issued by ICAI, the International Standards on Auditing or auditing standards of any other jurisdiction. If this is the case, the auditor’s report may refer to Standards on Auditing in addition to the International Standards on Auditing or auditing standards of such other jurisdiction, but the auditor shall do so only if:

- (a) There is no conflict between the requirements in the ISAs or such auditing standards of other jurisdiction and those in SAs that would lead the auditor:***
 - (i) to form a different opinion, or***
 - (ii) not to include an Emphasis of Matter paragraph or Other Matter paragraph that, in the particular circumstances, is required by SAs; and***
- (b) The auditor’s report includes, at a minimum, each of the elements set out in Auditor’s Report Prescribed by Law or Regulation discussed above when the auditor uses the layout or wording specified by the Standards on Auditing. However, reference to “law or regulation” in above paragraph shall be read as reference to the Standards on Auditing. The auditor’s report shall thereby identify such Standards on Auditing.***

When the auditor’s report refers to both the ISAs or the auditing standards of a specific jurisdiction and the Standards on Auditing issued by ICAI, the auditor’s report shall clearly identify the same including the jurisdiction of origin of the other auditing standards.

Supplementary Information Presented with the Financial Statements: If supplementary information that is not required by the applicable financial reporting framework is presented

⁵ SA 701, paragraphs 11–16

with the audited financial statements, the auditor shall evaluate:

- *whether, in the auditor's professional judgment, supplementary information is nevertheless an integral part of the financial statements due to its nature or how it is presented. When it is an integral part of the financial statements, the supplementary information shall be covered by the auditor's opinion.*
- *whether such supplementary information is presented in a way that sufficiently and clearly differentiates it from the audited financial statements. If this is not the case, then the auditor shall ask management to change how the unaudited supplementary information is presented. If management refuses to do so, the auditor shall identify the unaudited supplementary information and explain in the auditor's report that such supplementary information has not been audited.*

8.2.2 SA 701, "Communicating Key Audit Matters in the Independent Auditor's Report":

This SA 701 provide guidance regarding communication of Key Audit Matters. Key Audit matter are those matters that, in the auditor's professional judgment, were of most significance in the audit of the financial statements of the current period. Key audit matters are selected from matters communicated with those charged with governance.

Purpose: The purpose of communicating key audit matters is to enhance the communicative value of the auditor's report by providing greater transparency about the audit that was performed. Communicating key audit matters provides additional information to intended users of the financial statements ("intended users") to assist them in understanding those matters that, in the auditor's professional judgment, were of most significance in the audit of the financial statements of the current period. Communicating key audit matters may also assist intended users in understanding the entity and areas of significant management judgment in the audited financial statements.

Scope: Communicating key audit matters in the auditor's report is in the context of the auditor having formed an opinion on the financial statements as a whole. Communicating key audit matters in the auditor's report is not:

- (a) *A substitute for disclosures in the financial statements that the applicable financial reporting framework requires management to make, or that are otherwise necessary to achieve fair presentation;*
- (b) *A substitute for the auditor expressing a modified opinion when required by the circumstances of a specific audit engagement in accordance with SA 705 (Revised);*
- (c) *A substitute for reporting in accordance with SA 570 (Revised) when a material uncertainty exists relating to events or conditions that may cast significant doubt on an entity's ability to continue as a going concern; or*
- (d) *A separate opinion on individual matters.*

This SA applies to audits of complete sets of general purpose financial statements of listed entities and circumstances when the auditor otherwise decides to communicate

key audit matters in the auditor's report. This SA also applies when the auditor is required by law or regulation to communicate key audit matters in the auditor's report. However, SA 705 (Revised) prohibits the auditor from communicating key audit matters when the auditor disclaims an opinion on the financial statements, unless such reporting is required by law or regulation.

Determining Key Audit Matters: The auditor shall determine, from the matters communicated with those charged with governance, those matters that required significant auditor attention in performing the audit. In making this determination, the auditor shall take into account the following:

- (a) Areas of higher assessed risk of material misstatement, or significant risks identified in accordance with SA 315*
- (b) Significant auditor judgments relating to areas in the financial statements that involved significant management judgment, including accounting estimates that have been identified as having high estimation uncertainty.*
- (c) The effect on the audit of significant events or transactions that occurred during the period.*

Communicating Key Audit Matters: The introductory language in this section of the auditor's report shall state that:

- (a) Key audit matters are those matters that, in the auditor's professional judgment, were of most significance in the audit of the financial statements [of the current period]; and.*
- (b) These matters were addressed in the context of the audit of the financial statements as a whole, and in forming the auditor's opinion thereon, and the auditor does not provide a separate opinion on these matters.*

Illustration

The following illustrates the presentation in the auditor's report if the auditor has determined there are no key audit matters to communicate:

Key Audit Matters

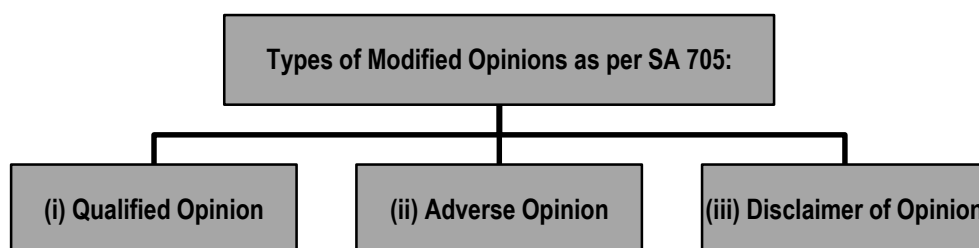

[Except for the matter described in the Basis for Qualified (Adverse) Opinion section or Material Uncertainty Related to Going Concern section,] We have determined that there are no [other] key audit matters to communicate in our report.]

8.2.3 SA 705, "Modifications to the Opinion in the Independent Auditor's Report":

Modified Opinions: SA 705 deals with the auditor's responsibility to issue an appropriate report in circumstances when, in forming an opinion in accordance with SA 700 (Revised), the auditor concludes that a modification to the auditor's opinion on the financial statements is necessary.

The succinct requirements of this SA 705 are given below -

Types of Modified Opinions:

The decision regarding which type of modified opinion is appropriate depends upon:

- (a) The nature of the matter giving rise to the modification, that is, whether the financial statements are materially misstated or, in the case of an inability to obtain sufficient appropriate audit evidence, may be materially misstated; and
- (b) The auditor's judgment about the pervasiveness of the effects or possible effects of the matter on the financial statements.

Objective: The objective of the auditor is to express clearly an appropriately modified opinion on the financial statements that is necessary when:

- (a) The auditor concludes, based on the audit evidence obtained, that the financial statements as a whole are not free from material misstatement; or
- (b) The auditor is unable to obtain sufficient appropriate audit evidence to conclude that the financial statements as a whole are free from material misstatement.

Circumstances When a Modification to the Auditor's Opinion is Required:

The auditor shall modify the opinion in the auditor's report when:

- (a) The auditor concludes that, based on the audit evidence obtained, the financial statements as a whole are not free from material misstatement; or
- (b) The auditor is unable to obtain sufficient appropriate audit evidence to conclude that the financial statements as a whole are free from material misstatement.

Determining the Type of Modification to the Auditor's Opinion:

Qualified Opinion: The auditor shall express a qualified opinion when:

- (a) The auditor, having obtained sufficient appropriate audit evidence, concludes that misstatements, individually or in the aggregate, are material, but not pervasive, to the financial statements; or
- (b) The auditor is unable to obtain sufficient appropriate audit evidence on which to base the opinion, but the auditor concludes that the possible effects on the financial statements of undetected misstatements, if any, could be material but not pervasive.

CASE STUDY

“The Company’s financing arrangements expire and amounts outstanding are payable on May 19, 20X1. The Company has been unable to re-negotiate or obtain replacement financing. This situation indicates the existence of a material uncertainty that may cast significant doubt on the Company’s ability to continue as a going concern and therefore the Company may be unable to realize its assets and discharge its liabilities in the normal course of business. The financial statements (and notes thereto) do not fully disclose this fact.” You are required to identify the type of opinion and draft the same.

In view of circumstances mentioned in SA 705, the auditor should give **Qualified Opinion** in above case. Draft qualified opinion is given as under;

Qualified Opinion

In our opinion, except for the incomplete disclosure of the information referred to in the Basis for Qualified Opinion paragraph, the financial statements give the information required by the Companies Act, 2013, in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India:

- (a) in the case of the Balance Sheet, of the state of affairs of the company as at March 31, 20X1;
- (b) in the case of the Profit and Loss Account, of the profit/ loss for the year ended on that date; and
- (c) in the case of the cash flow statement, of the cash flows for the year ended on that date.

Adverse Opinion: The auditor shall express an adverse opinion when the auditor, having obtained sufficient appropriate audit evidence, concludes that misstatements, individually or in the aggregate, are both material and pervasive to the financial statements.

CASE STUDY

“The Company’s financing arrangements expired and the amount outstanding was payable on March 31, 20X0. The Company has been unable to re-negotiate or obtain replacement financing and is considering filing for bankruptcy. These events indicate a material uncertainty that may cast significant doubt on the Company’s ability to continue as a going concern and therefore it may be unable to realize its assets and discharge its liabilities in the normal course of business. The financial statements (and notes thereto) do not disclose this fact.” You are required to identify the type of opinion and draft the same.

In view of circumstances mentioned in SA 705, the auditor should give **Adverse Opinion** in above case. Draft qualified opinion is given as under;

Adverse Opinion

In our opinion, because of the omission of the information mentioned in the Basis for Adverse Opinion paragraph, the financial statements do not give the information required by the Companies Act, 2013, in the manner so required and also do not give a true and fair view in conformity with the accounting principles generally accepted in India:

- (a) in the case of the Balance Sheet, of the state of affairs of the company as at March 31, 20X0; and
- (b) in the case of the Profit and Loss Account, of the profit/loss for the year ended on that date; and
- (c) in the case of the cash flow statement, of the cash flows for the year ended on that date.

Disclaimer of Opinion: The auditor shall disclaim an opinion when the auditor is unable to obtain sufficient appropriate audit evidence on which to base the opinion, and the auditor concludes that the possible effects on the financial statements of undetected misstatements, if any, could be both material and pervasive. The auditor shall disclaim an opinion when, in extremely rare circumstances involving multiple uncertainties, the auditor concludes that, notwithstanding having obtained sufficient appropriate audit evidence regarding each of the individual uncertainties, it is not possible to form an opinion on the financial statements due to the potential interaction of the uncertainties and their possible cumulative effect on the financial statements.

Consequence of an Inability to Obtain Sufficient Appropriate Audit Evidence Due to a Management-Imposed Limitation after the Auditor Has Accepted the Engagement

If, after accepting the engagement, the auditor becomes aware that management has imposed a limitation on the scope of the audit that the auditor considers likely to result in the need to express a qualified opinion or to disclaim an opinion on the financial statements, the auditor shall request that management remove the limitation.

If management refuses to remove the limitation, the auditor shall communicate the matter to those charged with governance, unless all of those charged with governance are involved in managing the entity, and determine whether it is possible to perform alternative procedures to obtain sufficient appropriate audit evidence.

If the auditor is unable to obtain sufficient appropriate audit evidence, the auditor shall determine the implications as follows:

- (a) If the auditor concludes that the possible effects on the financial statements of undetected misstatements, if any, could be material but not pervasive, the auditor shall qualify the opinion; or
- (b) **If the auditor concludes that the possible effects on the financial statements of undetected misstatements, if any, could be both material and pervasive so that a qualification of the opinion would be inadequate to communicate the gravity of the situation, the auditor shall:**
 - (i) **Withdraw from the audit, where practicable and possible under applicable law or regulation; or**
 - (ii) **If withdrawal from the audit before issuing the auditor's report is not practicable or possible, disclaim an opinion on the financial statements.**

If the auditor withdraws, before withdrawing, the auditor shall communicate to those charged with governance any matters regarding misstatements identified during the audit that would have given rise to a modification of the opinion.

Other Considerations Relating to an Adverse Opinion or Disclaimer of Opinion: When the auditor considers it necessary to express an adverse opinion or disclaim an opinion on the financial statements as a whole, the auditor's report shall not also include an unmodified opinion with respect to the same financial reporting framework on a single financial statement or one or more specific elements, accounts or items of a financial statement. To include such an unmodified opinion in the same report in these circumstances would contradict the auditor's adverse opinion or disclaimer of opinion on the financial statements as a whole.

Form and Content of the Auditor's Report When the Opinion is Modified

When the auditor modifies the audit opinion, the auditor shall use the heading "Qualified Opinion," "Adverse Opinion," or "Disclaimer of Opinion," as appropriate, for the Opinion section.

What special consideration needed for expressing Qualified Opinion?

When the auditor expresses a qualified opinion due to a material misstatement in the financial statements, the auditor shall state that, in the auditor's opinion, except for the effects of the matter(s) described in the Basis for Qualified Opinion section:

- (a) When reporting in accordance with a fair presentation framework, the accompanying financial statements present fairly, in all material respects (or give a true and fair view of) [...] in accordance with [the applicable financial reporting framework]; or***
- (b) When reporting in accordance with a compliance framework, the accompanying financial statements have been prepared, in all material respects, in accordance with [the applicable financial reporting framework].***

When the modification arises from an inability to obtain sufficient appropriate audit evidence, the auditor shall use the corresponding phrase "except for the possible effects of the matter(s) ..." for the modified opinion.

What special consideration needed for expressing Adverse Opinion?

When the auditor expresses an adverse opinion, the auditor shall state that, in the auditor's opinion, because of the significance of the matter(s) described in the Basis for Adverse Opinion section:

- (a) When reporting in accordance with a fair presentation framework, the accompanying financial statements do not present fairly (or give a true and fair view of) [...] in accordance with [the applicable financial reporting framework]; or***
- (b) When reporting in accordance with a compliance framework, the accompanying financial statements have not been prepared, in all material respects, in accordance with [the applicable financial reporting framework].***

What special consideration needed for expressing Disclaimer of Opinion?

When the auditor disclaims an opinion due to an inability to obtain sufficient appropriate audit evidence, the auditor shall:

- (a) State that the auditor does not express an opinion on the accompanying financial statements;***
- (b) State that, because of the significance of the matter(s) described in the Basis for Disclaimer of Opinion section, the auditor has not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on the financial statements; and***
- (c) Amend the statement required in SA 700 (Revised), which indicates that the financial statements have been audited, to state that the auditor was engaged to audit the financial statements.***

Unless required by law or regulation, when the auditor disclaims an opinion on the financial statements, the auditor's report shall not include a Key Audit Matters section in accordance with SA 701.

What is the Basis for Modification of Opinion (Qualified/Disclaimer /Adverse)?

When the auditor modifies (Qualification/Disclaimer/Adverse) the opinion as above on the financial statements, the auditor shall, in addition to the specific elements required by SA 700 (Revised):

- (a)** Amend the heading "Basis for Opinion" to "Basis for Qualified Opinion," "Basis for Adverse Opinion," or "Basis for Disclaimer of Opinion," as appropriate; and
- (b)** Within this section, include a description of the matter giving rise to the modification.

If there is a material misstatement of the financial statements that relates to specific amounts in the financial statements (including quantitative disclosures in the notes to the financial statements), the auditor shall include in the Basis for Opinion section a description and quantification of the financial effects of the misstatement, unless impracticable. If it is not practicable to quantify the financial effects, the auditor shall so state in this section.

If there is a material misstatement of the financial statements that relates to narrative disclosures, the auditor shall include in the Basis for Opinion section an explanation of how the disclosures are misstated.

If there is a material misstatement of the financial statements that relates to the non-disclosure of information required to be disclosed, the auditor shall:

- (a)** Discuss the non-disclosure with those charged with governance;
- (b)** Describe in the Basis for Opinion section the nature of the omitted information; and
- (c)** Unless prohibited by law or regulation, include the omitted disclosures, provided it is practicable to do so and the auditor has obtained sufficient appropriate audit evidence about the omitted information.

8.19 Advanced Auditing and Professional Ethics

If the modification results from an inability to obtain sufficient appropriate audit evidence, the auditor shall include in the Basis for Opinion section the reasons for that inability.

When the auditor expresses a qualified or adverse opinion, the auditor shall amend the statement about whether the audit evidence obtained is sufficient and appropriate to provide a basis for the auditor's opinion to include the word "qualified" or "adverse", as appropriate.

When the auditor disclaims an opinion on the financial statements, the auditor's report shall not include following elements required under SA 700

- (a) A reference to the section of the auditor's report where the auditor's responsibilities are described; and
- (b) A statement about whether the audit evidence obtained is sufficient and appropriate to provide a basis for the auditor's opinion.

Even if the auditor has expressed an adverse opinion or disclaimed an opinion on the financial statements, the auditor shall describe in the Basis for Opinion section the reasons for any other matters of which the auditor is aware that would have required a modification to the opinion, and the effects thereof.

How Auditor will give description of Auditor's Responsibilities for the Audit of the Financial Statements When the Auditor Disclaims an Opinion on the Financial Statements?

When the auditor disclaims an opinion on the financial statements due to an inability to obtain sufficient appropriate audit evidence, the auditor shall amend the description of the auditor's responsibilities required by SA 700 (Revised) to include only the following:

- (a) A statement that the auditor's responsibility is to conduct an audit of the entity's financial statements in accordance with Standards on Auditing and to issue an auditor's report;
- (b) A statement that, however, because of the matter(s) described in the Basis for Disclaimer of Opinion section, the auditor was not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on the financial statements; and
- (c) The statement about auditor independence and other ethical responsibilities required in SA 700 (Revised).

Communication with Those Charged with Governance

When the auditor expects to modify the opinion in the auditor's report, the auditor shall communicate with those charged with governance the circumstances that led to the expected modification and the wording of the modification.

8.2.4 SA 706, "Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report":

Objective: The objective of the auditor, having formed an opinion on the financial statements, is to draw users' attention, when in the auditor's judgment it is necessary to do so, by way of clear additional communication in the auditor's report, to:

- (a) *A matter, although appropriately presented or disclosed in the financial statements, that is of such importance that it is fundamental to users' understanding of the financial statements; or*
- (b) *As appropriate, any other matter that is relevant to users' understanding of the audit, the auditor's responsibilities or the auditor's report.*

Emphasis of Matter paragraph – *A paragraph included in the auditor's report that refers to a matter appropriately presented or disclosed in the financial statements that, in the auditor's judgment, is of such importance that it is fundamental to users' understanding of the financial statements.*

Other Matter paragraph – *A paragraph included in the auditor's report that refers to a matter other than those presented or disclosed in the financial statements that, in the auditor's judgment, is relevant to users' understanding of the audit, the auditor's responsibilities or the auditor's report.*

When to give emphasis of Matter Paragraphs in the Auditor's Report?

If the auditor considers it necessary to draw users' attention to a matter presented or disclosed in the financial statements that, in the auditor's judgment, is of such importance that it is fundamental to users' understanding of the financial statements, the auditor shall include an Emphasis of Matter paragraph in the auditor's report provided:

- (a) *The auditor would not be required to modify the opinion in accordance with SA 705 (Revised)³ as a result of the matter; and*
- (b) *When SA 701 applies, the matter has not been determined to be a key audit matter to be communicated in the auditor's report.*

These circumstances may include:

- *When a financial reporting framework prescribed by law or regulation would be unacceptable but for the fact that it is prescribed by law or regulation.*
- *To alert users that the financial statements are prepared in accordance with a special purpose framework.*
- *When facts become known to the auditor after the date of the auditor's report and the auditor provides a new or amended auditor's report (i.e., subsequent events).*

When the auditor includes an Emphasis of Matter paragraph in the auditor's report, the auditor shall:

- (a) *Include the paragraph within a separate section of the auditor's report with an appropriate heading that includes the term "Emphasis of Matter";*
- (b) *Include in the paragraph a clear reference to the matter being emphasized and to where relevant disclosures that fully describe the matter can be found in the financial statements. The paragraph shall refer only to information presented or disclosed in the financial statements; and*

- (c) *Indicate that the auditor's opinion is not modified in respect of the matter emphasized.*

When to issue other Matter Paragraphs in the Auditor's Report?

If the auditor considers it necessary to communicate a matter other than those that are presented or disclosed in the financial statements that, in the auditor's judgment, is relevant to users' understanding of the audit, the auditor's responsibilities or the auditor's report, the auditor shall include an Other Matter paragraph in the auditor's report, provided:

- (a) *This is not prohibited by law or regulation; and*
(b) *When SA 701 applies, the matter has not been determined to be a key audit matter to be communicated in the auditor's report.*

When the auditor includes an Other Matter paragraph in the auditor's report, the auditor shall include the paragraph within a separate section with the heading "Other Matter," or other appropriate heading.

Examples of circumstances where the auditor may consider it necessary to include an Emphasis of Matter paragraph are:

- An uncertainty relating to the future outcome of exceptional litigation or regulatory action.*
- A significant subsequent event that occurs between the date of the financial statements and the date of the auditor's report.*
- Early application (where permitted) of a new accounting standard that has a material effect on the financial statements.*
- A major catastrophe that has had, or continues to have, a significant effect on the entity's financial position.*

Is there any duty communication with Those Charged with Governance?

If the auditor expects to include an Emphasis of Matter or an Other Matter paragraph in the auditor's report, the auditor shall communicate with those charged with governance regarding this expectation and the wording of this paragraph.

Illustration of Emphasis of Matter Para

INDEPENDENT AUDITOR'S REPORT

To the Members of ABC Company Limited

Report on the Audit of the Standalone Financial Statements

Opinion

We have audited the standalone financial statements of ABC Company Limited (“the Company”), which comprise the balance sheet as at March 31, 20X1, and the statement of Profit & Loss, (statement of changes in equity) and the statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information (in which are included the Returns for the year ended on that date audited by the branch auditors of the Company’s branches located at (*location of branches*))¹³.

In our opinion, and to the best of our information and according to the explanations given to us the aforesaid financial statements, *give a true and fair view*, in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31st, 2XXX and profit/loss, (*changes in equity*) and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with Standards on Auditing (SAs). Our responsibilities under those standards are further described in the *Auditor’s Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements as per the *ICAI’s Code of Ethics and the provisions of the Companies Act, 2013*, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter

We draw attention to Note X of the financial statements, which describes the effects of a fire in the Company’s production facilities. Our opinion is not modified in respect of this matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

[Description of each key audit matter in accordance with SA 701.]

Other Matter

The financial statements of ABC Company for the year ended March 31, 20X0, were audited by another auditor who expressed an unmodified opinion on those statements on March 31, 20X1.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

[Reporting in accordance with SA 700 (Revised) – see Illustration 1 in SA 700 (Revised) given in Auditing Pronouncement.]

- (i) whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls;
- (j) such other matters as may be prescribed. Rule 11 of the Companies (Audit and Auditors) Rules, 2014 prescribes the other matters to be included in auditor's report. The auditor's report shall also include their views and comments on the following matters, namely:-
 - (i) whether the company has disclosed the impact, if any, of pending litigations on its financial position in its financial statement;
 - (ii) whether the company has made provision, as required under any law or accounting standards, for material foreseeable losses, if any, on long term contracts including derivative contracts;
 - (iii) whether there has been any delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the company.

The opinions which the auditor is required to express are:

- (i) Whether proper books of account as required by law have been kept by the company so far as it appears from the examination of the books and proper returns adequate for the purposes of the audit have been received from branches not visited by him;
- (ii) Whether the accounts give the information required by the Act in the manner so required;
- (iii) Whether in his opinion, the statement of profit and loss and balance sheet complied with the accounting standards referred to in Section 133;
- (iv) Whether the financial statements give a true and fair view of the state of the company's affairs as at the end of its financial year and profit or loss and cash flow for the year.

However, it should not be understood that a distinct statement of a fact makes it unnecessary to consider the same for the purpose of opinion formation. In effect, the facts, apart from their own significance which probably account for their, distinct disclosure, are complementary to the opinion. On the face of adverse facts, no favourable opinion can be given. It should be appreciated that only certain very important and basic facts about the accounts are required to be stated under the provisions of sub-sections (3). The statement of facts by the auditor is a very significant pointer to the credibility of the accounts. If the auditor states that he has not been able to obtain all the information and explanations considered necessary by him, the reliability of the accounting information under the report would be seriously impaired. Sub-section (4) provides for reasons to be given in the auditor's report, if any of the matters required to be included in the audit report under this section are subject to qualification or negative statement.

Note: Students are also required to refer Guidance note on Reporting under section 143(3)(f) and (h) of the Companies Act, 2013 given in Appendix at the end of this Chapter.

Report under Section 143(1) of the Companies Act, 2013: Section 143(1) requires the auditor to make certain specific enquiries during the course of his audit. This requirement is without prejudice to his general rights, powers and duties regarding access to books etc. and obtaining

8.25 Advanced Auditing and Professional Ethics

information and explanations. He is however not required to report on the matters specified in this sub-section, unless he has any special comments to make on any of the items referred to therein. If he is satisfied as a result of the enquiries, he has no further duty to report that he is so satisfied. It should however be noted that the auditor is required to make only enquiries on the matters specified in the sub-section and is not to investigate into the matters referred to therein.

Clause (a) requires the auditor to inquire:

“Whether loans and advances made by the company on the basis of security have been properly secured and whether the terms on which they have been made are prejudicial to the interests of the company or its members.”

This clause applies to loans and advances made by the company during the financial year under audit, whether they are outstanding on the date of the Balance Sheet or not. The inquiry should be made in the light of conditions prevailing when the loan or advance was made. Loans and advances have not been defined anywhere in the Act. However, having regard to the requirement of clause (d) of this sub-section, a distinction is obviously intended to be made between “loans and advances” and “deposits”. A “deposit” may be defined as the placing of money or money’s worth with a third party, either for safe keeping, or by way of security for the performance of the depositor’s obligations, or for the purpose of earning interest; in the last case deposit being with a party who customarily accepts deposits. Any item required to be disclosed under the head “Loans and Advances” in Part I of the Schedule III to the Act which do not fall within the above definition of a “deposit” should be construed for the purpose of this clause as “loans and advances”.

The clause applies to all loans and advances made “on the basis of the security”. “Security” for this purpose would include any movable or immovable property, whether belonging to the borrower or not, of which either physical possession or over which a legally effective charge is given to lender.

The loan agreement or correspondence in regard to the terms of the loan or advance should be seen. Where the loan or advance is made to a company, any charge on the assets of such a company should have been registered under Section 77 of the Act in order to constitute an effective security. The “terms” on which the loan or advance is made would primarily include the security, the interest charged and the terms of repayment. It would be difficult to lay down any general principles regarding the rate of interest which may be charged on loans and advances. Various considerations, such as the position and standing of the borrower, type of security, purpose of the loan, prevailing market rate of interest, etc., would have to be taken into account. If the loan has been given for business considerations, e.g., loans to staff for purchase of cars, houses, etc., loans to suppliers of raw materials or other goods, there may be justification for interest being charged at a rate lower than the market rate, or even, in appropriate circumstances, no interest being charged at all. However, when a loan is given only with a view to earning interest, the interest charged would be at the commercial rate.

Particular attention should be paid to loans or advances to concerns in which the directors of the company or their associates are interested. The question whether the terms on which a loan or advance has been made are “prejudicial to the interests of the company or its members” is a

difficult one. Obviously, the auditor is not to inquire as to how such transactions of the company affect the interests of individual members in their personal capacities. The reference to "members" should therefore be construed as a reference to the members of a company as a class, in their capacity as members. The members of the company would be primarily interested in a reasonable return on their investment and in the safety of their capital. The question whether a loan is prejudicial to the interests of the members should therefore be considered from this angle.

If loan or advance has been approved by the members of the company and/or the Government as required by Section 186, this would be a *prima facie* evidence to show that it is not prejudicial to the interests of the company or its members.

Under Clause (b) the auditor has to inquire:

"Whether transactions of the company which are represented merely by book entries are prejudicial to the interests of the company."

The transactions of a company are ordinarily matters of fact. The purpose of book entries is to correctly record transactions which have, in fact, taken place. If a book entry is passed which is not in accordance with the facts of the transaction, or is contrary thereto, this should be set right or reported upon by the auditor. Again, if book entries are passed purporting to record "transactions" which have, in fact, not taken place, similar considerations would apply. The clause is therefore intended to cover transactions of the company for which the only evidence, or the principal evidence, is the entry regarding the transactions in the books of account. In such cases, the auditor should inquire whether such transactions have in fact taken place and, if so, whether they are prejudicial to the interests of the company.

Under Clause (c) the auditor has to inquire:

"Where the company not being an investment company or a banking company, whether so much of the assets of the company as consist of shares, debentures and other securities have been sold at a price less than that at which they were purchased by the company".

This clause requires the auditor to inquire in all cases where shares, debentures or other securities have been sold at a price less than their cost. If, as a result of his inquiries, the auditor is satisfied that the sale is *bonafide* and the price realised is reasonable, having regard to the circumstances of the case, he has no further duty to report on the matter.

Under Clause (d) the auditor has to inquire:

"Whether loans and advances made by the company have been shown as deposits".

A reference is invited to the definition of a "deposit" in contradistinction to that of a loan or advance given in the comments on clause (a) above. It should be noted that the inquiry to be made is whether loans and advances have been shown as deposits, and not vice versa.

Clause (e) requires the auditor to inquire:

"Whether personal expenses have been charged to revenue account."

The practice of meeting certain types of personal expenses of employees is normal and is recognized both by the Income tax Authorities and the Company Law Board. Illustration of such

8.27 Advanced Auditing and Professional Ethics

expenses are the provision of rent-free quarters, conveyance for personal use, medical expenses, expenses on leave travel, maternity benefits, canteen facilities, etc. The charging to revenue of such personal expenses, either on the basis of the company's contractual obligations, or in accordance with accepted business practice, is perfectly normal and legitimate and does not call for any special comment by the auditor. Where, however, personal expenses not covered by contractual obligations or by accepted business practice are incurred by the company and charged to revenue account, it would be the duty of the auditor to report thereon.

Clause (f) requires the auditor to inquire:

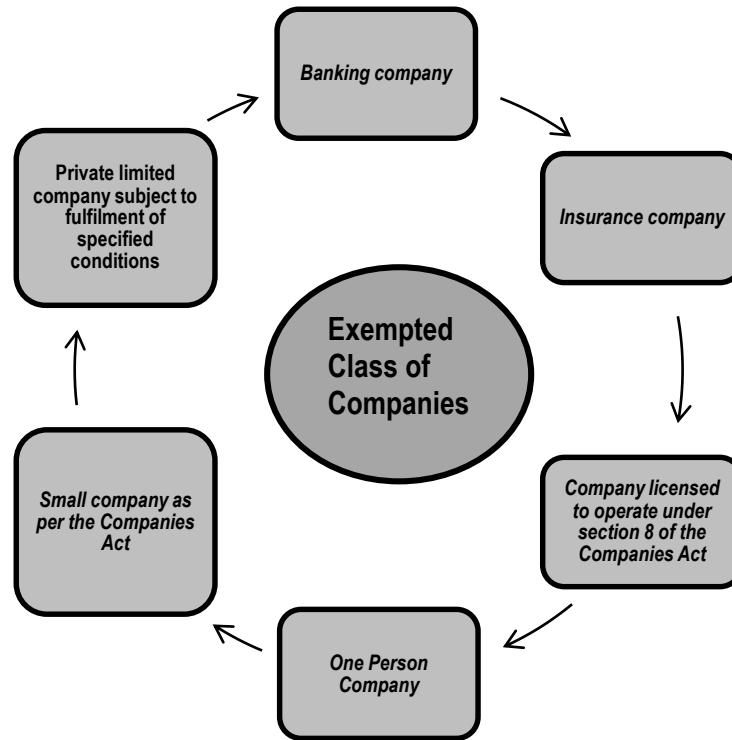

"Where it is stated in the books and documents of the company that any shares have been allotted for cash, whether cash has actually been received in respect of such allotment, and if no cash has actually been so received, whether the position as stated in the account books and the balance sheet is correct, regular and not misleading."

8.3 Reporting Under CARO, 2016

In exercise of the powers conferred by section 143(11) of the Companies Act, 2013, the Central Government, after consultation with the Institute of Chartered Accountants of India, has issued the Companies (Auditor's Report) Order, 2016, (CARO, 2016) dated 29th March, 2016.

8.3.1 Applicability of the Order: The CARO, 2016 is an additional reporting requirement Order. The order applies to every company including a foreign company as defined in clause (42) of section 2 of the Companies Act, 2013. However, the Order specifically exempts the following class of companies

- (i) a banking company as defined in clause (c) of section 5 of the Banking Regulation Act, 1949 (10 of 1949);***
- (ii) an insurance company as defined under the Insurance Act, 1938 (4 of 1938);***
- (iii) a company licensed to operate under section 8 of the Companies Act;***
- (iv) a One Person Company as defined under clause (62) of section 2 of the Companies Act and a small company as defined under clause (85) of section 2 of the Companies Act; and***
- (v) a private limited company, not being a subsidiary or holding company of a public company, having a paid up capital and reserves and surplus not more than rupees one crore as on the balance sheet date and which does not have total borrowings exceeding rupees one crore from any bank or financial institution at any point of time during the financial year and which does not have a total revenue as disclosed in Scheduled III to the Companies Act, 2013 (including revenue from discontinuing operations) exceeding rupees ten crore during the financial year as per the financial statements.***

8.3.2 Auditor's report to contain matters specified in paragraphs 3 and 4. - Every report made by the auditor under section 143 of the Companies Act, 2013 on the accounts of every company audited by him, to which this Order applies, for the financial years commencing on or after 1st April, 2015, shall in addition, contain the matters specified in paragraphs 3 and 4, as may be applicable: It may be noted that the Order shall not apply to the auditor's report on consolidated financial statements.

8.3.3 Matters to be included in the auditor's report. - The auditor's report on the accounts of a company to which this Order applies shall include a statement on the following matters, namely:-

- (i) (a) whether the company is maintaining proper records showing full particulars, including quantitative details and situation of fixed assets;
- (b) whether these fixed assets have been physically verified by the management at reasonable intervals; whether any material discrepancies were noticed on such verification and if so, whether the same have been properly dealt with in the books of account;
- (c) whether the title deeds of immovable properties are held in the name of the company. If not, provide the details thereof;
- (ii) whether physical verification of inventory has been conducted at reasonable intervals by the management and whether any material discrepancies were noticed and if so, whether they have been properly dealt with in the books of account;

- (iii) whether the company has granted any loans, secured or unsecured to companies, firms, Limited Liability Partnerships or other parties covered in the register maintained under section 189 of the Companies Act, 2013. If so,**

 - (a) whether the terms and conditions of the grant of such loans are not prejudicial to the company's interest;**
 - (b) whether the schedule of repayment of principal and payment of interest has been stipulated and whether the repayments or receipts are regular;**
 - (c) if the amount is overdue, state the total amount overdue for more than ninety days, and whether reasonable steps have been taken by the company for recovery of the principal and interest;**
- (iv) in respect of loans, investments, guarantees, and security whether provisions of section 185 and 186 of the Companies Act, 2013 have been complied with. If not, provide the details thereof.**
- (v) in case, the company has accepted deposits, whether the directives issued by the Reserve Bank of India and the provisions of sections 73 to 76 or any other relevant provisions of the Companies Act, 2013 and the rules framed there under, where applicable, have been complied with? If not, the nature of such contraventions be stated; If an order has been passed by Company Law Board or National Company Law Tribunal or Reserve Bank of India or any court or any other tribunal, whether the same has been complied with or not?**
- (vi) whether maintenance of cost records has been specified by the Central Government under section 148(1) of the Companies Act, 2013 and whether such accounts and records have been so made and maintained.**
- (vii) (a) whether the company is regular in depositing undisputed statutory dues including provident fund, employees' state insurance, income-tax, sales-tax, service tax, duty of customs, duty of excise, value added tax, cess and any other statutory dues to the appropriate authorities and if not, the extent of the arrears of outstanding statutory dues as on the last day of the financial year concerned for a period of more than six months from the date they became payable, shall be indicated;**

 - (b) where dues of income tax or sales tax or service tax or duty of customs or duty of excise or value added tax have not been deposited on account of any dispute, then the amounts involved and the forum where dispute is pending shall be mentioned. (A mere representation to the concerned Department shall not be treated as a dispute).**
- (viii) whether the company has defaulted in repayment of loans or borrowing to a financial institution, bank, Government or dues to debenture holders? If yes, the period and the amount of default to be reported (in case of defaults to banks, financial institutions, and Government, lender wise details to be provided).**

- (ix) *whether moneys raised by way of initial public offer or further public offer (including debt instruments) and term loans were applied for the purposes for which those are raised. If not, the details together with delays or default and subsequent rectification, if any, as may be applicable, be reported;*
- (x) *whether any fraud by the company or any fraud on the Company by its officers or employees has been noticed or reported during the year; If yes, the nature and the amount involved is to be indicated;*
- (xi) *whether managerial remuneration has been paid or provided in accordance with the requisite approvals mandated by the provisions of section 197 read with Schedule V to the Companies Act? If not, state the amount involved and steps taken by the company for securing refund of the same;*
- (xii) *whether the Nidhi Company has complied with the Net Owned Funds to Deposits in the ratio of 1: 20 to meet out the liability and whether the Nidhi Company is maintaining ten per cent unencumbered term deposits as specified in the Nidhi Rules, 2014 to meet out the liability;*
- (xiii) *whether all transactions with the related parties are in compliance with sections 177 and 188 of Companies Act, 2013 where applicable and the details have been disclosed in the Financial Statements etc., as required by the applicable accounting standards;*
- (xiv) *whether the company has made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year under review and if so, as to whether the requirement of section 42 of the Companies Act, 2013 have been complied with and the amount raised have been used for the purposes for which the funds were raised. If not, provide the details in respect of the amount involved and nature of non-compliance;*
- (xv) *whether the company has entered into any non-cash transactions with directors or persons connected with him and if so, whether the provisions of section 192 of Companies Act, 2013 have been complied with;*
- (xvi) *whether the company is required to be registered under section 45-IA of the Reserve Bank of India Act, 1934 and if so, whether the registration has been obtained.*

Examples

1. **ABC Pvt. Ltd. is a holding company of XYZ Ltd. Whether CARO is applicable to ABC Pvt. Ltd.?**
- CARO 2016 will be applicable to a private limited company which is holding company of a public company, which was not there in previous CARO. Therefore, CARO is applicable on ABC Pvt. Ltd.**

2. *Physical verification of only 50% (in value) of items of inventory has been conducted by the company. The balance 50% will be conducted in next year due to lack of time and resources.*

Reporting for Physical Verification of Inventory: clause (ii) of Para 3 of CARO, 2016 requires the auditor to state in his report whether physical verification of inventory has been conducted at reasonable interval by the management. Physical verification of inventory is the responsibility of the management which should verify all material items at least once in a year and more often in appropriate cases. The auditor in order to satisfy himself about verification at reasonable intervals should examine the adequacy of evidence and record of verification.

In the given case, the above requirement of CARO, 2016 has not been fulfilled as such and the auditor should point out the specific areas where he believes the procedure of inventory verification is not reasonable. He may consider the impact on financial statement and report accordingly.

3. *K Ltd. has taken a term loan from a nationalized bank in 2010 for ₹ 200 lakhs repayable in five equal instalments of ₹ 40 lakhs from 31st March, 2011 onwards. It had repaid the loans due in 2011 & 2012, but defaulted in 2013, 2014 & 2015. As the auditor of K Ltd. what is your responsibility assuming that company has sought reschedulement of loan?*

Reporting for Default in Repayment of Dues: As per clause (viii) of Para 3 of CARO, 2016, the auditor of a company has to report whether the Company has defaulted in repayment of its dues to a financial institution or bank or debentures holders and if yes, the period and amount of default to be reported.

In this case, K Ltd. has defaulted in repayment of dues for three years. Application for rescheduling will not change the default position. Hence the auditor has to report in his audit report that the Company has defaulted in its repayment of dues to the bank to the extent of ₹ 120 lakhs.

4. *LM Ltd. had obtained a Term Loan of ₹ 300 lakhs from a bank for the construction of a factory. Since there was a delay in the construction activities, the said funds were temporarily invested in short term deposits.*

Term Loan Invested in Short Term Deposits: As per clause (ix) of Para 3 of CARO, 2016, an auditor need to state in his report that whether the term loans were applied for the purpose for which the loans were obtained.

In the present case, the term loan obtained by LM Ltd. have not been put to use for construction activities and temporarily invested the same in short term deposit. Here, the auditor should report the fact in his report that pending utilization of the term loan for construction of a factory, the funds were temporarily used for the purpose other than the purpose for which the loan was sanctioned as per clause (ix) of Para 3 of CARO, 2016.

5. **For the purpose of availing exemption from CARO what kind of loan to be considered?**
All sorts of loan whether term loan, demand loan, export credit, working credit limits, cash credits. Overdrafts, bill purchased or discounted, but does not include non-fund based facilities like LC BG.
6. **Whether CARO is Applicable to the auditor of consolidated financial statement? Order shall not apply to the auditor's report on consolidated financial statements. In previous order it was not expressly provided hence CFS auditors used to include CARO in their report.**
7. **What documents Constitute Title Deed?**
Following constitute title deeds of the immovable property:-
- (i) *Registered sale deed / transfer deed / conveyance deed, etc. of land, land & building together, etc. purchased, allotted, transferred by any person including any government, government authority / body / agency/ corporation, etc. to the company.*
- (ii) *In case of leasehold land and land & buildings together, covered under the head fixed assets, the lease agreement duly registered with the appropriate authority.*
8. **Should the auditor examine the cost record in detail while reporting under CARO?**
CARO does not require a detailed examination of Cost Records. The Auditor should, therefore, conduct a general review of Cost Records to ensure that the records as prescribed are made and maintained. The word "made" applies in respect of Cost Accounts, and the word "maintained" applies in respect of Cost Records relating to Materials, Labour, Overheads, etc.

8.3.4 Reasons to be stated for unfavourable or qualified answers-

- (1) *Where, in the auditor's report, the answer to any of the questions referred to in paragraph 3 is unfavourable or qualified, the auditor's report shall also state the basis for such unfavourable or qualified answer, as the case may be.*
- (2) *Where the auditor is unable to express any opinion on any specified matter, his report shall indicate such fact together with the reasons as to why it is not possible for him to give his opinion on the same.*

(Note : Refer Appendix for Illustrative report)

8.4 Distinction between Audit Report and Certificate

The term 'report' is used where an expression of opinion is involved. The term 'certificate' is preferable where the auditor comments on or verifies facts such as a verification of investment by inspection or the checking of ballot papers on a poll in a company meeting. Under the Companies Act, 2013, a number of situations are there where an auditor is required to issue a certificate rather than a report like as per Section 66 of the Companies Act, 2013, an auditor is

8.33 Advanced Auditing and Professional Ethics

required to file a certificate in the tribunal where company proposing for the reduction of capital. However, the report under Section 143 of the Companies Act, 2013, is an opinion based report and is not a certificate.

Some situations where Audit Reports and Certificates are required is given below -

(1) *Under the Payment of Bonus Act, 1965, a chartered accountant may be required to issue a 'report' on the computation of bonus payable. The report may be as under:*

"We have reviewed the figures in the above computation in comparison with the books and records produced to us, the audit of which has already been completed by us and report that subject to the notes given on face of the computation in our opinion, and to the best of our knowledge and belief and according to the information and explanation given to us, the above computation is in due accordance therewith and has been made on a basis reasonably consistent with the provisions of the Payment of Bonus Act, 1965."

(2) *Auditor's Report in accordance with Regulation 54 of the SEBI (Mutual Fund) Regulations, 1993.*

- (i) All Mutual funds shall be required to get their accounts audited in terms of a provision to that effect in their trust deeds. The Auditor's Report shall form a part of the Annual Report. It should accompany the Abridged Balance Sheet and Revenue Account. The auditor shall report to the Board of Trustees and not to the unit holders.
- (ii) The auditor shall state whether:
 1. He has obtained all information and explanations which, to the best of his knowledge and belief, were necessary for the purpose of his audit.
 2. The Balance Sheet and the Revenue Account are in agreement with the books of account of the fund.
- (iii) The auditor shall give his opinion as to whether:
 1. The Balance Sheet gives a true and fair view of the scheme wise state of affairs' of the fund as at the balance sheet date, and
 2. The Revenue Account gives a true and fair view of the scheme wise surplus/deficit of the fund for the year/period ended at the balance sheet date.

MANNER OF SIGNING OF CERTIFICATES BY CHARTERED ACCOUNTANTS:

The Council of the Institute of Chartered Accountants of India (ICAI), at its 349th meeting held on 17th and 18th January, 2016 considered an issue relating to manner of signing of certificates by Chartered Accountants. The Council noted that presently different practices were in vogue in respect of the manner of signing of various certificates issued by the members of the ICAI. On a consideration of the matter, the Council, with a view to

bring uniformity in the manner of signing of certificates, has decided to require the members of the ICAI to include (in addition to any other requirements in this regard prescribed by the relevant law or regulation under which the certificate is being issued) the following details in their "Signatures" on the certificates issued by them:

- *Name of the CA firm**
- *Firm Registration Number (FRN)**
- *Name of the member*
- *Designation (Partner/Proprietor)*
- *Membership Number*

8.5 Audit Reports and Certificates for Special Purposes

In this first part, the relevant extracts from the Guidance Note on Audit Reports and Certificates for Special Purposes are given below (Also refer SA 800, SA 805 and SA 810):

Government authorities may, under various statutes or notifications, require reports or certificates from auditors in support of statements or other information prepared by an enterprise. Reports or certificates on specific matters may also be required from auditors by an enterprise, for its own special purposes. These reports or certificates to specific requirements of the individual users is unlike a 'general purposes report' e.g. an auditor's report on financial statements which is intended for general use. An audit report or certificate for special purposes is one to which the format of general purpose audit report is not applicable.

8.5.1 Scope of Special Purpose Audit Reports and Certificates: Audit reports or certificates for special purposes may be issued in connection with:

- (a) financial statements which are prepared in addition to general purpose financial statements;
- (b) specified elements, accounts or items of financial statements;
- (c) compliance with requirements of any agreement or statute or regulation;
- (d) financial information given in special purpose formats or schedules; or
- (e) compilation of statistics or ascertainment of basic figures e.g., for the purposes of fixed quotas or levies.

8.5.2 Responsibility for Preparation of Special Purpose Statements: The primary responsibility for the contents of special purpose statement rests with the enterprise and this would be evidenced by a suitable declaration or authentication by the management on the face of the statement.

8.5.3 Scope of Reporting Auditor's Function: A reporting auditor should have a clear understanding of the scope and nature of the terms of his assignment. It is desirable for him to obtain the terms in writing to avoid any misunderstanding. A reporting auditor is not an expert on purely technical matters and as such, when he is required to report on or certify such matters (e.g., composition or quality of a product) which are of paramount importance and constitute the

very basis of the figures contained in the statement, he should state his limitations clearly in the report or certificate. At the same time he should indicate the extent to which he has been able to exercise his own professional skill and judgement with regard to the matters being reported upon. For instance, he may state that, for the purposes of forming his opinion he has relied upon a certificate from technical experts. He should, of course, satisfy himself about the technical qualifications of the expert, and subject the expert's certificate to a reasonable review.

8.5.4 Contents of Reports and Certificates for Special Purposes: In many cases, a reporting auditor can choose the form and contents of his report or certificate. In other cases the form and contents of the report or certificate are specified by statute or notification and hence cannot be changed. Where a reporting auditor is free to draft his report or certificate, he should consider the following:

- (a) Specific elements, accounts or items covered by the report or certificate should be clearly identified and indicated.
- (b) The report or certificate should indicate the manner in which the audit was conducted, e.g., by the application of generally accepted auditing practices, or any other specific tests.
- (c) If the report or certificate is subject to any limitations in scope, such limitations should be clearly mentioned.
- (d) Assumptions on which the special purpose statement is based should be clearly indicated if they are fundamental to the appreciation of the statement.
- (e) Reference to the information and explanations obtained should be included in the report or certificate. In certain cases, apart from a general reference to information and explanations obtained, a reporting auditor may also find it necessary to refer in his report or certificate to specific information or explanations on which he has relied.
- (f) The title of the report or certificate should clearly indicate its nature, i.e., whether it is a report or a certificate. Similarly, the language should be unambiguous, i.e., it should clearly bring out whether the reporting auditor is expressing an opinion (as in the case of a report) or whether he is only confirming the accuracy of certain facts (as in the case of a certificate). For this, the choice of appropriate words and phrases is important.
- (g) If the special purposes statement is based on general purpose financial statements, the report or certificate should contain a reference to such statements. However, the report or certificate should not contain a reference to any other statement unless the same is attached herewith. It should be clearly indicated whether or not the statutory audit of the general purposes financial statements has been completed and also, whether such audit has been conducted by the reporting auditor or by another auditor. In case the general purposes financial statements have been audited by another auditor, the reporting auditor should specify the extent to which he has relied on them. He may communicate with the statutory auditor for securing his co-operation and in appropriate circumstances, discuss relevant matters with him, if possible.
- (h) Where a report requires the interpretation of statute, the reporting auditor should clearly indicate the fact that he is merely expressing his opinion in the matter. He should take sufficient

care to ensure that in respect of matters which are capable of more than one interpretation, his report is not misconstrued as representing a settled legal position.

(i) An audit report or certificate should ordinarily be a self-contained document. It should not confine itself to a mere reference to another report or certificate issued by the reporting auditor but should include all relevant information contained in such report or certificate.

(j) The reporting auditor should clearly indicate in his report or certificate, the extent of responsibility which he assumes. Where the statement on which he is required to give his report or certificate, includes some information which has not been audited, he should clearly indicate in his report or certificate the particulars of such information.

In certain cases, the form and/or contents of the report or certificate, as prescribed by a statute or a notification, may not be appropriate or adequate. In such situations, the reporting auditor may consider modifying the report or certificate on the basis of the suggestion made in above para to the extent applicable. In case this is not possible, he should clearly indicate the limitations in his report or certificate itself.

8.5.5 Extent of Reliance on General Purpose Audit Report: Where a special purpose engagement is undertaken after the statutory audit has been completed, a reporting auditor should invariably review the statutory audit report to ascertain whether there are any matters which have a bearing on his report or certificate. In cases, where a reporting auditor is required to report or certify certain specific matter arising from the financial statements taken as a whole, he should not normally issue his report or certificate until the statutory audit has been completed. For instance, a reporting auditor may be required to state whether, in the case of an Indian branch of a foreign company, the profit shown in the accounts represents the remittable surplus of the branch, or he may be asked to report on the computation of 'gross profit' for the purpose of bonus under the Payment of Bonus Act, 1965. In such cases, it would normally not be proper for him to give his report or certificate until the statutory audit has been completed, since he would not really be in a position to state whether the profit shown in the accounts itself has been properly computed.

Where an audit report or certificate is required before the statutory audit is completed, a reporting auditor should state clearly in his audit report or certificate that he is reporting on or certifying specific matters arising out of the financial statements of the enterprise, the statutory audit of which has not been completed. Where the reporting auditor prepares his report or certificate on the basis of duly audited general purpose financial statements he may take the following precautions:

- (i) He may clearly state in his report or certificate that the figures from the audited general purpose financial statements have been used and relied upon.
- (ii) He may include in his report or certificate a statement showing the reconciliation between the figures in the general purpose financial statements and the figures appearing in his report or certificate.

8.5.6 Reports and Certificates on Specified Accounts or Items of Financial Statements: The test of materiality which a reporting auditor uses in connection with special purpose reports

may be different, depending upon the circumstances, from the test he would use in connection with a general purpose report. For example, where he is required to express an opinion on specified accounts or items of financial statements, he may judge the materiality of an item solely in relation to such individual accounts or items rather than to the aggregate thereof or to the financial statements as a whole. A reporting auditor's examination of certain records for an audit report or certificate for special purpose may also be more intensive than the examination of the same records by the statutory auditor for the purpose of expressing an opinion on the general purpose financial statements as a whole. Certain accounts or items of financial statements are inter - related, e.g., sales and trade receivables, purchases and trade payables, fixed assets and depreciation, etc. Therefore, where the reporting auditor is required to examine and report upon or certify a specified account or items of financial statement, he may also need to examine the related accounts or items to discover the inconsistencies, if any, between these inter - related accounts or items.

8.5.7 Communication of Report or Certificate: The reporting auditor may address his report or certificate to the client or to the public authority or person requiring it, as the case may be. In appropriate circumstances, a certificate may be issued without reference to any particular person or authority by using the words. 'To whomsoever it may concern'. The report or certificate should normally be issued to the client who should be responsible for forwarding the same to the connected authority, where so required.

8.5.8 Communication with the Previous Reporting Auditor: It should be a healthy tradition if the practice of communicating with the member who had done the work previously is followed in every case where a member is required to give a report or certificate for a special purpose.

8.6 Reporting Requirements in case of Comparative Information

SA 710 Comparative Information-Corresponding Figures and Comparative Financial Statements deals with auditor's responsibility regarding comparative information in an audit of financial statement. There are two different broad approaches to the auditor's responsibilities in respect of comparative information: Corresponding figures and Comparative financial statement.

The essential audit reporting differences between the approaches are:

- (a) For corresponding figures, the auditor's opinion on the financial statements refers to the current period only; whereas
- (b) For comparative financial statements, the auditor's opinion refers to each period for which financial statements are presented.

The objectives of the auditor are to obtain sufficient appropriate audit evidence about whether the comparative information included in the financial statements has been presented, in all material respects, in accordance with the requirements for comparative information in the applicable financial reporting framework; and to report in accordance with the auditor's reporting responsibilities.

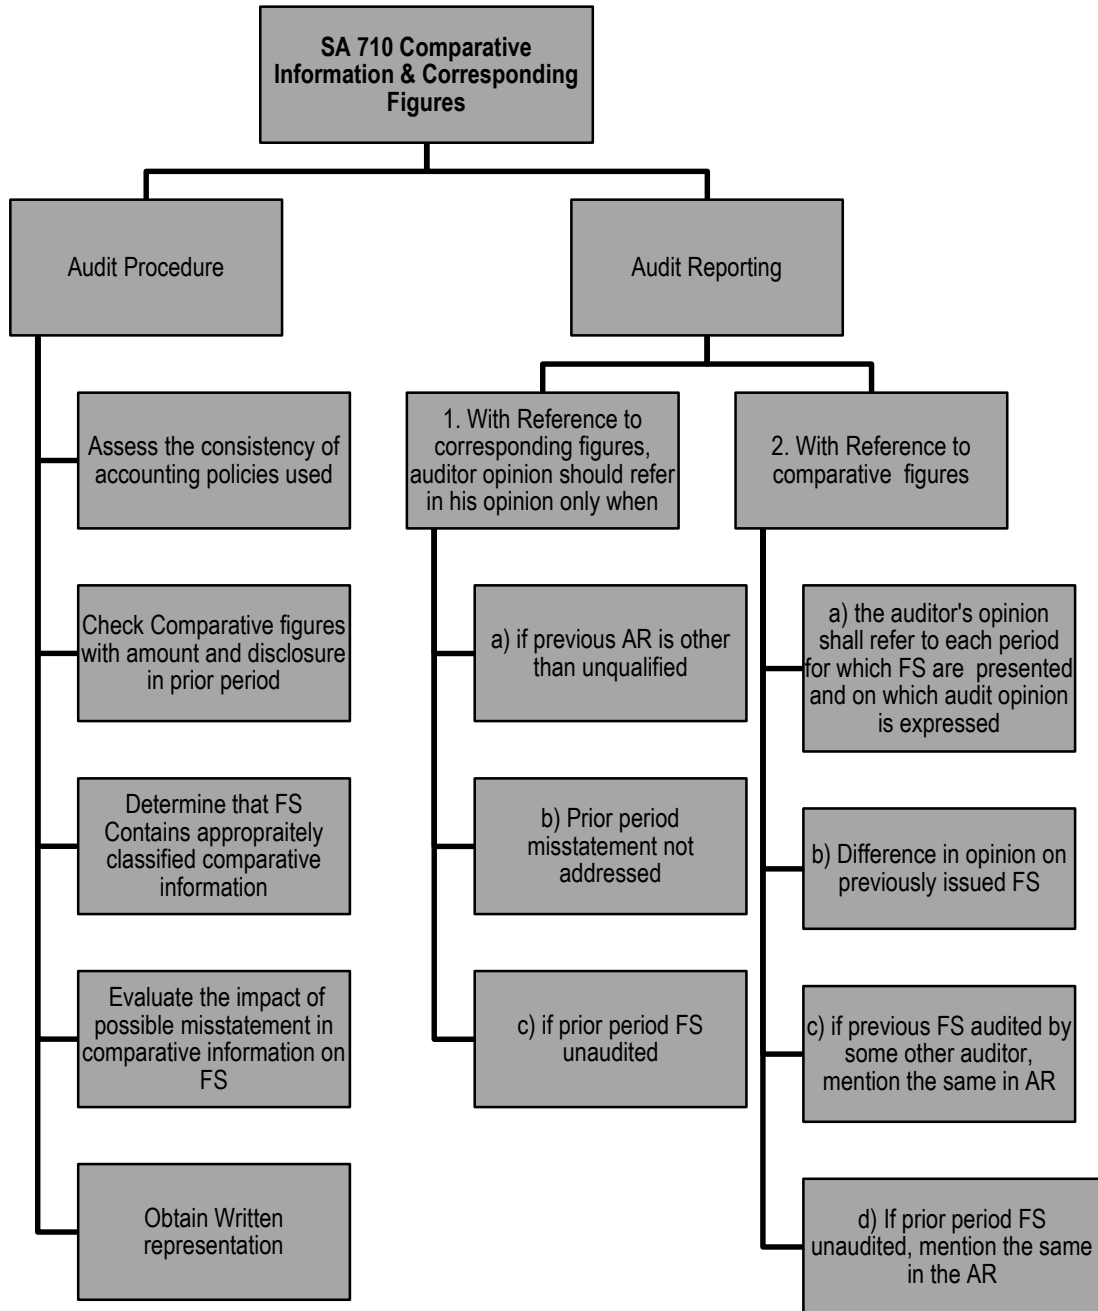

8.6.1 Audit Procedures for Comparative Information:

- (a) **Perform Specific audit Procedure:** For determining that the financial statement contains appropriately classified comparative information, the auditor should:

- Ensure that comparative information agrees with the amount and other disclosure presented in the prior period.
 - The accounting policies applied are consistent with those applied in current period.
 - If there have been any changes in the application of accounting policies than they are properly disclosed and presented.
- (b) **Evaluating the impact on financial statement:** If the auditor becomes aware of any possible misstatement in the comparative information, then:
- He should perform the necessary audit procedures to obtain sufficient audit evidence.
 - If the auditor had audited the prior period's financial statement than he should follow the relevant requirements of SA 560.
- (c) **Written Representation:** As required by SA 580, the auditor should also request written representation. He should also obtain a specific written representation regarding any prior period item that is disclosed in current year's financial statement.

8.6.2 Audit Reporting

- (a) **With Reference to Corresponding Figures:** When corresponding figures are presented, the auditor's opinion shall not refer to the corresponding figures except in the following circumstances:
- If the auditor's report of the previous period contains other than an unqualified opinion.
 - If the auditor is of the opinion, and he has sufficient evidence in this regard, that a material misstatement exists in the financial statement of prior period, which was not addressed earlier.
 - If the prior period financial statement are not audited, than he should obtain sufficient audit evidence that the opening balance does not contain any material misstatement.
- (b) **With Reference to Comparative Financial Statement:** When comparative financial statement are presented -
- The auditor's opinion shall refer to each period for which the financial statements are presented.
 - When reporting on current period's audit, if the auditor's opinion on such prior period financial statement differs from the opinion previously issued on such financial statement, the auditor shall disclose the substantive reason for the different opinion in other matter paragraph in his report.
 - If the auditor concludes that a material misstatement is present in the previously audited figures of financial statement, he should report it to the appropriate level of the management and request that the predecessor auditor be informed. If then the prior years statements are amended with new report by the predecessor auditor, then the auditor shall report only on the current period.

(c) Reporting treatment common to both (for corresponding figures and comparative information):

(i) If the financial statement of the prior period were audited by a predecessor auditor, the auditor (is permitted by law or regulation to refer to the predecessor audit report – on case of corresponding figures and decides to do so) shall state in his audit report:

- That the financial statement of the prior period were audited by a predecessor auditor;
- The type of the opinion expressed by the predecessor auditor;
- The date of that audit report.

(ii) If the prior period financial statement were not audited than he shall report the same in other matter paragraph in his audit report that the corresponding/comparative figures are unaudited. However, the disclosure does not relieve him from his responsibility of obtaining sufficient appropriate audit evidence that the opening balances do not contain misstatements that materially affect the current period's financial statements.

(Note: Students are advised to refer Series of SA 700 on Audit Reporting and Conclusion in addition to SA 800 Series for better understanding)

To the Members of ABC Limited

Opinion

We have audited the standalone financial statements of ABC Company Limited ("the Company"), which comprise the balance sheet as at 31st March 20XX, and the statement of Profit and Loss, (statement of changes in equity) and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information [in which are included the Returns for the year ended on that date audited by the branch auditors of the Company's branches located at (location of branches)].

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 20XX, and profit/loss, (changes in equity) and its cash flows for the year ended on that date.

Basis of our opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Management's Responsibility for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation and presentation of these

standalone financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these standalone financial statements based on our audit.

We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the

Company's preparation of the financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.

Report on Other Legal and Regulatory Requirements

- 1. As required by the Companies (Auditor's Report) Order, 2016 ("the Order") issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in the Annexure A, a statement on the matters specified in the paragraph 3 and 4 of the order.*
- 2. As required by Section 143 (3) of the Act, we report that:*

- (a) *we have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.*
- (b) *in our opinion proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;*
- (c) *the balance sheet, the statement of profit and loss and the cash flow statement dealt with by this Report are in agreement with the books of account;*
- (d) *in our opinion, the aforesaid standalone financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014;*
- (e) *on the basis of the written representations received from the directors as on 31st March 2016 taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2016 from being appointed as a director in terms of Section 164 (2) of the Act;*
- (f) *with respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate report in “Annexure B”; and*
- (g) *with respect to the other matters to be included in the Auditor’s Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:*
 - i. *the Company has disclosed the impact of pending litigations on its financial position in its financial statements.*
 - ii. *the Company has made provision, as required under the applicable law or accounting standards, for material foreseeable losses, if any, on long-term contracts including derivative contracts.*
 - iii. *There has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the Company.*

Annexure - A to the Auditors' Report

The Annexure referred to in Independent Auditors' Report to the members of the Company on the standalone financial statements for the year ended 31 March 2016, we report that:

- (i) (a) *The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets*
- (b) *The Company has a regular programme of physical verification of its fixed assets by which fixed assets are verified in a phased manner over a period of three years. In accordance with this programme, certain fixed assets were verified during the year and no material discrepancies were noticed on such verification. In our opinion, this periodicity of physical verification is reasonable having regard to the size of the Company and the nature of its assets.*
- (c) *According to the information and explanations given to us and on the basis of our examination of the records of the Company, the title deeds of immovable properties are held in the name of the Company.*
- (ii) *The Company is a service company, primarily rendering software services. Accordingly, it does not hold any physical inventories. Thus, paragraph 3(ii) of the Order is not applicable to the Company.*
- (iii) *The Company has granted loans to five bodies corporate covered in the register maintained under section 189 of the Companies Act, 2013 ('the Act').*
 - (a) *In our opinion, the rate of interest and other terms and conditions on which the loans had been granted to the bodies corporate listed in the register maintained under Section 189 of the Act were not, prima facie, prejudicial to the interest of the Company*
 - (b) *In the case of the loans granted to the bodies corporate listed in the register maintained under section 189 of the Act, the borrowers have been regular in the payment of the principal and interest as stipulated.*
 - (c) *There are no overdue amounts in respect of the loan granted to a body corporate listed in the register maintained under section 189 of the Act.*
- (iv) *In our opinion and according to the information and explanations given to us, the Company has complied with the provisions of section 185 and 186 of the Act, with respect to the loans and investments made.*
- (v) *The Company has not accepted any deposits from the public.*
- (vi) *The Central Government has not prescribed the maintenance of cost records under section 148(1) of the Act, for any of the services rendered by the Company.*
- (vii) (a) *According to the information and explanations given to us and on the basis of our examination of the records of the Company, amounts deducted/ accrued in the books of account in respect of undisputed statutory dues including provident fund, income-tax, sales tax, value added tax, duty of customs, service tax, cess and other*

material statutory dues have been regularly deposited during the year by the Company with the appropriate authorities. As explained to us, the Company did not have any dues on account of employees' state insurance and duty of excise.

According to the information and explanations given to us, no undisputed amounts payable in respect of provident fund, income tax, sales tax, value added tax, duty of customs, service tax, cess and other material statutory dues were in arrears as at 31 March 2016 for a period of more than six months from the date they became payable.

- (b) *According to the information and explanations given to us, there are no material dues of duty of customs which have not been deposited with the appropriate authorities on account of any dispute. However, according to information and explanations given to us, the following dues of income tax, sales tax, duty of excise, service tax and value added tax have not been deposited by the Company on account of disputes:*

Name of the statute	Nature of dues	Amount (in Rs)	Period to which the amount relates	Forum where dispute is pending

- (viii) *The Company does not have any loans or borrowings from any financial institution, banks, government or debenture holders during the year. Accordingly, paragraph 3(viii) of the Order is not applicable.*
- (ix) *The Company did not raise any money by way of initial public offer or further public offer (including debt instruments) and term loans during the year. Accordingly, paragraph 3 (ix) of the Order is not applicable.*
- (x) *According to the information and explanations given to us, no material fraud by the Company or on the Company by its officers or employees has been noticed or reported during the course of our audit.*
- (xi) *According to the information and explanations give to us and based on our examination of the records of the Company, the Company has paid/provided for managerial remuneration in accordance with the requisite approvals mandated by the provisions of section 197 read with Schedule V to the Act.*
- (xii) *In our opinion and according to the information and explanations given to us, the Company is not a nidhi company. Accordingly, paragraph 3(xii) of the Order is not applicable.*

- (xiii) According to the information and explanations given to us and based on our examination of the records of the Company, transactions with the related parties are in compliance with sections 177 and 188 of the Act where applicable and details of such transactions have been disclosed in the financial statements as required by the applicable accounting standards.
- (xiv) According to the information and explanations give to us and based on our examination of the records of the Company, the Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year.
- (xv) According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not entered into non-cash transactions with directors or persons connected with him. Accordingly, paragraph 3(xv) of the Order is not applicable.
- (xvi) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act 1934.

Annexure - B to the Auditors' Report

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of ABC Limited ("the Company") as of 31 March 2016 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design,

implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on

Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

(1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding

prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2016, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Appendix 2

Comprehensive Case Studies on CARO 2016

1. *Whether the Nidhi Company has complied with the Net Owned Funds to Deposits in the ratio of 1:20 to meet out the liability and whether the Nidhi Company is maintaining ten per cent unencumbered term deposits as specified in the Nidhi Rules, 2014 to meet out the liability? [Paragraph 3(xii)]*

Ans.

Relevant Provisions

- (a) *This clause requires the auditor to report whether, in the case of a Nidhi Company, net-owned funds to deposit liability ratio is more than 1:20 and the Nidhi Company is maintaining ten per cent unencumbered term deposits as specified in the Nidhi Rules 2014 to meet out the liability.*
- (b) *Section 406(1) of the Act defines “Nidhi” to mean a company which has been incorporated as a Nidhi with the object of cultivating the habit of thrift and savings amongst its members, receiving deposits from, and lending to, its members only, for their mutual benefit, and which complies with such rules as are prescribed by the Central Government for regulation of such class of companies.*
- (c) *It may be noted that Ministry of Corporate Affairs on 31st March 2014, vide its Notification No. GSR 258(E) notified the ‘Nidhi Rules 2014’, which came into force on the first day of April 2014. These Rules apply to Nidhi company incorporated as a Nidhi pursuant to the provisions of Section 406 of the Act and also to the Nidhi companies declared under sub-section (1) of section 620A of the Companies Act 1956.*

Audit Procedures and Reporting

- (d) *It may be noted that Rule 5(1) prescribes the requirements for minimum number of members, net owned fund etc. As per Rule 5(1) every Nidhi shall, within a period of one year from the commencement of these rules, ensure that it has— (i) not less than two hundred members; (ii) net owned funds of ten lakh rupees or more; (iii) unencumbered term deposits of not less than ten per cent of the outstanding deposits as specified in Rule 14; and (iv) ratio of net owned funds to deposits of not more than 1:20. The auditor should note that as such a Nidhi Company can accept deposits not exceeding twenty times of its net owned funds as per last audited balance sheet. Furthermore, as per Rule 14, every Nidhi is to invest and continue to keep invested, in encumbered term deposits with a Scheduled commercial bank (other than a co-operative bank or a regional rural bank), or post office deposits in its own name an amount which shall not be less than ten per cent of the deposits outstanding at the close of business on the last working day of the second preceding month, which needs to be examined.*
- (e) *As per Rule 3(d) Net Owned Funds are defined as the aggregate of paid up equity share capital and free reserves as reduced by accumulated losses and intangible assets*

appearing in the last audited balance sheet: Provided that, the amount representing the proceeds of issue of preference shares, shall not be included for calculating Net Owned Funds.

- (f) *(A Nidhi company can accept fixed deposits, recurring deposits accounts and savings deposits from its members in accordance with the directions notified by the Central Government. The aggregate of such deposits is referred to as “deposit liability”.*
- (g) *The auditor should ask the management to provide the computation of the deposit liability and net owned funds on the basis of the requirements contained herein above. This would enable him to verify that the ratio of deposit liability to net owned funds is in accordance with the requirements prescribed in this regard. The auditor should verify the ratio using the figures of net owned funds and deposit liability computed in accordance with what is stated above. The comments of the auditor should be based upon such a statement provided by the management and verification of the same by the auditor.*
- (h) *The auditor may report, incorporating the following as at the balance sheet date:- (i) In case of shortfall in the ratio of net owned funds to the deposits, report the amount of shortfall and state the actual ratio of net owned funds to the deposits. (ii) In case of shortfall with regard to the minimum amount of 10% as unencumbered term deposits, as specified in Nidhi Rules 2014, report the amount thereof.*
2. *Whether any fraud by the company or any fraud on the company by its officers or employees has been noticed or reported during the year; If yes, the nature and the amount involved is to be indicated? [Paragraph 3(x)]*

Ans.

Relevant Provisions

- (a) *This clause requires the auditor to report whether any fraud by the company or any fraud on the company by its officers or employees has been noticed or reported during the year. If yes, the auditor is required to state the amount involved and the nature of fraud. The clause does not require the auditor to discover such frauds. The scope of auditor’s inquiry under this clause is restricted to frauds ‘noticed or reported’ during the year. The use of the words “noticed or reported” indicates that the management of the company should have the knowledge about the frauds by the company or on the company by its Officer and employees that have occurred during the period covered by the auditor’s report. It may be noted that this clause of the Order, by requiring the auditor to report whether any fraud by the company or on the company by its Officer or employees has been noticed or reported, does not relieve the auditor from his responsibility to consider fraud and error in an audit of financial statements. In other words, irrespective of the auditor’s comments under this clause, the auditor is also required to comply with the requirements of Standard on Auditing (SA) 240, “The Auditor’s Responsibility Relating to Fraud in an Audit of Financial Statements”. In this*

context, the auditor should also have regard to the Guidance Note on Reporting on Fraud under Section 143(12) of the Companies Act, 2013, issued by ICAI.

- (b) The term "fraud" refers to an intentional act by one or more individuals among management, those charged with governance, employees, involving the use of deception to obtain an unjust or illegal advantage. Although fraud is a broad legal concept, the auditor is concerned with fraudulent acts that cause a material misstatement in the financial statements. Misstatement of the financial statements may not be the objective of some frauds. Auditors do not make legal determinations of whether fraud has actually occurred. Fraud involving one or more members of management or those charged with governance is referred to as "management fraud"; fraud involving only employees including officers of the entity is referred to as "employee fraud". In either case, there may be collusion with third parties outside the entity. In fact, generally speaking, the "management fraud" can be construed as "fraud by the company".*
- (c) Two types of intentional misstatements are relevant to the auditor's consideration of fraud - misstatements resulting from fraudulent financial reporting and misstatements resulting from misappropriation of assets.*
- (d) Fraudulent financial reporting involves intentional misstatements or omissions of amounts or disclosures in financial statements to deceive financial statement users. Fraudulent financial reporting may involve: (i) Deception such as manipulation, falsification, or alteration of accounting records or supporting documents from which the financial statements are prepared. (ii) Misrepresentation in, or intentional omission from, the financial statements of events, transactions or other significant information. (iii) Intentional misapplication of accounting principles relating to measurement, recognition, classification, presentation, or disclosure.*
- (e) Misappropriation of assets involves the theft of an entity's assets. Misappropriation of assets can be accomplished in a variety of ways (including embezzling receipts, stealing physical or intangible assets, or causing an entity to pay for goods and services not received); it is often accompanied by false or misleading records or documents in order to conceal the fact that the assets are missing.*
- (f) Fraudulent financial reporting may be committed by the company because management is under pressure, from sources outside or inside the entity, to achieve an expected (and perhaps unrealistic) earnings target particularly when the consequences to management of failing to meet financial goals can be significant. The auditor must appreciate that a perceived opportunity for fraudulent financial reporting or misappropriation of assets may exist when an individual believes internal control could be circumvented, for example, because the individual is in a position of trust or has knowledge of specific weaknesses in the internal control system. Audit Procedures and Reporting*

Audit Procedures and Reporting

- (g) *While planning the audit, the auditor should discuss with other members of the audit team, the susceptibility of the company to material misstatements in the financial statements resulting from fraud. While planning, the auditor should also make inquiries of management to determine whether management is aware of any known fraud or suspected fraud that the company is investigating.*
- (h) *The auditor should examine the reports of the internal auditor with a view to ascertain whether any fraud has been reported or noticed by the management. The auditor should examine the minutes of the audit committee, if available, to ascertain whether any instance of fraud pertaining to the company has been reported and actions taken thereon. The auditor should enquire from the management about any frauds on the company that it has noticed or that have been reported to it. The auditor should also discuss the matter with other employees including officers of the company. The auditor should also examine the minute book of the board meeting of the company in this regard.*
- (i) *The auditor should obtain written representations from management that: (i) it acknowledges its responsibility for the implementation and operation of accounting and internal control systems that are designed to prevent and detect fraud and error; (ii) it believes the effects of those uncorrected misstatements in financial statements, aggregated by the auditor during the audit are immaterial, both individually and in the aggregate, to the financial statements taken as a whole. A summary of such items should be included in or attached to the written representation; (iii) it has disclosed to the auditor all significant facts relating to any frauds or suspected frauds known to management that may have affected the entity; and (iv) it has disclosed to the auditor the results of its assessment of the risk that the financial statements may be materially misstated as a result of fraud.*
- (j) *Because management is responsible for adjusting the financial statements to correct material misstatements, it is important that the auditor obtains written representation from management that any uncorrected misstatements resulting from fraud are, in management's opinion, immaterial, both individually and in the aggregate. Such representations are not a substitute for obtaining sufficient appropriate audit evidence. In some circumstances, management may not believe that certain of the uncorrected financial statement misstatements aggregated by the auditor during the audit are misstatements. For that reason, management may want to add to their written representation words such as, "We do not agree that items constitute misstatements because [description of reasons]."*
- (k) *The auditor should consider if any fraud has been reported by them during the year under section 143(12) of the Act and if so whether that same would be reported under this Clause. It may be mentioned here that section 143(12) of the Act requires the auditor has reasons to believe that a fraud is being committed or has been committed by an employee or officer. In such a case the auditor needs to report to the Central Government*

or the Audit Committee. However, this Clause will include only the reported frauds and not suspected fraud.

- (l) *Where the auditor notices that any fraud by the company or on the company by its officers or employees has been noticed by or reported during the year, the auditor should, apart from reporting the existence of fraud, also required to report, the nature of fraud and amount involved. For reporting under this clause, the auditor may consider the following: (i) This clause requires all frauds noticed or reported during the year shall be reported indicating the nature and amount involved. As specified the fraud by the company or on the company by its officers or employees are only covered. (ii) Of the frauds covered under section 143(12) of the Act, only noticed frauds shall be included here and not the suspected frauds. (iii) While reporting under this clause with regard to the nature and the amount involved of the frauds noticed or reported, the auditor may also consider the principles of materiality outlined in Standards on Auditing.*
3. *Whether the company has entered into any noncash transactions with directors or persons connected with him and if so, whether the provisions of section 192 of Companies Act, 2013 have been complied with? [Paragraph 3(xv)]*

Ans.

Relevant Provisions:

- (a) *Section 192 of the Act deals with restriction on noncash transactions involving directors or persons connected with them. The section prohibits the company from entering into following types of arrangements unless it meets the conditions laid out in the said section:*
- i. An arrangement by which a director of the company or its holding, subsidiary or associate company or a person connected with such director acquires or is to acquire assets for consideration other than cash, from the company.*
 - ii. An arrangement by which the company acquires or is to acquire assets for consideration other than cash, from such director or person so connected.*
- (b) *Arrangements, as discussed herein above, can only be entered by the company on fulfillment of the conditions laid out in Section 192 of the Act which are as under:*
- I. The company should have obtained prior approval for such arrangement through a resolution of the company in general meeting.*
 - II. In case the concerned director or the person connected therewith, is also a director of its holding company, a similar approval should have been obtained by the holding company through a resolution at its general meeting.*
- (c) *The reporting requirements under this clause are in two parts. The first part requires the auditor to report on whether the company has entered into any non-cash transactions with the directors or any persons connected with such director/s. The second part of the clause requires the auditor to report whether the provisions of section 192 of the Act*

have been complied with. Therefore, the second part of the clause becomes reportable only if the answer to the first part is in affirmative.

- (d) In other words, such transactions involving change in the assets or liabilities of a company but not involving “cash” or cash equivalents” as defined under Accounting Standard (AS) 3, “Cash Flow Statement” may be construed as non-cash transactions. At this point, it may be appropriate to also refer to the definition and discussion on “non-cash transactions” & “cash and cash equivalents”, as given in AS 3.
- (e) There may be a situation where the acquisition of the asset takes place in one year and the corresponding liability is created in the financial statements, the corresponding settlement in the following year. The said transaction will not be considered as non-cash transaction. Further, mergers under Court schemes would be entered into subject to requisite approvals of Court etc., would not be considered non-cash transactions.
- (f) The term “person connected with the director” has not been defined in the Act, or the Rules thereunder. Instead, the term “to any other person in whom the director is interested” is defined in the Explanation to sub section
- (1) of section 185 of the Act, which is reproduced as under and may be used as the reference point for reporting under this clause.
- “(a) any director of the lending company, or of a company which is its holding company or any partner or relative of any such director;
- (b) any firm in which any such director or relative is a partner;
- (c) any private company of which any such director is a director or member;
- (d) any body corporate at a general meeting of which not less than twenty-five per cent. of the total voting power may be exercised or controlled by any such director, or by two or more such directors, together; or (e) any body corporate, the Board of directors, managing director or manager, whereof is accustomed to act in accordance with the directions or instructions of the Board, or of any director or directors, of the lending company.”
- (g) Section 2(77) of the Companies Act, 2013 read with Rule 4 of the Companies (Specification of Definition Details) Rules, 2014 defines the term “relative”. As per the aforesaid section 2(77), “Relative, with reference to any person, means anyone who is related to another, if –
- (i) they are members of a Hindu Undivided Family;
- (ii) they are husband and wife; or
- (iii) one person is related to the other in such manner as may be prescribed” As per Rule 4 of the Companies (Specification of Definition Details) Rules, 2014, a person shall be deemed to be the relative of another, if he or she is related to another in the following manner, namely –
- (i) Father, including step father

- (ii) *Mother, including step mother*
 - (iii) *Son, including step son*
 - (iv) *Son's wife*
 - (v) *Daughter*
 - (vi) *Daughter's husband*
 - (ii) *Brother, including step brother*
 - (viii) *Sister, including step sister*
- (h) *The term "acquire" simply means to come into possession of something. A thing that cannot be sold cannot be acquired. Thus, an acquisition would necessarily involve existence of two parties and a transfer of rights and/or obligations in a thing. In the context of section 192 of the Act, this transfer is between the company and the director and/or a person connected with a director. Such "director" is not restricted to being a director of the concerned company, but extends to director of a holding company, subsidiary or associate of the company under question.*
- (i) *As provided in section 192, the acquisition by/from the company has to be that of an "asset". Further, the term assets should be construed to have the same meaning as described in the Framework for Preparation and Presentation of Financial Statements, issued by the Institute of Chartered Accountants of India. The auditor would need to evaluate whether the subject matter of acquisition by/ from the company satisfies the characteristic of an "asset".*

Audit Procedures and Reporting

- (j) *For reporting on the first leg of the reporting clause, the starting point of the auditor's procedures could be obtaining a management representation as to whether the company has undertaken any non-cash transactions with the directors or persons connected with the directors, as envisaged in section 192(1) of the Act. The auditor would need to corroborate the management representation with sufficient appropriate audit evidence. A scrutiny of the following books of account, records and documents could provide source of such audit evidence to the auditor as to the existence of such non cash transactions as well as persons connected with the Directors:*

<i>Persons connected with Director</i>	<i>Acquisition by/ From Company</i>
<i>Form No. MBP 1, Notice of Interest by Director, filed pursuant to the Companies (Meetings of Board and Its Powers) Rules, 2014 [Ref: Sec 184(1) and Rule 9(1)]</i>	<i>Form No. MBP 2, Register of Loans, Guarantee, Security and Acquisition Made by the Company, filed pursuant to the Companies (Meetings of Board and Its Powers) Rules, 2014 [Ref: Sec 186(9) and Rule 12(1)]</i>
	<i>Form No. MBP 4, Register of Contracts with Related Party and Contracts and</i>

	<i>Bodies etc. in which Directors are Interested, filed pursuant to the Companies (Meetings of Board and Its Powers) Rules, 2014 [Ref: Sec 189(1) and Rule 16(1)]</i>
	<i>Movements in the Fixed Asset Register</i>
	<i>Minutes book of the General Meeting and Meetings of Directors</i>
	<i>Report on Annual General Meeting pursuant to Companies (Management and Administration) Rules, 2014 {Ref Sec 121(1) and Rule 31(2)}</i>

- (k) *The above documents and records would provide evidence of any such non-cash transactions that have actually taken place. The language of section 192(1) also uses the term “is to acquire” in the context of such transactions, indicating the existence of intention to acquire. The management may be requested to provide details of its intention to enter into transactions covered under section 192, after the date of the financial statements under audit. The minutes of the meetings of the Board of Directors and the Audit Committee may provide evidence of such intention. Besides, a scrutiny of the information for subsequent period as contained in the aforesaid records and documents may provide corroborative audit evidence of such intention having existed as at the date of the auditor’s report.*
- (l) *Where the company has entered into/is to enter into any non-cash transactions as discussed above, the auditor would make a report to that effect under this clause. The second leg of the clause requires the auditor to report whether the Company has complied with the provisions of section 192 in this regard. Section 192(1) and (2) envisage the following compliances in respect of such transactions:*
- (i) *The company should have obtained a prior approval for such arrangement by a resolution in the General Meeting.*
 - (ii) *If the concerned Director or connected person is a director of the company’s holding company, the latter too should have obtained a similar prior approval for the arrangement by a resolution at its General Meeting.*
 - (iii) *Notice for approval of the resolution should contain details of the arrangement along with the value of assets involved duly calculated by a registered valuer. The auditor should check compliance with Section 192(2) and verify the notice of the General Meeting that it includes particulars of arrangement along with the value of the assets involved such arrangements. The said value should be calculated by the register valuer.*

- (m) *In case where the concerned director/connected person is also a director of the holding company, the auditor would need to check whether the holding company has complied with the requirements. For this purpose, the auditor would need to obtain a management representation letter from the holding company through the management of the auditee company.*

Suggested paragraph on reporting:

According to the information and explanations given to us, the Company has entered into non-cash transactions with one of the directors/ person connected with the director during the year, by the acquisition of assets by assuming directly related liabilities, which in our opinion is covered under the provisions of Section 192 of the Act, and for which approval has not yet been obtained in a general meeting of the Company.

Appendix 3**Key Aspects discussed in Guidance Note on Reporting of Fraud under section 143(12) of the Companies Act 2013****1. What is Duty to report on frauds under Companies Act?**

As per sub-section (12) of section 143 of the Companies Act, 2013,

- if an auditor of a company
- in the course of the performance of his duties as auditor,
- has reason to believe that
- an offence of fraud involving such amount or amounts as may be prescribed,
- is being or has been committed in the company
- by its officers or employees,
- the auditor shall report the matter to the Central Government
- within such time and in such manner as may be prescribed.

2. What is the monetary threshold prescribed for such reporting?

Case-1 Fraud amounting to 1 crore or more:- If auditor has reason to believe that an offence of fraud, which involves or is expected to involve individually an amount of ₹ 1 crore or above, is being or has been committed against the company by its officers or employees, the auditor shall report the matter to the Central Government.

The manner of reporting the matter to the Central Government is as follows:

- (a) **the auditor shall report the matter to the Board or the Audit Committee, as the case may be, immediately but not later than 2 days of his knowledge of the fraud, seeking their reply or observations within 45 days;**
- (b) **on receipt of such reply or observations, the auditor shall forward his report and the reply or observations of the Board or the Audit Committee along with his comments (on such reply or observations of the Board or the Audit Committee) to the Central Government within 15 days from the date of receipt of such reply or observations;**
- (c) **in case the auditor fails to get any reply or observations from the Board or the Audit Committee within the stipulated period of 45 days, he shall forward his report to the Central Government along with a note containing the details of his report that was earlier forwarded to the Board or the Audit Committee for which he has not received any reply or observations;**
- (d) **the report shall be sent to the Secretary, Ministry of Corporate Affairs in a sealed cover by Registered Post with Acknowledgement Due or by Speed Post followed by an e-mail in confirmation of the same;**
- (e) **the report shall be on the letter-head of the auditor containing postal address, e-mail**

address and contact telephone number or mobile number and be signed by the auditor with his seal and shall indicate his Membership Number; and

(f) the report shall be in the form of a statement as specified in Form ADT-4.

Case 2 Fraud amounting to less than 1 Crore.:- *Sub-section (12) of section 143 of the Companies Act, 2013 further prescribes that in case of a fraud involving lesser than the specified amount [i.e. less than ₹ 1 crore], the auditor shall report the matter to the audit committee constituted under section 177 or to the Board in other cases within such time and in such manner as may be prescribed.*

In this regard, sub-rule (3) of Rule 13 of the Companies (Audit and Auditors) Rules, 2014 states that in case of a fraud involving lesser than the amount specified in sub-rule (1) [i.e. less than ₹1 crore], the auditor shall report the matter to Audit Committee constituted under section 177 or to the Board immediately but not later than 2 days of his knowledge of the fraud and he shall report the matter specifying the following:

- (a) Nature of Fraud with description;*
- (b) Approximate amount involved; and*
- (c) Parties involved.*

3. What are disclosure requirements of FRAUD in Board's report?

Sub-section (12) of section 143 of the Companies Act, 2013 further prescribes that the

- companies, whose auditors have reported frauds under this sub-section (12)*
- to the audit committee or the Board,*
- but not reported to the Central Government,*
- shall disclose the details about such frauds in the Board's report*
- in such manner as may be prescribed.*

In this regard, sub-rule (4) of Rule 13 of the Companies (Audit and Auditors) Rules, 2014 states that the auditor is also required to disclose in the Board's Report the following details of each of the fraud reported to the Audit Committee or the Board under sub-rule (3) during the year:

- (a) Nature of Fraud with description;*
- (b) Approximate Amount involved;*
- (c) Parties involved, if remedial action not taken; and*
- (d) Remedial actions taken.*

Appendix 4**Key Aspects discussed in Guidance Note on Reporting under Section 143(3) (f) and (h) of the Companies Act, 2013**

1. What are the reporting requirements under section 143(3)(f) and (h) of the Companies Act, 2013?

According to Section 143 (3) lays down certain matters required to be reported upon by the auditor in his report. Sub-section (3) of section 143 of Act provides as follows:

"(3) The auditor's report shall also state -

- (a) whether he has sought and obtained all the information and explanations which to the best of his knowledge and belief were necessary for the purpose of his audit and if not, the details thereof and the effect of such information on the financial statements;**
- (b) whether, in his opinion, proper books of account as required by law have been kept by the company so far as appears from his examination of those books and proper returns adequate for the purposes of his audit have been received from branches not visited by him;**
- (c) whether the report on the accounts of any branch office of the company audited under sub-section (8) by a person other than the company's auditor has been sent to him under the proviso to that sub-section and the manner in which he has dealt with it in preparing his report;**
- (d) whether the company's balance sheet and profit and loss account dealt with in the report are in agreement with the books of account and returns;**
- (e) whether, in his opinion, the financial statements comply with the accounting standards;**
- (f) the observations or comments of the auditors on financial transactions or matters which have any adverse effect on the functioning of the company;**
- (g) whether any director is disqualified from being appointed as a director under sub-section (2) of section 164;**
- (h) any qualification, reservation or adverse remark relating to the maintenance of accounts and other matters connected therewith;**
- (i) whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls;**
- (j) such other matters as may be prescribed.**

2. What should be considered while reporting under clause (f) of subsection 3 of section 143:- "the observations or comments of the auditors on financial transactions or matters which have any adverse effect on the functioning of the company"?

- *According to the Guidance note:- The words “observations” or “comments” as appearing in clause (f) of section 143(3) are construed to have the same meaning as referring to “emphasis of matter paragraphs, situations leading to modification in the auditor’s report. Accordingly, the auditor should have made an “observation” or “comment” in the auditor’s report in order to determine the need to report under clause (f) of section 143(3). Therefore, only such “observations” or “comments” of the auditors on financial transactions or matters that have been made by the auditor in the auditor’s report which have an adverse effect on the functioning of the company are required to be reported under this clause.*
- *It should be noted that there is no change in the objective and scope of an audit of financial statements because of inclusion of clause (f) in sub-section (3) of section 143 of the Act.*

3. Whether every qualification, disclaimer, adverse opinion, or emphasis of matter para required to be included in above reporting?

According to this Guidance Note - The auditor expresses his opinion on the true and fair view presented by the financial statements through his report which may be modified in certain circumstances. However, the auditor would now have to evaluate the subject matters leading to modification of the audit report or emphasis of matter in the auditor’s report to make judgment as to which of them has an adverse effect on the functioning of the company within the overall context of audit of financial statements of the company. Only such matters which, in the opinion of the auditor, have an adverse effect on the functioning of the company should be reported under this clause. Hence such qualifications or adverse opinions or disclaimer of opinion or emphasis of matters of the auditor, which do not deal with matters that have adverse effect on the functioning of the company, need not be reported under this clause.

4. Illustrate which type of modifications in auditor’s report will require to report under 143(3)(f) and which are not?

Examples of emphasis of matter which may have an adverse effect on the functioning of the company include situations where:

- *The going concern assumption is appropriate but there are several factors leading to a material uncertainty that may cast a significant doubt about the Company’s ability to continue as a going concern; or*
- *a material uncertainty regarding the outcome of a litigation wherein an unfavourable decision could result in a significant outflow of resources for the company, etc.*

Examples of emphasis of matter which may not have an adverse effect on the functioning of the company include a situation where there is an emphasis of matter:

- *on managerial remuneration which is subject to the approval of the Central Government;*
- *relating to accrual of a contractually receivable claim based on management estimate where the ultimate realisation could be different from the amount accrued;*

- *on frauds that have been dealt with in the financial statements of the company and would not have any continuing effect on the financial statements*

5. What is scope of auditor while reporting under 143(3)(h) “any qualification, reservation or adverse remark relating to the maintenance of accounts and other matters connected therewith”?

According to Guidance Note, the words “qualification”, “adverse remark” and “reservation” used in clause (h) of section 143(3) should be considered to be similar to the terms “qualified opinion”, “adverse opinion” and “disclaimer of opinion”, respectively, referred to in SA 705 “Modifications to the Opinion in the Independent Auditor’s Report”. Hence, the auditor would need to report under clause (h) of section 143(3) any matter that causes a qualification, adverse remark or disclaimer of opinion on the financial statements since such matters will or possibly will have an effect on the books of account maintained by the company. It should be noted that the auditor may have made an observation on maintenance of cost records under clause (b) of section 143(3) and this may not have had an effect on the financial statements of the company or the auditor’s opinion on the financial statements. Further, any material weakness in internal financial controls that is reported by the auditor under clause (i) of section 143(3) may not have an impact on the maintenance of books of account if such material weakness did not result in a modification to the opinion on the financial statements of the company. However, if the material weakness in internal financial controls resulted in a modification to the audit opinion on the financial statements, then such modification may be covered for reporting under clause (h) of section 143(3).

Appendix 5

Key Aspects discussed in Guidance Note on Internal Financial Control over Financial Reporting

1. What is Internal Financial Control (IFC)? (Sec 134)

As per Section 134 of the Companies Act 2013, the term Internal Financial Controls means the policies and procedures adopted by the company for ensuring:

- Orderly and efficient conduct of its business, including adherence to Company's policies,
- Safeguarding of its assets,
- Prevention and detection of frauds and errors,
- Accuracy and completeness of the accounting records, and
- Timely preparation of reliable financial information.

2. What is Internal Controls over financial Reporting (ICFR)?

As per Guidance Note issued by ICAI on Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (September, 2015), "Internal Financial Controls Over Financial Reporting (ICFR) shall mean:

"A Process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles". A Company's internal financial control over financial reporting includes those policies and procedures:

Pertain to the maintenance of the records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company:

It provides reasonable assurance that transactions are recorded as necessary to permit preparation of financial statement in accordance with generally accepted accounting principles, and those receipts and expenditures of the company are being made only in accordance with authorizations of management and director of the company.

Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effects of the financial statement.

3. Which provision of Companies Act requires such IFC and Reporting? Section 134:

In the case of a listed company, the Directors' Responsibility states that directors, have laid down IFC to be followed by the company and that such controls are adequate and operating effectively.

Section 143:

The auditor's report should also state whether the company has adequate IFC system in place and the operating effectiveness of such controls

Section 177:

Audit committee may call for comments of auditors about internal control systems before their submission to the Board and may also discuss any related issues with the internal and statutory auditors and the management of the company.

Schedule IV

The independent directors should satisfy themselves on the integrity of financial information and ensure that financial controls and systems of risk management are robust and defensible.

Rule 8(5)(viii) of the Companies (Accounts) Rules, 2014 –

The director's report should contain details in respect of adequacy of internal financial controls with reference to the financial reporting.

4. To whom does this apply?

The guidance note clarifies that reporting on ICFR by auditors will be applicable to both listed and unlisted companies, including small and one person companies. This is in line with the requirements of section 143(3)(i) of the Companies Act, 2013.

Furthermore, it states that auditors will have to report on ICFR in respect of both stand alone and consolidated financial statements.

5. When does this apply and for financial statements of which period?

The guidance note clarifies that auditors will have to report whether a company has an adequate ICFR system in place and whether the same was operating effectively as at the balance sheet date of 31 March 2016. In practice, this will mean that when forming its audit opinion on ICFR, the auditor will surely test transactions during the financial year ending 31 March 2016 and not just as at the balance sheet date, though the extent of testing at or near the balance sheet date may be higher. If control issues or deficiencies are identified during the interim period and are remediated before the balance sheet date, then the auditor may still be able to express an unqualified opinion on the ICFR. This is particularly important for companies for the current year ending 31 March 2016, as it will be the first year when auditor validation of ICFR will be required.

6. What is extent of reporting?

The auditor needs to obtain reasonable assurance to state whether an adequate internal financial controls system was maintained and whether such internal financial controls system operated effectively in the company in all material respects with respect to financial reporting only. The auditor's opinion therefore does not assure, for example, the future viability of the entity nor the efficiency or effectiveness with which management has conducted the affairs of the entity.

9

Audit Committee and Corporate Governance

9.1 Introduction

Corporate Governance is the system by which companies are directed and governed by the management. Through use of ethical business processes, the management is able to ensure accountability, transparency and fairness in the company operations, thereby ensuring that the interests of shareholders and all other stakeholders are protected. The Board of Directors are responsible for governance of their companies.

9.2 Corporate Governance

The word 'Corporate' relates to a large business entity or a large company. Similarly, the word 'Governance' means exercise of authority, direction or control. Thus, the concept of 'Corporate Governance' is the system by which the management of a business entity directs and controls the activities in the best interest of the stakeholders. Issues addressed in the LODR (Listing Obligations and Disclosure Requirements) Regulations regarding corporate governance are discussed in 9.3.1.

*Fig.: What is Corporate Governance?**

9.3 The Legal Framework

The Securities and Exchange Board of India (SEBI) issued circular no. CIR/CFD/POLICY CELL/2/2014 dated April 17, 2014 to all recognised stock exchanges, making amendments to Clause 35B and Clause 49 of the Equity Listing Agreement, with the intent to align the Listing Agreement with the provisions of the Companies Act, 2013, to make the corporate governance framework more effective and to adopt best practices on corporate governance. Further amendments were made to Clause 49 of the Listing Agreement vide circular no. CIR/CFD/POLICY CELL/7/2014 dated September 15, 2014.

** Source : mark wignall*

Since a listing agreement is a statutorily mandated contract between the listed entity and the stock exchange where it is listed, it does not have the authority of law behind it. Hence, on September 2, 2015, SEBI issued the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("LODR Regulations"), with the objective of streamlining and consolidating the provisions of various listing agreements in operation for different segments of the capital markets, such as equity shares, preference shares, debt instruments, units of mutual funds, Indian depository receipts, securitised debt instruments and any other securities that the SEBI may specify.

The LODR Regulations are divided into two parts - the substantive provisions are incorporated in the main body while the procedural requirements are incorporated in the form of schedules. The LODR Regulations also capture the corporate governance principles found in Clause 49 of SEBI's Model Listing Agreement. It may be noted that the LODR Regulations deal with only post-listing requirements and exclude all pre-listing requirements. Needless to add, the above-mentioned circulars stand rescinded.

Certain amendments to the LODR Regulations have been made vide SEBI (Listing Obligations and Disclosure Requirements) (Amendment) Regulations, 2016, w.e.f. April 1, 2016. The LODR Regulations and the amendments made thereto are collectively referred to as LODR Regulations hereinbelow.

9.3.1 Issues of Corporate Governance

Issues addressed in the LODR Regulations regarding corporate governance are:

- (i) Responsibilities and key functions of the Board, its composition, compensation and disclosures;
- (ii) Code of Conduct and vigil mechanism;
- (iii) Composition, meetings, powers, role and responsibilities of the Audit Committee which is an important pillar of corporate governance;
- (iv) Management of subsidiary companies;
- (v) Procedures related to risk management;
- (vi) Disclosures on important issues regarding related party transactions, accounting treatment, etc.;
- (vii) Content of management discussion and analysis;
- (viii) Information to shareholders;
- (ix) Compliance Certificate by the CEO and CFO;
- (x) Compliance Certificate from either the auditors or practising company secretaries regarding compliance of conditions on corporate governance.

9.3.2 Applicability of LODR Regulations [Regulation 3]

Unless otherwise provided, these regulations shall apply to the listed entity who has listed any of the following designated securities on recognised stock exchange(s):

9.3 Advanced Auditing and Professional Ethics

- (a) *specified securities listed on main board or SME Exchange or institutional trading platform;*
- (b) *non-convertible debt securities, non-convertible redeemable preference shares, perpetual debt instrument, perpetual non-cumulative preference shares;*
- (c) *Indian depository receipts;*
- (d) *securitised debt instruments;*
- (e) *units issued by mutual funds;*
- (f) *any other securities as may be specified by the Board.*

9.4 Audit Committee under LODR Regulations

The summarised requirements of corporate governance are discussed below:

9.4.1 Qualified and Independent Audit Committee [Regulation 18 (1)]

Every listed entity shall constitute a qualified and independent audit committee in accordance with the terms of reference, subject to the following:

1. *The Audit Committee shall have minimum three directors as members. Two-thirds of the members of audit committee shall be independent directors.*
2. *All members of Audit Committee shall be financially literate and at least one member shall have accounting or related financial management expertise.*

Explanation (i): *The term “financially literate” means the ability to read and understand basic financial statements i.e. balance sheet, profit and loss account, and statement of cash flows.*

Explanation (ii): *A member will be considered to have accounting or related financial management expertise if he or she possesses experience in finance or accounting, or requisite professional certification in accounting, or any other comparable experience or background which results in the individual’s financial sophistication, including being or having been a chief executive officer, chief financial officer or other senior officer with financial oversight responsibilities.*

3. *The Chairperson of the Audit Committee shall be an independent director and he shall be present at Annual General Meeting to answer shareholder queries;*
4. *The Company Secretary shall act as the secretary to the committee.*
5. *The Audit Committee at its discretion shall invite the finance director or the head of the finance function, head of internal audit and a representative of the statutory auditor and any other such executives to be present at the meetings of the committee; provided that occasionally, the Audit Committee may meet without the presence of any executives of the listed entity.*

9.4.2 Meeting of Audit Committee [Regulation 18 (2)]

The Audit Committee shall meet at least four times in a year and not more than one hundred and twenty days shall lapse between two meetings. The quorum shall be either two members or one third of the members of the Audit Committee whichever is greater, but there should be a minimum of two independent directors present.

9.4.3 Powers of Audit Committee [Regulation 18 (2)]

The Audit Committee shall have powers, which should include the following:

- (1) To investigate any activity within its terms of reference.*
- (2) To seek information from any employee.*
- (3) To obtain outside legal or other professional advice.*
- (4) To secure attendance of outsiders with relevant expertise, if it considers necessary.*

It may be noted that the powers mentioned above are only illustrative and not exhaustive.

The auditor should check whether the terms of reference of the Audit Committee have been suitably framed mentioning the above powers. It is mandatory for the above-mentioned four powers to be vested in the Audit Committee. The Board may delegate/vest further powers to the committee.

9.4.4 Role of Audit Committee [Part C (A) of Schedule II]

The role of the Audit Committee shall include the following:

- 1. Oversight of the listed entity's financial reporting process and the disclosure of its financial information to ensure that the financial statement is correct, sufficient and credible;*
- 2. Recommendation for appointment, remuneration and terms of appointment of auditors of the listed entity;*
- 3. Approval of payment to statutory auditors for any other services rendered by the statutory auditors;*
- 4. Reviewing, with the management, the annual financial statements and auditor's report thereon before submission to the Board for approval, with particular reference to:*
 - (a) Matters required to be included in the Director's Responsibility Statement to be included in the Board's report in terms of clause (c) of sub-section 3 of section 134 of the Companies Act, 2013;*

- (b) Changes, if any, in accounting policies and practices and reasons for the same;*
 - (c) Major accounting entries involving estimates based on the exercise of judgment by management;*
 - (d) Significant adjustments made in the financial statements arising out of audit findings;*
 - (e) Compliance with listing and other legal requirements relating to financial statements;*
 - (f) Disclosure of any related party transactions;*
 - (g) Modified opinion(s) in the draft audit report;*
- 5. Reviewing, with the management, the quarterly financial statements before submission to the Board for approval;*
 - 6. Reviewing, with the management, the statement of uses/application of funds raised through an issue (public issue, rights issue, preferential issue, etc.), the statement of funds utilized for purposes other than those stated in the offer document/prospectus/ notice and the report submitted by the monitoring agency monitoring the utilisation of proceeds of a public or rights issue, and making appropriate recommendations to the Board to take up steps in this matter;*
 - 7. Reviewing and monitoring the auditor's independence and performance, and effectiveness of audit process;*
 - 8. Approval or any subsequent modification of transactions of the listed entity with related parties;*
 - 9. Scrutiny of inter-corporate loans and investments;*
 - 10. Valuation of undertakings or assets of the listed entity, wherever it is necessary;*
 - 11. Evaluation of internal financial controls and risk management systems;*
 - 12. Reviewing, with the management, performance of statutory and internal auditors, adequacy of the internal control systems;*
 - 13. Reviewing the adequacy of internal audit function, if any, including the structure of the internal audit department, staffing and seniority of the official heading the department, reporting structure coverage and frequency of internal audit;*
 - 14. Discussion with internal auditors of any significant findings and follow up there on;*
 - 15. Reviewing the findings of any internal investigations by the internal auditors into matters where there is suspected fraud or irregularity or a failure of internal control systems of a material nature and reporting the matter to the Board;*

16. *Discussion with statutory auditors before the audit commences, about the nature and scope of audit as well as post-audit discussion to ascertain any area of concern;*
17. *To look into the reasons for substantial defaults in the payment to the depositors, debenture holders, shareholders (in case of non-payment of declared dividends) and creditors;*
18. *To review the functioning of the Whistle Blower mechanism;*
19. *Approval of appointment of Chief Financial Officer after assessing the qualifications, experience and background, etc. of the candidate;*
20. *Carrying out any other function as is mentioned in the terms of reference of the Audit Committee.*

If the company has set up an Audit Committee as per section 177 of the Companies Act, 2013, the company must ensure that the said Audit Committee has such additional functions / features as are contained in the LODR Regulations.

9.5 Audit Committee under Section 177 of the Companies Act, 2013

- (i) *As per section 177 read with Rule 6 of the Companies (Meetings of Board and its Powers) Rules, 2014, every listed company and the following classes of companies shall constitute an Audit Committee -*
 - (a) *all public companies with a paid up capital of ten crore rupees or more;*
 - (b) *all public companies having turnover of one hundred crore rupees or more;*
 - (c) *all public companies, having in aggregate, outstanding loans or borrowings or debentures or deposits exceeding fifty crore rupees or more.*

Explanation- The paid up share capital or turnover or outstanding loans, or borrowings or debentures or deposits, as the case may be, as existing on the date of last audited Financial Statements shall be taken into account for the purposes of this rule.

Where a company is required to constitute an Audit Committee under section 177, all appointments, including the filling of a casual vacancy of an auditor under this section shall be made after taking into account the recommendations of such committee.

- (ii) *The Audit Committee shall consist of a minimum of three directors with independent directors forming a majority. It may be noted that majority of members of Audit Committee including its Chairperson shall be persons with ability to read and understand, the financial statement.*

9.6 Functions of the Audit Committee

The Audit Committee performs various important functions like investigating the matters referred by board, discuss about internal control system etc. These sub-

sections of Section 177 are reproduced hereunder which specify the terms of reference as well as functions of the Audit Committee:

Sub Section 4: “Every Audit Committee shall act in accordance with the terms of reference specified in writing by the Board which shall inter alia, include,—

- (i) the recommendation for appointment, remuneration and terms of appointment of auditors of the company;
- (ii) review and monitor the auditor’s independence and performance, and effectiveness of audit process;
- (iii) examination of the financial statement and the auditors’ report thereon;
- (iv) approval or any subsequent modification of transactions of the company with related parties;

However, the Audit Committee may make omnibus approval for related party transactions proposed to be entered into by the company subject to such conditions as may be prescribed.

- (v) scrutiny of inter-corporate loans and investments;
- (vi) valuation of undertakings or assets of the company, wherever it is necessary;
- (vii) evaluation of internal financial controls and risk management systems;
- (viii) monitoring the end use of funds raised through public offers and related matters.”

Sub Section 5: “The Audit Committee may call for the comments of the auditors about internal control systems, the scope of audit, including the observations of the auditors and review of financial statement before their submission to the Board and may also discuss any related issues with the internal and statutory auditors and the management of the company.”

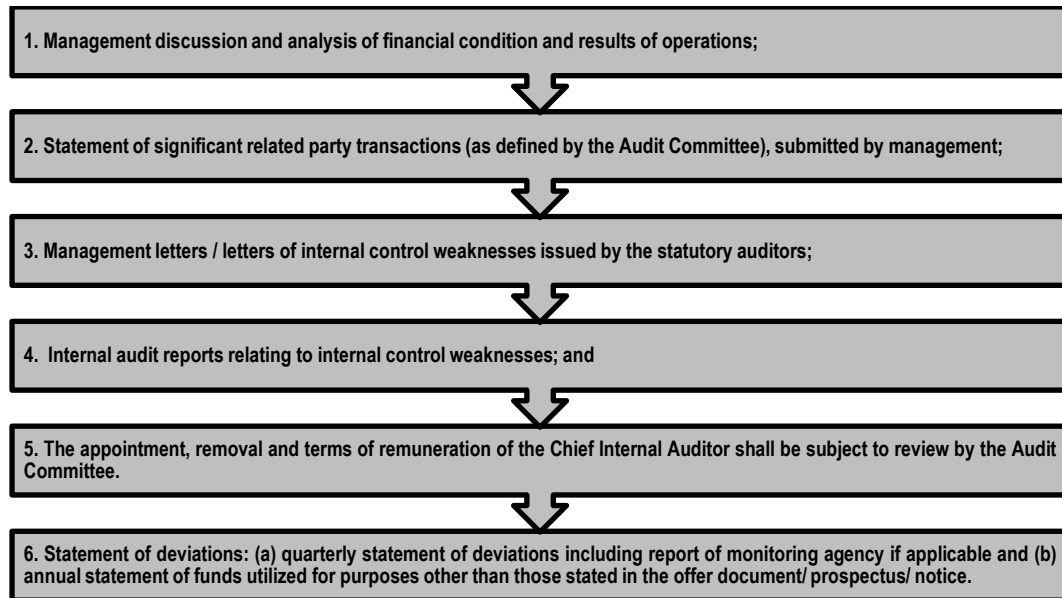

Sub Section 6: “The Audit Committee shall have authority to investigate into any matter in relation to the items specified in sub-section (4) or referred to it by the Board and for this purpose shall have power to obtain professional advice from external sources and have full access to information contained in the records of the company.”

Sub Section 9: “Every listed company or such class or classes of companies, as may be prescribed, shall establish a vigil mechanism for directors and employees to report genuine concerns in such manner as may be prescribed.”

Sub Section 10: “The vigil mechanism under sub-section (9) shall provide for adequate safeguards against victimisation of persons who use such mechanism and make provision for direct access to the chairperson of the Audit Committee in appropriate or exceptional cases: Provided that the details of establishment of such mechanism shall be disclosed by the company on its website, if any, and in the Board’s report.”

9.7 Review of Information by Audit Committee

The Audit Committee shall mandatorily review the following information as per Part C (B) of Schedule II:

The auditor should ascertain from the minutes book of the Audit Committee and other sources like agenda papers, etc. whether the Audit Committee has reviewed the above-mentioned information. The auditor should ascertain whether as a part of Directors' Report or as an addition thereto, a Management Discussion and Analysis report forms part of the annual report to the shareholders. The auditor should further ascertain whether the Management Discussion and Analysis report includes discussion on the matters stipulated in Schedule V (B).

Where certain deficiencies or adverse findings are noted by the Audit Committee, the auditor will be required to see that these have been suitably dealt with by the management in the report on corporate governance.

The auditor should ascertain that the information reviewed by the Audit Committee is consistent with the reporting in the financial statements including those drawn up giving segment wise break-up for compliance with Accounting Standard (AS) 17 (Segment Reporting)/ Indian Accounting Standard 108 (Operating Segments).

9.8 Role of Auditor in Audit Committee and Certification of Compliance of Conditions of Corporate Governance

The LODR Regulations as well as the Companies Act, 2013 in respect of the constitution of Audit Committee underline the importance of audit process and its contribution to the corporate governance process.

Regulation 18 (1) (f) stipulates that a representative of the statutory auditor, when required, shall be invited to the meetings of the Audit Committee. Similarly, Section 177 of the Companies Act, 2013 provides the auditors of a company and the key managerial personnel the right to be heard in the meetings of the Audit Committee when it considers the auditor's report but they shall not have the right to vote.

The auditor must ensure that he communicates frequently and openly with the Audit Committee on key accounting or auditing issues that, in the auditor's judgment, give rise to a greater risk of material misstatement of the financial statements, and also ensure that he addresses any questions or concerns voiced by the Audit Committee.

He can contribute significantly in assisting and advising the Audit Committee on improving corporate governance, oversight of financial reporting process, implementation of accounting policies and practices, compliance with accounting standards, strengthening of the internal control systems in regard to financial reporting and reporting processes.

The auditor must devote substantial professional time in assisting the management and the Audit Committee to enable them to discharge their functions effectively and in certification of the requirements of corporate governance.

The auditor has to keep in mind that his role is not to drive corporate governance directly. Rather, it is the management's responsibility to do so and, in the process, he should play a significant role in assisting management to ensure better standards of corporate governance.

9.8.1 Auditor's Responsibility - *The auditor's responsibility in certifying compliance with the requirements of corporate governance relates to the verification and certification of factual implementation of requirements of corporate governance as stipulated in the LODR Regulations. Such verification and certification is neither an audit nor an expression of opinion on the financial statements of the company.*

The certificate from the auditor as regards compliance with the requirements of corporate governance is neither an assurance as to the future viability of the company, nor the efficiency or effectiveness with which the management has conducted the affairs of the company.

9.8.2 General Principles of Audit

The standards set out in the Standards on Auditing (hereinafter referred to as SA) would be applicable in the performance of certification with the requirements of corporate governance by the auditor, to the extent relevant.

As in the case of other professional assignments, in certifying the compliance with the requirements of corporate governance, the auditor should comply with the "Code of Ethics" issued by the Institute of Chartered Accountants of India (ICAI).

The auditor should conduct verification of compliance with the requirements of corporate governance as stipulated in the LODR Regulations, in accordance with the Guidance Note on Certification of Corporate Governance issued by ICAI.

9.8.3 Documentation

The auditor should document matters, which are important in providing evidence to support the certificate of factual findings, in accordance with SA 230 on “Audit Documentation”.

9.8.4 Management Representations

The auditor should consider obtaining management representations in accordance with SA 580, “Written Representations”.

9.8.5 Verification regarding Composition of Board [Regulation 17]

- (i) *The auditor should ascertain whether, throughout the reporting period, the Board of Directors comprises an optimum combination of executive and non-executive directors, with at least one woman director and not less than 50% of the Board of Directors comprising non-executive directors. The minutes of the Board of Directors’ meetings should be verified to ascertain whether a director is an executive director or a non-executive director.*
- (ii) *The auditor should also verify that where the Chairperson of the Board is a non-executive director, at least one-third of the Board should comprise of independent directors and in case the listed entity does not have a regular non-executive Chairperson, at least half of the Board of Directors should comprise independent directors. Further, if the regular non-executive Chairperson is a promoter of the listed entity or is related to any promoter or person occupying management positions at the Board level or at one level below the Board, at least one-half of the Board of the listed entity shall consist of independent directors.*

In determining the number of requisite independent directors and/or non-executive directors, the fraction, if any, in the number of one-half or one-third as the case may be, should be rounded off. Since the terms in this clause refer to ‘not less than’ and ‘at least’, it would be appropriate to compute the number by rounding off any fraction to the next integer. For example, in a Board headed by a non-executive Chairman and comprising of six other directors (i.e., seven directors), the independent directors should be three or more.

- (iii) *Annual disclosure submitted by the directors to the Board of Directors may be examined for this purpose. If the Board of Directors has followed any particular procedure(s) to ascertain the independence of directors, the auditor should examine the same. Effect of changes in the composition of the Board and/or its Chairman and its impact on compliance throughout the reporting period should also be examined.*
- (iv) *An independent non-executive director, apart from receiving remuneration, should not have had/ should not have any material pecuniary relationship with the listed entity, its holding, subsidiary or associate company, or their promoters, or directors, during the two immediately preceding financial years or during the current financial year. Also, such independent director, either by himself or with*

any of his relatives should not be a material supplier, service provider or customer or a lessor or lessee of the listed entity, and should not also be a substantial shareholder of the listed entity. In determining 'not a substantial shareholder', he (together with his relatives) should not own 2% or more of total voting power of the listed entity.

[Student may note that independent director means a non-executive director other than a nominee director of the listed entity (a) who, in the opinion of the Board, is a person of integrity and possesses relevant expertise and experience(b) who is or was not a promoter of the listed entity or its holding, subsidiary or associate company and who is not related to promoters or directors in the listed entity, its holding, subsidiary or associate company(c) apart from receiving director's remuneration, has or had no material pecuniary relationship with the listed entity, its holding, subsidiary or associate company, or their promoters, or directors, during the two immediately preceding financial years or during the current financial year (d) none of whose relatives has or had pecuniary relationship or transaction with the listed entity, its holding, subsidiary or associate company, or their promoters, or directors, amounting to two per cent or more of its gross turnover or total income or fifty lakh rupees or such higher amount as may be prescribed, whichever is lower, during the two immediately preceding financial years or during the current financial year, (e) who, neither himself nor any of his relatives (i) holds or has held the position of a key managerial personnel or is or has been employee of the listed entity or its holding, subsidiary or associate company in any of the three financial years immediately preceding the financial year in which he is proposed to be appointed;(ii) is or has been an employee or proprietor or a partner, in any of the three financial years immediately preceding the financial year in which he is proposed to be appointed, of (A) a firm of auditors or company secretaries in practice or cost auditors of the listed entity or its holding, subsidiary or associate company; or (B) any legal or a consulting firm that has or had any transaction with the listed entity, its holding, subsidiary or associate company amounting to ten per cent or more of the gross turnover of such firm;(iii) holds together with his relatives two per cent or more of the total voting power of the listed entity; or (iv) is a Chief Executive or director, by whatever name called, of any non-profit organisation that receives twenty-five per cent or more of its receipts from the listed entity, any of its promoters, directors or its holding, subsidiary or associate company or that holds two per cent or more of the total voting power of the listed entity (v) is a material supplier, service provider or customer or a lessor or lessee of the listed entity and (f) who is not less than 21 years of age.]

9.9 Remuneration of Directors [Part C of Schedule V]

Disclosure requirements regarding directors' remuneration are stated below:

- (i) **All pecuniary relationship or transactions of the non-executive directors vis-à-vis the listed entity shall be disclosed in the Annual Report.**

- (ii) *Criteria of making payments to non-executive directors. Alternatively, this may be disseminated on the listed entity's website and reference drawn thereto in the annual report;*
- (iii) *In addition to the disclosures required under the Companies Act, 2013, the following disclosures on the remuneration of directors shall be made in the section on the corporate governance of the Annual Report:*
 - (a) *All elements of remuneration package of individual directors summarized under major groups, such as salary, benefits, bonuses, stock options, pension etc.*
 - (b) *Details of fixed component and performance linked incentives, along with the performance criteria.*
 - (c) *Service contracts, notice period, severance fees.*
 - (d) *Stock option details, if any – and whether issued at a discount as well as the period over which accrued and over which exercisable.*

9.9.1 Approval of Remuneration of Directors [Regulation 17 (6)]

All fees/compensation, if any paid to non-executive directors, including independent directors, shall be fixed by the Board of Directors and shall require previous approval of shareholders in general meeting. The shareholders' resolution shall specify the limits for the maximum number of stock options that can be granted to non-executive directors, in any financial year and in aggregate.

The requirement of obtaining prior approval of shareholders in general meeting shall not apply to payment of sitting fees to non-executive directors, if made within the limits prescribed under the Companies Act, 2013 for payment of sitting fees without approval of the Central Government. Provided further that independent director shall not be entitled to any stock option.

In this context, the auditor should:

- 1. ascertain from the minutes of the Board of Directors' meetings, shareholders' meetings, relevant agenda papers, notices, explanatory statements etc., whether the remuneration of non- executive directors has been decided by the Board of Directors after receiving prior approval of the shareholders in the general meeting;*
- 2. refer to the Articles of Association of the company, wherever applicable;*
- 3. examine the Report of the Board of Directors on corporate governance to be included in the annual report of the company and ascertain whether the same contains the disclosures with respect to remuneration of directors and compensation to non-executive directors. The auditor should correlate this data with that contained in the financial statements.*

Where application of this clause requires the value of ESOP to be determined, the services of expert may have to be utilized. In this regard, reference may be made to SA 620 dealing with "Using the Work of an Auditor's Expert"

9.10 Obligations of Director and Senior Management [Regulations 17(2) to 17(4), 25(5) to 25(6), 26(1) to 26 (2), 26(4) to 26(5)]

- (i) *The Board shall meet at least four times a year, with a maximum time gap of one hundred and twenty days between any two meetings.*
- (ii) *A director shall not be a member in more than ten committees or act as Chairperson of more than five committees across all listed entities in which he is a director. Furthermore, every director shall inform the listed entity about the committee positions he occupies in other listed entities and notify changes as and when they take place.*

It may be noted that for the purpose of considering the limit of the committees on which a director can serve, all public limited companies, whether listed or not, shall be included and all other companies including private limited companies, foreign companies and companies under Section 8 of the Companies Act, 2013 shall be excluded and for the purpose of reckoning the limit under this sub-clause, Chairpersonship/membership of the Audit Committee and the Stakeholders' Relationship Committee alone shall be considered.

- (iii) *The Board shall periodically review compliance reports of all laws applicable to the listed entity, prepared by the listed entity as well as steps taken by the listed entity to rectify instances of non-compliances.*
- (iv) *Non-executive directors shall be required to disclose their shareholding (both own or held by / for other persons on a beneficial basis) in the listed entity in which they are proposed to be appointed as directors, prior to their appointment. These details should be disclosed in the notice to the general meeting called for appointment of such director.*
- (v) *An independent director shall be held liable, only in respect of such acts of omission or commission by the listed entity which had occurred with his knowledge, attributable through Board processes, and with his consent or connivance or where he had not acted diligently with respect of the provisions contained in the LODR Regulations.*
- (vi) *Senior management shall make disclosures to the board relating to all material financial and commercial transactions, where they have personal interest, that may have a potential conflict with the interest of the company at large (for e.g. dealing in company shares, commercial dealings with bodies, which have shareholding of management and their relatives etc.)*
- (vii) *An independent director who resigns or is removed from the Board of Directors of the listed entity shall be replaced by a new independent director at the earliest but not later than the immediate next Board meeting or three months from the date of such vacancy, whichever is later.*

Provided that where the listed entity fulfils the requirement of independent directors in its Board even without filling the vacancy created by such resignation

or removal, as the case may be, the requirement of replacement by a new independent director shall not apply.

(viii) The Board of Directors of the listed entity shall satisfy itself that plans are in place for orderly succession for appointments to the Board and to senior management.

9.10.1 Section 173(1) of the Companies Act, 2013 provides

“Every company shall hold the first meeting of the Board of Directors within thirty days of the date of its incorporation and thereafter hold a minimum number of four meetings of its Board of Directors every year in such a manner that not more than one hundred and twenty days shall intervene between two consecutive meetings of the Board.

Provided that the Central Government may, by notification, direct that the provisions of this sub-section shall not apply in relation to any class or description of companies or shall apply subject to such exceptions, modifications or conditions as may be specified in the notification.

Both the LODR Regulations and Section 173 stipulate that Board meetings shall be held at least four times a year and that the maximum time gap between any two meetings should not exceed one hundred and twenty days.

The auditor should ascertain from the minute’s book of the Board meetings whether Board meetings were held at least four times a year, with a maximum time gap of one hundred and twenty days between any two meetings. The auditor should also ascertain whether the minimum required information was made available to the Board.

The auditor should also ascertain that a director of the company is not a member in more than ten committees or is acting as Chairman of more than five committees across all companies in which he is a director. A suitable declaration from director should be obtained to this effect. This information should be verified from the mandatory annual requirement for every director to inform the company about the committee positions he occupies in other companies as well as from the changes notified by the director as and when they take place.

For the purpose of reviewing compliance reports of all laws applicable to the company, the said reports prepared by the company as well as steps taken by the company to rectify instances of non-compliances, the auditor should take into consideration SA 250, dealing with “Consideration of Laws and Regulations in an Audit of Financial Statements”. It is the management’s responsibility to ensure that company operations are conducted in accordance with laws and regulations. The responsibility for the prevention and detection of non-compliance rests with the management. The auditor’s responsibility is limited to verification that management has taken suitable steps and has put in place policies and procedures to ensure compliance with laws and regulations and to detect deviation from such procedures. The auditor should obtain written representations that management has disclosed to the auditor all known actual or possible non-compliance with laws and regulations whose effects should be considered when preparing financial statements.

9.11 Code of Conduct [Regulations 17(5), 26(3), 46(2) and Part D of Schedule V] -

- (i) The Board shall lay down a code of conduct for all Board members and senior management of the listed entity.*
- (ii) All Board members and senior management personnel shall affirm compliance with the code on an annual basis.*
- (iii) The Code of Conduct shall suitably incorporate the duties of Independent Directors as laid down in the Companies Act, 2013.*
- (iv) The code of conduct shall be posted on the website of the company.*
- (v) The Annual Report of the company shall contain a declaration to this effect signed by the CEO.*

For this purpose, the term “senior management” shall mean personnel of the listed entity who are members of its core management team excluding Board of Directors. Normally, this would comprise all members of management one level below the executive directors, including all functional heads.

The auditor should ascertain whether the Board of Directors of the company has laid down a Code of Conduct for all Board members and senior personnel of the company and obtain a copy of the same. He should also verify whether all Board members and senior management personnel have affirmed compliance with the code on an annual basis and whether the code has been posted on company’s website.

9.12 Vigil Mechanism [Regulations 22 and 46 and Part C of Schedule V]

- (i) The listed entity shall establish a vigil mechanism for directors and employees to report genuine concerns.*
- (ii) This mechanism should also provide for adequate safeguards against victimization of director(s) / employee(s) or any other person who avail the mechanism and also provide for direct access to the chairperson of the Audit Committee in appropriate or exceptional cases.*
- (iii) The details of establishment of such mechanism shall be disclosed by the company on its website and in the Board’s report.*

9.13 Subsidiary of Listed Entity [Regulations 16(c), 24 and 46 and Part C of Schedule V]

- (i) At least one independent director on the Board of Directors of the listed entity shall be a director on the Board of Directors of an unlisted material subsidiary, incorporated in India.*
- (ii) The Audit Committee of the listed entity shall also review the financial statements, in particular, the investments made by the unlisted subsidiary.*

- (iii) *The minutes of the Board meetings of the unlisted subsidiary shall be placed at the Board meeting of the listed entity. The management of the unlisted subsidiary shall periodically bring to the notice of the Board of Directors of the listed entity, a statement of all significant transactions and arrangements entered into by the unlisted subsidiary.*
- (iv) *The company shall formulate a policy for determining ‘material’ subsidiaries and such policy shall be disclosed on the company’s website and a web link thereto shall be provided in the Annual Report.*
- (v) *For the purpose of this clause, a subsidiary shall be considered as material if the investment of the company in the subsidiary exceeds twenty per cent of its consolidated net worth as per the audited balance sheet of the previous financial year or if the subsidiary has generated twenty per cent of the consolidated income of the company during the previous financial year.*
- (vi) *A listed entity shall not dispose of shares in its material subsidiary resulting in reduction of its shareholding (either on its own or together with other subsidiaries) to less than 50% or cease the exercise of control over the subsidiary without passing a special resolution in its General Meeting except in cases where such divestment is made under a scheme of arrangement duly approved by a Court/Tribunal.*
- (vii) *Selling, disposing and leasing of assets amounting to more than twenty percent of the assets of the material subsidiary on an aggregate basis during a financial year shall require prior approval of shareholders by way of special resolution, unless the sale/disposal/lease is made under a scheme of arrangement duly approved by a Court/Tribunal.*

Explanation

- (i) *The term “material non-listed Indian subsidiary” shall mean an unlisted subsidiary, incorporated in India, whose income or net worth (i.e. paid up capital and free reserves) exceeds 20% of the consolidated income or net worth respectively, of the listed holding company and its subsidiaries in the immediately preceding accounting year.*
- (ii) *The term “significant transaction or arrangement” shall mean any individual transaction or arrangement that exceeds or is likely to exceed 10% of the total revenues or total expenses or total assets or total liabilities, as the case may be, of the material unlisted subsidiary for the immediately preceding accounting year.*
- (iii) *Where a listed entity has a listed subsidiary which is itself a holding company, the above provisions shall apply to the listed subsidiary insofar as its subsidiaries are concerned.*

Regulation 24 requires the Audit Committee of the listed entity to review the financial statements and in particular, the investments made by the unlisted subsidiary. This is required in regard to all unlisted subsidiaries, without reference to materiality or place

of incorporation etc. Where however the subsidiary of a listed entity is itself a listed entity, Explanation (iii) above would apply.

9.14 Statement of Deviation(s) or Variation(s) [Regulation 32 and Part C of Schedule II]

- (1) *The listed entity shall submit to the stock exchange the following statement(s) on a quarterly basis for public issue, rights issue, preferential issue etc. :-*
 - (a) *Indicating deviations, if any, in the use of proceeds from the objects stated in the offer document or explanatory statement to the notice for the general meeting, as applicable;*
 - (b) *Indicating category-wise variation (capital expenditure, sales and marketing, working capital etc.) between projected utilisation of funds made by it in its offer document or explanatory statement to the notice for the general meeting, as applicable and the actual utilisation of funds.*
- (2) *The statement(s) shall be continued to be given till such time the issue proceeds have been fully utilised or the purpose for which these proceeds were raised has been achieved.*

The audit committee shall mandatorily review:

- (a) *Quarterly statement of deviation(s) including report of monitoring agency, if applicable, submitted to stock exchange(s) in terms of Regulation 32(1).*
- (b) *Annual statement of funds utilized for purposes other than those stated in the offer document/prospectus/notice.*

9.15 Disclosures - Management Discussion and Analysis [Schedule V]

As part of the directors' report or as an addition thereto, a Management Discussion and Analysis report should form part of the Annual Report to the shareholders. This Management Discussion & Analysis should include discussion on the following matters within the limits set by the company's competitive position:

- (a) *Industry structure and developments.*
- (b) *Opportunities and Threats.*
- (c) *Segment-wise or product-wise performance.*
- (d) *Outlook*
- (e) *Risks and concerns.*
- (f) *Internal control systems and their adequacy.*
- (g) *Discussion on financial performance with respect to operational performance.*
- (h) *Material developments in Human Resources / Industrial Relations front, including number of people employed.*

The above information presented by the management is likely to include non-financial information, which may be outside the auditor's area of expertise. In such situations, the auditor may keep in mind SA 315 relating to "Identifying and Assessing the Risks of Material Misstatement through Understanding the Entity and its Environment" and the fact that he is only required to review the compliance with disclosure requirements and not verify the particular facts as disclosed by the management.

The auditor should ascertain that the segment-wise or product-wise performance (sub-clause (i) (c) as stated above) is consistent with what is reported in financial statements complying with AS 17 (Segment Reporting)/ Indian Accounting Standard 108 (Operating Segments) and also as per provisions of Section 133, 134 and 143 of the Companies Act, 2013.

9.16 Information to Shareholders [Regulation 36]

In case of the appointment of a new director or re-appointment of a director the shareholders must be provided with the following information:

- (a) A brief resume of the director;*
- (b) Nature of his expertise in specific functional areas;*
- (c) Disclosure of relationships between directors inter-se;*
- (d) Names of listed entities in which the person also holds the directorship and the membership of Committees of the Board; and*
- (d) Shareholding of non-executive directors.*

The auditor should ascertain from the communications sent, whether in the case of appointment of a new director or re-appointment of a director, the shareholders have been provided with the information stipulated above.

9.17 Stakeholders Relationship Committee [Regulation 20 and Part D of Schedule II]

- (i) The listed entity shall constitute a Stakeholders Relationship Committee to specifically look into the mechanism of redressal of grievances of shareholders, debenture holders and other security holders.*
- (ii) The chairperson of this Committee shall be a non-executive director.*
- (iii) The Board of Directors shall decide other members of this Committee.*
- (iv) The Committee shall consider and resolve the grievances of the security holders of the listed entity including complaints related to transfer of shares, non-receipt of balance sheet, non-receipt of declared dividends.*

The auditor should ascertain from the minutes book of the Board meetings whether a Board committee, namely a Shareholders/ Investors Grievance Committee has been set up under the chairmanship of a non-executive director to specifically look into the redressal of shareholder and investors complaints like transfer of shares, non-receipt of

balance sheet, non-receipt of declared dividends, etc. Further the auditor should also ascertain from the minutes book of the Shareholders/ Investors Grievance Committee meetings whether such committee is prima facie functioning.

The auditor should also verify from the records of the Shareholders/ Investors Grievance Committee as well as from the certificate obtained by the listed entity from SEBI and stock exchange(s), if any, as regards the investors' grievances pending up to the date of certificate of compliance of conditions of corporate governance.

9.18 Transfer or Transmission or Transposition of Securities [Regulation 40]

The Board of Directors of a listed entity shall delegate the power of transfer of securities to a committee or to the compliance officer or to the registrar to an issue and/or share transfer agents.

However, the board of directors and/or the delegated authority shall attend to the formalities pertaining to transfer of securities at least once in a fortnight. It may be noted that the delegated authority shall report on transfer of securities to the board of directors in each meeting.

The auditor should ascertain from the minutes book of the Board meetings whether the listed entity has delegated the power of share transfer to an officer or a committee or to the registrar and share transfer agents. The auditor should also verify from the records maintained to ascertain whether the delegated authority has attended to share transfer formalities at least once in a fortnight. The auditor may verify whether any transfer request are pending for more than a fortnight and are not attended to in terms of this Regulation.

9.19 Compliance Certificate [Part B of Schedule II]

The Chief Executive Officer and the Chief Financial Officer shall certify to the Board that:

- (a) They have reviewed financial statements and the cash flow statement for the year and that to the best of their knowledge and belief:
 - (i) These statements do not contain any materially untrue statement or omit any material fact or contain statements that might be misleading;*
 - (ii) These statements together present a true and fair view of the listed entity's affairs and are in compliance with existing accounting standards, applicable laws and regulations.**
- (b) There are, to the best of their knowledge and belief, no transactions entered into by the listed entity during the year which are fraudulent, illegal or violative of the listed entity's code of conduct.*
- (c) They accept responsibility for establishing and maintaining internal controls for financial reporting and that they have evaluated the effectiveness of the internal control systems of the listed entity pertaining to financial reporting and they have disclosed to the auditors and the Audit Committee, deficiencies in the design or*

operation of internal controls, if any, of which they are aware and the steps they have taken or propose to take to rectify these deficiencies.

- (d) They have indicated to the auditors and the Audit committee:**
- (i) Significant changes in internal control over financial reporting during the year;**
 - (ii) Significant changes in accounting policies during the year and that the same have been disclosed in the notes to the financial statements; and**
 - (iii) Instances of significant fraud of which they have become aware and the involvement therein, if any, of the management or an employee having a significant role in the listed entity's internal control system over financial reporting."**

Part B of Schedule II clearly brings out that -

The responsibility entrusted to the CEO and CFO is in relation to establishing and maintaining internal controls over financial reporting.

The Compliance Certificate has to assert that they have evaluated the effectiveness of internal control systems of the listed entity pertaining to financial reporting.

The Compliance Certificate will further state the manner in which deficiencies (if any) in the design or operation of such internal controls has been disclosed to the auditors and the Audit Committee.

The Compliance Certificate will also state the steps they have taken or propose to take to rectify these deficiencies in the design or operation of such internal controls pertaining to financial reporting.

In the context of internal controls, the auditor should ensure that -

The management has instituted an internal control framework with respect to financial reporting controls. The framework should be examined in the context of the documentation created for each significant process in terms of the related risk and mitigating control;

He has further examined whether the assessment process followed for evaluation of controls is reasonable and there is a process by which significant deficiencies as well as steps taken to correct them is communicated to the Audit Committee and to the auditors; and

He should also examine whether a process exists in the listed entity whereby all significant changes in the accounting policies and in the system of internal controls are communicated to the Audit Committee and the auditors.

The auditor should examine the adequacy of the process followed for issuing the Compliance Certificate and should review the same in regard to matters stated above and the consideration of the same by the Audit Committee. For this purpose he should refer to the minutes of the Audit Committee meetings.

In situations where negative or adverse comments or exclusions/disclaimers are contained in the Compliance Certificate, the auditor should take cognizance of the same in the Audit Report and/or the certificate of compliance of conditions of corporate governance.

9.20 Disclosures

The LODR Regulations on Corporate Governance requires disclosure of certain transactions which are discussed below.

9.20.1 Disclosure and Transparency [Regulation 4]

The listed entity shall ensure timely and accurate disclosure on all material matters including the financial situation, performance, ownership, and governance of the Listed entity, in the following manner:

- (a) *Information shall be prepared and disclosed in accordance with the prescribed standards of accounting, financial and non-financial disclosure.*
- (b) *Channels for disseminating information should provide for equal, timely and cost efficient access to relevant information by users.*
- (c) *Minutes of the meeting shall be maintained explicitly recording dissenting opinions, if any.*

9.20.2 Related Party Disclosure [Regulations 27, 46 and Schedule V]

The listed entity shall submit a quarterly compliance report on corporate governance in the format as specified by the Board from time to time to the recognised stock exchange(s) within fifteen days from close of the quarter.

Details of all material transactions with related parties shall be disclosed therein. The report shall be signed either by the compliance officer or the chief executive officer of the listed entity.

The company shall disclose the policy on dealing with related party transactions on its website and a web link thereto shall be provided in the Annual Report.

9.20.3 Disclosure of Accounting Treatment [Schedule V]

Where in the preparation of financial statements, a treatment different from that prescribed in an Accounting Standard has been followed, the fact shall be disclosed in the financial statements, together with the management's explanation as to why it believes such alternative treatment is more representative of the true and fair view of the underlying business transaction.

In this regard, the auditor should refer to Sections 133, 134 and 143 of the Companies Act, 2013. Also, the auditor should refer to the Compliance Certificate issued in accordance with Regulation 17.

9.21 Risk Management Committee [Regulation 21]

- (a) *The Board of Directors shall constitute a Risk Management Committee.*

- (b) *The majority of members of Risk Management Committee shall consist of members of the Board of Directors.*
- (c) *The Chairperson of the Risk Management Committee shall be a member of the Board of Directors and senior executives of the listed entity may be members of the committee.*
- (d) *The Board of Directors shall define the role and responsibility of the Risk Management Committee and may delegate monitoring and reviewing of the risk management plan to the committee and such other functions as it may deem fit.*
- (e) *The provisions of this regulation shall be applicable to top 100 listed entities, determined on the basis of market capitalisation, as at the end of the immediate previous financial year.*

These procedures shall be periodically reviewed to ensure that executive management controls risk through means of a properly defined framework. A majority of this Committee will be the members of the Board of Directors. Senior executives of the company may be also be members of the Committee, but the Chairperson of the Committee shall be a member of the Board of Directors.

9.22 Nomination and Remuneration Committee [Regulation 19 and Part D of Schedule II]

- A. *The Board of Directors shall constitute the Nomination and Remuneration Committee which shall comprise at least three directors, all of whom shall be non-executive directors and at least half shall be independent. Chairperson of the committee shall be an independent director.*

Provided that the Chairperson of the listed entity (whether executive or nonexecutive) may be appointed as a member of the Nomination and Remuneration Committee but shall not chair such committee.

- B. *The role of such committee shall, inter-alia, include the following:*
 - (i) *Formulation of the criteria for determining qualifications, positive attributes and independence of a director and recommend to the Board of Directors a policy, relating to the remuneration of the directors, key managerial personnel and other employees;*
 - (ii) *Formulation of criteria for evaluation of independent directors and the Board of Directors;*
 - (iii) *Devising a policy on Board diversity;*
 - (iv) *Identifying persons who are qualified to become directors and who may be appointed in senior management in accordance with the criteria laid down, and recommend to the Board their appointment and removal.*

- (v) *whether to extend or continue the term of appointment of the independent director, on the basis of the report of performance evaluation of independent directors.*
- C. *The Chairperson of the Nomination and Remuneration Committee may be present at the Annual General Meeting, to answer the shareholders' queries. However, it would be up to the Chairperson to decide who shall answer the queries.*

9.23 Report on Corporate Governance [Regulation 27 and Schedule II]

The listed entity shall submit a quarterly compliance report on corporate governance in the format as specified by the Board from time to time to the recognised stock exchange(s) within 15 days from the close of quarter. The report shall be signed either by the Compliance Officer or the Chief Executive Officer of the listed entity.

The auditor should ascertain whether the Board of Directors have included in the Annual Report of the listed entity, a separate section on corporate governance with a detailed compliance report on corporate governance.

Any data in the report on corporate governance should not be inconsistent with that contained in the financial statements. (For detailed contents of Report on Corporate Governance, students are advised to refer Appendix given at the end of this Chapter)

9.24 Auditors' Certificate

As per Schedule V, a listed entity shall obtain a compliance certificate from either the auditors or practicing company secretaries regarding compliance of conditions of corporate governance and shall annex it to the Directors' Report.

9.24.1 Adverse or Qualified Statement

Depending upon the facts and circumstances, some situations may require an adverse or qualified statement or a disclosure without necessarily making it a subject matter of qualification in the Auditors' Certificate, in respect of compliance of requirements of corporate governance for e.g.,

Examples of such circumstances:

- (a) *The number of non-executive directors is less than 50% of the strength of Board of directors.*
- (b) *A qualified and independent audit committee is not set up.*
- (c) *The Chairman of the audit committee is not an independent director.*
- (d) *The Audit Committee does not meet four times a year.*
- (e) *The necessary powers in terms of Part C of Schedule II have not been vested by the Board in the Audit Committee.*

- (f) The time gap between two Board meetings is more than one hundred and twenty days.*
- (g) A director is a member of more than ten committees or acts as Chairman of more than five committees across all companies in which he is a director.*
- (h) The information of quarterly results is neither put on the listed entity's website nor sent in a form so as to enable the stock exchange on which the entity's securities are listed to enable such stock exchange to put it on its own website.*
- (i) The power of share transfer is not delegated to an officer or a committee or to the registrar and share transfer agents.*

Case Studies –

Statements appearing in the Auditors' certificate on compliance of conditions of corporate governance:

- 1. ABC Oil & Natural Gas Commission - Non-compliance with (a) appointment of minimum number of independent directors (b) filling up the vacancies caused due to the resignation or retirement of independent directors within the specified time period and (c) appointment of woman director to the Board during certain specified periods.**
- 2. XYZ Bank - Non-compliance with appointment of woman director to the Board for the F.Y.2015-16.**
- 3. PQR Electrification Corporation Limited - Non-compliance with appointment of woman director to the Board**
- 4. RST Oil Corporation Limited - Non-compliance with (a) minimum number of independent directors in the composition of Board of Directors (b) appointment of woman director from 29.10.2015 (c) filling up the vacancies caused due to the retirement of independent directors for part of the year.**
- 5. RKP National Fertilizers Limited - Non-compliance with (a) minimum number of independent directors in the composition of Board of Directors (b) appointment of woman director (c) performance evaluation of independent directors by the entire Board of Directors and (d) performance evaluation by the independent directors of the non-independent directors, that of the board of directors as a whole and that of the Chairperson of the company.**

A performa of the certificate to be issued by the auditors regarding compliance of conditions of corporate governance is shown below:

CERTIFICATE

To,

The Members of.....

(Name of the entity)

We have examined the compliance of conditions of corporate governance by (name of the entity) for the year ended on as stipulated in Securities Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 (hereinafter called as "SEBI (LODR) Regulations, 2015").

The compliance of conditions of corporate governance is the responsibility of the management. Our examination was limited to procedures and implementation thereof, adopted by the company for ensuring the compliance of the conditions of the corporate governance. It is neither an audit nor an expression of opinion on the financial statements of the company.

In our opinion and to the best of our information and according to the explanations given to us, we certify that the company has complied with the conditions of corporate governance as stipulated in the above mentioned Regulations.

OR (as applicable)

In our opinion, and to the best of our information and according to the explanations given to us, subject to the following:

1)

2)

We certify that the company has complied with the conditions of corporate governance as stipulated in the above mentioned Regulations.

We state that such compliance is neither an assurance as to the future viability of the company nor the efficiency or effectiveness with which the management has conducted the affairs of the company.

APPENDIX

SCHEDULE II: CORPORATE GOVERNANCE

PART A: MINIMUM INFORMATION TO BE PLACED BEFORE BOARD OF DIRECTORS

[See Regulation 17(7)]

- A. Annual operating plans and budgets and any updates.**
- B. Capital budgets and any updates.**
- C. Quarterly results for the listed entity and its operating divisions or business segments.**
- D. Minutes of meetings of audit committee and other committees of the board of directors.**
- E. The information on recruitment and remuneration of senior officers just below the level of board of directors, including appointment or removal of Chief Financial Officer and the Company Secretary.**
- F. Show cause, demand, prosecution notices and penalty notices, which are materially important.**
- G. Fatal or serious accidents, dangerous occurrences, any material effluent or pollution problems.**
- H. Any material default in financial obligations to and by the listed entity, or substantial non-payment for goods sold by the listed entity.**
- I. Any issue, which involves possible public or product liability claims of substantial nature, including any judgement or order which, may have passed strictures on the conduct of the listed entity or taken an adverse view regarding another enterprise that may have negative implications on the listed entity.**
- J. Details of any joint venture or collaboration agreement.**
- K. Transactions that involve substantial payment towards goodwill, brand equity, or intellectual property.**
- L. Significant labour problems and their proposed solutions. Any significant development in Human Resources/ Industrial Relations front like signing of wage agreement, implementation of Voluntary Retirement Scheme etc.**
- M. Sale of investments, subsidiaries, assets which are material in nature and not in normal course of business.**
- N. Quarterly details of foreign exchange exposures and the steps taken by management to limit the risks of adverse exchange rate movement, if material.**
- O. Non-compliance of any regulatory, statutory or listing requirements and shareholders service such as non-payment of dividend, delay in share transfer etc.**

10

Audit of Consolidated Financial Statements

10.1 Introduction

Fig.: Consolidation*

Consolidated financial statements normally include consolidated balance sheet, consolidated statement of profit and loss, consolidated cash flow statement, a consolidated statement of change in equity (if applicable) and any explanatory notes annexed to, or forming part thereof. Consolidated financial statements are presented, to the extent possible, in the same format as adopted by the parent for its separate financial statements. The formats for preparation of balance sheet, statement of profit and loss and a statement of change in equity (if applicable) are prescribed under the Schedule III of the Companies Act, 2013.

An entity which prepares the consolidated financial statements, either under any law or regulation governing the entity or suo motu, might be required to or otherwise engage the auditor for conducting the audit of consolidated financial statements. However, a law

* Source : Business line

or regulation governing the entity may require the consolidated financial statements to be audited by the statutory auditor of the entity. The Guidance Note on Audit of Consolidated Financial Statements provides guidance on the specific issues and audit procedures to be applied in an audit of consolidated financial statements. This Guidance Note can also be used while auditing consolidated financial statements prepared for special purpose, to the extent applicable but it does not deal with accounting matters arising on consolidation of financial statements.

10.1.1 Consolidation of Financial Statements - Now Mandatory under Companies Act, 2013

According to Section 129(3) of the Companies Act, 2013, where a company has one or more subsidiaries, including associate company and joint venture, it shall, in addition to its own financial statements prepare a consolidated financial statement of the company and of all the subsidiaries in the same form and manner as that of its own. Further, section 129(4) of the said Act, provides that the provisions applicable to the preparation, adoption and audit of the financial statements of a holding company shall, mutatis mutandis, also apply to the consolidated financial statements.

The Consolidated financial statements shall also be approved by the board of directors before they are signed on behalf of the board, along with its own financial statements and shall also be laid before the annual general meeting of the company along with the laying of its own financial statement.

The company shall also attach along with its financial statement, a separate statement containing the salient features of the financial statement of its subsidiary or subsidiaries in Form AOC-1.

According to Companies (Accounts) Rules, 2014, the consolidation of financial statements of the company shall be made in accordance with the provisions of Schedule III to the Act and the applicable accounting standards. However, a company which is not required to prepare consolidated financial statements under the Accounting Standards, it shall be sufficient if the company complies with provisions on consolidated financial statements provided in Schedule III of the Act [refer Appendix given at the end of Chapter 6].

However, the requirement related to preparation of consolidated financial statements shall not apply to a company if it meets the following conditions:

(i) it is a wholly-owned subsidiary, or is a partially-owned subsidiary of another company and all its other members, including those not otherwise entitled to vote, having been intimated in writing and for which the proof of delivery of such intimation is available with the company, do not object to the company not presenting consolidated financial statements;

(ii) it is a company whose securities are not listed or are not in the process of listing on any stock exchange, whether in India or outside India; and

(iii) its ultimate or any intermediate holding company files consolidated financial statements with the Registrar which are in compliance with the applicable Accounting Standards.

10.3 Advanced Auditing and Professional Ethics

As per sub-section 6 of the section 129 of the Companies Act, 2013, the Central Government may, on its own or on an application by a class or classes of companies, by notification, exempt any class or classes of companies from complying with any of the requirements of section 129 or the rules made thereunder, if it is considered necessary to grant such exemption in the public interest and any such exemption may be granted either unconditionally or subject to such conditions as may be specified in the notification.

Thus, the companies having subsidiaries, which have previously never prepared the consolidated financial statements, must prepare their consolidated financial statements in adherence with this mandatory requirement. This will provide the holding companies' stakeholders more transparency about the companies' businesses.

10.2 Definitions

Various terms used in this Guidance Note, have the same meaning as defined in applicable accounting standards. Important terms definition are given below:

Terms defined under Accounting Standards

1. **Associate:** *An associate is an enterprise in which the investor has significant influence and which is neither a subsidiary nor a joint venture of the investor.*
2. **Consolidated financial statements:** *Consolidated financial statements are the financial statements of a group presented as those of a single enterprise.*
3. **Control:**
 - a. *The ownership, directly or indirectly through subsidiary(ies), of more than one-half of the voting power of an enterprise; or*
 - b. *control of the composition of the board of directors in the case of a company or of the composition of the corresponding governing body in case of any other enterprise so as to obtain economic benefits from its activities.*
4. **Group:** *A group comprises a parent and its subsidiaries.*
5. **Joint control:** *Joint control is the contractually agreed sharing of control over an economic activity.*
6. **Joint venture:** *A joint venture is a contractual arrangement whereby two or more parties undertake an economic activity, which is subject to joint control.*
7. **Minority interest:** *Minority interest is that part of the net results of operations and of net assets of a subsidiary attributable to interests which are not owned, directly or indirectly, through subsidiary(ies), by the parent.*
8. **Parent:** *A parent is an enterprise that has one or more subsidiaries.*
9. **Significant influence:** *Significant influence is the power to participate in the financial and/ or operating policy decisions of the investee but not control over those policies.*
10. **Subsidiary:** *A subsidiary is an enterprise that is controlled by another enterprise (known as the parent).*

Terms defined under Ind AS

1. **Associate:** *An associate is an entity over which the investor has significant influence.*
2. **Control of an investee:** *An investor controls an investee when the investor is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.*
3. **Consolidated financial statements:** *The financial statements of a group in which the assets, liabilities, equity, income, expenses and cash flows of the parent and its subsidiaries are presented as those of a single economic entity.*
4. **Group:** *A parent and its subsidiaries.*
5. **Joint Control:** *Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control.*
6. **Joint Venture:** *A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement.*
7. **Non-controlling Interest:** *Equity in a subsidiary not attributable, directly or indirectly, to a parent.*
8. **Parent:** *An entity that controls one or more entities.*
9. **Power:** *Existing rights that give the current ability to direct the relevant activities.*
10. **Relevant Activities:** *Relevant activities are activities of the investee that significantly affect the investee's returns.*
11. **Significant influence:** *Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control of those policies.*
12. **Subsidiary:** *An entity that is controlled by another entity.*
13. **Separate Financial Statements:** *separate financial statements are those presented by a parent (i.e. an investor with control of a subsidiary) or an investor with joint control of, or significant influence over, an investee, in which the investments are accounted for at cost or in accordance with Ind AS 109, 'Financial Instruments'.*

Terms defined under SA 600, "Using the Work of Another Auditor"

1. **Component:** *It is a division, branch, subsidiary, joint venture, associated enterprises or other entity whose financial information is included in the financial information audited by principal auditor.*

10.3 Responsibility of Parent

The responsibility for the preparation and presentation of consolidated financial statements, among other things, is that of the management of the parent. This includes:

- (a) identifying components, and including the financial information of the components to be included in the consolidated financial statements;
- (b) where appropriate, identifying reportable segments for segmental reporting;
- (c) identifying related parties and related party transactions for reporting;

- (d) obtaining accurate and complete financial information from components; and
- (e) making appropriate consolidation adjustments.
- (f) harmonization of accounting policies and accounting framework; and.**
- (g) GAAP conversion, where applicable.**

Apart from the above, the parent ordinarily issues instructions to the management of the component specifying the parent's requirements relating to financial information of the components to be included in the consolidated financial statements. The instructions ordinarily cover the accounting policies to be applied, statutory and other disclosure requirements applicable to the parent, including the identification of and reporting on reportable segments, and related parties and related party transactions, and a reporting timetable.

10.4 Responsibility of the Auditor of the Consolidated Financial Statements

Section 129(4) of the Companies Act, 2013 requires that the provisions of this Act applicable to the preparation, adoption and audit of the financial statements of a holding company shall, mutatis mutandis, apply to the consolidated financial statements. Besides other matters, the principal auditor of the consolidated financial statements is

responsible for expressing an opinion on whether the consolidated financial statements are prepared, in all material respects, in accordance with the financial reporting framework under which the parent prepares the consolidated financial statements in addition to reporting on the additional matters as required under the Companies Act, 2013 and any other statute to the extent applicable.

Fig.: Responsibility of Auditors*

Therefore, the auditor's objectives in an audit of consolidated financial statements are:

- (a) to satisfy himself that the consolidated financial statements have been prepared in accordance with the requirements of applicable financial reporting framework;**
- (b) to enable himself to express an opinion on the true and fair view presented by the consolidated financial statements.**
- (c) to enquire into the matters as specified in section 143(1) of the Companies Act, 2013; and.**
- (d) to report on the matters given in the clauses (a) to (i) of section 143(3) of the Companies Act, 2013; for other matters under section 143(3)(j) read with rule 11 of**

* Source : Business Insurance

the Companies (Audit and Auditors) Rules, 2014, to comment on the matters specified in sub-rule (a),(b) and (c)² to the extent applicable.

Standards on Auditing, Statements and Guidance Notes on auditing matters issued by the Institute of Chartered Accountants of India apply in the same manner to audit of consolidated financial statements as they apply to audit of separate financial statements. It means that the auditors, while conducting the audit of consolidated financial statements are, *inter alia*, expected to:

- (a) plan their work to enable them to conduct an effective audit in an efficient and timely manner;
- (b) ***obtain an understanding of the accounting and internal control systems including IT system like consolidation tool, sufficient to plan the audit and determine the nature, timing and extent of his audit procedures. Such an understanding would help the auditors to develop an effective audit approach;***
- (c) use professional judgement to assess audit risk and to design audit procedures to ensure that the risk is reduced to an acceptable level; etc.

10.5 Audit Considerations

The following features of consolidated financial statements have an impact on the related audit procedures:

- (a) ***The consolidated financial statements are prepared on the basis of separate financial statements of the parent and its components, using the consolidation procedures prescribed by Accounting Standards³ under applicable financial reporting framework; and***
- (b) ***The auditor of the consolidated financial statements may use the work of other auditors as per requirement of Standards on Auditing unless the auditor of consolidated financial statements is also the auditor of the other components of the group.***

The consolidated financial statements (including the intermediate consolidated financial statements prepared internally)⁴ are prepared using the separate financial statements of the parent and its components and also other financial information, which might not be covered by the separate financial statements of these entities. The 'other financial

² The auditor of the consolidated financial statements generally report on the matters pertaining to the component, on the basis of auditors' report of the respective component.

³ Accounting Standard (AS) 21, Consolidated Financial Statements, Accounting Standard (AS 23)- Accounting for Investments in Associates in Consolidated Financial Statements and Accounting Standard (AS) - 27, Financial Reporting of Interests in Joint Ventures OR Indian Accounting Standard (Ind AS) 110 – Consolidated Financial Statements, Indian Accounting Standard (Ind AS) 111- Joint Arrangements, Indian Accounting Standard (Ind AS) 112 –Disclosure of Interests in Other Entities and Indian Accounting Standard (Ind AS) 28 – Investments in Associates and Joint Ventures.

⁴ Intermediate consolidated financial statements are the consolidated financial statements of an intermediate parent, e.g., Company A has one subsidiary Company B. Company B has a subsidiary Company C. In this case, Company B is the intermediate parent and the consolidated financial statements prepared by Company B will be intermediate consolidated financial statements.

information' would include disclosures to be made in the consolidated financial statements about the components, proportion of items included in the consolidated financial statements to which different accounting policies have been applied where permitted, adjustments made for the effects of significant transactions or other events that occur between the financial statements of parent and its components, as the case may be, etc. Thus, this 'other financial information' would be required to be additionally disclosed.

When an auditor accepts the audit of consolidated financial statements, the auditor should assess whether based on his work alone he would be able to express an opinion on the true and fair view presented by the consolidated financial statements. If the auditor is of the view that his own participation may not be enough or sufficient, he should consider using the work of 'other auditors'.

Such 'other auditors' might be the statutory auditors of the separate financial statements of one or more of the components or the auditors appointed specifically for assisting the auditor of the consolidated financial statements (the principal auditor).

Where the statutory auditors of one or more of the components of the parent are also requested to assist the principal auditor, the work to be performed by such statutory auditors for use by the principal auditor would constitute an assignment separate from the assignment to conduct the statutory audit of the respective component.

Standard on Auditing (SA) 600, 'Using the Work of Another Auditor' establishes standards when an auditor, reporting on the financial statements of an entity (the group—in the case of consolidated financial statements), uses the work of another auditor on the financial information of one or more components included in the financial statements of the entity (Paragraph 2 of SA 600). The principal auditor, if he decides to use the work of another auditor in relation to the audit of consolidated financial statements, should comply with the requirements of SA 600.

In carrying out the audit of the standalone financial statements, the computation of materiality for the purpose of issuing an opinion on the standalone financial statements of each component would be done component-wise on a standalone basis. However, with regard to determination of materiality during the audit of consolidated financial statements (CFS), the auditor should consider the following:

- *The auditor is required to compute the materiality for the group as a whole. This materiality should be used to assess the appropriateness of the consolidation adjustments (i.e. permanent consolidation adjustments and current period consolidation adjustments) that are made by the management in the preparation of CFS.*
- *The parent auditor can also use the materiality computed on the group level to determine whether the component's financial statements are material to the group to determine whether they should scope in additional components, and consider*

using the work of other auditors as applicable⁵.

However, while considering the observations (for instance modification and /or emphasis of matter in accordance with SA 705/706) of the component auditor in his report on the standalone financial statements, the concept of materiality would not be considered. Thus, the component auditor's observations, if any, on the component's financial statements, irrespective of whether the auditors of the component are also the auditors of the CFS or not, are required to be included in the parent auditor's report on the CFS, regardless of materiality.

10.6 Auditing the Consolidation

Before commencing an audit of consolidated financial statements, the auditor should plan his work to enable him to conduct an effective audit in an efficient and timely manner. The auditor should make plans, among other things, for the following:

- (a) Understanding of the group structure and group-wide controls including assessment of Information Technology (IT) system and related general and applications IT related controls (manual and automated) for consolidation process;*
- (b) understanding of accounting policies of the parent and its components as well as of the consolidation process including the process of translation of financial statements of foreign components;*
- (c) determining and programming the nature, timing, and extent of the audit procedures to be performed based on the assessment of the risk of material misstatement in the consolidation process;*
- (d) determining the extent of use of other auditor's work in the audit; and*
- (e) coordinating the work to be performed.*

A parent which presents consolidated financial statements is required to consolidate all its components in the consolidated financial statements other than those for which exceptions have been provided in the relevant accounting standards under the applicable financial reporting framework.

The auditor should obtain a listing of all the components included in the consolidated financial statements and review the information provided by the management of the parent identifying the components. The auditor should verify that all the components have been included in the consolidated financial statements unless these components meet criterion for exclusion as referred to in paragraph 19 above. In respect of completeness of this information, the auditor should perform the following procedures:

- (a) review his working papers for the prior years for the known components;*
- (b) review the parent's procedures for identification of various components;*

⁵ Refer ICAI's Announcement on the Manner of Disclosure in the Auditor's Report of the Fact of Inclusion of Unaudited Financial Statements/ Information of Component/s in the Financial Statements Audited by the Principal Auditor(s) issued in February 2014.

- (c) *make inquiries of management to identify any new components or any component which goes out of consolidated financial statements.*
- (d) *review the investments of parent as well as its components to determine the shareholding in other entities;*
- (e) *review the joint ventures and joint arrangements as applicable;*
- (f) *review the other arrangements entered into by the parent that have not been included in the consolidated financial statements of the group.*
- (g) *review the statutory records maintained by the parent, for example registers under section 186, 190 of the Companies Act, 2013.*
- (h) *also identify the changes in the shareholding that might have taken place during the reporting period.*

The auditor should document procedures performed for assessing completeness of the components to be consolidated.

There would be various means by which control, joint control or significant influence can be obtained. In this regard, the auditor may verify the Board's minutes, shareholder agreements entered into by the parent, agreements with the entities to which the parent might have provided any technology or know how, enforcement of statute, as the case may be, etc. The auditor may also review the minutes of the meetings of the Board of Directors subsequent to the year-end to understand if there has been any liquidation of investments or any further investments have been made as these may provide further evidence to understand if the control was meant to be temporary in nature or otherwise.

Where a component is excluded from the consolidated financial statements, the auditor should examine the reasons for exclusion and whether such exclusion is in conformity with the applicable financial reporting framework, for example, under the Companies (Accounting Standards) Rules, 2006, there could be two reasons for exclusion of a subsidiary, associate or jointly controlled entity – one, that the relationship of parent with the subsidiary, associate or jointly controlled entity is intended to be temporary or the subsidiary, associate or joint venture operates under severe long-term restrictions which significantly impair its ability to transfer funds to the parent. Similarly, under the Companies Act, 2013, intermediate subsidiary in India is not required to present consolidated financial statements. Ind AS 110 also prescribes certain criteria where consolidated financial statements are not required. In such cases, the auditor should satisfy himself that the exclusion made by the management falls within these categories, e.g. in the case of an entity which is excluded from consolidation on the ground that the relationship of parent with the other entity as subsidiary, associate or joint venture is temporary, the auditor should verify that the intention of the parent, to dispose off the subsidiary, investment in associate or interest in jointly controlled entity, in the near future, existed at the time of acquisition of the subsidiary, making investment in associate or jointly controlled entity. The auditor should also verify that the reasons for exclusion are given in the consolidated financial statements. If an entity is excluded from the consolidated financial statements for reasons other than those allowed by the applicable

financial reporting framework, the auditor should consider its effect on the auditor's report to be issued.

The auditor should also examine whether there is any change in the status of a component (e.g., subsidiary to associate, JV to associates or vice – versa). The auditor, in such cases, should examine whether these changes have been appropriately accounted for in the consolidated financial statements as required by the relevant accounting standards under the applicable financial reporting framework.

(a) In preparing consolidated financial statements in accordance with the Companies (Accounting Standards) Rules, 2006, the financial statements of the parent and its subsidiaries are combined on a line by line basis by adding together like items of assets, liabilities, income, expenses and cash flows and then certain calculations like determination of goodwill or capital reserve, minorities interest and adjustments like elimination of intra group transactions, balances and unrealised profits etc. are made in accordance with the requirements of Accounting Standard (AS) 21, "Consolidated Financial Statements". Investments in associates are accounted for using the Equity Method as prescribed in Accounting Standard (AS) 23, "Accounting for Investments in Associates in Consolidated Financial Statements". A parent that has an interest in a jointly controlled entity, reports its interest in the consolidated financial statements using proportionate consolidation method in accordance with Accounting Standard (AS) 27, "Financial Reporting of Interests in Joint Ventures". Many of the procedures appropriate for the application of equity method and the proportionate consolidation method are similar to the consolidation procedures set out in Accounting Standard (AS) 21, "Consolidated Financial Statements".

(b) For consolidation of subsidiaries in accordance with the Companies (Indian Accounting Standards) Rules, 2015:

- the financial statements of the parent and its subsidiaries are combined as per Ind AS 110, "Consolidated Financial Statements" on a line by line basis by adding together like items of assets, liabilities, income, expenses and cash flows;*
- related goodwill/ capital reserve and non-controlling interest is determined as per Ind As 103;*
- adjustments like elimination of intra group transactions, balances, unrealised profits and deferred tax etc. are made in accordance with the requirements of Ind AS 110.*
- Investments in associates and joint ventures are accounted for using the Equity Method as prescribed in Indian Accounting Standard (Ind AS) 28, "Investments in Associates and Joint Ventures". Interests in assets, liabilities, revenues and expenses in a joint operation are accounted for as part of separate financial statements of the entity in accordance with Indian Accounting Standard (Ind AS) 111, "Joint Arrangements".*

The auditor should verify that the adjustments warranted by the relevant accounting standards under the applicable financial reporting framework have been made wherever required and have been properly approved by the management of the parent. The preparation of consolidated financial statements gives rise to permanent consolidation adjustments and current period consolidation adjustments. No adjustments, other than

those envisaged in this Guidance Note, can be carried out in the preparation of CFS at the group level.

10.7 Special Considerations

10.7.1 Permanent Consolidation Adjustments

Permanent consolidation adjustments are those adjustments that are made only on the first occasion or subsequent occasions in which there is a change in the shareholding of a particular entity which is consolidated. Permanent consolidation adjustments are:

(a) Determination of goodwill or capital reserve as per applicable accounting standards.

(b) Determination of amount of equity attributable to minority/ non-controlling interests.

The auditor should verify that the above calculations have been made appropriately. The auditor should pay particular attention to the determination of pre-acquisition reserves of the components. Date(s) of investment in components assumes importance in this regard. The auditor should also examine whether the pre-acquisition reserves have been allocated appropriately between the parent and the minority interests/ non-controlling interests of the subsidiary. The auditor should also verify the changes that might have taken place in these permanent consolidation adjustments on account of subsequent acquisition of shares in the components, disposal of the components in the subsequent years.

It may happen that while working out the permanent consolidation adjustments, in the case of one subsidiary, goodwill arises and in the case of another subsidiary a capital reserve arises. The parent may choose to net off these amounts to disclose a single amount in the consolidated balance sheet where permitted by the applicable financial reporting framework. In such cases, the auditor should verify that the gross amounts of goodwill and capital reserves arising on acquisition of various subsidiaries have been disclosed in the notes to the consolidated financial statements to reflect the excess/shortage over the parents' portion of the subsidiary's equity.

10.7.2 Current Period Consolidation Adjustments

Current period adjustments are those adjustments that are made in the accounting period for which the consolidation of financial statements is done. Current period consolidation adjustments primarily relate to elimination of intra-group transactions and account balances including:

- (a) intra-group interest paid and received, or management fees, etc.;

- (b) *unrealised intra-group profits on assets acquired/ transferred from/ to other subsidiaries;*
- (c) *intra-group indebtedness;*
- (d) *adjustments related to harmonising the different accounting policies being followed by the parent and its components;*
- (e) *adjustments to the financial statements (of the parent and the components being consolidated) for recognized subsequent events or transactions that occur between the balance sheet date and the date of the auditor's report on the consolidated financial statements of the group.*

There are two types of subsequent events:

- a. *The first type of subsequent events consists of events or transactions that provide additional evidence about conditions that existed at the date of the financial statements, including the estimates inherent in the process of preparing financial statements (i.e. adjusting events).*
- b. *The second type of subsequent events consists of events that provide evidence about conditions that did not exist at the date of the financial statements but arose subsequent to that date (i.e. non-adjusting events).*

Events occurring after balance sheet date which do not require adjustments would not normally require disclosure, although they may be of such significance that they may require a disclosure in the report of approving authority in the case of accounting standards and in the financial statements in case of Ind AS. For such events, the following shall be disclosed:

- a. *The nature of the event; and*
 - b. *An estimate of its financial effect or a statement that such an estimate cannot be made.*
- (f) *adjustments for the effects of significant transactions or other events that occur between the date of the components balance sheet and not already recognised in its financial statements and the date of the auditor's report on the group's consolidated financial statements when the financial statements of the component to be used for consolidation are not drawn upto the same balance sheet date as that of the parent;*
 - (g) *In case of a foreign component, adjustments to convert a component's audited financial statements prepared under the component's local GAAP to the GAAP under which the consolidated financial statements are prepared.*
 - (h) *determination of movement in equity attributable to the minorities interest/non-controlling interest since the date of acquisition of the subsidiary.*
 - (i) *adjustments of deferred tax on account of temporary differences arising out of elimination of profit and losses resulting from intragroup transactions and undistributed profits of the component in case of consolidated financial statements prepared under Ind AS.*

The adjustments required for preparation of consolidated financial statements are made in memorandum records kept for the purpose by the parent. The auditor should review the memorandum records to verify the adjustment entries made in the preparation of consolidated financial statements. Apart from reviewing the memorandum records, the auditor should inter alia:

- (a) verify that the intra group transactions and account balances have been eliminated;*
- (b) verify that the consolidated financial statements have been prepared using uniform accounting policies for like transactions and other events in similar circumstances;*
- (c) verify that adequate disclosures have been made in the consolidated financial statements of application of different accounting policies in case, it was impracticable to harmonize them. Applying a requirement is impracticable when the entity cannot apply it after making every reasonable effort to do so⁶.*
- (d) verify the adjustments made to harmonise the different accounting policies including adjustments made by management to convert a component's financial statements prepared under the component's GAAP to the GAAP under which the consolidated financial statements are prepared;*
- (e) verify the calculation of minorities/non-controlling interest;*
- (f) verify adjustments relating to deferred tax on account of temporary differences arising out of elimination of profit and losses resulting from Intergroup transactions (where the parent's accounts are maintained in Ind AS);*
- (g) verify that income and expenses of the subsidiary are included in consolidated financial statements from the date it gains control until the date when the entity ceases to control the subsidiary and further such income and expenses are based on the amounts of the assets and liabilities recognised in consolidated financial statements at the acquisition date⁷.*

The auditor should gain an understanding of the procedures adopted by the management of the enterprise to make the above mentioned adjustments. This helps the auditor in reducing the audit risk to an acceptably low level.

One of the important adjustment that may be required in the current period is determination of impairment loss that might exist for goodwill arising on consolidation. Goodwill arising on consolidation is carried at the value determined at the date of

⁶ AS 21/ AS 23/ AS 27 permit application of different accounting policies, if it is impractical to use uniform accounting policies, that fact should be disclosed together with the proportion of the items in the consolidated financial statements to which the different accounting policies have been applied. Ind AS 28 permits that financial statement of an associate can be prepared using different accounting policies if it is impractical to do so however adjustment shall be made to make the accounting policies conform to those of parent when the financial statements are used by parent in applying the equity method.

⁷ Where the consolidated financial statements are prepared under Indian Accounting Standards.

acquisition of the component, and the same is to be tested for impairment loss at every balance sheet date.

The auditor should examine whether any impairment loss has been determined by the parent. If yes, the auditor should examine the procedure followed for determination of impairment loss. The auditor should satisfy himself that the amount of impairment loss determined is fair. In case the impairment loss in goodwill of a component has been determined in foreign currency, the auditor should verify if any amount of loss in local currency need to be adjusted from currency translation reserve on account of movement in the exchange rate from the date when the goodwill was first accounted for in the consolidated financial statement of parent, to the date of determination of impairment loss.

The auditor should also perform audit procedures to understand and verify whether Intragroup losses are indicating an impairment loss that requires recognition in the consolidated financial statements.

Apart from verifying that the calculation and disclosures regarding minorities/non-controlling interest have been made appropriately, the auditor also determines, in cases where the minority interests' share of the losses exceed the minority /non-controlling interests' share of the equity, the excess, and any further losses applicable to the minority interest, have been accounted for in accordance with the relevant accounting standards.

The financial statements of the components used in the consolidation should be drawn up to the same reporting date as that of the parent. If it is not practicable to draw up the financial statements of one or more components to such date and, accordingly, those financial statements are drawn up to different reporting dates, adjustments should be made for the effects of significant transactions or other events that occur between those dates and the date of the parent's financial statements. In any case, the difference between reporting dates should not be more than six months in case of financial statements under AS and three months in case of financial statements under Ind AS. The auditor of the consolidated financial statements should review other components' results between its financial reporting date and that of the parent for significant transactions or other events that have taken place during the period and, therefore, need to be reflected in the consolidated financial statements. Recognition should be given by disclosure or otherwise to the effect of intervening events which materially affect the financial position, results of operations or cash flows.

The fundamental accounting assumption of "consistency" requires the auditor of the consolidated financial statements to consider whether the length of the reporting periods and any difference in financial year-ends are the same from period to period. If there have been any changes in the respective reporting periods of the components included in the consolidated financial statements that have a material effect on the financial statements, the auditor should ensure that the entity discloses such changes and the manner of treatment in the financial statements.

The Ministry of Corporate Affairs has issued a Circular number 39/2014 dated October 14, 2014 stating that Schedule III to the Act read with the applicable Accounting Standards does not envisage that a company while preparing its consolidated financial statements merely repeats the disclosures made by it under separate financial statements being consolidated. In the consolidated financial statements, the company would need to give all disclosures relevant to consolidated financial statements only.

Further, Accounting Standard (AS) 21 also lays down certain principles that should be observed while giving the information which is part of the separate financial statements of the Components but that need not be reported in the notes and other explanatory material of the consolidated financial statements. The auditor should:

- (a) examine that the notes required by the applicable standards which are necessary for presenting a true and fair view of the consolidated financial statements have been included in the consolidated financial statements as an integral part thereof; and*
- (b) examine that additional statutory information disclosed in the separate financial statements of the subsidiary and/or a parent having bearing on the true and fair view of the consolidated financial statements have been disclosed in the consolidated financial statements.*

In addition, the information required pursuant to Schedule III to the Companies Act, 2013 ('general instructions for the preparation of consolidated financial statements') should be disclosed. For example, following information is also required to be disclosed in the consolidated financial statements separately for the parent and each of its components (including foreign component) which has been consolidated:

- (i) amount of net assets and net assets as a percentage of consolidated net assets;*
- (ii) amount of share in profit or loss and the percentage share in profit or loss as a percentage of consolidated profit or loss;*
- (iii) amount in other comprehensive income (OCI) and the percentage of OCI as a percentage of Consolidated OCI.⁸*

As regards consolidation adjustments (including elimination of intra group transactions), it should be ensured that these are either disclosed as a single line item separately or adjusted in the information (e.g. net assets) disclosed for the parent and its each component.

The Ind AS 110 does not give a list of information which is part of the separate financial statement of the components but that need not be reported in the notes and other explanatory material of the consolidated financial statements, however, based on section 129(4) and MCA circular 39/2014 as referred above, it can be construed that, even in consolidated financial statements under Ind AS, only those disclosures should be given which are relevant to consolidated financial statements.

⁸ For companies which are covered by Ind AS.

Based on the above discussion, in case of companies, the information such as the following given in the notes to the separate financial statements of the parent and/or the subsidiary, need not be included in the consolidated financial statements.

- (i) Source from which bonus shares are issued, e.g., capitalisation of profits or Reserves or from Securities Premium Account.*
- (ii) Disclosure of all unutilised monies out of the issue indicating the form in which such unutilised funds have been invested.*
- (iii) Disclosure required under Micro, Small and Medium Enterprises Development Act, 2006.*
- (iv) A statement of investments (whether shown under “financial assets or non-financial assets as stock-in-trade) separately classifying trade investments and other investments, showing the names of the bodies corporate (indicating separately the names of the bodies corporate under the same management) in whose shares or debentures, investments have been made (including all investments, whether existing or not, made subsequent to the date as at which the previous balance sheet was made out) and the nature and extent of the investment so made in each such body corporate.*
- (v) Value of imports calculated on C.I.F. basis by the company during the financial year in respect of:*
 - (a) raw materials;*
 - (b) components and spare parts;*
 - (c) capital goods.*
- (vi) Expenditure in foreign currency during the financial year on account of royalty, know-how, professional and consultation fees, interest, and other matters.*
- (vii) Value of all imported raw materials, spare parts and components consumed during the financial year and the value of all indigenous raw materials, spare parts and components similarly consumed and the percentage of each to the total consumption.*
- (viii) The amount remitted during the year in foreign currencies on account of dividends, with a specific mention of the number of non-resident shareholders, the number of shares held by them on which the dividends were due and the year to which the dividends related.*
- (ix) Earnings in foreign exchange classified under the following heads, namely:-*
 - (a) export of goods calculated on F.O.B. basis;*
 - (b) royalty, know-how, professional and consultation fees;*
 - (c) interest and dividend;*
 - (d) other income, indicating the nature thereof.*

However, notwithstanding the above, the auditor needs to ensure compliance with disclosure requirements of applicable accounting standards and other applicable laws for consolidated financial statements.

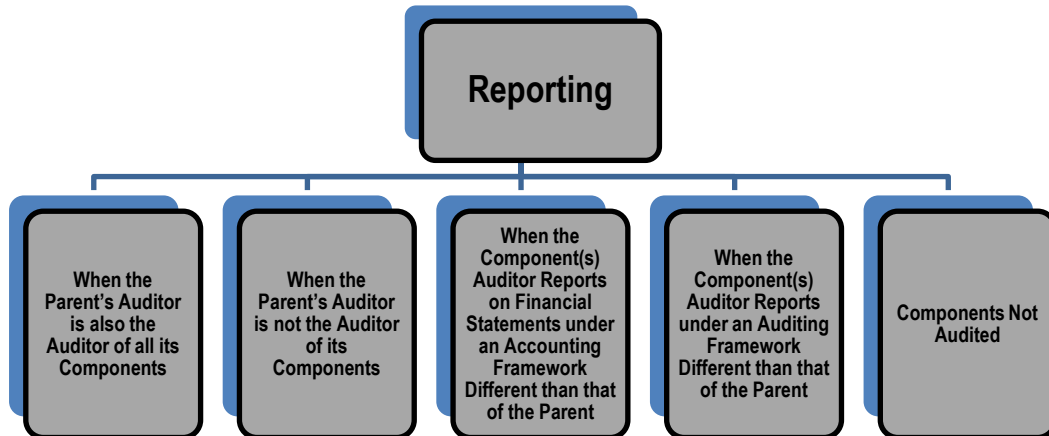

10.8 Management Representations

SA 580, "Written Representations" requires the auditor to obtain written representations from management and, where appropriate, those charged with governance. The auditor of the consolidated financial statements should obtain evidence that the management of the parent acknowledges its responsibility for a true and fair presentation of the consolidated financial statements in accordance with the financial reporting framework applicable to the parent and that parent management has approved the consolidated financial statements. In addition, the auditor of the consolidated financial statements obtains written representations from parent management on matters material to the consolidated financial statements. Examples of such representations include:

- (a) Completeness of components included in the consolidated financial statements;
- (b) Identification of reportable segments for segmental reporting;
- (c) Identification of related parties and related party transactions for reporting;
- (d) ***Appropriateness and completeness of permanent and current period consolidation adjustments, including the elimination of intra-group transactions.***

10.9 Reporting

There could be two situations in an audit of consolidated financial statements—when the parent's auditor is also the auditor of all the components to be included in the consolidated financial statements and when the parent's auditor is not the auditor of one or more components and therefore, uses the work of other auditors in the audit. ***The auditor should, while preparing the report, consider the requirements of Standard on Auditing (SA) 700, "Forming an Opinion and Reporting on Financial Statements", SA 705, "Modifications to the Opinion in the Independent Auditor's Report and SA 706, "Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report.*** Where, the auditor uses the work of other auditors in the audit of consolidated financial statements, the requirements of SA 600, "Using the Work of Another Auditor" should also be considered.

10.9.1 When the Parent’s Auditor is also the Auditor of all its Components

While drafting the audit report, the auditor should report whether principles and procedures for preparation and presentation of consolidated financial statements as laid down in the relevant accounting standards have been followed. In case of any departure or deviation, the auditor should make adequate disclosure in the audit report so that users of the consolidated financial statements are aware of such deviation. Auditor should issue an audit report expressing opinion whether the consolidated financial statements give a true and fair view of the state of affairs of the Group as on balance sheet date and as to whether consolidated profit and loss statement gives true and fair view of the results of consolidated profit or losses of the Group for the period under audit. Where the consolidated financial statements also include a cash flow statement, the auditor should also give his opinion on the true and fair view of the cash flows presented by the consolidated cash flow statements.

10.9.2 When the Parent’s Auditor is not the Auditor of all its Components

In a case where the parent’s auditor is not the auditor of all the components included in the consolidated financial statements, the auditor of the consolidated financial statements should also consider the requirement of SA 600.

As prescribed in SA 706, if the auditor considers it necessary to make reference to the audit of the other auditors, the auditor’s report on the consolidated financial statements should disclose clearly the magnitude of the portion of the financial statements audited by the other auditor(s). This may be done by stating aggregate rupee amounts or percentages of total assets, revenues and cash flows of components included in the consolidated financial statements not audited by the parent’s auditor. Total assets, revenues and cash flows not audited by the parent’s auditor should be presented before giving effect to permanent and current period consolidation adjustments. Reference in the report of the auditor on the consolidated financial statements to the fact that part of the audit of the group was made by other auditor(s) is not to be construed as a qualification of the opinion but rather as an indication of the divided responsibility between the auditors of the parent and its subsidiaries.

10.9.3 When the Component(s) Auditor Reports on Financial Statements under an Accounting Framework Different than that of the Parent

The parent may have components located in multiple geographies outside India applying an accounting framework (GAAP) that is different than that of the parent in preparing its financial statements. Foreign components prepare financial statements under different financial reporting frameworks, which may be a well-known framework (such as US GAAP or IFRS) or the local GAAP of the jurisdiction of the component. Local component auditors may be unable to report on financial statements prepared using the parent's GAAP because of their unfamiliarity with such GAAP.

When a component's financial statements are prepared under an accounting framework that is different than that of the framework used by the parent in preparing group's consolidated financial statements, the parent's management perform a conversion of the components' audited financial statements from the framework used by the component to the framework under which the consolidated financial statements are prepared. The conversion adjustments are audited by the principal auditor to ensure that the financial information of the component(s) is suitable and appropriate for the purposes of consolidation. Suggested format of the audit report to be issued by the auditor of the consolidated financial statements in this circumstance is given in Appendix I to this Guidance Note.

A component may alternatively prepare financial statements on the basis of the parent's accounting policies, as outlined in the group accounting manual, to facilitate the preparation of the group's consolidated financial statements. The group accounting manual would normally contain all accounting policies, including relevant disclosure requirements, which are consistent with the requirements of the financial reporting framework under which the group's consolidated financial statements are prepared. The local component auditor can then audit and issue an audit report on the components financial statements prepared in accordance with "group accounting policies".

When applying the approach in paragraph 53 above of using group accounting policies as the financial accounting framework for components to report under, the principal/parent auditors should perform procedures necessary to determine compliance of the group accounting policies with the GAAP applicable to the parent's financial statements. This ensures that the information prepared under the requirements of the group accounting policies will be directly usable and relevant for the preparation of consolidated financial statements by the parent entity, eliminating the need for auditing by the auditor, the differences between the basis used for the component's financial statements and that of the consolidated financial statements. The Principal auditor can then decide whether or not to rely on the components' audit report and make reference to it in the auditor's report on the consolidated financial statements. See paragraph 50 for additional guidance.

10.9.4 When the Component(s) Auditor Reports under an Auditing Framework Different than that of the Parent

Normally, audits of financial statements, including consolidated financial statements, are performed under auditing standards generally accepted in India ("Indian GAAS"). In order to maintain consistency of the auditing framework and to enable the parent auditor to rely and refer to the other auditor's audit report in their audit report on the consolidated financial statements, the components' financial statements should also be audited under a framework that corresponds to Indian GAAS.

10.9.5 Components Not Audited

Generally, the financial statements of all components included in consolidated financial statements should be audited or subjected to audit procedures in the context of a multi-location group audit. Such audits and audit procedures can be performed by the auditor reporting on the consolidated financial statements or by the components' auditor.

Where the financial statements of one or more components continue to remain unaudited, the auditor reporting on the consolidated financial statements should consider unaudited components in evaluating a possible modification to his report on the consolidated financial statements. The evaluation is necessary because the auditor (or other auditors, as the case may be) has not been able to obtain sufficient appropriate audit evidence in relation to such consolidated amounts/balances. In such cases, the auditor should evaluate both qualitative and quantitative factors on the possible effect of such amounts remaining unaudited when reporting on the consolidated financial statements using the guidance provided in SA 705, "Modifications to the Opinion in the Independent Auditor's Report".

Note: Students may refer Appendix 1 of Guidance Note on Consolidated Financial Statements for illustrative format of independent auditor's report on the consolidated financial statements of a group under the Companies Act, 2013 and the rules thereunder.

16.8	Right and Duties of Cost Auditor	16.18
16.9	True and Fair Cost of Production.....	16.18

11.1 Introduction

Lending constitutes a major activity of a bank. The core business of banks is accepting deposits for onward lending. Advances, generally, constitute the largest item on the assets side of the balance sheet of a bank and are major source of its income.

Advances generally comprises of:

- a) *money lent by the bank to its customers including interest accrued and due;*
- b) *debit balances in the account of the depositors;*
- c) *Inter-Bank Participation Certificates.*

Audit of advances is one of the most important areas covered by auditors. It is necessary that auditors should have adequate knowledge of the banking industry and the regulations governing the banks. Auditors must be aware of the various functional areas of the bank/branches, its processes, procedures, systems and prevailing internal controls.

11.2 Legal Framework

There is an elaborate legal framework governing the functioning of banks in India. The principal enactments which govern the functioning of various types of banks are:

- ◆ Banking Regulation Act, 1949
- ◆ State Bank of India Act, 1955
- ◆ Companies Act, 2013
- ◆ State Bank of India (Subsidiary Banks) Act, 1959
- ◆ Banking Companies (Acquisition and Transfer of Undertakings) Act, 1970
- ◆ Regional Rural Banks Act, 1976
- ◆ Banking Companies (Acquisition and Transfer of Undertakings) Act, 1980
- ◆ Information Technology Act, 2000
- ◆ Prevention of Money Laundering Act, 2002
- ◆ Securitisation and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002
- ◆ Credit Information Companies (Regulation) Act, 2005

11.2 Advanced Auditing and Professional Ethics

◆ Payment and Settlement Systems Act, 2007

Besides, the above enactments, the provisions of the Reserve Bank of India Act, 1934, also affect the functioning of banks. The Act gives wide powers to the RBI to give directions to banks which also have considerable effect on the functioning of banks.

11.3 Form and Content of Financial Statements

Sub-sections (1) and (2) of section 29 of the Act deal with the form and content of financial statements of a banking company and their authentication. These sub-sections are also applicable to nationalised banks, State Bank of India, subsidiaries of the State Bank of India, and Regional Rural Banks.

Every banking company is required to prepare a Balance Sheet and a Profit and Loss Account in the forms set out in the Third Schedule to the Act or as near thereto as the circumstances admit. Form A of the Third Schedule to the Banking Regulation Act, 1949, contains the form of Balance Sheet and Form B contains the form of Profit and Loss Account.

Every banking company needs to comply with the disclosure requirements under the various Accounting Standards, as specified under section 133 of the Companies Act, 2013, read with Rule 7 of the Companies (Accounts) Rules 2014, in so far as they apply to banking companies or the Accounting Standards issued by the ICAI.

11.4 Audit of Accounts

Sub-section (1) of section 30 of the Act requires that the balance sheet and profit and loss account of a banking company should be audited by a person duly qualified under any law for the time being in force to be an auditor of companies.

Qualifications of Auditor - Students may refer section 141 of the Companies Act, 2013 discussed in Chapter - 6 (The Company Audit) of this Study Material.

Appointment of Auditor - As per the provisions of the relevant enactments, the auditor of a banking company is to be appointed at the annual general meeting of the shareholders, whereas the auditor of a nationalised bank is to be appointed by the bank concerned acting through its Board of Directors. In either case, approval of the Reserve Bank is required before the appointment is made. The auditors of the State Bank of India are to be appointed by the Comptroller and Auditor General of India in consultation with the Central Government. The auditors of the subsidiaries of the State Bank of India are to be appointed by the State Bank of India. The auditors of regional rural banks are to be appointed by the bank concerned with the approval of the Central Government.

Remuneration of Auditor - The remuneration of auditor of a banking company is to be fixed in accordance with the provisions of section 142 of the Companies Act, 2013 (i.e., by the company in general meeting or in such manner as the company in general meeting may determine). The remuneration of auditors of nationalised banks and State Bank of India is to be fixed by the Reserve Bank of India in consultation with the Central Government.

Powers of Auditor - The auditor of a banking company or of a nationalised bank, State Bank

of India, a subsidiary of State Bank of India, or a regional rural bank has the same powers as those of a company auditor in the matter of access to the books, accounts, documents and vouchers.

Auditor's Report - In the case of a nationalised bank, the auditor is required to make a report to the Central Government in which he has to state the following:

- (a) whether, in his opinion, the balance sheet is a full and fair balance sheet containing all the necessary particulars and is properly drawn up so as to exhibit a true and fair view of the affairs of the bank, and in case he had called for any explanation or information, whether it has been given and whether it is satisfactory;
- (b) whether or not the transactions of the bank, which have come to his notice, have been within the powers of that bank;
- (c) whether or not the returns received from the offices and branches of the bank have been found adequate for the purpose of his audit;
- (d) whether the profit and loss account shows a true balance of profit or loss for the period covered by such account; and
- (e) any other matter which he considers should be brought to the notice of the Central Government.

The report of auditors of State Bank of India is also to be made to the Central Government and is almost identical to the auditor's report in the case of a nationalised bank.

Format of Audit Report - The auditors, central as well as branch, should also ensure that the audit report issued by them complies with the requirements of Revised SA 700, "Forming an Opinion and Reporting on Financial Statements", SA 705, "Modifications to the Opinion in the Independent Auditor's Report" and SA 706, "Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report". The auditor should ensure that not only information relating to number of unaudited branches is given but quantification of advances, deposits, interest income and interest expense for such unaudited branches has also been disclosed in the audit report. Such disclosure in the audit report is not only in accordance with the best international trends but also provides useful information to users of financial statements.

In addition to matters on which he is required to report to the shareholders under the Companies Act, 2013, the auditor of a banking company is required to state in his report:

- (a) Whether or not the information and explanations required by him have been found to be satisfactory;
- (b) whether or not the transactions of the company which have come to his notice have been within the powers of the company;
- (c) whether or not the returns received from the branch offices of the company have been found adequate for the purpose of his audit;
- (d) whether the profit and loss account shows a true balance of profit or loss for the period covered by such account; and

11.4 Advanced Auditing and Professional Ethics

(e) any other matter which he considers should be brought to the notice of the shareholders of the company.

It may be noted that, in addition to the aforesaid, the auditor of a banking company is also required to state in his report in respect of matters covered by Section 143 of the Companies Act, 2013. However, it is pertinent to mention that the reporting requirements relating to the Companies (Auditor's Report) Order, 2016 is not applicable to a banking company as defined in clause (c) of section 5 of the Banking Regulation Act, 1949.

As per reporting requirements cast through Rule 11 of the Companies (Audit and Auditors) Rules, 2014 the auditor's report shall also include their views and comments on the following matters, namely:

- i) whether the bank has disclosed the impact, if any, of the pending litigations on its financial position in its financial statements.***
- ii) whether the bank has made provision, as required under the law or accounting standards, for material foreseeable losses, if any, on long term contracts including derivative contracts.***
- iii) whether there has been any delay in transferring amounts, required to be transferred to the Investment Education and Protection Fund by the bank.***

Long Form Audit Report - Besides the audit report as per the statutory requirements discussed above, the terms of appointment of auditors of public sector banks, private sector banks and foreign banks (as well as their branches), require the auditors to also furnish a long form audit report (LFAR). The matters which the banks require their auditors to deal with in the long form audit report have been specified by the Reserve Bank of India.

The LFAR is to be submitted before 30th June every year. To ensure timely submission of LFAR, proper planning for completion of the LFAR is required. While the format of LFAR does not require an executive summary to be given, members may consider providing the same to bring out the key observations from the whole document.

Reporting to RBI - The RBI issued a Circular relating to implementation of recommendations of Committee on Legal Aspects of Bank Frauds applicable to all scheduled commercial banks (excluding Regional Rural Banks). Regarding liability of accounting and auditing profession, the said circular provided as under:

"If an accounting professional, whether in the course of internal or external audit or in the process of institutional audit finds anything susceptible to be fraud or fraudulent activity or act of excess power or smell any foul play in any transaction, he should refer the matter to the regulator. Any deliberate failure on the part of the auditor should render himself liable for action".

As per the above requirement, the member shall be required to report the kind of matters stated in the circular to RBI. In this regard, attention of the members is also invited to Clause 1 of Part I of the Second Schedule to the Chartered Accountants Act, 1949, which states that a chartered accountant in practice shall be deemed guilty of professional misconduct, if he

discloses information acquired in the course of his professional engagement to any person other than his client, without the consent of his client or otherwise than as required by any law for the time being in force.

Under the said provision, if a member of the Institute *suo motu* discloses any information regarding any actual or possible fraud or foul play to the RBI, the member would be liable for disciplinary action by the Institute. However, a member is not held guilty under the said clause if the client explicitly permits the auditor to disclose the information to a third party. If the above-mentioned requirement of the Circular is included in the letter of appointment (which constitutes the terms of audit engagement) then it would amount to the explicit permission by the concerned bank (client) to disclose information to the third party, i.e., the RBI.

Auditor should also consider the provisions of SA 250, "Consideration of Laws and Regulations in an Audit of Financial Statements". The said Standard explains that the duty of confidentiality is over-ridden by statute, law or by courts.

SA 240, "The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements" states that an auditor conducting an audit in accordance with SAs is responsible for obtaining reasonable assurance that the financial statements taken as a whole are free from material misstatement, whether caused by fraud or error.

It must be noted that auditor is not expected to look into each and every transaction but to evaluate the system as a whole. Therefore, if the auditor while performing his normal duties comes across any instance, he should report the matter to the RBI in addition to Chairman/Managing Director/Chief Executive of the concerned bank.

Duty to report on Frauds under the Companies Act, 2013 - As per sub-section 12 of section 143 of the Companies Act, 2013, if an auditor of a company, in the course of the performance of his duties as auditor, has reason to believe that an offence of fraud involving such amount or amounts as may be prescribed, is being or has been committed in the company by its officers or employees, the auditor shall report the matter to the Central Government within such time and in such manner as may be prescribed.

[Note: For detailed understanding on duty to report on fraud under Companies Act, 2013, students may refer Chapter-6 (The Company Audit) of this Study Material]

11.4.1 Conducting an Audit - The audit of banks or of their branches involves the following stages -

1. Initial consideration by the Statutory auditor
2. Identifying and Assessing the Risks of Material Misstatements
3. Understanding the Bank and Its Environment including Internal Control
4. Understand the Bank's Accounting Process
5. Understanding the Risk Management Process
6. Engagement Team Discussions

11.6 Advanced Auditing and Professional Ethics

7. Establish the Overall Audit Strategy
8. Develop the Audit Plan
9. Audit Planning Memorandum
10. Determine Audit Materiality
11. Consider Going Concern
12. Assess the Risk of Fraud including Money Laundering
13. Assess Specific Risks
14. Risk Associated with Outsourcing of Activities
15. Response to the Assessed Risks
16. Stress Testing
17. BASEL III framework.

1. Initial consideration by the statutory auditor

(i) **Declaration of Indebtedness:** The RBI has advised that the banks, before appointing their statutory central/circle/branch auditors, should obtain a declaration of indebtedness.

(ii) **Internal Assignments in Banks by Statutory Auditors:** The RBI decided that the audit firms should not undertake statutory audit assignment while they are associated with internal assignments in the bank during the same year.

(iii) **Planning:** Standard on Auditing (SA) 300, "Planning an Audit of Financial Statements" requires that the auditor shall undertake the following activities prior to starting an initial audit:

(a) Performing procedures required by SA 220, "Quality Control for Audit Work" regarding the acceptance of the client relationship and the specific audit engagement; and

(b) ***Establish understanding of terms of engagement as per SA 210, "Agreeing the Terms of Audit Engagements"***

(iv) **Communication with Previous Auditor:** As per Clause (8) of the Part I of the First Schedule to the Chartered Accountants Act, 1949, a chartered accountant in practice cannot accept position as auditor previously held by another chartered accountant without first communicating with him in writing.

(v) **Terms of Audit Engagements:** SA 210, "Terms of Audit Engagements" requires that for each period to be audited, the auditor should agree on the terms of the audit engagement with the bank before beginning significant portions of fieldwork. It is imperative that the terms of the engagement are documented, in order to prevent any confusion as to the terms that have been agreed in relation to the audit and the respective responsibilities of the management and the auditor, at the beginning of an audit relationship.

(vi) **Initial Engagements:** The auditor needs to perform the audit procedures as mentioned in SA 510 "Initial Audit Engagements-Opening Balances" and if after performing that procedures, the auditor concludes that the opening balances contain misstatements which materially affect the financial statements for the current period and the effect of the same is

not properly accounted for and adequately disclosed, the auditor should express a qualified opinion or an adverse opinion, as appropriate.

(vii) Assessment of Engagement Risk: The assessment of engagement risk is a critical part of the audit process and should be done prior to the acceptance of an audit engagement since it affects the decision of accepting the engagement and also in planning decisions if the audit is accepted.

(viii) Establish the Engagement Team: The assignment of qualified and experienced professionals is an important component of managing engagement risk. The size and composition of the engagement team would depend on the size, nature, and complexity of the bank's operations.

(ix) Understanding the Bank and its Environment: SA 315 "Identifying and Assessing the Risks of Material Misstatement Through Understanding the Entity and Its Environment" lays down that the auditor should obtain an understanding of the entity and its environment, including its internal control, sufficient to identify and assess the risks of material misstatement of the financial statements whether due to fraud or error, and sufficient to design and perform further audit procedures.

2. Identifying and Assessing the Risks of Material Misstatements: SA 315 requires the auditor to identify and assess the risks of material misstatement at the financial statement level and the assertion level for classes of transactions, account balances, and disclosures to provide a basis for designing and performing further audit procedures.

3. Understanding the Bank and Its Environment including Internal Control: An understanding of the bank and its environment, including its internal control, enables the auditor:

- ◆ to identify and assess risk;
- ◆ to develop an audit plan so as to determine the operating effectiveness of the controls, and to address the specific risks.

4. Understand the Bank's Accounting Process: The accounting process produces financial and operational information for management's use and it also contributes to the bank's internal control. Thus, understanding of the accounting process is necessary to identify and assess the risks of material misstatement whether due to fraud or not, and to design and perform further audit procedures.

5. Understanding the Risk Management Process: Management develops controls and uses performance indicators to aid in managing key business and financial risks. An effective risk management system in a bank generally requires the following:

- ◆ *Oversight and involvement in the control process by those charged with governance:* Those charged with governance (BOD/Chief Executive Officer) should approve written risk management policies. The policies should be consistent with the bank's business objectives and strategies, capital strength, management expertise, regulatory requirements and the types and amounts of risk it regards as acceptable.

11.8 Advanced Auditing and Professional Ethics

- ◆ *Identification, measurement and monitoring of risks:* Risks that could significantly impact the achievement of bank's goals should be identified, measured and monitored against pre-approved limits and criteria.
 - ◆ *Control activities:* A bank should have appropriate controls to manage its risks, including effective segregation of duties (particularly, between front and back offices), accurate measurement and reporting of positions, verification and approval of transactions, reconciliation of positions and results, setting of limits, reporting and approval of exceptions, physical security and contingency planning.
 - ◆ *Monitoring activities:* Risk management models, methodologies and assumptions used to measure and manage risk should be regularly assessed and updated. This function may be conducted by the independent risk management unit.
 - ◆ *Reliable information systems:* Banks require reliable information systems that provide adequate financial, operational and compliance information on a timely and consistent basis. Those charged with governance and management require risk management information that is easily understood and that enables them to assess the changing nature of the bank's risk profile.
- 6. Engagement Team Discussions:** The engagement team should hold discussions to gain better understanding of banks and its environment, including internal control, and also to assess the potential for material misstatements of the financial statements.
- 7. Establish the Overall Audit Strategy:** SA 300 "Planning an Audit of financial Statements" states that the objective of the auditor is to plan the audit so that it will be performed in an effective manner. For this purpose, the audit engagement partner should:
- ◆ establish the overall audit strategy, prior to the commencement of an audit; and
 - ◆ involve key engagement team members and other appropriate specialists while establishing the overall audit strategy, which depends on the characteristics of the audit engagement.
- 8. Develop the Audit Plan:** SA 300 deals with the auditor's responsibility to plan an audit of financial statements in an effective manner. It requires the involvement of all the key members of the engagement team while planning an audit. Before starting the planning of an audit, the auditor must perform the procedures as defined under SA 220, "Quality Control for an Audit of Financial Statements" for reviewing the ethical and independence requirements. In addition to this, the auditor is also required to comply with the requirements of SA 210, "Agreeing the Terms of Audit Engagement".
- 9. Audit Planning Memorandum:** The auditor should summarise their audit plan by preparing an audit planning memorandum in order to:
- ◆ Describe the expected scope and extent of the audit procedures to be performed by the auditor.
 - ◆ Highlight all significant issues and risks identified during their planning and risk assessment activities, as well as the decisions concerning reliance on controls.
 - ◆ Provide evidence that they have planned the audit engagement appropriately and have

responded to engagement risk, pervasive risks, specific risks, and other matters affecting the audit engagement.

10. Determine Audit Materiality: The auditor should consider the relationship between the audit materiality and audit risk when conducting an audit. The determination of audit materiality is a matter of professional judgment and depends upon the knowledge of the bank, assessment of engagement risk, and the reporting requirements for the financial statements.

11. Consider Going Concern: In obtaining an understanding of the bank, the auditor should consider whether there are events and conditions which may cast significant doubt on the bank's ability to continue as a going concern.

12. Assess the Risk of Fraud including Money Laundering: As per SA 240 "The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements", the auditor's objective are to identify and assess the risks of material misstatement in the financial statements due to fraud, to obtain sufficient appropriate audit evidence on those identified misstatements and to respond appropriately. The attitude of professional skepticism should be maintained by the auditor so as to recognise the possibility of misstatements due to fraud.

The RBI has framed specific guidelines that deal with prevention of money laundering and "Know Your Customer (KYC)" norms. The RBI has from time to time issued guidelines ("Know Your Customer Guidelines – Anti Money Laundering Standards"), requiring banks to establish policies, procedures and controls to deter and to recognise and report money laundering activities.

13. Assess Specific Risks: The auditors should identify and assess the risks of material misstatement at the financial statement level which refers to risks that relate pervasively to the financial statements as a whole, and potentially affect many assertions.

14. Risk Associated with Outsourcing of Activities: The modern day banks make extensive use of outsourcing as a means of both reducing costs as well as making use of services of an expert not available internally. There are, however, a number of risks associated with outsourcing of activities by banks and therefore, it is quintessential for the banks to effectively manage those risks.

15. Response to the Assessed Risks: SA 330 "The Auditor's Responses to Assessed Risks" requires the auditor to design and implement overall responses to address the assessed risks of material misstatement at the financial statement level. The auditor should design and perform further audit procedures whose nature, timing and extent are based on and are responsive to the assessed risks of material misstatement at the assertion level.

16. Stress Testing: RBI has required that all commercial banks shall put in place a Board approved 'Stress Testing framework' to suit their individual requirements which would integrate into their risk management systems.

17. BASEL III framework: The Basel Committee on Banking Supervision (BCBS) and the Financial Stability Board (FSB) has undertaken an extensive review of the regulatory framework in the wake of the sub-prime crisis. In the document titled 'Basel III: A global regulatory framework for more resilient banks and banking systems', released by the BCBS in December 2010, it has inter alia proposed certain minimum set of criteria for inclusion of

11.10 Advanced Auditing and Professional Ethics

instruments in the new definition of regulatory capital.

[**Note:** For detailed understanding of stages involved for conducting an audit, as discussed above, students may refer Guidance Note on Audit of Banks.]

Demonetisation

On 8th November, 2016, the Government announced Demonetisation Program by declaring withdrawal of legal tender status to currency notes denomination of ₹. 1000 and ₹. 500 (herein referred as Specified Bank Notes (SBN)) effective from November 09, 2016. Consequent to the announcement, there have been a series of announcements and notifications by the RBI regarding exchange facility, withdrawal limit, etc.

The most important aspect of Demonetisation program is to reconcile the balance of SBN and its movement by banks to ensure no misuse by branch officials. Reporting of the said details by banks has also been prescribed.

11.4.2 Special Considerations in a CIS Environment - As in today's environment all banks have embarked upon a large scale computerization, this has resulted in changes in the processing and storage of information and affects the organisation and procedures employed by the entity to achieve adequate internal control. Thus, while the overall objective and scope of audit do not change simply because data is maintained on computers, the procedures followed by the auditor in his study and evaluation of the accounting system and related internal controls and the nature, timing and extent of his other audit procedures are affected in a CIS environment.

11.4.3 Internal Audit and Inspection - Banks generally have a well organised system of internal audit. Their internal auditors pay frequent visit to the branches. They are an important link in the internal control of the bank. The systems of internal audit in different banks also have a system of regular inspection of branches and head office. The internal audit and inspection function is carried out by a separate department within the bank by firms of chartered accountants.

11.5 Internal Control in Certain Selected Areas

11.5.1 General

- (a) The staff and officers of a bank should be shifted from one position to another frequently and without prior notice.
- (b) The work of one person should always be checked by another person (usually by an officer) in the normal course of business.
- (c) The arithmetical accuracy of the books should be proved independently every day.
- (d) All bank forms (e.g. Cheque books, demand draft books, travellers' cheques etc.) should be kept in the possession of an officer, and another responsible officer should occasionally verify the stock of such stationery.

- (e) The mail should be opened by a responsible officer. Signatures on all the letters and advices received from other branches of the bank or its correspondence should be checked by an officer with the signature book.
- (f) The signature book and the telegraphic code book should be kept with responsible officers and used and seen by authorised officers only.
- (g) The bank should take out insurance policies against loss and employees' infidelity.
- (h) The powers of officers of different grades should be clearly defined.
- (i) There should be surprise inspection of head office and branches at periodic interval by the internal audit department. The irregularities pointed out in the inspection reports should be promptly rectified.

11.5.2 Cash

- (a) Cash should be kept in the joint custody of two responsible officers.
- (b) In addition to normal checking by the chief cashier, cash should be test-checked daily and counted in full occasionally by a responsible officer unconnected with the cash department. Actual cash in hand should agree with the balance shown by the Day Book every day.
- (c) The cashier should have no access to the customer's ledger accounts and the Day Book. This is an important safeguard. Bank managements are often tempted to use cashiers because of their shorter working hours as ledger clerks in the absence of regular staff on leave, etc. This can be a very expensive price of economy.
- (d) The counterfoil cash receipt vouchers (e.g. counterfeits of pay-in-slips lodged by the depositors) should be signed by an officer in Cash Department, in addition to the receiving cashier.
- (e) Payments should be made only after the vouchers (e.g. cheques, demand drafts etc.) have been passed for payment by the proper officer and have been entered in the customer's account.
- (f) Receipt and payment scrolls or their totals should be compared with the cash column of the Day-Book by independent persons.
- (g) Where the teller system is prevalent-
 - (i) A limit should be placed on the powers of tellers to make payment.
 - (ii) All vouchers relating to the accounts of customers which the tellers handle should first be sent to them and entered by them in the ledger cards.
 - (iii) Total payment made by a teller should be reconciled with the cash columns of the Voucher Summary Sheet of the ledger concerned every day.
 - (iv) There should be frequent rotation of tellers.

11.5.3 Clearings

- (a) Cheques received by the bank in clearing should be checked with the list accompanying them. Independent list should be prepared for cheques debited to different customers

11.12 Advanced Auditing and Professional Ethics

accounts and those returned unpaid and these should be checked by officers. The total number and amount of cheques included in these lists should be agreed with the list first mentioned by a person unconnected with both the customers, ledgers and the clearing department.

(b) The total number and amount of cheques sent out by the bank for clearing should be agreed with the total of the clearing pay- in-slips, by an independent person.

(c) The unpaid cheques received back in return clearing should be checked in the same manner as the cheques received.

11.5.4 Constituents' Ledgers

(a) Before making payment, cheques should be properly checked in respect of signature, date, balance in hand etc. and should be passed by an officer and entered into constituents' accounts.

(b) No withdrawals should normally be allowed against clearing cheques deposited on the same day.

(c) An officer should check all the entries made in the ledger with the original documents particularly noting that the correct accounts have been debited or credited.

(d) Ledger keepers should not have access to Voucher Summary Sheet after they have been checked by an officer and to the Day Book.

(e) Interest debited or credited to constituents' accounts should be independently checked.

11.5.5 Bills for Collection

(a) All the documents accompanying the bills should be received and entered in the Register by a responsible officer. At the time of despatch, the officer should also see that all the documents are sent along with the bills.

(b) The accounts of customers or principals should be credited only after the bills have been collected or an advice to that effect received from the branch or agent to which they were sent for collection.

(c) It should be ensured that bills sent by one, branch for collection to another branch of the bank, are not taken in the bills for collection twice in the amalgamated balance sheet of the bank. For this purpose, the receiving branch should reverse the entries regarding such bills at the end of the year for closing purposes.

11.5.6 Bills Purchased

(a) At the time of purchase of the bills, an officer should verify that all the documents of title are properly assigned to the bank.

(b) Sufficient margin should be kept while purchasing or discounting a bill so as to cover any decline in the value of the security etc.

(c) If the bank is unable to collect a bill on the due date, immediate steps should be taken to recover the amount from the drawer against the security provided.

- (d) All irregular outstanding accounts should be reported to the Head Office.
- (e) In the case of bills purchased outstanding at the close of the year the discount received thereon should be properly apportioned between the two years.

11.5.7 Loans and Advances

- (a) The bank should make advances only after satisfying itself as to the creditworthiness of the borrowers and after obtaining sanction from the proper authorities of the bank.
- (b) All the necessary documents (e.g., agreements, demand promissory notes, letters of hypothecation, etc.) should be executed by the parties before advances are made.
- (c) Sufficient margin should be kept against securities taken so as to cover any decline in the value thereof and also to comply with Reserve Bank directives. Such margins should be determined by the proper authorities of the bank as a general policy or for particular accounts.
- (d) All the securities should be received and returned by responsible officer. They should be kept in the Joint custody of two such officers.
- (e) All securities requiring registration should be registered in the name of the bank or otherwise accompanied by the documents sufficient to give title of the bank.
- (f) In the case of goods in the possession of the bank, contents of the packages should be test checked at the time of receipts. The godowns should be regularly and frequently inspected by a responsible officer of the branch concerned, in addition by the inspectors of the bank.
- (g) Surprise checks should be made in respect of hypothecated goods not in the possession of the bank.
- (h) Market value of goods should be checked by officers of the bank by personal enquiry in addition to the invoice value given by the borrowers.
- (i) As soon as any increase or decrease takes place in the value of securities proper entries should be made in the Drawing Power Book and Daily Balance Book. These entries should be checked by an officer.
- (j) All accounts should be kept within both the drawing power and the sanctioned limit at all times.
- (k) All the accounts which exceed the sanctioned limit or drawing power or are against unapproved securities or are otherwise irregular should be brought to the notice of the Management/Head Office regularly.
- (l) The operation (in each advance should be reviewed at least once every year.)

11.5.8 Telegraphic Transfers and Demand Drafts

- (a) The bank should have a reliable private code known only to responsible officers of its branches, coding and decoding of telegrams should be done only by such officers.
- (b) The signatures on a demand draft should be checked by an officer with the Signature Book.

11.14 Advanced Auditing and Professional Ethics

(c) All the T.Ts and D.Ds. sold by a branch should be immediately confirmed by the advices to the branches concerned.

(d) If the paying branch does not receive proper confirmation of any T.T. or D.D. from the issuing branch or does not receive credit in its account with that branch, it should take immediate steps to ascertain the reasons.

11.5.9 Inter Branch Accounts

(a) The accounts should be adjusted only on the basis of advices (and not on the strength of entries found in the statement of account) received from other branches,

(b) Prompt action should be taken preferably by central authority, if any entries (particularly debit entries) are not responded to by any branch within a reasonable time.

11.5.10 Credit Card Operations

(a) There should be effective screening of applications with reasonably good credit assessments.

(b) There should be strict control over storage and issue of cards.

(c) There should be a system whereby a merchant confirms the status of unutilised limit of a credit-card holder from the bank before accepting the settlement in case the amount to be settled exceeds a specified percentage of the total limit of the card holder.

(d) There should be a system of prompt reporting by the merchants of all settlements accepted by them through credit cards.

(e) Reimbursement to merchants should be made only after verification of the validity of merchant's acceptance of cards.

(f) All the reimbursement (gross of commission) should be immediately charged to the customer's account.

(g) There should be a system to ensure that statements are sent regularly and promptly to the customer.

(h) There should be a system to monitor and follow-up customers' payments.

(i) Items overdue beyond a reasonable period should be identified and attended to carefully. Credit should be stopped by informing the merchants through periodic bulletins, as early as possible, to avoid increased losses.

(j) There should be a system of periodic review of credit card holders' accounts. On this basis, the limits of customers may be revised, if necessary. The review should also include determination of doubtful amounts and the provisioning in respect thereof.

11.5.11 Compliance with CRR and SLR requirements

1. Cash Reserve Ratio (CRR) Requirements - One of the important determinants of cash balances to be maintained by banking companies and other scheduled banks is the requirement for maintenance of a certain minimum cash reserve. While the requirement for maintenance of cash reserve by banking companies is contained in the Banking Regulation

Act, 1949, corresponding requirement for scheduled banks is contained in the Reserve Bank of India Act, 1934. The RBI, from time to time, reviews the evolving liquidity situation and accordingly decides the rate of CRR required to be maintained by scheduled commercial banks. Therefore, the auditor need to refer the master circular issued from time to time in this regard to ensure the compliance of CRR requirements.

2. Statutory Liquidity Ratio (SLR) Requirements - The Reserve Bank of India requires statutory central auditors of banks to verify the compliance with SLR requirements of 12 odd dates in different months of a financial year not being Fridays. The resultant report is to be sent to the top management of the bank and to the Reserve Bank. The report of the statutory auditors in relation to compliance with SLR requirements has to cover two aspects:

- (i) correctness of the compilation of DTL (Demand and Time Liabilities) position; and
- (ii) maintenance of liquid assets.

Audit approach and procedure:

- (i) Obtain an understanding of the relevant circumstances of the RBI, particularly regarding composition of items of DTL.
- (ii) Require the branch auditors to send their weekly trial balance as on Friday and these are consolidated at the head office. Based on this consolidation, the DTL position is determined for every reporting Friday. The statutory central auditor should request the branch auditors to verify the correctness of the trial balances relevant to the dates selected by him. The branch auditors should also be specifically requested to examine the cash balance at the branch on the selected dates.
- (iii) Examine, on a test basis, the consolidations regarding DTL position prepared by the bank with reference to the related returns received from branches. The auditor should examine whether the valuation of securities done by the bank is in accordance with the guidelines prescribed by the RBI.
- (iv) While examining the computation of DTL, specifically examine that the following items have been excluded from liabilities-
 - (a) Part amounts of recoveries from the borrowers in respect of debts considered bad and doubtful of recovery.
 - (b) Amounts received in Indian currency against import bills and held in sundry deposits pending receipts of final rates.
 - (c) Un-adjusted deposits/balances lying in link branches for agency business like dividend warrants, interest warrants, refund of application money, etc., in respect of shares/debentures to the extent of payment made by other branches but not adjusted by the link branches.
 - (d) Margins held and kept in sundry deposits for funded facilities.
- (v) Similarly, specifically examine that the following items have been included in liabilities-

11.16 Advanced Auditing and Professional Ethics

- (a) Net credit balance in branch adjustment accounts including these relating to foreign branches.
- (b) Interest on deposit as at the end of the firm half year reversed in the beginning of the next half-year.
- (c) ***Borrowings from abroad by banks in India needs to be considered as 'liabilities to other' and thus, needs to be considered at gross level unlike 'liabilities towards banking system in India', which are permitted to be netted off against 'assets towards banking system in India'. Thus, the adverse balances in Nostro Mirror Account needs to be considered as 'Liabilities to other'***
- (d) ***The reconciliation of Nostro accounts (with Nostro Mirror Accounts) needs to be scrutinized carefully to analyze and ascertain if any inwards remittances are received on behalf of the customers / constituents of the bank and have remained unaccounted and / or any other debit (inward) entries have remained unaccounted and are pertaining to any liabilities for the bank.***
- (vi) ***Examine whether the consolidations prepared by the bank include the relevant information in respect of all the branches.***
- (vii) ***It may be noted that, even though interest accrues on a daily basis, it is recorded in the books only at periodic intervals. Thus, examine whether such interest accrued but not accounted for in books is included in the computation of DTL.***
- (viii) ***The auditor at the central level should apply the audit procedures listed above to the overall consolidation prepared for the bank as a whole. Where such procedure is followed, the central auditor should adequately describe the same in his report.***
- (viii) While reporting on compliance with SLR requirements, the auditor should specify the number of unaudited branches and state that he has relied on the returns received from the unaudited branches in forming his opinion. ***Recently, there has been introduction of Automated Data Flow (ADF) for CRR & SLR reporting and the auditors should develop necessary audit procedures around this.***

11.6 Verification of Assets and Balances

The following are the steps involved in verification of assets and balances-

I. CASH, BANK BALANCES AND MONEY AT CALL AND SHORT NOTICE - The Third Schedule to the Banking Regulation Act, 1949, requires the following disclosures to be made in the balance sheet regarding cash, balances with RBI, balances with other banks, and money at call and short notice.

Cash and Balances with Reserve Bank of India

- I. Cash in hand (including foreign currency notes)
- II. Balances with Reserve Bank of India
 - (i) in Current Account

- (ii) in Other Accounts

Balances with Banks and Money at Call and Short Notice

I. In India

- (i) Balances with other banks
 - (a) in Current Accounts
 - (b) in Other Deposit Accounts
- (ii) Money at call and short notice
 - (a) with banks
 - (b) with other institutions

II. Outside India

- (i) in Current Accounts
- (ii) in Other Deposit Accounts
- (iii) Money at call and short notice

Audit Procedures:

(a) Cash - The auditor should count the balance of cash on hand. As far as possible, the auditor should visit the branch at the close of business on the last working day of the year or before the commencement of business on the next day for carrying out the physical verification of cash. If, for any reason, the auditor is unable to do so, he should carry out the physical verification of cash as close to the balance sheet date as possible. It is sometimes arranged by the branch to deposit a large portion of its cash balance with the Reserve Bank of India or the State Bank of India or any other bank on the closing day, in which case, the work of the auditor is reduced substantially.

The cash balance as physically verified should be agreed with the balance shown in the cash book and the cash balance book. When the physical verification of cash is carried out by the auditor before or after the date of the balance sheet, the auditor should work forward/backward (as the case may be) to reconcile the results of his verification with the cash balance at the balance sheet date as shown by the books.

(b) Balance with Reserve Bank of India - In a bank, only a few select branches are designated to have account with the Reserve Bank. Thus, this item would not appear in the balance sheet of every branch. The following procedures are therefore applicable only to branches having account with the Reserve Bank of India.

- * Verify the ledger balances in each account with reference to the bank confirmation certificates and reconciliation statements as at the year-end.
- * Review the reconciliation statements. He should pay special attention to the following items appearing in the reconciliation statements:
 - (i) Cash transactions remaining unresponded;

11.18 Advanced Auditing and Professional Ethics

- (ii) Revenue items requiring adjustments/write-offs; and
- (iii) Old outstanding balances remaining unexplained / unadjusted for over one year.

* Obtain a written explanation from the management as to the reasons for old outstanding transactions in bank reconciliation statements remaining unexplained / unadjusted for over one year.

(c) Balance with Banks (Other than Reserve Bank of India) - Apart from the procedures described above in examining the balances with banks other than Reserve Bank, while reviewing the reconciliation statements, the auditor should pay particular attention to the following.

- (i) Examine that no debit for charges or credit for interest is outstanding and all the items which ought to have been taken to revenue for the year have been so taken.
- (ii) Examine that no cheque sent or received in clearing is outstanding.
- (iii) Examine that all bills or outstanding cheques sent for collection and outstanding as on the closing date have been credited subsequently.

The balances with banks outside India should also be verified in the manner described above. These balances should be converted into the Indian currency at the exchange rates prevailing on the balance sheet date.

(d) Money at Call and Short Notice - Money at call and short notice represents short-term investment of surplus funds in the money market. Money lent for one day is money at 'call' while money lent for a period of more than one day and up to fourteen days is money at 'short notice'.

The auditor should examine whether there is a proper authorisation, general or specific, for lending of the money at call or short notice. Compliance with the instructions or guidelines laid down in this behalf by the head office or controlling office of the branch, including the limits on lendings in inter-bank call money market, should also be examined.

Call loans should be verified with the certificates of the borrowers and the call loan receipts held by the bank. The auditor should examine whether the aggregate balances comprising this item as shown in the relevant register tally with the control accounts as per the general ledger. He should also examine subsequent repayments received from borrowing banks to verify the amounts shown under this head as at the year-end. It may be noted that call loans made by a bank cannot be netted-off against call loans received.

II. INVESTMENTS - The Third Schedule to the Banking Regulation Act, 1949, requires the disclosure of investments in the balance sheet as follows:

- I. *Investments in India in*
 - (i) Government securities
 - (ii) Other approved securities
 - (iii) Shares
 - (iv) Debentures and Bonds
 - (v) Subsidiaries and/or joint ventures

(vi) Others (to be specified)

II. *Investments outside India in*

- (i) Government securities (including local authorities)
- (ii) Subsidiaries and/or joint ventures abroad
- (iii) Other investments (to be specified)

In addition to other disclosures regarding investments, the Notes and Instructions for Compilation of Balance Sheet, also require the following information to be disclosed in the balance sheet:

- (1) gross value of investments in India and outside India;
- (2) aggregate of provisions for depreciation, separately on investments in India and outside India; and
- (3) net value of investments in India and outside India.
- (4) movement of provisions held towards depreciation on investments including opening balance by adding provisions made during the year and after deducting write-off/ write-back of excess provisions during the year.

The gross value of investments and provisions need not, however, be shown against each of the categories specified in the Schedule. The break-up of net value of investments in India and outside India (gross value of investments less provision) under each of the specified category need only be shown.

Audit Procedures: The auditor's primary objective in audit of investments is to satisfy himself as to their existence and valuation. Examination of compliance with statutory and regulatory requirements is also an important objective in audit of investments in as much as non-compliance may have a direct and material affect on the financial statements. The latter aspect assumes special significance in the case of banks where investment transactions have to be carried out within the numerous parameters laid down by the relevant legislation and directions of the RBI. The auditor should keep this in view while designing his audit procedures relating to investments.

(a) Internal Control Evaluation and Review of Investment Policy: The auditors should familiarise themselves with the instructions issued by the RBI regarding transactions in securities. They should review the investment policy of the bank to ascertain that the policy conforms, in all material respects, to the RBI's guidelines as well as to any statutory provisions applicable to the bank. While examining the internal controls over investments (including those on SGL forms and BRs), the auditor should particularly examine whether the same are in consonance with the guidelines of the RBI. He should also judge their efficacy.

(b) Separation of Investment Functions: The auditor should also examine whether the bank, as required by the RBI, is maintaining separate accounts for the investments made by it on their own Investment Account, on PMS clients' account, and on behalf of other constituents (including brokers). As per the RBI guidelines, banks are required to get their investments under PMS separately audited by external auditors.

11.20 Advanced Auditing and Professional Ethics

(c) Examination of Reconciliation: The auditor should examine the reconciliation of the investment account, physically verify the securities on hand, obtain confirmations from counter-party banks for BRs issued by such banks and on hand, obtain confirmation of SGL balances with the PDO, and examine the control and reconciliation of BRs issued by the bank.

(d) Examination of Documents: The auditor should ascertain whether the investments made by the bank are within its authority. In this regard, the auditor should examine whether the legal requirements governing the bank, in so far as they relate to investments, have been complied with and the investments made by the bank are not *ultra virus* the bank. Apart from the above, the auditor should also ensure that any other covenants or conditions which restrict qualify or abridge the right of ownership and/or disposal of investments, have been complied with by the bank.

The auditor should satisfy himself that the transactions for the purchase/sale of investments are supported by due authority and documentation. The acquisition/disposal of investments should be verified with reference to the broker's contract note, bill of costs, receipts and other similar evidence. ***The auditors should also check the segregation of duties within the bank staff in terms of executing trades, settlement and monitoring of such trades, and accounting of the same (generally termed as front office, middle office and back office functions' segregation).***

(e) Physical Verification: The auditor should verify the investment scrips physically at the close of business on the date of the balance sheet. In exceptional cases where it is not possible, the auditor should carry out the physical verification on a date as near to the balance sheet date as possible. In such a case, he should take into consideration any adjustments for subsequent transactions of purchase, sale, etc.

In respect of scripless dealings in investments through the OTC Exchange of India, the auditor should verify the interim and other acknowledgements issued by dealers as well as the year-end confirmation certificates of the depository organisation.

In respect of BRs issued by other banks and on hand with the bank at the year-end, the auditor should examine confirmations of counterparty banks about such BRs. Where any BRs have been outstanding for an unduly long period, the auditor should obtain written explanation from the management for the reasons thereof. The auditor should examine the reconciliation of BRs issued by the bank.

If certain securities are held in the names of nominees, the auditor should examine whether there are proper transfer deeds signed by the holders and also an undertaking from them that they hold the securities on behalf of the bank.

(f) Examination of Valuation: Method of valuation of investments followed by a bank may, therefore, have a significant effect on its balance sheet and profit and loss account. The auditor should examine whether the method of accounting followed by the bank in respect of investments, including their year-end valuation, is appropriate.

The auditor should examine the manner of accounting for investments in the context of the guidelines of the RBI and the accounting policy followed by the bank in respect of investments. The auditor should examine the appropriateness of accounting policies followed

by the bank. In case any of the accounting policies is not appropriate, the auditor should consider the effect of adoption of such policy on the financial statements and, consequently, on his audit report. In this regard, it may be noted that Accounting Standard (AS) 13, "Accounting for Investments", does not apply to banks.

According to RBI guidelines, in respect of shares which are unquoted or for which current quotations are not available, the market value has to be determined on the basis of the latest balance sheet of the company. This might create a problem in the case of new companies whose first annual reports are not yet available. It appears that in such a situation, it would be appropriate to value the shares at cost except where the evidence available indicates the deterioration in the value.

RBI guidelines require that individual scrips in the available-for-sale category should be marked to market at quarterly or more frequent intervals. It is further required that net depreciation in respect of each of the categories in which investments are presented in the balance sheet should be provided for while any similar net appreciation should be ignored. **As regards the scrips in Held for Trading (HFT) category, the same should be marked to market at monthly or at more frequent intervals in the similar manner, except in the following cases:**

- (i) **Equity shares should be marked to market preferably on daily basis, but at least on a weekly basis;**
- (ii) **Banks which undertake short sale transactions, the entire HFT portfolio including the short position should be marked to market on daily basis.**

The auditor should examine whether the profit or loss on sale of investments has been computed properly. **The carrying amount of investments disposed off should be determined consistently on similar basis. In case of HTM investments, Net Profit on sale of investments in this category should be first taken to the Profit & Loss Account, and thereafter be appropriated to the 'Capital Reserve Account' net of taxes and Net Loss will be recognised in the Profit & Loss Account.**

The classification of investments into held-to-maturity, held-for-trading and available-for-sale categories is based on the intention with which the respective investments have been acquired by the bank. The auditor should examine whether the investments have been properly classified into the three categories at the time of acquisition based on such intention as evidenced by the decision of the competent authority such as Board of directors, ALCO or Investment Committee.

As per RBI guidelines, investments classified under held-for-trading category should be sold within 90 days of their acquisition, failing which they should be shifted to the available-for-sale-category. The auditor should accordingly ensure that no investments purchased more than 89 days before the balance sheet date have been classified under this category.

Subject to what is stated above, the auditor should examine compliance by the bank with the guidelines of the RBI relating to valuation of investments.

11.22 Advanced Auditing and Professional Ethics

The auditor should examine whether income from investments is properly accounted for. This aspect assumes special importance in cases where the bank has opted for receipt of income through the electronic/on line medium.

There may be cases where the certificates of tax deduction at source (TDS) received along with the dividend/interest on investments are found missing. This increases the incidence of tax on the bank. The auditor should see that there is a proper system for recording and maintenance of TDS certificates received by the bank.

Special-purpose Certificates Relating to Investments: It may be noted that pursuant to RBI's circulars, issued from time to time, banks require their central auditors to issue the following certificates regarding investments of the bank (in addition to their main audit report and the long form audit report)-

- (i) Certificate on reconciliation of securities by the bank (both on its own Investment Account as well as PMS clients' account). The reconciliation is to be presented in a given format.
- (ii) Certificate on compliance by the bank in key areas of prudential and other guidelines relating to such transactions issued by the Reserve Bank of India.

(g) Dealings in Securities on Behalf of Others: Apart from making investments on its account, a bank may also deal in securities on behalf of its customers only with the prior approval from RBI. These activities of banks are in the nature of trust or fiduciary activities.

The auditor should examine whether bank's income from such activities has been recorded and is fairly stated in the bank's financial statements. The auditor also needs to consider whether the bank has any material undisclosed liability from a breach of its fiduciary duties, including the safekeeping of assets.

(h) Examination of classification and shifting: The auditor should examine whether the shifting of the investments from 'available for sale' to 'held to maturity' is duly approved by the Board of Directors of the bank. The auditor should also ensure the compliance of the RBI guidelines, issued from time to time, in this regard.

Audit, Review and Reporting: Banks should undertake half-yearly reviews (as of 30th September and 31st March) of their investment portfolio. These half yearly reviews should not only cover the operational aspects of the investment portfolio but also clearly indicate amendments made to the investment policy and certify the adherence to laid down internal investment policy and procedures and RBI guidelines.

The internal auditors are required to separately conduct the concurrent audit of treasury transactions and the results of their report should be placed before the CMD once every month. Banks need not forward copies of the audit report of internal auditor to RBI. However, major irregularities observed in these reports and position of compliance thereto may be incorporated in the half yearly review of the investment portfolio.

Classification of Investments: Banks are required to classify their entire investments portfolio into three categories-

- (i) *Held-to-maturity (HTM):* This category would comprise securities acquired by the bank

with the intention to hold them up to maturity.

- (ii) *Held-for-trading (HFT)*: This category would comprise securities acquired by the bank with the intention of trading, i.e., to benefit from short-term price/interest rate movements.
- (iii) *Available-for-sale (AFS)*: This category will comprise securities, which do not qualify for being categorised in either of the above categories, i.e., those that are acquired neither for trading purpose nor for being held till maturity.

Banks should decide the category of the investment at the time of acquisition and the decision should be recorded on the investment proposal/deal slip.

Non-Performing Investments: A non performing investment (NPI), similar to a non-performing advance (NPA), is one where-

- (i) Interest/ instalment (including maturity proceeds) is due and remains unpaid for more than 90 days.
- (ii) The above would apply mutatis-mutandis to preference shares where the fixed dividend is not paid.
- (iii) In the case of equity shares, in the event the investment in the shares of any company is valued at ₹ 1 per company on account of the non-availability of the latest balance sheet.
- (iv) If any credit facility availed by the issuer is NPA in the books of the bank, investment in any of the securities, including preference shares issued by the same issuer would also be treated as NPI and vice versa. However, if only the preference shares are classified as NPI, the investment in any of the other performing securities issued by the same issuer may not be classified as NPI and any performing credit facilities granted to that borrower need not be treated as NPA.
- (v) The investments in debentures/bonds, which are deemed to be in the nature of advance would also be subjected to NPI norms as applicable to investments.
- (vi) In case of conversion of non-performing loans into equity, debentures, bonds, etc., such instruments should be treated as NPI ab-initio in the same asset classification in which the relevant non-performing loans were classified and provision should be made as per the norms.

The guidelines specified above for identification of NPI will apply to state government guaranteed securities also.

Bank should make appropriate provisions for such NPIs by way of depreciation in the value of the investment. The banks should not set-off the depreciation requirement in respect of these non-performing securities against the appreciation in respect of other performing securities.

Income Recognition: The banks may book income in the following manner-

- (i) Banks may book income on accrual basis on securities of corporate bodies/ public sector undertakings in respect of which the payment of interest and repayment of principal have been guaranteed by the Central Government or a State Government, provided interest is serviced regularly and as such is not in arrears.

11.24 Advanced Auditing and Professional Ethics

- (ii) Banks may book interest income from all other performing investments on accrual basis provided interest rates on these instruments are pre-determined.
- (iii) Discount earned on discounted instruments like commercial papers, zero coupon bonds should be booked on accrual basis. The discount may either be accrued equally over the remaining period to maturity or by following the constant yield method.
- (iv) Interest income from non-performing investments should be booked on realisation.
- (v) Dividend on shares may be booked on accrual basis provided it is approved by the corporate body in its Annual General Meeting and the owner's right to receive dividend is established.
- (vi) Income from units of mutual funds should be booked on cash basis.
- (vii) Discount on interest bearing government securities classified under HTM should be recognised on redemption of the investments and should not be amortised over the remaining period to maturity.
- (viii) Profit and loss on sale of investments including on HTM category, should be shown under Profit/Loss on sale of investments.
- (ix) In case of sale of investments acquired on conversion of loan, if the sale proceeds are higher than the net book value, the excess to the extent of provision will not be reversed but will be utilised to meet the shortfall / loss on account of sale of other financial assets to SC /RC.
- (x) Except for profit/loss on sale/revaluation of investment, provision for investments and dividend from subsidiaries and joint ventures, all other income from investments should be shown under the head income from investment.

III. Advances - The Third Schedule to the Act requires classification of advances made by a bank from three different angles, viz., nature of advance, nature and extent of security, and place of making advance (i.e. whether in India or outside India). Accordingly, the advances are to be classified in Schedule 9 to the balance sheet as follows:

- A.
 - (i) Bills purchased and discounted
 - (ii) Cash Credits, Overdrafts and Loans repayable on demand
 - (iii) Term loans
- B.
 - (i) Secured by tangible assets
 - (ii) Covered by bank/government guarantees
 - (iii) Unsecured
- C.
 - I. Advances in India
 - (i) Priority sectors
 - (ii) Public sector
 - (iii) Banks
 - (iv) Others

- II. Advances outside India
 - (i) Due from banks
 - (ii) Due from others
 - (iii) Bills purchased and discounted
 - (iv) Syndicated loans
 - (v) Others

Non-Performing Assets: An asset, including a leased asset, becomes non-performing when it ceases to generate income for the bank.

Criteria for Classification of Various Types of Credit Facilities: In line with the international best practices and to ensure greater transparency, the RBI has directed the banks to adopt the '90 days' overdue' norm for identification of NPAs from the year ending March 31, 2004.

Banks have been charging interest at monthly rests, from April 1, 2002. However, the banks were advised that the date of classification of an advance as NPA would not be changed on account of charging of interest at monthly rests. Banks should, therefore, continue to classify an account as NPA only if the interest charged during any quarter is not serviced fully within 90 days from the end of the quarter.

An account should be treated as 'out of order' if the outstanding balance remains continuously in excess of the sanctioned limit/drawing power. In cases where the outstanding balance in the principal operating account is less than the sanctioned limit/drawing power, but there are no credits continuously for 90 days as on the date of Balance Sheet or credits are not enough to cover the interest debited during the same period, these accounts should be treated as 'out of order'. Further, any amount due to the bank under any credit facility is 'overdue' if it is not paid on the due date fixed by the bank.

The following criteria are to be applied for determining the status of various types of credit facilities:

- (a) *Term Loans:* A term loan is treated as a non-performing asset (NPA) if interest and/or instalment of principal remain overdue for a period of more than 90 days.
- (b) *Cash Credits and Overdrafts:* A cash credit or overdraft account is treated as NPA if it remains out of order as indicated above.
- (c) *Bills Purchased and Discounted:* Bills purchased and discounted are treated as NPA if they remain overdue and unpaid for a period of more than 90 days.
- (d) *Securitisation:* The asset is to be treated as NPA if the amount of liquidity facility remains outstanding for more than 90 days, in respect of a securitisation transaction undertaken in terms of guidelines on securitisation dated February 1, 2006.
- (e) *Agricultural Advances:* A loan granted for short duration crops will be treated as NPA, if the instalment of principal or interest thereon remains overdue for two crop seasons and, a loan granted for long duration crops will be treated as NPA, if the instalment of principal or interest thereon remains overdue for one crop season.

As per the guidelines, "long duration" crops would be crops with crop season longer than

11.26 Advanced Auditing and Professional Ethics

one year and crops, which are not “long duration” crops would be treated as “short duration” crops. The crop season for each crop, which means the period up to harvesting of the crops raised, would be as determined by the State Level Bankers’ Committee in each State. Depending upon the duration of crops raised by an agriculturist, the above NPA norms would also be made applicable to agricultural term loans availed of by him.

The above norms should be made applicable to all direct agricultural advances as listed in the Master Circular on Lending to Priority Sectors. In respect of all other agricultural loans, identification of NPAs would be done on the same basis as non-agricultural advances, which, at present, is the 90 days delinquency norm.

- (f) *Credit Card Accounts:* RBI vide its Circular on “Prudential Norms on Income Recognition, Asset Classification and Provisioning pertaining to Advances – Credit Card Accounts” advised that a credit card account will be treated as non-performing asset if the minimum amount due, as mentioned in the statement, is not paid fully within 90 days from the next statement date. The gap between two statements should not be more than a month. It is further suggested by RBI that banks should follow this uniform method of determining over-due status for credit card accounts while reporting to credit information companies and for the purpose of levying of penal charges, viz., late payment charges, etc., if any.

Classification Norms relating to NPAs

Temporary Deficiencies: In the matter of classification of accounts with temporary deficiencies, banks have to follow the following guidelines:

- (a) Banks should ensure that drawings in the working capital account are covered by the adequacy of the current assets. Drawing power is required to be arrived at based on current stock statement. However, considering the difficulties of large borrowers, stock statements relied upon by the banks for determining drawing power should not be older than three months.
- (b) The outstanding in the account based on drawing power calculated from stock statements older than three months is deemed as irregular.
- (c) A working capital borrowing account will become NPA if such irregular drawings are permitted in the account for a continuous period of 90 days even though the unit may be working or the borrower's financial position is satisfactory.
- (d) The accounts where regular/*ad hoc* credit limits have not been reviewed/renewed within 180 days from the due date/date of *ad hoc* sanction, the account should be treated as NPA.

Regularisation Near About Balance Sheet: The asset classification of borrower accounts where a solitary or a few credits are recorded before the balance sheet should be handled with care and without scope for subjectivity. Where the account indicates inherent weakness on the basis of the data available, the account should be deemed as a NPA.

Asset Classification to be Borrower-wise not Facility-wise: All facilities granted to a borrower and investment made in securities issued by the borrower will have to be treated as NPA/NPI and not the particular investment/facility once any or a part of the facility/investment has become irregular.

Erosion in Value of Securities/ Frauds Committed by Borrowers: In respect of accounts where there are potential threats for recovery on account of erosion in the value of security or non-availability of security and existence of other factors such as frauds committed by borrowers, such accounts need not go through the stages of asset classification. In such cases, the asset should be straightaway classified as doubtful or loss asset, as appropriate. Further,

- (i) Erosion in the value of securities by more than 50% of the value assessed by the bank or accepted by RBI inspection team at the time of last inspection, as the case may be, would be considered as “significant”, requiring the asset to be classified as doubtful straightaway and provided for adequately.
- (ii) The realisable value of security as assessed by bank/approved valuers/RBI is less than 10% of the outstanding in the borrowal accounts, the existence of the security should be ignored and the asset should be classified as loss asset. In such cases the asset should either be written off or fully provided for.

Government Guaranteed Advances: The credit facilities backed by guarantees of central government though overdue may be treated as NPA only when the government repudiates its guarantee when invoked. This exemption from classification of Central Government guaranteed advances as NPA is not for the purpose of recognition of income. In case of State Government guaranteed loans, this exemption will not be available and such account will be NPA if interest / principal / other dues remain overdue for more than 90 days.

Advances under Consortium: Consortium advances should be based on the record of recovery of the respective individual member banks and other aspects having a bearing on the recoverability of the advances. Where the remittances by the borrower under consortium lending arrangements are pooled with one bank and/or where the bank receiving remittances is not parting with the share of other member banks, the account should be treated as not serviced in the books of the other member banks and therefore, an NPA.

The banks participating in the consortium, therefore, need to arrange to get their share of recovery transferred from the lead bank or to get an express consent from the lead bank for the transfer of their share of recovery, to ensure proper asset classification in their respective books.

Advances Against Term Deposits, NSCs, KVPs/ IVPs, etc.: Advances against Term Deposits, NSCs eligible for surrender, KVP/IVP and life policies need not be treated as NPAs, provided adequate margin is available in the accounts.

Agricultural Advances Affected by Natural Calamities: Master Circular issued by the RBI deals elaborately with the classification and income recognition issues due to impairment caused by natural calamities. Banks may decide on their own relief measures, viz., conversion of the short term production loan into a term loan or re-schedulement of the repayment period and the sanctioning of fresh short term loan, subject to the guidelines contained in RBI’s latest Master Circular on Prudential Norms on Income Recognition, Asset Classification and provisioning pertaining to Advances. In such cases, the NPA classification would be governed by such rescheduled terms.

Advances to Staff: Interest bearing staff advances as a banker should be included as part of

11.28 Advanced Auditing and Professional Ethics

advances portfolio of the bank. In the case of housing loan or similar advances granted to staff members where interest is payable after recovery of principal, interest need not be considered as overdue from the first quarter onwards. Such loans/advances should be classified as NPA only when there is a default in repayment of instalment of principal or payment of interest on the respective due dates. The staff advances by a bank as an employer and not as a banker are required to be included under the sub-head 'Others' under the schedule of Other Assets.

Income Recognition

On Advances Granted: Banks recognise income (such as interest, fees and commission) on accrual basis, i.e., as it is earned. It is an essential condition for accrual of income that it should not be unreasonable to expect its ultimate collection. In view of the significant uncertainty regarding ultimate collection of income arising in respect of non-performing assets, the guidelines require that banks should not recognise income on non-performing assets until it is actually realised. When a credit facility is classified as non-performing for the first time, interest accrued and credited to the income account in the corresponding previous year which has not been realised should be reversed or provided for. Further,

- i. Interest income on advances against term deposits, NSCs, IVPs, KVPs and life policies may be taken to income account on the due date, provided adequate margin is available in the accounts.
- ii. Fees and commissions earned by the banks as a result of re-negotiations or rescheduling of outstanding debts should be recognised on an accrual basis over the period of time covered by the re-negotiated or rescheduled extension of credit.
- iii. If Government guaranteed advances become NPA, the interest on such advances should not be taken to income account unless the interest has been realised.

Reversal of Income: If any advance, including bills purchased and discounted, becomes NPA as at the close of any year, the entire interest accrued and credited to income account in the past periods, should be reversed or provided for if the same is not realised. This will apply to Government guaranteed accounts also.

In respect of NPAs, fees, commission and similar income that have accrued should cease to accrue in the current period and should be reversed or provided for with respect to past periods, if uncollected.

Further, in case of banks which have wrongly recognised income in the past should reverse the interest if it was recognised as income during the current year or make a provision for an equivalent amount if it was recognised as income in the previous year(s).

On Leased Assets: The finance charge component of finance income [as defined in 'AS 19 – Leases] on the leased asset which has accrued and was credited to income account before the asset became non-performing, and remaining unrealised, should be reversed or provided for in the current accounting period.

On Take-out Finance: In the case of take-out finance, if based on record of recovery, the account is classified by the lending bank as NPA, it should not recognise income unless realised from the borrower/taking-over institution (if the arrangement so provides).

On Partial Recoveries in NPAs: In the absence of a clear agreement between the bank and the borrower for the purpose of appropriation of recoveries in NPAs (i.e., towards principal or interest due), banks are required to adopt an accounting policy and exercise the right of appropriation of recoveries in a uniform and consistent manner. The appropriate policy to be followed is to recognise income as per AS 9 when certainty attaches to realisation and accordingly amount reversed/derecognised or not recognised in the past should be accounted.

Interest partly realised in NPAs can be taken to income. However, it should be ensured that the credits towards interest in the relevant accounts are not out of fresh/additional credit facilities sanctioned to the borrowers concerned.

[**Note:** For classification of advances, provisioning norms, etc., students may refer Chapter 6 of Paper 5- Advanced Accounting, Intermediate (IPC) Study Material.]

Auditor's Report in Case of Bank Borrowers: The RBI vide its circular had prescribed that all borrowers having credit limit of ₹ 10 lakh and above from the banking system should get their annual accounts audited by chartered accountants. The RBI has authorised the Board of Directors of banks to fix a suitable cut off limit with reference to the borrowing entity's overall exposure on the banking system, over which audit of accounts of borrower by chartered accountants would be mandatory.

Audit Procedures - Advances generally constitute the major part of the assets of the bank. There are large number of borrowers to whom variety of advances are granted. The audit of advances requires the major attention from the auditors.

In carrying out audit of advances, the auditor is primarily concerned with obtaining evidence about the following:

- a. Amounts included in balance sheet in respect of advances are outstanding at the date of the balance sheet.
- b. Advances represent amount due to the bank.
- c. Amounts due to the bank are appropriately supported by Loan documents and other documents as applicable to the nature of advances.
- d. There are no unrecorded advances.
- e. The stated basis of valuation of advances is appropriate and properly applied, and that the recoverability of advances is recognised in their valuation.
- f. The advances are disclosed, classified and described in accordance with recognised accounting policies and practices and relevant statutory and regulatory requirements.
- g. Appropriate provisions towards advances have been made as per the RBI norms, Accounting Standards and generally accepted accounting practices.

The auditor can obtain sufficient appropriate audit evidence about advances by study and evaluation of internal controls relating to advances, and by:

- ◆ examining the validity of the recorded amounts;
- ◆ examining loan documentation;

11.30 Advanced Auditing and Professional Ethics

- ◆ reviewing the operation of the accounts;
- ◆ examining the existence, enforceability and valuation of the security;
- ◆ checking compliance with RBI norms including appropriate classification and provisioning; and
- ◆ carrying out appropriate analytical procedures.

In carrying out his substantive procedures, the auditor should examine all large advances while other advances may be examined on a sampling basis. The accounts identified to be problem accounts however need to be examined in detail unless the amount involved is insignificant. The extent of sample checking would also depend on the auditor's assessment of efficacy of internal controls. What constitutes a 'large advance' would need to be determined in the context of volume of operations of the branch. As a general rule, however, an advance may be considered to be a large advance if the year-end balance is in excess of ₹ 2 crore or 5% of the aggregate year-end advances of the branch, whichever is less.

Advances which are sanctioned during the year or which are adversely commented by RBI inspection team, concurrent auditors, bank's internal inspection, etc. should generally be included in the auditor's review.

Evaluation of Internal Controls over Advances: The auditor should examine the efficacy of various internal controls over advances to determine the nature, timing and extent of his substantive procedures. In general, the internal controls over advances should include, *inter alia*, the following:

- ◆ The bank should make an advance only after satisfying itself as to the credit worthiness of the borrower and after obtaining sanction from the appropriate authorities of the bank. The sanction for an advance should specify, among other things, the limit of borrowing, nature of security, margin to be kept, interest, terms of repayment etc. It also needs to be ensured that the loans sanctioned are as per the Loan Policy of the bank and adhere to the regulatory (RBI) norms unless a specific exemption is taken in this regard.
- ◆ All the necessary documents (e.g., agreements, demand promissory notes, letters of hypothecation, etc.) should be executed by the parties before advances are made.
- ◆ The compliance with the terms of sanction and end use of funds should be ensured.
- ◆ Sufficient margin as specified in the sanction letter should be kept against securities taken so as to cover for any decline in the value thereof. The availability of sufficient margin needs to be ensured at regular intervals.
- ◆ If the securities taken are in the nature of shares, debentures, etc., the ownership of the same should be transferred in the name of the bank and the effective control of such securities be retained as a part of documentation.
- ◆ All securities requiring registration should be registered in the name of the bank or otherwise accompanied by documents sufficient to give title to the bank.
- ◆ In the case of goods in the possession of the bank, contents of the packages should be

test checked at the time of receipt. The godowns should be frequently inspected by responsible officers of the branch concerned, in addition to the inspectors of the bank.

- ◆ Surprise checks should be made in respect of hypothecated goods not in the physical possession of the bank.
- ◆ ***Drawing Power Register should be updated every month to record the value of securities hypothecated.*** These entries should be checked by an officer.
- ◆ The accounts should be kept within both the drawing power and the sanctioned limit.
- ◆ All the accounts which exceed the sanctioned limit or drawing power or are otherwise irregular should be brought to the notice of the controlling authority regularly.
- ◆ The operation of each advance account should be reviewed at least once a year, and at more frequent intervals in the case of large advances.

Long Form Audit Report: The auditor has to comment on various specific issues as mentioned in the Long Form Audit Report of the bank. While evaluating the efficacy of internal controls over advances, the auditor should particularly examine those aspects on which he is required to comment in his long form audit report. Thus, he should examine, *inter alia*, whether the loan applications are complete and in prescribed form; procedural instructions regarding grant/ renewal/ enhancement of facilities have been complied with; sanctions are within delegated authority and disbursements are as per terms of the sanction; documentation is complete; and supervision is timely, effective and as per prescribed guidelines. The auditor can gather the requisite evidence by examining relevant documents (such as loan application forms, supporting documentation, sanctions, security documents, etc.) and by obtaining information and explanations from the branch management in appropriate cases. The auditors must familiarise themselves with those issues and guidance relating to the same and should cover the same during the regular course of audit of advances.

Examining the Validity of Recorded Amounts: The auditor should ascertain the status of balancing of subsidiary ledgers relating to advances. The total of balances in the subsidiary ledgers should agree with the control accounts in the General Ledger. The auditor should also tally the total of the statement of advances with the balances as per general ledger/ subsidiary ledgers. He should also cross-check the balances of the advances selected for examination as listed in the statement of advances with the balances in the relevant advance accounts in the subsidiary ledgers. Banks often obtain balance confirmation statements from borrowers periodically. Such statements have a dual advantage in preventing disputes by the customer and extending the period of limitation by reference to the date of confirmation. Wherever available, such confirmations may be seen.

These days most of the banks have their 'advances' statements generated through the system. The auditor should ensure that the fields which system copies from last year are the same and he should take extra care in relation with the date of NPA and date of becoming doubtful asset as these facts have great bearing on the provisioning. The auditor should obtain audit trail from the bank to verify whether there are any changes or not.

Examination of Loan Documents: As indicated earlier, the documents relating to advances

11.32 Advanced Auditing and Professional Ethics

would be affected by the legal status of the borrower and the nature of security. Thus, where the borrower is a company, loan documents would include certificate of incorporation, memorandum and articles of association, certificate of commencement of business (in the case of public limited companies), resolution of board of directors, and resolution of shareholders [in cases covered by section 180 of the Companies Act, 2013], etc. Where the borrower is a partnership firm, loan documents would include copy of partnership deed. Where the security is in the form of mortgage, apart from mortgage deed (in the case of English Mortgage) or letter of intent to create mortgage (in the case of Equitable Mortgage), the evidence of registration of the charge with the Registrar of Companies would also form part of loan documentation if the borrower is a company. Each bank has its own set of rules regarding the documents to be obtained from various types of borrowers and in respect of different kinds of securities. The formats of many of the documents are also prescribed. The auditor should evaluate the adequacy of the loan documents in the context of the rules framed by the bank in this regard.

Review of Operation of Account: The auditor should review the operation of the advance accounts. In doing so, an intelligent scrutiny of the operation of the account should be carried out to see that the limit is not generally exceeded; that the account is not becoming stagnant; that the customer is not drawing against deposits which are not free from lien; that the account is not window-dressed by running down overdrafts at the year end and again drawing further advances in the new year, etc.

The auditor should also examine whether there is a healthy turnover in the account. It should be seen that the frequency and the amounts of credits in the account are commensurate with the sanctioned limit and the nature and volume of business of the borrower. Any unusual items in the account should be carefully examined by the auditor. If the auditor's review indicates any unhealthy trends, the account should be further examined. The auditor's examination should also cover transactions in the post-balance sheet date period. Large transactions in major accounts particularly as at the year-end may be looked into, to identify any irregularities in these accounts. A written note/explanation may be obtained from the management as regards any major irregularities which may have a bearing on his report.

The auditor may also review the following to assess the recoverability of advances:

- (a) Periodic statements submitted by the borrowers indicating the extent of compliance with terms and conditions.
- (b) Latest financial statements of borrowers.
- (c) Reports on inspection of security.
- (d) Auditors' reports in the case of borrowers enjoying aggregate credit limits of ₹ 10 lakh or above for working capital from the banking system.

The auditor should satisfy himself that interest is being charged on all performing accounts regularly. He should compare the rate of interest with the agreement and the sanction and with the credit rating reports where the rate of interest is linked to credit rating. In case the interest rate is to be revised based on the changes in PLR/BPLR/Base rate of the bank, it needs to be ensured that the rate of interest to be charged from the borrower is suitably revised as and

when there are changes in PLR/BPLR/Base rate. Calculation of interest should be test-checked. The auditor should examine that interest not received on any account, which is a non-performing asset as per the guidelines of the RBI, has not been recognised as income. It may be noted that interest accrued but not due on advances does not form part of advances.

Verification of Security against Advances: From the view point of security, advances are to be classified in the balance sheet in the following manner:

- (a) Secured by tangible assets
- (b) Covered by bank/government guarantees
- (c) Unsecured

An advance should be treated as secured to the extent of the value of the security on the balance sheet date. If only a part of the advance is covered by the value of the security as at the date of the balance sheet, that part only should be classified as secured; the remaining amount should be classified as unsecured.

As mentioned earlier, the Reserve Bank has specified that advances against book debts may be included under the head 'secured by tangible assets'.

The following points are relevant for classifying the advances based on security.

- (a) Government guarantees include guarantees of Central/State Governments and also advances guaranteed by Central/State Government owned corporations and financial institutions like IDBI, IFCI, ICICI, State Financial Corporations, State Industrial Development Corporations, ECGC, DICGC, etc.
- (b) Advances covered by bank guarantees also include advances guaranteed against any negotiable instrument, the payment of which is guaranteed by a bank.
- (c) Advances covered by bank/government guarantees should be included in unsecured advances to the extent the outstanding in these advances exceed the amount of related guarantees.
- (d) While classifying the advances as secured, the primary security should be applied first and for the residual balance, if any, the value of collateral security should be taken into account. If the advance is still not fully covered, then, to the extent of bank/government guarantees available, the advance should be classified as 'covered by bank/government guarantee'. The balance, if any, remaining after the above classification, should be classified as 'unsecured'.
- (e) There may be situations where more than one facility is granted to a single borrower and a facility is secured, apart from primary and collateral securities relating specifically to that facility, by the residual value of primary security relating to any other credit facility (or facilities) granted to the borrower. In such a case, in the event of shortfall in the value of primary security in such a credit facility, the residual value of primary security of the other facility (or facilities, as the case may be) may be applied first to the shortfall and the value of collateral securities should be applied next.
- (f) In the case of common collateral security for advances granted to more than one borrower, if there is a shortfall in value of primary security in any one or more of the

11.34 Advanced Auditing and Professional Ethics

borrowal accounts, the value of collateral security may be applied proportionately to the shortfall in each borrowal account.

- (g) Advances covered by ECGC/DICGC guarantees should be treated as covered by guarantees to the extent of guarantee cover available. The amount already received from DICGC/ECGC and kept in sundry creditors account pending adjustment should be deducted from advances.
- (h) An account which is fully secured but the margin in which is lower than that stipulated by the bank should nevertheless be treated as fully secured for the purposes of balance sheet presentation.
- (i) All documentary bills under delivery-against-payment terms (i.e., covered by RR/Airway Bill/Bill of lading) for which the documents are with the bank as on the balance sheet date should be classified as 'secured'.
- (j) Documentary bills under delivery-against-acceptance terms which remain unaccepted as at the close of 31st March (i.e., for which the documents of title are with the bank on this date) should be classified as secured. All accepted bills should be classified as 'unsecured' unless collaterally secured.
- (k) Cheques purchased including self-cheques (i.e., where the drawer and payee are one and the same) should be treated as unsecured.
- (l) Advances against supply bills, unless collaterally secured, should be classified as unsecured even if they have been accepted by the drawees.
- (m) 'Security' means tangible security properly discharged to the bank and will not include intangible securities like guarantees (including State government guarantees), comfort letters, etc.

In examining whether an advance is secured and, if so, to what extent, the auditor is concerned with determining –

- (a) whether the security is legally enforceable, i.e., whether the necessary legal formalities regarding documentation, registration, etc., have been complied with;
- (b) whether the security is in the effective control of the bank; and
- (c) to what extent the value of the security, assessed realistically, covers the amount outstanding in the advance.

The auditor should examine the following aspects in respect of advances classified as 'secured':

- (a) Documents executed are complete and in force.
- (b) Where documents have not been renewed, the limitation period has not expired.
- (c) Evidence is available as to the market value of the security.
- (d) Evidence is available that –
 - (i) hypothecated/pledged goods are the property of the borrowers and are not old/obsolete or otherwise unsaleable;

- (ii) advances against book debts of borrowers are related to their current debts and not old/doubtful debts; and
- (iii) Stocks hypothecated/pledged are paid stocks owned by the borrower.
- (e) In the case of companies, the charge is appropriately registered with the Registrar of Companies and a certificate of registration of charge or other evidence of registration is held.
- (f) Borrowers are regular in furnishing the requisite information regarding the value of security lodged with the bank.
- (g) In respect of the second charge being available in respect of certain assets, the amount of the lender(s) enjoying the first charge on such asset be worked out and only the residuary value, if any, available for second charge holders, be considered.

The following paragraphs deal with the different types of securities against advances generally accepted by banks and the manner in which the auditor should verify them.

Stock Exchange Securities and Other Securities: The auditor should verify stock exchange securities and their market value in the same manner as in the case of investments. The auditor should examine whether the securities have been registered or assigned in favour of the bank, wherever required and verify the same with Demat Account.

It sometimes happens that a quoted security may not have frequent transactions on the stock exchange and the quotation included in the official quotations may be that of a very old transaction. In such a case, the auditor should satisfy himself as to the market value by scrutiny of balance sheet, etc., of the company concerned, particularly if the amount of advance made against such security is large.

Banks do not generally make advances against partly paid securities. If, however, any such shares are accepted by the bank as security and these are registered in the name of the bank, the auditor should examine whether the issuing company has called up any amount on such securities and, if so, whether the amount has been paid in time by the borrower/bank.

Goods: In respect of hypothecated goods, the auditor should check the quantity and value of goods hypothecated with reference to the statement received from the borrower. He should also examine the reasonableness of valuation. Letter of hypothecation should also be examined by the auditor. If the value of the goods is higher than the amount mentioned in the letter of hypothecation, the bank's security is only to the extent of the latter. Auditor should also verify that the Bank has system of maintenance of proper register in this regard as also system of scrutiny of stock/book debt statement furnished by the borrower.

In respect of goods pledged with the bank, the auditor should check the statement received from the borrower regarding the quantity and value of goods pledged by him. He should test check the godown registers and the valuation of the goods. If there is any outstanding delivery order against the goods as on the balance sheet date, the same should be deducted from the total quantity in hand in ascertaining the value of the goods constituting the security. The auditor may also examine the key movement register to verify the movement of goods inwards and/or outwards.

Sometimes, goods are in the possession of third parties, such as clearing and forwarding

11.36 Advanced Auditing and Professional Ethics

agents, transporters, brokers, warehouse-keepers, etc. If these parties have given an undertaking to the bank that they will hand over the goods or sale proceeds thereof to the bank only, i.e., they have 'attorned' to the bank the advances made against such goods should be considered as secured. In such cases, certificates should be obtained by the bank from such third parties regarding quantities on hand on balance sheet date. The valuation of such goods should be checked by the auditor.

In case the borrower is a company, the auditor should examine the certificate of registration of charge on the goods hypothecated with the Registrar of Companies. It may be mentioned that in case of pledge of goods, registration of charge is not necessary.

Gold Ornaments and Bullion: The auditor should inspect and weigh (on a test basis) the ornaments on the closing date. He should also see the assayer's certificate regarding the net gold content of the ornaments and their valuation. Valuation should also be checked with reference to the current market price of gold.

In respect of gold and silver bars, the auditor should inspect the bars on a test basis and see that the mint seals are intact. The weights mentioned on the bars may generally be accepted as correct.

Life Insurance Policies: The auditor should inspect the policies and see whether they are assigned to the bank and whether such assignment has been registered with the insurer. The auditor should also examine whether premium has been paid on the policies and whether they are in force. Certificate regarding surrender value obtained from the insurer should be examined. The auditor should particularly see that if such surrender value is subject to payment of certain *premia*, the amount of such *premia* has been deducted from the surrender value.

Bank's Own Deposit Certificates: The auditor should inspect such certificates and examine whether they have been properly discharged and whether the lien of the bank is noted on the face of the certificates as well as in the relevant register of the bank.

Hire-purchase Documents: These advances may be classified as secured against the hypothecation of goods. Where there is no hypothecation, the advance will be classified as unsecured.

Plantations: These advances are classified as secured against the crop and/or the fixed assets of the plantation. The auditor should examine the agreement and the title deeds. Regarding the estimate of the crop, he may examine the record of the garden for the last few years. He should also ascertain whether the crop is properly insured against natural calamities and other disasters such as hail, etc.

Auditor should keep in mind that where moratorium is available for payment of interest in such plantation projects, the payment of interests becomes due only after the moratorium or gestation period is over and in such a case the account will become NPA in case interest is not recovered after the due date of such interest after moratorium period, if specifically mentioned in the sanction letter.

Immovable Property: The auditor should inspect the title deed, the solicitor's opinion taken by the bank in respect thereof, and the mortgage deed. For valuation, he may rely upon the architect's or valuer's report (which should be taken at least once in three years) after carrying

out appropriate audit procedures to satisfy himself about the adequacy of the work of the architect/valuer for his purpose.¹ He should also examine the insurance policies.

In some cases, banks make advances against immovable properties where the title deeds are not in the name of the borrower. For example, an advance may be given against the security of a flat in a co-operative group housing society, the title deeds of which may not be in the name of the borrower. In such cases, the auditor should examine the evidence regarding the right or interest of the borrower in the property mortgaged, e.g., power of attorney, share certificate of co-operative group housing society, 'no objection certificate' from the society/lessor (in the case of leasehold properties) for offering the property as security, etc.

Reliance on / review of other reports: The auditor should take into account the adverse comments, if any, on advances appearing in the following-

- ◆ Previous audit reports.
- ◆ Latest internal inspection reports of bank officials.
- ◆ Reserve Bank's latest inspection report.
- ◆ Concurrent / Internal audit report.
- ◆ Report on verification of security.
- ◆ Any other internal reports specially related to particular accounts.
- ◆ Manager's charge-handing-over report when incumbent is changed.

The above reports should be reviewed in detail. The Statutory Central Auditors must review the Annual Financial Inspection report of RBI relating to the bank and ensure that the variations in provisions, etc. reported by RBI have been properly considered by the bank management.

Third Party Guarantees: The auditor should examine the guarantee bonds and the demand promissory notes in order to verify the third party liability. He should satisfy himself that the guarantee is in force as at the date of the balance sheet. In the absence of a provision to the contrary, a guarantee terminates by revocation or upon death of the surety. The surety is also discharged (unless there is a specific covenant to the contrary) if the creditor arranges with the principal debtor for composition, or agrees to give time or agrees not to sue him, without consulting the surety. If any variation is made in the terms of the contract between the principal debtor and the creditor without the surety's consent, it discharges the surety as to transactions subsequent to the variation. The guarantee forms used by banks normally seek to ensure the continuing obligation of the guarantor in spite of these contingencies.

Verification of Bills Purchased and Discounted: The auditor should familiarise himself with the guidelines issued by the RBI and the policies framed by the bank itself regarding the discounting and rediscounting of bills. The auditor should ascertain that the policy framed by the bank conforms to the requirements laid down by the RBI.

Bills purchased and discounted have to be shown separately in the balance sheet as a part of

¹ Reference may be made in this regard to Standards on Auditing (SA) 620, "Using the Work of an Expert".

11.38 Advanced Auditing and Professional Ethics

'advances'. Further, under the head 'advances outside India' in the balance sheet, bills purchased and discounted outside India have to be shown separately. This category will include bills covering export of goods, bills discounted by foreign branches of the bank and payable in their respective countries, etc.

Banks purchase or discount bills of exchange drawn or endorsed by their customers. The bank credits the amount of the bill to its customer after deducting the discount. The total amount of such bills is shown as an asset in the balance sheet.

In certain eligible cases, the bills purchased or discounted by the bank may be rediscounted by it with the RBI IDBI/SIDBI. Such bills would not be included under advance but would constitute a contingent liability.

Bills purchased and discounted by the bank are generally drawn on outstation parties and are, therefore, sent by the bank to its branches or agents for collection immediately after their receipt. They are generally not in the possession of the bank on the closing date. The auditor therefore has to rely upon the Register of Bills Purchased and Discounted and the party-wise Register of Bills maintained by the bank. The auditor should examine these registers and satisfy himself that:

- (a) all the outstanding bills have been taken in the balance sheet;
- (b) all the details, including the nature of the bills and documents, are mentioned in the register and that the bills have been correctly classified;
- (c) the bills purchased or discounted from different parties are in accordance with the agreements with them and the total of outstanding bills of each party is not in excess of the sanctioned limit; and
- (d) the bills are not overdue. If there are any overdue bills, the auditors should ascertain the reasons for the delay and the action taken by the bank.

The auditor should examine whether registers of bills purchased and discounted are properly maintained and the transactions are recorded therein correctly. He should examine whether the bills and the documents accompanying the bills are properly endorsed and assigned in favour of the bank. In checking the bills, it should be ensured that the bills are held along with the documents of title. In the case of documentary bills, it should be ensured that the related RRs/TRs are held along with the invoices/ hundies / bills and that these have not been parted with. Wherever such RRs/TRs are not held on record, the fact should be duly considered by the auditor. The auditor should also examine bills collected subsequent to the year-end to obtain assurance regarding completeness and validity of the recorded bill amounts.

Other Aspects: Sometimes, a customer is sanctioned a cash credit limit at one branch but is authorised to utilise such overall limit at a number of other branches also, for each of which a sub-limit is fixed. In such a case, the determination of status of the account as NPA or otherwise should be determined at the limit-sanctioning branch with reference to the overall sanctioned limit/drawing power, and not by each of the other branches where a sub-limit has been fixed. The auditor should examine that any advances made by a banking company otherwise than in the course of banking business, such as, prepaid expenses, advance for

purchase of assets, etc., is not included under the head 'advances' but is included under 'other assets'.

The amounts of advances in India and those outside India are to be shown separately in the balance sheet. The auditor should examine whether any loan has been granted in violation of the statutory limitations contained in section 20 of the Banking Regulations Act, 1949. If any such loan has been granted the report will have to be drafted with suitable qualifications, as the transaction would be *ultra vires*.

It may also be examined whether the bank has a system of ensuring the end use of the funds granted as compared with the purpose of sanction. The reports submitted by the inspectors/officers in this regard should be reviewed to form opinion on the quality of the asset and also to consider reporting any matter in the LFAR.

Adverse features in a borrower's account are required to be reported in LFAR and hence during the course of verification all material information should be noted and documented in appropriate format. Following is an illustrative but not an exhaustive format:

1. Name of the Borrower.
2. Constitution.
3. Sanctioned limits as on Balance Sheet date.
4. Any change in limit during the year.
5. Terms of sanction.
6. Details of fulfilment of terms of sanction.
7. Details of Loan documents and observations on the same.
8. Balance outstanding as at balance sheet date.
9. Classification as per bank.
10. Whether classification requires a change.
11. If so the reasons for the differing view and the impact of the same.
12. Whether necessary changes made in Memorandum of Changes.
13. Observations on the conduct of the account.
14. Deficiencies noted in the account.
15. Availability of security.
16. Timely submission of stock statement and other statements.

Verification of Provision for Non-performing assets: An important aspect of audit of advances relates to their classification and provisioning. This implies that a proper provision should be made in respect of advances where the recovery is doubtful. As mentioned earlier, the Reserve Bank has prescribed objective norms for determining the quantum of provisions required in respect of advances. The auditors must take / download the latest Master Circular of RBI to familiarise himself fully with the norms prescribed by RBI in this regard. The circulars

11.40 Advanced Auditing and Professional Ethics

issued by RBI after the date of issue of Master Circular and till the date of audit should also be taken / downloaded and reviewed by the auditors for its adherence. However, these norms should be construed as laying down the minimum provisioning requirements and wherever a higher provision is warranted in the context of the threats to recovery, such higher provision should be made. In this regard, the provisions of section 15 of the Banking Regulation Act, 1949 may be noted. This section, which applies to banking companies, nationalised banks, State Bank of India, its subsidiaries, and regional rural banks, requires the bank concerned to make adequate provision for bad debts to the satisfaction of its auditor before paying any dividends on its shares.

The accounting entry for provision in respect of debts that are doubtful of recovery is usually made at the head office level and is not recorded in the books at the branch level. The amount of provision to be made at the head office level is based largely on the classification of various advances into standard, sub-standard, doubtful and loss categories. The auditor should carefully examine whether the classification made by the branch is appropriate. In doing so, he should particularly examine the classification of advances where there are threats to recovery. The auditor should also examine whether the secured and the unsecured portions of advances have been segregated correctly and provisions have been calculated properly.

As per the Reserve Bank guidelines, if an account has been regularised before the balance sheet date by payment of overdue amount through genuine sources, the account need not be treated as NPA. Where, subsequent to repayment by the borrower (which makes the account regular), the branch has provided further funds to the borrower (including by way of subscription to its debentures or in other accounts of the borrower), the auditor should carefully assess whether the repayment was out of genuine sources or not. Where the account indicates inherent weakness on the basis of the data available, the account should be deemed as a NPA. In other genuine cases, the banks must furnish satisfactory evidence to the Statutory Auditors about the manner of regularisation of the account to eliminate doubts on their performing status.

It is to be ensured that the classification is made as per the position as on date and hence classification of all standard accounts be reviewed as on balance sheet date. The date of NPA is of significant importance to determine the classification and hence specific care be taken in this regard.

Drawing Power Calculation: Working capital borrowal account, drawing power calculated from stock statement older than 3 months has to be considered as "irregular" (overdue). If such "irregular" account continues for 90 days, account has to be classified as NPA, even though the account is otherwise operated regularly.

The stock statements, quarterly returns and other statements submitted by the borrower to the bank should be scrutinised in detail.

The audited Annual Report submitted by the borrower should be scrutinised properly. The monthly stock statement of the month for which the audited accounts are prepared and submitted should be compared and the reasons for deviations, if any, should be ascertained.

It needs to be ensured that the drawing power is calculated as per the extant guidelines formulated by the Board of Directors of the respective bank and agreed upon by the concerned statutory auditors. Special consideration should be given to proper reporting of sundry creditors for the purposes of calculating drawing power.

The stock audit should be carried out by the bank for all accounts having funded exposure of more than ₹ 5 crores. Auditors can also advise for stock audit in other cases if the situation warrants the same. Branches should obtain the stock audit reports from lead bank in the cases where the Bank is not leader of the consortium of working capital. The report submitted by the stock auditors should be reviewed during the course of the audit and special focus should be given to the comments made by the stock auditors on valuation of security and calculation of drawing power.

The drawing power needs to be calculated carefully in case of working capital advances to companies engaged in construction business. The valuation of work in progress should be ensured in consistent and proper manner. It also needs to be ensured that mobilization advance being received by the contractors is reduced while calculating drawing power.

Limits not reviewed: Accounts where regular/*ad hoc* limits are not reviewed within 180 days from the due date/date of *ad hoc* sanction, have to be considered as NPA. Auditors should also ensure that the *ad hoc*/short reviews are not done on repetitive basis. In such cases, auditor can consider the classification of account based on other parameters and functioning of the account.

Government Guaranteed Advances: If government guaranteed advance becomes NPA, then for the purpose of income recognition, interest on such advance should not to be taken to income unless interest is realised. However, for purpose of asset classification, credit facility backed by Central Government Guarantee, though overdue, can be treated as NPA only when the Central Government repudiates its guarantee, when invoked. This exception is not applicable for State Government Guaranteed advances, where advance is to be considered NPA if it remains overdue for more than 90 days.

In case the bank has not invoked the Central Government Guarantee though the amount is overdue for long, the reasoning for the same should be taken and duly reported in LFAR.

Agricultural Advances: A loan granted for short duration crops will be treated as NPA, if the instalment of principal or interest thereon remains overdue for two crop seasons. A loan granted for long duration crops will be treated as NPA, if the instalment of principal or interest thereon remains overdue for one crop season. For the purpose of these guidelines, "long duration" crops would be crops with crop season longer than one year and crops, which are not "long duration" crops, would be treated as "short duration" crops. The crop season for each crop, which means the period up to harvesting of the crops raised would be as determined by the State Level Bankers' Committee in each State. Depending upon the duration of crops raised by an agriculturist, the above NPA norms would also be made applicable to agricultural term loans availed of by him. The above norms should be made applicable to all direct agricultural advances listed in Master Circular on lending to priority sector. In respect of agricultural loans, other than those specified in the circular, identification of NPAs would be done on the same basis as non-agricultural advances, which, at present, is the 90 days delinquency norm.

11.42 Advanced Auditing and Professional Ethics

Provisioning Towards Standard Assets: The auditor should check the latest RBI Circulars in this regard. The provisions need to be checked in detail with the statement of advances. The provisions bifurcation of standard advances under relevant category for proper calculation of provision should be checked and certified at branches level. The definition of respective items specified should be adhered as defined by RBI.

Restructuring of cases: RBI has given revised the guidelines for treatment of restructured accounts by its circular. The auditor should verify compliance with the requirements of the circular issued in this regard. Once the bank receives an application/proposal in respect of an account for restructuring, it implies that the account is intrinsically weak. Thereby during the time the account remains pending for restructuring, the auditors need to take a view whether provision needs to be made in respect of such accounts pending approval for restructuring.

Upgradation of Account: The auditor should examine all the accounts upgraded during the year to ensure that the upgrading of each account is strictly in terms of RBI guidelines.

Auditor has to ensure that any upgrading of accounts classified as 'Sub-Standard' or 'Doubtful' category wherein restructuring / rephasing of principal or interest has taken place should be upgraded to the 'Standard Asset' category only after a period of one year after the date when first payment of interest or of principal, whichever is earlier, falls due under the rescheduled terms, subject to satisfactory performance during the period. The total amount becoming due during this period of one year should be recovered and there should be no overdues to make it eligible for upgradation. If the amount which has become due during this one year period is on a lower side vis a vis total amount outstanding, the other aspects of the account, viz financial performance, availability of security, operations in account, etc., should be reviewed in detail and only if found satisfactory, the account should be upgraded.

Audit Procedure for Accounts falling under CDR (Corporate Debt Restructuring) Programme: Following audit procedures are to be carried out to assess / gain an understanding about the borrower account-

- (a) Review the present classification of the account under IRAC norms adopted by the bank and corresponding provision made in the books of accounts, if any. If the account is already treated as NPA in the books of the bank, the same cannot be upgraded only because of the CDR package.
- (b) Review the Debtor- Creditor Agreement (DCA) and Inter Creditor Agreement (ICA) with respect to availability of such agreements and necessary provisions in the agreement for reference to CDR cell in case of necessity, penal clauses, stand-still clause, to abide by the various elements of CDR system etc., (DCA may be entered into at the time of original sanction of loan or at the time of reference to CDR).
- (c) Auditor has to ascertain the terms of rehabilitation along with the sacrifices, if any, assumed in the rehabilitation program to verify whether such sacrifices have been accounted in the books of accounts of the lender. Ascertain whether any additional financing / conversion of loan into equity have been envisaged in the rehabilitation / restructuring program.

Auditor should also ascertain whether account has been referred to BIFR, as such cases are not eligible for restructuring under CDR system. Large value BIFR cases may be eligible for restructuring under CDR if specifically recommended by CDR core group. Auditor has to verify the necessary approvals / recommendations by CDR core group if auditor comes across any BIFR cases.

Auditor has to ensure that accounts wherein recovery suits have been filed, the initiative to resolve under CDR system is taken by at least by 75% of the creditors by value and 60% in number provided the account meets the basic criteria for becoming eligible under CDR mechanism.

Treatment of accounts restructured under CDR program: Classification and Provisioning: The criteria for classification of accounts will be on the basis of record of recovery as per the existing prudential norms. The asset classification will be as per the lender bank's record of recovery and will be bank specific.

The auditor should ensure that the lender has applied the usual asset classification norms pending outcome of the account with the CDR Cell. The asset classification status should be restored to the position, which existed at the time of reference to the cell if the restructuring under the CDR system takes place.

The auditor should also ensure that in case a standard asset has been restructured second or more time, it has been downgraded to "sub-standard" asset.

The auditor should also ensure that proper disclosure in the Notes to Accounts in respect of CDR of SME undertaken by the bank during the year, as prescribed in the RBI's circular, has been made.

Sale/ Purchase of NPAs: In case of a sale/ purchase of NPAs by the bank, the auditor should examine the policy laid down by the Board of Directors in this regard relating to procedures, valuation and delegation of powers.

The auditor should also examine that:

- (i) only such NPA has been sold which has remained NPA in the books of the bank for at least 2 years.
- (ii) the assets have been sold/ purchased "without recourse" only.
- (iii) subsequent to the sale of the NPA, the bank does not assume any legal, operational or any other type of risk relating to the sold NPAs.
- (iv) the NPA has been sold at cash basis only.
- (v) the bank has not purchased an NPA which it had originally sold.

In case of sale of an NPA, the auditor should also ensure that:

- (i) on the sale of the NPA, the same has been removed from the books of the account.
- (ii) the short fall in the net book value has been charged to the profit and loss account.

11.44 Advanced Auditing and Professional Ethics

- (iii) where the sale is for a value higher than the NBV, no profit is recognised and the excess provision has not been reversed but retained to meet the shortfall/ loss on account of sale of other non-performing financial assets.

Similarly, in case of purchase of NPAs, the auditor should verify that:

- (i) the NPA purchased has been subjected to the provisioning requirements appropriate to the classification status in the books of the purchasing bank.
- (ii) any recovery in respect of an NPA purchased from other banks is first adjusted against its acquisition cost and only the recovered amount in excess of the acquisition cost has been recognised as profit.
- (iii) for the purpose of capital adequacy, banks has assigned 100% risk weights to the NPAs purchased from other banks.

IV. Fixed Assets - The Third Schedule to the Banking Regulation Act, 1949 requires fixed assets to be classified into two categories in the balance sheet, viz., Premises and Other Fixed Assets. Though not specifically mentioned under the Banking Regulation Act, 1949, the assets taken on lease and intangible assets should be shown separately for proper classification and disclosure and also to comply with the requirements of the Accounting Standards (ASs).

Audit Procedures: In carrying out the audit of fixed assets, the auditor is concerned, primarily, with obtaining evidence about their existence and valuation. For this purpose, the auditor should review the system of internal controls relating to fixed assets, particularly the following:

- ◆ Control over expenditures incurred on fixed assets acquired or self constructed;
- ◆ Accountability and utilisation controls; and
- ◆ Information controls for ensuring availability of reliable information about fixed assets.

The branch auditor should ascertain whether the accounts in respect of fixed assets are maintained at the branch or centrally. Similarly, he should ascertain the location of documents of title or other documents evidencing ownership of various items of fixed assets. The procedures described in the following paragraphs would be relevant only to the extent the accounts and documents of title, etc., relating to fixed assets are maintained at the branch. Where the acquisition, disposal, etc., of fixed assets take place at branches / other offices, but accounting of fixed assets is done at the head office, the branch auditor should examine whether acquisitions, disposals, etc. effected at the branch during the year have been properly communicated to the head office.

Premises: The auditor should verify the opening balance of premises with reference to schedule of fixed assets, ledger or fixed assets register. Acquisition of new premises should be verified with reference to authorisation, title deeds, record of payment, etc. Self-constructed fixed assets should be verified with reference to authorisation and documents such as, contractors' bills, work order records and record of payments. The auditor should also examine whether the balances as per the fixed assets register reconcile with those as per the

ledger and the final statements.

In the case of leasehold premises, capitalisation and amortisation of lease premium, if any, should be examined. Any improvements to leasehold premises should be amortised over their balance residual life.

In case the title deeds are held at the head office or some other location, the branch auditor should obtain a written representation to this effect from the branch management and should bring this fact to the notice of the central statutory auditor through a suitable mention in his report. This fact should also be brought in the Long Form Audit Report (LFAR).

Where premises are under construction, it should be seen that they are shown under a separate heading, e.g., 'premises under construction'. Advances to contractors may be shown as a separate item under the head 'fixed assets' or under the head 'other assets'. It should be ensured that where the branch has obtained the licence to commence business and is ready for use then the same is not shown as "premises under construction". In such cases even if all the bills/ documents from the contractors/suppliers are not received, at the year end, an estimate of the expenditure thereon should be made and capitalised on a provisional basis.

Where the premises (or any other fixed assets) are re-valued, the auditor should examine the appropriateness of the basis of revaluation. The auditor should also examine whether the treatment of resultant revaluation surplus or deficit is in accordance with relevant Accounting Standard ". The auditor should also check the impairment, if any, by applying the principles laid down in relevant Accounting Standard .

The auditor should specifically keep in mind the provisions of section 9 of the Banking Regulation Act, 1949, which prohibit a banking company from holding any immovable property, howsoever acquired (i.e., whether acquired by way of satisfaction of claims or otherwise), for a period exceeding seven years from the date of acquisition, except such as is required for its own use. The auditor should specifically examine that no immovable properties other than those required for the own use of the bank have been included in fixed assets (own use would cover use by employees of the bank, e.g., residential premises provided to employees). The branch auditor should also obtain a written representation to the above effect from the branch management.

Other Fixed Assets: The procedures discussed above regarding premises also apply, to the extent relevant, to verification of other fixed assets. In respect of moveable fixed assets, the auditor should pay particular attention to the system of recording the movements as well as other controls over such fixed assets, e.g., their physical verification at periodic intervals by the branch management and/or by inspection/internal/concurrent audit team. He should also examine whether discrepancies have been properly dealt with in the books of account and adequate provision in respect of any damaged assets has been made.

In recent years, banks have incurred substantial expenditure on computer hardware and software. Computer software that is essential for the functioning of the hardware (e.g., operating system) can be considered an integral part of the related hardware. The expenditure incurred on acquisition and installation of the hardware (as also on any systems software considered to be an integral part of the related hardware) should be capitalised in accordance

11.46 Advanced Auditing and Professional Ethics

with the principles laid down in relevant Accounting Standard and depreciated over the remaining useful life of the hardware. Hardware and software are susceptible to faster rate of technical obsolescence, hence the auditor must take into consideration this fact while verifying the provision for depreciation on these assets. The same, however, should not be depreciated for a period of more than three years.

Application software is not an integral part of the related hardware and is treated as an intangible asset. Accordingly, the same should be accounted for as per Accounting Standard (AS 26), "Intangible Assets". The treatment of expenditure on applications software, whether acquired from outside or developed in-house, would also be similar. However, in estimating the useful life of applications software, the rapid pace of changes in software as also the need for periodic modification/ upgradation of software to cater to changes in nature of transactions, information needs etc. need special consideration. As far as expenditure during the stage of in-house development of software is concerned, the same needs to be accounted for in accordance with AS 26, "Intangible Assets", according to which expenditure incurred during the research phase should not be capitalised as part of cost of intangibles. While capitalising the development phase expenditure, due consideration should be given to Paragraph 44 of the said Standard. While conducting the audit of intangible assets, the auditor should also consider the guidelines given by RBI by way of Circulars.

Many a time, fixed assets like furniture, office equipments, etc. are transferred from one branch to another. The auditor should examine whether accumulated depreciation in respect of such assets is also transferred. It may be noted that the consolidated accounts of the bank would not be affected by such transfers.

It should be examined whether fixed assets have been properly classified. Fixed assets of similar nature only should be grouped together. For example, items like safe deposit vaults should not be clubbed together with the office equipments or the theft alarm system of the bank.

In respect of fixed assets sold during the year, a copy of the sale deed, if any, and receipt of the sale value should be examined by the auditor. In such a case, it should also be seen that the original cost and accumulated depreciation on the assets sold have been correctly adjusted. Profit earned or loss incurred on such sales should also be checked.

The auditor should examine whether any expenditure incurred on a fixed asset after it has been brought to its working condition for its intended use, has been dealt with properly.

The auditor at head office level should examine if the consolidated fixed assets schedule matches in all respect and all the transfers ins/outs, are tallied. A broad check on the depreciation amount *vis-a-vis* the gross block of assets be reviewed with special emphasis on the computer hardware/software.

Leased Assets: RBI's Circular No. DBOD No.FSC.BC.70/24.01.001/99 dated July 17, 1999 deals with accounting and provisioning norms to be followed by banks undertaking leasing activity. The auditor, in respect of leased assets, should also have regard to the requirements of AS 19, "Leases".

Impairment of Assets: AS 28 prescribe the procedures that an enterprise should apply to ensure that its assets are carried at not more than their recoverable amount. An asset is treated as carried at more than its recoverable amount if its carrying amount exceeds the amount to be recovered through use or sale of the asset. If this is the case, the asset is described as impaired and this Standard requires the enterprise to recognise an impairment loss. This Standard also prescribes when an enterprise should reverse an impairment loss and it prescribes certain disclosures for impaired assets. This Standard requires that an enterprise should assess at each balance sheet date whether there is any indication that an asset may be impaired. The impairment loss if recognised shall be debited in the profit and loss account provided no revaluation reserve exists at that date in relation to the asset, and if it exists, the loss should first be debited to revaluation reserve. After debiting the revaluation reserve, if still there is impairment loss then the same should be debited to profit and loss account. RBI's circular on compliance with Accounting Standards, issued in April 2004 states as follows in respect of AS 28:

- ◆ The Standard would not apply to investments, inventories and financial assets such as loans and advances and may generally be applicable to banks in so far as it relates to fixed assets.
- ◆ Banks may also take into account the following specific factors while complying with the Standard:
 - Paragraphs 7 and 8 of the Standard have clearly listed the triggers which may indicate impairment of the value assets. Hence, banks may be guided by these in determining the circumstances when the Standard is applicable to banks and how frequently the assets covered by the Standard need to be reviewed to measure impairment.
 - In addition to the assets of banks which are specifically identified above, viz., financial assets, inventories, investment, loans and advances etc to which the Standard does not apply, the Standard would apply to financial lease assets and non banking assets acquired in settlement of claims only when the indications of impairment of the entity are evident.

V. Other Assets - The branch auditor may carry out the audit of various items appearing under the head 'other assets' in the following manner:

Inter-Office Adjustments: Inter-branch accounts are normally reconciled by each bank at the central level. While practices with various banks may differ, the inter-branch accounts are normally sub-divided into segments or specific areas, e.g., 'Drafts paid/ payable', 'inter-branch remittances', 'H.O. A/c', etc. The auditor should report on the year-end status of inter-branch accounts indicating the dates up to which all or any segments of the accounts have been reconciled. The auditor should also indicate the number and amount of outstanding entries in the inter branch accounts, giving the relevant information separately for debit and credit entries. The auditor can obtain the relevant information primarily from branch audit reports.

Interest Accrued: The main components of this item are interest accrued but not due on investments and advances and interest due but not collected on investments. As banks

11.48 Advanced Auditing and Professional Ethics

normally debit the borrower's account with interest due on the balance sheet date, there would not usually be any amount of interest accrued but not due on advances as banks normally debit the borrowers account with interest due on the balance sheet date, there would not usually be any amount of interest accrued but not due on advances. On the other hand interest on government securities, debentures, bonds, etc. which accrues from day to day should be calculated and brought into account, in so far as it has accrued on the date of the balance sheet. ***The auditor should examine whether the interest has been accrued on the entire loans and advances portfolio of the bank. Special consideration should be given to the overdue bills purchased/discounted.***

The auditor should ensure that only such interest as can be realised in the ordinary course of business should be shown under this head. This is based on the principle, recognised in AS 9, that revenue cannot be recognised if there is a significant uncertainty about its collectability. Dividends recognised as income but not received may be included in the residuary sub-head of 'others'. Dividends and interest on investments would be recognised in the books of the branch only if it is handling the work relating to investments or receipt of income on investments.

Tax Paid in Advance/Tax Deducted at Source: Generally, this item is dealt with at the head office level only and would, therefore, not appear in the balance sheet of a branch, except that tax deducted at source on fixed deposits and other products/services is handled at the branch level. The procedures to be followed by the branch auditor for verification of tax deducted at source by the branch would be similar to those in an audit of other types of entities. The branch auditor needs to ensure that the certificates for such tax deducted at source is collected by the branch and the original copy is sent to the Head Office along with the transfer of such Tax Deducted at Source (TDS) amount to Head Office on periodic basis as defined.

At Head Office level, the availability of all the TDS Certificates, submission of the same with Income Tax Department/claim of the same in Income Tax returns filed should be checked to ensure the justification of the claim towards such certificates.

Stationery and Stamps: Internal controls over stationery of security items (like term deposit receipts, drafts, pay orders, cheque books, traveller's cheques, gift cheques, etc.) assume special significance in the case of banks as their loss or misuse could eventually lead to a misappropriation of the most valuable physical asset of a bank, viz., cash. The branch auditor should study and evaluate the existence, effectiveness and continuity of internal controls over these items in the normal course of his audit. It may be noted that the branch auditor is required to specifically comment on the adequacy of the relevant internal controls in his LFAR.

The item "Stationery and Stamps" should include only exceptional items of expenditure on stationery like, bulk purchase of security paper, loose leaf or other ledgers, etc., which are shown as quasi-asset to be written off over a period of time. In other words, the normal expenditure on stationery may be treated as an expense in the profit and loss account, while unusually heavy expenditure may be treated as an asset to be written off based on issue/consumption. At the branch level, the expenditure on latter category may not appear since a considerable part of the stationery is supplied to branches by the head office.

The auditor should physically verify the stationery and stamps on hand as at the year-end, especially stationery of security items. Any shortage should be inquired into as it could expose

the bank to a potential loss from misuse. The auditor should examine whether the cost of stationery and stamps consumed during the year has been properly charged to the profit and loss account for the year in the context of the accounting policy/instructions from the head office regarding treatment of cost of stationery and stamps.

Non-Banking Assets Acquired in Satisfaction of Claims: Under this heading, will be included, those immovable properties/tangible assets, which the bank has acquired in satisfaction of debts due or its other claims and are being held with the intention of being disposed of.

While examining this item, the auditor should specifically keep in mind the provisions of section 9 of the Banking Regulation Act, 1949, which prohibit a banking company from holding any immovable property, however, acquired (i.e. whether acquired by way of satisfaction of claims or otherwise), except such as is required for its own use, for any period exceeding seven years from the date of acquisition thereof. During this period, the bank may deal or trade in any such property for the purpose of facilitating the disposal thereof. The RBI has the power to extend the aforesaid period in a particular case up to another five years. (It may be noted that the aforesaid section is applicable to banking companies only and not to other types of banks like nationalised banks.)

The auditor should verify such assets with reference to the relevant documentary evidence, e.g., terms of settlement with the party, order of the Court or the award of arbitration, etc. He should satisfy himself that the ownership of the property has legally vested in the bank. If there is any dispute or other claim about the property, the auditor should examine whether the recording of the asset is appropriate or not. In case the dispute arises subsequently, the auditor should examine whether a provision for liability or disclosure of a contingent liability is appropriate, keeping in view the requirements of AS 29 "Provisions, Contingent Liabilities and Contingent Assets".

Others: This is the residual heading, which will include items not specifically covered under other sub-heads, e.g., claims which have not been received, debit items representing additions to assets or reductions in liabilities which have not been adjusted for technical reasons or want of particulars, etc., receivables on account of government business, prepaid expenses, Accrued income other than interest (e.g., dividend declared but not received) may also be included under this head. The audit procedures relating to some of the major items included under this head are discussed below-

Non-Interest Bearing Staff Advances: The auditor should examine non-interest bearing staff advances with reference to the relevant documentation and the policy in this regard which is framed by the bank. The availability, enforceability and valuation of security, if any, should also be examined. It needs to be ensured that the same relates to employees on the roll of the bank on the date of the preparation of financial statements.

Security Deposits: Security deposits with various authorities (e.g., on account of telephone, electricity, etc.) and with others (e.g., deposits in respect of premises taken on rent) should be examined with reference to documents containing relevant terms and conditions, and receipts obtained from the parties concerned. It needs to be ensured that the deposit amount has not become due as per the terms and conditions. If it is so, then the recoverability of the same

11.50 Advanced Auditing and Professional Ethics

needs to be looked into in detail and appropriate provision be made against the amount which is doubtful to recover.

Suspense Account: 'Suspense' account is another item included under 'other assets'. Ideally, where accounts are maintained properly and on a timely basis, the suspense account may not arise. However, in a practical situation, suspense account is often used to temporarily record certain items such as the following:

- (i) amounts temporarily recorded under this head till determination of the precise nature thereof or pending transfer thereof to the appropriate head of account;
- (ii) debit balances arising from payment of interest warrants/ dividend warrants pending reconciliation of amounts deposited by the company concerned with the bank and the payment made by various branches on this account;
- (iii) amounts of losses on account of frauds awaiting adjustment.

The auditor should pay special attention to any unusual items in suspense account. He should obtain from the management details of old outstanding entries in suspense account along with reasons for delay in adjusting the entries. Where the outstanding balances comprised in suspense account require a provision/write-off, the auditor should examine whether the necessary provision has been made/write-off.

Prepaid Expenses: The auditor should verify prepaid expenses in the same manner as in the case of other entities. Thus, the auditor should examine whether the basis of allocation of expenditure to different periods is reasonable. He should particularly examine whether the allocation of discounting and rediscounting charges paid by the bank to different accounting periods is in consonance with the accounting policy followed for the bank as a whole.

Miscellaneous Debit Balances on Government Account: Miscellaneous debit balances on government account in respect of pension, public provident funds, compulsory deposit scheme payments, etc., for which the branch obtains reimbursement from the government through a designated branch, are also included under the head 'others'. The auditor should review the ageing statements pertaining to these items. He should particularly examine the recoverability of old outstanding items. The auditor should also examine whether claims for reimbursement have been lodged by the branch in accordance with the relevant terms and conditions. The net balances of the amount recoverable at the Head Office level should also be taken along with the age-wise analysis of the same. In case of old outstanding balances without any confirmation or proper justification of the same, should be provided for in the accounts.

The residual item of "Others" in Other Assets generally constitutes a significant amount in the Balance Sheet of the bank. The Head Office auditors should obtain the head wise details of the same along with the previous year figures. The age-wise details of the major outstanding should also be obtained, wherever, feasible. Further, the major variance as compared to the previous year figures should also be enquired into and reasons for the same should be recorded and reviewed. In case any amount seems doubtful of recovery, appropriate provisions against the same should be made.

VI. Capital - The following particulars have to be given in respect of share capital in the balance sheet.

(a) For Banks Incorporated in India

Authorised Capital	(shares of ₹ each)
Issued Capital	(-do-)
Subscribed Capital	(-do-)
Called-up Capital	(-do-)

Less: Calls unpaid

Add: Forfeited shares

(In case of Nationalised Banks capital owned by Central Government as on the date of balance sheet including contribution from Government, if any, for participating in World Bank Projects should be shown separately.)

(b) For Banks Incorporated Outside India

- (i) Capital (the amount brought in by banks by way of start-up capital as prescribed by RBI should be shown under this head).
- (ii) Amount of deposit kept with the RBI under section 11(2) of the Banking Regulation Act, 1949.

The auditor should verify the opening balance of capital with reference to the audited balance sheet of the previous year. In case there has been an increase in capital during the year, the auditor should examine the relevant documents supporting the increase. For example, in case of an increase in the authorised capital of a banking company, the auditor should examine the special resolution of shareholders and the memorandum of association. An increase in subscribed and paid-up capital of a banking company, on the other hand, should be verified with reference to prospectus/other offer document, reports received from registrars to the issue, bank statement, etc.

11.7 Capital Adequacy

The term 'capital adequacy' is used to describe the adequacy of capital resources of a bank in relation to the risks associated with its operations.

Adequacy of capital of banks has been the subject matter of consideration by banking authorities around the world for several decades. For example, in 1975, the Bank of England published the conclusions of a Joint Working Party which had been formed by the Bank along with several clearing banks to examine the nature of capital and of liquidity of banks and to develop principles for examining their adequacy. The paper outlined two ratios for assessing the adequacy of capital: 'free resources ratio' and 'risk asset ratio'. The *free resources ratio* related current liabilities to capital resources excluding the part of capital devoted to financing infrastructure and other non-banking assets. The *risk asset ratio* related the risk of losses inherent in the assets of the business of banks to the capital available to absorb such losses. The paper argued that the risk asset ratio was more useful.

11.52 Advanced Auditing and Professional Ethics

The risk asset measure has since received wide international acceptance as the basis for measuring the capital adequacy of banks. An international agreement on a common risk-based capital framework and definition of bank capital was framed by the Committee on Banking Regulations and Supervisory Practices of the G-10 Nations (popularly known as the Basel Committee) and was formally adopted in 1988. It was also adopted by all the twenty-five countries that were either full members of the Organisation for Economic Co-operation and Development or had special lending arrangements under the International Monetary Fund's general borrowing procedures.

The framework attempted to relate a bank's capital needs to its risk profile. Besides serving to strengthen the soundness and stability of the banking system, it also sought to give banks an incentive to hold lower-risk assets, incorporate off-balance sheet exposures explicitly into capital assessments, and achieve greater uniformity in application of capital standards to banks across different countries. The prescribed minimum capital standards for risk-based capital were to apply to banks on a transitional basis beginning at the year-end 1990 and were to be fully in place by end 1992.

Capital Adequacy Measures in India: In India, the statutes governing various types of banks lay down the minimum capital requirements for them. Besides, there are also requirements for maintenance of statutory reserves. Considering the variations in minimum capital requirements applicable to different types of banks and taking into account the approach adopted by Basel Committee, the Reserve Bank prescribed, in year 1992, a uniform methodology for determining the capital adequacy of scheduled commercial banks (other than regional rural banks). The Master Circular on "Prudential Guidelines on Capital Adequacy and Market Discipline- New Capital Adequacy Framework (NCAF)", provides the guidelines to be followed by banks for capital adequacy. Some of the important aspects of the circular are covered below.

The basic approach of capital adequacy framework is that a bank should have sufficient capital to provide a stable resource to absorb any losses arising from the risks in its business. Capital is divided into tiers according to the characteristics/qualities of each qualifying instrument. For supervisory purposes capital is split into two categories: Tier I and Tier II, representing different instruments' quality as capital.

- ◆ **Tier I capital** consists mainly of share capital and disclosed reserves and it is a bank's highest quality capital because it is fully available to cover losses.
- ◆ **Tier II capital** consists of certain reserves and certain types of subordinated debt. The loss absorption capacity of Tier II capital is lower than that of Tier I capital.

Components of Capital: The Master Circular on Capital Adequacy discusses the Capital Funds in two categories – capital funds for Indian banks and capital funds of foreign banks operating in India. The following table shows the components of the Capital Funds for Indian *vis a vis* foreign banks operating in India.

	Indian Banks	Foreign Banks operating in India
Tier Capital I	Paid up capital (ordinary shares)	Interest free funds from Head Office ²
	Statutory reserves	Statutory reserves kept in Indian books
	Other disclosed free reserves, if any	Remittable surplus retained in Indian books which is not repatriable so long as the bank functions in India
	Innovative perpetual debt instruments eligible for inclusion as Tier I capital	Innovative Instruments eligible for inclusion as Tier I capital
	Perpetual non-cumulative preference shares eligible for inclusion as Tier I capital subject to laws in force from time to time*	Capital reserves representing surplus arising out of sale proceeds of assets
		Interest free funds remitted from abroad for the purpose of acquisition of property
Tier Capital II		Head office borrowings in foreign currency by foreign banks operating in India
	Revaluation reserves	Revaluation reserves
	General provisions and loss reserves	General provisions and loss reserves
	Hybrid debt capital instruments, which includes Perpetual Cumulative Preference Shares (PCPS) / Redeemable Non-Cumulative Preference Shares (RNCPS) / Redeemable cumulative preference shares(RCPS) and Debt capital instruments	Hybrid debt capital instruments which includes Perpetual Cumulative Preference Shares (PCPS)/Redeemable Non-Cumulative Preference Shares(RNCPS) /Redeemable cumulative preference shares(RCPS) and Debt capital instruments
	Subordinate debts	Subordinate debts
	Innovative Perpetual Debt Instruments (IPDI) and Perpetual Non- Cumulative Preference Shares (PNCPS)	

² Kept in a separate account in Indian books specifically for the purpose of meeting the capital adequacy norms.
 * The annexure to the Master Circular on Prudential Norms on Capital Adequacy-Basel I Framework provides the guidelines for Perpetual non-cumulative preference shares eligible for inclusion as Tier I capital.

11.54 Advanced Auditing and Professional Ethics

In case of foreign banks operating in India, RBI's Master Circular on Capital Adequacy also lays down certain additional provisions in respect of capital to be followed by such banks.

Undisclosed Reserves: They can be included in capital, if they represent accumulations of post-tax profits and are not encumbered by any known liability and should not be routinely used for absorbing normal loss or operating losses.

Re-valuation Reserves: It would be prudent to consider re-valuation reserves at a discount of 55 percent while determining their value for inclusion in Tier II capital. Such reserves will have to be reflected on the face of the Balance Sheet as re-valuation reserves.

General Provisions and Loss Reserves: Such reserves can be included in Tier II capital if they are not attributable to the actual diminution in value or identifiable potential loss in any specific asset and are available to meet unexpected losses. Adequate care must be taken to see that sufficient provisions have been made to meet all known losses and foreseeable potential losses before considering general provisions and loss reserves to be part of Tier II capital. General provisions/loss reserves will be admitted up to a maximum of 1.25 percent of total risk weighted assets. 'Floating Provisions' held by the banks, which is general in nature and not made against any identified assets, may be treated as a part of Tier II capital within the overall ceiling of 1.25 percent of total risk weighted assets, if such provisions are not netted off from gross NPAs to arrive at disclosure of net NPAs

Hybrid Debt Capital Instruments: Those instruments which have close similarities to equity, in particular when they are able to support losses on an ongoing basis without triggering liquidation, they may be included in Tier II capital. At present following instruments have been recognised and placed under this category.

- i. Perpetual Cumulative Preference Shares (PCPS)/ Redeemable Non-Cumulative Preference Shares (RNCPS)/Redeemable Cumulative Preference shares (RCPS) as part of upper Tier II capital.
- ii. Debt capital instruments eligible for inclusion as Upper Tier II capital.

Subordinated Debt: To be eligible for inclusion in Tier II capital, the instrument should be fully paid-up, unsecured, subordinated to the claims of other creditors, free of restrictive clauses, and should not be redeemable at the initiative of the holder or without the consent of the RBI. They often carry a fixed maturity, and as they approach maturity, they should be subjected to progressive discount, for inclusion in Tier II capital. Instruments with an initial maturity of less than 5 years or with a remaining maturity of one year should not be included as part of Tier II capital.

Investment Reserve Account: In the event of provisions created on account of depreciation in the 'Available for Sale' or 'Held for Trading' categories being found to be in excess of the required amount in any year, the excess should be credited to the Profit & Loss account and an equivalent amount (net of taxes, if any and net of transfer to Statutory Reserves as applicable to such excess provision) should be appropriated to an Investment Reserve Account in Schedule 2 –“Reserves & Surplus” under the head “Revenue and other Reserves” and would be eligible for inclusion under Tier II within the overall ceiling of 1.25 per cent of total Risk Weighted Assets prescribed for General Provisions/ Loss Reserves.

Banks are allowed to include the 'General Provisions on Standard Assets' and 'Provisions held for Country Exposures' in Tier II capital. However, the provisions on 'standard assets' together with other 'general provisions/ loss reserves' and 'provisions held for country exposures' will be admitted as Tier II capital up to a maximum of 1.25 per cent of the total risk-weighted assets.

Capital Risk Adequacy Ratio (CRAR)

The CRAR is computed as follows:

$$\frac{\text{Capital Funds}}{\text{Risk weighted assets and off-balance sheet items}} \times 100$$

The RBI requires banks to maintain a minimum CRAR of 9 per cent on an ongoing basis. The Master Circular on Capital Adequacy contains detailed guidelines on calculation of risk weighted assets and off-balance sheet items and CRAR.

VII. Reserves and Surplus - The following are required to be disclosed in the balance sheet under the head 'Reserves and Surplus'.

- I. Statutory Reserves
- II. Capital Reserves
- III. Share Premium
- IV. Revenue and Other Reserves including investment Fluctuation Reserve

(In respect of items I – IV above, opening balance, additions during the year and deductions during the year are to be shown separately in respect of each item)

- V. Balance in Profit and Loss Account

Statutory Reserves: Under sub-section (1) of section 17 of the Banking Regulation Act, 1949 every banking company incorporated in India has to transfer 20% of its profits to its reserve fund each year before declaring dividends. The transfer to reserve as above and any other reserve created in pursuance of any section of the Act has also to be disclosed under the aforesaid head. Sec 17(2) of Act provides that where a banking company appropriates any sum or sums from the reserve fund or the share premium account, it shall, within twenty-one days from the date of such appropriation, report the fact to the RBI, explaining the circumstances relating to such appropriation.

All scheduled commercial banks, including foreign banks operating in India, (except RRBs/LABs) have been instructed to transfer not less than 25% of the 'net profit' (before appropriations) to the Reserve Fund with effect from the year ending 31st March, 2001. Such transfer to reserves may be made "after adjustment / provision towards bonus to staff".

Capital Reserves: The expression 'capital reserves' does not include any amount regarded as free for distribution through the profit and loss account. According to the Notes and Instructions for Compilation of Balance Sheet, issued by the RBI, surplus on re-valuation or sale of fixed assets is to be treated as capital reserve.

Securities Premium Account: According to section 52 of the Companies Act, 2013, where a company issues shares at a premium, the amount of premium should be transferred to a

11.56 Advanced Auditing and Professional Ethics

separate account to be called the 'securities premium account'. The provisions of the Companies Act, 2013 regarding reduction of capital also apply to securities premium account. However, as per section 52, the securities premium may be applied for the following purposes:

- (a) issuing fully paid bonus securities;
- (b) writing off the preliminary expenses;
- (c) writing off the expenses of, or the commission paid or discount allowed on, any issue of securities or debentures;
- (d) providing for the premium payable on the redemption of any redeemable preference securities or debentures; or
- (e) for the purchase of its own shares or of other securities under section 68 of the Companies Act, 2013.

A banking company has to report to the RBI any appropriations made from the securities premium account. Such an appropriation can be only for the purposes described above or in accordance with the provisions governing reduction of share capital by a company.

Revenue and Other Reserves: According to the Notes and Instructions for Compilation of Balance Sheet and Profit and Loss Account, issued by the RBI, the expression 'Revenue Reserve' shall mean any reserve other than capital reserve.

All reserves, other than those separately classified (viz., statutory reserves, capital reserves and share premium) will be shown under this head. The expression 'reserve' shall not include any amount written off or retained by way of providing for depreciation, renewals or diminution in value of assets or retained by way of providing for any known liability. In terms of RBI guidelines, the 'Investment Reserve Account' representing write back of excess provision on investments has to be treated as revenue reserve.

Balance of Profit: This item includes balance of profit after appropriations. According to the Notes and Instructions for compilation of balance sheet and profit and loss account, issued by the RBI, in case of loss, the balance may be shown as a deduction. Though it is not mentioned whether the loss is to be deducted from the aggregate of 'reserves' or from 'revenue and other reserves' only, it is obvious on a consideration of legal requirements and sound accounting principles that the loss should be deducted only from revenue reserves.

Further, as prescribed by RBI's circular, the banks need to obtain prior approval of the Reserve Bank of India before any appropriation is made from the statutory reserve or any other reserve.

The said circular also requires that:

- (i) all expenses including provisions and write offs recognised in a period, whether mandatory or prudential, should be reflected in the Profit and Loss Account for the period as an 'above the line' item (i.e., before arriving at the net profit);
- (ii) wherever draw down from reserves takes place with the prior approval of Reserve Bank, it should be effected only "below the line", (i.e., after arriving at the profit/loss for the period); and

- (iii) suitable disclosures should be made of such draw down of reserves in the 'Notes on Accounts' to the Balance Sheet.

Audit Procedures: The auditor should verify the opening balances of various reserves with reference to the audited balance sheet of the previous year. Additions to or deductions from reserves should also be verified in the usual manner, e.g., with reference to board resolution. In the case of statutory reserves and share premium, compliance with legal requirements should also be examined. Thus, the auditor should specifically examine whether the requirements of the governing legislation regarding transfer of the prescribed percentage of profits to reserve fund have been complied with. In case the bank has been granted exemption from such transfer, the auditor should examine the relevant documents granting such exemption. Similarly, it should be examined whether the appropriations from share premium account conform to the relevant legal requirements.

VIII. Deposits - Deposits are required to be classified in the balance sheet under the following heads.

- A. I. *Demand Deposits*
 - (i) From Banks
 - (ii) From Others
- II. *Savings Bank Deposits*
- III. *Term Deposits*
 - (i) From Banks
 - (ii) From Others
- B. I. *Deposits of branches in India*
- II. *Deposits of branches outside India*

Audit Procedures: In carrying out audit of deposits and liabilities, the auditor is primarily concerned with obtaining reasonable assurance that all known liabilities are recorded and stated at appropriate amounts.

The auditor may verify various types of deposits in the following manner:

Current Accounts: The auditor should verify the balances in individual accounts on a sampling basis. He should also examine whether the balances as per subsidiary ledgers tally with the related control accounts in the General Ledger. In case of any differences, the auditor should examine the reconciliation prepared by the branch in this regard.

Some banks have a procedure for obtaining confirmation of balances periodically. The auditor should examine whether the procedure laid down in this behalf has been followed consistently throughout the year. He should also examine, on a sampling basis, the confirmations received.

The auditor should ensure that debit balances in current accounts are not netted out on the liabilities side but are appropriately included under the head 'advances'.

Inoperative accounts are a common area of frauds in banks. While examining current accounts, the auditor should specifically cover in his sample some of the inoperative accounts

11.58 Advanced Auditing and Professional Ethics

revived during the year. The auditor should also ascertain whether inoperative accounts are 'revived' only with proper authority. For this purpose, the auditor should identify cases where there has been a significant reduction in balances compared to the previous year and examine the authorisation for withdrawals.

Savings Bank Deposits: The auditor should verify the balances in individual accounts on a sampling basis. He should also examine whether the balances as per subsidiary ledgers tally with the related control accounts in the General Ledger. In case of any differences, the auditor should examine the reconciliation prepared by the branch in this regard.

The auditor should also check the calculations of interest on a test check basis. In case of branch under Core Banking Solution (CBS) the product sheet for calculation of interest on saving bank account can be obtained in selected sample and can verify the calculation. In case of manual branches the calculation can be verified as per the work sheets.

As in the case of current accounts, the auditor should pay special attention to inoperative savings bank accounts.

Term Deposits: While evaluating the internal controls over term deposits, the auditor should specifically examine whether the deposit receipts and cash certificates are issued serially and all of them are accounted for in the registers. The auditor should also satisfy himself that there is a proper control over the unused forms of deposit receipts and cash certificates to prevent their misuse.

As stated earlier, the rate of interest on Certificates of Deposits (CDs) is negotiable with the depositor. This area is quite sensitive. The auditor should bear this fact in mind while examining the efficacy of prescribed internal controls with regard to rates of interest on CDs.

The auditor should verify the deposits with reference to the relevant registers. The auditor should also examine, on a sampling basis, the registers with the counter-foils of the receipts issued and with the discharged receipts returned to the bank. The reconciliation of subsidiary records for various types of term deposits with the related control accounts in the General Ledger should be examined. The auditor should also examine whether provision has been made for interest accrued on the deposits up to the date of the balance sheet. Auditor should ensure that proper provision for interest payable on deposits is made.

In some cases, banks employ some persons as 'collectors' to collect the deposits from depositors, e.g., in case of recurring deposits. In such cases, the auditor should specifically examine the efficacy of the internal control procedures for reconciling the records of the bank with those of the collectors.

Term deposits from banks are usually (though not necessarily) in round figures. Any odd balances should, therefore, put the auditor to enquiry.

Deposits Designated in Foreign Currencies: In the case of deposits designated in a foreign currency, e.g., foreign currency non-resident deposits, the auditor should examine whether they have been converted into Indian rupees at the rate notified in this behalf by the head office. The auditor should also examine whether any resultant increase or decrease has been taken to the profit and loss account. It may also be seen that interest on deposits has been paid on the basis of 360 days in a year. Further, in case of conversion of FCNR (B) deposits

into NRE deposits or *vice versa* before maturity has been subjected to the provisions relating to premature withdrawal.

Interest Accrued But Not Due: The auditor should examine that interest accrued but not due on deposits is not included under the relevant deposits but is shown under the head 'other liabilities and provisions'.

Overall Reconciliation: The procedures of banks usually provide for periodic correlation of outstanding deposits with the cost of deposits. The auditor should ascertain from the management whether such an exercise has been carried out and if so, he should review the same. The auditor should examine that interest accrued but not due has also been considered for this purpose.

Window-dressing: There are several ways in which the deposits of a bank may be inflated for purposes of balance sheet presentation. For example, some of the constituents may be allowed overdraft on or around the date of the balance sheet, the overdrawn amounts may be placed as deposits with the bank, and further advances may be given on the security of the deposit receipts, thus inflating deposits as well as advances. The transactions may be reversed immediately after the close of the year. Where the auditor comes across transactions, which indicate the possibility of window-dressing, he may report the same in his long form audit report. In appropriate cases, the auditor should consider making a suitable qualification in his main audit report also.

Know Your Customers Norms: RBI has issued instructions to all banks to implement without fail certain procedural norms on KYC. Failure would attract levy of penalty and if penalty has been levied the same is to be disclosed in the notes to accounts. In view of the nature of the directive the audit procedure may be suitably adopted to enquire the system of implementation and review of other reports in respect of this area. The auditor should examine that an adequate there exists proper procedure in place to ensure that framework relating to 'Know Your Customer' and Anti-Money Laundering measures is formulated and put in place by the bank.

IX. Borrowing - Borrowings of a bank are required to be shown in balance sheet as follows.

I. Borrowings in India

- (i) Reserve Bank of India
- (ii) Other Banks
- (iii) Other Institutions and Agencies

II. Borrowings outside India

The total amount of secured borrowings included under the above heads is to be shown by way of a note to the relevant schedule. Secured borrowings for this purpose include borrowings/refinance in India as well as outside India. It may be noted that the inter-office transactions are not borrowings and therefore, should not be presented as such.

Audit Procedures

Borrowings from RBI, other banks/financial institutions, etc. should be verified by the auditor with reference to confirmation certificates and other supporting documents such as, agreements, correspondence, etc. Audit evidence in the form of external confirmations received directly by the auditor from appropriate confirming parties may assist the auditor in obtaining audit evidence that the auditor requires to respond to significant risks of material misstatement. The auditor is required to comply with the requirements of SA 505 "External Confirmations" which contains guidance on designing and performing external confirmation procedures to obtain relevant and reliable audit evidence.

The auditor should also examine whether a clear distinction has been made between 'rediscount' and 'refinance' for disclosure of the amount under the above head since rediscount does not figure under this head.

The auditor should examine whether borrowings of money at call and short notice are properly authorised. The rate of interest paid/payable on, as well as duration of such borrowings should also be examined by the auditor.

The auditor should similarly examine the relevant correspondence or other documents to ensure that the branch has been authorised by the head office to borrow/retain other borrowings and that the terms on which borrowings have been made are in accordance with the authorisation.

The auditor should examine whether the amount shown in the branch accounts is properly classified based on security or otherwise.

X. Other Liabilities and Provisions - The Third Schedule to the Banking Regulation Act, 1949, requires disclosure of the following items under the head 'Other Liabilities and Provisions'.

- (a) Bills payable
- (b) Inter-office adjustments (net)
- (c) Interest accrued
- (d) Others (including provisions)

Audit Procedures: The auditor may verify the various items under the head 'other liabilities and provisions' in the following manner.

Bills Payable: The auditor should evaluate the existence, effectiveness and continuity of internal controls over bills payable. Such controls should usually include the following -

- (a) Drafts, mail transfers, traveller's cheques, etc. should be made out in standard printed forms.
- (b) Unused forms relating to drafts, traveller's cheques, etc. should be kept under the custody of a responsible officer.
- (c) The bank should have a reliable private code known only to the responsible officers of its branches coding and decoding of the telegrams should be done only by such officers.
- (d) The signatures on a demand draft should be checked by an officer with the specimen

signature book.

- (e) All the telegraphic transfers and demand drafts issued by a branch should be immediately confirmed by advices to the branches concerned. On payment of these instruments, the paying branch should send a debit advice to the originating branch.
- (f) If the paying branch does not receive proper confirmation of any telegraphic transfers or demand draft from the issuing branch, it should take immediate steps to ascertain the reasons.
- (g) In case an instrument prepared on a security paper, e.g., draft, has to be cancelled (say, due to error in preparation), it should be ensured that the manner of cancellation is such that the instrument cannot be misused. (For example, in the case of drafts, banks generally cut the distinctive serial number printed on the form and paste it in the book in which drafts issued are entered.) Cases of frequent cancellation and re-issuance of drafts, pay orders, etc. should be carefully looked into by a responsible official.

Based on his evaluation of the efficacy of the relevant internal controls, the auditor should examine an appropriate sample of outstanding items comprised in bills payable accounts with the relevant registers. Reasons for old outstanding debits in respect of drafts or other similar instruments paid without advice should be ascertained. Correspondence with other branches after the year-end (e.g., responding advices received from other branches, advices received from other branches in respect of drafts issued by the branch and paid by the other branches without advice) should also be examined specially in so far as large value items outstanding on the balance sheet date are concerned.

Others (Including Provisions): It may be noted that the figure of advances and investments in the balance sheet of a bank excludes provisions in respect thereof made to the satisfaction of auditors. The auditor should examine other provisions and other items of liabilities in the same manner as in the case of other entities.

Inter-office Adjustments - The balance in inter-office adjustments account, if in credit, is to be shown under this head.

Interest Accrued - Interest accrued but not due on deposits and borrowings is to be shown under this head. The auditor should examine this item with reference to terms of the various types of deposits and borrowings. It should be specifically examined that such interest has not been clubbed with the figures of deposits and borrowings shown under the head 'Deposits and Borrowings'.

Others (including provisions) - According to the Notes and Instructions for compilation of balance sheet and profit and loss account, issued by the RBI, the following items are to be included under this head:

- (a) Net provision for income tax and other taxes like interest tax, less advance payment and tax deducted at source.
- (b) Surplus/provisions in bad and doubtful debts provision account (such surplus is in the nature of a reserve).
- (c) Surplus/provisions for depreciation in securities (such surplus is in the nature of a

11.62 Advanced Auditing and Professional Ethics

reserve).

- (d) Contingency funds, which are actually in the nature of reserves but are not disclosed as such.
- (e) Proposed dividend/transfer to Government.
- (f) Other liabilities, which are not disclosed under any of the major heads such as unclaimed dividend, provisions and funds kept for specific purposes, unexpired discount, outstanding charges like rent, conveyance, etc.
- (g) Certain types of deposits like staff security deposits, margin deposits, etc., which are repayable only subject to compliance with certain conditions. (The interest on such deposits would also be included under this head).
- (h) Blocked Account arising from transfer of credit entries in inter-branch accounts outstanding for more than five years.

Besides the above items, the following are other important items usually included under this head:

- (a) Collections in respect of suit-filed accounts. These are not adjusted against advances till final settlement. (However, for the purpose of provisioning against non-performing advances, such credit balances are taken into account for ascertaining net outstandings).
- (b) Collection of income-tax on behalf of the Government.
- (c) Collection from DICGC. These are carried till final realisation/write-off of the concerned advance account.
- (d) Provisions for frauds. These are ultimately adjusted by way of a write-off.
- (e) Insurance claims received in respect of frauds. These are retained separately till final write-off in respect of fraud.
- (f) Provision for gratuity, pension and other staff benefits.
- (g) Provision for bank's share in the expenses of the Banking Services Recruitment Board.
- (h) Provision for audit fees.
- (i) ***Unamortized interest income on the bills purchased/ discounted.***

It may be noted that many of the items to be disclosed under this head are accounted for at the head office level and would not therefore form part of balance sheet of a branch.

XI. Contingent Liabilities - The Third Schedule to the Banking Regulation Act, 1949, requires the disclosure of the following as a footnote to the balance sheet.

- (a) Contingent Liabilities
 - I. Claims against the bank not acknowledged as debts
 - II. Liability for partly paid investments
 - III. Liability on account of outstanding forward exchange contracts.

- IV. Guarantees given on behalf of constituents
 - (a) In India
 - (b) Outside India
- V. Acceptances, endorsements and other obligations
- VI. Other items for which the bank is contingently liable
 - (b) Bills for Collection

Audit Procedures

Contingent Liabilities: In respect of contingent liabilities, the auditor is primarily concerned with seeking reasonable assurance that all contingent liabilities are identified and properly valued. To this end, the auditor should, generally follow the audit procedures given below:

- (a) the auditor should ensure that there exists a system whereby the non fund based facilities or additional/*ad hoc* credit facilities to parties are extended only to their regular constituents, etc.
- (b) Ascertain whether there are adequate internal controls to ensure that transactions giving rise to contingent liabilities are executed only by persons authorised to do so and in accordance with the laid down procedures.
- (c) The auditor should also ensure that in case of LCs for import of goods, as required by the abovementioned Master Circular on guarantees and co-acceptances, the payment to the overseas suppliers is made on the basis of shipping documents and after ensuring that the said documents are in strict conformity with the terms of LCs.
- (d) Ascertain whether the accounting system of the bank provides for maintenance of adequate records in respect of such obligations and whether the internal controls ensure that contingent liabilities are properly identified and recorded.
- (e) Performs substantive audit tests to establish the completeness of the recorded obligations. Such tests include confirmation procedures as well as examination of relevant records in appropriate cases.
- (f) Review the reasonableness of the year-end amount of contingent liabilities in the light of previous experience and knowledge of the current year's activities.
- (g) Review whether comfort letters issued by the bank has been considered for disclosure of contingent liabilities.
- (h) Obtain representation from the management that:
 - (i) all contingent liabilities have been disclosed;
 - (ii) the disclosed contingent liabilities do not include any contingencies which are likely to result in a loss/ expense and which, therefore, require creation of a provision in the financial statements;

11.64 Advanced Auditing and Professional Ethics

- (iii) the estimated amounts of financial effect of the contingent liabilities are based on the best estimates in terms of Accounting Standard 29, including any possibility of any reimbursement;
 - (iv) in case of guarantees issued on behalf of the bank's directors, the bank has taken appropriate steps to ensure that adequate and effective arrangements have been made so that the commitments would be met out of the party's own resources and that the bank will not be called upon to grant any loan or advances to meet the liability consequent upon the invocation of the said guarantee(s) and that no violation of section 20 of the Banking Regulations Act, 1949 has arisen on account of such guarantee; and
 - (v) such contingent liabilities which have not been disclosed on account of the fact that the possibility of their outcome is remote, include the management's justification for reaching such a decision in respect of those contingent liabilities.
- (i) The auditor should also examine whether the bank has given any guarantees in respect of any trade credit (buyer's credit or seller's credit)*. The period of guarantees is co-terminus with the period of credit reckoned from the date of shipment.
 - (j) Verify whether bank has extended any non-fund facility or additional/*ad hoc* credit facilities to other than its regular customers. In such cases, auditor should ensure concurrence of existing bankers of such borrowers and enquire regarding financial position of those customers.

The specific procedures to be employed by the auditor to verify various items of contingent liabilities are discussed in the following paragraphs. It may be noted that many of the items discussed in the following paragraphs, may be designated in foreign currencies.

Claims Against the Bank Not Acknowledged as Debts: The auditor should examine the relevant evidence, e.g., correspondence with lawyers/others, claimants, workers/officers, and workmen's/officers' unions. The auditor should also review the minutes of meetings of board of directors/committees of board of directors, contracts, agreements and arrangements, list of pending legal cases, and correspondence relating to taxes, and duties, etc. to identify claims against the bank. The auditor should ascertain from the management the status of claims outstanding as at the end of the year. A review of subsequent events would also provide evidence about completeness and valuation of claims.

Liability on Account of Outstanding Forward Exchange Contracts: The auditor may verify the outstanding forward exchange contracts with the register maintained by the branch and with the broker's advice notes. In particular, the net "position" of the branch in relation to each foreign currency should be examined to see that the position is generally squared and not uncovered by a substantial amount. The net "position" as reported in the financial statements may be verified with reference to the foreign exchange position report prepared by the back office.

* In terms of the Circular No. A.P. (Dir. Series) 60 dated January 31, 2004, any trade credit extended for a period of three years and above comes under the category of external commercial borrowings.

Guarantees Given on Behalf of Constituents: The auditor should ascertain whether there are adequate internal controls over issuance of guarantees, e.g., whether guarantees are issued under proper sanctions, whether adherence to limits sanctioned for guarantees is ensured, whether margins are taken from customers before issuance of guarantees as per the prescribed procedures, etc.

The auditor should ascertain whether there are adequate controls over unused guarantee forms, e.g., whether these are kept under the custody of a responsible official, whether a proper record is kept of forms issued, whether stock of forms are periodically verified and reconciled with the book records, etc.

The auditor should examine the guarantee register to seek evidence whether the prescribed procedure of marking off the expired guarantees is being followed or not.

The auditor should check the relevant guarantee registers with the list of outstanding guarantees to obtain assurance that all outstanding guarantees are included in the amount disclosed in this behalf. The auditor should also examine that expired guarantees are not included in this head. He should verify guarantees with the copies of the letters of guarantee issued by the bank and with the counter-guarantees received from the customers. He should also verify the securities held as margin. If a claim has arisen, the auditor should consider whether a provision is required in terms of the requirements of AS 29, "Provisions, Contingent Liabilities and Contingent Assets".

The auditor should obtain a written confirmation from the management that all obligations in respect of guarantees have been duly recorded and that there are no guarantees issued upto the year-end which are yet to be recorded.

Acceptances, Endorsements and Other Obligations: The auditor should evaluate the adequacy of internal controls over issuance of letters of credit and over custody of unused LC forms in the same manner as in the case of guarantees.

The auditor should verify the balance of letters of credit from the register maintained by the bank. The register indicates the amount of the letters of credits and payments made under them. The auditor may examine the guarantees of the customers and copies of the letters of credit issued. The security obtained for issuing letters of credit should also be verified.

Other Acceptances and Endorsements: The auditor should study the arrangements made by the bank with its customers. He should test check the amounts of the bills with the register maintained by the bank for such bills. The auditor should also examine whether such bills are marked off in the register on payment at the time of maturity.

In respect of letters of comfort, the auditor should examine whether the bank has incurred a potential financial obligation under such a letter. If a comfort letter does not cast any such obligation on the bank, no contingent liability need to be disclosed on this account.

Common Procedures: The auditor should obtain a written confirmation from the management that all obligations assumed by way of acceptances, endorsements and letters of credit have been duly recorded and there are no such obligations assumed upto the year-end, which are yet to be recorded.

11.66 Advanced Auditing and Professional Ethics

The auditor should ascertain whether a contingent obligation assumed by a bank either by way of acceptance, endorsement etc. has resulted in an actual obligation owing to any act or default on the part of its constituent. In such a case, a provision would have to be made in the accounts for the bank's obligation. The amount of the provision should be determined taking into account the probable recovery from the customer.

Other Items for which the Bank is Contingently Liable: The auditor should examine whether commitments under all outstanding underwriting contracts have been disclosed as contingent liabilities. For this purpose, the auditor should examine the terms and conditions of the relevant contracts.

Rediscounting is generally done with the RBI, Industrial Development Bank of India or other financial institutions or, in the case of foreign bills, with foreign banks. If the drawer dishonours the bill, the rediscounting bank has a right to proceed against the bank as an endorser of the bill. The auditor may check this item from the register of bills rediscounted maintained by the branch. He should satisfy himself that all the bills are properly marked off on payment at the time of maturity.

In respect of disputed tax demands, the auditor should examine whether there is a positive evidence or action on the part of the bank to show that it has not accepted the demand for payment of tax or duty. Where an application for rectification of mistake has been made by the entity, the amount should be regarded as disputed. Where the demand notice/intimation for the payment of tax is for a certain amount and the dispute relates to only a part and not the whole of the amount, only such amount should be treated as disputed. A disputed tax liability may require a provision or suitable disclosure as per provisions of AS 29, "Provisions, Contingent Liabilities and Contingent Assets". In determining whether a provision is required, the auditor should, among other procedures, make appropriate inquiries of management, review minutes of the meetings of the board of directors and correspondence with the entity's lawyers, and obtain appropriate management representations.

Disputed tax liabilities in respect of income-tax and similar central taxes would not form part of balance sheet of a branch as these items are dealt with at the head office level. However, the principles enunciated above should be followed in dealing with taxes and duties (such as, local taxes) dealt with at the branch level.

The auditor should also look into the manner of disclosure of interest rate swaps in the financial statements of the bank. The interest rate swaps would be treated as real or contingent liability depending upon the facts and circumstances of each case in accordance with the provisions of the Accounting Standard (AS) 29.

The auditor as in the case of other entities may verify other items under this head.

Bills for Collection: The auditor should ensure that the bills drawn on other branches of the bank are not included in bills for collection.

Inward bills are generally available with the bank on the closing day and the auditor may inspect them at that time. The bank dispatches outward bills for collection soon after they are received. They are, therefore, not likely to be in hand at the date of the balance sheet. The auditor may verify them with reference to the register maintained for outward bills for collection.

The auditor should also examine collections made subsequent to the date of the balance sheet to obtain further evidence about the existence and completeness of bills for collection.

In regard to bills for collection, the auditor should also examine the procedure for crediting the party on whose behalf the bill has been collected. The procedure is usually such that the customer's account is credited only after the bill has actually been collected from the drawee either by the bank itself or through its agents, etc. This procedure is in consonance with the nature of obligations of the bank in respect of bills for collection.

The commission of the branch becomes due only when the bill has been collected. The auditor should, accordingly, examine that there exists adequate internal control system that debits the customer's account with the amount of bank's commission as soon as a bill collected is credited to the customer's account. The auditor should also examine that no income has been accrued in the accounts in respect of bills outstanding on the balance sheet date.

Co-acceptance of Bills: The auditor should ensure that the bank has instituted an adequate internal control system to comply with the safeguards as set out by the RBI's Master Circular on Guarantees and Co-acceptances.

Liability on Partly Paid Investments - If the bank holds any partly paid shares, debentures, etc., the auditor should examine whether the uncalled amounts thereof are shown as contingent liability in the balance sheet.

Liability on Account of Outstanding Forward Exchange Contracts - All branches which undertake foreign exchange business (i.e., those which are authorised foreign exchange dealers) usually enter into forward exchange contracts. The amount of forward exchange contracts, which are outstanding on the balance sheet date, is to be shown under this head.

11.8 Concurrent Audit

Concurrent audit, as the name suggests, is an audit or verification of transactions or activities of an organisation concurrently as the transaction/activity takes place. It is not a pre-audit. The concept in this audit is to verify the authenticity of the transaction/activity within the shortest possible time after the same takes place. It is akin to internal audit which is a concept recognised under the Companies Act. In view of the complexities of economic activities it is now well recognised that there must be a system of someone, other than the person involved in the operations, verifying the authenticity of the transaction/activity on a regular basis so that any deviation from the laid down procedures can be noticed in the shortest possible time and remedial action can be taken.

The concept of concurrent audit in the public as well as the private sector banks has gained acceptance in recent years. In some banks this task has been entrusted to the internal inspection staff who are not engaged in operational activities. In other banks, this work is allotted to outside professional firms of chartered accountants. The Reserve Bank of India (RBI) has issued certain guidelines for the conduct of this audit.

These guidelines are mandatory and all banks are required to cover 50 percent of total deposits and 50 per cent of total advances under this audit. This will mean that all banks will have to put their large branches under this audit.

11.68 Advanced Auditing and Professional Ethics

11.8.1 Scope of Concurrent Audit - The guidelines issued by the RBI cover all the important areas of activities of the branch which is under concurrent audit. Most banks have prepared an Audit Manual for this purpose. Broadly stated, the following areas are covered by these guidelines:

- (i) Daily cash transactions with particular reference to any abnormal receipts and payments. This will include currency chest transactions, major expenses incurred by cash payments and high value cash receipts and disbursements.
- (ii) Purchase and sale of shares, securities, etc. physical verification of investments and verification of rates at which transactions are entered into. Similarly, examination of capital expenditure on purchase of capital assets as well as sales of such assets. This will include verification of relevant documents and authorisation.
- (iii) Verification of procedure and documentation for opening new current, savings, term deposit accounts, etc. If there are any unusual operations in these new accounts the same should be examined thoroughly and unusual-features should be reported.
- (iv) Verification of Advances-Overdrafts, TOD, CC Accounts, Term Loans, Bills Purchase, L.C., Guarantees, Overdues, devolvement, and L.C./Guarantee, etc. For this verification special attention is required to be given to (a) procedure for sanction and renewal of limits and proper authorisation (b) disbursement of funds within limits and according to terms of sanction (c) recovery of funds (d) verification of godown, stock, securities, etc. (e) documentation including renewal of documents, registration of charges, mortgages, etc. (f) classification of advances (g) study of financial health of customers by observation about conduct of accounts, regular compliance by submission of financial information, stock statements, etc. and study of audited annual accounts of corporate as well as non-corporate customers, (h) timely signals for accounts likely to become doubtful (i) timely legal action for recovery (j) verification of interest and other service charges levied as per terms of sanction (k) credit rating of borrower and (l) compliance with special conditions contained in the terms of sanction.
- (v) Foreign Exchange transactions – if the branch is authorised to handle foreign exchange transactions these transactions have to be verified in detail in accordance with RBI guidelines. All aspects of Import/Export transactions, Foreign Bills transactions, Foreign L.C./Guarantees, FCNR/NRI deposits, Nostro/Vostro accounts, compliance with RBI guidelines and reporting will have to be examined.
- (vi) House keeping – This is another sensitive area. This will include verification of balancing of all ledgers and registers, inter-branch reconciliation, bank reconciliation, test calculations and verification of interest, discount, commission and exchange income, vouchers for expenses, transactions with staff members, reconciliation of clearing differences, reconciliation of suspense and other sensitive accounts, debit balances in savings accounts and Temporary Overdrafts.
- (vii) Special effort to detect revenue leakage should be made.
- (viii) Special attention to be paid to all fraud prone areas. The attempt should be to ensure that effective measures are taken to prevent frauds. In spite of these measures, if some

manipulation is done by any staff or outside party, the auditor should be able to detect the same as early as possible so that further damage is prevented and timely action is taken.

- (ix) Verification of high value transactions.
- (x) Procedure for safe custody of security forms with the branch.
- (xi) Whether all procedures for tax deduction at source from salaries, rent, interest, professional fees, etc. are followed and tax deducted is deposited with Government in time.
- (xii) Verification of statements, H.O. Returns, statutory returns, calculation of capital adequacy ratio, and compliance with requirements of government business (collection of tax and disbursements).
- (xiii) Study of RBI and internal inspection reports, statutory auditor's report, LFAR relating to branch, etc. and compliance thereto.
- (xiv) Whether customers' complaints are dealt with promptly.

11.8.2 Concurrent audit system in commercial banks -

1. It hardly needs to be stressed that the concurrent audit system is to be regarded as part of a bank's early-warning system to ensure timely detection of irregularities and lapses which helps in preventing fraudulent transactions at branches. It is, therefore, necessary for the bank's management to bestow serious attention to the implementation of various aspects of the system such as selection of branches/coverage of business operations, appointment of auditors, appropriate reporting procedures, follow-up/rectification processes and utilisation of the feedback from the system for appropriate and quick management decisions.

2. The bank should once in a year review the effectiveness of the system and take necessary measures to correct the lacunae in the implementation of the programme.

(A) Scope of concurrent audit: Concurrent audit is an examination which is contemporaneous with the occurrence of transactions or is carried out as near thereto as possible. It attempts to shorten the interval between a transaction and its examination by an independent person not involved in its documentation. There is an emphasis in favour of substantive checking in key areas rather than test checking. This audit is essentially a management process integral to the establishment of sound internal accounting functions and effective controls and setting the tone for a vigilance internal audit to preclude the incidence of serious errors and fraudulent manipulations.

A concurrent auditor may not sit in judgement of the decisions taken by a branch manager or an authorised official. This is beyond the scope of concurrent audit. However, the audit will necessarily have to see whether the transactions or decisions are within the policy parameters laid down by the Head Office, they do not violate the instructions or policy prescriptions of the RBI, and that they are within the delegated authority.

In very large branches, which have different divisions dealing with specific activities, concurrent audit is a means to the incharge of the branch to ensure on an on going basis that

11.70 Advanced Auditing and Professional Ethics

the different divisions function within laid-down parameters and procedures.

(B) Coverage of business/branches

- (i) The Departments/Divisions at the Head Office dealing with Treasury functions viz investments, funds management including inter-bank borrowings bill rediscount and foreign exchange business are to be subjected to concurrent audit. In addition, all branch offices, undertaking such business and dealing rooms have to be subjected to continuous audit.
- (ii) The coverage of branches should ensure that concurrent audit covers:
 - (a) Branches whose total credit and other risk exposures aggregate to not less than 50% of the total credit and other risk exposures of the bank; and
 - (b) Branches whose aggregate deposits cover not less than 50% of the aggregate deposits of the Bank.
- (iii) To achieve these twin criteria it is suggested that branches may be listed according to credit and other risk exposures and selected in the descending order of exposures to achieve a 50% coverage. If the deposits of these branches do not aggregate to 50% of the Bank's deposits, additional branches in descending order of deposits may be added to achieve a 50% coverage of the branches.
- (iv) While complying with the above parameters, it is necessary to ensure that the coverage encompasses:
 - ◆ exceptionally large branches
 - ◆ very large and large branches
 - ◆ special branches handling foreign exchange business, merchant banking business, large corporate wholesale banking business and forex dealing room operations
 - ◆ large problem branches rated as poor/very poor
 - ◆ Head Office department dealing with treasury/funds management and handling investment portfolio
 - ◆ any other branches or departments where in the opinion of the Bank concurrent audit is desirable.
- (v) Branches subjected to concurrent audit should not normally be included for revenue/income audit.

(C) Types of activities to be covered

- (1) The main role of concurrent audit is to supplement the efforts of the bank in carrying out simultaneous internal check of the transactions and other verifications and compliance with the procedures laid down.
- (2) The scope of concurrent audit should be wide enough to cover certain fraud-prone areas like handling of cash, deposits, safe custody of securities, investments, overdue bills, exercise of discretionary powers, sundry and suspense accounts, inter-branch

reconciliation, clearing differences, foreign exchange business including Nostro accounts, off-balance sheet items like letters of credit and guarantee, treasury functions and credit-card business.

- (3) The detailed scope of the concurrent audit should be clearly and uniformly determined for the Bank as a whole by the Bank's Inspector and Audit Department in consultation with the Bank's Audit Committee of the Board of Directors (ACB).
- (4) In determining the scope, importance should be given to checking high-risk transactions having large financial implications as opposed to transactions involving small amounts.
- (5) While the detailed scope of the concurrent audit may be determined and approved by the ACB.

(D) Appointment of Auditors and accountability

- (i) The option to consider whether concurrent audit should be done by bank's own staff or external auditors is left to the discretion of individual banks.
- (ii) In case the bank has engaged its own officials, they should be experienced, well trained and sufficiently senior. The staff engaged on concurrent audit must be independent of the branch where concurrent audit is conducted.
- (iii) Appointment of an external audit firm may be initially for one year and extended up to three years - after which an auditor could be shifted to another branch subject to satisfactory performance.
- (iv) If external firms are appointed and any serious acts of omissions or commissions are noticed in their working their appointments may be cancelled and the fact may be reported to RBI & ICAI.

(E) Facilities for effective Concurrent Audit: It has been represented that Concurrent Audit is not often effective because adequate facilities in terms of space, availability of records, etc are not available. To improve the effectiveness of concurrent audit it is suggested that -

- (i) banks arrange for an initial and periodical familiarisation process both for the bank's own staff when entrusted with the concurrent audit and for the external auditors appointed for the purpose;
- (ii) all relevant internal guidelines/circulars/important references as well as relevant circulars issued by RBI/SEBI and other regulating bodies should be made available to the concurrent auditors on an on - going basis;
- (iii) where adequate space is not available, concurrent auditors can commence work immediately after the close of banking hours.

(F) Remuneration - Terms of appointment of the external firms of Chartered Accountants for the concurrent audit and their remuneration may be fixed by banks at their discretion. Broad guidelines should be framed by ACB for these purposes. Suitable packages should be fixed by each bank's management in consultation with its ACB, keeping in view various factors such as coverage of areas, quality of work expected, number of people required for the job, number of hours to be spent on the job, etc.

11.72 Advanced Auditing and Professional Ethics

(G) Reporting Systems

- (i) Concurrent auditors should be attached to the branches and not the zonal offices.
- (ii) Minor irregularities pointed out by the concurrent auditors are to be rectified on the spot. Serious irregularities should be straightaway reported to the controlling offices/ Head Offices for immediate action.
- (iii) There should be zone-wise reporting of the findings of the concurrent audit to ACB and an annual appraisal/report of the audit system should be placed before the ACB.
- (iv) Whenever fraudulent transactions are detected, they should immediately be reported to Inspection & Audit Department (Head Office) as also the Chief Vigilance Officer as well as Branch Managers concerned (unless the branch manager is involved).
- (v) There should be proper reporting of the findings of the concurrent auditors. For this purpose, each bank should prepare a structured format. The major deficiencies/ aberrations noticed during audit should be highlighted in a special note and given immediately to the bank's branch/controlling offices. A quarterly review containing important features brought out during the concurrent audits should be placed before the ACB.
- (vi) Follow-up action on the concurrent audit reports should be given high priority by the controlling office/Inspection and Audit Department and rectification of the features done without any loss of time.
- (vii) A Special Cell in the Inspection and Audit Department may be created in each bank to:
 - (1) review the selection of auditors;
 - (2) initiate and operate a system for the appraisal of the performance on concurrent auditors;
 - (3) ensure that the work of concurrent auditors is properly documented;
 - (4) be responsible for the follow-up on audit reports and the presentation of the quarterly review to the ACB.

Suggested items of coverage are given below:

(A) Cash

- (i) Daily cash transactions with particular reference to any abnormal receipts and payments.
- (ii) Proper accounting of inward and outward cash remittances.
- (iii) Proper accounting of currency chest transactions, its prompt reporting to the RBI.
- (iv) Expenses incurred by cash payment involving sizeable amount.

(B) Investments

- (i) Ensure that in respect of purchase and sale of securities the branch has acted within its delegated power having regard to its Head Office instructions.
- (ii) Ensure that the securities held in the books of the branch are physically held by it.
- (iii) Ensure that the branch is complying with the RBI/head Office guidelines regarding BRs,

SGL forms, delivery of scrips, documentation and accounting.

- (iv) Ensure that the sale or purchase transactions are done at rates beneficial to the bank.

(C) Deposits

- (i) Check the transactions about deposits received and repaid.
- (ii) Percentage check of interest paid on deposits may be made including calculation of interest on large deposits.
- (iii) Check new accounts opened particularly current accounts. Operations in new current/SB accounts may be verified in the initial periods to see whether there are any unusual operations.

(D) Advances

- (i) Ensure that loans and advances have been sanctioned properly (i.e. after due scrutiny and at the appropriate level).
- (ii) Verify whether the sanctions are in accordance with delegated authority.
- (iii) Ensure that securities and documents have been received and properly charged/registered.
- (iv) Ensure that post disbursement supervision and follow-up is proper, such as receipt of stock statements, instalments, renewal of limits, etc.
- (v) Verify whether there is any mis utilisation of the loans and whether there are instances indicative of diversion of funds.
- (vi) Check whether the letters of credit issued by the branch are within the delegated power and ensure that they are for genuine trade transactions.
- (vii) Check the bank guarantees issued, whether they have been properly worded and recorded in the register of the bank. Whether they have been promptly renewed on the due dates.
- (viii) Ensure proper follow-up of overdue bills of exchange.
- (ix) Verify whether the classification of advances has been done as per RBI guidelines.
- (x) Verify whether the submission of claims to DICGC and ECGC is in time.
- (xi) Verify that instances of exceeding delegated powers have been promptly reported to controlling/Head Office by the branch and have been got confirmed or ratified at the required level.
- (xii) Verify the frequency and genuineness of such exercise of authority beyond the delegated powers by the concerned officials.

(E) Foreign Exchange transactions

- (i) Check foreign bills negotiated under letters of credit.
- (ii) Check FCNR and other non-resident accounts whether the debits and credits are permissible under rules.

11.74 Advanced Auditing and Professional Ethics

- (iii) Check whether inward/outward remittance have been properly accounted for.
- (iv) Examine extension and cancellation of forward contracts for purchase and sale of foreign currency. Ensure that they are duly authorised and necessary charges have been recovered.
- (v) Ensure that balances in Nostro accounts in different foreign currencies are within the limit as prescribed by the bank.
- (vi) Ensure that the overbought/oversold position maintained in different currencies is reasonable taking into account the foreign exchange operations.
- (vii) Ensure adherence to the guidelines issued by RBI/HO of the bank about dealing room operations.
- (viii) Ensure verification/reconciliation of Nostro and Vostro account transactions/balances.

(F) Housekeeping

- (i) Ensure that the maintenance and balancing of accounts, ledgers and registers including clean cash is proper.
- (ii) Early reconciliation of entries outstanding in the inter-branch and inter-bank accounts, Suspense Account, Sundry Deposits Account, DDDR Account, Drafts Account, etc.
Ensure early adjustment of large value entries.
- (iii) Carry out a percentage check of calculations of interest, discount, commission and exchange.
- (iv) Check whether debits in income account have been permitted by the competent authorities.
- (v) Check the transactions of staff accounts.
- (vi) In case of difference in clearing there is a tendency to book it in an intermediary suspense account instead of locating the difference. Examine the day book to verify as to how the differences in clearing have been adjusted. Such instances should be reported to Head Office in case the difference persists.
- (vii) Detection & prevention of revenue leakages through close examination of income and expenditure persists.
- (viii) Check cheques returned/bills returned register and look into reasons for return of those instruments.
- (ix) Checking of inward and outward remittances (DDs, MTs & TTs).

(G) Other items

- (i) In case the branch has been entrusted with government business, ensure that the transactions are done in accordance with the instructions issued by Government, RBI & HQ.
- (ii) Ensure that the branch gives proper compliance to the internal inspection/audit reports.
- (iii) Ensure that customers' complaints are dealt with promptly.

- (iv) Verification of statements, returns, statutory returns. The aforesaid list is illustrative and not Exhaustive.

11.8.3 Reporting by Concurrent Auditors - Timely reporting is the essence of the concurrent audit. Therefore, depending on the size of the operations in a branch the bank decides to get the audit conducted on a daily basis, monthly basis or quarterly basis. In any of these assignments, the auditor has to cover the entire area of operations. In the case of daily or monthly, audit, the audit report of the work done for a particular work is required to be submitted by the auditor by the 10th of the next month. In the case of quarterly audit the report is to be given by the 10th of the month after the end of the quarter. In the case of any serious irregularity noticed by the auditor while conducting the audit he has to give a flash report immediately so that the bank can take remedial action without any delay. Where monthly reports are given, the auditor is required to give an executive summary of audit report at the end of the each quarter. The auditor has to adhere to this discipline of timely reporting.

A member of the accounting profession has to use his specialised knowledge, skill and experience while drafting his audit report. Normally, the audit report should be divided in three parts. The first part should deal with major irregularities. The second part should deal with minor irregularities which have not been attended during the course of audit. The last part should deal with compliance with earlier reports. All issues pointed out in earlier reports which have not been complied with should be briefly stated in this last part. Items where no irregularities are found need not be stated in the report. Areas covered by the audit for the period covered by the report may be stated in the preamble. The rest of the reporting should be by exception so that only those items which require attention by the bank management are stated in the report.

Before submission of the report the auditor should discuss the important issues on which he wishes to report with the branch manager and concerned officers. This will enable him to take into consideration the opposite view point and clarify his doubts. In the case of a bank where there is four-tier system, that is, Branch, Regional Office, Zonal Office and Central Office, the detailed monthly/quarterly report is to be given to branch manager and regional manager. Quarterly executive summary is to be given to all the four authorities.

It is also essential for the bank management to take effective steps to study these reports and take remedial action so as to improve the working of the branches. Since this type of audit is conducted at the large branches only, the bank management should view the common irregularities pointed out by the auditors as illustrative and ensure that such irregularities do not take place in other branches which are not under concurrent audit. It is also essential that periodical meetings are held by the regional managers with the concurrent auditors. This will enable them to know the views of the auditors on certain important issues covering their audit assignments.

11.8.4 Audit Committee - In pursuance of RBI circular September 26, 1995, a bank is required to constitute an Audit Committee of its Board. The membership of the audit committee is restricted to the Executive Director, nominees of the Central Government and the RBI, Chartered Accountant director and one of the non-official directors.

One of the functions of this committee is to provide direction and also oversee the operations

11.76 Advanced Auditing and Professional Ethics

of the total audit function in the bank. The committee also has to review the internal inspection/audit function in the bank, with special emphasis on the system, its quality and effectiveness in terms of follow up. The committee has to review the system of appointment and remuneration of concurrent auditors.

The Audit Committee is, therefore, connected with the functioning of the system of concurrent audit. The method of appointment of auditors, their remuneration and the quality of their work is to be reviewed by the Audit Committee. It is in this context that periodical meetings by the members of the audit committee with the concurrent auditors and statutory auditors help the audit committee to oversee the operations of the total audit function in the bank.

Considering the coverage of this audit assignment and the specialised nature of work there is also a need for training to be imparted to the staff of the auditors. This training has to be given in specialised fields such as foreign exchange, computerisation, areas of income leakage, fraud prone areas, determination of credit rating and other similar specialised areas. The bank can organise such training programmes at various places so that it can ensure the quality of audit.

Audit of General Insurance Companies

12.1 Introduction

The general insurance business in India is governed by the Insurance Act, 1938 which is based on the British Insurance Act. The Act was amended in 1969 for social control to govern the general insurance business on healthy lines. However, it was felt that there still existed some scope for improvement. In view of this, on May 13, 1971 the government nationalised the general insurance industry by an ordinance which became the General Insurance (Nationalisation) Act, 1972. At that time, 107 companies were taken over by the Government and accordingly the General Insurance Corporation (GIC) was formed as a government company on November 22, 1972. The insurers were grouped into four companies viz., the Oriental Insurance Co. Ltd., the National Insurance Company Ltd., the New India Assurance Company Ltd. and the United India Insurance Company.

The Government of India, with a view to achieving effective regulation, decided to establish a regulator of the insurance industry. The decision of the Government was translated into reality by the enactment of Insurance Regulatory and Development Authority (IRDA) Act in the year 1999. The Insurance Regulatory and Development Authority Act, 1999 (Authority in brief) provided for the establishment of an Authority to protect the interests of holders of insurance policies, to regulate, promote and ensure orderly growth of the insurance industry and for matters connected therewith or incidental thereto. The Authority has been assigned the duty to regulate, promote and ensure orderly growth of the insurance business and re-insurance business.

As defined under the Insurance Act, 1938, 'general insurance business' means fire, marine or miscellaneous insurance business, whether carried on singly or in combination with one or more of them.

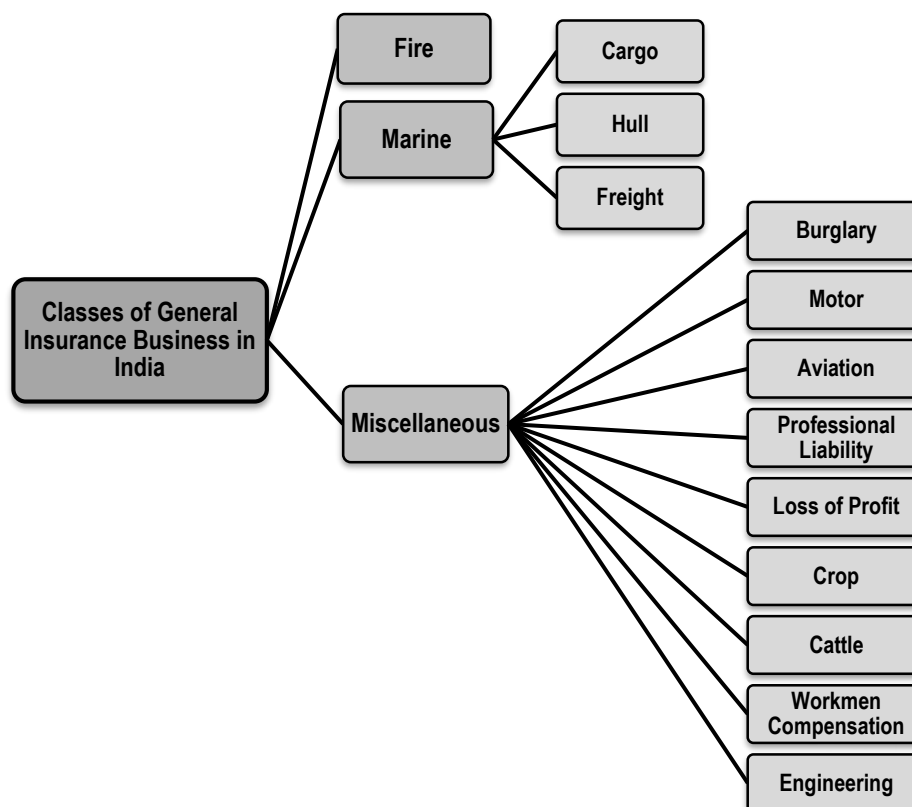

Diagram showing classes of General Insurance Business

12.2 Legal Framework

It is important for the auditor to familiarise himself with various statutes governing the insurance industry. The auditor, while familiarising himself with various rules, regulations, relevant notifications should also look into the important aspects arising out of those which might have an effect on determination of nature, timing and extent of audit procedures, while performing his role as an auditor.

The primary legislations which deal with the insurance business in India are the Insurance Act, 1938 and the IRDA Act, 1999. Various aspects relating to audit are dealt with around the framework of the following statutes and rules made thereunder:

- (a) The Insurance Act, 1938 as amended by the Insurance Laws (Amendment) Act, 2015 (including Insurance Rules, 1939);
- (b) The Insurance Regulatory and Development Authority Act, 1999 as amended by the Insurance Laws (Amendment) Act, 2015;

- (c) The Insurance Regulatory and Development Authority Regulations framed under the IRDA, Act, 1999;
- (d) The Companies Act, 2013; and
- (e) The General Insurance Business (Nationalisation) Act, 1972 as amended by the Insurance Laws (Amendment) Act, 2015 (including Rules framed thereunder).

Some relevant statutory provisions are discussed below:

Insurer - Section 2(9) of the Insurance Act, 1938 defines the term 'Insurer' as:

- (a) an Indian Insurance Company, or
- (b) a statutory body established by an Act of Parliament to carry on insurance business, or
- (c) an insurance co-operative society, or
- (d) a foreign company engaged in re-insurance business through a branch established in India.

It may be noted that a "foreign company" shall mean a company or body established or incorporated under a law of any country outside India and includes Lloyd's established under the Lloyd's Act, 1871 (United Kingdom) or any of its Members.

Policy Holder - Section 2(2) of the Insurance Act, 1938 defines the term policy holder as a person to whom the whole of the interest of the policy holder in the policy is assigned once and for all, but does not include an assignee thereof whose interest in the policy is defensible or is for the time being subject to any condition.

Prohibition of Insurance Business by Certain Persons - Third proviso to section 2C(1) of the Insurance Act, 1938 (inserted by the IRDA Act, 1999) prohibits persons other than an Indian insurance company to begin to transact the insurance business after the commencement of the IRDA Act, 1999.

Thus, the enterprises that were engaged in the insurance business prior to the commencement of the IRDA Act, 1999 continue to exist but a new insurance industry entrant can only be an Indian insurance company. However, an insurance co-operative society was allowed to carry on any class of insurance business on or after the commencement of the Insurance (Amendment) Act, 2002.

The definition of Indian Insurance Company given under section 2(7A) of the Insurance Act, 1938 is reproduced hereunder:

"Indian insurance company" means any insurer, being a company which is limited by shares, and,-

- (a) which is formed and registered under the Companies Act, 2013 as a public company or is converted into such a company within one year of the commencement of the Insurance Laws (Amendment) Act, 2015.

12.4 Advanced Auditing and Professional Ethics

- (b) in which the aggregate holdings of equity shares by foreign investors, including portfolio investors, does not exceed 49% of the paid up equity capital of such Indian Insurance company, which is Indian owned and controlled, in such manner as may be prescribed.

Here, the expression 'control' shall include the right to appoint a majority of the directors or to control the management or policy decisions including by virtue of their shareholding or management rights or shareholders agreements or voting agreements.

- (c) whose sole purpose is to carry on life insurance business or general insurance business or re-insurance business or health insurance business.

Registration of Indian Insurance Companies - Section 3 of the Insurance Act, 1938 requires every insurer to obtain a certificate of registration before commencement of insurance business in India. The section empowers the Authority to make regulations for registration of insurers. It may be noted here that no insurer other than an Indian insurance company can commence the insurance business after the enactment of the IRDA Act, 1999. The registration of Indian insurance companies is done in accordance with the IRDA (Registration of Indian Insurance Companies) Regulations, 2000.

Requirements as to the Minimum Paid-up Capital - The minimum paid-up equity share capital of an Indian insurance company carrying on general insurance business should be ₹ 100 crores excluding preliminary expenses incurred in the formation and registration of company. The insurer may enhance the same in accordance with the provisions of the Companies Act, 2013, SEBI Act, 1992 and the rules, regulations or directions issued thereunder or any other law for the time being in force.

12.3 Insurance Regulatory and Development Authority (IRDA) Act, 1999 and Regulations framed thereunder

As mentioned earlier, the IRDA Act, 1999 has established the Insurance Regulatory and Development Authority (the Authority) and has also provided for establishment of the Insurance Advisory Committee to advise the Authority on various matters. The IRDA Act, 1999 has also made amendments to the Insurance Act, 1938, the Life Insurance Corporation Act, 1956 and the General Insurance Business (Nationalisation) Act, 1972 by insertion of the First, Second and Third Schedules to the IRDA Act, 1999. These Schedules contain amendments to rationalise the provisions of the Insurance Act, 1938 and other statutes with the IRDA Act, 1999 and the Regulations.

12.4 Features of Accounting System of Insurance Companies

The system of recording, classifying and summarising the transactions in insurance companies, is, in substance, no different from other entities. However, in case of insurance companies, the ledger accounts specially those of premiums, claims, commissions, etc. need to be given greater attention. The functions of accounting system in general insurance business under IT environment may be based on:

- ◆ Underwriting module

- ◆ Claims module
- ◆ Agency management module
- ◆ Accounts module
- ◆ Investment module
- ◆ Reinsurance module

Every insurer, in respect of insurance business transacted and in respect of shareholder's funds, is required to prepare a Balance Sheet, a Profit and Loss Account, a separate Account of Receipts and Payments, a Revenue Account for each year in accordance with the Regulations as may be specified. Every insurer should keep separate accounts relating to funds of shareholders and policyholders.

12.4.1 Form and Contents of Financial Statements

Section 11 of the Insurance Act, 1938 provides that every insurer, on or after the date of the commencement of the Insurance Laws (Amendment) Act, 2015, in respect of insurance business transacted by him and in respect of his shareholders' funds, shall, at the expiration of each financial year, prepare with reference to that year, balance sheet, a profit and loss account, a separate account of receipts and payments, a revenue account in accordance with the regulations as may be specified.

The Authority, in pursuance of the powers conferred to it by the provisions of section 114 A of the Insurance Act, 1938, has issued regulations for the preparation of the financial statements and auditor's report of companies carrying on insurance business. The Regulations contain three schedules. Schedule A is applicable to companies carrying on life insurance business. Schedule B of the Regulations lays down the accounting principles, disclosures forming part of financial statements, general instructions for preparation of financial statements, the contents of the management report and the formats in which the financial statements of an insurer carrying on general insurance business should be drawn up. Schedule B is in five parts, covering various aspects related to the preparation of financial statements, which form the main basis for preparation of financial statements of general insurance companies. The five parts have been outlined in the following paragraphs. Schedule C to the Regulations lays down the matters to be dealt with by the auditor's report of an insurance company. Schedule C is applicable to insurers carrying on general insurance business as well as life insurance business.

12.4.2 Requirements of Schedule B to the IRDA (Preparation of Financial Statements and Auditors' Report of Insurance Companies) Regulations, 2002

Part I: Accounting Principles for Preparation of Financial Statements

1. Applicability of Accounting Standards
2. Premium
3. Premium Deficiency
4. Acquisition Costs

12.6 Advanced Auditing and Professional Ethics

5. Claims
6. Procedure to determine the value of investments
7. Loans
8. Catastrophe Reserve

Part II: Disclosures forming part of Financial Statements

Part III: General Instructions for Preparation of Financial Statements

Part IV: Contents of Management Report

Part V: Preparation of Financial Statements

For details along with format of the above, students may refer Chapter 5 of Paper 5- Advanced Accounting, Intermediate (IPC) Study Material.

Audit Considerations - As mentioned earlier, Schedule C to the IRDA (Preparation of Financial Statements and Auditor's Report of Insurance Companies) Regulations, 2002 prescribes the matters to be dealt with by the auditor's report. The auditors under clause (3) of Schedule C to the Regulations are required to certify that they have reviewed the management report and there is no apparent mistake or material inconsistencies in the management report with the financial statements. The auditors are also required to certify that the insurer has complied with the terms and conditions of the registration stipulated by the Authority.

From the foregoing, it is clear that the auditor has to examine the contents of the management report with a view to certify that there are no material inconsistencies in the same with the financial statements. The auditor should, based upon the audit conducted and information and explanations gathered during the course of the audit, verify that there are no material misstatements in the management report. As far as certification of compliance with the terms and conditions of the registration stipulated by the Authority is concerned, the auditor should ask for the relevant documents from the management of the company and conduct an examination thereof. Based on his observation, the auditor should certify the aforesaid compliance.

12.4.3 Signatures and Reports to be attached with the Accounts and Statements

Sub-section (3) of section 11 of the Insurance Act, 1938 provides that the accounts and statements referred to in sub-section (1) should be signed, in the case of a company, by the chairman, if any, and two directors and the principal officer of the company. It further provides that the accounts and statements should be accompanied by a statement containing the names, descriptions and occupations of, and the directorships held by, the persons in charge of the management of the business during the period to which such statements refers and by a report on the affairs of the business during that period.

12.4.4 Requirements of the Insurance Act, 1938 vis a vis the Companies Act, 2013

Disclosures under the Companies Act, 2013 relating to the Balance Sheet and Profit and Loss Account of the company also apply to an insurance company.

Proviso to sub-section (1) of section 129 of the Companies Act, 2013 provides that the financial statements of a company shall not be treated as not disclosing a true and fair view of the state of affairs of the company, merely by reason of the fact that they do not disclose, in the case of an insurance company, any matters which are not required to be disclosed under the Insurance Act, 1938, or the IRDA Act, 1999. However, if an insurance company so desires, it may disclose the information not required to be disclosed under the Insurance Act, 1938.

According to section 1 of the Companies Act, 2013, the provisions of the Companies Act, 2013 shall apply to insurance companies, except in so far as the said provisions are inconsistent with the provisions of the Insurance Act, 1938 or the IRDA Act, 1999. Section 117 of Insurance Act, 1938, provides that nothing in the Insurance Act, 1938 shall affect the liability of an insurer, being a company, to comply with the provisions of the Companies Act, 2013 in matters not otherwise specifically provided for by Insurance Act, 1938. Therefore, the provisions of the Companies Act, 2013 would be applicable wherever the Insurance Act, 1938 does not cover the relevant aspects and the insurer is a company within the meaning of the Companies Act, 2013. The provisions of the Companies Act, 2013 should be applied in a harmonised manner with the provisions of the Insurance Act, 1938, and the rules and regulations framed thereunder.

12.4.5 Accounting Policies

The IRDA Regulations on preparation of financial statements and auditor's report specify that the following accounting policies should form an integral part of the financial statements:

- (a) All significant policies in terms of Accounting Standards issued by the Institute of Chartered Accountants of India, and significant principles and policies given in Part I of Accounting Principles. Any other accounting policies followed by the insurer should be stated in the manner required under AS -1 issued by the Institute of Chartered Accountants of India.
- (b) Any departure from the accounting policies as aforesaid is required to be separately disclosed with reasons for such departure.

In connection with the matters in respect of which the auditor has to express an opinion as prescribed in Schedule C to the IRDA (Preparation of Financial Statements and Auditor's Report of Insurance Companies) Regulations, 2002, the auditor has to report whether the financial statements are prepared in accordance with the requirements of the Insurance Act, 1938 (4 of 1938), the Insurance Regulatory and Development Authority Act, 1999 (41 of 1999) and the Companies Act, 2013 to the extent applicable and in the manner so required.

12.5 Audit of Accounts

Under section 12 of the Insurance Act, 1938, the financial statements of every insurer are required to be audited annually by an auditor. Section 2(4) of the Insurance Act, 1938 defines the term 'auditor' as a person qualified under the Chartered Accountants Act, 1949 to act as an auditor of a company. The auditor, for audit of financial statements, has the powers to exercise the rights vested in, and discharge the duties and be subject to the liabilities and penalties imposed on auditors of companies under the Companies Act, 2013.

12.8 Advanced Auditing and Professional Ethics

The provisions of section 12 of the Insurance Act, 1938 apply only in a case where the financial statements of the insurer are not subject to audit under the Companies Act, 2013. A company carrying on general insurance business is subject to audit requirements laid down under the Companies Act, 2013.

The financial statements under section 12 include Balance Sheet, Profit and Loss Account, Revenue Account. Section 12 of the Insurance Act, 1938 does not cover the requirement for audit of the Receipts and Payments Account of an insurer. However, sub-section (1) of section 11 of the Insurance Act, 1938 requires that every insurer, in respect of insurance business transacted by him and in respect of his shareholders' funds, should prepare, at the end of each financial year, a Balance Sheet, a Profit and Loss Account, a separate Account of Receipts and Payments and a Revenue Account in accordance with the regulations as may be specified. Since Receipts and Payments Account has been made a part of financial statements of an insurer, it is implied that the Receipts and Payment Account is also required to be audited.

The Authority, in exercise of the powers conferred by the Insurance Act, 1938, issued the IRDA (Preparation of Financial Statements and Auditor's Report of Insurance Companies) Regulations, 2002. These Regulations require the auditor of an insurance company to report whether the Receipts and Payments Account of the insurer is in agreement with the books of account and returns. The auditor is also required to express an opinion as to whether the Receipts and Payments Account has been prepared in accordance with the provisions of the relevant statutes and whether the Receipts and Payments Account gives a true and fair view of the receipts and payments of the insurer for the period under audit. This also implies that the auditor is required to audit the Receipts and Payments Account of the insurer.

12.5.1 Appointment of auditors

The appointment of statutory auditors in the General Insurance Corporation of India, and its subsidiaries and the divisions is made by the Comptroller and Auditor General of India, as in the case of other public sector undertakings (For example, in the case of New India Assurance Company Ltd., United India Insurance Company Ltd.). However, in the case of others, auditor is appointed at the AGM (For example, in the case of Bajaj Allianz General Insurance Co. Ltd., ICICI Lombard General Insurance Co. Ltd., Cholamandalam General Insurance Co. Ltd.).

12.5.2 Remuneration of Auditors

The remuneration of auditor of an insurance company is to be fixed in accordance with the provisions of section 142 of the Companies Act, 2013 in the general meeting or in such a manner as the company in general meeting may determine.

12.5.3 Rights and duties of Branch Auditors

It is a practice that the divisional offices prepares a trial balance in a manner that it provides information required to be included in the various formats of financial statements prescribed in the Insurance Act. Each trial balance, in which are incorporated the figures relating to the branches of the divisions, is required to be audited and the report thereon is furnished to the statutory auditors. The divisions of the companies carrying on general insurance business are treated for the purposes of the Companies Act, 2013 as their branches. It follows that the branch

auditors appointed to conduct the audit of the divisions have the same rights and obligations under the statute as those of the, statutory auditors to whom they are expected to submit their report.

12.5.4 Investment Risk Management Systems and Process Audit

The IRDA vide Circular No. INV/CIR/008/2008-09 Dt. 22nd Aug, 2008 advised that the Chartered Accountants firm, which is not the Statutory or Internal or Concurrent Auditor of the concerned Insurer shall certify that the Investment Risk Management Systems and Processes are in place. For this purpose, the ICAI has also issued "Technical Guide on Review and Certification of Investment Risk Management Systems and Processes of Insurance Companies" in consultation with the IRDA.

12.5.5 Auditors' Report

The Authority has prescribed the matters to be dealt with by the Auditors' Report vide Regulation 3 under Schedule C of IRDA (Preparation of Financial Statements and Auditor's Report of Insurance Companies) Regulations, 2002. The Schedule C is reproduced below -

"The report of the auditors on the financial statements of every insurer shall deal with the specified herein -

1. (a) That they have obtained all the information and explanations which, to the best of their knowledge and belief, were necessary for the purposes of their audit and whether they have found them satisfactory;
 - (b) Whether proper books of account have been maintained by the insurer so far as appears from an examination of those books;
 - (c) Whether proper returns, audited or unaudited, from branches and other offices have been received and whether they were adequate for the purpose of their audit;
 - (d) Whether the Balance Sheet, Revenue Accounts and Profit and Loss Account dealt with by the report and the Receipts and Payments Account are in agreement with the books of account and returns;
 - (e) Whether the actuarial valuation of liabilities is duly certified by the appointed actuary, including to the effect that the assumptions for such valuation are in accordance with the guidelines and norms, if any, issued by the authority and/or the Actuarial Society of India in concurrence with the Authority.
2. The auditors shall express their opinion on:
 - (a) (i) Whether the Balance Sheet gives a true and fair view of the insurer's affairs as at the end of the financial year/period;
 - (ii) Whether the Revenue Account gives a true and fair view of the surplus or the deficit for the financial year/period;
 - (iii) Whether the Profit and Loss Account gives a true and fair view of the profit or loss for the financial year/period;

12.10 Advanced Auditing and Professional Ethics

- (iv) Whether the Receipts and Payments Account gives a true and fair view of the receipts and payments for the financial year/period;
 - (b) The financial statements stated at (a) above are prepared in accordance with the requirements of the Insurance Act, 1938 (4 of 1938), the Insurance Regulatory and Development Authority Act, 1999 (41 of 1999) and the Companies Act, 1956 (1 of 1956) [now Companies Act, 2013], to the extent applicable and in the manner so required.
 - (c) Investments have been valued in accordance with the provisions of the Act and the Regulations.
 - (d) The accounting policies selected by the insurer are appropriate and are in compliance with the applicable Accounting Standards and with the accounting principles, as prescribed in these Regulations or any order or direction issued by the Authority in this behalf.
3. The auditors shall further certify that:
- (a) they have reviewed the management report and that there is no apparent mistake or material inconsistencies with the financial statements; and
 - (b) the insurer has complied with the terms and conditions of the registration stipulated by the Authority.
4. A certificate signed by the auditors (which is in addition to any other certificate or report which is required by law to be given with respect to the balance sheet) certifying that:
- (a) they have verified the cash balances and the securities relating to the insurer's loans, reversions and life interests (in the case of life insurers) and investments;
 - (b) the extent, if any, to which they have verified the investments and transactions relating to any trusts undertaken by the insurer as trustee; and
 - (c) no part of the assets of the policyholders' funds has been directly or indirectly applied in contravention of the provisions of the Insurance Act, 1938 (4 of 1938) relating to the application and investments of the policyholders' funds."

Students may also note that auditors are required to follow the format of report prescribed by the Institute.

12.5.6 Direction of C&AG

The Comptroller and Auditor General of India has the power to direct the manner in which the accounts shall be audited and give such instructions in regard to any matter relating to performance of functions by the auditor and to conduct the supplementary or test audit of the accounts of such companies by such person or persons as may be authorised in this behalf. For the purposes of such audit, the C&AG may require information or additional information on such matters and in such form as may be directed by him in terms of Section 143(5) and 143(6) of the Companies Act, 2013. The statutory auditors are required to submit a copy of their report to the C&AG who has the right to comment upon or supplement the audit report.

12.5.7 Applicability of CARO, 2016

The additional reporting requirement under Companies (Auditor's Report) Order, 2016 is exempted for an insurance company as defined under the Insurance Act, 1938.

12.6 Specific Control Procedures Related to General Insurance Business

The internal control functions have been categorised below under main operational cycles considering the nature of general insurance business. Areas where the internal controls are similar to the ones adopted by other companies such as for cash and bank receipts and payments and fixed assets, have been dealt in the Internal Control Questionnaire, published by the Institute of Chartered Accountants of India. Since various operational cycles are inter-linked, the internal controls operating within the systems of such cycles should be reviewed simultaneously.

12.6.1 Underwriting

The underwriting function, which comprises of examination and evaluation of applications for insurance, the rating of risks and the establishment of premiums, is fundamental to the operations of a general insurance company. The prime objectives of an internal control system for underwriting is adherence to guidelines for acceptances of insurance, proper recording of insurance risk and its evaluation.

12.6.2 Premium

Premium is the consideration received by an insurer from the insured under an insurance contract, whereby the insurer agrees to undertake certain sum of risk on behalf of the insured. The objectives of internal controls over premium is to ensure that correct premium is calculated and collected before acceptance of any risk, that premium is accounted for in an appropriate manner and that the premium is collected only in respect of such risks which are assumed by the company.

12.6.3 Commission

The commission is the consideration payable for getting the insurance business. The term 'commission' is used for the payment of consideration to get Direct business. In case of reinsurance, the term used is 'Commission on reinsurance accepted'. The internal control with regard to commission is aimed at ensuring that commission is paid in accordance with the rules and regulations of the company and in accordance with the agreement with the agent, commission is paid to the agent who brought the business and the legal compliances, for example, tax deduction at sources and provisions of the Insurance Act, 1938 have been complied with.

12.6.4 Reinsurance

The key control objectives generally associated with reinsurance transaction involve determination of correct amounts for reinsurance ceded, proper valuation of assets and liabilities

12.12 Advanced Auditing and Professional Ethics

arising out of reinsurance transactions and adherence to legal provisions, regulations and reinsurance agreements.

12.6.5 Claims

A demand for payment of policy benefit because of the occurrence of an insured event is known as 'claim'. Cost of claims to the company includes all the expenses incurred in settlement of claims. Internal controls are established over claims to ensure that only *bonafide* claims are paid. Cost of claims are properly recorded and disclosed in the financial statements.

12.7 Audit Procedures

The important part of the business operations of general insurance companies comprises the issuance of policies for risks assumed and to indemnify the insured for losses to the extent covered by such policies. In financial terms, these operations get translated into the receipt and recording of premiums and the recording and settlement of claims. Both premiums and claims have a significant impact on the insurance companies' revenues, it would be an important part of the duty of the auditor to satisfy himself that the financial transactions involving both these operations have been fairly and properly recorded in the relevant books of account. The auditor should also ensure that the legal requirements as to the disclosure of these items are complied with in the financial statements.

12.7.1 Premium

Insurance premium is collected upon issuing policies. It is the consideration for bearing the risk by the insurance company. The assumption of the risk starts on the issue of receipt based on the acceptance of proposal form or cover note by the respective underwriting department. This receipt is recorded as the premium income in the books of the insurance company. Premium may be accepted either in cash/cheque/Demand Draft/pay order, bank guarantee, cash deposit, etc. The premium collections are credited to a separate bank account and no withdrawals are normally permitted from that account for meeting the general expenditure. As per the policy of the insurance company, the collections are transferred to the Regional Office or Head Office. As soon as the insurance policy is issued, an entry is made in the Register of Policies showing all the relevant details.

No Risk Assumption without Premium - No risk can be assumed by the insurer unless the premium is received. According to section 64VB of the Insurance Act, 1938, no insurer should assume any risk in India in respect of any insurance business on which premium is ordinarily payable in India unless and until the premium payable is received or is guaranteed to be paid by such person in such manner and within such time, as may be prescribed, or unless and until deposit of such amount, as may be prescribed, is made in advance in the prescribed manner. The premium receipt of insurance companies carrying on general insurance business normally arise out of three sources, viz., premium received from direct business, premium received from reinsurance business and the share of co-insurance premium.

Verification of Premiums - Verification of premium is of utmost importance to an auditor. The auditor should apply, inter alia, the following procedures for verification of premium -

- (i) Before commencing verification of premium income, the auditor should look into the internal controls and compliance thereof as laid down for collection and recording of the premiums.
- (ii) The auditor should ascertain that all the cover notes relating to the risks assumed have been serially numbered for each class of business. The auditor should also verify that there is an adequate internal check on the issue of stationery comprising of cover notes, policy documents, stamps, etc. The auditor may apply sampling techniques for verification of larger volume of transactions.
- (iii) The auditor should ensure that premium in respect of risks incepting during the relevant accounting year has been accounted as premium income of that year on the basis of premium revenue recognition. The auditor, as part of his audit procedures, should make an assessment of the reasonability of the risk pattern established by the management. The auditor should also see whether the premium received during the year but pertaining to risk commencing in the following year has been accounted for under the head 'Premium Received in Advance' and has been disclosed separately. Normally, such instances relate to the issue of cover notes and certificates at the end of the accounting year relating to risks commencing in the next accounting period. Generally, there is a column in the Premium Register called "Commencement of Risk", indicating the date and time from which the risk under the policy issued has commenced. The auditor should verify that policy documents have not been issued, or where issued, the company was not at risk, in case:
 - (a) premium had not been collected at all;
 - (b) premium had been collected but the relevant cheques have been dishonoured; (refer Cheque Dishonoured Book);
 - (c) premium had not immediately been collected due to furnishing of a bank guarantee or cash deposit but either the deposit or guarantee had fallen short or has expired or the premium had been collected beyond the stipulated time limit (i.e., there is a shortfall in bank guarantee account or cash deposit account of the insured);
 - (d) premium had not been collected due to risk cover being increased or where stipulated limits have been exhausted in respect of open declaration policies (i.e., where premium has accrued but has not been received); and
 - (e) instalments of premium have not been collected in time in respect of certain categories of policies, e.g., marine-cum-erection policies where facility has been granted for premium being paid in instalments (such facility is normally available subject to certain conditions, e.g., that the first equated instalment is more by 5 per cent of the total premium payable by instalments).
- (iv) The auditor should examine whether the reinsurance company is not under a risk in respect of amount lying at credit and outstanding as at the year-end in the following accounts:
 - (a) Deposit Premium Account;
 - (b) Premium Received in Advance Account;

12.14 Advanced Auditing and Professional Ethics

- (c) Inspectors' Deposits Account; and
- (d) Agent's Premium Accounts
- (v) The auditor should verify the collections lodged by agents after the balance sheet date to see whether any collection pertains to risk commencing for the year under audit. The auditor should also check that the premium has been recorded originally at the gross figure, i.e., without providing for unexpired risks and reinsurances.
- (vi) In case of co-insurance business, where the company is not the leader, because of the non-availability of the relevant information in many cases the premium is not booked even though the risk has commenced during the relevant accounting year. The auditor should see that the company's share of the premium has been accounted for on the basis of the available information on nature of risk and the provisional premium charged by the leading insurer. The auditor should examine the communications issued to the company by the leading insurers advising them of the company's share of premium income. Such communications should be seen even in respect of the post-audit period. Where the company is the leader, the auditor should obtain a reasonable assurance that only the company's own share of premium has been shown as income and accounts of the other companies have been credited with their share of the premium collected.
- (vii) The auditor should check whether Premium Registers have been maintained chronologically, for each underwriting department, giving full particulars including service tax charged as per acceptance advice on a day-to-day basis. The auditor should verify whether the figures of premium mentioned in the register tally with those in General Ledger.
- (viii) Where policies have been issued with a provision to collect premium periodically (i.e., under instalment clause, special declaration policy or periodical declaration under open policies in marine insurance), the auditor should check whether premium are collected as and when they become due.
- (ix) The auditor should verify whether instalments falling due on or before the balance sheet date, whether received or not, have been accounted for as premium income as for the year under audit. Also examine whether instalments of premium falling due in the subsequent year have not been recognised in the accounts as outstanding premium.
- (x) The auditor should verify the year end transactions to check that amounts received during the year in respect of risks commencing/ instalments falling due on or after the first day of next financial year are not credited to premium account but credited to Premium Received in Advance Account.
- (xi) The auditor should verify the collections remitted by agents immediately after the cut-off date to verify the risk assumed during the year under audit on those collections.
- (xii) The auditor should also check that in case of cancellation of policies/cover notes issued, no risk has been assumed between the date of issue and subsequent cancellation thereof.
- (xiii) Where premium originally received has been refunded, the auditor should verify whether the agency commission paid on such premium has been recovered.

- (xiv) The auditor should verify whether service tax has been charged from the insured, at the rates in force, on the total premium for all classes of business other than those exempted under service tax laws. Check whether service tax so collected is disclosed under 'Current Liabilities' to the extent not deposited in Government's Account.
- (xv) In the case of co-insurance business, the auditor should verify whether service tax at the rates in force on the whole premium has been charged or collected from the insured by the company in case it is the leader.

Check that service tax so collected on premium charged from the insured by the company have been regularly deposited in the Government's Account.

12.7.2 Claims

The components of the cost of claims to an insurer comprise the claims under policies and claim settlement costs. Claims under policies comprise the claims paid for losses incurred, and those estimated or anticipated claims pending settlements under the policies. Settlement cost of claims includes surveyor fee, legal expenses, etc. A liability for outstanding claims should be brought to account on the following:

- (i) Direct Business;
- (ii) Inward Reinsurance Business; and
- (iii) Co-Insurance business

The liability includes future payments in relation to unpaid reported claims and claims incurred but not reported including inadequate reserves which would result in future cash or asset outgo for settling liabilities against those claims. Change in estimated liability represents the difference between the estimated liabilities for outstanding claims in respect of claims under policies, whether due or intimated at the beginning and at the end of the financial period. The accounting estimate also includes claims cost adjusted for salvage value if there is sufficient degree of certainty of its realisation.

Registers and Records - The following register and records are generally prepared in respect of claims:

- (i) Claims Intimation Register;
- (ii) Claims Paid Register;
- (iii) Claims Disbursement Bank Book;
- (iv) Claims Dockets, normally containing the following records:
 - Claim intimation, claim form, particulars of policy, survey report, Photograph showing damage, repairer's bills, letter of subrogation, police report, fire service report, claim settlement note, claim satisfaction note, salvage report, salvage disposal note, claims discharge voucher, etc.;
- (v) Report of quality assurance team; and
- (vi) Salvage register.

12.16 Advanced Auditing and Professional Ethics

The Claim Account is debited with all the payments including repair charges, fire fighting expenses, police report fees, survey fees, amount decreed by the Courts, travel expenses, photograph charges, etc. The provision for claims incurred but not reported is not made at Branch/Divisional Office level but at the Head Office level.

Verification of Claims

Claims Provisions - The auditor should obtain from the divisions/branches, the information for each class of business, categorizing the claims value-wise before commencing verification of the claims provisions, so that appropriate statistical sampling techniques may be applied, to ensure that representative volume of claims is verified for each class of business. The auditor should determine the total number of documents to be checked giving due importance to claim provisions of higher value.

The outstanding liability at the year-end is determined at the divisions/branches where the liability originates for outstanding claims. Thereafter, based on the total consolidated figure for all the divisions/branches, the Head Office considers a further provision in respect of outstanding claims. The auditor should satisfy himself that the estimated liability provided for by the management is adequate with reference to the relevant claim files/dockets, keeping in view the following:

- (i) that provision has been made for all unsettled claims as at the year-end on the basis of claims lodged/communicated by the parties against the company. The date of loss (and not the date of communication thereof) is important for recording/ recognizing the claim as attributable to a particular year.

In certain circumstances, the claims are incurred by the insurance company but are not reported at the balance sheet date by the insured. Such claims are known as claims incurred but not reported (IBNR). The auditor should check the records for subsequent periods to ascertain that adequate provision has been created for such claims also.

- (ii) that provision has been made for only such claims for which the company is legally liable, considering particularly, (a) that the risk was covered by the policy, if in force, and the claims arose during the currency of the policy; and (b) that claim did not arise during the period the company was not supposed to cover the risk, e.g., where the premium was not paid or where cheques covering premium have been dishonoured (refer section 64VB of the Insurance Act, 1938) or where a total loss under a policy has already been met/settled.
- (iii) that the provision made is normally not in excess of the amount insured except in some categories of claims where matters may be sub-judice in legal proceedings which will determine the quantum of claim, the amount of provision should also include survey fee and other direct expenses.
- (iv) that in determining the amount of provision, events after the balance sheet date have been considered, e.g., (a) claims settled for a materially higher/lower amount in the post-audit period; (b) claims paid by other insurance companies during the year under audit and communicated to company after the balance sheet date where other companies are the leaders in co-insurance arrangements; and (c) further reports by surveyors or assessors.

- (v) that the claims status reports recommended to be prepared by the Divisional Manager on large claims outstanding at the year-end have been reviewed with the contents of relevant files or dockets for determining excess/short provisions. The said report should be complete as to material facts to enable the auditor to take a fair view of the provision made.
- (vi) that in determining the amount of provision, the 'average clause' has been applied in case of under-insurance by parties.
- (vii) that the provision made is net of payments made 'on account' to the parties wherever such payments have been booked to claims.
- (viii) that in case of co-insurance arrangements, the company has made provisions only in respect of its own share of anticipated liability.
- (ix) that wherever an unduly long time has elapsed after the filing of the claim and there has been no further communication and no litigation or arbitration dispute is involved, the reasons for carrying the provision have been ascertained.
- (x) that wherever legal advice has been sought or the claim is under litigation, the provision is made according to the legal advisor's view and differences, if any, are explained.
- (xi) that in the case of amounts purely in the nature of deposits with courts or other authorities, adequate provision is made and deposits are stated separately as assets and provisions are not made net of such deposits.
- (xii) that no contingent liability is carried in respect of any claim intimated in respect of policies issued.
- (xiii) that the claims are provided for net of estimated salvage, wherever applicable.
- (xiv) that intimation of loss is received within a reasonable time and reasons for undue delay in intimation are looked into.
- (xv) that provisions have been retained as at the yearend in respect of guarantees given by company to various Courts for claims under litigation.
- (xvi) that due provision has been made in respect of claims lodged at any office of the company other than the one from where the policy was taken, e.g., a vehicle insured at Mumbai having met with an accident at Chennai necessitating claim intimation at one of the offices of the company at Chennai.

In cases of material differences in the liability estimated by the management and that which ought to be provided in the opinion of the auditor, the same must be brought out in the auditor's report after obtaining further information or explanation from the management. For determining the adequacy of the provisions in respect of any category of business, the auditor may resort to the method of testing the actual payments, wherever made, with the provisions made earlier for that category of business. Whether such liability has been estimated in the past on a fair and realistic basis can, thus, be examined by looking into current year's payments against provisions of the earlier year.

Claims Paid - The auditor may determine the extent of checking of claims paid on the same line as suggested for outstanding claims. Other aspects in respect of claims paid to be examined by the auditors are as follows:

12.18 Advanced Auditing and Professional Ethics

- (i) that in case of co-insurance arrangements, claims paid have been booked only in respect of company's share and the balance has been debited to other insurance companies;
- (ii) that in case of claims paid on the basis of advices from other insurance companies (where the company is not the leader in co-insurance arrangements), whether share of premium was also received by the company. Such claims which have been communicated after the year-end for losses which occurred prior to the year-end must be accounted for in the year of audit;
- (iii) that the claims payments have been duly sanctioned by the authority concerned and the payments of the amounts are duly acknowledged by the claimants;
- (iv) that the salvage recovered has been duly accounted for in accordance with the procedure applicable to the company and a letter of subrogation has been obtained in accordance with the laid down procedure;
- (v) that the amounts of the nature of pure advances/deposits with Courts, etc., in matters under litigation/arbitration have not been treated as claims paid but are held as assets till final disposal of such claims. In such cases, full provision should be made for outstanding claims;
- (vi) that payment made against claims partially settled have been duly vouched. In such cases, the sanctioning authority should be the same as the one which has powers in respect of the total claimed amount;
- (vii) that in case of final settlement of claims, the claimant has given an unqualified discharge note, not involving the company in any further liability in respect of the claim; and
- (viii) that the figures of claims, wherever communicated for the year by the Division to the Head Office for purposes of reinsurance claims, have been reconciled with the trial balance-figure.

12.7.3 Commission

It is a well-known fact that insurance business is solicited by insurance agents. The remuneration of an agent is paid by way of commission which is calculated by applying a percentage to the premium collected by him. Commission is payable to the agents for the business procured through them and is debited to Commission on Direct Business Account. There is a separate head for commission on reinsurance accepted which usually arise in case of Head Office. It may be noted that under section 40 of Insurance Act, 1938, no commission can be paid to a person who is not an agent of the insurance company.

The auditor should, *inter alia*, do the following for verification of commission:

- (i) Vouch disbursement entries with reference to the disbursement vouchers with copies of commission bills and commission statements.
- (ii) Check whether the vouchers are authorised by the officers-in-charge as per rules in force and income tax is deducted at source, as applicable.
- (iii) Test check correctness of amounts of commission allowed.

(iv) Scrutinise agents' ledger and the balances, examine accounts having debit balances, if any, and obtain information on the same. Necessary rectification of accounts and other remedial actions have to be considered.

(v) Check whether commission outgo for the period under audit been duly accounted.

12.7.4 Operating Expenses related to Insurance Business (Expenses of Management)

All the administrative expenses in an insurance company are broadly classified under 13 heads as mentioned in Schedule 4 forming part of Financial Statements given under Schedule B to the Insurance Regulatory and Development Authority (Preparation of Financial Statements and Auditor's Report of Insurance Companies) Regulations, 2002. In so far as financial statements are concerned, this Schedule is part of the Revenue Account to be prepared for insurance business. Any other expenses are required to be disclosed under the head 'Others'. Any major expenses (₹ 5 lacs or in excess of 1% of net premium, whichever is higher) are required to be shown separately. Careful reading of the words 'expenses related to insurance business' clearly indicate any expenses which do not have any direct relation to insurance business are to be shown separately in the Profit and Loss Account. Expenses relating to investment department, brokerage, bank charges, transfer fees, etc. do not have a direct relationship to the day-to-day working of the insurance business and as such would not be included in the revenue account.

These expenses are first aggregated and then apportioned to the Revenue Account of each class of business on a reasonable and equitable basis. The accounting policy should clearly indicate the basis of apportionment of these expenses to the respective Revenue Accounts (i.e., fire, marine and miscellaneous) along with the certificate that all expenses of management, wherever incurred, directly or indirectly, read with the accounting policy, have been fully debited to the respective Revenue Account as expenses. Refer to Schedule 4 on Operating Expenses for specific items.

12.7.5 Legal and Professional Charges

As far as legal and professional charges are concerned, attention is drawn to the head 'Claims Incurred' under Schedule 2 where it is clearly stated that survey fees, legal and other expenses should form part of claim cost, and therefore, are not to be included under the head Legal and Professional Charges. Hence, all other expenses which are not covered under the claims cost are required to be included under this head.

12.7.6 Employees' Remuneration and Welfare Benefits

The employees' remuneration includes all kinds of payments made to employees in consideration of their services. The reimbursement of medical expenses or premium in respect of employees' health cover is covered under the employees' remuneration and welfare. Any medical fees incurred towards maintenance of health care policies (which are not for employees) are required to be debited to the claims cost under the health care and not to be included under this head. Any expenses towards medical treatment of employees incurred by the company should also be included under this head. Non training expenses have to be shown separately.

12.7.7 Interest and Bank charges

All expenses incurred towards maintenance of Bank Account, interest and other charges levied by bankers to the normal course of business other than bank expenses relating to investments (interest, bank charges, custodial charges, etc.) are shown under the head, "Interest and Bank Charges". Any other interest charged on the borrowings which could not form part of the Revenue Account not to be included under this head.

12.7.8 Depreciation

Charging of depreciation is governed by Schedule II to the Companies Act, 2013. In addition, compliance of relevant Accounting Standard is also to be taken care.

12.7.9 Interest, Dividend and Rent

An insurance enterprise, like any other, earns interest dividend and rent through its assets. The interest, dividend and rent earned are to be apportioned between Revenue Account and Profit and Loss Account. The Regulations require that basis of allocation of interest, dividend and rent between the Revenue Account and Profit and Loss Account should be clearly indicated in the company's accounting policy. The interest or dividend earned as against the policyholders' funds is required to be apportioned to the Revenue Account. The interest earned on, say, grant of vehicle loans, housing loans, deposits with banks of the shareholders, funds, rent received on let out properties owned by the company, by way of investments shareholders, funds, etc. are required to be shown under the profit and Loss Account.

12.8 Items Relating to Balance Sheet

Following are the broad classes of items in a balance sheet:

12.8.1 Investments

Insurance Companies make investments apart from earning income, to comply with the relevant statutory requirements and also for meeting any unforeseen contingencies and claims. The regulations issued by the authority from time to time affect the quantum of investments, the nature of assets in which investments are to be made.

Investments by general insurance companies are governed by the provisions of section 27, 27A, 27B, 27C, 27D and 27E of the Insurance Act, 1938 as well as by the guidelines issued from time to time by the Ministry of Finance through General Insurance Corporation of India.

Audit Procedures - The auditor's primary objective in audit of investments is to satisfy himself as to their existence and valuation. Examination of compliance with statutory and regulatory requirements is also an important objective in audit of investments insofar as non-compliance may have a direct and material effect on the financial statements.

The auditor should verify the investment scrips physically at the close of business on the date the balance sheet. In exceptional cases where physical verification of investment scrips on the balance sheet date is not possible, the auditor should carry out the physical verification on a date as near to the balance sheet date as possible. In such a case, he should take into consideration any adjustments for subsequent transactions of purchase, sale, etc.

He should take particular care to see that only genuine investments are produced before him, and that securities held by the insurance company on behalf of others (e.g., those held as security against loans) are not shown to him as the insurance company's own investments. To ensure this, the auditor should – require that all investment scrips in the possession of the insurance company – whether belonging to it or to borrowers should be produced before him simultaneously. The auditor should keep them under his control until he completes his checking. Normally, the investments of an insurance company are held by the insurance company itself or a depository (in the case of dematerialised securities other than government securities).

Investments are normally dealt with at the Head Office and not at the branches. However, sometimes, for realisation of interest, etc. and other similar purposes, investments of an insurance company may be held at Branch Offices also. In such cases, the auditor should examine the record maintained at the Head Office to record details of investments held at other locations and request the respective branch auditors to physically verify such investments as a part of their audit. The auditor should obtain a written confirmation to this effect from the branch auditors. In case the verification has been done on a date other than the balance sheet date, a statement showing the reconciliation of the investments held at the time of physical verification with the investments held as on the balance sheet date should also be obtained from the branch auditors. The branch auditors should report whether adequate records are maintained by the branch for the securities held by it on behalf of the Head Office.

Investments should not normally be held by any other person (as laid down in the City Equitable Fire Insurance Co. case). If any investments are so held, proper enquiry should be made to ensure that there is some justification for it, e.g., shares may be held by brokers for the purpose of transfer or splitting-up, etc. Shares may also be lodged with the companies concerned for transfer etc. When investments are held by any other person on behalf of the insurance company, the auditor should obtain a certificate from him. The certificate should state the reason for holding the investment (e.g., in safe custody or as security).

In respect of scripless dealings in investments through the OTC Exchange of India, the auditor should verify the interim and other acknowledgements issued by dealers as well as the year-end confirmation certificates of the depository organisation.

The auditor should also examine whether securities lodged for transfer are received back within a reasonable period. Similarly, he should examine whether share certificates, etc. are received within a reasonable period, of the lodging of the allotment advice. In case there is an unusual delay in registration of transfers, etc., the auditor should see that adequate follow-up action has been taken. He may, in appropriate cases, also enquire from the issuers, or their registrars, about the delays. In cases where the issuer/registrar has refused to register the transfer of securities in the name of the insurance company, the auditor should verify the validity of the title of the insurance company over such securities.

The auditor should examine whether the portfolio of the insurance company consists of any securities whose maturity dates have already expired. It is possible that income on such investments may also not have been received. In case the amount of such investments or the income accrued thereon is material, the auditor should seek an explanation from the

12.22 Advanced Auditing and Professional Ethics

management on this aspect. He should also consider whether any provision for loss on this account is required. Similarly, where income on any security is long overdue, the auditor should consider whether provision is required in respect of such income accrued earlier.

Investments in securities now-a-days constitute a substantial part of total assets of many insurance companies. Method of valuation of investments followed by an insurance company may, therefore, have a significant effect on its Balance Sheet and Profit and Loss Account. The auditor should examine whether the method of accounting followed by the insurance company in respect of investments, including their year-end valuation, is appropriate.

The auditor should examine the manner of accounting for investments in the context of the guidelines of the Insurance Regulatory and Development Authority and the accounting policy followed by the insurance company in respect of investments. The auditor should examine the appropriateness of accounting policies followed by the insurance company. In case any of the accounting policies is not appropriate, the auditor should consider the effect of adoption of such policy on the financial statements and, consequently, on his audit report.

A change in the method of valuation of investments constitutes a change in accounting policy and adequate disclosure regarding the fact of the change along with its financial effect should be made in the balance sheet.

The auditor should examine whether income from investments is properly accounted for. This aspect assumes special importance in cases where the insurance company has opted for receipt of income through the Electronic Clearing Service.

There may be cases where the certificates of tax deduction at source (TDS) received along with the interest on investments are found missing. This increases the incidence of tax on the insurance company. The auditor should see that there is a proper system for recording and maintenance of TDS certificates received by the insurance company.

12.8.2 Cash and Bank Balances

Cash and Bank balances at Branch Office/Divisional Office level also constitute significant items related to balance sheet. The auditor should apply the following audit procedures for verification of claims.

- (i) The auditor should physically verify cash balance collection and imprest for meeting day to day expenditures, postage stamps balance, revenue, policy, licence fees, franking machine balance. The auditor should also obtain a certificate from the management for the above mentioned balances as at the balance sheet date.

If for some reason, the physical verification of the above on the balance sheet date is not possible then the same can be done at a subsequent date and by way of backward calculations, cash in hand at the balance sheet date can be verified.

- (ii) The auditor should also check whether late collections of cash and cheques on the last working day of the financial year, which could not be deposited into bank account on the same day, have been identified and booked as Cash in Hand and Cheques in Hand Account, respectively.
- (iii) The auditor may apply test check on the bank transactions.

- (iv) The auditor should also check Bank Reconciliation statement and long outstanding entries therein.
- (v) The auditor should obtain confirmation of Bank Balances for all operative and inoperative accounts.
- (vi) The auditor should physically verify Term Deposit Receipts issued by bankers.
- (vii) The auditor should verify the deposits and withdrawals transactions at random and check whether the Account is operated by authorised persons only.
- (viii) The auditor should verify the subsequent realisations for all items appearing in the reconciliation.
- (ix) In case of funds, in-transit, he should verify that the same are properly reflected as part of bank balance.

12.8.3 Outstanding Premium and Agents' Balances

The following are the audit procedures to be followed for verification of outstanding premium and agents' balances:

- (i) Scrutinise and review control account debit balances and their nature should be enquired into.
- (ii) Examine inoperative balances and treatment given for old balances with reference to company rules.
- (iii) Enquire into the reasons for retaining the old balances.
- (iv) Verify old debit balances which may require provision or adjustment. Notes of explanation may be obtained from the management in this regard.
- (v) Check age-wise, sector-wise analysis of outstanding premium.
- (vi) Verify whether outstanding premiums have since been collected.
- (vii) Check the availability of adequate bank guarantee or premium deposit for outstanding premium.

12.8.4 Provision for Taxation

The steps to be conducted by the auditor for audit and verification are given below:

- (i) The auditor should check whether the provision for taxation has been made after taking into account the specific provisions applicable to insurance companies carrying on general insurance business.
- (ii) It should be seen by auditor whether for the purpose of computation not only the profit, as disclosed by the annual accounts, copies of which are required under the Insurance Act, 1938 to be furnished to the Controller of Insurance, is taken but also all the other accounts furnished by the company to the Controller of Insurance is taken into account.
- (iii) The auditor should assess the past trend regarding the approach of the Income Tax Department, the decision of the various appellate forums including the High Court and the Supreme Court *vis-a-vis* the computation made.

12.24 Advanced Auditing and Professional Ethics

- (iv) The compliance with the provisions of Chapter III of the Income Tax Act, 1961 which provides for income which do not form part of total income is also to be seen.
- (v) The auditor should see whether deductions under Chapter VIA of the Income Tax Act, 1961 which provides for deduction have been made in computing total income is properly taken into account.
- (vi) The auditor should examine whether income computation relating to foreign branches and other income earned outside India is dealt with properly as per the double taxation avoidance agreement, if any, entered into with those countries.
- (vii) It should be seen whether the exemption provision relating to tax deducted at source from certain categories of income as exempted under section 35A of the General Insurance (Business Nationalisation) Act, 1972 has been properly availed.
- (viii) Also, the auditor should check whether the grossing up of TDS relating to the income has been properly done for the purpose of computation of taxable income.
- (ix) The auditor should ensure that the provisions of the Income Tax Act, 1961 regarding the tax to be deducted at source have been properly complied with, relating to the payments / credits for which the TDS provisions of the Income Tax Act are applicable and the amount so deducted are remitted within the stipulated time. Also check TDS implication on the interest paid / payable and included on claim settlement / outstanding claims.
- (x) The auditor should see the system of service tax collection and the payment to the statutory authorities and the internal system including the filing of statutory returns.
- (xi) The examination of sales tax implication on the sale of salvage should also be seen as it is applicable to the respective states and the past trend in this regard.
- (xii) The auditor should check the liability under the VAT and whether provision for adequate amount has been made in the books or not.
- (xiii) The auditor should verify that adequate provision has been made for additional liability relating to earlier years for which demands have been received in the current year and where the company has gone into appeal, the fact that no provision has been made and that an appeal has been preferred has to be disclosed in the notes to accounts.

12.8.5 Unexpired Risks Reserve

The need for Unexpired Risks Reserve arises from the fact that all policies are renewed annually except in specific cases where short period policies are issued. Since the insurers close their accounts on a particular date, not all risks under policies expire on that date. Many policies normally extend beyond this date into the following year during which risks continue. In other words, at the closing date, there is unexpired liability under various policies which may occur during the remaining term of the policy beyond the year end.

As per section 64V of the Insurance Act, 1938, for the purpose of compliance with the provisions of maintaining control level of solvency margin, a proper value of every item of liability of the insurer shall be placed in the manner as may be specified by the regulations made in this behalf.

It may be mentioned that the profit and gain of insurance companies are governed by the provisions of section 44 of the Income Tax Act, 1961. In this regard, Rule 5 of the First Schedule to the Income Tax Act-Computation of Profit & Loss of General Insurance Business provides for creation of a reserve for unexpired risks as prescribed under Rule 6E of the Income Tax Rules, 1962. According to this Rule, the insurance companies are allowed a deduction of 50 per cent of net premium income in respect of Fire and Miscellaneous Business and 100 per cent of the net premium income relating to Marine Insurance business.

Fig.: Fire Insurance*

12.9 Reinsurance

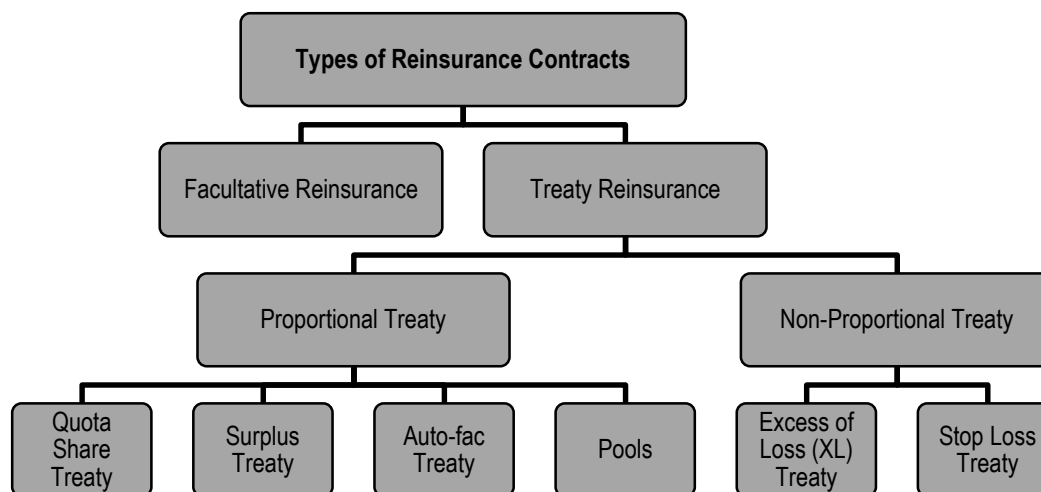

A reinsurance transaction may be defined as an agreement between a 'ceding company' and a 'reinsurer' whereby the former agrees to 'cede' and the latter agrees to accept a certain specified share of risk or liability upon terms as set out in the agreement. A 'ceding company' is the original insurance company which has accepted the risk and has agreed to 'cede' or pass on that risk to another insurance company or the reinsurance company. It may, however, be emphasised that the insured does not acquire any right under a reinsurance contract. In the event of loss, the insured's claim for full amount is against the original insurer only. The original insurer in turn, lodges a claim with the reinsurer.

12.9.1 Type of Reinsurance Contracts

There are broadly two types of reinsurance contracts, viz., facultative reinsurance and treaty reinsurance. A diagrammatic presentation is as below:

* Marine Source: Humpunjabi.com

* Fire Source: SpiderKerala.net

Facultative Reinsurance - It is that type of reinsurance whereby the contract relates to one particular risk and is expressed in the reinsurance policy. This is the oldest method of reinsurance and it necessitates consideration of each risk separately. Each transaction under facultative reinsurance has to be negotiated individually. Each party to the transaction has a free choice, i.e., for the ceding company to offer and the reinsurer to accept. The main drawbacks of this type of insurance are the volume of work involved and time taken to cover the risk. It is, however, still used even today, mainly when:

- (i) automatic covers have already been exhausted.
- (ii) the risk is excluded from the Treaties.
- (iii) the insurer does not want his reinsurance treaties overburdened with particularly heavy and abnormal risks.
- (iv) the insurer has no automatic cover at his disposal in a particular branch, where he issues policies rarely.
- (v) the nature of business is such that technical guidance or consultation with the reinsurer is required at every stage of acceptance of the risk itself or for a type of business where the number of risks is very small, for example, in atomic energy installations, oils rigs, etc.

Treaty Reinsurance - Under this type of reinsurance, a treaty agreement is entered into between the ceding company and the reinsurer(s) where reinsurances are within the limits of the treaty. These limits can be monetary, geographical, section of business, etc. Under this contract, it is obligatory for the reinsurer to accept all risks within the scope this treaty and it is obligatory for the ceding company to cede risks in accordance with the terms of the treaty. In the case of treaty reinsurance contracts, the insurer generally prepares a statement of treaty reinsurances accounts, either on quarterly basis or on half-yearly basis. These statements are sent to the re-insurer for the purpose of reconciliation of claims lodged under the reinsurance contracts, outstanding claims, claims paid and claims paid in advance. It may be noted here that the treaty reinsurance contracts generally provide that in the event of any large claim being

lodged with the insurer, the re-insurer shall make the payment even before the claim is finally settled or the statement of treaty reinsurance is received by the reinsurer. The reinsurer, in such cases, treats the amount paid to the insurer as 'advance against claim'. The Advance against Claim Account is squared up as and when the claim is settled and the information of this settlement is sent to the reinsurer through statement of treaty reinsurances. Such payments by the reinsurer are called Cash Loss Payments. Treaties can also be divided into two categories, viz., proportional treaties and non-proportional treaties.

Proportional Treaties - Such treaties are based on pro-rata apportionment of the sum insured, premium and losses, according to a pre-determined percentage/ratio. These treaties can be further classified as follows:

(a) **Quota share treaty** - Under this treaty, the ceding company binds itself to cede a fix percentage of all policies issued by it under a defined scope of business covered by the agreement. The accounting under this treaty is simpler than any other form of treaties. The advantage to the reinsurer under this treaty is that the reinsurer receives the same proportion of all business of the treaty class defined under the treaty. In other words, there is no selection against him. The advantage to the ceding company under this treaty is that, it cannot vary its retention/line for any particular risk, and therefore, it may have to pay premiums even on small risks which could have been retained by the ceding company itself. The use of this treaty is appropriate when a company commences business at a branch where no relevant data is available.

(b) **Surplus Treaty** - Where a company cedes those amounts which it cannot or does not want to retain for its net account, such type of contract is known as surplus reinsurance treaty. If certain risk is totally retained, no surplus is left to be ceded. Surplus is always determined in multiples of ceding company's retention. A company can arrange more surplus treaties by having, say, second surplus treaty or third surplus treaty, etc. An example is given below:

Sum Assured	₹ 500 lakhs
Line	₹ 5 lakhs
Surplus	₹ 495 lakhs

If first surplus treaty is 10 lines, it would cede ₹ 50 lakhs to the treaty and the balance of ₹ 445 lakhs would have to be ceded to other treaty arrangements.

(c) **Auto-fac Treaty** - Under this treaty, a ceding company may reinsure upto a defined limit after cession of its surplus treaties. It is obligatory for the reinsurer to accept cessions within the purview of the agreement. It, thus, resembles a facultative reinsurance treaty as the acceptance is obligatory and in many instances, the details of the risks are submitted by way of a Bordereaux.

(d) **Pools** - More than one insurer may form a Pool under an agreement whereby its members cede a pre-determined proportion of a particular category of business directly written by them into the Pool. They also share the aggregate premiums and claims in the proportion

and the share of premium ceded by each member. In India, the examples of this system are Indian Market Fire Pool and Hull Pools.

Non-Proportional Treaties - Such treaties are characterised by a distribution of liability between the ceding company and the reinsurer on the basis of losses rather than the sum insured, as is the case in proportional reinsurance. The following are the other characteristics of non-proportional treaties:

- (i) Premium is not calculated on each cession, but on the whole portfolio of the ceding company.
- (ii) The premium rate is predetermined.
- (iii) Cost of reinsurance can vary substantially each year, depending on the premium income, loss ratio and reinsurance market situations.
- (iv) Normally no commission is paid.

Non-Proportional Treaties can be further classified into following categories:

(a) Excess of Loss (XL) Treaties - In this type of treaty, the reinsurer's liability arises only when a claim exceeds a predetermined figure relating to a specific branch of the ceding company's business or to its entire business. The Treaty would provide for maximum liability as well as the amount upto which the ceding company would bear the loss itself, which is called the 'Underlying Limit'. The XL cover can also be arranged for an unlimited amount in excess of the underlying limit.

(b) Excess of loss cover on prevent basis - In this type of cover, in case as a result of one event several risks are effected, the loss under each risk is arrived at separately and the underlying limit is applied to each risk to determine the liability of the insurer. This is also known as 'Working Excess of Loss Cover'.

(c) Excess of loss cover on non-prevent basis- In this type of cover, losses resulting from one event are considered together and aggregate amount of loss is determined and one loss underlying limit is deducted from the aggregate amount of the loss to determine the liability of the excess of loss reinsurer. This type of cover provides protection to an insurer against the numerous losses caused by one or the same event such as cyclone, earthquake, etc. This type of cover is also, therefore, known as 'Catastrophic Covers'.

(d) Stop loss treaties - This is also known as 'Excess of Loss Ratio Cover' and it protects the company from losing more than a specified amount for a given class of business. Normally, the amount is fixed in relation to the ceding company's annual premium income for the class of business and is represented as a percentage. Thus, the reinsurer is liable for the losses which exceed the agreed percentage of loss ratio, until the limit of liability is reached which is expressed in the form of loss ratio. Such a treaty protects the annual results of a company in one branch against negative deviation due to increase in the number and cost of claims/losses.

12.9.2 Verification of Re-insurance Inward

Under regulation 4 of the IRDA (General Insurance Re-insurance) Regulations, 2013, every insurer desirous of writing inward re-insurance business should have a well defined underwriting

policy. The decisions on acceptance of re-insurance should be taken by persons with good knowledge and experience. The insurer is required to file with the Authority, its underwriting policy and any changes therein from time to time. The auditor should apply the following verifications measures for re-insurance inward transactions:

- (i) Re-insurance Inward underwriting should be as per the norms and guidelines prescribed by the Insurance Act, 1938 and IRDA Regulations. It is necessary to ensure that the inward reinsurance arrangements and acceptances, both Indian and foreign are done as per the prescribed parameters applicable for the particular year.
- (ii) The auditor should check that domestic inward acceptances are in accordance with the approved programme.
- (iii) The auditor should verify whether re-insurance inward acceptance, both Indian and foreign, are as per arrangements / agreements entered into with Indian and foreign insurance companies.
- (iv) The auditor should also verify whether the policy adopted for booking the accounts is on "receipt" basis or "due" basis with the appropriate basis of estimation towards accounts not received and that the basis of estimation is fair and consistently applied and properly disclosed.
- (v) The auditor should examine whether proper system exists to have control over the quantum of agreements existing at any point of time and also that periodical accounting statements received in connection with the agreements.
- (vi) The auditor should verify whether proper closing returns have been received for premiums and claims for facultative acceptances.
- (vii) The auditor should check the accounts for closure of any underwriting year, with portfolio withdrawals as per the terms and conditions agreed.
- (viii) The auditor should evaluate the system and practice adopted in recognising the foreign currency transaction and also whether it is in accordance with the Accounting Standard - 11 "The Effects of Changes in Foreign Exchange Rates".
- (ix) The auditor should verify whether profit commission has been calculated as per the agreement and terms and conditions and all the statements rendered are properly taken into account.
- (x) The auditor should check whether there is any run off claim / large claim of long chain in nature which requires any provisioning.
- (xi) The auditor should also verify whether the Foreign Inward acceptance components, consisting of premium, commission, brokerage and other expenses, claims consisting of paid claims opening and closing outstanding claims etc., have been recorded and accounted as per the accounts rendered by the companies. It is essential that the statement should be rendered in the currency in which it was agreed to be transacted and the conversion of foreign currency balances from the accounts submitted have been done at the appropriate conversion rates as per Accounting Standard -11.

12.30 Advanced Auditing and Professional Ethics

- (xii) The auditor should examine whether the outstanding claim figures have been properly obtained well in time, under proper systematic arrangements and sufficient provisioning has been made for all the outstanding claims. The auditor should see that regarding foreign inward, appropriate provisioning is done after adopting prescribed conversion rate to the Indian rupee. The auditor should ensure that confirmation regarding the outstanding claims have been received in respect of all inward arrangements.
- (xiii) As per IRDA (General Insurance Re-insurance) Regulations, 2013, every re-insurer is required to make provision for outstanding claims for every reinsurance arrangement accepted on the basis of loss information advices received from brokers /cedants and where such advices have not been received, on an actuarial estimation basis. In addition, every re-insurer has to make an appropriate provision for 'Incurred but Not Reported (IBNR)' claims on its reinsurance accepted portfolio on actuarial estimation basis. This aspect has to be looked into as this may result in a lot of difference in the financial results of the company.
- (xiv) Closing balances of the re-insurer's accounts should be reconciled and the confirmation of balances should be obtained from all the companies.
- (xv) The auditor must ensure that foreign inward accounts balances have been re-stated at the prevailing value at the year end and that difference arising out of re-statement has been taken to Profit and Loss Account.
- (xvi) The auditor should verify the requirement of provision / writing off of reinsurance inward balances based on the doubtful nature of recovery, if any.
- (xvii) The auditor should check whether Indian inward balances including with the GIC have reconciled and identical balances arrived at and affect, if any, due to co-insurance transactions should also be looked into.

12.9.3 Verification of Re-insurance Outward

The following steps may be taken by the auditor in the verification of re-insurance outward:

- (i) The auditor should verify that re-insurance underwriting returns received from the operating units regarding premium, claims paid, outstanding claims tally with the audited figures of premium, claims paid and outstanding claims.
- (ii) The auditor should check whether the pattern of re-insurance underwriting for outward cessions fits within the parameters and guidelines applicable to the relevant year.
- (iii) The auditor should also check whether the cessions have been made as per the stipulation applicable to various categories of risk.
- (iv) The auditor should verify whether the cessions have been made as per the agreements entered into with various companies.
- (v) It should also be seen whether the outward remittances to foreign re-insurers have been done as per the foreign exchange regulations.
- (vi) It should also be seen whether the commission on cession has been calculated as per the terms of the agreement with the re-insurers.

- (vii) The auditor should verify the computation of profit commission for various automatic treaty arrangements in the light of the periodical accounts rendered and in relation to outstanding loss pertaining to the treaty.
- (viii) The auditor should examine whether the cash loss recoveries have been claimed and accounted on a regular basis.
- (ix) The auditor should also verify whether the Claims Paid item appears in Outstanding Claims list by error. This can be verified at least in respect of major claims.
- (x) He should see whether provisioning for outstanding losses recoverable on cessions have been confirmed by the re-insurers and in the case of major claims, documentary support should be insisted and verified.
- (xi) Accounting aspects of the re-insurance cession premium, commission receivable, paid claims recovered, and outstanding losses recoverable on cessions have to be checked.
- (xii) The auditor should check percentage pattern of gross to net premium, claims paid and outstanding claims to ensure comparative justification.
- (xiii) The auditor should also check that the re-insurers balance on cessions and whether the sub ledger balances tallies with the general ledger balances.
- (xiv) The auditor should review the individual accounts to find out whether any balance requires provisioning / write off or write back.
- (xv) He should verify whether the balances with re-insurers are supported by necessary confirmation obtained from them.
- (xvi) He should verify whether opening outstanding claims not paid during the year find place in the closing outstanding claims vis-a-vis the reinsurance inwards outstanding losses recoverable on cessions appears in both opening and closing list. If not, the reason for the same should be analysed.
- (xvii) Any major event after the Balance Sheet date which might have wider impact with reference to subsequent changes regarding the claim recovery both paid and outstanding and also re-insurance balances will need to be brought out suitably.

12.10 Co-Insurance

Where the insured chooses to have more than one insurer for the same transaction of risk, it would amount to coinsurance. The concept of co-insurance emerges, when there is a predetermined set of understandings, leader of the business receives the premium and issues policy with a co-insurance clause in the policy and the referred leader also settle the claims to the insured in case of the occurrence of claims. Balances pertaining to other companies relating to premiums and claims are accounted under co-insurance as "Amounts due to / due from" other insurance companies.

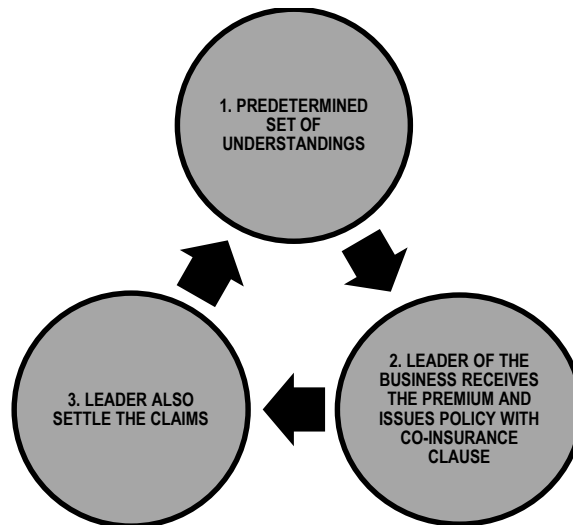

Diagram presenting the concept of Co-insurance

Balances are settled in periodical meetings and exchange of statements as agreed between the companies. Suitable slot can be provided in the systems to incorporate co-insurance requirements. Most of the practice in accounting and settlement of co-insurance transactions are industry specific and insured specific. Hence, system may suitably be designed to accommodate all the possibilities of co-insurance accounting and settlements.

The auditors should get information from the agreement arrived at the Insurance Council, where the insurance companies may chose to be the members. (Wherever the concept of Insurance Council is in place). Members of the Insurance Council could arrive the mutually agreeable terms and norms of entering into coinsurance agreement and the norms for settlement of dues. The Insurance Council may recommend the following norms while entering into coinsurance agreement:

- ◆ Settlement of commission Collection and Remittance of service tax
- ◆ Standard practices for settlement of dues
- ◆ Settlement of claims
- ◆ Reinsurance arrangement for the risk booked
- ◆ Exceptional booking and the powers thereof deviating from the Council's understanding .

The auditor should go through the understanding of the Council and ensure that the risks are covered as per the terms and conditions with adequate consideration and proper settlement.

12.11 Solvency Margin

Section 64VA of the Insurance Act, 1938 as amended by Insurance Laws (Amendment) Act, 2015 requires every insurer and re-insurer to maintain an excess of the value of assets over the amount of liabilities at all times which shall not be less than 50% of the amount of minimum

capital as stated under section 6 (requirement as to capital) of the Act and arrived at in the manner specified by the regulations.

The Authority, by way of regulation, shall specify a level of solvency margin known as 'control level of solvency'. However, in certain special circumstances, the authority may direct application of this provision with some modifications provided this shall not result in the control level of solvency being less than what is stipulated in above para.

If, at any time, an insurer or re-insurer does not maintain the required control level of solvency margin, he is required to submit a financial plan to the Authority indicating the plan of action to correct the deficiency. If, on consideration of the plan, the Authority finds it inadequate, the insurer has to modify the financial plan.

Maintenance of solvency margin has a great importance for an insurance company considering their size and nature of business and also involvement of public money. Sub-section (2) of section 64VA states that if an insurer or re-insurer fails to comply with the prescribed requirement of maintaining excess of value of assets over amount of liabilities, it shall be deemed to be insolvent and may be wound up by the Court on an application made by the authority.

12.11.1 IRDA Regulations

The Insurance Act requires every insurer to furnish a statement of his assets and liabilities as assessed in the manner laid down by the section 64V.

Every Insurer is required to prepare a statement of value of assets in "Form IRDA-Assets-AA." A statement of the amount of liabilities in case of general insurance business is to be prepared in "Form HG" and a statement of Solvency Margin in "Form KG" as specified in the Insurance Regulatory and Development Authority (Assets, Liabilities and Solvency Margin of Insurers) Regulations, 2000. The statement of assets, liabilities and solvency margin are to be certified by an auditor and filed by the insurance company with the Authority along with the audited accounts and statements.

12.12 Trade Credit Insurance

"Trade Credit Insurance business" means the business of effecting contracts of insurance in respect of trade credit insurance transactions.

"Trade credit insurance" means insurance of suppliers against the risk of non-payment of goods or services by their buyers who may be situated in the same country as the supplier (domestic risk) or a buyer situated in another country (export risk) against non-payment as a result of insolvency of the buyer or non-payment after an agreed number of months after due-date (protracted default) or non-payment following an event outside the control of the buyer or the seller (political risk cover). Political risk cover is available only in case of buyers outside India and in countries agreed upon at the proposal stage.

"Trade Credit Insurance transaction" means a transaction between two persons for supply of goods or services on open and agreed terms.

12.34 Advanced Auditing and Professional Ethics

"Trade Credit insurance policy" is a conditional insurance contract between two parties (insurer and seller) that cannot be traded and is always directly related to an underlying trade transaction, which is either the delivery of goods or of services. The correct fulfilment of this trade transaction and satisfaction of the contract terms is essential for credit cover to exist.

12.12.1 Basic Requirements of a Trade Credit Insurance Product

An insurer shall offer trade credit insurance product only if all requirements mentioned below are met -

- (i) Policyholder's loss is non-receipt of trade receivable arising out of a trade of goods or services.
- (ii) Policyholder is a supplier of goods or services in consideration for a fair market value.
- (iii) Policyholder's trade receivable does not arise out of factoring or reverse factoring arrangement or any other similar arrangement.
- (iv) Policyholder has a customer (*i.e.* Buyer) who is liable to pay a trade receivable to the policyholder in return for the goods and services received by him from the policyholder, in accordance with a policy document filed with the insurer.
- (v) Policyholder undertakes to pay premium for the entire Policy Period.
- (vi) Any other requirement that may be specified by the Authority from time to time.

Audit of Co-Operative Societies

13.1 Introduction

The Co-operative Societies Act, 1912, a Central Act, contains the fundamental law regarding the formation and working of the co-operative societies in India and is applicable in many states with or without amendments. In many states, viz., Maharashtra, West Bengal, Orissa, the co-operative societies are governed by specific state Acts. An auditor of a co-operative society should be familiar with the provisions of the particular Act governing the society under audit.

Co-operative society is a business organisation with a special mode of doing business, by pulling together all the means of production co-operatively, elimination of middlemen and exploitation from outside forces.

A chartered accountant has to play a significant role in the development of co-operative organisations on scientific lines. In this Unit, it is proposed to give a few guidelines in the matter of audits of co-operative societies.

Apart from audit, some other professional services could be rendered by chartered accountants such as-

- (1) guidance in accounts writing,
- (2) installation of accounting system,
- (3) internal audit,
- (4) management accounting services,
- (5) taxation etc.

However, the main focus is to give some guidelines about the audit of co-operative societies in general. The special features of audit applicable to all societies will be considered first, and subsequently a few special points with reference to audit programmes of specific types of societies will be considered.

13.1.1 Audit as per Section 17 of the Co-Operative Societies Act, 1912

- (1) The Registrar shall audit or cause to be audited by some person authorised by him by general or special order in writing in this behalf the accounts of every registered society once at least in every year.
- (2) The audit under sub-section (1) shall include an examination of overdue debts, if any, and a valuation of the assets and liabilities of the society.

13.2 Advanced Auditing and Professional Ethics

- (3) The Registrar, the Collector or any person authorised by general or special order in writing in this behalf by the Registrar shall at all times have access to all the books, accounts, papers and securities of a society, and every officer of the society shall furnish such information in regard to the transactions and working of the society as the person making such inspection may require.

"Registrar" means a person appointed to perform the duties of a Registrar of Co-operative Societies under this Act.

13.2 Auditor and Management

According to the nature of particular co-operative society the auditor will have to examine in general the pattern of management, delegation of authority and fixation of responsibilities. The examination of minute books will reveal important policy decisions taken by management. The Board of Directors is the chief executive body and the minute book recording the minutes of its meetings is the main evidence for an auditor to go through the entity's management decisions. The auditor should see how far these decisions are in line with co-operative principles, interest of members, the provisions in the respective co-operative law of the State applicable to the society; and lastly the provisions of bye-laws of the society. The Central Co-operative Societies Act, 1912 does not contain any direct provisions relating to the management and meetings. As such for the sake of guidance and reliance, regard shall be had to the respective Co-operative Societies Act. For instance, according to section 72 of Maharashtra State Co-operative Societies Act, 1960, the management of every society shall vest in a Committee constituted in accordance with the Act and rules and bye-laws. The managing committee elects a chairman, who is in charge of general administration; other administrative officers are Managing Director, Manager or Secretary according to the nature of the society. The administrative functions of a managing committee include the following:

- (1) Proper custody and maintenance of movable and immovable properties belonging to the society.
- (2) Proper maintenance of accounts relating to receipts and payments of the society, through its accounting staff.
- (3) To summon and attend all the meetings including Annual General Meeting and to record the proceedings of the meetings in a proper minute book.
- (4) To keep all the necessary registers and records required by the Co-operative Societies Act and Rules and bye-laws of the society.

Generally in case of co-operative organisations the management is not manned by professional managers and as such the auditor of a co-operative society could play a constructive role in the capacity as a guide, friend and an adviser to the society. The auditor should see that the actions of managing committee are not inconsistent with the resolutions passed by the meetings of general body and managing committee, provisions of Co-operative Societies Act and rules and bye-laws of the society.

The following points should be kept in mind in connection with the audit of a co-operative society:

1. Qualifications of Auditors - Apart from a chartered accountant within the meaning of the Chartered Accountants Act, 1949, some of the State Co-operative Acts have permitted persons holding a government diploma in co-operative accounts or in co-operation and accountancy and also a person who has served as an auditor in the co-operative department of a government to act as an auditor.

2. Appointment of the Auditor - An auditor of a co-operative society is appointed by the Registrar of Co-operative Societies and the auditor so appointed conducts the audit on behalf of the Registrar and submits his report to him as also to the society. The audit fees are paid by the society on the basis of statutory scale of fees prescribed by the Registrar, according to the category of the society audited.

3. Books, Accounts and other records of Co-operative Societies - Under section 43(h) of the Central Act, a state government can frame rules prescribing the books and accounts to be kept by a co-operative society.

For example, in Maharashtra, the co-operative societies are required to maintain books of account in terms of the instructions of the Registrar as following:

- (i) All sums of money received and expended by the society and the matters in respect of which receipts and expenditure take place.
- (ii) All sales and purchases of goods by the society.
- (iii) Assets and liabilities of the society.

In order to maintain proper financial accounting records so as to disclose full financial results of working of the society, the statutory or mandatory provisions provide a directive, but they are not conclusive. The society is at liberty to maintain such additional records according to its convenience and which it thinks more useful for clarity and detailed explanation. Ultimately the financial transactions and the results thereof must be presented very clearly and in the best possible manner.

Depending upon the nature and object of the society, different kinds of books and registers will be maintained, so as to disclose a proper and fair picture of financial transactions. In case of large scale co-operative organisation, different subsidiary books and registers shall be maintained and the daily summary totals will be transferred to main Cash Book. For example:

- (a) Daily cash sales summary register.
- (b) A register of collection from debtors if credit sales are allowed by bye-laws of society.
- (c) A register of recovery of loans from salaries and directly by receipts from members in case of credit society.
- (d) Loan disbursement register in case of credit society.
- (e) Any other columnar subsidiaries depending upon the nature and functions of society.

4. Restrictions on share holdings - According to section 5 of the Central Act, in the case of a society where the liability of a member of the society is limited, no member of a society other than a registered society can hold such portion of the share capital of the society as would exceed a maximum of twenty percent of the total number of shares or of the value of shareholding to ₹ 1,000/-. The auditor of a co-operative society will be concerned with this provision so as to watch any breach relating to holding of shares. One should also watch whether any provision in the bye-laws of the society is not contrary to this statutory position. The State Acts may provide limits as to the shareholding, other than that provided in the Central Act.

5. Restrictions on loans - Section 29 of the Central Act puts restriction on loan. It states that a registered society shall not make a loan to any person other than a member. However, with the special sanction of the Registrar, a registered society may make a loan to another registered society.

The State Government may further put such restrictions as it thinks fit on the loaning powers of the society to its members or to other societies in the interest of the society concerned and its members.

6. Restrictions on borrowings - Section 30 of the Central Act further puts restriction on borrowings. According to this section, a registered society shall accept loans and deposits from persons who are not members subject to the restrictions and limits of the bye-laws of the society. The auditor will have to examine the bye-laws in this respect.

7. Investment of funds - According to section 32 of the Central Act, a society may invest its funds in any one or more of the following:

- (a) In the Central or State Co-operative Bank.
- (b) In any of the securities specified in section 20 of the Indian Trusts Act, 1882.
- (c) In the shares, securities, bonds or debentures of any other society with limited liability.
- (d) In any co-operative bank, other than a Central or State co-operative bank, as approved by the Registrar on specified terms and conditions.
- (e) In any other moneys permitted by the Central or State Government.

In the principal provision relating to the investments of funds of a co-operative society, the Central as well as State Acts does not mention anything about the investment of reserve fund outside the business specifically.

8. Appropriation of profits - According to section 33 of the Central Act, a prescribed percentage of the profits should be transferred to Reserve Fund, before distribution as dividends or bonus to members.

9. Contributions to Charitable Purposes - According to section 34, a registered society may, with the sanction of the Registrar, contribute an amount not exceeding 10% of the net profits remaining after the compulsory transfer to the reserve fund for any charitable purpose as defined in section 2 of the Charitable Endowments Act, 1890.

10. Investment of Reserve Fund outside the business or utilisation as working capital -

Some of the State Acts provide that a society may use the Reserve Fund:

- (a) in the business of a society, as working capital (subject to the rules made in this behalf).
- (b) may invest as per provisions of the Act.
- (c) may be used for some public purposes likely to promote the object of the society.

The auditor should ensure strict compliance with the State Act and Rules in this regard.

11. Contribution to Education Fund - Some of the State Acts provide that every society shall contribute annually towards the Education Fund of the State Federal Society, at the appropriate rate as per the class of the society. Contribution to Education Fund is a charge on profits and not an appropriation.

Apart from statutory provisions relating to Reserve Fund, the auditor may have regard to the provisions in bye-laws and Rules and Regulations of the society regarding the appropriation of profits. Transfers to other reserves, dividends to members etc. are the other appropriations. Appropriations of profits must be approved by the General Body of the society, which is the supreme authority in the co-operative management. Further, it may be noted that necessary accounting entries for the appropriation of profits must be passed after the date of approval by the General Body. Here there is a departure from corporate accounting practice, where entries are passed for proposed appropriations, subject to approval of Annual General Meeting.

According to certain State Acts, transfers to Dividend Equalization Reserve and Share Capital Redemption Fund are stated as charges against profits. According to the generally accepted principles of accountancy these items are not charges, but appropriation of profits. The auditor should point out such spots where statutory provisions of any law are in contradiction with the generally accepted accounting principles.

13.3 Special Features of Co-Operative Audit

The general processes of auditing involved in audit work such as checking of posting, ascertainment of arithmetical accuracy, vouching, verification of assets and liabilities and final scrutiny of Balance Sheet are well known to the students, and the same are to be applied in co-operative audit as well. It need not be discussed in detail.

However, the special features of co-operative audit, to be borne in mind in general while conducting the audit are as follows:

1. Examination of overdue debts - Overdue debts for a period from 6 months to 5 years and more than 5 years will have to be classified and shall have to be reported by an auditor. Overdue debts have far reaching consequences on the working of a credit society. It affects its working capital position. A further analysis of these overdue debts from the viewpoint of chances of recovery will have to be made, and they will have to be classified as good or bad. The auditor will have to ascertain whether proper provisions for doubtful debts are made and whether the same is satisfactory.

2. Overdue Interest - Overdue interest should be excluded from interest outstanding and accrued due while calculating profit. Overdue interest is interest accrued or accruing in accounts, the amount of which the principal is overdue. In practice an overdue interest reserve is created and the credit of overdue interest credited to interest account is reduced.

3. Certification of Bad Debts - A peculiar feature regarding the writing off of the bad debts as per Maharashtra State Co-operative Rules, 1961, is very interesting to note. As per the said rules, bad debts can be written off only when they are certified as bad by the auditor. Bad debts and irrecoverable losses before being written off against Bad Debts Funds, Reserve Fund etc. should be certified as bad debts or irrecoverable losses by the auditor where the law so requires. Where no such requirement exists, the managing committee of the society must authorise the write-off.

4. Valuation of Assets and Liabilities - Regarding valuation of assets there are no specific provisions or instructions under the Act and Rules and as such due regard shall be had to the general principles of accounting and auditing conventions and standards adopted. The auditor will have to ascertain existence, ownership and valuation of assets. Fixed assets should be valued at cost less adequate provision for depreciation. The incidental expenses incurred in the

acquisition and the installation expenses of assets should be properly capitalised. If the difference in the original cost of acquisition and the present market price is of far reaching significance, a note regarding the present market value may be appended; so as to have a proper disclosure in the light of present inflatory conditions. The current assets be valued at cost or market price, whichever is lower. Regarding the liabilities, the auditor should see that all the known liabilities are brought into the account, and the contingent liabilities are stated by way of a note.

5. Adherence to Co-operative Principles - The auditor will have to ascertain in general, how far the objects, for which the co-operative organisation is set up, have been achieved in the course of its working. The assessment is not necessarily in terms of profits, but in terms of extending of benefits to members who have formed the society. Considered from the viewpoint of social benefits it may be looked into that how far the sales could be affected at lower prices. For the achievement of these activities, cost accounting methods, store control methods, techniques of standard costing, budgetary control etc. should be adopted. However, these modern techniques are mostly not in application and as such in practice a wide gap is found in the goals to be achieved and the actual achievements. While auditing the expenses, the auditor should see that they are economically incurred and there is no wastage of funds. Middlemen commissions are, as far as possible, avoided and the purchases are made by the committee members directly from the wholesalers. The principles of propriety audit should be followed for the purpose.

6. Observations of the Provisions of the Act and Rules - An auditor of a co-operative society is required to point out the infringement with the provisions of Co-operative Societies Act and Rules and bye-laws. The financial implications of such infringements should be properly assessed by the auditor and they should be reported. Some of the State Acts contain restrictions on payment of dividends, which should be noted by the auditor.

7. Verification of Members' Register and examination of their pass books - Examination of entries in members pass books regarding the loan given and its repayments, and confirmation of loan balances in person is very much important in a co-operative organisation to assure that the entries in the books of accounts are free from manipulation. Specifically in the rural and agricultural credit societies, members are not literate and as such this is a good safeguard on their part. Of course this checking will be resorted to on a test basis, which is a matter of judgement of the auditor.

8. Special report to the Registrar - During the course of audit, if the auditor notices that there are some serious irregularities in the working of the society he may report these special matters to the Registrar, drawing his specific attention to the points. The Registrar on receipt of such a special report may take necessary action against the society. In the following cases, for instance, a special report may become necessary:

- (i) Personal profiteering by members of managing committee in transactions of the society, which are ultimately detrimental to the interest of the society.
- (ii) Detection of fraud relating to expenses, purchases, property and stores of the society.

13.8 Advanced Auditing and Professional Ethics

- (iii) Specific examples of mis-management. Decisions of management against co-operative principles.
- (iv) In the case of urban co-operative banks, disproportionate advances to vested interest groups, such as relatives of management, and deliberate negligence about the recovery thereof. Cases of reckless advancing, where the management is negligent about taking adequate security and proper safeguards for judging the credit worthiness of the party.

9. Audit classification of society - After a judgement of an overall performance of the society, the auditor has to award a class to the society. This judgement is to be based on the criteria specified by the Registrar. It may be noted here that if the management of the society is not satisfied about the award of audit class, it can make an appeal to the Registrar, and the Registrar may direct to review the audit classification. The auditor should be very careful, while making a decision about the class of society.

10. Discussion of draft audit report with managing committee - On conclusion of the audit, the auditor should ask the Secretary of the society to convene the managing committee meeting to discuss the audit draft report. The audit report should never be finalised without discussion with the managing committee. Minor irregularities may be got settled and rectified. Matters of policy should be discussed in detail.

13.4 Rights and Duties of Co-Operative Auditors

Section 17 of the Co-operative Societies Act, 1912 contains audit provision as under:

- (i) The Registrar shall audit or cause to be audited by some person authorised by him by general or special order in writing in this behalf the accounts of every registered society once at least in every year.
- (ii) The audit under sub-section (1) shall include an examination of overdue debts, if any, and a valuation of the assets and liabilities of the society.
- (iii) The Registrar, the Collector or any person authorised by general or special order in writing in this behalf by the Registrar shall at all times have access to all the books, accounts, papers and securities of a society, and every officer of the society shall furnish such information in regard to the transactions and working of the society as the person making such inspection may require.

On completion of audit, the auditor has to submit his audit report to the society, and copies thereof to the respective authorities such as District Special Auditor, District Deputy Registrar etc. The audit report has to be submitted in the prescribed form specified by the Registrar or as given in the related Rules. According to the present prescribed form in some of the States, the auditor has to state:

- (a) Whether he has obtained all the necessary information and explanations which to the best of his knowledge and belief were necessary for the purpose of audit.

- (b) Whether in his opinion and to the best of his information and according to the explanations given to him, the said accounts give all the information required by the Act.
- (c) Whether the Profit and Loss Account of the society gives a true and fair view of the Profit and Loss made by the society.
- (d) Whether the Balance Sheet drawn up as at the end of the year gives a true and fair view of the state of affairs of the society as on the given date.
- (e) Whether in his opinion, proper books of account as required by the Act, the Rules and the bye-laws of the society have been properly maintained.
- (f) Whether the Balance Sheet and the Profit and Loss Account examined by him are in agreement with the books of account and returns of the society.

The auditor will have to give qualifying observations, if any of the answers to the above mentioned matters are negative.

13.5 Form of Audit Report

The form of the audit report to be submitted by the auditor, as prescribed in various states, contains a number of matters which the auditor has to state or comment upon. For example, the Rules formed under the Maharashtra State Co-operative Societies Act requires the auditor to make the usual affirmation pertaining to proper maintenance of books of accounts, true and fair nature of financial statements, etc. In addition to the above, the auditor will have to attach schedules to the report regarding the following information:

- (1) All transactions which appear to be contrary to the provisions of the Act, the rules and bye-laws of the society.
- (2) All sums, which ought to have been, but have not been brought into account by the society.
- (3) Any material, or property belonging to society which appears to the auditor to be bad or doubtful of recovery.
- (4) Any material irregularity or impropriety in expenditure or in the realisation or monies due to society.
- (5) Any other matters specified by the Registrar in this behalf.

In the case of Nil report in any of the above matters, the auditor will have to give a Nil report.

Further in addition to the audit certificate in the prescribed form and various schedules stated above, the auditor of co-operative society in the applicable State has to answer two sets of questionnaires called as audit memos. The first set of audit memo or questionnaire is of general nature and is applicable to all types of societies such as urban banks, consumers' stores, credit societies etc. The second set of questionnaire is specific for a particular type of society. These questionnaires are drafted in detail and serve the practical purpose of audit programme.

The audit report in a narrative form is also required to be submitted by the auditor addressed to

13.10 Advanced Auditing and Professional Ethics

the Chairman of the society. Generally the narrative audit report as per convention is divided into two parts styled as part I and part II. Part I of the report is very important which throws a light on comparative financial position, capital structure, solvency position and the profitability or otherwise of the society. It may contain comments on the working of the society and the suggestions for future improvements. It must be suitably divided into paragraphs. Part II of the report points out the observations of routine nature, which are the finished products of the routine vouch and post audit such as missing vouchers, loan bonds, inadequacies of documents, mistakes of principles in accounting etc. However mistakes having an impact on the profitability of society should be pointed out in Part I as it has got a consequential effect on the financial position of society.

13.6 Audit, Inquiry and Inspection of Multi-State Co-Operative Societies

The Multi-State Co-operative Societies Act, 2002, which came into force in August, 2002 applies to co-operative societies whose objects are not confined to one State. The Act contains detailed provisions regarding registration, membership and management of such societies.

The funds of a Multi-State co-operative society cannot be utilised for any political purpose. The Act contains detailed provisions regarding the investment of funds and restrictions on loans, borrowings, etc.

Books of Accounts - As per Multi-State Co-operative Society Rules 2002, every Multi-State Co-operative society shall keep books of account with respect to-

- a. all sum of money received and expended and matters in respect of which the receipt and expenditure take place;
- b. all sale and purchase of goods;
- c. the assets and liabilities;
- d. in the case of a Multi-State Co-operative society engaged in production, processing and manufacturing, particulars relating to utilization of materials or labour or other items of cost as may be specified in the bye-hours of such a society.

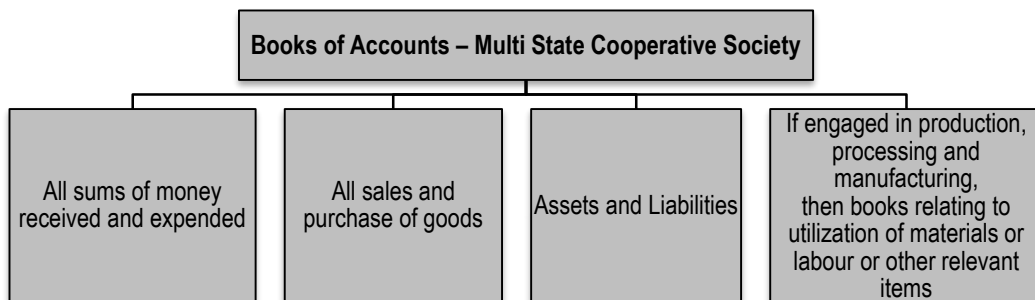

Diagram showing the Books of Accounts to be maintained by Multi State Co-operative Society

13.6.1 Audit of Multi-State Co-operative Society –

1. Qualification of Auditors - Section 72 of the Multi-State Co-operative Societies Act, 2002 states that a person who is a Chartered Accountant within the meaning of the Chartered Accountants Act, 1949 can only be appointed as auditor of Multi-State co-operative society.

However the following persons are not eligible for appointed as auditors of a Multi-State co-operative society-

- (a) A body corporate.
- (b) An officer or employee of the Multi-State co-operative society.
- (c) A person who is a member or who is in the employment, of an officer or employee of the Multi-State co-operative society.
- (d) A person who is indebted to the Multi-State co-operative society or who has given any guarantee or provided any security in connection with the indebtedness of any third person to the Multi-State co-operative society for an amount exceeding one thousand rupees.

If an auditor becomes subject, after his appointment, to any, of the disqualifications specified above, he shall be deemed to have vacated his office as such.

2. Appointment of Auditors - Section 70 of the Multi-State Co-operative Societies Act, 2002 provides that the first auditor or auditors of a Multi-State co-operative society shall be appointed by the board within one month of the date of registration of such society and the auditor or auditors so appointed shall hold office until the conclusion of the first annual general meeting. If the board fails to exercise its powers under this sub-section, the Multi-State co-operative society in the general meeting may appoint the first auditor or auditors.

The subsequent auditor or auditors are appointed by Multi-State co-operative society, at each annual general meeting. The auditor or auditors so appointed shall hold office from the conclusion of that meeting until the conclusion of the next annual general meeting.

3. Power and duties of Auditors – Section 73 of the Multi-State Co-operative Societies Act, 2002 discusses the powers and duties of auditors. According to this, every auditor of a Multi-State co-operative society shall have a right of access at all times to the books accounts and vouchers of the Multi-State co-operative society, whether kept at the head office of the Multi-State co-operative society or elsewhere, and shall be entitled to require from the officers or other employees of the Multi-State co-operative society such information and explanation as the auditor may think necessary for the performance of his duties as an auditor.

As per section 73(2), the auditor shall make following inquiry:

- (a) Whether loans and advances made by the Multi-State co-operative society on the basis of security have been properly secured and whether the terms on which they have been made are not prejudicial to the interests of the Multi-State co-operative society or its members,
- (b) Whether transactions of the Multi-State co-operative society which are represented merely by book entries are not prejudicial to the interests of the Multi-State co-operative society,

13.12 Advanced Auditing and Professional Ethics

- (c) Whether personal expenses have been charged to revenue account, and
- (d) Where it is Stated in the books and papers of the Multi-State co-operative society that any shares have been allotted for cash, whether cash has actually, been received in respect of such allotment, and if no cash has actually been so received, whether the position as stated in the account books and the balance sheet as correct regular and not misleading.

4. Content of Auditor's Report - As per sub-section (3) & (4) of section 73 of Multi-state Co-operative Societies Act, 2002, the auditor shall make a report to the members of the Multi-State co-operative society on the accounts examined by him and on every balance-sheet and profit and loss account and on every other document required to be part of or annexed to the balance-sheet or profit and loss account, which are laid before the Multi-State co-operative society in general meeting during his tenure of office, and the report shall state whether, in his opinion and to the best of his information and according to the explanation given to him, the said account give the information required by this act in the manner so required, and give a true and fair view:

- (a) In the case of the balance-sheet, of the state of the Multi-State co-operative society's affairs as at the end of its financial year; and
- (b) In the case of the profit and loss account, of the profit or loss for its financial year.

The auditor's report shall also state:

- (a) Whether he has obtained all the information and explanation which to the best of his knowledge and belief were necessary for the purpose of his audit.
- (b) Whether, in his opinion, proper books of account have been kept by the Multi-State co-operative society so far as appears from his examination of these books and proper returns adequate for the purpose of his audit have been received from branches or offices of the Multi-State co-operative society not visited by him.
- (c) Whether the report on the accounts of any branch office audited by a person other than the Multi-State co-operative society's auditor has been forwarded to him and how he has dealt with the same in preparing the auditor's report.
- (d) Whether the Multi-State co-operative society's balance sheet and profit and loss account dealt with by the report are in agreement with the books of account and return.

Where any of the matters referred to in sub-section (3) or (4) is answered in the negative or with a qualification, the auditor's report shall state the reason for the answer.

5. Power of Central Government to direct special audit in certain cases - Under section 77 of the Multi-State Co-operative Societies Act, 2002, where the Central Government is of the opinion:

- (a) that the affairs of any Multi-State co-operative society are not being managed in accordance with self-help and mutual aid and co-operative principles or prudent commercial practices or with sound business principles; or

- (b) that any Multi-State co-operative society is being managed in a manner likely to cause serious injury or damage to the interests of the trade industry or business to which it pertains; or
- (c) that the financial position of any Multi-State co-operative society is such as to endanger its solvency.

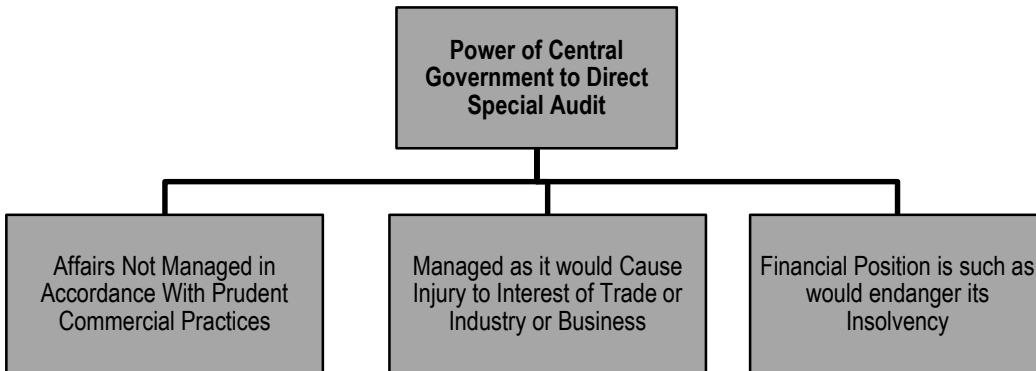

Diagram showing Power of Central Government to Direct Special Audit

The central Government may at any time by order direct that a special audit of the Multi-State co-operative society's accounts for such period or periods as may be specified in the order, shall be conducted and appoint either a chartered accountant or the Multi-State co-operative society's auditor himself to conduct the special audit.

However, central Government shall order for special audit only if that Government or the State Government either by itself or both hold fifty-one percent or more of the paid-up share capital in such Multi-State co-operative society.

The special auditor shall have the same powers and duties in relation to the special audit as an auditor of a Multi-State co-operative society has under section 73. However the special auditor shall instead of making his report to the members of the Multi-State co-operative society make the report to the Central Government. The report of the special auditor shall, include all the matters required to be included in the auditor's report under section 73 and any other matter as directed by the Central Government.

On receipts of the report of the special auditor the Central Government may take such action on the report as it considers necessary in accordance with the provision of the Act or any law for the time being in force.

However, if the Central Government does not take any action on the report within four months from the date of its receipt, that Government shall send to the Multi-State Co-operative society either a copy of, or relevant extract from, the report with its comments thereon and require the Multi-State Co-operative society either to circulate that copy or those extracts to the members or to have such copy or extracts read before the Multi-State Co-operative society at its next general meeting.

The expenses of, and incidental to, any special audit under this section (including the

13.14 Advanced Auditing and Professional Ethics

remuneration of the special auditor) shall be determined by the Central Government which determination shall be final and paid by the Multi-State Co-operative society and in default of such payment, shall be recoverable from the Multi-State Co-operative society as an arrear of land revenue.

13.6.2 Inquiry by Central Registrar under Section 78

The Central Registrar may, on a request from a federal co-operative to which a Multi-State Co-operative society is affiliated or a creditor or not less than one-third of the members of the board or not less than one-fifth of the total number of members of a Multi-state co-operative society, hold an inquiry or direct some person authorized by him by order in writing in his behalf to hold an inquiry into the constitutions, working and financial condition of a Multi-State Co-operative society. However, before holding such inquiry fifteen days notice must be given to the Multi-State co-operative society.

The Central Registrar or the person authorized by him shall have the following powers, namely:

- (a) he shall at all reasonable times have free access to the books, accounts, documents, securities, cash and other properties belonging to or in the custody of the Multi-State co-operative society and may summon any person in possession or responsible for the custody of any such books, accounts, documents securities, cash or other properties to produce the same at any place specified by him.
- (b) he may, notwithstanding any bye-law specifying the period of notice for a general meeting of the Multi-State co-operative society, require the officers of the society to call a general meeting of the society by giving notice of not less than seven days at such time and place at the head quarters of the society to consider such matters as may be directed to him, and where the officers of the society refuse or fail to call such a meeting, he shall have power to call it himself.
- (c) he may summon any person who is reasonably believed by him to have any knowledge of the affairs of the Multi-State co-operative society to appear before him at any place at the headquarters of the society or any branch thereof and may examine such person on oath.

The Central Registrar shall, within a period of three months of the date of receipt of the report, communicate the report of inquiry to the Multi-State co-operative society, the financial institutions, if any, to which the society is affiliated, and to the person or authority, if any at whose instance the inquiry is needed.

13.6.3 Inspection of Multi-State Co-operative societies under Section 79

The Central Registrar may, on a request from federal co-operative to which a Multi-State Co-operative society is affiliated or a creditor or not less than one-third of the members of the board or not less than one-fifth of the total number of members of a Multi-State co-operative society by general or special order in writing in this behalf inspect or direct any person authorized by him by order in writing in this behalf to make an inspection into the constitution, working and financial condition of a Multi-State co-operative society.

However, no inspection shall be made unless a notice of not less than fifteen days has been given to the multi-state co-operative society.

The Central Registrar or the person authorized by him shall have the following powers:

(a) He shall at all times have access to all books, accounts, papers, vouchers, securities, stock and other property of that society and may, in the event of serious irregularities discovered during inspection, take them into custody and shall have power to verify the cash balance of the society and subject to the general or special order of the central registrar to call a meeting of the society where such general meeting is, in his opinion necessary.

(b) Every officer or member of a Multi-State Co-operative society shall furnish such information with regard to the working of the society as the central registrar or the person making such inspection may require.

A copy of the report of inspection under this section shall be communicated to the Multi-State Co-operative society within a period of three months from the date of completion of such inspection.

Audit of Non-Banking Financial Companies

14.1 Introduction

Non-Banking Finance Company sector has evolved considerably in terms of its size, operations, technological sophistication, and entry into new areas of financial services and products. NBFCs are now deeply interconnected with the entities in the financial sector, on both sides of their balance sheets. Being financial entities, they are exposed to risks arising out of counterparty failures, funding and asset concentration, interest rate movement and risks pertaining to liquidity and solvency, as any other financial sector player. At the same time there are segments within the sector that do not pose any significant risks to the system. There is therefore, a felt need to address the risks, without impeding the dynamism displayed by NBFCs in delivering innovation and last mile connectivity for meeting the credit needs of the productive sectors of the economy.

Fig. : NBFCs*

Fig.: Audit of NBFCs*

Further, the RBI (Amendment) Act, 1997 provides for compulsory registration with the Reserve Bank of all NBFCs, irrespective of their holding of public deposits, for commencing and carrying on business, minimum entry point norms, maintenance of a portion of deposits in liquid assets, creation of Reserve Fund and transfer of 20 per cent of profit after tax annually

* Source: *Techno Legal Journalists*

* Source: *Inventicon*

to the Fund. The Amendment Act also conferred powers on Reserve Bank to issue directions to companies and its auditors, prohibit deposit acceptance and alienation of assets by companies and effect winding up of companies.

Accordingly, the Reserve Bank issued directions to companies on acceptance of public deposits, prudential norms like capital adequacy, income recognition, asset classification, provision for bad and doubtful debts, exposure norms and other measures to monitor the financial solvency and reporting by NBFCs. Directions were also issued to auditors to report non-compliance with the RBI Act and regulations to the Reserve Bank, Board of directors and shareholders.

Definition of NBFC

Section 45 I(f) of Reserve Bank of India (Amendment) Act, 1997 defines a non-banking financial company as:

- (i) A financial institution which is a company;
- (ii) A non banking institution which is a company with principal business of receiving of deposits, under any scheme or arrangement or in any other manner, or lending in any manner;
- (iii) Such other non-banking institution or class of such institutions, as the Reserve Bank with the previous approval of the Central Government may specify by notification in the Official Gazette.

For purposes of RBI Directions relating to Acceptance of Public Deposits, non-banking financial company means only the non-banking institution which is a –“Loan company, Investment company, Hire purchase finance company, Equipment leasing company and Mutual benefit financial company”.

Fig. : What is NBFC*

* Source: Slideshare

Registration and Regulation of NBFC

Under Section 45–IA of the Reserve Bank of India (Amendment) Act, 1997, no non-banking financial company is allowed to commence or carry on the business of a non-banking financial institution without obtaining a certificate of registration issued by the Reserve Bank of India.

A company incorporated under the Companies Act, 2013 and desirous of commencing business of non-banking financial institution as defined under Section 45–IA of the RBI Act, 1934 can apply to Reserve Bank of India in prescribed form along with necessary documents for registration. The RBI issues Certificate of Registration after satisfying itself that the conditions as enumerated in Section 45-IA of the RBI Act, 1934 are satisfied.

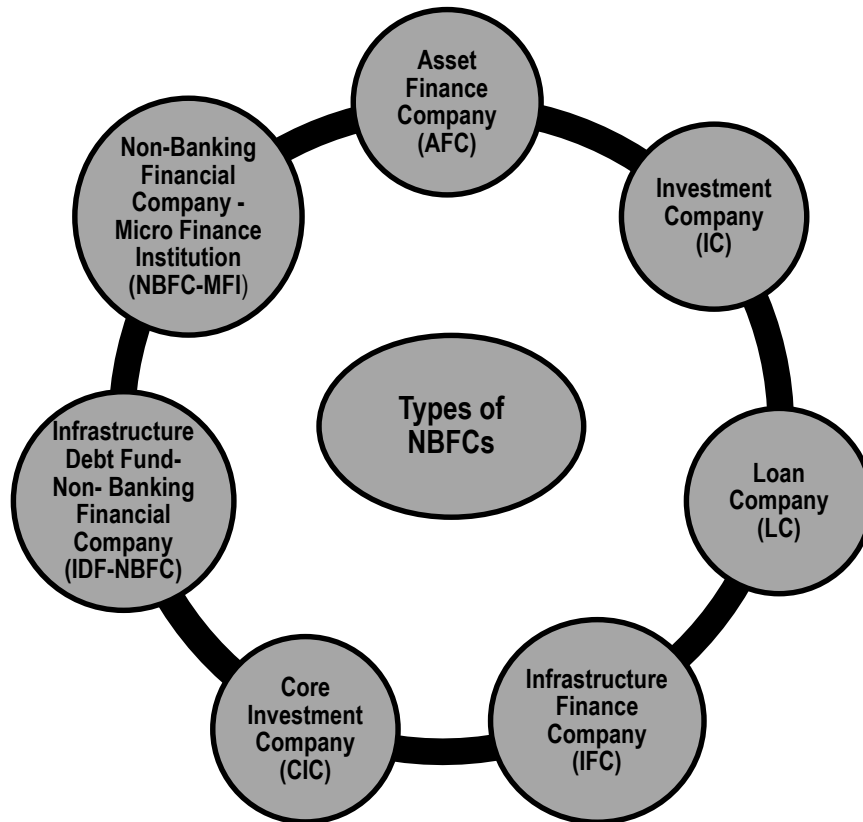

However, to obviate dual regulation, certain categories of NBFCs which are regulated by other regulators are exempted from the requirement of registration with RBI viz. Venture Capital Fund/Merchant Banking companies/Stock broking companies registered with SEBI, Insurance Company holding a valid Certificate of Registration issued by IRDA, Nidhi companies as notified under Section 406 of the Companies Act, 2013, Chit companies as defined in clause (b) of Section 2 of the Chit Funds Act, 1982 or Housing Finance Companies regulated by National Housing Bank.

The Reserve Bank of India has issued directions to non-banking financial companies on acceptance of public deposits, prudential norms like capital adequacy, income recognition, asset classification, provision for bad and doubtful debts, risk exposure norms and other measures to monitor the financial solvency and reporting by NBFCs. Directions were also issued to auditors to report non-compliance with the RBI Act and regulations to the Reserve Bank, Board of Directors and shareholders.

Type of NBFCs- Compliance and Regulatory Perspective

Non-Banking Financial Company - In terms of the Section 45-I(f) read with Section 45-I (c) of the RBI Act, 1934, as amended in 1997, NBFC is one whose principal business is that of receiving deposits or that of a financial institution, such as lending, investment in securities, hire purchase finance or equipment leasing. Consequent upon to RBI Circular December 6, 2006, companies financing real/physical assets for productive/ economic activity will be classified as Asset Finance Company (AFC) as per the specified criteria. The remaining companies would be continued to be classified as loan/investment companies/Infrastructure Finance Company. In the proposed structure the following categories of NBFCs will emerge:

Currently, NBFCs registered with RBI are being classified as:

[Note: Student may refer detailed description of types of NBFCs, given in CA. Final Paper 1: Financial Reporting Study Material.]

14.2 Audit Procedure

The following are the necessary steps involved -

(1) **Ascertaining the Business of the company** - The first step in carrying out the audit of a NBFC is to scan through the Memorandum and Articles of Association of the company, so as to acquaint oneself with the type of business that the company proposes to engage itself in. Normally, the Memorandum of Association of any company would be very wide in scope thereby permitting it to undertake a host of business activities, but companies generally tend to specialise in and focus on a few select activities. An auditor should therefore make a careful study of the business policy of the company so as to ascertain its principal business activities. For this purpose, an auditor may also scan through the minutes of the Board/Committee Meetings and hold discussions with the top level management to ascertain the corporate business plan/strategy which would give him a clear picture as to the principal objects of the company. An auditor should then independently corroborate his findings with the actual business done by the company, as reflected by the company's financial results.

14.5 Advanced Auditing and Professional Ethics

The task of ascertaining the principal business activity of any NBFC is of paramount importance (More so with the recent amendments made to the RBI Act) since the very classification of a company as a NBFC and its further classification into a loan company or an investment company or an equipment leasing/hire purchase finance company would all depend upon its principal business activity. Based on the classification of a company into a loan Company/Investment company etc., it will be accordingly required to comply with the provisions relating to limits on acceptance of public deposits as contained in the NBFC Public Deposit Directions.

(2) Evaluation of Internal Control System - The responsibility of maintaining an adequate accounting system incorporating various internal controls to the extent appropriate to the size and nature of its business vests with the management. A sound internal control system would enable an organisation to plug loopholes in its workings, particularly in the detection of frauds and would also aid in timely decision making. An auditor should gain an understanding of the accounting system and related internal controls adopted by the NBFC to determine the nature, timing and extent of his audit procedures. An auditor should also ascertain whether the internal controls put in place by the NBFC are adequate and are being effectively followed.

In particular, an auditor should review the effectiveness of the system of recovery prevalent at the NBFC. He should ascertain whether the NBFC has an effective system of periodical review of advances in place which would facilitate effective monitoring and follow up. The absence of a periodical review system could result in non-detection of sticky advances at its very inception which would ultimately result in the NBFC having an alarmingly high level of NPAs.

(3) Registration with the RBI - Section 45-IA inserted by the RBI Act, w.e.f. 9th January, 1997, has made it incumbent on the part of all NBFCs to comply with registration requirements and have minimum net owned funds (NOF) of ₹ 2 Crore (Although the requirement of minimum NOF at present stands at ₹ 200 lakh, the minimum NOF for companies that were already in existence before April 21, 1999 was retained at ₹ 25 lakh. However, for strengthening the financial sector and technology adoption, and in view of the increasing complexities of services offered by NBFCs, it shall be mandatory for all NBFCs to raise minimum NOF to ₹ 1 crore by March, 2016, and to further double it to ₹ 2 crore by 2017) for commencing/carrying on its business. An auditor should obtain a copy of the certificate of registration granted by the RBI or in case the certificate of registration has not been granted, a copy of the application form filed with the RBI for registration. It may particularly be noted that NBFCs incorporated after 9th January, 1997 are not entitled to commence business without first obtaining a registration certificate from the RBI. An auditor should therefore verify whether the dual conditions relating to registration with the RBI and maintenance of minimum net owned funds have been duly complied with by the concerned NBFC. Housing Finance Companies, Merchant Banking Companies, Stock Exchanges, Companies engaged in the business of stock-broking/sub-broking, Venture Capital Fund Companies, Nidhi Companies, Insurance companies and Chit Fund Companies are NBFCs but they have been exempted from the requirement of registration under Section 45-IA of the RBI Act, 1934 subject to certain conditions.

Every NBFC holding public deposits is required to invest a specified percentage (as the RBI may specify from time to time). The RBI has also prescribed a format for reporting to ensure compliance with the requirement of maintenance of liquid assets on a quarterly basis. This quarterly return (duly signed by an officer of the NBFC) is required to be submitted within 30 days from the end of the relevant quarter and with reference to investments held in approved securities during the relevant quarter. The auditor should ascertain whether investment in prescribed liquid assets have been made and whether quarterly returns as mentioned above have been regularly filed with the RBI by the concerned NBFC.

(4) NBFC Public Deposit Directions - The auditors must ascertain whether the company is a loan company or an investment company or a hire purchase finance company or an equipment leasing company as per the classification, if any, assigned to the NBFC by the RBI. In case, the NBFC has not been classified by the RBI, the classification of a company will have to be determined after a careful consideration of various factors such as particulars of earlier registration granted, if any, particulars furnished in the application form for registration, company's Memorandum of Association and its financial results. Thereafter, it must be ascertained whether the company has complied with the following aspects in relation to the activity of mobilisation of public deposits:

- (i) The ceiling on quantum of public deposits has been linked to its credit rating as given by an approved credit rating agency. Obtain a copy of the credit rating assigned to NBFC and check whether the public deposits accepted/held by it are in accordance with the level of credit rating assigned to it.

In the event of a downgrading of credit rating, the auditor should bear in mind that the NBFC will have to reduce its public deposits in accordance with the revised credit rating assigned to it within a specified time frame.

- (ii) Test checks the interest calculations in respect of public deposits mobilised by a NBFC to ascertain that the NBFC has not paid interest in excess as per specification. Likewise, test check the brokerage calculations with the bills and vouchers for reimbursement of out of pocket expenses submitted by a broker to ascertain that the NBFC has not paid brokerage in excess by way of reimbursement of expenses to brokers.
- (iii) Ascertain whether the NBFC has accepted or renewed any public deposit only after a written application form the depositor in the form to be supplied by the company, and shall contain all particulars specified in the Non-Banking Financial Companies and Miscellaneous Non Banking Companies (Advertisement) Rules, 1977. Further ensure whether it contain the specific category of depositor, i.e., whether depositor is a shareholder or a director or a promoter or a member of public.
- (iv) Verify the deposit register maintained by a NBFC and test check the particulars that have been entered therein in respect of each depositor with supporting receipts issued to the depositors. Also check whether the NBFC is regularly paying its deposits on due dates and in the case of a delay/default, the reasons for the delay/default and the actual date of payment.

14.7 Advanced Auditing and Professional Ethics

- (v) Check whether the investments made in approved liquid assets by a NBFC holding public deposits have been lodged in safe custody with a designated scheduled commercial bank as required by the NBFC Public Deposit Directions. Obtain a certificate from the bank to that effect.
- (vi) In the case of NBFCs accepting/holding public deposits ascertain whether audited statement of accounts together with a copy of the auditor's report and director's report thereon have been submitted within prescribed time limit from the date of holding the Annual general meeting.
- (vii) Check whether the NBFC has filed its annual return as specified in the First Schedule before the 30th June with reference to its position as on the 31st March of each year.
- (viii) In the case of NBFCs not accepting/holding public deposits, check whether a board resolution has been passed by the NBFC to the effect that it has neither accepted any public deposits nor would it accept any public deposits during the year.
- (ix) In the case of Group Holding Investment Companies, check whether the NBFC has passed a board resolution to the effect that the company has invested or would invest/hold its investments in share and securities of group companies specifying the names of the companies. In addition to the above, group holding investment companies are required to give a further undertaking that it would not trade in such shares/securities and that it has neither accepted nor would it accept any public deposits during the year.

(5) NBFC Prudential Norms Directions -

- (i) Check compliance with prudential norms encompassing income recognition, income from investments, accounting standards, accounting for investments, asset classification, provisioning for bad and doubtful debts, capital adequacy norms, prohibition on granting of loans by a NBFC against its own shares, prohibition on loans and investments for failure to repay public deposits and norms for concentration of credit/investments.
- (ii) An auditor should ensure that the Board of Directors of every NBFC granting/intending to grant demand/call loans shall frame a policy for the company and shall implement too.
- (iii) An auditor should assess on the basis of examinations conducted by him whether the NBFC has complied with the prudential norms. In particular, he should verify that advances and other credit facilities have been properly classified as standard/sub standard/doubtful/loss and that proper provision has been made in accordance with the Directions.
- (iv) In respect of Non Performing Assets, an auditor should check whether the unrealised income in respect of such assets has not been taken to the Profit & Loss Account on an accrual basis. Income from NPAs should be accounted for on realisation basis only.
- (v) Check whether all accounts which have been classified as NPAs in the previous year also continue to be shown as such in the current year also. If the same is not treated as a NPA in the current year, the auditor should specifically examine such accounts to ascertain whether the account has become regular and the same can be treated as performing as per the Directions.

14.3 Classification of Frauds by NBFC (RBI Circular July, 2015)

In order to have uniformity in reporting, frauds have been classified as under based mainly on the provisions of the Indian Penal Code:

- (a) Misappropriation and criminal breach of trust.
- (b) Fraudulent encashment through forged instruments, manipulation of books of account or through fictitious accounts and conversion of property.
- (c) Unauthorised credit facilities extended for reward or for illegal gratification.
- (d) Negligence and cash shortages.
- (e) Cheating and forgery.
- (f) Irregularities in foreign exchange transactions.
- (g) Any other type of fraud not coming under the specific heads as above.

Cases of 'negligence and cash shortages' and 'irregularities in foreign exchange transactions' referred to in items (d) and (f) above are to be reported as fraud if the intention to cheat/ defraud is suspected/ proved. However, the following cases where fraudulent intention is not suspected/ proved, at the time of detection, will be treated as fraud and reported accordingly:

- (a) cases of cash shortages more than ₹ 10,000/- and
- (b) cases of cash shortages more than ₹ 5000/- if detected by management/ auditor/ inspecting officer and not reported on the occurrence by the persons handling cash.

NBFCs having overseas branches/offices should report all frauds perpetrated at such branches/offices also to the Reserve Bank as per the prescribed format and procedures.

14.4 Audit Check-List

Some special points that may be covered in the audit of NBFCs are given below:

A. Investment Companies

- (i) Physically verify all the shares and securities held by a NBFC. Where any security is lodged with an institution or a bank, a certificate from the bank/institution to that effect must be verified.
- (ii) NBFC Prudential Norms stipulates that NBFCs should not lend more than 15% of its owned funds to any single borrower and not more than 25% to any single group of borrower. The ceiling on investments in shares by a NBFC in a single entity and the aggregate of investments in a single group of entities has been fixed at 15% and 25% respectively. Moreover, a composite limit of credit to and investments in a single entity/group of entities has been fixed at 25% and 40% respectively of the owned fund of the concerned NBFC. Verify that the credit facilities extended and investments made by the concerned NBFC are in accordance with the prescribed ceiling.

14.9 Advanced Auditing and Professional Ethics

- (iii) Verify whether the NBFC has not advanced any loans against the security of its own shares.
- (iv) Verify that dividend income wherever declared by a company, has been duly received by a NBFC and interest wherever due [except in case of NPAs] has been duly accounted for. NBFC Prudential Norms directions require dividend income on shares of companies and units of mutual funds to be recognised on cash basis. However, the NBFC has an option to account for dividend income on accrual basis, if the same has been declared by the body corporate in its Annual General meeting and its right receives the payment has been established. Income from bonds/debentures of corporate bodies is to be accounted on accrual basis only if the interest rate on these instruments is predetermined and interest is serviced regularly and not in arrears.
- (v) Test check bills/contract notes received from brokers with reference to the prices vis-à-vis the stock market quotations on the respective dates.
- (vi) Verify the Board Minutes for purchase and sale of investments. Ascertain from the Board resolution or obtain a management certificate to the effect that the investments so acquired are current investments or Long Term Investments.
- (vii) Check whether the investments have been valued in accordance with the NBFC Prudential Norms Directions and adequate provision for fall in the market value of securities, wherever applicable, have been made there against, as required by the Directions.
- (viii) Obtain a list of subsidiary/group companies from the management and verify the investments made in subsidiary/group companies during the year. Ascertain the basis for arriving at the price paid for the acquisition of such shares.
- (ix) Check whether investments in unquoted debentures/bonds have not been treated as investments but as term loans or other credit facilities for the purposes of income recognition and asset classification.
- (x) An auditor will have to ascertain whether the requirements of AS 13 "Accounting for Investments" (to the extent they are not inconsistent with the Directions) have been duly complied with by the NBFC.
- (xi) In respect of shares/securities held through a depository, obtain a confirmation from the depository regarding the shares/securities held by it on behalf of the NBFC.
- (xii) In the case of securities lent/borrowed under the Securities Lending Scheme of SEBI, verify the agreement entered into with the approved intermediary (i.e. the person through whom the lender will deposit and the borrower will borrow the securities for lending/borrowing) with regards to the period of depositing/lending securities, fees for depositing/lending, collateral securities and provision for the return including pre-mature return of the securities deposited/lent.
- (xiii) Verify that securities of the same type or class are received back by the lender/paid by the borrower at the end of the specified period together with all corporate benefits thereof (i.e. dividends, rights, bonus, interest or any other rights or benefit accruing thereon).

- (xiv) Verify charges received or paid in respect of securities lend/borrowed.
- (xv) Obtain a confirmation from the approved intermediary regarding securities deposited with/borrowed from it as at the year end.

B. Loan Company

- (i) An auditor should examine whether each loan or advance has been properly sanctioned. He should verify the conditions attached to the sanction of each loan or advance i.e. limit on borrowings, nature of security, interest, terms of repayment, etc.
- (ii) An auditor should verify the security obtained and the agreements entered into, if any, with the concerned parties in respect of the advances given. He must ascertain the nature and value of security and the net worth of the borrower/guarantor to determine the extent to which an advance could be considered realisable.
- (iii) Obtain balance confirmations from the concerned parties.
- (iv) As regards bill discounting, verify that proper records/documents have been maintained for every bill discounted/rediscounted by the NBFC. Test check some transactions with reference to the documents maintained and ascertain whether the discounting charges, wherever, due, have been duly accounted for by the NBFC.
- (v) Check whether the NBFC has not lent/invested in excess of the specified limits to any single borrower or group of borrowers as per NBFC Prudential Norms Directions.
- (vi) Check whether the NBFC has not advanced any loans against the security of its own shares.
- (vii) In case of companies which are engaged in the business of providing short term funds in the ICD market, the auditor should ascertain whether the NBFC has a regular system for ascertaining the credit worthiness of the clients prior to placed by the company are being rolled over and whether there is any risk of non-recovery. In addition, he should ascertain that the NBFC is receiving interest regularly in respect of these ICDs. Roll over of ICDs and non-realisation of interest and principal amounts should be thoroughly checked to determine whether the ICD is required to be treated as a NPA.
- (viii) An auditor should verify whether the NBFC has an adequate system of proper appraisal and follow up of loans and advances. In addition, he may analyse the trend of its recovery performance to ascertain that the NBFC does not have an unduly high level of NPAs.
- (ix) Check the classification of loans and advances (including bills purchased and discounted) made by a NBFC into Standard Assets, Sub-Standard Assets, doubtful assets and loss assets and the adequacy of provision for bad and doubtful debts as required by NBFC Prudential Norms Directions.
- (x) An auditor should also verify whether provision for bad and doubtful debts has been disclosed separately in the Balance Sheet and the same have not been netted off against the income or against the value of assets as required by the NBFC Prudential Norms Directions.

C. Asset Finance Company

1. Hire Purchase Finance Company

- (i) Ascertain whether the NBFC has an adequate appraisal system for extending hire purchase finance. The system of appraisal is basically concerned with obtaining information regarding the credit worthiness of the hirer, his experience in the field, assets owned, his past track record and future projections of his income.
- (ii) Verify that the payment for acquiring an asset should be made directly to the supplier/dealer and that the original invoice has been drawn out in the name of the NBFC.
- (iii) In the case of high value hire purchase items relating to machinery/equipment, an auditor should ascertain whether the valuation reports and installation reports are called for. In case of some high value items, he should also physically verify the asset in possession of the hirers, particularly in a situation where he has any doubts as regards the genuineness of the transaction.
- (iv) If the hire purchase finance is against vehicles, check whether the registration certificate contains an endorsement in favour of the hire purchase company.
- (v) The auditor should verify whether the NBFC has a system in place for verifying the hire purchase assets periodically to ensure that the hirers have not sold the assets or otherwise encumbered them.
- (vi) Check whether hire purchase instalments are being received regularly as and when they fall due. Check whether adequate provision has been made for overdue hire purchase instalments as required by the NBFC Prudential Norms directions.
- (vii) Examine the method of accounting followed by the hire purchase finance company for appropriation of finance charges over the period of the hire purchase contract. Ascertain that there is no change in the method of accounting as compared to the immediately preceding previous year.
- (viii) Verify that the assets given on hire purchase have been adequately insured against.
- (ix) In case the goods are repossessed by the hire purchase finance company on account of non-repayment of hire purchase instalments, verify that the repossessed goods have been valued on a realistic basis by the hire purchase finance company.

2. Equipment Leasing Finance Company

- (i) Ascertain whether the NBFC has an adequate appraisal system for extending equipment leasing finance.
- (ii) The auditor should verify whether there is an adequate system in place for ensuring installation of assets and their periodical physical verification. In respect of some major transactions, an auditor should arrange for physical verification of the leased assets so as to dispel any doubts that equipment leasing finance was not extended without the corresponding assets being created.

- (iii) Ascertain whether the NBFC has an adequate system for monitoring whether the assets have been adequately insured against and regular maintenance of the leased assets is being carried out by the lessee.
- (iv) Verify the lease agreement entered into with the lessee in respect of the equipment given on lease.
- (v) An auditor should verify whether the AS issued by the Institute of Chartered Accountants of India in respect of "Accounting for Lease" has been compulsorily followed.

14.5 Auditor's Duty

The following are the important duties of an auditor -

14.5.1 Compliance with NBFC Auditors Report RBI Directions - The recent RBI regulations have considerably increased the responsibility of auditors of NBFCs. A very onerous task of reporting to the Board of Directors on certain specified matters and to the RBI on an exception basis has been imposed upon him. This reporting requirement is in addition to the normal reporting requirements to the shareholders under section 143 of the Companies Act, 2013. Auditors will thus have to be very careful whilst carrying out audits of NBFCs to ensure that all matters which they are required to take into consideration for the purposes of reporting to the RBI have been taken due care of.

Section 45MA of the Reserve Bank of India Act has been introduced with effect from 13.12.1974. Under this provision the auditor of a non-banking financial company or a non-banking miscellaneous company which has accepted public deposits, has to inquire whether or not the company has furnished to the Reserve Bank of India statements, information of particulars relating to the deposits as are required to be furnished under Chapter IIIB of the Reserve Bank of India Act. The provision further states that if on inquiry the auditor is not satisfied about the compliance by the company, it is his duty to make to the Reserve Bank giving the aggregate amount of deposits held by the company. The auditor is also required to incorporate the report or intended to be made to the Reserve Bank in his report to the company under Section 143 of the Companies Act, 2013. Report to Board of Directors under RBI Directions as per Notification No. DNBS.201 /DG(VL)-2008 dated September 18, 2008, in exercise of the powers conferred by sub-section (1A) of Section 45MA of the Reserve Bank of India Act, 1934 (Act 2 of 1934) and of all the powers enabling it in this behalf, and in supersession of the Non-Banking Financial Companies Auditor's Report (Reserve Bank) Directions, 1998, issues to every auditor of every non-banking financial company, the Directions hereinafter specified.

1. Short title, application and commencement of the Directions

- (i) These Directions shall be known as "Non-Banking Financial Companies Auditor's Report (Reserve Bank) Directions, 2008."

14.13 Advanced Auditing and Professional Ethics

(ii) These Directions shall apply to every auditor of a non-banking financial company as defined in Section 45 I(f) of the Reserve Bank of India Act, 1934 (2 of 1934) hereinafter referred to as non-banking financial company.

(iii) These Directions shall come into force with immediate effect.

2. Auditors to submit additional Report to the Board of Directors: In addition to the Report made by the auditor under Section 227 of the Companies Act, 1956 (1 of 1956) [now Section 143 of the Companies Act, 2013] on the accounts of a non-banking financial company examined for every financial year ending on any day on or after the commencement of these Directions, the auditor shall also make a separate report to the Board of Directors of the Company on the matters specified in paragraphs 3 and 4 below.

3. Matters to be included in the auditor's report: The auditor's report on the accounts of a non-banking financial company shall include a statement on the following matters, namely:

(A) In the case of all non-banking financial companies

- I. Whether the company is engaged in the business of non-banking financial institution and whether it has obtained a Certificate of Registration (CoR) from the Bank.
- II. In the case of a company holding CoR issued by the Bank, whether that company is entitled to continue to hold such CoR in terms of its asset/income pattern as on March 31 of the applicable year.

(B) In the case of a non-banking financial company accepting/holding public deposits: Apart from the matters enumerated in (A) above, the auditor shall include a statement on the following matters, namely:-

- (i) Whether the public deposits accepted by the company together with other borrowings indicated below viz;
 - (a) from public by issue of unsecured non-convertible debentures/bonds;
 - (b) from its shareholders (if it is a public limited company); and
 - (c) which are not excluded from the definition of 'public deposit' in the Non-Banking Financial Companies Acceptance of Public Deposits (Reserve Bank) Directions, 1998 are within the limits admissible to the company as per the provisions of the Non-Banking Financial Companies Acceptance of Public Deposits (Reserve Bank) Directions, 1998;
- (ii) Whether the public deposits held by the company in excess of the quantum of such deposits permissible to it under the provisions of Non-Banking Financial Companies Acceptance of Public Deposits (Reserve Bank) Directions, 1998 are regularised in the manner provided in the said Directions;
- (iii) Whether an Asset Finance Company having Capital to Risk Assets Ratio (CRAR) less than 15% or an Investment Company or a Loan Company as defined in paragraph 2(1)(ia), (vi) and (viii) respectively of Non-Banking Financial Companies Acceptance of

Public Deposits (Reserve Bank) Directions, 1998 is accepting "public deposit" without minimum investment grade credit rating from an approved credit rating agency;

- (iv) In respect of NBFCs referred to in clause (iii) above,
 - (a) whether the credit rating, for each of the fixed deposits schemes that has been assigned by one of the Credit Rating Agencies listed in Non-Banking Financial Companies Acceptance of Public Deposits (Reserve Bank) Directions, 1998 is in force; and
 - (b) whether the aggregate amount of deposits outstanding as at any point during the year has exceeded the limit specified by the such Credit Rating Agency;
- (v) In case of NBFCs having Net Owned Funds of ₹ 25 lakh and above but less than ₹ 200 lakhs, whether the public deposit held by the companies is in excess of the quantum of such deposit permissible to it in terms of Notification No. DNBS. 199/CGM (PK) - 2008 dated June 17, 2008 and whether such company:
 - (a) has frozen its level of deposits as on the date of that Notification; or
 - (b) has brought down its level of deposits to the level of revised ceiling of deposits in terms of that Notification.
- (vi) Whether the company has defaulted in paying to its depositors the interest and /or principal amount of the deposits after such interest and/or principal became due;
- (vii) Whether the company has complied with the prudential norms on income recognition, accounting standards, asset classification, provisioning for bad and doubtful debts, and concentration of credit/investments as specified in the Directions issued by the Reserve Bank of India in terms of the Non-Banking Financial (Deposit Accepting or Holding) Companies Prudential Norms (Reserve Bank) Directions, 2007.
- (viii) Whether the capital adequacy ratio as disclosed in the return submitted to the Bank in terms of the Non-Banking Financial (Deposit Accepting or Holding) Companies Prudential Norms (Reserve Bank) Directions, 2007 has been correctly determined and whether such ratio is in compliance with the minimum CRAR prescribed therein;
- (ix) Whether the company has complied with the liquid assets requirement as prescribed by the Bank in exercise of powers under section 45-IB of the RBI Act and whether the details of the designated bank in which the approved securities are held is communicated to the office concerned of the Bank in terms of Notification No.DNBS.172/CGM(OPA)-2003 Dated July 31, 2003;
- (x) Whether the company has furnished to the Bank within the stipulated period the return on deposits as specified in the NBS 1 to the Non-Banking Financial Companies Acceptance of Public Deposits (Reserve Bank) Directions, 1998;
- (xi) Whether the company has furnished to the Bank within the stipulated period the half-yearly return on prudential norms as specified in the Non-Banking Financial (Deposit Accepting or Holding) Companies Prudential Norms (Reserve Bank) Directions, 2007;

14.15 Advanced Auditing and Professional Ethics

(xii) Whether, in the case of opening of new branches or offices to collect deposits or in the case of closure of existing branches/offices or in the case of appointment of agent, the company has complied with the requirements contained in the Non-Banking Financial Companies Acceptance of Public Deposits (Reserve Bank) Directions, 1998.

(C) In the case of a non-banking financial company not accepting public deposits:

Apart from the aspects enumerated in (A) above, the auditor shall include a statement on the following matters, namely: -

- (i) Whether the Board of Directors has passed a resolution for non- acceptance of any public deposits;
- (ii) Whether the company has accepted any public deposits during the relevant period/year;
- (iii) Whether the company has complied with the prudential norms relating to income recognition, accounting standards, asset classification and provisioning for bad and doubtful debts as applicable to it in terms of Non-Banking Financial (Non- Deposit Accepting or Holding) Companies Prudential Norms (Reserve Bank) Directions, 2007.
- (iv) In respect of Systemically Important Non-deposit taking NBFCs as defined in paragraph 2(1)(xix) of the Non-Banking Financial (Non- Deposit Accepting or Holding) Companies Prudential Norms (Reserve Bank) Directions, 2007
 - (a) whether the capital adequacy ratio as disclosed in the return submitted to the Bank in form NBS- 7, has been correctly arrived at and whether such ratio is in compliance with the minimum CRAR prescribed by the Bank;
 - (b) whether the company has furnished to the Bank the annual statement of capital funds, risk assets/exposures and risk asset ratio (NBS-7) within the stipulated period.

(D) In the case of a company engaged in the business of non-banking financial institution not required to hold CoR subject to certain conditions: Apart from the matters enumerated in (A)(i) above, the auditor shall include a statement on the following matters, namely:

Where a Company has obtained a specific advice from the Bank that it is not required to hold CoR from the Bank whether the company is complying with the conditions stipulated as advised by the Bank.

4. Reasons to be stated for unfavourable or qualified statements: Where, in the auditor's report, the statement regarding any of the items referred to in paragraph 3 above is unfavourable or qualified, the auditor's report shall also state the reasons for such unfavourable or qualified statement, as the case may be. Where the auditor is unable to express any opinion on any of the items referred to in paragraph 3 above, his report shall indicate such fact together with reasons therefore.

5. Obligation of auditor to submit an exception report to the Bank

(I) Where, in the case of a non-banking financial company, the statement regarding any of the items referred to in paragraph 3 above, is unfavourable or qualified, or in the opinion of the auditor the company has not complied with:

- (a) the provisions of Chapter III B of Reserve Bank of India Act, 1934 (Act 2 of 1934); or
- (b) the Non-Banking Financial Companies Acceptance of Public Deposits (Reserve Bank) Directions, 1998; or
- (c) Non-Banking Financial (Deposit Accepting or Holding) Companies Prudential Norms (Reserve Bank) Directions, 2007; or
- (d) Non-Banking Financial (Non- Deposit Accepting or Holding) Companies Prudential Norms (Reserve Bank) Directions, 2007;

it shall be the obligation of the auditor to make a report containing the details of such unfavourable or qualified statements and/or about the non-compliance, as the case may be, in respect of the company to the concerned Regional Office of the Department of Non-Banking Supervision of the Bank under whose jurisdiction the registered office of the company is located as per Second Schedule to the Non-Banking Financial Companies Acceptance of Public Deposits (Reserve Bank) Directions, 1998.

(II) The duty of the Auditor under sub-paragraph (I) shall be to report only the contraventions of the provisions of RBI Act, 1934, and Directions, Guidelines, instructions referred to in sub-paragraph (1) and such report shall not contain any statement with respect to compliance of any of those provisions.

14.5.2 Compliance with CARO 2016: As per CARO 2016 the auditor is required to report that “Whether the company is required to be registered under section 45-IA of the Reserve Bank of India Act, 1934 and if so, whether the registration has been obtained. [Paragraph 3(xvi)]”

1. Relevant Provisions:

- (a) The auditor is required to examine whether the company is engaged in the business which attract the requirements of the registration. The registration is required where the financing activity is a principal business of the company.**
- (b) The Reserve Bank of India restrict companies from carrying on the business of a non-banking financial institution without obtaining the certificate of registration. The relevant Text of the Section 45-IA is reproduced in Appendix XI to this Guidance Note.**
- (c) A Non-Banking Financial Company (NBFC) is a company registered under the Act, engaged in the business of loans and advances, acquisition of shares/stocks/bonds/debentures/securities issued by Government or local authority or other marketable securities of a like nature, leasing, hire-purchase, insurance business, chit business but does not include any**

institution whose principal business is that of agriculture activity, industrial activity, purchase or sale of any goods (other than securities) or providing any services and sale/purchase/construction of immovable property.

A non-banking institution which is a company and has principal business of receiving deposits under any scheme or arrangement in one lump sum or in installments by way of contributions or in any other manner, is also a non-banking financial company (Residuary non-banking company).

As per response to an FAQ as given by Reserve Bank of India, "Financial activity as principal business is when a company's financial assets constitute more than 50 per cent of the total assets and income from financial assets constitute more than 50 per cent of the gross income. A company which fulfils both these criteria will be registered as NBFC by RBI. The term 'principal business' is not defined by the Reserve Bank of India Act. The Reserve Bank has defined it so as to ensure that only companies predominantly engaged in financial activity get registered with it and are regulated and supervised by it. Hence if there are companies engaged in agricultural operations, industrial activity, purchase and sale of goods, providing services or purchase, sale or construction of immovable property as their principal business and are doing some financial business in a small way, they will not be regulated by the Reserve Bank. Interestingly, this test is popularly known as 50-50 test and is applied to determine whether or not a company is into financial business."

- (d) *NBFCs are doing functions similar to banks, however there exist difference between banks & NBFCs. NBFCs lend and make investments and hence their activities are akin to that of banks; however there are a few differences as given below:*
- (i) *NBFC cannot accept demand deposits;*
 - (ii) *NBFCs do not form part of the payment and settlement system and cannot issue cheques drawn on itself;*
 - (iii) *deposit insurance facility of Deposit Insurance and Credit Guarantee Corporation is not available to depositors of NBFCs, unlike in case of banks.*

As per Reserve Bank of India Act, 1934 Section 45I Clause (c) any company carries on as its business or part of its business any activity considered as carrying on the business of Financial Institution.

(The relevant text of the Section 45I(c) is reproduced in Appendix III to this Guidance Note.)

The Reserve Bank of India defined "net owned fund" as (a) the aggregate of the paid-up equity capital and free reserves as disclosed in the latest balance-sheet of the company after deducting there from (i) accumulated balance of loss; (ii)

deferred revenue expenditure; and (iii) other intangible assets; and (b) further reduced by the amounts representing– (1) investments of such company in shares of– (i) its subsidiaries; (ii) companies in the same group; (iii) all other non-banking financial companies; and (2) the book value of debentures, bonds, outstanding loans and advances (including hire-purchase and lease finance) made to, and deposits with,– (i) subsidiaries of such company; and (ii) companies in the same group, to the extent such amount exceeds ten per cent of (a) above. (“Subsidiaries” and “companies in the same group” shall have the same meanings assigned to them in the Companies Act, 1956.)

2. Audit Procedures and Reporting

- (a) The auditor should examine the transactions of the company with relation to the activities covered under the RBI Act and directions related to the Non-Banking Financial Companies.**
- (b) The financial statements should be examined to ascertain whether company’s financial assets constitute more than 50 per cent of the total assets and income from financial assets constitute more than 50 per cent of the gross income.**
- (c) Whether the company has net owned funds as required for the registration as NBFC.**
- (d) Whether the company has obtained the registration as NBFC, if not, the reasons should be sought from the management and documented.**
- (e) The auditor should report incorporating the following:-**
 - (i) Whether the registration is required under section 45-IA of the RBI Act, 1934.**
 - (ii) If so, whether it has obtained the registration.**
 - (iii) If the registration not obtained, reasons thereof.**

(Note: Students are required to refer Guidance Note on CARO, 2016 for more details).

Audit under Fiscal Laws

15.1 Introduction

For ensuring compliance sometimes audit becomes a necessity. Therefore, various statutes, including legislations governing direct and indirect tax provisions have incorporated audit provisions in some or the other form. Under direct taxes, the Central Board of Direct taxes has posed onerous responsibility on the auditor via Income-tax Act, 1961 which has various provisions requiring compulsory audit. However, with the growing importance of the indirect taxes in the economy, the Government is realizing the need of audit by independent bodies especially equipped to do the same. Introduction of audit provisions in the newly introduced Value Added Tax (VAT) legislations is a step towards this direction. Various state Governments have incorporated compulsory audit provisions in their respective State VAT legislations. Various provisions relating tax audit are discussed in this Chapter.

15.2 Audit(s) under the Income-Tax Act, 1961

The Income-tax Act, 1961 (hereinafter referred to as the Act) contains several provisions for audit of accounts of public charitable trusts, non-corporate assesses and other assesses to meet the specific objectives of the Act. Under the Act, several sections such as 12A, 35D, 35E, 44AB, 80IA, 80-IAB, 80-IB, 80-IC, 80-ID, 80-IE, 142(2A), etc., require audit of accounts for tax purposes. We shall discuss the requirements of some of these provisions from the audit angle.

Who can audit the Accounts under the Income-tax Act -Normally, in all the sections referred to above, subject to the exceptions specifically provided, the audit is to be conducted by an 'accountant', as defined in the Explanation below Section 288(2) of the Act. For the purpose of meaning of 'Accountant' as explained under section 288(2), students may refer Para 15.3.1.

15.2.1 Audit of Public Trusts: Section 12A of the Act deals with the conditions as to registration of trust etc. According to this section, exemption from Income tax would be available under sections 11 and 12 of the Income tax Act in relation to the income of any trust or institution provided the following conditions are satisfied:

- (A) Clause (a) of section 12A requires a charitable or religious trust or institution to make an application for registration within one year from the date of creation of the trust or establishment of the institution. The Commissioner is empowered to condone the delay in making the application for registration if he is satisfied that there were sufficient reasons for such delay. In such cases, the exemption provisions of section 11 and 12 would apply from the date of creation of the trust or establishment of the institution.

This requirement of filing an application for registration under section 12A within one year of creation of the religious or charitable trust or institution has been removed. The application can be filed at any time now. This has been provided by insertion of new clause (aa) in section 12A(1). Further, a proviso has been inserted in clause (a) to restrict the applicability of that clause to applications made prior to 1.6.2007.

Also, the power of the Commissioner to grant registration for past years, by condoning the delay in filing such application, has been removed.

Accordingly, in respect of applications filed on or after 1st June, 2007, the provisions of sections 11 and 12 shall apply from the assessment year relevant to the financial year in which the application is made i.e. the exemption would be available only with effect from the assessment year relevant to the previous year in which the application is filed. It would not be available in respect of any earlier assessment year.

- (B) Where the total income of the trust or institution as computed under this Act, without giving effect to the provisions of Sections 11 and 12 exceeds the maximum amount which is not chargeable to income tax in any previous year i.e. ₹ 2,50,000 for the A.Y. 2016-17, the accounts of the trust or institution for that year have been audited by an accountant as defined in the explanation below sub-section (2) of Section 288 and the person in receipt of the income furnishes along with the return of Income for the relevant assessment year, the report of such audit in the prescribed form duly signed and verified by such accountant and setting forth such particulars as may be prescribed. Rule 17B of the Income tax Rules, 1962 provides that the report of audit of accounts of a trust or institution which is required to be furnished under Clause (b) of Section 12A should be in Form No. 10B. The audit programme is outlined in the following paragraphs:

(a) Preliminary:

- (i) Obtain a resolution from the trust specifying the appointment as also indicating the scope of audit. In particular, the resolution should specify the duties of the auditor in relation to the items specified in the annexure to the prescribed Form No. 10B.
- (ii) Obtain a letter of appointment from the trust. Although the audit may have been conducted in the past by a person appointed as an auditor for the purpose of Section 12A, having regard to the spirit of the requirement contained in clause (8) of Part-I of Schedule I to the Chartered Accountants Act, 1949, it is suggested that the auditor appointed for the purpose of Section 12A, should, before accepting the audit, communicate with such previous auditor.
- (iii) Obtain a certificate as to the opening balances of assets and liabilities and the fund.
- (iv) Obtain a list of books of accounts which are maintained by the trust.
- (v) Obtain a certificate from the trust as to the system of accounting and internal control.
- (vi) Obtain from the trust a list of the institutions/ activities run/carried out by the

15.3 Advanced Auditing and Professional Ethics

trust.

- (vii) Obtain from the trust a certified true copy of the Deed of Trust or any other scheme containing the objects and conditions of the trust as operative from time to time.
- (b) Routine Checking:
- (i) Check the books of account and other records having regard to the system of accounting and internal control.
 - (ii) Vouch the transactions of the trust to satisfy that:
 - (a) the transaction falls within the ambit of the trust;
 - (b) the transaction is properly authorised by the trustees or other delegated authority as may be permissible in law;
 - (c) all incomes due to the trust have been properly accounted for on the basis of the system of accounting followed by the trust;
 - (d) all expenses and outgoings appertaining to the trust have been recorded on the basis of the system of accounting followed by the trust; and
 - (e) amounts shown as applied towards the object of the trust are covered by the objects of the trust as specified in the document governing the trust.
 - (iii) Obtain a trial balance on the closing date certified by the trustees.
 - (iv) Obtain the Balance Sheet and Profit & Loss Account of the trust authenticated by the trustees and check the same with the trial balance with which they should agree.
- (c) Accounting Principles: The auditor should follow, i.e., generally accepted accounting principles and ascertain the accuracy, truth and fairness of the Balance Sheet and Profit & Loss Account.
- In particular, the auditor will scrutinise that:
- (i) all assets of the trust are verified;
 - (ii) the assets of the trust have been properly valued and depreciation duly provided for;
 - (iii) all liabilities of the trust are properly accounted for;
 - (iv) the investments of the trust are properly classified and indicated and market values shown; and
 - (v) outstanding due to the trust are properly accounted for and their recoverability examined and provision made for irrecoverable.
- (d) Annexure to the Audit Report:
- (i) Obtain from the trustees, a certified list of persons covered by Section 13(3).
 - (ii) Obtain from the trustees, a statement enlisting the various items specified in

the Annexure to Form No. 10B and giving the information against each item together with explanatory or supporting schedules.

- (iii) Verify the information supplied by the trustees in the statements specified above in the light of available material. Where a list of persons specified in Section 13(3) is not available, indicate against Sections II and III of the items specified in the annexure the appropriate qualifying remarks.

The audit report is required to be furnished to the relevant year. Failure to furnish the report will disentitle the trust or institution to the benefit of Sections 11 and 12. The Auditor can accept as correct the list of persons covered by Section 13(3) as given by the managing trustees.

15.2.2 Audit of accounts in connection with the claim for deduction under Sections 35D and 35E: The conditions under which certain specified preliminary expenditure incurred before the commencement of business and once the business is commenced on expanding an industrial undertaking or in connection with setting up a new industrial unit can be amortised are stated in Section 35D of the Act. The manner in which deductions are allowed in respect of expenditure on any prospecting operations relating to certain specified minerals listed in the Seventh Schedule to the Act are stated in Section 35E of the Act. In respect of assessee other than a company or a co-operative society, these deductions are admissible only if the accounts for, the year or years in which the above specified expenditure is incurred are audited by an “accountant” as defined in explanation below sub-section (2) of section 288 of the Income-tax Act, 1961 and the report of such audit is furnished by the assessee along with the return of income. Rule 6AB of the Income-tax Rules 1962 provides that the report of audit required to be furnished by the above-mentioned assessee under section 35D and 35E should be in Form No.3AE. While doing the audit, the auditor is expected to follow general principles of auditing as mentioned in Standards on Auditing.

15.3 Tax Audit under Section 44AB

Section 44AB provides for the compulsory audit of accounts of certain persons carrying on business or profession. Section 44AB reads as under:

“Audit of accounts of certain persons carrying on business or profession”.

Every person -

- (a) carrying on business shall, if his total sales, turnover or gross receipts, as the case may be, in business exceed or exceeds one crore rupees in any previous year.
- (b) carrying on profession shall, if his gross receipts, in profession exceed twenty five lakhs rupees in any previous year,
- (c) carrying on the business shall, if the profits and gains from the business are deemed to be the profits and gains of such person under section 44AE or section 44BB or section 44BBB as the case may be, and he has claimed his income to be lower than the profits or gains so deemed to be the profits and gains of his business, as the case may be, in any previous year,

15.5 Advanced Auditing and Professional Ethics

- (d) carrying on the business shall, if the profits and gains from the business are deemed to be the profits and gains of such person under section 44AD, and he has claimed such income to be lower than the profits and gains so deemed to be the profits and gains of his business and his income exceeds the maximum amount which is not chargeable to income-tax in any previous year,

get his accounts of such previous year audited by an accountant before the specified date and furnish by that date the report of such audit in the prescribed form duly signed and verified by such accountant and setting forth such particulars as may be prescribed.

Provided that this section shall not apply to the person, who derives income of the nature referred to in section 44B or section 44BBA on and from the 1st day of April, 1985 or, as the case may be, the date on which the relevant section came into force, whichever is later.

Provided further that in a case where such person is required by or under any other law to get his accounts audited, it shall be sufficient compliance with the provisions of this section if such person gets the accounts of such business or profession audited under such law before the specified date and furnishes by that date the report of the audit as required under such other law and a further report by an accountant in the form prescribed under this section.

Explanation: For the purposes of this section,

- (i) "accountant" shall have the same meaning as in the explanation below sub-section (2) of Section 288;
- (ii) "specified date", in relation to the accounts of the assessee of the previous year relevant to an assessment year, means the due date for furnishing the return of income under sub-section (1) of section 139.

The above section stipulates that every person carrying on business is required to get his accounts audited before the "specified date" by a chartered accountant, if the total sales turnover or gross receipts in the business in any previous year exceed ₹ 1 crore. A person carrying on a profession will also have to get his accounts audited before the "specified date" by a chartered accountant if his gross receipts in profession in any previous year exceed ₹ 25 lakhs w.e.f. A.Y. 2013-14.

Clause (c) of Section 44AB, provides that in the case of an assessee carrying on a business of the nature specified in sections 44AE, 44BB or 44BBB, tax audit will be required if he claims his income to be lower than the presumptive income deemed under those sections. Therefore, such assessee will be required to have a tax audit even if their sales, turnover or gross receipts do not exceed ₹ 100 lakhs (one crore rupees).

If a person is carrying on business(es), coming within the scope of sections 44AE, 44BB or 44BBB but he exercises his option given under these sections to get his accounts audited under Section 44AB, tax audit requirements would apply, in respect of such business(es) even if the turnover of such business(es) does not exceed ₹ 100 lakhs (one crore rupees).

In the case of a person carrying on businesses covered by sections 44AE, 44BB or 44BBB and opting for presumptive taxation, tax audit requirement would not apply in respect of such businesses, if such person is carrying on other business(es) not covered by presumptive

taxation, tax audit requirements would apply in respect thereof if the turnover of such business(es), other than the business covered by presumptive taxation thereof, exceed ₹ 100 lakhs (one crore rupees).

The first proviso to section 44AB stipulates that the provisions of that section will not be applicable to a person who derives income of the nature referred to in sections 44B, or 44BBA. Where the assessee is carrying on any one or more of the businesses specified in section 44B or 44BBA referred to in the first proviso to section 44AB, the sales/turnover/gross receipts from such businesses shall not be included in the total sales/turnover/gross receipts for determining the applicability of section 44AB.

The report of such audit, duly signed and verified by the chartered accountant is required to be given in such form and setting forth such particulars as prescribed by the Board. Rule 6G provides that such audit report and particulars should be given in Form No. 3CA/3CB as may be applicable and the statement of particulars should be given in Form No.3CD.

A question may arise in the case of an assessee who is eligible to claim deductions under sections 80-IA, 80-IB, 80-IC etc., as to whether, it will be necessary for him to get separate audit reports/certificates under these sections in addition to an audit report under Section 44AB. The requirement of section 44AB is a general requirement covering the overall position of the accounts of the assessee. This applies to the consolidated accounts of the assessee for the relevant previous year covering the results of all the units owned by the assessee whether situated at one place or at different places. If turnover of all the units put together exceeds prescribed limits, the assessee would be required to get a separate audit report/certificate under above said sections he wants to avail deduction under the respective sections. Therefore it will be necessary for an assessee to get separate audit reports/certificates under above said sections in addition to an audit report, if any, required under section 44AB.

15.3.1 Tax Auditor: The term “accountant” has been defined in sub-clause (i) of Explanation to Section 44AB as under:

“accountant” shall have the same meaning as in the Explanation below sub-section (2) of Section 288”.

1. The above-mentioned explanation read as under-

"Accountant" means a chartered accountant as defined in clause (b) of sub-section (1) of section 2 of the Chartered Accountants Act, 1949 who holds a valid certificate of practice under sub-section (1) of section 6 of that Act, but does not include [except for the purposes of representing the assessee under sub-section (1)]—

- (a) in case of an assessee, being a company, the person who is not eligible for appointment as an auditor of the said company in accordance with the provisions of sub-section (3) of section 141 of the Companies Act, 2013 (18 of 2013); or
- (b) in any other case,—
 - (i) the assessee himself or in case of the assessee, being a firm or association of persons or Hindu undivided family, any partner of the firm, or member of the association or the family;

15.7 Advanced Auditing and Professional Ethics

- (ii) in case of the assessee, being a trust or institution, any person referred to in clauses (a), (b), (c) and (cc) of sub-section (3) of section 13;
 - (iii) in case of any person other than persons referred to in sub-clauses (i) and (ii), the person who is competent to verify the return under section 139 in accordance with the provisions of section 140;
 - (iv) any relative of any of the persons referred to in sub-clauses (i), (ii) and (iii);
 - (v) an officer or employee of the assessee;
 - (vi) an individual who is a partner, or who is in the employment, of an officer or employee of the assessee;
 - (vii) an individual who, or his relative or partner—
 - (I) is holding any security of, or interest in, the assessee:
Provided that the relative may hold security or interest in the assessee of the face value not exceeding one hundred thousand rupees;
 - (II) is indebted to the assessee:
Provided that the relative may be indebted to the assessee for an amount not exceeding one hundred thousand rupees;
 - (III) has given a guarantee or provided any security in connection with the indebtedness of any third person to the assessee:
Provided that the relative may give guarantee or provide any security in connection with the indebtedness of any third person to the assessee for an amount not exceeding one hundred thousand rupees;
 - (viii) a person who, whether directly or indirectly, has business relationship with the assessee of such nature as may be prescribed;
 - (ix) a person who has been convicted by a court of an offence involving fraud and a period of ten years has not elapsed from the date of such conviction.
2. The proviso to section 44AB lays down that where the accounts of an assessee are required to be audited by or under any other law, it shall be sufficient compliance with the provisions of this section, if such person gets the accounts of such business or profession audited under such other law before the specified date and furnishes by that date the report by an 'accountant' as required under section 44AB. It may be noted that after amendment by the Finance Act, 2001, tax audit can be carried out by an accountant only. Accordingly, in case of any assessee like a co-operative society where the accounts under the relevant law have been audited by a person other than a chartered accountant, the tax audit will have to be conducted by the 'accountant' as defined under section 44AB.
3. Though the section refers to the accounts being audited by an accountant, which means a chartered accountant as defined above, the audit can also be done by a firm of chartered accountants. This has been a recognised practice under the Act. In such a case, it would be necessary to state the name of the partner who has signed the audit report on behalf of the firm. The member signing the report as a partner of a firm or in his

individual capacity should give his membership number while registering himself in the e-filing portal.

4. Section 44AB stipulates that only Chartered Accountants should perform the tax audit. This section does not stipulate that only the statutory auditor appointed under the Companies Act or other similar Statute should perform the tax audit. As such the tax audit can be conducted either by the statutory auditor or by any other chartered accountant in full time practice.
5. Tax audit under section 44AB being a recurring audit assignment, for expressing professional opinion on the financial statements and the particulars, the member accepting the assignment should communicate with the member who had done tax audit in the earlier year as provided in the Chartered Accountants Act. When making the enquiry from the retiring auditor, the member accepting the assignment should find out whether there are any professional or other reasons why he should not accept the appointment. The professional reasons for not accepting the appointment include:
 - ◆ Non-compliance of the provisions of sections 224 and 225 of the Companies Act as mentioned in Code of Ethics issued by ICAI under Clause (9) of Part I of First Schedule to Chartered Accountants Act, 1949. Sections 224 and 225 have been replaced with section 139/142 and section 140 respectively in Companies Act, 2013.
 - ◆ Non-payment of undisputed audit fees by auditees other than in case of sick units for carrying out the statutory audit under the Companies Act or various other statutes.
 - ◆ Issuance of qualified report.
6. The tax auditor should obtain from the assessee a letter of appointment for conducting the audit as mentioned in section 44AB. It is advisable that such an appointment letter should be signed by the person competent to sign the return of income in terms of the provisions of section 140. It would also be useful if the letter affirms that no other auditor was appointed to conduct the tax audit for the year for which the appointment is being made. The letter may also give the name and address of the tax auditor for the previous year, wherever relevant. This would give the necessary information to the incoming tax auditor to enable him to communicate with the previous auditor. The letter of appointment should also specify the remuneration of the tax auditor. SA 210 – “Agreeing the Terms of Audit Engagement” issued by the ICAI requires that the auditor to agree with the terms of audit engagement with management or those charged with governance as appropriate. The agreed terms would need to be recorded in an audit engagement letter or other suitable form of written agreement.
7. The tax auditor should get the statement of particulars, as required in the annexure to the audit report, authenticated by the assessee before he does the same.
8. The Act does not prohibit a relative or an employee of the assessee being appointed as a tax auditor under section 44AB. It may, however, be noted that as per the decision of the Council, a chartered accountant should not express his opinion on financial statements of any business or enterprise in which he, his firm or a partner in his firm has a substantial

15.9 Advanced Auditing and Professional Ethics

interest. It may be noted that the Council has decided not to permit a Chartered Accountant in employment to certify the financial statements of the concern in which he is employed, or of a concern under the same management as the concern in which he is employed, even though he holds certificate of practice and that such certification can be done by any Chartered Accountant in practice. This restriction would not however apply where the certification is permitted by any law. Therefore, an employee of an assessee or an employee of a concern under the same management cannot audit the accounts of an assessee under section 44AB.

9. A chartered accountant who is responsible for writing or the maintenance of the books of account of the assessee should not audit such accounts. This principle will apply to the partner of such a member as well as to the firm in which he is a partner. In view of this, a chartered accountant who is responsible for writing or the maintenance of the books of account or his partner or the firm in which he is a partner should not accept tax audit assignment under section 44AB in the case of such an assessee.
10. The audit of accounts of a professional firm of chartered accountants, under section 44AB cannot be conducted by any partner or employee of such firm.
11. A chartered accountant/firm of chartered accountants, who is appointed as tax consultant of the assessee, can conduct tax audit under section 44AB. But an internal auditor of the assessee cannot conduct tax audit if he is an employee of the assessee. The Council of ICAI has decided that an internal auditor of an assessee, whether working with the organisation or independently practicing chartered accountant or a firm of chartered accountants, cannot be appointed as his tax auditor.
12. A question may arise whether an assessee can remove a tax auditor appointed under section 44AB. The answer depends upon the facts and circumstances of the case. It is, however, possible for the management to remove a tax auditor where there are valid grounds for such removal. This may arise where the tax auditor has delayed the submission of audit report under section 44AB for an unreasonable period and if it is found that there is no possibility of getting the audit report uploaded before the specified date. In such cases, the management may be justified in removing the tax auditor. However, the tax auditor cannot be removed on the ground that he has given an adverse audit report or the assessee has an apprehension that the tax auditor is likely to give an adverse audit report. If there is any unjustified removal of tax auditors, the Ethical Standards Board constituted by the Institute can intervene in such cases. No other chartered accountant should accept the audit assignment if the removal of his predecessor is not on valid grounds.
13. Before accepting a tax audit, the chartered accountant should take into consideration the ceiling on tax audit assignments fixed under the Notification dated 13th January, 1989, issued by the ICAI. In view of the said Notification, a member of the Institute in practice, shall be deemed to be guilty of professional misconduct if he accepts in a financial year more than **60-tax audit assignments** or such other limit as may be prescribed by ICAI from time to time under section 44AB, whether in respect of a person whose accounts have been audited under any other law or a person who carries on business or

profession but who is not required by or under any other law to get his accounts audited. Further, as per a Council decision, audits of accounts of persons carrying on business covered by sections 44AE, 44BB or 44BBB is not included in the aforesaid limit.

14. The audit of head office and branch offices of the assessee shall be regarded as one tax audit assignment.
15. A chartered accountant should not accept the tax audit of a person to whom he is indebted for more than rupees ten thousand. Reference should be made to Chapter- X "Appointment of an auditor when he is indebted to a concern" of the Council Guidelines No.1-CA(7)/02/2008, dated 8th August, 2008- whereby a member of the Institute shall be deemed to be guilty of professional misconduct if he accepts appointment as an auditor of a concern while he is indebted to the concern or has given any guarantee or provided any security in connection with the indebtedness of any third person to the concern, for limits fixed in the statute and in other cases for amount exceeding rupees ten thousand. For this purpose, the limit of ₹ 10,000/- shall be the aggregate amount in respect of the proprietor and/or the partner/s of the firm of chartered accountants.
16. The Council has issued a Guideline which states that a member of the Institute in practice shall be deemed to be guilty of professional misconduct, if he accepts the appointment as statutory auditor of Public Sector Undertaking/Government Company/Listed Company and other Public Company having turnover of ₹ 50 crores or more in a year and accepts any other work or assignment or service in regard to the same undertaking/company on a remuneration which in total exceeds the fee payable for carrying out the statutory audit of the same undertaking/company.
17. The tax auditor is required to upload the tax audit report directly in the e-filing portal.
18. A question may arise in the case of a public sector company or any other company where the statutory auditor has not been appointed by the authorities concerned as to whether the tax auditor appointed under section 44AB can complete his audit without waiting for statutory audit report on the accounts audited by the statutory auditors. It may be noted that Form No. 3CA requires the tax auditor to enclose a copy of the audit report conducted by the statutory auditor or the auditor of the financial statements as the case may be. Where a statutory auditor has not been appointed by the authorities concerned or where the report of the statutory auditor is not available for whatever reasons, it will be possible for the tax auditor to give his report in Form No. 3CB and to certify the relevant particulars in Form No.3CD. This is particularly important in those cases where the assessee concerned has suffered losses in the relevant accounting year. It may, however, be noted that the tax auditor in such cases will have to conduct the financial audit as well in order to enable him to certify whether or not the accounts reported upon by him give a true and fair view of the state of affairs of the assessee whose accounts are audited by him under section 44AB.
19. The appointment of the auditor for tax audit in the case of a company need not be made at the general meeting of the members. It can be made by the Board of Directors or even by any officer, if so authorised by the Board in this behalf. The appointment in the case of a firm or a proprietary concern can be made by a partner or the proprietor or a person

15.11 Advanced Auditing and Professional Ethics

authorised by the assessee. It is possible for the assessee to appoint two or more chartered accountants as joint auditors for carrying out the tax audit, in which case, the audit report will have to be signed by all the chartered accountants. In case of disagreement, they can give their reports separately.

20. The chartered accountants should charge reasonable fees depending upon the responsibility involved under the revised forms and taking into consideration the work involved in tax audit assignment which has increased considerably consequent to the revision of the forms. It is necessary that members of the profession should also maintain reasonable standards of professional fees.

Specified date and tax audit: As per the recent developments, the tax audit report is required to be uploaded using digital signature of the tax auditor. A question may arise whether a tax auditor appointed under section 44AB can be held responsible if he does not complete the audit and if the tax audit report is not uploaded before the specified date. Answer to this question will depend on the facts and circumstances of the case. Normally, it is the professional duty of the chartered accountant to ensure that the audit accepted by him is completed before the due date. If there is any unreasonable delay on his part, he is answerable to the Institute if a complaint is made by the client. However, if the delay in the completion of audit is attributable to his client, the tax auditor cannot be held responsible. It is, therefore, necessary that no chartered accountant should accept audit assignments which he cannot complete within the above time frame.

15.3.2 Income Computation and Disclosure Standards (ICDS): Section 145 of the Income Tax Act, 1961 deals with the method of accounting.

Under section 145(1), income chargeable under the heads "Profits and gains of business or profession" or "Income from other sources" shall be computed in accordance with either the cash or mercantile system of accounting regularly employed by the assessee.

Section 145(2) empowers the Central Government to notify in the Official Gazette from time to time, income computation and disclosure standards to be followed by any class of assesseees or in respect of any class of income.

Accordingly, the Central Government has, in exercise of the powers conferred under section 145(2), notified ten income computation and disclosure standards (ICDSs) to be followed by all assesses (other than an individual or a HUF who is not required to get his accounts of one previous year audited in accordance with the provisions of section 44(AB)) , following the mercantile system of accounting, for the purposes of computation of income chargeable to income-tax under the head "Profit and gains of business or profession" or " Income from other sources". from the A.Y. 2017-18.

All the notified ICDSs are applicable for computation of income chargeable under the head "Profits and gains of business or profession" or "Income from other sources" and not for the purpose of maintenance of books of accounts. In the case of conflict between the provisions of the Income-tax Act, 1961 and the notified ICDSs, the provisions of the Act shall prevail to that extent.

The Central Government has prescribed 10 Income Computation and Disclosure Standards (ICDSs) as under:

- A. ICDS I relating to Accounting Policies.**
- B. ICDS II relating to Valuation of Inventories.**
- C. ICDS III relating to Construction Contracts.**
- D. ICDS IV relating to Revenue Recognition.**
- E. ICDS V relating to Tangible Fixed Assets.**
- F. ICDS VI relating to the Effects of Changes in Foreign Exchange Rates.**
- G. ICDS VII relating to Government Grants.**
- H. ICDS VIII relating to Securities.**
- I. ICDS IX relating to Borrowing Costs.**
- J. ICDS X relating to Provisions, Contingent Liabilities and Contingent Assets.**

The above ICDSs are to be followed by all assesses (other than an individual or a HUF who is not required to get his accounts of one previous year audited in accordance with the provisions of section 44(AB)) following mercantile system of accounting. Therefore, it is clear that those assessee who are following cash system of accounting need not follow the ICDSs notified above.

15.3.3 Audit procedures

1. In the case of an audit, the tax auditor is required to express his opinion as to whether the financial statements give a true and fair view of the state of affairs of the assessee in the case of the balance sheet and in the case of the profit and loss account/ income and expenditure account, of the profit/loss or income/expenditure. As regards the statement of particulars to be annexed to the audit report, he is required to give his opinion as to whether the particulars are true and correct. In giving his report the tax auditor will have to use his professional skill and expertise and apply such audit tests as the circumstances of the case may require, considering the contents of the audit report. He will have to conduct the audit by applying the generally accepted auditing procedures which are applicable for any other audit. He can apply the technique of test audit depending on the type of internal control procedures followed by the assessee. The tax auditor will also have to keep in mind the concept of materiality depending upon the circumstances of each case. He would be well advised to refer to the Standards on Auditing (SAs) issued by ICAI, as well as the "Guidance Note on Audit Reports and Certificates for Special Purposes". If the statutory auditor of a person is also appointed to undertake tax audit, it is advisable to carry out both the audits concurrently.

2. Section 143 of the Companies Act 2013 gives certain powers to the auditors to call for the books of account, information, documents, explanations, etc. and to have access to all books and records. No such powers are given to the tax auditor appointed under section 44AB. Attention is invited to SA 210, *Agreeing the Terms of Audit Engagements*. The Standard requires an auditor to establish whether the pre-conditions for an audit are present so as to

15.13 Advanced Auditing and Professional Ethics

accept or continue an audit engagement. As per para 6(b) (iii) the auditor is required to obtain agreement of management that it acknowledges and understands its responsibilities to provide the auditor with (a) access to all information of which the management is aware that is relevant to the preparation of the financial statements such as records, documentation and other matters, (b) additional information that the auditor may request the management for the purpose of the audit and (c) unrestricted access to persons within the entity from whom the auditor determines it necessary to obtain audit evidence. Moreover, since the appointment of the tax auditor is made by assessee, it will be in the interest of the assessee to furnish all the information and explanations and produce books of account and records required by the tax auditor. If, however, after agreeing to the terms of the engagement, the assessee subsequently refuses to produce any particular record or to give any specific information or explanation in relation to the reporting requirement under section 44AB, the tax auditor should see the impact thereof from the perspective of "management integrity" vis-a-vis overall assessment of risk of misstatements in accordance with under SA 315, *Identifying and Assessing the risks of material misstatement through understanding the entity and its environment* and consequently on his/her opinion for reporting in Clause (3) of Form No. 3CA or Clause (5) of Form No. 3CB as the case may be.

3. The audit report given under section 44AB is to assist the income-tax department to assess the correct income of the assessee. In order that the tax auditor may be in a position to explain any question which may arise later on, it is necessary that he should keep necessary working papers about the evidence on which he has relied upon while conducting the audit and also maintain all his necessary working papers. Such working papers should include his notes on the following, amongst other matters:

- (a) work done while conducting the audit and by whom;
- (b) explanations and information given to him during the course of the audit and by whom;
- (c) decision on the various points taken;
- (d) the judicial pronouncements relied upon by him while making the audit report; and
- (e) certificates issued by the client/management letters.

The requirements of documentation are applicable in respect of tax audit conducted by chartered accountants. For this purpose attention is also invited to SA 230, *Audit Documentation*, which provides that the tax auditor should prepare documentation that provides a sufficient and appropriate record of the basis for the auditor's report and evidence that the audit was planned and performed in accordance with SA's and applicable legal and regulatory requirements.

4. If the accounts of the business or profession of a person have been audited under any other law by the statutory auditor(s), it is not necessary for the tax auditor appointed under section 44AB to conduct the audit once again in the matter of expression of "true and fair view" of the state of affairs of the entity and of its profit/loss for the period covered by the audit. However, the said section envisages the certification of the particulars in the prescribed form on which the tax auditor has to express his opinion as to whether these are 'true and correct'. In other words, where an audit has already been conducted and the opinion of the

auditor has been expressed on the accounts, it would not be necessary to repeat the entire exercise to express similar opinion all over again. The tax auditor has only to annex a copy of the audited accounts and the auditor's report and other documents forming part of these accounts to his report and verify the particulars in the prescribed form for expressing his opinion as to whether these are true and correct.

5. Just in case of the conduct of a statutory audit for the purpose of expression of the auditor's opinion as to whether the financial statements depict a 'true and fair' view, the statutory auditor applies audit sampling, in case of tax audits also the tax auditor may apply audit sampling techniques as prescribed in SA 530, *Audit Sampling* on the information provided by the assessee to obtain sufficient appropriate audit evidence to be able to draw reasonable conclusions on which to base the audit opinion.. The extent of check undertaken would have to be indicated by the tax auditor in his working papers and audit notes. The tax auditor would be well advised to so design his tax audit programme as would reveal the extent of checking and to ensure adequate documentation in support of the information being certified.

6. Where the assessee has been subjected to an internal audit and the tax auditor decides to use the work of the internal auditor for the purpose of the tax audit under section 44AB, the latter's procedures would be guided by the principles laid down in Standard on Auditing (SA) 610, *Using the Work of Internal Auditors*.

7. Audit procedures applicable to a person whose accounts of the business or profession have been audited under any other law will apply as well to a person who carries on business or profession but who is not required by or under any other law to get his accounts audited. In order to express his opinion on the accounts of a person belonging to the latter category the tax auditor should apply the same tests and checks as he would have applied in the conduct of audit of the former category. These may include disclosure regarding method of accounting and practices consistently and regularly followed, and whether a change in such matters or practice has been made during the year, notwithstanding the fact that such disclosures are required to be made in Form No.3CD.

8. The ICAI had pursuant to the issuance of the Revised SA 700, *Forming an Opinion and Reporting on Financial Statements*, prescribed a revised format of the auditor's report on financial statements, which has been made effective in respect of audits of financial statements for periods beginning on or after 1st April 2012. Since Form No. 3CA and Form No. 3CB are required to be filed online in a preset form and the same are not in line with the requirements of SA 700, there is no specifically allocated field for providing information relating to the respective responsibilities of the assessee and the tax auditor as required in terms of the principles laid out in SA 700. However, having regard to the importance of these respective responsibility paragraphs from the perspective of the readers of the tax audit report, it is suggested that these respective responsibility paragraphs relating can be provided in the space provided for giving observations, etc., under Clause (3) of Form No. 3CA or Clause (5) of Form No. 3CB as the case may be.

While test checks may suffice in the conduct of a statutory audit for the expression of the auditor's opinion as to whether the accounts depict a 'true and fair' view, the tax auditor may be required to apply reasonable tests on the total information to be prepared by the assessee

15.15 Advanced Auditing and Professional Ethics

in respect of certain items in the prescribed form, e.g., in verification of payments for purchases/expenses exceeding ₹ 20,000/- in cash. While the entity may have to prepare the details for the entire year, the tax auditor may have to ensure that no items have been omitted in the information furnished and a reasonable test check would reveal whether or not the information furnished is correct. The extent of check undertaken would have to be indicated by the tax auditor in his working papers and audit notes. The tax auditor would be well advised to so design his tax audit programme as would reveal the extent of checking and to ensure adequate documentation in support of the information being certified.

15.3.4 Audit report: Section 44AB requires the tax auditor to submit the audit report in the prescribed form and setting forth the prescribed particulars. Sub-rule 1 of rule 6G provides that the report of audit of accounts of a person required to be furnished under Section 44AB shall -

- (a) in the case of a person who carries on business or profession and who is required by or under any other law to get his accounts audited, be in Form No. 3CA;
- (b) in the case of a person who carries on business or profession, but not being a person referred to in clause (a), be in Form No. 3CB.

Sub-rule (2) of Rule 6G further provides that the particulars which are required to be furnished under Section 44AB shall be in Form No. 3CD.

It may be noted that the audit report in Form No.3CB is in two parts. The first part requires the tax auditor to give his opinion as to whether or not the accounts audited by him give a true and fair view:

- (i) in the case of the balance sheet, of the state of affairs as at the last date of the accounting year.
- (ii) in the case of the profit and loss account, of the profit or loss of the assessee for the relevant accounting year.

The second part of the report states that the statement of particulars required to be furnished under section 44AB is annexed to the audit report in Form No. 3CD. The tax auditor is required to give his opinion whether the prescribed particulars furnished by the assessee are true and correct subject to observations and qualifications, if any.

In paragraph 3 of Form No. 3CB the auditor has to report that the financial statements audited by him give a 'true' and fair view. The requirement in paragraph 3 of Form No. 3CA and paragraph 5 of Form No. 3CB relating to particulars in Form No. 3CD is that the auditor should report that these particulars in Form No. 3CD are "true and correct". The terminology "true and fair" is widely understood though not defined even under the Companies Act, 2013. On the other hand, the words "true and correct" lay emphasis on factual accuracy of the information. In this context reference is invited to AS-1 and AS(IT)-I relating to disclosure of accounting policies. These standards recognise that the major considerations governing the selection and application of accounting policies are (i) prudence, (ii) substance over form and (iii) materiality. Therefore, while giving particulars in Form No.3 CD these aspects should be kept in view. In particular, considering the nature of particulars to be given in Form No. 3CD, the aspect of materiality should be considered. In other words, particulars should be given in the respect of

material items and the auditors should ensure factual accuracy relating to these particulars. In the case of a person whose accounts of the business or profession have been audited under any other law, it is not required for the tax auditor appointed under section 44AB to give his opinion, as to whether or not the accounts give a true and fair view as indicated herein above. It would only be necessary for him to annex a copy of the audited accounts as well as a copy of the audit report given by the statutory auditor with his report in Form No. 3CA along with Form No. 3CD.

In the case of a person who carries on business and also renders professional services but who is not required by or under any other law to get his accounts audited, report should be given in Form No. 3CB. The statement of particulars should be given in Form No. 3CD.

In the case of "person" having their accounting year which is different from the financial year, accounts of the financial year are required to be prepared and audited. The audit report shall be in Form 3CB.

Form No. 3CA

1. This form is to be used in a case where the accounts of the business or profession of a person have been audited under any other law. The first part of the report refers to the fact that the statutory audit of the assessee was conducted by a chartered accountant or any other auditor in pursuance of the provisions of the relevant Act, and the copy of the audit report along with the audited profit and loss account and balance sheet and the documents declared by the relevant Act to be part of or annexed to the profit and loss account and balance sheet, are annexed to the report in Form No. 3CA. In a case where the tax auditor carrying out the audit under section 44AB is different from the statutory auditor, a reference should be made to the name of such statutory auditor. In case the statutory auditor is carrying out the audit under section 44AB, the fact that he has carried out the statutory audit under the relevant Act should be stated. Attention of the members in this context is invited to SA 600 "Using the work of Another Auditor".

2. Statement of particulars required to be furnished under section 44AB is annexed with the particulars in Form No. 3CD. The tax auditor has to further state that, in his opinion and to the best of his information and according to examination of books of account including other relevant documents and explanations given to him, the particulars given in the said Form No. 3CD and the annexure thereto are true and correct subject to the observations/qualifications, if any.

3. The auditor is required to examine not only the books of accounts but also other relevant documents directly related to transactions reflected in the books of accounts like original purchase invoice, copy of bank statements, bills, vouchers, various agreements/ contracts or any other document on the basis of which preliminary entries are passed in the books of accounts.

4. Attention is also drawn to the definition of 'document' as per section 2(22AA) of the Act which is as under:

"document" includes an electronic record as defined in clause (t) of sub-section (1) of section 2 of the Information Technology Act, 2000 (21 of 2000).

Section 2(1)(t) of the Information Technology Act, 2000 as referred above is reproduced below:

15.17 Advanced Auditing and Professional Ethics

"electronic record" means data, record or data generated, image or sound stored, received or sent in an electronic form or micro film or computer generated micro fiche.

The definition of term "document" is an inclusive definition and includes within its ambit documents other than those considered as electronic record as per section 2(1)(t) of the Information Technology Act, 2000. The above definition will also be considered while reporting under clause 11(c) of Form No. 3CD discussed later.

5. Where any of the requirements in this form is answered in negative or with qualification, the report shall state the reasons thereof. The tax auditor should state this qualification in the audit report so that the same becomes a comprehensive report and the user of the audited statement of particulars can realize the impact of such qualifications.

6. It is possible that in the case of a person whose accounts of the business or profession have been audited under any other law, which has branches at various places, the branch accounts might have been audited by branch auditors under the statute. If the audit under section 44AB is also carried out by the same branch auditors or other chartered accountants, they should submit the report in Form No. 3CA to the management or the principal tax auditor appointed for the head office under Section 44AB. Attention in this regard is drawn to SA 600, "Using the Work of Another Auditor" which discusses the procedures in this regard as well as the principal tax auditor's responsibility in relation to his use of the work of the branch auditor. The principal tax auditor should submit his consolidated report on the registered office/head office and branch accounts and report in his tax audit report as his observation in paragraph 3 of Form No. 3CA as under:

"I/We have taken into consideration the audit report and the audited statements of accounts, and particulars received from the auditors, duly appointed under the relevant law, of the branches not audited by me/us".

7. Item No. 4 of the notes to Form No. 3CA requires that the person, who signs this audit report, shall indicate reference of his membership No./certificate of practice number/authority under which he is entitled to sign this report. No separate certificate of practice number is allotted by ICAI. As such, where a chartered accountant acts as a tax auditor he should give his membership number with ICAI while registering himself in the e-filing portal. In case, the e-filing utility of Form No. 3CA requires the mention of the Firm Registration number and the name of the firm on whose behalf the member has conducted audit, the same should invariably be provided by the tax auditor.

8. An assessee may have one or more branches outside India. The accounts of such branches are normally audited by the professional accountants overseas. The results of such branches are also incorporated in the consolidated accounts prepared in this country. In the case of foreign branches, the relevant information in respect of such branches as is required by Form No. 3CD, may be obtained by the tax auditor in India from the assessee who should obtain the same from the overseas auditor who had audited the accounts of such foreign branches. The tax auditor in India while certifying the information in Form No. 3CD may rely upon the information obtained by him from the overseas auditor and while submitting his consolidated report in Form No. 3CD, he should specifically point out the following in his audit report in paragraph 3 of Form No. 3CA as his observation:-

“I/We have taken into consideration the audit report and the audited statements of accounts, and particulars received from the auditors, appointed under the relevant law, of the overseas branches not audited by me/us”.

If the assessee is unable to obtain relevant information in respect of the overseas branches duly certified by the overseas auditor, the relevant facts should be suitably disclosed and reported upon.

9. Where the tax auditor is unable to obtain the required information in respect of branches situated in India or outside India then the fact should be suitably disclosed along with its impact on the Auditor's opinion on the particulars furnished in Form No. 3CD, as an observation in clause (3) of Form No. 3CA. Reference is drawn to SA 705 “Modifications to the opinion in the Independent Auditor's report”.

Form No. 3CB

1. In the case of a person who carries on business or profession but who is not required by or under any other law to get his accounts audited, the audit report has to be given in Form No. 3CB. Form No. 3CB consists of five paragraphs.

2. The tax auditor has to state whether he has examined the balance sheet as on a particular relevant date and the profit and loss account/income and expenditure account for that period. Further, such a balance sheet and the profit and loss account must be attached with the audit report.

3. The tax auditor has to certify that the balance sheet and the profit and loss account/income and expenditure account are in agreement with the books of account maintained at the head office and branches. Also, he has to mention the total number of branches.

4. He has to report his observations, comments, discrepancies or inconsistencies, if any. Subject to the above observations, comments, discrepancies, inconsistencies he has to state whether:

- (a) he has obtained all the information and explanations which, to the best of his knowledge and belief, were necessary for the purposes of the audit;
- (b) in his opinion proper books of account have been kept by the head office and branches of the assessee so far as appears from his examination of the books;
- (c) in his opinion and to the best of his information and according to the explanations given to him the said accounts, read with notes thereon, if any, give a true and fair view;
 - (i) in the case of the balance sheet of the state of the affairs of the assessee as at 31st March, _____ and
 - (ii) in the case of the profit and loss account/income and expenditure account of the profit/loss or surplus/deficit of the assessee for the year ended on that date.

5. Under clause (a) of paragraph 3 of Form No. 3CB, the tax auditor has to report his “observations /comments/ discrepancies/ inconsistencies,” if any. The expression “Subject to

15.19 Advanced Auditing and Professional Ethics

above” appearing in clause (b) makes it clear that such observations /comments/ discrepancies/ inconsistencies which are of qualificatory nature relate to necessary information and explanations for the purposes of the audit or the keeping of proper books of accounts or the true and fair view of the financial statements, respectively to be reported on in paragraphs (A), (B) and (C) under clause (b) of paragraph 3. While reporting on clause (a) of paragraph 3 of Form No. 3CB the tax auditor should report only such of those observations/comments/ discrepancies/ inconsistencies which are of qualificatory nature which affect his reporting about obtaining all the information and explanations which were necessary for the purposes of the audit, about the keeping of proper books of account by the head office and branches of the assessee and about the true and fair view of the financial statements. Further, only such observations/comments/ discrepancies/inconsistencies which are of a qualificatory nature should be mentioned under clause (a). Any other observations/ comments/ discrepancies/ inconsistencies, which do not affect the reporting on the matters specified above may form part of the notes to accounts forming part of the accounts. In case the tax auditor has no observations/ comments/ discrepancies/ inconsistencies to report which are of qualificatory nature, “NIL” should be reported in this part of paragraph 3. The tax auditor may then give his report as required by sub-paragraphs (A), (B), and (C) of paragraph 3 and paragraph 4.

6. Paragraph 4 of Form No. 3CB provides that the prescribed particulars are furnished in Form No. 3CD annexed to the report. Paragraph 5 of Form No. 3CB requires the auditor to report whether in his opinion and to the best of his information and according to the explanations given to him, the particulars given in Form No. 3CD are true and correct subject to observations/qualifications, if any. The auditor may have a difference of opinion with regard to the particulars furnished by the assessee and he has to bring these differences under various clauses in Form No. 3CD. The auditor should make a specific reference to those clauses in Form No. 3CD in which he has expressed his reservations, difference of opinion, disclaimer etc. in this paragraph.

7. If a person who carries on business or profession but who is not required by or under any other law to get his accounts audited, has branches and separate accounts are maintained at the branches, the assessee can request the tax auditor appointed under section 44AB to audit the head office and branch accounts. In the alternative, the assessee can appoint separate tax auditors for branches. The branch tax auditor in such a case will have to give an audit report in Form No. 3CB to the management or the tax auditor appointed for the audit of head office accounts. The tax auditor appointed for the audit of head office can rely on the report of branch tax auditors subject to such checks and verifications as he may choose to make and shall submit his consolidated report on the head office and branch accounts. He should make suitable reference to the audit conducted by separate branch tax auditors in the same manner as stated in point 6 above.

8. If the tax auditor is called upon to give his report only in respect of one or more businesses carried on by the assessee and the books of accounts of the other businesses are not produced as the same are not required to be audited under the Act, the tax auditor should mention the fact that audit has not been conducted of those businesses whose books of account had not been produced. However, if the financial statements include, inter alia, the

results of such business for which books of account have not been produced, the auditor should qualify his report in Form No. 3CB.

Form No. 3CD

1. The statement of particulars given in Form No. 3CD as annexure to the audit report contains forty one clauses. The tax auditor has to report whether the particulars are true and correct. This Form is a statement of particulars required to be furnished under section 44AB. The same is to be annexed to the reports in Forms No. 3CA and 3CB in respect of a person who carries on business or profession and whose accounts have been audited under any other law and in respect of person who carries on business or profession but who is not required by or under any other law to get his accounts audited respectively.
2. As stated earlier, the tax auditor should obtain from the assessee, the statement of particulars in Form No. 3CD duly authenticated by him. It would be advisable for the assessee to take into consideration the following general principles while preparing the statement of particulars:
 - (a) He can rely upon the judicial pronouncements while taking any particular view about inclusion or exclusion of any items in the particulars to be furnished under any of the clauses specified in Form No. 3CD.
 - (b) If there is a conflict of judicial opinion on any particular issue, he may refer to the view which has been followed while giving the particulars under any specified clause.
 - (c) The AS, Guidance Notes, SA issued by the Institute from time to time should be followed.
3. While furnishing the particulars in Form No. 3CD it would be advisable for the tax auditor to consider the following:
 - (a) If a particular item of income/expenditure is covered in more than one of the specified clauses in the statement of particulars, care should be taken to make a suitable cross reference to such items at the appropriate places.
 - (b) If there is any difference in the opinion of the tax auditor and that of the assessee in respect of any information furnished in Form No. 3CD, the tax auditor should state both the view points and also the relevant information in order to enable the tax authority to take a decision in the matter.
 - (c) If any particular clause in Form No. 3CD is not applicable, he should state that the same is not applicable.
 - (d) In computing the allowance or disallowance, he should keep in view the law applicable in the relevant year, even though the form of audit report may not have been amended to bring it in conformity with the amended law.
 - (e) In case the prescribed particulars are given in part or piecemeal to the tax auditor or relevant form is incomplete and the assessee does not give the information against all or any of the clauses, the auditor should not withhold the entire audit report. In such a case, he can qualify his report on matters in respect of which information is not furnished to

15.21 Advanced Auditing and Professional Ethics

him. In the absence of relevant information, the tax auditor would have no option but to state in his report that the relevant information has not been furnished by the assessee.

- (f) The information in Form No. 3CD should be based on the books of accounts, records, documents, information and explanations made available to the tax auditor for his examination.
- (g) In case the auditor relies on a judicial pronouncement, he may mention the fact as his observations in clause (3) of Form No. 3CA or clause (5) provided in Form No. 3CB, as the case may be.

Particulars to be furnished in Form No. 3CD

PART – A

1.	Name of the assessee		
2.	Address		
3.	Permanent Account Number		
4.	Whether the assessee is liable to pay indirect tax like excise duty, service tax, sales tax, customs duty, etc. If yes, please furnish the registration number or any other identification number allotted for the same		
5.	Status		
6.	Previous year		from _____ to _____
7.	Assessment year		
8.	Indicate the relevant clause of section 44AB under which the audit has been Conducted		

[Clauses 1 to 8]

The requirements of clauses 1 to 8 of Part-A are discussed as follows:

- ❖ **Under clause (1)**, the name of the assessee whose accounts are being audited under section 44AB should be given. However, if the tax audit is in respect of a branch, name of such branch should be mentioned along with the name of the assessee.
- ❖ The address to be mentioned **under clause (2)** should be the same as has been communicated by the assessee to the Income-tax Department for assessment purposes as on the date of signing of the audit report. If the tax audit is in respect of a branch or a unit, the address of the branch or the unit should be given. In the case of a company, the address of the registered office should also be stated. In the case of a new assessee, the address should be that of the principal place of business.
- ❖ **Under clause (3)**, the permanent account number (PAN) allotted to the assessee should be indicated. It may be noted that in the e-filing format PAN is a mandatory field.
- ❖ **Under clause (4)**, the auditor is required to mention the registration number or any other

identification number, if any, allotted, in case the assessee is liable to pay indirect taxes like excise duty, service tax, sales tax, customs duty, etc. Part A of Form No. 3CD generally requires the auditor to give the factual details of the assessee. Thus, the auditor is primarily required to furnish the details of registration numbers as provided to him by the assessee. The reporting is however, to be done in the manner or format specified by the e-filing utility in this context. The information may be obtained and maintained in the following format:-

Sr. No	Relevant Indirect tax Law which requires registration	Place of Business/ profession/ service unit for which registration is in place/ or has been applied for:-	Registration/ Identification number
1	2	3	4

The auditor has to keep in mind the provisions of Standard on Auditing 580 "Written Representation". In case the auditor prima facie is of the opinion that any indirect taxes laws is applicable on the business or profession of the assessee but the assessee is not registered under the said law, he should report the same appropriately.

- ❖ **Under clause (5)**, the status of the assessee is to be mentioned. Obviously this refers to the different classes of assessee included in the definition of "person" in section 2 (31) of the Act, namely, individual, Hindu undivided family, company, firm, an association of persons or a body of individuals whether incorporated or not, a local authority or artificial juridical person.
- ❖ **Under clause (6)**, the period of the previous year has to be stated. Since the previous year under the Act now uniformly begins on 1st April and ends on 31st March, the relevant previous year should be mentioned. In case of amalgamations, demergers, reconstitution, new business, closure of existing business etc. the date of beginning/ ending of the previous year may be different, the auditor may accordingly, mention the relevant date of beginning and ending of the previous year in this clause. Hence, the tax auditor has to apply his professional judgement depending on the facts and circumstances of the same.
- ❖ **Under clause (7)**, the assessment year relevant to the previous year for which the accounts are being audited should be mentioned.
- ❖ **Under clause (8)**, the auditor is required to mention the relevant clause of section 44AB under which the audit has been conducted. In case the assessee is carrying on business and his total sales, turnover or gross receipts as the case may be, exceeds one crore in the relevant previous year, the auditor is required to mention clause (a) under this head. If the assessee is carrying on profession and his gross receipts exceed twenty five lakh rupees in the relevant previous year, the auditor is required to mention clause (b) under this head. Likewise, if the audit under section 44AB is being conducted by virtue of provisions of section 44AE, 44BB and 44BBB, the auditor is required to mention clause (c). For audit being conducted by virtue of provisions of section 44AD, clause (d) is to be mentioned under this head.

15.23 Advanced Auditing and Professional Ethics

Clause 9(a): If firm or Association of Persons, indicate names of partners/members and their profit sharing ratios.

Clause 9(b): If there is any change in the partners or members or in their profit sharing ratio since the last date of the preceding year, the particulars of such change.

Explanation for Clauses 9(a) and 9(b): Where the assessee is a firm or association of persons (AOP) or body of individuals, the names of partners of the firm or members of the association of persons or body of individuals and their profit sharing ratios (%) have to be stated. In case where the partner of a firm or the member of AOP/ BOI acts in a representative capacity, the name of the beneficial partner/member should be stated. Thus, the details of partners or members during the entire previous year will have to be furnished. The term "profit sharing ratios" would include loss-sharing ratio also since loss is nothing but negative profits. This would not cover any specific ratio or understanding in relation to payment of remuneration or interest to partners or members.

If there is any change in the partners of the firm or members of the association of persons/body of individuals or their profit or loss sharing ratio since the last date of the preceding year, the particulars of such change must be stated. All the changes occurring during the entire previous year must be stated.

The particulars in this clause should be verified from the instrument or agreement or any other document evidencing partnership or association of persons including any supplementary documents or other documents effecting such changes. For this purpose, the tax auditor may also verify:

- (i) in case of registered firms (including Indian LLPs), whether the relevant documents have been filed with the concerned authorities,
- (ii) whether notice of changes, if required, has been given to the registrar of firms, and
- (iii) any minutes or any other understanding recording any changes in the partners/members or their profit sharing ratios.

The tax auditor should obtain certified copies of the deeds, documents, understanding, notice of changes etc. including certified copies of the acknowledgment, if any, evidencing filing of documents with the concerned authorities, if registered.

Clause 10(a): Nature of business or profession (if more than one business or profession is carried on during the previous year, nature of every business or profession).

Clause 10(b): If there is any change in the nature of business or profession, the particulars of such change.

Explanation for Clauses 10(a) and 10(b): In regard to the nature of business, the principal line of each business is to be determined and stated in this clause, i.e. the sector in which the business or profession falls such as manufacturing, trading, commission agent, builder, contractor, professionals, service sector, financial service sector or entertainment industry. In case of a person belongs to service sector the nature of each type of service should be broadly stated. Thereafter, the auditor is required to mention the sub-sector pertaining to the sector selected.

Information has to be furnished in respect of each business. The code to be mentioned against the nature of business pertains to the main area of business activity.

Any material change in the nature of business should be precisely set out. The change will include change from manufacturer to trader as well as change in the principal line of business.

A review of business report or the minutes of meetings would enable the tax auditor to note the changes, if any. Based thereon, he may make necessary enquiries and seek information and determine whether any change has occurred or not. If need be, the tax auditor should get a declaration from the assessee regarding change in the nature of business, if any.

In the case of restructuring, if any line of activity is being hived off, the same may also be reported.

The auditor should keep in mind the above guidance while furnishing information under this clause in the format provided for in the e-filing utility.

Clause 11(a): Whether books of account are prescribed under section 44AA, if yes, list of books so prescribed.

Clause 11(b): List of books of account maintained and the address at which the books of account are kept.

(In case books of account are maintained in a computer system, mention the books of account generated by such computer system. If the books of accounts are not kept at one location, please furnish the addresses of locations along with the details of books of accounts maintained at each location.)

Clause 11(c): List of books of account and nature of relevant documents examined.

Explanation for Clauses 11(a), 11(b), and 11(c): The CBDT under Rule 6F has prescribed the books of account and other documents to be kept and maintained by a person carrying on certain professions specified in sub-section (1) of section 44AA. As such, every person carrying on legal, medical, engineering or architectural profession or the profession of accountancy or technical consultancy or interior decoration or authorised representative or film artist and whose total gross receipts exceed one lakh fifty thousand rupees in all the three years immediately preceding the previous year, or where the profession has been newly set up in the previous year, his total gross receipts in the profession for that year are likely to exceed the said amount, is required to maintain the following books of account:

1. Cash book.
2. Journal, if the accounts are maintained according to the mercantile system of accounting.
3. Ledger.

In the case of a person for whom the books of account have been prescribed under rule 6F, the list of books so prescribed have to be stated under clause 11(a). It may be noted that the daily case register and the inventory under broad heads do not constitute books of account and hence the same need not be mentioned under clause 11(a). Sometimes an assessee may carry on multiple activities. Books of account might have been prescribed for one of the activities. In that case, mention may be made of the activity for which books have been

15.25 Advanced Auditing and Professional Ethics

prescribed.

The tax auditor should obtain from the assessee a complete list of books of account and other documents maintained by him (both financial and non-financial records) and make appropriate marks of identification to ensure the identification of the books and records produced before him for audit. The list of books of account maintained by the assessee should be given under clause 11(b).

Section 44AA(2) provides that persons carrying on business or profession, other than those specified in sub-section (1), shall keep and maintain such books of account and other documents as may enable the Assessing Officer to compute his total income in accordance with the provisions of the Income-tax Act, if his income from business or profession exceeds the monetary limits prescribed under section 44AA(2) or his total sales, turnover or gross receipts in business or profession exceed the monetary limits prescribed under section 44AA(2) in any one of the three years immediately preceding the previous year. The tax auditor will, therefore, have to verify that the assessee has maintained such books of accounts and documents as may enable the Assessing Officer to compute the total income of the assessee in accordance with the provisions of the Act. It may be noted that though the Central Board of Direct Taxes has been empowered under sub-section (3) of section 44AA to prescribe books of account to be maintained under sub-section (2), so far no books of accounts have been prescribed.

For a person whose accounts of the business or profession have been audited under any other law, the requirement for maintenance of books of account is contained in the relevant statutes. In the case of other assessee, normal books of account to be maintained will be cash book/bank book, sales/purchase journal or register and ledger. Assessee engaged in trading/manufacturing activities should also maintain quantitative details of principal items of stores, raw materials and finished goods. While giving his report in Form No. 3CB about maintenance of proper books of account, the tax auditor should ensure that they are maintained in accordance with the above requirements. In case where stock records are not properly maintained by the assessee due to the nature, level, volume and variety of items/transactions, the tax auditor will have to consider the concept of materiality and practicality while giving particulars in Form No. 3CD.

In case, where books of accounts are maintained and generated through computer system, the auditor should obtain from the assessee the details of address of the place where the server is located or the principal place of business/Head office or registered office by whatever name called and mention the same accordingly in clause 11(b).

Clause 12: Whether the profit and loss account includes any profits and gains assessable on presumptive basis, if yes, indicate the amount and the relevant sections (44AD, 44AE, 44AF, 44B, 44BB, 44BBA, 44BBB Chapter XII-G, First Schedule or any other relevant section).

Where the profits and gains of the business are assessable to tax under presumptive basis under any of the sections mentioned below, the amount of such profits and gains credited/debited to the profit and loss account should be indicated under this clause:

S. No.	Section	Business covered
1	44AD	Eligible business
2	44AE	Transport business
3	44B	Shipping business of a non-resident
4	44BB	Providing service or facilities in connection with, or supplying plant and machinery on hire used, or to be used, in the prospecting for, or extraction or production of, mineral oils
5	44BBA	Operation of aircraft by non-resident
6	44BBB	Civil construction etc. in certain turnkey power project by non-residents
7	Chapter XII-G	Special provisions relating to Shipping Companies (Section 115V to 115VT)
8	First Schedule	Insurance Business
9	Any other relevant section	This refers to the sections not listed above under which income may be assessable on presumptive basis like section 44D and section 115A(1)(b) and will include any other section that may be enacted in future for presumptive taxation

If the profit and loss account does not include profit assessable on presumptive basis, then, there is no requirement to furnish the particulars under this clause.

The amount to be mentioned under this clause means the amount included in the profit and loss account. The tax auditor is not required to indicate as to whether such amount corresponds to the amount assessable under the relevant section relating to presumptive taxation. As such, the reporting requirement gets satisfied if the amount as per profit and loss account is reported.

The auditor should keep in mind the prescribed guidance while furnishing information under this clause in the format provided in the e-filing utility.

Clause 13 (a) Method of accounting employed in the previous year.

Clause 13 (b) Whether there had been any change in the method of accounting employed vis-a-vis the method employed in the immediately preceding previous year.

Clause 13 (c) If answer to (b) above is in the affirmative, give details of such change, and the effect thereof on the profit or loss.

Serial number	Particulars	Increase in profit (₹)	Decrease in profit (₹)

Clause 13 (d) Whether any adjustment is required to be made to the profits or loss for complying with the provisions of income computation and disclosure standards notified under section 145(2).

Clause 13 (e) If answer to (d) above is in the affirmative, give details of such adjustments:

15.27 Advanced Auditing and Professional Ethics

		<i>Increase in profit (₹)</i>	<i>Decrease in profit (₹)</i>	<i>Net effect (₹)</i>
<i>ICDS I</i>	<i>Accounting Policies</i>			
<i>ICDS II</i>	<i>Valuation of Inventories</i>			
<i>ICDS III</i>	<i>Construction Contracts</i>			
<i>ICDS IV</i>	<i>Revenue Recognition</i>			
<i>ICDS V</i>	<i>Tangible Fixed Assets</i>			
<i>ICDS VI</i>	<i>Changes in Foreign Exchange Rates</i>			
<i>ICDS VII</i>	<i>Governments Grants</i>			
<i>ICDS VIII</i>	<i>Securities</i>			
<i>ICDS IX</i>	<i>Borrowing Costs</i>			
<i>ICDS X</i>	<i>Provisions, Contingent Liabilities and Contingent Assets</i>			
	<i>Total</i>			

Clause 13 (f) Disclosure as per ICDS:

<i>(i)</i>	<i>ICDS I-Accounting Policies</i>
<i>(ii)</i>	<i>ICDS II-Valuation of Inventories</i>
<i>(iii)</i>	<i>ICDS III-Construction Contracts</i>
<i>(iv)</i>	<i>ICDS IV-Revenue Recognition</i>
<i>(v)</i>	<i>ICDS V-Tangible Fixed Assets</i>
<i>(vi)</i>	<i>ICDS VII-Governments Grants</i>
<i>(vii)</i>	<i>ICDS IX Borrowing Costs</i>
<i>(viii)</i>	<i>ICDS X-Provisions, Contingent Liabilities and Contingent Assets”.</i>

Explanation for Clauses 13(a), 13(b), 13(c) and 13(d): The Finance Act, 1995 amended section 145 with effect from assessment year 1997-98 to provide that the income chargeable under the head “Profits and gains of business or profession” or “Income from other sources” must be computed in accordance with either cash or mercantile system of accounting regularly employed by the assessee.

Under sub-clause (b), whether there has been any change in the method of accounting employed vis-à-vis the method employed in the immediately preceding previous year is to be stated. As already noted, an assessee can follow either cash or mercantile system of accounting.

Under sub-clause (c), if there is any change, the effect thereof i.e. increase or decrease in profits has to be stated under this clause. So far as the question of effect of such change on

the profit or loss is concerned, the concept of materiality is the basic governing factor. If it is not possible to quantify the effect of the change in the method of accounting, appropriate disclosure should be made under this clause.

Under Clause (d), tax auditor has to report on whether any adjustment is required to be made to the profits or loss for complying with the provisions of income computation and disclosure standards notified under section 145(2).

The Finance (No. 2) Act, 2014 has amended section 145 w.e.f AY 2015-16 to the effect that the words 'accounting standards' be replaced with the words 'income computation and disclosure standards'. As per the memorandum, such an amendment has been made in order to clarify that the standards notified under section 145(2) are only meant for computation of income and disclosure of information and the assessee need not maintain books of account on the basis of AS notified under the Income-tax Act, 1961. The Accounting Standards issued by ICAI/ Companies Accounting Standard Rule, 2006 would still be required to be followed by the assessee, for preparation of financial statements.

Clause 14 (a) Method of valuation of closing stock employed in the previous year.

Clause 14 (b) Details of deviation, if any, from the method of valuation prescribed under section 145A, and the effect thereof on the profit or loss, please furnish:

Serial number	Particulars	Increase in profit (₹)	Decrease in profit (₹)

Explanation for Clauses 14(a) and (b): The method of valuation of closing stock is to be stated under this clause. AS-2 "Valuation of Inventories" issued by ICAI requires disclosure of significant accounting policies. Accordingly, a reference may be invited to the same or the method of valuation may be again described in Form No.3CD.

In sub-clause (a) of clause 14 of Form No.3CD, the reference is made to "closing stock". The expression "stock-in-trade" means finished goods and raw materials. Since sub-clause (b) refers to section 145A where the term "inventories" is used, the term "closing stock" will include all items of inventories. AS-2 defines the term "inventories" to include finished goods, raw materials, work-in-progress, materials, maintenance supplies, consumables and loose tools. Therefore, method of valuation of items of inventories will have to be given under sub-clause (a).

The tax auditor should study the procedure followed by the assessee in taking the inventory of closing stock at the end of the year and the valuation thereof. He should obtain the inventory of closing stock, indicating the basis of valuation thereof, for reporting on the method of valuation of closing stock under this clause.

The method of stock valuation must be consistently followed from year to year and the method followed must be brought out clearly. The tax auditor should examine the basis adopted for ascertaining the cost and this basis should be consistently followed. It is necessary to ensure that the method followed for valuation of stock results in disclosure of correct profit and gains. The Supreme Court in case of CIT v. British Paints Ltd. [1991] 188 ITR 44 (SC) has held that the method of valuation of stock at actual cost of raw materials and not taking into account

15.29 Advanced Auditing and Professional Ethics

overhead charges was not the correct method of valuation even though the said method has been consistently followed.

The details of deviation, if any, from the method of valuation prescribed under section 145A, and the effect thereof on the profit or loss have to be stated under clause 14(b).

Clause 15: Give the following particulars of the capital asset converted into stock-in-trade:-

- (a) Description of capital asset;**
- (b) Date of acquisition;**
- (c) Cost of acquisition;**
- (d) Amount at which the asset is converted into stock-in-trade.**

For furnishing the particulars required by clause 15, the provisions of section 2(47), 45(2), 47(iv), (v) and 47A have to be kept in mind.

The particulars to be stated under new clause 15 should be furnished with respect to the previous year in which the asset has been converted into stock-in-trade. The clause does not require details regarding the taxability of capital gains or business income arising from such deemed transfer.

Under clause (a) description of the capital asset is required to be mentioned for example shares, security, land, building, plant, machinery etc.

Under Clause (b) the date of acquisition is to be reported. For ascertaining the correct date the tax auditor will have to refer the accounts of the financial year in which such capital asset is acquired. The date assumes importance for the purpose of determining whether the asset is long-term or short-term in nature.

Under clause (c) the cost of acquisition is required to be reported. Here the cost of acquisition as per the books of account is to be mentioned. In case of depreciable assets, the carrying cost appearing in the books will be the written down value. But the value to be reported will be the original cost of acquisition. Even in case of an asset acquired prior to the 1st day of April, 1981 the value to be reported will be the original cost of acquisition. The assessee may exercise the option of considering the fair market value of the asset as on 1st April, 1981 for assets acquired prior to that date for the purpose of computation of capital gains as provided under section 55(2)(b)(i).

Under clause (d) the amount recorded in the books of account at which the asset is converted into stock-in-trade should be stated. Such an amount may not be the fair market value as on the date of conversion or treatment as stock-in-trade. If a value other than carrying cost is recorded then the auditor has to examine the basis of arriving at such a value. The valuation of stock-in-trade is to be examined with reference to AS-2 – Valuation of Inventories. Non-compliance with AS-2 is to be suitably qualified in the main audit report.

It is desirable that necessary accounting entry is passed in the books of account at the time of conversion of the asset into or treatment of the same as stock-in-trade.

Clause 16: Amounts not credited to the profit and loss account, being,-

- (a) the items falling within the scope of section 28;**
- (b) the proforma credits, drawbacks, refund of duty of customs or excise or service tax, or refund of sales tax or value added tax, where such credits, drawbacks or refunds are admitted as due by the authorities concerned;**
- (c) escalation claims accepted during the previous year;**
- (d) any other item of income;**
- (e) capital receipt, if any.**

Under this clause various amounts falling within the scope of section 28 which are not credited to the profit and loss account are to be stated. The information under sub-clauses (a), (d) and (e) of clause (16) is to be given with reference to the entries in the books of account and records made available to the tax auditor for the purpose of tax audit under section 44AB. Sub-clauses 16 (b), (c) & (d) require information in respect of items which may also be covered under section 28 and as such will also fall in clause 16 (a). However, those items which are reported in clauses 16(b), (c) and (d) need not be reported in clause 16 (a). The tax auditor may obtain a management representation in writing from the assessee in respect of all items falling under this clause.

The details of the following claims, if admitted as due by the concerned authorities but not credited to the profit and loss account, are to be stated under sub-clause (b).

- (i) Pro forma credits
- (ii) Drawback
- (iii) Refund of duty of customs
- (iv) Refund of excise duty
- (v) Refund of service tax
- (vi) Refund of sales tax or value added tax

In respect of items falling under sub-clause (b) the tax auditor should examine all relevant correspondence, records and evidence in order to determine whether any particular refund/claim has been admitted as due and accepted during the relevant financial year.

There may be practical difficulties in verifying the information in regard to such refunds and credits. It may, therefore, be necessary for the tax auditor to scrutinise the relevant files or subsequent records relating to such refunds while verifying the particulars and also obtain an appropriate management representation.

Under sub-clause (c), the escalation claims accepted during the previous year but not credited to the profit and loss account are to be stated. The escalation claims accepted during the year would normally mean "accepted during the relevant previous year". If such amount has not been credited to the profit and loss account the fact should be brought out. The system of accounting followed in respect of this particular item may also be brought out in appropriate cases. If the assessee is following cash basis of accounting with reference to this item, it

15.31 Advanced Auditing and Professional Ethics

should be clearly brought out since acceptance of claims during the relevant previous year without actual receipt has no significance in cases where cash method of accounting is followed.

Sub-clause (d) covers any other items which the tax auditor considers as an income of the assessee based on his verification of records and other documents and information gathered, but which has not been credited to the profit and loss account. In giving the details under sub-clauses (c) and (d), due regard should be given to AS-9 - Revenue Recognition.

The tax auditor should scrutinise all the items including casual and nonrecurring items appearing in the books of account, particularly the credit items, and ensure himself whether any such credit which is in the nature of income has been credited to the profit and loss account or not.

Under sub-clause (e), capital receipt, if any, which has not been credited to the profit and loss account has to be stated. The tax auditor should use his professional expertise and judgement in determining whether the receipt is capital or revenue. The tax auditor may record various judicial pronouncements on which he has relied in his working papers.

The following is an illustrative list of capital receipts which, if not credited to the profit and loss account, are to be stated under this sub-clause.

- (a) Capital subsidy received in the form of Government grants which are in the nature of promoters' contribution i.e., they are given with reference to the total investment of the undertaking or by way of contribution to its total capital outlay. For e.g. Capital Investment Subsidy Scheme.
- (b) Government grant in relation to a specific fixed asset where such grant is shown as a deduction from the gross value of the asset by the concern in arriving at its book value.
- (c) Compensation for surrendering certain rights.
- (d) Profit on sale of fixed assets/investments to the extent not credited to the profit and loss account.

If during the course of audit auditor finds that certain income (e.g. income referred to in section 41(1)) are not credited to profit and loss account, the particulars of the same along with the amount is required to be reported under this clause.

Clause 17: Where any land or building or both is transferred during the previous year for a consideration less than value adopted or assessed or assessable by any authority of a State Government referred to in section 43CA or 50C, please furnish:

Details of property	Consideration received or accrued	Value adopted or assessed or assessable

Where any land or building or both is transferred during the previous year for a consideration less than value adopted or assessed or assessable by any authority of a State Government referred to in section 43CA or 50C, the auditor is required to furnish the following details:

- (a) Details of property
- (b) Consideration received or accrued
- (c) Value adopted or assessed or assessable

In the column requiring the details of property, the auditor has to furnish the details about the nature of property i.e. whether the property transferred by him is land or a building along with the address of such property. If the assessee has transferred more than one property, the detail of all such properties is required to be mentioned. The auditor should obtain a list of all properties transferred by the assessee during the previous year. He may also verify the same from the statement of profit and loss or balance sheet, as the case may be.

Under the heading “consideration received or accrued”, the auditor has to furnish the amount of consideration received or accrued, during the relevant previous year of audit, in respect of land/building transferred during the year as disclosed in the books of account of the assessee.

For reporting the value adopted or assessed or assessable, the auditor should obtain from the assessee a copy of the registered sale deed in case, the property is registered. In case the property is not registered, the auditor may verify relevant documents from relevant authorities or obtain third party expert like lawyer, solicitor representation to satisfy the compliance of section 43CA/ section 50C of the Act. In exceptional cases where the auditor is not able to obtain relevant documents, he may state the same through an observation in his report 3CA/CB.

Auditor would have to apply professional judgment as to what constitutes land or building for e.g. whether leasehold right / development rights / TDR / FSI etc would fall under this provisions or not, would require to be evaluated based on facts & circumstances of transactions.

Clause 18: Particulars of depreciation allowable as per the Income-tax Act, 1961 in respect of each asset or block of assets, as the case may be, in the following form:-

- (a) **Description of asset/block of assets.**
- (b) **Rate of depreciation.**
- (c) **Actual cost or written down value, as the case may be.**
- (d) **Additions/deductions during the year with dates; in the case of any addition of an asset, date put to use; including adjustments on account of –**
 - (i) **Central Value Added Tax credits claimed and allowed under the Central Excise Rules, 1944, in respect of assets acquired on or after 1st March, 1994,**
 - (ii) **change in rate of exchange of currency, and**
 - (iii) **subsidy or grant or reimbursement, by whatever name called.**
- (e) **Depreciation allowable.**
- (f) **Written down value at the end of the year.**

Having regard to the nature of requirements prescribed, it may be necessary for the tax

15.33 Advanced Auditing and Professional Ethics

auditor to examine:

- (a) Classification of the asset
- (b) Classification thereof to a block
- (c) The working of actual cost or written down value
- (d) The date of acquisition and the date on which it is put to use
- (e) The applicable rate of depreciation
- (f) The additions / deductions and dates thereof
- (g) Adjustments required – specified as well as on account of sale, etc.

For the purpose of determining the rate of depreciation, the tax auditor has to examine the classification of the assets into various blocks. The purpose for which the asset is used is also very material in this regard. Hence, the tax auditor should ensure that the classification as made by the assessee is in consonance with legal principles. In this connection, he should traverse through judicial pronouncements as well as through the past assessment history of the assessee, and upon an analysis thereof, if he comes to the conclusion that the matter is not free from doubt or controversy, he has to indicate the fact in his report by way of suitable qualification. It may also be necessary to rely upon technical data for determining the proper classification of the block. Since the tax auditor is not a technical expert, he has to obtain suitable certificate from concerned experts.

The tax auditor must have due regard to the Income-tax Rules, 1962, relevant clarifications from the Department and judicial decisions.

Under sub-clauses (a) to (b), information in respect of description of assets, block of assets under which the concerned asset is classifiable and the rate of depreciation are to be stated. This will include information about the existing assets. In respect of the existing assets, the computation of depreciation would involve stating the opening written down value of the block of assets which should be taken from the relevant income-tax records. The tax auditor will be conducting the audit in the current year only. As such the tax auditor can rely upon the classification of assets and written down value stated in the income tax records available with the assessee. The tax auditor should mention the fact that he has relied upon the income tax records of the assessee in respect of the information regarding the classification of assets and written down value of the existing assets.

For the purpose of determination of actual cost, the tax auditor has to be guided by the relevant legal provisions. Since determination of actual cost has got accounting implications, he can rely on the relevant Accounting Standards and Guidance Notes.

The additions/deductions during the year have to be reported, with dates. The tax auditor is advised to get the details of each asset or block of asset added during the year or disposed of during the year with the dates of acquisition/disposal. Where any addition was made, the date on which the asset was put to use is to be reported. In respect of deductions, the sale value of the assets disposed of along with dates should be mentioned. To ascertain when the asset has been put to use, the tax auditor could call for basic records like production

records/installation details/excise records/service tax records/records relating to power connection for operating the machine and any other relevant evidence.

Details have to be given in respect of adjustments on account of three factors. The first adjustment relates to CENVAT claimed and allowed under the Central Excise Rules, 1944 in respect of assets acquired on or after 1st March, 1994.

The second adjustment relates to the change in the rate of exchange of currency. Section 43A deals with the adjustment on account of change in the rate of exchange of currency.

The third adjustment relates to the subsidy or grant or reimbursement, by whatever name called. Explanation 10 to section 43(1) provides that where a portion of the cost of an asset acquired by the assessee has been met directly or indirectly by the Central Government or a State Government or any authority established under any law or by any other person, in the form of a subsidy or grant or reimbursement (by whatever name called), then, so much of the cost as is relatable to such subsidy or grant or reimbursement shall not be included in the actual cost of the asset to the assessee.

Finally, the amount of depreciation allowable and the WDV at the year end have to be stated. The tax auditor will need to verify the claim of additional depreciation under this clause as well.

Wherever, the full deduction of the cost of capital goods is allowed (e.g. expenditure on Scientific Research u/s. 35) the auditor should verify that the cost of such asset is not included in the block of assets for the purpose of depreciation.

Clause 19: Amounts admissible under sections:

Section	Amount debited to profit and loss account	Amounts admissible as per the provisions of the Income-tax Act, 1961 and also fulfills the conditions. If any specified under the relevant provisions of Income-tax Act, 1961 or Income-tax Rules, 1962 or any other guidelines, circular, etc., issued in this behalf.
32AC 33AB 33ABA 35(1)(i) 35(1)(ii) 35(1)(ia) 35(1)(iii) 35(1)(iv) 35(2AA) 35(2AB) 35ABB 35AC		

15.35 Advanced Auditing and Professional Ethics

35AD		
35CCA		
35CCB		
35CCC		
35CCD		
35D		
35DD		
35DDA		
35E		

The assessee can claim deduction under the sections 32AC, 33AB, 33ABA, 35, 35ABB, 35AC, 35AD, 35CCA, 35CCB, 35CCC, 35CCD, 35D, 35DD, 35DDA and 35E subject to the terms and conditions mentioned in these Sections.

The Tax Auditor should indicate the amount debited to the Profit & Loss Account and the amount actually admissible in accordance with the applicable provisions of law.

The amount not debited to the Profit & Loss Account but admissible under any of the Sections mentioned in the clause have to be stated. For example, sections 33AB and 33ABA allow deduction in respect of amount deposited in designated account for specified purposes which, as per accounting principles, are not to be debited to the Profit & Loss Account. In this connection, the Tax Auditor has to work out, on the basis of the conditions prescribed in the concerned Section, the amount admissible there under and report the same.

An assessee may be eligible for deduction under one or more sub-sections of section 35. In such case, the Tax Auditor should state the deduction allowable under each sub-section separately under applicable part, i.e. the amount deductible in respect of the amount debited in Profit & Loss Account and the amount not debited to the Profit & Loss Account.

The Tax Auditor should also ensure the eligibility of the expenditure/payment for deduction and compliance of the conditions prescribed in the sub-section including approval from the relevant/prescribed authority, notification issued by the Central Government, any other guideline circular etc. issued in this behalf. Tax auditor should also refer Rule 6 of Income-tax Rules, 1962.

In case the auditor relies on a judicial pronouncement, he may mention the fact in his observations para provided in Form No.3CA or Form No.3CB, as the case may be.

Where under any section an assessee is eligible for deduction under one or more of the sub-sections of the said section, the Tax Auditor should certify the amount of deduction available under each sub-section separately in the applicable part, i.e. the amount deductible in respect of the amount debited to Profit & Loss Account and the amount not debited to the Profit & Loss Account.

Clause 20(a): Any sum paid to an employee as bonus or commission for services rendered, where such sum was otherwise payable to him as profits or dividend. [Section 36(1)(ii)].

Clause 20(b): Details of contributions received from employees for various funds as referred to in section 36(1)(va):

Serial number	Nature of fund	Sum received from employees	Due date for payment	The actual amount paid	The actual date of payment to the concerned authorities

Explanation for Clauses 20(a) and (b): Section 36(1)(ii) provides for deduction of any sum paid to an employee as bonus or commission for services rendered where such sum would not have been payable to him as profit or dividend, if it had not been paid as bonus or commission. In other words, if bonus or commission is in the nature of profit or dividend, it may not be normally allowable as a deduction unless such payment is wholly and exclusively made to the employee. [Shahzada Nand & Sons v. CIT [1977]] 108 ITR 358 (SC).

Under Clause 20(b), the requirement is only in respect of the disclosure of the amount and the tax auditor is not expected to express his opinion about its allowability or otherwise. The tax auditor should verify the employment/ contract details of the employees so as to ascertain the nature of payments.

The tax auditor should get a list of various contributions recovered from the employees which come within the scope of this clause and the date on which it is deposited. He should also verify the documents relating to provident funds and other welfare funds. He should verify the agreement under which employees have to make contributions to provident fund and other welfare funds. The ledger account of contributions from employees should be reviewed; the due dates of payments and the actual dates of payment should be verified with the evidence available. In view of the voluminous nature of the information, the tax auditor can apply test checks and compliance tests to satisfy himself that the system of recovery and remittance is proper. Under this clause, details regarding the nature of fund, details of the amount deducted, due date for payment, actual amount paid and actual date of payment to the concerned authorities in respect of provident fund, ESI fund or other staff welfare fund have to be stated.

Clause 21(a): Please furnish the details of amounts debited to the profit and loss account, being in the nature of Capital, personal, advertisement expenditure etc.:

Nature	Serial number	Particulars	Amount in ₹
Capital Expenditure			
Personal Expenditure			

15.37 Advanced Auditing and Professional Ethics

Advertisement expenditure in any souvenir, brochure, tract, pamphlet or the like published by a political party			
Expenditure incurred at clubs being entrance fees and subscriptions			
Expenditure incurred at clubs being cost for club services and facilities used.			
Expenditure by way of penalty or fine for violation of any law for the time being force			
Expenditure by way of any other penalty or fine not covered above			
Expenditure incurred for any purpose which is an offence or which is prohibited by law			

Expenditure of Capital nature:

Capital expenditure is not allowable in computing business income unless specifically provided in any sections of the Act.

The details of capital expenditure, if any, debited to the profit and loss account should be maintained in a classified manner stating the amount under various heads separately. Since part of this capital expenditure may be allowable as deduction in the computation of total income, it is advisable to maintain particulars regarding the nature of expenditure, the amount of expenditure incurred, and the relevant provision under which the expenditure is admissible. However, the total amount of capital expenditure debited to the profit and loss account is to be reported under this clause in the e-filing portal.

Expenditure of personal nature:

Personal expenses debited to the profit and loss account are to be specified under this sub-clause as they are not deductible in the computation of total income under section 37.

Section 143(1)(e) of the Companies Act 2013 specifically requires the auditor to inquire whether personal expenses have been charged to revenue account. In the case of a person whose accounts of the business or profession have been audited under any other law, the tax auditor will have to report in respect of personal expenses debited in the profit and loss

account. In the case of a person who carries on business or profession but who is not required by or under any other law to get his accounts audited, the tax auditor will have to verify the personal expenses if debited in the expenses account while conducting the audit and verify the amount of expenses mentioned under this clause.

Expenditure on advertisement in any souvenir, brochure, tract, pamphlet or the like, published by a political party:

Section 37(2B) provides that no allowance shall be made in respect of expenditure incurred by an assessee on advertisement in any souvenir, brochure, tract, pamphlet or the like published by a political party. Therefore, the expenditure of this nature should be segregated and reported under this clause.

The tax auditor may come across advertising expenditure incurred on advertising in a souvenir, brochure, tract, pamphlet or journal published by a trade union or a labour union formed by a political party. The trade union or labour union though promoted or formed by a political party may have a distinct legal entity.

Expenditure incurred at clubs being cost for club services and facilities used, entrance fees and subscriptions:

The amount of payments made to clubs by the assessee during the year being cost for club services and facilities used should be indicated under this clause. The payments may be for entrance fees as well as membership subscription and for catering and other services by the club, both in respect of directors and other employees in case of companies and for partners or proprietors in other cases. The fact whether such expenses are incurred in the course of business or whether they are of personal nature should be ascertained. If they are personal in nature, they are to be shown separately under Clause 21(a) referred to earlier. This clause requires reporting of particulars and the amount of such expenses incurred in the respective fields.

Expenditure by way of penalty or fine for violation of any law for the time being in force; Expenditure by way of penalty or fine not covered above; Expenditure incurred for any other purpose which is an offence or is prohibited by law:

This clause requires separate reporting of penalty or fine for violation of any law for the time being in force, and any other penalty or fine. The tax auditor should obtain in writing from the assessee the details of all payments by way of penalty or fine for violation of any laws have been made and paid or incurred during the relevant previous year and how such amounts have been dealt with in the books of accounts produced for audit.

In order to ascertain the facts whether the sum debited in the profit and loss account is by way of penalty or fine for any violation of law, the tax auditor will have to refer to the relevant law under which the amount has been paid or incurred and ascertain whether such amount is in the nature of penalty or fine.

Clause 21(b): Amounts inadmissible under section 40(a):

(i) as payment to non-resident referred to in sub-clause (i)

(A) Details of payment on which tax is not deducted:

- (I) date of payment
- (II) amount of payment
- (III) nature of payment
- (IV) name and address of the payee
- (B) Details of payment on which tax has been deducted but has not been paid during the previous year or in the subsequent year before the expiry of time prescribed under section 200(1)
 - (I) date of payment
 - (II) amount of payment
 - (III) nature of payment
 - (IV) name and address of the payee
 - (V) amount of tax deducted
- (ii) as payment referred to in sub-clause (ia)
 - (A) Details of payment on which tax is not deducted:
 - (I) Date of payment
 - (II) Amount of payment
 - (III) Nature of payment
 - (IV) Name and address of the payee
 - (B) Details of payment on which tax has been deducted but has not been paid on or before the due date specified in sub-section (1) of section 139.
 - (I) Date of payment
 - (II) Amount of payment
 - (III) Nature of payment
 - (IV) Name and address of the payer*
 - (V) Amount of tax deducted
 - (VI) Amount out of (V) deposited, if any
- (iii) Under sub-clause (ic) [wherever applicable]
- (iv) Under sub-clause (iia)
- (v) Under sub-clause (iib)
- (vi) Under sub-clause (iii)
 - (A) Date of payment
 - (B) Amount of payment
 - (C) Name and address of the payee
- (vii) Under sub-clause (iv)

(viii) Under sub-clause (v)

***should be read as “payee” for proper reporting.**

This clause is substantially expanded to furnish detailed information for deduction and deposit of TDS. Section 40(a) specifies certain amounts which shall not be deducted in computing the income chargeable under the head “Profits and gains of business or profession”. In case where the assessee submits that any sum debited to profit and loss account is not inadmissible under the provisions of sub-section (a) of section 40, the tax auditor may exercise his judgement in the light of the applicable laws and report accordingly about the compliance of this provision. The tax auditor may rely upon the judicial pronouncements while taking any particular view. In case of difference of opinion between the tax auditor and the assessee, the tax auditor should state both the view points. In case of voluminous nature of the information, the tax auditor can apply materiality principles, tests checks and compliance tests for verifying the information required to be provided under this clause.

Clause 21(c): Amounts debited to profit and loss account being, interest, salary, bonus, commission or remuneration inadmissible under section 40(b)/40(ba) and computation thereof.

The tax auditor is required to state the inadmissible amount under section 40(b)/40(ba) and such information is also required to be given in respect of interest/ remuneration paid to a member of an Association of persons (AOP)/Body of individuals (BOI). By Finance Act (No.2) 2009, w.e.f. 1.4.2010, the term firm includes LLP (as registered under the provisions of LLP Act, 2008) The word "inadmissible" implies that the tax auditor will have to examine the facts, apply the conditions for allowance or disallowance and accordingly determine the prima facie inadmissibility of the deduction and also quantify the same.

In order to determine the amounts inadmissible under section 40(b), the tax auditor should obtain the computation of total income from the assessee.

The tax auditor should maintain the information in the prescribed format as a part of his working papers and report appropriately in the format provided in the e-filing utility. The tax auditor may note that the information required to be reported is the amount of inadmissible expenditure as per section 40(b) or 40(ba) and not the total amount debited to profit and loss account.

Clause 21(d): Disallowance/deemed income under section 40A(3).

(A) On the basis of the examination of books of account and other relevant documents/evidence, whether the expenditure covered under section 40A(3) read with rule 6DD were made by account payee cheque drawn on a bank or account payee bank draft. If not, please furnish the details:

Serial Number	Date of Payment	Nature of Payment	Amount	Name and Permanent Account Number of the payee, if available

(B) On the basis of the examination of books of account and other relevant documents/evidence, whether the payment referred to in section 40A(3A) read with rule

15.41 Advanced Auditing and Professional Ethics

6DD were made by account payee cheque drawn on a bank or account payee bank draft
If not, please furnish the details of amount deemed to be the profits and gains of business or profession under section 40A(3A):

Serial Number	Date of Payment	Nature of Payment	Amount	Name and Permanent Account Number of the payee, if available

For the purpose of furnishing the above particulars, the tax auditor should obtain a list of all cash payments in respect of expenditure exceeding ₹ 20,000 (₹ 35000/- in case of plying, hiring or leasing goods carriages w.e.f. 1.10.2009) made by the assessee during the relevant year which should include the list of payments exempted in terms of Rule 6DD with reasons. This list should be verified by the tax auditor with the books of account in order to ascertain whether the conditions for specific exemption granted under clauses (a) to (l) of Rule 6DD are satisfied. Details of payments which do not satisfy the above conditions should be stated under this clause.

The tax auditor has to take into account the technological advancements in the field of banking and information technology where payments have been taken other than through an account payee cheque or bank draft.

Clause 21(e): provision for payment of gratuity not allowable under section 40A(7).

As per section 40A(7), the deduction shall be allowed in relation to any provision made by the assessee for the purpose of payment of a sum by way of any contribution towards an approved gratuity fund, or for the purpose of payment of any gratuity, that has become payable during the previous year.

The tax auditor should call for the order of the Commissioner of Income-tax granting approval to the gratuity fund, verify the date from which it is effective and also verify whether the provision has been made as provided in the trust deed.

In case the provision made for payment of gratuity is not allowable under section 40A(7), the same is to be stated under this sub-clause.

Clause 21(f): any sum paid by the assessee as an employer not allowable under section 40A(9).

Under section 40A(9) any payment made by an employer towards the setting up or formation of or as contribution to any fund, trust, company, association of persons, body of individuals, society registered under the Societies Registration Act, 1860, or other institutions (other than contributions to recognised provident fund or approved superannuation fund or notified pension scheme or approved gratuity fund) is not allowable. The tax auditor should furnish the details of payments which are not allowable under this section.

Clause 21(g): particulars of any liability of a contingent nature.

The assessee is required to furnish particulars of any liability of a contingent nature debited to the profit and loss account. The tax auditor may not be able to immediately ascertain the details of contingent liabilities debited to the profit and loss account without a detailed scrutiny

of various account heads e.g. outstanding liabilities, provision etc. Accounting policy followed and disclosed would be helpful in ascertaining and verifying details. The expenses relating to disputed claims will be revealed only on the basis of the scrutiny of records relating to contingent liabilities. The tax auditor may look into particular items of contingent liabilities of the earlier year in order to determine whether or not any items has been charged to the profit and loss account of the current year and if so, whether the liability continues to be contingent in nature. Wherever necessary, a suitable note should be given by the tax auditor as to the non-availability of such particulars relating to the contingent liabilities.

Clause 21(h): Amount of deduction inadmissible in terms of section 14A in respect of the expenditure incurred in relation to income which does not form part of the total income.

The tax auditor shall examine the details of amount of inadmissible expenditure as furnished by the assessee. While carrying out such examination the tax auditor is entitled to rely on the management representation. However, Standard on Auditing (SA) 580, "Written Representations" may be referred to.

The tax auditor will verify the amount of inadmissible expenditure as estimated by the assessee with reference to established principles of allocation of expenditure based on logical parameters like proportion of exempt and taxable income recorded, turnover, man hours spent to earn the relevant income etc. For allocation of interest between taxable and non-taxable income, the quantum of investment, the period and the rate of interest are generally the relevant factors to be considered. This requires proper estimates to be made by the assessee. The tax auditor is required to audit such estimates. Attention is invited to Standard on Auditing - 540 "Audit of Accounting Estimates, including Fair value Accounting Estimates and Related Disclosures".

An assessee may claim that no expenditure has been incurred by him in relation to income which does not form part of the total income under the Act. Even in such a case the provisions of section 14A will apply. Accordingly, the tax auditor is required to verify such contention of the assessee.

Clause 21(i): amount inadmissible under the proviso to section 36(1)(iii).

The provisions of section 36(1)(iii) provide that the amount of the interest paid in respect of capital borrowed for the purposes of the business or profession would be allowed as a deduction in computing the income referred to in section 28 of the Act.

The proviso thereunder (inserted by the Finance Act, 2003 w.e.f. A.Y. 2004-05) provides that any amount of the interest paid, in respect of capital borrowed for acquisition of an asset for extension of existing business or profession (whether capitalized in the books or account or not) for any period beginning from the date on which the capital was borrowed for acquisition of the asset till the date on which such asset was put to use, shall not be allowed as a deduction.

The extension of an existing business or profession is a fact based exercise and the tax auditor should apply the professional judgment in determining the applicability of the proviso.

15.43 Advanced Auditing and Professional Ethics

The tax auditor is also advised to verify the treatment given for such asset under other provision of the Act like Chapter VI A deductions or under other statutes.

The tax auditor has to verify the correctness of the particulars furnished by the assessee with the documentary evidence.

Clause 22: Amount inadmissible under section 23 of the Micro, Small and Medium Enterprises Development Act, 2006.

This clause was inserted by the Central Board of Direct Taxes through its Notification No. 36/2009 dated 13-4-2009, in the Form No.3CD in Appendix II of the Income-tax Rules, 1962.

The tax auditor is required to state the amount of interest inadmissible under section 23 of the Micro, Small and Medium Enterprises Development Act, 2006. The Micro, Small and Medium Enterprises Development Act, 2006 (MSME Act) is an Act to provide for facilitating the promotion and development and enhancing the competitiveness of micro, small and medium enterprises and for matters connected therewith or incidental thereto.

Section 23 of the MSME Act lays down that an interest payable or paid by the buyer, under or in accordance with the provisions of this Act, shall not for the purposes of the computation of income under the Income-tax Act, 1961 be allowed as a deduction.

The inadmissible interest has to be determined on the basis of the provisions of the MSME Act.

The tax auditor while reporting in respect of clause 22 should take the following steps:

- (a) The auditor should seek information regarding status of the enterprise i.e. whether the same is covered under the Micro, Small and Medium Enterprises Development Act, 2006. Where the information is available and has been disclosed the same should be reported as such in Form No. 3CD. Where the information is not available the auditor should also mention the same in the Form No.3CD.
- (b) Since Section 22 of the Micro, Small and Medium Enterprises Development Act, 2006 requires disclosure of information, the tax auditor should cross check the disclosure made in the financial statements.
- (c) Obtain a full list of suppliers of the assessee which fall within the purview of the definition of "Supplier" under section 2(n) of the Micro, Small and Medium Enterprises Development Act, 2006. It is the responsibility of the auditee to classify and identify those suppliers who are covered by this Act.
- (d) Review the list so obtained.
- (e) Verify from the books of account whether any interest payable or paid to the buyer in terms of section 16 of the MSME Act has been debited or provided for in the books of account.
- (f) Verify the interest payable or paid as mentioned above on test check basis.
- (g) Verify the additional information provided by the auditee relating to interest under section 16 in his financial statement.

- (h) If on test check basis, the auditor is satisfied, then the amount so debited to the profit and loss account should be reported under clause 22.

Where the tax auditor, upon due verification, finds that the auditee has neither provided for nor paid any interest payable under the MSME Act, the no amount is inadmissible under section 23 of MSME Act. In such a case, appropriate reporting should be made against this clause in the format provided in the e-filing utility.

Clause 23: Particulars of payments made to persons specified under section 40A(2)(b).

Section 40(A)(2) provides that expenditure for which payment has been or is to be made to certain specified persons listed in the section may be disallowed if, in the opinion of the Assessing Officer, such expenditure is excessive or unreasonable having regard to:

- (i) the fair market value of the goods, services or facilities for which the payment is made; or
- (ii) for the legitimate needs of business or profession of the assessee; or
- (iii) the benefit derived by or accruing to the assessee from such expenditure.

Further, proviso to section 40A(2)(a) provides that no disallowance on account of any expenditure being excessive or unreasonable having regard to the fair market value, shall be made in respect of a specified domestic transaction referred to in section 92BA, if such transaction is at arm's length price as defined in clause (ii) of section 92F.

The section enjoins on the Assessing Officer the power to fix the quantum of disallowance. Under this clause, the particulars of payments coming under this sub-section are to be stated. The following steps may be taken by the tax auditor in this connection:

- (a) Obtain full list of specified persons as contemplated in this section.
- (b) Obtain details of expenditure/payments made to the specified persons.
- (c) Scrutinise all items of expenditure/payments to the above persons.
- (d) It may be difficult to locate all such payments and it may also involve a time consuming effort. It is, however, possible to localise the area of enquiry.

Clause 24: Amounts deemed to be profits and gains under section 32AC, 33AB or 33ABA or 33AC.

Section 32AC allows deduction @ 15% in respect of Investment in new Plant & Machinery to a company who is engaged in the business of manufacture or production of any article or thing and who acquires and installs new asset after the 31st day of March, 2013 but before the 1st day of April, 2015 and the aggregate actual cost of such new assets exceeds one hundred crore rupees. The Finance Act, 2014 has amended section 32AC w.e.f. financial year 2014-15. The investment limit in the plant and machinery has been reduced to ₹ 25 crores from ₹ 100 crores. The auditor is required to report the deemed income chargeable as profits and gains of business under the circumstances specified in sub sections (2) of section 32AC. Only because section 32AC(2) provides for chargeability of deemed income under the head "profit and gains from business or profession" in addition to taxability of capital gains, the auditor is not required to report any capital gains/losses arising on transfer on the said asset. The tax auditor will be required to verify the compliance to the conditions of the provisions of section 32AC and report

15.45 Advanced Auditing and Professional Ethics

the claim of deduction accordingly.

Clause 25: Any amount of profit chargeable to tax under section 41 and computation thereof.

The tax auditor should obtain a list containing all the amounts chargeable under section 41 with the accompanying evidence, correspondence, etc. He should in all relevant cases examine the past records to satisfy himself about the correctness of the information provided by the assessee. The tax auditor has to state the profit chargeable to tax under this section. This information has to be given irrespective of the fact whether the relevant amount has been credited to the profit and loss account or not. The computation of the profit chargeable under this clause is also to be stated.

The tax auditor should maintain the following in his working papers for the purpose of furnishing details required in the format provided in the e-filing utility:

Sr. No.	Name of person	Amount of income	Section	Description of transaction	Computation if any
1	2	3	4	5	6

Clause 26: In respect of any sum referred to in clause (a), (b), (c), (d), (e) or (f) of section 43B, the liability for which:-

- (A) pre-existed on the first day of the previous year but was not allowed in the assessment of any preceding previous year and was**
- (a) paid during the previous year;**
 - (b) not paid during the previous year;**
- (B) was incurred in the previous year and was**
- (a) paid on or before the due date for furnishing the return of income of the previous year under section 139(1);**
 - (b) not paid on or before the aforesaid date.**

(State whether sales tax, customs duty, excise duty or any other indirect tax, levy, cess, impost etc. is passed through the profit and loss account.)

In the case of an assessee maintaining its accounts on the mercantile system, the tax auditor should verify the aforesaid particulars of section 43B from the books of account for the year under audit as well as from the books of account, vouchers and documents of the immediately succeeding assessment year as well as return of income for the earlier assessment years so that the information about the aforesaid payments made in the subsequent year can be furnished.

The tax auditor, in his tax audit report, should clearly distinguish the liability incurred during the previous year in respect of all the specified sums referred to in clauses (a) to (f) from the liability that pre-existed on the first day of the relevant previous year.

In some cases the tax auditor may find amounts of the nature referred to in section 43B being credited to the profit and loss account although the relevant provisions for such liability had

not been allowed as a deduction in any previous year in view of the specific provisions of section 43B requiring actual payment as a condition precedent to allowance. The amounts so credited to the profit and loss account are not chargeable to tax since the conditions referred to in section 41(1) have not been satisfied. The tax auditor should identify such items and maintain the same in his working papers.

Clause 27(a): Amount of Central Value Added Tax credits availed of or utilized during the previous year and its treatment in the profit and loss account and treatment of outstanding Central Value Added Tax credits in the accounts.

CENVAT credit is available on eligible inputs, input services and capital goods. Such credits are utilized for the payment of the excise duty and service tax liability. Accordingly the tax auditor should check relevant statutory records maintained under the Central Excise Rules, 2002 and the records maintained under CENVAT Credit Rules, 2004 and ascertain therefrom the amount of credit on eligible inputs, input services and the capital goods and the amount utilised during the previous year. Records maintained in RG-23, wherever available should also be verified.

The tax auditor should verify that there is a proper reconciliation between balance of CENVAT credit in the accounts and relevant excise and service tax records. The tax auditor should report the amount of CENVAT availed and utilised under this sub-clause. In a given case CENVAT availed may be lesser than the CENVAT credit utilised during the year on account of opening balance in CENVAT account or vice-versa and as such it would be advisable, in order to avoid any misleading conclusion and inferences, to report the opening and closing balances of CENVAT. Further the sub-clause requires reporting of the credits availed of or utilized during the previous year, it is desirable to report both the credits availed and the credits utilized.

In so far as the reporting of accounting treatment of CENVAT credit is concerned the clause requires that its treatment in profit and loss account and the treatment of outstanding CENVAT credit in the account have to be reported upon.

The tax auditor should maintain the following information in his working papers for the purpose of reporting in the format provided in the e-filing utility:

CENVAT	Amount	Treatment in Profit & Loss Accounts
Opening balance		
CENVAT Availed		
CENVAT utilized		
Closing / outstanding Balance		

Clause 27(b): Particulars of income or expenditure of prior period credited or debited to the profit and loss account.

It may be noted that information under this clause would be relevant only in those cases where the assessee follows mercantile system of accounting. Under cash system of

15.47 Advanced Auditing and Professional Ethics

accounting, expenses debited/ income credited to the profit and loss account would be current year's expenses/income even though they may relate to earlier years. The tax auditor should obtain the particulars of expenditure or income of any earlier year debited or credited to the profit and loss account of the relevant previous year when mercantile system of accounting is followed. In the case of a person whose accounts of the business or profession have been audited under any other law, the information may be available from annual accounts. In the case of a person who carries on business or profession but who is not required by or under any other law to get his accounts audited, however, a close scrutiny of the ledger in regard to the period for which expenditure or income is entered in the account books may be necessary.

The tax auditor should maintain the following information in his working papers file for the purpose of reporting in the format provided in the e-filing utility:

Sr. No.	Type	Particulars	Amount	Prior Period to which it relates (Year in yyyy-yy format)
1	2	3	4	5

Clause 28: Whether during the previous year the assessee has received any property, being share of a company not being a company in which the public are substantially interested, without consideration or for inadequate consideration as referred to in section 56(2)(viia), if yes, please furnish the details of the same.

Section 56(2)(viia) provides that where a firm or a company not being a company in which the public are substantially interested, receives, in any previous year any property being shares of a company (not being a company in which the public is substantially interested,

- (i) without consideration, the aggregate fair value of which exceeds rupees fifty thousand, the whole of the aggregate fair market value of such property
- (ii) for a consideration which is less than the aggregate fair market value of the property by an amount exceeding fifty thousand rupees, the aggregate fair market value of such property as exceeds such consideration

shall be chargeable to income-tax under the head "Income from other sources"

Section 56(2)(viia) does not apply to the property received by way of a transaction not regarded as transfer under section 47(via), 47(vic), 47(vicb), 47(vid) and 47(vii). The fair market value of shares means the value determined in accordance with the method prescribed in rule 11UA of the Income-tax Rules, 1962.

Since section 56(2)(viia) is applicable to firms and companies in which public is not substantially interested, reporting under this clause is required only for them and not for other assesseees. The auditor should obtain from the auditee, a list containing the details of shares received, if any, by him from any other company and verify the same from the books of accounts and other relevant documents. Such shares, if received will be reflected in the books of accounts either as investments or as stock in trade. In case such shares are received without consideration, the same may not be reflected in the books of accounts. Such shares

may be verified from the relevant documents such as share certificates issued, if any, demat account statement etc. In either case, the same have to be reported under this clause.

For reporting under this clause, the auditor has to consider the provisions of Rule 11UA(1)(c) which provides for manner of determining:

- (a) fair market value of quoted shares and securities received by way of transaction carried out through any recognized stock exchange
- (b) fair market value of quoted shares and securities received by way of transaction carried out OTHER THAN through any recognized stock exchange
- (c) fair market value of unquoted equity shares
- (d) fair market value of unquoted shares and securities other than equity shares in a company which are not listed in any recognized stock exchange

Where for determining the fair market value of unquoted shares and securities other than equity shares in a company which are not listed in any recognized stock exchange, a valuation report has been obtained by the assessee from a merchant banker or an accountant, the auditor should obtain a copy of the same. Here, attention is invited to the Standard on Auditing- 620 "Using the work of an Auditor's expert".

Clause 29: Whether during the previous year the assessee received any consideration for issue of shares which exceeds the fair market value of the shares as referred to in section 56(2)(viib), if yes, please furnish the details of the same.

Section 56(2)(viib) provides that where a company, not being a company in which the public are substantially interested, receives, in any previous year, from any person being a resident, any consideration for issue of shares that exceeds the face value of such shares, the aggregate consideration received for such shares as exceeds the fair market value of the shares shall be chargeable to income-tax under the head "Income from other sources".

The provisions of this clause are not applicable where the consideration is received:

- (a) by a venture capital undertaking from a venture capital company or a venture capital fund
- (b) by a company from a class or classes of persons as may be notified by the Central Government in this behalf.

As per the explanation to section 56(2)(viib), the fair market value shall be the value as may be determined in accordance with such method as prescribed under Rule 11UA or as may be substantiated by the company to the satisfaction of the Assessing Officer, based on the value, on the date of issue of shares, of its assets, including intangible assets being goodwill, know-how, patents, copyrights, trademarks, licences, franchises or any other business or commercial rights of similar nature, whichever is higher.

Since section 56(2)(viib) is applicable to companies in which public is not substantially interested, reporting under this clause is to be done only for corporate assesseees. The auditor should obtain from the auditee, a list containing the details of shares issued, if any, by him to any person being a resident and verify the same from the books of accounts and other

15.49 Advanced Auditing and Professional Ethics

relevant documents. Attention is invited to the provisions of section 2(18) which defines the company in which public are substantially interested.

For reporting under this clause with respect to quoted shares, the auditor has to consider the provisions of Rule 11UA(1)(c)(a) which provides for manner of determining:

- (a) fair market value of quoted shares and securities received by way of transaction carried out through any recognized stock exchange
- (b) fair market value of quoted shares and securities received by way of transaction carried out OTHER THAN through any recognized stock exchange

For reporting under this clause with respect to unquoted equity shares, the auditor has to consider the provisions of Rule 11UA(2) which provides for manner of determining the fair market value of unquoted equity shares.

Clause 30: Details of any amount borrowed on hundi or any amount due thereon (including interest on the amount borrowed) repaid, otherwise than through an account payee cheque. [Section 69D].

Details of the amount borrowed on hundi (including interest on such amount borrowed) and details of repayment otherwise than by an account payee cheque, are required to be indicated under this clause.

For this purpose, the tax auditor should obtain a complete list of borrowings and repayments of hundi loans otherwise than by account payee cheques and verify the same with the books of account.

Clause 31 (a)* Particulars of each loan or deposit in an amount exceeding the limit specified in section 269SS taken or accepted during the previous year:-

- (i) name, address and permanent account number (if available with the assessee) of the lender or depositor;
- (ii) amount of loan or deposit taken or accepted;
- (iii) whether the loan or deposit was squared up during the previous year;
- (iv) maximum amount outstanding in the account at any time during the previous year;
- (v) whether the loan or deposit was taken or accepted otherwise than by an account payee cheque or an account payee bank draft.

***(These particulars need not be given in the case of a Government company, a banking company or a corporation established by a Central, State or Provincial Act.)**

Section 269SS prescribes the mode of taking or accepting certain loans and deposits. As per this section, no person shall take or accept from any other person any loan or deposit otherwise than by an account payee cheque or account payee bank draft if,-

- (a) the amount of such loan or deposit or the aggregate amount of such loan and deposit; or
- (b) on the date of taking or accepting such loan or deposit, any loan or deposit taken or accepted earlier by such person from the depositor is remaining unpaid (whether

repayment has fallen due or not), the amount or the aggregate amount remaining unpaid;
or

- (c) the amount or the aggregate amount referred to in clause (a) together with the amount or the aggregate amount referred to in clause (b),

is twenty thousand rupees or more.

For the purposes of section 269SS "loan or deposit" means loan or deposit of money.

If the total of all loans/deposits from a person exceed ₹ 20,000/- but each individual item is less than ₹ 20,000/-, the information will still be required to be given in respect of all such entries starting from the entry when the balance reaches ₹ 20,000/- or more and until the balance goes down below ₹ 20,000/-. As such the tax auditor should verify all loans/deposits taken or accepted where balance has reached ₹ 20,000 or more during the year for the purpose of reporting under this clause.

The tax auditor has to take into account the technological advancements in the field of banking and information technology where loans have been taken other than through an account payee cheque or bank draft which are capable of being tracked such as bank transactions made electronically through the internet or through mail transfer or telegraphic transfer. These types of payments, though not made by account payee cheques in the conventional manner are capable of being tracked. In order to judicially apply the provisions of section 269SS, the tax auditor need not report such cases under this clause. The Finance (No.2) Act, 2014 has acknowledged the fact and allowed the "use of electronic clearing system through a bank account" as a permissible mode for the purposes of section 269SS .

As per the proviso to section 269SS, the provisions of section 269SS shall not apply to any loan or deposit taken or accepted from, or any loan or deposit taken or accepted by-

- (a) Government;
- (b) any banking company, post office savings bank or co-operative bank;
- (c) any corporation established by a Central, State or Provincial Act;
- (d) any Government company as defined in section 2(45) of the Companies Act, 2013; Section 617 of the Companies Act, 1956 has been replaced with section 2(45) in the Companies Act, 2013 with effect from 1.4.2014.
- (e) such other institution, association or body or class of institutions, associations or bodies which the Central Government may, for reasons to be recorded in writing, notify in this behalf in the Official Gazette.

The auditor should maintain the prescribed information in his working papers for the purpose of reporting against this clause in the format provided in the e-filing utility. These particulars need not be given in case of a Government Company, a banking company or a corporation established by a Central, State or Provincial Act.

Clause 31(b) Particulars of each repayment of loan or deposit in an amount exceeding the limit specified in section 269T made during the previous year:-

15.51 Advanced Auditing and Professional Ethics

- (i) name, address and permanent account number (if available with the assessee) of the payee;
- (ii) amount of the repayment;
- (iii) maximum amount outstanding in the account at any time during the previous year;
- (iv) whether the repayment was made otherwise than by account payee cheque or account payee bank draft.

(The particulars (i) to (iv) above need not be given in the case of a repayment of any loan or deposit taken or accepted from Government, Government company, banking company or a corporation established by a Central, State or Provincial Act.)

This sub-clause requires particulars of each repayment of loan or deposit in an amount exceeding the limits specified in section 269T made during the previous year. Section 269T after amendment by the Finance Act, 2002 w.e.f. 1.6.2002 is now applicable to repayment of both loans and deposits. Section 269T is attracted where repayment of the loan or deposit is made to a person, where the aggregate amount of loans or deposits held by such person either in his own name or jointly with any other person on the date of such repayment together with interest, if any, payable on such deposit is ₹ 20,000 or more. Explanation (iii) contains a definition of the term “loan or deposit” for the purposes of section 269T. Accordingly, “loan or deposit” means any deposit of money which is repayable after notice or repayable after a period and, in the case of a person other than a company, includes loan or deposit of any nature. As such, all repayments made to any person where the loan or deposit along with interest is ₹ 20,000 or more are to be reported under this sub-clause, even though the amount of repayment may be less than ₹ 20,000. The tax auditor should verify such repayments and report accordingly.

The second proviso to section 269T inserted by the Finance Act, 2003 w.e.f. 1.6.2002 excludes repayments of loans taken from Government, Government company, Banking company, Corporation established by a Central, State or Provincial Act etc from the scope of the above section and therefore the tax auditor need not report such repayments in his report. However, section 269T does not exclude Government companies, banking companies from the scope of its applicability. As such, details of repayment are to be shown in the case of these entities also.

The monetary limit of ₹ 20,000 or more is applicable in respect of a banking company or a cooperative bank with reference to each branch and in all other cases assessee as a whole.

The auditor should maintain the prescribed information in his working papers for the purpose of reporting against this clause in the format provided in the e-filing utility.

Clause 31(c) Whether the taking or accepting loan or deposit, or repayment of the same were made by account payee cheque drawn on a bank or account payee bank draft based on the examination of books of account and other relevant documents

(The comment above need not be given in the case of a repayment of any loan or deposit taken or accepted from Government, Government company, banking company or a corporation established by a Central, State or Provincial Act.)

Under this sub clause the tax auditor has to comment as to whether the taking or accepting loan or deposit, or repayment of the same through an account payee cheque or an account payee bank draft based on the examination of books of accounts & other relevant documents.

In the case of a repayment of any loan or deposit taken or accepted from Government, Government company, banking company or a corporation established by a Central, State or Provincial Act, the particulars (i) to (iv) mentioned in sub-clause (b) of clause 31 and also the comment mentioned above need not be given.

However, section 269T does not exclude loans repaid by Government companies, banking companies, corporation established by a Central, State or Provincial Act from the scope of its applicability. As such, details of repayment made by such entities are to be shown.

It may be noted that the new requirement should be made applicable for the loans and the advances which are in excess of ₹ 20,000/-. This is evident from a harmonious reading of the clause (c) with the clauses (a) and (b).

Clause 32(a) Details of brought forward loss or depreciation allowance, in the following manner, to the extent available:

SI No.	Assessment year	Nature of loss / allowance (in rupees)	Amount as returned (in rupees)	Amount as assessed (give reference to relevant order)	Remarks

The amount of brought forward loss or depreciation allowance is required to be quantified as per return and assessment orders. A reporting format is prescribed for the sake of standardization.

At times while the particular claim for loss/allowance pertains to a particular assessment year as per the return of income, the same may relate to another assessment year as per the assessment order, e.g., depreciation claim in respect of assets capitalized at the end of the financial year. In those cases, once the assessment order is received, the particulars have to be re-stated with reference to the assessment year to which they relate as per the assessment order. This should be accompanied by suitable explanation in the remarks column.

The e-filing utility may require additional information regarding the relevant order. The information is required to be disclosed to the extent available. The tax auditor should consider the above guidance for the purpose of reporting under this clause in the format provided in the e-filing utility.

Clause 32(b) whether a change in shareholding of the company has taken place in the previous year due to which the losses incurred prior to the previous year cannot be allowed to be carried forward in terms of section 79.

Section 79 of the Act provides that, notwithstanding anything contained in Chapter VI of the Act, in the case of a company, not being a company in which the public are substantially interested, where a change in shareholding has taken place in a previous year, then no loss incurred in any year prior to the previous year shall be carried forward and set off against the

15.53 Advanced Auditing and Professional Ethics

income of the previous year unless on the last day of that previous year and on the last day of the previous year in which the loss was incurred, the shares of the company carrying not less than 51% of the voting power were beneficially held by the same persons.

Clause 32(c) whether the assessee has incurred any speculation loss referred to in section 73 during the previous year, if yes, please furnish the details of the same.

Section 73 of the Act provides for the treatment of losses in speculation business. Section 73(1) provides that any loss, computed in respect of a speculation business carried on by the assessee, shall not be set off except against profits and gains, if any, of another speculation business.

The tax auditor should maintain the prescribed information in his working papers for the purpose of reporting against this clause in the format provided in the e-filing utility.

Clause 32(d) whether the assessee has incurred any loss referred to in section 73A in respect of any specified business during the previous year, if yes, please furnish details of the same.

Section 73A provides for provisions relating to carry forward and set off of losses by specified business. It provides that any loss, computed in respect of any specified business referred to in section 35AD shall not be set off except against profits and gains, if any, of any other specified business.

Under clause 32(d), the tax auditor has to verify from the books of accounts and other relevant documents as to whether the assessee is carrying on specified business as referred to under section 35AD. In case the auditor is of the opinion that the assessee is carrying on such specified business, he has to furnish the details of the loss incurred, if any, in respect of any specified business during the previous year. In case the assessee carries on more than one specified businesses and loss has been incurred in both the business, the details of the loss incurred with respect of each business is to be specified separately.

The tax auditor should maintain the prescribed information in his working papers for the purpose of reporting against this clause in the format provided in the e-filing utility.

Clause 32(e) In case of a company, please state that whether the company is deemed to be carrying on a speculation business as referred in explanation to section 73, if yes, please furnish the details of speculation loss if any incurred during the previous year.

The Explanation to section 73 provides that where any part of the business of a company (other than a company whose gross total income consists mainly of income which is chargeable under the heads "Interest on securities", "Income from house property", "Capital gains" and "Income from other sources" or a company the principal business of which is the business of trading in shares or banking or the granting of loans and advances) consists in the purchase and sale of shares of other companies, such company shall, for the purposes of this section, be deemed to be carrying on a speculation business to the extent to which the business consists of the purchase and sale of such shares. The Finance Act, 2014 has amended the explanation to section 73 by deleting the words "the principal business of which is the business of trading in shares" from financial year 2014-2015.

Under this clause, the tax auditor has to furnish the details regarding the speculation losses incurred, if any, as referred in explanation to section 73. The auditor may obtain information in the following format from the assessee and verify the same from the books of account, income tax returns of earlier years and other relevant documents.

The prescribed information so maintained may be used by the tax auditor for the purpose of reporting against this clause in the format provided in the e-filing utility.

Clause 33: Section-wise details of deductions, if any, admissible under Chapter VIA or Chapter III (Section 10A, Section 10AA).

Section under which deduction is claimed	Amounts admissible as per the provision of the Income Tax Act, 1961 and fulfils the conditions, if any, specified under the relevant provisions of Income Tax Act, 1961 or Income Tax Rules, 1962 or any other guidelines, circular, etc., issued in this behalf.

Chapter VIA of the Act deals with various deductions which have to be given effect to by way of allowance from gross total Income of the assessee and they have been categorised under the Act as follows:

- A. Deduction in respect of certain payments.
- B. Deduction in respect of certain incomes.
- C. Other Deductions.

While Chapter III relates to Income which do not form part of total income, the reporting under this clause is required only with respect to exemptions claimed under section 10A (Special provisions in respect of newly established undertakings in free trade Zone etc) and section 10AA (Special provisions in respect of newly established units in Special Economic Zones).

Some sections in Chapter VIA such as section 80-G (donations), Section 80-GGB/80-GGC (contributions to political parties), section 80-JJAA (wages of new workmen) etc. relate to the expenditure incurred by an assessee. There are other sections such as section 80-P (income of co-operative societies), 80-JJA (certain specified business relating treatment of biodegradable waste) etc. which relate to income of the assessee. In respect of all these sections the tax auditor should ascertain whether there is any expenditure or income covered by the above sections recorded in the books of accounts audited by him. Information with regard to such expenditure/income in respect of deduction allowable under Chapter VIA should be given on the basis of the examination of the books of account and other records under clause 33.

Clause 34 (a) Whether the assessee is required to deduct or collect tax as per the provisions of Chapter XVII-B or Chapter XVII-BB, if yes please furnish:

15.55 Advanced Auditing and Professional Ethics

Tax deduction and collection Account Number (TAN)	Section	Nature of payment	Total amount of payment or receipt of the nature specified in column (3)	Total amount on which tax was required to be deducted or collected out of (4)	Total amount on which tax was deducted or collected at specified rate out of (5)	Amount of tax deducted or collected out of (6)	Total amount on which tax was deducted or collected at less than specified rate out of (7)*	Amount of tax deducted or collected on (8)	Amount of tax deducted or collected not deposited to the credit of the Central Government out of ** (6) and *** (8)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)

*Should be read as (5) for proper reporting

** Should be read as (7) for proper reporting

*** Should be read as (9) for proper reporting

While reporting under this clause the tax auditor may exercise his judgement in the light of the applicable laws and report accordingly about the applicability of the provisions of Chapter XVII-B or XVII-BB with regard to the auditee. The tax auditor may rely upon the judicial pronouncements while taking any particular view.

The auditor should obtain a copy of the TDS/TCS returns filed by the assessee which shall form the basis of reporting under this clause, to the extent possible. Further, in view of the voluminous nature of the transactions, the tax auditor can apply test checks and compliance tests on the transactions reported in the TDS return by the assessee for verifying the information required to be provided under this clause.

Clause 34 (b) Whether the assessee has furnished the statement of tax deducted or tax collected within the prescribed time. If not, please furnish the details:

Tax deduction and collection Account Number (TAN)	Type of Form	Due date for furnishing	Date of furnishing, if furnished	Whether the statement of tax deducted or collected contains information about all transactions which are required to be reported

Under clause 34(b), the tax auditor has to ascertain and report as to whether the assessee has furnished the statement of tax deducted or tax collected at source within the prescribed time.

Clause 34(b) also requires the auditor to report the transactions with regard to each TAN for which tax has been deducted but the return has either not been filed or has been filed after the expiry of the prescribed time. With regard to each TAN, the auditor is required to mention the "Type of form" that was applicable like Form 24, 24G, 24Q, 26, 26A, 26B, 26Q etc, due date of furnishing such statement and the actual date of furnishing, if the statement(s) has been furnished. Lastly, the auditor is required to state as to whether the statement of tax deducted or collected, which has been furnished beyond prescribed time contains information about all the transactions which are required to be reported.

Clause 34 (c) whether the assessee is liable to pay interest under section 201(1A) or section 206C(7). If yes, please furnish:

Tax deduction and collection Account Number (TAN)	Amount of interest under section 201(1A)/206C(7) is payable	Amount paid out of column (2) along with date of payment.

Under this clause, the auditor is required to furnish detailed information in case the assessee is liable to pay interest under section 201(1A) or section 206C(7) of the Act. Section 201(1A) provides for payment of interest at a specified rate in case the tax has not been deducted wholly or partly or after deducting has not been paid to the credit of Central Government as required by the Act. Similarly, section 206C(7) provides for payment of interest at a specified rate in case the tax is not collected wholly or partly or if collected not paid to the credit of the Central Government as required by the Act. The reporting as to whether the assessee is liable to pay such interest, should be in consonance with the reporting under clause 34(a) where the details of non-deduction are required to be reported by him.

Clause 35 (a) In the case of a trading concern, give quantitative details of the principal items of goods traded:

- (i) Opening stock;
- (ii) Purchases during the previous year;
- (iii) Sales during the previous year;
- (iv) Closing stock;
- (v) shortage / excess, if any.

The tax auditor should obtain certificates from the assessee in respect of the principal items of goods traded, the balance of the opening stock, purchases, sales and closing stock and the extent of shortage/ excess/damage and the reasons thereof.

Clause 35 (b) In the case of a manufacturing concern, give quantitative details of the principal items of raw materials, finished products and by-products:

- A. Raw materials:**
 - (i) opening stock;
 - (ii) purchases during the previous year;
 - (iii) consumption during the previous year;
 - (iv) sales during the previous year;
 - (v) closing stock;
 - (vi) yield of finished products;
 - (vii) percentage of yield;
 - (viii) shortage / excess, if any.

B. Finished products / By-products:

- (i) opening stock;
- (ii) purchases during the previous year;
- (iii) quantity manufactured during the previous year;
- (iv) sales during the previous year;
- (v) closing stock;
- (vi) shortage / excess, if any.

This information should be given only in respect of those items where it is practicable to do so, having regard to the records maintained by the assessee.

In a large concern it may be difficult for tax auditor to verify each and every item of purchase, consumption and production. In such cases, he may verify the figures on a sampling method and satisfy himself as to the correctness of the figures furnished. This clause requires that quantitative details of "principal items" of raw materials and finished goods should be given. Therefore, information about petty items need not be given. The information about 'yield', 'percentage of yield', and 'shortages/ excess' is also required to be given.

In respect of assesseees other than companies and those whose accounts have not been audited under any other law, the tax auditor should obtain the following certified documents for the principal items of raw materials, finished goods and by-products:

- (a) Certificate from the assessee certifying the balance of the opening stock, purchases, sales and closing stock.
- (b) Certificate to the extent of shortage/excess/damage and the reasons thereof.

Clause 36: In the case of a domestic company, details of tax on distributed profits under section 115-O in the following form:-

- (a) total amount of distributed profits;
- (b) amount of reduction as referred to in section 115-O(1A)(i);
- (c) amount of reduction as referred to in section 115-O(1A)(ii);
- (d) total tax paid thereon;
- (e) dates of payment with amounts.

Section 115-O provides for a special levy at the prescribed rate, on the amount of dividend declared, distributed or paid by such company whether such dividend is out of current profit or accumulated profits. Vide this clause the tax auditor has to report on profit distributed during the financial year and therefore, the amount of tax worked and paid out on such distributed profit at the prescribed rate plus surcharge at the applicable rate on the tax along with the education cess thereon has to be reported against this clause. The amount of the dividend referred to in sub-section (1) is to be reduced by the amount referred to in sub-section (1A). Since the tax is payable on such reduced amount, the gross amount may be reported in the sub-clause (a) and the amount of reduction as referred to in section 115-O(1A)(i) and 115-

O(1A)(ii) shall be reported in sub-clause (b) and (c) separately. The tax auditor should keep the working papers to reveal how the net amount has been arrived at.

The tax auditor should maintain the prescribed information in his working papers for the purpose of reporting against this clause in the format provided in the e-filing utility.

Clause 37: Whether any cost audit was carried out, if yes, give the details, if any, of disqualification or disagreement on any matter/item/value/ quantity as may be reported/identified by the cost auditor.

Clause 38: Whether any audit was conducted under the Central Excise Act, 1944, if yes, give the details, if any, of disqualification or disagreement on any matter/item/value/quantity as may be reported/ identified by the auditor.

Clause 39: Whether any audit was conducted under section 72A of the Finance Act, 1994 in relation to valuation of taxable services, if yes, give the details, if any, of disqualification or disagreement on any matter/item/value/quantity as may be reported/ identified by the auditor.

Explanation for Clauses 37, 38 & 39: The tax auditor should ascertain from the management whether Cost Audit/ Excise Audit under the Central Excise Act, 1944/Service Tax Special Audit as per section 72A of the Finance Act, 1994 and if such audit was carried out, obtain a copy of the report. Even though the tax auditor is not required to make any detailed study of such report, he has to take note of the details if any, of disqualification or disagreement on any matter/item/value/quantity as may be reported / identified by the auditor. The tax auditor need not express any opinion in a case where such audit has been ordered but the same has not been carried out.

In cases where cost audit /excise audit/service tax audit which might have been ordered is not completed by the time the tax auditor issues his report, he has to report appropriately in this report stating that since cost audit is not completed and the cost audit report is not available with the assessee.

The tax auditor should examine the time period for which the cost audit /excise audit/service tax audit if any has been required to be carried out. Information is required to be given only in respect of such cost audit report the time period of which falls within the relevant previous year. In effect the information is required to be given in respect of that cost audit report which is received up to the date of tax audit report.

Clause 40: Details regarding turnover, gross profit, etc., for the previous year and preceding previous year:

Serial number	Particulars	Previous year	Preceding previous year
1.	Total turnover of the assessee		
2.	Gross profit/turnover		
3.	Net profit/turnover		
4.	Stock-in-trade/turnover		
5.	Material consumed/finished goods produced		

15.59 Advanced Auditing and Professional Ethics

(The details required to be furnished for principal items of goods traded or manufactured or services rendered)

These ratios have to be calculated only for assessees who are engaged in manufacturing or trading activities. Moreover, the ratios have to be given for the business as a whole and need not be given product wise. Further, the ratio mentioned in (5) need not be given for trading concern or service provider.

Clause 41: Please furnish the details of demand raised or refund issued during the previous year under any tax laws other than Income Tax Act, 1961 and Wealth tax Act, 1957 along with details of relevant proceedings.

The auditee may be assessed under various tax laws other than Income-tax Act, 1961 and Wealth-tax Act, 1956 resulting into a demand order or a refund order. The tax auditor should obtain a copy of all the demand/ refund orders issued by the governmental authorities during the previous year under any tax laws other than Income Tax Act and Wealth Tax Act. The auditor should exercise his professional judgment in determining the applicability to relevant tax laws for reporting under this clause.

It may be noted that even though the demand/refund order is issued during the previous year, it may pertain to a period other than the relevant previous year. In such cases also, reporting has to be done under this clause. .

If there is any adjustment of refund against any demand, the auditor shall also report the same under this clause.

The tax auditor should maintain the information prescribed in his working papers for the purpose of reporting against this clause in the format provided in the e-filing utility.

SIGNATURE AND STAMP / SEAL OF THE SIGNATORY: Form 3CD has to be signed by the person competent to sign Form No. 3CA or Form No.3CB as the case may be. He has also to give his full name, address, membership number, firm registration number, wherever applicable, place and date. Further, the e-filing portal requires the tax auditor to affix his Digital Signature while registering himself. He is also required to put his stamp/Seal as well.

CODE OF ETHICS AND OTHER MATTERS: Some of the issues which are commonly raised in regard to different aspects of tax audit vis-à-vis the liability / obligations of the tax auditor are considered hereunder.

1. The liability of the tax auditor in respect of tax audit will be the same as in any other audit assignment. It may be noted that when any question relating to the audit conducted by a tax auditor arises, he is answerable to the Council of the Institute under the Chartered Accountants Act. In all matters concerning tax audit, ICAI's disciplinary jurisdiction will prevail.
2. In case the assessee is found guilty of having concealed the particulars of his income it would not ipso facto mean that the tax auditor is also responsible. If the Assessing Officer comes to the conclusion that the tax auditor was grossly negligent in the performance of his duties, he can refer the matter to the ICAI so that appropriate action can be taken against the tax auditor under the Chartered Accountants Act.

3. The Assessing Officer or any other authority who is authorised to issue summons and to call for evidence or documents, can call upon the tax auditor who has audited the accounts to give any evidence or produce documents. For this purpose notice under section 131 can be issued by the Assessing Officer or other tax authority mentioned in the said section.
4. If the actual work relating to examination of books and records is done by a qualified assistant in a firm of chartered accountants and the partner of the firm signing the audit report has relied upon this work, action, if any, for professional negligence can be initiated against the member who has signed the report and in such an event, it would be open for the member concerned to prove that he has taken due care and diligence in the performance of his duties and is not aware of any reason to believe that he should not have so relied.
5. If the qualified assistant (whether or not holding the certificate of practice) is found to be grossly negligent in the performance of his duties, the Council of the Institute can take disciplinary action against him.
6. A tax auditor can accept the assignment of tax representation.
7. Under the Code of Ethics, no tax auditor can charge professional fees by way of percentage of profits or which are contingent upon findings, or results of such employment, except as permitted under any regulation made under this Act
8. Since the figures in Form No. 3CD are duly verified by a chartered accountant, they should normally be accepted by tax authorities. If, however, there is a specific reason for differing from the view taken by tax auditor, the Assessing Officer may compute the income of the assessee by adopting different figures.
9. The opinion expressed by the tax auditor is not binding on the assessee. If the tax auditor has qualified his report and expressed an opinion on a particular item, the assessee may take a different view while preparing his return of income. In such cases, it is advisable for the assessee to state his viewpoint and support the same by any judicial pronouncements on which he wants to rely.

Format of Financial Statements: The tax auditor of a person who carries on business or profession but who is not required by or under any other law to get his accounts audited has to give his report in Forms No. 3CB/3CD and will have to ensure that the financial statements i.e. balance sheet and profit and loss account/ income and expenditure statement, are prepared in such a manner that adequate information which is necessary to convey a true and fair view of the state of affairs of the assessee is given. So far as a person whose accounts of the business or profession have been audited under any other law is concerned, the information to be given in the financial statements is normally provided in the particular statute by which the assessee is governed. Since there is no such legislation in respect of a person who carries on business or profession but who is not required by or under any other law to get his accounts audited, it is necessary to achieve some uniformity in respect of information to be provided in the financial statements. For presentation and disclosure requirements, applicable AS and AS (IT) should be kept in mind.

[Students may refer “Guidance Note on Tax Audit under Section 44AB of the Income Tax Act, 1961”- 2014 edition given in CD with Handbook on Auditing Pronouncements for comprehensive knowledge.]

15.4 Audit Provisions under VAT Law

Some of the major States who have introduced VAT on 1.4.2005 and some other States which are in waiting to implement VAT have incorporated audit provisions in their VAT Legislations. Some of the important features of these provisions along with the eligibility of the professionals to undertake the audit function and their supportive role for the successful implementation of the VAT system are dealt with in following paragraphs.

15.4.1 Necessity of audit: Like majority of the developing economies our country is also facing the problem of lack of education and awareness about tax laws, more particularly amongst the trading community. Further, the VAT System of taxation is new to them. Since the trading community is not educated enough and equipped to understand the implications of the VAT system of taxation immediately, there is every possibility that they may not be in a position to arrange their business affairs to fall in line with the requirements of the State Level VAT, calculate and discharge their exact tax liability under the VAT Law. On the other hand, the tax administrator i.e. the authorities in the taxation department also find themselves devoid of sufficient resources to educate the tax payers and inform them about the procedural and accounting changes that are necessitated by the implementation of VAT system.

Another reason for prescribing an audit under the VAT law by a Chartered Accountant, is that under the VAT system a major thrust is to be laid on the ‘self assessment’ meaning thereby that the tax liability calculated and paid by the tax payers through their periodical returns will be accepted by and large and the tax payers will not be called to substantiate the tax liability shown by them in the returns by producing books of account and other relevant material. The assessments with books of account will be an exception. Therefore, there is a strong need to see that the tax payers discharge their tax liability properly while filing the returns. This can be ensured only where the particulars furnished by the tax payers are verified by an independent auditor in minute details by going not only through the books of account but also by analysing and interpreting the provisions of the State-Level VAT Laws and reporting, whether any under-assessment was made by the dealer requiring additional payment or whether there was any excess payment of tax warranting refund to the tax payer. In most of the countries tax evasion is rampant under the existing tax systems. In India too evasion of excise and sales-tax is estimated to be very high. If no audit is prescribed under VAT law, the chances of evasion of VAT tax will increase causing revenue leakage for the Government. It is, therefore, essential that the audit of the proposed VAT system is attempted on a regular basis. However, it is not possible to conduct the audit of all the VAT dealers. Therefore, the criteria for audit can be the amount of turnover or the class of dealer dealing in specified commodities.

The concept of audit is popular even in foreign countries where the system of VAT is in practice since long in the field of indirect taxation. In countries like France and Korea the audit has proved to be an effective tool to check the evasion of tax, which was mostly done by producing fake invoices etc.

Since VAT is a new concept, some of the States want to keep the procedural formalities to the minimum. Hence at the initial stage their law makers refrain from keeping any audit provisions in their Act and rules. Perhaps, this may be due to the initial stage of introduction of VAT. But most of the States, keeping in mind the importance of audit, have incorporated the audit provisions since inception.

15.4.2 The role of the tax auditor: The role of tax auditor in the initial years of implementation of VAT would be that of an adviser to the taxpayers. This role will cast upon him the responsibility to educate and guide the auditee regarding the maintenance of proper records and in assisting the auditees in maintaining accounting records in such a manner as to get the information needed for filing of return without delay and extra efforts. In playing the advisory role the auditor will have to help in devising a proper accounting system as will generate the required information regarding the output tax, input tax credit etc. While doing so the auditor may take the guidance from the guidance notes issued by the Institute of Chartered Accountants of India, New Delhi.

The role of tax auditor vis-a-vis the tax administrators is that the auditor while discharging his function finds out whether the turnover of sales/purchases is shown correctly in the returns and is backed up by the accounts and other relevant documents; the deductions claimed by the tax payer from the turnover of sales are genuine and are supported by valid documents; the claim of input tax credit has been properly made i.e. it has not been claimed on the higher side or on such purchases, which are not eligible for grant of input tax credit. There may be certain instances wherein at the time of purchases the goods might have been eligible for set-off and accordingly the same was claimed in the returns but subsequent events might have rendered the input tax credit inadmissible. In such circumstances, it should be the responsibility of the VAT auditor to state whether the inadmissible input tax credit has been reversed or not and if not, he has to point it out in his report. Thus to a certain degree the VAT auditor is expected to assist the VAT administrators in the proper quantification of tax liability of the tax payer and see that State exchequer gets its revenue which is legally due.

15.4.3 Preparation for tax audit under VAT: A tax auditor has to make certain preliminary preparations before the actual execution of tax audit under the VAT law. The major steps required to be undertaken for the preparation are as under:

(i) **Knowledge of business** - After accepting the audit assignment the auditor should familiarize himself with the business of the auditee. In this regard, the auditor should refer to the SA 315- **"Identifying and Assessing the Risks of Material Misstatement through Understanding the Entity and its Environment"** issued by the Council of the Institute of Chartered Accountants of India. Before starting the audit, the auditor should have a preliminary knowledge of the industry/ business and of the nature of ownership, management etc. More detailed information should be obtained and should be assessed and updated during the course of audit. For this purpose the various sources of information may be tapped. The knowledge of business is important not only to the auditor but also to his staff engaged in the audit. The auditor has to ensure that the audit staff assigned to an audit engagement obtains sufficient knowledge of the business to carry out the audit work delegated to them and further they should make effective use of the knowledge about the business and should consider how

15.63 Advanced Auditing and Professional Ethics

it affects the tax liability reported in the return. The facts and figures in the returns should be consistent with the auditor's knowledge of the business. The auditor should also make himself familiar with the process of production and the distribution chain. The auditor should also obtain information about whether the auditee is a manufacturer/ importer/ retailer, the details of major customers to whom the sales are effected and the details of sales which are outside the scope of VAT law. Similarly, the sources of purchase and the items sold should be listed out. Further it should be ascertained whether the auditee has opted for the composition scheme or not.

(ii) Obtaining a list of all the accounting records maintained by the auditee - The auditor should obtain a complete list of all the accounting records relating to sale/purchase of goods, stocks, the various registers, the ledgers etc. maintained, in which the transactions are recorded, the various source documents in which the entries are recorded in the books of account and the process of their generation.

(iii) Ascertaining the major accounting policies adopted by the auditee - The auditor should know the major accounting policies based on which books of account have been recorded. The accounting policy regarding recording of sales, purchases and valuation of inventory must be made known and the auditor should also find out whether there has been any change in those policies during the year covered by audit. If there is any significant change in the accounting policy giving rise to some material effect on the tax liability, the same should be invariably reported.

(iv) Evaluation of internal control etc. - Before determining the extent of audit checks to be applied i.e. whether to go in- depth or to do only test check, the auditor should ascertain whether there is an internal check system in operation in the entity. He should particularly find out how the purchases and sales gets initiated, focused and processed. For example, in case of purchase, receipt of indent by the purchase department, determining the need for purchases, initiation of purchase order, receipt of material, preparation of MRN, entries made in the books of accounts etc. should be verified. For sales, receipt of inquiry, acceptance of sales order, execution of sales, preparation of sale invoice and realization of transaction. If the internal control is reliable, the extent of audit may be reduced and should be focused only on those areas where the auditor feels that greater degree of audit risk is involved.

(v) Knowledge about the VAT law and allied laws - The auditor and his staff should obtain a thorough knowledge of the State VAT law under which the audit is to be conducted. The auditor should study the VAT law starting from the definition of various terms, the procedure to be adopted, the provisions regarding issue of invoices, claiming of input tax credit, composition schedule in the VAT law, the manner in which the output tax is to be calculated the provisions of audit, the contents of the audit report, the periodicity of the return to be filed, the format of the forms of returns, and the various notifications issued. Further the auditor should know the Central Sales-tax law as he has to comment on the liability under that law also. The auditor should also have some knowledge about the judicial pronouncements made by the Tribunals and the Courts on the various facets of these laws.

15.4.4 Approach to tax audit under VAT: The audit approach of the tax auditor under the value added tax system will be more or less similar to the approach, which is adopted by the

auditor while conducting the tax audit under the provisions of section 44AB of the Income-tax Act, 1961. However, the reporting requirements vary to a considerable extent.

While the auditor has to apply the basic principles of audit he has to keep in mind that the requirements of VAT audit are different and accordingly he should design his audit programme.

While designing the audit program the auditor has to ensure that the program includes the performance of such audit checks as would generate the information which would enable him to ensure the following and also to draw his audit reports.

(i) The turnover of sales /purchases of goods has been properly determined keeping in view not only the generally accepted accounting policies but the definition of turnover of sales in the relevant VAT law. The sales turnover arrived at by applying the generally accepted accounting policies may not be the same as required under the VAT law. To take an example, the sale proceeds of a fixed asset will not form a part of turnover or sales as per the generally accepted accounting policies but will form a part of turnover or sales for the purpose of VAT law. Similarly, the price of goods returned is deducted from the turnover or sales even if the returns are from the sales effected in the previous years, while under VAT law, the goods returned are to be deducted only if they are made within the prescribed time, say six months from the date of sale. Thus, the results of the audit procedure adopted by the auditor should be such as will give him a reasonable assurance regarding the figures of sales reported in the returns. Not only that, he should also be able to get the exact quantum of the sales under reported or over reported duly classified for different tax rates and its impact on overall tax liability. The sales as per the financial statements may include the turnover or sales effected by all the branches, but for the purposes of VAT law the turnover or sales of only those branches will be included which are included in one registration certificate.

(ii) The turnover of purchases should be tested by applying audit checks as will enable the auditor to get the purchases eligible for grant of input tax credit segregated from other purchases. Further, the purchases on which the input tax credit is available in full and the purchases on which it is available partially should also be ascertained correctly. Thereafter, the auditor should get the exact amount of input tax credit available, compare the same with the credit claimed in the returns and report on the excess/short claim of the credit in the returns filed.

(iii) The auditor is also required to comment on the timely filing of the returns under the VAT law. For this purpose the auditor is expected to list out the due dates of filing of returns and find out the reasons for delay in filing the returns if any.

(iv) The auditor is also required to give his report on the composition scheme. He should apply such compliance tests as will be enable him to ascertain that the auditee is eligible for composition, it has paid the requisite composition fee and all the procedural formalities in relation thereto have been complied with.

(v) The auditor has to give his report on the TDS. Therefore, such tests are to be applied as will enable him to report on the applicability of TDS provisions, the accuracy of the amount deducted and paid, timely issue of TDS certificate and filing of TDS returns.

(vi) The auditor is also expected to check the consolidation of the returns filed for all the periods covered in the year under audit, both under the State-Level VAT law and the Central Sales-tax Act,

15.65 Advanced Auditing and Professional Ethics

1956. These returns are to be compared with the books of account and the documentary evidences available. The auditor is expected to apply such substantive steps as would enable him to judge whether all the transactions relating to sale and purchase are entered in the books of account and have been taken into consideration while filing the returns. In case of any inconsistency a proper reconciliation of book figures and the returned figures should be made and also the correct quantification of tax liability is to be done.

The above are only the major areas which are to be tested by the auditor while conducting the tax audit under VAT laws. The auditor has to take a judgement of his own regarding the adequacy and appropriateness of the audit checks to be applied and the areas where the tests are to be applied, so as to give him all the information needed to form a view not only on the authenticity of the books of account, correctness of the returns filed but also in the quantification of tax liability.

15.4.5 Audit report under the VAT law: All State-Level VAT laws have been framed by following a common VAT law Module suggested by the Central Government. Further the Empowered Committee which pioneered the concept of model VAT law based on certain common principles also insisted that the basic framework of all the VAT laws in the various States should be common. It is felt that there should be a common design for VAT Audit Report also so that the auditor should not find it difficult to conduct the audit and the reports can be made more meaningful and comprehensible to all. The Institute of Chartered Accountants of India has already taken a major initiative in this direction and has already developed a standard format of the audit report. The standard format of audit report was also submitted to the Empowered Committee. States can take the benefit of the same and incorporate the format of the audit report suggested by the ICAI in their VAT laws.

At the end of the audit the auditor has to arrive at his conclusion on the matters to be reported in the audit report. The format of the audit report is generally prescribed under the relevant VAT law and the auditor has to fill in all the columns of the audit report that are applicable. While performing the audit under VAT law the auditor is expected to conduct the audit presuming himself to be the tax assessor. His audit report will therefore have to be comprehensive commenting on each and every aspect which goes to the root of quantification of tax liability. The auditor is expected to give his opinion on the adequacy of accounting records, correctness and completeness and arithmetical consistency of returns filed. Further he has to State the basis of his opinion on the accounts, financial statements and the documents verified by him to arrive at the above conclusion. The auditor is also expected to give the summary of additional tax liability/additional refund arising on his verification of the returns together with the books of account. While the auditor is giving a general opinion on the truth and fairness of books and account he can make a qualified opinion or an unqualified opinion. He can also report to disclaimer where he finds that the accounting records were insufficient to enable him to frame either a unqualified opinion or a qualified opinion.

So far as the comment on the variation of tax liability is concerned the auditor has to quantify exactly the amount by which the liability increases or decreases. He has also to State the transactions against which there is variation in tax liability. Therefore, either he has to State that the tax liability shown in the return is correct or is incorrect and to what extent. Thus, an amount of certification of tax liability is involved therein which casts greater responsibility on the auditor.

Several State VAT Legislations have provided for audit of accounts by chartered accountants. Such audit becomes necessary whenever the turnover of the assessee exceeds the prescribed limit under the relevant State VAT Legislations. In this context the ICAI has developed a model State VAT Audit report. Maharashtra VAT legislation has also prescribed a form of audit report and also the details to be furnished along with the audit report. The audit report and the prescribed details are largely similar to the Model VAT Audit report developed by the ICAI. The objective of furnishing such details is to help the VAT authorities to determine the correct turnover and also to satisfy themselves whether the VAT has been remitted properly to the credit of the State Government. Wherever applicable such particulars have to be verified by the Chartered accountants. Such verification ensures that the input VAT credit has been claimed by the assessee in a proper manner.

Student may note that Government of India is geared up to roll out the GST regime - unified tax regime - by subsuming the major indirect taxes namely, central excise, service tax, VAT/sales tax, CST, luxury tax, etc. presently being levied on goods and services by the Centre and States. GST would be applicable on the supply of goods or services as against the present concept of tax on the manufacture and sale of goods or provision of services. It would be a destination based consumption tax.

16.1 Concept of Cost Audit

According to the Institute of Cost and Management Accountants of England, cost audit represents the verification of cost accounts and a check on the adherence to cost accounting plan.

Cost audit, therefore, comprises:

Fig.: Cost Audit*

- (a) verification of the cost accounting records such as the accuracy of the cost accounts, cost reports, cost statements, cost data and costing techniques, and
- (b) examination of these records to ensure that they adhere to the cost accounting principles, plans, procedures and objectives.

It, therefore, means that the cost auditors attention and approach should be to see that the cost accounting plan is in consonance with the objectives set by the organisation and the system of accounting is geared towards the attainment of the objectives. A cost accounting system designed to exercise control over cost may be different from the one if the objective is to fix price. The cost auditor should examine whether the methods laid down for ascertaining expenses as direct or indirect are cases in point. The cost auditor should also establish the correctness or otherwise of the figures by the processes of vouching verification, reconciliation etc.

The origin of the concept of cost audit could be traced to the Second World War period when the practice of assigning cost plus contracts started. However, probably India is the only country in the “free” world where cost audit is statutorily prescribed. Cost audit can offer valuable assistance to the management in its decision making process since it ensures reliable cost accounting data and information. The management will be in a position to know what price is to be fixed for a product, whether the wastages are avoidable, whether to re-organise purchase or sales or inventory systems to make the work more efficient and so on. Existence of such a system of audit will also be of great use for maintaining internal control and internal check and can be an advantageous even to the statutory financial auditor. Cost audit, apart from having all the normal ingredients of audit namely vouching, verification etc. has within its compass elements of efficiency audit.

* Source of image: www.costaudit.org

16.2 Types of Cost Audit

Cost audit is basically carried out at the instance of the management for obvious advantages. Apart from this, different other circumstances also sometimes occasion audit of cost accounts. The different types of cost audit that we come across may be the following:

16.2.1 Cost audit on behalf of the management

The principal object of this audit is to see that the cost data placed before the management are verified and reliable and they are prepared in such detail as will serve the purpose of the management in taking appropriate decisions. The detailed objectives include-

- (a) Establishing the accuracy of the costing data, as for example, cost of material used, allocation of wages into direct and indirect and on different products, functions and cost centres.
- (b) Ensuring that the objectives of cost accounting are being achieved through appropriate collection, segregation, analysis and compilation of data.
- (c) Ascertaining abnormal losses and gains along with the relevant causes, expressed in financial terms in a manner that the person responsible for such loss or gain is identified.
- (d) Determination of the unit cost of production in a precise but practicable manner.
- (e) Establishing proper overhead rates for absorption of overheads by various units of costs so that the cost is properly ascertained and there is no significant over or under recovery of expenses.
- (f) Fixation of contract price and the determination of the additional or supplementary charge that can be raised against customers for alterations, etc.
- (g) Improving the quality of cost accounting system by obtaining the audit observations and suggestions of cost auditor.

16.2.2 Cost audit on behalf of a customer

In case of cost plus contracts, often the buyer or the contractee insists on a cost audit to satisfy himself about the correct ascertainment of cost. More often than not, the provision, for a cost audit in such a circumstance is put in the relevant contract with the stipulation that the supplier or the contractor will extend all co-operation to the cost auditor. The cost of production arrived at for this purpose may differ from the cost of production ascertained for internal purposes.

16.2.3 Cost audit on behalf of Government

Sometimes, government is approached with requests for subsidies, protection, etc. Before taking a decision the government may prefer to have the cost of production of the product determined on the basis of cost audit to satisfy itself whether the need is genuine or the industry seeking assistance is generally efficiently run. The government, of its own also may initiate cost audit, in public interest to establish the fair price of any product.

16.3 Advanced Auditing and Professional Ethics

16.2.4 Cost audit by trade association

Where activities of a trade association include maintenance of a price of the products manufactured by the member units or where there is pooling or contribution arrangements, the trade association may require the accuracy of costing information submitted by the member-units checked. The trade association may seek full information on the costing system, level of efficiency, utilisation of capacity, etc.

16.2.5 Statutory cost audit

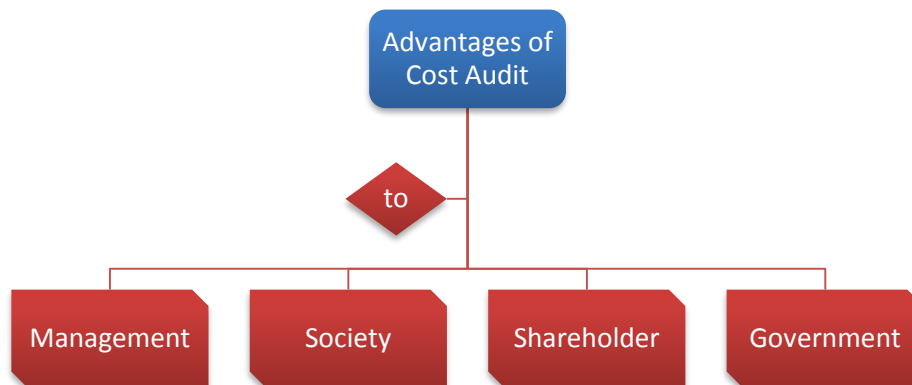

This is covered by the provisions of section 148 of the Companies Act, 2013.

Apart from the aforesaid types of cost audit, the undernoted circumstances may warrant the introduction of cost audit:

- (a) **Price fixation** - The need for fixation of retention prices in the case of materials of national importance, like steel, cement etc. may be useful in knowing the true cost of production.
- (b) **Cost variation within the industry** - Where the cost of production varies significantly from unit to unit in the same industry, cost audit may be necessary to find the reasons for such differences.
- (c) **Inefficient management** - Where a factory is run inefficiently and uneconomically, institution of cost audit may be necessary. It may be particularly useful for the Government before it takes over any unit.
- (d) **Tax-assessment** - Where a duty or tax is levied on products based on cost of production, the levying authorities may ask for cost audit to determine the correct cost of production.
- (e) **Trade disputes** - Cost audit may be useful in settling trade disputes about claim for higher wages, bonus, etc.

16.3 Advantages of Cost Audit

Cost audit will prove to be useful to the management, society, shareholders and the government.

The advantages are as under:

16.3.1 To Management

- (i) Management will get reliable data for its day-to-day operations like price fixing, control, decision-making, etc.
- (ii) A close and continuous check on all wastages will be kept through a proper system of reporting to management.
- (iii) Inefficiencies in the working of the company will be brought to light to facilitate corrective action.
- (iv) Management by exception becomes possible through allocation of responsibilities to individual managers.
- (v) The system of budgetary control and standard costing will be greatly facilitated.
- (vi) A reliable check on the valuation of closing stock and work-in-progress can be established.
- (vii) It helps in the detection of errors and fraud.

16.3.2 To Society

- (i) Cost audit is often introduced for the purpose of fixation of prices. The prices so fixed are based on the correct costing data and so the consumers are saved from exploitation.
- (ii) Since price increase by some industries is not allowed without proper justification as to increase in cost of production, inflation through price hikes can be controlled and consumers can maintain their standard of living.

16.3.3 To Shareholder

Cost audit ensures that proper records are kept as to purchases and utilisation of materials and expenses incurred on wages, etc. It also makes sure that the valuation of closing stocks and work-in-progress is on a fair basis. Thus the shareholders are assured of a fair return on their investment.

16.3.4 To Government

- (i) Where the Government enters into a cost-plus contract, cost audit helps government to fix the price of the contract at a reasonable level.
- (ii) Cost audit helps in the fixation of ceiling prices of essential commodities and thus undue profiteering is checked.
- (iii) Cost audit enables the government to focus its attention on inefficient units.
- (iv) Cost audit enables the government to decide in favour of giving protection to certain industries.
- (v) Cost audit facilitates settlement of trade disputes brought to the government.
- (vi) Cost audit and consequent management action can create a healthy competition among the various units in an industry. This imposes an automatic check on inflation.

16.4 Functions of Cost Auditor

The Institute of Cost and Works Accountants of India has detailed the principal functions of a cost auditor by way of comparison with the functions of the auditor of financial accounts. The principal functions of cost auditor, according to the aforesaid Institute are the following:

(i) Inventory

- (a) Is the size of the inventory adequate or excess compared with the production programme?
- (b) Is the provision most economical?
- (c) Does it ensure optimum order size?
- (d) Does it take into account the storage cost on the one hand, and carrying cost on the other?
- (e) Does it take note of lead time of the various items or groups of items?
- (f) Does the receipt and issue system cause any bottle-neck in production?
- (g) Does it involve too many forms and too much paper work?
- (h) Is there any room for reduction of inventory cost consistent with production needs?
- (i) Is the inventory as per the priced store ledger and as certified by the management physically correct?
- (j) Is the same amount of attention and care given to monies translated into material things like raw materials, stores and supplies of all kinds as given to liquid cash?
- (k) Does the issue of raw materials make the production in accordance with the standard or schedule or otherwise or covered by authorised schedule?
- (l) Is the expenditure of consumable stores within the standard? If not, why not?

(ii) Opening and Closing Stocks - The cost auditor will see the following:

- (a) that the opening stock is not unduly large compared with the volume of production during the year;
- (b) that the opening stock against various jobs really represents the actual physical stock in the production shop and is not merely an accounting figure;
- (c) that the responsibility of the shop foreman in-charge of the stock held in the production shop is clear and properly documented; that he maintains proper record of actual consumption vis-a-vis the actual withdrawal from the stock.

Valuation and correct indication of closing stock in the Trading and Profit and Loss Account and in Balance Sheet is equally important. The Cost Auditor will examine and certify:

- (a) that the physical verification is correctly carried out;
- (b) that the valuation is correct with reference to the actual cost of production and recognised policy for valuation;

- (c) that volume of closing stock is commensurate with the volume of production and that it does not reflect any failure or bottleneck in sales budget or production budget;
- (d) that the volume of unmoved stores is not abnormal in comparison with the normal rate of yearly consumption. The Cost Auditor will recommend disposal of such unmoved stores with consequent release of capital unnecessarily locked up to the advantage of the financial resources of the concern.

(iii) Store Issue Procedure in Stocks - The Cost Auditor will see:

- (a) that withdrawal of materials or stores to production shop is scientific or covered by authorised schedule and permits receipt to be located;
- (b) that there is no possibility of loss or pilferage of stock lying in the production section;
- (c) that surplus materials and scraps arising in production shops are returned to stores correctly and without delay for which necessary credit is given to unit cost of production. If transferred to other jobs, proper transfer voucher has been prepared and copies sent to the accounts, stores, etc.

(iv) Work-in Progress - The Cost Auditor will see the following:

- (a) that work-in-progress has been physically verified and that it agrees with the balance in the incomplete cost card;
- (b) that valuation of the work-in-progress is correct with reference to stage of completion of each job or process and the value job cost cards or process cost sheet;
- (c) that there is no over-valuation or under-valuation of opening work-in-progress or closing work-in-progress, thereby artificially pushing up and down net profits or net assets as the case may be;
- (d) that the volume and value of work-in-progress is not disproportionate compared with the finished out-turn.

(v) Labour -

- (a) Proper utilisation of labour and increase in productivity are now receiving attention, several productivity teams have emphasised importance of higher productivity. It is, therefore, essential to assess the performance efficiency of labour and compare it with standard performance, so that labour utilisation could be progressively improved. The labour force in Indian industries is generally very high compared to similar types of industries in other developed countries. Our aim should be to reach that level, though not immediately but over some time. A study of this nature would give an idea where the inefficiency lies so that timely and adequate steps could be taken to ensure maximum utilisation of labour to reduce labour cost.
- (b) Cost of labour is allocated to different jobs with reference to time or job cards.

16.7 Advanced Auditing and Professional Ethics

(vi) **Capacity Utilisation** -The cost auditor will see:

- (a) that the idle capacity in any production shop or of transport facilities for distribution is not excessive;
- (b) that production volume and overall machine time utilised are commensurate. In other words, the machine hours utilised have given the optimum output.

(vii) **Overheads and indirect expenditure** - The cost auditor will see and certify:

- (a) that allocation of indirect expenditure over production, sales, and distribution is logical and correct;
- (b) that compared with the value of production in a production shop, overhead charges are not excessive;
- (c) that actual indirect expenditure does not exceed budgets or standard expenditure significantly and that any variations are satisfactorily explained and accounted for;
- (d) that the relation of indirect expenditure in keeping with the load on individual production shop is appropriate;
- (e) correctness of appropriate allocation of overhead expenditure (both production and sales) will be certified by the cost auditor;
- (f) that allocation of overheads between finished products and unfinished products is in accordance with correct principles.

Shortly we shall discuss in detail the aspects to be dealt with in the cost auditor's report pursuant to the Companies (Cost Records and Audit) Rules, 2014. The aforesaid Rules have been issued pursuant to section 148 of the Companies Act, 2013 which prescribes the classes of companies required to include cost records in their books of account, applicability of cost audit, maintenance of records etc.

It may be noted that the requirement of the statutory cost audit in our Companies Act is something special, because statutes in most of the other countries do not contain a similar requirement. In most of the countries the concept of cost audit as such is also non-existent and the objectives, whatever they may be, are achieved by properly designing the scope and depth of internal audit.

The object with which the statutory requirement of cost audit has been included in the Companies Act can only be ascertained by a study of the cost audit report requirements. They include control over cost, wastage and losses, efficiency in the utilisation of human, material, and other resources, determination of appropriate selling price, proper maintenance of cost records appropriate use of the costing system, etc.

16.5 Programme of Cost Audit

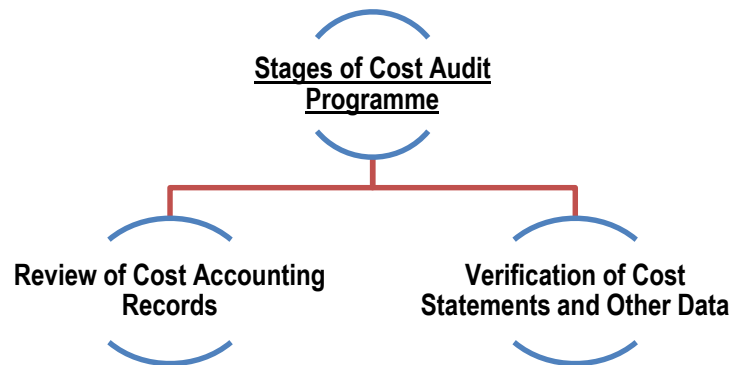

The audit programme should include all the usual broad steps that a financial auditor includes in his audit programme. However, the significant things that should not be missed are: proper vouching of expenses, capital and revenue character determination, allocation of expenses,

apportionment of overheads, arithmetical accuracy, the statutory requirements, examination of contracts and agreements, review of the Board's and shareholders' minute books to trace important decisions having bearing on costs, verification of title deeds and documents relating to properties and assets, etc. Cost audit, in order to be effective, should be completed at one time as far as practicable. The exact content of cost audit largely depends on the size of the organisation, range of products, production process, the existence of a well organised costing department and of a well designed costing system, and the existence of a capable internal auditing system. Other relevant considerations may be:

- (a) System of cost accounting in vogue and the organisation of the cost department, forms, schedules, etc.
- (b) System of internal check used in the organisation.
- (c) Frequency of audits, areas to be covered, volume of transactions, efficiency of the internal check, needs of management, purpose of cost audit, its benefits, etc.

After considering the aforesaid factors a set of procedures and instructions are evolved which may be termed the cost audit programme. Like every other audit, a systematic planning of cost audit routine is necessary.

Broadly speaking cost audit programme may be divided into the following stages:

- (a) **Review of Cost Accounting Records** - This will include:
 - (i) Method of costing in use - batch, process or unit.
 - (ii) Method of accounting for raw materials; stores and spares, wastages, spoilage defectives, etc.
 - (iii) System of recording wages, salaries, overtime and spares, wastages, etc.
 - (iv) Basis of allocation of overheads to cost centres and of absorption by products and apportionment of service department's expenses.
 - (v) Treatment of interest, recording of royalties, research and development expenses, etc.
 - (vi) Method of accounting of depreciation.

16.9 Advanced Auditing and Professional Ethics

- (vii) Method of stock-taking and its valuation including inventory policies.
- (viii) System of budgetary control.
- (ix) System of internal auditing.

(b) Verification of cost statements and other data - This will include the verification of:

- (i) Licensed, installed and utilised capacities.
- (ii) Financial ratios.
- (iii) Production data.
- (iv) Cost of raw material consumed, wages and salaries, stores, power and fuel, overheads provision for depreciation etc.
- (v) Sales realisation.
- (vi) Abnormal non-recurring and special costs.
- (vii) Cost statements.
- (viii) Reconciliation with financial books.

16.6 Cost Audit under the Companies Act

It is an audit process for verifying the cost of manufacture or production of any article, on the basis of accounts as regards utilisation of material or labour or other items of costs, maintained by the company.

Cost Audit is covered by section 148 of the Companies Act, 2013. The audit conducted under this section shall be in addition to the audit conducted under section 143.

As per the section 148, the Central Government may by order specify audit of items of cost in respect of certain companies.

Further, the Central Government may, by order, in respect of such class of companies engaged in the production of such goods or providing such services as may be prescribed, direct that particulars relating to the utilisation of material or labour or to other items of cost as may be prescribed shall also be included in the books of account kept by that class of companies.

However, the Central Government shall, before issuing such order in respect of any class of companies regulated under a special Act, consult the regulatory body constituted or established under such special Act.

The Central Government has notified the Companies (Cost Records and Audit) Rules, 2014 which prescribes the classes of companies required to include cost records in their books of account, applicability of cost audit, maintenance of records etc.

Maintenance of Cost Records: Rule 3 of the Companies (Cost Records and Audit) Rules, 2014 provides the classes of companies, engaged in the production of goods or providing services, having an overall turnover from all its products and services of ₹ 35 crore or more during the immediately preceding financial year, required to include cost records in their books of account.

These companies include Foreign Companies defined in sub-section (42) of section 2 of the Act, but exclude a company classified as a Micro enterprise or a Small enterprise including as per the turnover criteria provided under Micro, Small and Medium Enterprises Development Act, 2006. The said rule has divided the list of companies into regulated sectors (Part A) and non-regulated sectors (Part B).

As per Rule 5 of the Companies (Cost Records and Audit) Rules, 2014, every company under these rules including all units and branches thereof, shall, in respect of each of its financial year commencing, is required to maintain cost records in Form CRA-1. The cost records shall be maintained on regular basis in such manner as to facilitate calculation of per unit cost of production or cost of operations, cost of sales and margin for each of its products and activities for every financial year on monthly or quarterly or half-yearly or annual basis.

Additionally, the auditor is also required to report as per clause (vi) to Paragraph 3 of the CARO, 2016, which is discussed below:

“Whether maintenance of cost records has been specified by the Central Government under sub-section (1) of Section 148 of the Companies Act, 2013 and whether such accounts and records have been so made and maintained.”

Audit Procedures and Reporting:

The Order requires the auditor to report whether cost accounts and records have been made and maintained. The word “made” applies in respect of cost accounts (or cost statements) and the word “maintained” applies in respect of cost records relating to materials, labour, overheads, etc. The auditor has to report under the clause irrespective of whether a cost audit has been ordered by the central government.

The auditor should obtain a written representation from the management stating:

- (a) whether cost records are required to be maintained for any product(s) or services of the company under section 148 of the Act, and the Companies (Cost Records and Audit) Rules, 2014; and***
- (b) whether cost accounts and records are being made and maintained regularly.***

The auditor should also obtain a list of books/records made and maintained in this regard. The Order does not require a detailed examination of such records. The auditor should, therefore, conduct a general review of the cost records to ensure that the records as prescribed are made and maintained. He should, of course, make such reference to the records as is necessary for the purposes of his audit.

It is necessary that the extent of the examination made by the auditor is clearly brought out in his report. The following wording is, therefore, suggested:

“We have broadly reviewed the books of account maintained by the company pursuant to the Rules made by the Central Government for the maintenance of cost records under section 148 of the Act, and are of the opinion that prima facie, the prescribed accounts and records have been made and maintained.”

Where the auditor finds that the records have not been written or are not prima facie complete, it will be necessary for the auditor to make a suitable comment in his report.

Rule 6 of the Companies (Cost Records and Audit) Rules, 2014 requires the companies prescribed under the said Rules to appoint an auditor within one hundred and eighty days of the commencement of every financial year. ***However, before such appointment is made, the written consent of the cost auditor to such appointment and a certificate from him or it shall be obtained.***

The certificate to be obtained from the cost auditor shall certify that the-

- (a) the individual or the firm, as the case may be, is eligible for appointment and is not disqualified for appointment under the Companies Act, 2013, the Cost and Works Accountants Act, 1959 and the rules or regulations made thereunder;***
- (b) the individual or the firm, as the case may be, satisfies the criteria provided in section 141 of the Companies Act, 2013 so far as may be applicable;***
- (c) the proposed appointment is within the limits laid down by or under the authority of the Companies Act, 2013; and***
- (d) the list of proceedings against the cost auditor or audit firm or any partner of the audit firm pending with respect to professional matters of conduct, as disclosed in the certificate, is true and correct.***

Every referred company shall inform the cost auditor concerned of his or its appointment as such and file a notice of such appointment with the Central Government within a period of thirty days of the Board meeting in which such appointment is made or within a period of one hundred and eighty days of the commencement of the financial year, whichever is earlier, through electronic mode, in Form CRA-2, along with the fee as specified in Companies (Registration Offices and Fees) Rules, 2014.

The cost auditor appointed as such shall continue in such capacity till the expiry of one hundred and eighty days from the closure of the financial year or till he submits the cost audit report, for the financial year for which he has been appointed.

However, the cost auditor may be removed from his office before the expiry of his term, through a board resolution after giving a reasonable opportunity of being heard to the cost auditor and recording the reasons for such removal in writing.

It may be noted that the Form CRA-2 to be filed with the Central Government for intimating appointment of another cost auditor shall enclose the relevant Board Resolution to the effect.

It may further be noted that the above provisions shall not prejudice the right of the cost auditor to resign from such office of the company.

Casual Vacancy in the Office of a Cost Auditor: Any casual vacancy in the office of a Cost Auditor, whether due to resignation, death or removal, shall be filled by the Board of Directors

within 30 days of occurrence of such vacancy and the company shall inform the central government in Form CRA-2 within 30 days of such appointment of cost auditor.

The cost auditor shall submit the cost audit report along with his or its reservations or qualifications or observations or suggestions, if any, in Form CRA-3. He shall forward his **duly signed** report to the Board of Directors of the company within a period of one hundred and eighty days from the closure of the financial year to which the report relates and the Board of Directors shall consider and examine such report particularly any reservation or qualification contained therein.

It may be noted that the Board of Directors shall approve the cost statements, including other statements to be annexed to the cost audit report, for submission to the cost auditor to report thereon, before they are signed on behalf of the Board by any of the director authorised by the Board.

Duty to report on fraud: The provisions of sub-section (12) of section 143 of the Companies Act, 2013 and the relevant rules on duty to report on fraud shall apply mutatis mutandis to a cost auditor during performance of his functions under section 148 of the Act and these rules.

Cost Audit Rules not to apply in certain cases: The requirement for cost audit under these rules shall not be applicable to a company which is covered under rule 3, and,

- (i) whose revenue from exports, in foreign exchange, exceeds 75% of its total revenue; or
- (ii) which is operating from a special economic zone.

(iii) which is engaged in generation of electricity for captive consumption through Captive Generating Plant.

If the Central Government is of the opinion, that it is necessary to do so, it may, by order, direct that the audit of cost records of class of companies, which are covered under sub-section (1) and which have a net worth of such amount as may be prescribed or a turnover of such amount as may be prescribed, shall be conducted in the manner specified in the order.

Who can be cost auditor: The audit shall be conducted by a Cost Accountant in Practice who shall be appointed by the Board of such remuneration as may be determined by the members in such manner as may be prescribed.

Provided that no person appointed under section 139 as an auditor of the company shall be appointed for conducting the audit of cost records.

Provided further that the auditor conducting the cost audit shall comply with the cost auditing standards ("cost auditing standards" mean such standards as are issued by the Institute of Cost and Works Accountants of India, constituted under the Cost and Works Accountants Act, 1959, with the approval of the Central Government).

Appointment and Remuneration of Cost Auditor: As per rule 14 of the Companies (Audit and Auditors) Rules, 2014

- (a) in the case of companies which are required to constitute an audit committee-
 - (i) the Board shall appoint an individual, who is a cost accountant in practice, or a firm

16.13 Advanced Auditing and Professional Ethics

of cost accountants in practice, as cost auditor on the recommendations of the Audit committee, which shall also recommend remuneration for such cost auditor;

- (ii) the remuneration recommended by the Audit Committee under (i) shall be considered and approved by the Board of Directors and ratified subsequently by the shareholders;
- (b) in the case of other companies which are not required to constitute an audit committee, the Board shall appoint an individual who is a cost accountant in practice or a firm of cost accountants in practice as cost auditor and the remuneration of such cost auditor shall be ratified by shareholders subsequently.

Qualification, disqualification, rights, duties and obligations of Cost Auditor: The qualifications, disqualifications, rights, duties and obligations applicable to auditors under this Chapter shall, so far as may be applicable, apply to a cost auditor appointed under this section and it shall be the duty of the company to give all assistance and facilities to the cost auditor appointed under this section for auditing the cost records of the company.

It may be noted that the report on the audit of cost records shall be submitted by the cost accountant in practice to the Board of Directors of the company.

Submission of Cost Audit Report: A company shall within thirty days from the date of receipt of a copy of the cost audit report prepared (in pursuance of a direction issued by Central Government) furnish the Central Government with such report along with full information and explanation on every reservation or qualification contained therein, in Form CRA-4 *in Extensible Business Reporting Language (XBRL) format in the manner as specified in the Companies (Filing of Documents and Forms in Extensible Business Reporting language) Rules, 2015* along with fees specified in the Companies (Registration Offices and Fees) Rules, 2014.

If, after considering the cost audit report referred to under this section and the information and explanation furnished by the company as above, the Central Government is of the opinion, that any further information or explanation is necessary, it may call for such further information and explanation and the company shall furnish the same within such time as may be specified by that Government.

Penal Provisions in case of default: If any default is made in complying with the provisions of this section,

- (a) the company and every officer of the company who is in default shall be punishable in the manner as provided in sub-section (1) of section 147 (Section 147 is discussed separately in Chapter 6);
- (b) the cost auditor of the company who is in default shall be punishable in the manner as provided in sub-sections (2) to (4) of section 147. (Section 147 is discussed separately in Chapter 6).

16.7 Steps in Cost Audit

Broadly, cost audit is comprised of three steps i.e., review, verification and reporting.

Review - Collection and assimilation of all the relevant information and technicalities about the industry is an essential prerequisite of cost audit. The review should cover the following aspects:

1. Nature of the industry - priority industry, export-oriented industry etc.
2. Production method/process.
3. Important raw materials and their sources.
4. Licenced capacity and installed capacity.
5. Method of costing in use.
6. Method of accounting of raw materials, stores and production.
7. Method of accounting of wastages, spoilages and rejections.
8. Records relating to jigs and dies.
9. System of wages, salaries & overtime payment including incentive schemes, if any.
10. Basis of allocation of overheads to cost centres and of absorption to products.
11. Method of allocation of service department expenses.
12. Treatment of interest on borrowings.
13. Method of accounting of depreciation.
14. Agreement with collaborators or others for payment of royalty, its computation and payment.
15. Treatment of research and development expenses.
16. Accounting for sales and purchase - treatment with regard to sales tax, excise duty, etc.
17. System of year-end stock-taking.
18. Method of determination of work in progress.
19. Inventory valuation policy and method.
20. System of budgetary control.
21. System of internal audit.

16.15 Advanced Auditing and Professional Ethics

22. State of internal control over cost accounts and cost accounting records.
23. Cost accounting manual, if any.
24. Special cost accounting practice and methods peculiar to the industry under audit.

The cost auditor should familiarize himself with the memorandum and articles of association, past audit reports on the financial accounts, annual reports issued by the Board, the Chairman's speech, etc. He should also thoroughly review the costing system in vogue in relation to the production process and method, and should have a detailed knowledge of the flow of the production process and the documents that arise or are received in that course. A list of the costing books of account maintained by client should also be obtained by the cost auditor so that he knows the purpose and contents of such books.

A detailed audit programme should thereafter be prepared so that the work to be done and the manner in which it is to be done are planned. Students already know the purpose, contents and utility of an audit programme in the context of audit of financial accounts. All these are equally applicable in case of cost audit. Also, the cost auditor should do recording of all relevant information about the client, his business, production process, unresolved queries and matters requiring follow-up or discussion in a properly organised audit note book and working papers. Here again the functions and utilities are the same as in the case of financial audit and note books and working papers can be maintained in the very same manner as in the case of financial audit.

It is definitely desirable that the cost auditor should plan his test checking on the basis of strict rules of statistical sampling so that he knows how much risk he takes in adopting test checks and how reliable would be the opinion that he will express. He should also carefully study and evaluate internal controls and their operation on the costing books and records before deciding in favour of test of cost audit and may defer the appointment of the cost auditor as much as it can and thereby reduce further the time available to him.

Verification of cost statements and other data - The examination of the cost statements and other records by the cost auditor will generally cover the following:

- (i) Licensed capacity, installed and utilised capacities;
- (ii) Financial ratios;
- (iii) Production data;
- (iv) Cost of raw materials consumed;
- (v) Cost of power and fuel;
- (vi) Employee costs;
- (vii) Cost of stores etc. consumed;
- (viii) Provision for depreciation;
- (ix) Overheads and their allocation;
- (x) Royalty and technical aid payments;

- (xi) Sales relationships, local & export;
- (xii) Abnormal, non-recurring and special cost;
- (xiii) Cost statements;
- (xiv) Reconciliation with financial books.

Necessity to refer to financial records - It is needless to mention that the cost audit programme should cover all the above and any other matter that the cost auditor considers necessary. It is also obvious that cost audit under the Companies Act cannot be performed without reference to financial books and records. This is simply for the reason that apart from the requirement to have reconciliation between cost and financial accounts done. The cost statements are to contain a summary of all expenditure incurred by the company and the share in such expenditure attributable to the activities covered by Companies (Cost Records and Audit) Rules; overhead expenditure also needs allocation between activities covered by the rules and activities not so covered. Naturally, this can be done only by reference to the financial ledger. Expenses like salaries and wages may not be fully reflected in the cost statements and to ascertain whether appropriate charge has been made in the cost records, there would invariably be a necessity to refer to the full charge for salaries and wages in the financial ledger. Under the requirement of Part II of Schedule III to the Companies Act, 2013, quite a few matters are there which could be of direct relevance to the cost auditor - for example, consumption of raw materials, purchases of stock-in-trade, sales of products/services, changes in inventories in respect of finished goods, work-in-progress, stock-in-trade etc.

We can see from the above discussion that there exists quite a sizeable overlapping between the financial accounting records and cost accounting records. Effectiveness of both the audits, and specially cost audit, can be enhanced substantially if appropriate available data, and documents pertaining to the other field are kept in view while making audit verification. It may especially help the audit (cost and financial both) to locate errors, mistakes and omissions present in either set of accounts. If the cost auditor takes the pain of correlating the consumption of raw materials as appearing in the cost records with consumption disclosed in the financial records, he may be able to locate substantial errors either in cost records or in financial records. At least a material discrepancy between the two sets of consumption data will put him on special enquiry about the correctness of costing data and in these process errors in either may be established. Then comes the question: suppose he is convinced of the presence of a mistake in financial accounts after satisfying himself about the correctness of costing records, what he should do? He has no apparent duty to inform the auditor of financial accounts about the detection of the mistake. But nothing forbids him from asking the company to rectify the relevant cost statement where the complete financial data is compiled and allocated between activities covered by the Companies (Cost Records and Audit) Rules and other activities. Also, the reconciliation statement between costing and financial data will invariably contain indication of the discrepancy. Also he may bring the discrepancy to the notice of the management in writing and a copy of such communication may be endorsed to the financial auditor. In fact, no definite course of conduct has emerged as yet but it can be emphasised that the possibility of existence of mistakes in either record being located by the other auditor probably will lead to the

16.17 Advanced Auditing and Professional Ethics

development of necessary rapport between the two auditors. It may be pertinent to note that both the auditors have access to the records in the other field under the authority of law and it is the duty of the each auditor to refer to them to obtain necessary audit evidence that may help him in the discharge of duties cast on him. The auditor of financial accounts examines various allocations of overheads etc. to ascertain whether financial data is at variance with costing data. This he should provide in his audit programme itself. However, it is doubtful whether the cost auditor's report will be made available to the financial auditor even though in great many cases cost audit would be over before financial audit. Further, the provisions related to duty to report on fraud under sub-section (12) of section 143 of the Companies Act, 2013 and the relevant rules shall also apply mutatis mutandis to a cost auditor during performance of his functions.

Reporting - After completion of audit of costing and other relevant records the cost auditor is to submit his report. A company shall within thirty days from the date of receipt of a copy of the cost audit report prepared (in pursuance of a direction issued by Central Government) furnish the Central Government with such report along with full information and explanation on every reservation or qualification contained therein. If, after considering the cost audit report furnished by the company as above, the Central Government is of the opinion, that any further information or explanation is necessary, it may call for such further information and explanation and the company shall furnish the same within such time as may be specified by that Government.

GENERAL FEATURES OF COST AUDIT REPORT -

1. (i) I/We have/have not obtained all the information and explanations, which to the best of my/ our knowledge and belief were necessary for the purpose of this audit.
- (ii) In my/our opinion, proper cost records, as per rule 5 of the Companies (Cost Records and Audit) Rules, 2014, have/have not been maintained by the company in respect of good(s)/service(s) under reference;
- (iii) In my/our opinion, proper returns adequate for the purpose of Cost Audit have/have not been received from the branches not visited by me/us.
- (iv) In my/our opinion and to the best of my/our information, the said books and records give/do not give the information required by the Companies Act, 2013, in the manner so required.
- (v) In my/our opinion, company has/does not have adequate system of internal audit of cost records which to my/our opinion is commensurate to its nature and size of its business.
- (vi) In my/our opinion, information, statements in the annexure to this cost audit report gives/does not give a true and fair view of the cost of production of good(s)/rendering of service(s), cost of sales, margin and other information relating to good(s)/service(s) under reference.
- (vii) Detailed unit-wise and product/service-wise cost statements and schedules thereto in respect of the product/service under reference of the company duly audited and certified by me/us are/are not kept in the company.

2. If as a result of the examination of the books of account, the cost auditor desires to point out any material deficiency or give a qualified report, he/she shall indicate the same against the relevant para (i) to (vii) in the prescribed form of the Cost Audit Report giving details of discrepancies he/she has come across.
3. The report, suggestions, observations and conclusions given by the cost auditor shall be based on verified data, reference to which shall be made here and shall, wherever practicable, be included after the company has been afforded an opportunity to comment on them.

16.8 Rights and Duties of Cost Auditor

The cost auditor enjoys the powers and has the duties as contained in the Companies Act, 2013 which is discussed under Para 6.8 'Powers/Rights of Auditors' and 6.9 'Duties of Auditors' of Chapter 6 'The Company Audit'.

16.9 True and Fair Cost of Production

The true and fair concept is known to us in the context of financial accounts. Based on that knowledge, it may be assumed that the following are the relevant considerations in determining whether the cost of production determined is true and fair:

1. Determination of cost following the generally accepted cost accounting principles.
2. Application of the costing system appropriate to the product.
3. Materiality.
4. Consistency in the application of costing system and cost accounting principles.
5. Maintenance of cost records and preparation of cost statements in the prescribed form and having the prescribed contents.
6. Elimination of material prior-period adjustments.
7. Abnormal wastes and losses and other unusual transactions being ignored in determination of cost.

The report of the cost auditor discussed above will be subject to the cost auditor's observations and conclusions, if any. Also the report is subject to observations of the cost auditor on the various matters contained in the Annexure.

Under the Companies (Cost Records and Audit) Rules, 2014, an Annexure has been provided to be filled by the cost auditor and annexed to the report that he makes. The matters contained in the Annexure form part of the cost auditor's report.

[Note: For detailed knowledge of Annexure to the Cost Audit Report, students may refer Form CRA-3 (Pursuant to rule 6(4) of the Companies (Cost Records and Audit) Rules, 2014)].

22.9	Council Guidelines.....	22.73
22.10	Recommended Self-Regulatory Measures	22.80

Special Audit Assignments

17.1 Audit of Members of Stock Exchanges

A stock exchange is an organized market for the purchase and sale of listed industrial and financial securities. The securities dealt in at a stock exchange include the shares and debentures of public limited companies, Government securities, and bonds and securities issued by the municipal bodies and port trusts, etc. The Securities Contracts (Regulation) Act, 1956 defines a stock exchange as, “an association, organization or body of individuals, whether incorporated or not, established for the purpose of assisting, regulating and controlling business in buying, selling and dealing in securities.”

The Securities and Exchange Board of India Act was passed by the Parliament and assented to by the President of India in 1992. The powers vested in SEBI under the SEBI Act, 1992 include powers under the Securities Contracts (Regulation) Act like powers to call for periodic and annual returns from stock exchanges, licensing of dealers in securities, amendment to the rules and bye-laws of stock exchanges, etc. The SEBI has wide powers under the Act and the Rules to ensure proper conduct of affairs of the stock exchanges by giving suitable directions, however, the Securities Contracts (Regulation) Act, was promulgated only in 1956. The Securities Contracts (Regulation) Rules were framed thereunder in 1957. The Government has wide powers under the Act and the Rules to ensure proper conduct of affairs of the stock exchanges by giving suitable directions.

17.2 Functioning of Stock Exchanges

It is important for auditor to understand adequate knowledge about important aspects of on functioning of stock exchanges and the manner in which the transactions are entered into by the members of stock exchanges.

17.2.1 Regulation of Stock Exchanges

The Securities and Exchange Board of India (SEBI) is the apex, statutory regulatory body for the securities market with the express mandate of investor protection and development and regulation of market under SEBI Act, 1992. Apart from SEBI, Securities Contracts (Regulation) Act, 1956 which provides for regulation of transactions in securities through control over stock exchanges, Depositories Act, 1996 which provides for electronic maintenance and transfer of ownership of demat securities, Public Debt Act, 1942, Companies Act, 2013, Banking Regulation Act, 1949 and Income Tax Act, 1961 also have a substantial bearing on the working of the securities market.

17.2 Advanced Auditing and Professional Ethics

17.2.2 Securities and Exchange Board of India

SEBI is a body corporate having perpetual succession. It has been given quite wide powers for the achievement of the objectives of the SEBI Act, 1992. SEBI's main function is to regulate the business in securities market. SEBI, for the purposes of regulation of securities market, can issue directions to stock exchanges, companies, stock brokers or to any other person. SEBI Act, 1992 empowers SEBI to levy monetary fines and penalties on any person incurring a default under the Act in the following cases:

- ◆ failure to furnish any document, information, books, other documents, return or report called for by the Board;
- ◆ failure to maintain books of accounts and records;
- ◆ failure by an intermediary to enter into an agreement with his client, redress the grievances of investors;
- ◆ failure by a person sponsoring or carrying on any collective investment scheme, including mutual funds, without obtaining certificate of registration;
- ◆ failure by a stock broker to issue contract notes in the form and manner specified by the stock exchange, failure to deliver any security or failure to make payment of the amount due to the investor, charging of excess brokerage;
- ◆ any person dealing, communicating, counselling on the basis of some price sensitive information;
- ◆ failure by a person to disclose the aggregate of his shareholding in a body corporate before he acquires any shares of that body corporate and failure to make a public announcement to acquire shares at a minimum price in case of takeovers.

SEBI also has the power to suspend or cancel the certificate of registration of a stock-broker, sub-broker, share transfer agent, banker to an issue, trustee of a trust deed, registrar to an issue, merchant banker, underwriter, portfolio manager, investment adviser and such other intermediary who may be associated with securities market. This includes depository, depository participant, custodian of securities, foreign institutional investor and credit rating agency also.

The Securities Contract (Regulation) Act, 1956 empowers any recognised stock exchange may, subject to the previous approval of the Securities and Exchange Board of India, make bye-laws for the regulation and control of contracts.

It may be noted that since SEBI is the regulator of the securities market, the Securities Contract (Regulation) Act, 1956, through section 10, empowers SEBI to make or amend the byelaws of stock exchanges.

17.2.3 Governing Body

The Governing Body of a stock exchange can comprise of elected representatives of the members of stock exchange, nominated public representatives and/or professional directors. The Governing Body has powers, subject to SEBI approval, to make, amend and suspend the

operation of the Rules, Bye-laws and Regulations of the stock exchange besides having jurisdiction over all its members. The Governing Body is specially empowered to admit or expel members and their subordinates.

17.2.4 Membership

Business at a stock exchange, can only be transacted by a member of the stock exchange. A member of NSE cannot transact business at BSE unless he is a member of BSE also. The members of stock exchanges are also called stock or share brokers. The members enter into transactions either on their own behalf or on account of their clients, including sub-brokers. There are several ways of placing an order with a member. It could be either directly or indirectly through a sub-broker. Since the stock exchange operations involve considerable financial commitments on the part of its members, its membership is restricted to persons who are financially sound and possess adequate experience. The Securities Contracts (Regulation) Act, 1956, the SEBI Act, 1992 and various rules, regulations, notifications, etc., lay down the requirements for becoming a member of a stock exchange. Each stock exchange has its own SEBI approved rules and regulations regarding the admission of members. A stock exchange can have membership in multiple trading segments such as Capital Market Segment, Wholesale Debt Market Segment and Derivatives Segment. The deposit / fee structure applicable to a member depends on the trading segments in which the member is admitted.

17.2.5 Classification of Securities Traded

A security (in common parlance also known as scrip) which is allowed to be traded on any Exchange can either be listed with the Exchange or be permitted to be traded without being listed on the Exchange. A listed company is bound by the listing agreement with the exchange. The listed companies have to pay the listing fees as prescribed by the Securities and Exchange Board of India to the Exchange. However, in case of permitted securities, listing fees is not payable to the Exchange.

17.2.6 Margins

There can be wide fluctuations at the time of settlement in the prices of securities since the closing rate of the earlier settlement. In order to restrict excessive speculation and also to safeguard the interests of the investors, members are required to keep certain deposits with the stock exchange authorities. These deposits are termed 'margins'. The members are required to collect the margin from their clients, wherever applicable, and deposit the amount collected with the Clearing House. Margin is intended to protect the members by providing them with funds to cover anticipated fluctuations in prices of securities, particularly, if the client delays in paying the amount or is unable to meet his commitments. Margins also help prevent excessive speculation as clients would be required to invest some funds and not indulge in speculation without adequate resources. A member is required to pay or deposit different margins such as Gross Exposure Margin, Mark to Market (MTM) Margin, Volatility Margin (VM), Additional Volatility Margin (AVM), Special Margin and Ad-hoc Margin. The members are required to compute margin payable for all securities traded by them and make the margin payments on the due date to the Stock Exchange authorities. Different types of margins are payable at stipulated time, as decided by the Exchange or Clearing House of the Exchange.

17.4 Advanced Auditing and Professional Ethics

Three types of margins, viz., Mark-to-Market Margin, Volatility Margin and Gross Exposure Margins have been explained in the following paragraphs.

(i) **Mark to Market Margin:** MTM margin is the notional loss, which a member or his client would incur, if the net cumulative outstanding positions in all securities were closed out at the closing price of the relevant trading day, which is different from the price at which the transaction had been entered into. For each security, this is worked out by multiplying the difference between the closing price and the price at which the trade was executed by the cumulative buy and sell open position (for buy position the close price being lower than actual trade price and for sell position the close price being higher than actual trade price). The aggregate amount computed across all securities is MTM margin payable by a member. The mark-to-market margin is payable with reference to net position at client's level.

(ii) **Volatility Margin:** Volatility margin is imposed to curb excessive volatility in the market and to act as a deterrent to building up of excessive outstanding positions. Price variations on account of calls, bonuses, rights, mergers, amalgamations and schemes of arrangements are adjusted for determining volatile securities and adjustments in prices is made for the purpose of computation of volatility, when securities are traded ex-benefits. Securities that attract volatility margin and the applicable margin rates are announced on the last day of the trading cycle and are applicable from the first day of the succeeding trading cycle. The volatility margin is levied on the net outstanding positions of the member, in each security, based on the respective margin rates.

(iii) **Gross Exposure Margin:** Gross exposure margin is computed on the aggregate of the net cumulative outstanding positions (purchases or sales) in each security. Each Exchange determines its own rates of Gross Exposure Margin and Additional Volatility Margin based on its own risk perception of the market and other risk containment measures such as deposits and collaterals in its possession.

A Stock Exchange may also collect the following margins -

- (i) Special Margin in securities where price manipulation is suspected.
- (ii) Adhoc Margin where it is felt that the margin cover vis-à-vis the exposure of the member is inadequate or a member has a concentrated position in some securities or has common clients along with other members.

17.2.7 Trading System

As stated earlier, a member can transact business at a stock exchange either on his own behalf or on behalf of his clients / sub-broker. Thus, a non-member can purchase or sell shares and other securities only through member or through their authorised and registered sub-broker. The relationship between the client and the member is of a fiduciary nature. When, therefore, the member receives securities from his client for sale, he is obliged to sell the securities as per instructions and to remit the sale proceeds thereof, after deducting brokerage and other related expenses, to his client. Similarly, when on member buys securities for his client, he has to ensure that the shares/securities so purchased are delivered to the client after he has received from the client the payment for the same which includes the

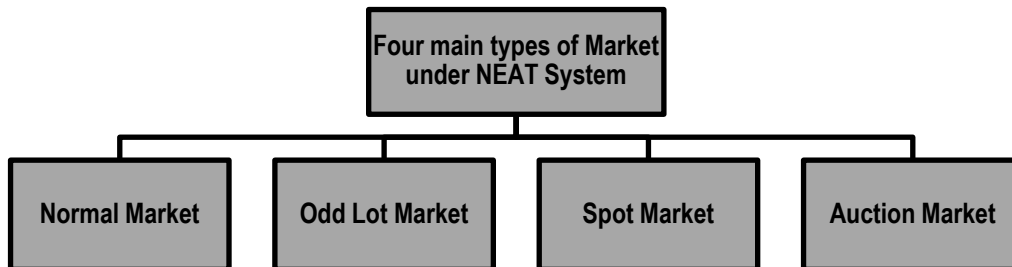

brokerage and other incidental expenses in connection therewith. Thus, a member acts as a custodian and handles the securities of his clients on their behalf. Therefore, the member must ensure that he has received payment from other stock brokers for the securities sold on behalf of his clients. The procedures followed by various Stock Exchanges in the purchase and sale of securities vary. In order to provide a basic understanding of trading on Stock Exchanges, trading systems at National Stock Exchange and the Stock Exchange, Mumbai have been discussed in this Chapter.

17.2.8 Trading on the National Stock Exchange

NSE operates on the 'National Exchange for Automated Trading' (NEAT) system, a fully computerised screen-based trading system. It enables members from across the country to trade simultaneously with enormous ease and efficiency by keying the order into the system. A single consolidated order book for each stock displays, on a real time basis, buy and sell orders originating from all over the country. The orders are executed only if the price-quantity conditions match.

17.2.9 Types of Market

The NEAT system has four main types of market. They are-

Normal Market: All orders which are of regular lot size or multiples thereof are traded in the normal market. For shares which are traded in the compulsory dematerialised mode the market lot of these shares is one. Normal market consists of various book types wherein orders are segregated as regular lot orders, special term orders, negotiated trade orders and stop loss orders, depending on their order attributes.

Odd Lot Market: An order is called an odd lot order if the order size is less than regular lot size; such orders are traded in the odd-lot market. These orders do not have any special terms or attributes attached to them. In an odd-lot market, both the price and quantity of both the orders (buy and sell) should exactly match for the trade to take place.

Spot Market: Spot orders are similar to the normal market orders except that spot orders have different settlement periods vis-à-vis normal market. These orders do not have any special terms or attributes attached to them.

Auction Market: In the auction market, auctions are initiated by the Exchange on behalf of trading members for completing the settlement process.

17.6 Advanced Auditing and Professional Ethics

17.2.10 Order Books

The NSE trading system provides flexibility to members in the kind of orders that can be placed by them. Orders are first numbered and time-stamped on receipt and then immediately processed for potential match. Every order has a distinctive order number and a unique time stamp on it. If a match is not found, then the orders are stored in different 'books' in price-time priority in the following sequence:

- ◆ Best Price
- ◆ Within Price, by time priority.

Price priority means that if two orders are entered into the system, the order having the best price gets the higher priority. Time priority means if two orders having the same price are entered, the order that is entered first gets the higher priority.

The capital market segment has following types of books:

Regular Lot Book - The Regular Lot Book contains all regular lot orders that have none of the following attributes or conditions* attached to them.

- ◆ All or None (AON)
- ◆ Minimum Fill (MF)
- ◆ Stop Loss (SL)

Special Terms Book - The special terms book contains all orders that have either of the following attributes or conditions attached:

- ◆ All or None (AON)
- ◆ Minimum Fill (MF)

Stop-Loss Book - Stop loss orders are stored in this book till the trigger price specified in the order is reached or surpassed. When the trigger price is reached or surpassed, the order is released in the regular lot book. The stop loss condition is met under the following circumstances:

- ◆ Sell Order - A sell order in the 'stop loss book' gets triggered when the last traded price in the normal market reaches or falls below the trigger price of the order.
- ◆ Buy Order - A buy order in the 'stop loss book' gets triggered when the last traded price in the normal market reaches or exceeds the trigger price of the order.

Odd Lot Book - The odd lot book contains all odd lot orders (orders with quantity less than marketable lot) in the system. The system attempts to match an active odd lot order against passive orders in the book. Currently, pursuant to a SEBI directive, the Odd Lot Market is being used for orders that have quantity less than or equal to 500 (Quantity more than the market lot) for trading. This is referred as the Limited Physical Market (LPM).

* Conditions are explained later in the Chapter.

Spot Book - The Spot Lot Book contains all spot orders (orders having only the settlement period different) in the system. The system attempts to match an active spot lot order against the passive orders in the book.

Auction Book - This book contains orders that are entered for all auctions.

17.2.11 Trading on The Stock Exchange, Mumbai (BSE)

The Exchange, which hitherto, had an open outcry trading system, switched over to a fully automated computerised mode of trading known as BOLT (BSE On Line Trading) System. It facilitates more efficient processing, automatic order matching and faster execution of trades. Above all, the system is more transparent for investors, while allowing members to keep their clients' positions confidential as compared to the earlier regime where the counterparty was always known. The members now enter orders/quotes on the Trader Work Stations (TWSs) in their offices instead of assembling in the trading ring. The trading system of The Stock Exchange, Mumbai also provides more or less the same features as those provided by the trading system of the National Stock Exchange.

17.2.12 Depositories and Dematerialisation

The entire transaction of purchase or sale of securities can be said to be completed only after the buyer becomes the rightful owner of the securities and the seller gets the sale consideration. Traditional settlement system on the Indian stock markets gave rise to settlement risk due to the time that lapsed before trades were settled. Further, transfer of securities involved sending the same along with sellers' endorsement on transfer deed for registration to the issuer. In many cases, the process took much longer than two months and significant proportion of transactions ended up as bad delivery due to faulty compliance of paper work. Theft, forgery, mutilation of certificates and other irregularities were rampant and in addition to the issuers right to refuse the transfer of security. To obviate these problems, the Depositories Act, 1996 was enacted to provide for establishment of depositories in securities with the objective of ensuring free transferability of securities with speed, accuracy and security by:

- (a) making securities of public limited companies freely transferable subject to certain exceptions;
- (b) dematerialising the securities in the depository mode; and
- (c) providing for maintenance of ownership records in book entry form.

In order to streamline both the stages of settlement process, the Depositories Act, 1996 envisaged transfer of ownership of securities electronically by book entry without making the securities moving from person to person. The Act made the securities of public limited companies freely transferable by restricting the company's right to use discretion in effecting the transfer of securities, thus, dispensing with the transfer deed and other procedural requirements under the Companies Act.

In a depository system, securities are held in securities (depository) accounts; which are more or less similar to holding funds in bank accounts. Transfer of ownership of securities is done

17.8 Advanced Auditing and Professional Ethics

through simple account transfers.

Advantages of Depository Services -

- (i) High liquidity of scrips due to immediate transfer and registration.
- (ii) Receive bonus and right as direct credit to the account thereby eliminating the risk of loss in transit.
- (iii) Much lower risk of bad deliveries.
- (iv) Reduction in brokerage.
- (v) Saving of stamp duty worth 1% of transaction price.
- (vi) Saving of courier, notary charges.
- (vii) Saving of expenses to be incurred on obtaining duplicate certificates as no threat of original shares getting mutilated or misplaced.

17.2.13 Depositories in India

National Securities Depository Limited (NSDL) and Central Depository Services Limited (CDSL) provide depository services to investors and clearing members through Depository Participants (DPs). They do not charge the investors and clearing members directly but charge their DPs, who are free to have their own charge structure for their clients. The charges for the investors are, therefore, market determined.

17.2.14 Clearing and Settlement Mechanism

When a trade has been executed, the shares and money should be transferred to the respective parties on settlement date. When an investor enters into a transaction with a broker, shares or funds, as the case may be, are delivered to the broker. In turn, the broker delivers these on settlement day to the settlement agent. In BSE, the settlement agent is known as 'Clearing House (CH)' whereas in NSE it is 'National Securities Clearing Corporation Ltd. (NSCCL)'.

Settlement of trades transacted on an Exchange requires smooth, preferably instantaneous, movement of securities and funds in accordance with the prescribed schedule of pay-in/pay-out. Movement of securities has become almost instantaneous in the dematerialised environment. Two depositories, namely, National Securities Depository Limited and Central Depository Services Limited, are in place to provide electronic transfer of securities. All actively traded scrips are held, traded and settled in demat form. The securities pay-in obligations of members / custodians are downloaded by the clearing agency. The members / custodians make available the required securities in their pool accounts with Depository Participants (DPs) by the prescribed pay-in time for securities. The depository runs an electronic file to transfer the securities from the pool accounts of members / custodians with DPs to the DP account of the clearing agency. As per the allocation schedule determined by the clearing agency, the securities are transferred on the pay-out day by the depository from the DP account of the clearing agency to the DP accounts of members / custodians. In case of trades settled under account period settlement, the pay-out of securities are effected on the same day in case of trades settled under rolling settlement. The ownership vests with the buyer as soon as the securities move from DP account of the member /

custodian to his DP account.

SEBI has directed that the brokers can issue contract notes authenticated by means of digital signatures, provided the broker has obtained the digital signature certificate from Certifying Authority under the IT Act, 2000.

Select banks have been empanelled by clearing agency for electronic transfer of funds. The members are required to maintain accounts with any of these banks. The members are informed electronically of their pay-in obligations of funds. The members make available required funds in their accounts with clearing banks by prescribed pay-in day.

The securities can move instantaneously from the seller to seller's broker to clearing agency to buyer's broker to buyer since all these have accounts with either of the two depositories which are connected to most of the Stock Exchanges. The depositories have been obligated under the Depositories Act, 1996 to transfer securities electronically.

17.2.15 Disclosure of Proprietary Trading by Broker to Client

With a view to increase the transparency in the dealings between the broker and the client, SEBI has directed that every broker shall disclose to his client whether he does client based business or proprietary trading as well. The broker shall disclose this information to his existing clients within a period of one month from the date of this circular. Further, the broker shall disclose this information upfront to his new clients at the time of entering into the Know Your Client agreement. In case of a broker who at present does not trade on proprietary account, chooses to do so at a later date, he shall be required to disclose this to his clients before carrying out any proprietary trading.

17.3 Rolling Settlement

A rolling settlement is one in which trades outstanding at the end of the day have to be settled (payments made for purchases or deliveries in the case of sale of securities) within "X" business days from the transaction date. Thus, in a T+2 rolling settlement, a transaction entered into on Monday, for instance, will be settled on Wednesday when the pay-in or pay-out takes place.

In the rolling settlement, trades on each single day are settled separately from the trades done earlier or subsequent trade days. The netting of trades is done only for the day and not for multiple days.

SEBI has gradually mandated most of the scrips to be settled exclusively on Rolling Settlement basis (T+2). The transactions in the Compulsory Rolling Settlement (CRS) are settled on T+2 basis, i.e., both pay-in and pay-out of monies and securities for transactions in scrips on transaction day (T day) would take place on the day after immediately following day.

However, transactions in 'Z' group securities are settled only on trade to trade basis on T+2, i.e., the facility of netting up of buy and sell transactions of the same day, as available in other securities, is not available with securities falling under 'Z' group. In other words, if an investor buys and sells X no. of shares on the same day then he shall first have to actually deliver and then receive the securities on the settlement day.

17.10 Advanced Auditing and Professional Ethics

Value at Risk (VaR) based margining approach has been adopted for transactions done in CRS scrips with effect from July 2, 2001. In the VaR system of margining, historical volatilities of scrips and overall market volatility is considered to arrive at a VaR margin percentage for a scrip. Further, the mark-to-market differences are collected on a daily basis and the broker members are required to maintain a capital level, as prescribed by the Exchange, adequate to support their exposure at all times.

In case, a member fails to deliver the shares sold in rolling settlement, the Exchange conducts an auction session on T+2, to meet the shortfall created by non-delivery of shares. In this auction session, offers are invited from the other members to deliver the shares sold by originally selling member, since delivery has to be made to the buying member. In case no shares are received in auction, the sale transaction is closed-out at a close-out price, determined by higher of the following:

- ◆ Highest price recorded in the scrip from the settlement in which the transaction took place upto a day prior to the auction.

OR

- ◆ 20% above the closing price on a day prior to the auction.

In this case, the auction price/close-out and difference between sale price, if positive is payable by the seller who failed to deliver the scrips. In case, auction /close out price is less than sale price, the difference is not given to the seller but is credited to Investor Protection Fund.

17.4 Derivatives

Derivative is a security whose price is dependent upon or derived from one or more underlying assets. The derivative itself is merely a contract between two or more parties. Its value is determined by fluctuations in the underlying asset.

17.4.1 Derivatives Market at NSE

The derivatives trading on the NSE commenced with S&P CNX Nifty Index futures on 12th June, 2000. The futures contract on NSE is based on S&P CNX Nifty Index. Currently, it has a maximum of 3 month expiration cycle. Three contracts are available for trading, with 1 month, 2 months and 3 months expiry. A new contract is introduced on the next trading day following the expiry of the near month contract.

The Futures and Options trading system of NSE called NEAT-F&O trading system, provides fully automated screen based trading for S&P CNX Nifty futures on a nationwide basis and an online monitoring and surveillance mechanism. The NEAT-F&O trading system is accessed by two types of users. The Trading Members (TM) have access to functions such as, order entry, order matching, order and trading management. The Clearing Members (CM) uses the trader workstation for the purpose of monitoring the trading members for whom they clear the trades. Additionally, they can enter and set limits to positions, which a trading member can take.

There are Two Types of Clearing Members

- ◆ Trading Member Clearing Member (TM-CM) is a CM who is also a TM. TM-CM may clear and settle his own proprietary trades and clients' trades as well as clear and settle for other TMs.
- ◆ Professional Clearing Members (PCM) is a CM who is not a TM. Typically banks and custodians could become a PCM and clear and settle for TMs.

Nifty index futures contracts are cash settled on a daily basis by marking to market all open positions on the basis of the daily settlement prices. Members are required to pay the mark to market losses by T+1 day and the same is in turn paid to the members who have made a profit. The contracts are finally settled on expiry of Nifty index futures contract, when NSCCL marks the open positions of a CM to the closing price of underlying index and resulting profit / loss is settled in cash.

For settlement purposes, the daily settlement price is the closing price of futures contract. Trading in Index Options and Stock Futures & Options has also been introduced in Derivatives Segment of NSE.

17.4.2 Derivative Trading at BSE

The derivatives trading on the BSE commenced with BSE Sensitive Index futures on 9th June, 2000. The futures contract on BSE is based on BSE Sensitive Index (Sensex). The trading and settlement mechanism is more or less on the same lines as in NSE. However, for settlement purposes, the daily settlement price is calculated as the weighted average price of trades during the day. Trading in Index Options and Stock Futures & Options has also been introduced in Derivatives Segment of BSE.

17.5 Circuit Filters or Circuit Breakers

Circuit Breakers or circuit filters are the price bands that set the upper and lower limit within which a stock can fluctuate on any particular day. A price band for a day is a function of previous trading day's closing. SEBI has directed the exchanges to apply circuit filters on scrips traded in Rolling Settlement if their price fluctuates more than 20% of the closing price of scrips on the previous day in any direction. However, feeling the threat of high settlement default in scrips forming part of sensex or in which derivatives and futures are available, because of these filters, SEBI has restricted the fluctuation to 10% instead of 20%.

Price bands restrict extreme price movements and thereby resist price manipulation. These protect investors from extreme fluctuations in a panic market created by rumours and short term fears.

Market Wide Circuit Breakers (MWCB) - Market wide circuit breakers do the same job for the entire market what circuit filters do for individual scrips. MWCB has been introduced to control excessive market movements in BSE sensex and Nifty. SEBI has introduced MWCB at 10-15-20% of the movements in these indices. The stock exchange on a daily basis shall translate the 10%, 15% and 20% circuit breaker limits of market-wide index variation based on the previous day's closing level of the index. These breakers provide the time to participants to

17.12 Advanced Auditing and Professional Ethics

react to the movement by way of the trading halt. Additionally, a 15 minutes pre-opening session post each trading halt has been introduced vide SEBI Circular dated September 3, 2013. The auditor need to ensure the compliance of the trigger limit, trigger time, halt duration and pre-opening session duration post each halt.

17.6 Accounting for Stock Exchange Transactions

A trading member is required to keep proper records and accounts for securities and monies receivable from and payable / transferable to both his clients as well as the Stock Exchange. The trading member is firstly required to enter the order into an Electronic Order Entry Book which then transfers the order to the Stock Exchange's trading system. As soon as the same is matched by a corresponding order by another trading member, the trade is said to be confirmed. A trading member is then required to pay margins (Mark-to-Market, Volatility, Gross Exposure) which are required to be collected from respective clients, wherever applicable). Since it is not feasible to collect margins from a client on a frequent basis, the trading member, generally, collects sufficient margin against each transaction at the point of execution of transaction. This margin is finally adjusted against outstandings in case of settlement of buy positions. If the client fails to pay for the securities purchased, the margin is used to take delivery and subsequently adjust the loss incurred in squaring off the transaction. In case of execution of sale order, the entire margin is refunded back alongwith the sale value of securities (net of brokerage and other costs) after the funds pay-out is received for securities delivered by the client. In case, the client fails to deliver the securities, the securities are required to be bought by the selling trading member to deliver to the buying trading member through auction. The margin is then used to adjust the loss on account of the difference between the buying price in auction and the price at which the security was original sold.

No entry is required to be passed by the trading member at the time of entering the order in Order Entry Book. Again on execution of trade, no entry is required to be passed in the books of accounts. All the transactions of each client are cumulated for an entire settlement before passing the entries in the ledger. However, it may be possible that a client may have made only one transaction in a given settlement.

Presuming that the client Mr. A (Client Code A0001) is the only client of the member for Rolling Settlement No. 200102151 and has done the following transactions in the said settlement -

Bought / Sold	Qty	Scrip Name	Transaction Rate (₹)	Brokerage @ 1% (say) (₹)	Effective Rate (₹)	Total Value (₹)
Bought	10	Infosys Technologies	3,000	30	3,030	30,300
Bought	100	TISCO	100	1	101	10,100
Sold	100	Reliance Industries	300	3	297	-29,700

In the above case, it may be noted that the client has to pay ₹ 10,700/- to the trading member. The trading member earns a brokerage of ₹ 700/- (i.e. $10 \times 30 + 100 \times 1 + 100 \times 3$) and is required to pay ₹ 10,000/- ($10 \times 3000 + 100 \times 100 - 100 \times 300$) to the Clearing Corporation/Clearing House towards his outstanding position for the settlement. The trading member would also have to add 5 % as service tax on brokerage earned amounting to ₹ 35/- on the net settlement position which is required to be paid to the Service Tax authorities.

It may be noted that the gross value of transactions done in the abovementioned example is ₹ 70,000/- (i.e. $10 \times 3000 + 100 \times 100 + 100 \times 300$). Considering the margin requirement @ 10% on gross value of transactions done, the trading member may collect ₹ 7,000/- from the client and for onward remittance to the Clearing Corporation / Clearing House.

In case, the client is unable to deliver the securities sold on the securities pay-in date, the same are auctioned by the Exchange (Auction Settlement Type A). This means that the Exchange allows any other Trading Member or his Client (through the Trading Member) bid for delivering the same. The client who has not been able to deliver the securities is required to treat the same as a buy order in his behalf and is bound to pay for the same.

Thus, if Mr. A (through his Trading Member) was unable to deliver 100 shares of Reliance Industries Ltd. on or before the pay-in day for securities and these shares were auctioned at a rate of ₹ 320 each, a fresh purchase entry would be passed in the books while no effect would be given to the original sales.

In case there are no bidders for selling the securities in an auction settlement for a particular auction scrip and quantity, then the original sale is closed out by squaring as per the rules of the Exchange. The entries nevertheless remain the same.

In case any amount is charged by the Exchange or clearing house towards any pay-in or pay-out defaults, the same is debited and collected from the client to the extent attributable to default committed by the client. The Member is also liable to pay transaction charges and various other charges, fines, interest, etc. to the Exchange or Clearing Corporation / Clearing House which along with other expenses are directly debited to the profit & loss account through respective expense accounts.

17.7 Conduct of Audit

As stated earlier, in exercise of the powers vested in the Central Government under Rule 12 of the Securities Contracts (Regulation) Rules, 1957, the Government issued a notification dated 29th January, 1983 requiring the accounts of active members of stock exchanges to be audited by chartered accountants. The audit comes into effect from the financial year commencing after 31st March, 1984 as per the Notification dated 11th January, 1984. Thus, accounts of members in respect of the financial years beginning on and after 1st April, 1984 are required to be audited by chartered accountants. Subsequent to the corporatisation of the Members of Stock Exchanges, statutory audit is now required under the Companies Act.

17.7.1 The Nature and Scope of the Audit

It has been clarified by the Government, vide its letter dated 31st May, 1984, that a member of

17.14 Advanced Auditing and Professional Ethics

the stock exchange, irrespective of the size of his business, would be considered 'active' for the purpose of audit if he has conducted business in securities even for a single day in the accounting year. The same letter also clarifies that the annual audit of accounts of a member of a stock exchange will be of the nature of the normal audit, as is conducted in the case of companies, co-operative societies and other entities. It will also hold good for the audits governed under the Companies Act.

Rule 12 of the Securities Contracts (Regulation) Rules, 1957 provides that "Every member shall get his accounts audited by a chartered accountant whenever such audit is required by the Securities and Exchange Board of India".

A sole proprietor, partnership firm, a corporate body and a financial institution also become members of the stock exchanges. Such members may get their financial statements audited under the statute governing them. For example, a company which is a member of a stock exchange would get its accounts audited under the provisions of the Companies Act, 2013. The members of stock exchanges may also get their accounts audited under the Income Tax Act, 1961.

17.7.2 The Books of Account and Other Documents subject to the Audit

According to the notification, audit is intended to cover the books of account and other documents specified under Securities Contracts (Regulation) Rules, 1957 and SEBI (Stock Brokers and Sub-Brokers) Rules, 1992. The members of the Exchange are required to maintain the following books of accounts and records as per Rule 15 of the Securities Contracts (Regulation) Rules, 1957 and Regulation 17 of the SEBI (Stock Brokers and Sub-Brokers) Rules, 1992:

- ◆ Register of Transactions (Sauda Book) / Daily Transaction List
- ◆ Clients Ledger
- ◆ General Ledger
- ◆ Journals
- ◆ Cash Book
- ◆ Bank Pass Book
- ◆ Documents Register/Inward-Outward Register showing full particulars of shares and securities received and delivered
- ◆ Members' contract book showing details of all contracts entered into by him with other members of the same exchange or counterfoils or duplicates of memos of confirmation issued to such other member
- ◆ Counterfoils or duplicates of contract notes issued to clients
- ◆ Written consent of clients in respect of contracts entered into as principals
- ◆ Margin Deposit Book
- ◆ Register of accounts of sub-brokers

- ◆ An agreement with a sub-broker specifying the scope of authority and responsibilities of the stock-broker and such sub-brokers
- ◆ An agreement with the sub-broker and with the client of the sub-broker to establish privity of contract between the stock broker and the client of the sub-broker.

In addition to the above statutory requirements, the Exchange as per its rules, regulations and bye-laws, may also require their Members to maintain the following records / documents-

- ◆ Copies of all margin statements downloaded from the Exchange.
- ◆ Copies of Settlement / Valan Balance Sheet along with all relevant sheets.
- ◆ Details of Spot Delivery transactions entered into (including securities delivered and payments made to the members)
- ◆ Client database & Broker Client Agreement.
- ◆ Copy of Registration Certificate of each Sub-broker issued by SEBI.
- ◆ Copy of approval for each Remisier given by the Exchange.
- ◆ Copy of the Power of Attorney/Board Resolution authorizing Directors/employees to sign the Contract Note.
- ◆ Copies of Pool Account Statements.

If a member of the Stock Exchange also holds' membership of any other recognized Stock Exchange or in a different segment of the same Exchange, (e.g., Derivatives Segment) then such member is required to maintain a separate set of books of accounts, records and documents for trades executed on each recognized stock exchange or each segment of the exchange. The auditor should verify whether the member is maintaining all the above books, documents, etc. and they are up to date.

Considering the extent of computerisation at the level of Stock Exchange as well as at member's end, an auditor may determine the extent and depth of verification of the audit. For this, the auditor needs to study and understand the various manual and computerised accounting processes employed by the Member and various controls and checks embodied therein. On the basis of same and the materiality thereof, the auditor may decide his audit procedures, extent of checking required and exercise his diligence for the purpose of reporting. Some of the important books of accounts, documents and relevant auditing procedures / tests are discussed below.

17.7.3 Daily Transactions List (Sauda Book) / Register of Transactions

All members are required to maintain a 'Sauda Book', which contains details of all deals transacted by them on a day to day basis. This is a basic record, which each member is required to maintain regularly on day-to-day basis. It contains the details regarding the name of the code of the client on whose behalf the deals have been done, rate and quantity of bought or sold. These details are maintained datewise. This register contains all the transactions, which may be of any of the kind mentioned below:

- ◆ member's own business on the Exchange

17.16 Advanced Auditing and Professional Ethics

- ◆ member's business on the Exchange on behalf of clients
- ◆ member's business with the clients on principal-to-principal basis
- ◆ member's business with the members of other Stock Exchanges
- ◆ member's business on behalf of his clients with the members of other Stock Exchanges
- ◆ Spot transactions, etc.

17.7.4 Contract Notes

Contract note is a document through which a contractual obligation is established between a member and a client. Every member of the stock-exchange has to issue contract notes to his clients for the trades executed on their behalf. The contract notes are required to be issued to the Client within 24 hours of execution of the trades. Members are also required to preserve counter-foils or duplicates of the copies of contract notes issued to clients. The member is also required to maintain written consent of clients for the contracts entered into as Principal. Contract notes issued to clients should show the brokerage separately. The total brokerage charged by the member should not exceed the specified value of the trade. It may be noted that the brokerage percentage is prescribed from time to time. The Contract Notes are required to be signed either by the member himself or his constituted attorney. In case of a sole proprietor / partnership firm wishes to authorise another person to sign the contract notes, then the member is required to submit a power of attorney to the Exchange. In case of corporate membership, a board resolution is required to authorise a person including Directors to sign the contract notes.

The member then prepares a Contract Note in the prescribed form after adding the brokerage and sends the original Contract Note to the client. The auditor should evaluate the internal control procedures instituted by the stock broker for proper maintenance and issuance of contract notes. The auditor should verify that the transactions done by a member are recorded in the sauda book. It should also be examined that contract notes are issued for all the business conducted on behalf of the clients. The auditor should verify the list of trades executed with the bills raised. The auditor should apply appropriate audit procedures to satisfy himself that -

- ◆ Contract notes have been serially numbered.
- ◆ No serial number has been left blank.
- ◆ Format of the Contract Note is as prescribed by the Regulations of the Exchange.
- ◆ Duplicate copies / counterfoils of contract notes are maintained.
- ◆ Brokerage charged in contract notes is within the permissible limits and is indicated separately including service tax.
- ◆ Contract notes have been signed by an authorised person.
- ◆ Contract notes have been issued in respect of all transactions.
- ◆ Transaction Identification, Trade Identification and Trade Execution time has been printed on the contract note issued.

- ◆ SEBI Registration number, Settlement number, Settlement dates have been mentioned.
- ◆ PAN number of the member and client has been mentioned on Contract Note where if required.
- ◆ All clauses specified by the Exchange have been printed on the reverse of the contract notes.

17.7.5 Service Tax

Service Tax on a member of a stock exchange had been introduced by the Government in union-budget 1994-95. Service tax is levied on the value of taxable services which shall be the gross amount charged by the service provider of such service provided or to be provided by him at the rate prescribed from time to time by the Government. Taxable Service has been defined u/s 65(105)(a) of the Act as any service provided to any person by a stock broker in connection with the sale or purchase of securities listed on a recognized stock exchange services provided by sub-brokers has also been brought into tax net by Finance (No.2) Act, 2004 w.e.f. 10.09.2004.

17.7.6 Security Transaction Tax (STT)

In the Union Budget for 2004-05, Government has introduced Securities Transaction Tax to be levied on all transactions done on stock exchange. As per the provisions of the Finance Bill, the stock exchanges have been entrusted with the responsibility of levy, collection and remittance of the STT on all transactions from the date of notification by the Government of India. SEBI vide its Circular No.MRD/DOP/Cir-28/2004 dated August 23, 2004 directed that no stock exchange shall permit trading activities unless it implements necessary software and procedures for the levy collection and remittance of STT.

17.7.7 Client Bills

Client Bills represents the summary of all trades executed on behalf of the client during a particular settlement. It also reflects the net amount receivable or payable to the Member from / to the client. This amount is normally posted to the individual ledger account. The auditor may call for the bills for verification and check whether the same have been properly posted to client's ledger.

17.7.8 Clients Ledger

Every broker is required to maintain a clients' ledger. This ledger contains the details of the bills raised and the payment received from or made to the clients. As mentioned earlier, Client Ledger is required to be maintained separately for different Exchange or for different Trading Segment of the same Exchange. It may be noted that SEBI Rules provides that payment is to be made to the client within 24 hours of pay-out by the Exchange. He should further verify that the clients receipts / payments are made through designated "Client Bank Account" of the Member. It may be mentioned here that payments not made or received since a considerable period or the amount of payment made or received is consistently different for bills raised over a period of time in respect of some clients. These may represent some financial or accounting irregularity which would require further attention of the Auditor. The auditor may also scrutinise

17.18 Advanced Auditing and Professional Ethics

the client ledger to identify accounts whether loans or deposits received from a paid to the clients have been passed through this account. The client may also obtain from member clients the letters confirming their balances at the end of the financial year as appearing in his books of account on a test basis. Preferably, such letters of confirmation should be sent to the clients directly by the auditor. The auditor should carry out scrutiny of the accounts appearing in the Clients' Ledger with a view to ascertain the age of clients' accounts and in case of old debit balances for determining provision for bad and doubtful debts.

17.7.9 Settlement / Vallan Control Account

At the end of the settlement, Client Bills are posted to Client Ledger account as mentioned above. At the same time the net amount receivable from or payable to the Exchange, Clearing house is posted to the Settlement / Vallan Control Account. The payment made to / received from Clearing House for a particular settlement should match with the pay-in / pay-out entries. The auditor should verify that the balance in this account after his settlement should ideally be nil and in case of any balance in this account, the reconciliation statement from the member should be obtained.

17.7.10 Clearing House Bank Account

At the end of the settlement, the payment related to the pay-in or pay-out is routed through the Clearing House account. This account normally reflects the bank entries which are passed in the Clearing Bank account. The book balance in this account should be reconciled with the balance in Clearing Bank account as per bank statement.

17.7.11 Brokerage Account

At the end of the each settlement, brokerage income is credited to brokerage account appearing in general ledger. The auditor should verify whether brokerage is credited for each settlement or not, failing which the reasons thereof can be inquired into. The brokerage amount should be periodically reconciled with the amount on which the service tax has been paid as disclosed in service tax return. Since brokerage is the main source of income for members of stock exchanges, the auditor should pay particular attention to revenue recognition aspect. Brokerage income is recognised as income on the basis of principles laid down in Accounting Standard (AS) 9, Revenue Recognition.

17.7.12 Margin Deposit Book

A member is required to maintain a margin deposit book wherein details of all the margins deposited with the Clearing House are to be recorded. The book should be verified to ascertain whether the member has complied with all the directives regarding margins, etc. issued by SEBI or Stock Exchange from time to time. The margin payments made by the member may be cross-checked with the daily margin statements downloaded from the Stock Exchange.

The auditor should apply appropriate audit procedures to satisfy himself that margins have been properly calculated, collected and paid. The auditor should examine that margin deposit lying with the Clearing House are supported by the confirmation. The auditor should verify

whether adjustment entries relating to settlement margin and daily margin which is adjusted at the time of settlement are correctly passed or not. The auditor should also ensure that exemptions from payment of margins of Institutional Trades have been claimed correctly.

17.7.13 Members' Own Trading Account

Many a times, member of the Exchange executes the trade on his own behalf. In such cases, the entry related to trades is passed in the same way as it is done for a client. Members own trading account normally appears in general ledger. The auditor should verify the entries appearing in this account with respect to the bills raised for own account trading. The balance appearing in this account should be identified into profit or loss or closing stock-in-hand, as the case may be.

17.7.14 Bank Book

A member of a Stock Exchange is required to maintain separate bank account for the client's money and their own money. No payment for a transaction in which the member has traded on his own account shall be made from clients account. No money can be paid into clients account other than -

1. Money held or received on account of clients.
2. Money for replacement for any sum which may by mistake or accident drawn from the account.
3. A cheque or draft received from a client.

No money can be paid from client's account other than -

1. The money required for payment to the Clearing Corporation / House on behalf of clients.
2. Money for replacement for any sum which may by mistake or accident deposited into client account.

The auditor should verify the bank reconciliation statement for all the bank accounts in the usual manner.

17.7.15 Documents Register (Inward / Outward Register)

This register contains the particulars of the securities including their distinctive numbers received from or delivered to clients in a physical form by a member. This is a primary record, which lists and identifies every security available with the member at any given time. Generally, it is observed that members maintain a ledger, which contains only the number received, delivered and balance. This ledger does not provide for the distinctive numbers of the scripts received from or delivered to the clients. It may be mentioned that if distinctive numbers are not recorded properly then the identification of introducer cannot be established.

While scrutinizing this register, the auditor should analyse the balances of stock appearing in this register and segregate the same into client stock and own stock. The auditor should inquire the reasons for client's stock remaining with the Member. Further, the auditor may also, on a random basis, physically verify the stock available with a member in certain scrips, if so, desired.

17.20 Advanced Auditing and Professional Ethics

17.7.16 Maintenance of Books of Accounts and Other Documents

In terms of Rules 14 and 15 of Securities Contracts (Regulation) Rules, 1957, every recognized stock exchange and its members are required to maintain and preserve the specified books of account and documents for a period of five years. Further, as per regulation 18 of SEBI (Stock Brokers & Sub-Brokers) Regulation, 1992, every stock broker shall preserve the specified books of account and other records for a minimum period of five years.

17.7.17 Dematerialized Securities

On account of compulsory dematerialisation of most of the securities listed on the Exchange, all stock brokers are required to maintain two accounts with their Depository Participants (DP) for handling the receipt and delivery of securities in demat. One account is 'Beneficiary Account' wherein the demat securities belonging to the members' for their own account are held and the other is 'Pool Account' wherein the demat securities of the clients are temporarily lodged for transfer to/from the Clients / Clearing House in the Pay-in/Pay-out. In case of sale of securities by clients, the clients transfer the same in the demat form to the member's Pool Account to the Clearing House on the Pay-in day. In case of purchase of securities by the Client, the Clearing House transfers the securities to the Pool Accounts of the members and the members then transfer the same to the accounts of individual clients. The members are required to maintain a proper record of all shares received and delivered from their Pool Account as well as preserve acknowledged copy of the delivery instructions given to their DP's for transferring the securities from the Pool Account to the Clients' account after the Pay-out.

The auditor should verify whether the securities received by the member in the Pool Account are regularly transferred to the buying clients' Demat Accounts within 24 hours of declaration of Pay-out of the relevant settlement of the Exchange. It may be noted that Sometimes, the clients instruct the brokers to retain the shares in the Pool Account either because they have not opened a demat account or because they intend to sell the shares they have bought earlier, in the subsequent settlement and thereby avoid transaction charges. The auditor should check that the shares lying in the Pool Account have not been utilized by the member to meet his own pay-in obligations or used for meeting auction obligations. If the auditor discovers something like this then, he should further enquire into the matter. Such instances might indicate the breach of fiduciary trust by the member of the stock exchange.

Depending upon the nature of the business carried on by the member, the auditor may apply such procedural tests as he considers necessary on major items of income and expense such as, commission, sub-brokerage, underwriting income, interest and dividends, advisory fees, interest, amounts payable towards transactions charges and other charges to the Exchange or Clearing House and other income and expenses.

The auditor should apply analytical procedures on the financial statements of the member. The auditor should compare current operating results with those of the prior period to ascertain that the variations are logical in the circumstances such as volume of business at the stock-exchanges, the brokerage concern's share of the market, changed business conditions such as volume of new securities issued, changes in the character of the business of the brokerage concern, and trend prices of securities. A discussion of this comparative data

with the officials of the member may highlight areas where added audit emphasis may be directed.

17.8 Auditor's Report

As per the notification issued by the Government, an auditor should submit his report in the following form:

“We have audited the attached balance sheet of M/s. ABC as at _____ and the profit and loss account for the year ended on that date annexed thereto and report that:

We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit.

In our opinion, proper books of account and records as specified in Rule 15 of the Securities Contracts (Regulation) Rules, 1957 have been kept so far as appears from our examination of such books.

The stock broker has complied with the requirements of the stock exchange so far as they relate to maintenance of accounts and was regular in submitting the required accounting information to the stock exchange.

The balance sheet and the profit and loss account referred to in this report are in agreement with the books of account.

In our opinion and to the best of our information and according to the explanations given to us, the said balance sheet and the profit and loss account read together with the notes thereon give a true and fair view insofar as it relates to the balance sheet, of the state of affairs of M/s. ABC, and insofar as it relates to profit and loss account, of the profit of M/s. ABC for the year ended on that date.”

According to clause (c) of the form of audit report prescribed by the Government, the auditor is required to report whether the member of the stock exchange had complied with the requirements of the stock exchange insofar as they relate to maintenance of accounts and that he was regular in submitting the required accounting information to the stock exchange. The auditor is therefore required to acquaint himself with the said requirements of the stock and / or the Ministry of Finance shall have a right to obtain a copy of the profit and exchange, if any.

The aforesaid Notification further requires that the audit should be completed within 6 months of the date of closing of the books of account. In individual cases, an extension for a period not exceeding 3 months may be granted by the concerned Executive Director / Secretary of the Stock Exchange if he is satisfied that adequate reasons exist for granting such an extension. The audit report should be made out in triplicate and addressed to the member of the Stock Exchange, who should submit quarterly, one of the copies of all audit reports received during the quarter to the Ministry of Finance within one month of the end of the quarter.

The audit reports to be submitted to the aforesaid authorities need not be accompanied by copies of the relevant profit and loss account and balance sheet. However, the said authorities

17.22 Advanced Auditing and Professional Ethics

have right to demand profit and loss account and / or balance sheet wherever they consider necessary.

It may be noted that in cases where the member is a company registered under the Companies Act, the reporting consideration that apply to other companies shall also apply to the member company. For example, the audit would have to necessarily make the assertions given in sub-section (2) and (3) of section 143 of the Companies Act, 2013.

Internal Audit for stock brokers/trading members/clearing members:

SEBI vide its Circular dated 21.10.2008 has decided that stock brokers/trading members/clearing members shall carry out complete internal audit on a half yearly basis by an independent qualified chartered accountants, company secretaries or cost and management accountants who are in practice and who do not have any conflict of interest.

17.9 Audit of Mutual Funds

SEBI (Mutual Funds) Regulations, 1996 provide that every mutual fund shall have the annual statement of accounts audited by an auditor who is not in any way associated with the auditor of the asset management company. An auditor is a person who is qualified to act as an auditor under the Companies Act. The auditor shall be appointed by trustees. The auditor shall forward his report to the trustees and such report shall form part of the Annual Report of the mutual fund.

Fig.: Audit of Mutual Fund*

17.9.1 Proper Books of Account

The Regulations require that every asset management company for each scheme shall keep and maintain proper books of account, records and documents, for each scheme so as to explain its transactions and to disclose at any point of time the financial position of each scheme and in particular give a true and fair view of the state of affairs of the fund and intimate to the Board the place where such books of account, records and documents are maintained. Every asset management company shall maintain and preserve for a period of 8 years its books of account, records and documents. The asset management company shall follow the accounting policies and standards as specified in Ninth Schedule so as to provide appropriate details of the scheme wise disposition of the assets of the fund at the relevant accounting date and the performance during that period together with information regarding distribution or accumulation of income accruing to the unit holder in a fair and true manner.

* Source: memeshappen.com

17.9.2 Audit Report

- (1) *Every mutual fund shall have the annual statement of accounts audited by an auditor who is not in any way associated with the auditor of the asset management company.*

Explanation: For the purposes of this sub-regulation and regulation 66 – auditor means a person who is qualified to audit the accounts of a company as per the Companies Act.

- (2) *An auditor shall be appointed by the trustees.*
- (3) *The auditor shall forward his report to the trustees and such report shall form part of the Annual Report of the mutual fund.*
- (4) *The auditor's report shall comprise the following:—*
- (a) *a certificate to the effect that,—*
- (i) *he has obtained all information and explanations which, to the best of his knowledge and belief, were necessary for the purpose of the audit;*
- (ii) *the balance sheet and the revenue account give a fair and true view of the scheme, state of affairs and surplus or deficit in the Fund for the accounting period to which the Balance Sheet or, as the case may be, the Revenue Account relates;*
- (iii) *the statement of account has been prepared in accordance with accounting policies and standards as specified in the Ninth Schedule.*

Below mentioned details of Audit Report is given in eleventh schedule on Annual Report and abridged summary as per SEBI (Mutual Fund) Regulation 1996:

- (i) *All mutual funds shall be required to get their accounts audited in terms of a provision to that effect in their trust deeds. The Auditor's Report shall form a part of the Annual Report. It should accompany the Abridged Balance Sheet and Revenue Account. The auditor shall report to the Board of Trustees and not to the unitholders.*
- (ii) *The auditor shall state whether:*
- (1) *he has obtained all information and explanations which, to the best of his knowledge and belief, were necessary for the purpose of his audit,*
- (2) *the Balance Sheet and the Revenue Account are in agreement with the books of account of the fund.*
- (iii) *The auditor shall give his opinion as to whether:*
1. *the Balance Sheet gives a true and fair view of the schemewise state of affairs of the fund as at the balance sheet date, and*
2. *the Revenue Account gives a true and fair view of the schemewise surplus/deficit of the fund for the year/period ended at the balance sheet date.*

17.24 Advanced Auditing and Professional Ethics

17.9.3 Inspection and Audit

The SEBI has a right to conduct inspection and audit the books of account as per Regulation. Some of the regulations of the SEBI (Mutual Funds) Regulations, 1996 are discussed below:

Regulation 61: Board's right to inspect and investigate

The SEBI may appoint one or more persons as inspecting officer to undertake the inspection of the books of account, records, documents and infrastructure, systems and procedures or to investigate the affairs of a mutual fund, the trustees and asset Management Company for any of the following purposes, namely:

- (a) to ensure that the books of account are being maintained by the mutual fund, the trustees and asset management company in the manner specified in these regulations;
- (b) to ascertain whether the provisions of the Act and these regulations are being complied with by the mutual fund, the trustees and asset management company;
- (c) to ascertain whether the systems, procedures and safeguards followed by the mutual fund are adequate;
- (d) to ascertain whether the provisions of the Act or any rules or regulations made thereunder have been violated;
- (e) to investigate into the complaints received from the investors or any other person on any matter having a bearing on the activities of the mutual funds, trustees and asset management company;
- (f) to *suo motu* ensure that the affairs of the mutual fund, trustees or asset management company are being conducted in a manner which is in the interest of the investors or the securities market.

Regulation 62: Notice before inspection and investigation

- (1) Before ordering an inspection or investigation under regulation 61 the Board shall give not less than ten days notice to the mutual fund, asset management company or trustees as the case may be.
- (2) Notwithstanding anything contained in sub-regulation (1), where the Board is satisfied that in the interest of the investors no such notice should be given, it may, by an order in writing direct that such inspection or investigation be taken up without such notice.
- (3) During the course of inspection or investigation, the mutual fund, trustees or asset management company against whom the inspection or investigation is being carried out shall be bound to discharge his obligations as provided in regulation 63.

Regulation 63: Obligations on inspection and investigation

- (1) It shall be the duty of the mutual fund, trustees or asset management company whose affairs are being inspected or investigated, and of every director, officer and employee thereof, to produce to the inspecting officer such books, accounts, records, and other documents in its custody or control and furnish him such statements and information

relating to the activities as mutual funds, trustees or asset management company, as the inspecting officer may require, within such reasonable period as the inspecting officer may specify.

- (2) The mutual fund, trustees or asset management company shall allow the inspecting officer to have a reasonable access to the premises occupied by it or by any other person on its behalf and also extend reasonable facility for examining any books, records, documents and computer data in the possession of the mutual fund, trustees and asset management company or such other person and also provide copies of documents or other materials which in the opinion of the inspecting officer are relevant for the purpose of the inspection.
- (3) The inspecting officer, in the course of inspection or investigation, shall be entitled to examine or record the statements of any director, officer, or employee of the mutual fund, trustees and asset management company.
- (4) It shall be the duty of every director, officer, or employee of the mutual fund, asset management company or trustee to give to the inspecting officer all assistance in connection with the inspection or investigation, which the inspecting officer may reasonably require.

The inspecting officer shall, as soon as possible, on completion of the inspection or investigation submit a report to the Board. He may also be required to submit an interim report if directed by the Board.

The SEBI has also the power in addition to normal audit, to appoint an auditor to inspect or investigate, as the case may be, into the books of account or the affairs of the mutual fund, trustee or asset Management Company:

Provided that the Auditor so appointed shall have the same powers of the inspecting officer as stated in regulation 61 and the obligation of the mutual fund, asset Management Company, trustee, and their respective employees in regulation 63, shall be applicable to the investigation under this regulation.

17.9.4 Ninth Schedule

As per Regulations 50(3), 55(4)(iii) to Securities and Exchange Board of India (Mutual Funds) Regulations, 1996, extract of ninth schedule is reproduced below:

Accounting Policies and Standards

- (a) For the purposes of the financial statements, mutual funds shall mark all investments to market and carry investments in the balance sheet at market value. However, since the unrealised gain arising out of appreciation on investments cannot be distributed, provision has to be made for exclusion of this item when arriving at distributable income.
- (b) Dividend income earned by a scheme should be recognised, not on the date the dividend is declared, but on the date the share is quoted on an ex-dividend basis. For investments which are not quoted on the stock exchange, dividend income must be recognised on the date of declaration.

17.26 Advanced Auditing and Professional Ethics

- (c) In respect of all interest-bearing investments, income must be accrued on a day to day basis as it is earned. Therefore, when such investments are purchased, interest paid for the period from the last interest due date upto the date of purchase must not be treated as a cost of purchase but must be debited to Interest Recoverable Account. Similarly interest received at the time of sale for the period from the last interest due date upto the date of sale must not be treated as an addition to sale value but must be credited to Interest Recoverable Account.
- (d) In determining the holding cost of investments and the gains or loss on sale of investments, the "average cost" method must be followed.
- (e) Transactions for purchase or sale of investments should be recognised as of the trade date and not as of the settlement date, so that the effect of all investments traded during a financial year are recorded and reflected in the financial statements for that year. Where investment transactions take place outside the stock market, for example, acquisitions through private placement or purchases or sales through private treaty, the transaction should be recorded in the event of a purchase, as of the date on which the scheme obtains an enforceable obligation to pay the price or, in the event of a sale, when the scheme obtains an enforceable right to collect the proceeds of sale or an enforceable obligation to deliver the instruments sold.
- (f) Bonus shares to which the scheme become entitled should be recognised only when the original shares on which the bonus entitlement accrues are traded on the stock exchange on an ex-bonus basis. Similarly, rights entitlements should be recognised only when the original shares on which the right entitlement accrues are traded on the stock exchange on an ex-rights basis.
- (g) Where income receivable on investments has accrued but has not been received for the period specified in the guidelines issued by the Board, provision shall be made by debiting to the revenue account the income so accrued in the manner specified by guidelines issued by the Board.
- (h) When in the case of an open-ended scheme units are sold, the difference between the sale price and the face value of the unit, if positive, should be credited to reserves and if negative be debited to reserves, the face value being credited to Capital Account. Similarly, when in respect of such a scheme, units are repurchased, the difference between the purchase price and face value of the unit, if positive should be debited to reserves and, if negative, should be credited to reserves, the face value being debited to the capital account.
- (i) In the case of an open-ended scheme, when units are sold and appropriate part of the sale proceeds should be credited to an Equalisation Account and when units are repurchased an appropriate amount should be debited to Equalisation Account. The net balance on this account should be credited or debited to the Revenue Account. The balance on the Equalisation Account debited or credited to the Revenue Account should not decrease or increase the net income of the fund but is only an adjustment to the

distributable surplus. It should, therefore, be reflected in the Revenue Account only after the net income of the fund is determined.

- (j) In a close-ended scheme launched prior to the commencement of the Securities and Exchange Board of India (Mutual Funds) (Amendment) Regulations, 2009 which provides to the unit holders the option for an early redemption or repurchase their own units, the par value of the unit has to be debited to Capital Account and the difference between the purchase price and the par value, if positive, should be credited to reserves and, if negative, should be debited to reserves. A proportionate part of the unamortised initial issue expenses should also be transferred to the reserves so that the balance carried forward on that account is proportional to the number of units remaining outstanding.
- (k) The cost of investments acquired or purchased should include brokerage, stamp charges and any charge customarily included in the broker's brought note. In respect of privately placed debt instruments any front-end discount offered should be reduced from the cost of the investment.
- (l) Underwriting commission should be recognised as revenue only when there is no devolvement on the scheme. Where there is devolvement on the scheme, the full underwriting commission received and not merely the portion applicable to the devolvement should be reduced from the cost of the investment.
- (m) In case of real estate mutual fund scheme, investments in unlisted equity shares shall be valued as per the norms specified in this regard.

17.9.5 Non availability of Unit Premium Reserve for dividend distribution

The Ninth and Eleventh Schedule of SEBI (Mutual Funds) Regulations provide the accounting policies to be followed for determining distributable surplus and accounting the sale and repurchase of units in the books of the Mutual Fund. Thus, the format for Scheme Balance Sheet provides for disclosure of Unit Premium Reserve.

In this perspective, SEBI vide its Circular, dated March 15th, 2010, clarified that the Unit Premium Reserve, which is part of the sales price of units that is not attributable to realized gains, cannot be used to pay dividend. However, it is observed that some Mutual Funds are using Unit Premium Reserve for distribution of dividend. It is therefore reiterated that:

- a. When units of an open-ended scheme are sold, and sale price is higher than face value of the unit, part of sale proceeds that represents unrealised gains shall be credited to a separate account (Unit Premium Reserve) and shall be treated at par with unit capital and the same shall not be utilized for the determination of distributable surplus.
- b. When units of an open-ended scheme are sold, and sale price is less than face value of the unit, the difference between the sale price and face value shall be debited to distributable reserves and the dividend can be declared only when distributable reserves become positive after adjusting the amount debited to reserves as per para 2(a)(ix) of Eleventh Schedule of SEBI (Mutual Funds) Regulations.

17.10 Audit of Depositories

The SEBI (Depositories and Participants) Regulations, 1996 empower SEBI to conduct inspection and audit. The regulation requires that depositories shall have adequate mechanisms for the purposes of reviewing monitoring and evaluating the depository's controls systems, procedures and safeguards. Depositories are required to maintain the following records and documents, namely:

Fig.: Audit of Depositories *

- (a) records of securities dematerialised and rematerialised;
- (b) the names of the transferor, transferee, and the dates of transfer of securities;
- (c) a register and an index of beneficial owners;
- (d) details of the holding of the securities of beneficial owners as at end of each year.
- (e) records of instructions received from and sent to participants, issuers, issuers' agents and beneficial owners;
- (f) records of approval, notice, entry and cancellation or pledge or hypothecation, as the case may be;
- (g) details of participants;
- (h) details of securities declared to be eligible for dematerialisation in the depository; and
- (i) such other records as may be specified by the Board for carrying on the activities as a depository.

Every depository shall intimate the Board the place where the records and documents are maintained. Subject to the provisions of any other law the depository shall preserve records and documents for a minimum period of five years.

Where records are kept electronically by the depository, it shall ensure that the integrity of the automatic data processing systems is maintained at all times and take all precautions necessary to ensure that the records are not lost, destroyed or tampered with and in the event of loss or destruction, ensure that sufficient back up of records is available at all times at a different place.

Some of the regulations of the SEBI (Depositories and Participants) Regulations, 1996 relating to inspection or investigation are discussed below:

* Source : CS Mukesh H Shah

Regulation 59: Board's right to inspect

The SEBI has also the power to appoint one or more persons as inspecting officer to undertake inspection of the books of account, records, documents and infrastructure, systems and procedures, or to investigate the affairs of a depository, a participant, a beneficial owner an issuer or its agent for any of the following purposes, namely:

- (a) to ensure that the books of account are being maintained by the depository, participant, issuer or its agent in the manner specified in these regulations;
- (b) to look into the complaints received from the depositories, participants, issuers, issuers' agents, beneficial owners or any other person;
- (c) to ascertain whether the provisions of the Act, the Depositories, the bye-laws, agreements and these regulations are being complied with by the depository, participant, beneficial owners, issuer or its agent;
- (d) to ascertain whether the systems, procedures and safeguards being followed by a depository, participant, beneficial owners, issuer or its agent are adequate;
- (e) to *suo motu* ensure that the affairs of a depository, participant, beneficial owner, issuer or its agent, are being conducted in a manner which are in the interest of the investors or the securities market.

Regulation 60: Notice before inspection and investigation.

- (1) Before ordering an inspection or investigation under regulation 59, the Board shall give not less than 10 days notice to the depository, participant, beneficial owner, issuer or its agent, as the case may be.
- (2) Notwithstanding anything contained in sub-regulation (1), where the Board is satisfied that in the interest of the investors no such notice should be given, it may, by an order in writing direct that such inspection be taken up without such notice.
- (3) During the course of an inspection or investigation, the depository, a participant, a beneficial owner, an issuer or its agent against whom the inspection or investigation is being carried out shall be bound to discharge his obligation as provided in regulation 61.

Regulation 61: Obligations on inspection by the Board.

- (1) It shall be the duty of the depository, a participant, a beneficial owner, an issuer or its agent whose affairs are being inspected or investigated, and of every director, officer and employee thereof, to produce to the inspecting officer such books, securities, accounts, records and other documents in its custody or control and furnish him with such statements and information relating to his activities as a depository, a participant, a beneficial owner, an issuer or its agent, as the inspecting officer may require, within such reasonable period as the inspecting officer may specify.
- (2) The depository, a participant, a beneficial owner, an issuer or its agent shall allow the inspecting officer to have reasonable access to the premises occupied by him or by any other person on his behalf and also extend reasonable facility for examining any books,

17.30 Advanced Auditing and Professional Ethics

records, documents and computer data in the possession of the depository, a participant, a beneficial owner, an issuer or its agent or such other person and also provide copies of documents or other materials which, in the opinion of the inspecting officer are relevant for the purposes of the inspection.

- (3) The inspecting officer, in the course of inspection of investigation, shall be entitled to examine or to record the statements of any director, officer or employee of the depository, a participant, a beneficial owner, an issuer or its agent.
- (4) It shall be the duty of every director, officer or employee of the depository, a participant, a beneficial owner, an issuer or its agent to give to the inspecting officer all assistance in connection with the inspection, which the inspecting officer may reasonably require.

The inspecting officer shall, as soon as possible, on completion of the inspection or investigation submit a report to the Board. He may also be required to submit an interim report if directed by the Board.

Further the SEBI has power to appoint an auditor to inspect or investigate, into the books of account, records, documents, infrastructures, systems and procedures or affairs of a depository, a participant, a beneficial owner, an issuer or its agent:

Provided that the auditor so appointed shall have the same powers of the inspecting or investigating officer as stated in regulations 59 and 60, and the obligation of the depository, participant, beneficial owner, issuer or its agent and their respective directors, officers and employees, as the case may be, as stated in regulation 61, shall be applicable to the inspection or investigation under this regulation.

Return of deposits to be filed with the Registrar: Rule 16 of the Companies (Acceptance of Deposits) Rules, 2014 requires, every company to which these rules apply shall, on or before the 30th day of June of every year, file with the Registrar, a return in the prescribed Form along with the specified fee and furnishing the information contained therein as on 31st day of March of that year, duly audited by the auditor of the company.

17.11 Environmental Auditing

Environmental reporting is the term now commonly used to describe the disclosure by an entity of environmentally related data, verified (audited) or not, regarding environmental risks, environmental impacts, policies, strategies, targets, costs, liabilities or environmental performance to those who have an interest in such information as an aid to enabling/enriching their relationship with the reporting entity) via either-

- (a) the annual report and accounts package;
- (b) a stand-alone corporate environmental performance report (CER);
- (c) a site-centered environmental statement; or
- (d) some other medium (e.g. staff newsletter, video, CD ROM, internet site)

Environmental audits are becoming increasingly common in certain industries. The term "environmental audit" has a wide variety of meanings. They can be performed by external or

internal experts (sometimes including internal auditors), at the discretion of the entity's management. In practice, persons from various disciplines can qualify to perform "environmental audits". Often the work is performed by a multi-disciplinary team. Normally, "environmental audits" are performed at the request of management and are for internal use.

In Indian scenario, the Regulatory Authorities like Ministry of Environment and Forest (MOEF), State Pollution Control Board (SPCB), State Department of Environment (SDOEn.) etc., have come into play to clear the projects from environmental viewpoint before it's commissioning. The Environmental Impact Assessment (EAI) is a pre-requisite to start an industry. The EAI tries to forecast the expected damage to be caused by the development of the industries to the environmental and the means required to mitigate that damage, incorporating the same in the Project Report for compliance in due course, keeping in view the serious threat to all the living beings in the universe by the rapid industrialisation which is polluting the environmental on an irreparable extent. The Indian Govt. notified by GSR No.329E dated 13.02.1992 that "Every person carrying on an industry, operation or process requiring consent under Section 25 of the Water (Prevention and Control of Pollution) Act, 1974 (6 of 1974) or under Section 21 of the Air (Prevention and Control of Pollution) Act, 1981 (4 of 1981) or both or authorisation under the Hazardous Waste (Management and Handling) Rules, 1989 issued under Environment Protection Act, 1986 (29 of 1986) shall submit an environment audit report for the financial year ending the 31st march in form V to the concerned State Pollution Control Board on or before the 15th day of May every year, beginning 1993".

With a view to define the Environmental Audit, it may be stressed that it is a critical analysis of (i) policies (ii) principles (iii) systems (iv) procedures (v) practices and (vi) performances of the aspect which relates the environment.

But a standard scope of Environmental Audit, as ought to be defined and adopted by standard companies, should be as follows:

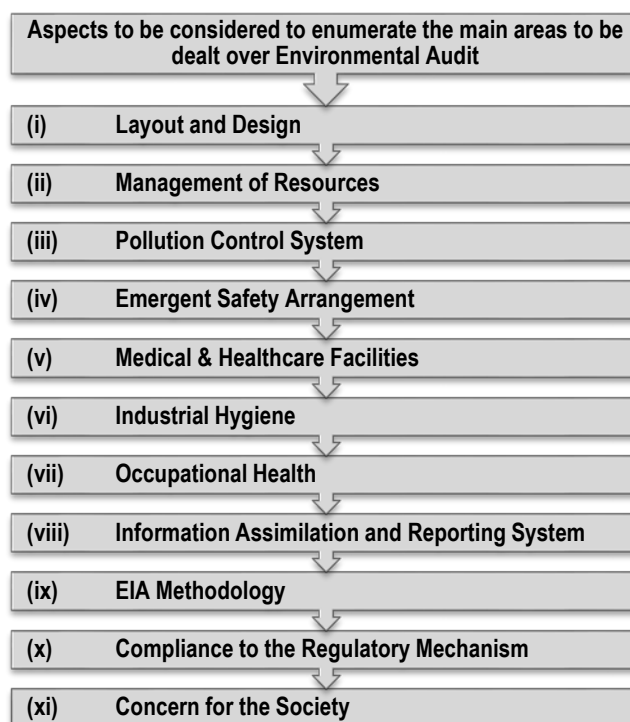

"A management tool comprising a systematic, documented, periodic and objective evaluation of how well environmental organisation, management and equipment are performing with the aim of helping to safeguard the environment by:

- (i) Facilitating management control of environmental Process.
- (ii) Assessing compliance with company policies, which would include meeting regulatory requirements".

The objective of the Environmental Audit are to evaluate the efficacy of the utilisation of resources of man, machines and materials, and to identify the areas of environmental risks and liabilities and weakness(es) of management system and problems in compliance of the directives of the regulatory agencies and control the generation of pollutants and/or waste.

As the Environmental Audit, especially in India, is still in its infancy the information usually gathered in the course of Environmental Audit is only what is required for the compliance of the statutory requirements, i.e., for Water Act, 1974, Air Act, 1981, etc., and for environmental clearance required before establishing an industry.

If it is to enumerate, what should be the main areas over which the Environmental Audit should be dealt, the following aspects are to be considered in respect of various industrial units:

- (i) **Layout and Design** – The layout to be sketched in the style which will allow adequate provisions for installing pollution control devices, as well as provision for up-gradation of pollution control measures and the meeting of the requirements of the regulations framed by the Government. In the course of the audit, the areas which requires attention but not attended to by the industry to be pinpointed as well as the future requirements of the environmental measures required in commensuration with the proposed future course of working plan are to be identified.
- (ii) **Management of Resources** – Management resources includes air, water, land, energy, raw materials and human resources besides others. The use of all resources is interlinked and the best uses in a synchronised manner results the best output and minimum waste. The waste of resources to the minimum possible extent is good for the health of the industry as well as the environment.
- (iii) **Pollution Control System** – An effective system of pollution control should be in existence. One aspect should be whether all required pollution control measures are in vogue or not next aspect should be whether the same is effective or not, further it is to investigate, whether more measures are required, keeping ill view the type of industry and its nature of working with respect to its grade of polluting the environment.
- (iv) **Emergent Safety Arrangement** – The chemical, gas, etc., industries which are prone to sudden requirement of safety arrangements, must remain alert all the while. The emergency plans are to be reviewed periodically, sufficient staff along with other required

safety amenities should be kept ready. The staff, remained so engaged, must possess the required awareness and alertness to meet the contingency. The degree of awareness, however, can be upgraded with proper training provisions.

- (v) **Medical & Healthcare Facilities** – The medical services should be maintained. The health of the workers should be a big consideration for the management.
- (vi) **Industrial Hygiene** – Proper system should be in vogue to eliminate industrial unhygienic state.
- (vii) **Occupational Health** – The requirement for safeguarding against occupational health hazards should be available for all the workers. As the occupational health hazards varies from industry to industry due to the difference in the nature of working atmosphere and the pollutants present in it, the concerned industry must pay proper weightage to those diseases which are prone to that particular type of industry.
- (viii) **Information Assimilation and Reporting System** – The information system should be strengthened to generate and its reporting system should be proper, keeping in view, the authorities, responsibilities and subsequent delegations. A report of compliance of all statutory environmental laws along with other preventive and precautionary measures should be put to Board at regular intervals.
- (ix) **EIA Methodology** – The Environmental Impact Assessment (EIA) is usually are pre-requisites to start an industry. This is done considering the known spheres of activities on the existing environmental conditions. But the predictions necessarily deviate from the actual happenings when the industry starts working. To accommodate the deviation in the system is also to be incorporated in the EIA report, if it is noticed that the degradation to the environment caused on the establishment and running of the industry is much higher than what was predicted, the mitigatory measures suggested must also be furthered.
- (x) **Compliance to the Regulatory Mechanism** – As the persons who are directly working with the system, may be unaware of the latest developments and requirements for the compliance of stipulations and standards prescribed by the various regulatory authorities, they should be trained and instructed on regular basis, to avoid making the Board/owner vulnerable to prosecution and penalty.
- (xi) **Concern for the Society** – The industry very often transforms the agrarian environment into an industrial environment. The people so displaced by industrialisation feel alienated and develop a feeling of facing the gaseous, dustful, clumsy state of surroundings. The audit should look into this aspect how the industry is making a balance between its own development and the society's concern.

17.11.1 Audit Procedure

The small or medium unit does not call for an elaborate and/or formal system, but somebody is to be given charge to look after the matter. But when the concern is a big one, it needs a well planned system.

17.34 Advanced Auditing and Professional Ethics

The audit is to be conducted at regular interval, and internal audit system should also be supplemented to review the efficiency, effectiveness and to identify the training requirements of the audit staff.

17.11.2 Audit Format

The following are the main aspects which may be covered in the probable format of "Environmental Statement".

- (a) Name and address of the owner/occupier of the industry, operation or process.
- (b) Date of last environmental audit report submitted.
- (c) Consumption of water and other raw materials as input during current and previous year.
- (d) Pollution generated in air and water along with the output and the types of pollutants and the deviation from standard.
- (e) Generation of hazardous waste (in line with the Hazardous Waste Management and Handling Rules, 1989) in current year and previous year from processes or from pollution control facility.
- (f) Quantity of sold waste generated during current year and previous year from process/es from pollution control facility and from recycling or re-utilisation of waste, etc.
- (g) The disposal practice for different type of waste.
- (h) The practice sorted for conservation of natural resources.
- (i) The additional investment proposal for environmental protection including abatement of pollution.

17.12 Energy Audit

Energy shortage and the cost of environmental quality control have made the use of energy very costly to many industrial establishments. As a result, many factories have opted for establishing energy management programmes to cope with severe energy shortages and for improving the profitability of their operations. Energy management involves the following basis approaches:

Fig.: Save Energy*

- (i) Reducing avoidable losses,
- (ii) Improving the effectiveness of energy use, and
- (iii) Increasing energy use efficiency

* Source : Alpha Techno Solution

No matter what approach is taken, the steps to be followed are general in nature, e.g., conduct energy audits, implement the energy conservation measures, carry out post installation monitoring and set targets, etc.

Energy auditing is defined as an activity that serves the purposes of assessing energy use pattern of a factory or energy consuming equipment and identifying energy saving opportunities. It is the first step of any energy management programmes. The function of an energy auditor could be compared with that of a financial auditor. At the moment, while energy auditor is not yet a mandatory requirement on an all-India basis, the financial auditor is a pre-requisite for any organisation. Another key distinction is that the energy auditor is normally expected to give recommendations on efficiency improvements leading to monetary benefits and also advise on energy management issues. Generally, energy auditor for the industry is an external party. The following are some of the key functions of the energy auditor:

- (i) Quantify energy costs and quantities.
- (ii) Correlate trends of production or activity to energy costs.
- (iii) Devise energy database formats to ensure they depict the correct picture – by product, department, consumer, etc.
- (iv) Advise and check the compliance of the organisation for policy and regulation aspects.
- (v) Highlight areas that need attention for detailed investigations.
- (vi) Conduct preliminary and detailed energy audits which should include the following:
 - (a) Data collection and analysis.
 - (b) Measurements, mass and energy balances.
 - (c) Reviewing energy procurement practices.
 - (d) Identification of energy efficiency projects and techno-economic evaluation.
 - (e) Establishing action plan including energy saving targets, staffing requirements, implementation time requirements, procurement issues, details and cost estimates.
 - (f) Recommendations on goal setting for energy saving, record keeping, reporting and energy accounting, organisation requirements, communications and public relations.

Energy efficiency is achieved through company-wide activities involving administration, purchase, design, engineering, production and maintenance management functions. Since it is an inter-disciplinary activity, energy efficiency must be supported not only by technical division but all other divisions as well. Therefore, in industries where energy cost is substantial or widely dispersed across the plant campus, it has been the experience of some large companies to set up internal energy audit teams. One of the effective ways of setting up an internal energy audit team is to have representation from the various sections with rotating membership and with atleast one team member from the area being audited. The eyes of a stranger very often see things which familiarity has made common place and invisible to the user of the area. To be truly effective, these audits must be made not only during normal working hours but also during night shifts, weekends and holidays.

17.12.1 Approach to Energy Auditing

The starting point for energy analysis of a factory would be to assess its past performance. The energy manager should first establish the energy efficiency indicator of the factory. To obtain this, the simplest approach is to consider the overall factory as a “black box” and identify the different forms of energies going into the boundary and the products leaving it over a given time period. Thus the evolution in the consumption of these energy inputs and the production rate can be derived. From these, the variation in the specific energy consumption (energy consumed per unit production) with time and production rate can be established. These figures can be compared with the average values or those pertaining to the best practices for similar industries in order to assess the comparative performance of the plant. It is found that there is indeed any scope for reduction in the specific energy consumption, one has to perform preliminary and/or detailed energy audit for analysing the different utility areas where these energies are to be converted into the final forms required by the production processes. The different phases of energy auditing in an industry are given below. All three phases can be included in a single audit or they can be conducted separately, depending on the size of the factory or facility under investigation.

- (i) Analysis of historical energy consumption and cost data.
- (ii) Preliminary energy audit, with the objectives to identify:
 - Major energy consuming equipment and processes.
 - Obvious inefficiencies and energy wastes.
 - Priority areas for further detailed investigation.
- (iii) Detailed technical and economic analyses of energy efficiency measures, especially those involving large capital investment or long payback periods.

17.13 Audit of Accounts of Non-Corporate Entities (Bank Borrowers)

The Reserve Bank of India (RBI), keeping in view the need for bringing discipline in the matter of maintenance of accounts by non-corporate entities, has issued a circular dated 12th April, 1985 to all Banks recommending audit of accounts of all non-corporate borrowers enjoying working capital limits of ₹ 10 lacs and above from the banking system.

For the purpose of computing the above limit, the term borrowing will include borrowing of the following types:

- (i) Packing credit facilities
- (ii) Cash credit facilities
- (iii) Loans-secured and unsecured
- (iv) Overdraft
- (v) Deferred payment facilities
- (vi) Guarantees:

- (a) Performance guarantees
- (b) Financial guarantees
- (vii) Bill Discounting Facilities
- (viii) Any other credit facilities (other than loans, guarantees, letter of credit etc.).

This requirement applied in respect of the accounting year of the non-corporate entity commencing on or after 1-4-1984. It is necessary for the non-corporate entity enjoying such credit facility to submit the audited statements and audit report to the concerned bank as early as possible but in any case not later than 6 months from the close of the accounting year. The primary responsibility for maintenance of books of accounts and records is that of the non-corporate entity.

17.13.1 Audit Procedure

- (i) The auditor is required to express his opinion as to whether the financial statements give a true and fair view of the state of affairs of the entity. For this purpose the auditor has to use his professional skill and expertise and apply such audit tests as the circumstances of the case may require. Considering the contents of the audit report the auditor has to conduct the audit by applying the same principles which are applicable for an audit in the corporate sector. The audit report is to be given to the lending bank and therefore such report will be in the nature of a special purpose report.
- (ii) If he finds that there is no internal control, it would not be advisable for him to conduct the audit by applying test checks. The auditor will also have to keep in mind the concept of materiality depending upon the circumstances of each case.
- (iii) Section 143 of the Companies Act gives certain powers to the auditors to call for the books of account, information, documents, explanations, etc. and to have access to all books and records. In the case of audit of a non-corporate entity, it would be in the interest of the entity to furnish all the information and explanations and produce books of accounts and records required by the auditor. If, however, the entity refuses to produce any particular record or to give any specific information or explanation the auditor would be required to report the same and qualify his report.
- (iv) The non-corporate entity is free to choose any practising Chartered Accountant to conduct this audit. In the event of any such change it is necessary for the incoming auditor to communicate with the outgoing auditor as explained in the Institute's publication "Code of Ethics". He should also ensure that he does not resort to undercutting while accepting any such assignment.
- (v) As already noted, the primary responsibility for maintenance of books of account and records and that for preparation of financial statements is of the non-corporate entity. The auditor should obtain the letter of engagement and list of books of account and other records maintained by the entity before undertaking the audit assignment.
- (vi) Non-corporate entities are, in certain cases; evidenced by documents/agreements, such as, partnership deed, deed of association, trust deed etc. It would be necessary for the

17.38 Advanced Auditing and Professional Ethics

auditor to check the compliance with the terms of documents, agreements, so far as they relate to accounts and audits and to report all material violations of such terms.

- (vii) The figures of the immediately preceding year should be given in a manner so as to enable meaningful comparison. If the accounts of such preceding year are not audited, the fact should be indicated by way of a note and also reported by the auditor.
- (viii) The audited accounts should clearly disclose the results of the working of the entity for the year, every material feature, transactions of an exceptional and non-recurring nature and also transactions pertaining to earlier years, if material. The said accounts should be prepared in conformity with the generally accepted accounting principles followed consistently. Any deviation, if material, either from the accepted principles or from the policy/treatment followed in the preceding year should be clearly brought out in the notes and/or the Auditors' Report.
- (ix) The overall consideration should be that the financial statements so prepared should give a true and fair view of the working of the entity. Moreover, these statements should also assist the lending bankers in their evaluation of the loan proposals and in ensuring strict financial discipline, coupled with uniformity, in the existing as well as prospective customers.

17.13.2 Special Audit Report

A lending bank may, in special cases, require the non-corporate entity to obtain a special report from the auditor. Such a report can be called by a lending bank if it finds that it is necessary to have more information about the working of the entity. In such a case the report will have to be given by the auditor on a quarterly basis.

The special audit report which is to be given on a quarterly basis in the specified form is in addition to the normal audit report which is to be given by the auditor on a yearly basis.

In the quarterly special audit report, the auditor will have to give information relating to the operating data for each quarter. This information will have to be classified in the following manner:

- (i) Actual production;
- (ii) Actual production as a percentage of rated capacity;
- (iii) Sales;
- (iv) Cost of goods sold/cost of production;
- (v) Gross margin;
- (vi) Interest on bank borrowing; and
- (vii) Interest on others

It is not necessary to work out the actual filed cost for this purpose.

The age-wise classification of raw materials and finished goods is to be given. For this purpose age-wise classification is to be made in the following manner in respect of raw materials and finished goods separately;

- (i) Inventory for more than one year;
- (ii) Between 6 months and one year;
- (iii) Between three months and 6 months; and
- (iv) Below 3 months.

Similar information about the work-in-progress i.e. the number of days of production which remains in progress should also be given.

The basis of valuation of raw material and finished goods should be given. For this purpose the following information is to be given:

- (i) The manner of determination of cost (i.e. components of cost)
- (ii) The method of valuing stock i.e. FIFO, weighted average cost, etc.

It is also necessary to state if there is any discrepancy between the quantity and value of the stock as furnished to the bank and as appearing in the books. The reasons for such discrepancy should be given in the audit report.

Age-wise classification of bills receivable and other receivables with reference to the, bills due from domestic parties and bills in respect of exports should be given. The age-wise classification is to be done on the same basis as the classification for raw materials and finished goods as stated above.

Information in respect of the following items is also to be given:

- (i) Balances at the end of each month of the quarter for major categories of stock, receivables and bills receivables;
- (ii) Tax assessments and payments made during the quarter;
- (iii) Actual disbursement of capital expenditure during the quarter;
- (iv) Outstanding contracts on capital account at the end of the quarter giving the details about the names of parties and amounts outstanding;
- (v) The contingent liability which may or may not materialize during the financial year succeeding the relevant quarter;
- (vi) Investment made during the quarter and the income from such investments including profit on sale of investments;
- (vii) Loans given during the quarter;
- (viii) Loans raised during the quarter from banks and from others. Separate figures to be given;

17.40 Advanced Auditing and Professional Ethics

- (ix) Overdue statutory liability at the end of the quarter;
- (x) Amounts due but not paid at the end of the quarter in respect of (a) loans from banks, (b) public deposits, and (c) other loans; and
- (xi) Figures of cash losses during the last 2 years to be stated on the basis of the annual accounts. If such accounts were not audited this fact should be stated.

The funds obtained from the lending banks have to be utilised for the purpose for which they are given by the bank. If the auditor finds that these funds have been diverted for the purposes other than those for which they were given by the bank the auditor will have to give the details of the diversion for such other purposes.

In order that the lending bank may be able to ascertain the correct financial position and financial health of the entity it is necessary for the auditor to give the details of the diversion for such other purposes.

In order that the lending bank may be able to ascertain the correct financial position and financial health of the entity it is necessary for the auditor to give information about the following ratios:

- (a) Current ratio
- (b) Acid test ratio
- (c) Raw materials-turnover ratio
- (d) Finished goods-turnover ratio
- (e) Receivables-turnover ratio
- (f) Return on investment
- (g) Interest cover ratio
- (h) Net margin ratio
- (i) Capital turnover ratio
- (j) Debt equity ratio
- (k) Operating cash flow.

ANNEXURE

SEBI Checklist for Auditors

Books of Accounts & Other Records

Sl. No.	Description	Reference
1.	Maintenance of books of accounts	Rule 15 of SCR(R) Rules, 1957 and Regulation 17 of SEBI (Stock Broker and Sub-broker) Regulations, 1992
2.	Any other book / record to be maintained by the broker as per the exchange regulations	Rules, Regulations and Circulars of the concerned Exchange.

Contract Notes

1	The member should issue contract notes for all trades done by him	Regulation 7(B)(2) of Schedule II of Code of Conduct of SEBI (Stock Broker and Sub-brokers) Regulations, 1992
2	The member should time stamp his order slips/ records and the order time should be reflected in the contract note along with the time of execution of order.	Circular SMD/POICY/IECG/1-97 dated 11th February, 1997
3	The contract notes should bear the contract SEBI Registration number of the member. Contract notes should bear pre-printed serial numbers. Contract notes should be issued within 24 hours of trade execution. Appropriate stamps should be affixed on the original contract notes. Duplicates of the contract notes issued should be maintained. Counterfoils maintained should also have adequate details. The duplicates of the contract notes issued should be acknowledged by the client.	Rules and Regulations of the Exchange. Circular SMD/MDP/CIR/043/96 dated August 5, 1996.
4	The contract notes should be signed by the member or his constituted attorney	Rules and Regulations of the Exchange
5	In case of Form A contract notes issued to clients, the brokerage should be shown separately.	Ministry of Finance Directive - Circular F. No. 4/16/SE/19 dated 19th August, 1991

17.42 Advanced Auditing and Professional Ethics

6	In case the broker acts as a principal, the contracts issued should be in Form B	SMD(B)/104/22775/93 dated 29 th October, 1993
7	The consent of the client should be taken for any trade done by the broker while acting as a principal	Regulation 17 J of SEBI (Stock Broker and Sub-brokers) Regulations, 1992. Section 15 of SC(R) Act, 1956.
8	Brokerage should be within the limits prescribed by the Exchange	Rules and Regulations of the concerned Exchange.

Dealings with Clients

1	The member should maintain client database	Circular SMD/POLICY/IECG/1-97 dated 11th February, 1997
2	The member should make full payment / delivery within 24 hours of the relevant pay-out	Circular MIRSD/SE/Cir-19/2009 dated December 3, 2009
3	Warehousing of trades for Institutional Clients	Circular SMD/POLICY/CIR-29/97 dated 13th November, 1997
4	Rectification of bad delivery should be done within a reasonable time	Circular SMD/POLICY/4296/96 dated 4th October, 1996
5	In case of bad delivery because of fake shares, the introducing broker should file the necessary FIRs with the police.	Circular SMD/RCG/PJ/671/96 dated 22nd February, 1996
6	The member should not charge the clients with rates more than the prevailing market rates	Code of Conduct A & B under Regulation 7 of the SEBI (Brokers and Sub-brokers) Regulation, 1992
7	The member should take adequate steps for redressal of investors grievances within one month from date of receipt of the complaint	Rule 4(e) of SEBI (Stock Broker and Sub-brokers) Regulations, 1992
8	The member should maintain a separate bank account for clients' funds. There should be a clear segregation of the clients' and brokers' money. Payments to / from the client should be made from this separate account - there should be a clear segregation of business. The member should not make payments for trades in which he is a principal from the client's account. The member should keep such records and books of accounts as necessary, to distinguish client's securities from his own securities. The member should keep such records and books of accounts as	Circular SMD/SED/CIR/93/23321 dated 18th November, 1993.

	necessary, to distinguish client's securities from his own securities.	
--	--	--

Funds and Resources

1	The member should not be involved in fund lending / borrowing activities except those in connection with or incidental to or consequential upon the securities business.	Regulations 8(1)(f) and 8(3)(f) of SC(R) Rules, 1957
2	The gross turnover of the member must be in direct correlation with the base capital / additional capital deposited by the member with the Exchange	Circulars SMD/SED/CIR/93/22570 dated 21st October, 1993 and SMD/SED/RCG/270/96 dated 19th January, 1996
3	The member should collect margin money from the clients in case of large orders / clients with frequent delays in payments deliveries / dispute of deals	Circular SMD/SED/CIR/93/23321 dated 18th November, 1993

Trading Operations

1	The member should be paying margin money as per the Exchange requirements on a regular basis. The auditor may also check the authenticity of the deals exempted from payment of margins, as in institutional deals, etc. Margins to be paid include Marked to Market margin, etc.	Circular SMD/RCG/2782/96 dated 16th July, 1996, Circular SMD/RCG/2995/96 dated 1st August, 1996, Circular SMD/POLICY/CIR-2/98 dated 14th January, 1998, Circular SMDRP/Policy/Circular-17/98 dated 2nd July, 1998, Circular SMDRP/POLICY/CIR-19/99 dated 2nd July, 1999 Circular SMDRP/POLICY/ CIR-26/99 dated 17th August, 1999
2	The member should report all off-market / negotiated deals to the concerned Exchange, within the time limits prescribed by the Exchange.	Circular SMD/RCG/(BKG)/293/95 dated 14th March, 1995
3	All off-market deals / negotiated deals entered into by the member should result in compulsory delivery.	Circular SMD/POLICY/Circular 3-97 dated 31st March, 1997 and Circular SMDRP/Policy/ Circular-20/98 dated 4th August, 1998
4	The member should not have entered into any fictitious transactions.	SEBI (Stock Broker and Sub-brokers) Regulations, 1992 - Code of Conduct

Regulatory Requirements

1	The member should have submitted the audit report for a financial year by 30th September of the next financial year	Circular SMD/SED/0072/92 dated 31st December, 1992
---	---	--

17.44 Advanced Auditing and Professional Ethics

2	The member should not have any dealings with sub-brokers not registered with Securities and Exchange Board of India	Circular SMD/POLICY/CIRCULAR/3-97 dated 31st March, 1997
3	Members of Stock Exchanges acting as sub-brokers should register themselves with Securities and Exchange Board of India	Circular SMD/Policy/CIR-3/98 dated 16th January, 1998
4.	Annual payment of registration fees to SEBI, based on recommendations of the expert committee / court's order, if any	Circular SMD/SED/1430/93 dated 7th January, 1993, Circular SMD/ED/2132/96 dated 4th June, 1996, Circular SMD/Policy/CIR-4/98 dated 16th January, 1998, Circular SMD/DBA-II/CIR-31/98 dated 5th November, 1998
4	The auditor should look into the agreement entered into by the member and sub-broker, including adherence to the terms mentioned in the contract	Circular SMD/OPG/AA/1020/96 dated 14th March, 1996
5	The inspecting authority should check if the member has submitted information about himself, sought by SEBI	Circular SMD/Policy/Cir-7/98 dated 16th February, 1998.

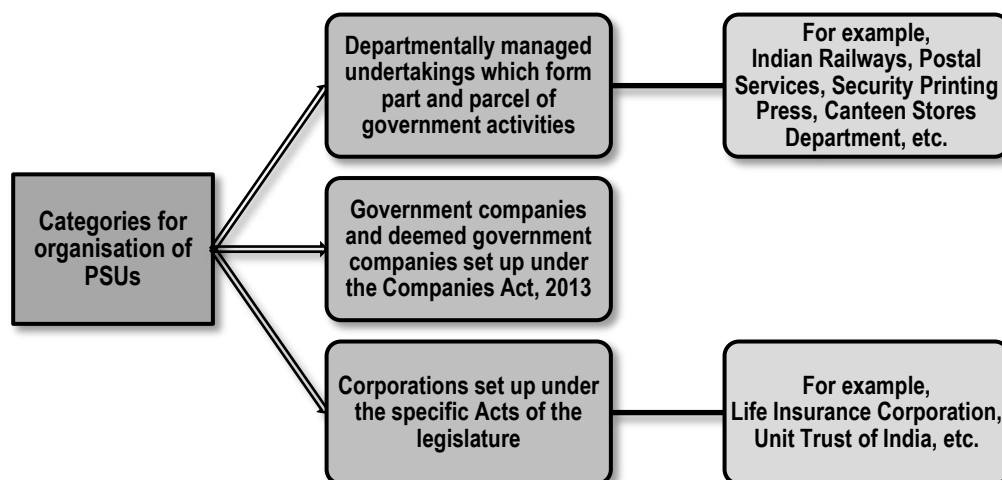

Audit of Public Sector Undertakings

18.1 Introduction

Public sector undertakings in India are fundamentally owned or controlled by central government, or any state government or governments, or partly by the central government and one or more state governments. The public enterprises have been assigned a key role in the socio-economic development of the country. These enterprises are industries supplying basic inputs to industry and agriculture, such as coal, oil, steel, minerals and metals, cement, chemicals and fertilizers and heavy equipment. Public utilities like the railways, postal and telecom services, electricity generation and supply, road transport, etc. constitute another class of public enterprises. Thus in India the public sector has achieved a dominant role in the national economy.

* Source Times of India

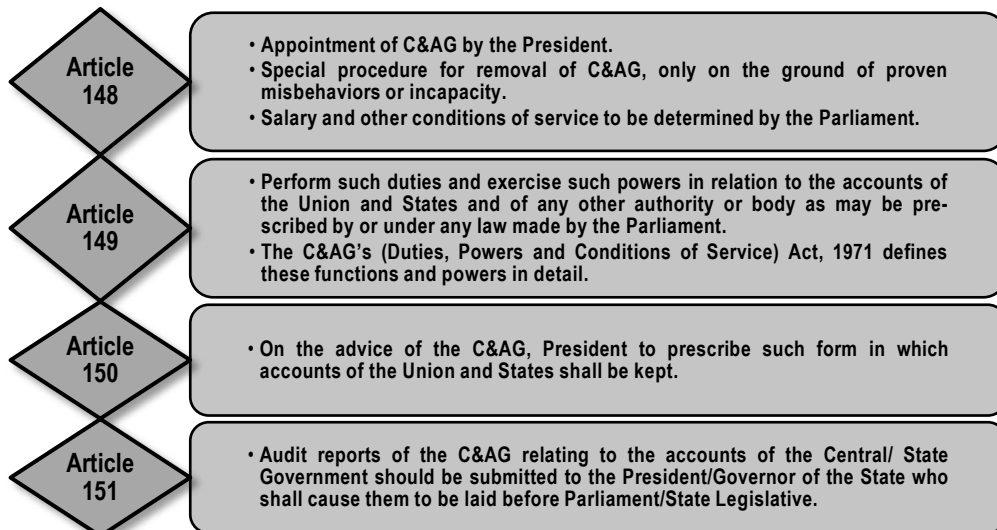

18.2 Framework for Government Audit

As defined under section 2(45) of the Companies Act, 2013, a “Government company” is a company in which not less than 51% of the paid-up share capital is held by the Central Government or by any State Government or Governments or partly by the Central Government and partly by one or more State Governments, and includes a company which is a subsidiary company of such a Government company.

In India, government audit is performed by an independent constitutional authority, i.e. Comptroller and Audit General (C&AG) of India, through the Indian Audit and Accounts Department. The Constitution of India gives a special status to the C&AG and contains provisions to safeguard his independence.

Article 148 to 151 of the Constitution prescribes the role of C&AG of India as follows:

The Comptroller and Audit General's (Duties, Power and Conditions of Services) Act, 1971, prescribes that the C&AG shall hold office for a term of six years or upto the age of 65 years, whichever is earlier. He can resign at any time through a resignation letter addressed to the President. The Act also assigns the duties regarding the audit to be followed by C&AG.

The number of organisations subject to the audit of the Comptroller and Auditor General of India is very large. This includes:

As a result, the Comptroller and Auditor General of India has been issuing a large number of audit reports every year.

Audit of Government Companies (Commercial Audit) – There is a special arrangement for the audit of companies where the equity participation by Government is 51 percent or more. The auditors of these companies are Chartered Accountants, appointed by the Comptroller & Auditor General, who gives the auditors directions on the manner in which the audit should be conducted by them. He is also empowered to comment upon the audit reports of the auditors. In addition, he has a right to conduct a supplementary audit of such companies and cause test audit if considered necessary, by an order.

[Note: Audit of Government companies is discussed separately under Para 18.4]

Audit Board Setup in Commercial Audit – A unique feature of the audit conducted by the Indian Audit and Accounts Department is the constitution of Audit Boards for conducting comprehensive audit appraisals of the working of Public Sector Enterprises engaged in diverse sectors of the economy.

These Audit Boards associate with them experts in disciplines relevant to the appraisals. They discuss their findings and conclusions with the managements of the enterprises and their controlling ministries and departments of government to ascertain their view points before finalisation.

The results of such comprehensive appraisals are incorporated by the Comptroller and Auditor General in his reports.

It has no separate legal entity and works under the supervision and control of the Comptroller and Auditor General.

18.4 Advanced Auditing and Professional Ethics

Action on Audit Reports – The scrutiny of the Annual Accounts and the Audit Reports thereon by the Parliament as a whole would be an arduous task, considering their diverse and specialised nature, besides imposing excessive demands on the limited time available to the Parliament for discussion of issues of national importance. Therefore, the Parliament and the State Legislatures have, for this purpose, constituted specialized Committees like the Public Accounts Committee (PAC) and the Committee on Public Undertakings (COPU), to which these audit Reports and Annual Accounts automatically stand referred.

Public Accounts Committee (PAC) – It is the duty of the Public Accounts Committee to satisfy itself:

- (i) that the moneys were disbursed legally on the service or purpose to which they were applied.
- (ii) that the expenditure was authorised.
- (iii) that re-appropriation has been made in accordance with the provisions made (i.e. distribution of funds).

It is also the duty of the PAC to examine the statement of accounts of autonomous and semi-autonomous bodies, the audit of which is conducted by the Comptroller & Auditor General either under the directions of the President or by a Statute of Parliament.

Estimates Committee – The Committee examines the estimates with a view to:

- (i) report that economies, improvements in organization, efficiency, consistent with the policy underlying the estimates may be effected;
- (ii) suggest alternative policies;
- (iii) examine whether the money is well laid out within the limit; and
- (iv) suggest the form in which the estimates shall be presented to Parliament.

The Committee does not comment upon a policy approved by Parliament, but where there is evidence that a particular policy is not leading to the desired results, or is leading to waste, it is the duty of the Committee to bring it to the notice of the House.

Committee on Public Undertakings – The Committee on Public Undertakings exercises the same financial control on the public sector undertakings as the Public Accounts Committee exercises over the functioning of the Government Departments. The functions of the Committee are -

- (i) to examine the reports and accounts of public undertakings.
- (ii) to examine the reports of the Comptroller & Auditor General on public undertakings.
- (iii) to examine the autonomy and efficiency of public undertakings and to see whether they are being managed in accordance with sound business principles and prudent commercial practices.
- (iv) to exercise such other functions vested in the PAC and the Committee on Estimates as are not covered above and as may be allotted by the Speaker from time to time.

The examination of public enterprises by the Committee takes the form of comprehensive appraisal or evaluation of performance of the undertaking. It involves a thorough examination, including evaluation of the policies, programmes and financial working of the undertaking.

The objective of the Financial Committees, in doing so, is not to focus only on the individual irregularity, but on the defects in the system which led to such irregularity, and the need for correction of such systems and procedures.

C&AG's Role – The Comptroller & Auditor General of India plays a key role in the functioning of the financial committees of Parliament and the State Legislatures. He has come to be recognised as a 'friend, philosopher and guide' of the Committees. His Reports generally form the basis of the Committees' working, although they are not precluded from examining issues not brought out in his Reports. He scrutinises the notes which the Ministries submit to the Committees and helps the Committees to check the correctness of submissions to the Committees and facts and figures in their draft reports.

The Financial Committees present their Report to the Parliament/ State Legislature with their observations and recommendations. The various Ministries / Department of the Government are required to inform the Committees of the action taken by them on the recommendations of the Committees (which are generally accepted) and the Committees present Action Taken Reports to Parliament / Legislature.

In respect of those cases in Audit Reports, which could not be discussed in detail by the Committees, written answers are obtained from the Department / Ministry concerned and are sometimes incorporated in the Reports presented to the Parliament / State Legislature. This ensures that the audit Reports are not taken lightly by the Government, even if the entire report is not deliberated upon by the Committee.

18.3 Objective and Scope of Public Enterprises Audit

The C&AG's (Duties, Power and Conditions of Services) Act, 1971 specifies the entities that come under audit purview of C&AG at the Union and State level, however, the scope and extent of audit is determined by the C&AG itself.

(1) **Audit of PSUs not constrained to Financial and Compliance Audit:** Audit of public enterprises in India is not restricted to financial and compliance audit; it extends also to performance (efficiency, economy and effectiveness) with which these operate and fulfill their objectives and goals.

18.6 Advanced Auditing and Professional Ethics

(2) **Propriety Audit:** Another aspect of audit relates to questions of propriety. This audit is directed towards an examination of management decisions in sales, purchases, contracts, etc. to see whether these have been taken in the best interests of the undertaking and conform to accepted principles of financial propriety.

(3) **Comprehensive Audit:** Under comprehensive audit, the C&AG do not really cover again the field which has already been covered. He conducts an appraisal or an efficiency-cum-performance audit. He sees whether the undertakings have fulfilled the objectives for which they have been established, whether value-for-money spent has been obtained, whether the targets have been achieved, etc. He locates the areas of weakness including review of the decisions taken by the management and a comprehensive appraisal of the performance of the undertaking.

(4) **Organisation's Decision to be taken by Competent Authority:** In examining the decisions of a management, the auditor examines that these were taken by the competent authority after examination of all aspects (economic, technological, public interest) on the basis of all the relevant information available at that time and taking into consideration the different alternatives available to management and that the decisions were consistent with the aims and objectives of the enterprise.

(5) **Helping Government:** Audit is an instrument of accountability. But an equally important purpose of audit of public enterprises in India is to help the Government and the enterprise managements improve their efficiency and effectiveness. This is achieved by bringing out financial and operational deficiencies, inadequacies or ineffectiveness of systems, shortfalls in performance, etc. and by analysing the causes of shortfall from acceptable standards of performance.

(6) **Highlighting Issues of Efficient and Economic Operations:** Financial performance is linked with physical performance and issues of efficient and economic operations and management of resources are highlighted. There is an increasing emphasis on audit being an instrument of improvement.

(7) **Fiscal and Managerial Accountability:** In the broader context, Government audit encompasses two main elements, viz., (a) Fiscal Accountability: It includes audit of provisions of funds, sanctions, compliances and propriety; and (b) Managerial Accountability: It includes audit of efficiency, economy and effectiveness (This is often referred to as efficiency-cum-performance audit).

18.4 Audit of Government Companies

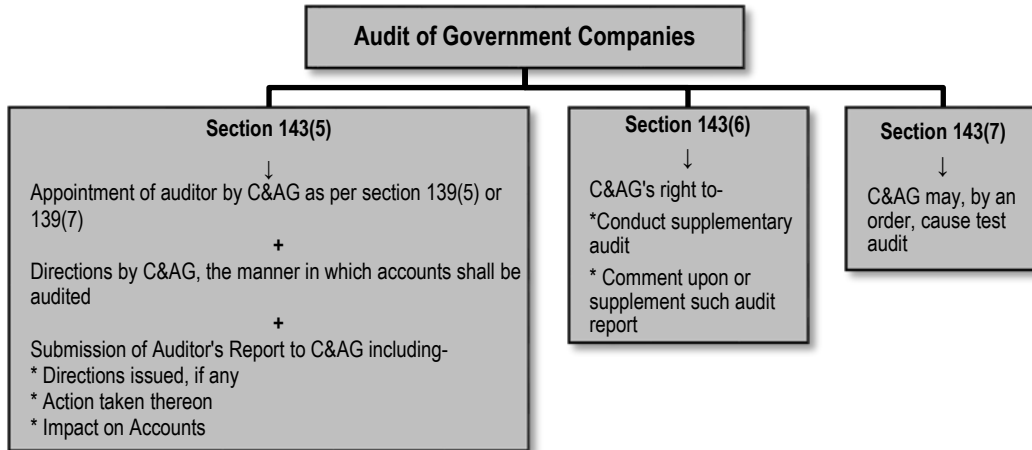

Diagram showing provisions of the Companies Act, 2013 related to Government Audit

The following steps are involved in the audit of government companies:

(a) Appointment of Auditors under Section 139(5) and 139(7) read with section 143(5) of the Companies Act, 2013 - Statutory auditors of Government Company are appointed or re-appointed by the Comptroller and Auditor General of India. There is thus a departure from the practice in vogue in the case of private sector companies where appointment or re-appointment of the auditors and their remuneration are decided by the members at the annual general meetings.

The C&AG may direct the appointed auditor the manner in which the accounts of the Government company are required to be audited and thereupon the auditor so appointed shall submit a copy of the audit report to the Comptroller and Auditor-General of India which, among other things, include the directions, if any, issued by the Comptroller and Auditor-General of India, the action taken thereon and its impact on the accounts and financial statement of the company.

(b) Supplementary audit under section 143(6)(a) of the Companies Act, 2013 - The Comptroller and Auditor-General of India shall within 60 days from the date of receipt of the audit report have a right to conduct a supplementary audit of the financial statement of the company by such person or persons as he may authorize in this behalf; and for the purposes of such audit, require information or additional information to be furnished to any person or persons, so authorised, on such matters, by such person or persons, and in such form, as the Comptroller and Auditor-General of India may direct.

(c) Comment upon or supplement such Audit Report under section 143(6)(b) of the Companies Act, 2013 - Any comments given by the Comptroller and Auditor-General of India upon, or supplement to, the audit report shall be sent by the company to every person entitled to copies of audited financial statements under sub-section (1) of section 136 of the said Act

18.8 Advanced Auditing and Professional Ethics

i.e. every member of the company, to every trustee for the debenture-holder of any debentures issued by the company, and to all persons other than such member or trustee, being the person so entitled and also be placed before the annual general meeting of the company at the same time and in the same manner as the audit report.

(d) Test audit under section 143(7) of the Companies Act, 2013 - Without prejudice to the provisions relating to audit and auditor, the Comptroller and Auditor- General of India may, in case of any company covered under sub-section (5) or sub-section (7) of section 139 of the said Act, if he considers necessary, by an order, cause test audit to be conducted of the accounts of such company and the provisions of section 19A of the Comptroller and Auditor-General's (Duties, Powers and Conditions of Service) Act, 1971, shall apply to the report of such test audit.

18.5 Financial Audit

Financial audit is primarily conducted to express an audit opinion on a set of financial statements. It includes:

- (i) examination and evaluation of financial records and expression of opinion on Financial Statements;
- (ii) audit of financial systems and transactions including an evaluation of compliance with applicable statutes and regulations which affect the accuracy and completeness of accounting records; and
- (iii) audit of internal control and internal audit functions that assist in safeguarding assets and resources and assure the accuracy and completeness of accounting records.

18.6 Compliance Audit

Compliance audit is an independent verification process of evaluating audit evidence to determine whether specified compliance requirements are met.

It examines the transactions relating to expenditure, receipts, assets and liabilities of Government for compliance with:

- (i) the provisions of the Constitution of India and the applicable laws; and
- (ii) the rules, regulations, orders and instructions issued by the competent authority either in pursuance of the provisions of the Constitution of India and the laws or by virtue of the powers formally delegated to it by a superior authority.

Compliance audit also includes an examination of the rules, regulations, orders and instructions for their legality, adequacy, transparency, propriety, prudence and effectiveness, that is, whether these are:

- (i) intra vires of the provisions of the Constitution of India and the laws (Legality);

- (ii) sufficiently comprehensive and ensure effective control over Government receipts, expenditure, assets and liabilities with sufficient safeguards against loss due to wastage, misuse, mismanagement, errors, frauds and other irregularities (Adequacy);
- (iii) clear and free from ambiguity and promote observance of probity in decision making (Transparency);
- (iv) effective and achieve the intended objectives and aims (Effectiveness).

18.7 Performance Audit

A performance audit is an objective and systematic examination of evidence for the purpose of providing an independent assessment of the performance of a government organization, program, activity, or function in order to provide information to improve public accountability and facilitate decision-making by parties with responsibility to oversee or initiate corrective action.

Performance audit in PSUs is conducted by the Comptroller and Auditor General of India (Supreme Audit Institutions) through various subordinate offices of Indian Audit and Accounts Department (IAAD). In conducting performance audit, the subordinate offices are guided by manual and auditing standards prescribed by CAG.

According to the guidelines issued by the C&AG of India, Performance Audits usually address the issues of:

- (i) **Economy-** It is minimising the cost of resources used for an activity, having regard to appropriate quantity, quality and at the best price.

Judging economy implies forming an opinion on the resources (e.g. human, financial and material) deployed. This requires assessing whether the given resources have been used economically and acquired in due time, in appropriate quantity and quality at the best price.

18.10 Advanced Auditing and Professional Ethics

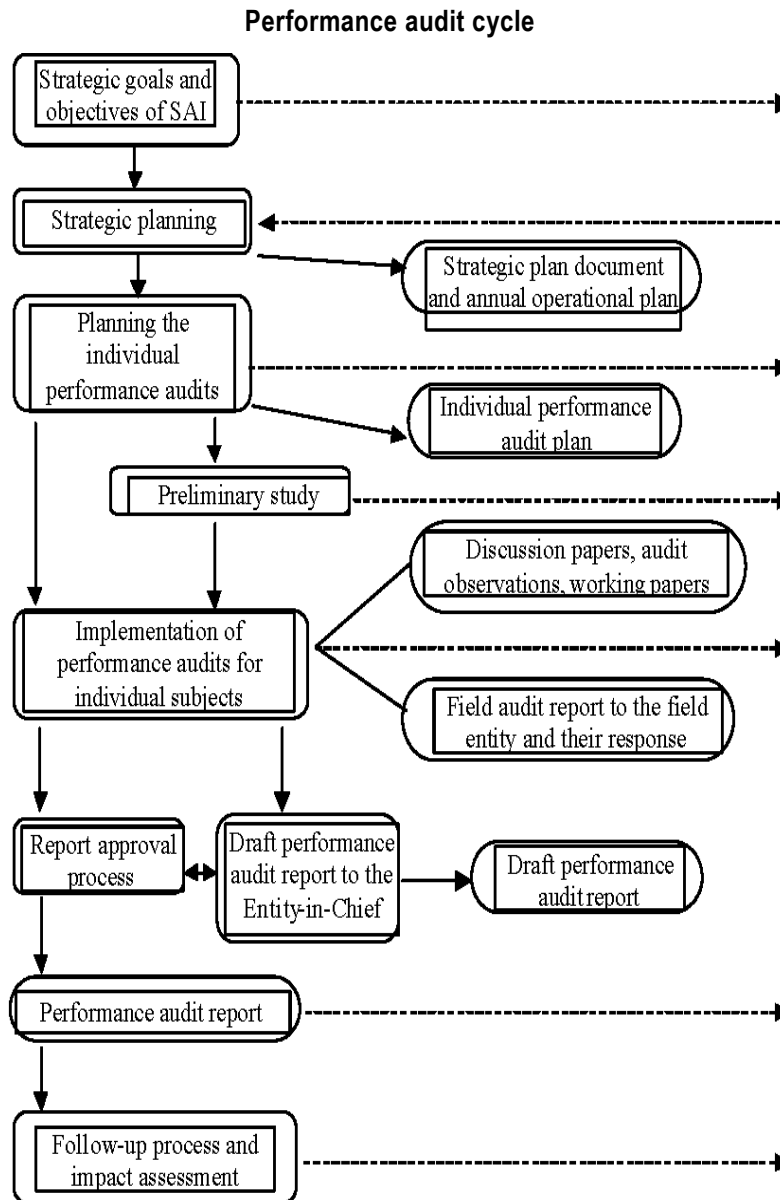

- (ii) **Efficiency-** It is the input-output ratio. In the case of public spending, efficiency is achieved when the output is maximised at the minimum of inputs, or input is minimised for any given quantity and quality of output.

Auditing efficiency embraces aspects such as whether:

- (a) sound procurement practices are followed;
 - (b) resources are properly protected and maintained;
 - (c) human, financial and other resources are efficiently used;
 - (d) optimum amount of resources (staff, equipment, and facilities) are used in producing or delivering the appropriate quantity and quality of goods or services in a timely manner;
 - (e) public sector programmes, entities and activities are efficiently managed, regulated, organised and executed;
 - (f) efficient operating procedures are used; and
 - (g) the objectives of public sector programmes are met cost-effectively.
- (iii) **Effectiveness-** It is the extent to which objectives are achieved and the relationship between the intended impact and the actual impact of an activity.

In auditing effectiveness, performance audit may, for instance:

- (a) assess whether the objectives of and the means provided (legal, financial, etc.) for a new or ongoing public sector programme are proper, consistent, suitable or relevant to the policy;
- (b) determine the extent to which a program achieves a desired level of program results;
- (c) assess and establish with evidence whether the observed direct or indirect social and economic impacts of a policy are due to the policy or to other causes;
- (d) identify factors inhibiting satisfactory performance or goal-fulfilment;
- (e) assess whether the programme complements, duplicates, overlaps or counteracts other related programmes;
- (f) assess the effectiveness of the program and/or of individual program components;
- (g) determine whether management has considered alternatives for carrying out the program that might yield desired results more effectively or at a lower cost;
- (h) assess the adequacy of the management control system for measuring, monitoring and reporting a programme's effectiveness;
- (i) assess compliance with laws and regulations applicable to the program; and
- (j) identify ways of making programmes work more effectively.

18.7.1 Provisions contained in Companies Act, 2013 and C&AG's (Duties, Powers, and Conditions of Service) Act, 1971

According to section 19(1) of the Comptroller and Auditor General (Duties, Powers, and Conditions of Service) Act, 1971, the duties and powers of the Comptroller and Auditor General in relation to the audit of the Accounts of Government companies shall be performed and exercised by him in accordance with the provisions of the Companies Act.

18.12 Advanced Auditing and Professional Ethics

Sub-section (6) and (7) of section 143 of the Companies Act, empowers Comptroller and Auditor General of India to conduct supplementary audit or test audit of Government companies. The CAG shall have right to conduct supplementary or test audit of the Government company's accounts by such person or persons as he may authorize in this behalf; and for the purposes of such audit to require information or additional information to such person or persons and in such form as the Comptroller and/ Auditor General may, by general or special order, direct.

The supplementary or test audit conducted by the Comptroller and Auditor General is in the nature of efficiency-cum-performance appraisal.

Section 143(5) of Companies Act requires the statutory auditor (chartered accountant appointed by CAG under section 139(5) or 139(7) of the Act) to submit a copy of his audit report on the accounts of the Government company to C&AG.

Thus section 143(6) and 143(7) of the Companies Act empowers C&AG to conduct supplementary audit and test audit respectively of annual accounts of a Government company.

In so far as statutory corporations are concerned the respective Statutes provide for audit by CAG. The scope includes conducting performance audit of these corporations also though specifically not stated so.

18.7.2 Objectives of Performance Auditing

The objectives of performance auditing are evaluation of economy, efficiency, and effectiveness of policy, programmes, organization and management. It also promotes accountability by assisting those charged with governance and oversight responsibilities to improve performance; and transparency by affording taxpayers, those targeted by government policies and other stakeholders an insight into the management and outcomes of different government activities.

Performance auditing focuses on areas in which it can add value which have the greatest potential for development. It provides constructive incentives for the responsible parties to take appropriate action.

Example

Performance Audit of enforcement mechanism for administering the provision of Minimum Wages Act (a social welfare legislation)

The auditors, who undertake performance audit of a program or unit, must possess knowledge of the industries or labor contracts where these provisions are applicable and also identify the population thereof before carrying out audit program. He shall evaluate the standard of living before implementation and after implementation of the Act.

Further, he shall have to evaluate the evidence available as to nature of returns prescribed and obtained for taking appropriate action.

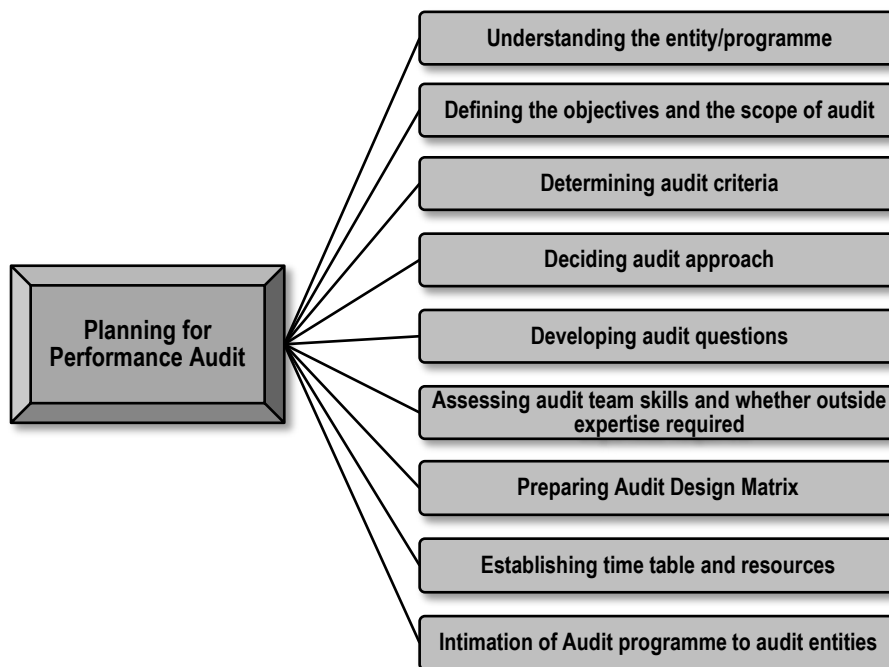

The Performance Auditor shall also have to evaluate the economy, efficiency and effectiveness in the welfare systems to be audited. He can then study the shortcomings in the coordination between different agencies like labor department, EPF and ESI organization and the control systems and point out a set of relevant problems.

Auditor shall also point out lacuna, if any in the existing legal frame work or enforcement mechanism to strengthen the objective of legislation. Another possible area of critical audit may be to study actual level of compensation required in each area keeping in mind the local living conditions and where the minimum wages prescribed in the statute is demonstrably different from this level he may report the same to the Government for taking appropriate action.

In this manner, the performance audit can not only examine the reasons for such vagaries but also ensures that the legislation serves the intended purpose. By reporting the same to the legislature, the corrective is made possible.

[Note: Interested students may refer to CPE Background Material on Performance Audit of Public Sector Enterprises in India published by the ICAI for further reference].

18.7.3 Planning for Performance Audit

The following steps are suggested to the auditors for planning while conducting the performance audit:

(A) Understanding the entity/programme - It is the starting point for planning individual performance audit.

The auditor may use the following sources for understanding the entity:

- (i) **Documents of the entity:** Documents on administration and functions of the entity, policy files, annual reports, budget documents, accounts, minutes of meetings, information on the website, internal audit reports, electronic databases and MIS reports, RTI material etc.
- (ii) **Legislative documents:** Legislation, parliamentary questions and debates, reports of the Public Accounts Committee, the Committee on Public Undertakings, the Estimates Committee and letters from Members of Parliament.
- (iii) **Policy documents:** Documents of Planning Commission, Ministry of Finance etc.
- (iv) **Academic or special research:** Independent evaluations on the entity, academic research and similar work done by other governments and other SAIs.
- (v) **Past audits:** Past financial and performance audits of the entity provide a major source of information and understanding.
- (vi) **Media coverage:** Print and electronic media - their systematic documentation on regular basis in a transparent manner.
- (vii) **Special focus groups:** Audit Advisory Committee concerns, annual and special reports of World Bank, Reserve Bank of India, reports by special interest groups, NGOs, etc.

(B) Defining the objectives and the scope of audit - The audit objectives should be defined in a succinct manner as they will impact the nature of the audit, govern its conduct and affect audit conclusions. Setting audit objectives ensures good quality performance audits. It facilitates clarity, demonstrates consistent quality of audit and serves as a measure of quality assurance of the audit.

Defining the scope constrict the audit to significant issues that relate to the audit objectives. It mainly focuses the extent, timing and nature of the audit.

(C) Determining audit criteria - Audit criteria are the standards used to determine whether a program meets or exceeds expectations. It provides a context for understanding the results of the audit. Audit criteria are reasonable and attainable standards of performance against which economy, efficiency and effectiveness of programmes and activities can be assessed.

The audit criteria may be sought to be obtained from the following sources:

- (i) procedure manuals of the entity.
- (ii) policies, standards, directives and guidelines.
- (iii) criteria used by the same entity or other entities in similar activities or programmes.
- (iv) independent expert opinion and know how.
- (v) new or established scientific knowledge and other reliable information.
- (vi) general management and subject matter literature and research papers.

(D) Deciding audit approach - There is no uniform audit approach prescribed that can be applicable to all types of subjects of performance audits. Selection of approach also determine methods and means used for conducting the audit.

Some of the methods which could be used in conducting performance audits include:

- (i) **Analysis of procedures:** It involves review of the systems in place for planning, conducting, checking and monitoring the activity. This would consist of examination of documents such as financial reports, budgets, programme guidelines, procedure manuals, etc.
- (ii) **Case studies:** A case study is a descriptive analysis of an entity, scheme or a programme. It involves analysis of a particular issue within the context of the whole area under review.
- (iii) **Use of existing data:** The audit staff should investigate the data held by entity management and by other relevant sources. Audit conclusions based on testing of available data for correctness and completeness enhances the assurance level.
- (iv) **Surveys:** Survey is a method of collecting information from members of a population to assess the interrelation of events and conditions. Surveys on predetermined parameters can supplement the audit findings and conclusions adding value to the performance audits.
- (v) **Analysis of results:** It requires the auditor to carry out actual output-input analysis to determine the efficiency of the programme.

18.16 Advanced Auditing and Professional Ethics

(vi) **Quantitative analysis:** It involves examination of available data relating to financials like earnings, revenue, or data relating to programme implementation like details of beneficiaries etc. However, it may not be possible for the auditor to work with complete data due to its high volume. In such cases, sampling techniques are required to be used.

(E) **Developing audit questions** - Subsequent to designing of audit objectives and determination of audit criteria, the audit team is required to prepare a list of questions to which they would seek answers. The questions should be framed in comprehensive manner involving detailed hierarchy of questions.

(F) **Assessing audit team skills and whether outside expertise required** - It is essential that the performance auditors possess special aptitude and knowledge. The Auditing Standards of C&AG of India provide that the audit institution should develop and train the auditors to enable them to perform their tasks effectively & efficiently and should prepare manuals & other written guidance notes & instructions concerning conduct of audits.

Given the diverse range of subjects of performance auditing, the audit team needs to develop sound understanding of the programme or entity proposed to be audited.

The audit team needs to decide at the planning stage on which aspect expertise is required. Though, the Accountant General may use the work of an expert, he retains full responsibility for the expression of opinion in the auditor's report.

(G) **Preparing Audit Design Matrix (ADM)** - Having determined the audit objective, audit criteria, audit approach, data collection etc., audit team should prepare an Audit Design Matrix. It is a structured and highly focused approach to designing a performance audit study.

It highlights the data collection and analysis method as well as the type and sources of evidence required to support audit opinion/findings.

The specimen of ADM is given as under:

Audit Objective (1)	Audit Questions (2)	Audit Criteria (3)	Evidence (4)	Data Collection and Analysis Method (5)

An ADM is prepared on the basis of information and knowledge obtained during the planning stage. A well-designed ADM leads to effective audits thus providing highest assurances to the auditing entities. It is desirable to prepare ADM for each of the audit objectives.

(H) **Establishing time table and resources** - It is significant to determine the timetable and desirable resources. Selection of appropriate audit team is the most vital component in planning an audit. Considerations for selection of an appropriate audit team should be recorded along with the proposed timelines for various activities to be undertaken as a part of audit process. The progress should also be monitored against these timelines. The Accountant General would be liable for ensuring that the performance audit is completed on time. The variations between the required and actual time spent should be compared and approved from the competent authority.

The team should build time for translation, approval and possible delays in their own schedule in order to meet the targets.

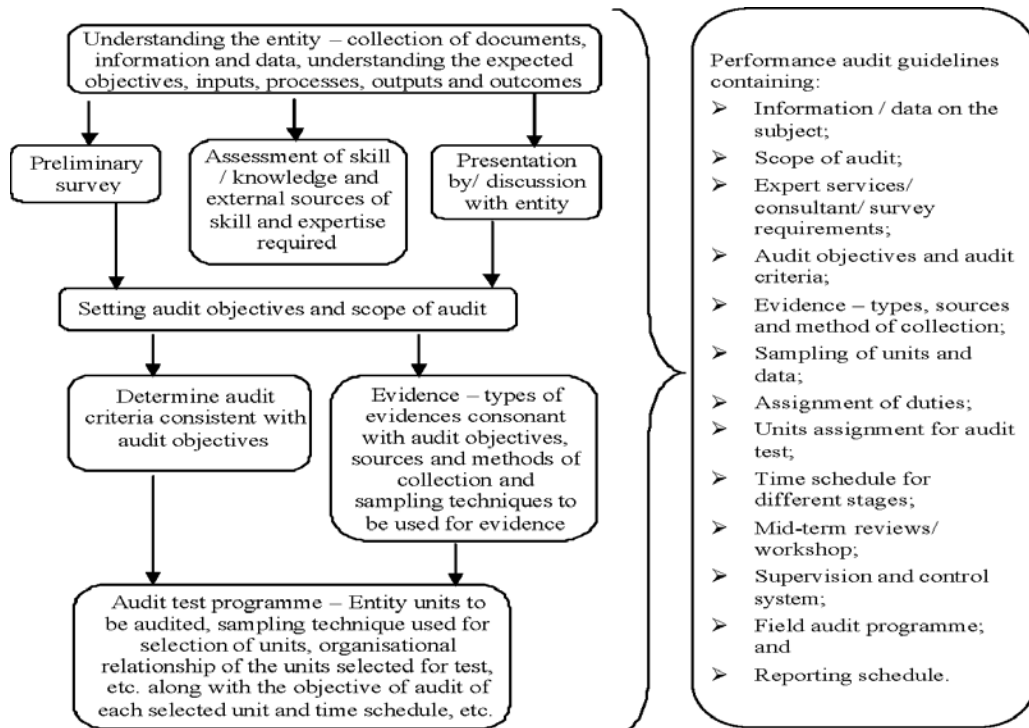

(I) Intimation of Audit programme to audit entities - Audited entities must be intimated about the intention of taking up planned performance audit with the scope and extent of audit including the constitution of audit team and the tentative time schedule, well before the commencement of Audit. Acknowledgement of this may be requested and placed on record.

It may be required to refine an audit's objectives as the audit progresses for gathering the requisite information to fulfill the audit. The reasons for such changes in the objectives should also be recorded and approved from the competent authority.

The audit programme should be flexible and reviewed from time to time as it is not possible to anticipate all the contingencies at the early stage.

The Accountant General should share all significant refinements in the approach and additional tests and findings, concurrently with other audit teams when different persons conduct the audit at different locations. The system of sharing of the significant field audit experience should be documented and reviewed.

Performance audit planning

18.8 Comprehensive Audit

The Comptroller and Auditor General assist the legislature in reviewing the performance of public undertakings. He conducts an efficiency-cum-performance audit other than the field which has already been covered either by the internal audit of the individual concerns or by

18.18 Advanced Auditing and Professional Ethics

the professional auditors. He locates the area of weakness and extravagance for managements' information.

The areas covered in comprehensive audit naturally vary from enterprise to enterprise depending on the nature of the enterprise, its objectives and operations. However, in general, the covered areas are those of investment decisions, project formulation, organisational effectiveness, capacity utilisation, management of equipment, plant and machinery, production performance, use of materials, productivity of labour, idle capacity, costs and prices, materials management, sales and credit control, budgetary and internal control systems, etc.

Some of the issues examined in comprehensive audit are:

- (a) How does the overall capital cost of the project compare with the approved planned costs? Were there any substantial increases and, if so, what are these and whether there is evidence of extravagance or unnecessary expenditure?
- (b) Have the accepted production or operational outputs been achieved? Has there been under-utilisation of installed capacity or shortfall in performance and, if so, what has caused it?
- (c) Has the planned rate of return been achieved?
- (d) Are the systems of project formulation and execution sound? Are there inadequacies? What has been the effect on the gestation period and capital cost?
- (e) Are cost control measures adequate and are there inefficiencies, wastages in raw materials consumption, etc.?
- (f) Are the purchase policies adequate? Or have they led to piling up of inventory resulting in redundancy in stores and spares?
- (g) Does the enterprise have research and development programmes? What has been the performance in adopting new processes, technologies, improving profits and in reducing costs through technological progress?
- (h) If the enterprise has an adequate system of repairs and maintenance?
- (i) Are procedures effective and economical?
- (j) Is there any poor or insufficient or inefficient project planning?

The efficiency and effectiveness audit of public enterprises is conducted on the basis of certain standards and criteria. Profit is not the key criterion on performance; management's performance in the economical and efficient use of public funds and in the achievement of objectives is more relevant. Public enterprises have been set up with certain socio-economic purposes and for fulfillment of certain objectives. The objectives vary from enterprise to enterprise. Audit appraisal analyses the performance of an enterprise to bring out the extent to which the objectives for which the enterprise was set up have been served.

The feasibility/detailed project reports give the basis of investment, capacity, costs, time schedules, gestation period, etc. and are built up of capacities, parameters and norms of consumption, yields, productivity, costs, rate of return, etc. These provide yardsticks by which the performance is measured. Some of the parameters may change due to external or internal factors subsequent to the setting up of the enterprise/project.

In conducting efficiency audit due account is taken of the changes effected. Then enterprises are required to have their long and short term capital and operational plans and these provide another set of reference points for assessment of performance. Rated capacity of the unit provides an acceptable benchmark against which physical performance is evaluated. However, utilisation of the rated capacity is assessed along with norms for consumption of raw materials and utilities, yields and rejections as well as requirements for proper maintenance and servicing of equipment. Cost efficiency is another important basis in appraising performance. Standard or target costs are determined on the basis of norms of capacity utilisation, consumption, productivity, yield etc. given in the detailed project reports, moderated in many cases by expert studies to take care of later constraints and changes.

The Bureau of Public Enterprises has issued guidelines to be followed by the public sector enterprises in respect of general management, financial management, materials management, production management, construction management, etc. and these guidelines provide another basis for appraising enterprise performance and its systems. Another source of criteria is industrial engineering and other technical studies by internal and external experts and the standards given in these. Then there are standards of financial propriety.

The starting point of a comprehensive appraisal of a public enterprise, which covers aspects of economy, efficiency and effectiveness, is the preparation of an audit programme based on the study of decisions relating to the setting up of the enterprise, its objectives, the areas of operation, organisation, financial and operational details available in the annual reports and accounts, capital and operational budgets, deliberations of the board of directors, material in the earlier audit inspection reports on the enterprise and other relevant available papers. These audit programmes (or guidelines) identify the areas/aspects which require further detailed audit analysis and criteria, the data required for such analysis and the sources of such data, the extent of the audit analysis including the test checks to be applied and the instructions to the audit parties assigned to the work.

18.9 Propriety Audit

Auditing, as a composite concept, looks into accounting and arithmetical accuracy, adherence to rules and regulations, propriety and the end result. According to the varied requirements, the emphasis on each of the aforesaid factors differs between various types of audit. Students should carefully go through section 143 of the Companies Act, 2013. All the requirements of this section are applicable to a Government Company and the analysis that will follow will show that some of the provisions of section 143 really are propriety based. ***Besides, the Companies (Auditor's Report) Order, 2016 issued under section 143(11) of the Companies Act, is also applicable to a Government Company, provided the Government Company belongs to any of the categories of companies to which the Order applies.***

18.20 Advanced Auditing and Professional Ethics

Finally, the Comptroller and Auditor General has issued a set of detailed directions under Companies Act which are to be complied with by the independent professional auditor in carrying out the audit of Government Companies. Propriety already exists in the audits carried on by the Comptroller and Auditor General of India.

18.9.1 Definition and Principles

Propriety audit stands for verification of transactions on the tests of public interest, commonly accepted customs and standards of conduct.

E.L. Kohler has defined the term propriety as “that which meets the tests of public interest, commonly accepted customs, and standards of conduct, and particularly as applied to professional performance, requirements of law, Government regulations and professional codes”. On an analysis, the tests boil down to tests on economy, efficiency and faithfulness. Instead of too much dependence on documents, vouchers and evidence, it shifts the emphasis to the substance of transactions and looks into the appropriateness thereof on a consideration of financial prudence, public interest and prevention of wasteful expenditure.

Thus, propriety audit is concerned with scrutiny of executive actions and decisions bearing on financial and profit and loss situation of the company, with special regard to public interest and commonly accepted customs and standards of conduct. It is also seen whether every officer has exercised the same vigilance in respect of expenditure incurred from public money, as a person of ordinary prudence would exercise in respect of expenditure of his own money under similar circumstances.

In ‘propriety audit’, the auditors try to bring out cases of improper, avoidable, or infructuous expenditure even though the expenditure has been incurred in conformity with the existing rules and regulations. A transaction may satisfy all the requirements of regularity audit insofar as the various formalities regarding rules and regulations are concerned, but may still be highly wasteful. For example, a building may be constructed for installing a telephone exchange but may not be used for the same purpose resulting in infructuous expenditure or a school building may be constructed but used after five years of its completion is a case of avoidable expenditure.

Audit should, therefore, try to secure a reasonably high standard of public financial morality by looking into the wisdom, faithfulness and economy of transactions. These considerations have led to the evolution of audit against propriety which is now being combined by the audit authorities with their routine function of regularity audit. It is hard to frame any precise rules for regulating the course of audit against propriety. Such an objective of audit depends for its acceptance on its appeal to the common sense and straight logic of the auditors and of those whose financial transactions are subjected to propriety audit. However, some general principles have been laid down in the Audit Code, which have for long been recognised as standards of financial propriety.

Propriety requires the transactions, and more particularly expenditure, to conform to certain general principles. These principles are:

- (i) that the expenditure is not *prima facie* more than the occasion demands and that every official exercises the same degree of vigilance in respect of expenditure as a person of ordinary prudence would exercise in respect of his own money;
- (ii) that the authority exercises its power of sanctioning expenditure to pass an order which will not directly or indirectly accrue to its own advantage;
- (iii) that funds are not utilised for the benefit of a particular person or group of persons and
- (iv) that, apart from the agreed remuneration or reward, no other avenue is kept open to indirectly benefit the management personnel, employees and others.

It may be stated that it is the responsibility of the executive departments to enforce economy in public expenditure. The function of audit is to bring to the notice of the proper authorities of wastefulness in public administration and cases of improper, avoidable and infructuous expenditure.

18.9.2 Relevant provisions in the Companies Act, 2013

The Parliament and Government, with a view to knowing the standards of efficiency, propriety, cost consciousness and economy, have already come up with some provisions in the Companies Act, having direct or indirect bearing on propriety; some of these have been referred to earlier. These provisions are:

1. Section 148 relating to Cost Records and Audit.
2. Section 143(1) requiring enquiry into certain specified matters.
3. Section 143(6) and 143(7) requiring a supplementary audit and test audit respectively in respect of the Government companies on matters specified.
4. Additional information in Part II of Schedule III.

All these are applicable to Government Companies. The requirement of the provisions of section 143(1) is essentially propriety-oriented as much as some specific dubious practices are required to be looked into by the auditor. Areas of propriety audit under the provisions of Section 143(1) may be following:

- (a) Whether the terms on which secured loans and secured advances have been made are prejudicial to the interests of the company or its members.

It may be appreciated that the terms of loans include such matters as security, interest, repayment period and other business considerations. The auditor has to inquire whether the terms are such that they can be adjudged as prejudicial to the legitimate interest of the company or of its shareholders. This is a process of judging a situation by reference to certain objective standards or reasonableness whether the terms entered into are prejudicial or not, not only to the company but also to the shareholders.

- (b) Whether transactions of the company which are represented merely by book entries are prejudicial to the interests of the company. This proposition has got to be inquired into by

18.22 Advanced Auditing and Professional Ethics

reference to the effects of the book entries, unsupported by transactions, on the legitimate interests of the company. The auditor has to exercise his judgment based on certain objective standards. It is also possible that some transactions may not adversely affect the interests of the company. The auditor has to judiciously consider what does and does not constitute the interest of the company.

- (c) Whether investment of companies, other than a banking or an investment company, in the form of shares, debentures and other securities have been sold at a price lower than the cost. Apparently, this is a matter of verification by the auditor. The intention, however, is not know whether loss has occurred due to the sale. The auditor is required to inquire into circumstances of sale of investments that resulted in loss. Obviously, the duty cast on him is propriety based, i.e., reasonableness of the decision to sell at a loss. It involves exercise of judgment having regard to the circumstances in which the company was placed at the time of making the sale.
- (d) Whether loans and advances made by the company have been shown as deposits. Again, considering the propriety element, rationalizing the proper disclosure of loans and advance given by company is made.
- (e) Whether personal expenses have been charged to revenue. It is an accepted principle that expenses which are not business expenses should not be charged to revenue. The effect of charging personal expenses to the business is to distort the profitability of the company and to secure a personal gain at the cost of the company. Obviously, propriety is involved in this; charging personal expenses to business account is highly improper and abusive hence this provision.
- (f) In case it is stated in the books and papers of the company that shares have been allotted for cash, whether cash has actually been received in respect of such allotment, and if no cash actually received, whether the position in books of account and balance sheet so stated is correct, regular and not misleading. A control has been set up to verify the receipt of cash in case of allotment of shares for cash. Further, if cash is not received, the books of accounts and statement of affairs shows the true picture.

Cost records and the provisions of cost audit are designed to inculcate cost consciousness in the management and to know whether productivity is of acceptable order and whether undue wastage or loss etc. has occurred. It would be useful to go into some of the specific requirement of cost audit report in this context. Some of the matters in the additional information sought through the Statement of Profit and Loss (i.e., Part II of Schedule III) provide a basis for making more searching enquiries into such vital matters as consumption of raw materials under broad heads, goods purchased under broad heads, work in progress under broad heads, any item of income or expenditure which exceeds one percent of the revenue from operations or ₹ 1,00,000, whichever is higher, etc.

The implications of the Companies (Auditor's Report) Order, 2016 and the provisions of the section 143(6) and the directions issued by the Comptroller and Auditor General also contain significant elements of propriety.

18.9.3 Propriety elements under CARO, 2016:

(a) If the company has granted any loans, secured or unsecured, to companies, firms limited liabilities partnerships or other parties covered in the register maintained under section 189 of the Companies Act, whether the terms and conditions of the grant of such loans are not prejudicial to the company's interest, whether the repayment of the principal amount and interest are stipulated and whether repayments or receipts are regular. For this, the auditor should take note of repayment schedule. If loan agreements are not executed, any other equivalent documents may be referred to arrive at the terms of receipt of interest, for example, letters of understanding, acknowledgement by the party of the terms and conditions communicated by the company, etc. The dates of receipt of principal amount and interest thereof needs to be verified with reference to the books of accounts of the company to come to the conclusion whether such receipts are regular.

(b) If the amount is overdue, state the total amount overdue for more than ninety days, and whether reasonable steps have been taken by the company for recovery of the principal and interest.. In making this examination, the auditor would have to consider the facts and circumstances of each case, including the amounts involved. It is not necessary that steps to be taken must necessarily be legal steps. Depending upon the circumstances, period of delay and other similar factors, issue of reminders or sending of advocate's or solicitor's notice may amount to reasonable steps. The auditor should ask the management to give in writing the steps which have been taken. The auditor should arrive at his opinion only after consideration of the management's representations.

(c) in respect of loans, investments, guarantees, and security whether provisions of section 185 and 186 of the Companies Act, 2013 have been complied with. If not, provide the details thereof.

(d) whether maintenance of cost records has been specified by the Central Government under section 148(1) of the Companies Act, 2013 and whether such accounts and records have been so made and maintained.

(e) whether the company is regular in depositing undisputed statutory dues including provident fund, employees' state insurance, income-tax, sales-tax, service tax, duty of customs, duty of excise, value added tax, cess and any other statutory dues to the appropriate authorities and if not, the extent of the arrears of outstanding statutory dues as on the last day of the financial year concerned for a period of more than six months from the date they became payable, shall be indicated; by the auditor. In addition, where dues of income tax or sales tax or service tax or duty of customs or duty of excise or value added tax have not been deposited on account of any dispute, then the amounts involved and the

forum where dispute is pending shall be mentioned by the auditor. It may be noted that mere representation to the concerned Department shall not be treated as a dispute.

(f) If the company has defaulted in repayment of loans or borrowing to a financial institution, bank, Government or dues to debenture holders? If yes, the period and the amount of default to be reported (in case of defaults to banks, financial institutions, and Government, lender wise details to be provided). The auditor should obtain a schedule of repayments to banks, financial institutions and debenture holders from the management of the company. He should examine the agreement or other documents containing the terms and conditions of the loans and borrowings of the company from banks and financial institutions. The auditor should also examine the debenture trust deed. This examination would enable the auditor in verifying the amount and due dates of the payments mentioned in schedule of repayments provided by the management of the company. The auditor should then verify whether the repayments as per the books of account are in accordance with the terms and conditions of the relevant agreement. The auditor should also satisfy himself that the repayment have actually been made to the party concerned.

(g) Whether the term loans were applied for the purpose for which the loans were obtained. The auditor should examine the terms and conditions subject to which the company has obtained the term loans. The auditor may also examine the proposal for grant of loan made to the bank. The auditor should compare the purpose for which term loans were sanctioned with the actual utilisation of the loans. He should obtain sufficient appropriate audit evidence regarding the utilisation of the amounts raised.

(h) whether moneys raised by way of initial public offer or further public offer (including debt instruments) and term loans were applied for the purposes for which those are raised. If not, the details together with delays or default and subsequent rectification, if any, as may be applicable, be reported;

(i) whether any fraud by the company or any fraud on the Company by its officers or employees has been noticed or reported during the year; If yes, the nature and the amount involved is to be indicated;

For this, while planning the audit, the auditor should discuss with other members of the audit team, the susceptibility of the company to material misstatements in the financial statements resulting from fraud. The auditor should examine the reports of the internal auditor with a view to ascertain whether any fraud has been reported or noticed by the management. The auditor should examine the minutes of the audit committee, if available, to ascertain whether any instance of fraud pertaining to the company has been reported and actions taken thereon. The auditor should also discuss the matter with other employees of the company.

(j) whether managerial remuneration has been paid or provided in accordance with the requisite approvals mandated by the provisions of section 197 read with Schedule V to the Companies Act? If not, state the amount involved and steps taken by the company for securing refund of the same;

(k) whether the Nidhi Company has complied with the Net Owned Funds to Deposits in the ratio of 1: 20 to meet out the liability and whether the Nidhi Company is maintaining ten per cent unencumbered term deposits as specified in the Nidhi Rules, 2014 to meet out the liability;

(l) whether the company has made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year under review and if so, as to whether the requirement of section 42 of the Companies Act, 2013 have been complied with and the amount raised have been used for the purposes for which the funds were raised. If not, provide the details in respect of the amount involved and nature of non-compliance;

(m) whether the company has entered into any non-cash transactions with directors or persons connected with him and if so, whether the provisions of section 192 of Companies Act, 2013 have been complied with;

From the above analysis, it is somewhat clear that under the Companies Act, we already have tools which bring about a blending of propriety to the professional audit of Government companies. However, a word of caution is necessary in this context. The audit conducted by the Comptroller and Auditor General is a rule, procedure and propriety-based one; and often it is said that the desired flexibility is lacking in the system and this has contributed in a large measure to the lack of rapport between the auditor and the audit-units. Honesty is open to question, if that honesty has deviated from laid down rules and procedures. In turn, this has tended to foster a tendency amongst Government officials to just conform to the rules and provide a show of compliance with the standards of propriety. This is not intended to be little the contribution of this audit in ensuring appropriate use of fund of the Government. In Government, because of the enormous amounts involved and the massive volume of transactions and in view of public interest, it is but necessary that compliance with rules should be insisted upon and non-compliance enquired into. But the benefit derived is at least partly offset by the element of distrust and often the truth remains buried.

One distinguishing feature should be observed; excepting the directions of the Comptroller and Auditor General under the Companies Act, the rest of the provisions are applicable equally to government and non-government companies. Whatever elements of propriety are discernible in them are also present in the audit of non-government companies. The directions generally known as Comptroller and Auditor General's directions, however, are exclusively applicable to the audit of Government companies.

Propriety Audit-Problems - Problems in propriety audit, however, arise mainly because of its distinct nature. The expression "propriety" is a moral term and can be understood by reference to the concept of morality accepted by the society at a given time. In any auditing, the essential test lies in formulation of auditing propositions. In the audit of financial accounts by reference to financial and legal requirements, propositions are built up about happening of events, existence, accuracy, title, ownership, compliance with law and internal regulations etc., which are all verifiable. In propriety audit the formulation of verifiable auditing propositions poses the problem.

18.26 Advanced Auditing and Professional Ethics

Propriety audit has an inherent element of subjectivity because it is very difficult to establish standards of public interest, commonly accepted customs, standards for conduct which are not firm basis for audit evaluation. To take care of this situation, the C&AG has developed the norms of propriety for expenditure of public funds in our country. By laying down the standards of propriety for Government expenditure the C&AG has really tried to tackle in a practical way the complex problem of subjectivity inherent in a situation calling for propriety consideration.

The norms so developed provide the basis of verifying expenditure incurred by various Government departments. It may be appreciated that the norms of propriety applicable to governmental transactions may not *ipso facto* apply to transactions of private sector which have distinct and more limited, objectives suited to them. Each private sector entity may have its unique objectives related, to its management philosophy and the transactions should be geared to achieve those. For example, a management which is operating for maximization of profits without infringing, any legal regulations may follow certain policies while another management believing in a wider measure of social justice may follow different policies. Despite these clear angularities, certain commonness can also be discerned in the policies and approaches of different managements. They include efficient operations, higher productivity and higher profit, reduction of wasteful expenditure etc. Above all, each entity has its impact on the society and building up propriety audit propositions becomes of paramount importance.

It is felt that if the management of each entity, irrespective of any legal requirements, formulates norms of propriety for the entity, taking full note of wider social repercussions inherent in its operations; a formidable hurdle in the way of wider introduction of propriety audit can be removed. The element of subjectivity in propriety evaluation will get reduced.

Propriety as a moral element should be a matter of evaluation based on objectives and prevailing circumstances. For example, a travel by air as such should not be considered wasteful unless it is proved that a travel by rail would have been feasible in the circumstances and would have brought the same results brought by the air travel.

The element of subjectivity has caused proper discharge of duty very delicate and demands discretion, but wisdom of taking commercial decisions under dynamic environment (the economic, social and political) must be evaluated with reference to the circumstances in which these were taken and therefore, the auditor in his field must reconstruct such circumstances. The judgment of the auditor must be objective as otherwise it would dampen the initiative of management and others in taking commercial decisions and propriety audit would prove itself to be counter productive.

18.10 Audit Report of the Comptroller and Auditor General

For facility of consideration, the reports of the Comptroller and Auditor General on the public sector undertakings of the Central Government are presented to the Parliament in several parts consisting of the following:

- (a) Introduction containing a general review of the working results of Government companies, deemed Government companies and corporations.

- (b) Results of comprehensive appraisals of selected undertakings conducted by the Audit Board.
- (c) Resume of the company auditors' reports submitted by them under the directions issued by the Comptroller and Auditor General and that of comments on the accounts of the Government companies.
- (d) Significant results of audit of the undertakings not taken up for appraisal by the Audit Board.

For certain specified states, the Comptroller and Auditor General submit a separate audit report (commercial) to the legislature, while for other States/Union Territories with legislature, there is a commercial chapter in the main audit report. The State audit reports, contains both the results of audit appraisal of performance of selected companies/corporations as well as important individual instances of financial irregularities, wasteful expenditure, system deficiencies noticed by the statutory auditors, comments noticed in Government audit in the audit functions of certification of accounts and a general review of the working results of Government companies and corporations.

***Specimen (abridged) Performance Report issued by
the Comptroller and Auditor General of India***

I. Performance Audit on functioning of Internal Audit in Income Tax Department for the year ended March, 2015

This Report for the year ended March 2015 has been prepared for submission to the President under Article 151 of the Constitution of India.

Income Tax Department (ITD) is subjected to Internal Audit of assessment and accounting functions. The audit objectives of the "Functioning of Internal Audit Wing in Income Tax Department" were to derive an assurance whether:

- (a) Internal audit is effective in providing reasonable assurance to the CBDT and Senior Management regarding achievement of objectives relating to compliance, assessment and other interrelated activities, as determined by CBDT.
- (b) Internal audit is playing an effective role in enhancing the quality of assessments.
- (c) There is an effective and efficient follow-up mechanism of internal audit findings and recommendations.

We examined the control issues relevant to CIT (Audit) charges and monitoring mechanism at the level of DIT (Audit) as well as Regional Supervisory Authorities administering the CIT (Audit) charges.

We found that Action Plan was not prepared in 17 CIT (Audit) charges. We noticed that list of auditable cases were not received on a regular basis in 19 CsIT (Audit) charges from administrative CsIT under Pr. CCsIT/CCsIT of 12 regions.

18.28 Advanced Auditing and Professional Ethics

We noticed that out of 7,00,398 cases assigned, Internal Audit examined only 5,73,457 cases resulting in shortfall in coverage of 1,26,941 cases. The practice of selection of high risk units is not in place.

We found that there were delays in initiation of remedial action in 6,172 cases (13 regions) and delays in completion of remedial action in 1,640 cases (10 regions). We noticed 73 cases involving tax effect of ₹ 134.10 crore in six regions where Internal Audit objections were settled without proper reply or completion of remedial action. Inadequate follow up of Internal Audit objections resulted in time barring of 1,553 cases involving tax effect of ₹ 392.65 crore in 11 CsIT (Audit) charges.

The audit has been conducted in conformity with the Auditing Standards issued by the Comptroller and Auditor General of India.

Audit wishes to acknowledge the cooperation received from the Department of Revenue - Central Board of Direct Taxes at each stage of the audit process.

II. Performance of 100% Export Oriented Unit (EOU) scheme of Department of Revenue-Indirect Taxes, Customs for the year ended March, 2014

This Report for the year ended March 2014 has been prepared for submission to the President of India under Article 151 of the Constitution of India.

A Performance Audit on the working of the EOU, corresponding to the Foreign Trade Policy (2009-14), was conducted with a view to seek an assurance that:

- (a) there exists adequate statutory provision/rules regulation, instructions/notification with regards to approval, creation, functioning and monitoring of EOUs.
- (b) the EOUs fulfilled the import conditions as laid down in the relevant notifications and FTP and applicable provisions of HBP.
- (c) the EOUs were able to fulfill the intended objectives as stated in the Foreign Trade Policy.
- (d) the internal controls system and monitoring mechanism are effective.

The total number of EOUs has gone down from 3109 in 2009-10 to 2608 in 2013-14. While the number of functional units has come down from 2279 to 2095 during the same period, the percentage of functional units to total units has declined from 83 per cent in 2010-11 to 80 per cent in 2013-14 with corresponding increase in percentage of non-functional and deboned units. There has been a gradual reduction in EOUs after the SEZ Act came into force in 2006-07.

Government of India had forgone significant customs revenue amounting to ₹ 32,932 crore during 2009-10 to 2013-14 on EOU/EHTP/STP schemes. Government has fallen short by almost 33 per cent (US\$ 150 billion) of its export target in 2013-14 vis-a-vis its Strategic Plan (DoC).

Audit wishes to acknowledge the cooperation received from Ministry of Commerce and Industry (DoC) and Department of Revenue (DoR) and its field formations at each stage of the audit process.

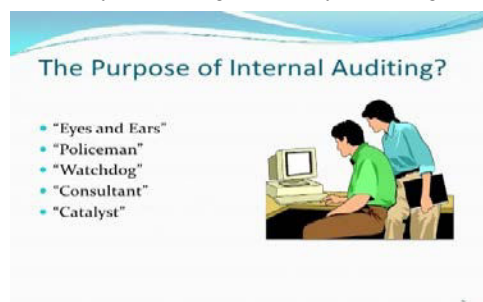

19

Internal Audit, Management and Operational Audit

19.1 Internal Audit

Many modern enterprises have become huge and sophisticated. This has resulted in decentralisation of their activities and consequently the top management is remotely concerned with the day-to-day activities of the concern. In this context internal auditing has acquired a great deal of significance.

Considering the increasing importance of internal auditing, the Institute of Chartered Accountants of India has constituted a Committee on Internal Audit (CIA) as a non-standing committee on February 5, 2004. The CIA was constituted with the object of formulating Standards and Guidance Notes on Internal Audit. As defined in scope of the standards on Internal Audit, Internal Audit means "An independent management function, which involves a continuous and critical appraisal of the functioning of an entity with a view to suggest improvements thereto and add value to and strengthen the overall governance mechanism of the entity, including the entity's strategic risk management and internal control system.

The internal auditing need not be confined to financial transactions and its scope may be extended to the task of reviewing whether the resource utilisation of the enterprise is efficient and economical. This would necessitate a review of all operations of the enterprise as also an evaluation of the effectiveness of management. We should not however lose sight of the fact that internal auditing is basically a service activity.

Fig.: Internal Audit*

The internal auditor has to review and report; he is not expected to take upon himself functions of the operational managers.

Applicability of Provisions of Internal Audit: As per section 138 of the Companies Act, 2013, following class of companies (prescribed in rule 13 of Companies (Accounts) Rules, 2014) shall

* Source: Slide Share

19.2 Advanced Auditing and Professional Ethics

be required to appoint **an internal auditor which may be either an individual or a partnership firm or a body corporate**, namely-

- (a) every listed company;
- (b) every unlisted public company having-
 - (i) paid up share capital of fifty crore rupees or more during the preceding financial year; or
 - (ii) turnover of two hundred crore rupees or more during the preceding financial year; or
 - (iii) outstanding loans or borrowings from banks or public financial institutions exceeding one hundred crore rupees or more at any point of time during the preceding financial year; or
 - (iv) outstanding deposits of twenty five crore rupees or more at any point of time during the preceding financial year; and
- (c) every private company having-
 - (i) turnover of two hundred crore rupees or more during the preceding financial year; or
 - (ii) outstanding loans or borrowings from banks or public financial institutions exceeding one hundred crore rupees or more at any point of time during the preceding financial year.

It is provided that an existing company covered under any of the above criteria shall comply with the requirements within six months of commencement of such section.

Who can be appointed as Internal Auditor? As per section 138, the internal auditor shall either be a chartered accountant or a cost accountant (whether engaged in practice or not), or such other professional as may be decided by the Board to conduct internal audit of the functions and activities of the companies. The internal auditor may or may not be an employee of the company.

To be effective, the internal auditor must be regarded as part of the management and not merely as an assistant thereto. He must have authority to investigate from the financial angles, every phase of the organisational activity under any circumstances. In recent years, there has been a growing tendency in Western countries to make the internal auditor responsible directly to the Board of Directors for the maintenance of adequate accounting procedures and for the preparation of financial statements and reports as regards the functioning of the business. His main responsibility, however, must be to maintain adequate system of internal control by a continuous examination of accounting procedures, receipts and disbursements and to provide adequate safeguards against misappropriation of assets. In carrying out these functions, he must operate independently of the accounting staff and must not in any way divest himself of any of the responsibilities placed upon him. He should also not involve himself in the performance of executive functions in order that his objective outlook does not get obscured by the creation of vested interest.

It may be further pointed out that internal auditors who are qualified accountants, because of

their training and experience, can be of great assistance to the management even in fields other than accounting. They can observe facts and situations and bring them to notice of authorities who would otherwise never know them; also, they critically appraise various policies of the management and draw its attention to any deficiencies, wherever these require to be corrected. In order that an internal auditor may be able to play such a role in the field of management, he must be closely associated with it and his knowledge must be kept up to date by his being kept informed about all important occurrences and events affecting the business, as well as the changes that are made in business policies. Also, he must enjoy an independent status.

In addition, the Audit Committee of the company or the Board shall, in consultation with the Internal Auditor, formulate the scope, functioning, periodicity and methodology for conducting the internal audit.

It may also be noted that the Central Government may, by rules, prescribe the manner and the intervals in which the internal audit shall be conducted and reported to the Board.

The Research Committee of the Institute of Chartered Accountants of India has brought out "General Guidelines on Internal auditing". The following discussion is based upon the above publication.

19.2 Management Functions and Scope of Internal Auditing

Management is a process by which the affairs of an enterprise are conducted in such a manner that its goals and objectives are attained through optimum utilisation of all available resources, within the legal, social, economic and environmental constraints. To achieve optimum utilisation of resources management should determine the goals and objectives of the concern, quantify them to the extent possible, develop major policies and plans, implement them and exercise control over such implementation.

Each of the managerial functions should constantly be viewed by the internal auditor. Translated into more concrete terms, the scope of internal auditor's work should include a review of-

- (i) internal control system and procedures.
- (ii) system regarding the custodianship and safeguarding of assets - monetary and non-monetary of enterprise.
- (iii) compliance by the various segments with the policies, plans and procedures of the enterprise as well as with the relevant regulations and laws.
- (iv) system of collecting data both monetary and non-monetary - to ensure that the information given to management and to external agencies is relevant and reliable.
- (v) organisational structure of the enterprise and its congruence with its objectives.
- (vi) efficient and economical use of available resources tangible as well as intangible.
- (vii) various operations.

On the basis of such review, the internal auditor should in his report, highlight the weaknesses

19.4 Advanced Auditing and Professional Ethics

observed and give suggestions for improvement. We may now have a brief description on each of the above areas of review:

- (i) **Review of internal control system and procedures -**
 - (a) The internal auditor should determine whether the internal control system is in consonance with the organisational structure. As far as possible, controls should be in-built in the operating functions, if they are to be cost effective. For example, the establishment of a separate credit control department would not be justified if the objective of reducing credit risk and minimising debt recovery period could be met through controls in-built in the accounting and sales systems especially in smaller and medium sized concerns.
 - (b) Each control should be reviewed and analysed in terms of its costs and benefits. It should also be seen whether the internal controls were in use throughout the period of intended reliance. A break-down in internal controls for a specific portion of intended reliance would need special attention.
- (ii) **Review of custodianship and safeguarding of assets -** The internal auditor should review the control systems to ensure that all assets are accounted for fully. He should review the means used for safeguarding assets against losses e.g. fire, improper or negligent activity, theft and illegal acts etc. He should review the control systems for intangible assets e.g. the procedures relating to credit control. Where an enterprise uses electronic data processing equipment, the physical and systems control on processing facilities as well as on data storage should be examined and tested fire should review the adequacy of the insurance cover for the various risks involved. He should also verify the existence of the assets.
- (iii) **Review of compliance with policies, plans, procedures and regulations -** It is essential that the various functional segments of an enterprise comply with the relevant policies, plans, procedures, laws and regulations so that the operations are carried out in coordinated manner. He should examine the system of periodical review of existing policies particularly when there is a change in the method and nature of operations of the enterprise. By combining the results of his review of the adequacy of the systems with the result of his compliance tests, the internal auditor should be able to evaluate the effectiveness of the former. He should point out specific weaknesses and suggest remedial action.
- (iv) **Review of relevance and reliability of information -** The internal auditor should review the information systems to evaluate the reliability and integrity of financial and operating information given to management and to external agencies such as governmental bodies, trade organisations and labour unions. For the purpose the internal auditor should review the means used for measuring, classifying and reporting information including the records from which the information is extracted. He should examine the accuracy and reliability of financial and operational records. The usefulness of the reports as well as of the records should be evaluated with reference to their costs. The internal auditor should examine

whether the reporting is by exception i.e. the reports highlight the significant and distinctive features.

- (v) **Review of the organisation structure** - The internal auditor should conduct an appraisal of the organisation structure to ascertain whether it is in harmony with the objectives of the enterprise and whether the assignment of responsibilities is in consonance therewith. For this purpose he should review the manner in which the activities of the enterprise are grouped for managerial control. It is also important to review whether responsibility and authority are in harmony with the grouping pattern. The internal auditor should examine the organisation chart to find out whether the structure is simple and economical and that no function enjoys an undue dominance over the others. He should particularly see that the responsibilities of managerial staff at headquarters do not overlap with those of chief executives at operating units. He should examine whether there is a satisfactory balance between authority and responsibility of important executives. This can be evaluated by discussing the problems of operations and implementation with various executives. The internal auditor should examine the reasonableness of the span of control of each executive (the number of sub-ordinates that an executive controls). He should examine whether there is a unity of command i.e., whether each person reports only to one superior. Where dual responsibilities cannot be avoided, the primary one should be specified and the specific responsibility to each senior fixed. This must be made known to all concerned. Finally, he should evaluate the process of managerial development in the enterprise. This is a vital aspect in a fast growing enterprise.
- (vi) **Review of utilisation of resources** - The internal auditor should check whether proper operating standards and norms have been established for measuring economical and efficient use of resources. They should be detailed enough to be identifiable with specific operating responsibilities and should be capable of being used by operating personnel for monitoring and evaluating their performance. The internal auditor should review the methods of establishing the operating standards and norms. He should carefully examine the assumptions made while setting the standards to ensure that they are appropriate and necessary. The variances should be examined to evaluate whether or not the standards and norms are practical. Where there is a wide divergence between actual performance and the corresponding standards, reasons may be looked into. As a part of evaluating resources utilisation, identifying the facilities which are under-utilized is an important function of the internal auditor. Such instances may consist of under-utilized machines, unoccupied storage space, huge cash or bank balances, idle man power etc. While commenting on staffing, the internal auditor should pay special attention to non-productive work being performed. This would require an enquiry into the job descriptions of employees combined with an intelligent observation of the work being done.
- (vii) **Review of accomplishment of goals and objectives** - The internal auditor should review the overall objectives of the enterprise to evaluate whether they are clearly stated and are attainable. The internal auditor should examine whether to the extent possible, objectives are expressed in precise quantifiable terms (both monetary and non-monetary) to facilitate detailed planning to be made for achieving them. Budgeting forms an important part of

19.6 Advanced Auditing and Professional Ethics

such planning. This will ensure that plans anticipate the problem areas. There should also be sufficient flexibility in the plans to permit such improvements in their implementation, as would benefit the enterprises as a whole.

19.3 Integrity, Objectivity and Independence of Internal Auditor

As per Standard on Internal Audit (SIA) 2, Basic Principles Governing Internal Audit, issued by the Council of the Institute of Chartered Accountants of India. The internal auditor should be straightforward, honest and sincere in his approach to his professional work. He must be fair and must not allow prejudice or bias to override his objectivity. He should maintain an impartial attitude. He should not only be independent in fact but also appear to be independent. The internal auditor should not, therefore, to the extent possible, undertake activities, which are or might appear to be incompatible with his independence and objectivity. For example, to avoid any conflict of interest, the internal auditor should not review an activity for which he was previously responsible. It is also expected from the management to take steps necessary for providing an environment conducive to enable the internal auditor to discharge his responsibilities independently and also report his findings without any management interference. For example, in case of a listed company, the internal auditor may be required to report directly to those charged with governance, such as the Audit Committee instead of the Chief Executive Officer or the Chief Financial Officer. The internal auditor should immediately bring any actual or apparent conflict of interest to the attention of the appropriate level of management so that necessary corrective action may be taken.

19.4 Qualifications of Internal Auditor

The internal auditor should have the special expertise necessary for evaluating management control systems, especially financial and accounting controls. Accounting and finance functions provide basic data for management control of an enterprise. Therefore the internal auditor must have accounting and financial expertise to be able to discharge his duties.

The internal auditor is also expected to evaluate operational performance and non-monetary, operational controls. This requires a basic knowledge of the technology and commercial practices of the enterprise. He should also have a basic knowledge of commerce, laws, taxation, cost accounting, economics, quantitative methods and EDP systems. An understanding of management principles and techniques is another essential qualification of an internal auditor as also the ability to deal with people. By his conduct the internal auditor should provide an assurance to the management that confidentiality of such information would be maintained.

19.5 Internal Audit Report

As per Standard on Internal Audit (SIA) 2, Basic Principles Governing Internal Audit, issued by the Council of the Institute of Chartered Accountants of India, the internal auditor should carefully review and assess the conclusions drawn from the audit evidence obtained, as the basis for his findings contained in his report and suggest remedial action. However, in case the internal auditor comes across any actual or suspected fraud or any other misappropriation of

assets, it would be more appropriate for him to bring the same immediately to the attention of the management.

Basic Elements of the Internal Audit Report: Basic elements of the internal audit report as per Standard on Internal Audit (SIA) 4, on Reporting issued by the Council of the Institute of Chartered Accountants of India. The internal auditor's report includes the following basic elements, ordinarily, in the following layout:

- (a) Title;
- (b) Addressee;
- (c) Report Distribution List;
- (d) Period of coverage of the Report;
- (e) Opening or introductory paragraph;
 - (i) identification of the processes/functions and items of financial statements audited; and
 - (ii) a statement of the responsibility of the entity's management and the responsibility of the internal auditor;
- (f) Objectives paragraph - statement of the objectives and scope of the internal audit engagement;
- (g) Scope paragraph (describing the nature of an internal audit):
 - (i) a reference to the generally accepted audit procedures in India, as applicable;
 - (ii) a description of the engagement background and the methodology of the internal audit together with procedures performed by the internal auditor; and
 - (iii) a description of the population and the sampling technique used.
- (h) Executive Summary, highlighting the key material issues, observations, control weaknesses and exceptions;
- (i) Observations, findings and recommendations made by the internal auditor;
- (j) Comments from the local management;
- (k) Action Taken Report – Action taken/ not taken pursuant to the observations made in the previous internal audit reports;
- (l) Date of the report;
- (m) Place of signature; and
- (n) Internal auditor's signature with Membership Number.

A measure of uniformity in the form and content of the internal auditor's report is desirable because it helps to promote the reader's understanding of the internal auditor's report and to identify unusual circumstances when they occur.

19.8 Advanced Auditing and Professional Ethics

(1) Title: The internal auditor's report should have an appropriate title expressing the nature of the Report.

(2) Addressee: The internal auditor's report should be appropriately addressed as required by the circumstances of the engagement. Ordinarily, the internal auditor's report is addressed to the appointing authority or such other person as directed.

(3) Report Distribution List, Coverage and Opening or Introductory Paragraph: There should be a mention of the recipients of the report in the section on Report Distribution List. The internal auditor's report should identify the systems, processes, functional lines or other items of the entity that have been audited, including the date of and period covered. The report should include a statement that the operation of systems, procedures and controls are the responsibility of the entity's management and a statement that the responsibility of the internal auditor is to express an opinion on the weaknesses in internal controls, risk management and governance (entity level controls) framework, highlighting any exceptions and cases of noncompliance and suggest or recommend improvements in the design and operations of controls based on the internal audit.

(4) Scope Paragraph: The internal auditor's report should describe the scope of the internal audit by stating that the internal audit was conducted in accordance with generally accepted audit procedures as applicable. The management needs this as an assurance that the audit has been carried out in accordance with established Standards. "Scope" refers to the internal auditor's ability to perform internal audit procedures deemed necessary in the circumstances. The report should include a statement that the internal audit was planned and performed to obtain reasonable assurance whether the systems, processes and controls operate efficiently and effectively and financial information is free of material misstatement. The internal auditor's report, in line with the terms of the engagement, should describe the internal audit as including:

- (i) examining, on a test basis, evidence to support the amounts and disclosures in financial statements;
- (ii) assessing the strength, design and operating effectiveness of internal controls at process level and identifying areas of control weakness, business risks and vulnerability in the system and procedures adopted by the entity;
- (iii) assessing the accounting principles and estimates used in the preparation of the financial statements; and
- (iv) evaluating the overall entity-wide risk management and governance framework.

The Report should include a description of the engagement background, internal audit methodology used and procedures performed by the internal auditor mentioning further that the internal audit provides a reasonable basis for his comments.

(5) Executive Summary Paragraph: The Executive Summary paragraph of the internal auditor's report should clearly indicate the highlights of the internal audit findings, key issues and observations of concern, significant controls lapses, failures or weaknesses in the systems or processes.

(6) Observations (Main Report) Paragraph: The Observations paragraph should clearly mention the process name, significant observations, findings, analysis and comments of the internal auditor.

(7) Comments from Local Management: The Comments from Local Management Paragraph should contain the observations and comments from the local management of the entity provided after giving due cognizance to the internal auditor's comments. This should also include local management's action plan for resolution of the issues and compliance to the internal auditor's recommendations and suggestions on the areas of process and control weakness/ deficiency. The management action plan should contain, inter alia:

- (i) the timeframe for taking appropriate corrective action;
- (ii) the person responsible; and
- (iii) resource requirements, if any, for ensuring such compliance. Further comments from the internal auditor, in response to the auditee feedback, are to be clearly mentioned. This paragraph should also contain the internal auditor's suggestions and recommendations to mitigate risks, strengthen controls and streamline processes with respect to each of the observations and comments made.

(8) Action Taken Report Paragraph: The Action Taken Report paragraph should be appended after the observations and findings and should include:

- (i) Status of compliance / corrective action already taken / being taken by the auditee with respect to previous internal audit observations;
- (ii) Status of compliance / corrective action not taken by the auditee with respect to previous internal audit observations and the reasons for non-compliance thereof; and
- (iii) Revised timelines for compliance of all open items in (b) above and fixation of the responsibility of the concerned process owner.

(9) Date: The date of an internal auditor's report is the date on which the internal auditor signs the report expressing his comments and observations.

(10) Place of Signature: The report should name the specific location, which is ordinarily the city where the internal audit report is signed.

(11) Internal Auditor's Signature: The report should be signed by the internal auditor in his personal name. The internal auditor should also mention the membership number assigned by the Institute of Chartered Accountants of India in the report so issued by him. Further, the internal auditor should exercise due professional care to ensure that the internal audit report, inter alia, is:

- (i) clear
- (ii) factual – presents all significant matters with disclosure of material facts
- (iii) specific
- (iv) concise

19.10 Advanced Auditing and Professional Ethics

- (v) unambiguous
- (vi) timely
- (vii) complies with generally accepted audit procedures in India, as applicable.

19.5.1 Essential features of a good internal audit report

The contents of an internal audit report are influenced by various factors such as the nature of internal auditing function in the organisation, level of reporting, degree of management support and capabilities of internal audit staff. However, for preparing a good internal audit report, the following general rules may be observed.

- (i) **Objectivity** - To maintain the credibility of internal audit function the comments and opinions expressed in the report should be as objective and unbiased as possible.
- (ii) **Clarity** - The language used should be simple and straight-forward. As far as practicable use of technical terms and jargon should be avoided. Each draft of the report should be reviewed by a senior who should attempt to read it from the point of view of the users of the report.
- (iii) **Accuracy** - The information contained in the report, whether quantified or otherwise, should be accurate. Where approximation or assumptions have been made the fact should be clearly stated along with reasons, if material.
- (iv) **Conciseness** - Brevity is vital subject, of course, to the condition that important information should not be omitted.
- (v) **Constructiveness** - Destructive criticism should carefully be avoided in the report. The report should clearly demonstrate that the internal auditor is trying to assist the auditor in an effective discharge of his responsibilities.
- (vi) **Readability** - The reader's interest should be captured and retained throughout. For this, appropriate paragraph heading may be used.
- (vii) **Timeliness** - The report should be submitted promptly because if the time lag between the occurrence of an event and its reporting is considerable, the opportunity for taking action may be lost or a wrong decision may be taken in the absence of the information.
- (viii) **Findings and conclusions** - These may be given either department-wise or in the order of importance. All the facts and data pertaining to the situation should be assembled, classified and analysed. Each conclusion and opinion should normally follow the findings. Tables or graphs may be used for the presentation of statistical data in appendices;
- (ix) **Recommendations** - An internal audit report usually includes recommendations for potential improvements. In order to enable the management to accept and implement the recommendations, the internal auditor should be able to convince the management that the conclusions are logical and valid and the recommendations represent effective and feasible ways of taking action.
- (x) **Auditee's views** - The auditee's views about audit conclusions or recommendations may also be included in the audit report in appropriate circumstances.

- (xi) **Summary** - A summary of conclusions and recommendations may be given at the end. This is particularly useful in long reports.
- (xii) **Supporting information** - The internal auditor should supplement his report by such documents and data which adequately and convincingly support the conclusions. Supporting information may include the relevant standards or regulations.
- (xiii) **Draft Report** - Before writing the final report, the internal auditor should prepare a draft report. This would help him in finding out the most effective manner of presenting his reports. It would also indicate whether there is any superfluous information or a gap in reasoning.
- (xiv) **Writing and issuing the Final Report** - The final report should be written only when the auditor is completely satisfied with the draft report. The head of the internal auditing department, may review and approve the final report. Before issuing the final report, the auditor should discuss conclusions and recommendations at appropriate levels of management. The report should be duly signed.

19.5.2 Follow-up

The internal auditor should review whether follow-up action is taken by the management on the basis of his report. If no action is taken within a reasonable time he should draw the management's attention to it.

Where the management has not acted upon his suggestions or not implemented his recommendations, the internal auditor should ascertain the reasons therefor. In cases where he finds that non-implementation is due to a gap in communication, he should initiate further discussion in the matter.

Where the management has accepted his recommendations and initiated the necessary action, the internal auditor should periodically review the manner and the extent of implementation of the recommendations and report to the management highlighting the recommendations which have not been implemented fully or partly.

19.6 Relationship between Internal and External Auditors

The scope and objective of internal audit are dependent upon the size and structure of the entity and the requirements of its management. As stated earlier the internal auditor operates in various areas such as review of accounting system and internal control; examination of financial and operating information for the benefit of management, examination of the economy, efficiency and effectiveness of operations including non-financial controls of various tangible assets of the entity. While operating in these areas, there is lot of overlapping between the work of internal auditor and external auditor. The work done by internal auditor has an important bearing on the work performed by the statutory auditor as evaluation done by the internal auditor in respect of internal controls, reliability of financial information, verification of assets etc. is also required to be done by the external auditor. The function of an internal auditor is an integral part of the system of internal control. It is statutory requirement too as per section 138 of the Companies Act, 2013 where the Audit Committee of the company or the Board shall, in

19.12 Advanced Auditing and Professional Ethics

consultation with the Internal Auditor, formulate the scope, functioning, periodicity and methodology for conducting the internal audit. However, it is obligatory for a statutory auditor to examine the scope and effectiveness of the work carried out by the internal auditor. For the purpose, he should examine the Internal Audit Department of the organisation, the strength of the internal audit staff, their qualification and their powers. Afterwards the procedures should be studied; also the scope of the audit examination carried out should be ascertained on referring to audit programmes, reports submitted, points raised in audit and how these had been dealt with subsequently. The extent of independence exhibited by the internal auditor in the discharge of his duties and his status in the organisation are important factors for determining the effectiveness of his audit. In a large business, it has been increasingly recognised that, if their functions and those of statutory auditors could be integrated, it might not be necessary for the statutory auditors to go over the same facts and figure as have been previously examined by a competent and trustworthy internal audit staff. But so far, the practice of audit being conducted jointly by the internal auditors is of great assistance to statutory auditors.

The role of the internal audit function within an entity is determined by management and its prime objective differs from that of the external auditor who is appointed to report independently on financial information. Nevertheless, some of the means of achieving their respective objectives are often similar and thus much of the work of the internal auditor may be useful to the external auditor in determining the nature, timing and extent of his procedures.

The external auditor should, as part of his audit, evaluate the internal audit function to the extent he considers that it will be relevant in determining the nature, timing and extent of his compliance and substantive procedures. Depending upon such evaluation, the external auditor may be able to adopt less extensive procedures than would otherwise be required.

By its very nature, the internal audit function cannot be expected to have the same degree of independence as is essential when the external auditor expresses his opinion of the financial information. The report of the external auditor is his sole responsibility, and that responsibility is not by any means reduced because of the reliance he places on the internal auditor's work.

SA 610 "Using the work of an Internal Auditor" deals with the relationship between internal and external auditors which is discussed in following paragraphs.

19.6.1 Determining Whether, in Which Areas, and to What Extent the Work of the Internal Audit Function Can Be Used

Evaluating the Internal Audit Function

The external auditor shall determine whether the work of the internal audit function can be used for purposes of the audit by evaluating the following:

- (a) The extent to which the internal audit function's organizational status and relevant policies and procedures support the objectivity of the internal auditors;***
- (b) The level of competence of the internal audit function; and***
- (c) Whether the internal audit function applies a systematic and disciplined approach, including quality control.***

The external auditor shall not use the work of the internal audit function if the external auditor determines that:

- (a) The function's organizational status and relevant policies and procedures do not adequately support the objectivity of internal auditors;*
- (b) The function lacks sufficient competence; or*
- (c) The function does not apply a systematic and disciplined approach, including quality control.*

19.6.2 Determining the Nature and Extent of Work of the Internal Audit Function that Can Be Used

As a basis for determining the areas and the extent to which the work of the internal audit function can be used, the external auditor shall consider the nature and scope of the work that has been performed, or is planned to be performed, by the internal audit function and its relevance to the external auditor's overall audit strategy and audit plan.

The external auditor shall make all significant judgments in the audit engagement and, to prevent undue use of the work of the internal audit function, shall plan to use less of the work of the function and perform more of the work directly:

- (a) The more judgment is involved in:
 - (i) Planning and performing relevant audit procedures; and*
 - (ii) Evaluating the audit evidence gathered;**
- (b) The higher the assessed risk of material misstatement at the assertion level, with special consideration given to risks identified as significant;*
- (c) The less the internal audit function's organizational status and relevant policies and procedures adequately support the objectivity of the internal auditors; and*
- (d) The lower the level of competence of the internal audit function.*

The external auditor shall also evaluate whether, in aggregate, using the work of the internal audit function to the extent planned would still result in the external auditor being sufficiently involved in the audit, given the external auditor's sole responsibility for the audit opinion expressed.

The external auditor shall, in communicating with those charged with governance an overview of the planned scope and timing of the audit in accordance with SA 260, communicate how the external auditor has planned to use the work of the internal audit function.

19.6.3 Using the Work of the Internal Audit Function

If the external auditor plans to use the work of the internal audit function, the external auditor shall discuss the planned use of its work with the function as a basis for coordinating their respective activities.

The external auditor shall read the reports of the internal audit function relating to the work of the function that the external auditor plans to use to obtain an understanding of the nature and extent of audit procedures it performed and the related findings.

The external auditor shall perform sufficient audit procedures on the body of work of the internal audit function as a whole that the external auditor plans to use to determine its adequacy for purposes of the audit, including evaluating whether:

- (a) The work of the function had been properly planned, performed, supervised, reviewed and documented;*
- (b) Sufficient appropriate evidence had been obtained to enable the function to draw reasonable conclusions; and*
- (c) Conclusions reached are appropriate in the circumstances and the reports prepared by the function are consistent with the results of the work performed.*

24. The nature and extent of the external auditor's audit procedures shall be responsive to the external auditor's evaluation of:

- (a) The amount of judgment involved;*
- (b) The assessed risk of material misstatement;*
- (c) The extent to which the internal audit function's organizational status and relevant policies and procedures support the objectivity of the internal auditors; and*
- (d) The level of competence of the function as discussed above;*

and shall include reperformance of some of the work.

The external auditor shall also evaluate whether the external auditor's conclusions regarding the internal audit function and the determination of the nature and extent of use of the work of the function for purposes of the audit remain appropriate.

19.6.4 Determining Whether, in Which Areas, and to What Extent Internal Auditors Can Be Used to Provide Direct Assistance

Determining Whether Internal Auditors Can Be Used to Provide Direct Assistance for Purposes of the Audit

The external auditor may be prohibited by law or regulation from obtaining direct assistance from internal auditors.

If using internal auditors to provide direct assistance is not prohibited by law or regulation, and the external auditor plans to use internal auditors to provide direct assistance on the audit, the external auditor shall evaluate the existence and significance of threats to objectivity and the level of competence of the internal auditors who will be providing such assistance. The external auditor's evaluation of the existence and significance of threats to the internal auditors' objectivity shall include inquiry of the internal auditors regarding interests and relationships that may create a threat to their objectivity.

The external auditor shall not use an internal auditor to provide direct assistance if:

- (a) There are significant threats to the objectivity of the internal auditor; or*
- (b) The internal auditor lacks sufficient competence to perform the proposed work.*

19.6.4.1 Determining the Nature and Extent of Work that Can Be Assigned to Internal Auditors Providing Direct Assistance

In determining the nature and extent of work that may be assigned to internal auditors and the nature, timing and extent of direction, supervision and review that is appropriate in the circumstances, the external auditor shall consider:

- (a) The amount of judgment involved in:
 - (i) Planning and performing relevant audit procedures; and*
 - (ii) Evaluating the audit evidence gathered;**
- (b) The assessed risk of material misstatement; and*
- (c) The external auditor's evaluation of the existence and significance of threats to the objectivity and level of competence of the internal auditors who will be providing such assistance.*

The external auditor shall not use internal auditors to provide direct assistance to perform procedures that:

- (a) Involve making significant judgments in the audit;*
- (b) Relate to higher assessed risks of material misstatement where the judgment required in performing the relevant audit procedures or evaluating the audit evidence gathered is more than limited;*
- (c) Relate to work with which the internal auditors have been involved and which has already been, or will be, reported to management or those charged with governance by the internal audit function; or*
- (d) Relate to decisions the external auditor makes in accordance with this SA regarding the internal audit function and the use of its work or direct assistance.*

Having appropriately evaluated whether and, if so, to what extent internal auditors can be used to provide direct assistance on the audit, the external auditor shall, in communicating with those charged with governance an overview of the planned scope and timing of the audit in accordance with SA 260, communicate the nature and extent of the planned use of internal auditors to provide direct assistance so as to reach a mutual understanding that such use is not excessive in the circumstances of the engagement.

The external auditor shall evaluate whether, in aggregate, using internal auditors to provide direct assistance to the extent planned, together with the planned use of the work of the internal audit function, would still result in the external auditor being sufficiently involved in the audit, given the external auditor's sole responsibility for the audit opinion expressed.

19.6.4.2 Using Internal Auditors to Provide Direct Assistance

Prior to using internal auditors to provide direct assistance for purposes of the audit, the external auditor shall:

- (a) Obtain written agreement from an authorized representative of the entity that the internal auditors will be allowed to follow the external auditor's instructions, and that the entity will not intervene in the work the internal auditor performs for the external auditor; and*
- (b) Obtain written agreement from the internal auditors that they will keep confidential specific matters as instructed by the external auditor and inform the external auditor of any threat to their objectivity.*

The external auditor shall direct, supervise and review the work performed by internal auditors on the engagement in accordance with SA 220.in so doing:

- (a) The nature, timing and extent of direction, supervision, and review shall recognize that the internal auditors are not independent of the entity and be responsive to the outcome of the evaluation of the factors of this SA; and*
- (b) The review procedures shall include the external auditor checking back to the underlying audit evidence for some of the work performed by the internal auditors.*

The direction, supervision and review by the external auditor of the work performed by the internal auditors shall be sufficient in order for the external auditor to be satisfied that the internal auditors have obtained sufficient appropriate audit evidence to support the conclusions based on that work.

In directing, supervising and reviewing the work performed by internal auditors, the external auditor shall remain alert for indications that the external auditor's evaluations no longer appropriate.

Finally, in India even the statute has now recognised that internal audit is necessary for efficient running of companies. Thus a review of the internal audit function in specified companies has become a statutory responsibility for the statutory auditor.

19.7 Management Audit

In recent years, the world has witnessed a rather new type of revolution viz. managerial revolution. Management of enterprises is itself a science and techniques and principles have been formulated for practising this science; a proper practice of this science will ensure an objective and efficient management of the affairs of any economic activity. This revolution has considerably changed the composition and outlook of management. Auditing has come to be viewed as an essential management tool, among others, for the efficient running of business and other economic activities. When we speak of auditing as a management tool, we give an extended coverage to the term auditing without, however, altering its basic concept. This extended concept of auditing includes operational auditing.

Auditing is generally associated with accounting activities or events. These activities or events are expressed in monetary terms. For this reason, we sometime try to take a narrow view of matters, that auditing is concerned with only the monetary accounting data. When we take this narrow view we lose sight of the fact that auditing basically and conceptually concerns itself with collection and appraisal of evidence underlying transactions that are quantifiable and not necessarily expressed in monetary figures. Auditing naturally looks to fields far more extensive than merely monetary accounts.

The emphasis of auditing has been changing over the years. It is now responding to a demand for more useful information that cannot be found solely in financial statements. In the late 1940's, for example, financial analysts and bankers showed a desire for information suitable for managerial appraisal. Today, stock holders, investors, government bodies, and the general public are seeking information by which the "quality of management" can be judged. As a result of this awakened interest of outsiders in judging the merits of organisations, there has arisen a similar movement from within organisations to judge the results of operations and their managers.

Fig.: Auditors discussing Management Audit*

19.7.1 Management and Operational Audit

The concept of operational audit is discussed in detail later in the chapter. Operational audit is an audit for the management; it is undertaken at the instance of the management for providing it with information and appraisal of operations and activities. A parallel development in auditing is getting shaped as management audit. In fact some of the authors do not see any difference between operational auditing and management auditing. They probably see that both these audits are for the management and cover operational areas that do not come under the review of the traditional audit. They are correct also to this extent. But they miss one important aspect of management audit, which has made it distinct from operational audit, i.e., management audit is an "audit of the management" also. According to T.G. Rose, "The management audit would therefore concern itself with the whole field of activities of the concern, from top to bottom, starting, as always where management control is concerned, from the top, because we are primarily concerned with whether the general management is functioning smoothly and satisfactorily. If it is not, it may be due to the functional management being faulty and, therefore, we pass on to examine that in its turn, in order to find the missing or faulty link which is causing the trouble".

From the very able conceptualisation contained in the above quoted passage, it is somewhat

* Source: Money Matters

19.18 Advanced Auditing and Professional Ethics

clear what should be the scope and content of management audit. It should definitely cover everything that we know as operational audit and, in addition it should also include review of the adequacy and competence of the objectives, plans, policies and decisions of the top management. However, as has been indicated above, unanimity is lacking on this aspect and management audit has become a subject of debate. John C. Burton, in the article "Management Auditing" (The Journal of Accountancy, May 1968) commented as follows:

"In a management audit, the auditor will look to see whether management is getting information relevant to the decisions and actions which it must take. This will require a much more intensive analysis of information needs and the efficiency of the existing system in meeting them. The auditor will not have to decide whether management is making the right strategic and operative decisions but rather whether management has available to it and is using the relevant information and techniques necessary to evaluate rationally the various alternatives that exist". Management audits are concerned with appraising management's accomplishment of organisational objectives; the management functions of planning, organising, directing, and controlling; and the adequacy of management's decisions and actions in moving towards its stated objectives. Hence, the accent is on evaluating managers' ability to manage.

19.7.2 Scope

From the authorities quoted above, it seems that the preponderant view about management audit is that it is wider in scope compared to operational audit. However, a distinction should be made between management audit and operational audit. Management audit is concerned with the quality of managing, whereas operational audit centres on the quality of operations. The basic difference between the two audits, then, is not in method, but in the level of appraisal. The two audits are complementary and supplementary to one another. In management audit, the auditor is to make his tests to the level of top management, its formulation of objectives, plans and policies and its decision making. It is not that he just verifies the operations of control and procedures and fulfilment of plans in conformity with the prescribed policies. He is to reach the root i.e., the functions of top management which lay down objectives and policies, provide means and procedures of implementation and control and which actually engage in direction and control on a continuous basis. In addition to what would normally be covered in an operational audit, management audit would also encompass the relevance and effectiveness of the aims, duties and decisions of management at various levels. Every aspect of the functions of Board of Directors should be in conformity with the objects set out in the constituting document. Similarly the managing director, if any, should act not only in accordance with the mandate he has received but he should ensure that the decisions he takes are in conformity with the objects of the company and the policies formulated by the Board. The effectiveness of management under the control of managing director and the various members of the Board including those incharge of finance, production, sales etc., should be subject to review of the management auditor. From the point of view of the management auditor, knowledge about the following is essential:

- (i) Purpose for which the organisation has been created. For example, purpose of a steel mill in the state sector may include:

- (a) production of steel to reduce imports of steel.
- (b) creation of reasonable employment opportunities.
- (c) development of backward areas.
- (d) providing staff welfare consistent with the needs for a proper living.

It should not be understood that such steel mill will not work for profit. Profit being one of the objects, should be properly balanced with other objects so that the purposes for which the organisation was created can be achieved.

- (ii) Management structure including delegation of authority, planning and budgeting.
- (iii) Reports required for a proper management and the reports actually received.
- (iv) Internal controls.
- (v) Nature of production of the business concerned in the broad way so that he can understand the flow and content of work leading to production and their mutual relationships. Some ideas about the techniques, formulas, raw materials and personnel requirement would be of direct assistance to the management auditor.
- (vi) Production planning.
- (vii) Factory layout, design and installed capacity.
- (viii) Personnel policy and personnel management including requirements, training, welfare, incentives and disincentives.
- (ix) Materials management including sources of important raw materials, receipt of materials of the quality and quantity needed, storage, supervision and safe custody, insurance and the procedure for issue of materials.
- (x) Sales management and sales planning including advertisement policy.
- (xi) Decision making process.
- (xii) Books and records including cost accounting records, cost accounting system and financial accounting policies.
- (xiii) Financial management of the organisation.

In view of the analysis made above which recognises management audit and operational audit as two identifiable exercises having a large area of overlapping jurisdiction, it may be convenient to consider them together to avoid duplication; and for this purpose the expression “management and operational audit” may be acceptable as a management audit which includes within its scope all the elements of operational auditing.

19.7.3 Desirability of Management Audit

Management Audit is a tool to improve management performance by recognising facts and information about management presented after appropriate examination, verification and evaluation, by professionally qualified and competent people. Management audit focuses attention on a comprehensive and constructive examination of the organisational structure, its

19.20 Advanced Auditing and Professional Ethics

components such as, divisions, departments, ventures, plans, policies, its financial control system, its method of operation, its appropriate use of human, physical and financial resources.

The principal reason for undertaking a management audit is the need for detecting and overcoming current managerial deficiencies (and resulting operational problems) in ongoing operations. A management audit represents a more positive, forward-looking approach that evaluates how well management accomplishes its stated organisational objectives; how effective management is in planning, organising, directing, and controlling the organisation's activities; and how appropriate management's decisions are for reaching stated organisation objectives. This evaluation of managerial performance is achieved with the aid of a management audit questionnaire.

One benefit of the management audit is that managerial problems and related operational difficulties can be spotted before the fact rather than after the fact as with a financial audit. This forward-looking approach is analogous to the preventive maintenance concept found in production; that is, periodic management audits can pinpoint problems as they are developing from a small scale. In comparison, detecting the same problem at a later time, when they have generally increased in scope, results in higher costs to the organisation.

A second important benefit of management auditing is that it represents another management tool to assist the organisation in accomplishing desired objectives. The capability of the management audit questionnaire to pinpoint important problem areas that are related to managing an organisation is a real plus factor for its use.

Obviously, management auditing would be clearly helpful in the case of ailing industries, to isolate the problems and account for their ailments. It is especially important if such industries are either to be taken over by the government or to be heavily financed by financial institutions with a view to bring back vigor in them. Before committing public funds, like government funds or the institutional funds, it is important to properly diagnose the financial health and possibilities of a business undertaking and know the specific reasons that have caused or contributed to the decline of the business.

19.7.4 Organising the Management Audit

The establishment of a general programme for management audit requires management's approval to the plan. Unless the management's full support is available for the proposal, there may be lot of difficulties at later stages. Therefore, it is imperative to give consideration to a statement of policy which indicates therein the objectives and which reflects a definite plan to achieve the objectives while organising for management audit. The plan should also include the statement on personnel requirements, establishment of staff training programmes to improve the effectiveness of work and the basis of control over time and cost. These, being the basic features are discussed below at length with related matters.

Devising the statement of policy - The management's support must be reflected clearly and categorically in the company's highest policy statement. The policy statement should be quite specific. It should spell out clearly the scope and status of the management/operational auditing within the enterprise, its authority to carry out audits, issue reports, make recommendations, and evaluate corrective action. The statement of policy should lay down in clear terms the scope

of activities to be performed by the management auditor. The scope of activities is the most basic requirement for building up a successful management audit programme both for small as well as a large organisation. The statement must categorically say that the management auditor is capable of reviewing administrative and management controls over any activity within the company. However, he should not be expected to extend his activities to the evaluation of performance of professional and technical activities calling for specialised knowledge and skills and suggest remedies unaided by people competent to undertake such evaluation.

Location of audit function within the organisation - Some organisations depending upon their size and nature have established a separate department of audit specialists where the head of the department reports directly to the top executive. In certain cases, the audit group may be a part of the activities of management services department, administrative control department or some other unit of organisation. The more important question, however, is that the function should be as entirely independent as possible of pressure from various groups in the enterprise. The greater the independence, greater is the freedom to work effectively. Therefore, it is better to place the auditing function quite high in the organisation.

One of the controversies that is usually raised is whether the management auditor should report to the finance director, to whom he may be administratively responsible or to the managing director where he has no administrative responsibility. A third opinion would like the auditor to report to an audit committee, comprising of senior executives of the company who are preferably Board members. A different school of thought would like auditors to report to both the finance director and the audit committee. Though the controversy rages and no definite solution can be arrived at, it is felt that the controversy regarding which of these persons the management auditor should report to is not much substance where independence exists. His independence is entirely dependent on the management's attitude towards audit, the credibility the management auditor has with the management and the management's positive will to listen to criticism for self betterment.

Allocation of personnel - Whatever be the size of the enterprise, it is important that all persons selected and assigned to audit possess a good understanding of auditing theory, a thorough knowledge of the fundamentals of both organisation and management, the principles and effective methods of control, and the requirements for conducting scientific appraisal. "General Guidelines on Internal Auditing" issued by the Institute also emphasizes these qualifications for an auditor whose area extends beyond the review of financial controls. As the management auditor is expected to evaluate operational performance and non-monetary operational controls, he should possess basic knowledge of the technology and commercial practices of the enterprise, an enquiring, analytical, pragmatic and imaginative approach and a thorough understanding of the control system. The management auditor should also have a basic knowledge of commerce, law, taxation, cost accounting, economics, quantitative methods and EDP systems. Knowledge in these areas would be adequate for him to identify problems and to determine steps to be taken when a problem is identified. In personal characteristics individuals assigned to the job should have an inclination towards analysis, a high degree of imagination and an ability to write and express themselves clearly and logically.

19.22 Advanced Auditing and Professional Ethics

Staff training programme - A continuous training programme is necessary to achieve quality in performing audit assignments because the management auditor must keep of new ways to improve auditing standards. An effective training programme enables staff to assume additional responsibilities and advancements in the organisation. Thus the programme acts as an incentive for drawing capable people into the department and keeping them.

Time and other aspects - The time and cost will vary for each assignment, depending upon the nature of the assignment, the number of auditors assigned to perform the work, and whether or not more specialists in a particular field are required. An audit of a production planning and control department, for example because of its size and other factors, could require an audit staff of several persons and, in addition, a specialist in production planning and one in production control. If an assignment is one which requires technical assistance of a nature unavailable within the audit group, it might be advisable to seek a qualified outside consultant to perform the work.

Frequency - Having specified various approaches to management audit, including its scope and its staffing requirements the last item that should be considered before undertaking such an audit is its frequency. Prime consideration should be given to the nature of the organisation. Is the company in a fast-changing industry where there is great accent on the latest technology in the company's products and/or services? When the organisation is subject to rapid change or the total resources utilised are expensive, the frequency of management auditing should be greater than when it does not undergo rapid changes or the resources employed are not high in value.

To get an idea of the optimum frequency of such an audit, it might be worthwhile to look at financial audits. Customarily, financial audits are conducted annually. They are highly programmed, since an internal control questionnaire is utilised to attest to accounting methods and procedures. By contrast, a management audit should be considered from a longer time frame. For an organisation, that is subject to rapid changes or consumes a great amount of high-cost resources, a two-years basis might be adequate to protect it from managerial and operational problems becoming entrenched or too large. For those organisations in a relatively stable industry, the frequency of audit can be every three years. In no case should the interval be allowed to exceed three years.

19.7.5 Conducting a Management Audit

Once top management has decided on the scope, the staffing, and the frequency of the management audit, the next phase is the undertaking of actual audit. This involves investigating and analysing the present facts through interviews as well as completing a management questionnaire so as to determine the problems confronting the organisation.

Getting the facts through interviews - To avoid waste of time and effort, adequate preparation is necessary in management auditing just as in financial auditing. The management auditors should know what information is desired, and they should be prepared to ask a number of direct questions to get the desired information. Reference can be made to the management audit questionnaire for specific questions. Care must be taken in selecting the proper managers to interview so as to obtain pertinent information.

In the interview itself, the auditors should begin by stating the purpose of the audit. Emphasis should be placed on getting the facts that are essential to review and appraise the functional area(s) under study. The exchange between auditor and manager should be friendly and conducted in an open atmosphere so as to encourage a free exchange of ideas. During the interview, management auditors should not commit themselves, nor should any recommendations be set forth at this time. Once all pertinent information has been extracted from the interview, it is advisable to verify the accuracy of information by requesting the person interviewed to read the notes taken and place his or her initials thereon. This extra step makes the individual feel an important part of management audit.

Measuring performance through the Management Audit Questionnaire - During the interview, the management auditors make a careful inquiry into important facts. The next step is to analyse this information, with the aim of measuring current performance. The best way to perform such an analysis is to utilise the sections of the management audit questionnaire that apply to the areas under study. By way of review, a management audit questionnaire aims at a comprehensive and constructive examination of an organisation's management and its assigned tasks. Overall, the questionnaire is concerned with the appraisal of management actions in accomplishing organisation objectives. Its primary objective is to highlight weaknesses and deficiencies of the organisation for possible improvements.

Management audit questionnaire for this part of the audit not only serves as a management tool to analyse the current situation; more importantly, it enables the management auditors to synthesise those elements that are causing organisational difficulties and deficiencies. To state it another way, a synthesis (a process of combining separate elements) can be used for determining the problem. The capability to assess all negative answers goes a long way towards defining the real problem-not just stating its symptoms.

19.7.6 Concluding a Management Audit

The preparation of the management audit report that covers the details of the management auditor's findings and recommendations represents an important part of concluding an audit assignment. To assist in the preparation of the final report, the management auditors normally meet with management and other concerned personnel for the purpose of discussing freely any aspect or finding of the audit. This approach assists the independent third party in bringing together the important elements of audit as well as determining appropriate recommendations. Also, it will disclose any "hang-ups" that organisation personnel may have towards a particular solution. It is far better to discuss alternative recommendations and feel out the possible consequences of recommended action. However, it should be noted that the type of report required varies with the level of investigation. Thus, a comprehensive investigation involves a report that is very broad in scope, while a smaller-scale investigation of one or two functional areas will result in a less comprehensive report.

Oral recommendations for improvement - From the management viewpoint, the main focus of audit is recommendations. Generally, there is an oral presentation of specific recommendations to members of the top management team who approved the audit. In some cases, the approval may have come from the board of directors, which then becomes the

19.24 Advanced Auditing and Professional Ethics

recipient of the auditors' oral recommendations. Upon completion of the presentation, oral recommendations become an integral part of the final report- the subject matter for the next section.

In the oral presentation, recommendations representing feasible solutions that will be accepted without too much difficulty are discussed initially. The auditors should back these recommendations with a cost/benefit analysis that indicates the expected return to the organisation from implementing them. The interchange of ideas among management and the auditors allows for a logical development of appropriate dates for implementation. Additionally, it assists management auditors in drawing up an implementation time-table for inclusion in their final report.

19.7.7 Management Audit Reports

The written report is the medium by which the comments, criticisms and recommendations of a management audit department are conveyed to the Board, to functional directors and to management in general. It follows, therefore, that audit reports crystallise the work of the management auditor and merit the closest consideration of all audit staff engaged in their preparation. Reports must be written with very great care after full consideration of the subject matter and with full regard to the fact that it is imperative that the report conveys exactly the right impressions on the reader. Management audit reports will inevitably cover a wide variety of subjects, reflecting the many and ever increasing ramifications of management audit departments. Broadly, however, reports may be divided into four main categories:

1. Reports prepared by the management audit staff after their visits to a unit.
2. Periodical reports prepared by senior members of management audit department which summarise the main audit findings and recommendations for the period under consideration and which afford a concise review of the department's activities for that period.
3. Reports on the results of special investigations and inquiries.
4. An annual audit report.

The right of the management auditor to report to the highest level is now well established in many organisations but in all cases responsible officials of the different units which have been subjected to audit should be afforded the opportunity of discussing matters in the report concerning their departments before this is passed in final form to a higher level.

Types of Reports - The reporting of results covers a wide spectrum of types. We can describe the more important ones as follows:

Oral reports - In many situations, the reporting of results will be on an oral basis. To some extent, this is inevitable since a part of the actual audit effort is carried on in conjunction with company personnel. In other cases, it is a result of emergency action needs. It may also be a prelude to more formal written reports. To some extent, there will always be oral reporting as a means of later supplementing written reports, especially when individuals being served have special needs.

Oral reporting therefore, serves a useful and legitimate purpose. It is recognised that it has a major limitation that there is no permanent record. As a result there are more likely to be later misunderstandings. What is important, therefore, is that this type of reporting be used carefully and for all significant matters, specially the matters covered by emergency oral reporting, should be followed up immediately by a written report giving reference to oral reporting. For example, a management auditor, if he has come across any embezzlement, should immediately inform the concerned management orally, so that steps may be immediately taken to prevent further embezzlement.

Interim written reports - In situations where it is deemed advisable to inform management of significant developments during the course of the audit, or at least preceding the release of the regular report, there may be some kind of interim written report. This report may pertain to especially significant problems where there is a need for early consideration or the report may be of a progress nature. In either case, they may be quite formal in nature or of the more informal type of current memoranda. They can be reserved for very exceptional developments, or issued on a more extensive basis. Often, their distribution is limited to this auditee management, but this is not necessarily the case. All in all, interim reports represent a type of reporting which, when used with judgement, can be a good device to improve the total reporting process.

Regular written reports - In the typical situation, the particular audit assignment will include the preparation of a formal written report. The form and content of such written reports will vary widely, both as between individual audit assignments and individual companies. They may be short or long. They may be presented in many different ways, including the extent to which quantitative or financial data are re-included. We will in the later pages discuss in more detail the organisation and planning of this type of report.

Summary written reports - These summary reports are also referred to as 'flash' reports. In a number of companies the practice has developed of issuing an annual (or sometimes more frequent) report summarising the various individual reports issued, and describing the range of their content. These summary reports in some cases are primarily for audit committees of Boards of Directors, but in other cases for higher level management. They are especially useful to top level managers who do not actively review the individual reports. They are also useful to the general auditor in seeing his total reporting effort with more perspective and on an integrated basis.

Organisation of the written report -

Format - Though it is difficult to lay down a format applicable to all situations, yet the following general guidelines may be observed:

- (i) **Title** - The management audit report should have a short but descriptive title so that its subject matter can be easily identified.
- (ii) **Objectives** - The management auditor may describe the objectives of the audit assignment.
- (iii) **Scope** - The management auditor may give a brief description of the activities audited by him.

- (iv) **Findings, conclusions and opinions** - These may be given either department wise or in the order of importance. All the facts and data pertaining to the, situation should be assembled, classified and analysed. Each finding should be discussed comprehensively and correlated with other findings. Conclusions and opinions should normally follow the findings. Tables or graphs may be used for the presentation of statistical data in appendices.
- (v) **Recommendations** - A management audit report may include recommendations for potential improvements. However, care should be taken in making recommendations in order that the auditor's own objectivity may not become subject matter of question. He may point out defects and make recommendations in a broad manner on how to overcome them. He should avoid providing detailed procedures in the capacity of an auditor. Normally specifying procedures etc. should rest with consultants.
- (vi) **Auditee's views** - The auditee's views about audit conclusions or recommendations may also be included in the audit report in appropriate circumstances.
- (vii) **Summary** - A summary of conclusions and recommendations may be given at the end. This is particularly useful in long reports.

Planning the Audit Report - Before starting the report, the auditor should ask himself, "What do I want to tell the reader about this audit? The answer will enable him to communicate effectively.

Supporting information - The management auditor should supplement his report by such documents and data which adequately and convincingly support the conclusions. Supporting information may include the relevant standards or regulations.

Preparing draft report - Before writing the final report, the auditor should prepare a draft report. This would help him in finding out the most effective manner of presenting his report. It would also indicate whether there is any superfluous information or a gap in reasoning.

Writing and issuing the final report - The final report should be written only when the auditor is completely satisfied with the draft report. The head of the management auditing department may review and approve the final report. Before issuing the final report, the auditor should discuss conclusions and recommendations at appropriate levels of management. The report should be duly signed and dated.

Follow-up of the audit report - The management auditor should review whether follow-up action is taken by management on the basis of his report. If no action is taken within a reasonable time, he should draw management's attention to it.

Where management has not acted upon his suggestions or not implemented his recommendations, the auditor should ascertain the reasons therefor. In cases where he finds that non-implementation is due to a gap in communication, he should initiate further discussions in that matter. Where management has accepted his recommendations and initiated the necessary action, the management auditor should periodically review the manner and the extent of implementation of the recommendations and report to the management highlighting the recommendations which have not been implemented fully or partly. Any non-implementation of

the management auditor's report in continuing assignments, after having convinced that the communication of the report was complete should be earnestly taken up because on this the credibility and usefulness of the audit function largely depends. It also reflects management's attitude to audit. In any case, the auditor to retain the usefulness of audit function should ascertain from the management, preferably in writing, the reasons for non-implementation. It is possible that because of change in circumstances, the audit observation did not require any action on the part of the management.

19.7.8 Behavioural aspects encountered in a Management Audit

It has been experienced that one of the biggest difficulties involved during the course of management audit is that people working in the organisation do not wish to accept any change. While at the time of conducting interviews, it seems that people working in the organisation are amenable to change but at the time of actual implementation they come up with stiff resistance to proposals on account of various behavioural problems arising on this account. Such an unfortunate situation can be avoided by building up a positive approach to management audit and involving the various organisation personnel right from the initiation of the management audit. Another fear which haunts executives working in the organisation is that the management auditors' recommendations may lead to their removal or reshuffling in the process. This problem may also be overcome by explaining to these executives that the management auditor is there to help them in achieving the results rather acting against their interests. Various problems arising on account of behavioural attitudes and solutions to overcome them during the process of management audit are discussed in the following paragraphs.

Financial auditors deal mainly with figures. Management auditors deal mainly with people. Management auditors in the normal discharge of their duty will come into contact with the following:

- (a) Colleagues in their own department.
- (b) Staff of the department whose functioning they audit.
- (c) "Top management" who authorise them to perform audits.

Therefore, management auditors must develop and maintain good relations with auditees to gain information and to ensure corrective action on audit findings. Yet, the general image that the auditor seemed to create is that he is a critic, fault finder or private spying authority of the top management. There are many causes for behavioural problems arising in the review function of management/operational audit. Particularly, when management/operational auditors performs comprehensive audit of operations, they cannot be as well informed about such operations as a financial auditor in a financial department. Operating processes may be unfamiliar and complex. The operating people may be speaking a language and using terms that are foreign to the auditor's experience. However, it must be emphasised that other departments which have only staff function to perform do have similar behavioural problems. Any suggestions made by them either may not be accepted or if forcibly implemented attempts are like to be made to make them a failure. In the following paragraphs, the nature and causes of behavioural problems that the management auditor is likely to face in the discharge of the review function that is expected of him and possible solutions to overcome these problems are discussed.

19.28 Advanced Auditing and Professional Ethics

(1) **Staff/line conflict** - The staff/line relationship is inherently prone to conflict. Management auditors are staff. And line people in the sense all members of other departments of the organisation are likely to regard the management auditor the same way as they regard other staff people. Management auditors being specialists in their field may think that their approach and solutions are the only answers.

(2) **Control** - As the management auditor is expected to evaluate the effectiveness of controls, there is an instinctive reaction from the auditee to have certain amount of fear that his actions when reported are likely to cause adverse effect on those who receive the auditor's report, viz., top management. There is a certain amount of justified fear that top management's opinion of their performance or implementation of control procedures is likely to be affected by the auditor's report. Therefore, the management auditor, being the part of control system and thorough evaluation of controls, leads to breeding of antagonism on the part of the auditees. According to a research study, the causes of antagonism are as follows:

- ◆ Fear of criticism stemming from adverse audit findings.
- ◆ Fear of changes in day-to-day working habits because of changes resulting from audit recommendations.
- ◆ Punitive action by superiors prompted by reported deficiencies.
- ◆ Insensitive audit practices - reports which are overly critical, reports which focus on deficiencies only, the air of mystery cloaking some audits, and the perception that auditors gain personally from reporting deficiencies.
- ◆ Hostile audit style - a cold and distant aspect is a lack of understanding of the auditee's problems, an absence of empathy, an air of smugness or superiority, an excessive concentration on insignificant errors, a prosecutorial tone when asking questions, and a greater concern with parading defects than helping constructively to improve conditions.

The other significant cause is that auditor's study of existing systems and procedures may give room for recommendations for changes of such systems. There is a certain built-in resistance to change. When a change is recommended by the auditor the resistance to change is transferred to the auditor's recommendations and the auditor. The auditor is looked upon as a likely instrument for recommending changes and auditees do not welcome the visits of auditors and much less their studies and their reports thereafter.

Solution to behavioural problems - The auditors, if they were to adopt the role of accuser or secret agency of the management to try upon the happenings of the auditee division, they would be unwelcome. Their presence will give rise to problems of personal relationship. Relations between the auditor and the auditee may improve if the auditor acts and is perceived as a professional advisor and consultant. In any event, there is a need to demonstrate to the extent possible that:

1. the audit is part of an overall programme mandated by higher-level authority to meet higher-level organisational needs for both protection and maximum constructive benefit.

2. the objective of the review is to provide maximum service in all feasible managerial dimensions.
3. the review will be conducted with minimum interference with regular operations of the operating personnel.
4. the responsible officers will be kept fully informed and have an opportunity to review findings and recommendations before any audit report is formally released.

It is essential to create an atmosphere of trust and friendliness so that audit reports will be understood in their proper perspective.

Davis and Scott in their book on "Human Relations and Organisational Behaviour" had suggested that being effective does not merely consist of being extremely polite. "Effectiveness is a difficult task requiring the highest mental ability and sound framework for analysing human situations". In view of the delicate role of the auditor, it is inevitable that he has to face complex situations. The skill that is needed is of a high order warranting "sophisticated understanding based on sound philosophy".

Constructive criticism - It is essential that the auditor should concentrate only on constructive criticism. He should also make obvious in his report the value of his comments in tangible terms. Only then would suggestions carry weight with the auditees and they will feel convinced that the auditor has been objective in his remarks in the report. T.J. Krien in his article on "People assets that talk back" has strongly advocated the view that once the auditor is able to convince the auditees that his approach is one of mutual problem solving rather than one of fault finding, then it would produce positive results and the chances of auditors' recommendations being considered in an objective fashion would be better. If the auditors were to adopt a "fault finding role", the auditees would be constrained to become defensive and would bend backwards to justify their position.

Reporting methods - To achieve this objective, the auditor has to make a concerted effort to convey effectively his role by adopting a friendly but firm tone in his report. It is always possible to disagree without being disagreeable, to criticise without being critical. The reports should concentrate on areas which need improvement rather than listing inefficiencies and deficiencies in performance of the auditee. The mistaken notion that the greater the number of deficiencies reported the higher would be the rating of his performance should be erased or given up. This is an outdated notion and does not in any way contribute to the effectiveness of the auditor.

Participative approach - It is well established that auditor's reports have better acceptability if the improvements suggested are discussed with those who have to implement them and made to feel that they have participated in the recommendations made for improvements. Harmeyer W.J. in his article on "Operational audit: You too can be a Consultant" has reasoned that by adopting a participative approach the chances of improvements being accepted and implemented successfully with conviction are very good. In his work, he has effectively described the concept as follows. "By utilising this participation you end up with coordinated suggestions for improvement not with the auditor's recommendations". W.T. Jerome also voiced the same view in his article in Harvard Business Review long back. He very correctly pointed

19.30 Advanced Auditing and Professional Ethics

out that “auditors must candidly recognise that they are appraising many deficiencies from the distorting vantage point of hindsight. If they recognise this limitation by soliciting the views of operating personnel, internal auditing becomes a co-operative enterprise, it will not then be regarded as the “secret police” of the home office.” On the other hand, it has been observed that either oral or written appreciation of the auditee’s achievements not only encourages the auditees to develop a friendly attitude towards the auditors but look forward to their guidance in a more receptive fashion.

The participative approach to the internal audit process has proved to be success. Well-known authorities in the field have proved by means of research they have conducted that resistance to change is absent if not minimal when participative method is adopted. Feelings of hostility disappear giving room to feelings of mutual trust. Team spirit is developed and the auditors and the auditee endeavour to achieve the common goal. Proposed recommendations are discussed with the auditee and such modifications as may be mutually agreed upon are incorporated.

Three cases are given hereunder to illustrate the practical aspects of behavioural problems.

Case-1: Auditor objective: Auditee offensive: Management’s apathy - In Professional Organisation Ltd., the Management Auditor as part of his duty was expected to perform the audit function of the Consultancy Division of the organisation. The auditor in the normal functioning discovered lack of control and a further study revealed suppression of information regarding illegal procedures being followed by the department. His further in-depth examination of the books revealed that the division has been overstating profits, to justify its existence. These facts which had been in existence with the knowledge of manager of the Division had been left undetected. The auditor was totally professional. His attitude was not one of “policing”. He had discussed the contents of his proposed report with the auditee. The auditee had to be defensive and hence decided to be offensive. Management had to face the predicament of appreciating the good job done by the management audit department without openly decrying the Divisional Manager. There was open “cold war” of hatred and hostility declared by the divisional Manager. The behavioural problems arose in spite of auditor’s professional role. The auditee’s reaction was instinctive as a corollary to being self-defensive. The management had a tough time. The problem was sorted out and the atmosphere of ill-feeling and hatred generated by the auditee could be smoothened.

Case-2 Auditee progressive: Auditor cantankerous: Management indifferent - In a large organisation, there was a long-standing problem of lack of coordination between marketing and production. The pressures of day-to-day problem, made the situation worse. Production and Marketing Managers were happy to have the services of the management, auditor to streamline procedures and monitor the implementation. It would have been ideal for the auditor to evolve a good system after a detailed study of the problems, have the key personnel of production and marketing departments participate in the discussion and to have introduced the proposed system with their co-operation. Instead the auditor took on his duty as a mission for fault finding and started submitting secret reports on the malfunctioning of the Production and Marketing departments. Management, having already the heavy load of coordination would seek explanations from Production and Marketing departments. The auditor’s cantankerous

behaviour and management's indifferent attitude inspite of auditee's very co-operative approach gave room for a series of behavioural problems. A participative approach, with the total curtailment of "policing" reports, with the correct guidance from the management would have avoided all behavioural problems.

Case-3 Auditor progressive- Auditee appreciative: Management objective - In a large organisation with operations spread all over the country the management faced sudden problems of lack of financial control, inspite of high levels of production and remarkable market demand. The organisation had an efficient and progressive management auditor with a good team. The auditees were individuals with professional attitude. Management was progressive and dynamic. Management called for meetings, explained the special assignment being given to management auditor of aiding management to get a grip over the situation. The auditee welcomed the auditor as an expert consultant. The auditor adopted an attitude of friendliness without descending to levels of too much familiarity. There was coordinated effort between the auditor and auditee. Management was kept informed of the problems and solutions being jointly worked out by the auditors and the auditees. Within a very reasonable time, what seemed an "out of control" situation was streamlined and the management got back the grip over the entire organisation.

19.8 Operational Audit

Operational auditing is a systematic process involving logical, structured and organized series of procedures.

19.8.1 Internal Auditing and Operational Auditing

To understand what operational auditing is, it would be better if we first understand internal auditing. It may be recalled that internal auditing is an activity carried on by the internal staff of an organisation to meet the management requirements of information. The definition of internal auditing given by the Institute of Internal Auditors (IIA), New York, in fact equals internal auditing with operational auditing. According to this definition, internal auditing is an independent appraisal activity within an organisation for the review of operations as a service to organisation. Naturally, when an auditor is concerned with the appraisal of operations, he becomes an operational auditor. Another important point that this definition throws up is that operational auditing is essentially a function of internal auditing staff. According to the Institute of Internal Auditors, "the overall objective of internal auditing is to assist all members of management in the objective discharge of their responsibilities, by furnishing them with objective analysis, appraisals, recommendations and pertinent comments, concerning the activities reviewed. The internal auditor, therefore, should be concerned with any phase of business activity wherein he can be of service to managements".

IIA publication defines operational auditing as - Operational auditing is a systematic process of evaluating an organisation's effectiveness, efficiency and economy of operations under management's control and reporting to appropriate persons the results of the evaluation along

19.32 Advanced Auditing and Professional Ethics

with recommendations for improvement¹.

On the basis of above definition operational auditing is a systematic process involving logical, structured and organized series of procedures. Operational auditing concentrates on effectiveness, efficiency and economy of operations and therefore it is future oriented. It does not end with the reporting of the findings but also recommends the steps for improvement in future.

At this stage it must be conceded that operational auditing is a newly emerged term and therefore liable to be understood according to individual perceptions about what it is or should be. It may, therefore, take some time to have a generally accepted conceptualisation on this. However there probably may not be much of difference in viewing operational audit as a review and appraisal of operations of an organisation carried on by a competent independent person. The question of competence is implicit in any auditing situation; unless one is well-conversant with the philosophy, techniques and procedures of audit, one cannot do justice to the work of audit. Similarly auditing whether carried on by an internal staff or by an external person, should necessarily be an independent activity to maintain its objectivity and usefulness. According to Cadmus "Operational Auditing is not different from internal auditing, it is merely an extension of internal auditing into operational areas. And it is characterised in both financial and operational areas - by the auditor's approach and state of mind". The difference in the approach of both these audits is illustrated below:

Perception - Traditionally, internal auditors have been engaged in a sort of protective function, deriving their authority from the management. They view and examine internal controls in the financial and accounting areas to ensure that possibilities of loss, wastage and fraud are not there; they check the accounting books and records to see, whether the internal checks are properly working and the resulting accounting data are reliable. They also look into the aspect of safety of the assets and properties of the company. To a traditional internal auditor, a loss of ₹ 1,000 caused by a wrong totalling of invoice is important and this is that he looks for. But for an auditor engaged in the review of operations, carrying out of a proper maintenance programme of the machines is of greater importance because considerable production loss due to machine breaks down can thus be prevented. In both the cases, the auditor's objective is to see that the business and its profitability do not suffer from avoidable loss, but, nevertheless, there is a distinct difference in approach.

Take another instance - when the auditor looks into the vouchers to see whether they corroborate the entries in the cash book or physically examines the cash in hand he is doing his traditional protective function. The moment he concerns himself to see whether customers' complaints are duly attended to or whether cash balance is excessive to the need, he comes to the operational field.

It should not be assumed, that, since an operational auditor is concerned with the audit of operations and review of operating conditions, he is not concerned with the financial aspects of

¹ Darwin J. Casler and James R. Crockett, operational Auditing. An Introduction (Altamonte Springs, FL: The Institute of Internal Auditors, Inc., 1982). P 14.

transaction and controls. A point has already been made that the special expertise acquired by the operational auditor, that enables him to view the controls and operations from the management point of view, can be carried back to his review of the financial areas. In the matter of cash transactions, the operational auditor will look into such aspects as the quantum of cash in hand (by relating it to the requirement of cash to be held) carried generally or the use of cash not immediately required. Also he will review the operational control on cash to determine whether maximum possible protection has been given to cash. Similarly, in the audit of stocks, he would be interested in such matters as reorder policy, obsolescence policy and the overall inventory management policy. In pure administrative areas on stock, he will see whether adequate security and insurance arrangements exist for protection of stocks.

Issues - The basic difference that exists in conceptualisation of the technique of operational auditing is in the auditor's role in recommending corrections or in installing systems and controls. According to Lindberg and Cohn, such a situation would be in conflict with the role of operational auditor. One cannot objectively review an operation, control or a system recommended by him and in fact this should be left to be dealt by methods and procedures people. In this connection, the views of the Institute of Internal Auditors, in the context of internal audit are relevant. According to that Institute, "the internal auditor should be free to review and appraise policies, plans, procedures and records; but his review and appraisal does not in any way relieve other persons in the organisation of the responsibilities assigned to them. The Institute has further held that "since complete objectivity is essential to the audit function, internal auditors should not develop and install procedures and systems, prepare records or engage in any other activity which they normally would be expected to review and appraise". It may be remembered that the definition of internal auditing given by this Institute is same as operational auditing. Therefore, the views quoted above equally apply to operational audit *per se* and Lindberg and Cohn's views are not different from these in this respect. Also there does not appear to be much conflict of views in understanding operational auditing as an extension of internal auditing with a definite work content which stretches beyond the traditional field of internal auditors i.e. financial accounting. However, a further distinction should be observed between traditional internal auditing and operational auditing - this lies in the attitude and approach to the whole auditing proposition. Every aspect of operational auditing programme should be geared to management policies, management objectives and management goals.

Objectives - The main objective of operational auditing is to verify the fulfilment of plans and sound business requirements as also to focus on objectives and their achievement objectives; the operational auditor should not only have a proper business sense, he should also be equipped with a thorough knowledge of policies, procedures, systems and controls, he should be intimately familiar with the business, its nature and problems and prospects and its environment. Above all, his mind should be open and active so as to be able to perceive problems and prospects and grasp technical matters. In carrying out his work probably at every step he will have to exercise judgement to evaluate evidence in connection with the situations and issues; he will have to get the assistance of norms and standards in every operating field to be able to objectively judge a situation. The norms and standards should be such as are generally acceptable or developed by the company itself.

19.34 Advanced Auditing and Professional Ethics

Performance yardsticks can be found in the management objectives, goals and plans, budgets, records of past performance, policies and procedures. Industry standards can be obtained from the statistics provided by industry, associations and government sources. It should be appreciated that the standards may be relative depending upon the situation and circumstances; the operational auditor may have to apply them with suitable adjustments. For example, the standards relating to objectives for a government company are quite different from those of a private sector company. Similarly standards of performance of a well equipped company which also adequately looks after the well-being of employees may be significantly different from a company which offers scanty welfare facilities or is ill-equipped. Today, however, the concept of modern internal auditing suggests that there is no difference in internal and operational auditing. In fact, the scope of internal auditing is broad enough to embrace the areas covered by operational auditing as well. The modern internal auditing performs both protective as well as constructive functions.

19.8.2 Qualities of Operational Auditor

The operational auditor should possess some very essential personal qualities to be effective in his work. In areas beyond accounting and finance, his knowledge ordinarily would be rather scanty and this is a reason which should make him even more inquisitive. He should ask the who, why, how of everything. He should try to visualise whether simpler alternative means are available to do a particular work. He should try to see every thing as to whether that properly fits in the business frame and organisational policy. He should be persistent and should possess an attitude of skepticism. He should not give up or feel satisfied easily. He should imbibe a constructive approach rather than a fault-finding approach and should give a feeling that his efforts are to help attaining an improved operation and not merely fault finding. He should consider a fault or mistake found in the course of audit more as a guide to effect improvement than to treat the fault as a sort of crime. If the auditor succeeds in giving a feeling of help and assistance through constructive criticism, he will be able to obtain co-operation of the persons who are involved in the operations. This will itself be a tremendous achievement of the operational auditor. He should try to develop a team comprised of people of different backgrounds. Involvement of technical people in operational auditing is generally helpful.

19.8.3 Why Operational Audit?

The need for operational auditing has arisen due to the inadequacy of traditional sources of information for an effective management of the company where the management is at a distance from actual operations due to layers of delegation of responsibility, separating it from actualities in the organisation. Specifically, operational auditing arose from the need of managers responsible for areas beyond their direct observation to be fully, objectively and currently informed about conditions in the units under control.

Operational audit is considered as a specialised management information tool to fill the void that conventional information sources fail to fill. Conventional sources of management information are departmental managers, routine performance report, internal audit reports, and periodic special investigation and survey. These conventional sources fail to provide information for the best direction of the departments all of whose activities do not come under direct observation of managers. The shortcomings of these sources can be stated as under:

- (i) Executives and managers are too preoccupied with implementation of plans and achieving of targets. They are left with very little time to collect information and locate problems. They may come across problems that have come to surface but they are hardly aware of problems that are brewing and potential.
- (ii) Managers or their aides are generally relied upon for transmitting information than for booking for information or for analysing situations.
- (iii) The information that is transmitted by managers is not necessarily objective - often it may be biased for various reasons.
- (iv) Conventional internal audit reports are often routine and mechanical in character and have a definite leaning towards accounting and financial information. They are also historical in nature.
- (v) Other performance reports contained in the annual audited accounts and the routine reports prepared by the operating departments have their own limitations. The annual audited accounts are good insofar as an overall evaluation is concerned in monetary terms. But they may not bring to light specific problems in different operational areas so readily. Sales may be shown at a higher monetary value compared to the previous year and this may apparently suggest that the functioning of the sales department is satisfactory. But this may have been caused by a number of factors in spite of a really bad performance on the sales front. This fact may not be readily known unless one cares to analyse the sales data by reference to notes and explanations to the accounts and other related accounting data. Even a study of this nature may not fully reveal the weakness. It is quite possible that the established market for sales has been lost partly while some fortuitous sales have compensated the loss. The other routine departmental reports definitely serve a purpose of more or less currently informing the management about the departmental performance. But the reports are not always objective and have a definite tendency to colour the departmental performance favourably. For example, the routine weekly production report may include production 'that is subsequently rejected by the quality control staff, or to avoid showing a bad production performance; even the partly produced goods may also be included. Remember, all this can happen in spite of specific management instructions about the basis on which the production report is to be made out.

Another important point may be noticed in the matter of routine departmental reports. The despatch section, to show a good performance, may show goods handed over to the transport section which, even within its knowledge, may not be really despatched within the next several days, because of accumulation of goods at the transport shed or because of non-availability of wagons or shipping space. It may be appreciated that those reports may or may not contain a falsehood; but, definitely, they do not show performance in the proper light in relation to allied activities and thereby the problems of one area are merely shifted to the next. They fail to provide insight into particular problems that may be growing elsewhere in the organisation. The busy management people, who can afford time only to glance over the performance reports, cannot be expected to make an integrated reading of several reports or to undertake an analysis of such reports. What they need is reliable,

19.36 Advanced Auditing and Professional Ethics

unmanipulated and objective report which they would like to look into to understand the situation.

- (vi) Operations of controls in a satisfactory manner cannot be relied upon to bring to light the environmental conditions. Controls are specific and their satisfactory operation is related to the specific situation under control. Also monitoring of the breakdown or non-operation of controls is a periodic phenomenon.
- (vii) Surveys and special investigations no doubt are very useful but these are at the best occasional in character. Also, they are costly, time consuming and keep the departmental key personnel busy during the period they are on. They are undertaken mostly to find causes of certain state of affairs or to fix responsibility for certain undesirable happenings. These are basically an attempt to carry out a post-mortem rather than to enlighten the management about the ways on improvement or for better performance or to give a signal for dangers and disasters to come.

19.8.4 Type of Operational Audits²

There are three broad categories of operational auditors: functional, organizational, and special assignments. In case, part of the audit is likely to concern evaluating internal controls for efficiency and effectiveness.

Functional Audits - Functions are a means of categorizing the activities of a business, such as the billing function or production function. There are many different ways to categorize and subdivide functions. For example, there is an accounting function, but there are also cash disbursements, cash receipt, and payroll disbursement functions. There is a payroll function, but there are also hiring, timekeeping, and payroll disbursement functions. As the name implies, a functional audit deals with one or more functions in an organization. It could concern, for example, the payroll function for a division or for the company as a whole.

A functional audit has the advantage of permitting specialization by auditors. Certain auditors within an internal audit staff can develop considerable expertise in an area, such as production engineering. They can more efficiently spend all their time auditing in that area. A disadvantage of functional auditing is the failure to evaluate interrelated functions. The production engineering function interacts with manufacturing and other functions in an organization.

Organizational Audits - An operational audit of an organization deals with an entire organizational units, such as a department, branch, or subsidiary. An organizational audit emphasizes how efficiently and effectively functions interact. The plan of organization and the methods to coordinate activities are especially important in this type of audit.

Special Assignments - In operational auditing, special assignments arise at the request of management. There are a wide variety of such audits. Examples include determining the cause of an ineffective IT system, investigating the possibility of fraud in a division, and making recommendations for reducing the cost of a manufactured product.

² Auditing and Assurance Services by Arens, Elder & Beasley; prentice hall publication, 2003 edition, page 740.

19.8.5 Objectives of Operational Audit

Like internal auditing, the scope and quality of operational auditing is predominantly dependent upon management attitudes. An open minded management with broad vision can appreciate the need of operational auditing and to give it the necessary freedom and sanction to perform what it is capable of performing. Also, the qualities and the sense of perspectives of the operational auditor can mould operational audit in the right shape. Without a combination of these two, operational auditing may not be able to show its distinctively and advantages to the organisation. Therefore, there is a possibility of operational auditing having different objectives to fulfil in different organisations. Generally, operational audit objectives include:

- (i) Appraisal of controls,
- (ii) Evaluation of performance,
- (iii) Appraisal of objectives and plans, and
- (iv) Appraisal of organisational structure.

The most significant gain an organisation can derive from operational auditing is probably in the area of appraisal of controls. Internal controls, because of their unobtrusive omnipresence in the organisation, provide the essential hinges to ensure proper performance in each functional or organisational area for accomplishing the desired organisational objective. If the hinge of a machine is weak or broken however costly or good that machine may be, it will not perform with any degree of efficiency. Similarly, if controls are weak or breaking down, however well equipped or well-manned the organisation may be, it will fail to operate effectively.

In the task of performance evaluation, an operational auditor is heavily dependent upon availability of acceptable standards. Apart from this, the operational auditor cannot be expected to possess technical background in so many diverse technical fields obtaining even in one enterprise. Even when examining or appraising performance or reports of performance, the operational auditor's mind is invariably fixed on control aspects. For example when he walks through the factory floor, amongst others, he observes whether machines are idle or workmen not present in the post assigned to them or the accumulation of stores on the floors All these have a bearing on the operation of controls. He can then go into the reasons of the failure of controls and bring these to the attention of the management for verification in the interest of proper working in future. He reviews internal control reports to ascertain whether they bring the performance, qualitatively and quantitatively to the notice of the management; also whether the organisation's policies and plans are being carried out.

In performance appraisal, the operational auditor is basically concerned not so much with how well technically the operations are going on, but with accumulating information and evidence to measure the effectiveness, efficiency and economy with which the operations are being carried on. He prepares his evaluation programme in such a manner that it will show how well or how poorly the department has fared by reference to applicable standards, procedures, rules, policies and plans. The principal basis of performance evaluation can be productivity, personnel, workload, cost and quality.

19.38 Advanced Auditing and Professional Ethics

In the area of *productivity*, the operational auditor can undertake such tests as input-output ratios for materials and labour in quantitative terms.

In the sphere of physical production the auditor will, in most cases, get the advantage of having some acceptable norms or standards. For other spheres, such measures as man-hours per customer or man- hours per application processed can be adopted. What measure is appropriate on what occasion is a matter to be judged by the auditor and he can evaluate performance by reference to the selected measure. Apart from these, the auditor has to consider the following broader aspects also in performance evaluation:

- (i) How does productivity compare with the prior period?
- (ii) At what level should productivity be to meet the target?
- (iii) What are the factors affecting productivity?
- (iv) Is the level of production commensurate with the flow of orders received?
- (v) Is unsatisfactory production performance the result of :
 - (a) non-availability of raw materials?
 - (b) inadequate or unskilled personnel?
 - (c) lack of proper supervision?
 - (d) lack of proper machine maintenance?
 - (e) strikes and/or lockout?
 - (f) problem of power supply?
 - (g) non-availability of essential machine spares?
 - (h) poor quality of raw materials?
 - (i) other causes like, fire, earthquake?
 - (j) lack of proper quality control?
- (vi) Can the work methods be improved?
- (vii) Are the machines utilised to their capacity?
- (viii) Can the work be further mechanised with advantage?

Personnel is perhaps the most important factor in performance evaluation. Unless the organisation has a sound personnel policy consistent with its requirements, the facilities, materials and equipment that are available in the organisation may not be utilised properly to obtain optimum performance. The operational auditor in his appraisal of personnel can make use of the quantitative data readily available to him like number of employees, personnel turnover, total regular and overtime hours worked ratio of direct employees to indirect employees and so on. He should also take into account the undernoted broad aspects involving personnel:

- (i) Whether the organisation has properly qualified and experienced personnel for the various levels of work?
- (ii) Is the number of people employed at various work centres adequate, excessive or inadequate?
- (iii) Does the organisation provide facilities for staff training so that employees and workers keep themselves abreast of current techniques and practices?
- (iii) Is the organisation unable to obtain staff possessing requisite qualifications?
- (iv) If yes, what are the reasons:
 - (a) Low wages?
 - (b) Bad working conditions?
 - (c) Management attitude?
 - (d) Status of the organisation in the industry?
- (v) Is the rate of staff turnover high? If yes, what are the causes?
- (vi) Is the ratio of overtime to regular man-hours excessive or normal?
- (vii) Why is the need for overtime?
- (viii) If the ratio of overtime is high, what is being done to reduce it?

Work load measurement can be another significant area where operational auditor can be of use because of ready availability of quantitative data. There can be measures like volume or quantity of work handled and/or performed volume of new work, backlog of work, etc. The propositions that would usually arise in this area may be as follows:

- (i) Is there any backlog of work? If yes, is it due to increasing volume of new work on the existing work itself is heavy by reference to the staff and facilities available?
- (ii) Is the new work volume increasing or decreasing?
- (iii) How to meet the increasing work load? Would it be worthwhile to employ more staff or get the work done by overtime?
- (iv) Is the current work done in time?
- (v) Is the backlog increasing or decreasing?

Quality of work is a matter which is not directly amenable to operational audit scrutiny. Nevertheless, it is an important aspect of performance of an organisation. Therefore, some quantitative measures are often devised to judge the quality of work. These can be number of customers' complaints, rejections by quality control department, number of workers' grievances, number of errors in invoicing or recording transactions, quantity of scrap and wastages, etc. The auditor may comprehend the quality aspect by reference to certain objective questions like:

- (i) Is the present work quality satisfactory in so far as customers, suppliers, bankers, workers and the quality standards followed are concerned?

19.40 Advanced Auditing and Professional Ethics

- (ii) If not, what are the factors that account for unsatisfactory quality? Is it the workload, lack of equipment, bad quality of raw materials or other materials in use, unsatisfactory working conditions giving rise to workers' grievances or the methods?
- (iii) Is the quality of work getting better or worse?
- (iv) Is the quality of work responsive to training imparted to workers?
- (v) How can the quality be improved whether by changing the work methods or boosting the workers' morale by adding more technical facilities, by improving supervision or by enforcing stricter control on quality of materials that go into the work?

Cost is perhaps the most cogent indicator of performance. Costs are classified and recorded for a proper assimilation of their implications on performance. The operational auditor may be concerned with such matters as:

- (i) Is the cost break-up realistic so as to serve as a basis for performance evaluation?
- (ii) Are the costs collected under various heads and sub-heads showing an increasing trend per unit of output?
- (iii) Do costs conform to forecasts? If not on what count?
- (iv) Are the costs of various departments or divisions justified?
- (v) Are all the activities necessary?
- (vi) Would it be better if the company buys some of the components or output from outside instead of producing them?
- (vii) Are the people cost conscious?

Though controversial, a school of thought holds that operational auditing can be stretched to evaluate management objectives and plans. This view stems from the fact that everything in an organisation is the product of basic plans and objectives set by the management. If the management policy favours installation of controls or specifies the extent of controls whether satisfactory or not, controls would have to stay within the policy frame. Therefore, the basic thing that should be evaluated is management policies, plans and objectives. However, it should be noted that there exists considerable opposition to the aforesaid view. The other viewpoint holds that operational auditing by its nature should be confined to operations and related controls. The aim of operational auditing is to appraise operations and controls and their adherence to prescribed or laid-down policies and not to go into the question of appropriateness of plans and objectives. However, the operational auditor may look into the aspects like whether objectives are clearly spelt out and properly communicated to the personnel responsible for implementation and whether the personnel have understood the objectives in the sense meant by the management. Also, he can take note of any apparent conflict in the objectives for its effect on operations.

Organisational structure provides the line of relationships and delegation of authority and tasks. This is an important element of the internal control design. Therefore, this is also another important area for appraisal by the operational auditor. In evaluating organisational structure,

the aspects that may be considered by the operational auditor may be as follows:

- (i) Is the organisational structure in conformity with management objectives?
- (ii) Whether the organisational structure is drawn up on the basis of matching of responsibility and authority?
- (iii) Whether the line of responsibility from the top to the bottom is clearly discernible from the structure?
- (iv) Whether the delegation of responsibility and authority at each stage is clear and overlapping are avoided?

19.9 Review of Systems and Procedures

19.9.1 Systems

The word 'system' is commonly defined as "a set of objects, together with relationships between the objects and their attributes, connected or related to each other and to their environment in such a manner as to form an entire or integral whole." The definition can be better understood with reference to a complex biological system of human beings which consists of various sub-systems, e.g. nervous system, digestive system, respiratory system, blood circulation system, reproductive system, etc. Each sub-system in turn, may be treated as a complete system in itself. For instance, digestive system consists of various organs, say stomach, esophagus, intestines, etc. which are interdependent and interrelated, so that failure of any part will lead to failure of the digestive system. Thus, the essence of a system lies in the inter-relationship and inter-dependence of various parts and processes. Unrelated and independent parts can never constitute a system. Similarly, it can be said that a business organisation also does not operate in a vacuum. Its various operations - manufacturing, purchasing, marketing, accounting and finance, research and development, personnel - comprise a system. All of these functional departments are combined into a complex unified, whole. The overall system i.e. a business organisation is made up of many interacting and related sub-systems, e.g. the various functional departments. These operation have to take into account and needs and operating modes of all the people, enterprises and governments that make up the environments in which it operates. To accomplish an objective by means of a system entails three main steps:

1. Design a system to achieve the main objectives.
2. Operate the system.
3. Check that the system is operating and producing as intended by its design, i.e. that the stated objective is being achieved.

19.9.2 Procedures

Procedures are the means by which policies are implemented. Most often, procedures entail the use of documents in accordance with precise instructions or methods to be used. At lower levels

19.42 Advanced Auditing and Professional Ethics

in an organisation, formalised and authorised procedures become more numerous and of specific nature because of following factors:

1. There exists economic advantage of specifying precise uniform action to be taken by a large number of people and for repetitive jobs.
2. The need for more precise control over employees' activities which can only be achieved if there are detailed prescriptions of how things are to be done.
3. The element of discretion has to be reduced as far as possible.

Standard procedures go a long way towards making sure that pertinent information flows to the people who need it and that each person understands what he is to do with it. In addition, standard procedures, when expressive of policy guidelines established by management, facilitate control of business operations. The purpose of establishing procedures is also to ensure consistent interpretation of policies. That eliminates the need to make the same decisions over and over and leaves more time for creative planning, thoughtful analysis and productive effort.

19.9.3 Review of Systems and Procedures

The purpose of systems and procedures is to help management in the planning and accomplishment of organisational purpose, in communicating their requirements, and in assisting the personnel in carrying out the requirements. The review of systems and procedures is to improve the methods, to get away from the old ways and traditional routines and to reduce the cost in completing and processing the paper work - eliminating waste, duplication and inefficiencies. In reviewing any system or procedure, the management auditor must concern himself with its purpose as well as its design and then he must decide on its merits as the best serving the interests of the enterprise. A poor system or procedure may prevent the carrying out of the policy for which it was intended. A system may have outgrown its usefulness. The end result of a system or a procedure may be loose and may require improvement. In the study of the systems and procedural functions, the auditor should ask himself:

1. Is the function properly located in the organisation?
2. Do the staff personnel have the necessary training and experience to perform the work?
3. Has a definite programme been established and has been taken for its attentive accomplishment?
